	2020-04-27 12:46:30	Western Cape		No I do not	Have we learned NOTHING in the last few weeks! There is a delicate balance in nature. Has the lesson from Wuhan evaporated? Part of the duty of a member of parliament is to apply your brain to matters at hand. This is an example of lazy thinking, taking the easy way out! Are pockets still being lined? It is beyond comprehension that hunting has been restored as a normal economic activity, not to mention the number of endangered and exotic animals on the list. This points to greed...who benefits? A small group of well connected people? This meat is certainly NOT for the general consumption of the public. How will decimating our natural resources and disrupting the wild life balance benefit the South African public or our natural habitat ? Just when I was beginning to think that at last we have intellectual capacity in government on individual demonstrates the contrary.	Annalise
	2020-04-27 11:26:59	Western Cape		No I do not	One has to question the credentials of the Minister who would propose such an ill conceived proposal. This list includes any wild animals that are endangered. Is this proposal intended to farm (breed in captivity) these wild animals for human consumption or live export. One would expect the Government to be moving away from these dangerous concepts that all animals are for or consumption or misuse. Please we expect better from our leaders. if the Minister does not understand the role expected of this portfolio they should be instantly recalled. Have we not learned anything from events of this year.	Lynette
	2020-04-27 11:24:50	Western Cape		No I do not	all you are going to do is legalize poaching and wipe out what little of our wild animals still exist . take our wild animals out of the country (or world) and you will destroy much of tourism . When i read what you are planning to allow on your list i was horrified and I cannot believe that any person with the slightest bit of intelligence would even consider allowing the wholesale killing of those animals unless there is some hidden financial reward for someones back pocket .	patrick
	2020-04-27 11:21:49	Western Cape		No I do not	If we have learned anything from the coronavirus it is to redefine how we treat animals. All animals have a right to their planet and domestic animals should be treated with respect. Killing endangered species should NOT be allowed in any circumstances.	Sharon

	2020-04-27 11:12:08	Western Cape		No I do not	This is barbaric! How can we okay the slaughtering and consumption of meat from wild life (see what happened in Wuhan??) and especially from endangered species. Rhinosand giraffes???? Shocking.	Terri
	2020-04-27 11:12:08	Western Cape		No I do not	This is barbaric! How can we okay the slaughtering and consumption of meat from wild life (see what happened in Wuhan??) and especially from endangered species. Rhinosand giraffes???? Shocking.	Terri

	2020-04-27 11:09:59	Western Cape		No I do not	Dear Minister, I beg you not to adopt this revised list of animals that could be slaughtered. The current virus pandemic should be viewed as the sort of thing that can happen when we move beyond the domestic animals which have sustained us so well for centuries. I thank you for inviting this participation and urge you to prayerfully consider this matter.	Bonnie
	2020-04-27 11:09:17	Western Cape		No I do not	If this draft amendment is passed it will signal the end of all our game parks and you can say goodbye to nature conservation in South Africa.	glenn
	2020-04-27 11:08:45	Western Cape		No I do not	It is heartbreaking to see beautiful animals being slaughtered for its horn. The cows, chickens and sheep are enough! why must we empty the earth of all animals?	Astrid
	2020-04-27 11:08:31	Western Cape		No I do not	It is heartbreaking to see beautiful animals being slaughtered for its horn. The cows, chickens and sheep are enough! why must we empty the earth of all animals?	Astrid
	2020-04-27 11:05:44	Western Cape		No I do not	Wild life in any form should be excluded. Period	Dirk
	2020-04-27 11:02:13	Western Cape		No I do not		Claire

	2020-04-27 10:58:51	Western Cape		No I do not	Until we understand the origin of Covid-19 we should not be adding more animals to the meat safety act. Zoonosis is the cause of many diseases jumping species e.g. from animals to humans and until these animals are cleared, they should certainly not be on any menu. There is also a large portion of these animals that should be protected, rather than slaughtered for meat consumption. Private, national game reserves and farmers should held more responsible with breading programs to avoid over population and culling. Trophy hunting of any animals should be illegal, it is a barbaric sport that serve no purpose.	Tharien
	2020-04-27 10:54:35	Western Cape		No I do not		Linda
	2020-04-27 10:53:11	Western Cape		No I do not	This is barbaric - wildlife should be treasured and conserved, not threatened even more than they already are.	Jeannie
	2020-04-27 10:50:30	Western Cape		No I do not	You may not agree that animal lives are as important as human lives, but you have to acknowledge that they are sentient; they feel happiness, pain, suffering, depression etc. They may not have the intellectual capacity we do as humans, but they excel at other things we do not. Just because we can hunt and eat them doesn't give us the right to. It has also been proven (from the Dietetic Association) that humans can get nutritionally get everything they need from a plant based diet. It is therefore only because of taste that we enjoy eating animals. That means that it is a form of pleasure for us and not a necessity. Is it therefore OK to support dog fights as they are also a form of pleasure to some? We already massacre billions of farmed animals a year. We cannot threaten any more animals with our unimaginable cruelty. Leave these animals ALONE. They do what they do for necessity. Humans hunt them for pleasure. It's simply not justifiable...	Vicente
	2020-04-27 10:35:43	Western Cape		No I do not		Jörn
	2020-04-27 10:34:43	Western Cape		No I do not	I oppose all violence and killing of our wild animals. This proposal is in direct contradiction towards the natural balance of the environment. South Africa needs to restore our economy through alignment with nature and not against it.	Adele
	2020-04-27 10:29:58	Western Cape		No I do not	Under no circumstances whatsoever should endangered wildlife be permitted to be slaughtered, shot or eaten. Meat safety is critical however only for species that are bred for this purpose, or species which have a population excess. Take rhinoceros off the list!	Rosemary
	2020-04-27 10:25:31	Western Cape		No I do not	The ANC alludes to the fact that SA if like a first world country, then try to introduce barbaric legislation, not even worthy of a 3rd world country. Politician hoping to muck a quick $$ of the back of the country's wildlife, and major tourist attraction We have no need to change the law on animal classification except if the ANC want to please their Chinese friends who will kill and eat anything that has a heart beat.	Martin
	2020-04-27 10:22:17	Western Cape		No I do not	I say NO! To extend the list to include such a vast number of different species of our wildlife is completely unacceptable and disgraceful on the part of our government. Our wildlife is our and the rest of Africa's heritage, it is what makes our land beautiful and unique. Aren't most of these species already under threat of extinction as it is? Surely with the recent events of the outbreak of Covid19 in China it is preposterous and criminal to think this is acceptable!	Lana

	2020-04-27 10:16:38	Western Cape		No I do not	We should not eat wild animals. Covid-19, Mers, SARS, Aids, Ebola etc should teach us that. Do we think we in SA are so special we can avoid these contagions. Most human diseases are zoonic.	Don

	2020-04-27 09:55:34	Western Cape		No I do not	Presumably there is anticipated farming of current animals on endangered list e..g. rhino. However, it still seems very unwise to list such animals prematurely. Rather one can amend the list when / if farming of endangered animals is written into law	Renee
	2020-04-27 09:54:16	Western Cape		No I do not	Government is destroying and raping the resources of our country for their own gain. These people are not representing the people of the country but are representing them selves and their own selfish aspirations.	Andre

	2020-04-27 09:14:44	Western Cape		No I do not	Leave our wildlife. Many of these animals are endangered. Stop destroying. The animals belong. To every person on this planet, you are killing nature for greed.	Wendy

	2020-04-27 08:53:31	Western Cape		No I do not	NO!!!! Leave our wildlife alone. Do you realise what happened in China!!! We want nothing to do with their ways and methods, it is EVIL. It is inhumane. Wildlife should not be on the list to consume as food. Let the farmers produce food, call off those who keep murdering them too!!! It is happening, only government denies it.	Cathryn

	2020-04-27 08:42:18	Western Cape		No I do not	All endangered wildlife should be protected, farmed antelope such as springbok, kudu, impala etc can be utilised but all should be done in a responsible way. Clearly there is not enough officers to ensure that other wildlife can be farmed responsibly.	stephen

	2020-04-27 08:31:29	Western Cape		No I do not	How can you ever consider this?! Do you want out endangered species lost forever? Do you want to not leave any heritage for our children and grandchildren? Even China is starting to ban the trade and consumption of wild and endangered species. If you haven't learned anything with Covid-19 and you have no regard for our wildlife, the beauty it holds and the fact that you're playing with the lives of other living beings, then there's no hope for you.	Heinrich
	2020-04-27 08:24:50	Western Cape		No I do not	We have spent YEARS and YEARS trying to save the rhino and elephants and now this dimwit wants to allow the export and consumption of them amongst others? So according to this list just about any animal is ripe for the picking. This is insane and precisely how animals become extinct. This woman is nuts and shouldn't be allowed to run an ant farm let alone a government department of any sort. I most definitely do not support this bill in any way whatsoever.	Bronwyn
	2020-04-27 08:20:12	Western Cape		No I do not	We are supposed to save the rhino, not eat them! Horses have personalities! If you ever had a horse for a friend, you would never eat them! Have a heart! You will be exposing our wildlife and horses to more abuse and theft.	Maryke

	2020-04-27 08:02:44	Western Cape		No I do not	The World needs to move away from consuming meat. All this does is increase the consumption. The list should be shortened to include only the most environmentally friendly of farmed animals. I would like to hear the specific reasoning behind why these animals should be added to the list - smacks of a hidden agenda.	Sean
	2020-04-27 07:49:46	Western Cape		No I do not	Remove all endangered species from the list and add no animals to be transported by sea	Lyn

	2020-04-27 07:17:01	Western Cape		No I do not	Personally I draw the line at Ostrich. Why on earth would we want to eat animals that are virtually extinct Isn't that what caused the dilemma we're in right now!	Adri
	2020-04-27 07:16:52	Western Cape		No I do not	Don't I minister now about heritage. What are the nature reserves their for, to protect our heritage which is animals. Why do you think we have covid-19,because of eating meat which isn't for human consumption. Each animal has an reason and part to play in the world no human put the animals here is the lord who did, so not eat or slaughter that which isn't meant to be eaten. We will only realize the value of these animals once it's too late. For example, informal settlements see the problems in winter weather all shacks are flooded because the ground isn't suitable for construction yet shacks get erected. DO NOT LET THIS HAPPEN. HELL NO.	Leon

	2020-04-27 06:38:21	Western Cape		No I do not	Due to Covid -19 China has implemented bans on wildlife markets. Why would South Africa now be trying to pass this amendment to its meat safety act? ! It seems completely contrary to the concerns of these times. What is the agenda behind this? I don't support this at all. Sad to see it .	gwen

	2020-04-27 06:29:16	Western Cape		No I do not	For me I am shocked to see Porcupines, Rhino, Hippo, Giraffe, Elephants, Crocodiles, Horses and Mules. How far does humans go to make money by sacrificing animals that are not only aesthetic and majestic in nature but also a valuable part of the biodiversity and eco -chain . Not to mention on the endangered species list such as the Rhino - This bill will encourage the already huge issue of poaching. Have we learnt nothing from this virus - hands off animals! Your list is already extensive. Its time to conserve, respect and preserve. Thank you,	Rochelle

	2020-04-27 05:22:31	Western Cape		No I do not	The Animal's are every South Africans heritage and should be preserved and protected. Not slaughtered for the greedy Chinese markets. We have a duty to our forefathers , ourselves and future South Africans to protect these animals. I am shocked to see animals that are close to extinction on this list the minister has put together. 	2020-04-27 04:00:12	Western Cape		No I do not	Several of the animals listed are highly endangered. If you allow the slaughter of these animals for the consumption of meat, we are effectively declaring the extinction of the species by Government	Mariatha
	2020-04-27 03:51:06	Western Cape		No I do not	The latest pandemic is all the reason needed as proof that we should be taking more animals OFF the old list, not adding them on.	Rehana
	2020-04-27 03:40:39	Western Cape		No I do not	Two sets of criteria: Practical and moral - 1. we are the custodians of our environment. Apart from being an enormous natural resource which we should treasure for our country's economic good, (tourism), 2. we have a moral responsibility to respect all life and bio diversity and not just focus on measures to ensure that humanity survive the covid19 virus. This is not the way to deal with short term hunger, but rather BREED for the pot involving planning, labour and our care to sustain all life.	Evelyn

	2020-04-27 02:24:43	Western Cape		No I do not	This is a retrogressive step. We will import meat from wild animals if other countries and become like China. I would prefer that only meat from animals bred for the specific use as food to be on the list Rhino & elephants and other animals threatened with extinction should specifically removed from the list.	Ann
	2020-04-27 00:56:19	Western Cape		No I do not	Absolutely NOT !! What is this WORLD COMING TO ?? PLEASE RECONSIDER ??	Robert

	2020-04-27 00:35:16	Western Cape		No I do not	I'm a bit blown away at how this list has extended from the old to the new. At first, to see rhino, giraffe, and hippo on there is a bit shocking. BUT, I would really want to understand the context of it. I'm personally not a big fan of letting "death be a waste". In other words, if any animal has already been killed, either illegally or legally, why not process their meat, sell it, and at least use some of the profit to support the protection of them. Example rhino. What I DO NOT AGREE WITH is that by default, allowing an animal on this list means that it can be hunted and killed with intention of consumption. I DO NOT agree that these protected and unique species become commercial trade. There are MORE THAN ENOUGH animals on the list that can be consumed. There is NO need to want to dip into our very unique animal species. On top of that, I agree with previous statements about "have we learnt NOTHING from covid-19". Stick to the meat we know! We are NOT cavemen anymore. We do not need to be just hunting and killing and eating whatever we come across. We have more than enough choice already available to us. As humans, we have damaged enough of the natural order of things (and continue to by trying to control nature following it's course, even with humans)... Choose wisely...	Nicki
	2020-04-27 00:32:53	Western Cape		No I do not	I do not support the slauter of endangered species. Only commercially farmed animals should be slaughtered.	Johannes
	2020-04-27 00:28:39	Western Cape		No I do not	What a disgrace that other countries have signed agreements to stop the culling of wild life animals but our own country agrees for this horrible thing to go on and now even a longer list. No wonder God is allowing this virus outbreak. STOP STOP STOP this raping of our beautiful planet and start reading your Bibles.	Christine

	2020-04-26 23:17:46	Western Cape		No I do not	It makes no sense. We are ok with the meat we already recieve. Or is this resource running out and we looking for alternatives as food. These animals are to be looked after for the future generations.	Basil

	2020-04-26 22:55:31	Western Cape		No I do not	You want to add to the list of non- farmed animals humans can profit from, without any measures of how they should be treated? That i could not agree to. But worse, much worse, you want citizens to allow you, and i quote you, to do this: "This Act also applies to all other species of animals not mentioned above including birds, fish and reptiles that may be slaughtered as food for human and animal consumption. This schedule includes animals that may be listed as threatened species in accordance with conservation provisions and therefore their slaughter for human and animal consumption must be in line with the relevant conservation provisions." This is appalling, beyond belief. This is exactly the sort of legislation that bred Covid 19 virus in China, and similar in other spots around the world where human greed was allowed.	Peter

	2020-04-26 22:35:45	Western Cape		No I do not	The act does not take into account small scale farmers who even at great lengths have setup and registered abattoirs. However at their scale cannot afford to have an independent body inspect their produce at R10 000 a month for 4 processing days.	Alex

	2020-04-26 22:17:42	Western Cape		No I do not	Wildlife is endangered, and this is fueling the fire that is already burning regarding the illegal trade and consumption in Asia and the ridiculous belief in medicinal value of the animals. There is also the animal cruelty aspect of this.	Mandy
	2020-04-26 22:17:37	Western Cape		No I do not	We should not be killing and eating animals. They are sentient beings and feel stress, terror and pain. Also the exporting of animals must be banned. Barbaric to consider consumption of wild animals.	Trish

	2020-04-26 22:11:10	Western Cape		No I do not	Have the minister and her advisors gone INSANE?! Absolutely, unequivocally NO NO NO! To have so many already endangered wildlife species on this list is UNTENABLE. The fight against poachers and to preserve our precious, national animals has already cost millions and cost LIVES - now it's a free for all? Have you learned NOTHING from the Covid-19 outbreak? Nature herself is screaming at human beings to stop and you want to add to the dangers as well? There is no WAY I or my family would ever consume any of the meat of these wildlife species. There has to be money in it for the proponents of this crazy amendment. More selfish self-serving corruption on the part of the very civil SERVANTS that are meant to SAFEGUARD our national treasures and US and now the defenceless wildlife is paying the price? How long before WE start paying the price too - another virus, another terrible outbreak? You should be ASHAMED Minister! I am so incensed I could fill the entire page here with objections. 	2020-04-26 17:43:11	Western Cape		No I do not	First of all, factory farming and slaughtering animals of ANY kind is cruel and barbaric, and government should be promoting the move to a PLANT-BASED diet, and not adding more animals to the list which may be murdered. Plant-based eating is not only far healthier, but also far environmentally friendly, and far more economical for poor communities. Secondly, many of the new animals added to the list are threatened species in South Africa – including rhino, elephant, giraffe, birds, reptiles and fish. It is absolutely outrageous that the government could promote the killing of these animals for human consumption, when we need to be protecting our wildlife.	Michelle

	2020-04-26 16:57:08	Western Cape		No I do not	Animals have been bred for thousands of years for domestic consumption. There is no rational explanation why this needs to change. Indigenous people used to eat the meat of the land. If such "wild" animals are slaughtered in a sustainable manner, they should be used for our indigenous people only. In addition, most animals slaughtered by humans endure prolonged suffering - why would you agree to that? Why would any forward-thinking, first world government promote suffering of any kind? Selective torture and killing can't be justified - it's just a play with words. This is no different from killing your neighbour's children, or whoever. 	2020-04-26 16:03:41	Western Cape		No I do not	This is outrageous! World experts have confirmed that the coronavirus, a threat that wiped out trillions from the world economy, and is devastating South Africa, has originated in wild life meat markets. 	2020-04-26 14:13:59	Western Cape		No I do not	The world is currently going through a crisis due to the virus Covid19. This disease originated from a wet market in Wuhan, China. The Chinese can buy more or less any kind of meat - including meat from different wild animals kept alive i small cages under horrific conditions. A sick bat was in a cage above a pangoline - the pangoline contracted the disease/virus which mutated and was passed on to humans. Seems humans never learn. South Africa should rather wake up and protect its most valuable asset - the unique wildlife. Together with the international community, we should put a ban on Chinese products until they take responsibility and stop these kind of markets.	Cecilie

	2020-04-26 14:02:54	Western Cape		No I do not	Farmed animal sources are managed under one standard. All other Wild and Game animals are managed based on existing Standards, CITES, and internal. The results of the culling and management of those results must be managed to ensure longevity of the ecosystem. What is the intent of amending these conditions? More money for politicians or their extended network? If its to ensure more protein is avaialable for human consumption then the hundreds of studies done overseas and locally should be used to determine other sources. These have been published and non green house gas, low water consumption, protein sources ARE available. This would be more fiscally efficient, more environmentally ethical farm and more strategic as a government. Farming and eating animals is EXACTLY why we have a fiscal crisis. Why is our government going backwards to Victorian ways of thinking. Step into the 21sr century!!	Michelle

	2020-04-26 13:32:55	Western Cape		No I do not	South Africa needs to change its policy on animal rights in its entirety. The cruel, inhumane methods which are used for farming and slaughter are barbaric to say the least - not to mention how live animals are transported/exported. 	2020-04-26 12:22:15	Western Cape		No I do not	I am appalled . How can so many protected species appear on this list. This is an invitation for people to kill practically any thing that moves. 	2020-04-26 12:17:51	Western Cape		No I do not	The inclusion of wild and endangered species, including reptiles is reckless. Since SARS, MERS and covid-19 it is clear that eating wild animals commercially invites new viruses to adapt to our species. Also, the existing legislation to protect endangered species is already inadequate to protect endangered species like elephants, rhino and many birds, and this will only worsen the speed at which they disappear.	Gwen

	2020-04-26 11:56:55	Western Cape		No I do not	I echo the sentiments of Claudia "Wild animals lived in harmony with nature and should always. Our ecology is in serious need of this harmony. Destroying forests, poisoning our rivers, now attacking our wildlife? As part of this harmony, we plant , care, and practice animal husbandry. We are to be practical and wise planet-gardeners to care for our food baskets and not spread extinction. As to eat, make a market of these animals and going for anything that moves is unwise! Making wholesale slaughter a law is immoral and detrimental to our ecology harmony. What ever society condones this atrocity is doomed. Natural culling to help keep a balance is always commendable but to make a law of this importance and magnitude is to decimate life rather than taking care of it! SHAME on you to only think of such a law!" Karoo Donkey Sanctuary rescued over 200 donkeys and 50 horses from wholesale slaughter destined for the Chinese market, some 3 years ago, - there is enormous support for such an initiative as there is for so many other animal sanctuaries. It's a horrific thought that "humanity" is so lacking in compassion, understanding and empathy!	Carol

	2020-04-26 11:32:24	Western Cape		No I do not	In the face of a pandemic we can't push even more onto our natural world and include more animals to be eaten. China is rather Banning wildlife trade. The anc has no foresight regarding natural ecosystems and their importance for now or for the future. While a species is about to go extinct they don't want to protect it to save it but rather speed up the extinction. This is ridiculous.	Niel
	2020-04-26 11:32:04	Western Cape		No I do not	I would be astounded if this proposal is not stopped post Corona Virus. One would assume that China is the main destination for these products. 	2020-04-26 11:30:30	Western Cape		No I do not	The list of animals included in the draft amendment encompasses all our wildlife in this country. I thought there was a worldwide ban on the trading of wildlife and surely this would include the consumption of wildlife meat? No I do NOT support the Amendment to the Act. Our wildlife is already under threat of overpopulation by humans.	Judith
	2020-04-26 11:24:08	Western Cape		No I do not	It is obsurd that this is even being considered. We as Africans should be the forerunners in the preservation of African wildlife. And amidst this pandemic, we should look at the root cause of it. It was due to laws regarding meat that should not have been there in the first place. We do not have a shortage of livestock, so there is no need for a law like this to exist. We should be spending more on fruit and vegetable farming, and educating citizens on how to keep our immune systems strong naturally.	Zeenat
	2020-04-26 11:23:02	Western Cape		No I do not	The minister should be fired immediately. Ridiculous to include endangered species. This is a major step backward in our evolution. The idea is to stop slaughter of as many animals as we can because the industry is literally sucking up our already limited water resources, and taking up large portions of land that could otherwise be used for sustainable resources. Besides the impact to the climate, he now wishes to make us a second China? Get OUT! And get out of China's pocket Mr Minister.	Petrus

	2020-04-26 11:03:57	Western Cape		No I do not	Tourism makes a huge contribution to the South African purse. It makes no sense to destroy the wild animals that are helping to fill that purse! Africa , and SA specifically, have an obligation to future generations to protect and preserve our unique wildlife, not to allow and encourage man all over the world to devour it without a thought for the future! Adding our wild animal species to a list for slaughter, will just create a market that will not be satisfied until there is nothing left - our abalone stocks are heading there already. 	2020-04-26 10:57:56	Western Cape		No I do not	The draft legislation is far to broad. Animals that are not in South Africa except perhaps in zoo's and the like are listed. What is the purpose of this legislation? Wholesale slaughter of anything living? Surely the Minister can come up with something that relates o South Africa's fauna only. Import of these animals should be by individual request and not a blanket allowance. Permission should only be given once premises are inspected and pass muster. With regular follow-up inspections to ensure standards are maintained. Our wildlife is a heritage which must be protected for future generations and not sold and or slaughtered for gain.	Howard

	2020-04-26 10:53:28	Western Cape		No I do not	Nearly 8 billion humans are really in need of changing the way they live. It's widely held that we have entered the Sixth Mass Extinction. Hundreds of animals are going extinct daily. We live in a biocentric world, we can not survive if the oceans have died because of an ecosystem collapse due to over fishing and fish populations going extinct. The same applies to land animals. We need to focus on biodiversity. With the excellent technology today we can reproduce proteins that no longer require the rearing of animals. We need to move away from animal proteins as a source of nutrition. Adding wild animals to this list will on exacerbate the current situation. Look at the coronavirus pandemic as to what was the root cause? An animal market! Do away with these barbaric practices and embrace a whole food plant-based diet. https://youtu.be/TMdd3gkxpqs	Godelieve
	2020-04-26 10:52:59	Western Cape		No I do not	If South Africa is under pressure, financial or otherwise, to do this by a foreign country(ies), it will not be long before all species are completely wiped out. 	2020-04-26 10:25:16	Western Cape		No I do not	All endangered and protected animals should not be included. We have lost so many Rhino and elephant from poaching, and now they are included. This is crazy. We should be protecting our wildlife for the future genrations.	David

	2020-04-26 10:15:55	Western Cape		No I do not	No I think it's terrible that the government wants to legalise the export of exotic animal meat. It's just another way the government will allow the country to get pillaged for their own benefit. Who in South Africa will go to picnpay and buy rhino, hippo, porcupine or Guineafowl from the deli.	Josh
	2020-04-26 10:14:44	Western Cape		No I do not	Have we not experienced enough virus related issues now with Covid19 spread from wild animals. Have you not realised that this can result in further risks of pandemics that may be much bigger than Covid19. Are you so stupid and blined not to saee this plus animlas are sentient beings, have feelings and emotions too. You are only looking to line the coffers and not using any brains here. Even China has now banned sale of wild animal food products. When will you ever learn!!!!!!!!	Stephen
	2020-04-26 10:13:50	Western Cape		No I do not	I am shocked to see this proposal for 2 reasons: 1. If we can so casually add endangered species to the list, then we are nothing but animals ourselves. 2. We are fighting the corona virus. There is some proof that a tiger was infected with the Corona virus, why are we adding any of these animals to the meat list when the world is in a major predicament because of people's greed. Seriously, do we still at this time want to consider eating these animals?	Hilary
	2020-04-26 10:09:28	Western Cape		No I do not	There is no rational sense in adding to the existing list - and if one believes the story that the Corona virus began at a meat market where exotic animals were sold, then this makes for an added danger to humans by allowing wild life to be slaughtered for human consumption.	Pixie
	2020-04-26 10:09:06	Western Cape		No I do not		Riaan
	2020-04-26 10:03:15	Western Cape		No I do not	No to the following wild animals: rhinoceros, elephants, giraffes and all other animals on the endangered list.	Jeanette
	2020-04-26 10:02:56	Western Cape		No I do not	Has the minister and her advisors gone INSANE?! Absolutely, unequivocally NO NO NO! To have so many already endangered wildlife species on this list is UNTENABLE. The fight against poachers and to preserve our precious, national animals has already cost millions and cost LIVES - now it's a free for all? Have you learned NOTHING from the Covid-19 outbreak? Nature herself is screaming at human beings to stop and you want to add to the dangers as well? There is no WAY I or my family would ever consume any of the meat of these wildlife species. There has to be money in it for the proponents of this crazy amendment. More selfish self-serving corruption on the part of the very civil SERVANTS that are meant to SAFEGUARD our national treasures and US and now the defenceless wildlife is paying the price? How long before WE start paying the price too - another virus, another terrible outbreak? You should be ASHAMED Minister! I am so incensed I could fill the entire page here with objections. No. No. No. No. No.	Ingrid
	2020-04-26 10:02:39	Western Cape		No I do not	Has this country gone mad? We should be eating less meat, not more. The world is already reeling from something caused by consumption of wild animals. To include endangered wildlife is sheer insanity. Most businesses are in deep trouble today and now we want to knock the final nail into the coffins containing our tourism and agricultural industries as well. Forget proudly South African - this proposed policy makes me ashamed to be South African.	Catherine
	2020-04-26 10:02:05	Western Cape		No I do not	Some animals are NOT created for consumption by humans!!! Not even animals eat beyond their created boundaries. Are we smart or not?	Riana
	2020-04-26 10:02:05	Western Cape		No I do not		Barry
	2020-04-26 10:01:38	Western Cape		No I do not	Absolutely cannot believe that our government would go the same route as China, and start supporting the slaughter of wild animals for consumption. This is what caused COVID19. PLEADING BEGGING DONT DO IT.	Sharyn

	2020-04-26 09:56:48	Western Cape		No I do not	Why would you even consider endangered animals like the Roan Antelope and Sable beggars belief! I understand conservation but it seems there is no real will to enforce proper practice. Please learn from this pandemic. Surely we should consider all life on this planet.	Anne
	2020-04-26 09:56:14	Western Cape		No I do not	I'm holding myself back with what I really think in leau of the fact that speaking my mind would probably get my vote Have we misplaced all our humanity and replaced it with ego? We have no right to determine which animals die and which live. We have no right to abuse our power to the detriment of another earthling. Where is our integrity? Where is your integrity?	Leigh
	2020-04-26 09:54:28	Western Cape		No I do not	It is a crying shame that endangered species are included on the list. As South Africans we should be proud of our wildlife. We should protect nature in all facets. We are depended on nature to survive. Please DO NOT INCLUDE ENDANGERED SPECIES!!	Sue

Neee ons kan nie ons wildlewe ook nog uitroei nie nie. Ons het ook uit ondervinding geleer, soos nou met Covit 19 virus, en ander soortgelyke gevalle, dat dit gevaarlik is om sommer enige diere te slag vir menslike gebruik. Leer by China! Bewaar ons wildlewe en Natuur! Asseblief!	Dalene

	2020-04-26 09:43:20	Western Cape		No I do not	In the light of Covid-19 and calls by the World Health Organisation to close wildlife markets, and also the export of species that then come into contact with other species that they would never be in proximity to in nature, it strikes me as a dangerous and extraordinarily foolhardy idea for South Africa to now start contributing to a global health problem.	Brent

	2020-04-26 09:14:38	Western Cape		No I do not	I vehemently disagree with this draft bill. In light of what's happened in this world, why on earth would you increase the selection??? Have their eyes not opened? Many animals are not deemed for human consumption with good reason. Animals carry their own defense mechanisms which it requires to survive. Some of these defense mechanisms, when consumed by humans cause catastrophic results because the human body wasn't designed to fight these unknown foreign bodies, thus creating a new disease or virus in humans that would be detrimental to our health and even mortality. There is a reason why human beings have been given superior knowledge to make the distinction between what is permitted and what is not. But, alas, they still prove to be the most ignorant.....	Koelsum

	2020-04-26 09:08:58	Western Cape		No I do not	This is ridiculous!! Our wildlife is under a huge amount of threat already. Making it legal to eat our wild animals is insanity. We should be doing our utmost to protect the wild animals we have left before we lose more and more species to extinction. Why include non indigenous animals? Kangaroo? Who wrote this amendment - do you know we don’t have kangaroos in South Africa? Have we learned nothing from the Wuhan wet market where the corona virus was transferred from animal to human. THIS MUST NOT BE ALLOWED TO GO AHEAD!	Teri

	2020-04-26 09:03:16	Western Cape		No I do not	The mere idea of this amendment, in the midst of the coronavirus pandemic, is totally appalling. Have we learned nothing in recent months about the consumption of wildlife, and cross species mutation? Our wildlife is already endangered from trophy hunting. Let us not add to this by the sale and consumption of "game". China has shown the world where this can lead.	Minota

	2020-04-26 08:53:14	Western Cape		No I do not	Primative to say the least. How can you be so short sighted. Didn't they learn from what happened in Wuhan? No cure for stupid!!	Claudette

	2020-04-26 08:45:22	Western Cape		No I do not	There are a couple of endangered animals on this list that should not be there. This is very shocking. I can't believe what I saw on this list Neighbouring countries such as Botswana and Namibia takes the protection of wild life seriously. This should be an eye opener for SA government to really overlook this list and reconsider.	Eduard
	2020-04-26 08:45:11	Western Cape		No I do not	While so much of our rich heritage of wildlife brings tourism money to our country, I cannot believe that our government would be stupid enough to think that this is a good idea!	Toni

	2020-04-26 08:42:18	Western Cape		No I do not	We have to draw the line. Humans have already destroyed enough of the planet. Didn't we learn anything? The Chinese eat everything that isn't nailed done, and we end up closing the world.	Angie

	2020-04-26 08:41:21	Western Cape		No I do not	I fail to see why there should be any amendments to our existing legislation. We are slaughtering our wild with no consideration of the scarcity of some of these animals. This is Africa, don't rob Africa of her legacy.	Paul
	2020-04-26 08:41:10	Western Cape		No I do not	Please remove all wildlife and only include meat which is currently sold in our regulated supermarkets. Do not sell SA to China and don't change our country to appease Eastern or other demands. Maintain moral and ethical fibre in the meat industry.	Janet
	2020-04-26 08:39:44	Western Cape		No I do not	NO! Human beings are an embarrassingly greedy and selfish species! Our Greed knows no boundaries. Governments need to learn to make decisions that will benefit the planet, not add to its destruction. Have we not learnt anything from the Covid-19 global pandemic? It's completely incomprehensible that such an amendment would even be considered! Spend the money on actively seeking out and prosecuting the perpetrators of the illegal trade of wild animals instead . Would government consider adding Tik, Heroin, Cocaine etc to the list of legally available pharmaceuticals just because the trade of such illegal drugs fall through the tax net? I think not...	Joanne
	2020-04-26 08:38:54	Western Cape		No I do not	You can not have our Big 5 animals and animal on our endangered species on a slaughter and export list.	Cathy

	2020-04-26 08:34:17	Western Cape		No I do not	Meat is non-essential. Our animals are. South Africa makes more money on tourism from those animals than killing them. Cull some human beings, like government ministers. They're fatter and taste like pork.	Ashley

	2020-04-26 08:31:10	Western Cape		No I do not	Our wildlife and marine animals are worth much more in the long ter. If they are treasured and kept alive gor the tourism industry. A hunter can only kill an animal once. A photographer and a sightseer can pay to see that animal a thousand times. Apart from the disgusting cruelty of hunting, it does not make financial srnse. Our wildlife is our treasure.	Elizabeth

	2020-04-26 08:26:42	Western Cape		No I do not	We need to move to a more sustainable model for where we get our meat from. I'm not a vegetarian or vegan but I do believe the slaughtering of animals as in its current form are inhuman.	Arran
	2020-04-26 08:26:20	Western Cape		No I do not	Why on earth are endangered species on this list? Does conservation not mean a thing in this country - its a joke. Will our Government wake up when there's literally nothing left and ask for help to put things back together when it's too late? Sounds like it.	Ingrid
	2020-04-26 08:25:18	Western Cape		No I do not	Many of our wildlife are teetering on the brink of extinction. It is not for us to exact our will and slaughter animals. We are the keepers of our wildlife. Stop this heinous killing and plundering of our beautiful sentient animals. This is shocking and not indicative of a civilised society but rather a savage one. 	2020-04-26 07:29:47	Western Cape		No I do not	The old list was comprehensive enough, we do not need to add additional animals and follow the" Eastern" trend to eat anything that moves. This is one of the scenario's tabled that was the source of the Corona Virus, do we also want to go down this rabbit hole? I think not. We also need not follow the rest of Africa who eat "Bush meat", we are a civilized country, or at least were before 1994.	ANDRE ANTHONY

	2020-04-26 06:57:08	Western Cape		No I do not	This is going to undo everything we have tried to do including curbing poaching. These wildlife need our protection NOT giving people basically a license to now hunt them and for WHAT purpose?!!!!! It's absolutely disgusting. We can't allow wine makers to cultivate wine for export which will bring in much needed cash but you'll allow people to hunt?! Where is the logic?!	Lauren
	2020-04-26 06:47:58	Western Cape		No I do not	Another case of an incompetent minister who has no understanding of the task at hand. Our big five and many other non-farming animals should never show up in the same list as cows or chickens for slaughter. We are trying to save the endangered Rhino and this minister puts it on a "for slaughte" list. No.	Jens
	2020-04-26 06:45:55	Western Cape		No I do not	Do not allow this. How can you go above the law and do as you please. These animals are all we have left.	Valery

	2020-04-26 06:03:16	Western Cape		No I do not	The act should not include animals that are threatened species. Furthermore parameters for wild animals should clearly define circumstances where they are raised for the purposes of meat and expressly discourage poaching, trapping etc.	Barry

	2020-04-26 03:01:55	Western Cape		No I do not	Leave the animals. We have enough. Humans are so greedy.	Lauren
	2020-04-26 02:48:47	Western Cape		No I do not	The biggest problem with this planet is us; the humans. We destroy and deplete everything around us. This Covid-19 virus is the perfect example how we sow destruction, even on each other. It is also the perfect example of how nature flourish when humans are locked indoors where we cannot harm it. Instead of depleting more animal species, learn to curb the population growth. And teach people respect for animals and for nature in general. And stop trying to eat every bloody living thing. If the Chinese would leave the bats alone, we wouldn't have the Covid-19 problem. Irrespective if they were trying to eat it, or just run tests on it. Leave the animals alone. Appreciate their magnificence, and let them be. Learn. It is not that hard.	Samantha

	2020-04-25 22:55:07	Western Cape		No I do not	Wild and endangered animals need protecting and are not acceptable for human consumption. There is more than enough choice of meat from already cruel and unethical farming practices. Leave wild animals alone at least. Stop messing up nature than you already have, you have no right and as a citizen of RSA I do not support these amendments and abhore them. Stop now and focus on the real issues in our country.	D
	2020-04-25 22:53:20	Western Cape		No I do not	Surely the corona pandemic is making us aware that we need to preserve our wild life. It is because of the abuse of wild animals that we are subjected to this pandemic. We need to live in harmony with wild animals, not consume them. If we do not learn from this there will be many more virus. I quote from an article 'The Age of Extinction' in The Guardian : 'humanity's excessive intrusion into nature is to blame for the coronovirus pandemic'. Surely its time to abandon this plan to add threatened species to this list. Rather protect them and our environment. Heed the advice of scientists that will be more viruses and and more economic costs, with the poor suffering the most.	Elizabeth

	2020-04-25 22:23:17	Western Cape		No I do not	The animals should remain within the country, even after slaughter. This would encourage local tourism. This draft amendment seems to forget about the risk consuming wild animals poses. Exotic animals should only be consumed onsite. If you want to travel to a game ranch in South Africa, it should be only on that ranch that you have the privilege of killing and consuming the available animals. It is only after the taxidermy process has been completed that only the skin and fur/feathers of the animal may be exported, subject to limitation on the number animals in total that can be exported by any given person and/or company. The export of exotic species creates channels rife for exploitation, and these channels are what will present biological infection risks in the future.	Robert

	2020-04-25 22:05:16	Western Cape		No I do not	MANY SOUTH ARICANS ARE BEING ASKED TO CONTRIBUTE TOWARDS THE SAFEGUARDING OF MANY OF THESE ANIMALS . Especially our elephants and rhinos. Has anyone let his mind flow towards a hidden reason.? Isnt'there a hidden reason? with us having gone through a heavy drought;our government stealing the money that is supposed to go to Local Authorities for the creation of alternative water resources? the loss of farmers to provide those all meat required to fees our people of South Africa? I S'NT THIS JUST A WAY OF GIVING THE GOVERMENT THE POWER TO SLAUGHTER THESE ANIMALS TO FEED THE POPULATION ?SHOULD WE HAVE ANOTHER DRY SEASON AND THE VIRONA VIRUS CONTINUE TO DEVISTATE OUR NATION ,AND THERE BECOMES A NEED TO DO SO? OBVIOUSLY NOT TO TAKE IT FOR FREE. Having been a Health Inspector one have always think where the resources will come from. They already want to take our farmer's land, so there will be no more ample grain ,vegetable in the future? 	2020-04-25 19:46:29	Western Cape		No I do not	this is coming very close to the situation in Wuhan China where all kinds of wild anlmals are slaughtered under conditions of no health and safety. Also these animals are not checked for disease when they are in the wild and when the are slaughtered If this is another case of trying to follow African traditional practise then it is totally misguided and absolutely dangerous and positively medieval Already meat is slaughtered on the side of the street in the townships. 	2020-04-25 17:39:31	Western Cape		No I do not	We have a beautiful natural world and the only threat it faces is humanity. Surely as we are all part of creation we can do without commercialising eating wild animals and at least do something to allow future generations to see the diversity of the animal kingdom. More than enough species are extinct and hundreds more are on the critical endangered list. The proposal also ignores the fact that animals do carry illnesses which we have not contracted and by now killing off species and eating them - which will happen because of inherent human greed and self interest - we will be exposing ourselves to the unknown consequences of selfish, financial greed. The egocentric efforts of human greed and self interest is already causing untold damage to our climate as is clearly visible by all except those who rank money as their main salvation in this life and have no regard for fellow beings.	Granville
	2020-04-25 17:33:44	Western Cape		No I do not	I think the extension of the list of animals that may be slaughtered, consumed, sold or exported is a grave mistake. In the era of covid-19, where the virus was spread to people by the consumption of an exotic animals, strict precautions should be taken to prevent future incidents of such viruses. One such precaution in my opinion should involve NOT consuming more varieties of species, which may contanimate other countries and people. Threatened species should under no circumstances be consumed by humans - there are more than enough other sources of protein available.	Lehza

	2020-04-25 17:07:57	Western Cape		No I do not	Niemand het iets teen die uitvoer van "wildsvleis" nie. Vir die meeste mense beteken dit bokke en miskien volstruise. Dit is vir my onaanvaarbaar dat van Suid-Afrika se gesogte en selfs skaars dierelewe soos bv kameelperde en renosters nou vir kos verkoop gaan word. Dit moedig die gebruik daarvan as voedsel in die wêreld net aan.	Jacqui

	2020-04-25 15:52:59	Western Cape		No I do not	I don't support this decision AT ALL. Consuming Rhinos and their meat is an absolutely abhorrent and abominable idea and whomever suggested it needs to be removed from their position of power entirely. They are a danger to the preservation of the living natural beauty that we are fortunate still exists here. What happened to "Save the Rhinos"? I was under the impression we were trying to save them from EXTINCTION? Am I missing something here? I feel like I'm having a stroke, can someone please explain why it would be made legal to kill and sell meat products of Rhinos, Giraffes and Elephants? Are we out of money and resources to protect them? Have we given up on our Rhinos? I do not believe this was suggested due to starvation. I feel this decision is a political one to ensure we have China in our pocket. They want our Rhinos more than we do, it seems. This is NOT a suggestion made by someone who has any thought for the longevity of the fauna in South Africa. I'm fucking disgusted.	Olivia

I definitely don't support this idiotic amendment. Have we learned nothing from this pandemic? Now the government wants to sell our wild life on the world market to people who will not cook the meat properly and then we shall be stuck with another flaming epidemic. There is no expertise left to make sure that the animals being caught for export are disease free. Have our farmers declined so badly that we are now forced to dig into our wildlife for sustainability?. Wake up and smell the crap!!!!. The world cannot afford another pandemic caused by idiocy. 	2020-04-25 15:13:03	Western Cape		No I do not	You can't do away with the distinction between "domesticated animals" and "wild game," because domesticated animals are freely utilized for human consumption and indigenous wild game are protected by licensing of hunting. The reason to add a specie to any one of the two lists should only be based on a proper motivation based on a thorough specie specific impact study: For domesticated animals on the existing degree of domestication and the practical effect and viability of the utilization. For wild game based on the protection status of the specific specie and other species utilizing it in the broad ecology.	Tjaard
	2020-04-25 15:07:32	Western Cape		No I do not	I believe that the various animals endemic to certain areas and/or countries should remain where they are, and be allowed to breed and live until their species is safe from exinction. If herds or flocks or whatever need to be culled to help them survive, only then could they be moved to safe areas similar to where they originate, excluding zoos, circuses, canned hunting, etc or because they are thought to be delicacies in another country. South Africa is a shining beacon to the world on how to go about protecting endangered wildlife, why on Earth would we want to or need to change this? There are more than enough animals being slaughtered for human consumption as it is, why do you want to add more, let alone endangered ones? You also need to consider the way in which the Corona virus was spread to a human host via the blood of a wild animal. Is it not conceivable that this could happen again? 	2020-04-25 13:46:39	Western Cape		No I do not	On land, meat for consumption should be restricted to stock animals only. More specifically cows, sheep, goats, pigs, ostrich and chicken. Certain, game such as buck, kudu etc.can be allowed provided it is under controlled measures. From the ocean, mass fishing should be banned and fishing should be limited to the greater shoal sea life. This needs constant monitoring and stringent control measures to be adhered to worldwide. As u see the above is already a huge variety of meat for various tastes and preferences. Animals known as wildlife are just that, and should NEVER be available for human consumption, especially after COVID19!!!	Pratishni

	2020-04-25 13:29:36	Western Cape		No I do not	There is no good reason to slaughter our wildlife. They are an important part of our country and should be protected . They contribute to tourism and to our countrys ecological balance. Considering that China has banned trade in wildlife due to the virus spread in Wuhan, we should be more careful with our wildlife and not less careful. All wildlife should be revered and protected as important and integral parts of our heritage, our environment, our land. Please reconsider and opt for protection not slaughter. Thank you.	John
	2020-04-25 13:27:50	Western Cape		No I do not	I DO NOT believe that the South African government, should add any of these animals to the list of animals, who can be culled and sold for food products. We are well known in the world., as protectors of wild animals, especially those who are endangered. I DO NOT AGREE WITH ADDING THESE ANIMALS, TO THIS LIST FOR ANY KIND OF FOOD PRODUCTS, OR ANY KIND OF EXPORT PRODUCTS AT ALL.	Lynn

	2020-04-25 13:22:45	Western Cape		No I do not	The prescence of covid 19 is a wakeup call. We need to restore balance in the world. We need to respect all of the Earth. We do not need to kill anything in order to survive. The planet needs to heal spiritually. Only man has the power to restore the balance. We need nonviolence to move forward as a human race. Please don't kill any thing living in order to eat. Its unnecessarily.	Carol
	2020-04-25 13:22:08	Western Cape		No I do not	Let us not continue to take nature for granted. It is already fighting back. We should be living in harmony with nature. Already our needless slaughter of animals has caused some to now be endangered. When an animal is already endangered it should not be allowed to be slaughtered for food. And the slaughter of those wild animals not yet endangered will most likely speed them into the endangered category. Let us rather stick to meat that has been farmed for the purpose of consumption by humans. We have seen in history when the slaughter of wildlife has been allowed in africa, that the wildlife was decimated. Part of africa's heritage is its wildlife. Let us ensure that we protect it and respect it.	Wendy
	2020-04-25 13:20:18	Western Cape		No I do not	Already our animals are under siege. Leave SA's wild life alone and learn to preserve what we have left. Or our kids and their children will never see these animals in their time. Enough wildlife has been butchered. Rather protect our wildlife	Kothar

	2020-04-25 13:08:09	Western Cape		No I do not	how on earth can any selfrespecting South African condone this . Our Heritage of the wild Will be destroyed and who would want to see that? We have the greatest country with the most amazing wild life, do not let this happen. Culling is one thing, slaughter for meat products is another. The Charonavirus started with animal meat products, so, will S.A. be the next country to start another Virus, possibly when you look at road side meat markets. NO NO NO, LEAVE OUR WILD LIFE ALONE, THEY ARE THREATENED ANYWAY!	Geoerge

	2020-04-25 13:04:29	Western Cape		No I do not	The reason I do not support this ammendment is the inclusion of all the endangered species on this list. We are already trying to preserve our wildlife why put them at risk? Is it really necessary to include new animals like elephant or porcupine? We don't need more poachers to desimate our continent. Please don't include any new animals on this list. It is not nessesary to slater them for export.	magda

	2020-04-25 12:48:44	Western Cape		No I do not	Absolutely NOT ! Human abuse of animals is already HORRIFIC. To attempt to add endangered wild species to the list of tortured domesticated sentient animals is a sure sign that SOMEONE is being offered a huge BRIBE to push this through legislation. Only greedy primitive self-centred "people" could even THINK of allowing this.	fiona
	2020-04-25 12:47:54	Western Cape		No I do not	There are already too many animals near extinction. This virus has taught us we need to protect the planet, not exploit it. We need to eat more responsibly, not less responsibly.	Ruth
	2020-04-25 12:47:21	Western Cape		No I do not	If they start the slaughter of these animals on a wholesale manner where will it end. Due to ignorance certain animals will be wiped out. We have massive unemployment and a rising! population and the demand for food is growing rapidly Where there is an overpopulation of edible animals etc. in our country then the culling of them is easier understood but then give the food to our own people, Why send food to China , the country that will probably be the main recipient of it and who also have a massive over population to feed, .The money we receive from them will again be abused and so the circle will continue until our own stocks have been depleted . Just notice where China`s fishing vessels are now operating	Douglas

	2020-04-25 12:25:45	Western Cape		No I do not	We need to have a paradigm shift when it comes to viewing animals as a commodity to make profit from. This is a bit extreme, and super disrespectful. Probably the same type of mentality that allows for human trafficking to exist. We need to respect life, and stop treating meat as a avenue of making profit. If people want to eat meat, they can firstly, go to the country of origin where he animal naturally exists. Secondly, practices like the Halaal or Khoi san traditions of blessing and showing gratitude for the loss of life, that we eat, should be taken more seriously. We have become conditioned to accept food in shops as separate from the animals that get slaughtered and killed for us to eat. Kids hardly have the capacity to connect the dots, unless they grew up on a farm or a rural area. Nobodies diet, needs to have as much meat in it, as we all think it needs. We need to respect life enough, to be real with the consequences of taking another living beings life, especially when profit is in the mix. Maybe if we respect animals, and plants and just nature in general, we can learn to respect each other has human beings too. Humanity first, profit last.	Natasha

	2020-04-25 12:17:57	Western Cape		No I do not	After this covid 19 world disaster, I am amazed that the government is even considering adding these animals to the list for slaughter. 	2020-04-25 11:41:10	Western Cape		No I do not	Who is asking for the list to be amended? Who compiled the "new and improved" bill? Get rid of feebleminded morons like these who have so much time and power to meddle in areas that needs to be protected, not abused even more! Corruption must end! We need God-fearing people in charge of our country! No, I do not support this!! If you spent your energy for good instead of evil, we would have a Country and Leaders we could be proud of!!	Maria
	2020-04-25 11:38:32	Western Cape		No I do not	Its appalling that this is even considered. Bad enough that cows, sheep etc get slaughtered. Leave them alone and let them live in their natural habitat.	Lesley
	2020-04-25 11:38:01	Western Cape		No I do not	Animals not designed for food production should be removed from this list. Animals that are not farmed and are in a dire situation for survival should be removed from this list. I feel that this list opens the door for mass removal of species and unprotected slaughter of animals for monetary gain for a select few. This in no way serves to the benefit of the people of South Africa as a whole. We already have animals designated this purpose, and lets keep it there. Removing anything else should be considered illegal. This land is already be raped and pillaged, so something like this needs to be stopped immediately.	Andrew

	2020-04-25 11:21:57	Western Cape		No I do not	It is very shortsighted to select endangered animals (including birds and fish) for slaughter. Endangered animals need all the protection they can get. Moreover andemics like Covid-19 will arise again with the encouragement for people to eat wild animals because of the massive number of pathogens wild animals have that can and have jumped to humans. The entire planet needs to move towards a meatless diet rather than enlarging the variety of meat available for slaughter.	Gillian

	2020-04-25 11:17:33	Western Cape		No I do not	I do not agree with any wild animal being being exported -wether live or as edible meat or trophy /trophies in any way or form . I note that the pangolin or aardvark, aardwolf , tortoise or turtle are not on this list , all reptiles wether for pet trade or food should be included . Exporting of live young for Zoos or game parks should also take precedence. Your list lacks National Parks listing as I am sure they should be taken into consideration.	Helen
	2020-04-25 11:16:51	Western Cape		No I do not	Please can we not just concentrate on agriculture and grow more fruit and vegetables - lets not just eat everything that moves and please lets not destroy our beautiful wildlife and cause them so much stress and pain. 	2020-04-25 11:11:28	Western Cape		No I do not	For me this sounds more like cruelty, and if this is allowed pretty soon we will allow the slaughter of cats, dogs and other animals for consumption and export . I am totally against this because just recently we were against the killing of rhinos for the illegal sale of rhino horns. We are currently dealing with the Covid19 pandemic. Aren't we putting ourselves in the risk of getting other diseases by consuming animals that we have never consumed in centuries. We are not Chinese people guys we cannot just consume anything that breathes. I am totally against this bill 100% against it.	Siyabonga

	2020-04-25 11:04:25	Western Cape		No I do not	This is iniquitous . Are you trying to slip this through parliament while we are are all half asleep? This looks like a Chinese shopping list! There are many on that list that are endangered species or on the way to being endangered with another new addition the giraffe . We spend fortunes trying to protect our rhino ,elephant and lions apart from all our other wonderful species for heavens sake . Tourism is our biggest asset if you want to make this about money. We are custodians of this amazing body of wildlife for future generations - let's cherish it and at the same time let them generate revenue for our ailing economy. No horses or donkeys either!	Fiona

	2020-04-25 10:32:48	Western Cape		No I do not	This is not about being Vegan or not, this is about MORALS, INTEGRITY, DOING WHAT IS RIGHT, HAVING A CLEAR Conscience and most of all LOVE, UNCONDITIONAL LOVE and RESPECT for all living things …. And not about how you can make money no matter the consequences Animals are SENTIENT BEINGS AND SHOULD BE TREATED AS SUCH they should not be used for Financial gain, Human Entertainment, or Slaughtered or used in Labs But we as Humans have been conditioned and programmed that we think we have the right and the power over Animals to do as we wish, how arrogant can we be as a species, how ignorant can we be how selfish can we be, and most of all how devolved are we in this age and time , driven by our selfish needs and cravings and misperceptions We are here to care for them, to protect them, to love them and to cherish them, THEY ARE NOT A COMMODITY WE ARE MEASURED BY THE WAY WE TREAD ANIMALS, CHILDREN, THE WEAK AND THE VULNERABLE As a COUNTRY and as South Africans of all races, when will we start to take responsibility, when are we going to take of the blinkers, the greed, the ignorance and the stupidity WE CAN START RIGHT HERE, TODAY!! I Challenge and Request Government to set an Example, Lead by example, we are a beautiful rainbow nation, with a lot of possibilities, if people can be guided and lead in the right direction, eventually other countries can and will follow `This quote says it all ~ "The animals you say were 'sent' for man's free use and nutriment. Pray, then, inform me, and be candid why came they aeons before Man did, to spend long centuries on earth awaiting their devourer's birth? Those ill-timed chattels, sent from heaven, were, sure, the maddest gift e'er given – 'sent' for man's use (can man believe it?) when there was no man to receive it!"	Jolanda

	2020-04-25 10:22:38	Western Cape		No I do not	I cannot believe this amendment is actually being proposed considering what we are going through globally at the moment and also the threat of extinction to many species across the world. As a country with an abundance of wildlife we should be protecting it not offering it to other countries to exploit. We are destroying the planet and its wildlife anyway so this amendments is wholly objectionable. What was wrong with the old list? Just seems the government cannot leave anything untouched.	Lisa

	2020-04-25 10:16:13	Western Cape		No I do not	Dear Minister, yesterday 24th April, I emailed the policy document to you of Compassion in World Farming, the leading international NGO on farmed animal welfare. It is titled "Is the next pandemic on our plate? Our food system, through the lens of COVID-19." This incisive document includes cutting-edge science on the health and welfare risks imposed on a human population by its leaders ignoring potential crises until they are hard upon us. In each potential crisis, our food systems play a major part. If we want to avoid further pandemics, we must change the way we farm and what we eat. The 25-page document is being hailed as a breakthrough in its potential to transform our food economics in a world facing poverty and hunger. I have emailed it to every South African political and veterinary leader who is tasked with the safety of our food. Please look out for my email. The policy document will also be on our website www.animalvoice.org as from tomorrow, 26th April. Thank you for your consideration of this vitally important document.	Louise

	2020-04-25 10:13:12	Western Cape		No I do not	How can endangered animals possibly be on this list? Remember that many of the animals have a greater value alive than dead in terms of tourism and the money it brings to surrounding communities. We as a race have an obligation to conserve wildlife for the future and to try to reverse the impact man is having on the natural environment on which we all depend. These proposals are uneducated and short sighted.	Karen

	2020-04-25 10:05:12	Western Cape		No I do not	It is ludicrous to pass a bill that would allow the slaughter of endangered animals but this would also mean an end to the Rhino population in a very short space of time. there are also many of us that do enjoy the art of the hunt and use it as a very relaxing sport and getting into the great outdoors. The passing of this bill would have disastrous consequences, not only for the hunting fraternity which brings in much needed revenue, but also for our future generations to come whom I am 100% sure would prefer to see the game alive rather than in books, which is the case for many extinct animals already. 	2020-04-25 09:48:56	Western Cape		No I do not	The inclsuion of endangered species on this list makes a mockery of anti-poaching efforts which automatically bring into question the governments commitment to protect South Africa's wild life. I think a deeper study should be done to see from where the pressure for these extentions come. I suspect East Asia would be a good place to start and to, at the same time investigate any trade deals and arrangements with those countries.	Keith
	2020-04-25 09:48:13	Western Cape		No I do not	Dear fellow readers. Unfortunately this has to be said though not to enforce any religion onto others. During every crisis everyone immediately goes to religion in the form of praying and asking for grace or relief from what our current problems may be..but then during everything else we just go about ignoring what God's rules are. So to answer this in plain lamens terms, the Bible clearly states what God has given us as food to eat under His rule. Follow God and His rules to the very end and great and gracious blessings will follow to the end if days, but ignore His rules and expect punishment from Him in all sorts of forms. Have a blessed day.	Pierre

COVID 19 SHOULD BE A LESSON LEARNT NOT AN OPPORTUNITY TO OPEN THE BORDERS TO THE IMPORT OF INEDIBLE SPECIES.	alan
	2020-04-25 09:44:16	Western Cape		No I do not	This is insane..... I am totally against most animals on that list being exported as a source of meat for someone's dinner plate. After this pandemic I think that all people around the world need to make life changing adaptions regarding the way they eat and lifestyles. We need our wildlife for tourism and the fact that the human race needs to live in harmony with nature. We all need to become more eco friendly and treat our beloved earth with the respect it deserves. If countries continue using their wildlife as a source of protein and wipe out many species what is going to happen to tourism. Yes at the moment there is no tourism but eventually the world will recover and there will be tourism again. What are we teaching our youth and future generations.....that is is our right as humans to take and destroy....no it is not. Humans and nature have to co-exist together for the benefit of the world. 	2020-04-25 07:51:33	Western Cape		No I do not	This draft legislation should immediately be abandoned or drastically amended. There are two compelling reasons for this. The first is that the impact on South African wildlife could be potentially devastating. Having threatened and endangered species such as rhino and elephant on a list of meat for killing and consumption is gravely irresponsible. Having other wildlife on this list is no less serious, even where their survival is not immediately threatened. Humans have been known to decimate animal populations in a very short time and can negatively affect the ecology and environment through these actions. This act will have dire and irreparable consequences on South Africa's treasured and lucrative wildlife. The second reason is the danger this poses to humans. Slaughtering undomesticated animals hugely increases the risk of viral contaminations as seen in the recent Covid19 pandemic which was traced to wildlife sold in meat markets in China. Other pandemics such as Ebola have similarly sprung from cross contamination of wild meat. It's time for South Africa to become a world leader in responsible wildlife management and promote the enhancement of life on our planet, not the needless slaughter of it.	Sean

					I'm truly staggered at this alarming amendment. Why on earth do you want to eat a porcupine? The globe is currently reeling from the worst pandemic in living memory -- a virus which was transferred by the consumption of wild animals in Chinese meat markets. Now the ANC wants to bind into policy the farming, handling and consumption of a vast list of wild animals in our own country. Do you realise what the consequences will be, should a situation similar to the coronavirus arise? Secondly, apart from the serious health considerations, many of these animals have threatened status.... and now you want to put them on the menu. There is a particularly influential lobby group that insists that farming wild animals is best for their survival. This argument has been shown to be false. Farming wild animals for consumption leads to a deliberate manipulation of genetic material (and a corresponding decrease in genetic diversity) to maximise meat yield and trophy size, exactly as has happened with domesticated animals. Please see the game farming industry's own literature, they advertise exactly this desire, and it is contrary to a strong gene pool and the long-term survivability of species. That some of SA's conservation bodies have bought into this argument is truly disturbing and short-sighted. Lastly, the fact that this objectionable amendment has reached the draft stage demonstrates that adequate consultation has not been undertaken with a broad swathe of society, nor with relevant animal welfare bodies, and the relevant science has not been tested adequately.

	2020-04-24 21:16:00	Western Cape		No I do not	Please stop this from happening. We don't need this horror inside this beautiful country. 	2020-04-24 21:08:22	Western Cape		No I do not	What is the matter with these humans. They believe they are truly the absolute apex of evolution and all below them are just there for their pleasure. 	2020-04-24 20:58:52	Western Cape		No I do not	Endangered species should obviously not be killed! Surely that goes without saying? Furthermore, we should be eating more plant based foods as this is infinitely more humane, better for the planet and ultimately healthier. We are currently in the throes of a pandemic, the consequences of which are extremely dire, precisely because of the Chinese people eating all manner of animals.	Adele

	2020-04-24 20:50:29	Western Cape		No I do not	1. Many of the animals on the list do not occur in South Africa and have no relevance to be listed. If the intention is to bring animals into SA for breeding or what ever reason, it will still not be supported as it could lead to potential disease risks to our native wildlife. Why are non-native wildlife listed and what measures will be taken to prevent the spread of diseases? 2. Wild animals should not fall under this Department at all. This will create extra loop holes for getting permits and transporting animals across borders. Wildlife should fall under the DEFF who should issue the permits in line with conservation strategies and mandate to conserve species and keep genetic diversity in ecoregions intact. What is the stance of DEFF on this application? What steps will be in place to prevent genetic introgression across SA? How will permit applications be handled for transportation across provincial borders? How will hunting permits be issued? What measures will be in place to prevent illegal trafficking of wildlife? Which government departments will be responsible? Does this not create extra red tape between Departments to the detriment of all animals?? 3. Many of the species listed are not and should not be domesticated! Some of the species are endangered and there are already species specific management plans (i.e. bontebok) and by declaring these animals domestic will seriously compromise their conservation status as well as genetic integrity. How will you address conservation threats already listed in management plans? 4. How will wildlife diseases be treated? Will wildlife suddenly be subjected to vaccines? This could potentially increase risks to wild populations. Disease plays an important role in wildlife and more information should be supplied on how this risk will be addressed. 5. How does this Department define wildlife? This country's most important income generation is via tourism, how will this influence our wildlife and tourism perceptions? Where does ecotourism and the believes and promotion of responsible tourism (no petting and exploitation of wildlife) then stand? What is the risk to SA reputation in terms responsible tourism? Not supported!!	Marna

	2020-04-24 20:46:48	Western Cape		No I do not	The old list of animals seems to be South African animals. The new list has many foreign species listed. If the minister allows not only these animals to be slaughtered, but even allows such exotic animals in to the country either for a zoo to exhibit or to farmers to breed for profit, it surely is a threat to our bio diversity. Can one be sure that the MInister and the relevant Portfolio Committee has an intimate knowledge of our Wild LIfe and what is edible and which animals if slaughtered would cause a public outcry, e.g. donkeys that are bred and exported to the far East? NO. Ask the MInister to send it back to the Portfolio Commitee and have the list amended. Animals that are the endangered list should also not be on this list, e.g. Rhyno.	Marleen

I would also urge that the wild life list be drastically reduced to prevent the proliferation of poaching of our wildlife with the concommitent reduction of wild life tourism. Why should s it necesary to expand upon the existing, old list? Who gave the politicians the right to decide the fate of animals to be slaughtered ? This is another abhorrent and disgraceful show of human ambivalance and disregard for life, and nature in general. Stop with the greed and worship of money and power abnd get in sync with nature. 	2020-04-24 20:17:58	Western Cape		No I do not	Su No I do not! We are already bow to big bully countries such as China as well as to the UN.. They have proved what monsters they are in multiple ways, particularly, the maltreatment & slaughter of any creature and our government in South Africa is giving free reign to allow this. We must protect our animals, wild and domestic. We need to set a GOOD example in Africa and cease the slaughter of animals for human profit and consumption. Why doesn't our erstwhile Minister of Agriculture encourage the cultivation of vegetables and fruit and lessening the greed for animal food products, especially those on the endangered list? The privileged of the human race, have become greedy for monetary and hedonistic gain.	Gregory
	2020-04-24 20:16:30	Western Cape		No I do not	I do not support this amendment due to the fact that it violates the extensive conservation efforts of South Africa to protect species of wildlife which have already been plundered by poaching and illicit hunting, bone and wildlife trade. Not only will it lead to the exploitation of many already vulnerable species but will push others to this point. Additionally this amendment is unethical and is a move fueled by greed for wealth with no regard for the preservation of nature or the rich biodiversity and ecosystems of South Africa. South Africa's tourism market is largely dependent on its wildlife and game viewing. Little to no Wild Animals because of meat trade will see a drastic drop in revenue from the tourism and hospitality sectors and the loss of many jobs. It is widely agreed by Scientists that the CoVid-19 virus originated from a wild animal sold in a wet market in China. This animal was likely of a foreign country of origin and had no place being taken from the wild for any reason most particularly human consumption. This amendment will open the doors for trade and exploitation of South Africa's natural wealth but could equally raise risk of further pandemics and viruses.	Patrick

	2020-04-24 19:18:59	Western Cape		No I do not	One of South Africa's greatest tourist attractions is our Nature Reserves and Game Parks because of our wildlife - yet you want to slaughter them. In times of touble and stress, and when people go on holiday, the primary destination to ease the tension, relax and recover is Nature, the bush, and to observe wildlife - yet you want to slaughter them. Very often rivers, businesses, logos, team names, locations and more are given the names of wildlife because we love them and are proud to carry their names - yet you want to slaughter them. Many of the wildlife on this list are endangered species - yet you want to slaughter more of them. Are you really unaware of all of this? Surely you know that the amount of money to be gained by this slaughter is completely insignificant compared to the multitude of benefits otherwise gained by us, our children, the animals, and Nature. No, your good sense and your conscience has to tell you that this is wrong - please do the right thing and not only stop this amendement but remove all wildlife from this barbaric legislation, it is the just and honourable thing to do. 	2020-04-24 19:16:52	Western Cape		No I do not	Wild animals lived in harmony with nature and should always. Our ecology is in serious need of this harmony. Destroying forests, poisoning our rivers, now attacking our wildlife? As part of this harmony, we plant , care, and practice animal husbandry. We are to be practical and wise planet-gardeners to care for our food baskets and not spread extinction. As to eat, make a market of these animals and going for anything that moves is unwise! Making wholesale slaughter a law is immoral and detrimental to our ecology harmony. What ever society condones this atrocity is doomed. Natural culling to help keep a balance is always commendable but to make a law of this importance and magnitude is to decimate life rather than taking care of it! SHAME on you to only think of such a law!	Claudie
	2020-04-24 19:11:44	Western Cape		No I do not	Only animals farmed in a healthy free range, grass fed zone should be consumed. All fishing, including whaling etc, should cease effective immediately until the oceans replenish and restore their ecosystem. Once the ecosystem has restored itself fully, testing for mercury and other toxic substances should be executed before any further consumption and fishing. The ocean needs time to heal. The general ecosystem of our planet needs time to balance itself. Leave all wildlife alone. It will restore to a healthy, virus free state. Farmed meat only. Cattle, sheep and chicken. Focus should be on planting crops in a sustainable organic system.	Catherine

South Africa has enough difficult trying to keep poaching at bay without legalising the consumption and export, etc, of the vast range of wild animals and birds from our own country as well as a selection of animals that are native to other countries. 	2020-04-24 17:43:26	Western Cape		No I do not	- No endangered or other threatened wildlife must appear in the Act - No live animals should be transported across this distance for consumption. It is not only cruel it increases the chances of infection - Surely the origin if this pandemic (and other viruses like MERS and SARS) has shown that we should not eat certain meats! The list must be reviewed with regards to the items listed below	Ursula

	2020-04-24 17:36:32	Western Cape		No I do not	1. This will open the floodgate of poaching on a large scale. It will be in the guise of cultural or religious slaughter. 2. To even contemplate including endangered and highly endangered species on this slaughter list speaks volumes about the lack of regard the proposers have toward wildlife. there appears to be other agencies at work to have let this even appear as a draft amendment. 	2020-04-24 17:31:07	Western Cape		No I do not	The eating of meat should be reduced to the minimum - ultimately completely stopped - not expanded. Commercial meat production is one of the main causes of the environmental sustainability and climate crises. We have got to change our lifestyles completely and plant-based diets are the future if we wish mankind to survive. Earth can and will survive without us - but we cannot survive without functional Earth ecosystems.	Llewellyn

	2020-04-24 17:30:58	Western Cape		No I do not	When will this list be extended so we may eat bats, lions, muce, etc,? It has been proven that what was believed to be exotic food caused a massive pandemic pandemic so please STOP signing documents before you know what you ars signing	Herman
	2020-04-24 17:29:25	Western Cape		No I do not	Surely this shocking amendment was thought of before Covid19??? Surely it is understood that this virus was born in a market in China selling animals on that endangered list and other creatures unhealthy for human consumption??? 	2020-04-24 17:19:44	Western Cape		No I do not	Our experience of the eating of exotic animals, as the Covid-19 pandemic so crucially exemplifies, surely demonstrates that this is a practice that should be banned, not encouraged by increasing the numbers on the list! 	2020-04-24 17:18:01	Western Cape		No I do not	We need to protect wild animals- only we can do it. They cannot do it themselves. It is cruel, it is inhumane, it is not necessary, it is horrible to export animals, mostly under the most horrible conditions. Also, exporting bush meat leads to things like the Corona Viruses. This is dangerous. So no, please to NOT extend the list. Make the list shorter. Much shorter.	Karin

	2020-04-24 17:14:23	Western Cape		No I do not	This draft should most certainly not be amended to extend the list of animals on it, most particularly not to include any wild animals considered endangered or coming close to endangered status. Needless to say we should be putting every measure in place to protect these animals, not giving guidelines on how to hygienically prepare them for human consumption! In addition, by extending this draft to endangered animals, we are increasing the incentive for existing and prospective poaching of these animals for profit.	Ashleigh

	2020-04-24 17:07:39	Western Cape		No I do not	There are various reasons we shouldn't be selling any of our wildlife, never mind adding new ones : 1. Wildlife sale is not a sustainable business model. These animals are not farmed so the number is finite. The money made from selling the few that are left will not balance out the damage done to both our environment and the tourism sector. 2. Wildlife and our natural environment is one of the main reasons tourists come to our country. After lock down ends, we will need the revenue that tourism brings. - Firstly, if we are seen as a country that exports endangered species, this will be counterproductive - tourists are increasingly aware of ethical travel. - Secondly, if you sell the animals for slaughter, etc. where will they come from? The wild? Game farms? If so, then what will the tourists come for? 3. Wildlife is a critical income for many communities, many of which are struggling already. Selling/slaughtering these animals may be a temporary fix, bringing in some money at that time but, in the long run, these communities will be jobless, posing added pressure on our welfare systems and, possibly, increasing crime rates. 3. There will be an impact on the environments in which these animals live, leading to further wildlife reduction and ecosystem degradation. Lastly, how will government be managing the welfare of these animals ? Only once you have updated the woefully out-of-date Animal Protections Act (last amended in the 60s!) should SA even consider adding more animals to the list. Although I don't agree with slaughter and inhumane export of any animals, I realise we should be pragmatic. Our country needs the money. So, at least see to the welfare, care, and proper standards of the animals (i.e. no live exports!) and leave the wildlife out of it completely.	Jenni
	2020-04-24 17:06:36	Western Cape		No I do not	I won't support the amendment to extend the list of animals classified for slaughter, consumption, sale and export!	Simone
	2020-04-24 17:02:46	Western Cape		No I do not	That list is madness they contain species that are endangered, for what are they on the list for, others are not even in South Africa.	Charlie
	2020-04-24 17:02:39	Western Cape		No I do not	No, I definitely do not support this bill. Why include our precious wildlife? Most are on the verge of extinction as it is. South Africa should be protecting it's precious wildlife, yet this suggests that South Africa couldn't care less about them. It's sickening. The Covid-19 virus has shown us that this world would thrive without us, and no wonder, look at what humans have done to this planet and obviously still want to continue by wiping out our beloved wildlife. Remove our wildlife from this list, leave them alone. Stop this immediately.	Barbara

	2020-04-24 16:55:18	Western Cape		No I do not	There is no good reason to slaughter our wildlife. They are an important part of our country and should be protected . They contribute to tourism and to our countrys ecological balance. Considering that China has banned trade in wildlife due to the virus spread in Wuhan, we should be more careful with our wildlife and not less careful. All wildlife should be revered and protected as important and integral parts of our heritage, our environment, our land. Please reconsider and opt for protection not slaughter. Thank you.	Sandy

	2020-04-24 16:47:28	Western Cape		No I do not	I don't think wild animals need to be added to those domestic animals whose plight is already parlous. The export of live animals ie sheep,is appalling.Othe sources of protein must be found for societies in need.	Judi

	2020-04-24 16:43:35	Western Cape		No I do not	With no heath or other proven disadvantages, bringing this into law would deprive thousands, most of whom are disadvantaged, their right to earn an honest income and destroy their way of life many of whom have been living this way for generations. This appears the be ether, a knee jerk reaction with no real thought behind it, or other sinister motivations are hiding behind this proposal.	Duncan
	2020-04-24 16:43:18	Western Cape		No I do not	Clearly you do not have a clue as to what the word "Endangered " means!! I in no way agree that engandered widlife species such as rhino and elephant be slaughtered, consumed, imported, exported and sold	Glen
	2020-04-24 16:37:01	Western Cape		No I do not	This is a disgrace to the country where animals such as these mostly exist only in Africa and where there existence may be threatened by indiscriminate and illegal activities for financial gain. As we have sween previously with sheep being exported to the middle east there is little humanitarian interest in the export market for human food or other cruel pracises. are we going to continue supporting cruel animal practises for gain. Come on. Take a step vack and promote vegetarianism or veganism. It is unimaginable in this day and age of supposed enlightenement tha this amendment has bee put forward. Shameful!!!	Eily

	2020-04-24 16:35:08	Western Cape		No I do not	The proposed amendment to the Meat Act is outrageous. Extending the list to include wild animals in the light of the current pandemic is unthinkable. It deeply saddens me to think that our natural heritage is exploited as an economic commodity. This is truly both inhumane and irresponsible. The South African Government is fueling the deadly wet markets in Asia. Our natural heritage, our fauna and flora should be conserved for future generations. Our people should be encouraged to experience the beauty of our game parks, to be involved and to learn the true value of our wild life, rather than merely as a food source. Encourage tourism whereby our own people could benefit financially. Make game parks more affordable to our local people. The canned lion and export of lion bones is another abhorrent industry and should be banned outright. Not only do animals suffer, but lion bones could carry TB, and cause another pandemic. I urge the SA Government to consider this amendment in the most serious light, if we hope to earn the respect of the rest of the world and our proud nation.	Lenore
	2020-04-24 16:32:01	Western Cape		No I do not	I do support the consumption of meat originating from animals of which the numbers are too high. I do not support the consumption of animals just because "it is my tradition to eat it". 	2020-04-24 16:28:33	Western Cape		No I do not	I absolutely cannot believe that endangered animals will be further endangered by man's Greed! 	2020-04-24 16:24:45	Western Cape		No I do not	I think this is a terrible idea and will only contribute towards many of our already endangered animals extinction. It will also encourage poaching which is already a huge problem for our country and tourism industry. Our wild animals should be a source of national pride, not a source of meat. Please don’t go forward with this.	Kim

	2020-04-24 15:56:53	Western Cape		No I do not	Please do not slaughter our wildlife. This will be done only for the money not too feed humans. The rich people who can afford wildlife has food enough. This will not go to feeding poor people! Do not do it! Wildlife is limited!	Nikki

	2020-04-24 15:49:52	Western Cape		No I do not	A number of the animals listed are already an endangered species. Our husbandry of game or wild animals must be seen to be and must be exemplary in the eyes of the world. Allowing these animals to be consumed is simply not acceptable. Allowing wholesale slaughter of these animals will lead to backyard meat processing and will have wider consequences for the population.	Clifford
	2020-04-24 15:46:55	Western Cape		No I do not	Species that are categorized as threatened on the IUCN Red Data List will go extinct if humans do not intervene. Black rhino, white rhino, African elephant and giraffe are categorized as either vulnerable or near threatened, with their populations declining. Regardless of their status on the Red Data List, these species have an intrinsic right to persist in the environment. We as stewards of South Africa has an obligation to protect and conserve our biodiversity. We are perpetuating colonial rule by allowing exploitation of our resources and heritage, to other nations for pennies.	Natasha

Extending our own wild species is a move in absolutely the wrong direction. We should be conserving MORE species, not opening up opportunities to kill more ..I suspect our wild animals may soon be being sold to foreign markets who pay top dollar. 	2020-04-24 15:19:46	Western Cape		No I do not	Africa is at a huge advantage compared to the so-called First World - we have NOT sold our souls by killing all wildlife. Animals - wild animals in particular - are what keep us HUMAN, they are not only food, but helpers to our spirits. They provide communicative channels between ourselves and our ancestors, and between ourselves and our shared history on this planet. Please read Credo Mutwa's book, Isilwane, and do research into the spiritual importance of animals and wildlife. It is a crime against our human dignity to kill threatened and critically endangered wildlife, and there is no reason to extend the list of domesticated animals. Those peoples who have sacrificed their wildlife heritage in other countries pay a lot of money to come and feed their souls here in our game parks.	Silke

	2020-04-24 15:08:23	Western Cape		No I do not	Has the current pandemic and its economic and social fallout taught our government nothing? Eating and closely interacting with exotic species causes novel viruses (Ebola, MERS, SARS etc etc etc) that threaten the existence of our own species. Not to mention that it's morally and ethically utterly unacceptable to exploit endangered and threatened animals for food, when there are so many safe and renewable alternatives. This legislation is born out of ignorance and greed, and makes me deeply worried. WHO BENEFITS FROM THIS? Certainly not South African citizens- quite the opposite. We should be conserving our country's precious resources for future generations, and concentrating on ecotourism, not feeding the insatiable, mindless gluttony for the exotic in other countries. 	2020-04-24 14:52:07	Western Cape		No I do not	May it be "Supply and Demand", Governments encourage exports as Exports increase jobs, bring in higher wages, and raise the standard of living for residents may be the basis of discussion of the matter really does not make sense at all. Who really benefits at the end of the day when you add exotic/endangered species on the menu. Surely not me as I might just try it once for experience or maybe not as can't afford the price tag. Not everyone has the same palette for such that it is just a waste at the end of the day to slaughter such endangered species. Gov officials can debate the regulations applied for Food Safety and Quality in South Africa: The FCD Act is considered to be a reactive act which means that approved and acceptable sources are taken in to account to provide the information on safety of foodstuffs for regulatory purposes. Such sources include: Codex Alimentarius standards and guidelines The Fertilizers, Farm Feed, Agricultural Remedies and Stock Remedies Act, 26 of 1947, which set out regulatory requirements for registration of pesticides and stock remedies The Medicines and Related Substances Control Act 65 of 1963, which sets out regulatory requirements for registration of veterinary medicines The Genetically Modified Organisms Act 15 of 1997, which sets out regulatory requirements for foods from genetically modified organisms I do second the majority of comments and suggestions made regarding the lesson learned fr the still fresh issue regarding covid-19 and where the virus originated from and how our economy will get affected one way or the other. We all need to remember this, WHO is killing WHO!!! Who is killing the world we live in!! WHAT is more important really...?!	Richard
	2020-04-24 14:52:05	Western Cape		No I do not	I can't understand the need for adding endangered animals. However the whole concept that the slaughter of game meat is problematic, since it makes life very difficult for farmers who cull for their own use as food, and for hunters on their farms, who hunt for the pot and not for trophies. Any addition of species to this list will mean that more meat from legitimate hunts will be wasted, since it is clearly uneconomical to take a single animal carcas to the local abbatoir for slaughter.	Gareth
	2020-04-24 14:51:44	Western Cape		No I do not	Please take note; I vehemently object and in no way, shape or form support this draft amendment. I am shocked to my core that 90% of these wild animals, such as elephant, rhinoceros, giraffe and hippopotamus and other wildlife are even being considered for consumption. To include endangered species is just too atrocious for words!! Leave our wildlife alone so they can live in peace and be enjoyed by future generations!	Pauline
	2020-04-24 14:51:34	Western Cape		No I do not	The very reason why we are in the covid 19 crisis is because of the sale. Export and consumption of wild. Animals. Please do. Not. Let. This bill go through. It will. Decimate. Our wild. Populations and will add to the spread of did eases and viruses. Animals. Like these wild ones should be protected not slaughtered. This is so ridiculously stupid and short sighted to. Pass a bill like this. Please save wildlife and humans and do the right thing. Profits mean. Nothing in the face of extinction animal and human.	Kali
	2020-04-24 14:51:21	Western Cape		No I do not	Not even considering the greed aspect of cruelty, Wildlife in South Africa is our guaranteed attraction for possible overseas visitors. At every occasion these wildlife should be protected. Killing of these animals, birds, creatures will deplete our heritage completely and not only kill our heritage, but will kill our Tourist Industry as well. Bear in mind too that some of the countries demand live animals to be imported, and their methods of torture and death of these magnificent animals leave much to be desired.	Althea

	2020-04-24 14:47:51	Western Cape		No I do not	More harsher action needs to be taken. Sentencing poachers and people who kill animals for sport is needed. Animals go through so much cruelty and the punishment is minute. Increased protection for game reserve animals is needed, restrictions to killing animals for sport and definately having regular and frequent check-ups with animals farms (even though I would love that animals would not be killed for consumption).	Cassey

	2020-04-24 14:47:18	Western Cape		No I do not	Dear Minister I am sure that you will agree that it makes no logical sense to include threatened species in this amendment whether it be for slaughter, consumption, import, export or sale. In fact South Africa's Wildlife belongs at home. I question how it can be considered whereby millions are being spent to protect a species like Rhino only to have such an amendment undermine those efforts. Please exclude any form of our Wildlife from this Amendment. I implore you.	Mark

	2020-04-24 14:43:52	Western Cape		No I do not	dear Minister i love this courty , and on so many levels feel it is and can be more of a "light and example to the world". this proposal is absolutely Inhumane and unacceptable; it is cruel and horrid and no good (no nutrition, healing or entertainment) can come out of such horrors. China has experienced few times already diseases spread from such practices of Wet markets. those are markets of horrors . no matter how much people want to deny and avoid ,,,the animals do suffer ...they then exude toxic death like hormones that do affect people , who partake in such practices and who eat this meat....Animals are innocent and placed in our care. Ghandi said that one can evaluate a country by its treatment of animals ... Please , Please , Please ...open your hearts and minds ..this is cruel and unsastainable ...SA needs to be an example to the world ...	zanna and gustav

Please protect our wildlife and tourist industry - leaving something beautiful and fascinating for generations to come. For centuries we were fine - not eating elephants, rhinos etc. I'm sure we'll be able to cope seeing that more people are turning to healthier lifestyles - consuming less meat.	T
	2020-04-24 14:42:48	Western Cape		No I do not	I really feel that that the list should not change, Rhino/elephant /hippo/.etc should not be hunted for meat, where does is end, you might as well start letting people eat each other, how will you tell the difference between poaching and hunting for meat. is the eating of wild animals not what has got us into this Corona problem, Leave our wild life, birds and reptiles alone.	caroline

	2020-04-24 14:39:53	Western Cape		No I do not	We need to protect our indigenous game, and allow for Tourism and controlled hunting to generate money; not the sale of game-meat. We are told that the Covid19 pandemic started due to the sale of 'game' meat. Why continue to possibly perpetuate the spread of pandemics	Richard
	2020-04-24 14:39:43	Western Cape		No I do not	I am astounded at the lack of thought and foresight that this minister has displayed in her proposals to allow the killing and sale of these endangered and other wildlife animals. Wildlife is a HUGE part of South Africa's tourism economy and to open Rhino, Elephants, Sable and even Giraffe to this ticket to slaughter is absolutely inconceivable! I feel so strongly about this silly and ill thought out proposal that I would recommend that this minister be severely penalised or even removed from the decision making office that they hold. Surely in the aftermath of the Covid Virus economic constraints we should promote regular sources for our meat, such as cattle, goats, sheep etc so our farmers can make a living. Rather than cutting off the life blood of Wildlife Tourism that brings in millions for our economy and the foreign currency will be vital to our country reviving again. PLEASE stop this from going through. It is a short sighted, short term 'idea' that does nothing for our country or economy.	Helen
	2020-04-24 14:39:37	Western Cape		No I do not	This proposed bill appears to be part of the general overreach by world governments in response to a strain of flu that may marginally spike the average flu season data year-on-year. It seems to be a means to breaking down our normal rule-of-law decisions to which South African citizens have in general agreed. Send our nation back to work! Stop this fear-mongering and nonsense! Most people with an iota of sense see through this diabolical scam to cripple the world. Keep our protected animals protected. Stand up to Chines Communist Party bullying. South Africa is a sheep nation. Not a goat nation! Let's start acting as though we believe this.	Grant

	2020-04-24 14:39:13	Western Cape		No I do not	How on earth can we protect our wild and endangered animals if a minister goes and slaps them on a list for the pickings??? Must be some kind of sick twisted joke??? I do not support such a concept at all!	Monique
	2020-04-24 14:38:59	Western Cape		No I do not	Okaying the slaughter of these animals would be an outrage. and would lead to inevitable loss. Domesticating them, i.e. breeding them for a life of suffering and slaughter would profit some, but we as a country would be impoverished beyond belief. What would a world be without wild places and creatures, everything monetized, all animals bred to be slaughtered? Are we to gobble up the entire world? No, we cause enough harm in the name of profit. It is in no way necessary to involve these animals also in the unacceptable and brutal cycle of suffering and death which already exists so that we can eat them. Exporting them, also domestic animals such as cattle and sheep, alive, is cruel beyond belief. We should be becoming more humane, more civilized, kinder and wiser, not less so. For this proposal to come at the time of a global pandemic caused by a virus which transferred from wild animals to humans at one of China's ghastly wet markets, just beggars belief. A resounding NO from me.	Carolyn
	2020-04-24 14:37:54	Western Cape		No I do not	This is preposterous! Where have you ever heard of such a ridiculous decision! I most Definitely don't support this bill! 	2020-04-24 14:36:40	Western Cape		No I do not	This is again coming from a Capitalist world view. You are destroying earth. Didn't you do enough damage. Feed the hungry, destitute children and people, instead of farming with innocent animals and feeding them the grains, etc just to kill them later for profit. There's no humanity in this. Animals feel pain, love, cold, etc just as humans do. Stop your greed and cruelty!	Joline

	2020-04-24 14:35:26	Western Cape		No I do not	Why is there a need to increase the list of animals for slaughter? The existing list includes all commonly eaten animals and a few more exotic ones, but it is sufficient. The new list includes animals whose survival as a species is already threatened such as roan and sable antelopes, hirolas (not even native in SA), or rhinos. Other animals such as the Himalayan Tahr hardly exist in South Africa and the few wild ones are invasive and have been mostly culled. Why introduce non-native animal species to be breed for slaughter to SA that might escape and cause damage to our own flora and fauna? Why allow the slaughter and trade with animals that were not breed in South Africa? This would only cause more harm to the aminals, pose a potential threat to our own delicate and unique environment, and there is a sufficient variety of meat already available.	Alexandra

	2020-04-24 14:30:54	Western Cape		No I do not	There is no way that one can justify including any of the South African animals that are endangered or under threat this includes but is not Limited to Elephant Rhino and Giraffe. The fact that American Bison are on the list is laughable as well. I would go even further and say that none of the South African ewildlife species should be on the list for export unless it is an abundant species being exprted to supplement the replensihment of teh same species in another country	Guy

	2020-04-24 14:03:41	Western Cape		No I do not	Killing Animals is so terrible. Animals have feelings like humans. 	2020-04-24 14:02:46	Western Cape		No I do not	We need to respect the wild life that makes up this planet. Covid 19 is a taste of what will happen to man on this planet if we destroy the infrastructure that we are tasked with protecting. A better solution would be to encourage populations to limit the number of children they make to reduce the world population. Mass breeding of children doesn't mean that we can start eating children - in the same way we cannot eat all the Elephants, Rhino, Zebra and and and because we are overpopulating this planet with people who don't produce food or care for the planet and all its residents and natural flora and fauna BUT want and need to eat. STOP THE POPULATION EXPLOSION - be a concerned parent when you consider making more babies. Make sure you have the means to nurture your children and feed them on food you grow or breed. Be a concerned and responsible resident of this small planet we call home.	Denise

	2020-04-24 13:57:18	Western Cape		No I do not	Haven't we learnt from Covid-19 that detrimental diseases can be crossed when humans ingest wild meat. These animals are not here for human consumption and should be able to be safe & thrive within THEIR environment. We should be protecting our wildlife. South Africa is known for these beautiful animals & if this passes people WILL take advantage of it and these animals numbers will drop DRASTICALLY. I'm an 18 year old South African, terrified for the future of not only the humans in this country but the animals as well. 	2020-04-24 13:56:39	Western Cape		No I do not	We are in a deep economic, humanitarian and ecological crisis that stems from the abuse of wild animals in wet markets in China. I am deeply concerned that the consequence of the amendment will be an increase in the cruel industrial factory farming of wild animals and other domesticated animals, including animals not previously subjected to the horrendous conditions of factory farms and feedlots. Should this amendment to the schedule take place, South Africa will be lining itself up to becoming the epicentre of zoonotic disease, having lost all compassion for our fellow sentient beings. My suggestion to avoid all future zoonotic-related crisis and assist in ending the illegal wildlife trade, is to completely revise the Schedule, narrow down and limit the species list to include only animals that have been historically subject to livestock farming and traditional subsistence farming. Many of the animals listed in the proposed schedule are not found in South Africa, nor are they eaten by South Africans! In order to demonstrate its goodwill, and in the light of the COVID-19 outbreak and other diseases such as SARS, Listeriosis and Mad Cow Disease, the South African government must commit itself publicly to the reduction of factory farming and not to the increase of this horrendous practice.	Michele

	2020-04-24 13:53:18	Western Cape		No I do not	This revised list is totally unacceptable. Including a number of wild animals that are endangered, such as rhinos and elephant, is just a way to enable the sale of rhino horn and ivory, which is disgusting! We have more than enough domesticated animals to slaughter, so there is no need to add further wildlife to the existing list.	Brenda
	2020-04-24 13:53:00	Western Cape		No I do not	The global pandemic caused by the SARS-coV-2 virus is the perfect example of why we should not even consider this amendment. Zoonotic viruses/diseases are a real threat to human civilization and we simply cannot take the associated health risk. In addition to health risks - there is the matter of conservation. I do not believe that we can effectively mitigate the reality of this amendment whilst still offering certain endangered species on the proposed list the guaranteed protection they need.	Linda

This draft legislation is pushing the envelope and will serve to limit the ability of groups to protect the interests and very survival of endangered species and animals in general in South Africa. Endangered species absolutely should not be on any export list, they are in the care of South Africa. Indeed they are citizens of South Africa and should be protected.	Ondria

	2020-04-24 13:40:00	Western Cape		No I do not	How can the new draft amendment list classifying animals for slaughter include endangered animals - giraffe, elephant and rhino among others. Is the list amended so that the carcass of poached animals may be used rather than destroying the carcass? If so it must be VERY clearly stated under what conditions the carcass of these animals may be used and also very strictly controlled or enforced. However I foresee control problems around this. There are animals not normally resident in South Africa. How can these be added to the list? Would they have to be specially bred in this country e.g. a swan, a kiwi or a musk ox or be imported when we have no say regarding if those animals may be slaughtered in their own country. What is the need to have exotic animals on the slaughter list?	Meriel
	2020-04-24 13:39:10	Western Cape		No I do not	The draft must be re-visited to include the correct and traditionally used meat sources, and exclude endangered species. The draft, as it stands now, will put even more pressure on our wildlife species.	Barend

	2020-04-24 13:36:01	Western Cape		No I do not	The wildlife meat trade has led to transmission of diseases like Ebola virus and Covid-19 from animals to humans. In the middle of the Covid-19 epidemic it seems the height of insanity to allow the uncontrolled slaughter and consumption of species that may be harmful to human health. Whoever is even considering this is very ill-informed.	Melissa
	2020-04-24 13:35:55	Western Cape		No I do not	Are there not enough domestic animals being farmed to feed the nation...we are going to have no legacy left to leave our children iro of animals found only in Africa and which makes Africa, Africa greed is destroying our country and people who make these types of decisions should at least have degrees in sustainable conservation and wildlife farming....it is in SA unfortunatly left to the ill equiped and uneducated to make life altering decisions on behalf of the country leaving it open to abuse and destruction. 	2020-04-24 13:33:09	Western Cape		No I do not	The animals are ENDANGERED!!!We should take pride in being able to protect them. There are many foundations looking after these animals and they need to be supported. This is the opposite of support. As the coronavirus proves, it is dangerous and deadly to trade with animals for food or otherwise. Rather than extending the list, we need to look to eating less meat overall and look at our inhumanely our currently farmed for meat animals are kept. Chicken farming being a prime example. We need to reconsider our entire approach to eating animals and MOST IMPORTANTLY NOT include endangered wild animals !!	inka

	2020-04-24 13:30:50	Western Cape		No I do not	Given the tenuous conservational state of a number of the animals being considered on the "new" list, I believe that the draft amendment, if instituted as a final decree, would significantly endanger such animals even more, leading towards an increased rate of decline towards possible extinction. This cannot be allowed to happen in a country like SA that prides itself on its natural reserves and parks, and where environmental values are highly respected. Additionally, enactment of the presently proposed draft would undoubtedly lead to more poaching, thereby speeding the species' decline even further. Given we are presently, globally, suffering devastating effects of a virus, transmitted to humans by the consumption and wet market sales of wild animals, adding more animals to the mix/possible market, is a risk only the foolish would consider as it threatens all humanity. Sincerely. Sven Coles	Sven

	2020-04-24 13:27:15	Western Cape		No I do not	We are current dealing with a serious pandemic that originates from eating wild life. Secondly, the new Meat Safety Act should not allow for any endangered animals to be killed because globally these animals need to be protected for the sake of the environment. Thirdly, the new Meat Safety Act should not allow for the killing and consumption of ANY animal that is not farmed for that purpose so that the consumption of these animals does not effect the natural balance of the ecosystem and cause any species to become endangered or extinct an so that it does not put any people at risk when hunting large animals. 	2020-04-24 13:20:41	Western Cape		No I do not	If we as a nation deeply consider the implications of breaking bonds with our natural heritage, if we could feel just for one moment the consequences of what is in store for us down the road in addition to the pandemic we are presently dealing with, if we go ahead and slaughter, consume and export our wild life, viz elephant, rhino, giraffe, hippopotamus, crocodile, buffalo, whose purpose on this planet is unseen, mostly not understood yet essential to the balance and well being of our environment and by extension, ours - not to mention smaller species of birds and fish that provide sustenance for us in the same way, but can provide nutrition for us in other ways - if we were given a flash of insight to what will be unleashed in terms of counteracting the health and well being of our self, our children and generations to come - and the ravages on our environment brought about by our excesses and misguided thinking about what truly sustains us, we would surely pause to reflect on whether we really, really, really-really need to eat elephant, giraffe, buffalo, crocodile, hippopotamus to save our lives. We would surely reconsider If selling our priceless wildlife (whether it is to 'honour' a previously state-captured trade agreement or a conditional transaction with some country in exchange for assistance during this pandemic) - ask yourself if you really, really, really-really can eat money to save yourself or use that money to sustain human life when the means of getting that money is causing the collapse of the very thing we desire to sustain. If this pandemic has not opened our hearts to be compassionate to All Life that this planet supports, it is on us when the next wave of unfathomable ravages sweep over us. One thing is for sure, whatever choice (and it is a choice - not the only option to feed or fund a nation) - we will ultimately be brought to our knees in utmost humility and clear-sightedness as to what we have lost and cannot regain. 	2020-04-24 13:02:06	Western Cape		No I do not	It is evident from our current situation of covid 19 that animals especially exotic animals are zootonic carrying viruses that are transmitted to humans through consumption. It is absurd that animals which are seen as endangered animals are now on a so called list for consumption. It is also evident that this list is purely made to accommodate SA's communits allies of which one of them is China. Clearly South African governement is not adhering to their promises to build a country to protect its wildlife but to rather destroy it. Vegetarian, vegan, or not, no one should be okay with this revolting bill. We need to treasure Mother Nature, and her beings, what will become of as as a species, if we keep ruling out, destroying, and threatening other species. This is sickening. 	2020-04-24 12:38:05	Western Cape		No I do not	We are already seeing viruses have come from the slaughter of wild animal so doing this will increase the risk. This movement is also counter the conservation of wild life which in its current state is already threatening the existence of these animals. 	2020-04-24 12:30:10	Western Cape		No I do not	No I do not support this under any circumstances. We are putting our wildlife, our planet and ourselves under risk and as it is, we are all threatened. The link between eating animals and disease is well established in terms of heart disease, diabetes, hypertension etc. and now talk of adding to that list. Hasn't Covid 19 taught us anything, so why is this even a discussion? To what end? For what purpose?	Marianne

	2020-04-24 12:30:00	Western Cape		No I do not	The orgin of Covid-19 is most likely the consumption of animals not normally consumed in the local markets of the world. In the middle of a pandemic, you propose this legislation? Why?	Charles Henry
	2020-04-24 12:29:26	Western Cape		No I do not	Why include Rhino on this list, I thought the official policy was to protect these creatures?	john
	2020-04-24 12:28:32	Western Cape		No I do not	I strongly disagree to add any endangered species to the list. They are part of SA s heritage and bonus to attract international visitors. Also, as someone already mentioned: The Minister must issue an amendment to the Notice, explaining the rationale for amending the Act. The Notice is silent in this regard and therefore unconstitutional. The Minister must also explain the footnote to Schedule 1. This justifies the slaughter of "threatened" species.	Angela
	2020-04-24 12:28:17	Western Cape		No I do not	I am appalled to see that there are so many endangered and 'near threatened' species on this list. We as human beings have already destroyed so many wildlife populations through global warming, habitat destruction and hunting . Please do not allow more species to be decimated. We have a duty to protect our world.	Carol
	2020-04-24 12:26:19	Western Cape		No I do not		Suzanne

	2020-04-24 12:25:23	Western Cape		No I do not	I do not support this amended list as why on earth would you extend this list other than to accomodate the export for the foreign markets such as china who already we are paying a dear price for their eating practicises. Its already bad enough how we treat and slaughter domestic animals so as a decent human on this planet, can we please stop selecting more species particularly endangered ones.	Dean
	2020-04-24 12:25:22	Western Cape		No I do not	Our wildlife is under threat thanks to poaching and destruction of their environment.By allowing the trade and slaughter of our wildlife will hasten the demise our precious wildlife.	Brian

	2020-04-24 12:25:09	Western Cape		No I do not	Whoever suggested this list is either an idiot or evil - going to give them the benefit of the doubt and suggest it is the former. Not only is placing vulnerable species on the list morally reprehensible but it also puts these species at further risk which directly contradicts the Governments stance on this (support of saving Rhino's and the use of SANDF for this purpose). The list must be altered to remove endangered and vulnerable species.	Dillon

	2020-04-24 12:22:51	Western Cape		No I do not	Do we really need to waste time on this? No endangered species should be on that list or any that form the basis of tourism. 	2020-04-24 12:15:17	Western Cape		No I do not	When one understands something and understands how critical animals are to the existence of humanity and the sustainability of ecosystems, then I doubt that one would ever wish to take any actions to ensure the decimation of animal species and therein shorten humans existence on earth. Are we becoming like China now, where nearly anything is killed and eaten? What are the true reasons for these amendments? We need total transparency. I do not support the destruction of species.	Jeff

	2020-04-24 12:14:03	Western Cape		No I do not	We need our wild animals - once the coronavirus is over, we need tourists to come to our country to see our wonderful wild life. DEFINITELY NOT ACCEPTABLE TO INCLUDE WILD ANIMALS IN THIS LAW,.	CHRISTINE
	2020-04-24 12:13:56	Western Cape		No I do not	We should NOT be allowing any threatened species in South Africa to be slaughtered for consumption, sale and / or export. Just the thought of this amendment is quite disgusting. We should be looking after our rhino, elephants, giraffe, birds, reptiles and fish.	Mohamed
	2020-04-24 12:13:54	Western Cape		No I do not	Endangered species, can not be on this list. Secondly, reptiles do. Ot belong on a table - thats what got us corona viruses in the first place. Please stop this insanity now.	Robin

	2020-04-24 12:12:13	Western Cape		No I do not	It is a sad reflection on yet another government department when a minister can sanction the butchering of an endangered species-rhinos. A great deal of money is spent, effort given and even lives are lost , in correctly, attempting to save as many rhinos as possible from illegal poaching. As for some of the other bush meat mentioned, what outbreaks of viruses have occurred because of wanton slaughtering, which no attempt at regulating will curtail? It is bordering on outrageous that this bill should even be compiled.	James

	2020-04-24 12:10:08	Western Cape		No I do not	I am against the slaughter of animals such as klipspringer, oribi, duiker and other ENDANGERED wildlife. These animals are part of our heritage, and there are plenty of domestic animals than can be killed for food, without resorting to wholesale slaughter of formerly protected game.	Debora
	2020-04-24 12:09:15	Western Cape		No I do not	The wildlife in South Africa which is already protected, is being decimated by poachers already! If the protection is lifted it would be a free for all and all our wildlife would dissapear! I bet China is behind this proposal!	Jon

	2020-04-24 12:08:12	Western Cape		No I do not	At a time when we are battling a world pandemic that was caused by a zoonosis, this amendment is totally inappropriate. Evidence suggests an incontrovertible link between wild animal species, slaughter for human consumption and outbreaks of serious diseases that have no vaccine or treatment at the time they emerge. . The health and economic consequences of such outbreaks are devastating in the short and long term. I say this having had frontline experience of working in the 2014 Ebola epidemic. We should be concentrating efforts towards sustainable and safe animal farming, not expanding the species to wild animals at this point.	Kathryn
	2020-04-24 12:08:00	Western Cape		No I do not	No I do not support this proposed legislation at all. Only venison can be for human consumption. Other wild animal are our heritage to care for and encourage tourist industry.	Helen

	2020-04-24 12:06:37	Western Cape		No I do not	I was appalled to read of this proposal. How can it even be considered when so many people have spent time and energy not to mention many millions of dollars,trying to protect the most vulnerable animals on the planet. Minister Didiza should hang her head in shame if she approves the amendment and bear in mind what can happen when wild animals are exploited in the way. Wuhan anyone?	Diana

	2020-04-24 12:05:32	Western Cape		No I do not	I have no words to describe my feelings when I read that list. We spend millions (including support from overseas) on trying to protect our wildlife - rhino being a perfect example - and then this crazy person and whoever else is responsible wants to make it legal to slaughter them for food!? I could go on and on - it just doesn't even bear considering.	Sue

Many of the animals that our human authorities are now listing as meat to consume are on this list. 	2020-04-24 11:57:31	Western Cape		No I do not	Our wildlife is what makes Africa special and all wildlife is vitally important to the environment and the survival of the human species. We'll gain so much by keeping them where they are and protected from hunters and poachers. Get tourists in to see them in the wild give them a real African experience. As we've just seen with the Covid virus consuming wild animals is both irresponsible and dangerous. Please don't destroy our children's futures by exploiting and killing our wildlife	Julie

	2020-04-24 11:53:25	Western Cape		No I do not	In these difficult times the Minister would be well advised to focus on the problems facing South Africa, rather than increasing a list which already includes far too many animals for slaughter.	Allan
	2020-04-24 11:52:36	Western Cape		No I do not	Now more than ever we need to utilise our natural resources to boost the economy. And that includes our wildlife which brings in many tourists. 	2020-04-24 11:52:15	Western Cape		No I do not	I condem all slaughters of the list of animals listed by the minister some of these animals are pets to the whole world does the minister want to be like China where they have these markets the minster must set his mind where this lock down of the whole world started CHINA MARKETS WHERE ANIMALS WERE KILLED SO PLEASE DON'T GO THAT PATH.	Philip
	2020-04-24 11:50:42	Western Cape		No I do not	This bill leaves me quite breathless with horror. The rich heritage that Africa has been blessed with belongs not just to Africa but to the world. There are so many issues here I don't know where to start. Firstly our tourism industry will be decimated - tourists who come to see our Big Five will be affected in one of three ways a. They will think that some of our Big Five will no longer be available to observe, because they are now farmed animals. b. Our Big Five will be devalued by this move. c. Tourists will stay away in protest. We don't have to be like China , to eat everything that moves. Look what happened there. We are exposing our people to more zoonotic diseases by farming wild animals, encroaching on their territory and increasing human/wildlife contact.	Nicola

	2020-04-24 11:46:37	Western Cape		No I do not	Emphatically NO to this proposed amendment. Endangered specie are listed for good reason and certain cultures DO NOT respect this. In our country, South Africa, we have to protect what is left to cherish and NOT ALLOW POACHERS and the like to find cause to destroy our environment, that includes wild life and many of the protected specie listed. My short answer is NO NO NO !!	Paul

	2020-04-24 11:41:58	Western Cape		No I do not	This is barbaric! Theybare not satisfied in killing the world around them and now they want to kill animals because they probably have to repay those billions of rands back to China. All those animals that are getting killed will probably be exported to china so they can stop eating bat. Come the fuck on. Does the human race and SA government in particular want to fuck up everything they touch. Kill one species and it has an after effect.	Veronica

	2020-04-24 11:41:00	Western Cape		No I do not	How can the inclusion of endangered species be justified. Many of these species are on the brink of complete extinction. This is extremely irresponsible and unacceptable. We have a duty to protect not just humans but all living beings which include animals. So much money has been spend to try and protect these species from extinction so how do you justify the inclusion of endangered species on the list which will have the opposite effect.	Marisa
	2020-04-24 11:40:56	Western Cape		No I do not	I do not support this amendement at all. Why would we allow the slaughter of endangered animals like rhino's? I do not agree with the continued slaughter of our wildlife. There will be no game left for our children to appreciate if these amendments go through. What is the objective / agenda for this amendement? It seems like the elite are once again colluding for their own gain. THIS MUST STOP!	Andrew

	2020-04-24 11:40:21	Western Cape		No I do not	Endangered species such as rhino and elephant are not generally regarded as a food source and face huge threats from hunting and poaching. Putting them on a legal list of meat to be slaughtered would only make it worse.	Rozanne
	2020-04-24 11:40:09	Western Cape		No I do not	South Africa prides itself on being one of the few countries in the world, to offer on view, all of its indigenous animals to the wild ... to bring this new Act into being, will just encourage poachers to decimate one of our natural heritages !	Nick

	2020-04-24 11:36:42	Western Cape		No I do not	In the context of how the corona viruses occurred, it would be nothing short of idiotic to proceed with such a proposal. 	2020-04-24 11:36:21	Western Cape		No I do not	It is the dumbest thing I have ever read - minister is an imbicile	alan

	2020-04-24 11:36:06	Western Cape		No I do not	Ms T Didiza, You are proposing that people just slaughter wildlife on a free basis as they wish. Are you in fact facilitating that all the wildlife can become extinct - because that is where we are already going. What are you thinking? There are controlled farms for the meat industry. So why target all the wildlife as well? We are custodians of our wildlife and fauna - let's act that way for a change to preserve this world!	Karin

	2020-04-24 11:28:51	Western Cape		No I do not	We have an obligation to look after the wildlife that we have. People (government) wants to exploit what we have for monetary gain. Do you really want to start South Africa on the same route where China and other countries are? Please do not do this!!!	Maria
	2020-04-24 11:28:51	Western Cape		No I do not	Wildlife is more valuable ALIVE than dead, that is a given! Domestic animals bred for consumption is acceptable under STRICT control. Think of the future of our children and this beautiful country.	Linda
	2020-04-24 11:27:48	Western Cape		No I do not	Look where the world is because of wild animal consuption, and reptials. Do they want to make South Africa a second China. Leave reptials en wild animals alone.	Bernice
	2020-04-24 11:27:03	Western Cape		No I do not	this is as bad as reading about Chinese wet markets. What makes any of these animals any different to the ones that the world now slates China for. This country is as guilty as all the eastern countries that they sell these animal and meat products to. The world needs to look at both sides of the coin. Stop killing animals. stop trading animals. start selling useless humans for food and fodda	jones

	2020-04-24 11:26:42	Western Cape		No I do not	There are too many animals on this list. . . we need to protect our elephant, rhinos and many other endangered species....not put them on the menu. This is completely insane.	Sheralee

	2020-04-24 11:26:32	Western Cape		No I do not	The planets wildlife does not belong to the humans who share the planet with them. It is our duty to care for and protect all animals, their existence has as much value as ours. The selfish greed of human beings will eventually bring about the end of all that is good. Could we not be a country that shows others a new way to live with the full spectrum of nature as it is supposed to be?	Hilary

	2020-04-24 11:26:29	Western Cape		No I do not	I am vehemently opposed to the proposed amendment, affecting endangered species, & am prepared to contribute financially toward legal proceedings opposing this proposed bill. We look like buffoons on the international stage, and this will impact greatly on the perception of tourists and affect tourism income as a result.	Michael
	2020-04-24 11:26:15	Western Cape		No I do not	The slaughter and commercial use of meat from endangered species is an act of immorality. This country nneds to reintroduce morality and integrity, as this has been eroded over the past 26 years. These marginilised species should be left for our children and their children to view and enjoy.	Richard

	2020-04-24 11:24:38	Western Cape		No I do not	you do must have a IQ as big as your shoe size to think about this. But OK from the ANC you can expect that the most. 	2020-04-24 11:24:12	Western Cape		No I do not	Wildlife must be protected for our future generation.	stefanus
	2020-04-24 11:21:18	Western Cape		No I do not	Why does this question even come up? The slaughter of any animal is murder - no matter what 'legit' words we use. But to even consider our wildlife as part of this bill, is a sign of absolute dysfunction. Why do we have reserves and parks ? it is the heritage of all living beings of the African continent. Not for exploitation, but to protect and share our wonder with the rest of the world (tourism etc.) China has long been gobbling up the African continent and its natural resources. We have the beauty and the natural heritage - why sell it away to those who will abuse it . (in any country) That is an immoral, mindless and self-destructive trade! The list of endangered and extinct species grows daily. It is us who encroach on their spaces and rights. The old addage of "two wrongs dont make a right" holds here. Until people are taught from childhood to respect and nurture the environment of which we are a part, populations will continue to burgeon without resources like natural food, clean air and health care. We're all part of the nature of this world. Protection, compassion and intelligent science is how we should be moving forward. I wouldnt like to see future generations having to go to other continents to see African wildlife .. Stop the slaughter and trade of all animals. We CAN do better.	edith
	2020-04-24 11:21:08	Western Cape		No I do not	The inclusion of endangered species suchact as rhinos on this list is completely unacceptable. As a country we should be protecting our natural heritage, not placing further strain on already fragile species. Furthermore, in a country with a strong agricultural and farming sector, there are sufficient meat alternatives. Endangered species are not required for food safety, and as has been acutely highlighted by the outbreak of Covid-19, may lead to serious unintended consequences.	Alida

	2020-04-24 11:20:16	Western Cape		No I do not	The research is clear that animal husbandry is the source of past, current and future viral and bacterial disease. The current pandemic is linked to wildlife, but we have already had SARS, Swine flu and others that have produced outbreaks of disease. This proposed legislation will only increase the risk of more disease. South Africa can currently not manage animal welfare, health and safety etc, under current conditions, there is not a chance that the country has the ability to monitor an increase in animals that are allowed to be slaughtered. Humane and safety conditions are poorly observed. This amendment will put our wildlife and human safety at risk.	Joanna

	2020-04-24 11:18:40	Western Cape		No I do not	It is important to protect our endangered species. Certain animals are meant to be slaughtered and eaten and others NOT! Please we need to differentiate between what is civil and what is not! See what happened when a certain culture decided to eat bats and all other weird animals. Be sensible please, we need wise decisions for our future. The entire WORLD is in crises because people have eaten animals that are not meant for human consumption and now you want to legalise the use of wild animals for meat - there are enough animals that are farmed to be used as a food source. Protect our wild life heritage and humanity!	Derick

	2020-04-24 11:17:08	Western Cape		No I do not	When will the governing party acknowledge that these animals added are to satisfy the cravings of a few and NOT for the masses. Why is rhino even on the list as we are already having so few white rhinos in Africa, let alone here in SA? What baffles me is that the small antelopes like the Duikers are on the list which is just incredulous, as well as Steenbuck. Who thinks that these animals are enough for a family to use as meat when they have supper? Surely you need to consider whether we want to remove species or whether we want to save some for our generations to come.	Dawie
	2020-04-24 11:16:30	Western Cape		No I do not	This will only encourage more poaching and further endanger the lives of certain species.	Helen
	2020-04-24 11:16:09	Western Cape		No I do not	I strongly support keeping to the original list of animal's for consumption. We have to care and protect our endangered species. 	2020-04-24 11:15:53	Western Cape		No I do not	What is the point of this amendment when we’re almost sure the corona virus was sparked by infections from bush meat , bats & other wild animals meat .... The entire process requires immediate halting until further clarity.... The domestic meat industry already suffices demand ... We require more intervention into making this industry much more humane & less stressful for the animals .... & not profit based ... The corona virus is our big wake up call .... Take heed	Fritz
	2020-04-24 11:15:50	Western Cape		No I do not	I do not agree with the slaughter of all these types of Annimals for Human consumption as there are many species which are on the list of "bewaarde species van uitwissing" en dit moet beslis wyer bespreek en gekonsulteer word. 	2020-04-24 11:13:24	Western Cape		No I do not	This must of necessity refer to reclassifying wild species as ‘farm’ animals. Listing some wildlife species, including some of which are threatened, with domestic stock for genetic manipulation, is beyond comprehension. The new schedule seems to invite the industrial farming of wild animal species, so that their meat can be sold. The problems associated with semi-intensive and intensive farming are well known, such as increased occurrence of disease and therefore a need for routine use of antibiotics, growth substances and vaccinations. Now, more than ever, we need to reflect on how our decision to exploit animals is turning on us. Most of the major diseases we know of originated through exploitation of animals. The stress of confinement suffered by animals is known to bring about pathogens. We know this from past pandemics. It is easy to point fingers elsewhere, but our own treatment of factory farmed animals makes the ideal breeding ground for another mutant zoonotic virus to emerge, and extending this to allow the possibility of the intensive industrial farming of yet more species as listed, must be reconsidered and rejected out of hand.	Garth
	2020-04-24 11:13:23	Western Cape		No I do not	What is wrong with the human race .... all they want to do is destroy the planet and all the precious animals on it. 	2020-04-24 11:06:05	Western Cape		No I do not	Including endangered animals in this amendment, will certainly make it more difficult to protect and conserve the endangered species. The government notice also states that " This Act also applies to all other species of animals not mentioned above including birds, fish and reptiles that may be slaughtered as food for human and animal consumption". Surely this should be a concern, since it effectively includes ALL animals.	Riaan

	2020-04-24 11:03:22	Western Cape		No I do not	The South African Government must stop trying to appease the Chinese because that's what all this is about. They going to cause a wholesale slaughter and extinction of some species as everyone will try to get on the bandwagon. Please please stop this.	Elzabe
	2020-04-24 11:02:47	Western Cape		No I do not	All wildlife animals must be excluded - it is one of our greatest assets and opening it up to general consumption / profiteering will only result in abuse. 	2020-04-24 11:01:34	Western Cape		No I do not	Most of the animals listed on the current Meat Safety Act 2000 are in decline and some are already endangered. The current list should be reduced and NOT increased. We beg minister Ms Didiza to use her position, power and knowledge to make a compassionate decision that she will do what is right and will not allow this new increased list of animals to go ahead as it will be a sure death sentence for South Africa's beautiful wild animals. Ms Didiza we call for you to protect South Africa's precious wildlife, please the animals need your help and protection now.	Jeanette

	2020-04-24 11:00:46	Western Cape		No I do not	This is complete madness we are trying world wide to save these animals not decimate them. The department of agriculture needs to be investigated for putting something like this forward it is a complete outrage	Caryn

	2020-04-24 10:58:20	Western Cape		No I do not	I can't understand how a government can amend an act which allows the slaughter, consumption, import, export and sale of threatened species in South Africa including rhino, elephant, giraffe. Not to mention the smallest of antelope species and animals like porcupine. We have this terrible virus COVID-19 spread across the entire world and it's due to people trading in wild animals. And now South Africa wants to do the same. Our wildlife is under threat as it is. To amend the act will only legalize and expand the bushmeat crisis. Oud onkeys are also already uynder threat with illegal slaughter for their skins. Inhumanely I must add. And worst of all the donkeys are stolen from their rightful owners, which are usually some of the poorest of the poor citizens in our country who depend on the donkeys for their livelyhood. Why this is even under consideration is I can't even try to understand. Government should be solving problems not creating more.	Debbie

	2020-04-24 10:57:47	Western Cape		No I do not	I know China already owns SA, but seriously what is next? Are we going to start wet markets & slaughter bats? I cannot believe that our government is considering the slaughter of rhino, elephant, giraffe & reptiles. Is there no end to the lows the ANC will go to line their pockets?	Victoria
	2020-04-24 10:57:47	Western Cape		No I do not	Why would we put threatened animals on this list? Sounds like someone stands to make some money from this list. Please be sensible and have some long-term thinking. If an animal disappears off the planet what good is that? Having an abundance of animals is one of our biggest tourist attractions and sustainability is the next major movement in this sphere. Let's start off on the right foot after this disaster.	kirsten

	2020-04-24 10:55:29	Western Cape		No I do not	Are we now trying to copy China's disgusting treatment of wildlife? No respect for nature so long as the actions can satisfy the greed. Has the Covid pandemic not taught us anything!	Paul
	2020-04-24 10:54:41	Western Cape		No I do not	Firstly - What great need would the additions to the list fill? Because the population is threatened with famine because of lack of animals for slaughtering on the first list? Will enlarging the list - more animals to be slaughtered - help the poorest of the poor? Secondly - who will benefit? I am afraid there is a hidden agenda here.	Rahila
	2020-04-24 10:54:33	Western Cape		No I do not	Leave the wildlife alone, and only used properly farmed animals for food. This is dumb.	Tyron
	2020-04-24 10:54:16	Western Cape		No I do not	This is the most rediculous proposal. It is not only dangerous from a health perspective , especially in the light of Covid 19, but conservation of our wildlife is of utmost importance & is one of our country's biggest assets. It also employs thousands of people. I can't believe this is even on the table for discussion.	Michael
	2020-04-24 10:53:29	Western Cape		No I do not	The human race is the reason why this planet is in the dreadful state it is today. The Corona Virus pandemic is an alert to humans to change their ways and NOT destroy every other species on Earth. The period of lockdown has allowed Nature to grow.....polluted skies have cleared, animals are appearing in places they have not been seen before and hopefully the oceans are being restocked? Instead of killing all animals, we should be preserving them. There are many other foods which humans could consume..... food which grows in the ground, or grows on trees.....far healthier than eating meat and better for all in the long run. Time to reconsider the way we live.....restore the planet to it's former glory for the enjoyment of all who follow us and for once, forget about the economic benefits of killing animals for consumption and export. Do NOT allow this to happen!	Kevin

	2020-04-24 10:53:18	Western Cape		No I do not	Please do not allow this. Animals are already subject to so much cruelty. We will go the way of China and I h much worse things will be done to animals (and our health) is we start consuming wild animals and those not normally consumed. It will also give way to evil practices of witch doctors who use animal parts (and human parts) cruelly. Please please don't allow this. If anything, tighten the controls and allow even less than what's already being allowed!	Charlane
	2020-04-24 10:52:58	Western Cape		No I do not	Rhino... Are you kidding me????	Melissa
	2020-04-24 10:52:58	Western Cape		No I do not	Chicken, sheep and cattle farms provide enough meat to feed the people. No need to kill wildlife anywhere to satisfy people with a sick desire to taste "exotic" animals.	Lize
	2020-04-24 10:51:46	Western Cape		No I do not	As the big 5 is a major source of income they should be protected and managed for optimal survival as the generate a huge income through tourism for South Africa. Other game and wild life should only be culled to assist in the survival of tue specie. More funds should be invested in our wild life and game reserves to assist in this process.	Thomas
	2020-04-24 10:51:24	Western Cape		No I do not	Personally I don't think any animals should be eaten. Period. You should send out an amendment that prohibits the consumption of all animals.	Cassandra

	2020-04-24 10:48:44	Western Cape		No I do not	Is the sad state the world is in right now not enough reason not to support this amendment? Please save our animals!	Loamie
	2020-04-24 10:48:40	Western Cape		No I do not	Directly to the Minister - what are you thinking??? How, can you possibly condone the 'slaughter' of sooooo many animals just to feed a few - there is more than enough animal farming (that I do not condone by the way) that takes place to feed those who want meet - to include wild life is barbaric to say the least.	Desire
	2020-04-24 10:48:16	Western Cape		No I do not	Are we now following the same road as China? People eating nonsense getting sick, running more risks? Who are you going to blame there is no way gov can control the safety of this. The big five is a definite NO! Remember the price of a decision and the consequences that will follow.	Annaliza
	2020-04-24 10:47:05	Western Cape		No I do not	Our wild animals are our Nation's asset, for tourists to view. We have to safeguard our assets in this very changing world of climate change. We are losing so many rhinos to poachers and to hunters. Our future generations may soon not even be able to see a real rhino. Elephants are under threat as well as the East such as China and Japan have insatiable appetites for our rhino horn and our elephant tusks. We have to keep our special assets for the future generations. We have to value our heritage. All wild animals should be protected unless there is a need for culling which should only be decided by the Game Rangers and Park specialists. Our South African heritage is not for sale.	Adrienne Mary

	2020-04-24 10:46:42	Western Cape		No I do not	We have lost so much of our African heritage and the numbers of our animals is so low already, how can this amendment even be drafted? It's absolutely disgusting that some people have no respect for our land or our indigenous animals. I am blown away that anyone could accept this. How is it not illegal to kill an endangered animal? We will have nothing to show the future generations on a safari and lost millions from tourism industry.	Sian

	2020-04-24 10:45:40	Western Cape		No I do not	Uncontrolled decimation of the country's wild animal heritage is not the only way to help starvation in the short term and will severely impact the income for many South Africans from future tourism.	Joan

	2020-04-24 10:45:23	Western Cape		No I do not	This is rediculous. You cannot actually think that this could possibly be a good idea. Why does everything need to be eaten?	Monique

	2020-04-24 10:44:29	Western Cape		No I do not	Is this intended for the chinese market? Keep our endangered, indigenous, wildlife protected. This amendment needs to be amended.	Edward

					Why does this even need to be said? Whoever is in support of this draft ammendment, either doesn't understand that allowing access for people to just chase the wilderness and it's resources till they run out and consuming of all the life in the seas and land is going to have disastrous effects on the Planet and Human Life. (this ignorance alone should be enough to not allow for something like this ammendment to even be considered.) or they are consciously choosing, regardless of the consequences. To put this amendment forward knowing that this is going to scale up, like most valuable resources do. Will reach a point where we have completely eaten the oceans and left all natural life bare. At some point you are going to have to ask what kind of a world you want to leave behind. We are still cleaning up the disasters and tragedies of the past. And if we continue down this path, the youth will have to live in a baren world that We left for them. This ammendment is idiotic and how it got this far is insanity. There are countries that have massive populations and they will eat our resources dry. Please don't rape our beautiful world for profit. Us humans are puting strain on the ecology of the planet as is.	Kyle
	2020-04-24 10:44:05	Western Cape		No I do not	I think this draft amendment is extremely unethical - we should be moving away from eating meat completely and looking at a more holistic, plant-based lifestyle, which is becoming the norm globallly. All animals have the right to life! But over and above this, many of these species are threatened in South Africa and should have a higher level of protection. Sadly this amendment will follow how the Chinese operate and its concerning that South Africa is very heavily indoctrinated by the Chinese and their mentality. I say NO to this unethical and unacceptable amendment to this Act.	Fiona

	2020-04-24 10:42:47	Western Cape		No I do not	NO! NO! NO! The world is in chaos with a virus that is suspected from transferring from a wild animal to humans. Leave the wild animals, birds and fish alone. We would like to reinstate South Africa as a top tourist destination with the wild life a huge attraction. Poaching of endangered species is rampant, what would happen if the slaughter of endangered wild is legalised. Nothing for future generations!	Gay
	2020-04-24 10:42:44	Western Cape		No I do not	I strongly disagree with this amendment, opening the door to human consumption of animals that should be protected and conserved. Especially in line with the Corona Virus pandemic, this change is dangerous and too unspecific. As all other animals are included, does it mean it is ok to harvest bats and pangolins and create another world pandemic -this time originating from with South Africa? It is time we create laws that protect our animal kingdom -not further driving it to extinction. If this list is accepted (including Rhino and Giraffe????) what legacy are we leaving to our children? Is it being enacted to please the insatiable appetite that the Chinese have for everything edible on this planet?	Dieter

	2020-04-24 10:41:03	Western Cape		No I do not	People and animal welfare have fought hard to save these animals from extinction, now you propose to eat them. These animals are ONLY found in Africa and that brings tourists and that brings money. THINK about that.	Gail

	2020-04-24 10:39:34	Western Cape		No I do not	The government must protect our wildlife. In fact we as a country should be encouraged to eat less meat anyway. Killing off wildlife is not an option and it is quite disturbing that a government minister thinks this is the way to go!	Pepe
	2020-04-24 10:39:33	Western Cape		No I do not	Didn't we learn anything from the corona virus?! The future should have less meat in it, not more, and absolutely NO wildlife!	Louis
	2020-04-24 10:39:04	Western Cape		No I do not	Protected species should not be included on the list. This will encourage destroying our precious wildlife.	Antoinette
	2020-04-24 10:39:00	Western Cape		No I do not	Why are we even talking about meat safety? We need to talk about animal safety. All animals. Stop eating animals. All animals.	Megan
	2020-04-24 10:38:06	Western Cape		No I do not	It is tragic that people would even think of slaughtering endangered animals. And what would happen to tourism here if we have no more game parks to visit? If this becomes legal it will not be long before all the wild animals will have been slaughtered.	Margot

	2020-04-24 10:37:43	Western Cape		No I do not	I think it is shocking that species like elephants and Rhino are included. These wild animals require our protection in this country. I do not agree with the consumption of wildlife .	Lara

	2020-04-24 10:36:06	Western Cape		No I do not	I am totally opposed to the slaughter and export of any wildlife. This is an obvious appeasment of Chinese demand for strange and abnormal "delicacies" . What next, the capture and slaughter of stray dogs and cats? NO!!!!! NO!!! NO!!!	Gregory

	2020-04-24 10:34:41	Western Cape		No I do not	I am schocked to see the list of animals. It is not necessary to eat endangered animals. Why would anybody need to do that? Regards. Elmien Mare	Elmien

	2020-04-24 10:29:23	Western Cape		No I do not	This is a ridiculous proposal considering wild game for slaughter meat purposes. Will be totally abused. What about transmission of diseases..eg co19. Just another way for corrupt people to exploit nature	Patrick
	2020-04-24 10:28:42	Western Cape		No I do not	When the world is STOPPING the sale and transport of wild animals it is ASTONISHING that SA wants to do the opposite. And put populations of wild animals at risk. And also the HEALTH OF OUR CITIZENS. Do NOT allow wild animals on this list	Jackie
	2020-04-24 10:28:34	Western Cape		No I do not	Our animals all of them in the country should be protected and not used for hunting or eating. It is a disgrace to mankind. The world is fragile enough as it is and we all need to do something to protect what is left!	Jenny
	2020-04-24 10:28:32	Western Cape		No I do not	ABSOLUTELY NOT! Not now. Not ever! Keep our wild life safe!	Margaret
	2020-04-24 10:28:18	Western Cape		No I do not	I absolutely do not support this amendment. I am appalled that some of our endangered animals are included on this list. Our wildlife is a precious resource (and tourist attraction) which is dwindling by the day. Everything and anything should be done by the minister to protect our wildlife. It seems like our government is wishing to replicate the catastrophe in China ito obliterating wild life and its consequences.	Merlene

	2020-04-24 10:23:13	Western Cape		No I do not	Any policy changes now, will take months or years to read dress later In the meantime, so many endangered animals will have died. 	2020-04-24 10:21:46	Western Cape		No I do not	This law is nothing other than an attempt to eliminate our rights to own hunting weapons. So I am not blind to what is being attempted here. SA game meat is of the safest in the wirld to consume and more over is also part of our heratage to be allowed to consume as Afrikaaners. So I say NO to this attempt to further disarm the Afrikaaner!	Mark
	2020-04-24 10:21:32	Western Cape		No I do not	Any endangered species or threatened species should be excluded from slaughter and commercial use.	Marius
	2020-04-24 10:21:12	Western Cape		No I do not	This is just appalling. Our wildlife need to be protected, not eaten! So many of them are either near or extinct. This will just increase their demise. When they are gone tourism will collapse. This is also incredibly bad for the image of South Africa as a tourist destination. You will be driving the country into the ground even further. Disgraceful to even consider this. I am absolutely appalled by this	Gina
	2020-04-24 10:20:44	Western Cape		No I do not	Has the minister not learn't anything from the current pandemic? Leave the animals alone!	Faheema
	2020-04-24 10:19:16	Western Cape		No I do not	I thought that the current COVID-19 pandemic was a very good example of why eating wild animals was a bad idea, so why expand the list of game legal to consume? I also fail to understand the inclusion of endangered species on the list of animals for consumption, such as the the rhino. The rhino that is going to go extinct because of poaching? I cannot support amendments that threaten our local wildlife and place it under further strain.	Kathryn

	2020-04-24 10:18:12	Western Cape		No I do not	How can this country have in place protection of wild life and at the same time propose to slaughter them. Hypocrisy and a contradiction in terms. Our wild life is a tourist resource essential to our collective livelihoods.	Ann

	2020-04-24 10:17:58	Western Cape		No I do not	This appears to be “sponsored “ by the Eastern country, who’s citizens eat anything that moves. Why are we actually considering a change to the list, who requested it? Looks like a fund raising exercise for our ruling party.	Thomas
	2020-04-24 10:17:45	Western Cape		No I do not	I would hope that the fact that Covid 19 probably originated in a market selling animal meat will mean this new policy will be totally revised and left as is. There are conservation issues at stake here. Where there is a market, people will poach and breed illegally for financial gain.	Thalassa
	2020-04-24 10:17:30	Western Cape		No I do not	The greed of politicians is diminishing our wild life . Is the possible origin in a wild life food market in Wuhan of the Corona virus not enough to make you abandon the idea completely?	Lorraine

	2020-04-24 10:15:40	Western Cape		No I do not	Wild animals are a rich heritage for the earth - instead of destroying farms and killing farmers, rather facilitate the improvement and expansion of crop and cattle/ sheep farming.	Madeliene

	2020-04-24 10:14:01	Western Cape		No I do not	It does not make sense to me to have animals like rhino's, hippo's and giraffe on a meat list. Immediately they lose protection and become "food". That is not how we look after our animals and our country	Douglas

	2020-04-24 10:10:51	Western Cape		No I do not	I find this proposal absolutely ridiculous. Our beautiful country that is known for its wildlife and spends thousands of rands on anti poaching campaigns on some of the animals that are on the list. The virus that is affecting the whole world came from exactly that type of behavior, to eat wildlife that is supposed to be looked at and not eaten!!!! Please stick to the animals that are bred for human consumption like cattle and sheep. Stop the greed!!!!!!!	Charlotte
	2020-04-24 10:10:42	Western Cape		No I do not	Wild Animals that are on the endangered list anywhere in the world including South Africa should not be on our list for human consumption or killed for human consumption. In light of what happened with the COVID 19 virus that scientists think came from slaughtering wild pangolins we have to be very careful with making our wild life list for human consumption longer.	MARIANNE
	2020-04-24 10:09:10	Western Cape		No I do not	Its obvious the way the Chinese are moving into Africa because of our mineral resources and particularly South Africa that our Government wants to accommodate their eating habits which to say the least is really different to western society plus the general consensus world wide is that the corona epidemic originated in China so therefore i am totally against the slaughtering of the animals mentioned in this draft amendment.	ian

	2020-04-24 10:08:21	Western Cape		No I do not	The new list includes many animals and species that should be left in their natural habitat. Rather focus on ensuring that existing legislation is applied across the board. By including all types of species will open up opportunities for many ill-conceived schemes that will exploit wildlife without a returning investment. This new proposed list appears to include too many species that are not meant to be exploited.	Andre

	2020-04-24 10:07:03	Western Cape		No I do not	We have seen first hand what the effects of eating wild meat have caused on this global COVID-19 pandemic (whether true or started in a lab 1 month before is still under speculation). We need to realise that all of the severe diseases and virus outbreaks have been caused from the consumption of animal products. We as a country should take the approach of reducing animal product consumption. Utilising our farmland to make food, not to feed animals, but to feed people. We will have bountiful supply, more than we ever need!	Peter

	2020-04-24 10:01:26	Western Cape		No I do not	The fact that Rhino is on this list is deeply disturbing. WE are in a situation now more than even where we see what nature means to us, WE need to do all we can to protect it. WE have enough meat in South Africa, there is no need for this amendment that will threaten some of our wildlife.	rochelle
	2020-04-24 10:01:18	Western Cape		No I do not	We need to protect animals and see where eating animals got us...in a international lockdown. Stop eating animals and protect them.	Menita
	2020-04-24 10:00:57	Western Cape		No I do not	The infrastructure in South Africa doesn't even allow us to slaughter domestic animals in a humane and ethical way, additional wild animals will put further strain on the system. Not to mention the stress wild animals will suffer leading up to the slaughter which going to lead to "farmed" wildlife which has further welfare implications.	Connor

If we continue in this route, in 10yrs time we will have no wild life animals to show to our children. Who even eats these animals? I certainly do not support this. These are just an example, there are more on the list that I do not support, please remove them • Horse, Donkey, Mule, Zebra, Warthog • Rhinoceros • Hippopotamus • Giraffe • Elephant	Thembakazi

	2020-04-24 09:59:25	Western Cape		No I do not	The parasites in government just cannot comprehend that actions has consequences. When all has been run down and demolished they will stand back in amazement and say:"Who on earth did this?". The vast majority of this country cannot even understand the importance of family planning; how in the world can they be trusted to be responsible about nature and what mother earth has afforded us?????	Pieter
	2020-04-24 09:58:47	Western Cape		No I do not	What is wrong with you people. After seeing what is happening in the world because of a animal market you really want to contribute to the problem? This slaughter has to be stopped and stopped now if we are to save our planet and mankind.	Beverly
	2020-04-24 09:58:32	Western Cape		No I do not		Kate
	2020-04-24 09:58:17	Western Cape		No I do not	Is South Africa looking to start another pandemic. Our wildlife is our heritage. No stop this, have we not yet learnt as to what took place in China	Shukria
	2020-04-24 09:58:04	Western Cape		No I do not	Animals allowed to be slaughtered for human consumption should be a small list of widely accepted animals and transportation of any animals for slaughter internationally should be banned completely. There should be a minimum distance from place of being raised and slaughter, no travelling from country to country or even region to region. There should be absolutely no endangered animals on the list. Some wild animals that have been culled could be included but no elephants, rhinos, pangolins - abosolutely no endangered animals. Animals that are raised to become food should be treated with the highest degree of respect and compassion.	Vincent
	2020-04-24 09:58:03	Western Cape		No I do not	Animals allowed to be slaughtered for human consumption should be a small list of widely accepted animals and transportation of any animals for slaughter internationally should be banned completely. 	2020-04-24 09:57:54	Western Cape		No I do not	Legal slaughtering of animals like rhino, elephant and giraffe will just stimulate illegal animal hunting and killing of endangered wildlife.	Gerhard
	2020-04-24 09:57:49	Western Cape		No I do not	This is a strange time to amend the act - especially after China has just cut many wild species from their list. What is it with the powers that be that they do not get conservation?? Leave threatened species alone!!!!	Nana
	2020-04-24 09:57:26	Western Cape		No I do not	100% NO!!!!!!!!	Nicky

	2020-04-24 09:55:42	Western Cape		No I do not	It is time that we see these living resources for what they are: living resources that are more valuable alive than dead. If we continue to convert our living resources into money, which is what this amendment is essentially trying to do, then it won't be long before our living capital is eroded completely. At that point, those who have monetized these resources may have lots of money, but very little else since our own health as a species is connected to the health of living capital around us.	Tristan

	2020-04-24 09:55:41	Western Cape		No I do not	I cannot comprehend why this would even be discussed at this surreal time. How could anyone think it is right in anyway to include our endangered animals. What message are you sending to the rest of the world! Absolutely disgusting and deplorable.	Liz
	2020-04-24 09:55:23	Western Cape		No I do not	The only thing we should be doing regarding endangered animals is protecting them, certainly not putting them up for slaughter. We will be destroying ecosystems and our rich heritage. We do so much to keep these animals alive and off the endangered lists and now you want to legalise poaching? And pretend that your wishes are more important than these incredible animals living? How dare you.	Sam
	2020-04-24 09:55:10	Western Cape		No I do not		Michelle
	2020-04-24 09:54:52	Western Cape		No I do not	We as humans have done enough damage to this world, and making it legal to trade in meats such as rhino and Elephant will just further destroy these animals that are already almost extinct. We have enough other sources of meat to choose from, so include even more species is just not the answer. We were put on this planet as protectors of the animals, not to destroy everything that we see	John
	2020-04-24 09:54:23	Western Cape		No I do not		Ilze
	2020-04-24 09:53:57	Western Cape		No I do not	The list contains numerous wild species that must be left in the wild, and should in no way be slaughtered for any reason, least of all export. This list is the start of another corona-type virus menu.	Michael
	2020-04-24 09:53:20	Western Cape		No I do not	Endangered and threatened should not be included Also, practices used for the species allowed should be vetted, checked and conform to proper regulations	AJL
	2020-04-24 09:53:15	Western Cape		No I do not	Threatened species should never be slaughtered nor species dangerous for human consumption	Inga

	2020-04-24 09:51:13	Western Cape		No I do not	As a vegetarian, I do not support the slaughter of any animals, for whatever reason or purpose. I realise, however, that South Africa is a meat-loving nation and that a plea to stop the sale and procurement of all meat would be fruitless. I strongly recommend that the slaughter of animals excludes those found in the wild, including all reptiles and wild bird species. In other words, to limit it to cattle , pigs and chickens (however much that saddens me, because they are beautiful, intelligent beings).	Willemien

	2020-04-24 09:50:34	Western Cape		No I do not	A blanket allowance will further endanger the endangered species. Restrictions are necessary.	Jack
	2020-04-24 09:50:06	Western Cape		No I do not	Once you open this door it will be the end of our wildlife. South Africa is in a unique position to drive the innovation for having insects as added or replacement for protein.	Dirk
	2020-04-24 09:49:25	Western Cape		No I do not	S No I do not Did people not see what the slaughter markets in China look like. Do we seriously want to go that route . Will the Government not learn a lesson from this Corona Virus pandemic. Earth has decided to hit back. Stop the slaughter and trade of wild animals. Keep the old list with the removal of all threatend wildlif like elephants, hippos ect. Assist farmers to start breeding with exceptable stock like cattle. Leave nature alone. Do not set the start to more pandemics.	Frederick
	2020-04-24 09:49:20	Western Cape		No I do not	THIS IS UNSAVOURY AND UNETHICAL TO SAY THE LEAST. MAYBE THIS AMENDMERNT IS TO PROVIDE THE ANC'S ALLIES WITH THEIR PREFERRED EXOTIC MEAT. NO! NO! PROTECT OUR WILDLIFE. IT IS NOT FOR THE BENEFIT OF THE CHINESE, KOREANS AND vIETNAMESE	ANDRE
	2020-04-24 09:48:25	Western Cape		No I do not	Please...we need our animals and they need us. Once we kill all of the animals, the world of people will also be destroyed. Please NO to this extended list of animals.	Nell
	2020-04-24 09:48:10	Western Cape		No I do not	I believe we need to protect threatened species in South Africa. Animals are not commodities.	Ntsiki

	2020-04-24 09:47:46	Western Cape		No I do not		Sabrina
	2020-04-24 09:47:44	Western Cape		No I do not	I am shocked @ the extent of animals included on this list. It is a slippery slope adding Wild animals - especially those on the endangered list. It opens the system to all kinds of abuse.I think the list needs to be dramatically edited -especially removing with immeadiate effect any animals on the endangered list & those that are vulnerable. Furthermore I think that the minister should stipulate conditions that require the most humane method of transport & slaughter. possible. Lets show the world that we are not something akin to China ITO of animal trade. Remember this quote from Gandhi “The greatness of a nation and its moral progress can be judged by the way its animals are treated.”	Jenny
	2020-04-24 09:47:41	Western Cape		No I do not	Endangered animals should be protected in every way, for their sake and AND OURS! Man has denuded our planet in every way. Is this new list the result of pressure from overseas trading partners? PLEASE DO NOT ALLOW THIS!	Michelle

	2020-04-24 09:47:35	Western Cape		No I do not	In the first place we are currently sitting with the Corona Virus pandemic which scientists believe was transmitted from a wild animal. Secondly this will further endanger our already endangered wildlife. Seems like this draft is focused on money!	Mariette

	2020-04-24 09:46:14	Western Cape		No I do not	I cannot see why the list needs to be extended to wild animals. It is barbaric to breed animals for slaughter in the first place, but to extend the list because someone would like to know what giraffe meat taste like is really unnecessary.	Karina
	2020-04-24 09:45:34	Western Cape		No I do not	Net diere wat geteel word vir hulle vleis moet geslag en verkoop word.	Gerhard
	2020-04-24 09:45:18	Western Cape		No I do not	It is absolute madness to allow the point blank slaughter of so many species of wildlife. I see even porcupines are inoded, as well as Rino's to mention just 2 on the list! Ease reconsider, best isnto sticknto the current list. Thank you	Mari
	2020-04-24 09:44:52	Western Cape		No I do not	It is beyond comprehension that endangered species are on this list. If this list of animals is approved, many species of our precious wildlife would soon become endangered. Please, please do not make senseless amendments.	Rina
	2020-04-24 09:44:31	Western Cape		No I do not	Opening us up for wildlife sales and consumption will promote Bush meat use and soon will include endangered and dangerous species to be consumed. Have we not learned anything from the global impact of eating Bush meat,,,,,,,, ebola, Corona virus.	Marcell
	2020-04-24 09:44:27	Western Cape		No I do not	It is reprehensible that endangered animals would be ok to slaughter. The government needs to stop this now!	Carla
	2020-04-24 09:44:15	Western Cape		No I do not	Is this an April's fool joke ? This is the 21st century and not the time of the Neanderthals. LEAVE THE ANIMALS ALONE.	Adèle

	2020-04-24 09:43:25	Western Cape		No I do not	How will all this be policed ? Our wildlife is extremely precious and unique to us . Our fish and marine life has been plundered by the Chinese,Korean Vietnamese etc as have our Rhinos Elephants Pangolins etc . Its a crimminal haven ..there are hundreds waiting for the next call to kil and strip out our biggest tourist attraction ..wild life . I urge that you do not view these animals as a source of meat .	jan

	2020-04-24 09:42:21	Western Cape		No I do not	I do not support this. Seems really stupid to me to add animals to this list that are clearly endangered already due to poaching, like the Rhino and Elephant.	Asea
	2020-04-24 09:42:09	Western Cape		No I do not	The old list should be reduced, Less animals should be tortured in the form of killing and more animals should be protected. We need to protect our precious wildlife.	Michelle

	2020-04-24 09:40:51	Western Cape		No I do not	I find it quite unfortunate that the current government feels the need to add endangered species to a list of animals approved for slaughter, probably entirely driven by greed and profit. This is only going to encourage people to kill everything they see and participate in illegal activities. How does approving Rhino for slaughter fit in with the endangered species act? Seems the Covid 19 pandemic and the link to wet markets and eating of everything that moves has taught the people in charge within the ANC nothing.	Michele
	2020-04-24 09:40:45	Western Cape		No I do not	Humans are sick. Animals have a right to be on this planet.	Jessie
	2020-04-24 09:40:36	Western Cape		No I do not	We are here to preserve what we have left, given the massive destruction of wildlife in internationally.	Haydn
	2020-04-24 09:39:17	Western Cape		No I do not	There is not a single argument in favour of this move and every reason to object to it. Nothing in the wild will be safe if this law is passed. What can it achieve beyond putting money they don't need in astute business people's pockets and giving careless individuals a chance to say, 'I've eaten hippo steaks'. I vehemently object to this proposed law.	Rosemary
	2020-04-24 09:39:11	Western Cape		No I do not	Rhinos are on the endangered list, how can we use these majestic animals for food or is it just to use the horn in other countries for a medication that has been proven not to work. Africa has a vast array of animals that the world comes to see. How can we eat these animals? Tourism brings much to our economy - let's not destroy a major part of our heritage.	Michele

	2020-04-24 09:39:10	Western Cape		No I do not	I simply do not understand how this proposal can even be considered. For years we have been watching the decline in numbers of dozens of species, particularly Rhino and elephant, superb wild animals. Millions is being spent on trying to save them from extinction, yet the poaching continues. It has been proven that if one species, e g humans, exploits others, the balance of nature is disturbed with negative consequences . We are now in the midst of a global pandemic due to the human species. The human quest for more, always more - money, power, possessions, fame at the expense of others is crippling the world . Diminishing and ultimately wiping out animal species is simply another step towards wiping out humans .	Wendy
	2020-04-24 09:38:54	Western Cape		No I do not	Why on earth would South Africa even consider changing the list of animals in this act?! The mentioned changes are totally unacceptable!!	Alta
	2020-04-24 09:38:37	Western Cape		No I do not		Jacqueline
	2020-04-24 09:38:23	Western Cape		No I do not	I object in the strongest possible terms to this revised list, especially regarding the inclusion of the endangered and near endangered species. We are supposed to be custodians of the planet and all it's species, not those who arrange their genocide. No, no and no!	Richard
	2020-04-24 09:38:02	Western Cape		No I do not	Surely they have kept up to date with ths WORLD WIDE BANNING of wildlife meat being sold? Allowing this to go ahead will just mean senseless slaughter of our wildlife. When, please Lord, will the greed end?	Lynette

	2020-04-24 09:36:40	Western Cape		No I do not	If there is one thing we should learn from this pandemic, is that we should be vigilant about what we eat.....why push the boundaries. I think we should be looking at only domestic free range produce. Healthy food = healthy nation. Mass production should come to a halt.....Meat should be a luxury.	Diane

	2020-04-24 09:35:56	Western Cape		No I do not	People need to realize that they eat too much meat in any case. Why eat more animals? It is much better for the environment to become vegetarian or even better, vegan.	Anida

	2020-04-24 09:34:48	Western Cape		No I do not	Killing wild animals on a commercial scale will annihilate the species, remove food from predators (of whom many are already on endangered lists) it will promote wholesale poaching as well.We know there are no resources left to ensure the law is followed in protecting species and numbers killed etc!! 	2020-04-24 09:32:53	Western Cape		No I do not	I am totally horrified at the idea. Why is this even being considered? Our wildlife is under such pressure as it is. There are so many species that are teetering on the endangered list that any more pressure and we will lose important resources, not to mention that as part of our ecosystem they serve a purpose. Apart from the health aspects (re: Covid19) and conservation issues, our wildlife is an enormous asset as far as tourism is concerned. It is extremely reckless to apply more pressure onto these resources.	ANN

We have ENOUGH domestic farming livestock to sustain the required food resources in this country!	Mandy
	2020-04-24 09:28:43	Western Cape		No I do not	The world should be moving away from this. This is UNACCEPTABLE. This is not for this minister to give away the rights of our animals as a South African I OBJECT STRONGLY	Jodi

	2020-04-24 09:18:07	Western Cape		No I do not	The proposed update to the meat safety act is preposterous! Not only will it cause the the extinction of our wild life , it may well generate the creation of viruses that could make the Covid19 pandemic insignificant.	Hilary
	2020-04-24 09:17:55	Western Cape		No I do not	This is totally unacceptable. We have sufficient domesticated animals to supply in our needs. Furthermore there are game farmers who also supply meat. Why bother with threatened species? Why this stupidity?	Pieter
	2020-04-24 09:17:52	Western Cape		No I do not	This is insane! What is wrong with people?	Lucille
	2020-04-24 09:17:20	Western Cape		No I do not	This is negligent. We have just had a major outbreak from the slaughter and eating of wild and endangered animals and now we want to make that more possible? This is a threat to the ecology of our country and the planet. China introduced farming and consumption of wild animals years ago and look where that has gotten them. This is the second SARS outbreak from Chinese origin and Chinese over fishing and trade of endangered animals is a major threat to our planet. How can our country even be considering this.	Jackie
	2020-04-24 09:17:20	Western Cape		No I do not	Most of these animals are listed in the Bible under the list of animals that should not be eaten. Why? Think of the Sars and Mers viruses (Covid 19) Use commen sense.	Marlene

	2020-04-24 08:53:33	Western Cape		No I do not	There are animals that are safe to consume because they are bred for eating like sheep, and cows and springbok etc. The there are animals who roam freely and are nearing extinction. Animals who are not farmed and bred for consumption , should not be allowed to be hunted and killed as they then WILL become extinct . Once that happens , it cannot be turned around. Some animals are also not safe to eat as the Corona Virus taught us . Please be sensible and review this list. Elephants, Rhinoceros, Hippopotamus, , Horse ,donkey, dog / canine, cat/feline etc should not be on the list for consumption	Suzette
	2020-04-24 08:53:15	Western Cape		No I do not	This new list is ridiculous and fits well into the realm of absurd. I doubt if the Minister has ever heard of many of the animals listed. 	2020-04-24 08:41:30	Western Cape		No I do not	it is at best disingenuous, at worst dangerous to facilitate the slaughter and transportation of wild animals, especially in this time of a global pandemic probably caused by exactly this practice. How can you promise food safety? How can you assure the public that future epidemics/pandemics caused by gross mismanagement and abuse of our environment will be avoided? To encourage the slaughter of ENDANGERED animals is evil, prompted purely by greed and is morally unconscionable. Not in my name.	Tessa

	2020-04-24 08:41:20	Western Cape		No I do not	Dear Minister. I fail to see how you can include Rhino on this list. Are you not aware of the poaching that is going on this country? The Black Rhino is critically endangered, do you think poachers would take a look at the Rhino they are about to poach and change their mind because it may be a Black Rhino? They kill indiscriminately, they could care less. As for Oribi, they are rare and now you want to ensure that they end up on the critically endangered list by adding them to this list. I fail to see any logic in your construction of the amended list unless it is for economic gain. Leave wildlife alone!!!	Udo

	2020-04-24 08:39:52	Western Cape		No I do not	In this day & age ... with all that is happening in the world , viruses, extinction of species, poaching, illegal trading - this list should be being reduced and not increased - the short sightedness and the impact of adding more animals to this list is very concerning and it is difficult to understand the clear reasoning such a decision . 	2020-04-24 08:37:19	Western Cape		No I do not	It seems somewhat bizarre that in a time when we are hit by a a zoonotic virus which comes from the eating of wild animals, South Africa decides to widen meat choices to include wild animals. 	2020-04-24 08:33:00	Western Cape		No I do not	Protecting our Wildlife is paramount to our success as a country and as an example to the rest of the world. Consumption of these animals is not necessary. There are plenty of cows, sheep, pigs and goats for people who prefer a protein rich animal based diet. Opening up this trade will create demand in the Rast and we will continue to see poaching and illegal trade in animal parts for medicinal use. The coronavirus has spoken. Leave the wildlife alone. Cruelty to animals breeds cruelty to people. As a nation now is our time to embrace compassion and kindness. Our President has been a leading light in this Pandemic. May he continue to hold the line and let South Africa set its own rules On the Global Syage.	Amanda

	2020-04-24 08:32:20	Western Cape		No I do not	These wild animals, which help comprise our national heritage, have great inherent value by virtue of their presence in our ecosystems. They are part of our inter connected living world that enriches our lives. They should not be exploited. Our attention should be focused on conserving the habitats and those creatures inhabiting them. The idea of harvesting wild animals as a resource is outdated, unethical, cruel, it disrupts ecosystems, and importantly, as we are currently seeing, it is a potential source of zoonotic diseases known and unknown. 	2020-04-24 08:30:31	Western Cape		No I do not	Eating animals that potentially place them on the extinction list is doing a dis-favour to future generations, and completely unnecessary. It is a selfish act, unfounded to deliver on any of the the assumed benefits to consume these. Further to this, as we have seen with COVID 19, the debilitation it has caused and the many it has plummeted into starvation and the untold anguish and fear it has caused, not to mention the loss of life. Lets leave animals where they belong. They have long grown used to these viruses, lets leave them be. We know we claim to be the strongest animal on earth, but if this sort of behaviour continues, there will be no earth, and human existance will be a thing of the past. 	2020-04-24 08:28:50	Western Cape		No I do not	Why is this being done? It is a 3 rd world practice and barbaric to say the least. Animals are already endangered by poachers and now this?	Bernadette
	2020-04-24 08:28:14	Western Cape		No I do not	There is absolutely no need to extend the list of animals allowed for slaughter. It is absolutely wrong and greedy, in that such an amendment will massively affect these eco systems, which has catastrophic consequences; potentially cause extinction of these animals, especially the Rhino and Giraffe, preventing future generations from appreciating these majestic animals who have a pivotal role to play in their environments. This cannot happen!	Michelle

	2020-04-24 08:27:36	Western Cape		No I do not	the Old List is the one I support. It seem asif the writer/s of the new list just took a list of all animals and incorporated it here. I cannot imagine all these animals slaughtered and the meat exported.	Willie
	2020-04-24 08:27:17	Western Cape		No I do not	This is an outrageous proposition. (1)The cataclysmic corona pandemic probably originated from the human consumption of wild animals from Africa . These animals are known to carry many contagious viruses that are pathogenic to humans. It is madness to include these animals on the menu!! Is this being introduced to serve our masters the Chinese?? (ii) In a world threatened by climate change and the extinction of thousands of species of plants, animals, insects etc. It is imperative that we protect our biodiversity. (iii) South Africa's rich wildlife is an important tourist attraction, employs many people and is an important source of revenue. We should protect this, not destroy it!	Ian
	2020-04-24 08:27:07	Western Cape		No I do not	Many progressive countries are moving toward more sustainable agriculture practices, with a view of protecting wildlife and endangered species while also ensuring animal welfare is a priority. With the reality of the climate crisis and food shortages, South Africa should be adopting these sustainable practices and relook this policy entirely. I do not support this bill at all.	Toni-Lee

	2020-04-24 08:26:16	Western Cape		No I do not	Remove all endangered animals /species from the list	Paula
	2020-04-24 08:25:31	Western Cape		No I do not	I do not support extending the list at all. There is no need to extend this list to species that are endangered and part of South Africa's wonderful biodiversity that has the potential to generate far more jobs through tourism than being harvested for food. Increasing South Africa's food security is of paramount importance and this should be done by investing in small scale farmers to increase the quality and quantity of domesticated livestock through improved sustainable farming practice. This will create jobs where they are needed and develop a new generation of farmers that this country so desperately needs. The proposed list is clearly out of sync with what is happening in the world as a result of the wet markets in China. Even considering such an amendment will once again demonstrated that Government policies are short sighted and not properly considered.	Angus
	2020-04-24 08:25:20	Western Cape		No I do not	Please leave our wild animals to roam and not be killed for food. They are under enough threat by development and other man made restrictions. Enough is enough.	Ginny

	2020-04-24 08:23:12	Western Cape		No I do not	This leaves the door wide open for abuse of the system. South Africa has the capability of farming animals that are widely accepted in the civilized world as food. Have we learned nothing from the present crisis? If endangered and exotic animals are allowed to be legally consumed, we as third world country will end up with wet markets just as in the East because it opens the flood gates for poaching. How is the already inadequate, incompetent police force going to distinguish between legal and illegal game?	JOHN

	2020-04-24 08:06:08	Western Cape		No I do not	I do no support the export or import of any living being. All wildlife and domestic animals should be banned from any form of export or import. Also any part of a wild animal should also be banned from export. The idea of shiploads of live animals being exported for slaughter is repulsive. Similarly, the idea of exporting wild animals that are removed from their mother's care is equally repulsive. 	2020-04-24 08:03:38	Western Cape		No I do not	It goes against all moral, & compassionate values to slaughter these animals. The way one treats one's animals, is the way one will treat human beings. Besides, South African is a Tourist destination, known for it's Wildlife Nature Reserves. Do you really want to affect the Tourist Industry & lose revenue & reputation? And send the carcasses or live animals to wet Markets, or as exotic cuisine overseas? These wildlife animals have been on this Land long before we arrived here. They have a right to be here. They are our legacy. You will damage the Soul of Afrlca & her inhabitants by such acts of cruelty, disregard & greed. You may anger the Ancestors who regarded many of these animals as sacred. Do not implement this draft amendment.	Dianne
	2020-04-24 08:02:57	Western Cape		No I do not	This is one of the reason we are in the pandemic, thanks to the slaughter of animals and the way these animals are kept in cages, causing massive spreading of viruses. That in itself already says that everything is not above board. Can't the minister see that keeping these animals alive and in our country will mean a lot more in tourism money than what the meat can be sold for, or are there no personal gain from that? We are already in this crises due to the Chinese wet markets where all sorts of wild meat etc is sold, so why add to the problem by allowing this amendment and even more animals/meat being exported to countries where we would have no control as to what happens. We should be focused on over population not more consumption. Stop breeding our world is suffering due to over population of humans.	Sharon

	2020-04-24 07:48:36	Western Cape		No I do not	Given that the tourism industry in South Africa is already severely under threat due to covid 19, it would be absolutely ludicrous to limit its well-being further by reducing its ability to allow hunting of wild game such as springbok, blessbuck, wildebeest, ostrich and others that have been hunted for many generations and are not considered to be endangered animals. This list is made by people who do not understand the global impact of removing the Hunting industry from South Africa and the livelihoods of hundreds of thousands of people that will be impacted if such things were to happen. Meat consumption is essential to a healthy diet, hunting however is not. I do understand that endangered species are being threatened by Poachers who export them to countries that have a market for such things like China that needs to be regulated under the strongest laws, however there are large sections of South Africa, like the Karoo, where farming with animals such as sheep and cattle is completely impossible due to the lack of vegetation. The livelihoods of people living in that area depends on hunting of wild game and the sale of that meat to local citizens. If you want to cause an increase rate of unemployment and the crash of our local economy then you support a Bill such as this which is made by people who do not have an understanding of the grassroots impact of what they are suggesting.	Mariechen

	2020-04-24 07:47:20	Western Cape		No I do not	I definitely do not support this or ever will. Its just plain cruelty, money making, unscrupulous for humans to even give this a thought. They are God's creatures too.	Beverley
	2020-04-24 07:46:53	Western Cape		No I do not	I strongly disagree with this new list of animals!	Jeandre
	2020-04-24 07:46:52	Western Cape		No I do not	Please don’t, let’s protect our wildlife and enjoy them alive....humans have done too much damage to nature already....Coronavirus is the perfect example.....please please don’t allow this.....	Virginia

	2020-04-24 07:45:49	Western Cape		No I do not	These are endangered species. I’m horrified at this. The consumption of these wild and exotic animals goes against first world ethics. What kind of people are we if we don’t protect our own endangered animals? There will be immediate international interest and disgust.	Lara
	2020-04-24 07:45:39	Western Cape		No I do not	I am strongly opposed against this. Preserve DON,'T DESTROY	Lanie
	2020-04-24 07:44:36	Western Cape		No I do not	I don’t see the need to slaughter endangered species for the sake of food when there are plenty of protein substitutes available.... man can survive and has survived for decades without eating meat	Debbie

	2020-04-24 07:42:59	Western Cape		No I do not	We should now more than ever do our utmost to ensure the safety and protection of our national assets, inclusive or its animals. The sale, slaughter for consumption of wild/ game animals (especially those exotic or endangered species) which was the original reason for the latest pandemic outbreak as announced by the Chinese government, should be prohibited at all costs. 	2020-04-24 07:38:36	Western Cape		No I do not	These animals are our heritage of SA. They define our country further, they are endangered species. We have enough to eat, sorry but this is just barbaric!!	Herschel

	2020-04-24 07:37:59	Western Cape		No I do not	Excuse my bluntness, but I think the isolation has damaged her vision. This has been a time to reflect on the damage and destruction that humans have inflicted on this beautiful planet. The butchering of innocent, magnificent, intelligent animals (great and small), is vicious, cruel, greedy and shortsighted. What should be encouraged is planting of ' edible ' gardens in people's backyards and in open spaces. If we have learnt anything, we should have learnt to be more self reliant and appreciative of the nature all around us and that greed is nothing but an end to it all.	Janine
	2020-04-24 07:37:53	Western Cape		No I do not	it's because of people eating wild animals that viruses like the current Corona virus has the world in lock down. Do you want to see more viruses coming your way?	Murray

	2020-04-24 07:36:24	Western Cape		No I do not	I will rather not comment on the absurd nature and thought process if any that went into even suggesting this idiotic amendment. How in this world can you possibly try to justify the killing and sale of endangered species? What do you think this will do as far as enticing more poachers and organized crime networks to get involved in and part of the slaughter of endangered and other wild life species. Police can not even properly enact and contain COVID-19 on their own. They are not able to fight violent crime in SA. Conservation personnel are already stretched to the max. Who is going to police this and enforce the law? Wait let me guess another corrupt government official with friends in Asia.....	Ben
	2020-04-24 07:35:52	Western Cape		No I do not	What is the reason for including all these new animals on the list!? This just opens the door for the (further) exploitation and poaching of wild and endangered animals by foreign powers. Any planned short term financial benefit (for a few) will be far outweighed by the long term negative effects on the environment and, therefore, the country as a whole. This will not be policed and controlled properly.	Dylan
	2020-04-24 07:35:47	Western Cape		No I do not	Just appalling the lack of understanding this minister has for the portfolio. I am Sure that there is money and bribes behind the additions on this list. sickens me. Make it stop !	Amanda
	2020-04-24 07:34:49	Western Cape		No I do not	It is totally rediculous to include ENDANGERED species in this permitted list for slaughtering. A little more care should be taken in the selection of animals for slaughtering.	Lionel

	2020-04-24 07:32:59	Western Cape		No I do not	This is shocking and no better than the poachers who have been plundering our wildlife for decades. This saddens me deeply that government do not realise the impact this would bring upon our wildlife. For them to even consider adding these beautiful wildlife species to the meat safety act slaughter list for human consumption is shocking and a definite no no no..... !!!!!!! I ask you this simple question (Ms) T. Didiza, Minister of Agriculture, Land Reform and Rural Development. (Why do you deem it necessary to add our wildlife to your list when it really is not necessary at all.) Save the RHINO and all our precious WILDLIFE.	Renato

	2020-04-24 07:13:12	Western Cape		No I do not	The COVID-19 virus (also known as the Corona Virus) was spread due to sale of wild animals. Has the South African government not learnt anything?! Furthermore, the South African government should rather focus on conservation of these animals, especially the animals that are facing extinction. What about the safety of the animals? If one considers the matter when live sheep was shipped out to the Middle East, which the SPCA tried to prevent, the conditions that the animals were kept in was absolutely shocking! No animal deserves that kind of treatment! For once, please think of the animal and not the government's bank account. This Bill also has the potential to increase poaching of certain animals, such as the Rhino. As it is, the South African government cannot contain this and cannot even control the crime rate in South Africa as it is! This Bill should not proceed!!	T

	2020-04-24 07:08:17	Western Cape		No I do not	Did people not see what the slaughter markets in China look like. Do we seriously want to go that route . Will the Government not learn a lesson from this Corona Virus pandemic. Earth has decided to hit back. Stop the slaughter and trade of wild animals. Keep the old list with the removal of all threatend wildlif like elephants, hippos ect. Assist farmers to start breeding with exceptable stock like cattle. Leave nature alone. Do not set the start to more pandemics.	S

	2020-04-24 07:06:26	Western Cape		No I do not	During a time of a pandemic caused by a zoonotic disease we must do all we can to prevent a further pandemic. We must also ensure we protect our valuable wildlife. Diseases affecting human health like sars, Ebola, mers, swine flu and bird flu must be prevented and can be prevented by not eating wild animals. We must also ensure that farmed animals are kept under better hygiene and welfare conditions. I am strongly against this proposal.	Eugene

	2020-04-24 06:58:38	Western Cape		No I do not	I do not support this ammendment. There are enough meat sources already. After corona virus we shouldn't even be considering such a move. Rather encourage people to love towards a more plant based diet	Judy
	2020-04-24 06:58:17	Western Cape		No I do not	This is absolutely ridiculous, are we not suffering enough currently due to the careless trade of wild and endangered species? We should be reducing animal consumption not broadening the scope.	Megan
	2020-04-24 06:58:09	Western Cape		No I do not	This is iniquitous. Trading in meat of wildlife will do enormous damage to our ecosystems. In addition, as the world currently suffers the tragic results of trading in wildlife, it’s astonishing that this could even be considered.	Catherine

	2020-04-24 06:52:18	Western Cape		No I do not	The slaughter of a lot of the listed animals should not be allowed. Most of these animals are endangered and need to be protected. 	2020-04-24 06:34:04	Western Cape		No I do not	I do not support this idea. STOP, JUST STOP. AS A DEPARTMENT YOU ARE WAISTING TIME, ENERGY AND MONEY. THIS ACTION IS IDIOTIC. IT ONLY SHOWS THE LOW IQ LEVEL OF THE DEPARTMENT. Focus on issues that is a problem ie. The continuous illegal trade of rhino horns and the open illigal trade of abalone. As a department show initiative and solve those issues. STOP attempting to fool the people to think that you are productive. This is a retarded way of thinking. South Africas economy depends on on it. Just Stop. You are making a fool of yourself. With no evidence of any correlation between COVID 19 and game or livestock. Stop. Do something about issues that is problematic in South Africa which the department has failed to resolve instead of attempting to portray an image of self worth by implementing idiotic laws which will sink the South African economy draper than what it alleady is. The ONLY AFFECTS OF A STUPID IDIOTIC USELESS LAW LIKE THE PROPOSED WOULD BE TO HIGHLIGHT THE FACT THAT THE DEPARTMENT HAS FAILED IN EVERY ASPECT OF THEIR DISCRIPTION AND THE LOW IQ AND IDIOTIC RECLESS WAY OF THOUGHT. SO IT HIGHLIGHTS THE INCOMPETENCE OF THE DEPARTMENT.	George

	2020-04-24 05:50:28	Western Cape		No I do not	As Mayoral Candidate for the City of Tshwane (2016) this minister caused a wave of riots leading to the deaths of 5 people and the arrest of 40 others. This minister does not understand the terms "Wild life Preservation" , "The Big Five" And "Tourist Industry" to mention just a few! This minister seems to support the use of "Muti-Products" like ground Rhinohorn and Ivory as prescribed by certain non-medical "doctors". I suppose the RSA can expect such draft amendments from the ANC which will improve international exports to China and render the preservation of wild life in the RSA to null and void!	Ali

	2020-04-24 05:07:35	Western Cape		No I do not	Our country has a rich natural biodiversity in many national parks and nature reserves which is only place where many of these animals still occur naturally. We cannot afford to let the wild animals become food like domesticated animals. We earn foreign currency from tourists visiting our country to see wild animals in their natural habitat. Another reason which is so self-evident that considering this ammendment is outrageous. The corona virus migrated from a wild animal to humans due to irresponsible meat handling and consumption. Wild animals should stay wild and need our protection not exploitation .	Liesbet
	2020-04-24 05:06:26	Western Cape		No I do not	I am a vegetarian for religious and ethical reasons. The destruction of animal life is harmful to the fragile ecosystem and exposes human beings to pathogens such as Covid-19. It is irresponsible and reprehensible.	Aidan

	2020-04-24 04:38:03	Western Cape		No I do not	I read that the Meat Safety Act is: " An Act to provide for measures to promote meat safety and the safety of animal products; to establish and maintain essential national standards in respect of abattoirs; to regulate the importation and exportation of meat; to establish meat safety schemes; and to provide for matters connected therewith." Hopefully this means that the "Wuhan style slaughter" of animals in open markets etc, should not be permitted. I don't understand why the Minister of Agriculture wants to add more threatened species of wildlife, reptiles and fish, to an already disturbing list of animals? I am horrified to see that rhino, elephants and giraffes are on the list! Is this Government not interested in the conservation of South Africa's wildlife/game? What other animals are going to be put on this list later on, if it continues to be so easily extended? Leopard, cheetah and even lions? Lions might end up being bred and exported to make canned food, like they are bred for "canned hunting" for tourist trophy hunters . One day all our beautiful wildlife will be extinct like the dinosaurs, and children of the future will only see pictures of them in books and movies.	Sharon

	2020-04-24 01:57:56	Western Cape		No I do not	All animals on the endangered species list should be protected. No wild animal especially any of the big 5 should be killed without a permit. 	2020-04-24 01:54:56	Western Cape		No I do not	I am absolutely shocked by this proposed amendment. It feels as if we are going to be exporting the very heart of that which makes us Africa. 	2020-04-23 22:42:11	Western Cape		No I do not	Minister Didiza would do well to read up on the benefits of a nation treating it's animals with care and compassion. - even if she doesn't personally have any great love for them which is obvious. An Act which permits the slaughter /human consumption/ export of so many different types of animals, particularly endangered species, is heinous. Already we have 60,000 sheep at a time, on one ship, with little or no facilities having to endure horrendous permitted travel to their brutal death in the Middle East; we have lion farms breeding the animals for their claws, skins and canned hunting; to quote a few. The Minister is quite aware of this but doesn't seem to have any deep feeling about it hence this proposed amended Act. We need to drastically reduce the human population for the sake of all on this world. 	2020-04-23 21:49:17	Western Cape		No I do not	Dear Sirs I am totally opposed to the draft amendment to the meat safety act for a number of reasons. One reason is that I believe the world is in crisis today, at this very moment, because wild animals were killed and eaten. I would have thought that South Africans would have learnt something from this crisis as it was started in a wet market by people eating wild animals that are not meant for human consumption. Secondly, if the market for killing wild animals opens up, there are many animals which are going to become extinct. Throughout South Africa there are numerous organisations which work on a daily basis to try and save animals such as the rhino and the elephant from extinction, so how does it make sense to now make it legal to kill them? Many of the animals will also be killed inhumanely by unskilled people as many will be shot but not killed, thereby maiming them or injuring them and causing them untold suffering. Poaching will be rife in our country not just for horns but for the meat. The rate of reproduction of wildlife will never be able to keep up with the demand. I honestly cannot believe that the Minister is even contemplating this ridiculous act. The whole world has come to a standstill because of the very thing the Minister is contemplating doing. I sincerely hope that this draft amendment is not passed and that sanity returns to the human race who is destroying this planet that we live on. I would like South Africa to be a country that thrives and has respect for its people, its animals and nature. Please do not extend the number of animals that can be eaten.	Sandra

Government ignored its own science task team by redefining 32 wild species as farm animals

---

In listing 32 wild animal species as farm animals under the Animal Improvement Act (AIA) last year, the Department of Agriculture went against the recommendations of the government's own Scientific Authority which pointed out the dangers to wildlife of doing this.

[First par]

The scientific report on wildlife breeding was called for by the former Minister of Environmental Affairs (DEFF) and authored by 14 of the country's top wildlife scientists. It warned that the listing of indigenous game animals under the AIA would 'entrench and exacerbate many of the risks highlighted in this report…It is strongly recommended that no further indigenous species are listed.'

This is precisely what happened. The Department of Agriculture – which virtually sneaked the new listing onto the statute books as a two-page amendment to an addendum – either failed to read or simply ignored the extensive 170-page peer-reviewed DEFF report. Or was it all simply bad timing? There was no public consultation. The Agriculture admitted in Parliament that no scientific study was done in redefining the animals incorporated under AIA.

The DEFF report is likely to be the centrepiece of a court challenge by two civil society organisations. Review processes have been independently filed by the Endangered Wildlife Trust and SA Hunters and Game Conservation Association to have the amendment recinded. They will, among other things, seek to establish why breeder profits were favoured over sound science, why the process was not followed and how this move could impact conservation principles.

SA Hunters say intensive breeding can have conservation value where there are critically low populations. But it has noted 'growing concerns and evidence from various sectors regarding the potential cumulative impacts of intensive and selective breeding of game for the commercial benefit by game breeders and how this may impact on the status of game species.'

The DEFF report notes similar concerns. It emphasises that, far from being a conservation measure, captive breeding is a potential danger to wild populations through 'leakage' to free-roaming populations.

It added that 'intensive management and selective breeding of game poses a number of significant risks to biodiversity [and] the biodiversity economy … and may compromise the current and future contribution of the wildlife industry to biodiversity conservation.'

Other dangers include a venison health risk from over medication of intensely-bred wild animals, parasite infections on farms being transferred to wild animals, reputational damage to South Africa from 'canned' hunting of captive-bred animals as well as aberrant traits from increasing domestication, intensive breeding, hybridization, genetic manipulation and selective inbreeding.

The report concludes that 'the practice of intensive and selective breeding based on the findings of this assessment may not meet the criteria for sustainability.'

There's a fundamental truth underlying the report: wild animals know how to look after themselves – they've been perfecting it for millions of years. When their environment is controlled by humans, however, there are problems. In general, we act in our best interests, not theirs.

For this reason, according to the Scientific Report, it's essential to use a precautionary principle in our relationship to wild animals, because some actions cannot easily be undone and could precipitate a disastrous cascade.

The report also cautions against creating market hype to push prices above the intrinsic value of the asset. This has led to market crashes in canned lion hunting and the breeding of colour varients in SA, the ostrich market in the United States, the hybrid tulip market in the Netherlands and the emu market 'bubble' in Canada. In each case millions of dollars were lost.

'Speculation linked to investment interest in a market can lead to an escalation of prices as new investors buy into this market,' it notes. 'This can lead to inflated prices and oversupply, especially in cases of poorly developed consumer markets, as is the case for colour variants. The common outcome of such is massive profit for the originators and early investors and significant financial loss.'

According to the report, potential impacts related to the intentional breeding for selective traits such as colour variation or increased horn or body size include the expression of 'warped' genes, the loss of genetic diversity, outbreeding depression, physiological stress, and domestication.

If these animals are released into the wild – and the report says it would be very difficult to prevent this over time – weakned genetic strains could 'infect' wild herds and could lead to gradual extinction.

'A loss of genetic diversity is highly likely to result in decreased fitness and in the long term reduce the evolutionary potential of populations to adapt to environmental change.'

Another problem is the inappropriate use of products to reduce parasites which leads them developing resistence and then spreading to other farms and wild animals. It could also lead to the entire failure of the vetenary product. There is also the problem of residual chemicals in venison that's marketed locally and internationally.

Continuous management will also entrench the domestication process, the report says. 'Domestication leads to the habituation of animals to humans, but in the long term to the selection for more timid animals that adapt better to a captive environment.

'Erosion of the social structure and behaviour of intensively-bred animals over time results in a loss of their natural ability to adapt to wild conditions.'

	2020-04-23 21:14:58	Western Cape		No I do not	In light of the pandemic we find ourselves there is international call to stop the trade and slaughter of wild animals. For many reasons as we have seen viruses are a disastrous outcome of such trade. Destruction of ecosystems which you take these animals out of. The more ecosystems we destroy the less resilient we become, as biodiversity is the key to us finding new medicine and fewer outbreaks. A healthy planet would mean a healthy population of humans. We are interconnected to these ecosystems in ways we cannot begin to try recreate with technology. For example the bee pollinates our crops for free. Every animal,plant and microbe plays a role in a healthy ecosystem. When we meddle, we upset the balance and put strain on the future of our existence.	Fiona

	2020-04-23 20:53:05	Western Cape		No I do not	Our wildlife resources are becoming scarcer by the minute. There are many reasons why they should be preserved. Starting with the first, which most people are aware of: it is a National Resource - our wildlife brings tourists , who are the lifeblood of many industries in our country. But it goes much further - the pressure on many of these species is becoming too much and they will become extinct very quickly. We need to look after the resources we have so we can appreciate them for many years to come. There is NO NEED to kill these precious animals for food. We have other resources to use for food, and to generate income. Let's use the land we have available to grow wonderful crops (not GMO). We can be abundant if our farmers are taught to preserve the soil and the biome which supports good growth.	Lennys

It is barbarous.This officer must be out of her mind to include our precious wildlife in such an unmitigated law. While China has, hopefully, learnt a lesson and is placing a ban on the slaughter and consumption of wildlife meat, South Africa (ANC) in it's vast arrogance and self righteousness is condoning it. 	2020-04-23 20:01:10	Western Cape		No I do not	It is things like this that lead to pandemics like the Covid-19 virus. We need to preserve the diverse wildlife that is already in trouble due to human encroachment and habitat destruction.	John

	2020-04-23 19:59:22	Western Cape		No I do not	Endangered animal species should be excluded from this list...this should be non-negotiable.	Terrie
	2020-04-23 19:59:12	Western Cape		No I do not	With the current outbreak of coronavirus caused by eating wildlife this is outrageous! Not to mention these animals need our protection more than ever. Be a leader South Africa and don't allow this.	Colleen
	2020-04-23 19:59:06	Western Cape		No I do not	In a growing society like South Africa I dont think our natural resources which includes our wildlife will be able to survìve for many more years. These animals are being hunted relentlessly especially by foreigners.	Marsha
	2020-04-23 19:58:46	Western Cape		No I do not	We should look after our wild animals. They are here sharing this planet with us. Killing them is not a good idea.	Mohamed H
	2020-04-23 19:58:38	Western Cape		No I do not	I do not support the slaying of our Wild Animals at all because our wild life is how South Africa gets a huge percentage of its income.. why would you allow the slaying of them?. Please do not allow this amendment to go through.	Lynn
	2020-04-23 19:58:16	Western Cape		No I do not	Slaughtering the last of our wildlife is a sure way to decimate the litle remaining eco systems and kill of the endangered species. Meat is not a necessity, grow something, help farmers.	Eugene
	2020-04-23 19:56:58	Western Cape		No I do not		Fern
	2020-04-23 19:56:36	Western Cape		No I do not	This is disgusting. All animals should be declared sentient beings. They are not there for human consumption. To even consider this ammendment shows what government runs this country.	Jacqui

	2020-04-23 19:55:06	Western Cape		No I do not	Stick to the old list of animals for consumption. Man was given the task of looking after the animals of this world and not to destroy species for self gain.	Richard
	2020-04-23 19:54:45	Western Cape		No I do not	According to the world media, Wuhan China is the epicenter of the Co-Vid 19 where a wild meat market is indicated to have been the place where the virus transferred from animal to human....so one begs the question is the new legislation applicable in the post Co-Vid19 world? 	2020-04-23 19:52:32	Western Cape		No I do not	We must protect our African, South African native animals. These should be further protected so as not to open any further poaching of our wildlife. By allowing this trade of their meat we open ourselves to new risk of poaching and losing species under threat in South Africa.	Justin
	2020-04-23 19:51:35	Western Cape		No I do not	I can see no reason why the list should be expanded. This will allow the indiscriminate killing, slaughter and exploitation of certain animals. We have more than enough meat in this country and some of the animals on the list are endangered. How crazy is it to want to kill them?! We need to do the right thing in this country and stop chasing money.	Glenda
	2020-04-23 19:51:27	Western Cape		No I do not		Bev
	2020-04-23 19:50:02	Western Cape		No I do not	I am totally against this amendment. Putting endangered species on this list is simply unacceptable, and the amended act will give the green light to poachers and syndicates. It must be stopped! We must protect and not destroy our wildlife.	Eugenie

	2020-04-23 19:49:35	Western Cape		No I do not	Out and out barbaric! Why do people feel the need to kill wild animals? It will become open season and the unscrupulous will make then most of it	C C

	2020-04-23 19:44:27	Western Cape		No I do not	Already too many animals are slaughtered for food, they have as much right to life as we do. Many species have become extinct because of humans. Leave our wildlife alone, it is already in enough danger because of the cruelty and greed of man.	Gloria

	2020-04-23 19:43:36	Western Cape		No I do not	I do not support this amendment as it is horrid to think of people eating rhino, elephant, giraffe etc. These are beautiful wild animals that are endangered and we need to preserve and protect them, not eat them.	Elizabeth

	2020-04-23 19:42:01	Western Cape		No I do not	Please please please don't eat our wild animals. The planet needs them to survive. Seriously whoever thought of eating theses animals what where you friggin thinking, seriously! Has this pandemic not taught you anything! Leave the wildlife alone ! Save the planet for the future generations	Tammy
	2020-04-23 19:42:00	Western Cape		No I do not	Looking at this eclectic list of animals, it appears your Chinese masters are capturing our wildlife to feed their hunger. This bill should be killed or preferably slaughtered.	Paul
	2020-04-23 19:41:34	Western Cape		No I do not	It is absolutely unacceptable to add these animals to the list of those. acceptable for slaughter. Surely the recent worldwide Covid 19 pandemic is proof enough that some animals are NOT suitable for consumption.	Mia
	2020-04-23 19:41:05	Western Cape		No I do not	Half these animals are endangered and need to be protected!!! Also in light of Covid 19, the use of wild animals for food which leads to cruelty and bad enclosure condition and hygiene - so this will lead to people doing what the Chinese do in their despicable markets and it will be a matter of time before a new virus starts again. Have they learnt nothing from what's happening now?!? This cannot go ahead, the list should be reduced not added too... what are they thinking????	Julie
	2020-04-23 19:40:57	Western Cape		No I do not	In light of the coronavirus pandemic currently ravaging our globe, I do not support the slaughter and consumption of wild animals. It has been made abundantly clear that there are virus transmissions between wild animals and humans. Beside the facts above, I do not believe in consumption of animals, especially wild animals, when there are other alternatives such as plant based diet.	Heidi

	2020-04-23 19:38:41	Western Cape		No I do not	Leave SA's wildlife alone! We have done enough damage already, please preserve and protect the animal species that we still have.	San
	2020-04-23 19:38:05	Western Cape		No I do not	A country must surely be judged by the way it treats it's people and animals. Animals bred for human consumption is unnecessary but understandable in todays world. Wild animals however are our heritage and the new list definitely is absolutely unacceptable in terms of the new additions and even more illogical in terms if including endangered species. Won't we ever learn as a country.	Patrick

	2020-04-23 19:31:21	Western Cape		No I do not	The current Coronavirus epidemic has taught us that we should leave wild animals alone. Domestic animals farmed for consumption should be enough for our consumption.	Marian

	2020-04-23 19:26:24	Western Cape		No I do not	THIS WILL CAUSE THE PRICE OF THESE SPECIES TO INCREASE EVEN MORE. WE AS SOUTH AFRICANS ARE ALREADY STRUGGLING TO PAY FOR OUR OWN LOCAL BILTONG AND VENISON MEATS. IF THESE SPECIES ARE EXPORTED AND THE OTHER COUNTRIES ARE PREPARED TO PAY MORE, IT WILL CAUSE THESE PRICES TO INCREASE LOCALLY. WE ARE ALREADY EXPERIENCING THIS IN THE ACCOMMODATION MARKET WHERE WINE FARMS AND GEUSTHOUSES IN THE AREAS LIKE STELLENBOSCH, PAARL AND FRANSCHOEK INCREASE THEIR PRICES SO HIGH THAT LOCALS CAN'T AFFORD IT. SAME TREND IS ALSO APPLICABLE AT GAME RESERVES OR GAME FARMS.	Gerrie

	2020-04-23 19:24:01	Western Cape		No I do not	Please can we learn from the current Covid 19 catastrophe, there can be no reason on this planet why we need to kill and consume wild animals/game. It has proven to be disastrous for humans and nature. On a more practical front, we need the constant revenue from tourists, many travel to our country to experience the privilege of seeing wild animals and if we kill any endangered species we are literally sacrificing the long term continued tourist income for a fast buck!!	Ann
	2020-04-23 19:23:09	Western Cape		No I do not	Sothat China can plunder and kill the remainder of our wild life.Its disgusting!	Verona
	2020-04-23 19:23:08	Western Cape		No I do not	It is complettely unecessary to slaughter wild animals for human consumption . If the present situation of COVID-19 has taught us anything, it is that the dangers of consuming wild animals are real. Climate change is doing enough damage to nature and its wild inhabitatnts . We have a choice to reverse the problem . This Policy only adds to the problems we are dealing with today.	Laura

	2020-04-23 19:22:50	Western Cape		No I do not	Have you all completely lost your minds. In this day and age with pandemics causing havoc around the world you want to pass acts that allow for the slaughter of wildlife that should be preserved, cared for, nurtured and protected. Humans are supposed to have evolved beyond barbaric and thoughtless acts - we as humans should take a long hard look at how we treat the creatures on this planet and in our country. We are in no way superior to animals. This list is totally disgusting and unnecessary - no one needs to eat these animals. I would love to know who compiled this list and on whose authority or wishes.	Tessa

	2020-04-23 19:19:24	Western Cape		No I do not	I do not agree with this amendment. South Africa needs its wild life. Why allow more killings of precious animals? They belong to this country and not in the stomach of people	Martina
	2020-04-23 19:18:31	Western Cape		No I do not	Absolutely a big NO to any of the endangered animals on the list!	Janeen
	2020-04-23 19:18:30	Western Cape		No I do not	These animals are endangered. They are also required for the ecosystem to function properly. We also do need more viruses claiming the lives of more people.	Trisha
	2020-04-23 19:17:44	Western Cape		No I do not	Apply CITES rules and suggestions only	Warren

	2020-04-23 19:15:39	Western Cape		No I do not	This is again proof of government officials and parliamentarians and ministers not doing proper research or even read the documents in front of them properly. The list contain a myriad number of endangered species, but does the decision makers care? Or do they really believe the people making money from this that to sell (etc) rhino meat and byproducts will help with the conservation of the species and ignore the research of scientists in the field who time and again tell us that trading (in whatever way) does not help with conservation but actually add to the problem. Please scrape the new list and I would suggest even shorten the existing list. Rethink your decision, listen to the experts not the money makers.	Annatjie

	2020-04-23 19:15:22	Western Cape		No I do not	People are the animals - not the beautiful creatures God created for us to brighten our world. There is no need to slaughter these creations of God. We need to protect them from greedy people.	Lucille

	2020-04-23 19:06:37	Western Cape		No I do not	There is currently a global pandemic that is directly linked to the capture, slaughter and consumption of wildlife. South Africa already has an aggressive poaching culture with many species nearing extinction due to illegal hunting. There are more case studies than we can count, on a global basis, of the diseases that can be transmitted from wildlife - take Ebola as another example. There is absolutely no rime nor reason for additional wildlife vulnerability to become legislated. Food security will NOT be solved by a policy of this nature. It is also, quite frankly, obscene to include some species where there are proven scientific studies of their intelligence and family groups, such as elephants. The only rationale for even considering an extension for some of these animals would be for hunting, which should not be condoned in any manner or form due to the gross abuse that it results in.	Nicole
	2020-04-23 19:06:27	Western Cape		No I do not	WTH!!! now future generations wont even see what the eat. When are we going to get over pandering to the West with their extraordinary will to destroy everything. They have raped Africa of everything already. Now that they have depleted and find less use for once common ore, minerals and our precious metals and gems, which they now generally buy from other markets, they want our animals. What next? Stop this madness. We need a responsible ministry, not one that only bows to the almighty dollar. When is our government going to get it right. Anything, that is.	Dhansukh
	2020-04-23 19:06:26	Western Cape		No I do not	Is there not enough animal abuse going on to satisfy the powers-that-be? When will some people learn to treat animals with the compassion and respect they deserve?	Barry
	2020-04-23 19:05:05	Western Cape		No I do not		Llewellyn
	2020-04-23 19:04:09	Western Cape		No I do not	Pray tell, why would they want to expand this list when we are currently living through the most challenging times . . . . supposedly as a result of wild meat, pangolin / bat, sold through the black market. Any approval of an extension simply opens the world markets - both controlled and uncontrolled - to ever increasing risk of unusual viral,bacterial , other transmission. Cross species risk. Completely unacceptable.	Robyn
	2020-04-23 19:03:29	Western Cape		No I do not	This is barbaric! This will kill the tourism industry for SA - not only for the killing of the "Big 5" for greed, but the rest of the world will see us as savages! People wake up!!!	Melanie
	2020-04-23 19:03:07	Western Cape		No I do not	This is utter bullsh@t.Too many people sit and think ways(Theirs) to force laws onto others at unthinkable costs and evects it will have on people and industries,and they believe,or plant this lie,because people would rather believe the lie than the truth.Stop spreading these k@k ideas about animals.	Marius
	2020-04-23 19:02:08	Western Cape		No I do not		Jon

	2020-04-23 19:00:46	Western Cape		No I do not	This is obviously for China's consumption. Have we not learned enough from this cornovirus that we need to stop slaughtering and consuming wild species. Besides the fact that we need to protect our wildlife. What will be left of our beautiful country which everyone comes visit if we allow such an amendment.	Nadine
	2020-04-23 18:59:50	Western Cape		No I do not		Linda
	2020-04-23 18:59:19	Western Cape		No I do not	We must act now! Stop this abuse of our heritage! If animals go, you go as well. Can't you see that. This stupid law makers should pay for there crimes.	Michael
	2020-04-23 18:59:18	Western Cape		No I do not	We should only eat meat that has been farmed and slaughtered in a holistic manner, i.e. methods of good animal husbandry, like beef, chicken and sheep. No wild animals should be farmed, captured or killed.	Stephanie
	2020-04-23 18:58:17	Western Cape		No I do not	i am heart broken, disappointed and ashamed to belong to a society that would consider legalising the slaughter, consumption and export of animals such as elephants, rhinos, giraffes and other animals that belong to our precious heritage not only as south africans but as human beings. please please stop this insanely cruel act!	Karin
	2020-04-23 18:56:25	Western Cape		No I do not		Thomas Dawid
	2020-04-23 18:54:31	Western Cape		No I do not	It seems ridiculous to be adding wild animals to the list when it seems that the pandemic engulfing the world has been caused by the consumption of the same type of meat.	Shireen
	2020-04-23 18:54:06	Western Cape		No I do not	To what depths will humans go for money and greed? This is vile. It is sad and bad enough that our farm animals are treated with cruelty....take battery chickens, fed on antibiotics to get fat to bring in more money...and so it goes on. Now they want to slaughter animals that are already threatened with extinction. This will also threaten our tourist industry. And as someone else said, "Has nothing been learnt through COVID-19?" Please don't let this be allowed. EVER.	Alison
	2020-04-23 18:53:09	Western Cape		No I do not	We have enough domestic animals to eat, why pray on the dwindling wild animals. Something South Africa is known for, but will soon be gone if we start eating them. This will be a green flag to all poachers!!!	Cor

	2020-04-23 18:50:24	Western Cape		No I do not	We, in South Africa have worked for many years to protect our wildlife and now the government wants to make money from slaughtering it. Where is the logic? At this moment in time the World is suffering from a pandemic, believed to have been caused by meat from wild animals. Why does South Africa not learn.? We already sell 8,000 sets of lion bones for so called medicine. The people of South Africa cannot always afford meat. If we have excess we should make it available to the people of South Africa. Why would you want to be part of the present World Problem and not part of the solution? Elephants, rhinos and many other listed species are not for human consumption so why would you have them exported? As usual someone sees money and does not care about the end result. A great big NO from our family	Santa

	2020-04-23 18:44:35	Western Cape		No I do not	Protect all wildlife to ensure extinction does not become an option. Wake up world! X	Leigh
	2020-04-23 18:44:26	Western Cape		No I do not	The impact of Covid-19 highlights the dangers of adding new species of animals to those that we domesticate, slaughter and eat. Whatever the need is for this to be passed surely it can't outweigh the downside	John
	2020-04-23 18:44:03	Western Cape		No I do not	There are different discussions, but generally it has become known that the Covid-19 virus is man-made. As per latest information, it does not affect animals. Thus the reason for this amendment is based on false information. In the few hundred years that wild animals in South Africa have been killed for food, no virus have infected any humans.	Maretha
	2020-04-23 18:43:32	Western Cape		No I do not	South Africa is world renowned for it's conservation policies and the spaces reserved for the conservation of wildlife. Let's keep this heritage safe from abuse and destruction for future generations of Southern Africa and the world at large. Slaughter and hunting of endangered and/or wild animals leads to extinction. 	2020-04-23 18:40:46	Western Cape		No I do not	Never has the Rand been so weak as it is right now. This bill is just another step towards further reducing the value of the Rand by further lowering the world view towards South Africa by showing the world how corrupt and disgusting South Africa can be. Do not allow this bill to proceed - if anything we need to take further steps to protect wildlife in this country!	Anthony

	2020-04-23 18:38:41	Western Cape		No I do not	All wild animals which are listed in the international data lists if being threatened or even endangered have to be removed from this list. Only animals which are specifically bred for animal husbandry purposes including slaughter and meat production, must be listed on this document. Non threatened Wild animals and ungulate game animals must be listed separately and adjudicated by an international panel to be approved for hunting and or husbandry purposes to supply the meat industry. 	2020-04-23 18:21:32	Western Cape		No I do not	Please do not add any more to this list. Please remove most of the animals from this list, if not all. This puts all our lives at risk.	Jill

	2020-04-23 18:20:37	Western Cape		No I do not	At such a time as this when the world is experiencing viruses and disease as a result of lax laws concerning the slaughter and consumption of animals, I cannot understand why there would be a move in South Africa to legally broaden the official list of animals that may be consumed. Rather spend the effort as a governing department finding ways to reduce South Africa's food & economic dependence on meat (including beef, chicken and other domestic animals). Let us start to replace these with healthier, more environmentally responsible sources of protein so that we, as a nation, can continue to support our farmers into new and better practices of food production.	Anne Laura
	2020-04-23 18:19:54	Western Cape		No I do not	For goodness sake, leave our animals alone! This is starting to get out of hand and who knows what virus can stem from eating these species. It is just another way to misuse our powers over the animals. Total greed.	Ian

Please help the animals.	Richenda
	2020-04-23 18:17:22	Western Cape		No I do not	Our wild life is under threat. If this draft goes through we can say goodbye to our wildlife. Does this Government really not care about our fauna,? Seems not.	Donnaveen

Does nobody have a brain anymore, why would you even consider this utter rubbish. Please stop being barbaric!!!!	Linda
	2020-04-23 18:15:48	Western Cape		No I do not	I don't think any wild animals, not bred for consumption should be on the list. They should concentrate on the implementation of limited children per family, to curb the population explotion which is transpiring. People are just making kids left right and centre with no means to raise them, feed them or even educate them. This is rubbish.	Cheryll
	2020-04-23 18:15:38	Western Cape		No I do not	THIS WOULD BE LIKE WALKING BACKWARD TO THE FUTURE. WHAT KIND OF CRAZY THINKING DRAFTS SUCH AN AMENDMENT. I SAY NO, NO, AND AGAIN NO. WHY EAT OUR TREASURES OR FEED THEM TO A SICK WORLD.	JEANNE
	2020-04-23 18:14:02	Western Cape		No I do not	Is this prompted by the Chinese. We know that they will eat anything. From rats to bats, anything, etc. What with Corona Virus, now lets destroy Africa's wildlife. What we have achieved through the past years, this minister is hoping to destroy as soon as possible. 	2020-04-23 18:08:40	Western Cape		No I do not	This is disgusting. Have you learned nothing from the country that eats everything that moves? Animals are not here for us to consume. We have such a great deal to learn from them. Open your eyes and learn them!	Maria

	2020-04-23 18:07:23	Western Cape		No I do not	Shocked and disgusted! Are not our African animals important. Should they not be preserved, at any cost, for the generations to come, not slaughtered for G-d knows what stupid reasons. God put animals on earth to be loved and not slaughtered. Is it not enough that this Corona Virus was caused due to people killing bats, etc. for testing and consumption.	DAWN

	2020-04-23 18:06:30	Western Cape		No I do not	The list is shocking, to say the least. Endangered and threatened species should be protected not slaughtered. Are the decisions regarding this made by specialists or politicians? Are conservationists consulted and involved in the final decision making process? All endangered or threatened, or even slightly sensitive species should be omitted from this list. Wild animals should only be allowed to be slaughtered if scientific culling to preserve the species is unavoidable. Hunting as a sport should be banned, especially trophy hunting. Ideally all animals species should be removed from this list, but I realise that that requires a complete paradigm shift in the human species. Hopefully someday this will come to pass.	Ida
	2020-04-23 18:06:08	Western Cape		No I do not	It seems perverse to risk our reputation as a haven for wildlife and wildlife tourism , and all the money and jobs that this brings to the country , for the small number of vested interest and pressure groups who this amendment has been designed to placate . 	2020-04-23 18:02:58	Western Cape		No I do not	I cannot even THINK that consideration can be given to an amendment in which there is ANY plan to slaughter , sell for consumption or trading with ANY animal, ESPECIALLY our endangered species. We cannot exist without our nature and animals. Especially now with the Lockout, do we see how nature "repairs" itself when humans aren't ruining it with cruelty and/or wrong farming methods and e.g. poisons.	Elise
	2020-04-23 18:01:59	Western Cape		No I do not	This is utter insanity. It's well known that the Corona pandemic is a zoonotic disease, caused by the wildlife markets. Does South Africa want to be the epicentre of another pandemic? SA should preserve its wildlife and biodiversity, not butcher our animals for consumption. This insane decision, if it passes, would almost without doubt see an increase in animal cruelty and violations of the Animals Protection Act, it would lead to biodiversity loss, create the conditions for another devastating pandemic, increase corruption and the illegal trade in wildlife, slow tourism and negatively impact SA's reputation. In short, it would disastrous, foolish, irresponsible and unethical.	Elisa
	2020-04-23 18:00:48	Western Cape		No I do not	In the light of the global pandemic because of slaughter of wild animals this is a joke. Our animals are our heritage. If anything we need to clamp down on these things.	Jan
	2020-04-23 17:59:35	Western Cape		No I do not	If there is one thing we have learned from the COVID-19 pandemic it is that eating wildlife can end the world. You must be crazy to allow this. This is exactly what happened in China. People were encouraged to amass wealth any way possible so they started eating strange animals. Not everything is meant to be eaten. We have domesticated farm animals for a reason.	Rozelle

	2020-04-23 17:54:10	Western Cape		No I do not	This is an outrage. The world is an ecosystem which means things are supposed to coexist. We cannot continue to pillage wildlife for the sake of short term monetary gains. The world as we know it is crumbling already, largely due to animal farming. Look at the facts. They are blatantly obvious!! The role of our fathers and mothers is to provide us with the tools we need to live. We will not be able to live let alone use any tools you if continue on this path. Your actions will not affect you, but they will affect us and your grandchildren. Have you no decency, common sense, or care for others? Or are you too self absorbed to think about the long term? Whoever brought this idea in should be ashamed of themselves.	Loïc Enzo

	2020-04-23 17:52:31	Western Cape		No I do not	This is unacceptable. Threatened species are protected for the reason that they are too few in numbers and should not be included in this bill. Furthermore wild animals should not be included. We should be strengthening our farming standards and improving animal welfare standards and reducing condumption of weeks animals with the advent of covid 19 and it's connection to our eating animals.	Francesca
	2020-04-23 17:51:07	Western Cape		No I do not	This will threaten the livelihood of wild animals and many of them will be extinct. If only a few from the list could be chosen and be bred under strict regulations to avoid hunting and killing these animals.	Ave

It is ridiculous to allow the slaughter of animals that are endangered. That's why they are called endangered. For piet's sake.	Neville

	2020-04-23 17:49:29	Western Cape		No I do not	Have you learned nothing from the COVID-19 pandemic? NO animals, wild or farmed, should be killed for food. Certainly not our wild heritage! How foolish to suggest depleting wild animal populations for human food! Raising farm animals for meat is economically and environmentally unsustainable also. The food grown for cattle, sheep, chickens etc can feed more people than the meat from them ever could. Not all people can afford meat. Plant based diets are more affordable and provide sufficient protein. Or are you bending to the will of your Chinese masters yet again?	Gina

	2020-04-23 17:46:33	Western Cape		No I do not	This is absolutely against preservation of our endangered species, will not be surprised if most of these are exported to China, the one country whose residents poach, slaughter and mutilate our animals! The reason,:warped ideas of medicinal use and above all, MONEY!!!! Is it not enough that China has dumped the whole world into the Covid 19 epidemic. When is our government going to start acting in the interests of our country, instead of their and their cronies pockets???? How anyone can still vote for the ANC after this, goes beyond belief! I will never ever vote for the ANC should this be passed by government. Come on Mr Ramaphosa, you have showed us your stealth and leadership abilities, protect our heritage and our countries must precious wildlife. How can we even think of this when our own people are dying of the hunger. Create jobs with the preservation so we can show the world in another 50 years all the species of wildlife we have preserved, not just for our sake, but for the generations to come!	Lorinda

	2020-04-23 17:43:55	Western Cape		No I do not	The government should provide logical reasons for this act - I, personally can't discern a valid reason for it. Covid-19 illustrates the danger of virus/bacteria jumping species barriers in China - humanity does not want a repeat by making scarce and endangered wild animals available for commercial exploitation by either individuals or governments. Where farming of animals is feasible, transparent enabling legislation should be provided for it - not blanket legislation. Prof. W L Rautenbach	Prof. Willem
	2020-04-23 17:43:53	Western Cape		No I do not	We need to protect all animals and especially our wild life and not eat them. 	2020-04-23 17:43:20	Western Cape		No I do not	Humanity just brought corona virus covid-19 upon its own head by the trade, both illegal and legal, of pangolin meat and scales, in which millions of african pangolins are exported live to china. yes, africans make money by exporting wild african meat. and in return, africa is destroyed, and africans get sick and die. pangolins are the sweetest animals, they have no attack capability, they do not bite, or kick, or claw, they roll into a ball and are scooped up. a mother pangolin has her baby wrapped up in her ball. but it isn't even their sweetness that defines them. they are keystones. they eat ants and termites. absent predation, ants and termites will clear a forest faster than chainsaws. the point is, everything is connected. in the midst of the covid-19 pandemic, the minister proposes to allow the capture, slaughter and trade of wild meat? the fairest analysis must call this ultimate stupidity, or the minister is hell-bent on human extinction. save the humans, peace for pangolins. save the african people, protect ALL african wild species and their habitats. if you sell our african heritage, so that your friends get rich, that is corrupt. but if you sell our african heritage, so that your mother and your father die, and your children die of disease, there are no adequate words.	Barry
	2020-04-23 17:42:43	Western Cape		No I do not	This is rediculous - what would we live on then? Cattle, chickens, pigs and sheep are standard in all countries. No, I would never think that any normal person would allow that.	Lorna

	2020-04-23 17:37:35	Western Cape		No I do not	Any endangered or threatened species should not be included in this list. Our wildlife is the heritage of all South Africans and in fact the world. We must not destroy this valuable asset. If we lose any one of these species it is gone forever. We can make far more use of these animals by proper wildlife management in their natural environments to benefit the whole country. Many experts say that protecting biodiversity is as important as fighting climate change. We need a different way of thinking about economics with a higher accountability of the costs in the future to the benefits we take today. Mark Rounsevell, co-chair of the European assessment. “We are responsible for all of the declines of biodiversity. We need to decouple economic growth from degradation of nature. We need to measure wealth beyond economic indicators. GDP only goes so far.” Humans destroy ecosystems. Our lifestyle creates pollution and we overuse our natural resources. Today, we are using the resources of 1 and ½ planet Earths, even though we only have one. We build roads, hunt animals, cut down trees destroying forests and just litter the planet like crazy. We waste resources that are not infinite and will soon run out, if we continue our practice. Every aspect of our ecosystem is important – because when one goes, the rest will follow.	Rick
	2020-04-23 17:37:26	Western Cape		No I do not	Knowing government, they will sell the complete collection of indigenous animals just to make a buck or two. Pun intended. R500 billion debt coming up...	John

	2020-04-23 17:36:58	Western Cape		No I do not	If this amendment is allowed to go through, we will be living in a land of only humans. We cannot allow the slaughter of all of these animals, many of which are endangered. With the implement of an amendment will lead to the endangerment and eventual extinction of many others. We already have evidence of our current pandemic having been past on via close and continued contact with wild animals and their consumption. The wildlife market in animals such as these is already being reconsidered. The pangolin is a prime example. This amendment should definitely not be brought into effect. Moyra Duchenne	Moyra
	2020-04-23 17:36:04	Western Cape		No I do not	Wild life particularly endangered species should be protected. We will become just as much of a problem as the unscrupulous poachers	colleen
	2020-04-23 17:35:46	Western Cape		No I do not	Wildlife is already under threat. Tourism brings in much needed revenue so why on earth do we want to allow the slaughter of wildlife. Some of the wildlife on the old list should be removed i.e. rhino, hippos etc. Man has already destroyed much of the world's wildlife bringing many speces to extinction. I do not support this. Another of the ANC's mindless Bills.	David
	2020-04-23 17:35:42	Western Cape		No I do not	So while one part of the government seeks to Promote wildlife conservation another is doing completely the opposite. Why would anyone even put this on the table?	Christine

	2020-04-23 17:32:47	Western Cape		No I do not	You would think that COVID 19 would have taught us to leave wild animals alone. Antelope are one thing. Giraffes, hippo and rhino etc are completely another.	Peter

	2020-04-23 17:26:30	Western Cape		No I do not	It is disgusting to contemplate these amendments. Are you trying to turn us into a China where we eat anything that moves. Completely abhorant to think of eating our endangered species	Sandie

	2020-04-23 17:25:23	Western Cape		No I do not	Firstly, what was wrong with the first list of animals and secondly, this list looks like it was put together with very little thought. Many of the animals are (a) endangered and shouldn't be on the list at all and (b) are not native to South Africa so why are they on the list. We surely don't want to be like the Chinese and eat everything and anything! Some things are not meant to be eaten and why we are getting all this bazaar diseases these days.	Carolyn

	2020-04-23 17:19:18	Western Cape		No I do not	To include endangered species in this list smacks of a complete lack of understanding of how our natural and ecological systems function. To try and generate (limited) income by selling the product(s) of endangered animals is a sure way of wiping them out. 	2020-04-23 17:08:32	Western Cape		No I do not		Amanda

	2020-04-23 17:07:23	Western Cape		No I do not	So , we've saved our Rhinos, only to want to slaughter them (legally) now? We've just seen with the recent outbreak of the Coronavirus, that buying, selling, and slaughtering of wild animals for food, is one way an animal-borne disease can infect people. China has recently banned the trade and consumption of wild animals for food; and now South Africa wants to promote it. We appear to be moving backwards. South Africa is a resource-rich country. We would be far better served by looking at ways to promote the sustainable development of our existing natural resources, instead of looking to turn our wildlife heritage into an economy - what a truly horrible idea.	Monica
	2020-04-23 17:06:17	Western Cape		No I do not	These animals are part of our heritage as fellow South Africans and they are already being slaughtered for ivory by poachers as it is. They are for us and the rest of the world to admire. They contribute to our tourism economy as well and now we are prepared to kill them? We have enough meat from farmers but the support from government towards our farmers is pathetic. They need to assist them no matter what race they are.	Justin

	2020-04-23 17:05:43	Western Cape		No I do not	Endangered species should not be consumed as this will already negatively affect species that we have pushed to dangerously low levels in the wild through negligence. 	2020-04-23 17:04:41	Western Cape		No I do not	I cannot believe that I have actually read this! Our tourism industry, that hopefully will take off again, will be badly affected. Tourists love seeing wild animals in their natural habitat. We were given charge over animals and the Earth. There's so little left, and now this proposal! Unbelievable! I want to see an elephant not eat it!	Corine
	2020-04-23 17:04:15	Western Cape		No I do not	No wild species should be included in this bill. We have so many wild animals threatened with extinction they do not need to be part of this as this will put them in greater danger to full extinction.	Terry

	2020-04-23 17:02:13	Western Cape		No I do not	Some of our animals, especially wild animals should be protected before they become extinct. They are definately not for consumption. Lions, Leopards, Elephants, Hiënas and many more should be protected.	Gerhardus

	2020-04-23 16:58:40	Western Cape		No I do not	Are you government people actually insane.... Endangered species on top of it..... wtf STOP EATING MEAT - everybody , full stop. Do you not yet understand how the energetic misdemeanor of eating living beings has caused havoc on this planet already. How can anybody still be eating meat pumped full of hormones and chemicals especially when the animals are then slaughtered under such inhuman circumstances. A lot of industries will die as our consciousness shifts , this is not a bad thing when it supports Mother Earth. Wake Up STOP EATING MEAT.	James

	2020-04-23 16:50:52	Western Cape		No I do not	This is completely unconstitutional in terms of wildlife CONSERVATION! Does the Ministter not know what the meaning of this word CONSERVATION is? Cl.early not. Secondly, wildlife forms the number one reason for our growing tourism industry. Allowing this disgraeful trade will negatively impact the tourism industry, and all its preliferal job creation industries. Only two reasons here but there are many many more reasons to PRESERVE wildlife, a critical resource for Africa. It is morally disgraceful. This cannot be allowed in ANY FORM WHASOEVER.	Dee
	2020-04-23 16:50:50	Western Cape		No I do not	This is absolutely ridiculous. A lot of the listed animals don't even live in South Africa!! We need to protect all our wildlife while there is some left to protect. I refer to and agree with Sir David Attenborough that every animal on this planet has a right to live also	Caro

	2020-04-23 16:50:11	Western Cape		No I do not	We should NOT be allowing any threatened species in South Africa to be slaughtered for consumption, sale and / or export. 	2020-04-23 16:48:33	Western Cape		No I do not	I think South Africa already has enough disrespect for the environment, if it isn't plastic bags and trash killing them then it's fucked up laws like this. Its clear that the government is more than happy to live in a desolate wasteland. So if you want that kind of environment, how about you go live in the desert somewhere and leave nature alone here! Fuck these people and fuck this government.	Gizelle

	2020-04-23 16:46:53	Western Cape		No I do not	It is time that those who are supposed to look out for their country, South Africa, should stop their greed and destruction of this country. When will they realise that controls are there to ensure the constant supply for the people of South Africa. If they continue in the manner that they are becoming used to there will be great suffering in this country. We do not want to become like the Chinese who are busy destroying all types of nature. Rhino horn is just one example. This is just hair but they think it is magic and cause terrible deaths for these magnificent Rhino's.	Chris
	2020-04-23 16:46:50	Western Cape		No I do not	I do not support the inclusion of any new species in the act and especially not any endangered species.	Stefan

	2020-04-23 16:45:21	Western Cape		No I do not	Rhino?! Seriously that is just offensive. Any animal listed on the IUCN Red List of Threatened species be put on the list of animals for slaughter and trade. Likweise animals that are uncommon should also not be put on the list. We need to protect ecosystems as a whole and not target certain species that might lead to the disruption of the ecological balance. Finally, there needs to be an embargo on teh cruel practice of exporting live-animals by ship!	Andrew
	2020-04-23 16:45:16	Western Cape		No I do not		Morris
	2020-04-23 16:45:06	Western Cape		No I do not	Our wild life is diminished constantly through poaching and other such activities (lion bones eg) These magnificent creatures are threatened with extinction due to man's greed. Allowing them to abused as envisaged in this act is a huge mistake.	Claire

	2020-04-23 16:44:38	Western Cape		No I do not	Expanding the list to include all these wild animals is no better than legalizing the bush meat trade. Wildlife tourism should rather be encouraged than allowing them to be slaughtered for food. The endangered species will soon become extinct by this type of legislation while what we should be doing is actually encouraging more a sustainable and less animal protein supported diet.	Len
	2020-04-23 16:44:32	Western Cape		No I do not	Instead of extending the list of animals, you would likely win more votes by decreasing the list and promoting animal rights. Let the hunters seek their sport elsewhere, not in South Africa.	Albert
	2020-04-23 16:44:29	Western Cape		No I do not	Why do we need a new list even?!! No endangered species should be on that list! Next it will be a new list to slaughter all unwanted babies? What ages do you think? Is the world going crazy?	Sue
	2020-04-23 16:44:10	Western Cape		No I do not	I cannot believe the stupidity of this . It is ludicrous that the inclusion of endangered species should even have seen the light of day. whose pockets are being looked after here?? What next ?	MERVYN
	2020-04-23 16:43:06	Western Cape		No I do not	I would like my grand children and their children to enjoy WATCHING wild life being ALIVE and free, not eating them! How absurd to think that you can kill anything that is alive for human consumption? How will we be able to show anything that we have preserved, cared for or maintained to our next generation if everything is being either killed, destroyed or abused? Just think people and use your heads and not your barbaric instincts please.	Sandra

	2020-04-23 16:42:31	Western Cape		No I do not	We have lost so many species already. What are we leaving for future generations if we do not preserve what wildlife we have left? It is incredibly sad to believe that mankind have lowered themselves to this level to even contemplate such a ridiculous and barbaric act. I pray that sanity shall prevail and that this thought is removed from discussion and that we start preserving what we have been blessed with and can draw tourists from over the world to share it with. 	2020-04-23 16:40:35	Western Cape		No I do not	This will place our wildlife in danger and bring with it extinction of many species Also the level of cruelty in the capturing and slaughtering of these animals will not be controlled We have enough meat resources in beef, sheep, poultry WHY encourage this legislation??? There are enough animals that are bred to be slaughtered that does not impact our diverse wildlife, which is the attraction for tourists to Africa as a whole and why is this? Because wildlife in the rest of the world has mostly been eradicated. We as the citizens of South Africa should all be against any bill trying to change the protection of our animals. 					Why is this government trying to pass amendments on this particular Act at this time? Is this part of the deal for accepting help from China with Covid 19 or are there deals being made with the USA Trump administration? Both of these "Super Powers" (lol) do not care about anyone except themselves, they are racist and always put themselves first. CHINA IS THE CAUSE OF THE COVID 19 PANDEMIC WHICH WAS CAUSED BY CONSUMING WILD MEAT!!!. The changes suggested are not at all acceptable, has nobody learnt anything?!? The entire world has been affected negatively, because of this, what is wrong with you?!! Stupidity reigns supreme Ms Didiza, if this is what you want to do, especially during a pandemic caused by China consuming wild animals. These Animals are extremely badly treated and kept in inhumane conditions when sold for consumption, or hunting, not too mention how they are transported and what happens to them along the way. Have you ever been to one of these markets, these exist not only in China but also in Africa including inside our own borders. It is unacceptable that you would even consider opening up this "market" for more animals to be exploited, tortured and abused and that just for money. Yes we are in a recession and our economy right now is getting worse by the day due to Covid 19 (again I stress, caused by China and eating wild meat). This however does not in any way justify exploiting our animals (and a number of species, that do not even come from Africa, which are included in the new list). PRESERVING AND PROTECTING our animal species, ESPECIALLY THOSE ON THE THREATENED / ENDANGERED LIST, should be the priority, NOT adding them to a list of animals to be hunted, slaughtered, tortured for "food" and "sport". It is not okay to do this to Elephants, Giraffes, Hippopotamus at all, why are they on this list? If you took some time to understand what this does to Elephants, who travel in "families" / a herd and who mourn the loss of any member in the herd, very similar to the way we humans do, maybe you would think again. Or maybe you just don't care or don't want to know. This is heartbreaking, if our country is not suffering enough through what is happening to our people caused by consuming wild meat, you now want to add more suffering to our beautiful and extremely precious animal species too. Shame on you! This is all about money and politics - deals and promises made with no consideration for our natural heritage in this country which includes all our animals.

	2020-04-23 16:33:11	Western Cape		No I do not	I cannot believe Government is even considering to implement this highly-unethical draft amendment! This current COVID-19 pandemic STARTED with the slaughter and human consumption, as well as, the import/export of animals such as the one's being mentioned in this draft, many of them threatened species in South Africa ! This proposed draft amendment to the Meat Safety Act, is inconceivable, dangerous & complicit towards actions which were the very cause of this pandemic! I would not be surprised if some, if not all, of these lists of animals, birds, reptiles & fish, would be exported - if this unethical amendment is passed - to China - the birthplace of the current pandemic! 					Government have a delegated obligation to look after the country and its people, this includes the protection and management of indigenous species, as part of the UN it should also stand in line with all efforts to protect the environment and its most vulnerable components, such as wild life and endangered animals, even if those animals are from another region the country should have a "no sale no buy no import" stance to discourage the exploitation of endangered animals around the world. I do not agree with the extended list, I believe it should be submitted to the WWF and local environmental specialists in the field of these animals and only upon consensus of these bodies and within the strict guidelines of their guidance should any wild animal be added to the list. I ask that this draft be scrapped and only revised at such a time as public and specialists can personally be invited and attend the compilation of a new draft that satisfies our directive as a country to look after our environment, flaura and fauna, wild and domestic. also I appose this draft in light of the recent highlighted risk of trading in wild meats, the exotic meat markets are still suspected as the origin of the current COVID 19 pandemic and in light of this the country should tread carefully in introducing new import export trade and consumption of exotic or wild meats, especially when those where before prohibited or protected. we have no need to create a list of new exotic or wild animals, there are enough options in which the government should rather invest its interests to see that enough is made available. I appose the draft and request that it be scrapped, I ask that a formal sitting be held with leaders of international WWF (since this law involves the import of meats and animals from other countries) and also local hunting and wild meat industry leaders as well as local wildlife and endangered animal sector leaders and in conjunction with them a new draft be drawn up and made available for comment.

	2020-04-23 16:20:12	Western Cape		No I do not	I would like to know why these animals and birds have been added. There is NO REASON whatsoever to extend the original list. In fact there are a few on the original list that need to be removed, such as rhino, elephant and crocodile - maybe others as well. I see that Kiwi is listed under birds. This bird is already extremely close to extinction with New Zealand desperately trying to coax their numbers up. The oribi too is getting closer and closer to extinction. I could go on and on about this, but right now I am just too angry to speak without saying things I may later regret! This is open season on game and will be a terrible lesson to all when some animals disappear off the face of the earth...	Elsie

	2020-04-23 16:19:30	Western Cape		No I do not	This is totally unacceptable, we are in 2020, not in the 1800 BC. 	2020-04-23 16:18:00	Western Cape		No I do not	It is an absolutely absurd suggestion to be adding wild animals for consumption by humans at the very time that we are all in fear of Covid 19, which is reported to have been transmitted from wild animals to humans. It is destroying our health and economy around the world, and you are proposing to add to the possibility of creating more problems. Wild animals and humans are being placed at risk by this proposal. I totally disagree to the additional list. Keep the old guidelines in place.	Joan
	2020-04-23 16:17:21	Western Cape		No I do not	It doesn't make sense to include endangered species on this list. While one part of the country is fighting to protect our wildlife, another part of government is seeking to destroy it. Tourism, and especially viewing our wildlife, is a major industry in South Africa, and the addition of endangered species on this list will surely have a negative impact on the tourism industry. An industry which has already been hit very hard by the Covid-19 lock-down.	Max
	2020-04-23 16:17:12	Western Cape		No I do not	I note with surprise that many of the species listed, are not native to South Africa; I am adamantly sure that New Zealand would never permit its native bird, the Kiwi, to be captured for export as a delicacy to be devoured in China! The latest COVID 19 pandemic is clear enough evidence that the capture and consumption of wildlife , and animal, bird species, is at best, an international health hazard and at worst, a fearful guarantee of global economic disaster. I formally request that the Minister responsible for accepting this Bill, Ms T Didiza, fully applies her mind to the immeasurably negative consequences that such an amendment would produce. We as a country, are leading the way forward by showing the world how we can manage ourselves in the light of COVID 19 pandemic. So now - let us stand together and demand that all trade from, and into South Africa that involves animals, birds, reptiles and fish, be ceased forthwith. Ms Didiza - lead the way forward! 	2020-04-23 15:52:04	Western Cape		No I do not	Our indigenous wildlife provides a tremendous income from tourism and should not be used for human consumption. Aside from buck which are culled in order to control their population balance. Once we allow the use of wild animals for human food consumption we will end up breeding them in captivity and end up destroying the species. We should stick to the current domestic animals as a source of protein. We have cattle, sheep, and pigs so why encroach on wild animals.	Frank
	2020-04-23 15:51:45	Western Cape		No I do not	I think the whole thing is preposterous. Here we are trying to save the wild animals so they will survive for our children and the South African government is giving permission to slaughter and consume them. DISGRACEFUL	Christine
	2020-04-23 15:51:28	Western Cape		No I do not	No! NO! NO! What else is there to say? Perhaps the following question, "Have people in government made an alliance with china and agreed that we too will have wet markets, eat "forbidden" food and spread a new unknown virus? This in turn might benefit pharmaceutical companies? Perhaps giraffes will be carriers of a virus. Has any one in government heard of "Save the Rhino?, Save the Planet" etc,?	Nicolette
	2020-04-23 15:51:12	Western Cape		No I do not	To add already threatened wildlife animals to this list is ludicrous in every possible way. Do we really want our children and further descendants to inherit a pillaged natural world? It's time that the killing of animals for consumption and ego-massaging trophy hunting were stopped - around the world and here in South Africa.	Colin

	2020-04-23 15:50:29	Western Cape		No I do not	What in the world are you thinking? Admidst an economic & health crisis, this is what government chooses to focus on, threatening already threatened species? No, no, no. This is absurd and sick.	Roxanne
	2020-04-23 15:50:06	Western Cape		No I do not	No to wild life and threatened animals and species.	Rhoda
	2020-04-23 15:50:02	Western Cape		No I do not	This proposal can only possibly have been conceived from a point where extreme ignorance of societal responsibility coupled with extraordinary greed for some personal benefits... feeding Nature's diversity willy-nilly into a sausage machine, for the production of short-lived gains and the inevitability of long-term barrenness in a consumer desert. Wisdom, mature thinking, understanding of societal and economical balance, respect for and appreciation of the essential diversity of wildlife and the need to preserve natural habitats are all absent in this incomprehensible proposal.	Sally
	2020-04-23 15:49:47	Western Cape		No I do not	This is Chinese mentality and is only being changed so they, in their stupidity and uncultured, abomination specie.. Can keep using horns etc for their stupid use...	Thea

	2020-04-23 15:47:03	Western Cape		No I do not	Our wildlife will be totally destroyed and we cannot afford to do that. Those that are almost extinct will become so, and nothing will be left in our beautiful game parks which attract thousands of tourists. We have spent millions of Rand to protect the rhinos from poachers and now - we will kill and sell them as meat products???	Leonora
	2020-04-23 15:46:55	Western Cape		No I do not	It is irresponsible to allow the consumption of animal species that have been listed as endangered by the IUCN. The ammended list should not include any species of animals that are endagered / by removing individuals from a species that is already under presuure, there can be a catastrophic effect on the population genetics, causing a faster decline in a specie. 	2020-04-23 15:46:34	Western Cape		No I do not	In this farming era, it is an antiquated idea to rely on wildlife to sustain one's food needs. Farm animals, do not rape and pillage wildlife. That's what the colonials did, and now this government wants to do the same?	Elise

	2020-04-23 15:40:10	Western Cape		No I do not	Government should protect our endangered species and not amend an act which supports killing, export and consumption of endangered wild life. 	2020-04-23 15:39:02	Western Cape		No I do not	No, I don't support this bill. Leave South Africa's wild animals and Rhinos alone! How can you even contemplate exporting endangered or near endangered species. Has no on learnt yet?	Nicole
	2020-04-23 15:38:20	Western Cape		No I do not	It's just not necessary and must be in the interests of just a select few to do this. I mean Bison? Kangaroo? really?? What is the source/reason for this amendment? Who is asking for it? Tell me that and then you can ask the question again. If there's no reason to change the act then why do it	David
	2020-04-23 15:38:15	Western Cape		No I do not	This is completely unacceptable. The South African heritage belongs to the people, NOT THE GOVERNMENT!!! The people have the say whether our heritage and our wild animals may be used to profit from NOT THE GOVERNMENT. It is very clear that there will be governmental pockets lined with this profit and supply to the International market, especially China. This IS NOT acceptable. The government are allowing China to dominate our country and this is one more step in that direction to pay off debt they have run up at the cost of our people, our animals and our land. THIS is unforgivable! NO to this proposal!! We live in a democratic country or has the government chosen to forget that?! Already bowing to communism. Have the animals of Earth not suffered enough at the hands of humans!!!??? This will create cruel farming and slaughtering, God forgive us all! CANNOT be allowed to continue	Beverley
	2020-04-23 15:37:31	Western Cape		No I do not	Wildlife is not meant to be exploited for our greed. This is outrageous. Leave our African wildlife alone. Nature needs to heal now more than ever from us humans.	Brigitte
	2020-04-23 15:37:05	Western Cape		No I do not	We need proper legislation and policing to protect certain species from extinction. Stop providing the Eastern market with endangered wildlife. Why do we have SANPARKS then?	Kobus
	2020-04-23 15:36:29	Western Cape		No I do not	I think that all endangered species should be removed from the list as well as species that are on their way to be endangered. We do not have to eat rhino, elephants etc just because. Lets keep our animals safe and protect them as we can	Adele

	2020-04-23 15:32:09	Western Cape		No I do not	It would be utterly stupid to include these wild animals on the list! Does the minister not realise that the coronavirus in all probability, according to the majority of scientists in the world, came from a wild animal (a bat and a pangolin) in Wuhan, and that exporting such animals will probably mean they will end up in such markets? It is because of humans encroaching on nature and animals' habitat that these viruses are shed - that has been pointed out by many scientists. SO - PLEASE, MINISTER, SHOW THAT YOU CAN INTELLIGENTLY AVOID SUBJECTING WILD ANIMALS - SOME OF THEM ENDANGERED SPECIES - TO THIS UTTERLY INSANE PROCESS!	Bert
	2020-04-23 15:31:23	Western Cape		No I do not	I do not fully agree with our wild animials being sold in the meat . There needs to be strict rules around the breeding aswell as living conditions and slaughter of these magnificent animals	Valerie
	2020-04-23 15:31:14	Western Cape		No I do not	Rhinos, and possibly other animals on the list, too, are highly endangered. It cannot be included in this list. All animal slaughter needs to be sustainable and the longevity of the variety of species need to be guaranteed.	Jeffrey
	2020-04-23 15:31:04	Western Cape		No I do not	The amended list must not contain the names of any endangered species of animals or any animal species which might become endangered in the near future. This is unacceptable and not even open to discussion. Endangered animals of any kind is not to be considered for this amended list.	Cameron
	2020-04-23 15:30:10	Western Cape		No I do not	As the world is currently, there is absolutely no reason to consume ANY animals at all, ever. Plant more trees, free up more land for food to be grown so there is no need to consume any animals. YOU should put a BAN on KILLING ANY LIVING THING. The cruelty aspect of proposed is insane If you remove animals from their natural habitats entire ecosystems fall apart impacting ALL life, including humans. (Controlled animal farming contributes hugely to global warming, destroys our soil and takes up way too much ground for grazing in comparison to its yield I motivate that this too is banned). Perhaps we can lesson the demand on animal consumption not expand the species selection. This is madness!! Pls stop this type of thinking.	Beverley

					Dear beloved South Africa – Doesn't Covid19 teach us that it's time to understand ourselves as PART OF NATURE and its sacred animal kingdom, including one of the world's most trafficked and hence endangered animal: the pangolin – not APART FROM NATURE? Science shows that many animals carry coronaviruses and are potential sources of infection. There is a relationship between animals, the environment and human disease. Research suggests that even Spanish flu - the world's worst pandemic on record, killing an estimated 50-100 million people worldwide (> Jeffrey Taubenberger, MD, PhD, Emerging Infectious Diseases journal) came from a bird. Why not understand this warning and take the right action to stop this from happening again? Birds, bats, swine, pangolins, what next – and again? And again? Isn't it OUR RESPONSIBILITY to end this vicious circle? Isn't it time to start COOPERATING WITH NATURE instead of dominating it? Why not take the lead in making not only South Africa, but Southern Africa, if not all of Africa a heaven for wildlife that develops naturally and lives in harmony with humans, without fear, in the true sense of UBUNTU = THE CONNECTEDNESS OF ALL THAT IS? Why not start truly investing, nurturing, with a long-term vision, in this UNIQUE and incredible potential we have! Meat can be 3D-printed already today and taste like the juiciest steak, giving the body all it needs BUT without endangering ourselves and the environment with hormones or toxins! That is the future of feeding the world. And that's the great chance and true task, if not SACRED OBLIGATION, for South Africa, and Africa as a whole, to HEAL ITSELF by honouring its NATURAL GIFTS, leading the world by doing just that! No, no JOBS (Just Over Broke) will be created – but occupations we LOVE and can be PROUD OF as now we're in synch with Nature again! We're healing and, in doing so, we are whole & healthy again and we lead a life by example. Life has a different meaning when we create something of value that we pass on to the next generation. A total game changer!	
	2020-04-23 15:28:14	Western Cape		No I do not		Bianca
	2020-04-23 15:27:23	Western Cape		No I do not	No animals on the endangered animals list should be exported from our country or allowed to be hunted in our country. Tourism is the lifeblood of our economy and our game reserves are the greatest attraction for local and overseas tourists. The proposed changes will lead to the increase in exploitation of endangered wildlife species. Futhermore, as we have seen with the Coronavirus pandemic, exploitation of wild animals can result in transmission of diseases from animals to humans. The amendment to the act could therefore potentially increase diseases between wildlife and humans and have an impact on human health.	Brian
	2020-04-23 15:27:12	Western Cape		No I do not	STOP KILLING OUR ANIMALS!!!!! AFRICA especially South Africa got unique wild life, we're fighting POACHERS that feels nothing for our animals - SO PLEASE CONSERVE OUR WILD ANIMALS !!! One can make better money from tourism then allowing people to kill them even of they are bread to slaughter, it will not stop there and poaching will then increase, masked by legal trade. SO NO I do not approve	Sean
	2020-04-23 15:26:52	Western Cape		No I do not		LOUISE
	2020-04-23 15:26:47	Western Cape		No I do not	Stop killing our wildlife and give our children a chance to know them personally and appreciate the biggest gifts we have. They are precious and should be protected.	Ankia
	2020-04-23 15:26:35	Western Cape		No I do not	This list of animals makes no sense. How can rhino be on there? And how can Beira be on there? It is a rare antelope only found in Somalia. Something very strange about all of this?	Callan
	2020-04-23 15:26:24	Western Cape		No I do not	This will just encourage more killing of endangered species and more poaching when this is already such a large problem. This time of pandemic has surely taught the world that we have to CONSERVE precious resources, and wild animals and endangered species surely fall within this category.	Michelle
	2020-04-23 15:26:23	Western Cape		No I do not	I cannot subscribe to wild animals being added to the list, especially those on the endangered species list. Consider Wuhan and the wet markets and the huge damage done by the unhygienic slaughter of animals, domestic and wild.	Christopher
	2020-04-23 15:26:09	Western Cape		No I do not	We need to protect all our wildlife not just the endangered species. We must not exploit them for profitable gain in any way. I don't even agree with the so-called list of domestic animals. I don't believe we should be eating horses, donkeys, etc.	Sue
	2020-04-23 15:26:01	Western Cape		No I do not	Some of the species are protected and endangered. Do not be ridiculous in including all the mentioned species.	Chris
	2020-04-23 15:25:29	Western Cape		No I do not	Stop killing of all sentient beings. We have enough land for planting of live foods	Adie
	2020-04-23 15:24:53	Western Cape		No I do not	No threatened/endangered species should be even considered for slaughter or consumption. End of story.	Candice

	2020-04-23 15:23:13	Western Cape		No I do not	We have survived on what was previously on the list. Is S.A. now trying to cater for the Asian people? Next on the list will be dogs and cats. A big NO from me.	Marinell
	2020-04-23 15:22:43	Western Cape		No I do not	South Africa's ties with China are sickening and the inclusion of non-food animals is indicative of this situation worsening. Did we learn nothing from covid? Enough with the slaughtering of animals other than established food sources - cows, pigs, chickens, sheep!	Erica

	2020-04-23 15:20:46	Western Cape		No I do not	I am shocked and utterly disappointed, that you could even contemplate such a terrible idea. Our country is dependant on tourism, and where selling is involved, corruption will flourish. Is this a demand from China?	Louisa
	2020-04-23 15:20:43	Western Cape		No I do not	This is beyond ridiculous! The effects of the corona virus is still here and now this? I think nobody with a slight sense of intelligence will support this!!! Our wild life is our future income for tourism and we need this for our economy. And government has the audacity to suggest this amendment! Rule us please, but don't destroy us!!!	Johan
	2020-04-23 15:20:25	Western Cape		No I do not	When will we ever learn? We've messed up and seem to be hell bent on continuing to do so. Leave our wildlife alone and start caring for our planet.	Janet

	2020-04-23 15:19:18	Western Cape		No I do not	Leave our wildlife alone. Do not export any wildlife or birds. We enjoy watching them alive in South Africa plus they are a huge tourist attraction.	Philippa
	2020-04-23 15:19:12	Western Cape		No I do not	The new list is so wide that it covers a vast number of wild animals which were not there before including endangered species as well. In the light of what we are doing to the environment already without these permits I can only think that the person/ organisation endorsing this is totally ignorant or has gone completely insane . If this goes through the butchering of our planet (literallly) will continue unabated and flies in the face of humanity.	Rick
	2020-04-23 15:18:50	Western Cape		No I do not	We are who we are because we are South African. South Africa is what it is, because of it's wild life and people protecting nature. 	2020-04-23 15:16:28	Western Cape		No I do not	No I don't support this new bill Destroying our game and wildlife is despicable and a sin. God gave mankind a list of meats we were allowed and disallowed to eat in the Bible but mankind has disobeyed and the result is sickness and diseases like corona virus too There is more than enough different types of meat etc we can eat but mankind is getting greedy. If they continue to kill etc, our world will just be destroyed even more.	DESIREE
	2020-04-23 15:15:56	Western Cape		No I do not	I cannot see why anyone would want this amendment especially in the light of the Covid 19 pandemic.	Denise
	2020-04-23 15:15:03	Western Cape		No I do not	The inclusion of protected and endangered species from all over the planet is confusing and surely unnecessary. The perception is left that the act is being amended to open loopholes for human consumption of various animals that are protected, for which there is no reason. If, for some reason, it is necessary to use this list as it stands then a provision must be made that it is subject to animal conservation, protection and endangered listing of any country in the world. This will at least stop e.g. musk oxen from being imported to SA for slaughter! Ideally the list should be cleaned of all protected animals.	Lawrence
	2020-04-23 15:14:19	Western Cape		No I do not	Definitely not!!! It is completely unacceptable.	Rudi

	2020-04-23 15:08:52	Western Cape		No I do not	I think the threat to the wild animals in Africa is already bad enough, without adding them to a list for slaughter, consumption, import and export. At some point, somebody will have to say stop, before the wildlife in Africa disappears for good.	Erica
	2020-04-23 15:08:47	Western Cape		No I do not	Please consider what you consider as meat for human consumption. Have we not learned anything from the corona virus? ??	Sonia
	2020-04-23 15:08:37	Western Cape		No I do not	Absolute NO from me. It is our responsibility to do what we can to protect our wildlife. This new proposal is scandalous and disgusting.	Jean

	2020-04-23 15:04:57	Western Cape		No I do not	Why do they need all this meat? There are many substitutes, much cheaper than meat. In countries like China, they eat rice and more rice. Eating meat every day is the privilege of a rich country. We are not a rich country. Being a vegetarian, this is all terrible for me, but it's not my business to tell others what to do. And they want to export the meat as well. There is no dire need for meat in this country, so I see no good reason to include the animals mentioned in the new list. It's a good thing I'm not in charge in this country. I would empty the jails by feeding the convicts to humans and animals. We are, after all also animals - human mammals and we're a bad lot, so this would be an excellent opportunity of emptying our over full jails.	Adele

	2020-04-23 15:03:18	Western Cape		No I do not	The fact that this is even on the table is beyond belief!!! All consumption of any animals should be completely banned. All hunting of any wild animals should be banned and punishable. Animal agriculture should be phased out completely.	Patrick

	2020-04-23 15:01:45	Western Cape		No I do not	There is no reason whatsoever to slaughter any large species of wild animal. 	2020-04-23 15:01:17	Western Cape		No I do not	We are in this situation with Covid19 due to the consumption of 'wild meat'. It is natures way of telling humans that we have taken a big step too far and that eating of wild meat, along with all the other dreadful thigs humans do to this planet, is going to kill us. Furthermore how can this Government sanction the slaughter of endangered animals for human consumption? We would do a million times better to protect them all and reap the rewards of a thriving tourist trade, rather than allowing some very warped individuals to kill and eat our wonderful wildlife. Haven't we messed up enough already? Don't make it worse!	Wendy

	2020-04-23 14:58:11	Western Cape		No I do not	It is totally unacceptable that wildlife should be included on this list, including many endangered species . This amendment MUST be redrafted so that govt policies from different depts align where there are overlaps.	Dave
	2020-04-23 14:52:16	Western Cape		No I do not	The old list is more than good enough. No other animal should be added, least those on the endangered species lists!	Ulu

	2020-04-23 14:52:09	Western Cape		No I do not	Government once again shows how little it cares for wildlife and nature. Putting animals like giraffes, rhinos etc. on a butchers slab to make more money is disgusting and evil. something would have expected from China. Seeing how China has treated its wildlife, both on land and sea, makes it clear we should be protecting our own. Makes me wonder how far trade agreements with China go with some of our government officials. Also don't forget in what particular type of store area in China COVID-19 spread from and I guarantee if such a law is passed, officials would run such markets/stores in the same deplorable manner. Also passing such a law, would give poachers right to hunt and kill these creatures in even larger quantities. Even more so if introduced to some loop hole by an official or representative in relevant department looking for some extra cash. Would we sell out the beauty and serene creatures, which we as dominant species should be protecting, for more money to be placed into greedy officials pockets. We are already causing the extinction of many creatures with our land developments and pollution. Any individual who pushes this to be passed as law, has no morals in the least and as well as the people who proposed & supported this draft. They are clearly have no regard for anything other than themselves. Does not matter what excuse was used to lead to try and make such a evil and deplorable act law. This is far too heinous and deplorable, and should NEVER be passed as any kinda of law.	Sheldon

Now more than ever is the time for our government to be clamping down and placing further restrictions on the slaughter of, the exporting of and the consumption of wild animals. South Africa is one of the most important countries in the world involved in conservation of wild life and Game Parks for tourism. We should be leading by example.	Hilary

	2020-04-23 14:29:28	Western Cape		No I do not	Many of the animals on the new list are endangered . This appears to be another opportunistic move by government to pass this legislation while everyone is focusing on the Corona pandemic. Who is going to benefit from this? Certainly not tourism . How many South Africans eat many of these animals . Follow the money !!	Richard

	2020-04-23 14:28:55	Western Cape		No I do not	Go to Leviticus 11 and read what the Bible say about animals to eat and not to eat. One cannot eat anything. Covid-19 originated in China from wildlife that's sold and eaten and it's causing major health risks. Please don't add these other wildlife to our counties permitable meat sources. It's a NO NO	Christelle

	2020-04-23 14:28:06	Western Cape		No I do not	I strongly DO NOT support the slaughter, consumption, sale and export of ANY animal but doubt that anything can ever change this but I do ask that more is done to prevent the terrible cruelty that occurs within the meat and trade industries. This industry, along with their unethical and barbaric practices needs to be brought to task and more needs to be done to treat these animals with the respect they deserve. The meat industry is the main contributor to Cancer and the destruction of the environment. We need to wake up and start changing how we operate.	Joyce

Now it is up to the so called authorities to do the right thing and stop this amendment. TOTAL MADNESS, strict birth control is required , big insensitives for women with no children	Gregory
	2020-04-23 14:19:46	Western Cape		No I do not	The health of our planet (humans included) relies heavily on protecting and respecting our biodiversity which could be severely compromised by any reduction in species. This is a short sighted self serving decision made by a few that will have dire consequences for possibly the whole world. It will further commercialise the uniqueness of Africa that will eventually implode and destroy the very unique and important product that forms an essential part of the African economic possibilities. . If the rationale was that the world needs more varieties of meat it boggles the mind !!! If the rationale is that it would create more revenue for a few in South Africa it boggles the mind even more. If the rationale is that it will stop poaching it boggles the mind even more as we will be moving further and further away from being responsible and accountable self appointed custodians of what this part of the planet that we are occupying is offering us. Sadly this new list is a possible powderkeg that might blow up in our faces sooner than we think.	Melani

	2020-04-23 14:19:08	Western Cape		No I do not	No, I do not support the amendment. The government has clearly shown that they are not capable to protect and regulate the wildlife animals in SA. They cannot even control the poaching, let alone controlling any culling process. There are only a few game farmers in SA who genuinely protect our wildlife and who practice conservation and even they are plagued by poachers. Why do they not ask these farmers for their input ? Nature sort itself out. If the lions and tigers were not slaughtered they would have controlled the numbers of the animal kingdom.	Petrus

	2020-04-23 14:10:22	Western Cape		No I do not	We are animals, just like every other animal. Lets start to view them with compassion and respect like we do to our other human brothers and sisters. If not for compassion, then for biodiversity. Every animal plays a role in the ecosystem and if we start removing these from the system we create a snowball effect which will impact other animals not even on this vast unnecessary list lowering biodiversity even further. And if not for Biodiversity then do it for the economy. Tourism is a huge addition to GDP and if harnessed correctly could add far more than it currently does. By increasing this list you are lowering the African tourism appeal of wildlife and therefore indirectly lowering tourism and costing South Africa jobs and a brighter future. Dont ruin all the good Cyril Ramaphosa is doing for the ANC by treating animals poorly, reducing biodiversity and ultimately costing the economy with more unemployment and cycling back to hurting more animals, us.	Logan

	2020-04-23 13:56:30	Western Cape		No I do not	The slaughter of rhino and elephants for their ivory is already a problem in our country. 	2020-04-23 13:55:40	Western Cape		No I do not	We should protect wild and domestic animals. There must be laws with harsh penalties in place. Poaching should come with jail time. Canned hunting and wild hunting should be banned, unless it is for population control. I'm not an expert, we need guidance on that subject. It does not aid conservation! We must come up with solutions to meat alternatives. Such as using cell cultures to produce meat for human consumption. When the lockdown is over, scientists need to work on finding meat alternatives for all animals currently consumed by humans. It would be hypocritical to say 'protect the wild ones, eat the domesticated ones!' It must be fair. I hope we can all come to some sort of compromise.	Daniela

	2020-04-23 13:53:49	Western Cape		No I do not	It's totally ridiculous contemplating such a sick idea. Those poor animals are under threat all year. 	2020-04-23 13:53:25	Western Cape		No I do not	It is extremely worrying that animals on the endangered list would be up for slaughter, consumption and especially export. Have we sold our wildlife to China and their wet markets? This is disgraceful. Our wildlife needs our protection, not to be exploited for political gain. I see no other reason for wanting to make such a change of law. We have other animals for consumption and we don't need to extend our menu to wildlife to meet the human need of protein consumption. 	2020-04-23 13:50:33	Western Cape		No I do not	If an animal species listed as protected or endangered it can not be considered for export as a product to be killed for consumption likewise how do we allow the donkey to be decimated just because Asian countries think it is a medicine This bill in my opinion is all about money and nothing to do with protecting our wildlife which could and should be our first consideration, with this as a backdrop we can honestly motivate visitation to our country to see wildlife	Andy
	2020-04-23 13:50:08	Western Cape		No I do not	The inclusion of so many animals which are, and always have been classified as game or wildlife, which classification presumably kept them off the poaching hitlist because they were not on the "menu" will take SA down a treacherous road. The widespread legal consumption of just about anything that moves in China is by all accounts what may have led to the coronavirus pandemic, and one can only suspect that increased Chinese presence in SA may be behind this !! 	2020-04-23 13:45:01	Western Cape		No I do not	No I do not support this amendment. If the slaughter of endangered species is allowed it will push these animals to extinction. People will poach these animals and it will be very difficult to control. Please do not create more problems for country. Once these animals go extinct what then. Our wildlife create lots of tourism. Think of the future. People from all over the world visit our country for our wildlife.	Karin

	2020-04-23 13:40:55	Western Cape		No I do not	I am shocked and horrified that this government is sending our precious wildlife to other counties It's a cruel practice and with a constitution like ours they should behave in a much more ethical way although in the past 15 years they have shown us they have no moral compass but let's hope in the future they will realize that if they want to have the support of their people it's something they need to have and they must demonstrate it The other despicable thing they did last year was send that consignment of sheep to the Middle East It made me sick to my stomach to think that human beings could do such a cruel and inhuman thing and that practice needs to stop immediately I do not support this amendment They should being amending it to we will not export our wildlife and we will only export meat if it has been humanely slaughtered in this country	Sharon

As boerdery diere en wilde diere nie geeet word nie, gaan daar n oorbevolking van diere rasse plaasvind, want daar is nie genoeg weiding vir almal nie. Die mens is daar om beheer uit te oefen en balans te handhaaf. Wanneer n dier geskiet of geslag word moet hy tenvolle benut word. Nie net n gedeelte van hom nie. Daaroor voel ek baie streng. 	2020-04-23 13:25:01	Western Cape		No I do not	Threatened animals need to be looked after more now than ever. We need to stand together to protect all wild animals. There is no need for the slaughter of these animals for the purpose of some man made up idea of what the animal may or may not do health wise for humans, these are living breathing creatures we are talking about, they hurt just like me and you. It is absolutely disgusting that this would be considered (even allowed) when we have so little animals left. Please please do not allow this to happen, animals needs a right to live too!!! Come on SA be kind to our animals, they are OURS and belong with us.	Storm
	2020-04-23 13:24:41	Western Cape		No I do not	So why would any balanced person wish to allow God's creation to be slaughtered? THERE IS SOMETHING FISHY ABOUT THIS LEGISLATION AT A FUNDAMENTAL LEVEL. THE QUESTION BEGS: WHY ARE WE SUDDENLY EAGER TO PLACE THESE NEW SPECIES ON A LIST WHICH DECLARES OPEN SEASON ON THEM? COULD IT HAVE ANYTHING TO DO WITH THE OVERALL SELL-OUT OF SOUTH AFRICA'S PRECIOUS COMMODITIES AND RESOURCES TO THOSE WHO OFFER ASSISTANCE CLAD AS RESCUE GIFTS, SO THAT THEY CAN PLUNDER THE RICHES OF OUR CONTINENT WITHOUT QUESTION ? I definitely say no.	RUSSELL

	2020-04-23 13:13:54	Western Cape		No I do not	Banning production and consumption of all these species, will surely lead to their extinction in most cases. When animals can no longer be sustainable as a food source, their existance in the foodsector can mot be justified. So many species will have to be culled as a result, as they can surely not be kept and be allowed to share space with domesticated species. Why sheep feature on the list leaves me stumped. There is no evidence of any of the species on the list to be harmfull to human consumption.	Nico

	2020-04-23 13:08:38	Western Cape		No I do not	Please do not pass this legislation. It is totally unnecessary to extend to animals that are considered wild life. They should be protected. The number that are currently permitted should be sufficient. Why are we doing everything we can to save our Rhino's and other species only to have them allowed for consumption. This is insane! I presume this is being lobbied for by game farmers who have a vested economic interest in getting this legislation passed.	Avis

	2020-04-23 13:06:57	Western Cape		No I do not	Why are we doing this now when people aren't thinking straight. Looks like we're abusing this devastating period in human history to push through ridiculous policy for political gain. IT CAN WAIT. Besides the fact that some of these animals are endangered, they are potentially the source of further Covid-19 outbreaks. Animals raised under controlled conditions are fine for consumption, NOT wildlife.	Greg
	2020-04-23 13:06:56	Western Cape		No I do not	why are animals not indigenous to Africa included in the list, together with carnivores, which have never been hunted as food. 	2020-04-23 13:02:19	Western Cape		No I do not	I believe that it would be criminal to allow for the export of game meat, many of the game being on the endangered game list. Has the Minister actually examined the list or just passed on the list to subortinates for action	Ian

	2020-04-23 13:01:34	Western Cape		No I do not	As a non meat eater, my ideal world would be one without the slaughter of animals and birds. We are living in an extraordinary time which seems to require of humanity to reconsider its assumption that we have dominion over all other life. We have used the earth's resources to a point where the effects of doing so are threatening human existence. It would be wise to reconsider the manner in which we go forward if we are to survive. So no, I do not agree with the increase of use of earth's creatures for our consumption.	Cheryl

	2020-04-23 12:59:12	Western Cape		No I do not	Legalising trade in endangered species ia a terrible idea. In fact, trade in any of our game species should not be allowed. Should humans be allowed to eat every last species on the planet until we're the only species left? Then what, eat humans?	Gill
	2020-04-23 12:59:02	Western Cape		No I do not	Are they totally insane? We are already seeing some of these animals on the endangered species list and this ANC Government wants to allow for their slaughter nd export? 	2020-04-23 12:58:47	Western Cape		No I do not	Have we not learnt anything from the pandemic we currently find ourselves in - first and foremost to respect and protect nature! If the pandemic did arise out of the wet markets of China there surely is a lesson to be learnt. Every nation has the capability and resource to cultivate the more domestics type proteins, e.g. beef, lamb, pork, chicken, in efficient quantities to meet their own domestic markets. There is a hidden agenda as usual behind this - among others to line the pockets of those who are expediting these agreements. Leave our wild animals alone. Stop plundering Africa's nature!	Hellene

	2020-04-23 12:57:35	Western Cape		No I do not	commercialization of heritage animals threatens our biodiversity. 	2020-04-23 12:56:28	Western Cape		No I do not	Our animals, and wild life in general, should be very strictly protected, most definitely not for this irresponsible, incompetent, inept and corrupt ANC regime to squander away like they've done with most of the world class infrastructure they inherited in 1994. If approved, this will also only serve to appease their new masters, the Chinese. Disgusting, SIES!	Gene
	2020-04-23 12:55:53	Western Cape		No I do not	Leave our wild life alone! How can you even consider endangered wildlife such as rhino? If an animal is farmed for consumption that is fine as it's not impacting on our natural wild life, but to even think that it's ok to hunt and slaughter wild animals, that's inconceivable!	Andrew

	2020-04-23 12:48:58	Western Cape		No I do not	Our wild life should be protected at all costs for future generations. Our wildlife is also a valuable tourist attraction and should be preserved ,not eaten.	Jennifer
	2020-04-23 12:48:24	Western Cape		No I do not	People should stop eating meat in its entirety! This is just a method to make more money and to exploit animals even further. This us not good. We are going through a world epidemic, Covid 19, which derives from eating animals and unhealthy and poor managed environments where the slaughter of these animals take place. Why ? Please stop this. Do not ad more animals to the list for human consumption. Please stop. Do not allow this. More and more viruses will come, but people are more interested in their taste and lust for flesh then to live a compassionate life.	chantel
	2020-04-23 12:48:10	Western Cape		No I do not	Is there not enough meat to eat in South Africa currently? How dare we permit the slaughter of indigenous South African animals? So that they too can become extinct? Have we not plundered this earth enough???? Stop the slaughtering of anything but the usual: sheep, chicken, beef and have this done by professional slaughterhouses in supervised surroundings and in accordance with strict laws pertaining to the death of animals in a humane and painless ways. Stop the slaughtering of innocent animals in public places! One should not be forced to view something which one considers unacceptable. Do we want to follow in China's footsteps?	Sue

	2020-04-23 12:39:55	Western Cape		No I do not	That this Bill is being drafted at a time of monumental negative impact on our planet is quite simply stunningly insensitive. The original list should be shortened not lengthened! To see wildlife being added and especially endangered wildlife points to sinister motives. What can the motivation be besides a way of making money from people and countries who place no value except financial on sentient beings? Stop this madness now South Africa! Put our country on the map for the value we place on our wildlife heritage. Stop with making China, Asia our masters! Stop also the ocean transportation of livestock. 	2020-04-23 12:34:50	Western Cape		No I do not	Is the Bills intention to prevent the slaughter , sale and consumption of all wild animals to prevent another COVID-19 crisis ? The Bil must make crystal clear that no trade all wild or exotic species is permitted. We stand by our international CITIES commitments and all animal protection rules must be observed . All our wild game other than those antelope that are specifically bred for slaughter for sale as biltong etc. should simply be banned from slaughter, sale, import or export.	john

	2020-04-23 12:33:41	Western Cape		No I do not	In light of the current Covid19 crisis, this proposed law is particularly irresponsible and harmful - not only to innocent animals but to humanity, given that history has shown that the consumption of animals causes these sorts of pandemics. This is another abhorrent and disgraceful show of human ambivalance and disregard for life, and nature in general. Stop with the greed and worship of money and power abnd get in sync with nature. 	2020-04-23 12:20:53	Western Cape		No I do not	Dear Minister, the amendment you seek to implement is an abomination to the preserve of humanity and things that surround them. I am of the opinion that the desire to add more genus of wildlife into the consumption list is driven by the new colonisers of Africa, viz. the Peoples Republic of China in their insatiable greed to devour everything that crosses their communist path! Please do not, Please do not amend the ACT. No doubt you are aware, that this current Corona Virus pandemic, SARS and H1N1 are largely attributed to the consumption of wild animals and the transference of these viruses. Knowing these risks to humanity, how could you contemplate such an heinous act? This proposed amendment make a mockery of the Presidents' declaration of State of Disaster, where he seeks to save lives, whilst you seek to place the very same lives at risk. We do not need to resort to the slaying of wild animals to protect food security. As the minister responsible for this area, you should be enhancing and supporting the already established norms of meat consumption. I challenge you to deviate from the usual norm of blindness of ANC policy and invoke in your true self ubuntu ngumuntu ngabantu (I am because of who we all are) I am NOT in favour of this amendment. 	2020-04-23 12:17:21	Western Cape		No I do not	This will be a sad day if this Bill is passed. Unfortunately the persons promoting this have no respect for animal life in Africa, particularly endangered species. Our past President himself acknowledged that care of dogs was not in the African culture. This together with how animals such as cattle and goats are treated in rural markets and cultural ceremonies is a sad fact and together with legalizing the slaughter of endangered species is just too horrendous.	arthur

	2020-04-23 12:17:17	Western Cape		No I do not	There can never be a good reason to slaughter wild life. Please do not allow this bill which will give humans the right to slaughter our wild life.	Edna
	2020-04-23 12:16:51	Western Cape		No I do not	The existing list of animals is plenty for meat requirements. I'm not even in favour of including elephants on the list but accept that when culling is sometimes necessary the meat cannot be wasted. The new list is absolute rubbish. How on earth are rhinoceros included here? What was the drafter of this proposal smoking? You cannot have open season on things like porcupines, dik-dik, klipspringer etc. Surely this country is beyond the usual african categorisation of any animal being "meat".	Evan

	2020-04-23 12:12:43	Western Cape		No I do not	Just when I thought we were at last finding Ministers with something other than space between their ears, this is suggested!!! What has happened to all the attempts over the years to save our wildlife from extinction by poaching and other illegal activities, now she looks to reverse years of hard work, dedication and donations to save our wildlife. I cannot believe the stupidity and gross lack of intelligence.	Wendy

	2020-04-23 12:11:48	Western Cape		No I do not	Cross species viral jumps present a very real threat to the entire human population of the world as stated by the CDC, WHO and other health bodes. It is totally irresponsible to include wild animals in the list of acceptable species that can be included into the daily human food chain of SA or any country in the world. The covid-19 pandemic is proof of the very real risks this behaviour poses. It is for this very reason that the CDD and WHO has recommended that all wild animal markets / and the consumption of wild animals be prohibited with immediate effect and why China is outlawing this practice throughout the country! This is over and above the fact that SA is the custodian of all local wildlife species. It is the SA government's and all its citizens responsibility to protect this country's heritage. To do otherwise would be grossly irresponsible and an international crime.	AM
	2020-04-23 12:11:46	Western Cape		No I do not	We need to protect our wild animals for future generations and also for tourism and sustained hunting. Exporting our animals is cruel as we have no control of how they are treated,	Ed
	2020-04-23 12:11:11	Western Cape		No I do not	Please don't do this.We are the guardians of the wild animals in our country and should be protecting them,not slaughtering them	Kathy
	2020-04-23 12:10:49	Western Cape		No I do not	This is typical of our incompetent government and officials, who do not give any proper thought to any legislation changes. The wild life is already threatened with poaching, etc and now they want to condone slaughtering !! For what purpose? this will further encourage poaching. This is also the very reason why there is a sever virus at the moment. All these viruses come from animals. Have they learnt nothing from this?? I guess not?	Pat
	2020-04-23 12:10:31	Western Cape		No I do not	NO! NO! NO! Are they out of their mind. This nothing else but barbaric and greed.	Fatima

	2020-04-23 12:10:15	Western Cape		No I do not	Another retarded fool employed by the government to destroy the country one way or another. Where on earth do they find this lot? Completely amazing and disturbing.	fiona
	2020-04-23 12:10:14	Western Cape		No I do not	I can see no logic reason/s for extension of the list of animals, apart from the fact that many are endangered species - as if this country do not have sufficient meat resources from the normal list of cattle, sheep, chicken, pork etc??	Martha
	2020-04-23 12:10:08	Western Cape		No I do not	This to me is what we have become to expect from a person who has no idea of the impact this act will have on the future of these animals. This to my mind will give free reign to poachers and the like and they can't even control poaching at the moment	roy
	2020-04-23 12:10:01	Western Cape		No I do not	Is not the COVID 19 pandemic lesson enough ?! Surely we should not extend our meat consumption to wild & endangered species and especially not possibly to satisfy the gluttonous & often very cruel Chinese or any other taste for 'exotica' . (Consider Sharks' Fin Soup & how unmercifully the sharks are left to die!) Please limit the species allowed to the old list. That is enough!	Phyll

	2020-04-23 12:09:29	Western Cape		No I do not	The existing list is to long and in some cases includes species that are and in some categories on the extinction list. The new list is totally unacceptable and should be discarded with the contempt that it deserves. I would suggest that the institute for animal studies with the environmental department ascertain first what impact this will have on the population numbers, and the effect that an increase in breeding for consumption will have on the environment. How will this process be managed to ensure that the numbers of the different species are not wiped out by a law that in my simple mind will have a devastating effect on existing populations. Whoever felt it necessary to increase the list needs to be found and asked whether he/she or the committee responsible have the relevant knowledge to make a request to the minister to extend the existing list.	Kevan

	2020-04-23 12:08:31	Western Cape		No I do not	It is dangerous to allow people to eat wild meat and the meat of endangered species. The covid19 virus has proved how dangerous that is. In addition this practice will encourage certain disgusting people to wipe out our endangered species.	Marian

	2020-04-23 12:07:26	Western Cape		No I do not	I cannot understand how one could even consider this amendment. Our wildlife is our heritage, and therefore is our wealth, this keeps tourism alive and in that south africa alive. Why is it that those in power are so blind, Dont rape nature as you have in the past and obviously advocate this even today...Nature is very powerful and will turn around and bite you. Nature who has always supported life as a whole is not acknowledged at all. How sad that those in power have not earned their positions, by going into nature and doing a rights of passage with nature as the educationalist.....they have not got a clue, God help us. Our society seems to be governed by lawlessness, by corruption.....If only we had the khoi san, the first people who live according to the laws of nature in a respectful manner, they might not have a matric, however they are far wiser than those driving this ammendment. WAKE UP YOUR DAYS ARE NUMBERED, WHERE WILL YOU RUN WHEN NATURE TURNS ON YOU.	Elsa
	2020-04-23 12:07:25	Western Cape		No I do not	Haven't we done enough damage to wildlife and our planet already where will human greed end?	Andre
	2020-04-23 12:07:18	Western Cape		No I do not	The proposed amendments seems to sanction the slaughter for sale or export of very rare and Cites protected species and also allowing the import of such meat?. Is the intention to prevent the importation, sale and consumption of 'wild' meat. All our wild game other than those that are specifically bred for slaughter for sale as biltong or prepared cuts should simply be banned from slaughter, sale, import or export. It seems that our Minister is attempting to block the sale and consumption of 'wild' meat to prevent the sort of COVID-19 debacle that has unfolded from the Chinese/ Wuhan meat markets? If so this is not the clear intention. There is a short sentence to say that animal protection rules should be observed, but is that enough?.	Mark
	2020-04-23 12:07:03	Western Cape		No I do not	We are already on the road towards our own destruction- look to China who eat anything! The whole world is on lockdown- wake up - you cannot eat money!	Ros
	2020-04-23 12:06:44	Western Cape		No I do not	I think I understand the motivation behind this - to provide a further source of protein for the many who struggle to get nutritious food. However, controls need to be firmly in place and there should be no exploitation. Therein lies the problem. Added to that, the world is struggling to get to grips with Covid-19 at this point. Is it really wise to open up the slaughter of a whole new raft of animals at this point?	Jennifer

	2020-04-23 12:05:55	Western Cape		No I do not	Many of these 'meats' are our special wild animals of South Africa. Many peoples livelihoods depend on their care and availability to encourage tourists and visitors to come to our land. They are a vital part of out heritage and should not be destroyed. They are not a food source.	lavenda june
	2020-04-23 12:05:48	Western Cape		No I do not	One of the great assets of South Africa is her great variety of birds and wildlife. These species all contribute to the delicate balance of ecological systems on the planet. Different species, such as rhino and elephant have been practically poached into extinction throughout the continent, and now our illustrious minister wanted to include all these threatened species in her list of animals for slaughter. We, at present, are faced with this horrible pandemic killing hundreds of thousands of people of all races, creeds and countries, directly or indirectly traced to contamination from wild animal markets in China. Our minister is charged with protecting our wildlife, but now is acting as agent for them to be butchered by brutal hunters, etc. from USA, Europe and the Far East Personally, I feel that whatever anticipated 'so-called' financial benefits won't be realized just as the jobs for arms deal, Chinese factories, etc. have not been. The National Parks Board will be unable to monitor and we will lose something that can't be regained.	Michael

	2020-04-23 12:02:32	Western Cape		No I do not	To include threatened species and protected species on this list, seems idiotic to me. This will certainly result in more endangered animals getting killed and creating more endangered species and by using the act as a legal means to do it. Seems ludicrous to me.	Wayne
	2020-04-23 12:01:59	Western Cape		No I do not	There are enough animals being bred in awful and disgusting circumstances for human consumption. Increasing the list will only add more of such facilities and lead to criminal activities not limited to poaching.	Anna
	2020-04-23 12:01:51	Western Cape		No I do not	This is disgraceful we need to protect our wild life	Betty
	2020-04-23 12:01:08	Western Cape		No I do not	Not sure how this amendment to the Act was drawn up but it seems that it is just 200% incorrect in many areas, especially with endangered and/or protected animals in the list!	Mike
	2020-04-23 12:01:05	Western Cape		No I do not	It is absolutely unacceptable that any animal listed on the IUCN Red List of Threatened species be put on the list of animals for slaughter and trade. Equally, animals that are uncommon should also not be put on the list. We need to protect ecosystems as a whole and not target certain species that might lead to the disruption of the ecological balance.	Angela

	2020-04-23 12:00:20	Western Cape		No I do not	How can we support the slaughter of Rhino when it's an endangered species? And giraffe? Elephant? It is unacceptable that endangered wildlife become tradeable commodities - it is not in the interest of the people, or the environment for this list to become law. It is clearly opening the door to countries like China to come here and slaughter our precious and diminishing animal resources.	Matt

	2020-04-23 11:59:22	Western Cape		No I do not	We are no better or more evolved passing this bill than if we were condoning wet markets. Surely humans can find another food source besides decimating wild animal species to survive. If we continue on this dangerous path then all we will be left with is grey areas of what is acceptable to consume and not. Is it not enough that we have domesticated animals for our personal consumption, now we are looking at creatures which represent our national pride and heritage. Perhaps we need to focus more on overpopulation than finding ways to feed us.	Francesca
	2020-04-23 11:59:17	Western Cape		No I do not	We need to protect wildlife, especially those on the endangered species list. This proposal will create a free-for-all on all non-domestic animals. 	2020-04-23 11:58:32	Western Cape		No I do not	There is no way that this is a good idea. One of South Africa's remaining treasures which hold appeal and have great local and international ability for Tourism is that we have wildlife. Many of the animals on this list are endangered. Apart from the conservation aspect, the global pandemic was kicked off by humans eating wildlife in the form of bats and pangolin - why on earth would you do this? Please reconsider.	Amanda
	2020-04-23 11:57:59	Western Cape		No I do not	We should not include animals that ought to be protected, and also limit our exploitation of wild animals generally - we have responsibilities to conserve these creatures, and not everything is up for exploitation.	Ivan

	2020-04-23 11:54:21	Western Cape		No I do not	No explanation is provided as to why the list should be enlarged to include more wildlife species and non-indigenous species. Rightfully, there is no demand for the consumption of rare wildlife or non-indigenous species. Introducing alien species for farming purposes will damage delicate ecosystems. There is a reason why some animals are called "wildlife" and others are called "domesticated" - domesticated animals have been farmed and consumed for thousands of years, therefore people know how to properly handle the products. Consuming wildlife can have devastating effects - after all, one need only look to the corona virus pandemic to realise how dangerous it is to consume non-domesticated species.	Winand
	2020-04-23 11:54:18	Western Cape		No I do not	if we agree that all (fourfooted) animals are in principle edible we also agree that despite their being enlisted on an endangered list, that they are actually open for free hunt. this is a nonsensical approach to managing the delicate balance between eco-systems, conservation and the protein need of people than can be satisfied more sustainable without needless animal sacrifice.	Amor

	2020-04-23 11:52:51	Western Cape		No I do not	Considering all the resources spent on conservation of endangered species, this is ridiculous, immoral & unethical. Subsidise our meat producers (beef, mutton, chickens) to encourage increased production of farmed animals & leave our wild life alone. Next you will be allowing "Wet Markets" to sell these animal products - as they have in China. The whole world is suffering the consequences of that.	Mary
	2020-04-23 11:52:16	Western Cape		No I do not	Many of these are endangered species and many of these are unhealthy to consume. We have seen what has happened in Wuhan. Do we want to create more pandemics? Has anyone made and educated study of these animals to see if its healthy to eat. The Bible says pork is forbidden because it is 'unclean' And we know it is the source of many viruses and sicknesses.	Ebrahim

	2020-04-23 11:51:50	Western Cape		No I do not	the list of animals must be revised and exclude animals on the endangered list. You are wasting all of our time making it a free for all and endangering the animals that we need to protect.	Maggie

	2020-04-23 11:50:44	Western Cape		No I do not	I am appalled that this amendment should even have been considered. It smacks of corruption at the highest level. Only the Chinese would be interested in the amendment being made. It is certainly NOT IN THE INTERESTS OF SOUTH AFRICA. Our wild animals are a national heritage, a national treasure. Why would seriously endangered animals like rhino be on the list? Why is the list including animals not even indigenous to to South Africa and not domestic animals? The minister who wants this amendment obviously does not take his responsibility to serve South Africa seriously and his judgment must have been clouded by bribery. How can we trust a government who tries to slip through an amendment which will seriously compromise our country's most valuable treasures - its wild animals during a time of lock down.	Louise

	2020-04-23 11:49:14	Western Cape		No I do not	I thought it was time to move away from factory farming. And if we legalise eating wild animals, what does this mean for poaching in game parks. 	2020-04-23 11:40:55	Western Cape		No I do not	We need to respect the life of all creatures .....there is no need to kill anything that moves to eat it. We are in the process of destroying the natural order of things ...we will wipe out the natural world and as a consequence humanity will bear the brunt. Corona Virus ...is just the beginning of this process ....the revenge of the Pangolins	Alan

	2020-04-23 11:39:42	Western Cape		No I do not	No! No! No! How can this amendment even be tabled in the first place?	Faye
	2020-04-23 11:39:39	Western Cape		No I do not	There are not enough of these animals to support our insatiable desire to eat meet. It will further destroy our environment and fragile ecosystem. THIS IS NOT SUSTAINABLE! empower people to grow food plants. Stop planting useless vegetation on council land. Plant fruit trees on the islands between highways. Fill the verges with spinach and lettuces. Cover fences with granadilla.	Shazelle
	2020-04-23 11:39:36	Western Cape		No I do not	Why would you knowingly add endangered species to the list of animals for slaughter? Why would you want to eat rhino, giraffe, birds? The only people i know of that currently do that are the chinese and we all know were that has led us. Is it possible, the we are all now under the CCP?	shane
	2020-04-23 11:39:11	Western Cape		No I do not	You discredit your office and any authority you may have by implementing antisocial, greedy policies that will alienate South Africa from the rest of the world.	Kim

	2020-04-23 11:38:58	Western Cape		No I do not	I see no difference between cows and sheep and NON threatened/endangered herbivores being available for meat export. But the fact that they are trying to pass highly endangered species being made available makes me think they aren't ready to do this responsibly.	Sarah
	2020-04-23 11:38:44	Western Cape		No I do not	This draft amendment/Act is indicative of the shallow understanding (if any) of nature & our environment and is typical of people with little or no respect for the animals that this country still has. Including wild animals in the meat food chain is another step towards taking SA into the darkest Africa!	Mark
	2020-04-23 11:38:10	Western Cape		No I do not	We are set on earth to PROTECT the animals.I do not support this at all just to give some sick CHINESE a delicacy....	graham
	2020-04-23 11:38:04	Western Cape		No I do not	I'm absolutely (vehemently am) opposed to any endangered (and threatened) species of animals being added to an "allowed" list, for the slaughter and consumption (in any form, even for non-consumption). Any excess stocks (if any, an eg. - elephants), should be strongly considered for exportation to other "SOUTH AFRICAN" reserves, at any cost, so as to maintain our healthy stocks within our own borders.	Achille
	2020-04-23 11:37:42	Western Cape		No I do not	Please, let's not put our national heritage animals - those that bring visitors, and make our country unique, to this list. After COVID-19 originating from wet markets, selling meat not usually eaten by humans, I do not believe extending the list to wild animals, is a safe option. Government should rather focus on vegetarian food security - its cheaper, healthier, better for the environment and a safe and affordable option.	Jodene

	2020-04-23 11:37:35	Western Cape		No I do not	Every being that lives Wants to live! Who are we to take away life? Our wilderness is our Treasure! If this bill was allowed, Very quickly we we will lose Everything. What will you give to our children and their children for Beauty, Awe and Wonder? That which connects Each one Automatically to the Mother and Father of All things! I believe that our Minister should be taken With some children, any children, for a beautiful 2/3 week stay at one or two of our Precious Natural Reserves. I don't believe that she "KNOWS"... if she did she wouldn't. She just does not know in Truth. In her body. With her eyes and ears... when things are on paper they are meaningless...	Christine
	2020-04-23 11:37:33	Western Cape		No I do not	No endangered species should be on this list. Where culling us necessary because of too many animals to be supported in an area this should be done responsibly. Our wildlife are dwindling as it is, with humans encroaching on their space, without us having to start hunting them for our profit. Nature is groaning because of our greed. There will be nothing left for future generations at this rate. This act will lead to even more corruption and poaching. Start killing off e.g. porcupines birds and the ecology becomes unbalanced with dire consequences for us as a human race.	Barbara

	2020-04-23 11:36:30	Western Cape		No I do not	Definitely not, are we doing this to allow the chinese to desecrate our wildlife?	Sylvana
	2020-04-23 11:36:28	Western Cape		No I do not	Honestly, this anthropocentric epistemology we subscribe to needs to end. We need to afford nature the same rights as people, which includes the right to life. We, as a species, have plundered any and all resources we have seen fit. While I agree that people need to eat, surely it is for the greater good to exclude more animals than to include them? I am so sick and tired of our state seeking every means of exploitation instead of investing in better and proven methods to ensure food and economic security. This madness needs to end! When will we realise the depleting wildlife populaces has far reaching ecological effects that cannot be undone?	Alice
	2020-04-23 11:36:28	Western Cape		No I do not	This is totally crazy. I can understand giving meat occasioned by necessary culling to the poor in SA, but export would be ridiculous. Also no endangered animals should be on the list. The bill must be stopped.	R Howard

	2020-04-23 11:36:19	Western Cape		No I do not	This amendment is absolutely insane. There should be no endangered or rare species on the list. 	2020-04-23 11:35:01	Western Cape		No I do not	I find Ms T. Didiza's suggested amendments to the Meat Safety Act highly suspicious and breathtakingly insane. I have to ask whether we are also moving into a China-style wet-market society. In fact, is China influencing this process? And to what degree are certain individuals enriching themselves with the precious wildlife of South Africa. A key question: Why are there threatened species e.g. rhino and giraffe on the list? Have we lost it? The answer is NO! NO! NO!	Regine

	2020-04-23 11:34:53	Western Cape		No I do not	I'm totally against the slaughter consumption import export and sale of any of our wild life species birds, reptiles or fish species for human or animal consumption in South Africa. 	2020-04-23 11:34:44	Western Cape		No I do not	If these animals are endangered and protected , why is this amendment even under consideration. Have we not learned anything from the pandemic we are currently facing worldwide, rumoured to have been started by eating wild meat. NO, our government can definately use the money and time for more pressing issues facing the country at present rather than destroying the wildlife	Ethel

	2020-04-23 11:28:24	Western Cape		No I do not	It is a disgrace how the ANC have plundered the wild life and sea life to enrich themselves only. The ones doing the real harm is the people and countries the ANC gave permission to to take from these resources what they want . These are entities /peoples who has absolutely NO regard, respect or gratitude for these animals, fish or birds. Neither do they understand the concept of sustainability. They live for today only. Further more have the ANC government sold us out to the Asian, Spanish and Russians for their own gain while the educated people/ recreational fisherman must pay a high price to be able to get something to enjoy from the sea in the land he also belongs to. The true conservationist is the recreational fisherman who take only that he can enjoy fresh on the table and game farm owners that have to fork out massive amounts of money from their own pockets for feed in droughts stricken areas and high electrical fences to protect the species. Before you do any further amendments to this bill , pretty please educate yourself first and then use your heart to think with further. We are moving into desperate times.	M

	2020-04-23 11:26:53	Western Cape		No I do not	Our wildlife is already under threat and some listed are on the endangered list, how can you even think that it is okay to slaughter these animals!	Patricia
	2020-04-23 11:26:50	Western Cape		No I do not	Science has shown that the current pandemic comes from the consumption of wildlife. Conservationists, scientists, medical experts and indigenous elders have been predicting a pandemic of zoonotic disease if the consumption of wildlife continues. There is no way that animals bred and kept for slaughter can be kept sterile and stress-free enough to prevent these viruses from spreading. The Covid19 pandemic could have been prevented if people stopped the breeding, slaughter and consumption of animals. If this act goes ahead, the government of South Africa is participating in an act of criminal proportions, literally risking the lives of millions of people. Not to mention the ethics and welfare issues of the animals themselves.	Wynter
	2020-04-23 11:26:38	Western Cape		No I do not	How on earth can a minister of the ANC propose this amendment. Wild animals are not for eating but to be preserved for future generation. 	2020-04-23 11:19:15	Western Cape		No I do not	I do not agree to the extended list of animals for consumption, import and export. Not all animals is meant for human consumption, this has been proven by the emergence of various diseases and viruses that humans is dying from. Children are born with diseases unheard of before and my belief is that all this can be attributed to the consumption of foods not meant for human consumption which includes the animals on the extended list.	Charlene
	2020-04-23 11:18:51	Western Cape		No I do not	The current list of animals is quite adequate for the requirements as well as the culture of South African citizens. The inclusion of so many other species is unwarranted and bears the mark of foreign influence trying to change South African policies. There is already evidence that wild animals can carry viruses which human beings do not have the capacity to resist. There is absolutely no need to increase the list of both domesticated and wild animals already available for human consumption. It smacks of a return to the primitive and barbaric.	Hendrina

					Our wildlife is our national heritage and as such they must remain protected. Our tourism industry relies heavily on the sustained development and protection of our wildlife. We see already the disastrous effect of the canned lion hunting on conservation efforts. The care, rehabilitation and protection of our wildlife is already a difficult and sensitive subject. Opening this to the cruelty of the meat industry for consumption will only add to the problems we are already facing. In our own country and in other countries in Africa we see the incredible work that is being done by our wildlife conservation departments and this proposal would negatively undermine everything that has is currently being done. Our government should be looking how to implement further measures to protect our wildlife – not abuse and use them in this destructive, unnecessary and cruel way. With Covid-19, the unacceptable trade in wildlife and the risks it proposes has again been highlighted – that situation cannot be ignored and it would be irresponsible of our Government to implement any act with blatantly ignores the general health and welfare of the public. The South African Government has an incredible, modern constitution and a radical and barbaric proposal is not in line with the constitution on many levels. Lastly on a humane level – surely the Minister can see that this proposal is not sustainable and the care of these sentient beings is in the hands of our Government as much as the people are.

	2020-04-23 11:17:17	Western Cape		No I do not	We are experiencing the devastating effects of uncontrolled meat from wildlife in Wuhan, China. Animals in nature are not monitored and the meat is not tested regularly. Do we not learn from others' mistakes? Let wild life be wildlife an stay a tourist attraction. We will put more lives at risk if we continue to commercialize wildlife for human consumption and to fill the food gab. Find other more suitable and human friendly ways. It is sad and a bit dubious that the minister does not make the list and intent public in newspapers or tv. That is the only way the masses will know and the public can comment. Many people will never see the list and therefore cannot comment as the public.	Msthhew
	2020-04-23 11:17:02	Western Cape		No I do not	We have enough domesticated animals for human consumption so adding wildlife to this list on a commercial scale is unnecessary and should be unlawful considering many of the the species on that list are already endangered. Then the exporting animals should also be banned it has been proven again and again they mistreated and mishandled. I also don't think we should be importing foreign species onto our soil either , there is no need.	Amanda

	2020-04-23 11:15:50	Western Cape		No I do not	This is an absolute disaster for S A. We are losing so many wild animals to extinction because of human greed and stupidity. What is happening to the human race? Who thought up this diabolical amendment? No doubt there is a huge back hander for the 'people' involved in getting this slaughter approved. 	2020-04-23 11:14:39	Western Cape		No I do not	This barbaric legislation should never be allowed. The fact that it is proposed by the so called South African ANC Government is not surprising.	WALTER
	2020-04-23 11:14:39	Western Cape		No I do not	This is outrageous. We should learn from the Kalahari Bushmen. They only kill to eat. There is sufficient cattle and sheep in South Africa to feed the Nation. There are a lot of animals species on this list that are endangered or soon to be endangered if we do not take care. We do not need this kind of legislation when there are so many other areas of our society that need urgent attention.	HM
	2020-04-23 11:14:32	Western Cape		No I do not		Michael
	2020-04-23 11:13:34	Western Cape		No I do not	I cant believe they now going to make this legal. Leave the endangered species. We must stop this before the humankind strips the earth of all animal life.	Shelly-Ann
	2020-04-23 11:13:29	Western Cape		No I do not	Has this country gone crazy!!! We are fighting to preserve so many species from going extinct and some ruthless people have the audacity to want to put them on the menu!!! I'm furious and absolutely disgusted, and those who attributed to this even being on the bill should be removed from their positions with immediate effect. We need to replenish and protect our eco system, and not resort to wiping it out. Those animals that are listed on your bizarre list are the ones that are keeping our eco system in check. If the people involved in compiling this ridiculous and brutal list, got the cobwebs out of their heads, they would realise that with a bit of effort and constructive thinking, there is enough food to feed everyone (fish, vegetables, etc). So while we have some time left in lockdown, let us all put our heads together (including those that sit on their backsides waiting for handouts), and come up with a solution rather than a problem.	Maxine

	2020-04-23 11:13:14	Western Cape		No I do not	I cannot believe that this amendment is even contemplated - what is the Minister thinking !!! All the world is trying to get China to close their wet markets especially because of the wild animals cruelly restrained in these markets and here in South Africa we are now encouraging the slaughter of animals that are on our endangered list - no wonder the west sneers at Africa when we proposed such appalling actions. I hope this is brought to the attention of the President of South Africa who, surely, could not approve of one of his Ministers even considering such an amendment	glynn

	2020-04-23 11:12:27	Western Cape		No I do not	How on earth can endangered species and wildlife be on a list for slaughter and consumption? What heritage does the ANC want to leave behind for future generations? Do they really have no respect for anything at all?	Mariam
	2020-04-23 11:12:14	Western Cape		No I do not	I am horrified that this is even open to debate? If our government allow this to happen it will be the final nail in the coffin as far as corruption is concerned.To put a price on our natural heritage is abhorent .	Charlotte
	2020-04-23 11:12:10	Western Cape		No I do not	We should be protecting our wildlife and not commercialising the slaughter of them for consumption purposes. Furthermore, in the light of the Corona Virus Covid-19, consumption of wildlife particulalry in Asian countries MUST be banned. These animals are indigenous to Africa and must remain so. The list also does not make sense as there are animals listed such as Kangaroo which are not found in Africa.	Patrick
	2020-04-23 11:12:07	Western Cape		No I do not	This is so bizarre and heathen I cannot even think straight! Just NO. When there are no fish in the sea, when there are no more animals left, when the final bee has died, when there is famine and strife and nothing left to eat on earth... what good is your money? Leave nature as nature intended....alive and in the wild.	Carol
	2020-04-23 11:11:33	Western Cape		No I do not	What are you trying to achieve? We are fighting Covid 19 because of eating all kind of wild animals. You are exposing the people of the world to all kind of illnesses and the animal kingdom to extinction.	Wilna

	2020-04-23 11:11:21	Western Cape		No I do not	This is a ridiculous amendment and will open up a whole new can of worms that must be dealt with on the poaching front and health front. It is not necessary to kill and eat all these animals when there are so many more sustainable and animal friendly options available in terms of vegetables and fruit for sustainability. In my opinion if South Africa moves ahead with this it's joining in the ranks of China which is a 'no go zone'.	Jean

	2020-04-23 11:10:12	Western Cape		No I do not	It is important that we very carefully manage the sustainability of our natural resources in a very ethical and respectful way while also acknowledging that some industries can be great contributors to our economy if they adhere to ethical guidelines and practices. 	2020-04-23 11:10:09	Western Cape		No I do not	selling of meat not bred for human consumption has caused PANDEMIC of note...covid-19. selling any animal not specifically bred for consumption is ridiculous. 	2020-04-23 11:07:50	Western Cape		No I do not	My concern is around the wildlife added. If only farmed wildlife were included this shouldn't be a problem but I do think this makes poaching more difficult to control. My second concern is what testing has been done to ensure these animals are safe to farm and eat. It's a strange time to be wanting to expand the species that we eat when the world is moving to limit it.	Catherine

	2020-04-23 11:06:25	Western Cape		No I do not	Has our government completely lost it!!!!!!! The level of ignorance is mind-blowing. 	2020-04-23 11:04:03	Western Cape		No I do not	I do ask myself the question upon reading the list if the particular people that compiled the list is possibly INSANE!!. What on earth could be the rationale for a minister to suggest policy that include critically endangered species!!. This must be an insane person or did she not read the list or does she not understand nor comprehend the impact of her actions? It is in utter amazement that this is a possible amendment, it is rather a possible disaster on call. It really is absurd. When will the ANC stop wasting precious time and money and focus on what a government are actually there for - SERVING PEOPLE!!!!	Pieter
	2020-04-23 11:03:56	Western Cape		No I do not	How can any one support a bill like that. To allow the slaughter of animals, especially our already threatent wild animals ,is a crime beyond imagination	Mary
	2020-04-23 11:03:50	Western Cape		No I do not	Under no circumstances do I consent to the destruction of our wild life as food fodder for the masses. 	2020-04-23 11:01:58	Western Cape		No I do not	I object to this amendment on every conceivable level. 	2020-04-23 11:01:48	Western Cape		No I do not	What is South Africa doing to destroy, in one way or another, all our wild animals? This is absolutely disgraceful and this amendment cannot be passed in any form, whether wild or domestic animals. Our grandchildren, and those that follow, will grow up not knowing anything about the beautiful animals that should be allowed to freely roam in reserves in our country. The list of animals included in the amendment is way beyond any human requirements and, in years to come, humans will have become enlightened and will not sacrifice animals for their own use. Let South Africa be one of the first countries to look after the animals and not destroy for future generations.	Audrey

	2020-04-23 11:00:55	Western Cape		No I do not	How is it possible that the minister can even THINK of slaughtering out precious wildlife? Can she not SEE what has happened to the world when this is permitted? Is SA to become another China? Our animal heritage is sacred and a huge benefit for tourism, while many animals are already threatened. This is barbaric and should NEVER be allowed. SA should progress not regress.	Marius

	2020-04-23 10:59:43	Western Cape		No I do not	It is sheer madness and pandering to mindless greed to include ANY endangered animals.	Peter
	2020-04-23 10:59:42	Western Cape		No I do not	Absolutely not! Endangered spesies are on this list. This is bizzare especially now when we are not sure some animal species are suitable for human consumption. NO NO NO!!	Stephanie
	2020-04-23 10:59:05	Western Cape		No I do not	The world economy almost terminal resulting from an unseen virus deemed to have come from a bat and possibly a pangolin. This proposed legislation is humanity gone insane. Why? GREED and STUPIDITY. Leave well alone and conserve and protect these endangered species. Better yet stop food waste and limit family size	Vina
	2020-04-23 10:59:00	Western Cape		No I do not	Isn't covid 19 enough proof that we should stop the stress, sale, export and slaughter of wild animals and all in general? Swine flu, bird flu, mad cow disease, how many more pandemics does the world need before we learn as a species to stop killing other species?	Joanna

	2020-04-23 10:58:53	Western Cape		No I do not		Greg
	2020-04-23 10:58:44	Western Cape		No I do not	The change in policy does not in my view enhance the meat supply chain to the sustainable benefit of the affected parties but it does add appreciable risk especially to endangered species as well as problems in heath issues related to introduction of many new/unknown/untested supply chains. My view is that all New Regulation should have to successfully pass the test of does the regulation benefit RSA on a sustainable basis and if not then the must be solid constitutional reason to have the regulation in place. The proposed regulation will also make monitoring and enforcing the MEAT SAFETY ACT far more challenging than it is already hence enabling more abuses/ non compliance.	Neil
	2020-04-23 10:58:23	Western Cape		No I do not	(Ms) T. Didiza what is wrong with you? Not only are many of these animals critically endangered and already being poached but now you are going to say that they are safe for consumption, ultimately giving people more reason to kill and abuse these animals. This is disgusting, unthoughtful, unfounded and downright stupid.	Brooke
	2020-04-23 10:58:12	Western Cape		No I do not		shannon
	2020-04-23 10:58:10	Western Cape		No I do not	Hmmm. A very long and intense thought process must have occurred in this area by Minister Didiza and her wonderful entourage (sic). It cannot be possible that someone can be so ignorant to amend a bill to allow for the slaughter, consumption, import, export and sale of many "threatened" and "endangered" (aka Rhinoceros) species. Many more hours need to be spent doing a full analysis of what would happen should the amendment be passed. Case scenario:- Rhino horn poachers, kill a Rhino and if they are caught, they can then turn around and say they killed it for the meat... Wake up Minister Didiza and do not lean to the side of idiocracy...	Graham
	2020-04-23 10:57:33	Western Cape		No I do not	I mean really, are you insane?! Including wildlife in the list of animals is ridiculous! Also, look at how COVID-19 started... WITH POOR MANAGEMENT OF WILDLIFE WHICH WAS MADE FOR SALE AS FOOD! Don't be stupid and reckless. Also, don't endanger our wildlife. Grow fruit and vegetables to feed the hungry. It's sustainable, doesn't endanger any living creature, and is far healthier as well.	Matthew
	2020-04-23 10:56:20	Western Cape		No I do not	This list should NOT include any wildlife or endangered species, nor any animal that could become endangered in the future. We are keepers of these animals and as such must do our best to protect them at all times. Furthermore, we have seen the health problems with Covid-19 across the world stemming from markets selling meat from endangered species. Don’t add to this potential.	Lyndon
	2020-04-23 10:56:17	Western Cape		No I do not	This list should NOT include any wildlife or endangered species, nor any animal that could become endangered in the future. We are keepers of these animals and as such must do our best to protect	Yverne

	2020-04-23 10:55:21	Western Cape		No I do not	I am very pleased to participate in this process. I am UTTERLY OPPOSED to this. Too much of wild life has already been destroyed across the world; we should not add to this decimation. Wild life plays a role on this planet. we should NOT interfere with that. Visit places like Lake Turkana, all wild life except for birds, ceases to exist. Visit the Mekong river in Laos where one would expect an abundance of birds....NOTHING...all been captured for food.	Ian Roger

	2020-04-23 10:55:01	Western Cape		No I do not	The slaughter of our wild life,much of which is already on the threshold of extinction, is irresponsible and should not even be considered. The way these endangered animals are exterminated in the rest of Africa means that RSA will have to be the "Noah's Arck" to restock the rest of Africa (as Kenya with rhino). The bill for the slaughter of domestic livestock should ensure humaine policies are rigorously enforced.	Alastair

	2020-04-23 10:53:32	Western Cape		No I do not	We have so many animals that are nearly extinct and now they want to allow the consumption of these animals. Absolutely absurb. This is the worst idea!	Lynne
	2020-04-23 10:52:53	Western Cape		No I do not	It seems to be an incredibly insane idea, but it is to be expected from the morons who form our government,	William
	2020-04-23 10:52:23	Western Cape		No I do not	This proposal is criminal and tone-deaf, given we have a pandemic supposedly caused by eating wild animals. I DO NOT see the necessity to include any endangered species. There is more than enough chicken, pork, lamb, beef available. 	2020-04-23 10:51:12	Western Cape		No I do not	This is absurd!!! Especially in light of what is happening at this very time with this pandemic which probably comes from the wild animal market in Wuhan China. We need to protect our precious wildlife and humanity. We as human beings really need to take charge of our actions what we are doing to this Earth and do we really need to eat animals??? If we stop consuming meat maybe we will have much better health. We should live in harmony with ALL of God's wonderful creation	Willem
	2020-04-23 10:51:06	Western Cape		No I do not	Wow this is unbelievable, whilst the whole of South Africa is focused on surviving this pandemic (be it health wise and or financially) you have minister/s trying to slip though such a law - shame on YOU! Threatened species and wild life should NOT be included in the list. This will only result in more endangered animals getting killed and adding more animals to the ever growing endangered species list! To have such a law in place is shocking! Why are you so callous and narrow minded Didiza? Why kill the little wildlife that we have left - why not create employment instead by building more parks? Imagine the employment you would create in all the parks surrounding areas - extra employment such a game rangers, personal to run the park facilities, people to service the accommodations, restaurants etc all this attracts tourists who in turn spend money in our country. Attract the tourist, let them then go home and spread the word about how amazing South Africa is! Let them spread the word about our natural beauty, our beautiful people and break down the ever growing fear and hatred which media portrays about OUR South Africa! A Quote to think about : Give a man a fish and you feed him for a day; teach a man to fish and you feed him for a lifetime Killing off the animals - you feeding the people for one day Creating employment by creating parks - you are TEACHING a person to fish and feed himself and their families for life!	Anita

	2020-04-23 10:45:40	Western Cape		No I do not	No this is showing what people whom are given power what their attitude is towards our natural environment. We are already a large producing meat industry which is exported and sold locally, if we allow government to proceed with this lunacy what next? Domestic animals? It is morally wrong in every level. A nation is judged by their actions towards their animals and natural environment. We are already the laughing stock globally we are going to become the butt joke which we already are. Wake up!!! They don't respect us.	Marilena
	2020-04-23 10:45:37	Western Cape		No I do not	Our wildlife needs to be protected - not exported - neither killed for human consumption in our country If a culling programme is needed for an area - it needs to be done by the relevant wildlife experts - then the meat can be given to the needy	Ben

					More Jammer om so knaend te wees maar die sinnelose argumente wat deesdae deur meestal politiesie en ander oningeligte bronne rondgegooi word raak nou van kritiese belang vir die voortbestaan van ons bedryf en die behoud van ons bekwame en gewaardeerde personeel. Om die "Oes" van wild deur Jagters te verbied is heeltemal belaglik en onprakties vir o.a die volgende redes: 1. Daar bestaan nie genoeg wild oes spanne in die Land om alle oortollige wild van die veld/weiding te verwyder nie. 2. Boere is ook meestal nie ingerig en bevoeg genoeg om so 'n proses/operassie prakties tot uitvoering te bring nie. 3. Jagters se sosiale stand val bo die gemiddelde van die middelklas en gevolglik weens logiese redes is hulle risiko vir die verspreiding van Covid 19 ignoreerbaar gering. 4. Niemand in die Wild/Jagbedryf verwag dat die basiese voorsorg maatreëls genegeer moet word nie en is heeltemal bereid om onder redelike voorskrifte te opereer. 5. Die gesondheids risiko om na 'n "Shopping Mall" te reis om vleis te koop is baie groter as om na 'n plaas te reis vir dieselfde doeleindes. 6. Daar moet nog oneindig baie argumente vir die ordelike verslapping van die maatreëls rondom jag te wees. So sit by asb By voorbaat dankie Colin

	2020-04-23 10:41:35	Western Cape		No I do not	Why does the list need to be extended? Is is a pity there is not a clear explanation as to what the objective is. A lot of these animals/genus do not even occur in South Africa. Is the government looking at protecting the local industry or importing unwanted meat and animal products to kill off the local industry? Is this all about money or food safety? Are we not supposed to look at better ways to feed our population than enriching other countries and a few of our government officials? Better ways include options that are better for the environment. It seems this act also gives the government the right to decide how animal products may be disposed of? Is that why Rhinos have now been added, so the government can dispose/sell Rhino horns as they see fit?	JW

					i oppose this & do not want any killing of any animals . & oppose trade & export in etc. i am vegan animal lover extreme . it is wrong to kill wild animals & equines . already the donkey skin trade shows the low down level type of human who would do this . it is bad for the economy . it is a betrayal of the wild animals. it is cruel & extremely evil. these bad types of humans want to kill the animals & live in their beautiful land & destroy natural habitat. it is extreme evil . the dead animals - where can they now be reborn in their next lifetime ? the killers & traders are not worthy to have offspring & so on. this will create warfare about death & babies & new diseases & violations of the dying - human & animal & will be the most evil actions in the history of the world. every person dying or childbirth will be under great stress & threat . they will then become militaristic &take more & more land & kill more white people. all of heaven & nature paradise will be contaminated & die & rain will be reluctant. drought & pharoah plague will endure. the killers & traders will be using the animal victims as a place for evil buyers to put their diseases into & will blame the animals & there will be sexual perversion & necromancy extreme.they will abuse the spirit of the dead & torture ;;& torture before the killing preamble to . they will start to hunt people as well on some level . as well no horse or donkey will be safe . they will try kill horses brutally as does Canada & many countries who are so depraved they can do nothing except kill horses & animals & watch bull fights all countries now even europe & north america have lost their entigrity so much that all they can do now is trade in horse meat & boast about the brutal cruel painful slaughter- this is happening worldwide. every human dying of their sins looks at animals & relieves their evils that way as a sacrifice .it is sacrifice to the evil gods. animals in nature & all animals & horses are in divine paradise & are enlightened & conscious buy bad people do not know this & just want to kill the good .& take their land habitat for the undeserving humans . whereas they should rather ask angel people to help & have special children born who were animals before but still keep the wild land open for animals & hiking etc.

	2020-04-23 10:33:34	Western Cape		No I do not	The existing list of wild game animals seems perfectly adequate, except that elephant should be removed as they are poached for ivory as well. Threatened animals should be protected, not slaughtered and exported.	Melanie
	2020-04-23 10:33:21	Western Cape		No I do not	A good ecology is the bedrock of sustainable indigenous conservation. Systematically decimating many of the wildlife species on the draft list will further endanger species which are integral to maintaining ecological balance. Without ecological balance, we face the possibility of huge flora and fauna biome disruption which in turn will lead to further changes to the existing climate change problem. According to the socialist agenda, this climate change is 'urgent' and 'needs to be addressed'. Disruption to the the natural food chain in the wild affects every species and subspecies which depends on the wellbeing of the draft's targeted animals from apex predators right down to insects, natural beneficial bacteria and soil structures. The result of this could result in erosion, flooding, drought and other major natural (but avoidable) disasters. The current problem with the CCP (Corona Virus) as well as our past issues with MERS and SARS highlight the disastrous effects of consuming and offering meat which is not intended for human consumption. It has not been irrefutably established that the wet markets in the East (recently Wuhan and the greater China) are not instrumental in the development and spread of the COVID19 (CCP) virus. Ebola has a vector history in Africa which involves bats and possibly primates as well. To further endanger the lives of both South Africans and the citizens of destination countries is completely irresponsible given the current global pandemic crisis . To further damage and neglect our very own biome (micro and macro) through the monetisation of our valuable wildlife species speaks of a disregard for our ancestors' stewardship and care for the world they lived in and an attitude which will leave our children and theirs bereft of the very beauty which draws people from around the world to come to South Africa, to spend their currency here as tourists, to go back home and tell of the magnificence of this continent. This draft reflects the irresponsibility, expediency and manipulation of not only our natural heritage but also our finances and I reject the proposal in its entirety. We are not a colony of the communist state which is China. We have our own cultures (ancient and new) and we cannot be stripped of every last natural resource we have for money.	Tracy

	2020-04-23 10:32:46	Western Cape		No I do not	As a past director of Sanccob , where the staff worked night and day to preserve endangered African penguins and other sea birds, I am acutely aware of the dangers to our wildlife. At the age of 77, I am perfectly healthy in mind and body without having to eat anything that has blood in it. Why should any creature's life be cut short so that I could go on living, when there is an excellent alternative? Moreover, some of the animals on that list are endangered, and any species lost makes the world a poorer place, not to mention having robbed our children of the wonder of experiencing all that nature has to offer. In a day and age when the planet is reeling under the stupidity, greed and rampant consumption by mankind, surely now is the time for sanity to prevail and consider the bigger picture. The planet is not here for mankind to lord over it as it has for so long, it is here for all living things, with a space to live and right to life. Change is needed and it is needed NOW.	Lee

	2020-04-23 10:29:26	Western Cape		No I do not	The Act should allow for the consumption of meat of farmed animals only (whether these animals are considered as wildlife or not). If the animals is farmed specifically for the production of food, then it should be okay to slaughter and consume. 	2020-04-23 10:27:12	Western Cape		No I do not	I object to the amendment to the Act. Those animals are for pleasure to enjoy in game parks in natural habitat. Some are endangered and would become extinct. This is criminal.	Diane
	2020-04-23 10:27:10	Western Cape		No I do not	In a world where we have become increasingly aware of our damaging impact on ecological systems in general, and wildlife in particular, this is an unbelievably uninformed and hugely damaging move backwards on so many levels.	Kim
	2020-04-23 10:27:06	Western Cape		No I do not	It seems to me that it is necessary to tighten laws against poachers, and not to legalize their actions.	Oleg

	2020-04-23 10:26:44	Western Cape		No I do not	This is a very terrible, terrible idea!!! Don't we have enough animals for slaugther and consumption in South Africa, is South Africa going backwards, and China goes forward. Please keep animals such as rhinoceros, elephants, girafes etc. off this list, future generations will point fingers at us, save this heritage for them. We must learn the lesson from China. Do you think we want to be like Zimbabwe and China they slaugther all their wild animals there are no birds to greet you if a person wakes up in the mornings, stop this this nonsense!!! We need to look into the future! What are we going to leave behind for children and grandchildren if we breed iconic mega fauna and other wild creatures for meat? This is a move in the wrong direction, remember South Africa is can be the next birth place for a bigger Covid- 19 outbreak if you let this bill pass. Leonar	Danie & Thea
	2020-04-23 10:26:31	Western Cape		No I do not	WHy is it necessary to keep extending rules when what is current is more than plenty and in fact actually too much - has Covid19 taught us nothing. Humans need to appreciate nature, not slaughter it.	joanna
	2020-04-23 10:26:22	Western Cape		No I do not	This would be disastrous for animals, especially our wildlife, who re being poached and their numbers dwelling just in order to sell things like rhino horn to our virus originator, China. I know the SA government also supplies skins like donkey skins (donkeys skinned whilst still alive). Again for the Chinese, elephant tusks in huge quantities. We might as well become a country that doesn't depend on our wildlife for our (not at the moment of course!) booming tourist industry which depends of tourists visiting game parks in huge numbers. This move sounds like the Chinese again who would like to kill (and milk bile in the case of the black bears who have to be caged for the rest of their lives - cages that they can't even move around in as they are too small, a tube permanently connected to their bile ducts as bile is for "impotency"! From the magnitude of the animal proposed in this amendmet one can see many "wet markets" coming into existence - this is from where the virus originated. Come on South Africa, don't go back to your archaic roots - embrace the new (which you have in some ways) and show kindness to these wonderful animals who should be perished and NOT sold for meat - I think a good idea for SA of course, would be cannabalism which would reduce the huge over-population problem!!!! (tongue in cheek....) This is why people are starving all over SA - like an elderly lady on TV last night with a family of 10 grandchildren who didn't have any food. Too many people	Dianne

	2020-04-23 10:25:12	Western Cape		No I do not	We have enough choice with cow, chicken, pork, ostrich and fish. How many more different types of animals do we need. Rather keep the allowance small, and I would recommend shrinking it even further. Furthermore, there are some threatened species on there which should not be killed under ANY circumstances. They should rather be protected. Then with C-19, it is OBVIOUS that we don't truly understand the risks associated with wild meat (or even farmed meat that was recently wild, as per China). DO NOT follow China's lead. Let's not become their laptop (I really hope it's not too late for that!!!). Focus on subsistence farming and permaculture, localised production and consumption. Thank you	Candice
	2020-04-23 10:25:10	Western Cape		No I do not	I do not believe that we will be able to control the slaughter of wildlife if this Act is passed. The farming of game animals is is not ideal but it probably assists the safety and conservation of our wildlife to satisfy the demand for the meat. This Act could trigger a catastrophic depletion of animals in the wild.	Charles

	2020-04-23 10:24:15	Western Cape		No I do not	All wild animals especially those on the endangered list should not be listed for consumption. Has the covid19 pandemic not taught us anything? What sort of country are we to allow this disgusting and barbaric behaviour.	S

	2020-04-23 10:20:10	Western Cape		No I do not	It is outrageous to include wild animals on the list. We are where we are with this pandemic thanks to the shocking eating habits of the Chinese in the first place and their total lack if humane treatment towards wildlife and all animals. 	2020-04-23 10:19:54	Western Cape		No I do not	We need to protect the animals listed instead of making a quick buck killing and exporting them. 	2020-04-23 10:16:05	Western Cape		No I do not	While we grapple with the economic and humanitarian disaster, it barely surpises me that Government would try to sneak passed an amendment of this nature, as there is obviously individuals within the organization that stand to benefit from the trade in these precious resources! Let us not become like the Chinese and consume anything that crawls , walks or flies. let us understand the importance of maintaining our wildlife heritage which is so important to our African culture. If people need food, let them grow it, or even better, let us produce it for them! In this changing world, more and more people are realizing the contribution of meat consumption towards global warming crisis. Perhaps nobody has read that yet. Let the wildlife be wildlife, and not something we just consume.	Butch
	2020-04-23 10:15:58	Western Cape		No I do not	I do not at all support this. THIS IS A SHOPPING LIST FOR RICH AND CORRUPT PEOPLE! It’s a blatant disgrace. 	2020-04-23 10:14:22	Western Cape		No I do not	The existing list of animals that may be considered for slaughter, consumption, import, export and sale is comprehensive enough. Protect our wildlife; worth far more as a well-managed, job-creating tourist attraction than as meat for the Asian market.	Helen
	2020-04-23 10:14:11	Western Cape		No I do not	Who in their right mind would out animals that are on the endangered list onto the menu?? Are they mad, stupid, ignorant or do they just not care? We need to protect ALL of our wildlife - starting now! I am not a vegetarian but we should also SERIOUSLY look at reducing our dependence on meat products across the board for the sake of the planet. Just my view!!	Ian

					This is outrageous. The ongoing slaughter and eradication of animals, birds, fish and wildlife is despicable and must stop and this includes the torture of these poor creatures in the process, including at sea. We've seen what happened to a huge cargoload of sheep which were kept on board for weeks in atrocious conditions which constituted torture and starvation and of course massive stress. The government is callous, much like the Chinese and has no consideration at all for animals which are sentient beings. This must end now. I vehemently oppose this new Act which allows all of this.	

	2020-04-23 10:13:56	Western Cape		No I do not	These wild animals should not be on the list: Rhinoceros Hippopotamus Giraffe Elephant Crocodile Zebra these animals will be hunted to extinction eventually and should not be eaten	Patrick

	2020-04-23 10:13:53	Western Cape		No I do not	There is not enough space in this objection to deal with the reasons for objecting to this draft amendment. It is unclear what the rationale for this proposed amendment is but it can surely not have taken all factors into account least of which relate to: 1. protecting SA's heritage; 2. the ethics of slaughtering wild animals This amendment must be resisted with all force possible.	russell

	2020-04-23 10:13:41	Western Cape		No I do not	Selling Africa precious wildlife resources will certainly not feed the hunger it will only fuel the elites taste for exotic things. We need to protect what precious wildlife we have for our children's children. With the new Covid 19 pandemic I hope we have learnt that we should not be doing this..	Diane
	2020-04-23 10:13:33	Western Cape		No I do not	we need to preserve our indigenous animals while we still have some left. If this goes ahead it will increase poaching as well because the goal posts have moved - terrible idea	lynne

	2020-04-23 10:12:19	Western Cape		No I do not	I am absolutely against the slaughter of our BIG FIVE first and foremost! for meat eaters there are animals bred specifically to satisfy their meat (protein) requirements. The animals that are not bred specifically for slaughter are dying out, We have destroyed our ecosystem tremendously and slaughtering animals will only make this so much worse, natural predators will even die out - stop slaughtering animals NOT bred for consumption! 	2020-04-23 10:11:32	Western Cape		No I do not	In the time of Covid 19 this is ridiculous wrt wild animals. Domesticated animals is Ok but not wild animals unless we want another pandemic.	Penny
	2020-04-23 10:11:19	Western Cape		No I do not	I don't think we should be exporting meat when our own nation is half starving. Nor should be be killing endangered wildlife! Really if the government allows all our wildlife to be killed we will have no tourism and that is what we should be focusing on as this is the number one place to create job opportunities in this land where job creation is needed so despertely.	Lynnette
	2020-04-23 10:11:04	Western Cape		No I do not	Do you really want people to slaughter our endangered species... This makes me sick! Think again.	Nicolaas
	2020-04-23 10:10:58	Western Cape		No I do not	I think that one of the 'goals' of the COVID-19 pandemic is to thin out the world's population. The homo sapien one of the few animal species that is present in excess. We must be the only species that, not only keeps the weak alive, but continues to breed with it. Unfortunately the African mindset does not even begin to comprehend this.: their solution is to kill yet more animals, including endangered species, to feed the burgeoning numbers. I think there is sufficient evidence to indicate that what we have done to the planetary habitat has played a part in this pandemic. To my understanding, if we don't change our destructive ways, there will be more pandemics to come; probably worse than this one. So this proposal is not a solution; it is part of the problem.	Sally

	2020-04-23 10:09:31	Western Cape		No I do not	I do not agree with the inclusion of certain non farmable wild animals. This sets a very dangerous precident in the future. I think we need to look at the example that Covid 19 has set in terms of dealing with wild animal meat and the dangers it may pose.	Megon
	2020-04-23 10:09:28	Western Cape		No I do not		Riande

	2020-04-23 10:09:23	Western Cape		No I do not	Firstly, I am appalled to have found out that so many iconic animals are already on the existing list. Adding more, some of which are critically endangered and rapidly heading toward extinction, shows gross ignorance of the seriousness of the situation. Why is it necessary to include such animals as rhino and elephant on such a list, as well as most of the other existing and proposed ones, is beyond belief, when we already have established cattle, sheep, pig and similar animal farming in South Africa, supplying the necessary meat production for the country. Is it now considered essential that we export the meat of wild animals as well?	Gary
	2020-04-23 10:09:21	Western Cape		No I do not	you stupid incompetent minister, what are you thinking, why do this? Bloody idiots(becoming like the Chinese) - eat anything that moves.	uys
	2020-04-23 10:09:11	Western Cape		No I do not	What are they trying to do?! They'll wipe out everything on the planet!!	Libby
	2020-04-23 10:09:10	Western Cape		No I do not	I think this is shocking. We cannot use wild animals for consumption. The SARS virus and the covid19 virus come from wild animals. What next . We will just get another virus. I absolutely do not agree with it.	Patricia
	2020-04-23 10:08:49	Western Cape		No I do not	Wild animals cannot be handled in the same way as tame domestic stock. This amendment has no compassion nor understanding of the behaviour, ecology and physiology of wild animals. No civilised society could implement this legislation. An absolute disgrace.	Dick
	2020-04-23 10:08:39	Western Cape		No I do not	This I feel is absolutely crazy, stop killing our animals it's not necessary we have enough food. Has covid19 taught you nothing.	Shirley
	2020-04-23 10:08:29	Western Cape		No I do not		Gunther
	2020-04-23 10:07:23	Western Cape		No I do not	In view of the ongoing battle against poaching I don't see how these amendments could possibly be helpful.	Cherylle
	2020-04-23 10:07:10	Western Cape		No I do not	Surely with our present crisis, everyone can see how important it is to preserve our wildlife at all costs. Our wild animals are what makes South Africa as a country unique in the world and we are losing our wildlife so rapidly that we will no longer have this asset in the future.	Barbara
	2020-04-23 10:06:58	Western Cape		No I do not	This list seems utterly ridiculous, many of these animals do not inhabit Africa.	Eric
	2020-04-23 10:06:52	Western Cape		No I do not	This is a completely unnecessary and illogical change in policy. if COVID-19 has taught this world anything is that the slaughter wild animals for consumption is the reason so many new viruses are being released into the world. The pursuit of profits at the cost to our environment and ultimately mankind is completely insane. DO NOT ALLOW THE AMMENDMENT to this MEAT SAFETY ACT under any circumstances.	Alistair

	2020-04-23 10:05:53	Western Cape		No I do not	No, this may not be approved. Why include endangered species? They are endangered because they have been killed off for human consumption over many years. We need to concerve our environment and wildlife.	Paul

	2020-04-23 10:05:34	Western Cape		No I do not		Carol
	2020-04-23 10:05:31	Western Cape		No I do not	I think the threat to the wild animas in Africa is already bad enough, without adding them to a list for slaughter, consumption, import and export. At some point, somebody will have to say stop, before the wildlife in Africa disappears for good.	Barbara
	2020-04-23 10:05:22	Western Cape		No I do not	This is so upsetting and disturbing. These vulnerable animals need our protection. Please stop the barbaric suggestions.	Ronell
	2020-04-23 10:05:12	Western Cape		No I do not	As humans we share this planet with millions of other life forms. We need to change our tendency to dominate our will over all the other creatures. We should take on the role of protectors of these beautiful and amazing beings. We should ensure that they too may live out their lives as God intended them to, wild, free, with space to move about as God intended them to. We are strangling all of Nature. We are the behaving like a plague to this Planet and its creatures. We need to stop manipulating creatures and the environment to suit our appetites or our pockets. We need to have respect for other life forms as well as the environment which supports us all.	Melissa
	2020-04-23 10:04:50	Western Cape		No I do not	We must protect our wildlife.There is just NO justification for this ridiculous way they want us to become like China.	Yvonne

	2020-04-23 10:04:15	Western Cape		No I do not	This open up the system to be further abused and is promoting a loss of biodiversity - I do not suppose this. Who in their right mind can approve rhinos on a slaughter list when considering the illegal ivory trade and poaching! This will be abused and the animals will suffer!	Tiffany
	2020-04-23 10:04:00	Western Cape		No I do not		Sharon
	2020-04-23 10:03:56	Western Cape		No I do not	Who started this idea ? Do the ANC now also want to ruin our wild life after they have ruined the country ? This is not China, leave our wild life alone.	Andre
	2020-04-23 10:03:54	Western Cape		No I do not	I am strongly opposed to the amendment. The list of animals are among the most threatened species in the world. Our government is currently not coping with the protection of these vulnerable species and definitely wont be able to monitor and or control the slaughtering of these indigenous species. There is no acceptable reason/ rationale for the implementation of this ridiculous amendment. What would we deprive our children of their African Heritage by destroying these animals. I vehemently disagree and strong oppose this amendment. Lets put money and ego's aside and protect what is ours!!	Eben

	2020-04-23 10:03:33	Western Cape		No I do not		Heather
	2020-04-23 10:03:15	Western Cape		No I do not	All wild animals has to be out of the approved list. Even China is slowly going this way. Please stop this idiocy. Only traditional farm animals should be on the list.	Kevin
	2020-04-23 10:02:58	Western Cape		No I do not		Petrus
	2020-04-23 10:02:58	Western Cape		No I do not	South Africa has already been stripped of its natural treasures. Man is so selfish and wants to control everything for his/her own pleasure. Our lockdown has demonstrated how we have banished our wild animals and it is heartwarming to see them coming back into their areas when we keep our distance. Even the dogs in our yards no longer bark as much; even when the wild animals come and visit. Act in a responsible manner, please!	Guenther
	2020-04-23 10:02:47	Western Cape		No I do not	We can not slaughter, export or consume any endangered species.	Dirk
	2020-04-23 10:02:25	Western Cape		No I do not	Lets stop threatening our co inhabitants, and eat less of them, not more. They have as much right to exist as we do. Maybe more.	ernest

	2020-04-23 10:01:42	Western Cape		No I do not	I cannot believe that in this day and age that this would even be suggested.....heaven help us there will be nothing left of the country in 50 years time ....raped of all its wild life .	Judith
	2020-04-23 10:01:21	Western Cape		No I do not	Dear Hon. Minister, The list of animals suggested is totally unacceptable. RSA should restrict trade in animal product to only those historically acceptable in a civilised South Africa. Trade in Endangered Species must be completely prohibited, as even allowing sale of culled animals permits the illegal traffic to be hidden.	Mike
	2020-04-23 10:01:13	Western Cape		No I do not	We need to be protecting our wildlife. Allowing this slaughter will only benefit the economy in the short term. Long term, we will have reduced tourism when these animals are extinct and there jobs related to them disappear.	Lauren

	2020-04-23 10:01:00	Western Cape		No I do not	Why would anyone agree to monetise endangered species which will in turn increase demand leading to more killings and poaching?	Bongi
	2020-04-23 10:00:42	Western Cape		No I do not	Please tell me this is some kind of sick sick demented joke, I cannot actually believe my eyes right now!!! What Didiza is proposing is in line with the Chinese Communist Parties policies to feed their starved masses, because they are too corrupt and incompetent to feed their population effectively, so they just declare open market on any and all animals, especially the endangered ones. I do not support this at all, in fact I'm absolutely appalled by our once proud governments decision to plunder the remainder of our natural resources	Kevin

	2020-04-23 10:00:26	Western Cape		No I do not	Besides the list containing endangered animals, have we not learnt anything from what is currently happening? That RNA viruses can jump from wild animals to humans?	Mark
	2020-04-23 09:59:37	Western Cape		No I do not	Absolutely ridiculous to want to eat protected and endangered species. Is this another case of supporting the eastern market who because of eating every kind of animal have caused this viral pandemic. Time we stood up against destroying all animals purely to do trade with the result of making this country look mindless. Already there are clear signs that humans are busy destroying the planet. This is another stupid decision.	erica
	2020-04-23 09:59:31	Western Cape		No I do not	Dit is totaal en al onaanvaarbaar dat bedreigde spesies in hierdie lys ingesluit word. Hoe kan enigeiemand met n verstand daaraan dink om diere, visse, voels, wat moontlik kan uitsterf, in n beleid te plaas wat toestemming verleen om dit te mag eet. Selfs nou dat dit nie toegelaat word nie, vind swartmark verkope en die eet daarvan plaas, hoe vinnig gaan die diere nie uitgeroei word indien toestemming verleen word om dit wel te kan doen nie. Polities gemotiveerd om te kan voldoen aan sommige lande se versoeke? Verduidelik asb die redes vir die insluiting van hierdie diere in die beleid. Daar kan onmoontlik nie aanvaarbare redes hiervoor wees nie.	yvonne

	2020-04-23 09:59:17	Western Cape		No I do not	WHY would anybody want to do anything with, other than protect, our endangered wildlife? These animals MUST be protected, not killed and sold.	Gayo

	2020-04-23 09:59:13	Western Cape		No I do not	I cannot understand why a person whom we trust in our Government should have NOT PROPERLY APPLIED THEIR MINDS when listing animals allowed for slaughter. This is a VERY sad situation. Everyone know how hard we are working to SAVE the planet This policy MUST please be amended to exclude ALL threatened AND limit the amount of the non threatened species. Furthermore , I would like to see something done about better control the POACHING that we know goes on under the noses of the authorities. It's time you had a look at the integrity of all these people Thank you	Beverley Ann
	2020-04-23 09:59:10	Western Cape		No I do not	Absolutely Not acceptanable Leave the will animals where they being - in the wild. Let them eat bats, have they not learners anything!	Nell

	2020-04-23 09:59:00	Western Cape		No I do not	It is really asking for (later) trouble to allow the slaughter and export of our wild animals, especially the endangered species. I wasn't aware of problems with the existing Act, so why the amendment? What is the objective of the changes? Pleasing China? Money? What improvements are expected?	John
	2020-04-23 09:58:59	Western Cape		No I do not	Leave our wildlife alone! There are too many people and too few wild animals left.	Dieter

	2020-04-23 09:57:53	Western Cape		No I do not	The list is a pretty comprehensive list that has been drawn up with no reference to the experts in the field of animal conservation. It involves many of the smaller buck species such as the =Dik Dik, Duiker and Gemsbok. all of which are of no commercial value as meat and in fact need protection. Porcupine is not an endangered species at the moment but is not prolific either. Rhinocerus. Must not be included. Giraffe are getting scarce due to trophy hunting, they too need to be protected. This whole list must be reworked. The old one was adequate.	Malcolm
	2020-04-23 09:57:33	Western Cape		No I do not	We have very few natural resources, its been maimed to almost nothing. Stop supplying what we have to others... they do not NEED it. They are greedy and we are greedy for money. NOT WORTH IT!	Adri

	2020-04-23 09:56:00	Western Cape		No I do not	To use our wildlife for meat (probably to be exported to China) is not a good idea. South Africa has many tourists who come and visit our game farms and resorts and in this way provide income for this country. If you start using our game for meat, we will soon be in the same position as China. I am against this strategy.	IC
	2020-04-23 09:55:58	Western Cape		No I do not	Will this government ever learn that the creatures on this planet do not belong to the human race for their greed and exploitation but are to be protected?	Reyna
	2020-04-23 09:55:55	Western Cape		No I do not	Is this Minister under drugs or what. How the hell can they say this that killing wildlife etc., is correct. Do they not see what happened in China now as they eat all sorts of rubbish, actually killing the world wild species. A DEFINITE NO FROM ME. Or the Minister can go back to the bush as we live in civilization and this is not civil at all.	Bev

	2020-04-23 09:55:18	Western Cape		No I do not	Why slaughter endangered species, stop following other countries mad ideas, and keep our animals safe, as we always have. Money is not everything!!! Life is!!!	Elma
	2020-04-23 09:54:30	Western Cape		No I do not	Threatened species and wild life should not be included in the list. This will result in more endangered animals getting killed and creating more endangered species and by using the act as a legal means to do it. Why must we in South Africa be so evil that we destroy everything that nature gives us. We do not need to eat wild and endangered species. This is our heritage to protect. Remove this Minister for even thinking about this evil deed.	Colleen

	2020-04-23 09:54:14	Western Cape		No I do not	No I do not believe that endangered animals should be slaughtered for consumption. as a human society we believe that we can destroy and kill because we are superior, in this notion I believe we are destroying this earth and therefore mother nature is taking her back not slowly but deadly.certain animals were put on earth for a reason not for consumption but to keep us in check .yet again we are destroying what natural resources is available(ocean pollution,earth pollution, destruction of forests ,mountains ,and any natural earthly resource) It is therefore our duty to protect and preserve our endangered animals .	Shafiek

	2020-04-23 09:53:42	Western Cape		No I do not	Only farm animals may be exported under well controlled circumstances. The current Covid 19 pandemic has been caused through wet markets. This must be stopped to prevent this ever happening again and crippling all the economies around the world. Each country must breed their own wild game for consumption. Stop cruelty to animals. Man is the most vile and cruel of all animals. Lets make this a better country and no exporting of game at all for consumption.	ANGELA

	2020-04-23 09:53:29	Western Cape		No I do not	You cannot slaughter endangered animals, as the wildlife and environment must be protected. There's enough traditional animals for eating purposes, like sheep, cattle and goats.	Hannes
	2020-04-23 09:53:15	Western Cape		No I do not	This is just further proof that we as humans is a very guilty specie if it comes to the rights we claim for ourselves and the total ignorance of every other living thing, which by the way include plants, just because we perceive us "superior" and in the process destroy all and sundry and in the not so long run ourselves. What legislation should incorporate is responsibility for our actions especially our breeding rate.	Jakobus P H
	2020-04-23 09:52:58	Western Cape		No I do not	No wild animal unless farmed should be on this list. We are already putting so much pressure on wild life by degrading the environment, contracting habitat and illegal trade, there should be no laws in place to allow harm to them. Species and diversity should have laws to protect them not threaten them.	Marianne
	2020-04-23 09:52:53	Western Cape		No I do not	Absolutely do not support this. This is shocking!!!	Antoinette

	2020-04-23 09:51:49	Western Cape		No I do not	It’s unbelievable that in a world of heightened conversation regarding conservation we even have such a debate! African wildlife is our heritage, the continent known for it’s amazing wild animals ! We have to preserve it for future generations! Not hunt it, export it, import it or consume it for heavens sake! What are we savages? As for domestic animals ... the cruelty is unspeakable ! Transport of life animals should be strictly criminalized !	Maria
	2020-04-23 09:51:29	Western Cape		No I do not	If there is one overwhelming lesson to be learnt from the Corona virus pandemic, it's that we HAVE to become vegan. This pandemic was started by consumption of animal flesh. Additionally, there is the most appalling cruelty associated with ANY form of animal agriculture. No-one can claim to love animals if they consume animal flesh - and the same applies to fowl or fish. A plant based diet is the way to go if we want to make the planet sustainable. So I DO NOT support any initiative which legalises the killing of animals - domestic or wildlife - when there is a compassionate and sustainable alternative.	Roderick

	2020-04-23 09:50:52	Western Cape		No I do not	Are we not already killing and eating enough animals?? Do we really need to extend this list to include almost extinct animals such as rhino. If anything we should be reducing the list.	Tiva
	2020-04-23 09:50:49	Western Cape		No I do not	Enough has been spoken about in the past few months, as we have grappled with the devastating effects of the zoonotic Coronavirus, regarding the urgency with which we need to change the way we interact with the other species on this planet. The minister and her advisors must be living under a rock to be attempting to push through an amendment that is so clearly contradictory to the zeitgeist of our entire civilisation.	Michele
	2020-04-23 09:50:41	Western Cape		No I do not	This amendment is absolutely preposterous ! only the norma such as cattle , sheep chickens etc., should be slaughtered. Culled animals which are acceptable are buck, rabbit, guinea fowl. no endangered species at all. Any wildlife that are considered the big 5 an absolute No no. What is the Minister thinking???? He is an animal for even considering this and I wish as an his future was in my hands ! He would be loved and nurtured to the point of understanding that these animals are the planet and the future. We do not want to encourage poaching in any way ! Making this legal and amending the law will not stop the poaching so please please please reconsider this bill.	Linda
	2020-04-23 09:50:39	Western Cape		No I do not	No animals should be slaughtered for any reason whatsoever. I will never support any so-called politicians calls for animal murder.	David
	2020-04-23 09:50:38	Western Cape		No I do not		Graham

	2020-04-23 09:50:17	Western Cape		No I do not	I prefer that no animal be added to the list. We as people eat enough animals and the environment is suffering enough already.	Pierre

	2020-04-23 09:49:16	Western Cape		No I do not	I DO NOT support this draft amendment . It will impact on the future generation and the tourist industry which in effect has an impact on the economy. The lives of the animals is a precious commodity and with the poaching that is already taking place is having an effect on the numbers of our stocks. NO to this amendment.	christina
	2020-04-23 09:49:15	Western Cape		No I do not	If they do not stop the absolute destruction of everything they touch and the killing of food producing farmers they will be eating the pets next then their old people then their children selah.	I E

	2020-04-23 09:48:05	Western Cape		No I do not	We, as humans, farm enough meat through agricultural means without needing to dip into endangered and other unique species for food. If we do, we are no better than locusts.	Lee

	2020-04-23 09:46:49	Western Cape		No I do not	Please do not adopt this bill. In fact no animals should be slaughtered at all. Its an inhumane practise and eating meat is unhealthy, cruel, expensive, unnecessary and contributes to global warming.	Gloria
	2020-04-23 09:46:42	Western Cape		No I do not	We HAVE to protect all wild life at all costs! Surely this is obvious! Do we want to be likened to places like China where there is NO respect for the life of living creatures! No wonder so many people are vegetarian or vegan. Time for people to step up & protect all the animals on this planet. Both on land & in our oceans!	DelRay
	2020-04-23 09:46:36	Western Cape		No I do not	We need to preserve our natural resource s for future generations. Are we running out of animals we breed for consumption? I am concerned about the health implications. We have seen what happened in China.	Ida
	2020-04-23 09:46:19	Western Cape		No I do not	Anything as cruel and crazy as this points to dirty money under the table. Can anybody with the least comprehension of the interdependence of nature even consider anything as stupid and short sighted. Many of our species are already becoming extinct because China has this barbaric apatite for anything that slithers or crawls on the face of the earth. They are doing a good job of raping Africa of all its vital resources with the consent of corrupt governments. Are we going to be any different???	Lowe
	2020-04-23 09:45:57	Western Cape		No I do not		Bruce
	2020-04-23 09:45:56	Western Cape		No I do not	I absolutely do not support the proposed new list of animals that may be slaughtered in South Africa - under no circumstances should any threatened species be allowed to be slaughtered or the meat and/or byproducts sold for commercial purposes. Furthermore, making a blanket statement that 'the Act also applies to all other species of animals not mentioned including birds, fish and reptiles that may be slaughtered as food for human and animal consumption' is unacceptable. This will effectively allow any birds, fish and reptiles, irrespective of the threatened status, to be slaughtered and consumed, as it could be argued that these species may be slaughtered. The list should be extremely specific, and limited only to animals that are bred for slaughtering and consumption, including domesticated farm animals and game identified for such consumption. The list should also not include any wild animals. The proposed new list also includes many foreign / alien species which do not naturally occur in South Africa. Unless these are imported and bred specifically for consumption, it does not make sense to include them. No foreign threatened / protected species should be included in this list under any circumstances.	Anel
	2020-04-23 09:45:32	Western Cape		No I do not	In this time during lockdown, the government are trying to amend this! When focus should be on the pandemic rescue. Are we going to be the next country to cause another disease! What about humans? Add them to the list too. Everything and anything goes Leave the wild life alone. Tourism depends on our unique animal kingdom. Will this government stop at nothing to destroy everything that is beautiful?	Ezra
	2020-04-23 09:45:21	Western Cape		No I do not		Gert

	2020-04-23 09:44:55	Western Cape		No I do not	The lack of foresight in this proposed amendment is a shock. South Africa supports and attracts a wide variety of flora and fauna, the existence thereof contributes considerably to our country economically and as well as to our well being by being exposed to these extraordinary creatures of nature. Do we really need to eat our wild life to survive in South Africa? Is this the level of depravity that we have reached?	pauline
	2020-04-23 09:44:21	Western Cape		No I do not	Leave our wild life alone it is not for sale and the Government has to put a stop to this slaughter, if they care for this country ??? But I think their back pockets are worth more than the wild life. It is a disgrace and I am shocked to have this bill approved.	Leigh
	2020-04-23 09:44:16	Western Cape		No I do not	It is unbeleavable that somebody with a brain is suggesting to ammend the law to include wild life animals . You do not cut off the tree branch that you sitting on. Think of the tourist market!	Rita

	2020-04-23 09:42:48	Western Cape		No I do not		Suzette
	2020-04-23 09:42:48	Western Cape		No I do not	I can’t believe that this is even being contemplated. To propose an amendment to allow killing of endangered animals is complete madness. China goes forwards, South Africa goes backwards. If this is accepted, we will be showing the world that we are, in fact, an uncivilised country with no understanding of the environment . Protect and respect our wild animals and save the heritage of our children's future and teach them to respect and love nature.	sharonne
	2020-04-23 09:42:45	Western Cape		No I do not	This will only serve to kill endangered species and export their body parts, e.g. rhino horn	Zuleigha
	2020-04-23 09:42:24	Western Cape		No I do not	This sounds completely crazy when we are in the throes of the Covid 19 pandemic which appears to have originated from the consumption of a wild animal. Quite apart from that we should be conserving our fast- diminishing and precious wildlife, not eating it!	Frances
	2020-04-23 09:42:23	Western Cape		No I do not	PLEASE STOP LYING TO PEOPLE and ramp up the safety of BASIC meat products! Hold retailers to account! It is madness to include any form of wildlife on the list considering the 6th mass extinction is currently underway. Equally as mad is the complete lack of thought that has gone into the Meat safety act's most basic promulgates such as the very definition of meat! The entire thing needs to be redone, re-researched and re-written. If the definition of mince is not minced meat (with a DETAILED definition of meat) with NO additives, then it is not minced meat. Brine filled chicken IS lying to the consumer. Hormone and antibiotic pumped meat is not meat its a medicine delivery system.	Natalie
	2020-04-23 09:42:21	Western Cape		No I do not		Ramsay
	2020-04-23 09:42:03	Western Cape		No I do not	This is absolutely insane. Why when our wildlife is already in such a threatened state. This will just exasperate the problem further. Have we not learned anything. If this law is passed I would request the government to stop being part of the Global effort to combat the further deteriorating of this earth because on the one hand they pretend to be concerned but on the other they want to pass laws like this!	Helen
	2020-04-23 09:41:58	Western Cape		No I do not	No Endangered species of any kind should be listed for human slaughter or consumption. This would undermine all the efforts made by our national conservation agencies to protect the diverse fauna of our country which brings in a huge tourist attraction therefore enriching our economy.	Cedric
	2020-04-23 09:41:56	Western Cape		No I do not	Although the Bill (which I just read) does not have Rhino or Giraffe on the list (page 16), it does have Hippo, Zebra, Buffalo and Wildebeest. We need to protect South Africa s wild animals, no other country has the wild animals we have, so no other country has the ability to protect them. How can we condone the slaughter of Hippos, Zebra and Buffalo? That would open a door that we cant afford to walk through. Please consider what this will do to certain species, if we allow this Bill, as it stands, to be passed.	Simone
	2020-04-23 09:41:51	Western Cape		No I do not	As South Africans we treasure our wildlife. Absolutely not.	Elizabeth
	2020-04-23 09:41:21	Western Cape		No I do not	I do not support the proposed amendment. Endangered animals shouldbe left alone, the word endangered says it all. Inasmuch as meat becomes available from culling, it should as much as possible be destroyed. We have seen what the result can be when humans start consuming exotic animals (Corona virus): chances are that new outbreaks may occur of yet unknown diseases. No wild animals must be added to the list.	Andre
	2020-04-23 09:41:19	Western Cape		No I do not	Given the current zoonotic COVID19 epidemic, it is unthinkable that the government is considering including threatened wildlife such as rhinoceros, elephant, giraffe, and many other birds, reptiles and fish for human consumption. This is potentially leading to a ‘canned’ rhino industry, similar to the already disgraceful lion bone industry. Donkeys, although domesticated, are also a threatened species due to Chinese demand for their hides and ought to be protected from slaughter for consumption. The SA government demonstrates no idea of what dominion and respect for nature entails and is a disgraceful custodian of our wildlife,. This is pure domination and bound to contribute to the wet wild meat market trade in Asia that fuels these pandemics.	Alison

	2020-04-23 09:41:17	Western Cape		No I do not	This is outrageous no wild life should be on the list Please have you not learned your lesson with regards to virus animals carry Our wild life is the heritage of this country and need to be protected not killed	Pat
	2020-04-23 09:41:07	Western Cape		No I do not	Wildlife animals, including donkeys and horses, are not resources for humanity to exploit. They have a right to live in South Africa, in their natural environment, full and healthy lives. We do not need to exploit other species for meat trade, and to contemplate doing so is a morally corrupt decision. Wildlife is not food. We have proven how badly we take care of our already domesticated animals and livestock, how badly we organise their deaths, how we drain our empathy banks every time we categorise another species as a "resource". We are stewards on this planet. We need to take only that which we need to survive. Farming animals for 'wealth and prosperity', in the name of 'growth and economy', is abhorrent and will be looked on by next generations as ignorant, backwards and a sign of a greedy nation. If we truly value justice and freedom, then it must be justice and freedom for all sentient beings in our country. This debate is morally bankrupt from the start because there is no argument that can win over the fact that we do not have rights over other sentient beings. We cannot assign them as resources.	Laura
	2020-04-23 09:40:40	Western Cape		No I do not	Anything that jeopardizes our precious species esp endangered ones should not even be considered as an amendment - I would have thought that the COVID-19 pandemic would have taught us all the importance of respecting all life-forms & would have stopped the greediness of politicians.	Val
	2020-04-23 09:40:19	Western Cape		No I do not	I find it extremely difficullt to believe what I have just read To market for the sake of greed our God given wild life is not only abhorrid but sinful. It can only be soul less persons that would even think of such a thing. Out of respect for animal life I am vegetarian. Thats how strongly I feel about this matter. I am pretty sure there are thousands of fellow South Africans who think the same way. To exploit these creatures for greed will have repercussions from the almighty.	Pieter
	2020-04-23 09:39:39	Western Cape		No I do not	Are they crazy? Putting endangered animal on a list that authorises eating them? Who wants to eat them any way?	Don
	2020-04-23 09:38:48	Western Cape		No I do not	It has become more and more evident that the mass farming (factory) farming of animals for human consumption is causing ecological and heath crisis. The only real solution to solve so many of the global issues we face is to phase out the eating of animals and to move toward a plant based diet only. This amendment is taking steps back and will put us years back.	David

	2020-04-23 09:38:22	Western Cape		No I do not	It Is an absurb thought that this act could even be contemplated. The Mindset of those in power surely must know that this is killing on of our major tourism - visiting our beautiful reserves with natural free roaming wild life . Where is the logic ???	Lindsey
	2020-04-23 09:38:12	Western Cape		No I do not	Endangered species added to the list. Totally unnecessary. Shame on you!	Pieter
	2020-04-23 09:38:12	Western Cape		No I do not	Only people who are in favour of the poaching our endangered animals will support the draft amendment to the Meat Safety Act!!	Paul
	2020-04-23 09:38:08	Western Cape		No I do not	For safety reasons, I prefer farmed meat. it will increase the poaching of our wild life.	ronel
	2020-04-23 09:37:48	Western Cape		No I do not	Have you learnt nothing from COVID-19? Why should endangered and protected species be allowed to be harvested? What about future generations? I am highly disappointed in this minister to even entertain this amendment. Shame on you.	Stefan

	2020-04-23 09:36:36	Western Cape		No I do not	Endangered species should be forbidden to be slaughtered for consumed of human or animal food or use.	Jeanell
	2020-04-23 09:36:33	Western Cape		No I do not	Our indigenous wild animals & all protected species must not be added to this act. Should the need arise to cull certain species then special approval must be sourced as & when required. SA's wild life must be protected at all costs as it contributes massively to the success & sustainability of our tourism industry.	Ken

	2020-04-23 09:33:05	Western Cape		No I do not	If the amendment is allowed to go through China will steal all our wildlife, including over fishing our territorial waters as they are busy doing now. 	2020-04-23 09:32:58	Western Cape		No I do not	Please do not amend the act. Our wildlife is a national asset and must be protected by all means, for future generations. Wild life animals are good for tourism, to look at and to photograph and not as a specialty on a dinner plate. Let us rather concentrate on improving the environment and minimize pollution.	Karl

	2020-04-23 09:31:26	Western Cape		No I do not	This is ludicrous. Is there no educational institution where government officials can get at least some education on how to run a business. That is what government is, after all. If they do this, then they are joining forces with the COVID-19 virus and they will kill the rest of what is left of life on earth.	Johan
	2020-04-23 09:31:10	Western Cape		No I do not	We're living the consequences of human exploitation of wildlife with the covid pandemic. We should be reducing our meat consumption not seeking to increase it.	colin
	2020-04-23 09:31:05	Western Cape		No I do not	Surely the world's current COVID-19 situation should teach the world to respect animals and the wild? No threatened species should EVER be included or even be considered!	Retha

	2020-04-23 09:29:13	Western Cape		No I do not	I have no strong feelings about protection of reptiles , and feel that less (or no) crocodiles and venomous snakes would make life safer for tribes-people in affected areas, but strongly oppose treating endangered species as a food source . If need be, antelope and fish could be farmed as a food source, but not elephant or rhino.	Roger
	2020-04-23 09:29:09	Western Cape		No I do not	This amendment looks like it is opening up a conduit to a certain market known to eat any animal or creature on the planet. It will encourage the poaching and decimation of many species that currently have protection. One senses that this is a an act that is is being imposed on our country to supply a lucrative market abroad.	Malcolm

	2020-04-23 09:28:19	Western Cape		No I do not	I believe that wild game may be slaughtered but with very strict permit control in place. The slaughter of reptiles and any animal under threat of extinction can definitely not be allowed to be slaughtered, including fish and bird species.	Edward

	2020-04-23 09:27:41	Western Cape		No I do not	This is lunacy - pure and simple. 1. Have we learned NOTHING from Covid 19? It is widely thought that consumption of non domestic animal meat STARTED this whole pandemic. Are we so jealous of their notoriety that we want to start our OWN pandemic? Really? 2. Animals that are endangered, semi endangered or extinct in the wild must be PRESERVED not EATEN!!!! 3.We already have a major problem with keeping our Rhino's alive due to market demand for their glorified NAILS to be used as "medicine"..... are we really suggesting that we should start up similar trades in other animals? I am more ashamed every day to be called a South African. This is a very sad reflection of what the rainbow nation has become. Trade in endangered species is frowned upon by the civilized world for a reason. Perhaps the plan is to become reviled by the world for our shameful legislation again? If that is the case then we are off to a great start with this idea!	Tracy

	2020-04-23 09:27:33	Western Cape		No I do not	I do not support this bill. Our wildlife needs protection, NOT exploitation.	Sean

	2020-04-23 09:26:42	Western Cape		No I do not	This is another sample why this government is corrupt and short term limited thinking. Instead on doing relevant works it only adjust, change, add new regulations. Useless, highly paid useful idiots.	Halina
	2020-04-23 09:26:37	Western Cape		No I do not	Any animal listed as "endangered" should not be appearing on this list. If there is one thing the world should have learned by now it is that humans are the caretakers of nature. Conservation and the protection and preservation of animals and plants (particularly threatened species) is of cardinal importance for human survival. Furthermore, lessons should already have been learnt from the Coronavirus, its origins, the transmission and how the consumption of certain animals resulted in a catastrophe for human beings.	Ean
	2020-04-23 09:26:27	Western Cape		No I do not	Has Covid-19 which originated from animal or bird or bat meat, taught us nothing? Even the Chinese have banned the import and sale of animal products so WHY ARE WE INCREASING THE LIST species OF MEAT from animal, bird, fish etc species? And particularly the THREATENED species like Rhino. It is too crazy to comprehend. If anything is to be amended it should be that the list becomes smaller not wider in range. Please decrease the number of species rather.	Janet
	2020-04-23 09:26:24	Western Cape		No I do not		Jean Ann
	2020-04-23 09:25:59	Western Cape		No I do not	The new list will allow the import and export of the meat of the extended list of animals on the list. Many of the animals on the list are endangered in South Africa and many of those not found naturally in our country are endangered in their countries of origin. The ultimate outcome of the extension of the list will be that South Africa will become a conduit for the export of the meat of endangered animals to China. The Rhino population is under threat of extinction due to poaching for their horns. If it becomes legal to slaughter them and process their meat in abattoirs the next logical step in the process will be to legalise the export and import of rhino horn. China will not rest until they have totally denuded Africa of all of its wildlife.	Andrew
	2020-04-23 09:25:40	Western Cape		No I do not	The problem at present is not the supply of meat but the ability of paying for it. As for the laughable idea of using wild animals, stop and think were the Coronavirus came from. Maybe the idea is to turn us all into vegetarians.	John

	2020-04-23 09:24:33	Western Cape		No I do not	Wildlife is part of Africa, important for balance in an ecosystem and more importantly tourism. We are already struggling to keep the numbers of poached animals down, how will the wildlife survive if they are allowed to be slaughtered for consumption.	Julia
	2020-04-23 09:24:29	Western Cape		No I do not	Good Morning, I cannot believe 'they' are even considering eating wild animals that are on an 'endangered animal list' I do not eat meat, that is my choice. I think if you have to eat meat, this should only be 'farmed'. And who farms elephant for eatng? I think it is time these people whoever they are, get real,get withit. Otherwise have a wonderful meat free day.	Joan
	2020-04-23 09:24:11	Western Cape		No I do not	Threatened species should not be included in the list. This will result in more endangered animals getting killed using the act as a legal means to do it.	Abrie

	2020-04-23 09:23:49	Western Cape		No I do not	I understand that food insecurity exist in this country, however the slaughter and consumption of endangered species and bush meat should be banned. If we wish to save our planet for future generations we have to respect all the animals on this earth.	Johlene
	2020-04-23 09:23:47	Western Cape		No I do not	I believe in line with new emerging trends, climate change and coronavirus exotic meat eating should be banned and factory farming with over crowding should be strictly controlled.	Giselle
	2020-04-23 09:23:46	Western Cape		No I do not	We are here to protect our wildlife not to destroy and make it extinct. In particular giraffes , elephants , rhinos etc are under threat. We are there guardians and protectors. We as a country are not here to support the eastern markets by helping them have easier access to our wildlife. Our wildlife is also part of our tourism industry. If South Africa allows this then we are worse than countries like China and America. Please speak to people in the know like Paul Hilton ....he has been fighting for animal rights throughout the world. Speak to organisations like the WWF. Please protect our species and don't support the East hunger for exotic animals. Stop the exploitation and corruption South Africa we do not need the East. We are the protesters. In light of corona virus let a south Africa not be the cause of a virus or the extinction of all our beautiful wildlife.	Bonita
	2020-04-23 09:23:46	Western Cape		No I do not	God gave us animals to look after them not to slaughter them. There are animals that are given for food not wildlife.	Wilmien
	2020-04-23 09:23:23	Western Cape		No I do not	How can government consent to giving permission to the slaughtering of endangered wild life. There job is suppose to be to protect the lives of these animals and others that are will eventually to become endangered because a law like this could be passed. Please, this list needs to be scrutinized and redone. The list here is not acceptable!	Rushda
	2020-04-23 09:23:11	Western Cape		No I do not	Absolutely not! Our wildlife will be decimated!! Why must wildlife be included when there is a glut of farmed animals that serves the consumption needs of the country?	gary

	2020-04-23 09:23:10	Western Cape		No I do not	How can the government even think of extending the list of wild animals to be consumed, let alone add in species that are so vulnerable. They obviously have no idea of what is happening to our wild life, which forms a major part of the country's employment and income. Is this being put forward because certain members of the government will receive enormous personal financial gain? The world is already raping the wild life to the extent of animals being made extinct at a faster rate that any previous time and all that will happen with the Act is to increase that rate. All the wildlife lives symbiotically, which is something we humans need to learn.	Lorraine

	2020-04-23 09:22:59	Western Cape		No I do not	David No I do not Does the SA government actually propose that we become even more like China in cruelty, contribute to the extinction of our wildlife and the spread of viruses resulting from this practice like ebola, covid 19, This is 2020 after all. 	2020-04-23 09:22:54	Western Cape		No I do not	I Definitely do not support the Amendment to the Slaughter, sale, export & consumption of animals as proposed. The only exception would be when there are too many animals of a specific specie which the natural habitat cannot sustain. Then planned intelligent culling to take place to preserve the specie, but under NO circumstances indiscriminate killing should be allowed.	Pamela

	2020-04-23 09:22:09	Western Cape		No I do not	I see no rationale provided for these fairly drastic changes and do not see how they can be justified, given the associated risks, including those to tourism, animal-borne infections and threats to endangered species	Roger

	2020-04-23 09:19:46	Western Cape		No I do not	STOP! STOP! STOP!!!! Stop the slaughter and decimation of our Wildlife. I strongly OPPOSE that this draft amendment be signed into legislation. There are more than enough people producing more than enough animals for human consumption, along with vegetable and fruit crops. We do not need these beautiful animals to be added to the list. GOD put each and every animal, plant, tree insect, bird and living organism on this earth for a reason, and each and every one of them has a function in the wellbeing of our planet. Humans DO NOT HAVE THE RIGHT TO DESTROY THAT WHICH GOD HAS CREATED. Drop this bill and concentrate rather on the criminal elements within Government and society. Leave the wild animals alone and at least leave a better planet for future generations to enjoy as well and stop being so selfish.	Adrian
	2020-04-23 09:19:21	Western Cape		No I do not	How can the Minister of Agriculture even think of including endangered species into further decimation. Has she been informed of the dire consequences of slaughtering these amazing animals. A definite, NO, NO and NO.	Margie

	2020-04-23 09:17:35	Western Cape		No I do not	We are trying to protect our planet and all living beings on it. i Very Strongly am against killing of endangered animals. 	2020-04-23 09:14:38	Western Cape		No I do not	There is absolutely no good reason to include these wild, undomesticated and possibly endangered animals onto this list. Not only are the amendments an abhorrent and poorly-hidden excuse for indiscriminate slaughter and savagery, but on the back of the zoological transfer of covid-19 and the resultant pandemic, the proposed changes ring as tone-deaf and just plain idiotic. It is not worth the risk. In a country so desperate for food security, why not invest more time, energy and legislature into selling state-owned, unused farmland to cultivate crops and raise cattle?	S
	2020-04-23 09:14:36	Western Cape		No I do not	How can we even think of including scarce animal species to be included. This is ridiculous and should be stopped. - It seems that decisions being made around our country is going from bad to worse. If eating wildlife in China causing a world pandemic has not taught them anything then I dont know what will teach them anything that they are able to learn. Disgusting	A
	2020-04-23 09:14:29	Western Cape		No I do not	As a country that tourists mainly visit to experience our wonderful and diverse range of wildlife why kill what we should be immensely proud of? We should lead the way in nature conservation instead of destroying this rich inheritance. Added to this if we are to survive as a species then this will not help at all - nature will find a way to fight back and more diseases may erupt which will no doubt pose huge threats to our survival going forward. The world is a mess - why make it any worse than it is already!	Moyra

	2020-04-23 09:11:56	Western Cape		No I do not	With the number of species becoming extinct world wide this is the time to further prohibit the consumption of especially wild life. There needs to be controls in place to protect the animal populations to ensure their diversity, it is no good consuming these animals to such an extent that it endangers the well being of the species, and also the ecosystem at large. Where proper research has been done, and an independent review has been performed, culling of species excess could be considered, if beneficial to the ecosystem at large. This has to be controlled. If we don't protect, especially our wildlife resources, we endanger the ecosystem, the lives and jobs that depend on it, and the associated tourism., which is worth far more in the long term, compared to the short term food benefit.	Grenville

	2020-04-23 09:11:54	Western Cape		No I do not	I feel absolutely sick reading the list of animals they want to add to this act. It's unforgivable and disgusting. I 100% DO NOT accept this bill and think the ministers involved should have legal action taken against them. All they care about is money. Is this the Chinese government's influence? Wanting to eat every single animal? (That is the very reason we have a pandemic) The future is veganism, not adding endangered species to the menu. We should be protecting animals, not abusing and eating them.	Natalie

	2020-04-23 09:09:06	Western Cape		No I do not	As is clearly shown by the global infection of the new corona virus, all consumption of wild animals should be banned. As humans continue to destroy the natural world around them, there will be a crossover of viruses that humans have no defense against. Distance from and protection of wild animals is of utmost importance. Restore natural habitats and educate people not to engage in unhealthy and dangerous habits. Why endangered animals are on this list is incomprehensible. These animals should be removed from the list immediately. Any future endangered animals should automatically be removed as well.	Kelly

	2020-04-23 09:05:42	Western Cape		No I do not	There is already a high level of poaching and illegal killing of wild life such that several species are at risk of extinction. 	2020-04-23 09:02:42	Western Cape		No I do not	have they learnt nothing from the wuhan wet markets? placing these animals on a list doesn't mean they are slaughtered humanely, hygienically or legally. it's bad enough we rear and eat so many cows, sheep, chickens and pigs every year, now we have to add endangered animals to that list? the minister needs to come up with a more viable way to make money than to deplete our animal heritage. this shows distinct lack of creativity and foresight, as per usual. has the covid-19 pandemic not drawn attention to how human decisions are bad for our planet and society in general? when will people WAKE UP and think about how their decisions affect the world negatively? maybe they should add pigeons to the list. they are flying crap and baby-making machines, pretty much useless to anybody.	dominique
	2020-04-23 09:02:34	Western Cape		No I do not	This is INSANITY! You are increasing and encouraging POACHING and the decimation of some of the most unique and rare animal species in the world. We are blessed with some of the last wilderness areas on the planet and these animals are an integral part of the whole. Tourism, which brings in huge benefits for South Africa will dry up. Obviously there are viable species that can be culled, BUT RHINOCEROUS, are you serious. You, minister will be responsible for the extinction of an animal that roamed the planet at the time of the dinosaurs.....WAKE UP! We are in lockdown precisely because of our consumption of wild meat! You cannot be serious	Terry
	2020-04-23 09:02:29	Western Cape		No I do not	This is REDICULOUS. There is evidence that Covid 19 started with consumption of wild animals - Are you not going to learn anything from this??? Plus, NO to the cruelty of slaughter. People in SA need to eat more vegetables, fruit, legumes and pulses. THAT IS HEALTHY. Not more meat. NO. Do not extend cruelty to more animals now or ever. 	2020-04-23 09:01:57	Western Cape		No I do not	There is no justification for this ridiculous proposal, I think the powers that be are being strongly swayed by outside influences, most likely from Asia! At this time in the world's history with the current crisis causing so many deaths and a global economic collapse, how could any Govt. even consider such a ludicrous proposal?! The 'Brand South Africa' has already been tarnished internationally by things such as canned Lion hunting, to add even more species to this list would be the tipping point in our tourism industry and would do irreparable damage to this country. The exploitation of wildlife should be decreased not increased! Morally there can be no justification for this proposed amendment, this is all about money, as always!	Paul

	2020-04-23 09:01:26	Western Cape		No I do not	This list of animals includes many wild animals that could face extinction in the wild should we open their meat up for export. Animals such as Giraffe, elephant, rhino, dikdik, klipspringer and Duiker which are not 'farmable' should not be permitted to be slaughtered and exported as this could endanger their survival into the future. Our wild life which is dwindling at a rapid rate needs to be protected. Localized culling where necessary should be given individual permissions under the expert guidance of scientists and conservationists.	Jennifer
	2020-04-23 09:01:07	Western Cape		No I do not	The amended list should remove any species on the threatened or endangered list or where there are concerns around the sustainability of the species population.	Michael
	2020-04-23 09:01:01	Western Cape		No I do not	Considering the problem the world has because of the Chinese coronavirus, apparently started in the notorious wet markets in Wuhan, China, we really should not consider adding wild animals to our food list. 	2020-04-23 09:00:57	Western Cape		No I do not	Any expansion of the existing limitations will certainly have the effect of widening the opportunity for further poaching of already threatened wildlife. 	2020-04-23 08:56:13	Western Cape		No I do not	Our wildlife is one of the marketable resources we have in South AFrica which is why we have our National Parks. This is a tourism opportunity which brings capital into this country. We have seen the devastation caused by the sale and ingestion of wild animals in Wuhan. Do we really want to open that up in this country? This new proposed amendment is only going to increase the ravishing of this country's natural wildlife resources, give poachers the validity they so desperately crave and take away from this planet, the very wildlife that is part of the ecosystem of the world, not to mention the looming extinction of whole species, due to the stupidity and greed of the perpetrators of this mindless proposal. My recommendation is to remove the person or people proposing this bill because they very clearly do not have the best interests of this country at heart.	Vanessa

When you go to those countries you will see say an African elephant, gold, diamonds and rare trees and stones which are extinct in Africa. What South Africa need is to plan human settlement and free most of the land from reckless urban sprawl and preserve agricultural and conversation land. There must be a balanced co-existence among the rest of nature and human beings. 	2020-04-23 08:47:44	Western Cape		No I do not	Only domesticated animals and wild game that is currently being slaughtered should be allowed all others must be banned.	Leon
	2020-04-23 08:47:34	Western Cape		No I do not	I am very much against this petition because I am an animal lover and also there will not be a single species left for tourist attraction in South African. Whose idea is this terrible slaughter? Are they trying to do this in order to achieve more lands from vast wild games for more houses to be construction for the homeless people in South Africa? I am sorry about this and do not accept this massive slaughtering of domestic and wild animals. We live in a beautiful country with so many races, cultures and talents. Viva South Africa!	Andrew John
	2020-04-23 08:47:32	Western Cape		No I do not	We cannot encourage the slaughter of all animals,as we could experience the repeat of diseases/viruses similar to the pandemic we are facing currently with the coronavirus. Thank you.	Anne

	2020-04-23 08:45:43	Western Cape		No I do not	Have we not learnt a lesson from China. This will encourage an increase in wildlife poaching. We should not leave such important issues for delinguent politicians to act on An intellectual and scientific approach will be the best response	norman
	2020-04-23 08:45:26	Western Cape		No I do not	We should not include the sale and consumption etc. of our indigenous wildlife. We need to protect these creatures not legalize their demise. We should be adding more measures to protect them.	Natasha

	2020-04-23 08:44:36	Western Cape		No I do not	Just when one thinks that matters could not get any worse here in SA , the ANC government comes up with another disaster. Instead of copying our new masters , China (who have surely proved to the world what harm their disgusting eating habits have produced) please , show some sense and stop killing everything that moves ! When one sees the like of elephant , rhinos , hippos , etc on the new list , one shudders ..... does the minister not know what has been going on in this country and is still going on ???? Instead of killing off all our beautiful wildlife (a major Tourist attraction) rather control the ever-expanding population explosion that is running out of control in this country ! S.Africans are becoming like a plague ..... destroying everything in their pathway just to put food into their bellies ! God help us .	Gillian
	2020-04-23 08:44:00	Western Cape		No I do not	I cannot believe we have not learnt or lesson with the current virus, we have caused enough harm to animals & why do we have to eat everything that is what got us into the mess we are currently dealing with. 	2020-04-23 08:43:38	Western Cape		No I do not	It is inconceivable that during a time when we have been made aware of what the greed, arrogance and ever increasing demands of the human species has done, which has damaged the earth and other species , vegetation, oceans, rivers, streams and air, that our own government is seeking to slaughter magnificent wild animals for consumption. NO, in the strongest of terms, NO! This very thought is unconscionable. NO!	Liz
	2020-04-23 08:43:31	Western Cape		No I do not	Most definitely not. This is totally unacceptable. It is sick and disgusting where are we heading.....really our beautiful wild animals make our South Africa what it is. They must be protected at all costs.	Vena

We must preserve....save....the world we live on: it is a gift. It sustains us.	mark
	2020-04-23 08:38:42	Western Cape		No I do not	DO you really want to be the country that the world looks to in disgust? Not protecting your wildlife? This is a China centric regulation/law that government wants to pass to score points with their Chinese owners. Is this a part of what R500b buys you! there does not seem to be any research or empirical data to determine how many numbers of each species. Some species are not even found in South Africa..!! Some are red data species and when one sees rhino, donkey, horse, porcupine and pretty much anything else that moves on a "blanket list", it is pretty obvious it is a nothing more than a cut and paste of the import species list of this government's Chinese masters. It would come as no surprise some comrades with eastern connections are behind this.	Peter

	2020-04-23 08:36:37	Western Cape		No I do not	Specifying certain engangered species in the schedule when the act already applies to all fauna is redundant, and may cause misinterpretation that it might somehow be acceptable to kill endangered species for human consumption. Why does the ANC just not admit they have no idea what they are doing?	Charl

	2020-04-23 08:35:32	Western Cape		No I do not	Many of these animals on the new list are protected species. After all the hard work from conservationists to protect animals like Rhino and Elephants this new list is just a slap in the face! There are also many animals listed here that do not even exist here, wallaby, kiwi, emu?? My thoughts are this list was provided from another country, namely, China?! When will government realise that they are being used and speak up for themselves and not just copy and paste ? This bill is ludicrous!	Louise
	2020-04-23 08:35:15	Western Cape		No I do not	I feel that the inclusion of smaller Duiker and mammals like porcupines etc is going to escalate illegal poaching which is already a big issue in parts of KZN and the Western Cape. These amimals are not commercially 'farmed' and need large tracks of land to sustain themselves. It begs the question: What justification is there for the amended changes and what studies have been done to substantiate the inclusion of the additional animals. We live in a very different world than 100 years ago with an ever increasing poorer population.	Paul
	2020-04-23 08:35:13	Western Cape		No I do not	Has this women Didiza ever seen a Dik-Dik, Suni, Duiker, Steenbuck in real life. Definitely NOT. The mass of a live Suni or Dik-Dik about 5kg"s . 	2020-04-23 08:35:09	Western Cape		No I do not	How can you include animals that are endangered - have you lost your mind, or is the fact that you'll get tons of money actually the driving force here? where is your conscience , or do you not possess one? Leave the wild animals alone, and let them be wild so that many generations to come will still be able to see them and not just in story books. People do not need to eat all these types of animals. We breed animals for eating, why can't you just leave it at that?	Janine

	2020-04-23 08:34:00	Western Cape		No I do not	Not only would this amendment threaten the extinction of animals already on the endangered list, but the need to feed on and devour wild and precious animals is the mark of a cruel and savage people, without conscience or regard for the precious kingdom of nature. 	2020-04-23 08:31:22	Western Cape		No I do not	Dear Minister Please rethink your inclusion of exotic animals such as rhino and crocodile on the list of animals that can be slaughtered. Not only are these animals part of our South African landscape and a reason we attract tourists, but we should all learn from China that the consumption of wild animals may lead to an outcome that we do not wish upon ourselves, such as the Covid-19 virus that originated in China's wet markets. We cannot, unlike China, afford to compensate countries for their economic contraction, if a global pandemic happens on our doorstep and spread to the rest of the world.	Monique

	2020-04-23 08:23:47	Western Cape		No I do not	Has the ANC government comoletely sold us out to China? The greed of our leaders is beyond belief. Have they not learned anything from Wuhan, covid 19, Wet markets, SARS and other viruses? The ANC have taken so much money already from the CCP that they are now obliged to change the legislation of our country to accommodate their debt to China. Is everything given to us on loan on this beautiful planet of ours, up for sale to the highest bidder for the sake of the few elite?. Even our population seems to be expendable. People with no hope nor future because their government has put precedence to their own greed. Live animal shipments to the middle east have proved to be cruel and evil. When is this madness going to stop? Our children's children will have nothing left to enjoy if this government continues to plunder all of our natural resources. May God have mercy on us!	Rene

	2020-04-23 08:20:51	Western Cape		No I do not	You must be joking... Have we learnt nothing from the Covid-19 crisis in that some things are not meant to be eaten. An elephant and rhinoceros are endangered, which get poached and are almost going extinct but officials think it would be a good idea to legalize the slaughter of these animals. How does this make any sense. I vehemently oppose this new amendment and think it is immoral and disgusting to allow the slaughter of most of those animals on those lists. Kudu's and other similar animals on that list are not meant for mass meat produce as they will not be able to reproduce quickly enough to recover from being murdered. We have enough other meat products to eat. Plus with new technology meat replacement products are flooding the markets. Alot of people are moving away from meat which is wonderful. Here comes SA and wants to undo all the good that has been done. It is revolting and makes no logical sense.	Nicola

	2020-04-23 08:18:53	Western Cape		No I do not	This ammendment will only stimulate the demand for the so-called "BUSH MEAT" . It will be in direct opposition to our Wildlife Conservation laws and regulations while it will also play directly into the hands of the current illegal trade in these animals and organisms. If this goes through it will in time nullify our most honest and committed efforts to conserve the little nature that is left for our children and grandchildren. RATHER: stimulate and assist our agricultural sector, including small farmers as well as commercial farmers to enable them to produce enough for every citizen at affordable prices so we can export our product and get rid of all the "Cheap meat" from foreign countries	Joachim M
	2020-04-23 08:18:52	Western Cape		No I do not	This will simply increase the trade of our wildlife meat. Unacceptable. We have no right to trade this wild animal meat. Has COVID-19 not taught us anything??? There is no sustainability in this decision.	Kirsty
	2020-04-23 08:18:34	Western Cape		No I do not	No no no !! Protect what we have	Pierre

	2020-04-23 08:18:05	Western Cape		No I do not	We as human beings are the stewards of this planet. We have a duty to protect our environment and all creatures that we share this planet with . I find this amendment totally disgusting and absurd. With the current crisis around the world you would think mindsets would be changing with regards to conservation but clearly not. Protect, conserve and love our animals this is what we should all be trying our best to do . STOP THE SLAUGHTER !!!!!	Grant

	2020-04-23 08:16:26	Western Cape		No I do not	This rule will make wildlife instinct and it will bring in breeding specifically for the meat trade this is animal cruelty it is bad enough what animals are already been bred just for this purpose. There are too many back streets breeders and this law would encourage more.	Nicole
	2020-04-23 08:16:25	Western Cape		No I do not	The cause of corona virus was people eating meat from pangolins. Do we want another pandemic? If we need to eat meat do not eat wildlife. It is human entitlement to exploit natural resources which is causing global problems.	Marcel
	2020-04-23 08:16:21	Western Cape		No I do not	Disgusting and irresponsible, our duty is to safeguard our fauna and flora for future generations, not exploit it futher. I find it interesting that in the midst of the corona pandemic, allegedly caused by the consumption of 'exotic' meat, the ANC makes this move now. Bowing to your Chinese masters, are you? Selling out Africa and it's natural resoursec wholesale, offering it on a silver platter. Tell us again how much our country and continent means to you. Unbelievable.	Wendy

	2020-04-23 08:16:20	Western Cape		No I do not	No it is not necessary to take animals that are not considered as normal for consumption. We don't follow China by eating any and every animal. To consume endangered stock is senseless and barbaric. There are much more pressing issues that are concerning than eating useless animals.	Alnna

	2020-04-23 08:15:10	Western Cape		No I do not	My heart breaks at this suggested amendement. Living organisms are not only means but ends. 	2020-04-23 08:14:49	Western Cape		No I do not	It is completely unethical and morally wrong to promote the slaughter and consumption of endangered wild life. There should be better support for cattle and sheep farmers if the concern is food security.	Keabetswe
	2020-04-23 08:14:22	Western Cape		No I do not	What a terrible idea! Our wildlife needs to he protected . The government must do more to protect them not to make them suffer. This is unbelievable cruel.	Silvia
	2020-04-23 08:13:04	Western Cape		No I do not	Absolutely not. There is no need to slaughter these animals to the point that our children will have nothing to grow up. This is simply barbaric consumerism with no empathy to satisfy black south African and Chinese interests.	Bob
	2020-04-23 08:12:37	Western Cape		No I do not	There is no need to add endangered wildlife to this list. We are responsible for our wildlife instead of always killing every living being in our world. There is enough meat variety, stop trying to make things more exotic!	Olga
	2020-04-23 08:12:30	Western Cape		No I do not	Slaughtering wild animals is disgusting and unnecessry. Leave our animal kingdom alone.	Rosa

	2020-04-23 08:09:57	Western Cape		No I do not	The very fact that Rhino is on the list shows the integrity behind this move.I suspect it was added for shock value only to be removed by government as a "concession" to pass the bill, so all the other Asian requirements are catered for. SA government you need to stop selling out your people and resources other nations citizens have already turned against their governments for this kind of immoral behavior.	Mark

	2020-04-23 08:08:20	Western Cape		No I do not	Government yet again demonstrates its incompetence to rule the country. Its a step back to the Middle Ages, it is barbaric! It is obviously a step to follow the example of countries north of us which are hell bent of destroying its wild live and with that its tourism potential. If, what is suggested, is part of conservation efforts (culling), I could support it, but as it stands its sheer madness for which this Government is famous.	Klaus
	2020-04-23 08:07:55	Western Cape		No I do not	We are shocked and horrified to read this list! Why are wild animals such as rhino and giraffe on this list? Is South Africa an instrument of China? Please do your job SA government and protect our animals. Especially after what we are all now subjected to with corona virus, the consumption of wild animals is terrible and needs to stop.	Melissa

	2020-04-23 08:04:43	Western Cape		No I do not	Why would the minister do this especially considering there are endangered species on that list, we should be protecting these animals for future generations.Clearly this hasn't been thought through at all. This will have a huge negative impact on tourism in this country and they come to see these wonderful animals and not how you are screwing this country up. 	2020-04-23 08:04:15	Western Cape		No I do not	Why on earth are endangered animals included in the draft amendment? It is blatantly clear that the human race has already done so much damage to the planet and all its creatures and yet the powers that be just seem to turn a blind eye on the whole situation. This should be stopped at all costs.	Tessa

	2020-04-23 08:04:01	Western Cape		No I do not	the new animals included in the amendment are precious to us as South Africans, are part of our heritage and many are threatened, there is no need to slaughter and consume these animals, we have plenty of other animals to eat! The future of our wildlife is at stake, think of future generations to come, these animals will become extinct if we do not protect them, they should be protected, not slaughtered, this is barbaric, reckless and irresponsible governance of our precious wildlife!	Caroline

This act and its attached lists should be water tight.	Alan
	2020-04-23 08:03:31	Western Cape		No I do not	There are people farming with these animals for hunting purposes. Do you now want to kill that part of our economy as well? 90% of the species you have on here are not endangered	Piet
	2020-04-23 08:03:10	Western Cape		No I do not	Viral contagion in wild meat products is reason enough to prevent all and any processing of Bush meat products. Wiks Animas and their environments need our protection and preservation and not sellout to ignorant Asian monsters..	Gareth

	2020-04-23 08:01:15	Western Cape		No I do not	The act and heading you provide is misleading. It include a lot of animals that are not endangered like sheep, cattle, springbuck etc. This act will collapse the agricultural and wildfarming industry creating mass job losses, driven by vegans.	Jaco
	2020-04-23 08:01:10	Western Cape		No I do not	Many of South Africa's animals are unique and contribute to what makes South Africa special and an important part of local and international tourism. Animals are an essential part of various ecosystems and must be preserved for the stability of the environment. Please think again and don't allow this insanity.	Claire

	2020-04-23 08:00:39	Western Cape		No I do not	Some of the very animals that millions of rand are spent on protecting, as in anti-poaching, are now in a proposal for legal slaughter, consumption & even export. It is nonsensical & beyond my understanding.	Ruth

	2020-04-23 07:59:39	Western Cape		No I do not	Some of the animals on this list are very rare and should be protected. Invasive species, domestic livestock and very common and widespread wild species are suitable food animals, but any indigenous rare or threatened species, such as rhinoceros should not be regarded as a source of food. Where species such as elephant or hippo have to be culled, the use of their meat should be acceptable, but only under special permit. Do human beings want to drive every other creature to extinction?	Jennifer
	2020-04-23 07:59:18	Western Cape		No I do not	I do NOT support this. KEEP THE ENDANGERED ANIMALS OFF THIS LIST! Stop killing endangered animals. It is SICK and unfair and only enriches a few. Let our children's children one day see an elephant and a rhino for real, not just in picture books AFTER THEY WERE MURDERED BY SELFISH GREEDY CORRUPT HUMANS.	Jeanine
	2020-04-23 07:59:05	Western Cape		No I do not	Unacceptable to allow the wholesale slaughter of wildlife for consumption! Insane and ridiculous policy! Wonder how much influence the Chinese have in her thinking. That might explain her cruelty! Otherwise its madness!	Nanine

	2020-04-23 07:57:09	Western Cape		No I do not	Our wildlife (which is a significant contributor to our GDP through the tourism sector) is already under pressure from population growth and the invasion/ destruction of protected and previously wild areas. Poaching adds further pressure, alongside industrial/mining creep. So to now include an extended range of wild animals under legislation that would allow them to be slaughtered as mere food is an appalling idea and reflects absolutely no concern for the future of our wildlife. One strongly suspects it's once more a case of short-term government profit over long-term country conservation.	INGRID

We need to use common sense and compassion and stop the slaughter of so many of our beautiful creatures - there is plenty of other stuff to eat even with the lockdown!!! The lockdown should not be used as an excuse either!	Jean
	2020-04-23 07:53:15	Western Cape		No I do not	Are they crazy?! I can't believe they'd even consider this! Haven't they learned anything from where China has gone wrong?? There are few enough of the species they want to add that they would be commercially extinct almost immediately	Wendy
	2020-04-23 07:53:08	Western Cape		No I do not	First question - why? Without including reasons about the corona virus being a zoonotic virus, why on earth would anyone want to add in even more sentient beings to the 'mix'? Second question - why? I can see no reasons beyond some people getting wealthy over this. Totally disgusted at this idea. I am a taxpayer in South Africa and a citizen. I do not support this in any way shape or form.	Maureen
	2020-04-23 07:53:08	Western Cape		No I do not	This is a ludicrous Idea. How much did that foreign government, the one who's people eat anything that moves, contribute to our leading political party's coffers? The rape of the continent is being legalized. NO WAYS.	Thomas

	2020-04-23 07:52:09	Western Cape		No I do not	This is nothing more than cow towing to the Chinese who are under scrutiny for their consumption of exotic animals. This gives faux legitimacy to them to continue with their disgusting habits that contributed to this COVID crisis.	Mike
	2020-04-23 07:51:59	Western Cape		No I do not	Does the SA government actually propose that we become even more like China in cruelty, contribute to the extinction of our wildlife and the spread of viruses resulting from this practice like ebola, covid 19, This is 2020 after all.	Liana
	2020-04-23 07:51:44	Western Cape		No I do not	Please stop killing any type of animal. They deserve to live like us, to be loved and nurtured. That is why I follow a plant based lifestyle. Please STOP THE CRUELTY	MARY
	2020-04-23 07:51:44	Western Cape		No I do not	One species is missing from the list - please add politicians, because this act is just another source of looting for the government and politicians. Or don't the Chinese appreciate wildlife on their new continent?	Joe
	2020-04-23 07:51:34	Western Cape		No I do not	Pure barbaric madness. When will the government learn how important our wildlife is and start protecting it. Too many people and too few wild animals.	Simone
	2020-04-23 07:51:24	Western Cape		No I do not		Vivien
	2020-04-23 07:50:51	Western Cape		No I do not	We cannot allow for slaughter of our threatened species. Tourism and selected trophy hunting of threatened species are far more economically viable than the food markets.	Keith
	2020-04-23 07:50:34	Western Cape		No I do not	DO you really want to be the country that the world looks to in disgust? Not protecting your wildlife? This is a China centric regulation/law that government wants to pass to score points with their Chinese owners. Is this a part of what R500b buys you!	Marthin
	2020-04-23 07:50:27	Western Cape		No I do not	Our wildlife is worth much more to us alive than dead. You can only slaughter an animal once however that animal can be viewed, photographed & enjoyed many times by many tourists. Many of these tourists return to our shores time & again to view our beautiful wildlife.	Keith
	2020-04-23 07:50:26	Western Cape		No I do not	Nature conservation is high priority. Our wildlife must be protected. Ecosystem must be preserved in order to keep the balance between predator and prey.	Anwar

	2020-04-23 07:50:14	Western Cape		No I do not		Gay
	2020-04-23 07:50:10	Western Cape		No I do not	This sounds like Chinese influence! Do humans never learn! Why on God's earth do people need to eat extinct species? This Minister and his obvious lack of so many qualities should be fired!	Caron
	2020-04-23 07:49:56	Western Cape		No I do not	No, I do not support this.	Meshan
	2020-04-23 07:49:39	Western Cape		No I do not	We want our wild life protected. We have plenty of good farmed meat in this country. Don't touch our wild life.	Brenda
	2020-04-23 07:49:29	Western Cape		No I do not		Edward
	2020-04-23 07:49:24	Western Cape		No I do not	This amendment is a definate NO!! This will lead to poaching on a grand scale,a lot worse than is currently is, to the detremen of our national treasures/heritage. There is sufficient protein available!!!	Ian
	2020-04-23 07:48:59	Western Cape		No I do not	Leave our wildlife alone! There are too many people and too few wild animals left. This is an idiotic idea which demonstrates how far behind we are in our thinking.	Kathleen
	2020-04-23 07:48:54	Western Cape		No I do not	We cannot allow to endanger parts of our natural treasure. We need to support endangered wild life species and ensure that they contribute to the balance of our eco system. Each species has a specific function in nature and their existence needs to be protected and ensured.	Hanno
	2020-04-23 07:48:53	Western Cape		No I do not		Cheryl
	2020-04-23 07:48:33	Western Cape		No I do not	I question the sudden need to legalize the slaughter and export of all the listed animals, or the necessity to include animals which are threatened species, such as Rhino. We have survived without the new included species all these years, why the need to do so now. It would appear that we are catering to the whims and appetites of our New Colonizers	Peter
	2020-04-23 07:48:27	Western Cape		No I do not	Our animals are to precious to SA	Louis

	2020-04-23 07:45:13	Western Cape		No I do not	Too many endangered species to slaughter those few that are left	Hazel
	2020-04-23 07:45:11	Western Cape		No I do not		James
	2020-04-23 07:44:54	Western Cape		No I do not		Ronell
	2020-04-23 07:44:53	Western Cape		No I do not	I strongly object to include any wildlife for slaughter for human consumption. Let us continue to consume domestic animals raised for that purpose. If done correctly there is enough for everyone. It is also safer. See what happened in China. Leave wildlife alone!!!	S
	2020-04-23 07:44:34	Western Cape		No I do not	I do not support the amendment bill as animals on the list are protected species.	Martin
	2020-04-23 07:44:06	Western Cape		No I do not	This is a criminal act, no wild animals should be allowed to be slaughtered but I am afraid that the ANC have no regard for anything other than their own corrupt agendas	Michael

	2020-04-23 07:42:26	Western Cape		No I do not	No import or export of animals should be carried out. It is barbaric and inhumane to traffic living creatures in ships and planes. This includes ALL living creatures. Address this issue morally instead of financially.	Sharon
	2020-04-23 07:42:12	Western Cape		No I do not	Next we will be selling bat and baboon meat on the street corner. The government can't even regulate what is currently being slaughtered correctly. Our wildlife needs to be preserved and most species are close to extinction already.	Colin
	2020-04-23 07:42:08	Western Cape		No I do not	This must be the most insane proposal ever! We do what we can to protect our animals and then SLAUGHTER them??	Ank
	2020-04-23 07:41:57	Western Cape		No I do not		Lynette

	2020-04-23 07:41:16	Western Cape		No I do not	This is appauling dont whe have enough animals already for slaughter and consumption in SA. Leave our wildlife and endangered species alone! No . Terrible idea . The world is moving away from this , they are watching , we are not barbarians . No . Terrible idea . The world is moving away from this , they are watching , we are not barbarians . What is our government thinking! Stop this Bill. Leave our Wild Life alone. We will have no Wild Life left! These animals are on the brink of extinction and should be protected, not eaten.	Wayne
	2020-04-23 07:41:15	Western Cape		No I do not		Hans
	2020-04-23 07:41:10	Western Cape		No I do not	Why do we have to slaughter more wildlife for consumption or for sale to others for consumption. We need to find other forms of meat protein. That is why we probably sitting with the COVID-19 Pandemic. Chicken, Sheep, Cow, Ostrich, Fish should be enough. I strongly disagree with this.	Marco
	2020-04-23 07:40:30	Western Cape		No I do not	Here we are with a new corona virus that has shut down the entire world which has come from the consumption of wild animals and you want to now allow their slaughter in South Africa. I can believe the stupidity. Where are you going to export them to? China! Not only that, wildlife in South Africa is our natural treasure. Not to be exploited. All animals are sentient beings. They have feelings. Please, please do not be part of humanity that is destroying God's beautiful creation. We have dominion over animals i.e. as human beings it is our responsibility to protect them.	susan
	2020-04-23 07:40:28	Western Cape		No I do not	As usual the cANCer is playing right into the hands of their Chinese masters .The wild animal consumption is the cause of Covid 19 in the first place ,so carry on slaughter everything and wipe out the world's population maybe the earth needs a cleansing from the morons inhabiting it !	Rusten

	2020-04-23 07:38:47	Western Cape		No I do not		Richard
	2020-04-23 07:38:45	Western Cape		No I do not	The import and export of wild and endangered animals is absolutely not acceptable. Please stop raping our country of its rich heritage for monetary gains. I do not support this at all. Any export of live animals is cruelty.	Karen
	2020-04-23 07:38:42	Western Cape		No I do not	What is about this despicable ANC Government that yet again does not care about the heritage of our country but only about their power albeit it through an infantile and pathetic mentality. 	2020-04-23 07:34:18	Western Cape		No I do not	We need to look after the earth. Covid 19 proofs that we should not slaughter all these animals. They are endangered already. Who are the people who want to kill and eat the animals? Who are the people who approve this behavior? Do they want to wipe out all the different species, including humans who need the earth to live on? Is Covid 19 not an example how the humans are behaving incorrectly? It is time you learn from it.	carola

	2020-04-23 07:33:52	Western Cape		No I do not	The slaughter of wild animals is disgusting. There is no need for it. There is no need for mankind to continue the destruction of nature. In China there are parks with loudspeakers. Coming out the loudspeakers you hear chirp chirp chirp. There are no birds left there, they have all been eaten. There has been mass slaughter of wild animals in Zimbabwe. Does this government really want to be like Zimbabwe. STOP TOTAL DISTRUCTION	Ken
	2020-04-23 07:33:49	Western Cape		No I do not	Instead of focussing on depleting some of our precious animal kingdom our government should rather focus on how to protect it.	Regina
	2020-04-23 07:33:41	Western Cape		No I do not	Our wildlife in SA is threatened by poaching, drought, loss of habitat disease and much more. It is careless and idiotic to pass such a bill as it will have a total negative effect on all our National Parks and Reserves in SA, leading to extinction of certain animal species.	Peter-John
	2020-04-23 07:33:38	Western Cape		No I do not	Please do not amend the bill. It is evil to even consider it. The world and animals has been raped enough! Look at what happened now with Corona virus!	Jacobus
	2020-04-23 07:33:37	Western Cape		No I do not	We don't need to eat so much meat. Humans are selfish and only think of themselves.	Brigitte

	2020-04-23 07:29:22	Western Cape		No I do not	i completely disagree with the consumption of endangered species as there are not many left over in our area in South Africa. God did not create wildlife as these to be eaten. It is not the right thing to do rather protect and conserve for our children and grandchildren. we do not want another virus outbreak and created in our country South Africa. wildlife is exactly that which it is called, wildlife, it belongs in the wild.	Anna

	2020-04-23 07:29:03	Western Cape		No I do not	We do not need to copy the Chinese and eat everything that moves. Unless this all geared toward trading with China. My answer would still be no. For all we know this could cause another type of virus to infect the human population. Besides if this goes through, you can kiss the beautiful wild animals to our country goodbye. They are one of the reasons why foreigners come to our country but what do you want to do? Eat them! And what about the future generations they will probably never see a giraffe, hippo rhino etc. All because they were killed for gain. Stop thinking of your pocket and think of what is right thing to do for a change.	Dina
	2020-04-23 07:28:26	Western Cape		No I do not	What utter idiocy! So now we're going to open the floodgates to our wildlife? The incumbents can't manage the poaching on our coasts and now open the inland areas to the same criminal element? Why not just support the farmers in South Africa? Or promote tourism more effectively as it brings in more than the export of meat? And why wild animals? Is the source of novel Coronavirus forgotten? And Ebola? And SARS ? And HIV? All wild animal meat.	Jan

	2020-04-23 07:28:25	Western Cape		No I do not	The regulation must stipulate firstly that the animals are being sustainably farmed. Secondly their endangered species status should determine if they may be on the list at all. Any threatened species should obviously be excluded. This piece of legislation is not fit for purpose as written. I presume this is to supply the Asian (China) market with the kinds of strange meat they currently procure through organised poaching.	Paul

	2020-04-23 07:25:17	Western Cape		No I do not	This sounds like a Chinese initiated law. They have plundered their own country's wildlife and now they are starting with South Africa. They will not stop until they have ruined our country's wonderful wildlife. I strongly oppose this new law. We are dependent on our wildlife for tourism, now our government officials want to line their pockets with blood money.	Florence

	2020-04-23 07:22:41	Western Cape		No I do not	The world is going mad ?. Seriously people must start to behave. If things go on like eating every animal on this planet the earth will take its revenge on us sooner than later. We need animals for the sustainability of our world not for humans to consume. We have cow sheep and chickens for that. People are so into making money that they just don't care.	Emmarentia
	2020-04-23 07:22:28	Western Cape		No I do not	In the light of the recent and on-going experience with the Covid19 virus, which from all accounts originated in a wet meat market in China, as well as in the interests of conservation, our wild life should be left alone and not be considered for export. As an absolute minimum, the endangered species in South Africa should be removed from the list.	Chris
	2020-04-23 07:21:31	Western Cape		No I do not	I definitely do not approve of the fact that our endangered species of wild life should be included on the list for human consumption. I am concerned that this was even considered by our Government and feel that there may be an influence from another country involved here. So in my opinion I fervently do NOT support this change.	Alietta
	2020-04-23 07:20:57	Western Cape		No I do not	We cannot eat protected species, never mind eating exotic animals caused corona virus. Please amended your list, let's be proud of our animals and not destroy them	Kate

	2020-04-23 07:09:52	Western Cape		No I do not	Baie van die diere op die lys is uniek aan Suid-Afrika. Suid-Afrika is afhanklik van ons inkomste uit toerisme, dit skep baie werksgeleenthede. Indien jy sekere diere gaan laat uitsterf, gaan dit 'n effek he op die toerisme bedryf. Ons kinders het ook die reg om die unieke diere in die natuur te sien en nie net op prentjies of dokumentere programme nie. Sekere diere is nie geskik vir voedsel nie. Suid-Afrika het genoeg land om skape, beeste en hoenders te voorsien as om die diere op die lys te moet gebruik vir voedsel. Natuurlike ekosisteme gaan ontwrig word indien van daardie diere op die lys uit hul habitat verwyder word.	Juanita

	2020-04-23 07:05:02	Western Cape		No I do not	Exporting and eating wild animals is how we got to COVID-19. I don't think we need more cross-contamination of animals and humans. 	2020-04-23 06:45:54	Western Cape		No I do not	This list should not include ANY endangered species, ESPECIALLY not iconic animals like any of South Africa's Big Five. Additionally the addition of the Rhinocerous to this list is suspect. Local populations may not be as endangered as in the rest of Africa, but they are still at risk and allowing this will open floodgates for legal and illegal slaughter to serve primitive superstitions of, for example, the Chinese. Being part of BRICS does not mean bowing down to Chinese and Russian interests.	Nikolaos

	2020-04-23 06:43:50	Western Cape		No I do not	I think even considering slaughtering wild animals is so short-sighted end shows me the minister is completely disconnected from life and the world around him. Maybe he just wants to fill his pockets. Not only are wildlife our national treasures but they also bring business to our economy which now is especially fragile. I can tell you this. I worked in the news in New York City for 20 years and I will do whatever it takes to have stories written about this if this decision goes through. Americans and Canadians, people in Europe in general, are very sensitive to the well-being of wild animals in Africa and abroad. This is an animal holocaust. And during this time of a Covid-19, where we are given a chance to step back and take stock of all the horrible things we do to the earth, well it's just damn insulting and tells me that Africa will never move forward with this kind of thinking but would rather drown in its stupidity. Why wouldn't he rather be seen as a proponent and champion of these animals, rather then a murderer?	Lana

	2020-04-23 06:43:19	Western Cape		No I do not	Leave animals alone - they too are sentient beings which feel love and fear. Just because they cannot speak our language does not mean they have no feelings. Instinct - after all - is a feeling. Neither do we have teeth like cats or wolves - which are neat eating. We have teeth like cattle and deer - grass eating. Finally - all animals are slaughtered with the energy of FEAR and we then eat that energy and wonder why things are so screwed up or we feel violent/ fear/ etc. EVERYthing is energy!!!!	Jennifer

	2020-04-23 06:42:04	Western Cape		No I do not	The list provided includes animals that are not native to South Africa. How can we legislate about the ie. American Bison? If this becomes law it will be legal to kill and sell animals that are presently in danger of being extinct and open the door for legal poaching as many of these animals are only found in game parks. Do we really want meat markets similar to what is seen in China and other countries?	Chris

	2020-04-23 06:41:29	Western Cape		No I do not	We are fighting to preserve so many species from going extinct and some ruthless people have the audacity to want to put them on the menu!!! I'm furious and those who attributed to this even being on the bill should be removed from their positions with immediate effect! Factory farming is bad enough, farming domestic animals results in horrific cruelty, in farms, in transport and in slaughter houses. Meat eating is totally unnecessary and wasteful and environmentally damaging. Why bring wild animals into this now...for totally imoral profit. Wild animals have had enough if their land stolen from them as it is. Now they must be slaves, bred to be eaten? Its a complete contradiction of a human duty to take care of the environment.	Karen

	2020-04-23 06:14:28	Western Cape		No I do not	No endanger species should be extended to a list of meat for human consumption . All endangered species need to be protected and conserved for the generations to come. Exotic meats need to be banned for human consumption - there are very good health reasons why humans should not be consuming certain types of creatures. Pandemics that have apparently arisen from the consumption of exotic species have impacted the world extremely negatively.	David

	2020-04-23 05:41:06	Western Cape		No I do not	Thank you for the opportunity to comment. Although the slaughter and export of some indigenous species might stimulate breeding and ultimately increase their numbers, there does not seem to be any research or empirical data to determine how many numbers of each species. Some species are not even found in South Africa..!! Some are red data species and when one sees rhino, donkey, horse, porcupine and pretty much anything else that moves on a "blanket list", it is pretty obvious it is a nothing more than a cut and paste of the import species list of this government's Chinese masters. It would come as no surprise some comrades with eastern connections are behind this.	Leon F
	2020-04-23 05:40:46	Western Cape		No I do not	The slaughter of animals for human consumption is bad enough as it is. To include endangered species will be nothing short of barbaric! I am not vegetarian or vegan but the toll on wild animals as it stands is bad enough.	Roelof

	2020-04-23 05:34:55	Western Cape		No I do not	STOP IT. Have you learnt nothing? That instead of increasing the list we need to decrease the unwanted children or the procreation of kids by uplifting the woman so they do not procreate when they cannot afford themselves !!! Plus if this corona virus teach us not, but that the viruses from animal to human are increasing? So why talk about killing more and more animals because human beings know no limit . Wrong , wrong and wrong . Fix our problems instead of creating more !!!	Janap

	2020-04-23 05:24:13	Western Cape		No I do not	Not a very well thought out change. This list includes many endangered animals. It seems the minister/government does not care for our heritage. If this amendment gets accepted it will be a disaster and many animals will be pushed to extinction.	Joan

	2020-04-23 05:23:17	Western Cape		No I do not	We can see the devastation the world is in from human loss to financial loss because China was importing and eating Africa's wildlife. It should be unthinkable that any government should even be considering allowing the slaughter of our precious animals. Many try to do this daily as citizens, so why is the government working against us? We are responsible for our home, and only by working with nature will we ensure that the biodiversity still exists to sustain our country and planet. Put more effort into controlling the human population, and stop destroying everything for profit. One day we'll learn that we can't eat money.	Dane

	2020-04-21 19:11:45	Western Cape		No I do not	There are many valid reasons for opposing this bill. 1. The wildlife of Africa is our heritage and belongs not to us, but to our children and grandchildren. So little remains of our once great landscapes filled with a diversity of free and beautiful animals. We need to protect and preserve this legacy at all costs. 2. The list of diseases caused by the enslavement of animals is long and ghastly. God has decreed that their suffering will be our suffering. When we cause them to suffer and live unnatural lives, we and our children will suffer too. Covid-19 is just one example of this principle in action. 3. Our status in the eyes of the global community is already compromised. Let us not behave like callous fools with no morals. Let us rather be a nation that sets a positive and good example to the rest of the world. Let us be proud to be South African once again. 4. When we disrespect and abuse animals, we set the moral tone for our children to follow. It has been said that you can judge a nation by the way they treat their animals. Instead of raising generations of thugs who see violence and abuse as normal, let us raise children who are compassionate and kind. A child who is encouraged to abuse animals and who sees violence as normal will grow up to be an adult who is violent towards both humans and animals. 5. We are a hard working and creative nation. We can rebuild a strong economy and create jobs for all in positive, life affirming ways that will set an example for all the world to follow. To make torture, suffering and bloodshed the cornerstone of our economy will not turn out well for us in the long run. 6. Let us not become puppets of the Chinese government at the expense of our land, our wildlife and our people. There is a better way forward.	Louise

	2020-04-21 17:29:22	Western Cape		No I do not	Dear Minister, Please refrain from this proposed update, I implore you. Have we learnt nothing from the Covid-19 outbreak? The world at the moment is experiencing a global pandemic initiated by the consumption of wild animals. The signs are clear: we need to move away from eating animal meat, and not towards it. Animals are not meant to be exploited or bred in captivity, many of which are often kept in very cruel conditions, for human consumption. Our wildlife needs to be protected, not eaten. This act could be a public health and ecological disaster. We as South Africans cannot preach conservation on one hand, animal welfare and promoting tourism to see these beautiful animals in their natural environment and at the same time approve their consumption purely for economic gain. Please reconsider this, and move our country towards a kinder, more sustainable future.	Lauren

	2020-04-17 11:38:04	Western Cape		No I do not	This bill raises serious sanitary and environmental concerns. Indeed, several life-threatening infectious diseases, including COVID-19, have been linked to the trade and consumption of wild animals, and Africa's wildlife is already under threat due to excessive hunting, poaching, illegal trading and habitat destruction. Please let 's not compound the already-existing problems.	Fanny

	2020-04-17 10:18:22	Western Cape		No I do not	The reality is that wild animals are not farm animals and should not be listed as such to become subject to the abuse suffered by current farm animals albeit legal. This is poorly thought through as wild animals already pay their own way in terms of hunting and as tourist attractions in game parks. I hereby request that do not add wild animals to the farm animal list unless of course you are aligning yourself with and your masters are the China Communist Party.	Dave
	2020-04-17 08:57:07	Western Cape		No I do not	Surely we do not need more meat - it has been proven scientifically in many studies and the WHO has recommended that meat consumption be cut drastically or eliminated in favor of a plant based diet. Animal Agriculture of any kind is responsible for 51% of all greenhouse gas emissions - more so than ALL fossil fuel transport including cars, planes, taxis, trains, ships, trucks. This is an enormous step backwards and shows distressing ignorance on the negative impact of a meat diet on human health.	Marda

	2020-04-16 23:15:40	Western Cape		No I do not	In 2015, the World Health Organization (WHO) published a list of top emerging diseases that were “likely to cause severe outbreaks in the near future.” It’s no coincidence that all the diseases on the list are zoonotic diseases caused by RNA viruses, which turn animals—mostly wild ones—into reservoirs to hide in. Bushmeat in Africa has been shown to be the source of scourges such as HIV and Ebola. The 2014 Ebola outbreak lasted two years and infected 28,000 people and killed more than 11,000. Africa should take a stand and for once lead by example. Protect our wildlife - Protect Africans and start leading by example.	Lana

	2020-04-16 20:58:41	Western Cape		No I do not	The real intention behind this amendment is for ‘game’ farmers to enter the export market. 	2020-04-16 09:15:08	Western Cape		No I do not	South Africa is turning towards laws that fully allows the economic exploitation of wildlife, in contradiction to our Animal Protection Act. The intention is to market the use of endangered species in order to produce cheap meat. The current corona virus crisis is evidence this can be a public health, economic and ecological disaster. Despite the pandemic, and despite the causes of this zoonosis, South Africa is preparing to expand and intensify captive breeding of wild species and sell their meat in the food markets. This is an alarming turning point in the nation's immense biological heritage management policies. There is a massive ethical and moral concern when governance choose profits over safety and protection of the country's natural resources and inhabitants.	Ronel

There a billions of people in this world who genuinely care about all wild life and are working extremely hard for their survival, yet YOU MS DIDIZI wish to destroy the very essence of the wild animals well being. 	2020-04-15 15:53:13	Western Cape		No I do not	Animals are sentient beings and this was confirmed in the Con Court. To commodify them to the point that this Bill proposes will ensure utmost cruelty in the process. Already in place by inhumane industrialized farming practices. 	2020-04-15 12:12:56	Western Cape		No I do not	I am opposed to creating a country in which any wild animal including our most cherished heritage animals worthy of our respect and protection are being turned into nothing more than farm commodities to be bred en masse, slaughtered and eaten. This does nothing for our status as a cultured country who cares about our heritage, our animals of national importance, of sentience of animals and of humanity and the manner in which we conduct ourselves as custodians of South Africa, and consumers. We are turning SA into nothing more than a mass producing meat machine; being bought out by the Middle East in extreme and obscene live exportation deals that smack of another Corona virus waiting to happen. We must protect the sanctity of our wild animals, and not farm them to eat them. We have Corona-virus implications to be considered here too with regards to the production and transportation to slaughter of these animals. I object on every possible ground to this proposition - we are playing with fire and are going to get badly burned.	Karen
	2020-04-15 11:58:09	Western Cape		No I do not	This is primitive and barbaric. We are not savages. Please look to what developed countries are doing with regards to animal life and wildlife. 	2020-06-03 17:13:17	Western Cape		No I do not	South Africa needs to get with the times. Developed countries are realising the dangers of meat production and the movement to Plant based diets is happening fast. Meat production harms the environment and was the cause of the COVID-19 pandemic. There is no difference between a Cow, Elephant, Dog, Horse and anything else on the list. They all have the right to life. The water usage to raise meat is unsustainable and we could easily provide cheap and healthy fruit and veggies to the nation, especially the hungry. We should be moving to reduce our meat production not expand it. And on an ethical level. Thinking you have dominion over animals is the same thinking that whites had during apartheid. They held a belief that Black South Africans were less than them and so had the right to do with them as they please. This is the same thinking that Humans think for Animals. We oppress them, we slaughter them for rituals, we cause them harm and pain. We steal their babies. As a country born from oppression, we should look to always stop oppression of any kind. This includes the living sentient and feeling animals we kill for food. Any people that have been oppressed should feel the pain of our animals and seek to end it, otherwise you are no better than your oppressors. We will only become a more civilised society when we recognise the ills that slaughtering animals causes and move away from eating meat.	David

	2020-06-03 15:16:58	Western Cape		No I do not	Please note that the laws are not clear enough and leave too many grey areas. Government cannot enforce existing legislation designed to protect biodiversity and human public health and this leaves too much to change and is closely aligned with the fact that these latest proposed amendments to the Meat Safety Act suggest the intention to stretch South Africa's wildlife laws to include the large-scale farming of wild animal species specifically for consumptive purposes. This is where the comparison to China's journey with wildlife farming becomes highly relevant. *https://www.farmingportal.co.za/index.php/agri-index/84-wild-life/4359-farming-wild-animals-is-china-the-model-for-south-africa	Sarah
	2020-06-03 12:40:38	Western Cape		No I do not	This is unacceptable on so many levels. It is downright regressive! Please, please can South Africa give expression to its progressive foundations and show leadership, forward-thinking and compassion.	tracy

	2020-06-03 05:40:11	Western Cape		No I do not	It goes against South Africa proud tradition to protect wildlife. It is irrational and thuth to deem a wildlife animal a farm animal After all the life and economical destruction of Covid19 it mindblowing to crest a law that will potentially increase the risk of zoonotic transmissions. It is inhumane and cruel to treat wildlife like this	Cecilia
	2020-06-02 22:15:27	Western Cape		No I do not	There are many animals on this new list that carry disease which is not always detectable. Frankly it is just irresponsible to believe that anything that moves can be eaten. This is exactly why the Coronavius started along with HIV. I sincerely doubt the minister will give any consideration to science, because the scope in this list is simply testimony to utter stupidity.	Lucia
	2020-06-02 21:15:35	Western Cape		No I do not	Firstly, we South Africans have no right at all to change wild life animal status to be farmed for slaughter or to be eaten. Secondly, the diseases that will inevitably let loose from eating wild meat that is no longer wild, but kept as agricultural livestock will endanger the lives of humans. I strongly disagree with this suggested amendment.	Ann

We have enough of commercially produced meat. I pray that the law and the people making laws will not be greedy. 	2020-05-20 13:24:59	Western Cape		No I do not	I think it is horrifying how the suggestion of eating animals not intended for human consumption, are being considered as food ... especially so as many of these animals are near extinction and because it is this very act that has caused COVID-19 and the deaths of over three hundred thousand people worldwide to date, with more deaths to come. All of these weird viruses such as SARS and now COVID have come from China and they are the ones who eat all of the animals no other nationality does . By legalizing the human consumption of these animals, to me it seems you are signing a death row agreement on the population ... rather than doing any one any good.	Bronwyn

	2020-05-18 15:21:32	Western Cape		No I do not	This is yet another profit-driven, ad-hoc legislative amendment that is set to have detrimental long-term consequences. You do NOT have my support in attempting to pass this.	Nicholas
	2020-05-18 11:11:32	Western Cape		No I do not	No endangered species should be on this list. They should be protected and not put on a consumption list! It is in total contradiction to their endangered status!	Mari-Louise
	2020-05-17 19:40:05	Western Cape		No I do not	There are endangered animals on that list. So much money and time is spent on stopping poachers from killing our precious wild life and this policy is legalizing the slaughtering of these beautiful creatures. If this policy passes, our few remaining Rhinos will be gone and Rhinos will be extinct. DO NOT IMPLEMENT THIS POLICY PLEASE for the sake of our indigenous wildlife.	Martha
	2020-05-17 19:36:33	Western Cape		No I do not	With all due respect, in a time of Corona virus, and the huge spotlight that has been shone on the diseases that wildlife meat - and meat markets - carry with them, it seems absolutely absurd to extend our list any longer than it already is. Furthermore, I believe that extending the list only invites more poaching and illegal activity surrounding "wild meat". Who is going to 'monitor' this? Or will nobody care, much like what is already going on with animal cruelty in ALL abbatoirs/ slaughyerhouses. While not illegal, canned lion hunting is an absolute atrocity taking place on our very soil. It's sacrilege. And don't get me started on how we are losing the battle in protecting our critically endangered rhinos. Why would we ever want to extend the wild animals list to invite more of the same, or worse, create farms to breed these majestic animals? This new act disheartens me as a South African. It is both depressing, and disappointing that our country is even considering extending the list.	Saskia

	2020-05-17 05:58:32	Western Cape		No I do not	What is wrong with the people making this list... You might as well add humans onto the list. Some of the animals are endangered. Who precisely is going to eat a f&: %ING giraffe or rhino... The list is opening a way for any animal to be slaughtered and eaten. This list needs to be done over and not by some person who clearly has a exotic meat fetish. Animal rights should have a definite influence on the eat - able animal.	Charmaine
	2020-05-16 22:11:47	Western Cape		No I do not	Endangered and threatened species should not be on a list for slaughter or to be consumed by humans at all. They should be protected.	Charmaine
	2020-05-16 16:51:50	Western Cape		No I do not	Many of these animals are on the endangered list and under constant threat from hunters, exporters of body parts and the despicable practice of selling the babies to zoos. Particularly elephants, rhinoceros and giraffes. The "Canned Lion Industry" certainly does not inspire any hope that any animals will be well treated.	Jennifer

	2020-05-16 15:35:53	Western Cape		No I do not	We need to treat our animals with the respect they deserve. We are all one. Animals have the right to life. Not just as profit for the rich. 	2020-05-14 06:41:26	Western Cape		No I do not	SA should be excluding the export and usage of exotic wild animal meat from the world diners plates. We are already doing enough damage to the earth's fine balance.	Christine

	2020-05-13 16:13:05	Western Cape		No I do not	The proposal to expand the list of animals that may be slaughtered cannot be supported in light of the tremendous increase in black market slaughtering and sale of animal parts, including rhino horns and elephant tusks. The mere proposal to include these animals, which are protected animals, in the list despite the horrific slaughter of rhinos the past few years, seems to be in bad faith. Including these animals in the list can lead to their extinction in South Africa. I propose that the suggested amendments be scrapped or redone, excluding rhinos and elephants and giraffes. The timing of including these animals for slaughter, consumption, sale and export, cannot be rationally justified, unless the government is expecting increased poverty necessitating the slaughter of theses animals to save human lives. Even if so, the sale and export of the meat of the animals cannot be justified in a country seemingly supporting nature conservation.	Maarten
	2020-05-13 16:04:50	Western Cape		No I do not	If passed, this amendment will lead to a depletion of our natural fauna, simply for money. It will undo all the good work done by conservation agencies. It is totally unnecessary and unjust.	R
	2020-05-13 15:52:46	Western Cape		No I do not	What are you trying to achieve? Should we not rather list these wild animals as national treasures. We have enough meat in the form of domesticated animals like beef & chicken	Shaun

	2020-05-12 21:54:31	Western Cape		No I do not	While this act makes it easier for some people to access meat, I don't believe this is a solution. 	2020-05-12 14:06:15	Western Cape		No I do not	Half of the new list includes animals not from SA. This means introducing alien species increases potential for invasion into the natural environment. Some of the included native game cannot be farmed in any ethical logical way as there home ranges may be too large or the densities or sizes may be extremely small. Endangered animals will be easier to exploit and misuse if this amendment is passed.	Peter

	2020-05-12 11:35:05	Western Cape		No I do not	Firstly, I do not support making our wildlife heritage available for consumption. There is enough pressure as it is on the preservation and conservation of our natural heritage. Secondly, allowing this will put even more pressure on the conservation of our wildlife as it will encourage poaching.	Margarethe
	2020-05-12 11:15:30	Western Cape		No I do not	This is the maddest idea ever and wil result in the extinction of these animals within two years maximum. That will totally demolish our safari tourism, more than that it will result in full decimation andvdesertification of our wilderness areas which are ourcwster catchment areas and extinction of humans within 15 years. This is China at work in destroying our country. We need a governmengveith intellect.	Judy
	2020-05-12 10:40:42	Western Cape		No I do not	This is preposterous. The current problem is obviously not related to a food supply issue, but a matter of allowing citizens to earn money to buy food. South Africans should be allowed to earn an income for themselves and tot be forced into a situation where arbitrary, draconian laws are passed under the cover of "disaster prevention" that force them to rely on charity. As it happens, charity has apparently been monopolised by the ANC as well, with NGO's, churches, and individuals forced to submit food parcels to a central service, plagued by corruption and misadministration. Furthermore, allowing the slaughter of endangered animals, like the rhinoceros, is absurd. What happened to conservation of these critically vulnerable species? The situation WILL BE abused by persons looking to make money off exotic animal products that may be legally slaughtered. This will NOT help to feed the nation - It will will impoverish us further and line the pocket of black market organisations to whom we have rolled out the red carpet. Our current theory is that COVID-19 originated from an abattoir where exotic animals are kept under poor hygiene standards. Do the glaring hazards of the backyard butchering of exotic animals really need to be explained further? I strongly appose this madness.	Pieter-Paul

	2020-05-12 10:31:17	Western Cape		No I do not	DEFINATE NO. Picture this country with a loss of support in tourism from the rest of the world because we ate our precious wildlife. A VERY strong possibility of another outbreak of some devastating disease from eating bushmeat. Think Ebola linked to eating monkeys if Corona doesn't work. We do not need to eat everything that has a pulse. Let try to EVOLVE from that thinking please !!!!	CLAIRE
	2020-05-12 10:27:59	Western Cape		No I do not	You people are fucking idots! 	2020-05-12 10:11:40	Western Cape		No I do not	This is an amendment which will only allow for the further exploitation and disrespect of wild animals which we should be protecting. Lion farming is already clearly a badly managed industry, so increasing the number of our wildlife which can be mistreated will not be beneficial to conservation in any way. Conservation efforts must respect the animals they seek to conserve. This is nothing but an excuse to further endanger our wildlife and should not be allowed.	Enya
	2020-05-12 09:13:31	Western Cape		No I do not	It is absolutely senseless and unnecessary - some of these animals are already nearly extinct, and animal cruelty will skyrocket as there is no way to regulate or monitor this type of system. I also cannot imagine that any decent human would want to actually eat these animals. I can only imagine this is government's attempt at procuring cheap meat for the masses living in poverty - in which case they should consider a more sustainable and much less cruel approach: Resigning en masse and allowing competent people with integrity to take over (not only the animals will be grateful).	Andrea
	2020-05-12 09:04:29	Western Cape		No I do not	Don't believe much comment is necessary. 	2020-05-10 18:05:28	Western Cape		No I do not	Given the direction the World Health Organization is taking in trying to limit or even ban the consumption of wild animals, this amendment is completely counter to current thinking and will only provide a legal basis for the consumption of endangered species and animals that may not be afforded adequate protection. The consumption of these species should be HIGHLY regulated, with a permit for consumption having to be sought for special local cultural traditions - not for Asian dinner menus! The consumption of trophy animals should be localised with no meat exported. This would limit the possibility if loop holes for hunting certain species.	Gregg

	2020-05-10 15:36:01	Western Cape		No I do not	I do not support the slaughter of more animal species for consumption because our wildlife is already dwindling rapidly - on top of being a slow suicide for future tourism, we have seen how viruses can jump from animals to humans, so why create more risk?	Bernadette
	2020-05-10 14:30:14	Western Cape		No I do not	Our Wild Life is under direct threat !!! NO NO NO - we CANNOT allow our wild life be part of the "average" meal or market produce. WE must PROTECT our open spaces and the animals that live on them !!!!	Peter
	2020-05-10 14:17:32	Western Cape		No I do not	Why are endangered animal species being added to an act allowing for slaughter, consumption, import and export? This Act should NOT be allowed to go through with the inclusion of endangered animals, rhino, elephant, giraffe and more. We are risking the wellbeing and sustainability of our national natural environment.	Michelle
	2020-05-10 13:09:22	Western Cape		No I do not	I do not want more wild animals on the list of acceptable meats. Firstly, many of the animals on the extended list are endangered. Secondly, many of the recent hectic viruses - like COVID-19 - have started with a transferral of a novel virus from a slaughtered wild animal, at a meat market, to humans. We cannot afford for that to happen again.	Garth
	2020-05-10 12:07:15	Western Cape		No I do not	We must protect our wildlife! This draft amendment is absolutely outrageous! Elephant, Rhino, hippo and many others should always be protected and banned from slaughter and sale.	Robin

We need to have more bills protecting our sacred wildlife and especially endangered species. This will further encourage and legitimise the illegal trade in Rhino for example. This cannot happen.	lance
	2020-05-10 11:25:58	Western Cape		No I do not	Including endangered and wild animals as well as birds/ reptiles on this list not only ensures the extinction of many species but also increase the risk of animal related infections. 	2020-05-09 19:20:36	Western Cape		No I do not	Why would it even cross your minds to include our beautiful and already endangered species on this list. 	2020-05-09 13:41:10	Western Cape		No I do not	By creating legislation that legitimises the supply of exotic animal products to other countries, South Africa as a nation is making a broader statement about our wildlife, that anything is for sale if the price is right. This is totally unacceptable. The sale of wildlife for consumption is a stepping stone to eradicating these endangered populations and destroying the biodiversity of our country. We have also learnt a valuable lesson about what happens when humans consume what they shouldn't and encroach on wildlife examples being the coronavirus and various zoonotic disease pandemics which have directly been caused by the consumption of exotic animals. 	2020-05-09 11:44:01	Western Cape		No I do not	Only sustainably farmed and health screened animals (domestic and “wild”) should be slaughtered for meat consumption. Additionally, allowing meat from unknown sources would further compromise endangered species as it encourages poaching.	Mary

	2020-05-09 10:06:07	Western Cape		No I do not	Unacceptable to add any of these species to the list of meat allowed to be consumed. These species are already under threat due to ridiculous believes that they have healing abilities etc. This will open to more poaching and we do not have that under control as it stands. There is enough farmed meat to be used and venison, that does not form part of threatened species. Common sense says NO!!!!!!!!!!	Lizelle

	2020-05-09 09:34:49	Western Cape		No I do not	WHY WHY WHY??? This is heartbreaking!!! Must be some sort of sick joke. This is so shocking! I do not support this at all! We have so many endangered species, we are trying to protect the animals left in our country, we are trying to save them and create spaces where the population can grow. There are so few of some of these animals left, what will there be to export? Why not raise funds or receive investments for protection of endangered species? If this passes, I have definitely lost hope in our government. So so shocking. Please revise this and start to think straight.	Laika

	2020-05-08 22:30:04	Western Cape		No I do not	With the Carona virus reported to be caused by eating wild animals & the Chinese government banning this practice it will be a disaster for South Africa to implement this list of animals which includes threatened species. The international reaction will also threaten our status as the leading wild animal conservation nation in the world, a reputation we are already losing to Kenya because of South Africa permitting canned lion hunting & the lion bone trade	Denley
	2020-05-08 21:03:15	Western Cape		No I do not	Legalising endangered species is just going to make protecting them that much harder. This is just another form of corruption, the funds from these sales will just end up on the pockets of currupt politicians	Michael
	2020-05-08 20:40:03	Western Cape		No I do not	Dear Sirs, Please, please reconsider this and remove all our threatened wildlife species from this list. Our world is in such a fragile state and allowing the legal slaughter of animals such as rhino, elephant, giraffe and others we would be damaging the balance of nature as well as destroying our very important tourist industry already so damaged by Covid 19. Diana Droomer	Diana
	2020-05-08 20:10:12	Western Cape		No I do not	Our wildlife should be protected, so many on their way to distinction, and farmed wildlife (and other animals) generally live in abhorrent conditions and there is absolutely nothing being done by the government to protect these animals (e.g. the absolutely inhumane way those thousands of live sheep were/are shipped). Government just want to line their own pockets. PLEASE safe guard our wildlife treasures	Linda
	2020-05-08 19:46:09	Western Cape		No I do not	What an absolute shame! The heritage of Africa is being sold to people who completely disregard the fact that many of our species are being decimated. 	2020-05-08 19:26:19	Western Cape		No I do not	Our wildlife and wild spaces are an incredibly valuable asset to this country, to our environment, our climate and for our own wellbeing - they are all part of wild ecosystems that keep our environment and climate healthy. It's becoming clear that environmental destruction at the hands of humans is having catastrophic effects on the whole system (climate, environment and humans alike). Our laws should be focussed on the protection of wild animals and spaces, or better yet, focusing on making sure they are disturbed and intruded upon as little as possible by humans. We have enough. We need to stop taking taking taking, plundering, killing, consuming. Enough is enough.	Erin

	2020-05-08 15:36:22	Western Cape		No I do not	This schedule includes animals that may be listed as threatened species. To add them to a list where it will be permitted to slaughter them for human and animal consumption makes no sense. Threatened species need to be protected and conserved. This will do the exact opposite, as endangered species will be even more at risk.	Candice

Covid 19 comes out of the trade, SARS did and so did MERS. Do you want more of these viruses circulating. We are tired of mismanagement of our wildlife. Support the anti poaching efforts rather than making up new channels for criminals. Rhino is highly endangered and extinct in some parts of Africa.	Angie

On the one hand, millions are spent to protect these animals, yet now government adds them to this list? Duh! And can somebody please explain why we need to have all those exotic animals that have never even been SEEN in South Africa, should be on this list? What's the agenda behind this? We have farmers and registered hunters who, IF - IF they received proper support from government, would be able to provide all the (healthy) meat we need in South Africa.	Marina

Rhinos and elephants are already slaughtered for their tusks, lions poisont and killed for muti purposes, what evil do you still want to go to to murder innocent animals that is a tourist attraction. Those in countries like China who wants to eat all kinds perverse animals, must raise them in their own countries. Certain animals also carry viruses and look where we are globally and with so many people that have lost their lives. As SAs we should do everything in our power to safeguard our endangered species that is also a tourist attraction and also serves as good excursions for our children. No no no to this amemdment. Does government not think of the consequences of this action. ? Do you want to mix in what God has created ? . Were we not given animals that we can consume ? 	2020-05-07 19:52:06	Western Cape		No I do not	I'm completely again any increase on the list of approved wild animals allowed to be eaten. Never ever should the killing, consumption or trade of endangered animals be allowed. We are the care takers of this world and if drastic action to save a number of species is not taken and vigorously enforced- it will be South Africans fault that some species are wiped from the earth. We are currently going through a pandemic because of a zoonotic disease (from eating animals). It's commonly believed that the corona virus came from somebody eating bat. Ebola - came from 'bush meats' in Middle Africa. AIDS came from people eating chimpanzees in Congo. https://www.cdc.gov/onehealth/basics/zoonotic-diseases.html "..... animals can sometimes carry harmful germs that can spread to people and cause illness – these are known as zoonotic diseases or zoonoses. Zoonotic diseases are caused by harmful germs like viruses, bacterial, parasites, and fungi. These germs can cause many different types of illnesses in people and animals, ranging from mild to serious illness and even death. Animals can sometimes appear healthy even when they are carrying germs that can make people sick, depending on the zoonotic disease. Zoonotic diseases are very common, both in the United States and around the world. Scientists estimate that more than 6 out of every 10 known infectious diseases in people can be spread from animals, and 3 out of every 4 new or emerging infectious diseases in people come from animals. Because of this, CDC works 24/7 to protect people from zoonotic diseases in the United States and around the world."	Yolanda

					The issue of food safety through increasing access to animal meat is not going to be a long term sustainable option for our country. The resources used to grow crops used to feed industrially farmed animals is already a resource drain. Legalising the trade of these protected animals listed on this list will likely lead to either formal industrial and regulated growth and slaughter of these animals or illegal unprotected raising of these animals. The concern for these wild animals safety in both formal and illegal farming practices is of great concern. The risk of zoonotic virus spread is of course at these times a critical consideration to take into account, given the mass economic destruction and knock societal effects our country is witnessing due to the current COVID-19 pandemic which has emerged from animal raising practices of previously wild and endangered species. Secondly, the issue that is trying to be solved through making these animals legal hunted, grown, raised and/or slaughtered is one of human food secutirty and access to reliable safe nutrition - unless there are more pure economic motivations behind this act. On the notion that animal meat is going to solve our food security issues on a mass scale in South Africa is not evidence based. The amount of existing literature that significantly links the consumption of animal protein to cardiovascular disease especially and other non-communicable chronic diseases is scientifically and ethically unavoidable. If you would like reference to some of these studies: I list below for view. I would urge that if this act is progressed, that notable medical consultation is made with professionals in the fields of medicine, nutrition and lifestyle diseases as well as epidemiology, a review of existing data is accumulated and presented in conjunction with the release of this act, so as to adequately show South Africans that there are risks involved with increased animal protein consumption that government is willing to acknowledge and presumably accept for their citizens. For instance a 2020 review of existing literature including 7786 participants over 13 years of data collection found an increased risk of mortality from cardiovascular disease to be 9% in highest meat consumers versus lowest meat consumers. (reference 7) The WHO has also classified processed red meat class 1 carcinogen, meaning there is strong evidence to support carcinogenicity and red meat to be a class 2A carcinogen meaning it probably causes cancer. (reference 10). The Animals listed on this list will very likely either be processed or are considered red meat. Bird meat from animals listed are also likely to convey similar health effects to poultry, which has now also been associated with poor health outcomes in large scale epidemiological studies available to date. (reference 11) I urge that confirmation of this act pends on complete review of existing literature as mentioned above by a third party non-financially biased or incentivised group, possibly including internationals. Consideration of public health safety ought to be a major factor influencing policy acceptance or rejection and I implore the leaders in relation to this project to employ evidence based approaches in order to scrutinise this decision. Other countries then, with thier skilled labour, process these raw resources into jewellery and other things and then sell it back to our country for triple the price. Therefore, we stand at a loss every time. Why now should we include our precious and endangered species? Even if it is for countries like China and other countries, it is not for our benefit! 	2020-05-07 11:03:25	Western Cape		No I do not	Taking into consideration the lack of effective enforcement of laws regarding the illegal trade of Rhino horn, abalone, and crayfish to name a few, I feel that this is a bad decision as it could / will open up new avenues for the trafficking of illegally obtained animal materials. I feel the cost of poaching on our economy is grossly underestimated and the loss of possible tax revenue from said activities is astronomical. Before the trade in such animal parts can be legalized, control of our wildlife and protection from poaching must be prioritized and deemed to be under control. Smaller antelope species listed are also often overlooked as vulnerable species and I if it was decided the trade in such meat should be legalized, I fear the proper scientific channels were not followed or there outcomes were not considered with enough seriousness. I understand the economic decision to trade (tax gained from a legal rhino horn / ivory export would be significant) in these animals but it cannot and must not be allowed to go forward until the government can enforce and completely minimize the impacts of poaching of said animals. I also fear the legalization would decrease the overseas price obtained, making it accessible to more people and therefore increasing the demand, thereby incentivising poachers.	Devin

	2020-05-07 09:17:39	Western Cape		No I do not	With wild life already endangered species being ruthlessly targeted for ill gotten gains you are going to increase the crime and drive away tourism ! The crime dies not bring money to SA but tourism does! What kind of politician are you? Looking at personal gain?	Caro
	2020-05-07 09:12:13	Western Cape		No I do not	No threatened animal species including mammals, reptiles, birds or fish should be slaughtered for consumption, import, export and sale in South Africa to ensure the survival of all these species and the conservation of these species as well as our natural eco systems.	Natalie
	2020-05-07 09:01:13	Western Cape		No I do not	Is there no end to the plunder by the ruling government of natural resources? Our wildlife is one of the most sacred treasures that this country is blessed with and must be protected at all cost. Our wildlife parks create massive amounts of revenue for the country with all of the knock on effects because tourists spend money on route making use of airlines, hired cars, visiting other venue sites and shops. So if you kill the “golden goose”, you kill the whole country. A vast number of hospitality jobs will be lost through this action.	Lilian

	2020-05-07 08:02:05	Western Cape		No I do not	In the midst of the worst global pandemic in 100 years we have seen how the consumption of wildlife has impacted us as people and the world as a whole. This is absurd and against the global movement of seeking to end the trade in bushmeat for human consumption. South Africa has been a light in conservation throughout our troubled history, and this attempt to push grotesque legislation quietly through is an indication of the exact greed, we as humans, are trying to rid ourselves of. No, no and no again on all accounts!	Greg

	2020-05-06 22:52:33	Western Cape		No I do not	I honestly do not understand how this could even be put to paper that you would even think of adding endangered animal species to this list. This is totally and utterly unacceptable. So one day, when our children are big enough to go to a game reserve and we have to tell them there is only 4 of the Big 5 left as the government decided to legalise human consumption of Rhino. The minds boggles at the total absurdity of something like this. It's times like this when I honestly wish I was not a South African as I can only hold my head in shame and disappointment that something like this would even be thought of. Endangered or threatened species must be excluded. Legalizing a trade on these animals will escalate their extinction.	Allan
	2020-05-06 22:18:40	Western Cape		No I do not	These are animals that are already on the endangered list and IT IS ABOMINABLE FOR IT TO EVEN BE THOUGHT OF LET ALONE CONSIDERED. These animals are NOT ment for human consumption and this type of irrational behaviour will wipe out these animals entirely. We have a responsibility to protect the earth and all animals This is totally irresponsible and heartless. Millions have been spent to try and protect them from poachers. To think that to legalise it will stop the poachers is illogical. It will just continue plus you want to legalise. These animals will be wiped out in such a short space of time. What do you hope to achieve by such an act? Money, power, greed. This human behaviour is despicable.	Claire

	2020-05-06 15:40:11	Western Cape		No I do not	This extended list of wild animals that can be slaughter cannot be for real ! How can animals like rhino or elephants, giraffe, porcupines, etc be on this list? Does this means the selling of elephant teeth, or rhino horns etc are then legalise as well ? There is no sensible reason why this list is extended to include animals like these., unless it is money in a few specific persons pockets. There are way more funding to be generated by the tourists industry than any funds coming from slaughtering these animals.	Dirk

	2020-05-06 14:48:41	Western Cape		No I do not	In a time when it is uncertain whether or not the consumption of wild animals might be one of the causes of the covid-19 pandemic, this policy makes absolutely no sense. It also sends the message to the South African public that the government does not care about our country (our natural heritage) and is only concerned with making money, even at the expense of what makes our country unique and beautiful. This policy smacks of exploitation, greed and contempt.	Kurt
	2020-05-06 14:43:04	Western Cape		No I do not	Tourism plays a crucial role in the livelihood of many South Africans. 	2020-05-06 14:36:46	Western Cape		No I do not	I absolutely do not support this. I think South Africa's blatant disregard for all matters pertaining to the environment is incredibly unsettling. Our governments lack of stance on wildlife, nature etc shows the clear lack of empathy and compassion in the upper tier of leadership. These animals play a crucial role in eco tourism within the country and attract masses of foreign visitors each year. No one is going to support a country that eats endangered animals when they can pop over to Namibia and Botswana instead! What agenda are you pushing??? 	2020-05-06 14:29:04	Western Cape		No I do not	The Natural Heritage, Wildlife and Ecosystems of South Africa are already under immense threat due to poaching. To now legalise the trade of endangered species on the brink of extinction will literally be a nail in the coffin for South Africa's wildlife population. The decimation of the tourist industry will follow soon after the population of these beautiful creatures has been wiped out. No good can come from legalising this trade. Please Minister, consider the effects this decision will have on our children's and grandchildren's future. We are teetering on the edge of total wildlife decimation in this country. Please don't allow this to happen. The effects are irreversible.	Aileen

	2020-05-06 14:18:20	Western Cape		No I do not	We have little enough regulations around agriculturally reared, slaughtered and consumed meat. The entire world is crippled by a virus that resulted in a animal to human cross over from WILD meat to mankind if EVER there was a time when we could open our eyes and take the RIGHT measures around our perpetual consumption of animals it is NOW. These amendments would be a step backward in our protection of our populations both human and wildlife.	Sharon

	2020-05-06 14:13:01	Western Cape		No I do not	Animals farmed for human consumption is fine. But definitely not wild and endangered animals. How are you going to define what is poached from our reserves versus what is breed for human consumption. We need all the tourism money we can get right now. And you are just willing to destroy that!!	Hannah
	2020-05-06 14:12:15	Western Cape		No I do not	The species being added to this list is already on the brink of extinction, at the hands at humans. How dare you want to accelerate that process? Id like to live in a world where these species exist thank you!	Jade

At what cost? The cost of our children's future in a world of environmental diversity where conservation are disregarded. It is not our role to take from them. Our role is to protect the earth and all who will live in it, not to create and promote a culture of greed and destruction.	Sharon

	2020-05-06 13:44:12	Western Cape		No I do not	Please please NO. Many new animals on this list are already close to extinction and this will surely guarantee their demise. I fully do not support the implementation of this new list. Do the right thing.	Ray
	2020-05-06 13:41:59	Western Cape		No I do not	Ii think it is ridiculous that the SA Government is considering this amendment. We have endangered species listed for consumption, do they want to make these animals extinct?	Jodenia
	2020-05-06 13:34:37	Western Cape		No I do not	Animals that are on the brink of extinction should be excluded. As well as animals such as elephant, giraffe, hippos, horses, donkeys, mules and zebras.	Shannon
	2020-05-06 13:33:29	Western Cape		No I do not	Just no. Have we not learnt from the current Coronavirus worldwide pandemic about the dangers of eating animals that aren't part of our regular diets - those that are tried and tested. We don't need more meat options. The economy may be devastated by the pandemic, and it needs reviving, but not this way. And your list has endangered animals on it. We are fighting against rhino poaching, we seeing South African species decline and became endangered and now you want to add the meat of rhinos, elephants, giraffe and more. What legacy are we leaving for our children. We should be at the forefront of environmental protection - have we not learned. I do not in anyway support this draft amendment to the Meat Safety Act's extended list of animals. It is disgusting.	Bev

	2020-05-06 13:08:46	Western Cape		No I do not	The crisis that many wild animals face due to human greed, encroachment and a belief that it is good for medicine is dangerously misled and reprehensible. Our government is willing to sacrifice living treasures for nefarious gains. The largest consumers of these products is the Far East and having seen the abhorrent manor in which animals suffer and die to satisfy unsubstantiated ideals or beliefs is galling. South Africa could be at the forefront of offering protection to endangered wild life and yet the misguided draft amendment appears to be once again kowtowing to a master that has an insatiable and perverse appetite for the "exotic". The corona virus has drawn attention to the zoonotic crossover from animals to humans, yet it appears that we are prepared to ignore science when avarice tempts us into another stream of income that will potentially encourage a step up in poaching and criminality under the guise of the Meat Safety Act.	Loretta
	2020-05-06 13:01:09	Western Cape		No I do not	This will open up more endangered animals being killed with the pretence of "killing for food", poachers will have a field day!	Andrea

	2020-05-06 13:00:28	Western Cape		No I do not		Debbie
	2020-05-06 12:58:30	Western Cape		No I do not	Endangered/threatened animals should not be allowed to be slaughtered for consumption! Humans have already eradicated multiple species worldwide - by making it legal to kill threatened species, we are not only killing wildlife, but also decreasing the sustainability of the nature and country. One sector which will suffer is tourism and thereby a large income to the country will disappear.	Mia
	2020-05-06 12:57:35	Western Cape		No I do not	Somewhat disgusting to think endangered species will ease the risk of Covid-19 in the future. Also, who in their right-mind will consume Rhino or Elephant meat as it carries no nutritional value at all. It is an excuse to overlook the anti-poaching battle, which the South African government has failed to get under control for a number of years. Way better regulations or policies can be implemented, which will not carry the risk of the coronavirus to the country but which will also ensure the safety of these animals for generations to come. The whole Covid-19 issues arose because people were consuming meat they shouldn't. Expanding the list of legally consumed animals will increase the risk, not decrease it.	Andre

	2020-05-06 12:50:11	Western Cape		No I do not	We should not be eating endangered species. This amendment is nothing short of pure stupidity. 	2020-05-06 12:48:23	Western Cape		No I do not	More pillaging of our natural resources? This is ridiculous.	Kerry

	2020-05-06 12:47:24	Western Cape		No I do not	Dear Minister I am strongly against such an amendment to the Meat Safety Act. I have a BTech degree in Nature Conservation, and from my obtained knowledge such an amendment would have catastrophic consequences for South African wildlife. Opening the trade on endangered species such as rhino and elephant would create bigger loopholes for black markets which would make it easier to exploit these species. Criminals will undoubtedly capitalize on such an amendment as it would create a screen for them that would allow them to hide their illegal poaching activities. It would also be much easier to illegally trade in rhino horn, ivory, bones and other horns of various mammals if these animals are subject to being slaughtered for commercial consumption. I would also like to remind you of the S24 obligation on government to protect the environment of everyone. Allowing South African wildlife, and particularly endangered species, to be slaughtered for consumption would be a direct infringement of this right, as these animals all play vital roles in maintaining the various ecosystems of South Africa. Many of the animals on the list of your proposed amendment are species that are already compromised and vulnerable to extinction in their local ranges. If they were to become extinct in their local areas it would lead to comprised ecosystems and a degraded environment for all of those humans that depend on that ecosystem. Exploitation of these species will lead to various environmental problems, such as bush encroachment, altered fire regimes, disease outbreaks and will have knock on effects for many predators and birds. Concerning altered fire regimes this is a good time to remind you what happened recently in the Australian bush fires, where massive stands of dry fuel caused ravaging infernos. Many of the herbivores on your list play vital roles in maintaining a patch mosaic system that allows for naturally occuring smaller fires to burn relatively safely and efficiently. As South Africa is a country with many fire prone biomes, such as Grassland, Savanna and Fynbos, these mammals play a vital part in maintaining the fire regime in these biomes. By removing the mammals that manage this fire regime you will be putting lives at risk at the hand of uncontrolled bush fires that will have originated because of an uncontrolled build up of fuel load. An animal such as elephant can also not be commercially farmed, as elephants have social needs similar to humans and they require vast ranges to move. You would be subjecting elephants, and many other mammals, on your proposed list to animal cruelty as you would be completely ignoring their social and ecological requirements should you say that only farmed animals will be utilised and wild populations would be left intact. Furthermore, the National Environmental Management Act (an enactment of S24 of the Constitution) specifically protects species such as rhino, therefore exploiting this species would be an infringement of NEMA and the Constitution. I do not believe the large scale exploitation of these native South African species is at all warranted. Vulnerable species such as rhino, elephant and giraffe should be protected from exploitation, and our native antelope and bird species should also not be subject to this large scale commercial exploitation. There is enough provisions made by our law in its current format for obtaining game meat. This further amendment would simply serve to exploit native South African mammals in an extremely unsustainable manner. South African wildlife is part of the cultural heritage of every South African, and I plead with you not take this away from South Africans. These native South African animals are worth far more alive in protected reserves than they would be dead in a slaughter house. The current law makes more than enough provision for sustainable harvesting of a select number of species that is more than adequate to sustain the demand. I thank you for your time	Andre

	2020-05-06 12:06:04	Western Cape		No I do not	Many of the animals are endangered this would encourage poaching. Also the world is in this terrible state of covid 19 because of eating "wild animals". It has been banned. And it should be banned in south Africa	Rushdia

	2020-05-05 20:27:47	Western Cape		No I do not	What a disgraceful idea. It seems the more people are being warned that meat consumption is harmful to people and the earth, the more they want to test that theory. Cheryl
	2020-05-05 19:40:41	Western Cape		No I do not	1) I was a student of Veterinary Science & Zoology. We are herbivores. We should never eat any carnivores, as this goes directly against the natural, safe eating order. 2) Many of the animals listed are endangered eg: Rhino. 3) If Cornovavirus developed from bats, then surely humans should question the eating of creatures such as porcupines etc. 4) We are not Barbarians. 	2020-05-05 16:30:37	Western Cape		No I do not	It is unbelievable! We are facing Corona virus because of the killing and eating of wild animals (and possibly any animal). How can anyone, or any country possibly allow and enable more animals to be added to the list? This shows greed , pure stupidity and proves that our country is going to enable more Viruses (some more dangerous than Covid 19) to be passed to humans and spread globally. Why are we in lockdown then? What is the use of trying to beat this virus if we are going to assist in the making of new ones ? No !No! No ! In the name of sanity. I do not approve of this!	Gail

	2020-05-04 23:27:36	Western Cape		No I do not	How absolutely disgusting for you even to be considering this. This is a hard NO from me. Wildlife is not livestock. If you grow the market for wild, you also escalate the demand for wild. Poaching is already beyond belief. We should be revising current conditions for existing livestock not adding more animals to the list to be bred with for various forms of consumption. Animals even less suited for this kind of 'farming'. I feel like this whole thing smacks of some underhanded trade with China. You should be ashamed for even thinking of this.	Elisma

	2020-05-04 21:32:25	Western Cape		No I do not	Nou wil die ANC net soos China alles verwoes. Dit is mos maklikker om af te breek as om op te bou. As die land se ekologie opgetreet is deur krimmenele en toerusme vernitig is vat die ryk ANC gepuis hulle geld en gaan land uit. Plaas dat hulle die probleem van oorbevolking aanpak en ophou mense betaal om kinders te te maak wat ander mense voor moet betaal. Daar behoort reels in plek te wees dat as persoon meer as 2 kinders het hulle nie kan sassa geld kry tensy die persoon gesterriliseer is nie. Die kinderfabriekke om geld te kry is die grootste probleem in die land. Soos gewoonlik het die regering nie die wil om dit te verander nie... help liewers wat die land verder die afgrond ingaan.... maar nou lan hulle ook nie vlug nie. 	2020-05-04 10:36:51	Western Cape		No I do not	The current pandemic has highlighted how farming and caging of wild animals is unsustainable and unhealthy to society. Even regular farming of livestock has a burden on healthcare system and demands huge resources in the form of anti-biotics and other drugs. Not only that, but allowing people to farm wildlife will add to the suffering of so many animals. As a citizen of South Africa, I find it horrific that our leaders would encourage this. Gandhi, a friend of our nation, was the one who said that a nation should be judged by the way it treats its animals. What are you hoping to achieve with this? Why not rather focus on protecting wild species, and giving better care to existing farm animals. Let's lead by example.	Nicola

	2020-05-03 20:54:26	Western Cape		No I do not	I take note of the proposed amendments to the Schedule of the Meat Safety Act 2000 (Act No 40 of 2000). I am concerned that the consequence of the amendment will be an increase in the industrial factory farming of wild animals and other domesticated animals, including animals who have not been subjected to the horrendous conditions at factory farms and feedlots. In order to demonstrate its goodwill, and in the light of the COVID-19 outbreak and other diseases such as SARS and Mad Cow Disease, the South African government must commit itself publicly to the reduction of factory farming and not to the increase of this horrendous practice. 	2020-05-03 19:07:03	Western Cape		No I do not	ABSOLUTELY DO NOT SUPPORT THIS SLAUGHTER! How can our government be so two-faced as to consider including wildlife for sale while poor starving people are arrested for poaching such animals. How do you propose to control the legitimate versus the illegitimate killing of these different species? Besides the fact that as a vegetarian I do not agree with eating any of God's creatures, this will be an impossible situation to monitor and control - our tourism industry is huge in the area of ANIMAL VIEWING not killing. our country is renowned for our care of nature and its flora and fauna. Please reconsider this non-sensical proposal - it will denude our land of precious wildlife in the long run.	LINDA

	2020-05-03 13:11:22	Western Cape		No I do not	The proposed killing and export of South Africa's wild life is quite simply giving away (even for money) assets that belong to South Africa. We all know the condition and state that the Rhino are in. These animals, and many others that you mention are of great interest to visitors to our country and also a source of joy and interest to South Africans. Is this possibly a response to Covid 19 - we must find other ways of obtaining money, such as the IMF. Please do not do this, if you do, what else are you going to slaughter because the wild life mentioned can always be added to. This is unnecessary, cruel and giving away our natural assets.	Melanie
	2020-05-03 12:54:50	Western Cape		No I do not	South Africa must not make its wildlife a commodity. It should show care for all its animals, and in particular its wildlife. 	2020-05-03 11:11:45	Western Cape		No I do not	We are in the midst of covid 19 and they now want to expand the eating list? This is stupid. Apart from that some of these animals are already protected and on the brink of extinction. Tourism at the parks rely on visitors being able to see animals in their natural habitat. The economy is in a shambles now. This will only make it worse.	Janet

	2020-05-03 08:32:34	Western Cape		No I do not	The world is in turmoil due to Covid19. Allowing continual exploitation of other species is going to exacerbate the issue. These viruses will become more evident and frequent if we continue to allow this to happen. Already we have climate change to consider globally which will have an impact on all of life on earth, why exploit it further? As Gandhi said you can judge a nation's humanity by the way in which it treats it's animals, so let's step up and show that we do care for our unique flora and fauna.	Eleanor
	2020-05-02 22:07:29	Western Cape		No I do not	I am totally against killng and slaughtering wild animals especially endangered animals and birds for human consumption, medicine or trophies. 	2020-05-02 19:12:34	Western Cape		No I do not	We are currently in the midst of a covid 19 pandemic which can be traced to a market slaughtering exotic meats. Have we learnt NOTHING from this. 	2020-05-02 19:06:15	Western Cape		No I do not	The Covid virus and many other zoonotic SARS viruses are linked to bush meat/wet markets and the consumption of wildlife in general. 	2020-05-02 14:46:34	Western Cape		No I do not	No I do not. I am shocked and appalled that anybody can even consider placing endangered and protected wildlife species on this list of animals to be exported and slaughtered. I am against all wildlife species being sold for slaughter. What on earth has happened to conservation in this country? Does the minister only care about money and profit? This is as bad as supporting poaching. Does the minister not see the dwindling numbers of animals on this planet? We are so lucky to have our wildlife in our country. These species should be nurtured not slaughtered. And has the government learnt nothing from the Covid 19 outbreak due to the wetmarkets in China? Please abandon this outrageous and immoral legislation. It is completely unacceptable.	Margaret

	2020-05-02 13:52:26	Western Cape		No I do not	As a vegetarian i am appalled by animal slaughter. However to include our precious wildlife is horrendous. It is under enough pressure as it is. Why because we are pandering to Chinese & other countries who subscribe to hokus pokus medicines, not to mention the fact that some of these countrieswill kill & eat anything! Is it any wonder that the Chinese with their appalling "wet markets" have spread the corona virus throughout the world. Its hardly rocket science to put two & two together!! Is this what we want for South Africa??!!	Jayne
	2020-05-02 13:29:26	Western Cape		No I do not	Scientific culling of game to maintain sustainable ecosystems has been and still is part of a sensible management plan for natural areas. The reason behind this necessity is that Southern Africa is criss-crossed with fences and intense agriculture restricting game movement off over utilized areas . There is no conservation argument against the sale and human consumption of these culled animals. In fact, a financial benefit from the sale of these carcasses is motivation to maintain areas under conservation and thus maintaining a biodiversity so important to the resilience of habitats and human health. The intensive farming of wild game species and their genetic modification through human selection to increase productivity threatens natural populations and that very biodiversity so important for human health. There is substantial evidence that intensive breeding of domesticated stock effects anthropogenic health by exposure to pesticides, herbicides, hormones and genetic modification. Furthermore, to produce domestic stock for human consumption thousands of hectares of natural vegetation must be converted to homogenous fields of grain species to feed the stock, thus destroying the very biodiversity our health is so relient on. Domesticating game will increase this tendency. Dont do it.	Rory

	2020-04-30 20:59:28	Western Cape		No I do not	This list includes protected and endangerded animal species that should never be allowed to be butchered. Animals that are farmed can be listed to be slaughtered at abattoirs. This should include all indigenous species regularly farmed intensively or extensively as well as all alien species legally in SA. It is a shame how unprofessional this list is presented. IS this the best the authorities can do? The present list has many spelling errors and list even blou bulle as a species - a joke?	Ben
	2020-04-30 20:57:38	Western Cape		No I do not	At a time when we are all in lockdown due to Covid-19 which appears to have its origins in the wild meat markets of Wuhan, the need to extend the list of animals is contrary to any actions beneficial to the planet and its inhabitants, save those purely interested in making a profit or bowing down to economic partners with very different cultural identities. We must look towards developing the conservation and protection of all our wild life and involve all our diverse peoples in order to benefit and grow their wealth and contribution to our country. Greater emphasis needs to be placed on the regulations controlling the humane and considerate treatment of all animals that have been farmed for consumption.	Jane

	2020-04-30 16:34:41	Western Cape		No I do not	Tourism in South Africa generates large amounts of money and provides many jobs. This sector of our economy is very closely tied up with game lodges and parks. Massive amounts of time, dedication and money have been and are being spent to preserve many of the animals on this proposed list. My mind absolutely boggles at the sheer barbaric acts that this draft amendment will allow. Does the word "conservation" not mean anything to Minister T.Didiza?!! What will the world think of South Africa? This proposed amendment is a travesty against our wild life, that should be protected at all costs!! I strongly object to this draft amendment!!!	Michela
	2020-04-30 16:27:30	Western Cape		No I do not	As our understanding of the link between the novel corona virus has been greatly extended and as we in this time of reflection can consider how we have exploited wildlife and other animals for profit with little thought given to conservation or sustainability and as we become more conscious of the fact that meat eating generally is a major climate change and global heating driver it is inappropriate that this act goes through without serious debate.	Patrick
	2020-04-30 16:15:56	Western Cape		No I do not	No animals that are included on the CITIES endagered animals list should be included in any way. South Africa has a large number of endagered animals that would be exploited should they be included in a scheme to promote the use of domestic wildlife for food. The hard work done by many South Africans in protecting our wildlife will be undone by this proposal.	Dave
	2020-04-30 15:33:23	Western Cape		No I do not	I am strongly against this draft amendment. Please take into consideration that eating wild animals, in this case bats, is seen as the cause of the Corona virus spreading to humans. Eating wild animals should be discouraged!	Maryna

	2020-04-30 14:46:13	Western Cape		No I do not	I assume that this amendment will allow any of the attached livestock to be transported by ship or air or overland for slaughter to whichever country it lands in - probably Middle East, Asia and China. Once these animals leave SA territory there is no comeback as to the treatment they receive en route to slaughter (proof of such trips can be proven on request) or at the slaughter house destination. Hence conditions are often appalling and cruel. South Africans surely do not want to go down the route that China has where the world is pointing fingers at the atrocious acts that they impart on there animals including wildlife animals. The harm will be reflected in tourism and trade. There is absolutely no reason to transport animals off South African shores for slaughter, it will create more jobs in South Africa to upgrade and build more slaughter houses. Australia is receiving huge negative world feedback due to its live transport policies. Please don't let South Africa fall into this greed and unethical trap. Prove to the world that South Africa has higher standards than other countries and be the leading light in Africa, it will pay dividends.	Elizabeth Jane
	2020-04-30 14:40:25	Western Cape		No I do not	No you should not in any way change the list. The present Covid-19 pandemic we believe was started with animals from the wild. Why do you even consider changing the original list? This is complete madness and could be another health risk. And then on top of it you want to kill endangered species? It's hard to believe the government even wants to consider this.	Lorraine
	2020-04-30 14:33:19	Western Cape		No I do not	Have we not learnt anything from the Corona Virus????. These animals should definitely not be placed on a list for slaughtering and eating purposes. 	2020-04-30 13:19:59	Western Cape		No I do not	The proposed amendment act will eventually kill our wild life. The constant willingness to please Chinese people is rather dangerous for the country and for future generations. Part of me believes that this act was proposed to suit China's demand for exotic meat products	Sibulele

					There are many different reasons as to why a large number of species on this proposed list should never, ever be considered as a food source for human beings. I will lay it out as specifically and as to the point as possible: We are a conservation organisation based in the Western Cape, the company is a young company and it also 100% BEE registered. The focus of the company is to protect wildlife in a world where wildlife habitats are diminishing at an extremely fast rate. Our focus is landscape rehabilitation in terms of restoring ecological processes back to the natural so that humans and wildlife can have healthy and natural areas, and also so that humans can receive natural ecological services. For example, we do extensive alien clearing projects to restore water systems, rivers, water flow and underground water tables to limit the amount of water being taken up by alien trees. Also, to limit the excessive amount of uncontrolled large-scale fires. We serve to inform people and communities of the extreme ecological importance of the natural areas and in fact, why we need them and rely on them desperately for our own livelihoods. Part of what we do is educate youth and adults alike on environmental aspects, conservation and the need to protect the planet and keep in it 'green'. We do extensive environmental education programmes where we cover topics like the extreme negative effects of illegal wire-snaring, hunting wildlife with dogs, trapping animals, destroying natural habitat, pollution, starting fires, using poisons and pesticides etc… Natural areas are so important for human health in that they provide us with eco-system services such as: Clean water (plant roots and reeds filter dirty water and clean it for us so that we can have clean water); clean air (trees and plants provide us with oxygen); pollination (pollination in nature facilitates pollination agriculture so that we can eat); soil stability (plants, animals, even ants keep soil structure so that we can be kept safe from landslides, and also so our soils can be healthy for things like agriculture so that we can survive and eat); wildlife and ecotourism is so important in this day and age, and therefore the disappearance and killing of these animals will be detrimental to biodiversity as a whole and also for ecotourism in South Africa. South Africa is a very popular tourist destination and is often referred to as 'the world in one country'. This is largely due to its diversity of wildlife and biodiverse eco-systems and different vegetation biomes, scenic beauty, cultural diversity, heritage and history and endless opportunities to explore the outdoors through sport and adventure. We also have an amazing climate and the people are generally friendly and easy-going. In 2003, South Africa had 6.5 million arrivals to the country. Tourism is SA's fastest growing industry and the contribution from tourism towards the GDP is in the 100 billion bracket per annum. Tourism employs 3% of SA's workforce and is regarded as the largest provider of jobs and earner of foreign exchange. In 2010, the tourism economy employed more than 1.2 million people. Ecotourism is very, very large component of the tourism in South Africa, and having species killed for human consumption seems a very unwise decision to make if you think of what this will mean for ecotourism in the country. Think about it, a loss of these species will mean less tourists coming to the country to see our wildlife because if these species are allowed to be eaten, then there will be no wildlife. Even an animal such as the klipspringer (which is on the list), is ecologically important because it serves a s a food source for charismatic species such as the leopard which relies heavily on the klipspringer as a food source. Take away the klipspringer in the wild, you are causing cascading effects on the rest of the ecosystem, the leopards will not have enough food, (and the leopard is an iconic drawcard for ecotourism); not to mention the ecological benefits that klipspringer have for the vegetation on which they feed. Many of the animals proposed in the list are endangered, the Rhino is a critically endangered species. How can this animal even be considered for this list? This species, too, is an extremely important iconic drawcard for ecotourism. Not to mention it is a keystone species, as a browser and grazer of natural areas, controlling and altering ecosystems for the benefit of many other species. Another animal on the list, is the Bontebok: Only a small population of these animals exist and they are endemic to the Western Cape, having suffered major persecution on their species years back, extensive conservation efforts have successfully brought these species back to existence. And now you want to make it legal to consume this very species which is also very important ecologically as well as for ecotourism. The other extremely important factor here is the spread of zoonotic diseases, if we have any better time to learn from our mistakes, it is now. The human race needs to wake up to the fact that we are destroying wild habitats at an extremely fast rate and therefore coming into closer contact with wildlife who carry parasites and diseases that they may be immune to but that humans are susceptive to. Just like what is the case with the current global issue of Covid-19, stemmed from direct violations towards illegal wildlife trade and the consumption of wildlife species, species that are never ever meant to be eaten by humans! Proposing to consume many of these species on the list will only open up more opportunity to spread more zoonotic diseases, and have more outbreaks like this Coronavirus. You have proposed many reptile and other species not even mentioned, which is extremely unwise.

					There are many different reasons as to why a large number of species on this proposed list should never ever be considered as a food source for human beings. I will lay it out as specifically and justified as possible: We are a conservation organisation based in the Western Cape, the company is a young company and it also 100% BEE registered. The focus of the company is to protect wildlife in a world where wildlife habitats are diminishing at an extremely fast rate. Our focus is landscape rehabilitation in terms of restoring ecological processes back to the natural so that humans and wildlife can have healthy and natural areas, and also so that humans can receive natural ecological services. For example, we do extensive alien clearing projects to restore water systems, rivers, water flow and underground water tables to limit the amount of water being taken up by alien trees. Also, to limit the excessive amount of uncontrolled large-scale fires. We serve to inform people and communities of the extreme ecological importance of the natural areas and in fact, why we need them and rely on them desperately for our own livelihoods. Part of what we do is educate youth and adults alike on environmental aspects, conservation and the need to protect the planet and keep in it 'green'. We do extensive environmental education programmes where we cover topics like the extreme negative effects of illegal wire-snaring, hunting wildlife with dogs, trapping animals, destroying natural habitat, pollution, starting fires, using poisons and pesticides etc… Natural areas are so important for human health in that they provide us with eco-system services such as: Clean water (plant roots and reeds filter dirty water and clean it for us so that we can have clean water); clean air (trees and plants provide us with oxygen); pollination (pollination in nature facilitates pollination agriculture so that we can eat); soil stability (plants, animals, even ants keep soil structure so that we can be kept safe from landslides, and also so our soils can be healthy for things like agriculture so that we can survive and eat); wildlife and ecotourism is so important in this day and age, and therefore the disappearance and killing of these animals will be detrimental to biodiversity as a whole and also for ecotourism in South Africa. South Africa is a very popular tourist destination and is often referred to as 'the world in one country'. This is largely due to its diversity of wildlife and biodiverse eco-systems and different vegetation biomes, scenic beauty, cultural diversity, heritage and history and endless opportunities to explore the outdoors through sport and adventure. We also have an amazing climate and the people are generally friendly and easy-going. In 2003, South Africa had 6.5 million arrivals to the country. Tourism is SA's fastest growing industry and the contribution from tourism towards the GDP is in the 100 billion bracket per annum. Tourism employs 3% of SA's workforce and is regarded as the largest provider of jobs and earner of foreign exchange. In 2010, the tourism economy employed more than 1.2 million people. Ecotourism is very, very large component of the tourism in South Africa, and having species killed for human consumption seems a very unwise decision to make if you think of what this will mean for ecotourism in the country. Think about it, a loss of these species will mean less tourists coming to the country to see our wildlife because if these species are allowed to be eaten, then there will be no wildlife. Even an animal such as the klipspringer (which is on the list), is ecologically important because it serves a s a food source for charismatic species such as the leopard which relies heavily on the klipspringer as a food source. Take away the klipspringer in the wild, you are causing cascading effects on the rest of the ecosystem, the leopards will not have enough food, (and the leopard is an iconic drawcard for ecotourism); not to mention the ecological benefits that klipspringer have for the vegetation on which they feed. Many of the animals proposed in the list are endangered, the Rhino is a critically endangered species. How can this animal even be considered for this list? This species, too, is an extremely important iconic drawcard for ecotourism. Not to mention it is a keystone species, as a browser and grazer of natural areas, controlling and altering ecosystems for the benefit of many other species. Another animal on the list, is the Bontebok: Only a small population of these animals exist and they are endemic to the Western Cape, having suffered major persecution on their species years back, extensive conservation efforts have successfully brought these species back to existence. And now you want to make it legal to consume this very species which is also very important ecologically as well as for ecotourism. The other extremely important factor here is the spread of zoonotic diseases, if we have any better time to learn from our mistakes, it is now. The human race needs to wake up to the fact that we are destroying wild habitats at an extremely fast rate and therefore coming into closer contact with wildlife who carry parasites and diseases that they may be immune to but that humans are susceptive to. Just like what is the case with the current global issue of Covid-19, stemmed from direct violations towards illegal wildlife trade and the consumption of wildlife species, species that are never ever meant to be eaten by humans! Proposing to consume many of these species on the list will only open up more opportunity to spread more zoonotic diseases, and have more outbreaks like this Coronavirus. You have proposed many reptile and other species not even mentioned, which is extremely unwise. All of the species on the list have a very important role to play in nature, and having their populations subjected to even more decline will mean the decline of human health and wellbeing in general. We need to learn to live with nature, and not keep taking, we will end up shooting ourselves in the foot, which is in fact what we have already done. Please reconsider many of the animals on this list, and see to it that no animals proposed for human consumption are endangered and vulnerable to extinction. See to it that you consider the expert opinions from ecological scientists, because, if you really cared about the people of South Africa, you would make sure that our wildlife is protected first and foremost so that people can thrive in a healthy world, and where tourism is not threatened because of a governments unwise decision. It has clearly not been thought through and many of the animals proposed should never

I understood South Africa was one of many countries banning their exploitation in any form, including the use or export of their by-products. To add them to the list of creatures for slaughter or human consumption is unacceptable. 2. Some of these species are known to be hazardous to human health. Especially as it is thought that Coronavirus 19 - and other epidemics or pandemics very likely to occur - due to continued or new ideas for human consumption, to increase the list is very dangerous. 	2020-04-30 08:23:05	Western Cape		No I do not	Weighing up the positive and negative implications of eating animals - there is no good reason to eat ANY animals and certainly not to extend the list of animals that may be eaten. Consider that most of the diseases that humans suffer, are due to our treating animals as “livestock” (breeding for eating). The mess we are in now - Coronavirus deaths and economic ruin are due to this. Eating meat & dairy contributes and causes a variety of other diseases from heart disease to immune related diseases. A side of animals that results from regarding them as livestock is inhumane & immoral. Livestock has a hugely negative impact on the environment. And we can get BETTER quality protein and other nutrients from plants, at far less cost in every way. So why, would you even consider this? Because of the ego’s who think they are mightier if they eat meat?	Carolyn

	2020-04-29 15:55:06	Western Cape		No I do not	This is a dreadful step - we need to conserve these species for future generations and the health of our planet, not encourage their destruction!!! Adding animals that are on an endangered list or close to being on that list to the list that can be slaughtered for consumption is negligent and unbelievably short sighted. This is the move of a minister so out of touch with the mood in the world as to be reminiscent of Trump. The Covid-19 crisis has surely highlighted how important it is to have a balance in nature between us and the environment. We already face the extinction of several species and this act would surely result in loop holes being sought for the killing of those species, such as the Rhino. This is another senseless amendment, legalising crimes Government cannot control, so it is no longer a crime, and therefor does not have to be controlled. The world needs to investigate plant-based foods to feed our rapidly increasing populations, not use exotic wild animals as a source of food. AND we need to realise that we cannot have many children - we need to decrease our population as the world cannot sustain us if we don't !!	Abby

Please let common sense prevail!	Izzy
	2020-04-29 14:59:32	Western Cape		No I do not	This appears to be part of the move towards increasing the exploitation and commercialisation of our precious wildlife. The environment minister is also part of this push and she is redoing research relating to elephant culling, trade in rhino horn and the canned lion hunting trade. This research had been done and it's recommendations were very clear and not the answers that the vested hunting interests wanted. This change is very possibly another way to help those vested interests get what they want. It seems that our government is hellbent on pandering to a few wealthy, privileged landowners and hunters, without any concern for our wildlife, the science, the previous research, our tourist industry and the wishes of a large proportion of our population. 	2020-04-29 11:35:03	Western Cape		No I do not	Endangered or wildlife animals should not be consumed as they are rare species and not cows or other meat like chicken that breeds easily.	Nadia
	2020-04-29 11:34:04	Western Cape		No I do not	Lets start by asking the querstion, why would the protected specis be placed on the list for annialation? Proactive culling to control numbers of animals for their survival can be debated. Humanly, the only animals that should be included must only be those designated as domesticated for human consumption e. g. Cattle , sheep etc. Strict regulation must be promulgated for the slaughter of venison. All the animals named in the new list should be examined individually and only after consultation with public input should the list be finalised.	jan
	2020-04-29 11:34:00	Western Cape		No I do not	Why a rhinoceros???? it's already endangered . There are enough animals on the current list of slaughter animals. Who is behind this idea? What is the matter with you? Our country should be devoted to the protection and conservation of wild animals. What about diseases such as Covid 19? Have we not seen the devastation caused by eating wild animals? It should be banned worldwide.	Jennifer
	2020-04-29 11:27:39	Western Cape		No I do not	Our wildlife and more specifically threatened species are far more valuable to our economy (and thereby to ALL our people) when they are alive to attract tourism, rather than dead and eaten. This is like slaughtering and eating the goose that lays the golden eggs!!!	Uwe
	2020-04-29 11:17:18	Western Cape		No I do not	It is unnecessary to slaughter animals that are endangered and goes against everything South Africa is trying to achieve in terms of protecting our wildlife. Please don’t allow this!	Debby
	2020-04-29 11:05:22	Western Cape		No I do not	Why is this change in the law being done while we're all distracted by Covid -19? What is the reason for the changes and what have the scientists have to say about this? The Meat Safety Act seems to be about the safety measure required by abattoirs in South Africa so does this mean that our abattoirs can slaughter any animal on this list? It is irresponsible to put endangered species on the list and then say in accordance with conservation provisions. Is this a precursor to allowing the export of endangered species and bush meat?	Pauline
	2020-04-29 10:59:41	Western Cape		No I do not	(Ms) T. Didiza, Minister of Agriculture, Land Reform and Rural Development I say NO to the slaughtering of and consumption of 'bushmeat' and animals which are critically endangered, and this idea is especially foolish as we know that the current Covid-19 pandemic has been caused by animal to human transmission. What about the income generated every year through International Tourism? South Africa CAN NOT AFFORD to loose this huge income which also PROVIDES JOBS to so many in our country.	eLNA

	2020-04-29 10:48:32	Western Cape		No I do not	I am totally opposed to the slaughter, consumption and trade in the animals listed in the proposed Meat Safety Act. It goes against all established principles of conservation and constitutes inhumane treatment. In light of the Covid-19 crisis, which is the result of zoogenic pathogens (as is the case with other major outbreaks in the last 40 years), it would be irresponsible to allow farming, hunting and trading in wild animals. It's government's duty - for the protection of humans and other animals - to stop it immediately.	Trevor

	2020-04-29 10:11:05	Western Cape		No I do not	We have just had a global demonstration on what happens when humans consume wildlife who carry diseases to which we have no immunity. If this isn’t enough of a lesson then humanity fully deserves to be wiped off the face of the earth! Even if you care nothing about animal cruelty, global warming and preserving our natural heritage you should care about the horrific socio-economic repercussions of global pandemics of zoonotic origin! Regardless of your moral and political beliefs, only a savage or a fool would think there is any scenario under which it is appropriate to farm and eat endangered wildlife!	Monique

	2020-04-29 10:10:56	Western Cape		No I do not	This is the most appalling piece of legislation . Let's stop it now. Leave our animals alone and focus on a more plant based diet. Have we learnt nothing from "thePangolin Revenge"?, ie coronavirus? We don't know what else is out there.	Jill
	2020-04-29 10:03:57	Western Cape		No I do not	While adding all these animals to the list will enable the meat processing industry to create even more indistinguishable and dubious concoctions for the consumer, the possible health risks from these are also likely to rise.	Thomas

	2020-04-29 00:25:07	Western Cape		No I do not	The SA Government will become the laughing stock of the world should they allow our wildlife to be slaughtered and sold. We are spending millions on protecting rhinos and elephants from poachers. Doesn't the current pandemic not teach us that consuming all kinds of animals lead to death and ruin of humans, the environment and earth as a whole. All kinds of deseases will be the result of this. Thirdly, our country makes millions in tourism because we have the Big Five. Slaughtering wildlife will bring in money for a short period but in the long run it will destroy the tourism industry. No government will ever assist SA again in combating or helping with any wildlife related issues SA might have. If we don't care about our wildlife, why should they. This is also against the CITES agreement, which SA, is a signatory of.	Adele

	2020-04-28 21:20:05	Western Cape		No I do not	All animals ....endangered or not should be protected. Covid 19 should be enough of an indication that not all animals should be eaten. People eat beef/fowl/lamb and pork. Surely that is enough, and even those poor creatures should be slaughtered under the strictest of humane processes. And while we are here, the manner in which dairy cows are milked should also be addressed, its also totally inhumane.	Sharyn

	2020-04-28 20:34:38	Western Cape		No I do not	It is ironic that the Ministry of Agriculture appears to be attempting to slip these amendments through at the time of the Covid crisis; a crisis which is guaranteed to distract people from the process. And yet the Coronaviruses are tangible and devastating proof of the health risks posed by the uncontrolled sale and consumption of wildlife. I reject the amendments because they threaten nature conversation (the provision that the slaughter and consumption of threatened species be in line with 'relevant conservation provisions' is vague and meaningless, and open to manipulation by the Ministry itself, which can simply change the 'relevant conservation provisions' through regulations. I further reject them because the cruelty already inherent in much commercial farming needs to be controlled, not extended to other species. And finally, the proposed amendments allow for the large-scale slaughter of animals that are not even considered and listed separately, but enclosed in a catch-all provision which shows no engagement by the Ministry into the vulnerabilities of each individual species. 	2020-04-28 18:16:09	Western Cape		No I do not	We need to CONSERVE our wild life, not decimate it. If this pandemic teaches us just one thing, it is to conserve and respect other sentient beings. It has been proven that wild animals, under stress while being slaughtered, pass on their diseases to us and other animals. Apart from this, do we really want to destroy our valuable tourist industry? Dr Jane Goodall predicted, decades ago, exactly what is happening to us now. Destroy the habitat of wildlife, eat these animals and treat them as commodities and a virus will take over and try and destroy us. The next one will be far worse than Corona. Respect ALL animals. 	2020-04-28 17:15:23	Western Cape		No I do not	Recent world events have brought sharply into focus the urgent need for humans to relate to land, plants, trees and animals and all life forms on earth with awareness of our interconnection. I object in the strongest terms and feel shocked that such a draft document of this nature to include wild animals even exists for consideration, and at this time when we are invited to wake up to what we as a species have done, are doing. Policy makers, I ask you to listen to the wisdom of your heart. To remember that we are connected. To see clearly, that nothing NOTHING can justify this. Does the Minister really not have better things to do ? Maybe to address how he can feed the poor without killing all our endangered species which bring in tourism from all over the world and provides a huge amount of employment ??	Angela

	2020-04-28 16:44:37	Western Cape		No I do not	The expansion of the number of animals included in this draft amendment to the Meat Safety Act appears to include a number of small buck and animals that at the moment have legal protection from packs of hunting dogs. I do not support this draft amendment!	Niki

	2020-04-28 15:47:57	Western Cape		No I do not	It is mind boggling that anyone can even contemplate approving the killing / destroying of innocent animals - for What?? What this legislation if past will do is unnecessarily - increase crime - increase financial burdens on farmers, smallholders, game farms to protect the animals they care for - increase workload on SAPS - increase workload on criminal system with a bit of thought you will know the list goes on and on, all aspects our poor Country can ill afford. and at the heart of it - create pain and suffering of innocent animals purely to satisfy the greed of mankind. Shame on the person/s who came up with the idea. More time should be spent on how to educate the masses on how to grow crops and feed themselves rather than a quick "get rich" scheme by a select few which will not benefit those that need food on the table in our own Country. -	Jacomina
	2020-04-28 15:44:08	Western Cape		No I do not	Is this a new Money making scheme ? I do not see this as an April Fools joke. PLEASE leave our endangered species alone where they belong. In the Nature. Why must we be so Greedy and Ready to Kill Nature.	Hannes

	2020-04-28 15:38:57	Western Cape		No I do not	Is it really necessary to include the likes of animals that are currently under threat eg Rhinoceros ? We have a major poaching issue threatening to wipe out this animal but here we want to slaughter for consumption ? And ditto for may others.	Mark
	2020-04-28 15:33:34	Western Cape		No I do not	Ons het 'n verantwoordelikheid om die natuur op te pas en te versorg. Ek sien geen nodigheid om die bestaande lys uit te brei nie. Wild moet beskerm word nie bedreig en uitgewis word nie.	Maria
	2020-04-28 15:25:33	Western Cape		No I do not	The inclusion of animals that are endangered is reckless and unnecessary. In the light of COVID 19, how has nothing been learned? The list of animals should be reduced! The more wild animals that are destroyed, along with their environments, will only lead to further pandemics and chaos in the natural world, which will only endanger ourselves in the end. Keep the list of animals "safe for consumption" to a minimum, and protect wild animals and their environments!	Kathy
	2020-04-28 15:21:26	Western Cape		No I do not	There is a huge risk that in this age of mass extinction, many of the species on this list may be poached and sold to overseas markets. It is also obvious that in this age of extreme economic collapse, desperate people may turn to poaching and use this as an opportunity to prey on endangered populations of wild animals. Cross-species virus contamination is also an obvious reason not to agree to this policy. We have seen how the sale of Pangolins on a wet market in Wuhan let loose a certain Covid virus, which has changed the world forever. So please, for goodness sake, stick to the domestic animals who are being bred for the food market. If mankind does not work in integrity with nature at this time, we will have to wait longer and longer before balance is restored. This is a lesson we all need to learn. Animals should be treated with respect and care.	Helena

Perhaps we should add humans to this new list and see how the people who agreed to this draft amendment concerning our beloved animals, feels about being slaughtered, exported and used for consumption!! Yuck!!! No wonder we have Coronavirus in our world, it's because these decision makers, think they can play God!!! Saying NO to this list!!! Voilà!!!	Helene

	2020-04-28 12:38:59	Western Cape		No I do not	There is clear evidence that the Covid 19 virus originated in the Wuhan wildlife market when it crossed to humans from an infected animal. It is quite outrageous that our Government now believes it is appropriate to include many threatened wildlife species in the list of animals that can be slaughtered and sold for human consumption. This draft amendment clearly needs to go back to the drawing board where rational consideration can be given to its possible implications for wildlife and people	Paul

	2020-04-28 12:27:31	Western Cape		No I do not	We are in a time of ecological crisis. By farming animals and promoting their exploitation, we are contributing to the decline of our ecological world which we rely on for ecological service (making us survive). By threatening ecosystems and enabling the exploitation of animals, we put ourselves and animal populations at risk of unintended consequences - such as pandemics much like COVID-19, imbalances on the ecosystems we depend on and importantly, cruelty to animals.	Alexa

	2020-04-28 12:08:35	Western Cape		No I do not	It's outrageous. No one should be allowed to hunt wild animals. Domestic animals should NEVER be used for human consumption. Eating meat that is pumped full of chemicals or hormones is not healthy for anyone. Slaughtering if required should be done in a much more kind way rather than allowing the animal to be at high stress levels beforehand as that in turn is not good for the meat condition and hence health of consumer. 	2020-04-28 11:59:01	Western Cape		No I do not	The slaughter and trade of wild, and possibly endangered, animals should definitely be thought on more thoroughly. Although certain species on the list need to be hunted to keep a stable ecosystem, they need to be hunted in our own country, stop selling raw produce to forgein countries. As seen with the Covid-19, the trade of wild animals often leads to deadly viruses. Also, how could you trade our precious ecosystem? South African has one of the most unique and beautiful collections of flora and fauna. They should be kept in our country and celebrated, not sold off.	Alexa

	2020-04-28 11:45:08	Western Cape		No I do not	This proposed amendment is unacceptable. In the revelation that COVID19 emanated from a facility where animals, many of them wild, are slaughtered, the proposal to make such activities legal in South Africa is illogical. Quite apart from the slaughter, this Act relates also to the sale, consumption, import and export of such animals ' and to provide for matters connected therewith', which is a worryingly open statement. The final 2 paragraphs of the list of the animals to which this 'Act' applies read : 'This Act also applies to all other species of animals not mentioned above including birds, fish and reptiles that may be slaughtered as food for human and animal consumption.This schedule includes animals that may be listed as threatened species in accordance with conservation provisions and therefore their slaughter for human and animal consumption must be inline with the relevant conservation provisions.' These 2 paragraphs illustrate the limitless extent to which this 'Act' could be applied. This is totally unacceptable. Quite apart from the potential for animal slaughtering to lead to future pandemics, the many examples of how wild animals are benefitting from lockdown, as well documented online, proves that humans should be interfering in, controlling and dominating the lives of other species less rather than more.	SJ

	2020-04-28 11:38:58	Western Cape		No I do not	Protection of our wildlife is critical to the maintenance of SA tourism. It is the single most valuable part of our African heritage and MUST be protected and preserved for future generations! Given the covid 19 pandemic we need urgently to protect ourselves against the outbreak of zoonotic diseases- starting in SA and throughout the world! Care and management of domestic animals for slaughter needs to be better monitored and stringent measures need to be enforced that prohibit brutal treatment and minimize stress caused to these animals creating the possibility of animal to human infections! 	2020-04-28 11:27:23	Western Cape		No I do not	No NO and NO again, we do not need another means of enrichment and uncontrolled poaching, leave our wildlife to the conservationists an use the meat/ fish etc production and consumption as is, the next thing there will be no wildlife at all, God made things in perfect balance, don't try and do His job!!	Basil
	2020-04-28 11:26:17	Western Cape		No I do not	As more and more people adopt more humane diets, and ways of faming, which cause minimal harm. Eating, encouragibg the eating and making available animal flesh just to please a few who can afford such luxuries (at huge cost to our world wild life). At best this is pandering to a few taste buds of people who still consume meat. We can all improve our health by adopting or continuing to eat a plant based diet. We're the guardians of the earth not the killers of other species that co-inhabit our world. Let's change the paradigm.	Michele

	2020-04-28 11:06:46	Western Cape		No I do not	COVID19 has shown YET AGAIN that diseases from wild animals can transmit to humans. 'Endangered' animals should not be killed for ANY reason. If we are trying to save the planet and ourselves then all wildlife must be protected to the maximum.	Nicci
	2020-04-28 11:05:13	Western Cape		No I do not	Please let South Africa be a leader in the world by our laws which protects our animals from exploitation and cruelty. We as a country can be setting an example to the world. Thank you.	Greta
	2020-04-28 11:03:22	Western Cape		No I do not	Quite apart from some of the more bizarre exotic animals listed that are probably not kept outside a few zoos, it is inconceivable that this country would want to slaughter, consume or export threatened species like rhinos. It is conceivable that some animals may be sold (let's say to national parks in other parts of Africa) but as we know, the only part of a rhino that is used is its horn, which is exported by poachers to Asia for false medicinal reasons. Does our government really want to encourage that? The same argument applies to other endangered animals like elephants (only tusks used) and lions (bones) and to endangered birds. The endangered status of an animal or bird is dead easy to establish - just check the lists - so why list them as consumable and exportable? Please leave out anything that is on endangered lists.	Christiaan

	2020-04-28 10:54:12	Western Cape		No I do not	It is outrageous to even consider the slaughter of our heritage. This sounds to me like a quick fix to try to recover money previously stolen by some of our government ministers. Why don't our Parliamentarians realise what a roll our wild life play in the economy of our country and how important tourism is? Some of those species are already on the endangered list. It seems to me that our government is set to destroy South Africa and our wild life.	Keith
	2020-04-28 10:52:50	Western Cape		No I do not	We need to educate people to other sources of protein without killing animals. There are many vegetables, beans, lentils that are healthy forms of protein and perfectly sustaining - doctors worldwide support this. We don't need animal protein and to extend to slaughtering wild life Is barbaric.	Dru
	2020-04-28 10:51:53	Western Cape		No I do not	HAVE WE NOT LEARNT THAT YOU CANNOT AND SHOULD NOT INCLUDE THE SALE AND OR SLAUGHTER OF WILD LIFE FOR HUMAN CONSUMPTION !!!!! COVID - 19 PEOPLE !!!!!!	STEVE
	2020-04-28 10:51:21	Western Cape		No I do not	Animals listed as endangered in any way should not be listed in the meat safety act as acceptable for the food chain	Selwyn
	2020-04-28 10:51:04	Western Cape		No I do not	I fully oppose the new amendment. Including threatened species on the list is ludicrous. South Africa do produce enough meat from animals on the current and existing list. NO NEED to extend it at all. Adding new "strange" animals to the list increase the risk for poaching.	Piet
	2020-04-28 10:49:45	Western Cape		No I do not	Beef and sheep are acceptable, as well as wild buck,deer etc. Do not allow Elephant, Rhino and giraffe, or any endangered specie on the list. It will be catastrophic to the nature, which we as humans have already trashed.	Richard
	2020-04-28 10:48:33	Western Cape		No I do not	No, definitely not!! This is outragious. These are endangered wild animals. We should be preserving them, not ALLOWING them to be killed!! How on earth can the government give permission for these animals to be slaughtered knowing how many diseases emanate from killing and eating wild animals?! Is COVID19 not enough for us and the world to deal with? Have we as a country not learned anything from COVID19, the Pandemic, the destruction of lives, our economy? Why destroy our wildlife too, it's the only thing left to be proud of in South Africa!	S
	2020-04-28 10:47:06	Western Cape		No I do not	This is beyond reprehensible. Leave our Wildlife alone before there's nothing left for future generations to see and appreciate. Most of our animals are on the brink of Extinction already. To want to slaughter giraffe, elephant, rhino (almost extinct already) and our bucks is sickening. Have you not learnt your lesson from what has just happened in China. No, its all about money, money and more money.	Karen
	2020-04-28 10:45:56	Western Cape		No I do not		Tarryn

	2020-04-28 10:41:55	Western Cape		No I do not	Firstly, there is not much I can fault when reading the current list of animals allowed to be slaughtered and sold. Having said that, there is already more than enough unsafe, unethical and unregulated practises in the current meat industry as it is. However, there is a huge problem with the proposed new list. And I'm no expert on these matters, but I have intelligence and common sense enough to know that this is a completely senseless decision. Didiza proposes to open a can of rotten worms which would be best left unopened. 1. The fact that there are several endangered species on the list is absolutely and completely unacceptable! Elephants? Rhinos? Giraffes, Porcupines? Didiza is very clearly encouraging the trade of so called "bush meat". A savage, unregulated, unhygienic, primitive, cruel and environmentally disastrous practice to say the very least. She's actively encouraging the poaching of animals, which has decimated wildlife all over Africa. Thousands of game rangers have lost their lives to poachers. The recent massacre of 17 people in Virunga National Park is a prime example (15 of them rangers). This would have dire consequences to all the efforts that have been made to conservation in this country and the rest of Africa. It would mean that many species of mammals, birds and reptiles would be hunted and poached to extinction. Not to mention the cruelty involved in the unregulated capture and slaughter of these poor animals! Stop the trade of wild animals and their parts right now! 2. There are many animals on this list that are not endemic to South Africa. What exactly does this mean? Are these animals and/or their meat now on the list to potentially be imported? Why exactly do we have the need to import more meat to our country? We most certainly have enough producers of meat in this country. Poultry, beef, sheep, goats, ostriches etc. This is equally unacceptable. Has Covid-19 not been a clear message that the trade, import and export of animals pose a huge risk in the spread of potentially deadly diseases??? Are you saying that SA wants to import Kangaroos, Wallabees etc. all the way from Australia?? As if we don't already have enough problems with GLOBAL WARMING we now want to further contribute to it by importing and exporting potentially vast quantities of meat all over the world! To who's benefit may I ask?? Who is financially going to benefit from this? What new level of corruption in Government is hiding behind this proposal? This new proposed list is short sighted, and clearly not well thought out by someone most likely not qualified to hold the position she has. Money obviously plays a very important role here. We need to investigate extensively who's to benefit from these proposed new regulations. This is an unethical, morally corrupt and disastrous proposal. In conclusion...STOP THE TRADE! CONSERVATION OVER DECIMATION AND SLAUGHTER! STOP GLOBAL WARMING! RECYCLE REDUCE & RE-USE!	Sarel

	2020-04-28 10:21:22	Western Cape		No I do not	I cannot support this in anyway , these are a protected animals for a reason - they are endangered in numbers and tourists local and international pay millions to view our wild life. Can the government please try and see beyond just today , the future is what we need to plan for and why they are in government. Health - have we learnt nothing from COVID 19 and the spread of virus between wild animal and human. if it the motivation of the extended list of animals is hunger then best the government start educating people properly so they can earn a living - perhaps if the same government can open up the economy so we can expand and have inclusive growth all this nonsense would stop. Hunger is created by the INABILITY to earn money and to fend for oneself together with a unhindered increase in the population. if the Government really cares for the people they should be doing everything they can to address both.	peter

	2020-04-28 10:10:11	Western Cape		No I do not	1) Adding endangered species (such as rhinoceros) to a list of animals approved for slaughter, consumption and export is outrageously irresponsible and senseless. We are already struggling to impede poachers from decimating our fragile ecosystem - to lift the ban on slaughtering these animals would utterly defeat all of our efforts to keep these species from the brink of extinction. The excuse that these animals would be kept alive through farming is groundless (see point 2 below) and will not protect those in the wild from being targeted by poachers - lifting the ban will just make it easier for them to circumvent the law. 2) Wild animals require large tracts of land in order to flourish - that is why they have not been domesticated in all the millennia that man has been farming livestock. Attempting to breed and raise these animals in a farmed environment is an ill-considered venture. Such conditions lead to a sharp decline in the health of these animals, which leads to disease, which results in such global tragedies as the current Covid-19 pandemic. 3) The land and resources required for farming wild game (especially the larger species) is immense and would be far better utilised to the benefit of our nation (especially the poor) if used to further local agriculture and other industries.	Trish

	2020-04-28 09:43:31	Western Cape		No I do not	Elizabeth Maruma Mrema, the acting executive secretary of the UN Convention on Biological Diversity, said countries should move to prevent future pandemics by banning the sale of live and dead animals for human consumption, but cautioned against unintended consequences. Using the examples of Ebola in west-central Africa and the Nipah virus in east Asia, Mrema said there were clear links between the destruction of nature and new human illnesses, but cautioned against a reactionary approach to the ongoing Covid-19 pandemic. “The message we are getting is if we don’t take care of nature, it will take care of us,” she said. “It would be good to ban the live animal markets as China has done and some countries. But we should also remember you have communities, particularly from low-income rural areas, particularly in Africa, which are dependent on wild animals to sustain the livelihoods of millions of people. “So unless we get alternatives for these communities, there might be a danger of opening up illegal trade in wild animals which currently is already leading us to the brink of extinction .” “We need to look at how we balance that and really close the hole of illegal trade in the future.” As the coronavirus has spread around the world, there has been increased focus on how humanity’s destruction of nature creates conditions for new zoonotic illness to spread. Jinfeng Zhou, secretary general of the China Biodiversity Conservation and Green Development Foundation, called on authorities to make the ban on wildlife markets permanent, warning diseases such as Covid-19 would appear again. “I agree there should be a global ban on the consumption of wild animals, which will help a lot on wildlife conservation and protection of ourselves from improper contacts with wildlife,” Zhou said. “More than 70% of human diseases are from wildlife and many species are endangered by eating them.” Mrema said she was optimistic that the world would take the consequences of the destruction of the natural world more seriously in the wake of the Covid-19 outbreak when countries returned to negotiate the post-2020 framework for biodiversity, billed as the Paris agreement for nature. “Preserving intact ecosystems and biodiversity will help us reduce the prevalence of some of these diseases. So the way we farm, the way we use the soils, the way we protect coastal ecosystems and the way we treat our forests will either wreck the future or help us live longer,” she said. “We know in the late 1990s in Malaysia with the outbreak of Nipah virus, it is believed that the virus was a result of forest fires, deforestation and drought which had caused fruit bats, the natural carriers of the virus, to move from the forests into the peat farms. It infected the farmers, which infected other humans and that led to the spread of disease.	Nicolette

	2020-04-28 09:41:11	Western Cape		No I do not	Our planet is already threatened and that includes and involves the animals that are part of her. We as humans do not need to consume everything, like vacuum cleaners, sucking the life out of this beautiful planet. We have seen first hand what dangers come with eating and consuming wild meat eg foreign viruses etc I love meat but we have enough to choose from. We do not need to pray on everything This planet belongs to all who live on it not only those who can dominate. Obesity is already a growing problem in our lives, why add to this with increased selections of food. So many species of animals are already extinct, becoming extinct why do we want to add to this? It is not just a matter of control... we have proven that we cant control these things. Killing, slaughtering, hunting etc are all violent, negative energies. 	2020-04-28 09:24:42	Western Cape		No I do not	Extending the list is a short-sighted move in my view and will endanger many animals even more than they already are. Conservation is the needed course of action for long-term sustainability - our wildlife and natural world is integral to our well-being (and is also economically viable if we manage and invest in eco-tourism at the local level) and such a move as the amendment will only bring short term profits with long term consequences. 	2020-04-28 09:14:31	Western Cape		No I do not	We have had an impact on 95% of the land on our earth with majority of this impact being negative, most often resulting in negative consequences... Climate change and the infamous Covid-19 pandemic to name a few. These consequences usually are detrimental to human existence at all scales creating health, economic and ecological challenges and disasters. And we are currently living through a prime example of this. Exploiting biodiversity is not the answer unless this is a deliberate ploy to do even more harm to ourselves and cause more pandemics. It would be irresponsible to biodiversity protection and to progress made in conservation thus far. Is this amendment being pushed by individuals for personal gain? This is not for the well being of our country whatsoever.	Melanie

Compared to animals in a feedlot, game is the definition of hormone free, cruelty free and free range. Secondly, this will negatively affect all conservation. The wildlife conservation industry needs income to be sustainable. Not being able to sell the abundant animals for consumption will ultimately force all land owners to exchange their game for normal livestock which can be sold and therefore negatively affect biodiversity. No one is allowd to to see and travel on these ships and once they have left our shores nothing can be done with there fate. There is absolutely no reason why these animals cannot be slaughtered in South Africa under regulated conditions thus giving South Africans much needed work. Cold storage is much more economical and easier to transport. Also Africa is being decimated of its cultral animals. Wildlife is under enormous stress. Transporting wildlife in itself is very traumatising let alone for meat. Guess this bill is for the Chinese / Asian and Arab countries. Another dangerous curve for Africa.	Jane

	2020-04-28 08:12:51	Western Cape		No I do not	With corruption as it is, this will just open doors to selling our wildlife to the likes of China. The worst possible form of slaughter and eradication of our wildlife.	Patrick

	2020-04-28 08:10:09	Western Cape		No I do not	How does a list with endangered, and near extinct species get drawn up? Are we going to become like China (or supply them) where every living creature on this planet is consumed.	Deborah
	2020-04-28 08:09:42	Western Cape		No I do not	I do not agree with the slaughter of wild animals, particularly those that are endangered. We should only eat animals that are farmed for human consumption.	Janet
	2020-04-28 08:09:22	Western Cape		No I do not	This is completely regressive in nature and mind blowing that it is being proposed amidst a zoonotic pandemic.	Adrian
	2020-04-28 08:08:21	Western Cape		No I do not	We are experiencing the Coron Virus directly because of the sale of the wet markets sale of wildlife in Wuhan China. Allowing the sale, trade and slaughter of the list of animals will increase the risk of another world pandemic. South Africa should encourage its citizens to move away from meat based diets to plant based diets in order to fight against global warming as well as additional pandemics.	Jonathan
	2020-04-28 08:07:36	Western Cape		No I do not	I do not see the rationale to amend the current list. The new list includes a large number of virtually unknown species that do not occur in the country. It also includes threatened species that need protection. Leave your wild life alone. It is a country asset and not here to support man’s greed and ego of hunting and killing	Mike
	2020-04-28 08:07:32	Western Cape		No I do not	It is unacceptable that despite global environmental concerns and endangered species being wiped out for ever, that we are prepared to accept that endangered animals appear on this list. 	2020-04-28 08:01:28	Western Cape		No I do not	I do not support the slaughter of any wild animals. Apart from being entirely wrong from a health and environmental point of view it will negatively affect our tourist industry	Stephen
	2020-04-28 08:01:14	Western Cape		No I do not	I don't want any wild animals on the list. This will have a huge negative impact on tourism which is our second most industry in view of GDP and our first most important industry in view of employment. Secondary, Covid was started as a result of people eating the meat of wild animals imported into China. As a result our own economy suffered thousandfold more than can ever be gained from seething the meat of wild animals. We should therefore never allow this to happen again and have a moral obligation to protect our own people from having to go through any form of lockdown again as a result of selling wild animal meat.	Henko

	2020-04-28 07:57:39	Western Cape		No I do not	I don’t believe the reasons for extending the animal list for slaughter are worth endangering more animals, not to mention the cruelty to animals that this involved. Let’s not succumb to outside demands and protect our South African animals.	Danielle

	2020-04-28 07:50:38	Western Cape		No I do not	One would think that the recent developments that have currently endangered the lives of 3 million people, a number which will probably double every dew weeks, would be enough to fully ban the slaughtering and sale of wild animals for the food market. 	2020-04-28 07:50:19	Western Cape		No I do not	I fear that this legislation will: 1. lead to Increasing in poaching, the undermining of the all the National Parks and private 2. Totally decimation of the rhino population 3. an increase in disease (such as Covid-19 which more than likely originated due to 'exotic" meats are kept/slaughtered 4. the next big pandemic will come from a country that does have stricter laws concerning killing, keeping and human interaction with wild/ exotic species. SARS and Covid -19 already point to this. Please consider amending the bill.	Suzanne
	2020-04-28 07:48:38	Western Cape		No I do not	We should be protecting our wildlife & especially the species on the endangered list, we should all strive towards a vegetarian way of life.	Debbie
	2020-04-28 07:45:20	Western Cape		No I do not	While I am a meat eater, i dont condone the cruel way animals are treated They are exported alive, in shocking conditions and treated inhumanely. On the new ammended list are several either endangered or some domestic animals that are very questionable whether they are actually going to be used for food or only parts of them that will be used for so called unscientifically proven medicine. We as humans should take responsibility to not treat animals with cruelty and I feel exporting, in particularly with live animals is just wrong.	Karin
	2020-04-28 07:44:45	Western Cape		No I do not	We cannot add endangered species to this list. It will only speed up their extinction. Also, have we learnt nothing from COVID-19? Leave exotic animals off the list!	Daniek

	2020-04-28 07:22:48	Western Cape		No I do not	It should be illegal to eat any Bush meat, any wild animal, any endangered species. People shoukd be educated and encouraged not to eat any meat at all, to save the planet, for their health, and to oreve t diseases and viruses like COVID 19 and other coorina viruses. People should eat a plant based diet, humans should be Vegetarian if not Vegan. Humans are omnivore nor carnivore so should eat as herbivore, humans should not eat meat. It is because of the sale of meat at a wet market in China that we now have a global pandemic. Educate people to have fewer babies and not to eat meat, then we can save the world.	Ros
	2020-04-28 07:22:28	Western Cape		No I do not	Seems this list has been adjusted merely for the benefit of Asian countries such as China. We as Africans do not consume Elephants / Rhinoceros etc. How has this amendment even been considered as a change to an act??? Seems very convenient at a time where South Africa just pulled R500million rand out of the sky. Absolutely not - it is our job as Africans to protect our wildlife. We are in this global mess because of Wildlife being consumed when it SHOULDN'T be. Don't do this.	Murfey
	2020-04-28 07:15:03	Western Cape		No I do not	All humans should be eating LESS MEAT of hopefully NO MEAT AT ALL in order to save the planet. COVID 19 started because a bat was in a wet market. If every human in the world was at least VEGETARIAN, if not the better option Vegan, there would be no noval Corona virus. ALL BUSH MEAT SHOULD BE BANNED COMPLETELY everywhere in the world to prevent sickness, diseases, viruses. All meat farming and hunting and meat eating should be discouraged to save the planrt for future generations. Anyone caught eating an endangered animal or any wild animal should be put in jail with murderers, rapists, child abusers and animal abusers or anyone who is cruel to the innocent - children and animals. People should be EDUCATED to NOT EAT ANY MEAT AT ALL and to have NO CHILDREN OR FEWER CHILDREN to save the planet. If people practiced birth control, and only had 0 or 1 or maximum 2 children, and if people ate plant based food only, no meat at all, there would be no COVID 19. It could have been prevented if people were not so greedy. If people stop eating meat, they slow down global warming. All meat should be banned, but especially Bush meat, wild animals and endangered species because the human population and especially the meat eating human population is destroying the planet, nature, the habitat of wild animals. There are too many humans on the planet, which is why we now have a new Corona virus because China did not stop the selling of meat and wild animals in a wet market. We should stop giving grants to people who have babies, as this encourages them to breed, and we should make any meat so expensive that no one can afford to buy it. Humans are omnivores, not carnivores. They can easily live as herbivores and leave all meat out of their diet completely, then they will be healthier and the planet will be healthier. It is the only moral way to live a decent life.	Ros . Rosalind Jean

	2020-04-28 07:14:08	Western Cape		No I do not	Unless there is data driven evidence that the sale of non-agricultural or' bush meat' aids in the protection of those species and this government department has met its performance indicators for 3 years running, it would be unwise to support this amendment. 	2020-04-28 07:12:22	Western Cape		No I do not	I am strongly opposed to this amendment. The whole world is now in a state of calamitous catastrophy, the like of which has not been seen for 100 years. There is little doubt that the COVID-19 virus was transmitted to humans through the sale of "bush meat" which had been exported to China. As such there is little to be gained and much to be put at serious risk by permitting the export of meat produced from the animals listed in this amendment. The amendment must be scrapped in it's entirety.	J. F.

					I am a vegetarian and am not entirely in support of us humans eating all our brothers and sisters who are residing soulfully in the animal kingdom. I feel they too have a right to life and that we do not have the right to kill them overly much and negligently , unconsciously and ungratefully to consume them. I feel that we are more wise when we cultivate plants and vegetables to consume - organically - with ethical mindfulness and love and rather than eating our animal friends in their masses. Each animal links to our human soul and therefore to eat up our whole Planet does not make sense as we are eating up the soul and spirit inside ourselves when we do this. It may be far more worthwhile to preserve animals wherever possible and to create other sources of food wherever possible. I feel we need to change our human food needs to being more simple and sustainable and less harmful. As humans we need to eat with reverence anything earth supplies for us to eat and less is often more. Let us make the list shorter and simpler - not longer and longer - let us at least aim to do this. These are choices.....and the manner of slaughtering on behalf of others is wrong too - each person ought to know what killing feels like themselves - not just going to a supermarket and buying meat off a shelf. We each need to know the life that was lost in order for us to consume its flesh. I feel personally and collectively that we need to become conscious human beings and not be allowed to be unconscious human doings in ALL ways. Let us aim to create heaven on earth.....respect all life.....act reverently in relation to all life.....be true. Thank you for considering these viewpoints. x

Scrap this idiotic draft off the table ASAP!	Retha
	2020-04-28 06:05:16	Western Cape		No I do not	Some of these animals are endangered species, it's bad enough the elephant are poached for their tusks, rhino for their horns, giraffe for their tails, Pangolins and other species for the traditional Chinese medicine . To allow any of the endangered species to be considered for consumption is irresponsible and unnecessary. The covid-19 pandemic which started in Wuhan wet market, where would life is sold for consumption hasn't even ended. People are still in lockdown and this amendment allows so much bush meat into circulation. What's to stop another pandemic breaking out in SA? Think carefully before signing away the protection of our endangered species and signing into being a bill that could may not be able to protect human health and well being.	Fern

	2020-04-28 05:06:00	Western Cape		No I do not	The endangered species and many of the "wild" wildlife animals should absolutely not be on the list . The entire list needs revising. The rise of COVID 19 is as a result of the intended consumption of "wild" animals. Does SOUTH AFRICA really want to be the centre of the next virus outbreak? Dear Minister, take a stand and make the right decision or if you are uncertain, at least seek advice from those who dedicate their lives to matters such as this. 	2020-04-27 22:51:59	Western Cape		No I do not	Looking at the attached list of animals, I can already see where this is going. The covid virus was not spread by any of these animals. Most of the animals on the list are not on the endangered species list either. Most of them can be found in huge numbers on farms across the country. I have been hunting game for the past 35 years and because of people like me, farmers have been keeping and breeding game as it is a lucrative farming commodity. Without hunters and breeders there wont be any of these game animals Mrs the Minister. We conserve these animals so that we have adequate numbers to hunt in the years to come. We slaughter and prepare the carcasses ourselves as we have been doing for decades. We don't use abattoirs to do it, we do it ourselves as it is the practical thing to do. No one I know has ever fallen ill by consuming game meat. We DO NOT EAT BATS, BABOONS or any other weird and wonderful animals like your Main business partners in China does. 	2020-04-27 21:38:56	Western Cape		No I do not	Adding a new list of animals that can be slaughtered for human consumption is absolutely the wrong thing to do. Wildlife organizations all over the world are already losing the battle to stop the extinction of many wildlife species, such as the rhino, giraffe and others, yet this new amendment of the meat safety Act will destroy their efforts completely. It is a even more puzzling with arrival of Covid 19 which has now been proved to have originated in wildlife meat markets,most likely in China. Please do not add any new wildlife animals to the Meat Safety Act. Save our wildlife, they are the Crown Jewels of Africa and the World.	Greg

	2020-04-27 21:27:36	Western Cape		No I do not	In the light of yet another New Coronavirus having come from our exploitation and consumption of animals, instead of adding animals to the slaughter list, we need to completely change our use of animals for food, and encourage a healthy plant based diet for all. The overcrowding in factory farms is the perfect breeding ground for the next deadly coronavirus. We need to be moving away from flesh consumption, and not looking to increase it.	Antoinette

	2020-04-27 20:22:58	Western Cape		No I do not	The notion of classifying threatened species such as rhino and elephant, or any South African wildlife, so that they can be used for consumption or export and sale is shocking and completely barbaric. This must not be allowed. Apart from appalling lack of understanding of ,and cruelty to, animals, it would decimate our tourism industry, and disgrace South Africa	Alex
	2020-04-27 20:07:01	Western Cape		No I do not	I do not believe this is the right thing to do. Endangered or threatened species should not be on a list for slaughter or to be consumed by humans at all.	Amber

	2020-04-27 19:56:59	Western Cape		No I do not	I find this draft amendment beyond absurd. Shouldnt the minister be spending her time protecting our wildlife instead of wasting precious time on this? The mere fact that she is even thinking about it is a cause for concern.	Chrystal

Stop this madness in the pursuit of profit.	Neil

					Dear (Ms) T. Didiza, Minister of Agriculture, Land Reform and , Rural Development I, Barbara Karen Louw, ID # 710524 0036 087, urge you to remove all South African wildlife that occurs naturally here in South Africa from the proposed update to Schedule 1, as provided for in section 1(2) of the Meat Safety Act, 2000 (Act No 40 of 2000), listing the animals to which the Act applies, as well as removing Elephant, and Hippopotamus from the now very out dated ACT #40 drafted on the 1 NOVEMBER 2000. We need to close all loopholes where this meat could end up in wet markets / or on the menus of elite restaurants anywhere in the world. We do not want to promote this kind of trade due to the risk of exposing our global population to coronaviruses that may possibly cause massive socio economic disasters like the one we are experiencing right now. Our wildlife is one of our greatest commodities. Our tourism needs our wildlife to be conserved, our tourism industry will suffer greatly if the amendment is passed. Please consider this request urgently, you do not want the extinction of certain animal species to fall in your hands. THIS is a crime against humanity. Thank you for your time. Barbara Louw	
	2020-04-27 18:09:24	Western Cape		No I do not		Barbara
	2020-04-27 18:07:56	Western Cape		No I do not	I fo not support the inclusion of many of the wild animals on this list. Animals like lions should never be commodities, this is just disingenuous, and the attempt to include many wild animals as farm animals is just plain immoral and wrong.	Jean
	2020-04-27 18:07:37	Western Cape		No I do not	I do not support this decision re. wildlife as most of the animals and birds are highly endangered already. We just saw what is happening with Covid 19 in China and the consumption of wildlife situation.	Jacqueline
	2020-04-27 17:49:25	Western Cape		No I do not	We do not support this amendment. One of these days all our wild animals are going to be on the list of endangered species. Please stop killing our wildlife and fish. They also play a very important part in tourism that generate a much needed income for our country.	Cornelius
	2020-04-27 17:46:32	Western Cape		No I do not	There are enough animals on the list of endangered species, we should formulate amendments to protect rather than to endanger more animals!	Albert
	2020-04-27 17:44:40	Western Cape		No I do not		Stefan
	2020-04-27 17:26:08	Western Cape		No I do not	Please do not allow this. These animals have feelings but no voice. I am their voice! They have family structures, they moarn, they feel. These amazing animals in their free and wild state are what makes this world beautiful. Nature and all that lives in it, deserves to be respected and cherished, not exploited and destroyed. We have a God given mandate to protect and care for them not to slaughter for gain. If we keep on killing everything, what will we have at the end of the day? Alot of blood on our hands and suffering, for the gain and greed of a few. This would be an absolute obscene crime in my eyes. I plead on behalf of every creature!	Natalie
	2020-04-27 17:23:09	Western Cape		No I do not	Why on earth would Government want to endangered animals to lists like these? Look after our wildlife!	Evan

	2020-04-27 17:16:39	Western Cape		No I do not		Renske
	2020-04-27 17:14:33	Western Cape		No I do not	Good day! We live in a world where there should and must be mutual respect and for both people and animals. The fact that people consume meats that are farmed such as cows, sheep etc is tolerated but not truly acceptable in its operational form. To now look at consuming wildlife is a recipe for disaster. One only has to look at the current situation with COVID 19 to know there must be a healthy distance, respect and acknowledgement that some species are not to be consumed but permitted to live as wildlife as nature intended. We must cease this tragic and brutal onslaught on wildlife. I urge you to respect this and take cognizance of what is right and what is wrong! I could go on and on about the integrity, long term effects of the proposed bill but I am sure you are aware of the situation and how appalling the concept is. Thank you M. Jankelow	Michele
	2020-04-27 17:00:17	Western Cape		No I do not	There are many animals that should not be on this list in the first place and choosing to place threatened species on this list is even more ridiculous; that makes NO sense. They are meant to be protected by government and not exploited.	Kris
	2020-04-27 17:00:15	Western Cape		No I do not	Surely we have enough farmers producing enough meat protein for slaughter, consumption, sale and export?? Are the farmers getting enough support?? And why not keep the old list.?? I'm shocked, disappointed and disgusted!!! I cannot believe that the slaughter of our endangered and protected species, that the whole country is outraged about being poached, is even being considered in the new list of animals. Can you imagine our beautiful country without these magnificent creatures? Even many of the smaller species? They are all an integral part of who and what we are. This is AFRICA. Please Mr President, read through this new list with the passion of Africa and our heritage.	Jennifer
	2020-04-27 16:57:27	Western Cape		No I do not	We have enough types of meat to satisfy all tastes. There is no need to add more animals.	Jane

	2020-04-27 16:57:15	Western Cape		No I do not		Hester
	2020-04-27 16:41:37	Western Cape		No I do not	If there is any logic to widening the list of animals for import/export it is not apparent in the proposed legislative change. Including animals on the endangered list for 'export and 'slaughter' can hardly improve South Africa's image internationally particularly at this current time with the Corona Virus decimating the planet and the confirmed link between animal and human transference. Re-think the list, re-think the legislation and if the import/export (not for slaughter) of animals for ensuring their continued existence, through select breeding programmes outside Africa is supportable, motivate legislation accordingly.	Michael
	2020-04-27 16:39:15	Western Cape		No I do not		Hildegarde
	2020-04-27 16:39:07	Western Cape		No I do not	I have been a non-meat eater for many years, a decision that is based on the following considerations: Whilst I understand and accept without judgement, that people need to eat and that possibly meat is the only source of protein, even of food, for many people, I feel that the fear that animals, who have an awareness beyond what humans can know, must experience at the hands of humans both in the wilds as well as in the raising of them in private undertakings, for their ultimate slaughter, to provide food for humans generally, is incredibly cruel and inhumane. Many are kept in over-crowded conditions, are fed a variety of hormones to speed up their growth etc. and are then taken, often in overcrowded conditions too, to places of slaughter. Their fear is, for me, awful to contemplate, as is the cruel treatment of any species, human or otherwise. That fear, (as well as the hormones, must surely be ingested by those who eat the meat and who knows what this causes in the human body and even psyche? Our current world situation, though unusual, is a case in point as we do battle with the Covid 19??!! In urban as well as in rural areas there is food that may be consumed by humans that is not meat. Even the San people, known as Hunter-Gatherers, were more predominantly herbivores than carnivores. I understand that in the current world there are issues of land availability, and this makes takes this discussion way beyond the scope of this submission. However, a predominantly herbivore way of life is still possible and available to humans who have this as a choice! In the wilds animals kill other animals, but, usually, ONLY when they need to eat. Species that are carnivores have no other sources of food supplies. I am horrified to see that animals, including the beautiful creatures, some that are on the endangered species list and need human protection, are now among those that may be exported for their meat under the sanction of our government.! Millions of rand are donated and spent annually on conserving our animals in the wild which has its own natural culling for herd numbers control to prevent overcrowding. Surely though in our world more humane answers to any problems that exist, could be found in consultation with experts in this field, to prevent the slaughter for their meat, of these beautiful creatures?? This , ultimately, can hardly be called "The SAFETY of Meat Act" and certainly not the safety of our animals!!! PLEASE think again!	Nancye
	2020-04-27 16:34:48	Western Cape		No I do not	Instead of extending the list you should consider to minimize it to zero. There is no need to trade animals for any reason.	Dirk
	2020-04-27 16:31:54	Western Cape		No I do not	It will be a sad day if this proposed list of animals for slaughter is passed into law. Spare a thought for all the effort and expense which has gone into protecting our wild life, especially the Rhinocerous. it will all be wasted.	arthur
	2020-04-27 16:31:10	Western Cape		No I do not	I cannot support this Draft amendment as it includes endangered species, which should be protected, not licensed for slaughter and consumption. Furthermore the risks of animal to human viral transmission through consumption is unknown and especially pertinent at the current time. IMHO it would therefore be extremely irresponsible for our Government to proceed with the proposed amendment to the MSA. It's ethos does not seem in keeping with the thoughtful and informed way they are guiding the citizens of SA through the Covid-19 epidemic.	Andrea
	2020-04-27 16:28:42	Western Cape		No I do not	Animals are sentient beings, they are suffering enough with ongoing abuse, hunting and negligence. Humans have taken over their habitats threatening them more and more each day. Pls stop or ban this random slaughtering and export completely!	Angie
	2020-04-27 16:28:30	Western Cape		No I do not		Ben
	2020-04-27 16:17:14	Western Cape		No I do not	The idea of extending the list classifying animals for slaughter, consumption, import, export and sale is irresponsible, indecent and definitely unacceptable. What ever could be the reasoning behind this? Please do not go forward with this abominable idea.	Gayle
	2020-04-27 16:02:38	Western Cape		No I do not	Please dont plunder our country. Protect our animals. We need to learn from wet markets in China.	Sharon

					Covid 19 has highlighted what we know already. The consumption of animal meat, industrial or wild, increases the outbreak of zoonotic outbreaks.(disease between animals and people.) Using animals ..wild or commercial in our food system is a risk to our species. We are presently experiencing the results of such a pandemic..... a public health and economic disaster, hunger and the destabilisation of governments. Right now we should be accelerating the production of plants ... in line with the movement towards plant based meat, milk and egg products. The UN Environmental programme has called for a worldwide diet change away from animal products. Why doesn't South Africa take this stance and become a world leading player ..away from meat to a plant based diet. The consequences of Commercial farming and wild life farming: *one creates an imbalance in the habitat of the environment * loss of biodiversity *disease transmission(viral and bacterial) *loss of ecologically balanced wildlife habitat * antibiotics and antibiotic resistance prevalent in commercial farming and humans. (antibiotics become less effective and no longer treats disease) The CDC warned that the POST ANITBIOTIC ERA has arrived and certain diseases can no longer be treated because of the overuse of antibiotics in animal(for consumption) and humans. *There is abundant evidence that animals in commercial conditions and the use and low dose of antibiotics for disease prevention ..is the perfect incubator for spontaneous mutation in the DNA of bacteria.(Robert Lawrence.. professor of environmental health) These resistance bacteria become new strains that spread all over the world. *By sending meat across borders we are ramping up disease spread even more. Strains previously isolated from each other now can recombine creating new and devastating viral outbreaks. Read... ' Tyronisation ' Greger *There is evidence that 15% of annual global greenhouse gas emmissions are contributed to animal agriculture. Plant agriculture has a less significant effect on the environment and climate change. To conclude our ecosystem is part of our natural heritage and should be protected to ensure it's survival. We are custodians of our landscape and need to protect and enhance biodiversity. 'Wild animals' are part of South Africa's proud heritage ...by turning them into a commercial food for export... our endangered species!!!!.. We might as well become cannibals!! It certainly is an indication of how humanity has regressed.

	2020-04-27 15:21:04	Western Cape		No I do not	Under the current coronavirus scenario, perhaps it's time to stop killing all animals, especially when the facts are screaming out viruses and climate change all linked to killing wild animals and destroying their habitat.	Chris

	2020-04-27 14:46:57	Western Cape		No I do not	Have they not learned a lesson crom China, where this virus was transmitted from wildlife to humans? Even if there was no Corona virus, where is the slaughtering going to stop? Humans can look after themselves, but not animals so they are dependant on the care and protection of humans. Please, please do not agree to this request for the sake of our humanity. Let us look after the wild animals and allow them to remain for future generations.	Lutz
	2020-04-27 14:43:36	Western Cape		No I do not	Many species are under threat of extinction, wholesale slaughter will result from such an amendment. Mankind has encroached into the animal kingdom with no regard to the species. SARS, MERS, Covid 19 is typical examples of what happens under this kind of "allowable" destruction, as it is clear that Government Departments are unable to control nor apply proper regulations or oversight.	Peter
	2020-04-27 14:40:51	Western Cape		No I do not	The notion of classifying threatened species such as rhino and elephant, or any South African wildlife, so that they can be used for consumption or export and sale is shocking and completely barbaric. 	2020-04-27 14:37:12	Western Cape		No I do not	This is so shocking and upsetting to read....LEAVE THE WILD ANIMALS ALONE !!!! The world is in such a mess and we are going to destroy it even more...the worst Animal on this planet that abuses and destroys is the the HUMAN BEING!!!!!!!	Janet
	2020-04-27 14:30:20	Western Cape		No I do not	Stop being retarded, stop treating animals as if they are there purely for humans to eat and profit off of. Eating a giraffe, or some other exotic animal, will not help you in any way whatsoever. If you believe it will, you are in no way fit, or intelligent enough, to be in office. Wake up.	Devon
	2020-04-27 14:27:50	Western Cape		No I do not	I am of the opinion that we are increasingly moving towards greater health challenges should this legislation be made law. We can't move away from the health care values as described in the Bible.	Alfred

	2020-04-27 14:25:34	Western Cape		No I do not	This list is absolutely unacceptable and has not been properly thought through. The parties responsible should be ashamed of themselves for such sloppy and incompetent work. While accepting meat is a required food source it should not include any threatened species and the process should be as humane as possible. No animals on a recognised list that are itemised as being threatened or endangered must be allowed to be included. The exception would be only meat from a recognised and authorised culling exercise to be temporally permitted. No new foreign wild animals should be allowed to be brought in for breeding and slaughter. Commercialisation of wild animals bred for slaughter must be limited, and genetics monitored so that weak breeding lines are not propagated The list needs to be very specific, as generalisations like "pigeons" includes some specific species that are actually endangered. More detail must be provided of fish and birds.	David
	2020-04-27 14:23:44	Western Cape		No I do not	To what end, certain of these animals are nearly extinct. This smacks of this country being sold to a certain Oriental Country.	Daron
	2020-04-27 14:18:59	Western Cape		No I do not	Any animal not deemed NECESSARY for our survival should not be on any list for consumption. No need to wipe out an entire planets ecosystem to feed ourselves.	Alan
	2020-04-27 14:14:12	Western Cape		No I do not	ANY animal that is considered to be an endangered animal should not be on this list. Many of these animals help this country and her people to generate income and their continued survival is crucial to ensure the well being of not only the environments where they live but also the economic security and livelihood of those that care for these animals. Rhino, elephants and giraffes are well-known animals that are representatives of not only this country but also this continent.	Robyn
	2020-04-27 14:05:17	Western Cape		No I do not	Leave the wild animals alone., for heavens sake. Are we not yet learning anything from the raging virus ? 	2020-04-27 13:58:53	Western Cape		No I do not	I see no rhyme or reason for this . Our wildlife is a great source of income from tourism. Once killed to extinction this will no longer be the case. I do want future generations to also enjoy seeing wildlife that is currently on the endangered list. We do not know what the health implications are of allowing meat of these more exotic animals to be up for consumption. Thus we may create another problem by allowing the consumption. How would the slaughter and making available the products of the animals be regulated for our safety with wildlife not normally close to slaughter houses? Please rethink this.	Marietjie
	2020-04-27 13:58:08	Western Cape		No I do not	How can you add these animals - especially rhino - to this list. you will be undoing all the anti poach efforts.	Leonhard

	2020-04-27 13:12:22	Western Cape		No I do not	I do not support this draft amendment which includes Rhino, Elephant, Grifaff, Hippo, Buffalo and much of the wild antelope and bird species. We must all cost support the efforts of protecting our wild life in South Africa. We have lost too much already due to the unscurpulous greed of many. We have spent millions already trying to protect our Rhino - to put Rhino on this list will just open the floodgates for more carnage and abuse. I feel the same about the rest of the animals I have put in this email. It is absolutely irresponsible of Ms Didiza.. It surprizes and upsets me (together with millions of people) that this has even been taken into consideration.	Elize
	2020-04-27 13:08:23	Western Cape		No I do not	These are endangered species, this will wipe out these breeds and wildlife will no longer exist thus wiping out the Tourism industry. Haven't enough industries already been wiped out with the coronavirus.	Ann
	2020-04-27 13:04:20	Western Cape		No I do not	In the light of zoonotic disease outbreaks such as COVID19 this is insane. Apart from the obvious animal welfare infringements, there is no regard for the environment or Public Health.	Sharyn

	2020-04-27 13:00:06	Western Cape		No I do not	I do not support this amendment for several reasons. Firstly the inclusion of many endangered species on this list immediately causes concern. While I understand that certain populations of wild animals need to be controlled through culling surely this does not include those species we are fighting protect, even for those species not critically endangered, I believe that opening upthe control of their numbers to industry of any sort causes the line between ethical conservation efforts and exploitation to blur even further than it has done already. The fact that we are currently enduring the worst pandemic in our lifetimes due to the harvest of wild animals for human consumption must also have some weight when considering the further legalisation of such practices in our country.	Emma

	2020-04-27 12:48:10	Western Cape		No I do not	I strongly object to this draft amendment to the Meat Safety Act. I am totally against the killing of our wild and endangered animals. Already so many of our animals are extinct or nearly so. Please protect our wild animals by cancelling this amendment.	Cynthia
	2020-04-27 12:46:03	Western Cape		No I do not	This act is unacceptable. Animals such as rhino, elephant and giraffe should not be available for consumption.	Michelle

	2020-04-27 12:43:45	Western Cape		No I do not	It is totally not acceptable to slaughter wild life. I do not see any reason for this bill to be accepted. We have no respect for this earth that we live on. Yes we need to slaughter for food but let us keep to the animals that we know(sheep, beef, pork, chickens) We consume way to much proteins in the form of meat.	Therese

	2020-04-27 12:40:46	Western Cape		No I do not	Doesn't the ANC government learn anything? We are currently in lockdown world-wide due to China's insatiable hunger for wild animals and animal products. During 2014-2016, West Africa had to contend with Ebola - where over 30,000 were infected and close to 12,000 people died - due to the continued selling and consumption of so-called "bush meat". The time is now for a total ban on the sale and consumption of any kind of wild animal!	Marilie

	2020-07-14 13:52:11	Western Cape		No I do not	The new draft looks like a kill anything that moves. Not an educated person"s decision. If an animal is on the endangered list it should be a definite no-no. Don't think of today only, preserve our animals for all our tomorrows, our children's futures are important. If the present meat , animals are not enough, eat more vegetables. Better still, limit your meat intake, better for your health and heart.	Shirley

	2020-07-14 11:53:23	Western Cape		No I do not	Sure, lets eat a bunch of endangered animals and help them be annihilated faster, whats the worst that can happen, and lets not bother doing proper health testing after all animal to human diseases are never an issue.	Rudi

	2020-07-13 12:53:01	Western Cape		No I do not	Our wildlife is already under substantial threat from poaching and loss of habitat and this law will be abused and misused putting our wild animal population under even greater threat. It would be a highly irresponsible action on the part of government who should be protecting this precious resource that is an integral part of our heritage and tourism.	Sonya
	2020-07-13 10:55:59	Western Cape		No I do not	Our government has completely lost the plot!!!! How on earth can one even consider having endangered animals on this list? Why dont they put people as an option - there is enough of us around!	Anita

	2020-07-13 10:03:09	Western Cape		No I do not	South Africa already struggles to manage the exploitation of wild and exotic animals - adding more animals to the list of ediuble/consumable animals will muddle the already murky waters of wildlife in trade and expose our country to animal exploitation. The larger the animal being reared the larger the environmental impact (from soil erosion to land degradation and the trade off between agri land for growing edible foods versus growing food for animals). As a country we need to understand the entire systemic impact on people, plants, animals, the ecomony and the community before we can agree to this revised list. Sustainable long term growth that balances ethical and economic impact is crucial.	Helene

	2020-07-11 12:33:25	Western Cape		No I do not	Please consider carefully the potential impact of this legislation. This would surely lead to even more cases of Lion farming and boost poaching of endangered animals like rhino. The government should rather be encouraging small scale chicken farming. 	2020-07-11 12:18:52	Western Cape		No I do not	To sacrifice our wildlife as a profit source is totally insane. Kill the wildlife and kill the hugely profitable tourist industry! 	2020-07-11 00:29:15	Western Cape		No I do not	No wild animals that could enhance the viewing experiences of our wild game tourist industry should be killed, except for medical or environmental protection reasons. This should be as decided by the independent vets involved, if medical, and by environmental scientists qualified and experienced, if environmental reasons . And the edible meat of such killed animals should be for local consumption only, no export licences issued, and the meat identified and stamped for identification by government inspectors . No imported wild animals should be permitted to be anything other than for breeding stock or for tourism promotion, in legally registered game parks or conservancies, ie. for viewing or rehabilitation purposes.	Diarmuid
	2020-07-11 00:22:23	Western Cape		No I do not	Look what happened in China and now in the rest of the world. COVID 19 but SA are so greedy that they could not care. It's all about money. Animals will be killed to extinction and man who thinks he knows it all will still not be happy even if he dies because of a new virus. Earth cannot handle all the millions of people and something serious is going to happen soon to teach us a lesson. Stop killing animals and do something about the human population growth.	Christilene

	2020-07-10 14:33:27	Western Cape		No I do not	The old list was already extensive why include wild life for Human consumption. It's not like there is a shortage of cattle, sheep, goat, pigs or chickens. We are already killing turkeys now you want to include Peacocks as well. Our Rhinos are currently being killed for the horns which in itself is barbaric now we want to say hey its okay you can now kill it to sell the meat. Have some dignity and self respect for nature. I am sorry but killing an elephant for human consumption is crossing the line.	Wedah

	2020-07-10 13:59:31	Western Cape		No I do not	1. The potential for diseases to jump species will be exacerbated by doing this 2. The current ANC government has demonstrated in many ways that it is unable to enforce legislation that it passes. This will become a free ticket for anyone and everyone to have open season on wildlife in protected areas, as it will be seen as a free resource to exploit without incurring any cost 3. I believe this is just another way for the ANC cadres to enrich themselves, by exploiting our natural resources for their own gain by taking control of who and who may not use this resource	Ken
	2020-07-10 13:52:20	Western Cape		No I do not	For a start, diseases have come from eating wild animals. Secondly, a lot of wildlife is endangered. Thirdly, they attract many tourists and income by being alive and wild. It's insulting to have to explain this to government officials who should be able to make educated choices.... But once again, the leaders are throwing all South Africans to the wolves... with our wild animals.	Aimee

	2020-07-10 13:35:06	Western Cape		No I do not	This is an excuse to sell off our wild animals as exotic food - more money for the gravy train riders! This will not, in any way, help the citizens of the country. It will endangers our already vulnerable wildlife and gives a ready excuse to poachers. This is plain rubbish! Where are your minds?!! And the added insult of already endangered species on the list? You greedy halfwits are making our country look like money hungry, mentally vacant morons! 	2020-07-10 13:02:57	Western Cape		No I do not	There is little explanation for this desire to add wild animals to the definition of livestock. Livestock by its nature are domesticated animals. By mass farming them as the world currently does, we are creating monster diseases and soon to be irreversible ecological damage. To classify wild animals as livestock is a blatant and small minded attempt to maximise income in the hands of a very few at the expense of a very large number. There is ZERO JUSTIFICATION.	caroline

	2020-07-10 12:31:47	Western Cape		No I do not	I'm from the UK and spent many years as a travel agent. I can tell you now no one will want to visit a country that treats it's wildlife in this way. It is probably the main attraction for tourists who want to visit Africa. Allowing this will send a terrible message and will inevitably mean tourists going elsewhere. We should be preserving and protecting this valuable asset for the future. There are enough deterrents for people visiting South Africa without making yourselves the pariah of the wildlife tourism world.	philip

	2020-07-10 11:36:52	Western Cape		No I do not	I do not support the amendment as I think it is totally unnecessary. In this Country we have an agricultural sector as well as a tourism sector. If managed correctly both sectors should bring in foreign investment and currency. The tourism sector is and can be a massive sector to get local and foreign visitors to spend time in the beautiful game parks etc and this intern will create work in desperately needed foreign income. Which incidentally will also result in foreign exchange being spent in many other tourist regions that do not have wildlife. To open up the proposed draft will do nothing short of legalizing poaching. The agricultural industry has more than enough capacity to feed this country and export to others. The first thing we have to stop doing is allowing the cheep imports of goods that we should be producing ourselves. Thus, making local production non-competitive and costing an enormous amount of much needed jobs. Why do we have to kill the Golden Goose?	Gail

	2020-07-10 09:46:08	Western Cape		No I do not	I do not agree with broadening the already very large list of animals. We should be aiming to minimise our impact on the environment if we would like it to keep supporting us, not destroy it as quickly as we can. Rhinoceroses?? Are you serious? How can we put highly endangered species on the dinner table? A species that has one of it's last remaining strongholds in our beloved country and this is how we behave. Shameful. I would also be interested to know who is eating all these expensive antelope? Strangely enough, something smells fishy. I agree that we should be changing this list drastically, in the other direction. We should be removing many of these (now endangered) animals from our stale lists from the past, and be managing our country, environment, and resources adaptively for a more sustainable and equitable future. This sort of destructive behaviour will only lead to more troubles.	Michael

	2020-07-10 09:31:20	Western Cape		No I do not	This amendment appears to open a doorway for the trade in animal products that will be detrimental to their conservation, despite vague statements to the contrary. The assumption must be that a big part of the motivation is the use of such products in traditional medicine, not only in South Africa and the rest of Africa, but also in Asian countries such as China, as well as to use them as delicacy food items in Asian countries and other places, where such products command exorbitant prices. Removing legal barriers around the protection of animals and the use of products derived from them will massively increase the destruction of their populations. Just claiming that it would not happen does not change the fact that the history of how humans use and abuse animals speaks volumes about how quickly these animals can be pushed into extinction and how people will use legal loopholes to be allowed to do so. I believe that other kinds of legislation can be formulated that would facilitate the breeding and sale of captive bred animals and their products that are necessary for traditional medicine use and perhaps western medicine and certain kinds of research (and NOT for general use as food or to sell as pets). In the same way that legal medical marijuana or opioid products are produced and sold under specially controlled circumstances and legislation, animals needed for research, traditional medicine or other uses can be bred specifically to purpose and under legislation geared to the specific animals and uses. This amendment is a blanket removal of the legal protections that are vital to conserving our heritage from unscrupulous abuse and should not be accepted. I am not against a complete use of animal products, and I understand that they are important in traditional medicine, research and even in certain industrial circumstances, but animals are still living things that deserve to live and die with dignity and without suffering. The law should protect them even more than it does, and not less, such as this amendment proposes.	Rudi

There are enough animals on the old list being slaughtered for consumption. We are going through a pandemic of COVID-19, no cure. This all started in China where they slaughter any animal to consume... That's just wrong. I think our government is getting greedy to make more money. It's okay if we don't want Rabbit, we already have a long list of animals with the basic lamb being so expensive per kg for 5 pieces of stewing lamb...	Charmion
	2020-07-09 21:09:37	Western Cape		No I do not	I am UTTERLY OPPOSED to the sale for consumption of our wild animals heritage. So many of these species are under huge environmental pressure and many are predicted to be extinct by 2050. We cannot leave such a shocking legacy for further generations of South Africa - this is an environmental crime of the first order. Just to satisfy a few exotic taste sensations eating elephant for instance - cannot possibly be justified. Elephants are sacred creatures - to allow them to be slaughtered just for the sake of a few meals is to mess with fundamental, spiritual entities that power our planet. To interfere with the natural order of organisms and thereby disrupt the food chain by removing such a large group of creatures is to invite environmental disaster down the road. Any biologist will tell you this - listen to the scientists!!! Does one need a bigger warning than The Covid Pandemic to warn about messing with wild life. 	2020-07-09 15:01:26	Western Cape		No I do not	The new and extended list of animals include various species of animals which also appear on the WHO's Endangered, Vulnerable and Threatened Animal list, e.g., rhinoceros and elephants. These wild animals are our heritage which we need to preserve for many generations to come. To allow these animals to be placed on the meat safety act (for mass slaughter and consumption) is contrary to the laws of nature. A classic example of why wild animals should not be permitted for domestic consumption is not only the current Covid-19 pandemic, but also various other diseases which have been proven to have come from animals. The vast majority of tourists come to the RSA to visit the Kruger and other Parks, so that they view our most treasured national asset, namely, our amazing wild life. Can you imagine serving these same tourists a plate of Lion stew, or a delicious platter of Crocodile, Puff adder and Wild dog hors d’oeuvres. Wild animals MUST NOT be added to a list along with chickens, cattle, pigs, and fish etc. It is beyond comprehension that the SA government would even consider adding wild animals such as Rhino, elephant, giraffe, lion and more as agricultural animals fit for consumption or commercial trade. This reeks of corruption, greed and low morale and is so so short sighted. Yet another reason for tourists to abandon South Africa as a destination. A word of warning from those that you seek to destroy, butcher us and your country will lose the vast majority of tourist that come to visit us, and to delight in what they see.’ NB!!!! 	2020-07-09 12:55:54	Western Cape		No I do not	This proposed amendment to the Meat Safety Act is barbarous. There is no necessity for the amendment at all. None of the wildlife species listed should be exported or slaughtered for human consumption. Many of the species listed are endangered. Is it the ANC's aim to enhance the extinction of these defenseless animals? Does the ANC not recognise the many years of conservation that have gone into saving the existence of many of the listed species in South Africa? The white rhino is just one. Furthermore, has the ANC learned nothing from the current Corona virus pandemic? It is highly likely that the virus originated from wildlife slaughtered at a wet market in Wuhan in China. Other pandemics are speculated to have the same origin. One has to wonder who and what are behind this travesty of legislation. There should be a total ban on killing or exporting all wildlife in South Africa.	Lynn

	2020-07-09 08:49:25	Western Cape		No I do not	It is not needed in terms of the fact that we already have adequate supplies of animal protein. Abbattoirs - slaughter procedures are very specialized and currently are not supervised and governed adequately. How on earth will this system cope with more! The intelligence levels and needs of the animals considered are very very different to farming cattle, pigs, sheep and chickens - which already are generally shocking in this country. The exploitation that goes on now is ludicrous - imagine adding to this with these animals. By adding these animals to the list we are surely opening up to go the exact same way that China has gone - and look where that has taken then globally re health and genetal acceptance of their food practices. Cruelty and general lack of respect and care in this country already exists at a pandemic level - this will just feed it! And not only on an environmental and animal level but also on a human and humane level. Research has proved this - just look at what the SPCA have uncovered and proven! Export too is TOTALLY inadequate for animals on this level. What experts have been consulted? What studies have been done to prove that this is NEEDED! REALLY! On what grounds is the minister saying this is a good thing, needed and necessary? Since when do we farm and eat wild animals at this level? Absolute madness! We will be sitting ducks for more health issues and pandemics.....	Tracy

					Dear Honourable Didiza Thank you for offering us the opportunity to provide comments on the proposed update to Schedule 1 of the South African Meat Safety Act 2000. If it so pleases you, People for Nature & Peace would like to submit the following in response to your request. Concerns about the proposed amendments • Lack of independent scientific evaluation of the principles underpinning the proposed changes • Lack of independent scientific assessment of or rationale behind the selection of species and their classification according to genera • Lack of clarity about the potential inclusion of non-listed species • Lack of consultation with range states non-native species, including those that are threatened and/or subject to international trade restrictions or bans • Lack of information about how non-native species, including those listed as threatened with extinction or protected by international agreements, including CITES, are to be obtained and for what purpose. • Lack of national and international wildlife trade enforcement capacity • Wildlife farming is recognized a major risk factor in the development of pandemics • The progressive monetization and commercialization of wildlife undermines biodiversity conservation • Meat and dairy consumption are a major source of global greenhouse gas emissions (51%). Therefore, the UN and others have called for a global shift towards a vegan diet to save the world from hunger, fuel poverty and the worst impacts of climate change. • The proposed amendments fail to consider the scientifically recognized sentience or animals, including their capacity to suffer as a result of capture, handling, captivity, transport and slaughter. In addition, we would like to make the following observations Wildlife farming, slaughter and trade raises the risk of zoonoses and pandemics Farming of wild animals for consumption or any other purposes and introducing non-native species to RSA also heightens the risk of developing new zoonotic outbreak and pandemics. Mammals and birds harbour an estimated 1.5 million viruses. Of these, about 700,000 can endanger human health. Today, zoonotic diseases account for around 60% of all emerging infectious disease, and a majority of these originate in wild animals. Scientists have long warned that the rate of emergence of these diseases is increasing. The risk of zoonoses is greatly increased when animals are taken out of their natural habitats and put under stress and in close proximity to other animals and humans. Almost half of the new diseases that jumped from animals to humans (called zoonotic pathogens) after 1940 can be traced to changes in land use, agriculture, or wildlife hunting. In fact, virus spillover risk from wildlife to people was shown to rise as contact between them increases. Johnston and her colleagues were able to show that “Domesticated species, primates and bats were identified as having more zoonotic viruses than other species. Among threatened wildlife species, those with population reductions owing to exploitation and loss of habitat shared more viruses with humans. Exploitation of wildlife through hunting and trade facilitates close contact between wildlife and humans, and our findings provide further evidence that exploitation, as well as anthropogenic activities that have caused losses in wildlife habitat quality, have increased opportunities for animal–human interactions and facilitated zoonotic disease transmission. Our study provides new evidence for assessing spillover risk from mammalian species and highlights convergent processes whereby the causes of wildlife population declines have facilitated the transmission of animal viruses to humans.” What scientific, peer reviewed research was conducted and accepted to justify the classification of specific genera? Many of the species listed in the amendment are listed on CITES appendices and have never been subject to farming for consumption or other commercial purposes. Most of those listed on the CITES trade database are listed exclusively as sourced from the wild and are mostly sold as trophies and skins rather than meat. This could indicate that these animals do not fare well in a farmed environment and in any case, e.g., Himalayan or sub-arctic species, are not biologically adapted captivity, farming or survival in South Africa’s environment. Other unsuitable entries include Mercistops leptorhynchus – a species which was only recently discovered, the Kiwi – a national and beloved symbol of New Zealand, as well as many others for which countries are investing significant resources to rebuild their numbers and protect them from exploitation and trade. We understand that there has been no consultation with range states about the inclusion of non-native species on the proposed inclusion on the list. Lack of clarity as to which species are included The wording of the act to include all other species of animals not mentioned in the published list – leaves a legal loophole which would allow for every single animal species within South African borders, rendering the proposed additions null and void. Non-specific wording and non-specific amendments create an opportunity for abuse and corruption. In such situations it is not uncommon for those at the top of the pyramid to benefit more than the communities they reside in. If the proposed amendments were made with any illusion of broader economic benefit and upliftment, then the amendments need to be considered carefully and not just accepted on an ill-advised whim.

	2020-07-09 02:42:11	Western Cape		No I do not	At a time when the world is slowly moving in a positive direction with regards to conservation, South Africa, blessed with a rich biodiversity should be leading the pack and not taking a step backward. The fact that some of the animals on the amended list include animals listed in CITES and TOPS is unconscionable. It must also be noted that illegal slaughter of animals currently takes place with impunity rendering the MSA hard to enforce. In pursuing this revision the government continues to be at odds with the constitutional declaration that animals are sentient creatures. Non-human animals have intrinsic value and we homo sapiens, to live up to the name of our own species, have a moral and ethical duty to protect them.	Natalia
	2020-07-09 00:20:45	Western Cape		No I do not	This is absolutely unacceptable! I cannot believe that something as unethical as this would even be considered! 	2020-07-09 00:04:15	Western Cape		No I do not	Firstly, animals have rights. There is a reason for this! People have learned from their past mistakes, so why is it that South Africa seems to be moving backwards in regards to animal rights? It doesn't make sense! In case you have forgotten, animals have feelings and are, in many ways, better than humans. This is just unethical nonsense! If you somehow don't have a love for animals, at least think of what this will do to our tourism industry! The problem is with the government, not the general South African public. We need to educate people about this! Come on! We're better than this! Leave the animals alone! Let's protect them rather than killing them!	Elana

	2020-07-08 15:47:20	Western Cape		No I do not	I definitely do not support the inclusion of our wild life. we have a healthy meat and chicken industry that can supply our population that government should be supporting. this includes the protection of our farmers ' lives that they are not receiving. More adequate protection of our fishing industry is also required. We are custodians of our wild life that has provided South Africa with a healthy income through tourism. Don't destroy the goose that lays the golden egg. We need diversity in our wild life, our food and our population to remain robust and strong. Whoever or whatever is driving this nefarious act must rethink. We are not interested in losing our wild life and nor are we interested in artificial meat further down the line. Thank you.	Beverley

	2020-07-08 14:30:19	Western Cape		No I do not	For goodness sake, how can we possibly kill rhino for meat? The country spends a fortune trying to protect these animals and then the poor creatures end up on a list that allows us to eat them - what insanity. In addition, if we look at the history of modern viruses, particularly Corona and HIV, these crossed over from non-domesticated animals; surely it would be in our interest to eat less meat rather than bring in new species as food? I am not a vegetarian but would recommend that the world moves more towards a plant-based diet for the future of the planet.	Sarah
	2020-07-08 14:28:57	Western Cape		No I do not	Totally unnecessary and can only be for someone's bragging rights to claim they've eaten some of the meat of these animals. 	2020-07-08 14:02:56	Western Cape		No I do not	This is total insanity and catering only to wants of China, all our wild animals found in Southern Africa are our heritage and should be protected by all South Africans and by CITES. ANC have shown in the past that there is no accountability for decisions taken, especially regarding the export and hunting of wild animals - think Lions and the whole sale slaughter and poaching of Rhino and pangolin. Once these animals are wiped off the face of the earth due the nefarious actions of the ANC - there will be no coming back from that. Remember China is an insatiable beast that will never stop. It is up to every South African to stop and defend our heritage.	Penny

	2020-07-07 17:30:19	Western Cape		No I do not	Please do not interfere with our endangered wildlife that has been protected for many years! Our animals make South Africans proud!! These animals are an asset to our country, many tourists come to South Africa to view our beautiful, protected, endangered animals! If this Law is passed, pretty soon there will be no more animals to be proud of, just like everything else in this country. It will mean fewer tourists which will mean less money being spent in our country. This will result in major job losses all over the country and a major increase in unemployment and starvation!! Why oh why interfere in something that is successful, that attracts locals and tourists to view these animals? Why not ENFORCE NO killing of animals and PROTECT ALL ANIMALS? That way the animals are protected and saved, and people don't lose their jobs and their dignity. I cannot for the life of me understand why anybody would want to pass this Law. If people are hungry, Government should be providing feeding programs as well as skills programs to uplift communities, not allowing the public to slaughter animals!! Please, for the sake of all of our children and grandchildren, please DO NOT PASS THIS LAW.	S

	2020-07-07 15:55:18	Western Cape		No I do not	Our Wildlife and the environment, land , sea and air are already polluted and precarious. As humans, and the custodians of the Earth and all in it, we need to curb the desire for food that further endangers the creatures that are managing to survive to date.. Extinctions of species are a daily reality. Extending the list is likely to lead to uncontrolled hunting on widespread scale which will reinforce and exacerbate existing imbalances and degradation of the environment. OUR ENVIRONMENT IS A VALUABLE RESOURCE FOR ALL OF US IN SOUTH AFRICA. If we are to survive beyond COVID and overcrowding, we have to start by managing ourselves.	Marybelle
	2020-07-07 15:54:50	Western Cape		No I do not	It is unacceptable that any reptiles or endangered species should be exported for consumption. China has already threatened the world with so many horrific viruses from their wet markets. Why encourage some other horrendous pandemic?? 	2020-07-07 15:54:32	Western Cape		No I do not	I cannot believe that government is trying to push this, especially in the time of Covid. 	2020-07-07 13:56:02	Western Cape		No I do not	We have, as human beings exterminated any number of species. Some of us hang our heads in shame. It remains inexplicable that not everyone does. 	2020-07-07 13:48:13	Western Cape		No I do not	As we are currently experiencing a global pandemic which appears to have been started in the Wet Markets of China where any creature that moves is eaten, what is our government thinking. 	2020-07-07 13:33:36	Western Cape		No I do not	Instead of adding species to the list of animals to harvest for meat, we should prioritise finding ways of sustaining ourselves that do not necessitate animal suffering and propagate public health risks.	Merryl
	2020-07-07 13:31:34	Western Cape		No I do not	So the animals that are farmed for slaughter are not enough we now have to become greedy and go for the wildlife. Just like China	KAREN
	2020-07-07 13:24:36	Western Cape		No I do not	This is completely obscene. Did China have something to do with it because since they have arrived in Africa our animals have been decimated? Do we really need to kill more animals? It’s bad enough that factory farming exists. And lions are kept in cages when they should be roaming the planes naturally. Clearly this minister is from the old school of Africa where it’s take take take and pocket the money for feom The blood and torture Of what we consider a beautiful resource. Clearly she does not recognize that we are ALL connected no matter what species we are. That animals, because they cannot talk need our protection. And protection from us. The fact that this was slipped Under the door without anyone knowing about it screams CORRUPTION. It’s hideous and I will do everything I can, havingworked with the top press and tv shows in America to bring this woman and this judgement down. Why wouldn’t you, Ms. Didiza be known as someone who does the right thing, who carries the flame to do the right thing instead of just being another disgusting human being. You should be ashamed of yourself. Shame on you for even considering this. This is why Africa remains in the Middle Ages and cannot move forward. Rather make us proud.	Lana
	2020-07-07 13:19:04	Western Cape		No I do not	Have we not learnt from this pandemic that eating wild animals is not a good idea! Why on earth are endangered animals like Rhino on this list? It makes no sense. We should be protecting every rare individual not giving license to farm and eat them! We farm enough animals, we don't need to add any animals to this list.	Michaela
	2020-07-07 13:16:42	Western Cape		No I do not	I am a nurse and I do not believe that we should eat wild animals. They are a heritage we need to preserve and protect. 	2020-07-07 12:57:31	Western Cape		No I do not	This is the most disgusting thing that this incompetent government of our has come up with to date. Our tourist industry relies on visiting game reserves and enjoying the beauty of our wild life. These are majestic and beautiful animals and need to be respected and cared for. I can only imagine the abuse of and ill-treatment of these wild animals should this bill be passed. We should be going forwards and not backwards in this country. We all know what goes on in China and other Eastern countries: they eat anything that moves and have no regard to how these animals are kept or how they are slaughtered. We have enough worries with "saving the rhino" and "saving the pangolin" and "saving the elephants" without adding to the distress of our beloved wild life even further. We need to show that we are a humane society - not an inhumane society. I object with all my heart and soul to this proposal and hope never to see such heartless devastation and disrespect for God's creatures happening in this country.	Carol

	2020-07-07 12:52:31	Western Cape		No I do not	Is anyone actually eating the meat of elephants, rhinos or giraffes? This is just an excuse to hunt endangered species. There are enough cattle and sheep, or pigs and goats to eat. Leave our wildlife alone.	Trevor
	2020-07-07 12:49:46	Western Cape		No I do not	Why is it necessary to list these animals? The concept "meat" is well defined throughout the world. Is it simply because the concept "meat" changes south of the Limpopo and Orange rivers, while it has a different meaning for the rest of the planet and according to the Oxford and Cambridge dictionaries? Are we yet again assigning new meanings to the English words, the language of choice by government, since these dictionaries are not available , neither the international regulations? Is this simply a lesson to us in English literature by non English speaking teachers?	Francois

	2020-07-07 12:16:41	Western Cape		No I do not	It is unnecessary to add wore wildlife to the list. We have enough food. Some of the animals that are going to be added are endangered and the need to protect them outweighs the need for consumption. If endangered animals become extinct the knock on effect will be catastrophic.	Marian
	2020-07-07 12:04:51	Western Cape		No I do not	No No No. Definitely not	Del
	2020-07-07 12:04:02	Western Cape		No I do not	The exploitation of wild animals is definitely unnecessary. The wild life is not ours to exploit. It is part of our heritage. Too much has been lost already. These proposals will only lead to further decimation of this precious resource. We can be far more productive by utilizing our wild life in their natural environment and generating income from tourism for example. We keep and preserve our wild life and earn an income. Allowing the culling of wild life is a zero sum game.	Rick
	2020-07-07 11:57:41	Western Cape		No I do not	We cannot allow our wildlife to be slaughtered - with the risk that our future generations of children will not be able to see these beautiful creatures because they became extinct! It must NOT happen!	Nicholas
	2020-07-07 11:55:59	Western Cape		No I do not	Covid-19 is said to have come from markets dealing with the sale of dead animals. Now the SA Government wants to add to this by slaughtering many of our wild animals, no doubt for onward transmission to countries in the East. Do we know how safe this is? Leave our wild animals alone. They form part of our wonderful tourism industry.	Heather
	2020-07-07 11:51:19	Western Cape		No I do not	All the responsible world is trying to save our animals which are mainly on the endangered list, Botswana, Malawi, etc. Even in the East all breeding of tigers for trophy purposes has to stop. It is time that the world stopped dealing with Chin, Korea etc while they are demanding the importation of endangered animal parts and supporting poaching. What will they be wanting next? Slave labour? It would seem that corrupt senior officials are finding another way of lining their pockets.	Cecil
	2020-07-07 11:46:22	Western Cape		No I do not	I cannot believe that this is still a topic of discussion when we are sitting where we are today in a pandemic caused by the human consumption of wild animals. What we should be discussing is how to protect what remains of our wild animals.	Pam

	2020-07-07 11:43:15	Western Cape		No I do not	I have no words. Legalised poaching? Seriously?	Judy
	2020-07-07 11:40:15	Western Cape		No I do not	I do not support this draft by government. Wild animals should be able to live out their lives without the fear of being captured and slaughtered, it is just another name for poaching. If we spent this energy on humane practices when it comes to cattle, sheep chickens etc. we wouldn't have to go to these lengths. We also know that these mass slaughters whether controlled or not have a negative impact on our environment with excessive amounts of water that is needed during the slaughtering process. I think this is an excuse to make more money ie money and greed over living beings, which I'm sure you can agree is inhumane. And if that doesn't make sense, maybe we should consider the global impact that covid 19 has had which stems from eating wildlife.	Kristin
	2020-07-07 11:39:41	Western Cape		No I do not	The current pandemic should alert us that this change in legislation is disastrous! And South Africa can't control current legislation, never mind expanding to include all these other species. Why are kangaroos on the list??? A definite NO! 	2020-07-07 11:24:55	Western Cape		No I do not	It is abhorrent enough that man breeds animales to consume. To add to this abhorrence, a vast range of wild and some endangered species is unconscionable. Then again, many decisions of the ANC can be described thus!	STEPHEN
	2020-07-07 11:24:03	Western Cape		No I do not	Has humanity not suffered enough because of eating wildlife? the world is in crisis because of it. Our abalone is being stolen and exported from under our noses, and we as South Africans can't buy it in a local store. Now you want to sell our wildlife down the river as well, so that our children and there children will have no idea what wildlife existed in our beautiful country.	Glynnis

	2020-07-07 11:05:42	Western Cape		No I do not	Are these people stupid? Where on earth did they get their education! This amendment is disgusting and I definitely DO NOT support it! Stop wasting the tax payers money by thinking out stupid stuff to vote into law and start doing your jobs of governing the freaking country! 	2020-07-07 10:59:20	Western Cape		No I do not	As Humans, we need LESS meat, not more. Moreover, I am in total disagreement with Nature getting a smaller and smaller slice of the available landscape when we are so dependent as humans on Natural Resources. We should be expanding conserved areas, and expanding herds of wild animals to what they approximated before MAN came along ....to ensure the health of the planet , its biodiversity and our OWN ability to survive. To simply be exploiting these animals for anthropogenic purposes is to lose our sense of purpose. Can our government not see this?? Mans appetite is insatiable because we subscribe to the conecpt of GREED!! None of these animals takes more than it needs from the planet, and why do we need animal protein more than once a month. Why does anyone need powdered Rhino horn or an elepahnt tusk ornament??? There may be some sense in eating animals that are better adapted to the SA habitat than sheep and cattle, but these have been licensed in the MSA already??? NO NO NO NO NO NO NO NO to this amendment....	Bridget

	2020-07-07 10:57:35	Western Cape		No I do not	Please do not put these beautiful wild animals on the list. Our wildlife is already threatened and this would lead to further species going extinct. We have also learned from the Covid19 experience that eating wild animals can lead to the crossover and spread of deadly viruses. Let's take these lessons seriously and not make the same mistakes.	Leon
	2020-07-07 10:54:34	Western Cape		No I do not	No! Wild animals are a heritage for the world at large. Adding them to the "for consumption" list makes no sense whatsoever. 	2020-07-07 10:22:11	Western Cape		No I do not	One has to wonder if China's influence played a roll here as it seems they eat anything with a heart beat. My guess someone in government will prosper financially should this draft be amended.	Steven
	2020-07-07 10:19:50	Western Cape		No I do not	The inclusion of any game animal, including those on the list that are targeted by poachers, will put those animals under extreme pressure. The thought of some of the animals on this list being treated as cattle is reprehensible, and that government even considers this shows a total lack of understanding of conservation, not to mention and ethical and moral questions this raises. The world is aware of the SA governments smuggling of animals to China, and also the motivation behind this sudden move to include those animals on the consumables list in SA. It is to make excuses for the Chinese lack of moral and ethical compass in the way they treat animals in general, and also the animals they consume. This is not okay, and will never have the support of the greater public. Your reasons are based on you own personal greed and that alone is despicable. These animals are the true owners of Africa, and you have no right to treat them with a total lack of dignity. You should be ashamed of you despicable behavior, based in personal enrichment and pure greed. Game are carriers of deadly diseases and that you are so low as to even consider this, makes me and your ancestors hang their heads in shame.	Stephanie
	2020-07-07 10:17:26	Western Cape		No I do not	I am absolutely horrified that you would even suggest some of the animals on this list. Elephants, Rhinoceros, Giraffes and quite a few more are all endagered already. We have been trying to protect our animals from horn poaching before we lose them all.. then you suggest they can be slaughtered for consumption??? Are you NUTS!!!! This will just open up the entire country to those who have no respect for our heritage....for our animals.....NOOOOOOOO ABSOLUTELY NOT. Do you even know what you are thinking. What will be left for future generations :(	ARLETTE

	2020-07-07 10:15:36	Western Cape		No I do not	As a Human species I find it disgusting that we would like to destroy Nature in it,s entirety due to our greed and Gluttony. We know we are destroying the Earth but we continue to slaughter animals and what I find unacceptable is I listen to communities and in shops and they refer to the meat in a way that indicates that most people believe that meat is grown on trees . Yet most of those who eat meat have never slaughtered a animal themselves and should they do so, I can assure you they will not eat meat anymore. Absolutely disgusting the way we tend to legalize these activities as if it is our right. I hope that people will start understanding physics and realize that we are made up of the same dust and life given to a animal is the same life given to a human the only difference is the human mind has been given the choice of thought. That does not mean that we have the choice to destroy life if it is not deemed to be human. The interpretation made by man to compartmentalize other beings is just not acceptable. We are now allowing Government and private sector that through time look at other beings as products as if they are growing these. Just from a environmental aspect we already have too many Cattle in the world and this is already causing havoc globally with the effect that they have on the climate. But we want to increase our slaughter of innocent animals. totally unacceptable .	Kevan

	2020-07-07 09:19:38	Western Cape		No I do not	There are safe, healthy alternatives for meat available. Meat is not a necessity. Also, certain animals need to be protected, as their numbers are unable to support mass industrial processing of meat and byproducts.	John

	2020-07-07 07:10:24	Western Cape		No I do not	We have industry and employment focused on meat supply within normal accepted areas- beef, lamb, pork and chicken. Occasionally some exotics. That said, to allow wild meat production and harvesting has seen canned hunting, s bones trade, and sentiment that opposes this and opposes the exploitation of our wild life heritage. The location for wild life to exist should be preserved, and the animals protected from consumerism and commercialization, it is not necessary to make everything a trade commodity. Some things- our game and wildlife- should be preserved for heritage- for ever- as iconic and emblematic As South African history. 	2020-07-07 06:26:30	Western Cape		No I do not	This is completely outrageous. One would think that given the recent COVID-19 pandemic and the increase in viruses linked to animal-human transmission, we'd be extra careful. Aside from the danger posed by this, there is the conservation, tourism aspect of what us bring proposed. There will in all likelihood be increased, in humane poaching to fuel a "bush meat" trade. 	2020-07-07 01:10:03	Western Cape		No I do not	I have a good understanding of the issues as I have friends in both hunting and conservation. On the one hand, animals breed, and due to their limited habitat with limited food, sometimes they need to be culled in order to keep the rest of the herd healthy. At present the majority of animals that are not poached are culled in a humane way, none of the meat goes to waste and is processed by specialist game abattoirs. Legalising the mass slaughter, consumption, import and export of the majority of wild animals would be a disaster. For a start, their habitat and the South African landscape would be changed beyond recognition to domesticate them, with the focus on providing sufficient food to sustain much higher numbers in a given area. Savanna will become fields of crops with pens full of wild animals to maximise profit. It goes without saying that this will lead to stress for the animals, disease, and more pandemics. Of equal importance is the ability of Government to fight against poaching in order to save our most endangered species. If you legalise their slaughter, even if the details says you have to "own the animal to be allowed to kill it" the message to the population in rural areas will be that it's OK for them to kill and eat any wildlife they see. This will have a devastating effect on the wildlife and the tourist trade in South Africa. Finally, if you legalise the slaughter and sale of endangered species, how on earth do you think the courts will have any chance of prosecuting poachers and their masters caught with endangered wildlife?	Jason

	2020-07-06 20:21:12	Western Cape		No I do not	TIME AND TIME AGAIN, HISTORY HAS SHOWN THAT RELYING ON ANIMALS FOR FOOD IN THIS COUNTRY IS NOT REALISTIC, NOT SYSTAINABLE, NOT RELIABLE IN THIS CLIMATE, AND CAUSES SO MUCH POLLUTION THAT WHATEVER THE BENEFITS SEEM TO BE, THE ENVIRONMENTAL DESTRUCTION WILL COST MUCH MORE THAN THE BENEFITS. PRODUCING FOOD FOR ANIMAL FARMING IS TAKING UP TOO MUCH OF AVAILABLE FERTILE LAND, AND THE RESULTANT DAMAGE CAUSED BY BREEDING AND SLAUGHTERING MILLIONS OF ANIMALS IN CONFINED SPACES, IS INCALCULABLE, ESPECIALLY IN TERMS OF THE USE OF WATER AND ONGOING POLLLUTION AROUND FACTORY FARRMS. USING AND ABUSING DOMESTIC FARM ANIMALS FOR MODERN DAY FACTORY FARMING HAS BECOME AN APPALLING AND DEPLORABLE WAY OF MAKING PROFIT INSTEAD OF FOOD FOR THE POPULATION. IT IS TIME FOR ALL CITIZENS TO REALISE THAT THERE IS ONLY ONE WAY FOR A SUSTAINABLE FUTURE AND THAT IS TO PRODUCE PLANT FOOD PRODUCTS, CONSIDERING THE DAMAGE THAT ANIMAL FARMING IS DOING TO NATURE AND THE ENVIRONMENT, ESPECIALLY AT THIS TIME WHERE CLIMATE CHANGE IS LOOMING EVER CLOSER. THE BENEFITS OF PLANT FOOD CANNOT BE OVEREMPHASIZED, ESPECIALLY IN TERMS OF HEALTH, SUSTAINABILITY, AND ACCESS FOR ALL CITIZENS TO EITHER GROW THEIR OWN FOOD, OR TO SUPPORT LOCAL FOOD GROWING ENTERPRISES. TO EVEN INCLUDE WILDLIFE ON THE NEW LIST OF ANIMALS ALLOWED TO BE USED FOR SLAUGHTER IS UNBELIEVABLE AND APPALLING, CONSIDERING THAT WILDLIFE IS AT GREAT RISK FROM POACHING AND RECKLESS HUNTING. HAVING WILDLIFE IN THE COUNTRY IS A PRIVILEGE AND OF GREAT BENEFIT TO ALL CITIZENS IN TERMS OF THE POTENTIAL OF TOURISM AND SO MANY OTHER RELATED ACTIVITIES THAT BRING MILLIONS OF VISITORS AND INVESTORS INTO THE COUNTRY. PLEASE RECONSIDER PUTTING WILDLIFE AT RISK OF EXTINCTION BY INCLUDING THEM ON THIS LIST. THANK YOU	VAL

	2020-07-06 18:18:39	Western Cape		No I do not	It is inconceivable that at a time when the world is experiencing the worst pandemic that has been created by humanity's disrespect and disregard for Nature, and animals in particular, that some moron could even propose that humans (homohorrirblesimus maximus) should now munch up the most precious, endangered and beautiful creatures that share our planet.!! - and that are our greatest tourist asset.!! The fact that this is not a joke or scam - as I and others first thought- because it is so preposterous, is a SHOCKING indictment on the leadership of this ailing country. How amazing it would be, if with pride and compassion to protect and nurture ALL our creatures, we could show the world what a great country and leadership we have.?	Sheila
	2020-07-06 18:14:32	Western Cape		No I do not	People should be encouraged to eat less rather than more meat for health and environmental reasons. There is no reason other than financial greed, for more animals to be traded slaughtered and consumed. It is environmentally not sustainable, will lead to more poaching and crime and even more zoonotic disease and pandemic outbreaks.	Sandra

	2020-07-06 17:30:15	Western Cape		No I do not	Leave our wild animals alone - in the wild, not in the abbatoir. There's more than enough meat to eat, when the world should, for several reasons, be eating less meat, and more plant food. At the time of a world pandemic caused by a virus suspected of having jumped from wild animal to human being, this is more of a ludicrous extension of animal slaughter than at any other time (when it would be bad enough).	Jean
	2020-07-06 17:19:57	Western Cape		No I do not	Animals such as elephant, giraffe, roan antelope, porcupine and hippo are/will soon be endangered - this change in the law will encourage poaching and hasten the demise of many species.	Jane
	2020-07-06 17:17:02	Western Cape		No I do not	Allowing endangered or even at risk animals to this list could be catastrophic. You only have to look at recent events with coronavirus to show that wild animals should not be consumed under any circumstances.	Louis
	2020-07-06 17:14:25	Western Cape		No I do not	We are currently facing a pandemic because of the consumption of animals that cannot and should not be bred for consumption.	Heather

	2020-07-06 17:13:54	Western Cape		No I do not	I do not think it at all acceptable to include endangered species in a list of animals for human consumption, to be slaughtered etc. That is totally unacceptable. 	2020-07-06 17:09:41	Western Cape		No I do not	I don't understand why? What will ultimately happen is our wildlife will be sent to China. It is just morally wrong. Future African children and generations will have nothing left to marvel at. There is only so much left on earth. We need to preserve it	Deesel

	2020-07-06 16:16:00	Western Cape		No I do not	It is abhorrent to me that South Africa's iconic wild animals should be regarded simply as meat. They are our natural heritage - not consumptive resources.	Anina

	2020-07-06 16:13:34	Western Cape		No I do not	Conservation of our wild animals is our heritage and what makes South Africa a sort out option for foreign travellers. Our Game Parks and Nature Reserves bring in a hefty income for our country. As government is concerned with the economy, or should be, because of the state we are in, it seems sensible to open up our nature reserves and game parks fully. The world has far too many animals on the endangered list and we have plenty of them. It has taken years to grow some of the species to a good number. It was certainly not to be slaughtered by gun toting thugs who want to kill anything. How does government decide what animals may be killed and where? Has no one thought this through or are we so blinded by foreign dictates that we cannot so 'no'?	Gillian
	2020-07-06 16:01:22	Western Cape		No I do not	We need to be very careful that we do not go down the route of China and start eating exotic animals that could cause another world-wide pandemic. Please think before passing such laws !	DAVE
	2020-07-06 15:58:31	Western Cape		No I do not	I do not support the inclusion of the animals on the list. None should be slaughtered. 	2020-07-06 15:57:30	Western Cape		No I do not	This is not acceptable at all. I will not support this at all. Our country's wildlife has been decimated for a long time. These animals are on the extinction/endangered species list. This will play right into the poachers hands.	Enoos

This is so disrespectful to animals. South Africa must take a stand against this and not cow-tow to the Chinese wishes to eat all our animals.	Sandra

	2020-07-06 14:08:39	Western Cape		No I do not	This smells of Chinese influence. Mankind are quickly depleting the wildlife of this planet. The attitude of the people drafting this legislation is so short sighted, it is a "Well i wont be here to miss these animals , so who cares" attitude. It is our responsibility to ensure that our grand children and great great grandchildren are able to enjoy seeing animals in the wild just as we are at the moment.	Graham
	2020-07-06 14:00:31	Western Cape		No I do not	It defies belief that the SA government is considering that endangered species of wildlife can be slaughtered for human consumption. When is this government going to try to preserve and CONSERVE what remaining wildlife we have for future generations? Apart from the conservational and ecological considerations, it is unthinkable that we are planning to further exploit 'bush meat', when so many lethal infectious diseases are said to have originated from such sources . How do such plans logically align with a Meat SAFETY Act?	Felicity

	2020-07-06 13:57:09	Western Cape		No I do not	We have more than enough meat sources available. There is no reason to extend the list. No endangered or protected animal should be on the list . If there is pressure from outside South Africa to extend the list of animals suitable for slaughter, then this should be resisted.	Marion

	2020-07-06 13:56:35	Western Cape		No I do not	I think it is a huge failing of government to even contemplate such a move. Why spend so much on preventing poaching and killing of wild life. What did these animals do to deserve this disgusting treatment. I thought we were trying to keep these animals for future generations. Allowing this would end in a free for all. Also stronger regulations and checks of current meat quality and hygiene controls for existing meat providers , packaging and freezing should have more attention. We do not need another virus spreading either among animals or humans. Stop catering to the whims of certain groups of population. Save and protect ALL wild life species. Stricter regulations for current accepted animal food products for the protection of humans consuming this meat. Get it right please. No need to have wild life included on the menu. There is enough already.. Geez. I can't even believe we have to even go here to comment. Where are your morals and principals people ??????	Adele
	2020-07-06 13:55:55	Western Cape		No I do not	South Africa has a sorry history of bad decisions in this respect, with questionable reasoning and science backing decisions to permit activities. Lobby groups represent narrow interests, often backed by criminal syndicates, promote these ideas to government officials. SA Government must consult widely with the conservation experts and appreciate that South Africa has an incredibly rich natural resource in its wildlife diversity that should be protected and maintained for generations to come, not destroyed through greed and potentially criminal interests. Currently protected wildlife species should not be consumed / farmed for commercial usage.	Robert
	2020-07-06 13:50:26	Western Cape		No I do not	The most ridiculous thing ever. Don't these people have anything better to do with their time. The country's ailing economy is now in an ever worsening condition thanks to a virus started in China because of the disgusting way they treat animals - eating anything that moves. When will governments learn that we must look after the planet and ll that dwell on it. Focus on conservation and tourism, safety, fighting corruption, etc, etc.	Mandy

	2020-07-06 13:35:32	Western Cape		No I do not	In light of the Covid-19 pandemic and it's origins, together with research evidence that suggests that we might anticipate more pandemics as the result of both biodiversity loss and animal to human viral transmission, this draft amendment is untenable. The exploitation of threatened and other undefined species makes a mockery of the global endeavour to conserve biodiversity, protect wildlife and the planet, and thereby protect human life. Now more than ever we need to protect our natural world, and not seek to wantonly profit from it.	Nicky
	2020-07-06 13:34:55	Western Cape		No I do not	Allowing the slaughter of any threatened or endangered animals is unconstitutional.	Michelle
	2020-07-06 13:30:28	Western Cape		No I do not	Wild animals are part and parcel of South Africa's heritage. They belong in the wild, not for human consumption. China 's wet markets and their consumption of wild animals led to Covid-19 . The ANC government clearly have no vision!	Marilyne
	2020-07-06 13:11:46	Western Cape		No I do not	I cannot believe that this option is even on the table! Do we not have enough in the way of protein from domesticated animals that we need to extend to wild, and in certain cases protected, species? Breed more cows/goats/sheep, but leave the wild animals out of this.	T B

	2020-07-06 13:09:54	Western Cape		No I do not	Outrageous proposal. The leap of SARS CoV2 (also known as Corona Virus 19 which causes COVID-19) has been proven to have made the leap from wild animals to humans in China. In the wake of this global pandemic which is causing havoc for society on so many levels, it is unbelievable that South African authorities are considering increasing the trade of wild meat. This is another public health disaster waiting to happen. In addition to the human health concerns, the cruelty and suffering that these animals will experience is unthinkable and the knock-on effect on the environment will be dire. Humans should be living more in unison with nature and mother earth. Human-kind has been sent so many warnings that we cannot continue to rape and pillage mother earth. I had hoped that Covid-19 would have been a wake up call to many more citizens but unfortunately this proposal shows that many are still living unconsciously with no care for the future of this planet or the generations to come. 300 elephants in Botswana died mysteriously. What is the message that they are telling us? They are the keepers of wisdom. The world is dying and we are facing the world's next mass extinction. Science if very clear on this. If eco-systems are not protected, there are only a matter of a few decades left for us.	Belinda

	2020-07-06 13:03:36	Western Cape		No I do not	Good day Dr M Molefe No I do not support the draft amendment to the Meat Safety Act	Dane

	2020-07-06 13:03:27	Western Cape		No I do not	Anyone agreeing to this list of eating more exotic animals specifically in view that now clear correlations are found between viruses such as SARS, MERS, CoVID transmitted after mutations from secluded/exotic species to humans must be INSANE (probably suffering from "Mad Cow disease" already !! I totally object to even entertain any aspect of these draft amendements	Susanne
	2020-07-06 13:01:46	Western Cape		No I do not	have we not learnt anything from china regarding the danger of selling wild meat and the viruses that may be passed on to humans? when there are restrictions on slaughtering wildlife, people just ignore them. try to rather support and encourage the farming of vegetables and non meat-based produce. don't tax these so that they are affordable to the poor. grow more nuts locally so that these can come down in price, supporting local industry. encourage vegetable-based diets, so that we don't poison the planet with methane from rearing cows and sheep. more schools, communities, parks and churches should be encouraged and rewarded for growing vegetables. the government needs to place such hectic fines that restrict foreigners from looting our animal heritage and culling our endangered wild life. definitely keep pigeons on the list.	dominique
	2020-07-06 12:56:56	Western Cape		No I do not	There are enough animals been breed for consumption. Wildlife most definately does not need to be included.	Pat
	2020-07-06 12:54:53	Western Cape		No I do not	I want to live in a world without politicians as I find their statements on this subject to be absolutely ludicrous. How can you allow this? 	2020-07-06 12:53:56	Western Cape		No I do not	God Made the Earth (Nature) and Put Man and animals on this earth to enjoy his life on it God gave Man Intellect to use of the Earth to satisfy himself using of the Earth to make shelter, find food and water and use his good judgment Man has destroyed all Gods good intention - I mean just look around you - Chaos! And with all Mans intellect he chooses further to eat certain animal/s for his own pleasure with no rhyme or reason to do so - as God has provided other good food for him in abundance! Its called Greed! So therefore Man has disobeyed Gods Command - therefore Man will Perish - as it is Gods Will - This is only the beginning of Gods Wrath!	Loretta

Plus there are wild animals that are extinct, please let's not decrease the population of our wild animals and one day our grandchildren will only see wild animals in a picture.	Esmeralda
	2020-07-06 12:33:15	Western Cape		No I do not	Any legislation that allows and encourages the slaughter of endangered species such as Rhinoceros and elephant is mindless in a country so heavily dependent on Tourism. 	2020-07-06 12:30:20	Western Cape		No I do not	We are in midst of a global pandemic brought about by the consumption of wild animals never meant for humans to eat. We go to great lengths to stop poaching & slaughtering , nationally & internationally & to put a stop to illegal sales to preserve our wild life. SO NO. This ANC government is unethical. The ANC a few months ago approved sand mining in the EC – you are supposed to protect our environment not destroy it. By these unethical actions you are wilfully and knowingly destroying our environment and in the process our country. The sale of wild animals for human consumption is nothing short of barbaric. My answer is NO !	Athena
	2020-07-06 12:25:15	Western Cape		No I do not	This is the most unsavoury meat draft to ensure that our Wildlife game can be slaughtered for export, food, business purposes. We already have canned hunting legislatered in this country which is so in humane and now the goverment want to legislate the killing of Rhino , Giraffe and Elephant . It is mind boggling that anyone could contemplate such a law !!! I truly hope that this law is never past .	Lindsey

	2020-07-06 12:20:40	Western Cape		No I do not	I strongly oppose the slaughter of our heritage game i.e. wild cats, rhino, hippo, elephant and giraffe for both sport and consumption. We are their custodians and should protect our wildlife - especially from the all consuming eastern markets. Many dangerous viruses have been transferred from animals (which should not have been eaten in the first place) to humans of which HIV is but one. Is the Covid-19 virus just a ruse? If not, this should be prevented/banned . Should this be implemented in South Africa and it leads to illness, we will most certainly hold government accountable.	John

	2020-07-06 12:10:48	Western Cape		No I do not	I as a human being have been given the care of all animals on earth, as have you. I urge you to stop and think about what you are doing. When there are no more wild animals, you will have no tourists and this country relies on them. Countries, like China have eaten everything they can lay their hands on, other than the Panda bear, which is treated with such care and awe. We, in South Africa, feel the same about our special animals, like the lions, elephants, giraffe and especially the rhino. I can't wait for the day when everything has been killed and China starts eating their own people. I wouldn't be surprised if they don't do so already. Remember, God is watching you.	Colleen
	2020-07-06 12:10:40	Western Cape		No I do not	Who drew up this list? Surely EVERYONE knows by now that some animals are completely off limits. 	2020-07-06 12:05:15	Western Cape		No I do not	We are the custodians of our wild animals. We have an obligation to conserve them for generations to come. The original list already has some endangered species. If anything the list should be shortened by removing those that are endangered. The COVID-19 pandemic has proved that man should not be eating wild and endangered animals. Extending the list of wild animals is morally and ethically repugnant.	Bruce
	2020-07-06 12:02:35	Western Cape		No I do not	Why do we have to eat all these wild animals? Have we not learnt from what has happened in China now with the Covid19 virus?	Loes
	2020-07-06 11:59:53	Western Cape		No I do not	Never, never. This is going backwards into history. Don't even consider wild animals for meat. In fact it's barborous to use any animal's meat for human consumption. We should have learnt our lesson from China's debacle and covid-19.	Rosalyn
	2020-07-06 11:58:35	Western Cape		No I do not	Please no! this can only be abused. they are wild, belong to the wild. Leave them alone. If our farmers are able to live, they can provide all we need. This will be a disaster .	Penny

	2020-07-06 11:43:09	Western Cape		No I do not	NO NO NO!! our wildlife is sacred!! We need to save them for our children and their children. What makes South Africa so interesting to overseas tourists is our wildlife. If they are shot for trophees (lions, leopard, rhino, elephant) the lucrative tourist industry will suffer - less money for the goverment - This amendment will be a a stain of blood on our country that can never be erased	Brenda
	2020-07-06 11:42:56	Western Cape		No I do not	I think people should all stop eating meat, the flesh of another being . The cruel slaughter methods are abhorrent and archaic. There will be food for everyone if farmers plant crops for consumption and we will all be healthier . Less violence in the world	Auriol

	2020-07-06 11:40:04	Western Cape		No I do not	1. Humans are eating vast amounts of meat from cows, fish, poultry, goats, sheep and the like. Why do they need more meat!! 2. What about the reality of wild animals going extinct. Biodiversity in Nature is the core to life on earth. 3. Wild animals in captivity for meat-eating - A shocking indictment of the human popluation. Bad enough having cows industrially farmed and fed a whole lot of shit that is bad for them and bad for us! I am shocked to the core!	Pat

	2020-07-06 11:36:49	Western Cape		No I do not	ABSOLUTELY NOT. More particularly leave our Wildlife alone. Does the government need to be reminded that some of the animals are on the endangered list? Frankly, the stupidity is mind-blowing. It goes beyond my comprehension why has this process even been given a thought. It is frankly devastating to think it has any chance of happening. The world is in the midst of a pandemic brought on by consumption of wild animals never meant for humans to eat, please learn from this terrible state if affairs.	Karen

	2020-07-06 11:30:19	Western Cape		No I do not	There is more than sufficient meat available through import, export and farming of domestic animals and occasional culling required of game in the country. This is another greed-driven, money-making initiative thought out by unethical and corrupt politicians. The national wildlife heritage of this country should be protected and the current generation needs to be guardians for posterity. These decisions undermine and minimize the uniqueness of what SA can offer future generations and tourists in terms of wildlife and conservation opportunities.	Marlene
	2020-07-06 11:27:29	Western Cape		No I do not	We know for sure that many restaurants in SA have been serving fish which is not the actual fish that is indicated on the menu. Thanks to independent researchers we now have samples of our fish that can be identified, both raw and cooked. What control do we have on the imports that we get. e.g. Thailand/Japan etc have tuna that is extremely high in Heavy metals and we are importing tins to sell at low prices and from what I have learned most of our Tuna is exported to the East and of a better quality. Where is the control as to what we are actually eating. Is there any? Very doubtful especially if we import which is now huge, nearly every tin I pick up is from elsewhere in the world Why would one turn to wild life and especially that of endangered wild life? This is a knee jerk reaction this is also the jewel of our tourist industry. We also need to take into consideration drought - climate change which is and will continue to have a dramatic on both wild life/domestic and human life. When are we going to address the real issue which is overpopulation and its control of. I am totally against the increase use of wild life and would like to see kinder/safer measures introduced in the meat trade where these animals live in disgusting environments, are cruelly treated and are continually being injected with antibiotics to keep infections down, then we eat this stuff. We dont need to eat so much meat, and waste is a huge problem. Lets us think about the good of ALL (BOTH MAN AND BEAST) Then we will make more sound decisions.	L

	2020-07-06 11:27:02	Western Cape		No I do not	The real problem that our dear government cannot acknowledge is HUMAN over population. Instread they promote increasing the population of SA by handing out grants. SA would not have such a big unemployment rate if they stopped encouraging the poor to have children. Hence the poverty cycle gets perpetuated. Use the Child grants to protect our wildlife.	Craig

	2020-07-06 11:22:07	Western Cape		No I do not	Please think about the future and not immediate enrichment. Animals in our country are supposed to be revered, protected and taken care of. Stop trading with the animals as if they belong to us. The animals were here before us!! Why do we think we have a right to sell, eat, trade with them as if they are our belongings?? ANC, make the right choices and stop trading with endangered animals, how can you think you have the right?	Jackie
	2020-07-06 11:20:05	Western Cape		No I do not	Our wildlife is South Africas HISTORY and have been here long before humans. 					Muhatma Gandhi famously stated: “The greatness of a nation and its moral progress can be judged by the way its animals are treated.” South Africa’s morality since 1994, led by the ANC, has taken the country down a fetid cul-de-sac of ANC big-men structurally looting it’s own poor Black people into worsening poverty and now a poverty-trap where our remaining wildlife is to be declared edible as a commercial product due to the chaotic mess of food-insecurity that these so-called “leaders” have caused. Wildlife, one of the bastions of South Africa’s Tourism sector, arguably the only high employment-creating overseas revenue generating sector, is now to being given permission to kill and actually eat the very resource that attracts people to South Africa and creates jobs if this ignorantly conceived law is passed. These so-called “leaders” wish to sanction the killing and eating of the goose that lays golden eggs to get the last egg from inside the last dead goose. Like the Vice-President of Zimbabwe is reported as saying today, “We got our independence but the white man never gave knowledge on how to run our economy.” (News24 5 July 2020), after this resource has been plundered into the ground with savage & barbaric poaching made tacitly acceptable by this proposed backward law, these incompetents shall probably again refuse to take responsibility for ransacking South Africa’s wildlife resource like the scourge of a swarm of locusts. As Nelson Mandela famously stated: “If the ANC does to you what the apartheid government did to you, then you must do to the ANC what you did to the apartheid government. NO to this proposed law and any further ridiculously & ignorantly conceived laws in the Republic of South Africa!

	2020-07-06 11:03:40	Western Cape		No I do not	don't we eat enough meat!	rebecca
	2020-07-06 11:03:01	Western Cape		No I do not	Is the virus from slaughter of wild animals not enough of a lesson? Who is benefiting from this? Our animal kingdom is under so much threat and you want to legalise it!! Shame on you. And I feel ashamed to face foreigners because of government decisions and lawmaking.	Lita
	2020-07-06 11:02:49	Western Cape		No I do not	Another ridiculous concept. Leave our wildlife alone. Somebody must be getting a kickback	Neville

	2020-07-06 10:58:07	Western Cape		No I do not	Absolutely disagree with this amendment!!! Clearly this is aimed at feeding someones coffers and not necessarily hungry mouths....and....what's next...domestic animals??? Let's try and move forward dear ministers and try not to regress to being savages!!	Robert
	2020-07-06 10:57:59	Western Cape		No I do not	I object to the broadening of the scope to include wild animals. This will encourage and legitimise the hunting and commercialisation of trade in these species. In addition, given the health problems that have occurred (Ebola and possibly COVID-19) due to the consumption of bush meat, this legislation will serve to encourage use. While it can be argued that the legislation is intended to increase safe use, it is not acceptable to encourage exploitation of wild species. We cannot seek to protect wild animals on one hand and then to legalise their consumption.	Chris
	2020-07-06 10:57:48	Western Cape		No I do not	Any threatened or undefined species should be removed from the list.	David
	2020-07-06 10:57:13	Western Cape		No I do not	Humans are slowly but surely wiping out the existence of wild life. It has to stop. The raping has to end, let us leave the wild life for generations to come!!	Eldon
	2020-07-06 10:56:14	Western Cape		No I do not	I fail to understand why the government wants to include wild animals for human consumption. Some of these wild animals are endangered species, and therefore must be protected from mass extinction All wild animals in South Africa form part of our tourism industry. Does the government want to create another potential COVID situation originating in SA as did in China ? PLEASE DO NOT INCLUDE WILD ANIMALS FOR HUMAN CONSUMPTION.	Maxine

	2020-07-06 10:53:59	Western Cape		No I do not	I definitely do not agree with the proposed inclusion of all wild animals for human consumption . Our wild game is part of the unique jewel of South Africa and contributes significantly towards the GDP. With proper planning the tourism industry could be further developed which would significantly create employment. It is unthinkable that at this stage of the corona-virus epidemic where the link between the consumption of wildlife and zoonotic diseases is well documented, that the Minister would think of increasing the slaughter of all types of wild life (the wording of the draft document is not at all specific) for human consumption. The current game canning industry is horrendous and the Minister is clearly unable to legislate it . I hope and pray that the preservation of South African wild life will be the Minister's priority and not its decimation.	Estelle
	2020-07-06 10:53:44	Western Cape		No I do not	reduce the consumption of wild animal meat to save them not increase it	vaughan
	2020-07-06 10:53:21	Western Cape		No I do not	Our wildlife and game parks are vital for our children and for tourism which is vital. As well the many of us who love our game parks and wild animals. DEFINITELY DO NOT AGREE WITH THIS	Christine
	2020-07-06 10:50:41	Western Cape		No I do not	Why why haven't we learned. Does this goverment know what they are doing. Killing also the Tourist sector. People don't have to eat mear everyday. Or is it the ivory, and just smellling money	Valerie
	2020-07-06 10:48:14	Western Cape		No I do not	Our wildlife is our heritage and we need to protect it for future generations. Our wild-life is a major draw card for the tourism industry, which supports many more people from an employment viewpoint , versus fewer people taking the opportunity to exploit our wildlife as a get rich scheme.	Eric
	2020-07-06 10:42:35	Western Cape		No I do not	Wildlife must be protected from mass extinction	Elaine
	2020-07-06 10:39:52	Western Cape		No I do not	There is enough food which can be produced if the ANC government stop filling their own pockets and the people who wanted jobs is actually working and not strking - stop stealing and destroying	Liezel
	2020-07-06 10:39:27	Western Cape		No I do not	Animals are to be protected by mankind and some may be consumed, but please do not include endangered and other species that were not on the old list.	Chris
	2020-07-06 10:36:32	Western Cape		No I do not	The link between wildlife and zoonotic diseases is well documented.	Jacques
	2020-07-06 10:36:03	Western Cape		No I do not	If we want to safe guard our wildlife to boast tourism, why open this up for consumption. This will only encourage poaching, the biggest scourge that is facing the game parks	Bjorn
	2020-07-06 10:33:15	Western Cape		No I do not	The corona virus was due to human consumption of bats now animals previously not consumed by humans and allowed now may open up another pandemic. I won't be eating any of those animals and some of them are on the extinct list. Is she going to make money off the slaughter? As otherwise there is no valid reason for this decision. If she is it provez once again that the ANC dont care about the ppl just themselves.	Jennifer
	2020-07-06 10:31:51	Western Cape		No I do not		Chris
	2020-07-06 10:30:08	Western Cape		No I do not	All endangered species must be excluded from the list. If local species are to be included, there must be strict regulation thereof to prevent exploitation of the species. Governance could possibly include "farming" of local species.	Tandy
	2020-07-06 10:28:47	Western Cape		No I do not	I do not believe in treating sentient beings like property and goods for consumption. People need to wake up and see what they are doing to the world. We have been here the shortest time, and done the most damage. We are hell bent on doing more.	Liz
	2020-07-06 10:26:36	Western Cape		No I do not	No I do not I do not support the Act because:- 1. South Africa's wild animals are one of our greatest assets from a local and especially international tourist prospective, bringing financial prosperity to the country as a whole. 2. Once an animal is slaughtered is where it value ends, as a live asset the continue to give back in the form of tourism. 3. Tourists come to our game parks to see our wild life, not to look at an empty desert. 4. The final and most important reason is Government has not shown itself able to control many of it SOE, if the flood gates are open to allow the slaughter and trade in our wild life it will be the proverbial Blood Bath and lack of control exhibited over the last 20 years are what concern me. 	2020-07-06 10:16:46	Western Cape		No I do not	With our wild life being poached and destroyed on a massive scale , we need to more than ever protect our wildlife and not add them to the "menu". It is estimated that we have lost over 60% of our wildlife between 1970 and 2014. This in itself should disallow the ANC from passing this bill. Tourism will also hugely be affected - protect instead of destroy!	Nadja
	2020-07-06 10:15:13	Western Cape		No I do not	We have far too many animals bred for eating already and wildlife is traded horribly in our corrupt world. Let wildlife be conserved PLEASE!!!!!	Jennifer

	2020-07-06 10:13:01	Western Cape		No I do not	you do not shoot yourself in the foot. At the end we are the only people obeying the law. Others have no respect for the law. We as responsible farmers do not need a law. We are all protectors of our animals.	Boy
	2020-07-06 10:12:13	Western Cape		No I do not	Why must we eat every living creature? Protect our wildlife and stop the slaughter of animals!!! Why on earth would you want to eat an elephant??? Please stop killing everything.. people can survive on fruit and vegetables.	julia
	2020-07-06 10:11:14	Western Cape		No I do not	No need to slaughter our precious wild animals. There are enough meat for human consumption.	Annette
	2020-07-06 10:07:50	Western Cape		No I do not	The meat of wild animals will for sure not cheaper that other meat. Initially it may be done to pass law, but soon will be the same or more. We have enough meat available from our farms. Do we really want to eat every living thing like they do in some countries. If it moves, it must be eaten and if it does't move, they kick it until it moves and then eats it	Herman
	2020-07-06 10:07:21	Western Cape		No I do not	The old law was reasonable, the new one includes animals beautiful to see but difficult to find on a game drive. e.g. Tsessebe. Only common game like Impala should be culled for food.	Neville
	2020-07-06 10:06:38	Western Cape		No I do not	Leave all endangered species of the list. Why does government feel its necessary to endangered animals to the list. 	2020-07-06 10:02:48	Western Cape		No I do not	1. Our planet is on the verge of collapsing. 2. Africa's wildlife is the reason why millions of tourists visit our country every year. If we kill and destroy that beautiful side of South Africa there is NO reason for any tourist to come to this corrupt and unsafe country anymore. We are killing the goose that lies the golden egg! 3. The excessive consumption of eating meat is the reason why we are in this Corvid 19 mess and more pandemics will follow without doubt. 5. WE ARE KILLING OUR CHILDREN'S FUTURE!!!!! If this Meat Safety Act is passed by Government the disastrous results for our country will be irreversible!	Barbara
	2020-07-06 10:00:28	Western Cape		No I do not	I disagree with this amendment as it violates the NEMA Biodiversity, TOPS protected species Act and constitutional human rights to a safe, ecological and protected natural heritage for all South Africans. We know the correct regulation and enforcement of this Act will not be enforced and allow illegal poaching, illegal trade and illegal export of protected species to occur to the detriment of all South Africans	Richard

	2020-07-06 09:58:34	Western Cape		No I do not	Leave the wild animal alone! We only have a few left and now you want to eat them! They are already going extinct. There will be nothing left for our children to see and think about the tourist attraction that you will lose. We can eat pork, sheep, cows and chickens!	KARIKE
	2020-07-06 09:56:15	Western Cape		No I do not	No please leave all wild animals off the list of edible meats except some buck that are already on it. Keep domestic animals OFF the list completely and except for birds that are now on the list, leave that alone too. Our endangered wild should NEVER be considered AT ALL!	Stephanie
	2020-07-06 09:55:30	Western Cape		No I do not	We have a chronic unemployment crisis. Put resources into the livestock industry . Wildlife is sacred. It is easy to kill but difficult to replace wild animals. Wildlife is a legacy we are bound to pass on to future generations.	Alan
	2020-07-06 09:50:37	Western Cape		No I do not	Why would our government not realize that our wild animals constitute the wealth of our country. Wild animals in their natural habitat running wild and free is becoming so rare in our world. They constitute a natural treasure. Please stop this madness!!! Hands off our tourist industry!!! A large percentage of income earned For South Africa is from tourists visiting South Africa to experience the thrill of seeing wild animals.	Sharon
	2020-07-06 09:50:07	Western Cape		No I do not	This is outrageous. Where else on earth are wild animals considered to be domestic animals? How much further is there for this government to go before it hits rock bottom? I think this will do it. Shame shame shame on anyone who supports this disgusting idea. Are there no morals or decency left, if there were any in the first place? I think not.	gill

	2020-07-06 09:49:21	Western Cape		No I do not	We already have a huge problem with poaching and unethical hunting in South Africa, amending this bill to include rare and protected animals not owned nor farmed for this purpose would be catastrophic for the conservation and game farming industry. Also, and particularly pertinent now with Covid-19 pandemic in full swing globally, this is definitely not the time to be considering the inclusion of wild animals for consumption. It's time humans started respecting the natural world more and stop using and abusing it as if it were there at our endless disposal!	Andrew
	2020-07-06 09:46:13	Western Cape		No I do not	Eating wild life will remove future income from tourism opportunities and remove future study opportunities for your children.	J
	2020-07-06 09:43:42	Western Cape		No I do not	We are supposed to protect our wildlife. Why have we spent so much money on training people to protect animals on the brink of extinction only to amend the policy and let them become part of the food chain. They are our responsibility to protect from greed. We are the worst enemies of this world.	Angeline
	2020-07-06 09:41:27	Western Cape		No I do not	Many of these animals are already endangered, and making it easier to export these animals will not help the situation. It might bring the price down but this only has a marginal effect. Secondly many South Africans rely on our variety and abundance of animals to attract tourists and visitors to make a living.	Retief

	2020-07-06 09:28:48	Western Cape		No I do not	Wild animals need our protection. Humans have taken their habitat over the last couple of hundred years and reduced their numbers close to extinction. We cannot keep exploiting the planet and destroy the balance of nature. The meat trade is cruel as it is too much meat is consumed by humans, we need to protect our wild species, who already face danger of poaching and trafficking	Maike

	2020-07-06 09:18:09	Western Cape		No I do not	The world's population has gone from 3 billion to 6.5 billion + in less than 3 generations. We are crowding / crushing the planet. Any balance with nature is effectively lost. We have to redress our thoughtless expansion by rethinking our relationship with all animals, which does not mean eating them. 	2020-07-06 09:13:25	Western Cape		No I do not	I think I have already submitted a response. If so again I re-iterate that why allow the good work done on preservation and trying to stop poaching go to waste. At times allow the officials to do any necessary required culling. 	2020-07-06 09:11:02	Western Cape		No I do not	To allow mass bushmeat export will undermine all nature conservation mechanisms and encourage poaching at greater levels and lead to further wildlife extinctions of those animals that are being added to the list. I support legal, organised culling of wildlife as part of any conservation plan on licensed farms and reserves but mass sale of bushmeat will facilitate further problems with wildlife that are bread for their meat instead of tourism. Any illegal and uncontrolled exports will be merely camouflaged under the screen of legal activities. Hunting and consumption of wildlife meats is part of SA's tourism draw-card and should be retained to encourage tourism and not for the sale of our natural resources. Wildlife is as much a natural resources as coal, iron ore, etc and should be exploited in SA and not exported. Have we not learned from past experience with eating of wild animals, causing the spread of more viruses to humans.	Scott

	2020-07-06 09:08:10	Western Cape		No I do not	Firstly and foremostly, God commanded us to rule over wild animals(which is supposed to be wild) and domestic and bird and fish... NOT TO DESTROY ALL SPECIES FOR THE ENRICHMENT OF SOME PEOPLE... Secondly, I believe there is more than enough meat types we can eat... 	2020-07-06 09:03:48	Western Cape		No I do not	I am absolutely appalled that you would even consider destroying our natural heritage, our wildlife that supports and attracts tourists from all over the world, apart from the fact that these animals are a part of the ecology of the world. I absolutely abhore this and cannot understand how anyone could even consider enacting such a barbaric act, against all the laws of nature.	Angelique
	2020-07-06 09:03:40	Western Cape		No I do not	How can this atrocity be sanctioned. Apart from the very real danger of disease from eating these animals. Look at the pandemic we are living with now! These beautiful animals bring tourists into our country, thus bringing good money into our national coffers which we definitely need especially with our economy taking a huge downturn due to Covid-19. If we need food give people the education and means to grow their own food. Slaughtering our wild animals is not the solution.	Janice

	2020-07-06 08:47:30	Western Cape		No I do not	It is immoral to have endangered species on the animals for slaughter list. Our conservationists are struggling against a wave of illegal poaching, numbers are dwindling . I strongly oppose the addition of these animals to the list	Garry
	2020-07-06 08:44:53	Western Cape		No I do not	In view of Covid I think it crazy to be introducing additional wild animal meat to be allowed to be consumed Also as South Africa relies on a thriving tourist destination for its wild life how can we as a country condone eating the animals we are supposed to be protecting	Andrew

	2020-07-04 16:58:39	Western Cape		No I do not	I am really distressed that such an amendment is even being considered in this time of Covid 19 when the corona virus is of a zoonotic origin and proven to have come from wild animals/bushmeat. is South Africa so greedy that as custodians of our wildlife she can't protect our most precious inheritance, pour iconic wildlife. Already it is to South Africa's shame that we have so many unregulated lion farms for canned hunting. Our donkeys are being slaughtered by the Chinese, poachers are killing our elephants and rhinos for their ivory and horns. This amendment will open the door for greedy unscrupulous individuals in positions of power to sell and export our wildlife for monetary gain without any vision for future generations and diminish the respect and awe we all should have for a God given treasure in this country. To the government - SHAME on you!	Ingrid
	2020-07-04 14:14:42	Western Cape		No I do not	The only species of animals in South Africa which should be farmed are any buck which are present in large numbers ie.Impala. It is insane to now include wild animals in this list. Tourism is our lifeline, it brings in millions (if not billions) of Rands into our coffers, and most tourists come to see our wildlife and do a “safari”. We would lose thousands of tourists to Kenya, Botswana and other countries if we do this	Franca
	2020-07-04 12:12:12	Western Cape		No I do not	It does not pass the constitutional threshold of rationality to amend the Meat Safety Act to allow for the sale and consumption of endangered animals with no regard to their level of vulnerability and longevity as a species. 	2020-07-01 23:31:24	Western Cape		No I do not	The slaughter of endangered animals is morally wrong and unjustifiable. We have contributed money to prevent extinction of some animals on the list and suddenly our government decides to consume them. This law should be repealed and we need to remove China from our lands and terminate all forms of trade.	Cassidy
	2020-07-01 23:16:21	Western Cape		No I do not	Please be a responsible citizen and protect our animals from extinction. I beg you	Beverley

	2020-07-01 22:57:40	Western Cape		No I do not	It is at best unethical and at worst illegal to slaughter endangered animals eg rhino and elephant for food; it is already illegal to kill them for their horns, tusks and other body parts. South Africa has made and will again make enormous sums of money from tourism, with many more overseas visitors wanting to see our animals alive and protected than there are visitors wanting to eat them, or to know that it is legal to do so. What message are we sending to countries like China, the destination of many poached animals (most famously pangolins and abalone) and their body parts (elephant tusks, rhino horns, lion bones etc): "Don't do what we do, do what we say"? Animals which are hunted and then eaten - which is legal under strict conditions, not always adhered to but that is another story - cannot be said to have been slaughtered. Slaughtering is the killing for food of farmed animals and birds in a designated abattoir. Where are these rhinos and giraffes going to be farmed? Perhaps this is not what the legislation envisages, but others will adhere to the letter of the law, should it be passed, with potentially alarming consequences for public health. Infections, such as Covid-19, can and do pass from wild (non-domesticated) animals to humans. Humans have no natural immunity to such diseases. That is why the world is in lockdown right now. That is why there is such pressure on China and other Asian countries to end their live-meat markets, and on all countries to move away from consuming bush meat. What would this legislation say about South Africa? Nothing good; and nothing that would attract, not just tourists, but international investors. Our Constitution leads the world in its concern for justice and fairness: what could possibly justify taking the protection of those great principles away from animals which are already facing enormous challenges from human activities? I trust that the draft amendment will be scrapped and will not reappear in any other guise, ever. Then we can be proud to be South African; if it is passed, I am afraid we cannot. Thank you.	Deborah
	2020-07-01 22:53:30	Western Cape		No I do not	Meat factories already contribute some of the highest emissions to Global Warming, now you want to add to that? 	2020-07-01 21:07:35	Western Cape		No I do not	To whom it may concern. I am an South African citizen, My heritage as an South African is that we have the big five. I grew up knowing I have this special wonder of the world in my country. I do not believe that this will help anyone. As many of these animals are endangered, this will help every person looking for a buck on the side to become poachers. I have been privey to a town that was thriving on fishing and diving for many years, yet no matter if you follow the rules or not it gets taken away from everyone. You as the people trying to pass this bill will hurt our country. So please from the bottom of my heart. This is not what we are nor what we need to become. 	2020-07-01 16:52:32	Western Cape		No I do not	I believe that humans have sufficient alternatives in the existing Meat Safety Act to more than properly sustain ourselves, and have every option of venturing into the plant based space if this is not sufficient. If we start eating any and every living thing , it not only opens up a vast array of potential health issues, but also takes so much away from our countries natural beauty and infrastructure. 	2020-07-01 12:16:39	Western Cape		No I do not	The Government always appears to take the easy way out. Wild life is one of the primary reasons why we attract tourists who boost the economy. Instead of spending money on superior Education to ensure people become self-reliant we have created a Nation dependent on Grants which cannot sustain them. Plan B how do we feed them Oh let’s feed them wild animals . Nowhere in the last two decades have I seen any promotion of Birth Control. Smaller families are able to feed, sustain & educate themselves . We are on a path to self-destruction with NO 5 , 10 or 20 year plan just crisis management. The Tax Base is shrinking and the Government has not stopped the corruption. 	2020-07-01 08:12:07	Western Cape		No I do not	Let us not become like China. We need to preserve our precious wildlife. The meat industry is already a cruel industry that is not regulated properly. We need to be looking at ways to reduce our overall meat consumption and improve our farming practices so that this country and it people can prosper under a healthy food system, and so that the environment can continue to sustain us. Adding more meat varieties and animals to our menu is not the answer. The meat industry is already under such enormous pressure to produce the huge quantities we demand that it forces farmers and feed lots to take drastic measures to keep up, at the cost of the animals health and wellbeing and thereby the health and wellbeing of the entire eco-system(which includes us). We should be turning away from this industry altogether. This land should not be at the mercy of whatever corporations demand is necessary. Its time to focus on better farming practices that do not come at the cost of oceanic dead zones, or nutrient-deficient food and unhealthy citizens. Please consider that this bill is only going to cause further complications to the system, require more resources for monitoring and maintenance when we could be focusing our energies on fixing the larger systemic issues we have. 	2020-07-01 00:01:14	Western Cape		No I do not	1. It is cruel for wild animals to be included as livestock . They are not domesticated, they live in the wild and to breed wild animals for slaughter that would ultimately happen is animal abuse. Already our endangered lions are allowed to be bred for the lion bone trade as 'medicine'. How many other wild animal.parts will be allowed to be exported to foreign countries for use as their untested unproved 'medicine' . 2. With so many wild animals that can be slaughtered in SA 'wet markets' like in China where the outbreak of diseases occur including Covid19 would likely also open in South Africa. 3. The bush meat trade would increase 4. Donkeys have bern allowed to be slaughtered in SA specifically for 'medicine' to the east I do not approve of this list of animals for slaughter	Marilyn

No killing of rhinos, elephants or giraffe. Why? Why have we fought to stop poaching all these years? Has this government no common sense? If all the big 5 is hunted and killed who would visit our wild life reserves? Think a bit further than just food. Think of all the job creation that the tourism industry also generates. 	2020-06-30 20:57:55	Western Cape		No I do not	Are we going to create the basis for another Pandemic? We know that government already received expert advise concerning this matter a number of years ago. Now the responsible minister has started the process of assessing the value of our wild life all over again while ignoring the results of the already available reports and without including the experts that served before. Which lobby is served here? Not only are we going to destroy one of our most beautiful living assets in the country, we provide again livestock to the greedy needs of merchants without compassion for the the precious nature of animal life. We should follow the philosophy of the first nation people who only took respectfully those animals which they needed for their survival. The legislator opens another door for the unbearable presence of the bio-industry. We repudiate the Chinese wet markets but allowing similar abattoir practices on our own soil. Has the legislator ever seen the care that these animals show for their offspring and community members. Shame on your all. Please don't call you self Christians anymore. You are all denying the heart of African care as expressed in the philosophy and practice of UBUNTU . Have you forgotten that animals can feel? The agony directed towards this most exploited kingdom on our earth will haunt us. Look as Dean Schneider's work at the HAKUNA MIPAKA (= Swahili for no limits) sanctuary for a different, compassion driven approach: No breeding or trading of animals (see https://www.deanschneider.com). Also read Don Pinnock's articles on the reclassification of wild species as farm animals: in https:/www.dailymaverick.co.za/article/2019-10-16-sa-reclassifies-33-wild species-as-farm-animals/ and https:/www.dailymaverick.co.za/article/2020-04-08-living-with-wild-animals-part-two-eat-them-like-theres-no-tomorrow/ In short: this amendment of the Meat-Safety-Act has nothing to do with raising respect for the lives of non-human sentient beings and by implication does not instill any conscious awareness or respect all life among humans. 	2020-06-30 17:12:19	Western Cape		No I do not	The wildlife in Africa is unique. Tourism is driven by the desire to experience nature and all her splendors. South Africa offers a unique opportunity to view these creatures and ThHeiff Ed habitats at the same time financing the preservation of our precious wildlife. We need to wake up to the fact that nature and wildlife have as much right as us to be on this planet . The planet is (or was) a balanced ecosystem where every creature has its part to play . Wildlife and natural systems that support them have to be protected. Farmed animals are often kept in inhuman conditions and suffer enormously before being slaughtered. We have to be responsible for their protection and well being.	Alison

	2020-06-30 16:56:16	Western Cape		No I do not	I do not believe that reclassifying these species (some of which are not even endemic) is a good solution to the problem of conservation. Adding these species to the list of animals which we can farm intensively will do nothing but make them easier to exploit and mismanage and will degrade the genetic integrity which is maintained in the wild. Lions, rhino and giraffe , alongside other species on this list, should be treated and classified as the wild animals that they are.	Enya

	2020-06-30 16:45:59	Western Cape		No I do not	Wild animals should not be on the extended list of animals. If there are any lessons to be learnt from SARS-COV2, it is that there is an increased risk in creating a worldwide pandemic when humans handle/consume wild animals, especially when multiple animals are kept in confined spaces. Similar risks also exist in the current animal agriculture industry, and just yesterday there was a BBC article about a new swine flu mutation (G4 EA H1N1) that has been discovered by scientists in a pig farm/abattoirs in China. 	2020-06-30 16:03:27	Western Cape		No I do not	When all the evidence points to plant protein as being the most ecologically sustainable, economically viable, healthy form for human sustenance, why is SA looking to increase slaughter of animals and specifically some of our most valuable natural assets? Is this to protect the public or because it will clear the way for industrial-level farming of these animals thereby making some wealthy individuals even wealthier? Most importantly , by escalating meat production, are our representatives and public servants seeking to mitigate or aggravate climate change? Is it short term greed paid for by our children's future? And this in the middle of a pandemic resulting from farming of wildlife. This is madness, greed or stupidity, or all 3	Pam

Shame on anyone even thinking of killing our beautiful wildlife. Shame on the people to pit a disgusting suggestion like this on the table. The majority of diseases that have emerged over recent years have come from wildlife. Farming wild animals is likely to exacerbate this phenomenon, by subjecting them to unnatural conditions that will cause them to experience chronic physiological stress, affecting their immune systems and increasing the likelihood of them spreading dangerous pathogens. 	2020-06-30 14:15:14	Western Cape		No I do not	Given the current global crisis around COVID type pandemics any tacit or indeed explicit sanction of wild harvest animal consumption would seem folly at best and naive and reckless at worse I understand it may be argued it covers farmed stock; or it recognizes traditional protein sources for certain communities but neither addresses the failure of the scientific world to understand the transfer of disease between species and the consumption of them. To establish "standards" for slaughter unwittingly conveys the impression that the risk is understood and so for those not interested in the standards their consumption is "safe" regardless. 	2020-06-30 13:49:56	Western Cape		No I do not	As a South African citizen, I vehemently reject this draft amendment. The exploitation of nonhuman animals by humans is unethical and therefore should not be supported or encouraged by government policy. There are many ethical solutions to sustaining our nation. Exploiting nonhumans for food only violates nonhuman rights and leads to an increase in the risk of the emergence of zoonotic illnesses.	Chloe

					There is glaring proof of the detrimental outcomes of interfering with wildlife - their natural way of life and their habitat. Not only has the current pandemic shown us the devastating effects of this kind of practice, it is showing us how NOT to continue with such practices. Please read the research on how we got to this point. There is a treasure trove of it out there. The COVID 19 virus is postulated to have originated from caged animals in a wet market in China, from animals that should have been in the wild, in their natural environment, unhindered. That COVID 19 may have stemmed from the faeces of bats in caves in rural China before that, is due to the fact that humans have encroached onto their natural habitat (study the science). It is not the 1st virus to do this - called jumping (mutating to become a direct human-to-human spreading virus). Recall the recent swine flu, bird flu, ebola, and even the HIV pandemic. These all originated from man's interference with the natural order of things on planet earth (again look up the scientific research on this). Modern agricultural practices & human settlements have encroached on natural habitats of wild animals & ecosystems, creating an imbalance. Part of this has also been the caging and fencing off of wild animals, especially for consumption. This unnatural practice is what has got us to this critical point globally. If we do not change our current ways of thinking & practices of plundering & environmental destruction in the name of greed & profit, which I believe is the intention for slaughtering wild in this way, we are heading for unprecedented destruction of earth and ourselves. Current livestock and poultry practices are also in dire need of revision - recall the recent Listeria outbreak. Another way of looking at it - we need to realize that all creatures deserve the respect due to them. The Golden Rule, Ubuntu, applies equally to Mother Nature & her other creatures, not just to humans. Again, please take heed of the science. We are currently experiencing the 6th mass extinction of creatures on our planet (loss of 150 to 200 species daily due to human interference). Since we are also a species, it is bound to impact us. We are already seeing this destruction in all the interconnected disasters around the world - global warming, disappearing ecosystems, diseases as mentioned, animal extinctions, loss of viable land, wild fires, floods, melting glaciers, rising oceans, warming temperatures, and more. These events are not occurring in isolation - they are inextricably interconnected. Again, heed the scientific research. Let live the wild creatures. Improve conditions for domesticated animals, Re-think the notion of 'for-profit' - it is short-sighted, and self-destructive in the long run. What are our needs versus our wants. We are destroying our children's future. If this pandemic has not taught us that, then we are in grave danger. The time has arrived for us to change the way we do things, to save ourselves, our future, and our planet. Hope this helps you to re-consider, and to take the notion wider, beyond the slaughter of wild animals. We are custodians of the earth, we are part of it. It is not lawful for us to dominate the earth & its creatures. We ignore this to our own detriment. The proof is in the current pudding. As a start, the YouTube/TED Talk video by a well-known environmental lawyer - Mumta Ito, is most informative & worth the 15-minute watch: https://www.youtube.com/watch?v=1nZ9u2ZoIJo&feature=youtu.be

Please read the research on how we got to this point. There is a treasure trove of it out there. The COVID 19 virus is postulated to have originated from caged animals in a wet market in China, from animals that should have been in the wild, in their natural environment, unhindered. That COVID 19 may have stemmed from the faeces of bats in caves in rural China before that, is due to the fact that humans have encroached onto their natural habitat (study the science). It is not the 1st virus to do this - called jumping (mutating to become a direct human-to-human spreading virus). Recall the recent swine flu, bird flu, ebola, and even the HIV pandemic. These all originated from man's interference with the natural order of things on planet earth (again look up the scientific research on this). Modern agricultural practices & human settlements have encroached on natural habitats of wild animals & ecosystems, creating an imbalance. Part of this has also been the caging and fencing off of wild animals, especially for consumption. This unnatural practice is what has got us to this critical point globally. If we do not change our current ways of thinking & practices of plundering & environmental destruction in the name of greed & profit, which I believe is the intention for slaughtering wild in this way, we are heading for unprecedented destruction of earth and ourselves. Current livestock and poultry practices are also in dire need of revision - recall the recent Listeria outbreak. Another way of looking at it - we need to realize that all creatures deserve the respect due to them. The Golden Rule, Ubuntu, applies equally to Mother Nature & her other creatures, not just to humans. Again, please take heed of the science. We are currently experiencing the 6th mass extinction of creatures on our planet (loss of 150 to 200 species daily due to human interference). Since we are also a species, it is bound to impact us. We are already seeing this destruction in all the interconnected disasters around the world - global warming, disappearing ecosystems, diseases as mentioned, animal extinctions, loss of viable land, wild fires, floods, melting glaciers, rising oceans, warming temperatures, and more. These events are not occurring in isolation - they are inextricably interconnected. Again, heed the scientific research. Let live the wild creatures. Improve conditions for domesticated animals, Re-think the notion of 'for-profit' - it is short-sighted, and self-destructive in the long run. What are our needs versus our wants. We are destroying our children's future. If this pandemic has not taught us that, then we are in grave danger. The time has arrived for us to change the way we do things, to save ourselves, our future, and our planet. Hope this helps you to re-consider, and to take the notion wider, beyond the slaughter of wild animals. We are custodians of the earth, we are part of it. It is not lawful for us to dominate the earth & its creatures. We ignore this to our own detriment. The proof is in the current pudding. As a start, the YouTube/TED Talk video by a well-known environmental lawyer - Mumta Ito, is most informative & worth the 15 - minute watch: https://www.youtube.com/watch?v=1nZ9u2ZoIJo&feature=youtu.be Thank you for listening. 	2020-06-30 11:26:01	Western Cape		No I do not	We've already established that the virus we are currently battling arose from eating wildlife. There is evidence of similar viruses being present in many species. We should, for our own safety, move away from the practice of eating wildlife. Furthemore, wildlife constitutes one of the means by which this country makes money through tourism. Globally many species are becoming extinct because of the reckless attitude of governments towards preservation. South Africa, a country that is on the forefront when it comes to the recognition and protection of human rights, was scored an “E” by the World Animal Protection, with “A” being the best score that a country could be awarded. This international NGO has done a comparison of the animal welfare laws of 50 countries and found South Africa lacking in respect of its commitment to improve and allocate resources to animal welfare, as well as in respect of developing laws to provide for sufficient protection of animals. Our score a few years ago was a "D". We are getting worse, not better. South Africa can do better! Adding species to the list of animals to harvest for meat is unacceptable. The list should be reduced, not expanded. We should protect our wildlife for the next generation and if we exploit them, it should be to show off our wealth in wildlife in their natural habitat to tourists.	Charmaine

	2020-06-30 11:01:48	Western Cape		No I do not	There can't be any reasonable rasionale behind this decision - to essentially bypass the vital endangered species act. If this is an attempt to make more meat produce available to the public, then in my opinion, a better solution is to educate the public on the amount of meat intake that we as responsible members of society should be consuming. Changing the demand will impact this act. If this is an attempt to open the South African economy to a new source of income, then this is extremely shortsighted and deplorable in the face of what we as a nation - and humanity - have accomplished so far to safeguard the future of our life on this planet. 	2020-06-30 10:37:54	Western Cape		No I do not	Legalising and increasing the number of animal species that can be slaughtered and exported presents a serious threat to our wildlife. Whatever legislation is put in place to manage this legalisation there are going to be loopholes and corrupt officials involved, which will result in plundering of our wildlife resources. Humanity has already raped the earth and caused untold destruction with a massive extinction of species happening currently. I appreciate that communities living close to our wildlife resources need to benefit economically, but surely this can be done by engendering respect and promoting stewardship, which will increase tourism opportunities, rather than by promoting wholesale slaughter and further upsetting the delicate balance of Nature. It is the responsibility of government to educate and promote living in harmony with each other and all our fellow Earth inhabitants rather than supporting the notion that as an apex species we can just continue to take whatever we want. 	2020-06-30 09:54:33	Western Cape		No I do not	It is utterly barbaric to kill all animals for profit or food apart from those domestic animals bred for that specific purpose., under strict supervision. Africa has a wealth of wild animals which are threatened with extinction if they are not protected. They form a huge part of the tourism industry. If we do not protect all animals, especially wildlife and endangered species , the rest of the world will turn on SA and our tourist industry will collapse. Protecting our wild animals from exploitation and neglect. And improving wildlife conservation efforts .. which would have the added bonus of improving much needed tourism revenue.	Darryl

	2020-06-30 09:03:31	Western Cape		No I do not	It is clearly shown in the Bible which animals we should eat: only grass or wheat eating or seed eating animals were permitted. That is because our Creator knows best what is good for us. We are not programmed to eat carnivores and that is where sooner or later disease arises as Covid 19 has proved. All this does not even touch on the importance of the tourist industry. Visitors come from far distant lands to see our wonderful animals living in their natural habitat. So sooner or later we would lose the tourism industry as well.	Stella

	2020-06-29 22:32:41	Western Cape		No I do not	If this were an act in the hopes of raising the populations of these endangered species I would be saying something else. The fact that the government is trying to pass an act to farm an endangered species for slaughter, is NOT a solution. It is counter productive as it is not promoting the proliferation of animals in their natural environments and is therefore not an act of conservation, but rather another government scheme to get more money. Does this counter act poaching, to an extent yes. Does it do it constructively, no. Rather than promote their life and position in their natural habitat it has turned then into a product with a dollar sign on it.	Freya

	2020-06-29 22:22:52	Western Cape		No I do not	Dear Ms.Didiza, I and numerous South Africans are very suspicious about this proposed extension of the listed animals to now being 'edible'. Are you serious!!!! We were given these animals into our care by Almighty God not for our use and to satisfy our greed. This is not acceptable at all. The track record of your department when dealing with wild animals makes me very apprehensive as to your motive, whatever your assurances might be at this stage. Most of the animals on this list are draw cards for tourists and are distinctive to our country if you need an economic imperative to protect them and not use them for pet food for instance, which could well follow this law change. Basically we as concerned South Africans wish to know why you are wanting this change to the existing law to re-categorize these animals. Kindly let us know! Respectively yours, Maria Schoeman	Maria
	2020-06-29 22:21:57	Western Cape		No I do not	Many wildlife species numbers are already dwindling away , and to do this will only be to open the flood gates and nothing will be left for our childrens children. We are also only a part of the many different ecosystem and various food chains around us. If we break one or more of these food chains , we are literally endangering our own sustainable existence through damaging the longterm sustainability or survival of our food supply's.	Ulrich

	2020-06-29 20:18:40	Western Cape		No I do not	To resort to slaughter of all and sundry is a completely irrational decision indeed. Firstly Southern Africa produces a dearth of all types of livestock for human consumption.South Africa in its own right produces more than adequate amount of meat.Our neighbours.Botswana and Namibia do too.If we commit to the slaughter of our wildlife as was done in Zimbabwe we will put a nail into the coffin of our most precious tourism industry. A decision to commit to the slaughter of our wildlife is totally irresponsible and borders on barbaric.One wonders about the huge influence the Chinese have had on this ridiculous notion.We should be protecting our already endangered species from poaching and ultimate decimation.We in South Africa should be leading the way in conservation.To pass a law like this would be as very sad day which would signal the demise of one of one the most beautiful countries in the world.It would be an incredible insult to all our conservationists who work tirelessly to protect our wildlife.Please pour all available resource into wildlife protection so that our children can all get to experience the sounds of the wild.Please I beg of you to act now before we become a barren wasteland devoid of life	Mike

These species contributes to South Africa's biodiversity and are the reason so many international tourist pay high prices to visit our country and contribute huge amounts to our economy The way this act is written allows many loop holes that cause the abuse and demise of our wildlife. Please reconsider the necessity of adding more species to this list.	Brittany

We should be protecting these animals, not filling our bellies and whoever made the request to extend the list of animal meats, that we can buy at our local stores, honestly disgusts me.	Cole

	2020-06-29 16:21:23	Western Cape		No I do not	We should learn our lessons, too. As a consequence from the current coronavirus pandemic even China has restricted wildlife trade and banned consumption of bushmeat. And the South African Government is considering just the opposite? PLEASE, stop this immediately! For the sake of our public health! Also we should protect our beautiful, yet already dwindling wildlife which is part of our National Heritage and a crucial tourist attraction. If you really include elephants, rhinos and other endangered animals as “meat”, this will lead to a huge and long-running boycott of the international tourists. 	2020-06-29 15:53:55	Western Cape		No I do not	We need to start preserving our wildlife and also face the difficult questions of what impact eating meat has on the animals themselves, people's health and the affects on the environment. Economically, there is arguably more people in tourism that will benefit from these animals being alive than those that will benefit from the unnecessary killing of these animals. In the middle of a pandemic that is yet another outbreak of a contagious disease that is caused by the consumption of (wild) animals it is time we rethink our approach to how we treat animals. 	2020-06-29 15:39:29	Western Cape		No I do not	I join tens of thousands of other South Africans in deeply objecting to this dangerous draft amendment to the so-called 'Meat Safety Act'. What an ironic name. This short-sighted and badly researched amendment encourages the exact opposite of safety for humans, animals and the environment. It would be a major and irreversible setback for the environment and for the animal justice struggle in South Africa, which is aligned to social justice struggles around the planet. In short, it is deeply unprogressive and contrary to the progressive spirit of South Africa's Constitution. I recommend that it be scrapped outright as a retrogressive and deeply harmful piece of legislation that will open the doors to unchecked systematic violence and cruelty to our fellow sentient beings and usher in a dark new era of wild animals being farmed and exploited on mass — just like cows, pigs, sheep and chickens. In an era when the world is waking up to the immense harm that animal agriculture is doing to the environment, it would be a grave error for South Africa to move in the exact opposite direction, amping up industrial animal agriculture for the short-term profit for the few at the expense of healthy, flourishing ecosystems for the many. Animal agriculture has been proven to be one of the leading sources of climate change and the people of southern Africa are at great peril from the ravages that will be wrought on us if we continue to ignore the warnings. The South African government should be crafting legislation to reduce and end animal agriculture and promote diverse plant crops, polycultures and small-scale farming across the country's cities and rural areas. We need to increase our green spaces and protect our wildlife from harmful poaching and hunting, not enslave animals into systems of endless violent reproduction and slaughter to profit the few. This legislation is deeply shortsighted and retrogressive and it must not be passed. In addition to the harmful effects of animal agriculture on the environment, the COVID-19 pandemic has highlighted the clear link between animal agriculture — and in particular the link between human exploitation of wild animals as the source of this pandemic and other catastrophic virus. The South African government should be doing everything in its power to halt the emergence and spread of further zoonotic diseases. Instead, this legislation opens the door to the exact conditions that give rise to zoonotic diseases. It is as if the government has done zero research into the proven scientific source of this virus and this catastrophic pandemic. If government is serious about creating the conditions for a healthy, well-fed nation and a flourishing biodiverse environment, they will wake up to the fact that the future is plant-powered (and wind- and solar-powered). The proposed amendment to this Act must not be passed. It is an aberration that will harm this nation — humans and animals and all life in this region	Yashmeen

	2020-06-29 15:35:44	Western Cape		No I do not	This would encourage killing of endangered species for consumption, which would not only have negative ecological impacts, it would hurt the game tourism industry as well (as game viewing animal numbers would dwindle) & poaching would be encouraged. This takes away protection from endagered species & upsets the environments balance as well as encouraging poachin behaviour. There is enough regulated meat on the market as is. To allow consumption and hunting of more game animals is irrational and unreasonable. Do not make these amendments. Do research on what happened when elephant tusk was legal & look at our current position with the rhino population. To allow these amendments would be utterly irresponsible & frankly backwards thinking.	Margaux

Under no circumstances will myself or my family ever approve of using wild animals for consumption. South Africa has pride in their 'Big Five' and other animals that draw thousands of tourists to our land yearly. Not only is it wrong to even consider consumption of our wildlife, the uproar from internationals will be deafening. We are currently in a Climate Crisis, and destroying what little there is left of our beautiful environment is not viable, is selfish, and a step closer to South Africa being shunned more than it is already being shunned. Never before have I heard of such a ludicrous idea. If anything, funds should be put towards self-sustainable vegetable gardens. We will not sit back and watch the SA government steal everything from us, especially not our wildlife. You have no right, whatsoever, to even begin to draft your plans in this regard.	carly

	2020-06-29 14:57:38	Western Cape		No I do not	Its hard to believe that there was any thought other than material gain in the compilation of this list. Approximately half of the species listed do not exist in South Africa - not even in zoos. Many others have a Red Listing of Threatened or even Endangered. Even rhinos are included in the list. The final clause at the end of the document basically allows any species to be utilized as meat. Seems that even the experience of the covid pandemic has not stopped our government from increasing the amount and species of wild animals consumed - do they not have any idea how humankind became plagued by covid-19, SARS, MERS, Ebola and HIV? It was all through consumption of wildlife , something which we should be curtailing and not expanding! How irresponsible to the future generations..	Mike

	2020-06-29 14:52:45	Western Cape		No I do not	1. It is entirely inappropriate to include a number of highly threatened wild animal species on this list. These animals are part of our national heritage, and everything must be done to ensure their protection and continued existence, for both this generation and future generations, as set out in the National Environmental Management Act 107 of 1998 and in the National Environmental Management Biodiversity Act of 2004. 2. It is extraordinarily ill-advised at this time, when increasingly the science of disease transmission is focusing on the consumption of wild meat as the sources of pandemics such as Covid-19, to propose expanding the list of wild animals to be farmed and consumed. Such a move will considerably increase the risks of future pandemics; something that should not be considered in our country. I do not support any amendment of this Act - all threatened wild animals MUST be removed from this Meat Safety Act.	Susan

	2020-06-29 14:41:58	Western Cape		No I do not	Whilst I am not against the slaughtering of pigs, cows, chickens, sheep etc as these are all the generally accepted meats for consumption, even antelope like for example the impala which seem to breed in significantly large numbers - I do however believe it is Absolutely Disgusting to slaughter exotic wildlife like for example, Giraffe, Lions, other wild cats etc where often the population of these animals may be more compromised and pushed to the verge of extinction. By adding more species to this legislation and then it will be the next new ruling and the next ... little by little it will become the Cheetah and the Rhino and the Hippo ... where does it end? Africans need to take steps now to stop this nonsense before it goes too far and gets way too late or inevitably there will be many consequences which will start to jeopardise and impact on so many things like eco systems jobs tourism etc. We need to work to preserve and respect the exotic wildlife that we have been blessed with living on this Continent otherwise what is the point of people fighting to protect animals like the Rhino from poachers or doing research on improving the gene pool to keep the Cheetah species going? Some loathsome "humans" won't be happy it seems until many if not all species become extinct. Then what? It will certainly put a stop to the Rhino horn poachers and the Canned Lion hunters, trophy hunters visiting from abroad and the Chinese importing our exotic animals for their own weird "pharmaceutical" requirements because there won't be any animals left. Many people from across the globe visit Africa every year to see the beauty of the lands, their people and the majestic wildlife in its wild natural habitat. This has a huge knock on effect throughout the tourism industry and many facets beyond providing much needed funds for businesses, employment in hospitality and the craft industry, people paying to volunteer in animal sanctuaries to mention a few. Churches and charity organisations overseas will organise volunteers to come to Africa to provide free volunteering assistance where they can help within needy communities often within schools and creches. Larger organisations like Born in Africa provide much needed funding for buildings, equipment, teachers, uniforms etc. In some instances perhaps many if not all overseas visitors will at some point want to come or have already been on their trip of a lifetime first to visit the game reserves to see the animals and then perhaps that has prompted them to help in some way. It is a huge draw card for them to come to Africa to see the animals in their natural environment. This is probably the highlight of their trip and is probably the main factor for people to return. Africa should set an example to the rest of the world and take the lead in visible action to cease abuse, slaughter and destruction of wildlife. This is happening around the world whether it be against animals or abusing the land it all has a dangerous effect on many different species. We should be promoting protection and respect from now today to benefit all future generations. It is not our right to force them out of existence. All lives matter whether human, animal, insect, flowers, trees, grasses we are all here in combination and balance to create a harmonic and beautiful natural world. Life is not about wealth, power and prestige. We need to look to and relearn from those that know how to live with and from the land, plants etc and not destroy everything in our path but strive to maintain and protect our beautiful planet and return to our true life's path living alongside Nature.	Angie

	2020-06-29 14:14:19	Western Cape		No I do not	I am absolutely appalled that a draft like this would even be considered! Firstly this is our WILDLIFE .....WILD.....not to be factory farmed to satisfy a taste for bushmeat. This is Africas heritage....people travel from far and wide to experience these majestic animals in the wild, not think of them as a food source.....the rich or poor!!! There is more than enough meat breed from farm animals for consumption, not always in a human way either I am sad to say. Secondly, we are in the midst of a pandemic, heaven knows how this virus originated, but the devastation has been unbelievable to so many people, mainly poor.....why would we then choose to eat animals that are not meant to be eaten and maybe once again introduce a virus or desease that could kill even thousands more. It will also open the flood gates on more corruption, greed and money exchanges as anything with fur, fins or feathers will be considered "fair game".....God will judge us all on how we treat our animals!!! Please stop this bill being passed.....let sanity prevail!!!!!! Please someone in power make a stand against this bill, I beg you.	Charmaine

	2020-06-29 12:47:16	Western Cape		No I do not	I join tens of thousands of other South Africans in deeply objecting to this dangerous draft amendment to the so-called 'Meat Safety Act'. What an ironic name. This short-sighted and badly researched amendment encourages the exact opposite of safety for humans, animals and the environment. It would be a major and irreversible setback for the environment and for the animal justice struggle in South Africa, which is aligned to the social justice struggles around the planet. In short is deeply unprogressive and contrary to the progressive spirit of South Africa's Constitution. I recommend that it be scrapped outright as a retrogressive and deeply harmful piece of legislation that will open the doors to unchecked systematic violence and cruelty to our fellow sentient beings and usher in a dark new era of wild animals being farmed and exploited on mass -- just like cows, pigs, sheep and chickens. In an era when the world is waking up to the immense harm that animal agriculture is doing to the environment, it would be grave error for South Africa to move in the exact opposite direction, amping up industrial animal agriculture for short-term profit for the few at the expense of healthy, flourishing ecosystem's for the many. Animal agriculture has been proven to be one of the leading sources of climate change and the people of southern Africa are at great peril from the ravages that will be wrought on us if we continue to ignore the warnings. The South African government should be crafting legislation to reduce and end animal agriculture and promote diverse plant crops, polycultures and small-scale farming across the country's cities and rural areas. We need to increase our green spaces and protect our wildlife from harmful poaching and hunting, not enslave animals into systems of endless violent reproduction and slaughter to profit the few. This legislation is deeply shortsighted and retrogressive and it must not be passed. In addition to the harmful effects of animal agriculture on the environment, the COVID-19 pandemic has highlighted the clear link between animal agriculture -- and in particular the link between human exploitation of wild animals as the source of this pandemic and other catastrophic virus. The South African government should be doing everything in its power to halt the emergence and spread of further zoonotic diseases. Instead, this legislation opens the door to the exact conditions that give rise to zoonotic diseases. It is as if the government has done zero research into the proven scientific source of this virus and this catastrophic pandemic. If government is serious about creating the conditions for a healthy, well-fed nation and a flourishing biodiverse environment, they will wake up to the fact that the future is plant-powered (and wind- and solar-powered). The proposed amendment to this Act must not be passed. It is an aberration that will harm this nation -- humans and animals and all life in this region.	Dr Alexandra

	2020-06-29 12:40:57	Western Cape		No I do not	This is totally barbaric! We should be protecting all our wildlife, especially the species on the endangered list, not farming & consuming them. Does the South African government want to be an epicentre of zoonotic diseases like China is? The fact that the outbreak of COVID-19 occured in China where wet markets flourish should be a huge red flag for any country thinking of commercialising wildlife for consumption. It is completely unnecessary & just shows how backwards our country can really be. We're better than this. South Africa should be a glowing example to the rest of the world of how a country protects its stunningly diverse wildlife, not decimating it.	Amelia

	2020-06-29 10:18:33	Western Cape		No I do not	1. The proposed list includes many critically endangered animals, which should be conserved. 2. The law states that an animal presented for slaughter at an abattoir must be handled humanely during loading, transportation, off-loading, housing, immobilizing and killingas prescribed in accordance with the requirements of the Animals ProtectionAct, 1962 (Act No. 71 of 1962); and each animal must be closely examined by an independent expert before it is killed. This is not possible with most wild animals, particularly animals such as rhinos, giraffes, elephants and hippos. 3. 	2020-06-29 09:57:10	Western Cape		No I do not	It's a travesty to include meats such as giraffe, rhinoceros and elephant. Conservationists are already battling to save these species from poachers and hunters. This new law will allow people to exponentially kill these animals via poaching and hunting for their own consumption, thereby leading to the extinction of these species Africa is famous for, and for whom tourists flock to the land. This law will lead to cruelty in killing and decline of tourism, one of Africa's top money spinners. You seriously haven't learnt via Covid 19 about the dangers of extorting meat from wild animals leads to a range of new diseases and possible pandemics My thoughts are that China is behind this attempt to add these meats. Shame on you causing extinction of beautiful, graceful gentle giants. This truly sickens me. I imagine it's yet another corrupt attempt on behalf of government to get kickbacks in the form of huge money payments and this is truly horrendous.	Debbie

Are people not learning their lesson with the corona virus? How many people must die before we realise that we are not supposed to eat just any animal. I urge you to please not pass this law and disallow the eating and consumption of all these animals.	Marelize

Dogs and cats? These lists should be gradually reduced with the visionary goal of having a meatfree livestyle. There are more and more alternatives, which just have to be promoted to trigger cultural and behavioral change. Like 'wash your hands and sanitize...to curb the spread and protect others' ...it could/should also be promoted something like 'Avoid meat and most or all enviromentally harming animal products to save water'	Kilian

It's Act X Part X? That's the voice of the cynic in me, it does not come out of nowhere!! There is however, the hopeful part of me! Hopeful that the ideals and vision that Nelson Mandela and many other great men dedicated their lives to fighting for, is somehow reignited by whichever means possible. By leaders who truly care about South Africa's future!! Anybody out there? Leaders who uphold what the ANC stood for then. How does our NOW government sleep at night knowing the insult to these freedom fighters? Freedom for all! Including those who now hold power and whom have now taken away our freedom in other areas. And if that is not enough, they now want to take away the freedom of our WILDlife? This is my contribution towards standing up and fighting! I may be one voice, but there are many more and together we can make a difference! I refuse to see South Africa become more of a circus than it already is with irrational, insane decisions being made and all sorts of ludicrous laws coming into place, bypassing all mandatory procedures. Whether or not correct channels are being adhered to regarding implementing this act, or if government is wearing a big smiley faced clown mask, is in my humble opinion, completely irrelevant!!! Who wrote this comedy? This is the most outrageous act to date! Are we going to be the South Africa that ate its BIG 5??? So, my short response….do I Agree? NO!	Nicole Vittoria

Education of what is allowed is lacking greatly. We need to protect our creatures and give them the respect they deserve because that is heartbreaking enough what these animals go through daily for human consumption. Are we not going to start making the world a better place by educating those that animals are not food. A life is a life and it occurs more naturally in nature than in humans because they are connected to the earth and react to the environment to which they are placed. Please do not allow more butchering to happen. We need to educate people. This is far greater than you can imagine as its going to change the world drastically and potentially forever by allowing things like this. We are destroying nature and one day it's going to be too late to save the planet and worse diseases and bacteria and viruses will become a danger if you allow this. Please stop!!!!!!! This cannot happen, nature is going to suffer and in turn humans will out of it. I beg you, please do not do this!!!!!	Liza
	2020-06-29 00:15:05	Western Cape		No I do not	Many of these animals are endangered and this law if passed will hasten the inevitable- extinction. We need to protect them for future generations and help secure the diversity of species the planet so desperately needs.	Brucr

	2020-06-28 23:31:41	Western Cape		No I do not	Definately NO, NO, NO!!!! Please scrap this policy. There is no room to shape it. It is a sick policy! Is this how the government wants to reserve wild live for the generations to come? It seems to me there is another agenda behind this amendment - why on earth do you want to eat these beautiful animals? The lockdown has killed tourism and hospitality in SA and now you even want to kill the possibilities to resurrect these businesses? Where does the government think they will get money from if they kill businesses and our precious resources and heritage for the generations to come? Please scrap this policy! Where do you get time and money to spend on policies like this? Please rethink what you are doing! Is this your plan to feed the millions who are going to be hungry after the lockdown and your money has run out? Support and protect farmers so they can grow us healty and nutritious food. Humans don't even need meat! In time of famin, you cannot kill your wild life. If there is famine after the lockdown, it is because of bad decisions made by our government. This is not the way to feed a starving nation.	Hanlie

	2020-06-28 23:29:57	Western Cape		No I do not	This will make the governing and protection of endangered wildlife even harder. It will blur the lines between endangered species and livelihoods. It will expose more animals to abuse and mistreatment as it will be nearly impossible to regulate. The fact is people will not adhere to seasons or allotted numbers and our natural heritage will be plundered and lost forever.	Wayne
	2020-06-28 23:29:39	Western Cape		No I do not	I think that it is absolutely cruel and disgusting for any animal , no matter what species, to be killed so that the greedy population of man kind can over eat and bring extinction to many habits and species... Just for the enjoyment of a steak. This cow WAS a living being just like you and me, that did not need to be slaughtered. No matter the amount of money or power of a person, they can not fix a world that we could, and have already destroyed with our greed and unkindness towards nature and its animals... and all together just others in general. Just because we are stronger than other species doesn't mean we have the right to murder living beings that have emotions and feelings.	Savanna

	2020-06-28 23:15:21	Western Cape		No I do not	I'm against the legislation, but am also totally against the racist comments from some 'privileged' racist. This stems from greed...many farmers involved in breeding wildlife for canning for rich great white trophy hunters are themselves not like from China. Is it then ok to eat kudu, springbok, gemsbok, and many other wildlife or is it only when it's eaten by Chinese. Or stay with pork and beef like any civilised persons would, especially with all the hormones and antibiotics they treated with...	Guy

	2020-06-28 21:33:23	Western Cape		No I do not	Some of the reasons why I would oppose such legislation: 1. This seems mainly in the interest of the huge wildlife game meat business, canned lion hunting concerns and the export of animal derived products to Asia. 2. Protection and conservation of endangered species and the welfare of wildlife in general is of no or little consideration. 3. Poaching and the illegal trade in wildlife products will be much harder to police than it already is and subsequently increase. 4. The covid-19 crisis should be a reminder of the dangers of infectious diseases passing from wildlife to humans. 5. There is no provision made to ensure humane treatment of animals to be slaughtered and the Dept. of Agriculture does not have the capacity to oversee all abattoirs.	Simone

	2020-06-28 17:58:35	Western Cape		No I do not	I am horryfied that animals like lions, hippo, elephant lions etc should be kept on small holdings, used comercially for their skins and meat etc. What happened to conservation, compassion for other species .? WHY is this countrybecoming more and more like some Asian countries, next week will allow people to farm Rhino for their horns. There should be more emphasis on human birth control, then less food will be required for humans. Habitat destruction must be curbed and our wild animals need to stay in their natural habitats. 	2020-06-28 17:54:53	Western Cape		No I do not	As much as sine believe that meat is meat,Wildlife is what actually makes our African continent to be proud, preserving and protecting our game will teach our future leaders and kids as to what wildlife is. A lot of them are getting extinct due to to greediness that benefits only the bourgeoisies, yet the proletarians suffer the results. With so many wild animals in the jungle why would the very endangered ones are selected? Will this mean that they will be eaten through culling or what,and whats there discovered from those animals all of a sudden and by who? Tourism is benefiting from such animals and therefore it's the industry that puts food on the table that is put on ICU.	Thangami

	2020-06-28 17:28:16	Western Cape		No I do not	At this given time, when we are facing a global pandemic that originated from a misuse, abuse and extortion of our wilflide and human heirtage, it is incomprehensible that such a amendment would even. Be considered, let alone endorsed. If there is a shred interest in the future existence of this world, then any new Acts or amendments to existing Acts should only benefit the strict conservation of natural resources and animals. When will human greed and complete disregard for Mother Earth and all her inhabitants get to a point where enough is enough? We may as well all end ourselves right now if we continue to rob the world of all its natural resources and continue to dig our heavy tracks into the earth. At the rate we are going, the world is already on the edge of a slippery slope downwards. I cannot condone the amendment if an Act that will rob us of the animals that make us such a beautiful African country.
