2022-08-13 11:15:10	Outside SA	Namibia	Yes I do	Solar	1) Draw up a 20 year plan on how much electricity will be needed. 2) Draw up a 10 year plan on how much electricity will be needed. 3) Determine all factors that will contribute to increased electricity need, like population growth, changes in laws, new technology etc. 4) Place and advertisement in the media to find out about energy producers in the country, abjuring counties, etc. 5) Send an invitation to all major contributors. 6) Discuss the energy needed for the next 10 to 20 years with all role payers and get their input on what they can contribute to the plan. 7) Get everybody's committment on contributing to the plan. 8) Draw up a plan for supply and demand over the next 10 to 20 years. 9) Revise the plan yearly to see that all contributions are done. 10) Draw up a plan to determine maintenance requirements, necessary new equipment, etc.	Andries	retired
2022-08-12 23:22:46	Free State		Yes I do	Solar	Solar/batery banks energy is simple but effective. No pollution and reliable.	Dennis	retired
2022-08-11 23:31:13	Western Cape		Yes I do	Solar		Golda	retired
2022-08-09 16:55:38	Gauteng		Yes I do	Solar	Solar and wind energy are in plentiful supply year round in South Africa. Independent producers should be able to sell to Eskom. Coal is a dirty form of energy.	Gail	retired
2022-08-09 08:30:00	KwaZulu- Natal		Yes I do	Solar		Keith	retired
2022-08-08 16:53:57	Western Cape		Yes I do	Solar	Why do we as citizens have to be in darkness due to corruption and mismanagment? Are we not supposed to be considered in receiving the best possible method of Power supply. Corruption is at the order of the day. When is the Government going to take action to protect us? We are enslaved to legal insecurities due to their will and conduct. We are paying our taxes and therefore we are entitled to the best Power Supply available.	Charlie	retired
2022-08-08 05:21:00	Gauteng		Yes I do	Solar	Our country is in a mess so I feel all people /businesses that can generate electricity at reasonable prices should be allowed to approach Government with their tenders immediatly ti end this load- shedding and help SA To move forward	Cecelia Ruth	retired
2022-08-07 22:49:01	Western Cape		Yes I do	Solar		Santa	retired
2022-08-06 13:21:34	KwaZulu- Natal		Yes I do	Solar	Apart from solar, wind could also be considered. With this new concession one just hopes that it is just not another scheme with loopholes for the chosen corrupt ones to abuse. Apart from the current situation we find ourselves in, partly due to corruption and inability to maintain ageing infrastructure, the question arises whether we can still afford exporting energy to neighbouring countries?? All this to the detriment of our OWN economy and livelihood of our OWN citizens.	Attie	retired
2022-08-06 13:21:34	KwaZulu- Natal		Yes I do	Solar	Apart from solar, wind could also be considered. With this new concession one just hopes that it is just not another scheme with loopholes for the chosen corrupt ones to abuse. Apart from the current situation we find ourselves in, partly due to corruption and inability to maintain ageing infrastructure, the question arises whether we can still afford exporting energy to neighbouring countries?? All this to the detriment of our OWN economy and livelihood of our OWN citizens.	Attie	retired
2022-08-06 09:09:04	Western Cape		Yes I do	Solar	With the failure of Eskom it is essential to make it easier for others to contribute towards the supply of power. I support a combination of all clean energy power, and that private industry and individuals can produce and add power to the grid.	Rona	retired
2022-08-06 08:42:27	Gauteng		Yes I do	Solar	Look after the environment. Use solar and wind it is free and easily available. Strop the corruption, go private. Anc are not trustworthy	Valerie	retired
2022-08-06 00:07:16	Free State		Yes I do	Solar	We must look at alternatives for power in any form to assist putting power in the grid, but long term Eskom must be scrapped and private companies should be allowed to provide energy on a competative base. Our current elecricity is soo expensive. Its unacceptable!	Monica	retired
2022-08-05 16:37:15	Western Cape		Yes I do	Solar	With out electricity this country is doomed. Eskom life span is coming to an end. Let private enterprises generate electricity for consumption and supply Eskom. Just do not leave gaps for corruption.	Hamish	retired

2022-08-01 20:10:58	Western Cape		Yes I do	Solar	Solar AND wind generated power! We have so many suitable areas for wind generated electricity farms.	Karin	retired
2022-08-01 20:09:56	Gauteng		Yes I do	Solar		M	retired
2022-08-01 20:07:53	Free State		Yes I do	Solar	Both sun and wind are 'free' sources of energy and harmless to the environment. To me it is a responsible way of acting in a time when the majority of methods generating electricity presently is cause irreversible damage to our dear planet.	TC	retired
2022-08-01 19:47:50	Western Cape		Yes I do	Solar		David	retired
2022-08-01 19:06:29	Gauteng		Yes I do	Solar	Solar installation should be affordable, the sunshine is freely available. Keep corruption out!	Mel	retired
2022-08-01 18:46:20	KwaZulu- Natal		Yes I do	Solar	We desperately need power. Around the world, the quickest implementations are being done via solar, wind and battery power (for storage). These also happen to be the least environmentally damaging solutions, and this would likely be least affected by environmental regulations and environment-inspired lawsuits. Nuclear takes decades to implement (witness the overruns in time and cost in the current nuclear program in Georgia, USA). Minister Mantashe quotes SMRs (Small Modular Reactors) but to date, there is no effective commercially implementation of SMRs at any scale, and some will still take many years to implement. Coal: witness Medupi and Kusile.... SA doesn't have the ability to implement new coal, let alone on time and on budget and reliably. Gas: yet another fossil fuel with potential for rent seeking by the ANC and it's allies. And given the volatility in gas prices, likely to become islands of wasted investment in the medium term as solar and wind are much cheaper.	Anthony	retired
2022-08-01 18:26:04	Western Cape		Yes I do	Solar		Madeline	retired

2022-08-01 15:22:43	Gauteng		Yes I do	Solar	Solar, Hydro, Wind and Nuclear.	Maria	retired
2022-08-01 15:08:29	Gauteng		Yes I do	Solar	Combination of solar and wind should be sufficient.	Marilyn	retired
2022-08-01 14:43:57	Gauteng		Yes I do	Solar	For a country that has the sun out nearly the whole year, SOLAR was the obvious choice, EXCEPT we have a govt that only thinks of THEMSELVES No BEE should be selected or else FAILURE is on the horizon!!!!!!	DAMOVA	retired
2022-08-01 13:49:20	Western Cape		Yes I do	Solar	so much sun yet we still burn coal.	Alison	retired
2022-08-01 12:44:38	KwaZulu- Natal		Yes I do	Solar	Go for it !	Philip	retired
2022-08-01 12:17:01	Gauteng		Yes I do	Solar	Solar power is the quickest and most cost effective method of generating electricity. It is green energy and should be encouraged.	Dharshan	retired
2022-08-01 12:16:14	Western Cape		Yes I do	Solar	The 4 following power sources should be implemented as soon as is feasible, in the following order of importance and least impact on the environment. 1. Solar and wind. 2. Gas 3. Hydro 4. Nuclear.	Oliver	retired
2022-08-01 12:15:30	Western Cape		Yes I do	Solar		Priscilla	retired
2022-08-01 12:06:34	Mpumal anga		Yes I do	Solar	This should have been done many years ago. The government has been short-sighted and the politicians have put self-interest before the country's needs. There are vast tracts of land in the Northern Cape that could be put under Solar and solar IPP's should be supported, not discouraged. By continuing to support coal and gas, Mantashe has made South Africa a pariah state. It's high time that changed. The future of South Africa is at stake here.	Gwilym	retired
2022-08-01 12:02:25	Gauteng		Yes I do	Solar	Solar its free and with our climate, generally available all year round. ESKOM has been run into the ground by ANC's greed, Corruption and absolute incompetence.	Anton	retired
2022-08-01 11:22:55	Gauteng		Yes I do	Solar		Lilian	retired
2022-08-01 11:17:28	Western Cape		Yes I do	Solar	Sun is something South Africa has plenty of. We should be able to harness it to our advantage.	Susan	retired
2022-08-01 10:29:57	Western Cape		Yes I do	Solar		Leon	retired

2022-08-01 10:27:29	Western Cape		Yes I do	Solar	The ANC Government are a dictatorship and through this have destroyed everything in their sight as well as our country. In 30 years they have not maintained any infrastructure. We need to go private as soon as possible and get rid of all the red tape as well as Gwede and all the corrupt ministers at the same time. This is long overdue.	Pat	retired
2022-08-01 10:04:24	Western Cape		Yes I do	Solar	Once again the ANC government already shows over last 27 years that they do not have the ability to govern a country. The more any process can be taken out of Governments hands, the better. Lets go private. Pieter	Pieter	retired
2022-08-01 09:54:54	Gauteng		Yes I do	Solar	Solar should be used in conjunction with other forms of renewables where applicable. Wind and nuclear also have a part to play. But the important thing is to get away from coal and start delivering reliable energy to a struggling economy.	Cynthia	retired
2022-08-01 09:50:54	Western Cape		Yes I do	Solar	Solar, Wind, Nuclear and Hydro should be the direction South Africa goes. We have an abundance of Sunlight & winds both onshore & offshore. Solar is available for both large and small scale. Private individuals should be encouraged to have solar power for their own use and provide excess electricity to the grid. The opportunity here for land owners to do this is huge. Wind is available for both large and small scale. There are companies delivering both the above and the government can contract in for both build and management thus saving the government money that they don't have. Both can be built quickly. The development of both the above have brought the cost of wind & solar electricity down. Nuclear is far more long term and bigger. Nuclear power can be exported. South Africa should have a vision of being the biggest exporter of electricity in Southern Africa if not all of Africa.	William	retired
2022-08-01 09:17:42	Free State		Yes I do	Solar	The entire country depends on electricity, what is the risk of alternative power sources / suppliers, in fact it would be an advantage to everyone. I have installed a 8kw solar power system. I am in favour of any alternative power source, what I can not understand is if municipalities or big corporate in a particular area want to put up a power plant why can't they. In Sasolburg for example, the Sasol factory has its own power station, for their own use, they have offered to supply the residents, but this was turned down, WHY???	Peter	retired
2022-08-01 08:52:01	Gauteng		Yes I do	Solar	The abundance of sunshine throughout the year in many of our country's regions offers the best and earliest opportunity to add much power to the grid using a mature technology, a capability that is currently in place under private ownership and can be expanded in the short term. The dire need for rapid additional power is essential to avoid further economic repercussions and will allow other longer term options to be evaluated, but the need to deal with the current crisis is paramount.	Robert	retired
2022-08-01 08:37:35	Gauteng		Yes I do	Solar	So much depends on our power supply that we have to rectify the current single supplier situation and bring other power suppliers as quickly as possible. South Africa generally has many sunny days so solar is a great option.	Caroline	retired
2022-08-01 08:21:05	Gauteng		Yes I do	Solar	Renewables can help us supply the energy grid, Every household that can afford it should be encouraged to put on solar, wind- anything with subsidies to help in this situation. California did this successfully in the 80s	Gail	retired
2022-08-01 08:16:47	KwaZulu- Natal		Yes I do	Solar	There is an urgent need for additional power. This can be met in the short term by solar power. Government must facilitate the generation of additional power by any sustainable, environmentally acceptable means while we anticipate fusion power. New solar technology looks very promising.	Reginald	retired
2022-08-01 08:06:18	Western Cape		Yes I do	Solar		D.	retired
2022-08-01 07:11:53	Western Cape		Yes I do	Solar		Paddy	retired
2022-08-01 06:03:58	KwaZulu- Natal		Yes I do	Solar	Allow solar energy to be used free of charges to all. Give tax incentives to those who install solar power units to their homes.	Elizabeth	retired
2022-08-01 05:57:49	Western Cape		Yes I do	Solar	Should be alternatives, Also depends on who sets "independent" regulations.	Carol	retired
2022-08-01 05:01:50	Western Cape		Yes I do	Solar	I would have preferred not to have had to specify one type of alternative energy to promote for SA but since I must, its time to harness Sun energy, an unlimited resource. The point is the scrapping of red tape which intelligent humans have been requesting for years. We could have averted the recent power crisis had this Gov allowed independent providers to contribute to the grid sooner. Be it whatever kind of alternative power generation. I dont know why gas, coal and diesel and even water are included in the above list. They are where we are, not where we want to go.	Esme	retired
2022-08-01 04:55:01	Western Cape		Yes I do	Solar		Annemarie	retired
2022-08-01 04:23:56	Western Cape		Yes I do	Solar		Tricia	retired
2022-07-31 21:31:37	Western Cape		Yes I do	Solar		Rudene	retired
2022-07-31 19:39:30	Gauteng		Yes I do	Solar	Our nuclear reactor is there, several million kilometres away, harvest its energy. It reappear every morning without fail, no side effects. Technology is available, use it. It can provide millions in clean energy and hundred thousand with jobs. ESCOM can assist in doing it with existing infrastructure and in process it can reinvent itself into future. All that need only an act of faith of people in government.	Andrzej	retired
2022-07-31 19:28:10	Western Cape		Yes I do	Solar	If the Government removes all the red tape and restrictions for putting solar back into the grid our load shedding would have been something of the past long ago.	Rina	retired

2022-07-31 17:38:41	KwaZulu- Natal		Yes I do	Solar	Solar power is freely available in SA	Michael	retired
2022-07-30 20:20:47	Gauteng		Yes I do	Solar	To begin, the attempt by ANC to give the impression it is acting to remedy the electricity generation crisis - which ANC has caused in the first place! - is just another case of SA being lied to by ANC politicians and cronies. As SA has of the highest insolation on the planet - NOT insulation! - along with a climate that has sunshine for a significant part of the year means that the obstruction of deployment by means of bureaucratic nonsense likely is part of some enrichment scheme by subterfuge. Today (31st July,2022) estimated production of electricity in Germany at 14:00 was 25.4GW (see https://www.sma.de/en/company/pv-electricity-produced-in-germany.html) - yet in SA it was pathetically little. Some years ago a 96MW PV farm near Upington was completed in 11 months - on time and within budget, which compared with Medupi and Kosile tells a story. Even without battery storage the benefit of making use of sunlight during the day makes financial sense as there is no fuel cost (probably unpalatable to the corrupt as there is no opportunity for gouging large amounts of money). With the significant evolution of battery technology and the benefit of using stored electricity after the sun has set makes this particular sustainable technology attractive for SA, even though not for the corrupt. The well-being of all South Africans should be the factor that is considered when policy is decided, not some half-arsed ideological or corruption opportunity. Wind is also a reasonable source of electricity. SA should be allowed to follow the global trend to deployment of sustainable generation, constrained only by obviously poor practice. Job creation has followed sustainable generation deployment and in SA local companies should be encouraged/assisted to be primary implementers/ operators to avoid the drain on foreign exchange via repatriating dividends by foreign companies. Local companies	Robert	retired
2022-07-30 13:08:35	Gauteng		Yes I do	Solar	SA is mostly sunny however we may still require coal nuclear and people who have the right qualifications and expertise in the field of electric power. Who can manage people who work for eskom and eradicate corruption and the will to do it.	Petronella	retired
2022-07-29 15:32:43	Mpumalanga		Yes I do	Solar		Silviu	retired
2022-07-28 15:32:34	Gauteng		Yes I do	Solar	Solar energy is first choice. South Africa has abundant sunshine. Using coal, gas produces pollution and is the cause for climate change.	Francoise	retired
2022-07-28 14:13:03	Western Cape		Yes I do	Solar		Lee	retired
2022-07-28 10:15:54	Western Cape		Yes I do	Solar	As citizens of The Republic of South Africa we together with others are so privileged to have abundant wind and long days of sun. These natural resources should be utilised, i.e. wind pumps for the benefit of all. Our dams when full, should also be used with hydro electricity. We should, at all costs never be at the mercy of people in Government or overseas who want to exploit the current crisis.	Brian	retired
2022-07-28 07:24:34	Limpopo		Yes I do	Solar	Solar and wind is our solution and to get rid of the shenigans running and stealing our country into the dumps.	Jan	retired
2022-07-27 17:39:52	Gauteng		Yes I do	Solar	Solar and wind energy from Private and Eskom Sources should be utilised to the full. Storage needs to receive high priority. The coal power stations should be brought to full production immediately but no new coal and nuclear power stations should be built.	Hans- Christoph	retired
2022-07-27 15:10:06	Gauteng		Yes I do	Solar	Its about time the government removed their finger. This should have happened 14 years ago. The economy would be in better shape... and people would be happier. Not, of course, that the ANC cares about their people...	Gisela	retired
2022-07-27 10:14:58	Gauteng		Yes I do	Solar		Trudie	retired
2022-07-26 14:39:50	Western Cape		Yes I do	Solar	I would like to chose solar and wind electricity production , because both methods would help to solve our problems.	Anieka	retired
2022-07-26 12:38:34	Gauteng		Yes I do	Solar	This is the best option. Eskom must go. Too much loadshedding and they charge us a lot of money for services not rendered	Hester	retired
2022-07-26 07:34:49	KwaZulu- Natal		Yes I do	Solar	Solar , wind & any other environmentally friendly & sustainable source - but NO involvement by any government or political party ! ANC & government over the past 30 years have destroyed the infrastructure we had & pillaged the coffers - the must NOT be involved !!!	Barbara	retired
2022-07-26 06:58:34	KwaZulu- Natal		Yes I do	Solar	Eskom has been useless for 20 years	Gary	retired
2022-07-25 22:06:38	Gauteng		Yes I do	Solar	We have so much annual sunlight and so little rain comparatively speaking it is ridiculous not to harness a natural sustainable resource.	Doreen	retired
2022-07-25 19:19:04	Western Cape		Yes I do	Solar	Solar has been researched and developed. Infrastructure is in place. And its out of govt's control, so far.	Deon	retired

2022-07-25 17:42:48	Gauteng	Yes I do	Solar	At the minimum, the government should encourage all citizens to fit Photo Voltaic Solar panels on their roof tops. What would be nice if the government subsidises the capital investment to a certain percentage WITH NO STRINGS ATTACHED. The next critical action required is that the government replaces ALL electrically heated water geysers with solar heated water geysers in ALL households throughout South Africa. Just imagine if all the mega watts consumed by these antiquated electrical geysers turns to ZERO WATTS. if the the above is done, then South Africa would not need any new power stations. Go and do some basic mathematics.	Steve	retired
2022-07-25 15:31:16	Gauteng	Yes I do	Solar		Mike	retired
2022-07-25 15:29:53	Gauteng	Yes I do	Solar		Mada	retired
2022-07-25 12:54:10	Gauteng	Yes I do	Solar	Rather than taxing people with solar panels, as is already mentioned as a possibility by some, home owners with solar panels should be allowed to pump electricity into the net. And if some are given solar geysers for free, why not free for all?	Agatha	retired
2022-07-25 12:29:17	Limpopo	Yes I do	Solar		Gideon	retired
2022-07-22 16:37:30	Limpopo	Yes I do	Solar	The more power people can produce independently, the better. as it can overflow to more companies and people being able to help others and themselves.	Louis	student
2022-07-19 09:20:54	Western Cape	Yes I do	Solar	Opening the energy production sector is the most effective way to reduce the damaging effects of poor management and corruption on the South African population. We must urgently prioritise the transition towards renewable energy as this is in the best interests of the people. Solar energy utilises the hot South African sun to create electricity which will empower South African people. I urge the government to do what is best for South Africans as well as the environment in the long-term and to act now.	Sarah	student
2022-07-18 21:32:41	Limpopo	Yes I do	Solar	Use what is free for all and that has no end in natural resources that is also pollution free: Sun, Wind, Water. Producing electricity with flowing water streams is by far the best solution to endless power, because water flow in pipes and rivers can go on endlessly and cant be affected like the sun or wind.	Louis	student
2022-07-16 16:22:48	Western Cape	Yes I do	Solar		Denae	student
2022-07-13 10:50:24	Gauteng	Yes I do	Solar		Lourens	student
2022-07-12 22:08:42	Western Cape	Yes I do	Solar		Chiara	student
2022-07-12 21:03:15	North West	Yes I do	Solar	North West is normally sunny. South Africa is ideal for solar energy. I think we need micro-grids. People and companies with solar energy should be able to push excess energy into the grid for tax benefits.	Louise	student
2022-07-12 19:36:16	Western Cape	Yes I do	Solar		SIMONE	student
2022-07-12 15:16:03	Gauteng	Yes I do	Solar	I am a designer who believes in making use of renewable energy generation. Using renewable generation will be expensive at first but will benefit the country in the long run.	Jewraine	student
2022-07-12 11:42:33	Western Cape	Yes I do	Solar	We have solar panels and it works.	Grant-Pierre	student
2022-07-12 09:35:33	Western Cape	Yes I do	Solar	South Africa has incredibly high solar power generation potential. We need to move into the future and stop relying on fossil fuels for our energy needs. Apart from its damaging impacts on people and the environment, fossil fuels are a finite resource - making them an economically dangerous choice to continue investing in. We need a massive shift to renewable resources if we are to save South Africa's economy and ensure equitable and comprehensive electricity coverage for all South Africans.	Cecilia	student
2022-07-12 07:35:13	Mpumalanga	Yes I do	Solar	South Africa is one of the sunniest countries, we should allow the independent power production just to name one reason. This is also an opportunity to create jobs and educate people on green energy, which is the future. This will also give an opportunity for many South African citizens to pump electricity into the grid form there solar system, both reducing the the electrical load and the continued increase of the solar markets.	SJ	student
2022-07-11 17:00:32	Gauteng	Yes I do	Solar		Chazelle	student
2022-07-11 15:15:36	Gauteng	Yes I do	Solar	This country has been in an energy crisis for over a decade and the government has done nothing useful to help. It's time to let IPP have their chance to allow South Africans to have proper access to power. While more costly than coal, solar, hydro and wind power are clean renewable sources that I would be willing to pay for.	Victoria	student
2022-07-11 14:34:36	Gauteng	Yes I do	Solar		Ruby	student

2022-07-11 13:44:36	Western Cape		Yes I do	Solar	We have extremely sunny weather over the entire country almost year-round. Initial investment would be high but environmental benefits are tremendous. Would be a stable way to generate sufficient electricity for South Africa and neighbouring countries.	Thomas	student
2022-07-11 13:27:08	Western Cape		Yes I do	Solar		Ruth	student
2022-07-11 11:50:32	Gauteng		Yes I do	Solar	I do not care too much how independent companies produce and sell electricity, I am just desperate for Eskom to lose their grip and provide a fair and open market for electricity. Please help Eskom lose their monopoly, as they are utterly incompetent.	Matthew	student
2022-07-11 10:56:43	Western Cape		Yes I do	Solar		Logan	student
2022-07-11 10:51:41	Western Cape		Yes I do	Solar	South Africa has an untapped resource of solar energy and that of which can generate large amounts of power if operated properly and the best part is that none can steal the sun unlike the coal that's supposedly being stolen.	Jason	student
2022-07-11 09:46:41	Gauteng		Yes I do	Solar	It is trite that South Africa's local resource in terms of solar is one of the highest. It is time to harness its power for uses which are beneficial and advantageous to all without restricting capable and willing persons (whether natural/ juristic/ private/ public etc.) from doing so.	Ciaran	student
2022-07-11 08:10:52	Gauteng		Yes I do	Solar			student
2022-07-11 07:37:15	Gauteng		Yes I do	Solar		Caitlin	student
2022-07-11 06:32:04	Eastern Cape		Yes I do	Solar	Coal and nuclear are too expensive and will take too long to set up privately. We already have infrastructure to produce solar panels as well as a host of contractors who already work to set up farms that sell to Eskom.	Thomas	student
2022-07-11 05:06:51	Gauteng		Yes I do	Solar	Solar and wind are abundant power resources that could be used to generate stable power. Solar plants have the ability to generate electricity for 80,000 housing units, imagine with the help of town planners, urban designers, architects and engineers having eye-catching minimum of 3 main power plants, a few sub-power plants and houses have solar panels, which feed into the grids, the extra solar power stored in the house the power produces can buy back the energy and feed it into the grid. Also we have to separate our power grids, one for services, which will run services like roads, light, robots, trains, train stations, telecommunications towers, hospitals, filling stations, food outlets everything in the public domain, which directly impact our daily survival.	Khulukani	student
2022-07-11 04:55:43	Mpumalanga		Yes I do	Solar	If every house has its own solar, the power would not be under so much pressure and it is affordable. Long-term solution.	Johanna	student
2022-07-11 01:24:34	Western Cape		Yes I do	Solar	We have a desert in the middle of our country! Let's use it.	Cameron	student
2022-07-10 23:08:31	Western Cape		Yes I do	Solar		Junine	student
2022-07-10 22:46:14	Western Cape		Yes I do	Solar		Michaela	student
2022-07-10 22:28:56	Gauteng		Yes I do	Solar	South Africa has an abundance of space and sunlight which is ideal for solar. Additionally, Gauteng is experiencing high amounts of air pollution and switching to a cleaner energy source would benefit the health of its citizens.	Caitlin	student
2022-07-10 21:54:55	KwaZulu- Natal		Yes I do	Solar	Environmentally friendly sustainable sources of energy generation should be used, such as solar and wind power. We simply cannot continue as we are going.	Shaneen	student
2022-07-10 19:46:43	Gauteng		Yes I do	Solar	South Africa is in extreme need of alternative power suppliers and independent power will be a sure way to help relieve large pressure from Eskom to supply electricity to the country. Solar is a very good option as it is renewable ensuring longevity.	Conor	student
2022-07-10 18:16:28	Gauteng		Yes I do	Solar	Considering the dire situation the country finds itself in terms of electrification, I and many others would look favourably on any individuals that are able to speed up the procurement of electricity from any and all sources in order to stabilise the situation. Legislation is there to serve the country and its people and if it is in the way of securing our livelihoods and future, it should be amended with haste in order to resolve the situation. We as a country, cannot afford to be picky when it comes to the source of power procurement, and while I think solar sources would be the most beneficial in the long term, we cannot shy away from non-renewables at this time.	Justin	student
2022-07-10 17:37:13	Western Cape		Yes I do	Solar		Afxentis	student
2022-07-10 10:30:11	Gauteng		Yes I do	Solar	Also hydro because South Africa has 9 perennial rivers.	Jordan Rachel	student

2022-07-08 15:44:51	Gauteng		Yes I do	Solar	Eskom has has decades to fix their issues. Introduce independent electricity providers and then Eskom will be faced with two choices: fix their issues IMMEDIATELY to compete with others or close down.	Nadia	student
2022-07-08 15:44:49	Gauteng		Yes I do	Solar	Eskom has has decades to fix their issues. Introduce independent electricity providers and then Eskom will be faced with two choices: fix their issues IMMEDIATELY to compete with others or close down.	Nadia	student
2022-07-08 15:23:32	Western Cape		Yes I do	Solar	I absolutely support immediately giving independent power providers the green light to contribute towards the South African national power production! I specifically support wind and solar energy, but also all other forms of renewables! I only support imports of gas and fuel for our own energy production and completely disagree with contracting other countries, like China, for energy production!	Corin	student
2022-07-08 14:31:41	Outside SA	Japan	Yes I do	Solar	Unfortunately the government of South Africa has proven itself completely incapable of addressing the problems with Eskom and consequently has failed to deliver electricity to the nation. Having a stable power supply is essential for the economy as it supports business and therefore also supports confidence of over seas investors. Without power, SA has and is slipping deeper into becoming a 3rd world country with little prospects for a bright future. Opening up the grid to be supplied by a competitive market of independent power producers should have a big impact on turning the picture around. The government and Eskom have shown they cannot deliver. Now is the time to allow the private sector to step in and do what they can to save the situation. I honestly see no other way forward for the country.	Edith	student
2022-07-08 14:28:44	KwaZulu- Natal		Yes I do	Solar	Solar is cheap and can quickly be implemented to help supply South Africa with power	Martin	student
2022-07-08 13:28:10	Gauteng		Yes I do	Solar		Mohamed	student
2022-07-08 12:51:20	Gauteng		Yes I do	Solar	We have a lot of sunshine and the development of solar would put us in a better space for the future	Bianca	student
2022-07-08 12:22:29	Western Cape		Yes I do	Solar	Eskom has gone from a world leader in electricity production to a failed enterprise that is costing the country and unthinkable amount of money, pain, livelihoods and even lives. It has proven itself to be inept time and time again, and its continues failures were only made possible by the lack of competition to this state-endorsed monopoly. Open the market and cut the red tape. This will alleviate some pressure off of Eskom and allow it time to recover and rebuild, whilst providing the country with the electricity it needs to get the economy back on track. Dear members of parliament, if you do not make the right decision here, you will be remembered for causing the failure of an entire country.	Eduard	student
2022-07-08 11:45:06	Mpumal anga		Yes I do	Solar		Ninke	student
2022-07-08 11:43:52	KwaZulu- Natal		Yes I do	Solar	I am sick of having load shedding. It is ridiculous how the government turns a blind eye to corruption and the plight of the country it is meant to serve. Outsource the work because Eskom is useless.	Arisha	student
2022-07-08 11:29:50	Western Cape		Yes I do	Solar	Apart from Solar, Wind and Nuclear would be best alternatives	Dalene	student
2022-07-08 11:00:29	Gauteng		Yes I do	Solar		Joshua	student
2022-07-08 10:58:00	Western Cape		Yes I do	Solar	Eskom has clearly demonstrated a lack of capabilities in generating electricity to meet the demands of this country. Eskom should move itself into a transmission only company and buy electricity from independent power producers. The generating grid should be a combination of solar power plants and nuclear power plants to provide grid stability. South Africa has rich deposits of Uranium and has in the past shown abilities to enrich this Uranium for power purposes and we should strive to be a combined nuclear and solar grid.	Jack	student
2022-07-08 10:16:39	Gauteng		Yes I do	Solar	We experience load shedding numerous times a day. It interrupts studies, work , time for preparation food and leisure We are going back time and it's about time we get an independent that can actually offer us service.	Ashley	student
2022-07-08 09:28:06	Western Cape		Yes I do	Solar	I fully support Independent Power Producers to be allowed to immediately supply South Africa with electricity?	Luke	student
2022-07-08 09:21:39	Western Cape		Yes I do	Solar	I fully support Independent Power Producers to be allowed to immediately supply South Africa with electricity?	Liam	student
2022-07-08 07:01:39	Gauteng		Yes I do	Solar	There are people who are busy setting up solar "fields" that can help Escom. There is more than enough sun shine in SA, and more than enough people willing to do the work.	Teagan	student
2022-07-08 07:00:16	Gauteng		Yes I do	Solar	There are people who are busy setting up solar "fields" that can help Escom. There is more than enough sun shine in SA, and more than enough people willing to do the work.	Teagan	student
2022-07-07 22:44:23	Gauteng		Yes I do	Solar		Marco	student

2022-07-07 22:29:58	Gauteng	Yes I do	Solar	Make it easy (administratively and financially) for homes and businesses to sell electricity back to the grid. Not only will this help relieve the pressure on Eskom's generation division but will also boost the renewable portion of SA's energy mix. Furthermore, this is a great way to ensure that our electricity supply is not dependent on foreign interests (like Turkish powerships). We have a giant fusion reactor in the sky, put it to use.	Sameer	student
2022-07-07 20:11:05	Eastern Cape	Yes I do	Solar		Siddharth	student
2022-09-12 08:16:29	Eastern Cape	Yes I do	Solar	South Africa should make more use of solar and wind power harvested privately, which is also far more environmentally friendly than burning fossil fuels - the price of which has also risen dramatically.	Meghan	student
2022-08-02 16:55:20	KwaZulu- Natal	Yes I do	Solar	Eskom cannot supply the required power and independent power producers will be able to fill in the gap that Eskom cannot supply.	Martin	student

2022-07-12 13:42:30	Eastern Cape	Yes I do	Solar	We have sun and wind. Use what we have!!!	Willie	Non-profit
2022-07-12 12:42:59	Gauteng	Yes I do	Solar	Please we need you our Government to hear us the Tax payers. This is so critical, I am a pastor in a congregation of just over a thousand people, on average we reach about 15000 people in the work place each and every day, and the people are just so tired of all the excuses and nothing getting done. There is just no accountability what so ever from our leaders. We are trying our hardest to bring our part as citizens please do your job and bring your part. My suggestion is fix and service what we have, lets get out of the hole, then look seriously at Solar and other forms of free energy, shared evenly through independent organisations so that we can have a better long term plan in place.	mark	Non-profit

2022-07-12 09:38:54	Western Cape	Yes I do	Solar	With the current SEO infrastructure and management an evident failure, South Africa is rapidly moving backwards. Electrical power is essential to industry and to business, which is the only engine that can pull the economy (and the wellbeing of the people of this country) forwards. The monopoly of Eskom - with the inevitable looting and State capture that has literally left millions in the dark - must end. Independent power producers are the only solution to the critical issue at hand. The sooner they are engaged and integrated, the better.	Michael	Non-profit
2022-07-12 08:30:12	Gauteng	Yes I do	Solar	We have ample supply of solar energy right across our country and a huge coastal area too which could allow for hydro power to be explored on a massive scale. A government incentive on households and enterprises installing and actually using solar energy on a daily basis could release the pressure on Eskom and create sustainability going forward.	Abel	Non-profit
2022-07-12 08:00:42	Gauteng	Yes I do	Solar	I think that keeping the status quo is exacerbating the corrupt nature of our power utility and that scrapping the red tape for independent power suppliers to add to the grid will eventually lead to righting the situation in Eskom. I feel that solar power and wind generated power should be options that are used since our country is a rich source of these natural energy sources. Lastly, the negative devastating effect of power outages on our economy and especially on our businesses is an accumulative one which might not be easily seen now but will have a really bad outcome on our economy to be restore and to prosper again if not dealt with decisively right now.	Glyn	Non-profit

2022-07-11 14:42:44	Western Cape	Yes I do	Solar	South Africa needs to move away from dependence on energy sources which are not renewable. We are dependent almost entirely on coal and what happens when coal resources run out.	Nicolette	Non-profit

2022-07-11 14:42:04	Gauteng		Yes I do	Solar	Solar would be the cheapest method right now (seeing that SA has so many sunny days). Hydro could certainly be considered later, but it will probably take too long to implement to be part of an emergency plan.	George	Non-profit
2022-07-11 12:41:53	Gauteng		Yes I do	Solar	Government is unable to solve the energy crisis in the country and should immediately scrap all the red tape and allow private generation of electricity to be added to the grid. Solar and/or Wind should be utilised as this is at least 'free fuel' and more sustainable than fossil fuels. It is also greener and thus better for the environment. Prices should however be regulated to be better than the current ESCOM tariffs which is ridiculously high for all consumers.	Ronel	Non-profit
2022-07-11 11:15:51	Western Cape		Yes I do	Solar	Most effective, affordable and least damaging environmentally energy generation is via solar power. Every roof in the country could be collecting free energy from the sun. Government should make this easy and affordable for the average person to erect panels on his roof and subsidize these, converters and batteries. Only together can we do this. Citizens are ready - now may our government with WITH us on this. They need us and we need them. We can do this!	Elma	Non-profit

2022-07-08 12:34:09	Gauteng		Yes I do	Solar	I selected solar above, but it should be opened up for all kinds of electricity production. Imagine if all houses, factories and entities could produce their own power. We would not need any network or dependency on government. According to the Bible, the first duty of the government should be to protect lives. Security is the first and main duty. Secondly, a peaceful framework could be provided wherein people may be able to work. I think, its time to get down to basics. The government is trying to do far too much. It interferes in far too many spheres of the lives of people. That is why its not doing what it should do properly. Government concentrate on security, on the Law of God, "you shall not murder" and leave things like generation of power etc. to the people, or at least to the municipalities and private bussiness sector. SOE's are something of the past. Technology goes in that direction.	Kurt	Non-profit

2022-07-20 09:46:49	Gauteng		Yes I do	Solar	Although initial capital input is high, if well initiated & MAINTAINED this type of energy production as well as wind, hydro & wave, leads to greener, less costly energy for all. This type of energy could also be exported creating a revenue stream for South Africa. We are, after all, affectionately known as "SUNNY South Africa"!!!		
2022-07-19 15:03:47	KwaZulu-Natal		Yes I do	Solar	One should be able to select more than 1 option as we can benefit by utilising all our resources. Solar is great for Sunny SA but it is more beneficial for daytime use, then night time. We need to utilise what we have and keep on introducing new ways looking at our dams which ones would be able to sustain sufficient electricity for specific areas. Minerals that aren't utilised and would have a consistent supply like gas for night time. Wind in natural windy areas, will be beneficial for those areas. Every new development, rural area and new builds need to have alternative energy resources whether it is gas, solar, wind, hydro, diesel or coal. Essentially keeping Radiant at bay.	Karin	
2022-07-18 22:10:31	Limpopo		Yes I do	Solar	South Africa has an abundance of sunshine throughout the year and that can be used to our advantage	Soyaphi

2022-07-13 21:42:52	Western Cape		Yes I do	Solar	Coal production not a cost-effective solution to creating electricity. We're in the much sunnier Southern hemisphere and should utilize Solar much much more!		

2022-07-13 19:10:50	Western Cape		Yes I do	Solar	It is imperative that the government moves away from the old and outdated conventional methods of electricity generation. Solar and wind power is the way to go. The government needs to consider and implement the proposals from independent power producers in this regard. Also run an education campaign on TV, the internet and other media empowering people about this. The government should also look at setting up or at least subsidising the manufacturing of solar and wind generators in South Africa. This would go a long way to upskilling and creating employment for our people, including moving towards new technology.	Riyaad	
2022-07-13 18:02:36	Gauteng		Yes I do	Solar		Nicolette	
2022-07-13 10:49:58	Gauteng		Yes I do	Solar	Elon Musk powered a large portion of the western Australia within 9 months by means of solar power. Government must encourage people to go solar in their businesses and homes by removing tax for such installations. Eskom must tell people with Solar systems that they would buy any surplus electricity produced by them for say 50% per kilowatt of what Eskom charges for a kilowatt, and then Eskom sells it for 100% of the going rate. This will mean no great capital outlay for Eskom and 50% profit on electricity purchased.	Peter	
2022-07-13 08:55:45	Gauteng		Yes I do	Solar	Gas is ook een van my keuses. Solank die Regering nie inmeng met regulasies nie. Daar moet kompetisie wees. Die goedkoopste en betroubaarste kry my besigheid.	ANNA

2022-07-09 19:15:09	Gauteng		Yes I do	Solar		Merle	
2022-07-09 19:00:06	Western Cape		Yes I do	Solar	Supply of electricity should not rest in the hands of a single organisation. Focus on wind and solar power	Valerie	
2022-07-09 18:39:07	Western Cape		Yes I do	Solar		Brian	
2022-07-09 18:19:03	Western Cape		Yes I do	Solar	Solar is not the only solution, All the means to create electricity should be used to reach stability. Thereafter most economic and scientifically viable methods should be used. The principle is good ,honest, competent and fair governance for all!	anonymo us	
2022-07-09 17:10:46	Western Cape		Yes I do	Solar		Leo	
2022-07-09 16:40:47	KwaZulu- Natal		Yes I do	Solar	Solar and wind are preferable to nuclear and carry fewer risks to the environment. They must, nevertheless, be responsibly managed. Government has created an intolerable monopoly in Eskom which it uses for skullduggery, cadre-deployment and rent-seeking. Red tape must be dispensed with and renewables instituted immediately. Ministers feet must be held to the fire to see that urgent implementation is carried out. We are sick and tired of the charade that has dragged on over the past 10 years in which government has played ducks and drakes with various renewable energy providers and kept moving the goalposts.	Brigid	
2022-07-09 15:52:45	KwaZulu- Natal		Yes I do	Solar		Collen	
2022-07-09 14:22:11	Western Cape		Yes I do	Solar		Albertyn	
2022-07-09 12:45:15	Western Cape		Yes I do	Solar	The sun shines, the government can keep the lights on anymore. We need to use renewable energy!!!	Sharon	
2022-07-09 12:26:42	North West		Yes I do	Solar		Christel	

2022-07-09 12:15:21	Western Cape		Yes I do	Solar	I will under NO circumstances accept the handing over of our national power supply grid to foreign entities that can then: 1) WHO WILL CHARGE us exorbitant prices for energy 2) Dictate how we should use and consume energy 3) Enslave us even further to corporate control 4) Cut off our energy via the smart meters when it suits them or when we exceed the carbon allotment, they want to dictate to us, or even when we criticise or say something they don't like. STOP destroying Eskom. We know who owns the alternative "green" energy suppliers. We KNOW that you want to manipulate us with increasing loadshedding to accept these foreign entities. We know that the president and his family own large stakes in these companies including other high-profile politicians. We are sick and tired of the lies and manipulation. South-Africans know what you are up to. Just stop it. I WILL NOT ACCEPT! I DO NOT COMPLY!	Chabad	
2022-07-09 12:05:17	Western Cape		Yes I do	Solar	Using solar energy will lower electricity prices, keep the environment clean, and limit the electricity cuts that the country suffers from. I also believe that the production of electricity on ESKOM alone is what brought us to the current status we are experiencing; Because there is no competition in the market.	Abderemane Charif	
2022-07-09 11:05:32	Mpumalanga		Yes I do	Solar		Francois	
2022-07-09 11:05:28	Mpumalanga		Yes I do	Solar		Francois	
2022-07-09 08:52:22	Western Cape		Yes I do	Solar	Solar and Wind generation would be the answer as we have plenty of both	Jack	
2022-07-09 08:11:55	North West		Yes I do	Solar	As South Africa is a very sunny country, with large swathes of unused land. Solar farms should be relative easy to build . Also a jon creation opportunity	Hendrik	
2022-07-09 06:43:36	Eastern Cape		Yes I do	Solar		Dimitrios	
2022-07-09 06:01:15	Gauteng		Yes I do	Solar		Lynn	
2022-07-09 00:26:09	Western Cape		Yes I do	Solar	Load shedding is not only a real nuisance but causing massive financial loss to country and business. Solar and wind power is the ultimate as we have plenty of sun and wind in cape town and the sonnet the red tape is cut to give private power utilities the ability to add massive amounts of power to the grid. The sooner we can get rid of load shedding once and for all	Sean	
2022-07-08 23:54:36	Gauteng		Yes I do	Solar	Our country has excellent sunshine and it is non-polluting and safe.	Ingrid	
2022-07-08 22:37:46	Gauteng		Yes I do	Solar		Sabine

2022-07-13 13:43:01	Gauteng		Yes I do	Coal	Coal is what we have here in South Africa we must use what we have because if we cancel coal more jobless will increase.	Emmanuel	unemployed individual
2022-07-13 13:40:54	Gauteng		Yes I do	Coal	We have currently the necessary power stations to supply enough power for SA. These are driven by coal. SA must stop to export the best coal to other countries and use it to produce power. The current power stations must be repaired and maintained. Upgrade to stations need to be planned. Wind power supply must be incorporated but the existing infrastructure need to be upgraded to be able to handle to input of wind power.	Jan	unemployed individual
2022-07-13 09:09:42	Limpopo		Yes I do	Coal		Khotso	unemployed individual
2022-07-12 21:44:13	Gauteng		Yes I do	Coal	Coal is the tried and tested method for years. SA used to be the leader in this field many years ago, however as corrupt officials and leaders stepped into Eskom, things are fell apart. We are still a third world country so we should exploit our cheapest source of electricity which is coal, and not sell it off to China who are enjoying rapid growth with our coal.	Dooley	unemployed individual
2022-07-12 19:29:09	Gauteng		Yes I do	Coal	Nuclear would be the best energy source, however, there is only one nuclear power station in the South as a result it won't be enough for the whole of South Africa. Therefore, the current coal method is ideal as South Africa has enough coal to run the coal-fired power station.	Khataza	unemployed individual
2022-07-12 19:29:08	Gauteng		Yes I do	Coal	Nuclear would be the best energy source, however, there is only one nuclear power station in the South as a result it won't be enough for the whole of South Africa. Therefore, the current coal method is ideal as South Africa has enough coal to run the coal-fired power station.	Khataza	unemployed individual
2022-07-12 19:29:04	Gauteng		Yes I do	Coal	Nuclear would be the best energy source, however, there is only one nuclear power station in the South as a result it won't be enough for the whole of South Africa. Therefore, the current coal method is ideal as South Africa has enough coal to run the coal-fired power station.	Khataza	unemployed individual
2022-07-12 18:25:38	Free State		Yes I do	Coal	The thing is, population in South Africa is growing in high rate. So electricity is one of the basic needs in the country not in the homes only and businesses again they are affected on this matter. So, to grow up the power of electricity for all necessity of, it needs a lot of money. To cut the story. Government supposed to take over on this issue or supposed to subsidize on this. A company will seek funds to survive.	Mohau Silvester	unemployed individual
2022-07-12 16:42:12	Western Cape		Yes I do	Coal	Cheapest option solar and wind to expensive and doesn't work full time	Jurie	unemployed individual
2022-07-11 16:23:58	KwaZulu- Natal		Yes I do	Coal	We can no longer depend on one electricity supplier and therefore it would be beneficial to have others so that we can select based on what is affordable to us. We also need reliable suppliers of electricity.	Maria	unemployed individual
2022-07-11 12:56:30	Limpopo		Yes I do	Coal		Mahlatse	unemployed individual
2022-07-11 10:43:29	Gauteng		Yes I do	Coal	We have coal mines to supply SA power demands - the Eskom and government Management are inept and cannot manage the task they've signed up for - ANC government has let the whole SA down and need to step aside and someone else try and ? the country up - everyone gets to eat ?	Lindsay	unemployed individual
2022-07-11 10:33:40	Limpopo		Yes I do	Coal	Renewable energy is not a viable solution to the current energy challenges in the country. We should continue burning coal to meet our energy needs and in future consider making coal energy cleaner or transitioning to nuclear energy. Renewable energy is not reliable and will be too costly and may not even meet our energy needs	Frans	unemployed individual
2022-07-11 10:02:50	KwaZulu- Natal		Yes I do	Coal		Sindi	unemployed individual
2022-07-11 09:40:59	Gauteng		Yes I do	Coal		Ian	unemployed individual

2022-07-11 08:20:45	Gauteng		Yes I do	Coal	We are a coal producing country. This type of electricity generation worked in the past - why can't it work again. This country had so much to offer but the Government has messed everything up. Get rid of the culprits and let's try and rebuild.	Esme	unemployed individual
2022-07-11 08:11:49	Limpopo		Yes I do	Coal	Rolling Blackouts have been destroying this country for more than 15 years with it only getting worse and worse. Eskom can clearly not fix the problem. Opening the market would solve the problem within a year.	Pieter	unemployed individual
2022-07-11 07:29:11	Gauteng		Yes I do	Coal	We have the resource. LETS USE IT BETTER!!! HEMP FUEL, AND YOU SHOULD HAVE AN OPTION FOR ALL OF THE ABOVE.	BRIONY	unemployed individual
2022-07-10 23:21:45	Western Cape		Yes I do	Coal	Coal is filthy and is the one of the most dangerous sources of energy, however South Africa still mines coal locally and has the existing infrastructure to support coal fired plants. In the long run Nuclear it is the safest, cheapest, and cleanest option its only real downside is high up front cost.	Christopher	unemployed individual
2022-07-10 23:15:16	Western Cape		Yes I do	Coal		Emile	unemployed individual
2022-07-10 23:05:51	Gauteng		Yes I do	Coal		Valerie	unemployed individual
2022-07-10 22:43:10	Gauteng		Yes I do	Coal	President wil nou iets doen, hy moet binne kort afstaan as president, nou wil hy sy familie, die Motsepes verder verryk, deur vir hulle die krag kontrakte te gee, voor hy afstaan.	Cliffton	unemployed individual
2022-07-10 21:32:49	Gauteng		Yes I do	Coal	South Africa don't have the sources for hydro-generation. Solar systems is too small for the surface area it consume to replace traditional coal fired generation. Nuclear could be an option if not resisted by so called "green" activists.	Stephanus	unemployed individual
2022-07-10 21:31:40	KwaZulu-Natal		Yes I do	Coal	We have abundance of coal supply. Renewable energy only provides 2% of current capacity. We are the experiment of the world, our economy is hurting, our people are unemployed. Powering up existing coal plants and keeping our coal for domestic use and growing industry is far more important than keeping hypocrites like America, Germany, England and France happy with their leftest unsustainable plans. We are Africans and need to stop cowering down to India and China. Our polite and must climb out of their pockets and start taking meaningful decisions for the interest of South Africans.	Joel	unemployed individual
2022-07-10 21:03:41	Mpumalanga		Yes I do	Coal	Coal will create jobs for South Africa. Other sources not yet certain how will it generate jobs	Bhaduza Joseph	unemployed individual
2022-07-10 21:00:16	Gauteng		Yes I do	Coal	South Africa has a lot of coal, which does cause a lot of pollution, but right now we cannot bother with pollution. That is a concern for countries that do not worry about producing enough energy. I am also in favor of Nuclear energy, especially considering the advances in the technology over that last 50 years and the fact that there are elements that could be used that have a much shorter half-life in terms of radiation. We just need to acquire the appropriate knowledge and expertise without a political quota being added to it...	Markus	unemployed individual
2022-07-10 20:43:03	Gauteng		Yes I do	Coal	Immediate solution is coal because of it's abundance. Just keep corruption out of it!	Pieter	unemployed individual
2022-07-10 20:23:42	Western Cape		Yes I do	Coal	As an immediate solution coal power would be the best as it's readily available and able to scale to a large scale. Long term however nuclear is a much better option	Imaad	unemployed individual
2022-07-10 19:10:38	Western Cape		Yes I do	Coal		Wanita	unemployed individual
2022-07-10 14:09:52	Western Cape		Yes I do	Coal		Fernanda	unemployed individual

2022-07-10 11:14:33	Western Cape		Yes I do	Coal	Being on the grid is still the best power you can have. Solar, gas and other is just a temporary solution. They also break and believe me when they do you will have to spent a lot more to have it fixed. So I say privatize Eskom. Let people that know what they are doing fix Eskom's problem.	Debby	unemployed individual
2022-07-10 08:33:13	Gauteng		Yes I do	Coal	Coal power is a better solution in the long run for South Africa. Nuclear is not a solution because it is very dangerous. There is currently no way scientifically of disposing of nuclear waste. Burying it underground is not a solution because it is harmful to the ecosystem. Not only that but little is known about the long term effect of storing nuclear waste as it could leak out onto the surface of the earth. It is extremely hazardous to human health as it is toxic and it can kill people. Solar power power is not the best solution because the energy would probably be required to be stored in batteries. It is very expensive but also bad for the environment because manufacturing of batteries lets out a lot of pollution into the air. The reason why coal power is more effective is because coal is mined in South Africa so a lot of it is already produced. It has pollution yes but it's probably the same amount of pollution as required to produce the energy storage solutions such as batteries for solar power. The other disadvantage of solar power is that if there is no sunlight, there is no power. The same with wind power, if there is no wind then there is no power. Energy storage is not cost effective nor environment friendly. Hydro electric is not powerful enough to cover large areas as it requires a lot of strong flowing water and expensive infrastructure on a large scale. It would be a waste of resources. Gas power is bad for the environment as it has a large amount of pollution but it's also expensive as it requires imports from other countries.	Jared	unemployed individual

2022-07-10 08:26:18	Gauteng		Yes I do	Coal		Lucia	unemployed individual
2022-07-10 07:59:51	Gauteng		Yes I do	Coal	Nuclear is too dangerous in the hands of people who can't even handle coal. Solar requires too many batteries that aren't recyclable.	Andy	unemployed individual

2022-08-04 08:48:49	Western Cape		Yes I do	Coal	Because we have it readily available second nuclear. As a third world country we can't be worried about climate. We need our country to move forward.	Wendy	unemployed individual
2022-08-01 07:34:30	Western Cape		Yes I do	Coal	We have massive coal reserves and should not be selling them off.. They should be a source of very cheap energy coupled with wind and solar.	Gareth	unemployed individual
2022-07-29 21:12:30	Gauteng		Yes I do	Coal		Petrus	unemployed individual
2022-07-28 19:12:20	Gauteng		Yes I do	Coal	We have lots of coal in South Africa and we will never run out of coal. Stop fooling us with this load shedding. Because of greedy people who want to take over Eskom and miss using funds in the state owned enterprises. We are really tired as South Africans to be fooled like this	Mhlengi	unemployed individual
2022-07-21 10:22:55	Western Cape		Yes I do	Coal	The best way to relieve the immediate problem is to properly maintain our existing coal power generation capacity. Renewable sources like wind and solar will help us until we have grid-level storage (extremely large and powerful batteries) technology to store and release the energy when we actually need it.	Dane	employed individual
2022-07-20 17:39:09	Outside SA		Yes I do	Coal	Coal, because of existing infrastructure will address the immediate need. Thereafter, when the supply has been resolved, nuclear, hydro and gas should be developed and built as a matter of utmost urgency.	Reynier	employed individual
2022-07-18 20:36:02	Gauteng		Yes I do	Coal		Ashleigh	employed individual

2022-07-18 17:07:59	Mpumalanga		Yes I do	Coal	Nuclear is too expensive and all our money has been stolen[redistributed] Coal is the only way to provide enough power. The other energy sources must also be utilized--every little bit will help. It must be privatized--every single department of the state is and will be a failure except the financial department and they are working on it. If they realize this too late[Mantsho] there will be a total collapse.	STEYN	employed individual
2022-07-18 12:42:18	Western Cape		Yes I do	Coal	Firstly, if the Government had listened to the people with the knowledge 2004 - then we would not be in this position. But unfortunately Politicians always not best yet they do not have the qualifications in these areas. When they stop trying to buy brownie points to look good - then make a complete hash of whatever they touch! Work for the people - then all will come right in this beautiful country of ours. Mother earth has plenty coal and with everybody jumping on the bandwagon of climate change - which is really not as bad as the media will have made it out to be.... then let's stop the sabotage on our power stations - get them repaired and then let's look at alternative methods for the future. But to go and want to start from scratch when this Government was given the best in 1994 - they do not know how to look after anything but themselves! Stop the garbage and fix what we have - another money making racket for them to steal from if they get the Chinese to build a new Eskom... what a joke!	Nadia	employed individual
2022-07-18 10:09:55	Western Cape		Yes I do	Coal	That's the resource we have in abundance locally	Theo	employed individual
2022-07-16 19:41:39	Outside SA	The Netherlands	Yes I do	Coal	We are talking here about IMMEDIATE needs. I am all for green energy, but first loadshedding needs to get under control. South Africa has a rich supply of coal. I think solar energy would be a next step. If you make it more profitable for people to set up their own solar panels, that also takes off pressure on the grid. Also yes yes yes, allow private energy suppliers!!!	Anonymo us	employed individual
2022-07-15 02:28:41	North West		Yes I do	Coal	I say, use coal in areas where it is fully available. In more advanced areas like cities, use nuclear power, later on when the budget allows it. First try to stabilize the current situation by reducing load shedding. Power supply should be under control of independent companies, with no links to government. Example, the same as NASA is using Elon Musk for rockets etc.	Gerhardt	employed individual
2022-07-14 15:48:58	KwaZulu-Natal		Yes I do	Coal	With load shedding destroying what is left of our economy, we can't afford luxury choices like green energy only. We have coal and other resources, we have to use everything at our disposal to generate power independently and urgently. Our contribution to global warming is negligible. We need to prioritize energy production to allow for job creation and we can focus on green energy later.	Catherine	employed individual
2022-07-14 14:22:00	Gauteng		Yes I do	Coal	Coal powered suppliers are the quickest to get onstream, but sure, so-called green renewables must also be used and then coal slowly replaced. But we need power NOW!	eugene	employed individual
2022-07-14 10:47:57	Gauteng		Yes I do	Coal	We have enough minerals such as coal in South Africa to produce and supply to the power stations that will be responsible to supply electricity to the rest of the South Africans. Why struggling to have electricity and fuel when all this product are produced here in South Africa and why having to pay for more, when all this products are produced here in the country?	Joseph Frank	employed individual
2022-07-13 19:27:56	Western Cape		Yes I do	Coal	Quite frankly, any and all methods of electricity should be used at this point. We are beyond being picky. The loadshedding is hugely inconvenient and is killing an already failing economy. Privatization is the future. SOE don't work and will continue not to work despite bail outs. Stop pushing the communist agenda and do what is best for South Africa and its people. We don't want to be another Zimbabwe.	Bernadette	employed individual
2022-07-13 11:56:32	Gauteng		Yes I do	Coal	SA has coal and no need to move away from it because coal power stations have the largest MW output and it is reliable	Cebisile	employed individual
2022-07-13 10:59:17	Mpumalanga		Yes I do	Coal	South Africa's unemployment rate, including people who have stopped looking for work, is ~45%. While this is true, we simply do not have the money to invest in renewable energy. The whole energy crisis is exacerbated by corrupt officials (who caused the crisis in the first place) whose only aim is to line their own pockets by riding the "righteous" (their motto being: anything is just if it's done in the name of righteousness) "Green Movement" wave. We cannot afford to "save the planet" - which is an incredibly vague and unscientific notion - when so many South Africans are without work and without basic necessities. The solution is to use the cheapest energy resource so that South Africans are able to grow the economy as quickly as possible, so every citizen has the opportunity to earn a living.	Petrus	employed individual
2022-07-13 10:40:12	Limpopo		Yes I do	Coal		Kotie	employed individual
2022-07-13 10:30:06	Mpumalanga		Yes I do	Coal		Francois	employed individual
2022-07-13 10:19:10	Eastern Cape		Yes I do	Coal		Johan	employed individual
2022-07-13 10:07:53	Gauteng		Yes I do	Coal	Existing coal plants that require less maintenance to be kept reliable and able to generate should be the focus area. Older plants where maintenance and breakdowns equate to wasted effort should be taken offline to redistribute labour and skills to more reliable plants. The older plants, where feasible, should be sold to IPP's to refurbish the plants and improve reliability in the medium term. Those refurbished plants can then be brought back to add to generation capacity.	Graham	employed individual
2022-07-13 09:29:40	KwaZulu-Natal		Yes I do	Coal	For immediate emergency purposes coal would be the answer. For future long term sustainability solar and wind. Prohibit strikes as this is an essential service.	Raj	employed individual

2022-07-13 08:55:25	Mpumalanga		Yes I do	Coal	There is no immediate solution, so we should look at getting our house in order. An Independent Provider should be looking at both the use of wind and solar energy as these are plentiful in our Country.	Alda	employed individual
2022-07-13 07:14:12	KwaZulu-Natal		Yes I do	Coal	Allow Independent Power suppliers in which will help us to turn this crisis around. If we don't act fast it will be the end of South Africa.	Maryke	employed individual
2022-07-12 22:54:48	Western Cape		Yes I do	Coal	Coal is cheap and abundant. Let's use it and get this going.	Mitchell	employed individual
2022-07-12 16:53:52	Gauteng		Yes I do	Coal	We have the technology and the knowledge to use coal. Green technology is good, but it can wait till our crises point diminishes. As for private producers, they will need to be given concessionary status of at least 30 years to ensure it is worth their while to spend the start up money. Otherwise history may repeat itself, with them being shut down at Eskom's whim again!	Elena	employed individual
2022-07-12 16:17:52	Gauteng		Yes I do	Coal		Dudzile	employed individual
2022-07-12 15:21:02	Gauteng		Yes I do	Coal	We have all the resources needed to run the coal power stations for the next 100 years. The fact that the corrupt people export the better coal and keep the scraps for South Africa is just evil. It would have been cheaper to build the power stations without the requirements of BEE. It would also have taken less time to build more Nuclear stations to support the Coal power stations. The expensive smoke scrubbers should be installed on the towers of the coal burning stations, for better and cleaner environments. The fact that they drive away all the experienced people, no matter color or creed, is also evil.	Francois	employed individual
2022-07-12 14:35:37	Eastern Cape		Yes I do	Coal	We are enriched Country with so much to offer for. It's Citizen's. I definitely say, we can go independant.	Beulah	employed individual
2022-07-12 13:55:42	Western Cape		Yes I do	Coal	Coal now, other later. Combination of types suitable immediate, intermediate, and long term. Sun, wind, coupled with existing method for transition period. Main point, government must stop interfering on our constitutional rights and remove vested restrictive laws.	Dietrich	employed individual
2022-07-12 13:55:40	Western Cape		Yes I do	Coal	Coal now, other later. Combination of types suitable immediate, intermediate, and long term. Sun, wind, coupled with existing method for transition period. Main point, government must stop interfering on our constitutional rights and remove vested restrictive laws.	Dietrich	employed individual
2022-07-12 13:52:27	Western Cape		Yes I do	Coal	We need dependable energy supply immediately, private involvement is essential and long overdue	Pierre	employed individual
2022-07-12 13:51:47	Western Cape		Yes I do	Coal		Daniel	employed individual
2022-07-12 12:38:27	Western Cape		Yes I do	Coal	Think feel like we need to sort out or coal production plant right now and in future move to more sustainable energy production method. Allow independent energy production to sale back to the grid will and can only help the country.	Nathaniel	employed individual
2022-07-12 12:33:09	KwaZulu-Natal		Yes I do	Coal	South Africa not only has an abundance of coal, we have a fleet of already built coal power plants that I am sure can still run for a couple of decades. The best way to get around the current electricity challenge is to repair these and bring them back into operation. The idea that coal is dirty is a fallacy that is driven by those with vested interests. If coal was so dirty, why is China, the US, India and recently, Germany still burning coal? Where does our coal which we still export still get bought by overseas countries. They are not doing anything else with the coal but burning it. Then as a secondary source of supplementary power, we can start thinking about new power and how this is produced and procured. this is when we should leverage solar and wind, with gas as a supplemental baseload support when the renewables are offline. Again, this will be a requirement if the repaired and reinstated coal stations have issues. If China builds coal power plants in the rate, scale and costs that they did in the early 2000, and Germany has been able to reinstate their coal power plants so quickly, maybe that is where we should go for the skills required to repair our coal power fleet. Stop this wasteful, unproductive expenditure on companies that think Eskom is an engineering and construction school where they go to learn at high cost to the South African economy, get proper skills. Finally, for heaven's sake, use the country's money properly and stop multilayered corrupt tender systems that so nothing but load premiums on the real price of things. Put South Africa first.	Mzi	employed individual
2022-07-12 11:54:08	Gauteng		Yes I do	Coal	We need electricity, from any reliable safe method. Private and not monopoly type of supply(Just lazy and non competitive.)	Tony	employed individual
2022-07-12 11:18:04	Western Cape		Yes I do	Coal	At moment fastest implimentation economical , then move to nuclear along the coast line	victor	employed individual
2022-07-12 10:51:45	Mpumalanga		Yes I do	Coal	Coal is produced in South Africa and there is no scarcity of it. As the country is deeply under depth better use what we have and what can cost us less.	Dumsane	employed individual

2022-07-12 10:29:58	Western Cape		Yes I do	Coal	As an answer to the above question on what method of electricity generation would suit SA's immediate needs, that is 100% scientifically-verified, coal, but for long term sustainable energy generation we need nuclear power. Specifically look into Thorium-based nuclear power generation, as Thorium is more abundant, more liberatable-energy-dense than even Uranium (200x give or take, and 3.5 mil times more than coal), is difficult to produce weapons with the byproducts, and the thorium ore is generally more thorium-dense hence it is more cost effective to mine. In a liquid fluoride thorium reactor, it also produces less radio-toxic waste and the reactor has a safe design should meltdown occur. This is basically everything you want for power generation. South Africa has an estimated 18000 tons of thorium in ore, but India is supposed to have around 1 mil tons (25% of the world's thorium), so consider imports as well.	Dylan	employed individual
2022-07-12 10:28:43	Western Cape		Yes I do	Coal		Meryl	employed individual
2022-07-12 09:20:04	Western Cape		Yes I do	Coal	While south africa sets up more solar equipment, we can use what we have to produce energy. Solar isn't always the way to go since the solar panels aren't made of renewable/biodegradable marerials. But it's very clear that we need independent power producers in SA. Eskom can't handle it at the moment and the economy suffers because of it. The people suffer because of it.	Adronel	employed individual
2022-07-12 09:09:45	Gauteng		Yes I do	Coal	The is nothing wrong with coal energy production in south africa we have plenty of coal.Why are we scrapping coal energy yet we export?	Moses	employed individual
2022-07-12 08:34:58	Gauteng		Yes I do	Coal	Anything we can do to generate electricity in the short term needs to be done. Independent power suppliers need to be free to produce and sell power.	Alan	employed individual
2022-07-12 07:59:04	Free State		Yes I do	Coal	SA have natural resources, but also very innovative experts. Please give them the chance to put their heads together and work for the country's people and not for political gain. One should acknowledge if you don't have the knowledge and/or skills, it is not a shame, but it is a shame not allowing those that do know to assist.	CC	employed individual
2022-07-12 07:40:11	Gauteng		Yes I do	Coal	I worked at Eskom from 1969 to October 2001 in System Planning (Tx and Gx) and our department created the SAPP. In the early 90's, with the privatization of the CEBG in England and Wales under Margaret Thatcher, a similar project was started at Eskom. We learnt from the UK's experience. We devised a system whereby each power station would bid its selling price to the grid for the next day. Three prices for three levels of generation for each hour on the next day. We purchased the computer software from ABB (England). There was a defined time table for the bids, the calculation of the pool prices and the cost of auxiliary services for each hour of the next day. All power stations would receive the pool price determined by the highest successful bid for that hour. The pumped storage stations would remain under the control of Simmerpan. Tx would add the cost of wheeling the power to its 120 substations. Each power station manager would be responsible for its own coal contract(s). This competitive set-up would run for one year and then Eskom would sell its power stations on auction to the private sector. At least 7 independent entities to ensure real competition. The people who worked on this project have left Eskom or are on pension. The project was stopped when a new minister (educated in the USSR) was appointed by President Mbeki. The software must still be somewhere in National Control at Simmerpan.	Pierre	employed individual
2022-07-12 07:38:46	Western Cape		Yes I do	Coal	It doesn't matter what method is used as long as it is actually used. As long as the coal isn't stolen, the diesel isn't stolen, the plants are maintained, the management is actually managing the plants and not just stealing everything they possibly can. Just make the loadshedding stop please	MARI JONI	employed individual
2022-07-12 07:30:50	Western Cape		Yes I do	Coal	Eskom is captured by the ANC and BEE and SA cannot afford the increases anymore. We need to cheepers electricity and fast.	Liezel	employed individual
2022-07-11 21:22:30	Gauteng		Yes I do	Coal	This country is in dire need for energy security, and we should strongly consider all proposed alternatives to get to such security in the shortest possible time. Coal and gas is an abundant local resource, and should be our first port of call. The welfare and progress of millions of South Africans depend on electricity for the supply of essential needs such as the production and supply of food, health care and life support, transport, cooling, heating, lighting, communication, and the list continues. Power outages cost companies and individuals billions of Rands in lost revenue, additional expenditure in an effort to mitigate the negative consequences of power outages. When companies suffer, employees suffer as a result of job cuts and salary cuts. Government's monopoly on energy generation needs to end, as it has proven incompetent, wasteful and with more will to play political games in order to keep corrupt, thieving ANC/SACP/Cosatu Alliance cadres in cushy, overpaid jobs, than to serve the citizens they were sworn to serve. This is a supposedly democratic country, with a free market economy. Try it for a change, and let competent private companies have a go at building this beautiful country Make the raw resources (that belong to each and every citizen of this country) available to power producers at nominal rates.	Johan	employed individual
2022-07-11 20:07:05	Gauteng		Yes I do	Coal		Liezl	employed individual
2022-07-11 19:35:28	Outside SA	USA	Yes I do	Coal	Heal Eskom by getting rid of BEE/Cadre deployment, and then employ competent people to fix and maintain the power stations. Once base load power has been restored, move on to renewables such as wind and solar. The new nuclear technology also has a place. And yes, encourage private enterprise to generate electricity with minimum Government interference....	Willem	employed individual

2022-07-11 19:04:55	Gauteng		Yes I do	Coal	Privatise eskom kla!	Jacobus	employed individual
2022-07-11 18:05:18	Gauteng		Yes I do	Coal	Absolutely anything that is available should be used to help the situation.	Naomi	employed individual
2022-07-11 17:51:57	Western Cape		Yes I do	Coal		Jannie	employed individual
2022-07-11 17:42:50	Western Cape		Yes I do	Coal	The state has failed to provide sufficient electricity to the people of South Africa. It is now critical that the government works as quickly as possible to provide a framework for IPPs to operate. I believe coal is the best source of energy for South Africa as we have ample deposits in the republic. I have seen no evidence that reducing carbon dioxide emissions will change the climate, or that the lack thereof will prevent the climate from changing. The hypothesis presented by advocates of such theories are routinely disproved by subsequent sensory data. Asserting such hypothesis as fact is unscientific. Furthermore it is critical that pseudoscience and superstitions are not use to form policy in the republic.	Werner	employed individual
2022-07-11 14:50:17	KwaZulu-Natal		Yes I do	Coal	To immediately start sorting out the problem would probably mean using coal for the short term. Get it sorted and then look at long term solutions for a cleaner energy, but cut the crap now. Get it sorted!!	Joe	employed individual

2022-07-11 10:45:21	Gauteng		Yes I do	Coal	Coal powered stations are already built. Spend money to get them running. New alternate sources can be implemented once the power crisis has been fixed.	Gerhard	employed individual
2022-07-11 10:40:09	Gauteng		Yes I do	Coal	I believe any independent person business should be allowed to provide power and we can use different sources to provide energy/electricity	Emile	employed individual
2022-07-11 10:36:51	Gauteng		Yes I do	Coal	Anything but nuclear, I would support, depending on best options available for different parts of the country. All sources could be utilised and implemented. However, coal seems the best option in the short term to supply enough power/electricity.	Marna	employed individual
2022-07-11 10:31:11	Western Cape		Yes I do	Coal	The state (government) should not be involved in industrial regulatory activities other than ensuring free and fair competition amongst companies. The form of energy should not be mandated by anyone but left to the producer to make the economics of the process profitable. No regulation and no bail outs for energy producers.	Ang	employed individual
2022-07-11 10:30:33	Gauteng		Yes I do	Coal	In the immediate short term coal is still the only way to produce enough electricity. Huge effort must be taken to change the mixture of energy sources and be less dependent on coal.	Eric	employed individual
2022-07-11 10:24:35	Gauteng		Yes I do	Coal	By allowing independent power producers to supply electricity to the national grid, all existing power plants that are not currently connected to the Eskom grid, can connect to the national grid and sell off additional power to the system with minimum costs. Existing power producers can link to the grid faster than any other source can build new plants of any sort. This will immediately reduce the dependency on Eskom and alleviate the strain on the national grid. This, in turn, will reduce load shedding and help our economy to recover.	Eben	employed individual
2022-07-11 10:17:58	Western Cape		Yes I do	Coal	Coal and Nuclear are the best solutions. Coal for short term, nuclear for long term. Nuclear is green.	Nathan	employed individual
2022-07-11 10:17:16	Mpumal anga		Yes I do	Coal	By allowing independent power producers to supply electricity to the national grid, all existing power plants that are not currently connected to the Eskom grid, can connect to the national grid and sell off additional power to the system with minimum costs. Existing power producers can link to the grid faster than any other source can build new plants of any sort. This will immediately reduce the dependency on Eskom and alleviate the strain on the national grid. This, in turn, will reduce load shedding and help our economy to recover after the disaster that was caused by Covid and compounded by the ridiculous load shedding.	Kevin	employed individual
2022-07-11 10:11:16	Free State		Yes I do	Coal	South Africa is a country that has nearly 50% of the population without work, and 90%. Cheap energy is the best way to life populations out of poverty. In order to enable investment in South Africa, South Africa should allow for the cheapest possible electricity so that the people of South Africa can benefit from Investment. Once South Africa is out of extreme poverty South Africa can invest into renewable energy - which is very expensive.	Lloyd	employed individual
2022-07-11 10:06:29	Limpopo		Yes I do	Coal		Frank	employed individual
2022-07-11 09:55:51	Western Cape		Yes I do	Coal	Get rid of BEE at Eskom - Only appoint people based on merit - can they do the job? hired! optimise all spending - no more BEE tenders! get the best service and the best parts and best coal for the best price! regardless of skin colour! Rehire all the competent and capable engineers and critical skills that the government fired simply because they didn't have black skin. reduce the size of the workforce at Eskom - each year the number of employees is going up and the amount of power generated or available is less - this simply cannot be allowed to continue. we have an abundance of coal in South Africa - this resource should be providing a cheap, dependable source for energy for decades to come. Private companies should be encouraged and allowed to generate and sell as much electricity as possible. Natural Gas and small Nuclear power should also be considered - when the economy is growing at 5-10% every year and unemployment is below 10% then you can consider adding more renewable energy that is expensive and unreliable. The ANC is incapable to rehabilitating Eskom. if we wait for the government to supply all the electricity that South Africa needs then we will never end blackouts. Give CEO Andre De Ryter carte blanche to run the company as he sees fit and to the best of his ability with no government interference. and then when everything is working well again you can try and convince us that BEE and ANC cadres deployed to every key department and SOE was the better option.	Jason	employed individual

2022-07-11 08:18:42	Gauteng	Yes I do	Coal	If you can't provide a service that people are paying for, then let someone else do it.	Kenneth	employed individual
2022-07-11 08:16:52	Gauteng	Yes I do	Coal	Immediate needs: coal, as the power stations already exist. The way forward would be nuclear power. Government also needs to allow private companies to produce electricity on a larger scale, in so doing more than making up the shortfall and bringing the cost of electricity down. In the interim, municipalities should cease the penalising of individual households that try to go off the grid with solar/ gas....surely the more households that are self-sufficient, the less of a burden there will be on the national grid!The providing of electricity to other countries in Africa should either be immediately terminated or drastically reduced, until SA has sorted out its own electricity shortfall!!!	Paul	employed individual
2022-07-11 08:04:54	Gauteng	Yes I do	Coal	Repairs to existing coal power plants will be quicker, and more cost effective than trying to build new power plants. The eco footprint of new "green" power plants will also be far greater than that of the coal power plants, in my opinion.	Christa	employed individual
2022-07-11 08:01:26	Eastern Cape	Yes I do	Coal		Roger	employed individual
2022-07-11 08:00:22	Free State	Yes I do	Coal	South Africa needs a diverse energy supply. We can't focus on one solution and hope it will be enough. The private sector has capital and they can make sure work is done on schedule and within the budget. Ideology won't save us now. We have to make it as easy as possible for power producers to start with their projects. The economy is on it's knees. We need to invest in a diverse portfolio of generating ideas. We can't have all our eggs in one basket. Look at what is happening in Europe after they stopped importing from Russia	Daniel	employed individual

2022-07-11 06:56:56	Gauteng	Yes I do	Coal		Kit	employed individual
2022-07-11 06:23:06	Limpopo	Yes I do	Coal	The current Eskom monopoly is not serving us well and it's destabilising an already struggling economy. The staff complement at Eskom doubled since democracy without an increase in power generation. Eskom was being treated as an unemployment resolution agency rather than a power generator. On top of that it's captured by corrupt individuals, constant sabotage, etc. I support cleaner energy generation but it needs to be practical & sustainable, nuclear is the best in that regard. For our immediate needs though, I support coal power generation.	Thabang	employed individual
2022-07-11 05:52:22	Gauteng	Yes I do	Coal	Coal is still the best power production method. The current power stations need fixing and government must also allow independent coal power stations	Katlego	employed individual
2022-07-11 05:35:31	Eastern Cape	Yes I do	Coal		Brett	employed individual
2022-07-11 05:28:20	North West	Yes I do	Coal	We have already coal, so lets use it .	Andreas	employed individual
2022-07-11 05:14:14	Western Cape	Yes I do	Coal	Immediately: coal. Once stability has been achieved - moving to solar, wind and hydro would be the best ideas (renewable, more sustainable).	Danielle	employed individual
2022-07-11 05:04:20	KwaZulu-Natal	Yes I do	Coal		Mark	employed individual

2022-07-11 04:25:18	Gauteng		Yes I do	Coal	As a South African now don't think we have any choice, it seems like a Government already took decision, and already have suppliers, and now we been abused for so many years by this loadshedding	Piet	employed individual
2022-07-11 04:21:48	Mpumalanga		Yes I do	Coal	Electricity supply sits easier with one supplier. However, with a good control in place it is possible to manage several suppliers on an electricity grid. The current supplier with the involvement of the Energy department has shown in the last 30 years that they are incapable of managing this task alone. The best suited electricity supply is not a single answer question. We have less water (rivers) than other African countries so hydro is not suitable. Renewable energy does not provide enough electricity to make the difference. A combination of Nuclear, Coal and Gas will make the best solution. Coal at the moment is in place. Nuclear requires control of a high level and gas reserves coming from Maputo makes us dependent. Finally, it seems that coal is still the current best solution.	Jannie	employed individual
2022-07-11 03:54:06	Free State		Yes I do	Coal		Henine	employed individual
2022-07-11 00:45:59	Western Cape		Yes I do	Coal	I have lost all faith in the Govt's ability to solve the crisis. Electricity prices have been going up and up for many many years but to no avail in alleviating supply to the country. We should examine and justify the labour costs (e.g CEO salary) of Eskom workers and their contribution to electricity supply . An independent international organisation should be established immediately to oversee the problems on SA electricity power supply (e.g. corruption) and let them offer their recommendations. Eskom management has has enough chances. We all fed up.	Saleigh	employed individual
2022-07-11 00:29:25	Gauteng		Yes I do	Coal	Coal would be the best for now because we have coal. Long term would be nuclear. Renewable energy sources aren't sufficient for base load and aren't as clean as people think. Especially when it comes to recycling. We can pursue cleaner energy once we have the "basics" in place. Pursuing clean energy now would also be way more expensive.	Niel	employed individual
2022-07-10 23:00:24	Gauteng		Yes I do	Coal	Loadshedding is really getting worse. It's clear something needs to be done asap. It's not right to raise tariffs when we not getting the service!!	Mel	employed individual
2022-07-10 22:43:43	Free State		Yes I do	Coal	It's totally clear that Eskom, under it's current operational model, is incapable of supplying power in a reliable and sustainable manner. The economy will continue to regress or underperform if things continue as is. The introduction of IPPs is an opportunity for innovative solutions to thrive and change the landscape of South Africa's energy crisis. Coal is still brilliant as a primary source, but let's also look into how renewables can be used to supplement our overall production capacity. I believe smaller IPPs can be more efficiently managed and audited. Let's allow the private sector to help Eskom out of the pits.	Tshepo	employed individual
2022-07-10 22:38:52	Gauteng		Yes I do	Coal	Die enigste rede hoekom Die President, nou wil iets doen, is om sy Motsepe familie te verryk, en om die krag kontrak aan die Motsepes te gee, want hy moet binne kort afstaan as president.	Cliffton	employed individual
2022-07-10 22:09:35	Western Cape		Yes I do	Coal	Coal is the cheapest to produce. Nuclear is also a brilliant option. Stay away from the so called Green solutions. They are wrecking economies and we're All aware that it's part of the scam that is the new works orders great reset to cripple economies. Keep clear of the cult called green energy. People are more important than trees. Carbon production is not going to destroy the earth. It's necessary for life on earth. Stop the insanity being experienced in the rest of the world where the Green God is being bowed to at the expense of human lives. Example the Netherlands and Sri Lanka. Cattle farms have been shut down because of the so called excessive pollutants from cattle. A lot of hysteria and non scientific garbage. Not here in South African. Let's do our best to be responsible stewards of the earth but keep economic wisdom that is sustainable for the long term.	Nick	employed individual
2022-07-10 21:59:39	Western Cape		Yes I do	Coal	We know how to use coal and we still have large supplies of it. Next we have a lot of sunshine, but our electricity storage technology still needs to be developed.	Grant	employed individual
2022-07-10 21:53:12	Western Cape		Yes I do	Coal	We should first ensure that our coal generation is producing optimal and stable supply. For the longer term I believe that the best solution for renewable supply is nuclear and plans to reduce coal generation must run parallel to this.	Oscar	employed individual

2022-07-10 11:29:27	Western Cape	Yes I do	Coal	While government refuses to allow other means of electricity generation, we are forced to pay more for a system that does not deliver causing serious damage to our struggling economy. We are held hostage by corrupt government officials doing corrupt deals with real life consequences to the normal guys in society. The proof is in the pudding that centralization of or monopolizing of these state entities serves only the politically connected and corrupt. Democracy is dead under centralized policies.	Chris	employed individual
2022-07-10 10:52:03	KwaZulu-Natal	Yes I do	Coal	Independent suppliers of electricity would help eradicate or lessen the corruption that goes on at Eskom. To get to the point, it would be like the SABC trying to compete and stay relevant in todays era. Eskom is heading in that direction fast.	Suman	employed individual
2022-07-10 10:07:46	Gauteng	Yes I do	Coal	The government should make decisions according to the will of the people of the country. People are clearly desperately in need of electricity so that their basic needs can be met. The situation is urgent and keeping independent power producers from applying the best minds and efforts the country has to offer from meeting the people's needs gravely compromises the principles of freedom while severely crippling people's quality of life and in many cases costing people their life and health. No restrictions should be placed on what kind of power is allowed to be produced. The priority should be to produce electricity by any means that is safe as the preservation of people's lives and livelihoods should be of paramount importance in deciding policy.	Esté	employed individual
2022-07-10 09:51:34	Western Cape	Yes I do	Coal	Eskom has failed the country and are now reverting to sabotage and are controlled by political forces. How else to explain a workforce of 40 000 with average salary of R700 000 per annum producing power which should be done by 16 000. Therefore SA has no choice for survival but to open up for independent power producers, this will allow for competition to reduce electricity prices and provide reliable electricity supply. Coal is still the most economical and will be able to deliver the faster than Nuclear or Solar provided competent people take over repair and run the current infrastructure. A single approach will be now means solve the problem. Therefore solar should be encouraged and incentivized to reduce the strain on the current supply and nuclear and hydro should also be used as longer term solutions as coal is not a long term solution as the need for reducing pollution becomes more important that the current dire need for survival.	Gerrit	employed individual
2022-07-10 09:12:54	Gauteng	Yes I do	Coal	By using coal and make use of Flue gas desulfurization plant we can use coal wth little impacted on the environment	Lucas	employed individual

2022-07-09 09:58:18	Eastern Cape		Yes I do	Coal	Due to the unreliability of renewables such as Solar and Wind and the lack of any storage facility, the immediate answer is to continue with coal-powered stations and even bring mothballed ones back online where possible. The construction of modular nuclear powered stations should start to take place immediately. If foreign investment allows then we should go ahead and build renewables, bearing in mind nuclear stations will take a minimum of ten years to come on line. In the meantime every generation plant be it coal, gas or diesel-fired must be utilised to fill the gap. Once we have the generation capacity to fulfill our needs and the needs of the economy, then we can have the luxury of choosing renewables. The European and Western First World countries grew their wealth and economies on the back of fossil-fuelled power, they do not have the right to dictate to Africa what power it may or may not use - they gave up that right when they gave up their half-developed colonies. We need power now, by whatever means.	Hugh	employed individual
2022-07-09 09:01:06	Gauteng		Yes I do	Coal	Coal is the best immediate solution. Wind will not provide enough power for the same amount of money, large tracts of land will be need and South Africa has no sustainable wind. Solar cannot provide enough power , also large tracts of land will be needed and no sun at night Battery backup extremely expensive. Neuclear Power is Best but we dont have the money to build one.	Gerald	employed individual
2022-07-09 08:06:42	Western Cape		Yes I do	Coal		Bongiwe	employed individual

2022-07-09 07:34:28	Mpumalanga	Yes I do	Coal	Coal is the obvious immediate method to produce electricity in the short term however all an any methods available at present should be used to get the supply of electricity stable and prevent power outages/loadshedding. This will help to stop the detrimental effect this is currently having on the economy as well as help the people of SA to have a more positive outlook on the future in SA. In addition may help build confidence to foreign investors, IMF etc.	Andrew	employed individual
2022-07-09 06:17:42	Gauteng	Yes I do	Coal	I hereby oppose legislative efforts to prevent independent power producers from supplying electricity in a competitive economic market. Instead, I would like Government policy to allow private energy producers to enter the market and supply power to consumers on or off the Eskom grid.	Victor	employed individual
2022-07-09 01:16:04	Gauteng	Yes I do	Coal	Because South Africa produces a lot of coal from our own mines meaning that we are NOT going to have any problem on electricity.	Robert	employed individual

2022-07-08 11:08:09	Western Cape	Yes I do	Coal	<p>Sadly, we are being duped into believing a narrative that coal is causing dramatic negative effects - especially huge amounts of carbon dioxide in the air! The fact that trees and plants need CO2 to produce oxygen is completely neglected by the "pushers" of the narrative!</p> <p>To solve the problem:</p> <p>1) immediately scrap regulations regarding private sector power producers from entering the market! The control here has to be that NO government officials, or their family members (up to 2nd cousins), may own, partner, or invest in any IPP!</p> <p>2) Get some of the engineers who built all the power stations in the country (excepting the recent to which keep using more resources than they produce power), and have them oversee the building of new stations based on that old technology that keeps working, and training a new generation of engineers in that technology! This skills transfer is more vital than all the efforts to try and manage Medupi and Kusile alive - or rather on life support!</p> <p>3) Remove the restrictive exorbitant import duties on solar equipment, or strike a deal with producers of quality products, to come here and start training and production here, under license! This will reduce the current cost of installing solar, as well as providing employment opportunities!</p> <p>4) Get Mr Mantashe to take responsibility for his position as minister of energy, and STEP DOWN(out of politics!) If, as he says, Public Works is responsible, then Mr Gordhan can also make retirement his new employment! They have to both go, because neither is holding the other accountable, and neither is taking responsibility!</p> <p>5) Get Mr Cele to do the right thing - SHAARRRRRAAP all the way through his resignation, along with all the other fat cat Generals who are proudly displaying brass on their shoulders, while leeching fat salaries, for doing absolutely nothing to prevent the crime wave that continues to drag Eskom into the mud! Anyone caught for cable theft, pylon theft, destruction of power generation equipment, purposely loading coal with destructive materials, etc, must be charged (and convicted) with treason and terrorism!</p>	Scott	employed individual
2022-07-08 11:04:55	KwaZulu- Natal	Yes I do	Coal	<p>Govt needs to be open and transparent in its processes.</p> <p>We are in a crisis at the moment. Independent power producers are essential to the system.</p>	Brandon	employed individual
2022-07-08 10:51:51	KwaZulu- Natal	Yes I do	Coal	<p>Coal is renewable energy and keeps people employed. We have our own supply in SA. As for coal getting wet, it never used to be weather dependant and if handled correctly, should be able to feed the power plants on demand.</p>	Diane	employed individual
2022-07-08 10:48:37	Western Cape	Yes I do	Coal		Hanlie	employed individual
2022-07-08 10:47:02	Western Cape	Yes I do	Coal	<p>I second this, Coal would be cheapest due to availability and being a proven energy resource. Fluidized Bed Combustion (FBC) should be used rather than pulverised coal combustion. FBC is cleaner and can burn poorer quality coals. Underground coal gasification (UCG) was proven as a potential technology in the Majuba coal area. This could also be considered as a generating energy source. Renewables, wind and sun, are not reliable and has been proven to be to expensive. South Africa does not have sufficient proven gas reserves to be considered as an energy source. Imported gas and diesel would be to expensive.</p> <p>Nuclear is a definite option, we have metric tons of Thorium in our soil but since it can't be weaponized they won't consider it. Nuclear will take time to set up but ultimately necessary too.</p>	David	employed individual
2022-07-08 10:46:11	Gauteng	Yes I do	Coal		Marcell	employed individual
2022-07-08 10:37:07	Limpopo	Yes I do	Coal	<p>Coal is our cheapest source but I support all power production methods. Currently we need power, flood the market and it will become cheap. As time goes it will be easy to get rid of coal if you think it is the reason for climate change, which I don't believe.</p>	Shandu	employed individual
2022-07-08 09:25:56	KwaZulu- Natal	Yes I do	Coal	<p>Other countries have more than one option when choosing who to get their electricity from. Monopolies don't work in most situations. If you aren't happy with your service provider, you have the option to change. The free market is the best option. Competition drives innovation. All these useless SOE's have had enough time being protected from competition. They have all failed. Smaller government = better for everyone, since they can't get anything right anyway...</p>	Hayden	employed individual
2022-07-08 09:24:56	KwaZulu- Natal	Yes I do	Coal	<p>Nuclear or coal. The two obvious choices. Both with pros and cons but lets go with either to keep us afloat.</p>	Shaun	employed individual

2022-07-08 09:16:40	Gauteng		Yes I do	Coal	<p>1) It is time to cut the crap and get down to business, we no longer have time for political gains. If the electricity grid collapse, we will have anarchy on our hands that will make the Natal riots look like a picnic. It is time to set aside all other considerations like Bullshit BEE nonsense, and get qualified people into the business of generating power. We need to introduce competition in the market that will push prices down and so that we're no longer stuck with a single point of failure.</p> <p>2) This is *NOT* the time to pander to the Greta Thurnbergs of the world. Windmills and Solar is expensive, and will *NOT* be sufficient to make up for the short fall. We need to get the grid fixed as soon and as cheaply as possible, we don't have time to virtue signal to countries that have no real problems. Speaking of countries that have no real problems, with the Russian invasion, Europe is quick to forget all their climate commitments and switch on their coal power plants, so we should not let them bully us into not using our coal when we don't have enough power already as it is. Once we have a functioning electrical grid again, then we can worry about niceties like wind and solar.</p>	Hanno	employed individual
2022-07-08 09:02:39	Gauteng		Yes I do	Coal	Coal is currently the cheapest form of electricity production available in SA at the moment. Considering the debt burden on Eskom, the logical step is to take the cheapest option to perhaps contribute to the grid. South Africa cannot afford a bankrupt monopoly, and it is essential for the country as a whole to keep the lights on.	Michelle	employed individual

2022-07-08 08:05:05	Eastern Cape		Yes I do	Coal	<p>South Africa is being held ransom by criminal elements within all SOE. Eskom is no exception and may even be the worst. There are a TON of independent power producers just waiting to get involved in adding to the available capacity but they are being barred by nonsensical policy put in place to enrich a few "elite" greedy BBBEE people. The electricity grid is on the brink of collapse and if that goes down then what little security we have also goes down, transport will stop because no one can pump fuel and shops will run out of food leading to anarchy and, most likely, civil war. Government needs to pull finger, stop being so greedy and make a plan to increase the power generation (i.e. allow independent providers to contribute).</p> <p>Firstly, there is no time to set up the infrastructure for renewable energy. We all know how long it takes to get anything done in this country. Secondly, the level of crime and vandalism will ensure that that which does get build gets destroyed / stolen / vandalized in record time. The best thing to do would be to source DECENT quality coal, not the substandard coal supplied to Eskom because of underhanded dealings with "comrade" suppliers, and use that to start ensuring a steady supply of electricity. Obviously independent providers could and should use whatever means they have to produce power but Eskom does not have the money to expand to other forms of energy at this point in time and we simply cannot wait until they do.</p>	Amy	employed individual

2022-10-02 09:11:26	Western Cape	Yes I do	Coal	We cannot afford to let the ANC continue their disastrous policies to retain power by imposing draconian red tape measures to avoid IPPs coming on board to solve our energy crisis created by them! They are, no doubt, making sure that their comrades get a biggest slice of the pie when they are eventually forced into removing the red tape to avoid a catastrophe.	Kerry	employed individual

2022-09-22 18:26:49	Northern Cape		Yes I do	Coal	I only said Coal because of the availability of coal but all of the options are viable and can be part of the whole so as not to be in the position of being reliant on 1 type or supplier	Kevin	employed individual
2022-09-21 15:24:40	Western Cape		Yes I do	Coal	It is evident that the deep seeded corruption and cadre deployment over 25 years have led to South Africa's demise in all SEO sectors. It has been proven that Eskom isn't capable of supplying the energy needs of SA and its Economy. It is further evident from the ingrained corruption that the construction and continued failures of Medupi and Kusile after being over budget and delivered late speaks volumes of the incompetence of Eskom. In retrospect NERSA keeps on being asked for unimaginable and unthinkable increases yet Eskom doesn't deliver! It is imperative that the energy crisis in SA requires the intervention, management and running by the Private sector if anything is to be done to fix this problem. The further concern is that the State will make this overly onerous for IPP's to come online. Hence the Red Tape MUST be removed if SA is ever to recover its energy security and economy whom are all failing as a result of the lack of energy security provided by the state!	John	employed individual
2022-09-16 18:49:18	Gauteng		Yes I do	Coal	South Africa cannot afford to waste more time in privatising electricity generation. The fastest and probably most affordable way of generating electricity is most probably still coal driven power plants. Why is China planning to build another 200 odd of them? Once we have electricity supply stable and affordable to actually attract investment in our economy we can start looking at going green and shut down coal power stations if greener options is in fact green and do not produce electricity at double the price of coal. It does not help to be green if there is no investment in our economy and all of us end up sitting without jobs.	Jasper	employed individual
2022-09-16 12:19:59	KwaZulu- Natal		Yes I do	Coal	Cut the red tape , get independent power producers in. Cut the red tape in Eskom. Allow De Ruyter to do his job without political interference. Stop cadre deployment. Government can't only 'cut the red tape' for the president's brother in law Motsepe's business (why is the Development bank of SA funding Motsepe's business? If it's taxpayer funded it's not completely private as we are being told. Same as SAA deal)need to ' cut the red tape' for actual independent power producers not just for those connected to ANC(which the taxpayer ends up paying for anyway)	Tamsin	employed individual
2022-08-12 08:13:57	Gauteng		Yes I do	Coal	Coal Power Generation is suitable for the required base load.	TSHEPO	employed individual
2022-08-05 08:21:35	Gauteng		Yes I do	Coal	For the future a diverse energy mix is required. Coal for base load power - specifically CFB boilers. Solar and wind with battery storage - requires substantially more mining than currently taking place. Pumped storage if possible. Biogas. Waste incineration. Encourage agriculture to generate own electricity - this sector is very constrained right now in terms of what they can do. Every house must have a solar geyser by law.	Nikki	employed individual
2022-08-04 06:47:12	Gauteng		Yes I do	Coal		philip	employed individual
2022-08-04 05:32:29	Western Cape		Yes I do	Coal	All the others are relevant in medium to long term. But with coal and solar we can produce now.	Will	employed individual
2022-08-03 19:56:53	Western Cape		Yes I do	Coal	Yes we need independent power producers in this country.	Jacobus	employed individual
2022-08-02 20:55:13	Gauteng		Yes I do	Coal	Stop underestimating the crisis. Eskom has had enough bail-outs. South Africa produces LESS power than in 2004 and the economy is SMALLER than then, we should have more than enough electricity ALREADY. STOP expensive Medupi's and managers, give engineers a chance to reignite the coal power stations and coal network SA ALREADY had in 2004. It will be cheaper for Gov to buy electricity for the poor, than to keep the bloated corrupt Eskom going, like the past 17years without success.	Marthinus	employed individual
2022-08-02 14:38:35	Gauteng		Yes I do	Coal	if there is independent/ private companies producing power, then there will be less interruptions as each will strive for the best service delivery. less theft and government influence. better rates for the people. an end to Eskom's monopoly	garath	employed individual
2022-08-02 12:26:39	Eastern Cape		Yes I do	Coal	we have coal fire power stations that can be fired up to alleviate the shortage in the short term and then maybe think about renewables	ndyebo	employed individual
2022-08-01 13:24:30	Gauteng		Yes I do	Coal	Newer technologies that can provide cleaner alternative to coal is still expensive and maybe above the current technological expertise level of South Africa The coal sector lobbyists (aka Gwede Mantashe) will never let coal take a backseat or will do the utmost to make other technologies fail which equates to economic sabotage just to get a few bucks in their pockets	Hermann	employed individual

2022-07-28 08:57:12	Gauteng	Yes I do	Coal	If we want to transform to using cleaner energy sources, that transformation itself will need energy. Wind and solar are not yet ready, there is no suitable storage system that can power the grid during nighttime or while the wind is still. All of the effort expended in setting up wind farms and whatnot could rather be applied to installing technology to clean up the output from coal station smokestacks.	Pieter	employed individual
2022-07-22 10:48:31	Free State	Yes I do	Coal	Wake-up people Coal generating CO2 is what our planet needs. Seriously do your homework	Dominic	business owner
2022-07-21 15:42:24	Gauteng	Yes I do	Coal	We have enough coal to power up the electricity. Allow private suppliers of solar and encourage more people to go for it. Stop charging stupid tax you intend on those using solar. You don't own the sun so you have no right to charge that. Stop thinking only about yourself as the government but the people you should be representing	Marumo	business owner
2022-07-18 13:58:53	Gauteng	Yes I do	Coal		Fred	business owner
2022-07-17 20:29:46	Western Cape	Yes I do	Coal		Marius	business owner
2022-07-17 14:10:27	Gauteng	Yes I do	Coal	Well immediate solution would be coal because we have enough but keep the power-stations up and running is another story. Solar will be the best for the future but it will take awhile to get it up and running. To privatize the supply of electricity will be the best solution by far. Getting away from all the idiots that run South Africa to the ground.	Juan	business owner
2022-07-16 13:08:57	Gauteng	Yes I do	Coal	We need independent power producers. We can not rely on the state anymore, until corruption has been rooted out and we the people has elected a new government. Coal is still the best option to go for. After all, Europe is scrambling to get back to use coal. It is evident that solar, wind and batteries are far more expensive and not reliable.	Conrad	business owner
2022-07-16 08:24:49	Eastern Cape	Yes I do	Coal	Only innovation from the private sector can produce electrical requirements for South Africa, this responsibility must be taken out of the hands of the incompetent ANC.	George	business owner
2022-07-14 15:40:08	Western Cape	Yes I do	Coal	There are various ways for independent providers to supply electricity to the country! Starting with coal and working toward a better supply is good.	Paul	business owner
2022-07-14 12:08:24	Limpopo	Yes I do	Coal	Utilize appropriately the source of power we currently have first, and at the same time allow for independant companies that are focused on renewable energy sources like solar, to begin building a new energy backbone to take over from coal in the future.	Matthew	business owner
2022-07-14 08:15:02	Gauteng	Yes I do	Coal	This self made crises is proof that communism/socialism lead to a fail state. If the government perused a free market strategy the private sector would have invested in this golden opportunity a decade ago. I believe coal is the most suitable immediate solution making use of existing infrastructure but nuclear energy is the most sustainable and environmental friendly solution compared to the green energy solutions.	Jan-Harm	business owner
2022-07-13 09:30:27	Gauteng	Yes I do	Coal	Keep the lights on! All this load shedding is killing businesses, education and entrepreneurs across South Africa. Give us back out light!	Linda	business owner
2022-07-13 08:23:32	Gauteng	Yes I do	Coal	I think coal should be used currently and supplemented by solar. The red tape be scrapped. The independent producers need to be capped in pricing structure. There is no climate change, that is all bs made up by the cabal.	Craig	business owner
2022-07-12 21:13:12	Western Cape	Yes I do	Coal	Coal for immediate relief as it is available. Longer term, Solar & wind to supplement coal & nuclear production. Also, the government should encourage people (not penalize them as is now the case) to put their own infrastructure in place to generate their own power & put any excess back into the grid in order to lighten the load.	Jacqui	business owner
2022-07-12 21:11:40	Western Cape	Yes I do	Coal		David	business owner
2022-07-12 20:41:41	KwaZulu-Natal	Yes I do	Coal	My take on this is coal which is readily available be used to drive the powerstations. Solar farms as in the case of Great Karoo being championed by Gayton Mckenzie has proven that these can be up and ready in a matter of days to supply a sustainable source. Really it should be a mix at this late stage.	Dereck	business owner
2022-07-12 20:00:45	Gauteng	Yes I do	Coal	Coal is easily available and power stations using coal are already present.	Lutanyani	business owner
2022-07-12 17:59:00	Western Cape	Yes I do	Coal	We have coal and this is thr best way to provide base load capacity	Jacobus	business owner
2022-07-12 16:53:27	KwaZulu-Natal	Yes I do	Coal		nassim	business owner
2022-07-12 14:52:24	KwaZulu-Natal	Yes I do	Coal	Most red tape should be scrapped, government needs to get out of the way of private enterprise and the economy will improve but on the matter of electricity, which is now a crisis, it needs to get out of the way, let sensible, honest business people get on with it.	Hazel	business owner
2022-07-12 14:44:27	KwaZulu-Natal	Yes I do	Coal		Mohamed	business owner
2022-07-12 14:36:17	Gauteng	Yes I do	Coal	Government has no business running electricity, this should be in the hands of independent providers, allowing for a competitive and continuous supply of electricity. We have coal natural resources, so they need to stop exporting and use locally. Alternate energy sources are far more damaging to the environment, so do even think about it.	Michael	business owner

2022-07-12 12:55:02	Western Cape		Yes I do	Coal	Changing to alternative method will not suit SA's immediate needs. Once our immediate needs are met we must explore environmentally sustainable solutions	Ismail	business owner
					Coal and nuclear power are both unpopular energy sources for power generation. Burning coal produces greenhouse gasses that add to global warming. Nuclear produces toxic waste which remains dangerous for many years and as such is very difficult and expensive to dispose of cheaply. Nuclear power is however a very cheap and efficient source of power generation. Due to the international red tape surrounding nuclear compliance it is unlikely that building more nuclear power stations will be a fast solution to meeting South Africa's energy demands. In the long term, investment in nuclear power would be the best way forward. The problem we face is an immediate one and so we need a quick, effective solution to support economic growth. A prosperous economy can support sustainable, clean power generation. A poor economy cannot do this without outside help. We have to use what we have and what we have is lots of coal. We need to build power stations that are quick and cheap to build and run. The technology for coal generation is well established and easily available and very energy efficient. I believe that the same vigour that was applied to the Covid19 epidemic needs to be applied to Eskom. Skills and capacity should be scrutinised and staff that are unable to perform the tasks required of them should be removed. This would mean upsetting the Dept of Labour and their job creation goals. A strong economy will create far more jobs than Eskom ever could and this small compromise will pay off in the long run. Employees disrupting the workflow in Eskom should be treated like citizens not wearing a mask during Covid. They should be arrested and criminally charged. Once the chaff is removed and the right skills are in place then the focus needs to move onto maintenance. The problems need to be identified and skilled, honest people need to be in the supply chain to prevent tender tampering and ensure the right products and services are in place. Getting the existing infrastructure functioning properly will be the quickest solution to power generation. Building new power stations to meet the demand in five years is the next step. Allowing the private sector to fill in the gaps is an absolute necessity. Opening up power generation to the private sector comes at the risk of even further price increases for the end user as this competition will use their influence to monopolise their investment. Unfortunately, through greed and poor decisions those in charge have destroyed the asset we, as a country, had in Eskom and so we have to accept these consequences. As such, we need the private sector to be free of red tape so they can innovate and adjust to the market needs.		
2022-07-12 12:53:07	Western Cape		Yes I do	Coal		Rohan	business owner
2022-07-12 10:36:28	Eastern Cape		Yes I do	Coal	The quickest way to reduce load shedding in the short term is to get competent personnel to fix and maintain the existing Eskom infrastructure and to get as much PV installed ASAP. There is no single solution to solving longer term reliability of supply. PV will take up too much space and wind is not always assured. Base load should still be coal, nuclear, gas. Reliability will only become a reality when private enterprise is allowed to contribute more easily. All illegal strikers must be dealt with in no uncertain terms to prevent future mayhem.	Clive	business owner
2022-07-12 08:00:14	Eastern Cape		Yes I do	Coal	The best and first prize is renewable solar and wind, until that has been achieved we have to live with coal. Small independent producers are the way to go, not one single supplier as is the case now	Charles	business owner
					South Africa should never give into the insanity of the unscientifically founded theories of climate change and / or global warming and / or global cooling. These unscientific theories are easily debunked with a simple application of the scientific method... CO2, Nitrogen, ... etc... are not pollutants -- they are natural molecules that are key to life on the planet, and anybody who tries to demonise them are not to be trusted... because their driving goals are in direct opposition to humanity, instead are singularly greed based; to financially benefit those few who are pushing these unscientific theories.. South Africa should ignore all the indoctrinated idiots who oppose offshore exploration and drilling; similarly fracking and coal mining. Let's take full advantage of the rich resources that our country has been blessed with. 1st world countries became rich and powerful by exploiting the resources; yet today they want to impose limits on the 3rd world countries for as they falsely reason for the sake of the earth; this is completely rubbish; they are only doing this to prevent opposition to their power; they do not want 3rd world countries to succeed; the more they can keep 3rd world countries subservient to their hegemony the better for the hold on power.		
2022-07-11 22:06:34	North West		Yes I do	Coal	Tell the western countries; especially the USA to take a hike... strengthen the relationship with the non western world which represents the overwhelming majority of people on earth, and hence is where the power should reside.	Vaughn	business owner

2022-07-11 10:01:50	North West		Yes I do	Coal	GOVERNMENT SHOULD ABSOLUTELY NOT BE ALLOWED TO REGULATE ANYTHING, THE LAST 30 YEARS HAVE SHOWN THAT CLEARLY.	WAYNE	business owner
2022-07-11 09:45:49	KwaZulu-Natal		Yes I do	Coal		Daryl	business owner

2022-07-11 09:38:02	Western Cape		Yes I do	Coal	<p>The problem is governments restriction on only allowing IPP's t generate 100W. Why the limit. It is common knowledge that the ANC just wants to hold on to the monopoly instead of allowing the public to do the generation needed, because they would then not have the control.</p> <p>The ANC has proved that they cannot run any of the SEO's, so why not deregulate it in the interests of all South Africans ?</p> <p>My option of coal is not the only one. I believe it should be any means available. As far as coal goes, even Germany is firing up its coal plants again. The slow down of fossil fuels needs to happen gradually, this is not something that can be done overnight, like the ANC is trying to do.</p>	Iain	business owner
2022-07-11 09:26:24	Western Cape		Yes I do	Coal	Coal is still the cheapest and most abundant resource we have. Nuclear is also a very good option. By all means we should explore solar, as we have many hours of sunshine a day, and we should utilize it. However, it should be made much more affordable than it is at present. For many people, it is completely out of reach. Coal remains the most reliable and the most efficient at this stage.	Alison	business owner
2022-07-11 09:26:20	Western Cape		Yes I do	Coal	Coal is still the cheapest and most abundant resource we have. Nuclear is also a very good option. By all means we should explore solar, as we have many hours of sunshine a day, and we should utilize it. However, it should be made much more affordable than it is at present. For many people, it is completely out of reach. Coal remains the most reliable and the most efficient at this stage.	Alison	business owner
2022-07-11 09:17:47	KwaZulu- Natal		Yes I do	Coal	Coal and natural gas would be the best solutions in the short term given South Africas resources. The big question is who are these independent power producers and how long will they take to get online? How long will we continue to just sit on our hands and work around a crippling load shedding schedule that changes every day.	Scott	business owner
2022-07-11 09:17:41	Gauteng		Yes I do	Coal		Winston	business owner
2022-07-11 08:22:22	Eastern Cape		Yes I do	Coal		Jansie	business owner
2022-07-11 08:18:12	Gauteng		Yes I do	Coal	I was in Komatipoort last week, was shocked to see the amount of coal crossing the border. Kilometres and kilometres of coal trucks were standing in line to cross the border. It is very obvious that our government is selling our needed supplies to enrich their own pockets! I really doubt if revenue from all those sales benefit anyone other than those in power. I remember numerous times in the past that the shortage of coal was an excuse for load shedding!!!	Tania	business owner
2022-07-11 08:11:24	KwaZulu- Natal		Yes I do	Coal	Immediately I think we need to carry on with coal as that is what is currently available but to me in SA solar should be expanded	Nanette	business owner
2022-07-11 08:03:33	North West		Yes I do	Coal			business owner
2022-07-11 08:03:00	Gauteng		Yes I do	Coal		Adam	business owner
2022-07-11 07:54:24	Gauteng		Yes I do	Coal		Graeme	business owner
2022-07-11 07:52:48	Gauteng		Yes I do	Coal	Government should allow independent power producers to participate in providing electricity. Eskom monopoly doesn't do it for the country and it's economy. They have be ripped off and will take years before they return (if that) to what eskom used to be. Independent power producers are the way to go.	Duduzile	business owner
2022-07-11 07:38:48	Free State		Yes I do	Coal	<p>Coal is in abundance in South Africa as primary energy; coal projects if a smaller capacity up to 1200MW spread according to geographical sources of coal will have lesser environmental footprint than the Eskom large power plants.</p> <p>Baseload based on coal is still an attractive proposal in terms of project timelines.</p> <p>Internationally many IPP players have proven ultra-low emissions, especially in Asia with available construction capacity round the globe.</p> <p>Europe is returning their coal-fired power plants to service, despite their urging South Africa to the contrary.</p> <p>The IDC and DBSA are still intact as developmental funding institutions to play a significant role in funding projects. Internationally there was still appetite for IPPs up to the dawn of Covid-19.</p> <p>The DTI's CPFP could play a huge role in accelerated project preparation as it has been abused internally as source of corruption by the charged officials.</p> <p>Freestate projects would be in low environmental loading areas, and gave significant coal deposits.</p>	Mase	business owner
2022-07-11 07:28:16	KwaZulu- Natal		Yes I do	Coal		Vish	business owner

2022-07-11 07:23:05	Gauteng	Yes I do	Coal	Developed nations were allowed to grow and develop their economies through the use of coal, which remains the cheapest method power production for SA and we still have >100yrs of coal resources. Were it not for a useless, corrupt and greedy government we would still be one of the worlds cheapest power producers Eskom should refocus as a network grid supplier only and independents should immediately be allowed to start producing. The consumer should be allowed to chose their own electrical power producer and pointless organisations such as Joburg City Power should shut down.	Dean	business owner
2022-07-11 06:56:16	North West	Yes I do	Coal	I believe that we can use a combination of all of the possibilities listed above with a slow move to renewables.	Grant	business owner
2022-07-11 06:24:03	Gauteng	Yes I do	Coal	We have an energy crisis in the country which is negatively impacting the economy, which is not able to grow to create jobs. We have to fully optimise our current electricity producing infrastructure being managed by Eskom. In addition to this, all available alternative energy sources i.e. solar and wind must be fed into the grid. New pebble bed reactors must be build to replace coal as baseload for the future.	Harold	business owner
2022-07-11 06:18:32	Mpumalanga	Yes I do	Coal	In the short term, we cannot afford to indulge the ridiculous global bias against fossil fuelled energy. We have the resource, we must make use of coal in combination with private coal-fired power stations to restore stability. The shock to our labour market to suddenly move away from coal would be devastating to our country. In the long term we must look at private nuclear & hydro-electric solutions to add the the energy mix.	Chris	business owner
2022-07-11 05:54:43	Gauteng	Yes I do	Coal	coal, nuclear and hydro for base load, which are supplemented by solar (and a little wind). if affordable natural gas is an alternative but SA needs to burn coal in the short/medium term. cheap power = economic growth and employment!	Hayden	business owner
2022-07-11 05:52:56	Gauteng	Yes I do	Coal	Eskom is no longer capable of holding this monopoly, even if they wanted. It's time to open up the market.	Richard	business owner
2022-07-11 05:35:30	Gauteng	Yes I do	Coal	or Gas or nuclear. The cost of solar and wind is too high for the energy obtained in the short term. But yes remove the red tape on IPP's	Brian	business owner
2022-07-11 00:32:33	Gauteng	Yes I do	Coal	Allow independent power producers to generate electricity by any means to meet the country's needs.	Katyusha	business owner
2022-07-10 22:32:02	North West	Yes I do	Coal	Coal is very abundant in South Africa and is the cheapest energy source available to us. The infrastructure for electricity generation from coal already exists. The coal power plants need to be properly maintained and need to be upgraded. The quickest way to achieve this is to privatize these power plants and to reinstate the engineers and technicians lost due to state capture and the mismanagement of past government and ESCOM officials. Other more environmentally friendly methods of electricity production also need to be developed. These methods are unfortunately in it's infancy in South Africa and it would not be able to provide the capacity needed.	Hennie	business owner
2022-07-10 22:23:55	Western Cape	Yes I do	Coal		Aleksandar	business owner
2022-07-10 22:22:03	KwaZulu-Natal	Yes I do	Coal		Digby	business owner

2022-07-10 22:21:57	KwaZulu-Natal	Yes I do	Coal		Digby	business owner
2022-07-10 21:35:27	KwaZulu-Natal	Yes I do	Coal	Solar power is the most renewable and the cheapest, but wont suit SAs immediate needs....so I guess it would be coal or hydro... Not sure how easy/reasonable gas is.....	Pamela Marie	business owner
2022-07-10 21:23:06	KwaZulu-Natal	Yes I do	Coal	We need competent people running the country irrespective of color or race. We are a resilient nation, but for how long?	Mary	business owner
2022-07-10 21:05:02	Eastern Cape	Yes I do	Coal		Liesl	business owner
2022-07-10 20:19:35	Western Cape	Yes I do	Coal	We have sufficient coal and we have powerstations that could fully supply if sabotage and corruption is stopped, and if repairs are prioritized and competently dealt with, and maintenance responsibly done.	Richard	business owner
2022-07-10 18:48:22	Gauteng	Yes I do	Coal		Christopher	business owner
2022-07-10 18:16:56	Western Cape	Yes I do	Coal	Privatize all power producers as government has proved it can not run itself nor companies.	Jean	business owner
2022-07-10 16:18:46	Mpumalanga	Yes I do	Coal	Clearly, the state-run Eskom does not have sufficient competency to meet the power needs of South Africa. Using "Load Shedding" as a routine way of providing this service is not in any way a satisfactory way to operate. At the very minimum, the law should be open to non-state-run power generators, whether they be small individual or commercial scale operations. This is our only hope. Individuals are willingly adopting small solar power generation, but are not being compensated for sending excess to the grid. Commercial scale coal-fired generation should be encouraged from the private sector, but for now is not. These are viable solutions. With the government aligned against these private power generators, it is willfully pushing the country to true 3rd World status with an unreliable electrical grid.	MN	business owner
2022-07-10 15:55:43	Gauteng	Yes I do	Coal		Marinda	business owner

2022-07-10 15:41:49	Gauteng		Yes I do	Coal	Excess carbon is not a problem. As South Africans we shouldn't have to pay for elite first world desire to change energy sources. We need to remain independent of the globalists	Kevin	business owner
2022-07-10 14:28:22	Western Cape		Yes I do	Coal	Our shortest-term solution is with coal-fired power stations. In the period since load shedding started, we have seen an incalculable loss from a lack of refining the raw minerals we export. Nuff said. My next step would be to develop the already tested gas options we have in the deeper-lying coal fields. The gas produced as a by-product of coal seems a no-brainer. We're a far way off from a wind or solar alone system. A dream scenario would be to have the existing coal power stations for our heavy industry and residential backup, promoting individual homes to secure their own electricity via natural sources. I only have one option above to select, thus my choice. I do believe that our solution lies in more environmentally friendly solutions in the long run, but we've got a country to save.	Lofty	business owner
2022-07-10 13:54:38	Western Cape		Yes I do	Coal	We have enough coal.	Jaco	business owner
2022-07-10 12:02:38	Western Cape		Yes I do	Coal	Use clean coal systems to generate electricity	Brett	business owner
2022-07-10 11:40:47	Gauteng		Yes I do	Coal	We have the infrastructure, use it as long it can work. Get households to cover their needs with a subsidy to get invertors installed. Define strategic areas, like hospitals and ensure their power will not be switched off. The future should be driven by a proper energy strategy. I believe the total answer is in a balanced mix of coal, nuclear, gas, wind and sun, driven by a professional analysis of needs through 24 hour cycles and different industry requirements and foreseen growth. This must be done by accredited people/institutions and should not be a political playball.	Jacob	business owner
2022-07-10 11:31:11	Limpopo		Yes I do	Coal		Lourens	business owner
2022-07-10 11:11:46	Western Cape		Yes I do	Coal	I believe Independent electricity suppliers should be allowed and given all the Aid from government to save this country from the a complete black out . If there is legislation blocking this process it must be scrapped ASAP	Bobby	business owner
2022-07-10 10:40:32	Western Cape		Yes I do	Coal	immediate production can only be done with coal. We have coal use it, it's a crisis. Lose the Eskom 'trench engineers' and get some real ones. NOT FROM CUBA. Global warming is the worry of the first world who created the problem. Nuclear is the answer but this will take some time.	Mark	business owner
2022-07-10 10:17:00	Gauteng		Yes I do	Coal	What's important right now is to have South Africa having lights therefore whatever positive measures that can be put in place will work for South Africans.	Lonwabo	business owner
2022-07-10 09:59:03	Gauteng		Yes I do	Coal	For the sake of our citizens livelihood, foreign investment, tourism etc - the number 1 priority should be to provide power. Government has shown time and again that their interference and 'red tape' does absolutely nothing but hinder growth. We are in 2022 and no amount of electricity price increase over the last years has gotten us closer to having stable power. Government has proven again they are inept and at the expense of our citizens.	Ray	business owner
2022-07-10 09:22:14	Gauteng		Yes I do	Coal	It's plain to see the destruction of power plants is to serve the "Green Deal" with the G7. And only those who haven't bothered to research what "Green" means support it. It's a load of bollocks. The immediate solution is OBVIOUSLY to privatise, and use immediate locally sourced resources such as coal, rolling up to more sustainable solar solutions in the long term. But this cannot be done while the corrupt cabal puppets remain in charge. When will my fellow South Africans finally stand against thus?	Tamara	business owner
2022-07-10 09:14:05	Gauteng		Yes I do	Coal	Eskom is in to proses of destroying the Country & its people. We have more than 50% unemployment & already Eskom cannot supply continuous Electrical Power supply. We desperately need additional Electrical Power supply to enable Job Creation. Job Creation is impossible without reliable Electrical Power Supply	Willie	business owner
2022-07-10 08:18:41	Gauteng		Yes I do	Coal	There is proof that Eskom is deliberately reducing power supply by simply NOT producing available power. They are spinning the generators at various power plants rather than generating power. They are covering for something by changing the focus from some other form of corruption to load-shedding, as it affects more people. Every time there is some scandal or corruption they start with load-shedding to move the general public focus away from that.	Kobus	business owner
2022-07-10 08:15:46	North West		Yes I do	Coal	Coal is immediately available if all the shenanigans are taken out of the picture. Maintenance must be planned better and infrastructure upgraded. This will take a lot of capital. Illegal connections need to be addressed so the grid can stay stable.	Lettie	business owner
2022-07-10 08:14:10	Western Cape		Yes I do	Coal	The government should have encouraged independent power producers years ago.	jim	business owner
2022-07-10 08:08:08	Gauteng		Yes I do	Coal		Miguel	business owner

2022-07-10 08:07:46	KwaZulu-Natal	Yes I do	Coal	I feel coal is the most immediately available so should be used in the short term to provide the electricity now to help us through this critical problem. In the longer term gas is better but ultimately nuclear should be first choice but this must be small scale reactors run by truly independent producers who have no connection with government and everything possible must be done to stop political interference so no BEE or other such requirements that open up undue influence by the politically connected people must be imposed. As a safety the relevant government appointed departments must oversee and license the operators to ensure safety.	Patrick	business owner
2022-07-10 07:40:32	Gauteng	Yes I do	Coal	Ultimately nuclear is the best solution but in the short term coal would probably be the easiest to implement for base load. Renewables would not solve the base load problem.	David Charles	business owner
2022-07-10 07:38:49	Eastern Cape	Yes I do	Coal		Kelly	business owner
2022-07-10 07:33:15	Gauteng	Yes I do	Coal	Concerning method of electricity... I don't care as long as it's not nuclear, because with our level of standards and maintenance we will have another chernobyl on our hands	Lino	business owner
2022-07-10 07:26:33	Gauteng	Yes I do	Coal		Mirko	business owner
2022-07-10 07:12:20	KwaZulu-Natal	Yes I do	Coal	As a short term solution coal is our best option but going forward nuclear is the most efficient. Having said that, any option that can produce low cost power to the masses is worth investing in. That's where private producers come in, with the market determining the best cost to output ratio.	Brendon	business owner
2022-07-10 05:34:06	Eastern Cape	Yes I do	Coal		Malcolm	business owner
2022-07-10 05:32:10	Gauteng	Yes I do	Coal	Coal as we use to it Or any other Cheap Cost viable long term reliable Solution that can be done*	Mohamed	business owner
2022-07-09 22:33:39	Western Cape	Yes I do	Coal	Coal can be directly used or metaphored to gas or liquid petroleum. Wind and solar cells are not green as is electrical driven cars. The best other option is nuclear, but everything considered historically will be a disaster in existing "capable " hands.	Sakkie	business owner
2022-07-09 22:11:55	Eastern Cape	Yes I do	Coal	Why has it taken so long to get to this point?? The answer is obvious - utterly incompetent governance. The ANC has shown itself to be utterly hopeless at running this country. Cyril has been a massive disappointment and Pravin utterly hopeless. They, along with the rest of their cares should be banned from ever holding such positions again.	Graham	business owner
2022-07-09 21:43:34	KwaZulu-Natal	Yes I do	Coal		Fehaaz	business owner
2022-07-09 20:09:33	Gauteng	Yes I do	Coal		Wonder	business owner
2022-07-09 18:15:50	Mpumalanga	Yes I do	Coal		Dennis	business owner
2022-07-09 17:17:57	Gauteng	Yes I do	Coal	We're a world producer of coal and while there are cleaner resources to use - right now our premier focus should be to privatize the energy sector in SA. The costs of renewable resources would be too great (right now) but with privatization and the efficient usage of money paid for services rendered (shame on you Eskom) would be able to come up with a transitional solution in time. Step 1: Cease providing power to our neighbours - perhaps even request an IMF bailout specifically for our energy industry - this will attract foreign investment Step 2: Privatization of the entire industry	Zander	business owner
2022-07-09 16:43:44	Western Cape	Yes I do	Coal	We already have working coal power stations so we do more of what already works, once we restore permanent electrical supply then we start looking at systematically replacing the existing generation system with Green solution such as wind, solar ext. The main focus should be immediately restoring permanent electrical supply so the economy can function.	BEYERS	business owner
2022-07-09 16:28:09	Gauteng	Yes I do	Coal	Before Eskom became an identity Municipalities would produce their own power source to urban and rural communities within their immediate area. In the past number of years Eskom have closed numerous Power Stations in South Africa and stripped the info structure. There appears that they was a legal reason why Independent Electricity production was not allowed. Eskom became a monopoly.	Ian	business owner
2022-07-09 14:56:27	Gauteng	Yes I do	Coal		Adriaan	business owner
2022-07-09 14:29:39	Gauteng	Yes I do	Coal	We have an abundance of coal and it should be used more efficiently within private power generation. Wind and Solar is also good, but it is unpredictable and does not contribute to base load (what is needed now) Long term Nuclear is the best option for sustainability and great base load need. A mix of Coal, Solar, Wind, Hydro, Nuclear and other like ocean currents will provide resiliency in supply and will promote price efficiency.	Hannes	business owner

2022-07-09 14:28:18	Western Cape		Yes I do	Coal	The short term solution is to provide coal-powered electricity. Long term would be nuclear and fossil fuel. A strategy must be formulated for the short, medium and long terms. Government MUST remove legislation for this to be enabled, now, before it is too late. Clearly, Eskom is dying...	Richard	business owner
2022-07-09 14:11:07	Gauteng		Yes I do	Coal		Fabrice herve	business owner
2022-07-09 11:58:05	Gauteng		Yes I do	Coal	We don't have time for all the other things to get in place ... get rid of all the unnecessary people let De Ruiter het controle fire all the rest and the unions lock up everybody that sabotage the grid . Too much government involvement	Wannie	business owner
2022-07-09 10:25:28	Gauteng		Yes I do	Coal	Use the cheapest form of electricity for now so that we can get our country back on track. Western nations are hypocrites who complain about climate change and then ship their manufacturing overseas to countries that use coal power where it is out of sight, out of mind. We can look at clean energy once our nation is out of crisis and can afford it.	Brad	business owner
2022-07-09 10:17:52	Gauteng		Yes I do	Coal	Hi I'd say let's continue with the coal to produce electricity because we are not importing it and it is found right in the country. That will boost the economy and minimize imports which at this stage is not an option given the state of our economy. We can look into Nuclear and forms of electricity production once the economy is stronger	Siegfried	business owner
2022-07-09 09:05:04	Gauteng		Yes I do	Coal	carry on with the coal, but add solar and wind	Bruce	business owner
2022-07-09 08:55:47	Free State		Yes I do	Coal	For our immediate needs Eskom needs to get the present coal fired power stations running properly , for our long term needs a combination of Nuclear and hydro is needed . The immediate remedy is to prosecute all the thieves who raped Eskom and recover the stolen money	Barry	business owner
2022-07-09 05:42:27	Western Cape		Yes I do	Coal		Vic	business owner
2022-07-09 00:19:31	KwaZulu- Natal		Yes I do	Coal		Pierre	business owner
2022-07-08 21:07:34	Gauteng		Yes I do	Coal	Coal is cheap and abundant. Solutions to transition to renewables can roll out in years to come - but coal is proven and cost-effective now.	Peter	business owner
2022-07-08 21:02:17	Gauteng		Yes I do	Coal	We have huge coal stockpiles. Allow private companies to build and operate power stations in South Africa. Coal still is the best and least expensive way to generate electricity. Keeping all generation only to the dysfunctional Eskom is madness.	Eben	business owner
2022-07-08 20:18:37	Western Cape		Yes I do	Coal	Claims that fossil fuels are responsible for climate change are bogus and not supported by real science. Furthermore, we have abundant coal resources. Unless international institutions are willing to provide grants (note, not funding but grants) to switch to their version of sustainable energy, we should continue pursuing a mix of sustainable energy solutions of which coal should form the back-bone.	Theodore	business owner
2022-07-08 20:08:06	Gauteng		Yes I do	Coal		Willem	business owner
2022-07-08 17:31:41	Gauteng		Yes I do	Coal	sa has lots of coal , so coal would suite the immediate needs , but the power stations would have to be built very fast , like in less than 1 year. long term would be renewables or nuclear	Desmond	business owner
2022-07-08 17:26:57	Western Cape		Yes I do	Coal	We have abundant coal reserves. This should be used for the short term to stabilise electricity production. Once load shedding has ceased we can look to wind and solar power. Generation needs to be taken out of the hands of the incompetent government and privatised.	Michael	business owner
2022-07-08 16:27:42	Gauteng		Yes I do	Coal	We have coal as natural resource. We have technology to explore and extract it We need technology to clean it and ameliorate its poisonous gasses and use them for other means. Invest in RnD to clean coal energy. That is the cheaper n better way to assure energy at affordable cost for ZA.	Bigman	business owner
2022-07-08 15:39:52	Limpopo		Yes I do	Coal	Nuclear would be the best in the long run but for our immediate needs I would say coal run by a private entity that is in no way connected or run by the government.	Neels	business owner
2022-07-08 15:36:45	Gauteng		Yes I do	Coal	Coal should be the cheapest and then Nuclear	Hugo	business owner
2022-07-08 14:55:29	Gauteng		Yes I do	Coal		Craig	business owner
2022-07-08 14:21:19	Gauteng		Yes I do	Coal	The government must privatize power stations, but keep the grid charge privateers a reasonable rate to use the grid, thereby making revenue to pay employees and maintain the grid as well as making investment into the government coffers. The privateers maintain the power stations and charge the power to the users via pre paid power thus everyone insures payment.	Tony	business owner
2022-07-08 13:51:30	Gauteng		Yes I do	Coal	The government needs to get Medupi and Kusile running at 95% urgently. The infrastructure is there but there needs to be political will to hold all contractors to account to make this a reality. With both projects having exceeded budget by multiple times and time spans the same - IT IS TREASONOUS to not hold these company's to account. So too is it treasonous to have union membered Eskom employees sabotaging our electrical infrastructure - they too must face the law.	ANDREW	business owner

2022-07-08 13:30:07	Eastern Cape		Yes I do	Coal	If an Immediate Solution to the Electricity Problem is Not Resolved Soon....We can All EXPECT PANDEMONIUM in this COUNTRY, that is Guaranteed. And the Only Way we can Deal with this ISSUE Immediately is to Go back to COAL, PERIOD. Long Term Strategy should be This: Build More HYDRO/Desalination Plants for Future Electricity Needs, and Clean Drinking Water Needs through Droughts. Upgrade all Old Infrastructures On the Grid and Local Municipalities, GET RID OF ALL USELESS PEOPLE that do Not Belong in Positions they are Not Supposed to be In.... Also HAVE NO MERCY ON CORRUPTED INDIVIDUALS in SEATS of POWER.....FROM the TOP to the BOTTOM, their NEEDS to be RADICAL and IMMEDIATE CHANGES Done in All Areas. Otherwise their Will be Nothing Left to Move Forward with, and we WILL be PLUMMETED into the DARK AGES where its EVERY PERSON for themselves... Is this the FUTURE we Want to Leave Our CHILDREN Because WICKED Individuals have LOOTED this Country to The Extent of COLLAPSE.	Allen	business owner
2022-07-08 13:25:51	Gauteng		Yes I do	Coal	The ANC has proved only one ability in nearly 30 years of government, and that is to take that which once functioned and break it completely. As a developing nation we do not have the luxury of time of money for all the greens beanie nonsense currently espoused by those that cannot do maths or have no appreciation of the basics of power generation. We urgently need cadre free, BEE free procurement of repairs and upgrades to existing power stations. We have well over 50GW of installed capacity, which is more than enough for our current needs. Eliminate stupid BEE coal contracts. Buy power from mines directly. Use conveyors. Fire the staff and eskom and rehire at normalised salary levels and in accordance with international staffing norms. That should see us in good shape.	Stephen	business owner
2022-07-08 13:24:00	Western Cape		Yes I do	Coal	It's either coal or Nuclear so undr the circumstances it's coal.	Gary	business owner
2022-07-08 13:21:29	Mpumal anga		Yes I do	Coal	We have coal. Let's use it for now. Solar and wind are not all that 'clean' either. Nuclear will take years to get started. Our local sugar mill can easily supply our whole town with coal powered electricity but is prevented from doing so by Eskom.	Brand	business owner
2022-07-08 13:12:20	Gauteng		Yes I do	Coal	Coal properly managed, with scrubbers and air cleaning. Coal brought prosperity to the northern hemisphere, carbon emission limits by them now, are at our expense. Obviously we need solar asap and nuclear long term.	Nigel	business owner
2022-07-08 13:12:15	Western Cape		Yes I do	Coal		Elmarie	business owner
2022-07-08 13:06:18	Gauteng		Yes I do	Coal		Vernon	business owner
2022-07-08 12:59:23	Western Cape		Yes I do	Coal	New infrastructure for ANY of the production methods will take a very long time to build so I believe fixing, improving & adding on to the existing coal powered facilities would be the quickest fix.	Brian	business owner
2022-07-08 12:04:48	Gauteng		Yes I do	Coal	Open up for independent power producers, this will allow for competition to reduce electricity prices.	JS	business owner
2022-07-08 11:46:40	Gauteng		Yes I do	Coal		Jamie	business owner
2022-07-08 11:33:05	North West		Yes I do	Coal	The short term solution for SA's electricity problem is to allow properly managed private companies to generate power by means of coal and gas. Solar, wind and hydro generation plants are also easy to put up. However, these are dependent on nature and the power generation is intermittent. The government should support these private enterprises by investing in large water battery schemes like the Steenbras-dam scheme near the Strand. During peak electricity generation hours of the day, excess power must be used to pump large volumes of water from a lower dam to a higher situated dam. When solar / wind generation drops, the water from the upper level dam can generate electricity while flowing back to the lower dam. This will act like a "water battery" and it will help to stabilize the power supply for solar and wind generation. The ultimate will be if we could have more nuclear plants since these are the most stable. These will require proper control to ensure safety.	Adriaan	business owner
2022-07-08 11:26:49	Gauteng		Yes I do	Coal	We have coal, the technology is proven.	Wilbur	business owner
2022-07-08 11:25:59	Western Cape		Yes I do	Coal	Coal is by far still the most economical source of energy in the short term. We have access to the fuel source and the infrastructure to effectively turn it into electricity. This should be our priority to ensure energy security in the short term. Then we can explore alternative sources of energy in the longer term.	Herman	business owner
2022-07-08 11:12:39	Western Cape		Yes I do	Coal	Coal is cheapest and best suited to SA's needs. Allow only free market price mechanisms for any sort of generation. Price competitiveness is the only arbiter. No mandates from government such as BEE, BBBEE, renewable quotas, priority dispatch etc. etc. No subsidies. Government meddling is what got us into this mess - get out - and get out now.	Ken	business owner

2022-07-08 11:11:15	Gauteng		Yes I do	Coal	South Africa has coal in abundance. Stop exports of coal. We need to apply our raw materials and resources for our country's benefit first and foremost. Allow private individuals to go off-grid without penalties being applied for the "privilege" and simplify the process and reduce the cost burden.	Richard	business owner
2022-07-08 10:59:36	Western Cape		Yes I do	Coal	There are many options available. Less politics please	Luc	business owner
2022-07-08 10:58:50	Gauteng		Yes I do	Coal	We have lots of coal and coal fired technology. The only thing stopping new big coal projects is refusal of international banks to fund these projects due their 'green' energy policies. If the private sector were allowed unfettered access to the energy market, we could fund more coal power by private investors who are not restricted by 'green' policies. We cannot afford to adopt first world energy policies when we are so far from energy security and have no fiscal reserves. Gas is the other option, with the best longer term solution being nuclear SMRs.	Ryan	business owner
2022-07-08 10:45:43	Western Cape		Yes I do	Coal	Coal would suit South Africa's immediate needs but other methods are required for long term sustainability like nuclear. Green technology is too expensive and not dependable enough for South Africa. Germany is an example of how wind and solar are not sufficient.	Caroline	business owner
2022-07-08 10:33:59	KwaZulu-Natal		Yes I do	Coal	Coal must be used as the stop gap while other sources are prepared. If RSA has sufficient gas reserves off the east coast that must be exploited and foreign activists must not be allowed to stir up trouble in our country. Nuclear is the cheapest and most efficient energy source. Renewables(?) are intermittent and cannot provide a constant source of energy, energy storage is excessively expensive, the environmental impact of windmills and solar farms is being ignored.	Grgeory	business owner
2022-07-08 10:33:59	KwaZulu-Natal		Yes I do	Coal	Coal must be used as the stop gap while other sources are prepared. If RSA has sufficient gas reserves off the east coast that must be exploited and foreign activists must not be allowed to stir up trouble in our country. Nuclear is the cheapest and most efficient energy source. Renewables(?) are intermittent and cannot provide a constant source of energy, energy storage is excessively expensive, the environmental impact of windmills and solar farms is being ignored.	Grgeory	business owner
2022-07-08 10:33:56	KwaZulu-Natal		Yes I do	Coal	Coal must be used as the stop gap while other sources are prepared. If RSA has sufficient gas reserves off the east coast that must be exploited and foreign activists must not be allowed to stir up trouble in our country. Nuclear is the cheapest and most efficient energy source. Renewables(?) are intermittent and cannot provide a constant source of energy, energy storage is excessively expensive, the environmental impact of windmills and solar farms is being ignored.	Grgeory	business owner
2022-07-08 10:33:51	KwaZulu-Natal		Yes I do	Coal	Coal must be used as the stop gap while other sources are prepared. If RSA has sufficient gas reserves off the east coast that must be exploited and foreign activists must not be allowed to stir up trouble in our country. Nuclear is the cheapest and most efficient energy source. Renewables(?) are intermittent and cannot provide a constant source of energy, energy storage is excessively expensive, the environmental impact of windmills and solar farms is being ignored.	Grgeory	business owner
2022-07-08 10:04:18	KwaZulu-Natal		Yes I do	Coal	Nuclear is probably best, but with BEEE employment, this is not an option as employment is based on cadre deployment and colour, not capability. Solar and wind have to be added asap to help with day time industrial needs. For 24hr supply, we do not enough Hydro energy to convert. Diesel and Gas are far too expensive, and should only be used in emergencies. This leaves coal, which is much simpler than nuclear, but still too complicated for the newly appointed technical staff, after getting rid of the experienced old staff. But it has the biggest chance of success if managed properly again.	Mike	business owner
2022-07-08 10:03:28	KwaZulu-Natal		Yes I do	Coal	Nuclear is probably best, but with BEEE employment, this is not an option as employment is based on cadre deployment and colour, not capability. Solar and wind have to be added asap to help with day time industrial needs. For 24hr supply, we do not enough Hydro energy to convert. Diesel and Gas are far too expensive, and should only be used in emergencies. This leaves coal, which is much simpler than nuclear, but still too complicated for the newly appointed technical staff, after getting rid of the experienced old staff. But it has the biggest chance of success if managed properly again.	Mike	business owner
2022-07-08 10:01:03	Gauteng		Yes I do	Coal	We should upgrade our existing Coal to Cleaner Coal, whilst building Nuclear.	Desiree	business owner
2022-07-08 09:33:35	Western Cape		Yes I do	Coal	Immediate: coal Medium: coal + solar Long: all renewable possible at the price South Africans can pay plus coal if still needed	Elena M	business owner
2022-07-08 09:24:16	Gauteng		Yes I do	Coal	Coal is the immediate solution. We need to activate the trains for coal delivery. Trains need to be privatized so that vandalism and abuse can be stopped. The trucks currently used for coal transport are very counterproductive. They damage roads and are a risk for road users. Give provinces and cities permission to generate their own power. Medium to long-term solutions are - New safer nuclear generation - alternative energy solutions	Reuben	business owner

2022-07-08 09:23:40	Gauteng	Yes I do	Coal	Coal is the immediate solution. We need to activate the trains for coal delivery. Trains need to be privatized so that vandalism and abuse can be stopped. The trucks currently used for coal transport are very counterproductive. They damage roads and are a risk for road users. Give provinces and cities permission to generate their own power. Medium to long-term solutions are - New safer nuclear generation - alternative energy solutions	Reuben	business owner
2022-07-08 09:10:22	Gauteng	Yes I do	Coal	SA has vast reserves of coal, so that should be a first choice.. But Nuclear is also a viable power source. Anything except more renewables (solar & Wind). These have not delivered and do not address the problem of base-load electricity	David	business owner
2022-07-08 07:53:01	KwaZulu-Natal	Yes I do	Coal		Carl	business owner
2022-07-08 07:35:53	KwaZulu-Natal	Yes I do	Coal	Coal is the only feasible immediate solution. Green solutions may be developed later IPP's are essential for South Africa's survival	Mike	business owner
2022-07-08 06:49:41	Gauteng	Yes I do	Coal	We have more than enough coal for our needs, and it's cheaper than other options and readily available. Just need to get rid of cadre deployment and the corruption that goes with it. Climate change is a joke.	Craig	business owner
2022-07-08 05:50:33	Western Cape	Yes I do	Coal	It is best to use coal now as SA has a lot of it. The energy transition that makes the most sense is go from coal and oil to liquified natural gas and then liquified hydrogen powered by Nuclear power. This means no new infra-structure is needed. SA has these resources and needs to go down a path that has reliable energy not unreliable energy such as wind and solar because a base load is still needed and new infra-structure costs will be high. This is inline now with the EU lawmakers who have declared Gas and Nuclear as "green energy"	Charles	business owner
2022-07-08 05:36:23	Gauteng	Yes I do	Coal	As I understand; although our current electricity supply infrastructure is on a brink of collapse the immediate solution would be to utilise as much of this platform as possible. While doing so I would think we should be implementing short-to-medium term plans which would enable further relief to the power grid via (in my opinion) the likes of solar power on a large-scale basis, supported by a household subsidy for the purchase and installation of equipment. A medium-to-long term plan surrounding a strategy to re-establish a productive, sustainable and reliable energy source over the next 10 to 20 years, whether is be solar, water, wind or whatever direction is deemed the best by the South African experts in order to re-stabilise South Africa's energy base. Thank you.	Richard	business owner
2022-07-07 21:30:24	KwaZulu-Natal	Yes I do	Coal		Ewald	business owner
2022-07-07 19:41:12	KwaZulu-Natal	Yes I do	Coal	In a short quick fix, coal plants are easiest to get running. If there is already solar fields put there will to provide, let them assist and provide. Eskom is corrupt, and run by political cadres, idiots and morons, and political patsies from unions. They should all be fired and eskom should have no interference, any Cadre, political institutions or parties or even unions that try to threaten, incite violence and all corruption cleaned out. All should be fired. They useless. They only want to destroy, and have no idea how to actually do the jobs right. Clean house, get well versed people in to sort it all out. Eskom was a highly profitable entity years ago, then anc caderism took over and destroyed it. The entire country should also stop paying taxes until the cANCer is kicked out. They are unable to do the job right without sending in cadres that only destroy as they have no idea how to do anything in the positions they get out in.	David	business owner
2022-09-30 14:21:24	Western Cape	Yes I do	Coal	Allow private companies to resolve electricity supply on their own. Government failed Preventing private enterprise to partake in an area where government failed is not even debatable. Do what is right for the country for once.	Joan	business owner
2022-09-11 15:21:03	Western Cape	Yes I do	Coal	The more power producers, the better. The gvmnt has demonstrated for 20 years that they cannot supply enough power to grow our economy, or just keep the lights on in homes. Coal is unsexy however, if there was a coherent plan to use it now as an emergency power source and phase it out over, say 10 years, I think we should consider it.	Clive	business owner

2022-08-20 09:30:46	Gauteng		Yes I do	Coal	<p>Eskom has proven that they cannot manage the current energy demands of the Country. All existing power stations are reaching the end of the life span, and are in the process of been mothballed or de-commissioned. The new power plants medupi and kusile, have huge capital expenditure, have over run budge by over 400% and where meant to be commissioned in 2014 and 2015 respectively.</p> <p>Eskom needs to allow independent providers to tie into the grid (at an agreed rate), and allow private individuals to sell excess power generated by home energy systems back into the grid, thus aligned with all first world power providers.</p> <p>Furthermore government should look at braking down / removing the unions powers, its proven through history that labour unions cripple the economy.</p> <p>Coal, is in abundance in south africa, the infrastructure already exists in south africa, and should be the only go to solution for the immediate future.</p> <p>Furthermore, Government must stop selling of resources to the cheapest bidder, trains of coal are been exported to china daily from Saldanah and other ports around RSA.</p> <p>Lastly, currant renewable energy proposals are not the optimum clean energy solutions.</p> <p>Countries like America and China must not dictate solutions to green house emissions when they still rely heavily on coal power.</p>	Rory	business owner
2022-08-05 09:29:18	Gauteng		Yes I do	Coal	Coal is still available and need to be used then Nuclear	Hugo	business owner
2022-08-02 14:30:08	KwaZulu-Natal		Yes I do	Coal	Coal is in abundance in South Africa. Contrary to what the globalists say coal does not add to global warming in any meaningful way. We already have the power stations to handle coal, they must be made in 100% operating standards.	John	business owner
2022-08-01 08:12:21	Gauteng		Yes I do	Coal	I believe we should continue to use our coal fired power stations - but we should (and can) control the CO2 emissions. In order for that to become efficient and acceptable to the rest of the world we need to prove to COP that CO2 emissions can indeed be trapped and we then need to allow private enterprise the take over the management of the generation of power, the procurement of coal and the transport of coal and the control of emissions. The most obvious problem is not with coal itself it is with the corrupt and as a result inept management of all aspects of the production of power.	Barry	business owner
2022-08-01 06:13:52	KwaZulu-Natal		Yes I do	Coal	Cheap Easily available Pollution can be controlled	Dennis	business owner
2022-07-30 08:30:18	Outside SA	Zimbabwe	Yes I do	Coal	Refurb existing coal fired plants, using expertise that had previously been laid off. ie experienced artisans and engineers, being paid top dollar. Nuclear for the future is the way forward. Renewables are expensive,storage for solar is a big problem and wind turbines require a lot of coal to be burnt to manufacture the steel,initially. Disposal of expired solar batteries and panels never gets spoken about.	MICHAEL	business owner
2022-07-22 08:25:19	KwaZulu-Natal		Yes I do	Coal		Richard	retired
2022-07-19 16:49:23	Gauteng		Yes I do	Coal	The Climate Change rhetoric is damaging to economic activity. The World does need to move from coal and hydrocarbons increasingly towards renewable sources. But at present only 6% of primary energy is from renewables. 25% is coal, 25% is gas, 25% is oil. Europe has just seen that they have to move back to coal as Russia has cut off their gas supply. Germany and France are unwise to close down nuclear reactors. We should ignore the hysteria and be cool headed and move in the right direction without damaging the World economies.	ian	retired
2022-07-19 12:18:06	Western Cape		Yes I do	Coal	First and foremost we need competent people, not worthless ANC cadres running Government and its Parastatals at the behest of global elites, Secondly we need an urgent independent inquiry into the blatant corruption, with rapid prosecutions. Proper qualified personnel must be employed with public scrutiny. South Africa is a coal rich country so coal power will work best to rectify our base load supply until a viable alternative can be found. As evident in Europe, solar and wind will never be able to provide a stable and essential base load. the climate change, green renewable agenda is a computer modulated pipe dream and a false narrative. Plants can't grow without carbon and nor can soil absorb water. We can however clean up the toxic profit driven, shortcut processes especially in the fuel industries. Finally we need to urgently take charge of our sovereign affairs and exclude the international control agendas and start a maintenance and renewal process with competent citizens.	Chris	retired

2022-07-18 12:29:21	Gauteng	Yes I do	Coal	<p>We have an abundance of coal but the power stations need to be urgently fixed up properly in order to utilise this resource.</p> <p>Experts who were retired need to be re-employed and should be used to pass on their knowledge and skills to the young people. Apprenticeship teaching and mentoring should be a priority.</p> <p>Green energy has many problems and is not really viable at this stage apart from solar power. Solar panels can be privately installed on buildings with a large roof area and on the roofs of homes if people can afford to install the panels. Most of the population do not have the finances to do this and therefore rely on power from an outside source.</p> <p>Municipalities should have control over the power for their area and communities must have a voice in who represents them.</p> <p>Better policing within the power stations and at all power sub-stations must be instituted to prevent criminal activities such as cable theft.</p>	Irene	retired
2022-07-18 11:38:56	Western Cape	Yes I do	Coal	<p>Coal is viable for the immediate power production needs. Supply of coal should be strictly regulated and open to all producers - not just favoured suppliers.</p> <p>IPPs have access to the top engineering brains. Use this knowledge as to how to proceed with development and integration of other sectors in renewable resources, including hydro power production.</p>	Stephne	retired

2022-07-14 10:55:44	Eastern Cape	Yes I do	Coal	<p>We in South Africa have natural minerals and resources. It worked for 100's of years. It is mismanaged through corruption etc. Best alternative in my view is solar, keep it natural. I absolutely scrap the red tape for Independent Power Producers.</p>	stephnie	retired
2022-07-14 10:24:33	Gauteng	Yes I do	Coal	<p>Refurbish existing old coal power stations scheduled to be decommissioned using private investors and install clean energy technology to reduce carbon emissions. Wind and sun not reliable for peak time base load. Hydro good but long building time. Nuclear good but expensive and long time to build</p>	Susan	retired

2022-07-14 08:32:07	KwaZulu-Natal		Yes I do	Coal	The keyword is 'immediate'. Only coal & gas can produce immediate solutions, except for a few solar projects already in progress. The most suited energy production for the not-so-immediate future is integration of Solar, Wind, Hydro and Nuclear, in that order. Smaller power generating sites could be developed by individuals & companies-excluding nuclear off course, and added to the grid. Some factories have waste heat that can be turned into electricity and pumped into the grid. Home solar installations designed to over-produce can also deliver additional electricity to the grid. The cost to connect to the grid needs to be re-assessed. Its about production of electricity and not funding institutions for access to the grid.	Wimpie	retired

2022-07-12 19:05:37	Gauteng		Yes I do	Coal	We have coal available but thd government through corruption and incompetence cannot provide it. Give the private sector the opportunity to do so	Mikkie	retired
2022-07-12 19:05:13	Eastern Cape		Yes I do	Coal	We have to overcome this crisis. We have a "ton of coal" and we must use it in the short term. Eskom need help from government and the npa to root out the bad people, then, whilst other solutions are being sought, we must use what we have.	Michael	retired
2022-07-12 16:31:31	Western Cape		Yes I do	Coal	WE HAVE COAL IN ABUNDANCE FIRST AND FORMOST. SCRAP BEE IN ITS ENTIRETY, BECAUSE THIS IS ONE OF THE VEHICLES THAT HAS ALLOWED THE CORRUPT AND INCOMPETENT ANC TO ROB THE COUNTRY BLIND. FIRE THE FREE LOADERS AT ESKOM AND KEEP THOSE WHO WANT TO WORK, IT WILL BE AN AMAZING OVERNIGHT TRANSFORMATION TO END LOAD SHEDDING. THEN ONLY LOOK AT IMPLEMENTING ALTERNATIVE SOURCES THAT ARE SUSTAINABLE.	John	retired
2022-07-12 15:29:41	Mpumalanga		Yes I do	Coal	Coal is the cheapest option. A power station can be built for the 1st unit on load after 3 years and after that it is possible to commission a unit after 9 months. it was done with Matla and the stations after wards. (not Madupi and Kusile). a proper desulfurisation will ensure that less than 0,1% dust will leave the smoke stacks. Another option is small nuclear plants (Say 100Mw each) in different locations, cities, towns etc. With this option there will be no pollution.	Piet	retired
2022-07-12 14:27:25	Eastern Cape		Yes I do	Coal	Global warming is a money making scam we have millions of tons of coal we should be using	Noel	retired
2022-07-12 13:45:26	Free State		Yes I do	Coal	Wêreld wyd gebruik hul steenkool ondergrondse fosiele verstenings, gas en natuurlike brandstof. Ons volg nou Amerika. Eie bronne toegemaak en verkoop. Nous dit Putin se skuld . Hulle wou hul mense dwing om elektrise motors te koop. Dis net so mal hier. Die Transformers is nie ontwerp om sulke groot ladinge te hanteer nie. Dit veroorsaak die addisionele probleme. Ons moet onafhanklik bly. Moenie op ander lande en instansies sraat maak wat suid afrika kan afpers nie. Ons het genoeg probleme van ons eie. En so by the way aan sekere party, Putin is nie julle uitkoms nie jul sal sleg tweede kom. Lees bietjie Geskiedenis op en ook oorlogsmisdade.	Miemie	retired

2022-07-10 21:39:46	Gauteng		Yes I do	Coal	All red tape that has to do with electricity generation and the sale of electricity should be done away with	Daniel	retired
2022-07-10 21:34:32	Western Cape		Yes I do	Coal	While renewable sources would always be first prize, it is unlikely that we would actually be able to store enough power even if renewable power were created. In theory pumped storage schemes could do this but the cost of construction of storage dams would be slow and very expensive -- and would we have enough water? Thus coal fired power stations of a reasonable size offer us a practical and quick solution to our short term needs. If expansion is planned from the beginning they could be enlarged as more power is needed. They can be constructed reasonably quickly. Ideally they are built near coal sources and fed into the national grid instead of transporting coal to a power station any distance away. Again water supply may well be a problem. Diesel or gas fired power stations are much too expensive for our needs but may supply power in the very short term. The immediate use of solar power from the drier area of South Africa for daytime use in industry would go a long way to providing power where it can do the most good and would not need too much storage although it is likely that industry may be able to provide storage for their own needs. Construction of these places is probably the quickest solution! We should also be looking into ways to use less electricity and eliminating theft of power from the Eskom grid.	Peter	retired

2022-07-10 18:15:26	KwaZulu-Natal	Yes I do	Coal	<p>Ordinarily I would be against coal for the obvious reasons. However the situation pertaining in South Africa is very different to that of established Western Nations. Here we have the massive and steadily growing problem of unemployment to deal with while our growth rate is pitifully low and can't keep up with population growth which means that without further job losses unemployment will still grow. The trouble with massive unemployment such as ours has to be our future ability to govern because there is a tipping point beyond which no country can operate.</p> <p>Therefore it is imperative that we look for the quickest and least costly method to get our economy functioning at a level that attracts outside investment. China, which is far more developed than we are and India's economies still use fossil fuels and we should not be scared to do the same.</p> <p>It is all very well to be ecologically aware, but it should be noted that developed countries in the west have simply shifted their manufacturing to countries using fossil fuels, so where is the great saving in that? They've simply shifted the problem and pretended that they're improving matters by reducing local emissions while increasing emissions in the countries in which they place their orders. Their consumption either remains the same or grows, so I see no need whatsoever to kowtow to their wishes when we have so many urgent problems to attend to on our doorstep. It's simple commonsense to look to the well being of our citizens before we attend to the needs of the rest of the world. Charity after all begins at home.</p>	Charles	retired
2022-07-10 18:12:17	Gauteng	Yes I do	Coal	<p>We have a crisis. Things that need to happen now;</p> <ol style="list-style-type: none"> 1; Remove the ANC government. 2; Tell the green bunnies to get lost. 3; Fire all Eskom workers that went on strike. 4; Allow private energy provider's to supply electricity to the grid. 5; We export our Coal 6; Sasol to sell petrol not linked to the international oil prices immediately 	John	retired

2022-07-10 07:02:32	Gauteng		Yes I do	Coal	We need to still use coal supplemented with wind and solar plus nuclear from Koeberg. We must have a mix. Look at Europe and US. Stopped using coal too quickly and now they have huge problems and are restarting the coal power stations.	Mary	retired
2022-07-10 06:29:54	Gauteng		Yes I do	Coal	Not everybody can afford Solar because it is very expensive and what about the rural area where there is no network because once again we can't afford it. We must stop supplying our energy to our neighboring countries	Joan	retired

2022-07-10 05:53:52	KwaZulu-Natal	Yes I do	Coal	<p>I believe that the urgent contribution from private electricity suppliers is needed.</p> <p>Originally, cities used to generate their own electricity e.g, Durban. When Eskom came along with the countrywide power grid, cities closed their power plants. Essentially, South Africa has now gone full circle back to its roots, from a power point of view.</p> <p>I suggest clean coal technologies, since coal is readily available in SA.</p> <p>Hydropower requires large rivers, and special dam sites - often rare to find.</p> <p>The intermittency and exorbitant price of alternative energy sources, rule them out of the picture.</p> <p>Eskom's real problems reside in the nature of the technology used in the new power stations - European design - pushing technology limits - not practical). SA needs technology solutions that can be maintained by South Africans - they need to be robust, and bullet-proof.</p> <p>By all means fast-track the introduction of private power-generation companies. Let market forces then decide and perhaps place an upper cap on their rates, but, in the main, let their rates be determined by market forces.</p>	Desmond	retired

2022-07-09 16:20:53	Gauteng	Yes I do	Coal		Robert	retired

2022-07-09 16:08:02	Western Cape	Yes I do	Coal	<p>Though not eco friendly coal is SA's main immediate solution for volume of electricity. Alongside this all other avenues must be encouraged and allowed to supply into the national grid but having Eskom manage this process is allowing another failing para-statal to be subsidised for further corruption and social disruption by unions.</p> <p>Local municipalities and authorities should, like City of Cape Town, be allowed to use local infrastructure facilities too supplement the national grid in innovative ways and be allowed to negotiate to the local benefit, e.g. reducing load shedding levels equal to their contribution into the grid. in this manner you encourage other local authorities to step up and be innovative rather than just riding the national wave and doing nothing to contribute.</p> <p>Nuclear power has a bad name and the massive costs and time to production so long that this favours corruption and poor government participation so is of no immediate benefit. I do not think that SA can afford not to consider nuclear power generation in the long term as demand for electricity will just continue to grow and we need to be able to replace coal -based power in the long term.</p> <p>We have massive coal reserves and cannot afford to forego these as this is also the cheapest option in an economy that is slowing down and is hemorrhaging cash due to poor government policy making, inefficiency and corruption.</p> <p>Wind and other eco-friendly forms of electricity are necessary to fill the gap but may not be as cheap as we are made to believe. It may be cheap enough at the point of generation but comes with high downstream costs for distribution and if fed into the Eskom national grid will leak cash and be handled inefficiently. These inefficiencies must be handled long-term but for now we need every "hand to the plow" to ensure businesses can continue to operate and homes can continue to function.</p> <p>Any new projects will take years to come on stream so coal remains our immediate answer but Eskom must be taken in hand or else we will have another SAA on our hands that is running as a skeleton of its former self and only to shut the unions up who so easily call for social action and further disruption and sabotage.</p> <p>Wake up government and smell the "pollution" that you have created and fostered with your crony, cadre appointments. the country cannot afford to run as a day care centre, where the increasing unemployed numbers are sucking the "golden egg" dry. Local investment is drying up and foreign investment is leaving and too little is being replaced due to poor economic forecasts by international agencies that frighten any interest in SA away.</p> <p>Every means at hand must be roped in and used and the government and Eskom must wake up to how they can facilitate as many private sector providers and local and provincial providers contributing into the grid, rather than refusing to allow law making that encourages this means of participation. when the president encourages private sector participation yet does not facilitate the legal environment for it to happen, then one must question what his real intentions are or whether the government vision of a baby-sitting welfare state has so blinded them to the realities of its failure. A Biblical verse states that the eating of something may be sweet in the mouth but ends up being bitter in the stomach. So much of government policy may sound sweet to the population but at end of day government has shown that their policies and service delivery lead to bitterness in the stomach through failure to be effective or that the government solutions are altogether the wrong medicine for that which ails the country.</p> <p>None so blind as those who will not see.</p>	Scott	retired
2022-07-09 16:04:00	KwaZulu- Natal	Yes I do	Coal	<p>Eskom is not managing to supply the country with power, so please let independant power producers provide our power.</p>	Susan	retired
2022-07-09 15:42:32	Western Cape	Yes I do	Coal	<p>SA is geared for coal. We must not allow ourselves to be bullied by the Western or First World Nations to go renewable (green). Global warming is a lie. Privatization of the existing generation fleet to either the French, Chinese or whoever provides the best and most cost effective solution to our power generation woes.</p> <p>Coal is essential for our 'base load' power requirements. We cannot run this country on renewable energy as it's an unreliable source.</p> <p>Build two more nuclear power plants and upgrade Koeberg to compliment our coal fleet for the reliable base load power generation.</p>	Byron	retired
2022-07-09 15:05:47	Mpumal anga	Yes I do	Coal	<p>We need to STOP exporting our coal to other countries. We also need to put "green energy" on the back burner until such time as our electricity supply is stable and sustainable.</p>	Danielle	retired
2022-07-09 13:34:04	Gauteng	Yes I do	Coal	<p>To my knowledge some of the coal powered capacity is not used or shut down for environment reason</p> <p>As much as I appreciate environmental concerns what we need right now is power, so I feel they should use those non-compliant coal power station capacity as I am sure the emergency use of paraffin etc. will cause more short term pollution then the non compliant coal stations. Ask Andre De ruitter which stations those are which could establish how quickly these abandoned or partially used units could add power to power strained grid</p> <p>Use solar to add immediate additional capacity as it can be used incrementally as it is build. Try and use Hydrogen to run Eskom's diesel generator's as that would save substantial vilumes of Diesel which is needed elsewhere</p> <p>Christoph Reiser</p>	Christoph	retired

2022-07-09 13:08:40	Gauteng		Yes I do	Coal		Charl	retired
2022-07-09 12:23:23	KwaZulu-Natal		Yes I do	Coal	We have abundant coal. We are not a problem with regard to global warming. Get our coal fired stations working properly by sorting out the various saboteurs. Other methods eg large scale solar and wind produce a far greater waste problem. Dishonest politicians and unqualified cadre deployees are the problem. Give de Ruyter the teeth he needs to do the job he obviously knows how to do.	Barbara	retired
2022-07-09 11:34:58	Western Cape		Yes I do	Coal	coal is immediately available--as it is an emergency,the "going green" must stand aside for now. Hydro can be useful in the western cape. Nuclear in the long run,but SA must find a permanent storage for N-waste.	Duncan	retired
2022-07-09 10:55:50	KwaZulu-Natal		Yes I do	Coal	We would be foolish to hamstring our economic development for compliance with global hysteria about fossil fuels.Not for generations will wind or sun provide sufficient immediate energy for any national economy in modernity. Coal is plentiful and cheap and can be more responsibly mined and combusted. However, released in private generation from union and centrist govt restraints could also harness other complementary processes. Certainly businesses and communities should be allowed other options than an unwieldy and inefficient parastatal monopoly.	Mathew	retired
2022-07-09 10:52:35	Western Cape		Yes I do	Coal	All methods of generating electricity must be used in the short term to get reliable electricity to the country. The economy is coming to a standstill which will impoverish our country. Communities who help themselves to free electricity need to be held accountable as well. We all need to pay a reasonable fee for uninterrupted electricity.	Jennifer	retired
2022-07-09 10:43:35	Western Cape		Yes I do	Coal		D	retired
2022-07-09 09:49:18	Western Cape		Yes I do	Coal	Coal is the immediate answer, supplemented by solar, but with hydrogen introduced a s a p, and down the line, nuclear must be in the mix(but not anything to do with criminal, Jacob Zuma and his family, or with the Russians). And, of course, there needs to be a change(asap) of Govt, towards the DA and / or Responsible Coalitions! And for Gwede Mantashe to be stepped-aside a s a p.	philip	retired
2022-07-09 09:32:12	Gauteng		Yes I do	Coal	Use coal just to get electricity while developing other methods Wind power cannot be stored and on windless days windmills are useless	Joyce	retired

2022-07-09 09:26:29	Gauteng		Yes I do	Coal	As a matter of urgency, let Independent Power Producers use any means to generate power to allow South Africa to deal with the electricity crisis.	Malcolm	retired
2022-07-09 08:58:01	Eastern Cape		Yes I do	Coal		Bruce	retired
2022-07-09 08:52:27	Western Cape		Yes I do	Coal		Willem	retired
2022-07-09 08:51:26	Gauteng		Yes I do	Coal	Don't pump money into new sources. FIX the existing ones, create jobs by stabilizing mining, (get rid of Gwede Mantashe). Get rid of 50% of Eskom staff, you would still have employed enough cadre's even if you do this! Employ competent people who will take pride in their work and therefore keep things running.	Doris	retired
2022-07-09 08:20:24	Limpopo		Yes I do	Coal	As we are having Loadsheddings , it seems the Government have no solution in this regard	Lesiba	retired
2022-07-09 08:12:13	Western Cape		Yes I do	Coal	Nuclear is the long term solution. In the interim, our vast investment in coal need to be used effectively. My suggestion is to sell off the "unwanted, dirty and unreliable" coal stations to a private consortium, that will be allowed to run those plants efficiently. This means having a new independent, private company, with no Government interference, allowing the new management to get rid of all the incompetent BEE staff, their corruption and their inability to make plans.	Charl	retired
2022-07-09 08:10:04	Eastern Cape		Yes I do	Coal	All this carbon footprint jargon is a mith from globalist elites. GOD provided us with natural elements in the ground for man's benefit. The SA government has a primary responsibility to protect both the people and the environment of SA from all the plots of evil foreign persons, and to be honest and sincere about it.	Leigh	retired
2022-07-09 07:43:49	Gauteng		Yes I do	Coal		Wynand	retired
2022-07-09 07:37:26	Western Cape		Yes I do	Coal	We have an abundance of coal and generators that don't work. Fix them. Renewable solar, wind and hydro would be next best options.	Rosana	retired
2022-07-09 07:23:52	Gauteng		Yes I do	Coal	These rolling blackouts are destroying SA's economy! We need a combination of electricity production methods and we need independent power producers because government is incredibly inefficient and corrupt. Gwede Mantashe's recent comments about electricity being a luxury prove that our country is governed by ANC dinosaurs who need to GO before they completely destroy the beloved country. It is time for younger leaders with integrity to lead SA in this century.	Kondilia	retired
2022-07-09 07:05:06	KwaZulu-Natal		Yes I do	Coal	It is time that Eskom has a competitor. We need to stop the collapse of this country. Instead of exporting our coal we should use it to stabilise our country first. The corrupt government needs to go.	Vincent	retired

2022-07-09 05:30:01	KwaZulu- Natal		Yes I do	Coal	We have coal in abundance. Whilst there is pressure to stop coal-fired generators, other forms of electricity can be used by those who don't have coal. Once the gas-field are exploited then augment generation with gas turbines. In the longer term, Nuclear is the next best. Wind and solar have major limitations	Errol	retired
2022-07-08 22:41:38	KwaZulu- Natal		Yes I do	Coal	Easiest to implement for immediate improvement, whilst cleaner options are explored and developed tor long term	Terry	retired
2022-07-08 22:28:23	Free State		Yes I do	Coal	I believe we have sufficient reserves of coal to supply electricity for the whole of RSA. I do NOT support becoming reliant on other countries to obtain raw materials for electricity generation, as this would place RSA in a situation where we would be at the mercy of the external countries. I believe the nuclear option would also be viable in the longer term.	Denis Patrick	retired
2022-07-08 22:00:19	Gauteng		Yes I do	Coal		Michael	retired
2022-07-08 21:55:40	KwaZulu- Natal		Yes I do	Coal	We have abundant coal already, so long as its use is not sabotaged. Gas would be fastest to implement - start fracking also. Nuclear takes longer to develop, but small modular reactors (e.g. by Rolls Royce) are cheaper and quicker to build and can be placed near all the coastal metros and perhaps integrated with desalination processes to supplement fresh water supplies.	Richard	retired
2022-07-08 21:47:57	Western Cape		Yes I do	Coal	We need to utilise the available energy sources we have and we have an abundance of cheap coal. The latest generating stations can cut down on most pollution using the latest scrubber technology. We must not be held to ransom by a bunch of idealized climate zealots from european and american nations pushing an unproven theory and therefore depriving our population of cheap power.	Harry	retired
2022-07-08 20:45:50	KwaZulu- Natal		Yes I do	Coal	To fix the present plant will be the quickest	Fred	retired
2022-07-08 20:41:34	KwaZulu- Natal		Yes I do	Coal		Raoul	retired
2022-07-08 20:31:14	Western Cape		Yes I do	Coal	For immediate relief - and in order to boost Industry and the Economy in general - Coal is unfortunately probably the short term solution. But at the same time - and for medium and long term - alternatives like Wind, Solar and even Nuclear should be prioritised.	Johan	retired
2022-07-08 20:23:47	Eastern Cape		Yes I do	Coal		Vaughn	retired
2022-07-08 20:02:53	KwaZulu- Natal		Yes I do	Coal		Lorna	retired
2022-07-08 20:00:42	Western Cape		Yes I do	Coal	For immediate production, coal fired plants are to be preferred given the possibility for fast building such plants. For the longer term, nuclear is my preference. The Koeberg plant (nuclear) is THE most reliable plant at present. Uranium can be stockpiled easily, so supply shocks can be buffered for. The only disadvantage on the short term is the long construction time for a nuclear power plant. (5 years) Coal : SA has an abundance of coal, so SA is independent from foreign import. But for immediate results : only a mere 50% (!) of installed capacity is "online" because of breakdowns (read : sabotage) and maintenance works. THERE is a big opportunity to get things going, and fast. It is more than time to kick out incompetent and/or corrupt people at ESKOM.	Hendrik	retired
2022-07-08 19:13:10	Gauteng		Yes I do	Coal	Wind and Solar is unreliable and also expensive. The future is nuclear where modern nuclear plants are more efficient and much safer than older plants. Fusion reactors would be the game changer if it can be achieved. For now we have enough coal so it is the only viable way for the short term.	Keith	retired
2022-07-08 19:06:19	Gauteng		Yes I do	Coal	The fourth highest paid workers of Eskom is not working for it. the only way to wake them up is by competition. Get independent electricity suppliers on board. Create a price war that will push prices down, and will at the same time get rid of the dead wood Eskom workers. The legislation is overdue to be changed. These Eskom workers are paid under Government protection! REMOVE that. I have a small Solar Power system at home. I do not use all the electricity that the sun create. I have a prepaid meter that prevents me from supplying the excess electricity to Eskom - as a matter of fact I am charged to supply the excess to Eskom should I do so! Now I rather through the excess electricity away. The Carbon Emission story worldwide is fake. We need carbon in the air so that in combination with lightning and water it creates the correct substances for plants and food plants to grow properly. As long as our president is under control of Klaus Schwab and his World Economic Forum, nothing is going to happen about The Fake Green Carbon Story. Start by educating people properly through a working media. We should keep on using Coal as our main electricity supply. We export our Coal via Richards Bay to Japan and other countries. Stop that.	Kobus	retired

2022-07-08 19:02:58	Gauteng		Yes I do	Coal	As i have said on many occasions if the government supported the house holders with solar panels, being able to pay them of monthly at a minimal rate. The councils would still have a revenue and give the government a greater chance to get there power in order and need less off it, this would also open job opportunity for the placing of the panels and services, a small businesses could go around replacing batteries when needed. I agree with private power suppliers if they can get the prices down and it would go a long way to overcome or present position, the price is the problem, can they get it down so that customers can afford it monthly.	Cliff	retired
2022-07-08 18:35:36	KwaZulu-Natal		Yes I do	Coal	Eskom is just another example of the ANCs thieving policy - Zuma, Molefe and their pals of which none are in jail. Coal is the short term answer to our problems as we don't have to import it. We won't get the ANC off it's arses to do anything, so maybe a power revolution is necessary. Can anyone tell me of any ANC department is mildly successful?	Keith	retired
2022-07-08 18:34:54	KwaZulu-Natal		Yes I do	Coal	We gave an abundance of coal, so banks like Standard which say they will not fund new coal enterprises are wrong footing themselves for two reasons: it makes sense to exploit natural resources and in so doing to address the unemployment dilemma we face. Solar panels and wind turbines don't create employment. Besides they are mostly manufactured in China. But beyond coal, we should be developing nuclear energy sources. They are safe and disposal of waste is neither harmful nor requiring any extent of land. The recent decision of the EU to recognise nuclear and gas as "green" sources exposes the nonsense that is being disseminated about Climate change by the likes of Greta Thunberg, John Kerry and the Biden regime.	DUNCAN	retired
2022-07-08 18:32:41	Western Cape		Yes I do	Coal	Drill for oil, burn coal, use Gass, stop the madness of the woke climate madness, make South Africa energy independent, using all the natural GOD given resources, this will arrest price inflation please.	Warren	retired

2022-07-08 17:57:44	Western Cape		Yes I do	Coal	I am not an energy expert and not able to express a qualified opinion on which energy sources should be utilized to best effect in the present crisis Common sense , however , dictates that coal is the best option for South Africa but that all options must be considered under the present circum-stances and every legal obstacle thereto removed . For a more comprehensive response I refer you to the comments by Allen and Michael which I fully endorse .	Nelson	retired
2022-07-08 17:53:01	Gauteng		Yes I do	Coal	We are still rich with coal deposits that can last for over 100 years. Gas and diesel can be made from coal. All that is needed is good smoke filters / extractors and think of the many job's that can be kept and generated. Solar and wind can be secondary. House roofs should be designed with solar panels.	Bill	retired
2022-07-08 17:45:56	Western Cape		Yes I do	Coal		Kerry	retired
2022-07-08 17:13:54	Gauteng		Yes I do	Coal	we already have this power stations start them up again. Until we have a workable alternative	Albert	retired
2022-07-08 17:07:41	Western Cape		Yes I do	Coal	We have tremendous resources of coal in our country and it is daft not to use it fully despite whatever the greenies shout for. I cannot support them because they have completely lost the plot>	Pieter	retired
2022-07-08 16:51:34	Gauteng		Yes I do	Coal	SA still sits with very large coal reserves and it should be utilized to its full potential.The gas emmissions vis-a-vi the world carbon footprint is negligible and should be ignored.Coal is still the cheapest source to supply not only electric power but fuel as well.Why borrow if one has the resources available.It is also high time that neighbouring countries start producing more energy for the SOUTHERN AFRICAN region.BOTSWANA sits on a mountain of first grade coal SA is being misused.Let every country become self contained.THIS IS NEIGHBOURLINES NOT SPONGING TO THE DETRIMENT OF SA	JAN	retired
2022-07-08 16:47:46	Western Cape		Yes I do	Coal	We have huge reserves of coal available to power generators and we have a shortage of jobs for our workers. Surely using coal will address both the lack of generating capacity and joblessness. Also, we need to understand that the workforce that is presently employed by Eskom is not up to the job and the government should engage overseas, experienced and knowledgeable companies to rectify the many problems that are hampering the repairs and commissioning of power stations. They should also accept without quibble any private suppliers onto the grid as quickly as possible.	Trevor Lewis	retired
2022-07-08 16:30:21	KwaZulu-Natal		Yes I do	Coal	The most effective and productive options are coal / nuclear	Barbara	retired
2022-07-08 16:25:45	Gauteng		Yes I do	Coal	Use coal till SA is better equipped to use solar etc. Stick to what we know until we've got this crisis under control	Cam	retired
2022-07-08 16:23:22	Mpumalanga		Yes I do	Coal	It is already available in great amounts. The workforce of Eskom must be regulated and a serious effort must be implemented to stop the looting of assets. For the future any private company that can deliver power must be allowed to enter and compete in the power market. The source can be of any kind like solar, wind, hidro, nuclear to gradually replacing coal plants completely	Daniel	retired

2022-07-08 16:21:20	Western Cape		Yes I do	Coal	We will have to continue with coal until such time options for another source can be implimented to replace it. Our country is rich in coal for many years to come. To keep Eskom running it is essential that maintenance should be first priority, which was not the case up to now. No ongoing maintenance means trouble and that is what we experience now.	Willie	retired
2022-07-08 16:07:25	KwaZulu- Natal		Yes I do	Coal		Tom	retired
2022-07-08 15:59:58	Western Cape		Yes I do	Coal	We have plenty of God-given coal which works well for making electricity - unless tampered with, as has happened. The carbon released is essential for the growth of plants and trees which are needed by humans to support life. The Eskom power plants which are outdated, can be rebuilt and new ones built for the growing demand. In addition additional nuclear plants can be built to supplement Koeberg. Meanwhile allow all businesses and individuals to produce solar power for own use and donate unused power to the Eskom grid. This will help solve the problem while new power plants are being constructed - which can take several years.	Leonora	retired
2022-07-08 15:55:12	Limpopo		Yes I do	Coal	Proper management (repair, protect and reduction of wage bill) of existing defunct power stations will be the quickest way around the problem	Hoffie	retired

2022-07-08 14:56:15	Western Cape		Yes I do	Coal	I think coal and nuclear would get us out the current situation, however we must not allow the ANC anywhere near it as a BEE project as they will just steal and place their cadres in to ruin it.	Michael	retired
2022-07-08 14:33:18	Western Cape		Yes I do	Coal	Nuclear power generation would have been the answer for South African conditions.... But we can not even CONSIDER that with the poor workforce we have in this country ...let alone the incompetent government.. That is why I stick to coal , solar or wind,,	dries	retired
2022-07-08 14:22:32	Limpopo		Yes I do	Coal	Although I support the use of coal to suit South Africa's immediate needs, I firmly believe that the future lies in nuclear power in the form of pebble bed reactors. It is fascinating to read that nuclear power is the safest, most efficient, and in the long term, the cheapest form of electricity. Why are we ignoring the science?!	Sally	retired
2022-07-08 14:18:46	KwaZulu- Natal		Yes I do	Coal	South Africans does not have mandated feed-in tarrifs for all. The city of Cape Town introduced them. Speed this process up.	Herman	retired
2022-07-08 14:14:20	Gauteng		Yes I do	Coal	Nog beter sal wees om Eskom te privatiseer. Dis al hoe 'n dom, onkundige en korrupte regering se invloed beëindig sal word en korrupsie, sabotasie en stakings hok geslaan sal word en konstante krag aan die land gelewer sal kan word.	Dr Pieter	retired
2022-07-08 13:59:16	Gauteng		Yes I do	Coal		Di	retired

2022-07-08 13:59:07	Eastern Cape		Yes I do	Coal	It is extremely naive to assume that a rapid transition to renewables is the answer to the world's climate woes. The expense involved is far too great for poorer countries, and even first world countries. We already have huge problems with Eskom, and the ANC, lack of adequate funding due to rabid corruption, a small proportion of the population staggering under the absurdly heavy tax burden foisted upon them, and so proposing a very expensive transition is only pushed by those who are out of touch with reality, especially the reality of the average person trying to make a living. Besides, we are indeed experiencing climate warming, but not largely due to human intervention.	Rob	retired
2022-07-08 13:51:57	KwaZulu- Natal		Yes I do	Coal	South Africa must use what it can especially with its natural resources e.g. coal, solar, wind. Nuclear is good, clean energy. All systems must be properly managed, operated and maintained. Government should play a lesser role.	Patrick	retired
2022-07-08 13:40:07	Western Cape		Yes I do	Coal	I don't like coal but we have it in abundance and we were always geared for it in our power generation; that was until the mob started their manipulations. The whole industry needs to be privatised and all the rats that are currently involved in Eskom to be totally excluded. There is a strong "rumour" that the current supply chaos is manipulated in favour of a " Rainbow Power Supply Co" coming into being. It would naturally include many of the present hoods in government and their cronies. If this happens they will out-perform Eskom in criminal activity. One only needs to examine the salary structures and benefits of Eskom personnel to see why it is bankrupt and under the supervision of unqualified thugs.	Lowe	retired
2022-07-08 13:38:24	Gauteng		Yes I do	Coal	Hell yes, sick of the incompetence.	Hendrik	retired
2022-07-08 13:27:16	Gauteng		Yes I do	Coal	Solar does not suit the whole country, in the Cape it would probably be nuclear. Where there are established coal power stations use coal. Diversify but privatise. We need electricity to generate industry. Eskom has virtually destroyed the economy and mr. De Ruyter gets sabotaged at every opportunity if he tries to stop it.	Casper	retired
2022-07-08 13:07:28	Gauteng		Yes I do	Coal	We have coal, we should be using it. For the medium term, nuclear, run by competent service providers (not a cadre based organization), should be considered. We should consider independent service providers whose objective is power delivery, not political manoeuvring.	Craig	retired
2022-07-08 12:53:31	KwaZulu- Natal		Yes I do	Coal	We have massive coal reserves SA contributes peanuts via carbon emissions compared to 1st world Use coal for 20 years whilst economic alternatives found Eskom barely knows how to use even coal, so let private businesses free to develop cleaner use and reduce costs Privatise Eskom in full	john	retired
2022-07-08 12:40:32	Western Cape		Yes I do	Coal	I only chose coal because it seemed to be the most obvious. I do not have enough knowledge to give an educated answer.	beefy	retired
2022-07-08 12:21:48	Eastern Cape		Yes I do	Coal	Coal in the Southern Hemisphere is the cheapest and easiest to mine because it is usually close to the surface and open cast mines are the cheapest to rehabilitate. While using this coal as an energy source to produce electricity we leave a large carbon foot print!!! We also pollute the air with various SoX's and NoX's which I believe we could use SCRUBBERS to extract leaving us with other useful chemicals. These extraction practices will cost the end user a bit more, however the benefits of using a cheaper and otherwise nearly worthless resource should be researched properly!!	Brian	retired
2022-07-08 12:10:41	KwaZulu- Natal		Yes I do	Coal	Use any means possible to generate power.	Chris	retired
2022-07-08 12:01:03	Western Cape		Yes I do	Coal	Coal abundant and proper Nuclear in the long run	Russell	retired
2022-07-08 11:38:13	Gauteng		Yes I do	Coal	For now and for immediate need coal would be the more suitable choice, but without corruption and the current legislation. For future, which should already be commencing and implemented, solar, hydro and wind energy are the easier options. Wave/swell/tidal energy might be more complex.	Daniel	retired
2022-07-08 11:29:58	KwaZulu- Natal		Yes I do	Coal		Clifford	retired
2022-07-08 11:28:45	KwaZulu- Natal		Yes I do	Coal		Muriel	retired
2022-07-08 11:28:11	Gauteng		Yes I do	Coal	All forms of power generation should be utilized. Get the power grid working and then diversify as far as possible	Rob	retired
2022-07-08 11:27:26	Western Cape		Yes I do	Coal	We have abundant coal supplies that can be used to help us in the short term supply of power, then increase wind and solar and nuclear energy to get rid of coal.	Thys	retired
2022-07-08 11:20:48	Western Cape		Yes I do	Coal	Keep coal generation going it doesn't do anything to harm the atmosphere the Greens are just pushing their own agenda. Allow independent producers to go ahead and scrap all legislation controlling the production of power. Allow independent generators to compete with each other do not legislate them out of the way. Our dictatorial type of government has no chance of getting this right also I am not convinced that many of them are intelligent enough to do it. Let independent producers compete. Nuclear is the answer but we don't have the money.	Peter	retired
2022-07-08 11:18:35	Gauteng		Yes I do	Coal	Coal for immediate..solar would be better though. Also to consider the price.. power is expensive at the moment	Linda	retired

2022-07-08 11:16:48	Gauteng		Yes I do	Coal	It is the most cost effective solution for an industry that must be stimulated to grow back to what it was before the ANC destroyed it. We have an abundance of coal (what is left after the rest being exported to China anyway) . We cannot follow first world trends who are just looking for markets to sell their new technologies to.	Willie	retired
2022-07-08 11:13:16	KwaZulu-Natal		Yes I do	Coal	I have selected coal because it is there and would solve our immediate problems. Solar would be first prize but would take time to install and also very expensive. Having said coal we would still have to solve all the maintenance problems and remove all the fat cats running Eskom at the moment. That is why independent electrical producers would be best.	Garth	retired
2022-07-08 11:13:07	Western Cape		Yes I do	Coal	Coal and nuclear are the only possible solutions for South African electricity needs. The generation of electricity should be taken out of government hands as I have messed up everything they have touched so far. Apartheid was awful and unjust but everything worked because we had talented people who have now left the country mostly. We need to privatise coal or nuclear.	Peter	retired
2022-07-08 11:05:07	Western Cape		Yes I do	Coal	Nuclear is the obvious answer for South African power, but I'm not sure we have intelligent enough people to run the show so I would go for coal-fired generators and scrub the smoke. The green people of God are totally wrong we actually need much more carbon dioxide in the atmosphere for all plants depend on it for life and we only have about 50% of what we should have. If we go nuclear we have some very deep and used mines to store the radioactive leftover. Coal or nuclear is the obvious answer to South African generating needs. Wind and sun generation is a total dead loss and no country has been able to make it work.	Peter	retired
2022-07-08 10:58:28	Gauteng		Yes I do	Coal	Fix the immediate problem first and then look to replacing the "quick fix" with greener methods. We need power now, and coal is still unfortunately the most efficient way to do that.	Andre	retired
2022-07-08 10:51:45	Gauteng		Yes I do	Coal	All other methods are long term plans. Halt providing electricity externally, until we can fix the mess in our own country. Eskom should privatize immediately to blazes with the cadres.	Louis Michel	retired
2022-07-08 10:46:33	Gauteng		Yes I do	Coal	Immediate fixes require immediate resources. Nuclear, renewables etc are longer-term solutions. The need is to fix existing power stations, supplemented by whatever private sources are available	Andre	retired
2022-07-08 10:46:31	Gauteng		Yes I do	Coal	Immediate fixes require immediate resources. Nuclear, renewables etc are longer-term solutions. The need is to fix existing power stations, supplemented by whatever private sources are available	Andre	retired
2022-07-08 10:41:48	KwaZulu-Natal		Yes I do	Coal	This is a government produced situation due to a lot of factors where one is the deliberate failure of Eskom to suit their agenda and that of their handlers. This could be corrected in a short period of time if government allowed it, but it is not in some in governments best interest to do so. This is what you can expect when you put toddlers in charge of a government, a total defunct country on the verge of total collapse.	johan	retired
2022-07-08 10:40:38	Eastern Cape		Yes I do	Coal	Coal is produced in South Africa. The capital cost of generation capacity is much less than alternative sources and in private hands could be be implemented fairly quickly.	Geoffrey	retired
2022-07-08 10:38:06	Gauteng		Yes I do	Coal	I am totally against the importation of electricity by any means (e.g. generator ships from Turkey, diesel due to cost of crude oil, etc) as these solutions will drastically increase the cost of electricity due to the deterioration of the value of the rand. I am also against the use of nuclear power because of the skills shortage in our country created by the flight of skills to other countries due to the mismanagement of electricity and crime in South Africa. This would therefore require us to import expensive skills at a premium. Furthermore, the ongoing publicly announced sabotage and theft in power stations will expose us to potential nuclear fallout which would render vast areas of our country uninhabitable for decades (or even centuries).	Steve	retired
2022-07-08 10:33:11	KwaZulu-Natal		Yes I do	Coal	Get rid of the corruption in the government and employ the proper educated and trained staff that can do the job, or otherwise let private industry take over the total system of generating electricity for SA.	kevin	retired
2022-07-08 10:30:12	KwaZulu-Natal		Yes I do	Coal		Alexander	retired
2022-07-08 10:28:27	Gauteng		Yes I do	Coal	Coal would be cheapest due to availability and being a proven energy resource. Fluidized Bed Combustion (FBC) should be used rather than pulverised coal combustion. FBC is cleaner and can burn poorer quality coals. Underground coal gasification (UCG) was proven as a potential technology in the Majuba coal area. This could also be considered as a generating energy source. Renewables, wind and sun, are not reliable and has been proven to be to expensive. South Africa does not have sufficient proven gas reserves to be considered as an energy source. Imported gas and diesel would be to expensive.	Johan	retired
2022-07-08 10:27:59	Limpopo		Yes I do	Coal		AnnaMarie	retired
2022-07-08 10:21:51	Gauteng		Yes I do	Coal	I think that all red tape should be abolished that all available energy sources should be used so that cheap affordable energy resources should be used as emergency measures Once we have a constant supply only the can we move on to reducing carbon load	fred	retired
2022-07-08 10:17:55	Gauteng		Yes I do	Coal		nadena	retired
2022-07-08 09:58:55	KwaZulu-Natal		Yes I do	Coal		Jan	retired

2022-07-08 09:54:18	Gauteng		Yes I do	Coal	Coal remains the most RELIABLE source of energy for power generation SA Power stations were clean before falling into the hands of ANC and the Gupta's. Biggest money scam in the country to date. Solar is not a total solution. Tide me over relieve pressure. Clean - no, batteries for storage are hazardous waste, Solar panels are polluting as they cannot be recycled at any level. Far to much land area required which renders that agric land useless un u useable for ever. Nuclear is any thing but clean. Nuclear waste disposal!!!!!!!!!!!!!! and so on.	Edgar	retired
2022-07-08 09:47:39	Western Cape		Yes I do	Coal	We have all these power stations specially built near to existing coal fields that should all be revamped drastically and without govt interference. Privates and companies should be allowed to generate their own power as well. Power to the people! Governments and other entities are wrapping us up in red tape and debilitating us and the economy for their own purposes and not for the good of we the people . FREEDOM!	AM	retired
2022-07-08 09:39:14	Gauteng		Yes I do	Coal	Nuclear is the longer-term solution, but would take much longer to implement. It also needs to be procured from an entity with a good safety & reliability track record, e.g. France, and not through corrupt dealings with Russia. Our coal-fired power stations were deliberately built near sources of good quality coal for efficiency, but corrupt individuals have infiltrated the supply chain, resulting in higher-cost poor-quality coal being trucked vast distances. Coupled with deliberate sabotage and incompetent cadre appointees forcing out the knowledgeable staff, it is unsurprising that we suffer the mess. That needs to be fixed urgently, and restoring the existing power stations to service is more likely to be done quicker and more cheaply than installing new power stations of any kind. Meanwhile it is vital to enable private entities to contribute according to the technologies they can bring to bear, with thermal solar being a good option. It should also be made easier for ordinary citizens to install solar power on their premises, alleviating the load on the grid.	Chris	retired
2022-07-08 09:29:37	Gauteng		Yes I do	Coal		Sheldon	retired
2022-07-08 09:15:27	KwaZulu- Natal		Yes I do	Coal	The immediate needs could be serviced by sorting out the sabotage at existing power stations and bringing in qualified people to fix whatever's broken and train staff properly. Medium term needs can be served from private solar and wind generation and long term should be nuclear.	John	retired
2022-07-08 09:14:54	KwaZulu- Natal		Yes I do	Coal	The immediate needs could be serviced by sorting out the sabotage at existing power stations and bringing in qualified people to fix whatever's broken and train staff properly. Medium term needs can be served from private solar and wind generation and long term should be nuclear.	John	retired
2022-07-08 08:54:50	Gauteng		Yes I do	Coal	I have a very strong feeling that pushing for "green" is a method of taxation, and it's coming. Carbon tax is on its way. There are many ways we can pull down CO2s. We have an abundance of coal in South Africa, use it. The cleanest and most productive electricity production is nuclear. Sincerely John	John	retired
2022-07-08 08:37:51	Eastern Cape		Yes I do	Coal	Having a state monopoly in the supply of power leads to inefficiency, corruption and a total disrespect for the customer.	Tim	retired
2022-07-08 08:31:16	Western Cape		Yes I do	Coal	Green fad is an obvious scam designed to further impoverish the poor. China is smart enough to know that its abundance of coal is a blessing hence multiple coal-fired plants are in progress. We could do the same but the failed ANC must stay 10km away from it.	Neville	retired
2022-07-08 08:20:12	Limpopo		Yes I do	Coal	Dit is SA se grootste bron van energie.	John	retired
2022-07-08 08:18:21	Western Cape		Yes I do	Coal		Garth	retired
2022-07-08 08:13:28	Western Cape		Yes I do	Coal	Small coal units are the best solution followed by small nuclear ie pebblebed units	Pierre	retired

2022-08-13 14:31:29	KwaZulu- Natal		Yes I do	Coal	Get professional people engineer's to run Eskom and have long term goals . Also have loby term planning and back up plans in place	Cobus	retired
2022-08-06 10:01:38	KwaZulu- Natal		Yes I do	Coal	ALLOW INDEPENDENT SUPPLIERS OF ELECTRICITY A CHANCE TO SUPPLY. SOUTHERN AFRICANS WITH ELECTRICITY. ESKOM IS RIFE WITH CORRUPTION, HIGH SALARIES AND BONUSES FOR PEOPLE WHO DO NOT HAVE SOUTH AFRICAN PEOPLE'S INTERESTS AT HEART. ALSO WHY DO WE SUPPLY NEIGHBOURING COUNTRIES ELECTRICITY TO THE DETRIMENT OF SOUTH AFRICANS. ESKOM AND THE GOVERNMENT ARE SO CORRUPT. I PRAY THAT THIS DOES NOT LEAD TO MORE CORRUPTION	EUNICE	retired
2022-08-03 07:08:23	Gauteng		Yes I do	Coal	With the right people operating the existing infrastructure it can be revitalised.	James	retired
2022-08-02 21:16:40	Eastern Cape		Yes I do	Coal		Vaughn	retired
2022-08-01 17:18:54	Western Cape		Yes I do	Coal	That will increase the supply available, which is what we want to achieve. It will increase private business, thereby increasing employment.	Mitch	retired
2022-08-01 07:51:04	Mpumal anga		Yes I do	Coal	Why not use the coal!!!	C	retired
2022-07-27 20:08:01	KwaZulu- Natal		Yes I do	Coal	Stop selling our best coal to China at dump price. Use it to power SA economy for the benefit of all SA people. To do this government must give up trying to control every thing by appointing friends and family to jobs they cannot do. Do away with BEE, it is the source of corruption.	Christopher	retired
2022-07-27 11:52:13	Western Cape		Yes I do	Coal	Immediate term we are set up for coal. This needs to be used but we also have gas, solar and hydro suitability in SA. Private enterprise should be encouraged and should be able to feed the grid. South Africans need to stand together and not be thinking what they individually can get out of this. Whatever the government does it needs to be transparent. No corruption.	Ernstine	retired
2022-07-26 20:40:53	Gauteng		Yes I do	Coal	The reason I selected coal for the method of electricity production that would suit SA's immediate needs is that coal is abundant and our power stations are designed for coal usage. Independent energy generators should use whatever method they can to generate as much additional energy in the shortest possible period to address the shortfall. Eskom's debt is a massive risk.	Robert	retired

2022-07-26 09:43:50	KwaZulu- Natal		Yes I do	Coal	The ANC government determinedly ousted the qualified and experienced management and technical expertise from every SOE and organ of state after winning control in 1994. Their incompetence has allowed the communist controlled worker unions to disable and sabotage the normal operation of every facet of the public service and rendered most national infrastructure almost useless.	Anthony	retired
2022-07-25 20:55:53	Western Cape		Yes I do	Coal	As an engineer these are my views. Getting Coal to 100% and getting rid of corrupts BEE is first priority. Then concentrated solar should also be phased in over time as it is the only viable renewable with minimal environmental impact. Government and family should not be allowed to corrupt this energy drive with tenderneurship. Nuclear can be considered only when BEE, corruption and lack of skills is properly addressed in the future to ensure safety. Solar panels (mercury) and wind turbines (landfill plastics) cause more longer term environmental problems and should only be used on a smaller scale by private individuals. Human consumption of coal has a less than 1% impact on the environment when compared with Sun Solar flares 96% & volcanos 3%, so coal is not the big problem that politicians make it out to be. China is building the majority of coal plants in the - why? China is smart in this, but I do not like them for stealing so much intellectual property.	Dewald	retired
2022-07-25 07:04:50	Gauteng		Yes I do	Coal	Coal is abundant in SA, so as a long term strategy we need to add more coal powered stations because they are more reliable compared to solar and wind. We should have lots of solar and wind but only as back up	Muhluri	student
2022-07-12 16:32:54	Gauteng		Yes I do	Coal	Immediately, I think power production should be privatised to help the South Africans struggling because of Eskom. People cannot live in this current state. In the future, things like solar and wind can be introduced as it is more economically sustainable.	Ashleigh	student
2022-07-12 14:56:57	Gauteng		Yes I do	Coal	Of course a mixture of the variety is good, coal is a powerful source to use and if certain legislation and regulations can be put in place, South Africa can return to benefiting from it and also a stable and reliable supply can be established.	Zimele	student
2022-07-12 14:02:44	Gauteng		Yes I do	Coal		C.	student
2022-07-12 11:39:28	Western Cape		Yes I do	Coal	We need power immediately. While solar is a good option, the national infrastructure may take some time to develop to allow solar to be implemented. Thus we need more coal power capacity as soon as possible while starting to increase solar capability.	Dylan	student
2022-07-11 12:38:07	Eastern Cape		Yes I do	Coal		Jenna	student
2022-07-10 06:23:06	Free State		Yes I do	Coal		Uwais	student
2022-07-09 22:45:50	Western Cape		Yes I do	Coal	Coal can bridge the gap to nuclear stations, perhaps modular micro reactors.	Ruben	student
2022-07-09 14:30:49	Western Cape		Yes I do	Coal	.	Bianca	student
2022-07-08 08:29:20	Gauteng		Yes I do	Coal	Developing nations should not be restrained in energy production to CO2 limits imposed by unelected officials in developed nations. In SA we have an abundance of coal that could be used to meet our energy needs, it is easy to transition to more sustainable means of energy productions such as nuclear when you have sufficient energy supply. At this stage, there should be no limits to Independent Energy Producers with regard to generation capacity or racial policies such as BEE, the private sector needs to supply and the government be reduced to distribution as they have the infrastructure.	Wessel	student
2022-07-08 07:56:11	Western Cape		Yes I do	Coal		Hans- Willem	student
2022-07-08 07:55:58	Western Cape		Yes I do	Coal		Hans- Willem	student
2022-07-08 07:55:41	Western Cape		Yes I do	Coal		Hans- Willem	student
2022-07-07 23:49:59	Gauteng		Yes I do	Coal	Although coal is not very sustainable, our infrastructure is built for it. Private companies using coal would be a quick fix. However, I think the way forward would be hydro, wind and especially solar due to our hours of sunlight.	Carina	student
2022-08-29 12:26:28	Eastern Cape		Yes I do	Coal	We've got coal. All we need are efficient private companies to run at a profit and deliver competitive results. Not eskom, where you can run at a loss, be bailed out by govt, and continue happy days	Craig	student
2022-07-15 11:19:45	Western Cape		Yes I do	Coal		Leona	Non-profit

2022-07-12 11:17:54	Western Cape		Yes I do	Coal	<p>Dear Sir or Madam</p> <p>In the light of the very poor track record of administration and maintenance of State Owned Enterprises by the present government and its allies, and noting the terrible impact this has had on the lives of ordinary South Africans, noting that businesses which employ South Africans are going under or are under severe stress at present with load shedding, noting that electricity-based infrastructure is taking strain from the constant interruptions to power supply, and noting too that the problem was known decades ago that our power sector would all but collapse if we continued along the same rotten path, I would say that the time has now arrived for a cooperation between the State and private sector as is the case in certain other countries where even private households are able to sell surplus generated power back to the national grid. I am personally aware of a bid by a European consortium to invest in clean energy generation in South Africa about ten years ago where, because the government refused to give them a permit, they withdrew. This is appalling not only from a power-supply point and also from the loss of potential job creation. Leaving people in the dark and in poverty is not UBUNTU!</p> <p>I hope for investment in solar and wind generating power sources with their low carbon imprint although I am aware that the mining of materials required for these systems also degrades the environment in many places. In the interim we will have to rely on coal powered generation. I am opposed to nuclear power.</p> <p>When fission nuclear power stations become possible, that looks like a solution to most of our power problems.</p> <p>We should not be having to wait for everything to collapse and breakdown before we do something about it. This is expensive and inefficient. Mr De Ruyter has an unenviable task of trying to repair the damage done by the State through neglect, indifference and corruption over the last 20 years or so, and in the present, his task to repair this damage is unenviable. Mr Gordhan's recent statements on the corruption in the coal supply chain to our power stations and the consequent ongoing damage done to the power-generating plant, demands that those responsible should be arrested, tried and sentenced for sabotaging the South African State. The Union's illegal strike is further evidence of a collapsing system. So while coal seems to be the immediate focus for power-generation, we need to diversify.</p> <p>Please get moving on alternates and cooperation with the private sector and cut all the red tape!</p> <p>Yours sincerely Andrew Cox</p>	Andrew	Non-profit
2022-07-11 11:40:12	Western Cape		Yes I do	Coal	Coal, nuclear and solar is available so why not make use of it all?	Mario	Non-profit
2022-07-10 21:27:59	Gauteng		Yes I do	Coal	South Africa has abundant coal ,Eskom should fix its stations and repair what has been damaged	Rorisang	Non-profit
2022-07-10 10:12:17	Eastern Cape		Yes I do	Coal	All electricity and Ekom should be depoliticized and run by a private Enterprises	Dawie	Non-profit

2022-07-19 08:04:02	Gauteng	South Africa	Yes I do	Nuclear	While I would prefer wind,solar solutions, the supply of such is not sufficiently consistent while the cost of storage is prohibitive. Nuclear provides clean affordable power on a consistent basis. I believe wind & solar should be accepted where it can be provided but be managed as complimentary supply and not primary supply.	Daan	unemployed individual
2022-07-18 19:36:35	Eastern Cape		Yes I do	Nuclear	I would suggest nuclear power as an option only if there were competent and skilled engineers who are committed to staying in South Africa and sufficiently training workers to deal with any possible fallout. South Africa is drought prone so Hydro power may be unreliable. Solar is a good option however it produces more waste than nuclear.	Kristin	unemployed individual
2022-07-18 13:22:48	Western Cape		Yes I do	Nuclear	There are numerous ways to produce energy, but the underlying problem is waste. Yes, solar and renewables are the cleanest but as we can see throughout the world, it simply isn't enough to power a country with high energy needs like ours. Stop falling for the propaganda and see how wealthy nations are firing up the coal power stations again. Coal is immediate, yes, but what happens when it gets wet? With coal we need to at least stop exporting it in massive droves or charge more for it so we can improve things at home first. With advances in nuclear technology, there are sustainable ways of disposing of radioactive waste and it is cleaner and more reliable than coal-driven power. The real problems in this country is BEE, that has sent many qualified people abroad, and the red tape that determines how much energy can be produced by anyone other than Eskom. BEE regulations and lack of competition in the energy sector means we are stuck with Eskom which is failing dismally... Failing because the State failed to heed early warnings of Eskom's collapse should they fail to create new capacity generation and want to continue to control the country's energy supply. Now we are where we are, because of State failure, hence the need for independent producers. So the State needs to concede and allow private energy producers to compete in the market, this competition will force prices to come down to a reasonable place. Private companies won't employ useless people, because they fought in the struggle. Private companies will employ properly qualified people to manage their systems, because private companies are profit-driven. So yes, lift the red tape. End the monopoly.	N	unemployed individual
2022-07-16 12:15:37	Gauteng		Yes I do	Nuclear		Gerhard	unemployed individual
2022-07-15 17:38:01	Gauteng		Yes I do	Nuclear	Nuclear energy I think it will be assist a lot.The world globally we are facing this called climate change ?	Lucky	unemployed individual
2022-07-15 15:52:23	Western Cape		Yes I do	Nuclear	It's very reliable. There is a lot of countries with expertise to help us. Yes you have waste that needs to be buried and disposed of responsibly but it is reliable.	Bonita	unemployed individual
2022-07-13 14:23:42	Western Cape		Yes I do	Nuclear		Margaret	unemployed individual
2022-07-13 11:36:46	Western Cape		Yes I do	Nuclear	Nuclear energy ensures energy equity due to its low cost and energy security from the large amounts of power it provides. Nuclear power is also a sustainable way to produce electricity. Poor Government leadership has created poor economic growth. Sadly, corruption and lack of oversight and accountability, poor appointments in key positions as well as mismanagement in government is rife. South African citizens are disheartened because of the poor leadership. We need strong, competent and principled leadership to put our country on a path of economic growth. We need the best expertise to be sourced in the private and public sectors to fill key positions now. IT IS THE STATE'S RESPONSIBILITY TO DELIVER TO IT'S CITIZENS!!	Vanessa	unemployed individual

2022-07-13 09:19:30	Western Cape		Yes I do	Nuclear	Nuclear is the cleanest and most efficient source of energy. Spent fuel rods can be recycled and eventually disposed of with "on site deep disposal" methods. Nuclear waste is NOT glowing green goo in leaking barrels as portrayed in movies and video games. It's actually solid, and encased in ceramic, glass, steel, and concrete. Hydro is my other preferred method.	Tanya	unemployed individual

2022-07-11 08:09:15	Western Cape		Yes I do	Nuclear	All our thanks to the current management (de Ruyter etc) who have to deal with this mess and for their progress on this. It is heartbroking to think how much money just disappeared and nothing nothing nothing has been done or maintained since 1994 up 2020.	Erasmus	unemployed individual
2022-07-11 07:58:25	Gauteng		Yes I do	Nuclear	From all the methods above there are positives and negatives that can be listed. Some are not really financially viable other not practical. At this moment a few things needs to be taken into consideration. All other methods of renewable power generation will required equipment to be produced and for that you need power to mine raw products, process raw products and install the equipment. Those plants that are in operation can assist in supplying power to the grid but will still not be enough to stop the current situation. For the Electricity system to catch-up will require Eskom to firstly clear our the corruption, then remove all the not functional positions and replace the current non qualified employees with people that has the knowledge, skill and experience to OPERATE AND MAINTAIN the current plants we have.	Neels	unemployed individual
2022-07-11 00:35:00	KwaZulu- Natal		Yes I do	Nuclear	Yes we definetly need to change to independant power supply, escom just not up to standard.	Charlotte	unemployed individual
2022-07-10 22:31:11	Gauteng		Yes I do	Nuclear	France and most of the European countries are switching to Nuclear Power after many years of debates. It is not very clean , but it can produce enough energy for many years ahead.	George	unemployed individual

2022-07-10 21:21:46	Western Cape		Yes I do	Nuclear	We have to eliminate Eskom monopoly and daily load shedding and bring in alternative independent power producers to support the country economy and development of the country. Nuclear production is the most efficient.	Lana	unemployed individual
2022-07-10 19:34:15	Western Cape		Yes I do	Nuclear	YES. I completely and fully agree that the government MUST immediately fully allow all independant power producers, WITHOUT any red tape, BBBEE restrictive nonsense, and the usual government incompetence and destructive policies. Besides the fact that it is idiotic for one company, and paticularly a Government company to have full manipulation over the power supply of an entire country, we are being increasingly pushed into the literal dark ages by this black ANC government, and its reprehensible connects to the WHO, UN, WEF, and other unelected global control organizations whose values and ideas are the complete opposite of the People of South Africa. You politicians probably haven't experienced a day of loadshedding in your privilaged fat lives, we get it many times every day. You have utterly failed your own people, and now by withholding this bill to allow independant power producers, you are pushing the people down into the darkness even when they try to rise and fix their lives. This is not something that even has to be questioned; you MUST ALLOW INDEPENDANT POWER IMMEDIATELY, any other outcomes signify you always are against the good of the people, the whole 1994 change was just for you to get rich and had nothing to do with the plight of the people.	Doug	unemployed individual
2022-07-10 17:55:51	KwaZulu- Natal		Yes I do	Nuclear	Black Power has failed.	Muhamm ad	unemployed individual
2022-07-10 17:11:29	Gauteng		Yes I do	Nuclear	South Africans are forced to pay for a service we cannot rely on. Nuclear and Solar are proven to work around the world. We should have the right to be able to choose a reliable energy provider. Our government can't be relied to look after us and provide ANY service in this country. They have destroyed everything that once worked. Just look at our power supply, the roads and our non existent postal service. All this is destroying our economy.	Heleen	unemployed individual
2022-07-10 16:50:57	Western Cape		Yes I do	Nuclear	Connect already constructed wind/solar systems to the grid and get people who have the relevant knowledge.	Louise	unemployed individual

2022-07-08 19:41:24	KwaZulu-Natal	Yes I do	Nuclear	What ever source is immediate will be best..long term we need to find something cheap and renewable. Most of all we need private companies to supply our power.	Jenny	unemployed individual
2022-07-08 19:12:14	Western Cape	Yes I do	Nuclear		Bonita	unemployed individual
2022-07-08 18:37:28	Gauteng	Yes I do	Nuclear	SOE ARE UNSUSTAINABLE. Private competition is best including having proper discussion and vendors on nuclear power.	Elize	unemployed individual
2022-07-08 18:03:07	KwaZulu-Natal	Yes I do	Nuclear	I think that Nuclear would be the best option, since it's not only cleaner than burning fossil fuels, but it's safer than what most people think and gives out more energy for less of the ingredients required, provided the people in charge know what they're doing. Some suggestions would be to build nuclear powerplants, but before a person applies for the job, a very thorough background check gets put in place to make sure that they have the correct radiation worker qualifications, have no criminal record or records of negligence or recklessness in their workspace. I do think that solar and hydroelectric energy would also be a good option. Eskom has proven time and time again that they are not capable of managing electricity or the funds that come with it, and something needs to be done about it. It's about time the entire country starts looking toward clean energy and stops relying on, and paying a corrupt company who is going to send us back to the dark ages, and soon.	Austin	unemployed individual
2022-07-08 17:56:57	KwaZulu-Natal	Yes I do	Nuclear	More diverse power providers will create competitiveness and keep a high standard	Karen	unemployed individual
2022-07-08 17:55:58	Western Cape	Yes I do	Nuclear	Time for the anc communists to stop stealing from their voters. Think of the country and NOT your pockets. Everything the anc touches turn into shit, give the power back to knowledgeable people, people who knows how to govern a country. the efforts of the anc is pathetic and destroy this once awesome country, which was the flagship of Africa, but know is the shithouse of Africa	Henri	unemployed individual
2022-07-08 17:26:08	Gauteng	Yes I do	Nuclear	Nuclear is the way to go and government must diversify power protection, not only rely on coal.	Boitumelo	unemployed individual

2022-07-08 06:32:11	Gauteng		Yes I do	Nuclear	ESkom, like ALL the other SOE's, have failed this Country, and failed dismally. Let the poor suffering beast die in peace, and allow us our Democatic Right- the RIGHT TO CHOOSE!	Chantell	unemployed individual
2022-07-07 22:03:32	Western Cape		Yes I do	Nuclear	I'm tired of the nonsense happening in the country,Eskom is the cause of appliances blowing up in your face,fridges,tvs,stoves etc,without so much as a compensation for all our losses,how many appliances did we have to replace because of Eskom's nonsense,people are calling for De Ruyter to step down...they should start with the cANcer who are the cause of the mess the country's in,its time for us to stand up and fight	Anita	unemployed individual
2022-07-07 19:50:48	Western Cape		Yes I do	Nuclear	Europe has already called Nuclear energy 'Green'. So why such hesitation over a low co2 emitting solution that is cheap and reliable. South Africa has minimal time left for hesitation on this matter. It's truly the smartest option. The government has shown it is incapable of keeping Eskom afloat. Time for a change that will actually benefit the country and not just this corrupt government.	Christopher	unemployed individual
2022-07-07 19:36:13	Western Cape		Yes I do	Nuclear		Bonita	unemployed individual
2022-09-12 23:45:25	Western Cape		Yes I do	Nuclear		Bonita	unemployed individual
2022-08-02 13:14:29	Western Cape		Yes I do	Nuclear	Nuclear, like Koeberg. Obviously with people operating that have the knowhow. There are lots of space on our coastlines away from cities.	Dawie	unemployed individual
2022-08-02 07:52:48	Gauteng		Yes I do	Nuclear		Jeanne	unemployed individual
2022-07-24 11:33:29	Western Cape		Yes I do	Nuclear	The ANC has has 28 years to get their act together and were told up front that due to population increase additional power plants will have to built to sustain the needs of the population. The ANC built one nuclear power plant which took them 20 years with 4x the cost and 4x the time it took to build Koeburg Nuclear Power Station. Nuclear is the way to go in South Africa as a basic to build up the grid and solar and wind can be added as backup. People are being misled if they think that solar and wind is enough to sustain the grid, it is not especially if we are being pushed to run all vehicles with electricity in the next 10 years. We need to do away with ANC appointed political members manage SOE'S, because this enables them to have their fingers in the cookie jar. We need to do away with BEEE especially where we need highly qualified, certified and experienced personnel running the operations of a highly responsible job like a nuclear power plant and must be handed to the private sector without BEE restrictions so that qualified companies can do the job properly. All SOE,S are bankrupt, and in dire straits and in my opinion the SOE,s must be handed to the private sector without BEE restrictions, so that the qualified companies can do their jobs unrestricted Private generating companies must be allowed to provide electricity to the grid, and or cities and towns, without restrictive conditions.	Kim	employed individual
2022-07-22 20:23:09	Gauteng		Yes I do	Nuclear	Nuclear is not as dangerous as people make it out to be it generates a lot of energy, in a small amount of space. A great example is Koeberg. It has a very low carbon footprint. Nuclear stations also last for years and need very little maintenance, therefore it is a good solution for South Africa.	Cathrine	employed individual
2022-07-22 14:35:54	Gauteng		Yes I do	Nuclear		Lindsay	employed individual
2022-07-22 10:12:59	Gauteng		Yes I do	Nuclear	Scrap the red tape on independant power producers! We want affordable electricity. No to ridiculous power tariff increases!!! Not anymore, we cannot afford it or you pay our bills!	Claudia	employed individual
2022-07-22 09:51:23	Gauteng		Yes I do	Nuclear	Nuclear power would be the most reliable and cleanest form of energy relative to the average capacity factor. It would be better for private companies to design, finance, build and operate this infrastructure as government has proven itself incapable of delivering a project like this (Medupi and Kusile)	Jan	employed individual
2022-07-22 06:48:20	Gauteng		Yes I do	Nuclear	Convenient	Emanuel	employed individual
2022-07-21 20:15:34	KwaZulu-Natal		Yes I do	Nuclear	Any of the answers above could apply as it is an emergency and heading for a disaster. Talking about the problem wont solve it, Action is needed.	Gerhard	employed individual
2022-07-20 19:54:13	Gauteng		Yes I do	Nuclear		Hanrich	employed individual
2022-07-20 15:20:54	Free State		Yes I do	Nuclear		Johnnie	employed individual
2022-07-19 08:21:41	Western Cape		Yes I do	Nuclear	I fully support the scrapping of the policy red tape for Independent Power Producers. In my opinion Nuclear is the method that would suit SA's immediate needs, with wind and solar coming second. The government should stop restraining IPP from coming to the rescue of our energy crises. Government had their opportunity for 24 years when the then ruling ANC government was informed of the impending crises. The ANC government is still in power and the impending crises is now a crises that they cannot fix.	Charlene	employed individual
2022-07-18 19:27:54	Gauteng		Yes I do	Nuclear	Privatised Nuclear Is Important And Urgently Needed, But Solar Can Be An Initial Energy Source. Bio-Fuel needs to be advanced too. The Government are servants, they need to remember that and get out the way of decentralized privatisation.	Michele	employed individual

2022-07-18 17:49:14	Western Cape		Yes I do	Nuclear	<p>Koeberg has been running extremely reliably. Another Koeberg - in the Western Cape, or elsewhere, with equally (or more) qualified individuals running it - would be an amazing idea for the long-term stabilisation of the grid. Less space occupied, no air pollution produced, and high efficiency of production (much better than Koeberg's thanks to improved reactor technologies) mean a win for South Africa's ailing electricity production.</p> <p>And if it is too expensive, as per Ramaphosa - then coal, all the way. We have plenty, and it is cheap and reliable compared to any other electrical production means (which only depend on sun or wind, or battery reliability or charge level), quickly boosting the country's otherwise low electrical generation capacity - which should be a reasonable government's only priority, over and above any other "clean power" mission.</p>	Elia	employed individual
2022-07-18 10:19:11	Gauteng		Yes I do	Nuclear	<p>There is no reason why government needs to own energy production and load shedding is testament to their failure. Nuclear is a proven, high yield clean energy source. Simple</p>	Steven	employed individual
2022-07-18 10:12:20	Gauteng		Yes I do	Nuclear	<p>Eskom is very clearly on the verge of collapse, and very urgent action needs to be taken.</p> <p>The government has shown that it is only capable of running previously functional state departments into the ground, one after the other, through the combination of destructive policies such as BEE, cadre deployment, anti-white racism, identity politics, massive proliferation of costly regulations and red tape, inter-factional fighting, state capture, and rampant out of control corruption.</p> <p>The ONLY option that can rapidly be deployed to avert disaster at this stage is for the government to admit they have recklessly and wantonly wrought destruction on it's citizens, step aside and allow the private sector to generate their own power without unnecessary meddling restriction or hinderance from the government. If they do that, the private sector can probably save the country from total disaster, probably quite quickly.</p> <p>The other problem which is not being addressed, is the misguided infatuation with the trendy fashion of renewable energy - while those should be utilised to maximum practical, it must be acknowledged that renewable energy WILL NOT solve our electricity problem. Renewable energy is literally as fickle as the weather and cannot to relied upon to provide electricity at every second of the day. The availability of renewable energy waxes and wanes from one second to the next, as we all know.</p> <p>In order to ensure that the country does not continue to suffer continuous load shedding, we need reliable base load that will be available 24/7, which is not affected by the vagaries of the weather.</p> <p>That is the real problem we face.</p> <p>We need a large increase in either coal or nuclear power stations! Of which nuclear is probably the cleanest option.</p> <p>But we cannot afford the rampant corruption and incompetence , which turned the last two new power stations built into an absolute farce, either! We apparently paid five times the normal price for two crippled power stations that were delivered broken, and still do not function properly! Well done!</p> <p>It's time for the government to stop showering themselves in our hard earned money and step aside.</p>	Alan	employed individual
2022-07-18 07:43:32	Gauteng		Yes I do	Nuclear		Piers	employed individual
2022-07-17 06:29:07	Gauteng		Yes I do	Nuclear		Marianne	employed individual
2022-07-16 22:22:12	Free State		Yes I do	Nuclear	<p>I think obviously for all other forms of electricity it depends what part of the country it is. For example solar would be good for an are which is not often cloudy. Like the Karoo. Wind power is good for western cape. Hydro would be good for areas with permanent rivers. Our country is perfect for these sources.</p>	Devlin	employed individual
2022-07-16 17:43:15	Eastern Cape		Yes I do	Nuclear	<p>1. Yes for immediate independent power producers without any BEE or Political connection or affiliation. 2. Yes for immediate amended legislation that does not serve the political elite but the people. 3. Step away from renewable energy to supply industries because they cant keep up with the load or demand. This will be SA's downfall. Renewable energy is fine for households and small businesses.</p>	Angelique	employed individual
2022-07-16 12:02:35	Gauteng		Yes I do	Nuclear	<p>Hope Koeberg gets fixed and extended As long as the ANC have nothing to do with the running of it it should be good However we need a mix of all green energy nuclear coal and gas The sooner we have at least some of all of these the better Electricity should not be political so keep the ANC as far away from it as possible</p>	Sharon	employed individual
2022-07-16 10:22:05	Western Cape		Yes I do	Nuclear	<p>Government has the network to. Distribute, they are failing at generation of power. They have failed from the time of coming to power until current to create enough generation. Give private producers an opportunity cause they failed clearly because of corruption and politics meddling in affairs. Now they need 45 billion from tax payers to fix a failing entity where private can step in.</p>	Lindsay	employed individual

2022-07-16 10:22:03	Western Cape		Yes I do	Nuclear	Government has the network to. Distribute, they are failing at generation of power. They have failed from the time of coming to power until current to create enough generation. Give private producers an opportunity cause they failed clearly because of corruption and politics meddling in affairs. Now they need 45 billion from tax payers to fix a failing entity where private can step in.	Lindsay	employed individual
2022-07-15 21:23:16	Western Cape		Yes I do	Nuclear	Latest nuclear technology is cheap, can be manufactured off site, retrofitted in old obsolete coal plants and give sustainable bulk power. Combined with all forms of solar/wind and gas	Clive	employed individual
2022-07-15 11:45:23	Gauteng		Yes I do	Nuclear	It is evident that everything government owned fails (SAA, SARS, ESKOM to name a few). Nuclear is the fastest way to get everything up and running. My second choice would be coal, which we have a lot of.	Sherize	employed individual
2022-07-15 09:41:20	Gauteng		Yes I do	Nuclear	Small naval nuclear reactors at key points around the grid in the short term. Solar and wind medium term as fossile fuels are phased out. Keep the politically connected away from any dealings/shareholdings in this sector otherwise this is legalised state capture all over again. (Motsepe already has a fast track approval for solar, no coincidence)	Steve	employed individual
2022-07-14 23:14:22	Gauteng		Yes I do	Nuclear		Christian	employed individual
2022-07-14 22:26:01	Gauteng		Yes I do	Nuclear	I do not like the pollution of coal and I think we are too limited to try gas wind or hydro. Perhaps nuclear should be looked at again? It can be made reasonably safe, I think.	Marlene	employed individual
2022-07-14 19:34:53	North West		Yes I do	Nuclear	Eskom has held the monopoly on electricity for far too long and clearly cannot deliver, and now our country and economy is suffering because of it. If there are other companies that can alleviate they should be allowed to do so as soon as possible.	Agape	employed individual
2022-07-14 14:57:40	Western Cape		Yes I do	Nuclear	Nuclear is highly efficient, safe and less wasteful than our current energy sources.	Sheldon	employed individual
2022-07-14 13:55:13	Gauteng		Yes I do	Nuclear	Currently business is unable to maintain this level of power cuts. Open market solution has proven most success in parts of the world where used and shown fastest recovery of ailing markets	Garth	employed individual
2022-07-14 13:07:31	Gauteng		Yes I do	Nuclear	I think a combination of different power sources can be used to solve the current electricity crisis - wind, solar, hydro and nuclear. Nuclear power can be provided in a safe way, as long as safety protocols and maintenance plans are strictly followed. The most important factor is that we as consumers should have a CHOICE about the source of power we consume. We should not be forced to rely on a failed parastatal to bring us the power we need. Eskom has cost the economy billions of Rands and continues to hemorrhage money, while at the same time there is no end in sight for loadshedding after more than 10 years. Enough is enough! We should be allowed to purchase power from private providers. We should be allowed to form private companies that produce power and sell it, provided safety guidelines are followed. In first world countries, private companies sell power. We should not have to rely on a failed government for one of our most basic needs.	Lauren	employed individual
2022-07-14 08:43:00	KwaZulu- Natal		Yes I do	Nuclear	It is clear from the current state of power outages and loadshedding that Eskom is not equipped to efficiently provide South Africa with power. Although they have had many years to work towards resolving the issue, the situation is now worse than ever. The time has come to bypass Eskom and find an alternative supplier in order to ease the current crisis which is impacting negatively on our country's economy. Nuclear energy is the most reliable energy source but only when it is maintained efficiently. It's time to put aside BEE etc and urgently appoint a supplier that is capable of dealing with this situation	Linda	employed individual
2022-07-14 01:12:44	Western Cape		Yes I do	Nuclear		Derek	employed individual
2022-07-13 21:04:43	Western Cape		Yes I do	Nuclear	Actually any method of electricity production that will the stop load shedding that is crippling our country and destroying specifically small businesses that can't afford generators.	Jasper	employed individual
2022-07-13 16:35:36	Gauteng		Yes I do	Nuclear		Cheryl	employed individual
2022-07-13 15:33:39	Gauteng		Yes I do	Nuclear	Nuclear power plant is more effective than the other	Thoko	employed individual
2022-07-13 14:06:14	Gauteng		Yes I do	Nuclear	Good afternoon Government must allow and sign in the private power producers with immediate effect, no matter what method are they going to use as long it be a quicker and affordable for the people of South Africa, it can be nuclear, gas solar etc	Diamond	employed individual
2022-07-13 13:41:07	Gauteng		Yes I do	Nuclear		Steve	employed individual
2022-07-13 13:17:21	Western Cape		Yes I do	Nuclear		Siegfriedt	employed individual
2022-07-13 11:37:16	Western Cape		Yes I do	Nuclear	With demand for electricity in South Africa far exceeding the supply, we needed to have started construction on new power stations years ago. The only power source that could solve the problem we will face in the coming years is modern nuclear. Construction on plants in strategically placed secluded areas should start as soon as possible.	Raymond	employed individual

2022-07-13 10:31:10	Mpumalanga		Yes I do	Nuclear	Absolutely, because the government has had more than two decades now to prove how incomparably inept it is at managing Eskom. People should be allowed a certain measure of self governance, and this would be a step in the right direction.	George	employed individual
2022-07-13 10:20:13	Eastern Cape		Yes I do	Nuclear		Erika	employed individual
2022-07-13 10:01:08	Gauteng		Yes I do	Nuclear	The option above should let one choose several methods, as one method is not sustainable on its own, Therefore a combination of renewable energy, wind , hydro and solar energy can maybe be allocated to households that will relief some power from Eskom.	Johan	employed individual
2022-07-13 09:52:59	Gauteng		Yes I do	Nuclear	Renewable sources are good but we need to increase power for the base load. Renewables don't do this. Nuclear is the only option and we have the space on the Western seaboard for another 2 stations at least. Obviously coal is not the answer, but all of the coal plants should be kept 100% operational until alternative sources are up and running. The argument against nuclear is lack of skills and cost. In that case import the skills and grin and bear the cost. But start ASAP. The public will be more tolerant of load shedding if they know that a viable plan is going ahead.	John	employed individual
2022-07-13 08:55:54	Western Cape		Yes I do	Nuclear		Julie	employed individual
2022-07-13 08:45:35	Eastern Cape		Yes I do	Nuclear		Thabo Patrick	employed individual
2022-07-13 08:14:56	KwaZulu-Natal		Yes I do	Nuclear	We already have nuclear power plants that can be better utilised to increase the electricity that is already being produced. This solution will not take too much time to get moving.	Simone	employed individual
2022-07-13 07:53:08	Gauteng		Yes I do	Nuclear	I think people are been affected by loadshedding even some businesses so I urge the power to be provided by independent power supplier	Phathutshedzo	employed individual
2022-07-12 21:00:57	Mpumalanga		Yes I do	Nuclear	Eskom is exhausted - there is no chance for a recovery to an up-to-date service facility. Eskom ranks like a third world - supplier. We need investors, who are by no means affiliated with the government - we need clean energy.	KATHLEEN	employed individual
2022-07-12 20:47:57	Western Cape		Yes I do	Nuclear	Nuclear technology has come a long way. It's a safe, effective alternative. The only barrier is the peoples opinion that is based on historical events.	Christiaan	employed individual
2022-07-12 20:41:52	Northern Cape		Yes I do	Nuclear			employed individual
2022-07-12 18:52:54	Gauteng		Yes I do	Nuclear	Government can't supply enough power and don't have any plans and solutions to resolve this crisis. Our country is collapsing due to this crippling power crisis. We need to immediately allow the open market to supply the grid with power to ease the strain.	Robert	employed individual
2022-07-12 18:31:07	Western Cape		Yes I do	Nuclear	Well they screwed up on coal delivery nuclear is cleaner but hope that it will be treaded properly or else that would let to a disaster	Johan	employed individual
2022-07-12 18:02:03	Gauteng		Yes I do	Nuclear		Michelle	employed individual
2022-07-12 16:58:00	Gauteng		Yes I do	Nuclear	Although I've noted 'NUCLEAR' as the best solution, the true solution is any that is better for the environment and avoids the obvious downfalls of the current power production. Nuclear is a safer, cleaner, and more environmentally suitable solution than our current dependence on coal. This is also true for hydro, solar, and wind. The ultimate shortfalls of coal power, and energy production in our country in general, are lack of maintenance, environmental impact, and sabotage/human intervention. Although there is a major issue with general sabotage when it comes to power delivery infrastructure, which is an issue that lies beyond the scope of production choice, the other production types afford opportunities to remedy those shortcomings. New infrastructure for the production of renewable energy would allow maintenance to be an ongoing solution, rather than a scramble to repair dated and poorly maintained, existing infrastructure. Privatisation would mean that individual companies have the responsibility to maintain equipment, rather than a government which, at the best of times, lacks the forethought to maintain equipment. As we've seen, the world is moving toward cleaner energy production and the opportunity afforded by privitisation would mean that South Africa can set an example, as we have in many other areas, for what conscious legislation can provide the world and the South African people. I've chosen nuclear specifically because of its successful history, its innovation, and the opportunities provided by the furthering of research in the field. The shortfalls of the technology, the potential danger, and the high levels of maintenance required, would be disastrous in the hands of the languishing South African government but would be mitigated by the capital-focused executives of private companies.	Rory	employed individual
2022-07-12 16:36:58	Gauteng		Yes I do	Nuclear	More sustainable in the long term and not that expensive	Sarel	employed individual
2022-07-12 16:04:02	KwaZulu-Natal		Yes I do	Nuclear		Caleb	employed individual
2022-07-12 13:51:31	Gauteng		Yes I do	Nuclear	There is no drop down option of "All". I believe that ALL power production should be allowed with immediate effect.	Brian	employed individual

2022-07-12 13:46:33	Western Cape		Yes I do	Nuclear	South Africa urgently needs more electricity production capacity. Allowing citizens to generate their own power and independent producers to sell power into the grid is the only way forward. Eskom should stop monopolising production, production that they cannot provide. I support all types of production except coal. South Africa have run out of coal in 15 years. To continue building coal power stations to run for only 15 years is ridiculous and counter productive. We should invest in long-term sustainable power production.	Zanne	employed individual
2022-07-12 13:27:58	Gauteng		Yes I do	Nuclear		Stuart	employed individual
2022-07-12 12:02:38	Gauteng		Yes I do	Nuclear	Firstly most South Africans have lost trust in anything run by government. Secondly a competitive market is always good. It's good to have choice of electric providers as other countries have done and then have the option to choose the one that suits your needs.	Claudette	employed individual
2022-07-12 11:51:53	Western Cape		Yes I do	Nuclear	Nuclear is by far the most efficient but the northern cape has proven to be good for solar. I am not an expert, but i do know that monopoly of eskom is not helpful at all. Free market-competition has always been good and keeps every company on top of their game	Theo	employed individual
2022-07-12 11:25:35	Gauteng		Yes I do	Nuclear		Warren	employed individual
2022-07-12 10:17:13	North West		Yes I do	Nuclear	Nuclear is environmentally friendly. It has a small footprint It is not weather dependent and doesn't need storage Produces minimal waste	Garrett	employed individual
2022-07-12 09:43:32	Limpopo		Yes I do	Nuclear		Malesela	employed individual
2022-07-12 09:31:20	North West		Yes I do	Nuclear		Jacobus	employed individual
2022-07-12 09:07:38	Gauteng		Yes I do	Nuclear	The only way to save South Africa is to introduce private producers of electricity, using multiple forms of production. Nuclear energy is produced responsibly and taken care of, is clean energy and very useful. Whatever the case, the problems with Eskom are dragging the entire country down. Allowing for private producers would enhance employment and investment. Two things that we very badly need,	Ethelwyn	employed individual
2022-07-12 09:06:59	Gauteng		Yes I do	Nuclear	The Country must built nuclear power stations for the following reasons: 1. It is essential to our response to climate change and greenhouse gas emissions. 2. It has most low-carbon energy sources 3. Nuclear power is relatively one of the most cost-effective and reliable energy compared to other sources 4. If we have independent power/energy producers, we will see the township uprising because majority of people are not working or can not afford.	Mofukane	employed individual
2022-07-12 08:53:48	Gauteng		Yes I do	Nuclear	The combination of Nuclear and renewable is the only solution that will prove cheap and reliable over long period of time. Nuclear alone does have the speed required currently, but renewable alone will not have the longevity and the reliability required to sustain economic development. Economic growth requires Nuclear power urgently, mitigating some of the current predicament of govern inertia when it comes to energy provision for the country we will need hasten provision of renewable. We must not be fooled, renewables are not a solution but they can mitigate the effect of government inertia and bad decisions when it come to energy provision for the country. BUT NUCLER is the ultimate solution for both energy provision for the country and environment/ climate change.	Mpho	employed individual
2022-07-12 08:49:23	Gauteng		Yes I do	Nuclear	Although renewable energy is an good source of energy, it is also quite unpredictable and unreliable as it depends on preferable weather conditions. Renewable energy sources also take up large amounts of physical space (thus destroying more of the planet), and have various cons including higher rates of death to both animals and humans in comparison to other forms of energy. Nuclear energy is not only much more efficient, but it's more safer for people. It also takes a minimal amount of physical space in comparison to other renewable sources of energy.	Kathryn	employed individual
2022-07-12 08:15:24	Western Cape		Yes I do	Nuclear		Natasha	employed individual
2022-07-12 00:09:12	KwaZulu- Natal		Yes I do	Nuclear	It is a clean energy as South Africa and the Rest Of the World approach Coal Free Era	Sabelo	employed individual
2022-07-11 22:18:59	Western Cape		Yes I do	Nuclear	Consistent energy, least damage to environment	Henry	employed individual
2022-07-11 20:33:08	Gauteng		Yes I do	Nuclear	An immediate action is needed to save S. A from the energy disaster. Nuclear or solar system should be in discussion.		employed individual
2022-07-11 20:13:57	KwaZulu- Natal		Yes I do	Nuclear		Ndumiso	employed individual
2022-07-11 20:08:29	North West		Yes I do	Nuclear	Science has proven that: when properly run and maintained nuclear power is not only cheap and safe, but the most effective way of generating power and it has come a long way since Chernobyl, for those who those fears.	Heinrich	employed individual
2022-07-11 19:59:36	Mpumal anga		Yes I do	Nuclear	Eskom tried to burn coal for years so it can produce electricity for South Africans, I now it's that time we give Nuclear Energy a go...	Clement	employed individual
2022-07-11 19:52:28	Gauteng		Yes I do	Nuclear	Please end loadshedding	Thabo Samson	employed individual

2022-07-11 15:36:15	Limpopo		Yes I do	Nuclear	We need to deal with this once and for all	Kobe Godf	employed individual
2022-07-11 15:18:51	Western Cape		Yes I do	Nuclear		Steve	employed individual
2022-07-11 14:45:07	Eastern Cape		Yes I do	Nuclear		Wayne	employed individual
2022-07-11 14:44:51	Gauteng		Yes I do	Nuclear	The government should allow for privatization of electricity	Jabu	employed individual
2022-07-11 13:56:54	Gauteng		Yes I do	Nuclear	Simple, Eskom can't do the job so let independents make up the shortfall. Log term go nuclear., but start now. However SA may have squandered the expertise that it once had. Renewables are unreliable and will take years before being able to make a significant contribution to the grid and in that time new nuclear power station / s could be built. However, I would suggest the nuclear power stations be run by independents and not Eskom. I believe Eskom is too far gone with internal corruption and the interference of unions and government to ever be viable.	Kevin	employed individual
2022-07-11 13:40:35	Western Cape		Yes I do	Nuclear		Herman	employed individual
2022-07-11 13:17:05	Western Cape		Yes I do	Nuclear	Coal, Solar, Wind, Hydro, Gas and /or Diesel. We should use any means possible for the short term to resolve the immediate crisis we are in with electricity black outs. South Africa's declining economy, job loses, and companies closing down are some of the most urgent issues to be addressed with immediate electricity availability. Then the long term plans, with Government and Business working together to find the best solution to supply electricity to SA. Stopping all the people from African coming through our borders and living here and not paying electricity, or tax, etc, will also go a long way to alleviate the electricity burden the country is faced with.	Delene	employed individual
2022-07-11 12:50:27	Gauteng		Yes I do	Nuclear		Rene	employed individual
2022-07-11 12:30:22	Mpumalanga		Yes I do	Nuclear	Migration from Coal to gas in the short term include the deployment of module Nuclear power station independently operated. We need to consider Hydrogen in the mid-term.	Charl	employed individual
2022-07-11 12:16:52	Western Cape		Yes I do	Nuclear	Let people generate their own electricity without having to jump through hoops and pay the king his tax on it. Also by making it easier to dip your toe into the solar game one in turn makes it cheaper and gives power to those who previously could not afford it. Also let those who would be able to generate enough where they can sell it back to a willing buyer do so.	Heini	employed individual
2022-07-11 12:14:13	Gauteng		Yes I do	Nuclear		Louise	employed individual
2022-07-11 11:51:41	Western Cape		Yes I do	Nuclear	This is not an immediate solution, but requires immediate action so that dependency on coal for base-load energy can be decreased as soon as possible. Wind and solar are good for short-term small capacity, but not for the long-term base load.	Derry	employed individual
2022-07-11 11:49:28	Western Cape		Yes I do	Nuclear	Not always wind but mostly sunny South Africa Wind mostly alongside the coasts therefore windturbines is a good alternative Nuclear would be the most stable supply of power for south Africa	Eben	employed individual
2022-07-11 11:33:18	Western Cape		Yes I do	Nuclear	Nuclear energy is the safest power source and in the right hands will be the best method to generate electricity for South Africa before renewable energy power sources can be put into place after nature study impacts are completed.	Anneke	employed individual
2022-07-11 11:26:04	KwaZulu-Natal		Yes I do	Nuclear	I think if there is a competition with Eskom we won't have in this mess as we in now. Let's allow independent power producer to supply electricity	Sikhumbuzo	employed individual

2022-07-11 11:19:13	Gauteng	Yes I do	Nuclear	All options should be pursued in view of overcoming the situation we find ourselves in now. I have no doubt that Solar and Wind can be beneficial, but these options don't provide a holistic result on an overcast day. Gas is an option (Saw this in Israel, how coal fired power stations were modified to using gas?) Government is dragging its feet, at the expense of ordinary South Africans and more so from a business point of view. Minister Mantashe has failed us and he is not qualified to head this department - coupled to the fact that he is a dishonest corrupter. Thanks Sean	Sean	employed individual
2022-07-11 11:18:42	Mpumalanga	Yes I do	Nuclear		David	employed individual
2022-07-11 11:10:53	Western Cape	Yes I do	Nuclear	We have a Nuclear Power Station at Koeberg. It needs some love but it can be done for way way less than what was squandered at Medupi. As long as the ANC and BEE is not part of the process there can ONLY be success. No foreign country should be involved either! This whole process needs to be kept transparent and Mantashe should also take a hike...in fact the ANC should not be allowed to be part of this process. Gordian must also be kept far away from this and any political interference should be dealt with criminally. The Unions should also stay away from this process. This is not another opportunity for self enrichment but this is ABOUT OUR COUNTRY!!!	Paul	employed individual
2022-07-11 11:10:51	Gauteng	Yes I do	Nuclear	The whole world is coming of age and nuclear power is only the best way forward. Any town planning or expansion projects must also include increased power generation endeavours because the country has just been growing residential areas without looking into the strain on energy. Just one perfectly constructed nuclear plant should suffice.	Vusani	employed individual
2022-07-11 10:57:29	Gauteng	Yes I do	Nuclear	Privatize Energy in South Africa. State involvement in energy has run it's course. Too much red tape and uncertainties have led to our terrible energy crisis. Privatization will allow competition which in turns allows for better services and better supply of electricity. There are dozens of companies, if not hundreds, willing to enter the energy generation space to fix the load shedding issue. We need their help. Our country is suffering.	Christiaan	employed individual
2022-07-11 10:47:33	KwaZulu-Natal	Yes I do	Nuclear	At this stage in South Africa any form of electricity will do, given the total inability of Eskom to do so. Privatise power generation to scrap corruption, inefficiency and government totalitarian control!!	Douglas	employed individual
2022-07-11 10:42:51	Western Cape	Yes I do	Nuclear	Nuclear remains the best method of generating electricity	Josias	employed individual
2022-07-11 10:42:03	Gauteng	Yes I do	Nuclear		Sanchia	employed individual
2022-07-11 10:26:56	Eastern Cape	Yes I do	Nuclear	First and foremost, we need to open up the retail element of electricity supply. This will slow the likes of Total Energies, Engie, Drax, EOn to enter our market and provide investment into the generation segment. Eskom needs to be split up and maintain focus on repairing and maintaining the grid and allow independent suppliers to handle the supply . This will allow a more transactional and transparent approach to investing in renewal in the form of cfd fit charges	Jason	employed individual
2022-07-11 10:11:36	Gauteng	Yes I do	Nuclear	I am no expert but I believe nuclear power is the cleanest and cheapest. I do believe in solar power too but you gave me the choice of only one option in your drop down.	Melanie	employed individual
2022-07-11 10:06:44	Gauteng	Yes I do	Nuclear	Nuclear energy is quite expensive for the initial build, but carries so many other positives that will rightly outweigh any of the negatives. It's cheap to run, so ROI is high. It's constant. Has zero carbon emissions. With the correct disposal of nuclear waste, the only outright negative impact can be negated. With modern technology, and the correct education, catastrophic events will be at minimal risk. Privatising this might be a good solution. Nuclear, on the other hand, is long term. For a shorter term solution, the government can invest in quick energy solutions like solar. Having more solar at a cheaper cost can be beneficial. Creating a private but shared battery network can assist in giving the current network an additional boost. Citizens can get credited for power being pushed back to the grid. These batteries can help store excess power from current generation methodologies and return it to the grid when needed.	Marius	employed individual
2022-07-11 09:44:55	KwaZulu-Natal	Yes I do	Nuclear	Nuclear power is strong	Thulani	employed individual
2022-07-11 09:41:39	Gauteng	Yes I do	Nuclear		FRANCOIS	employed individual

				<p>I support Nuclear. The ratio of fuel vs power output vs waste is the best out of any of the power production technologies. As I understand, all the waste produced by Koeberg (which is an old tech nuclear plant) is still contained on site!</p> <p>Please note the difficulties and prohibitive cost of "green" electricity in Germany, who have closed most of, if not all, their nuclear plants to go "green". Now due to the difficulty of getting gas, they are pushing to re-instate their nuclear capability.</p> <p>Secondly, we have coal. This is the immediate second best option; Modern high-efficiency coal fired power stations. We need to stabilise energy production. It is critical to do that, to be able to improve our economy, so that we can be in a position to increase green options later. (i.e. when the people can afford it).</p> <p>The other sources of energy; gas, diesel, hydro, puts us at risk, as we have limited resources available (gas, water for hydro), so we would have to import diesel, gas etc. which could raise our cost of electricity even more.</p> <p>Wind is too inefficient - low power output, large areas of land required; high maintenance.</p> <p>Solar - how much toxic waste is produced during the manufacturing of solar panels? And then how much waste is produced when breaking down old toxic panels? Also you need large areas of land available.</p> <p>I support Independent Power Producers; There needs to be at least 2 licenses granted to large scale power producers, so that we don't have a monopoly, to keep electricity costs in check, and then it should also be possible for businesses and individuals that have the ability or means to supply electricity on a smaller scale, to sell it back to the grid; when they have more than what they use available.</p>		
2022-07-11 09:38:55	Western Cape	Yes I do	Nuclear	We need to empower our citizens; provide stable and affordable electricity; to improve instead of impoverish the next generation.	Darryl	employed individual

2022-07-11 09:07:07	Free State	Yes I do	Nuclear		Lizelle	employed individual
2022-07-11 09:06:02	Gauteng	Yes I do	Nuclear	Ensuring that independent power producers are able to supply electricity as quickly as possible is what this country needs due to the current state of Eskom.	Brett	employed individual
2022-07-11 08:49:44	KwaZulu-Natal	Yes I do	Nuclear	We are in a crisis, electricity should not be a luxury. End Eskoms corrupt monopoly and allow independent suppliers and for domestic solar generators to feed back into the grid immediately!	Ken	employed individual
2022-07-11 08:47:08	Gauteng	Yes I do	Nuclear	<p>Nuclear has the least long term environmental impact compared to other non-renewable power sources and solar power. Also, the amount of energy produced by one single plant, ie one project, is multiple times what you would get from a solar or wind farm, for instance, while using a fraction of the land surface area. This will be much more efficient in solving the SA power problem. Obviously studies need to be done.</p> <p>However, I believe that this is not just about 1 project but about opening up the grid to everyone, and every kind of power input, such as excess power from solar and wind, biogas / biomass / landfill gas to energy. Every little bit will help.</p>	Benita	employed individual
2022-07-11 08:44:13	Western Cape	Yes I do	Nuclear	<p>Nuclear power, if done correctly, and not trying to make use of untested experimental plants, is the cleanest and most reliable source of power of earth to date. Koeberg power station shows us this. It has been online since 1984, now almost 40years old and has done less environmental damage than any other power plant in the Southern Hemisphere. Zero emissions into the atmosphere.</p> <p>Build more power stations like Koeberg power station at Kleinzee on the west coast of the Northern Cape province. It is a ghost town and already a restricted area! They could also do with the employment.</p> <p>Our nation is well aware the power shortage issue is due to gross miss management in the past.</p>	Stuart	employed individual
2022-07-11 08:41:21	Western Cape	Yes I do	Nuclear	Allow for IPP to help alleviate loadshedding	Niel	employed individual
2022-07-11 08:40:40	Gauteng	Yes I do	Nuclear	Nuclear fission is nearly 8,000 times more efficient at producing energy than traditional fossil fuels. That's a considerable amount of energy density. For now, privatizing supply is the only option we have for immediate relief.	Warren	employed individual
2022-07-11 08:39:00	Gauteng	Yes I do	Nuclear	The easiest to get the golden ticket would actually be for the ANC to resign. Now we want the ANC (That broke Eskom) to fix it? Are you thick in the head?	Laubscher	employed individual
2022-07-11 08:29:56	Gauteng	Yes I do	Nuclear	Get independent power producers to supply the grid with solar/wind/gas power. Get a non corrupt nuclear plant project going.	Gideon	employed individual
2022-07-11 08:29:19	Gauteng	Yes I do	Nuclear	Coal is running out, we need to find an alternative, and soon	Burgher	employed individual
2022-07-11 08:25:11	Gauteng	Yes I do	Nuclear	Nuclear delivers the most power for the minimum land use. Cost per megawatt is similar to solar. A solar array for a family of four is about R 100 000. Nuclear is about 1 tn. Divide by 60 million citizens is R 16 667 per person, or 67 000 per family. It's actually slightly cheaper to go for nuclear. The only issue is delay. In the meantime, we can start making law that all new buildings have to be self-powering.	Anony	employed individual

2022-07-11 08:20:10	KwaZulu-Natal	Yes I do	Nuclear	From what I've read, it seems Nuclear would be the most stable type of electricity generation for SA. It would not be the safest option, but would be stable and a better option than coal.	Dylan	employed individual

2022-07-10 21:23:06	Western Cape		Yes I do	Nuclear		Conrad	employed individual

				<p>Nuclear gets a bad wrap due to the events at Chernobyl, but with proper management it is the most efficient way of generating power.</p> <p>With nuclear you get out 99% of the energy that you put in and the waste disposal can be done cleanly if done properly. It also has by far the lowest carbon footprint.</p> <p>With coal you only get out about 50% of the energy that you put in.</p> <p>A team of 2 specialized engineers can build a safe, reliable, small nuclear generator, the size of a car engine, in their garage in a matter of 3 months or less. We don't need massive billion-dollar nuclear power plants. We need millions of small nuclear generators that get serviced individually on a regular basis by companies who hire specialists in this field. If opened to the public sector, competition will drive the price of these nuclear units/pods down to an affordable cost.</p> <p>Besides nuclear, solar might make a dent, but, at the scale and volume that we are operating, solar cannot simply replace our coal-fired power plants. Although, independent solar providers might be able to help out here and there.</p> <p>Wind power generation is an economic scam for the most part. Stay as far away from this as possible. The best it can do is to serve as a means of virtue signaling for alternate sources of power generation, without actually generating a significant amount of power. This doesn't solve any of our problems.</p> <p>We don't have mountain ranges in the majority of South Africa, so only some areas can operate on hydro-electric power. Most of the areas that can already do.</p> <p>The coal-fired power plants aren't going away immediately. Even if we start unloading selected regions off Eskom's supply onto small nuclear power generators, the rest of the regions will still need the coal-fired power plants.</p> <p>Unloading selected regions onto their own smaller nuclear generators does however serve as an actionable plan to systematically and incrementally offload the load from Eskom over time.</p> <p>At some point Eskom might even be able to have their existing systems online 24/7 die to only having to supply to certain regions. This will enable them to get out of debt since their maintenance will only need to be done for power plants that supply to the remaining regions.</p> <p>Independent companies can then buy out the power plants that Eskom doesn't need at that point and supply their own power if it is still a viable market.</p> <p>Overall, the more independent companies there are to provide the service of energy, the better it can be managed, and the smaller the cascading effect of an issue in one energy supplier can be.</p>		
2022-07-10 21:21:54	Gauteng	Yes I do	Nuclear	It's time South Africa takes some the eggs it's got in Eskom and hand them over to companies with teams that have the focus and capacity to look after them.	Gustav	employed individual

2022-07-10 11:04:02	KwaZulu-Natal		Yes I do	Nuclear	South Africa must use what ever energy is suitable for each region. Government must stop waisting tax payers money and open up all posible solution for tye interest of tge whole country. I believe the ANC should resign it is a disgrace of what they have done to the country so far. They should swallow their pride, they have failed Nelson Mandelas proficy of building a rainbow nation and have only used their power for building their own riches	Dieter	employed individual
2022-07-10 10:54:26	Western Cape		Yes I do	Nuclear		M	employed individual
2022-07-10 10:50:34	Gauteng		Yes I do	Nuclear	Nuclear is the only sustainable alternative for the medium- to long-term, not only in SA, but worldwide. In the interim, coal is the only viable alternative for SA, as production (and eventual de-commissioning/replacement) of solar panels, wind turbines and their required storage batteries are not quite as environmentally friendly as many seem to think.	Wouter	employed individual

2022-07-10 10:42:45	Gauteng		Yes I do	Nuclear		Mervyn	employed individual
2022-07-10 10:39:42	Gauteng		Yes I do	Nuclear	We own Kragbron and have the top nuclear physicists and SA nuclear technology on board. We could have been half way through a nuclear build but we get stopped at every corner with red tape. Contact me if you are serious about doing something real.	Olivia	employed individual
2022-07-10 10:34:04	Gauteng		Yes I do	Nuclear		Juliaan	employed individual
2022-07-10 10:24:35	KwaZulu-Natal		Yes I do	Nuclear	We need the cheapest reliable energy source which however needs to be safe in the country.	Nkuthalo	employed individual
2022-07-10 10:17:46	Mpumalanga		Yes I do	Nuclear		Pieter	employed individual
2022-07-10 09:39:15	Western Cape		Yes I do	Nuclear	28 years in power and our government has gone nowhere but backwards. Nuclear would be the most immediate way to fix our problems but with that been said, we have a lot of open land where solar and wind farms can be built which can also turn things around drastically. Instead of pocketing all our money, government can put 5 solar panels on every household roof to generate a small amount of electricity to pump back into the grid. If every household had this in place our power worries would come to an end.	Gianluca	employed individual
2022-07-10 09:13:41	Western Cape		Yes I do	Nuclear	How can there still be a debate about whether Eskom and the ANC are able to fulfil their mandate to be of service to the energy payers and voters? They have failed. Instead they are content to cripple the country, destroy the infrastructure and not plan for the future. They have to be stopped. Privatisation and competition is the only solution!	Sedick	employed individual
2022-07-10 09:05:27	Gauteng		Yes I do	Nuclear		Riaan	employed individual
2022-07-10 08:57:09	Western Cape		Yes I do	Nuclear	There are many ways to immediately address the dire situation that South Africa is facing... it will not be an overnight fix, but getting rid of corruption, cadre deployment and allowing ability and skill set to be the main criteria for employment would go a long way to fixing Eskom. The ANC Government are the main problem to the decay and destruction of SA's electricity capacity and Eskom's infrastructure...	Steven	employed individual
2022-07-10 08:56:23	Gauteng		Yes I do	Nuclear	Modern nuclear production is far safer than the dinosaur we have in Koeberg. France runs multiple nuclear stations safely, cleanly, and efficiently.	Rory	employed individual
2022-07-10 08:41:53	KwaZulu-Natal		Yes I do	Nuclear		Rickie	employed individual
2022-07-10 08:17:23	Western Cape		Yes I do	Nuclear	The power station should have been built long ago then we wouldn't be sitting where we are today	Nicholas	employed individual
2022-07-10 08:13:18	Gauteng		Yes I do	Nuclear	The network requires a stable base load. Renewables cannot provide this. Nuclear is a clean energy. More research should be done on spent fuel usage or storage. Old mine shafts? SA has no natural threats to nuclear installation such as earth quakes or tsunamis.	Jacques	employed individual
2022-07-10 08:09:29	Western Cape		Yes I do	Nuclear		Mathew	employed individual
2022-07-10 08:04:53	Western Cape		Yes I do	Nuclear	Allow 3 different service providers so there is competition and managed. Each acting independently not owned by one corporation.	Darryl	employed individual
2022-07-10 07:38:08	Free State		Yes I do	Nuclear	While short-term power solutions have their benefits, independent power producers offer the best of both worlds by providing sites with stable, energy-efficient power which is geared for long-term results. This can improve sustainability for businesses and communities while enabling the use of renewable energy innovations.	Teboho	employed individual
2022-07-10 07:34:27	Western Cape		Yes I do	Nuclear	Modular nuclear plants are the best long term solution that is good for the environment as well. Legislation needs to be amended to remove red tape and allow independent power producers to resolve the crisis.	Jonathan	employed individual
2022-07-10 06:58:53	KwaZulu-Natal		Yes I do	Nuclear	It has been over a decade since Eskom began load shedding and it is only getting worse. The organisation as a whole is clearly unfit to reliably provide electricity to South Africa.	Josh	employed individual
2022-07-10 06:43:06	Gauteng		Yes I do	Nuclear		Rowan	employed individual
2022-07-10 06:13:23	Gauteng		Yes I do	Nuclear	In my opinion any other power source would be better than Eskom, if its gas, nuclear, solar, anything that we as the people can use, because as it stands now, we can not carry on, paying for something that is non-existent	Elize	employed individual
2022-07-10 06:12:51	Western Cape		Yes I do	Nuclear		Ashraf	employed individual
2022-07-10 05:11:46	Western Cape		Yes I do	Nuclear	Nuclear is the most reliable and clean energy. Solar gas hydro are short term solutions. No coal	Miranda	employed individual
2022-07-10 05:07:08	Western Cape		Yes I do	Nuclear	Eskom generating units, with the exception of nuclear MUST become IPPs with PPAs for supply to a National Grid, which supplies to independent distributors that supply clients. Nuclear is the best (reliable & clean) long term option for base load supply. Gas & renewable are the only responsible short term option. Avoid coal.	Peter	employed individual

2022-07-10 04:36:03	Western Cape		Yes I do	Nuclear	The people of South Africa deserve to have power no matter who provides it. This will also ensure that the people have a choice in whom they want as a power provider and not be forced to use only one government owned service, which at this stage is undeniably the most unreliable service in South Africa but yet the most basic of requirements for any household. Give the people what the people need, choice.	Cedric	employed individual
2022-07-10 04:18:34	KwaZulu- Natal		Yes I do	Nuclear		Drummond	employed individual
2022-07-10 03:52:17	Gauteng		Yes I do	Nuclear		Kgomotso	employed individual
2022-07-10 03:37:02	Western Cape		Yes I do	Nuclear	We already have a good understanding of nuclear power and our relationship with France would help us build stations quickly. Quite frankly, any form of power that can be built quickly without too many people stealing the funds would be great.	Richard	employed individual
2022-07-10 03:11:42	Gauteng		Yes I do	Nuclear	Nuclear energy is clean and reliable. It is far less environmentally damaging than any other option considering the power generated thereby. South Africa has adequate engineering know how to implement and maintain the infrastructure. Wind and solar cannot supply reliable base load energy. Furthermore storage options are inefficient and unreliable. Renewables are not designed to work with the national grid and the environmental effects of rare earth metals mining as well as the related slave and child labour is conveniently ignored by most. Warlords, cartels, corrupt politicians and despots gain from the promotion of so-called 'renewables.' Nuclear energy is the only kind that's truly renewable. However it must be properly regulated and transparent in order to prevent corruption. There are new technologies and smaller reactor designs available now. Koeberg should also have its useful life extended. The WC government needs to stop relenting to green zealot ideologies which aren't interested in scientific realities.	David	employed individual
2022-07-10 02:44:51	Gauteng		Yes I do	Nuclear		Michelle	employed individual
2022-07-10 02:15:36	Gauteng		Yes I do	Nuclear	Nuclear is the best long term solution, but then also there is always wind and sun in SA, we do have rivers, why can we not make wind farms for every municipality, or solar stations, or even power generators using our rivers to generate power for us, but then also all this including the nuclear will only work if it is not stolen, bankrupt or wrong something..... but then some one will again make him self rich and steal everything, it is mos SOUTH AFRICA, whe and I say WHE beacouse all of us big, small, young, old, is all getting this same problem "No electricity". It needs to be sorted	JP	employed individual
2022-07-10 01:49:39	Western Cape		Yes I do	Nuclear	Nuclear is the only good long term option. Coal / Diesel / Gas may fill the gap in the meantime but the environmental cost is not worth further investment in my opinion. Hydro : MAYBE but "clean" isn't necessarily "low impact". Hydro claims vast swaths of land for reservoirs. Do we have that land and can we justify this use. Solar / Wind : Don't produce when there's no sun or wind... it's easier to steal a solar panel or 20 or 50 from a field in the middle of nowhere... also, you know these "clean energy alternatives" aren't actually clean. Wind turbines have to have their blades replaced every so often and what do you do with a 50m long piece of fiberglass and plywood? You throw it on a landfill. EZ	Anton	employed individual
2022-07-10 01:41:44	Western Cape		Yes I do	Nuclear	Nuclear seems the most stable as long as it's managed efficiently and safely. Solar is also a good bet, considering we get year round sun in most of the country.	Olivia	employed individual
2022-07-10 00:51:16	Western Cape		Yes I do	Nuclear	SMEs and industrial area companies could be incentivised to use their large roof areas for solar. Excess solar energy could feed back into the grid helping out other consumers in the same area. We should have gone more nuclear 28 years ago, but we know how that went..... stupid anc. Wind farms in some areas could also help. But doing something is better than nothing, which is what our current gov is doing. CoCt needs to also ease up on certs and red tape nonsense! Yeah, I'm talking to YOU, DA! re ESKOM, they are extortionists. Their small print is Unfair Business Practice and they need to be taken to court.	Peter	employed individual
2022-07-10 00:44:53	KwaZulu- Natal		Yes I do	Nuclear	I don't support any fossil fuel generated power but as clean energy is the future of the world, South Africa should either lead the way with a well managed nuclear power plant, or start investing in large scale wind and solar energy as our landscape offers excellent potential in these fields of clean energy supply.	Gavin	employed individual
2022-07-09 22:47:50	Western Cape		Yes I do	Nuclear		Carla	employed individual
2022-07-09 22:25:33	Western Cape		Yes I do	Nuclear		Etienne	employed individual

2022-07-09 18:45:37	Gauteng		Yes I do	Nuclear	We need independent suppliers that will compete in a free market, free from government regulations. This will reduce price and enhance service offerings. Nuclear power is clean and sustainable, if managed correctly to the highest standards and efficacy.	John	employed individual
2022-07-09 18:39:35	Western Cape		Yes I do	Nuclear	Nuclear energy is internationally monitored and regulated. It is extremely efficient and suits the Western Cape best.	Olivia	employed individual
2022-07-09 17:54:58	Gauteng		Yes I do	Nuclear		Trudy	employed individual
2022-07-09 17:51:57	Gauteng		Yes I do	Nuclear	Anything that works should be brought forth. Eskom failed!	Teboho	employed individual
2022-07-09 17:33:55	Northern Cape		Yes I do	Nuclear	Open the market for independent power suppliers so that Eskom can finally die and that our tax money can be used for something other than corruption.	Maretha	employed individual

2022-07-09 17:06:20	Gauteng		Yes I do	Nuclear	We need energy mix, nuclear is the way to go	Atang	employed individual
2022-07-09 16:24:15	Western Cape		Yes I do	Nuclear	We needed to resolve this problem long ago, since we are sure government cannot handle it, it would be best to involve independants, especially people from over seas or who have years of industry experience regardless of BBBEE status. we cannot idly let you stand in the way of such a critical issue, remove all the red tape and get to work	Brendan	employed individual
2022-07-09 16:00:52	Gauteng		Yes I do	Nuclear		Andre	employed individual
2022-07-09 16:00:49	Outside SA	Germany	Yes I do	Nuclear	South Africa is facing a power crisis and the government wasd not able to provide enough electricity to its citizens for over 15 years now. It is time to end the governments monopoly on power production.	Sebastian W.	employed individual
2022-07-09 15:48:19	Eastern Cape		Yes I do	Nuclear	Independent Power Producers should be allowed to immediately supply South Africa with electricity.	Matthew	employed individual
2022-07-09 15:32:45	Gauteng		Yes I do	Nuclear	Sasol can provide power, leave Eskom to their own destruction and serve the people of South Africa! Privatization and competition will drive better service delivery.	Alzanley	employed individual
2022-07-09 14:47:15	Western Cape		Yes I do	Nuclear		Sharon	employed individual
2022-07-09 12:48:53	Gauteng		Yes I do	Nuclear		Niel	employed individual
2022-07-09 12:33:01	Western Cape		Yes I do	Nuclear	Nuclear will take some time to set up, but once running is the most effective, clean energy and is very sustainable in the long run. Perhaps solar would be the short term solution until further nuclear energy is available..	Janez	employed individual
2022-07-09 12:18:48	Gauteng		Yes I do	Nuclear	Optiins are ready and available but blocked by government because a monopoly. Competition will not only solve the crisis but will make electricity much cheaper.	Sam	employed individual
2022-07-09 11:59:43	Gauteng		Yes I do	Nuclear		Shaun	employed individual
2022-07-09 11:40:34	Gauteng		Yes I do	Nuclear	Nuclear is the most clean and efficient source of power that exists at the moment. Media and scientific consensus is nonsense. Objective facts are what matters and there are numerous scientists and climate activists that have seen the light of nuclear power. The information is there. The political will is not. Privatize the power industry with Eskom as the standards bureau and let companies compete to give South Africa power at the safest and best price.	Wayne	employed individual
2022-07-09 11:04:18	Western Cape		Yes I do	Nuclear	Although nuclear sounds like the least environmental friendly option, it is the cheapest option for recovering the energy producing deficit we have currently. There are plenty of solar power we can utilise as well, but it might not be able to provide consistent energy which is required now.	Jean	employed individual
2022-07-09 10:27:38	Northern Cape		Yes I do	Nuclear	The problem with solar power is storage. Wind is great but it has only a few areas in SA. Coal is basically on the way out. Nuclear is, at the moment, the best of the bunch. Although a potential threat [Russia, Japan] it has become so much safer. It only uses a small amount of nuclear material whereas coal power stations use a great deal and pollute the atmosphere something horrendous. Solar is the answer for this country, eg Northern Cape has 300 days of sun a year, but the problem is storage. When an effective battery is discovered solar is the answer. The other problem is Eskom, monopoly. It needs competition!	Angus	employed individual
2022-07-09 09:55:30	North West		Yes I do	Nuclear		Elaine	employed individual
2022-07-09 09:21:19	Gauteng		Yes I do	Nuclear	The most important factor is for electrical power producers to be run by engineers and procurement to be based on an open tender system governed by merit.	Brian	employed individual
2022-07-09 09:09:02	Western Cape		Yes I do	Nuclear	Nuclear is the cleanest energy we have, and been proven pretty safe. We need To do eat Germany does with energy, people can buy energy from lots of different sources, competitively. And they also charge an average rate For 6 months, and they have it all worked out. On top of that, they drop your rate and congratulate you if you use less than the average household of your size. 2 people in a house? You pay less. 6 people in a house, you pay the average use of 6 people. But you see, this only works if you know exactly what's going on in the house	Michéal	employed individual
2022-07-09 08:30:20	Gauteng		Yes I do	Nuclear		Talani	employed individual
2022-07-09 08:20:00	Eastern Cape		Yes I do	Nuclear	Nuclear will take time to develop in certain parts of the countries and outside the governments, "activists" in South Africa, somehow, have a lot of power. Nuclear has been shown to be the most cost-effective and consistent method of power production. Private institutions must be allowed to produce this power. We cannot allow Eskom to continue on this tread. The recent salary increases clearly indicate that the power distribution is uneven. The legislation must be decriminalised. This could create a lot of investment in South Africa, it will boost the economy and provide work to the unemployed. However, it should not be an extended bureaucratic process. Make it quick and easy.	Tiaan	employed individual
2022-07-09 07:10:31	North West		Yes I do	Nuclear	Nuclear and solar in my opinion is the best method for renewable energy that will work for SA	Dawie	employed individual

2022-07-09 05:29:17	KwaZulu- Natal		Yes I do	Nuclear	To open the door to independent power supplies is the perfect solution to our country's electricity supply woes, which we're brought on by the corrupt Zuma /Gupta tyrade. For the sake of businesses in SA, independent power is essential!	Jennifer	employed individual
2022-07-09 04:49:18	Gauteng		Yes I do	Nuclear		Theresia	employed individual
2022-07-09 04:28:07	Free State		Yes I do	Nuclear	In order for the electricity crises to be resolved, governments involvement should be limited as they are incompetent and corrupt. Nuclear is clean and save why to produce electricity, however it should be manage with private company without government involvement.	Shaun	employed individual
2022-07-09 04:05:57	Gauteng		Yes I do	Nuclear	I believe the SOe eskom should continue to supply electricity. No independent producers are needed.	Yvonne- Yvette	employed individual
2022-07-09 01:16:12	Gauteng		Yes I do	Nuclear	Opening the way for independent power producers is possibly the only thing that will save our country from this serious dilemma.	Alicia	employed individual
2022-07-09 00:53:35	Gauteng		Yes I do	Nuclear	Load shedding is becoming absolutely ridiculous and economically dangerous. Something like this should have happened years ago. Eskom needs to wake up.	Roy	employed individual
2022-07-08 23:51:12	Gauteng		Yes I do	Nuclear	Because it is the most readily available	Tracy-Lee	employed individual
2022-07-08 23:33:37	Western Cape		Yes I do	Nuclear		Brandon	employed individual
2022-07-08 22:25:46	Gauteng		Yes I do	Nuclear	Just allow whatever form of power is available to be utilised. Eskom is unable to provide the whole country with power, why keep us dependent on them?	Pierre	employed individual
2022-07-08 22:14:21	Gauteng		Yes I do	Nuclear	Nuclear energy will be perfect for our environment, along with solar energy it will be efficient and very cost effective for the poor of the poorest. Judging from the state of our economy it will suit us perfect. Unemployment rate in South Africa it is sky rocketing every day. People are loosing their jobs on a daily basis. So I think this will be the best solution.	Stephen Matome	employed individual
2022-07-08 21:26:39	Gauteng		Yes I do	Nuclear		Christian	employed individual
2022-07-08 21:13:29	Gauteng		Yes I do	Nuclear	We need to create tax incentives for households to install solar - the tax forfeited in the short term would be repaid immediately by more productive citizenry, creating more income. Tax rebates could be staggered over a number of years to lessen the impact on the fiscus. We also need to allow municipalities to become energy autonomous, by being able to procure power from whomever they wish, including individuals.	Brian	employed individual
2022-07-08 20:53:49	Limpopo		Yes I do	Nuclear	Energy is the future	Mokutu	employed individual
2022-07-08 20:38:33	Western Cape		Yes I do	Nuclear	Nuclear is high yield, and relieve, and we need to address the huge shortfall in supply over demand. Wind and solar renewables are definitely the clean energy alternatives to dirty coal	Michael	employed individual
2022-07-08 20:29:22	Gauteng		Yes I do	Nuclear	Nuclear will provide large amounts of generating capacity to the grid. Contrary to common beliefs, it's a very safe energy source and has minimal impact on the environment.	Bernhard	employed individual
2022-07-08 19:55:47	Gauteng		Yes I do	Nuclear		Kgomotso	employed individual

2022-07-08 19:47:50	Gauteng	Yes I do	Nuclear	<p>The point of NERSA should not to be the gate keeper of energy producers, the point of NERSA should be to regulate the power/gas/petroleum, to make sure whom ever works in these industries does so to specific standards, compatible with the national transmission/storage/transportation of these products. There should be no "licenses" to generate power, what there should be is inspectors to check that the power being produced is of the right frequency and voltages. They should at most be involved in the distribution of these products to do the load balancing / logistics where required but not be involved at all with the creation of new power stations or the like. They can be involved in disputes between communities and new proposed plants or activist groups vs producers STRICLY as mediators and inspectors making sure that all environmental laws and community inputs have been adhered to, but that is all. If they find something has been overlooked or not complied with then they should have the power to tell the offending party to get the required things in order before continuing, but not pick and choose how many companies may operate in the energy sphere.</p> <p>If the red tape is scrapped, a multitude of private producers will jump at the chance to open doors, they might even push through smart meter installations across the nation to keep track of which customers are theirs and not their competition etc. which will force all possible consumers to also move to some sort of monitored system, which will also allow selective "load shedding" to only those who according to their smart meters are defunct payers etc. . The poorest of the poor and those in government shelters should be serviced by Eskom (and requires Eskom linked smart meters), anyone else should buy power from the probable various new vendors linked to their various smart meter accounts.</p> <p>To not make ESKOM totally obsolete, the government can institute a policy that all international power sales must go through Eskom, and any additional power independent producers make and not sell, can be sold to Eskom at cost for resale in Africa at a profit for Eskom to help with offsetting cost to the poor and government shelters.</p> <p>This is the most fair between those who are able to pay pay for what they want, and also help those who can not pay for them selves.</p> <p>As for power type, Nuclear is by far the best option for stable large amounts of power, we have a multitude of 4Km+ deep mines that can easily be used as spent nuclear fuel storage. Additionally on both the east and west coast solar farms can be created, the sun sets roughly 1 hour apart on the two coast lines, which should help with evening peak usage as the entire solar system won't turn off at the same time.</p> <p>So in my opinion, a mix of Nuclear, Solar, Wind, and Tidal/Wave (especially near the Cape where the sea can be rough), if possible look at retrofitting old coal stations to something like nuclear/molten salt solar as in essence all power stations run on the same principle of boiling water to make steam to turn a turbine, just the heat source that changes, so it should be possible to exchange the heat source of older stations a lot more cheaply than building new stations.</p>	Izak	employed individual
2022-07-08 18:53:43	Western Cape	Yes I do	Nuclear	Eskom can no longer provide what we need due to mismanagement. They have had their Chan to sort themselves out and they haven't. They have not been loyal to us, therefore they don't deserve our loyalty anymore. Let independent providers take over. The only regulation needed is a fair competition one allowing the citizens to get their power at the most affordable rate. No price gouging like Eskom.	Brent	employed individual
2022-07-08 18:24:50	KwaZulu-Natal	Yes I do	Nuclear		Francois	employed individual
2022-07-08 18:11:14	Gauteng	Yes I do	Nuclear	I believe a monopoly in any market is not good for the consumer, in this case the country. Solar and wind are unreliable, especially during the night and are more expensive than nuclear. Nuclear produces approximately 17 times more power than a single solar farm with less damage to the environment and substantially less physical space. Solar and wind have proven to not work in more developed countries as well with some moving back to coal. We need a lot of power quickly and reliably which is why I say nuclear.	David	employed individual
2022-07-08 18:07:11	Western Cape	Yes I do	Nuclear		Danielle	employed individual
2022-07-08 18:04:53	Gauteng	Yes I do	Nuclear		Human	employed individual
2022-07-08 17:37:32	Western Cape	Yes I do	Nuclear		Suzette	employed individual
2022-07-08 17:04:33	Western Cape	Yes I do	Nuclear	We should learn from other mistakes. In the 80's part of Europe choose to stop nuclear and now these countries are importing power generated by nuclear plants situated in neighboring countries. Nuclear power is the way to go but of course the plants shall be built and managed by personnel with the necessary qualifications	Max	employed individual

2022-07-08 17:04:11	Gauteng	Yes I do	Nuclear	Unfortunately the electricity problem can't be solved within the next few months. Nuclear power stations can be used to generate large amounts of energy and modern nuclear stations are safe. The initial investment cost is somewhat high but this is the fastest solution to fix South Africa's power problem. Give every city a small nuclear reactor	Johan	employed individual
2022-07-08 16:56:15	Western Cape	Yes I do	Nuclear	South Africa should of allowed independant producers 15 years ago. If it had already been allowed then we could be using clean energy, but at this stage we need maximum output in shortest time so we unfortunately have to go Nuclear.	Peter	employed individual
2022-07-08 16:46:30	Western Cape	Yes I do	Nuclear	It's time to take away the monopoly from Eskom and to create some competition that would start to benefit the end-user.	James	employed individual
2022-07-08 16:27:16	Gauteng	Yes I do	Nuclear	As dangerous as Nuclear power plants can be, they give you more bang for your buck. I'm just concerned that there isn't enough skilled dedicated workers to maintain this very important system and things might go seriously bad if something isn't managed properly. I think tackling this power shortage issue should probably be done at multiple angles - solar, wind, hydro etc etc... all of them. Coal and gas are finite and won't last forever.	Cindy	employed individual
2022-07-08 16:23:31	Western Cape	Yes I do	Nuclear		Daniel	employed individual
2022-07-08 16:08:30	Gauteng	Yes I do	Nuclear	I am not a power expert but I believe we need to do whatever it takes to stabilize our power situation which will in turn improve the economic situation and general quality of life. Nuclear seems capable of providing huge amounts of power and if it's privately managed I'll have more faith in it's safety.	Annette	employed individual
2022-07-08 16:07:34	Gauteng	Yes I do	Nuclear	The fastest solution for South Africa's power crisis is for Government to get out of the way.	Charl	employed individual
2022-07-08 16:06:53	Western Cape	Yes I do	Nuclear	This option should only become a reality if we are assured the SA Government have no involvement in the Operations and Maintenance of the power station, ie totally privatised. Home owners must be incentivized to install solar such as signification Tax rebates and zero penalties for going solar.	Andre	employed individual
2022-07-08 16:00:40	Western Cape	Yes I do	Nuclear	First thing to do is get rid of the useless self serving ANC appointed kleptomaniacs in charge of ESKOM and privatize it. Then get private companies to start building three or four nuclear power pants.	Samuel	employed individual
2022-07-08 15:58:35	Gauteng	Yes I do	Nuclear	The current electricity situation is out of control. Lives, businesses, and the economy are being ruined and Eskom seem incapable of resolving it. We can't keep doing the same thing and hoping for a different outcome, we need other players to step in.	Alastair	employed individual

2022-07-08 12:57:53	Gauteng		Yes I do	Nuclear	I believe nuclear energy is the best for the near future. The technology is sound and these days you get smaller reactors that might be of use. Coal is also a viable solution if the state can get their power stations sorted out. Looking further into the future the county will have to adopt a hybrid methodology. Solar during the day hydro during the evenings. For solar the state should look at the solar farm in Upington which can store some of the energy it produces during the day to be deployed at night. Along with this flywheel energy storage should be considered. The main thing is we as a country will have to move away from only having one energy supplier as this is causing a major redundancy issue. Creating a more open market will create more businesses that can supply power and in turn create more jobs in other industries.	Jacobus	employed individual

2022-07-08 10:21:28	Gauteng		Yes I do	Nuclear	Privatize Eskom, fire all the management and staff stealing from Eskom and employ people who actually do the work. Scrap BEE we need the best qualified people to do the job, not friends and family member hangers on. Get the right people to do the repairs, utilize Nuclear power stations we have for now for but head towards Hydro and solar solutions for the future.	paula	employed individual

				<p>The government has demonstrated beyond a shadow of a doubt that they are neither capable nor competent to provide power to South Africa's grid. South Africa has been patient, but the rolling black-outs have only grown worse. Stage 1 to Stage 2, Stage 2 to Stage 4, and now Stage 4 to State 6. If I were a betting man, then I would venture to bet that Stage 6 to Stage 8 is somewhere on the short to medium term horizon. We cannot sustain an economy when the power is out 50% of the time.</p> <p>The government, in its sinful pride, cannot both fail to provide SA's power needs, and also restrict or encumber individuals in the private sector from fulfilling the needed mandate. You cannot refuse a bystander from providing medical assistance to a patient, while at the same time failing to provide it yourself. Or maybe it would be more accurate to say that you are kicking the patient on the floor.</p> <p>A solution: The government ought to split Eskom into power distribution and power generation groups. The government ought to sell Eskom (power generation) to the private sector and allow a for-profit model to rescue the business. Eskom (power distribution) should buy power (or receive donated power) from private individuals to sustain SA's load.</p> <p>Investment strategy: If the government wants to invest in power for the future, then the development should not be managed by the government (otherwise we will end up in the same position). Also, any investment should be toward nuclear power. Nuclear power is the only type of power generation that does not produce CO2 in operation, and is able to supply SA's power needs. There are many falsehoods about the fatality rates of nuclear power, please research the deaths per mega-watt statistics of different power generation methods, and compare them.</p> <p>Wind and solar are not capable of meeting of SA's power needs. Please learn from the mistakes of the European countries who have heavily invested in green energy, only to find that they have dips in power when the weather does not play along, and they have too much power on the grid in extreme weather conditions (so much so that they have to sell off power at a loss). Fracking (or natural gas) is also a good supplementary option.</p> <p>If the government is not willing to invest in nuclear or fracking, then the government will have to get over the fantasy that SA is a first-world country with fist-world CO2 problems: bite the bullet and burn more coal. Just because you are well-off and live first-world tax-funded lives, does not mean that the rest of SA shares your experience. We can cut back on CO2 once the nuclear reactors are operational.</p>

2022-07-08 09:26:13	Gauteng	Yes I do	Nuclear	<p>Good day. Eskom is under considerable strain, yet I believe the management team are acting in good faith to prevent a total collapse of the grid. I personally praise and support their valiant efforts to keep the lights on in our country. The problems faced by Eskom can only be overcome with the free market principle of supply and demand, deregulation, and immediate direct contribution from the private sector. The best solution is a blend of all available power generation resources, i.e. Wind, Solar, Coal, Hydro, and Nuclear. Each has its risk and benefits to humans and the environment, yet it is cost and ready supply that are the determining factors. In South Africa most nuclear fuels are extracted as a byproduct of mining. With developments in methods, technologies, and sciences, Nuclear has become safe, cheap, and relatively sustainable. South Africa already has enrichment facilities available (a legacy of the Apartheid Government's Nuclear Programme). Disposing of Nuclear waste can be overcome by converting abandoned mine shafts for safe long term storage and deterioration of its half life (a nice business model if expanded to include the safe storage of foreign nuclear waste) and it can eliminate our ZamaZama problem as well. Solar and Wind power ultimately do more damage than good, and are generally not as reliable or capable, considering that they are dependant on batteries for power supply and conversion. When considering the environmental impact (carbon footprint) and real manufacturing cost of both these options, even diesel is a better alternative. In these trying times it is easy to over react. Yet clear heads, common sense, reason, cooperation, healthy competition, and long term planning are absolutely essential to all of our economic recovery and continued survival. Unfortunately, this crisis does not only concern our generation, but the generations to come, and those that will inherit our country after we are gone. It is for them, and us that we must do the right thing now. I pray for our country and our leadership. And I thank you for the opportunity, your time and consideration in this matter. Sincerely. Arthur.</p>	Arthur	employed individual
2022-07-08 09:26:05	Gauteng	Yes I do	Nuclear	<p>It is clear that the current government and leadership of Eskom have cut corners for decades, and will only be able to fix their mistakes in coming years, not months or weeks.</p> <p>If they cannot competently maintain the power grid of the country, in order to maintain our economy and people's livelihoods, then outside assistance should immediately be able to come in and help.</p> <p>Businesses and people will be able to maintain their income, and the huge loss of revenue that we see every single day of loadshedding will stop. The only downside is to Eskom, they will not get as much revenue as before, but let's face facts: Eskom was squandering that money anyway. Let them fix their mistakes before we put our confidence in them again.</p>	Luke	employed individual

2022-07-08 09:21:02	Free State		Yes I do	Nuclear	SA's immediate urgent need to rid the country from load shedding lies with private energy producers who is ready and able to respond effectively, efficiently and cost effectively. Government has demonstrated its slow response, lack of proper planning and inability in execution of projects (Madupi & Kusile vast cost- & time to completion over runs). Coal, gas and diesel generation are all fossil dependant on fuel and non-friendly to the environment. This may be a short term answer though but should be phased out as soon as is practically possible. Hydro, solar and wind should be developed maximally being green energy and 'asap'. Long term, nuclear seems to be the answer as it is sustainable, produce very little 'by-products' and can be implemented in modules in a rather short time. Government should still be a role player but not be the dominant party and needs to be dictated by via the private sector actions. If it (government & Eskom) becomes obsolete along the way, so be it!	Louis	employed individual

2022-07-08 09:06:36	Western Cape		Yes I do	Nuclear	Nuclear energy has by far the highest capacity factor of any other energy source. Renewables are not efficient enough. It's a fantasy to believe it will solve the problem at large. It could only serve as a temporary solution to transition to nuclear on the lower energy consumer side. Freeing up the remaining Eskom energy to help the larger consumers like the mining and manufacturing industries until new nuclear power is established. Nuclear power is by far the most efficient and clean option. It emits 4 times less CO2 than solar power, 2 times less than hydroelectricity, and the same amount as wind power. Nuclear power require less maintenance and are designed to operate for longer stretches before refueling. It will take 5 years to build one so we better get started. Nuclear power can work providing it is not managed by government at all on any level apart from ensuring independent safety regulations. It should also not be beholden to any BBBEE policy. When it comes to nuclear you want the right skill and experience regardless of any other factor. Shale gas should also be considered as a complementary option. South Africa has 390 trillion cubic feet of technically recoverable shale gas resources in the Karoo. The problem with South African energy is decades of mismanagement. We do not lack energy potential. Let the private sector take over energy production. It is imperative to quickly remove any legislative barriers to allow their participation on a large scale.	Johannes	employed individual
2022-07-08 09:05:53	Western Cape		Yes I do	Nuclear	This doesn't even warrant an explanation/comment as it is that obvious! Eskom has a monopoly on supply and cannot make it happen despite every possible government bailout there is and ridiculous annual increases funding their inefficiencies so why not give someone else the opportunity to supply power SA so desperately needs? How can this possibly be a bad thing?	Morne	employed individual

2022-07-08 08:39:54	Gauteng	Yes I do	Nuclear	<p>Immediate rewriting of the policy is necessary to allow for independent power producers. The independent power producers should not be limited by the size of their production as well. What I mean by this is that we can allow large corporations, such as Sasol, to contribute to the grid with the power plants they already have. We should also allow for the individual homes who are already using solar power to contribute to the grid, and award them credits for their contribution. This will incentivize the implementation of more solar power for homes, reducing our power demands and increasing our capacity at the same time.</p> <p>Also it is a fact that nuclear energy is the safest, cheapest and most reliable option that South Africa has. Germany tried to implement only solar and wind, and now they have an energy crisis and need to import coal, oil and gas from Russia. Nuclear is not only cheaper and much more reliable than solar and wind, it is also safer and has less of an impact on the environment in the long run, because they require less space for more power generation, and the materials can be recycled. Solar panels and wind turbines cannot be recycled after their use, Modern nuclear plants are extremely safe, last for more than 50 years (compared to 20 years of renewables), and have extremely low amounts of waste that can be managed properly.</p>	Michael	employed individual

We should also allow for the individual homes who are already using solar power to contribute to the grid, and award them credits for their contribution. This will incentivize the implementation of more solar power for homes, reducing our power demands and increasing our capacity at the same time.</p> <p>Also it is a fact that nuclear energy is the safest, cheapest and most reliable option that South Africa has. Germany tried to implement only solar and wind, and now they have an energy crisis and need to import coal, oil and gas from Russia. Nuclear is not only cheaper and much more reliable than solar and wind, it is also safer and has less of an impact on the environment in the long run, because they require less space for more power generation, and the materials can be recycled. Solar panels and wind turbines cannot be recycled after their use, Modern nuclear plants are extremely safe, last for more than 50 years (compared to 20 years of renewables), and have extremely low amounts of waste that can be managed properly.</p>	Michael	employed individual
2022-07-08 08:34:48	Gauteng	Yes I do	Nuclear	<p>In a free economy, whoever provides the best service at the best price should be allowed to sell their services to customers willing and able to pay for it. Paying customers should be allowed to choose the best service providers and the price they are willing to pay.</p>	Gerrit	employed individual
2022-07-08 08:32:50	KwaZulu-Natal	Yes I do	Nuclear	<p>If everyone is talking green energy then Nuclear is the best solution. Solar farms are inefficient as they only produce power while we have sun. Secondly they are not green as the Carbon footprint to make solar panels and batteries is huge. Also disposing of end of life batteries and panels is way more bad for the environment than running a coal power station. Wind turbines also very bad for bird life and as with solar only generate power while the wind is blowing and seeing that wind speed varies the power output is not constant. Also it takes a wind turbine to offset its carbon footprint 200 years of running time.</p> <p>Secondly we must ensure that every energy producer is allowed to produce and add power to the grid and not just govt crony companies.</p>	Anton	employed individual
2022-07-08 08:32:32	KwaZulu-Natal	Yes I do	Nuclear	<p>If everyone is talking green energy then Nuclear is the best solution. Solar farms are inefficient as they only produce power while we have sun. 2022-07-08 06:54:16	Gauteng		Yes I do	Nuclear	The ANC has not improved a single SOE they have been involved in. Similarly, Eskom has now been redeuced to shambles and is incapable of providing South Africans with sufficient power. There is no way that they will ever recover from this as they would not even know how. Open up power production to anyone and everyone and let there be competition. Eskom has, in much the same way as most SOEs, turned into a kind of welfare system where undeserving individuals are provided with jobs/income and adding little to no value whatsoever. We need to rid ourselves of this. The bigger issue is government control and involvement which always leads to ideologies being forced onto institutions. We may very well not be able to cure this ail given the foundational, institutionalised, racism that is at the heart of everything the ANC is and does. We are living in 2022 and there is no place for this. Merit and skil is all that should matter.	Eben	employed individual

2022-07-15 16:02:02	Gauteng		Yes I do	Nuclear	While nuclear is 'feared' should there be an incident that causes the reactor to fail, the upside of nuclear is that, in private hands the construction and delivery will be guaranteed within the budget and time frames and the carbon fallout is negligible.	David	business owner
2022-07-15 15:37:26	Western Cape		Yes I do	Nuclear	We need to use all forms of power generation. I think Eskom should be scrapped. Electricity should be purchased from the cheapest, most reliable producer. I don't think South Africa is in the position to abandon coal. Nuclear is still the best, but keep the ANC away from any development.	PAUL	business owner
2022-07-15 11:50:46	Western Cape		Yes I do	Nuclear	Eskom is currently a monopoly. Any monopoly is bad for consumers. Simple. Read the Wealth of Nations for the great Adam Smith's great explanation about this. If there are a few competitors in the energy industry then energy prices will come down and there will be more energy produced. From reading a great book that has a large section on nuclear power https://www.amazon.com/Apocalypse-Never-Environmental-Alarmism-Hurts/dp/0063001691 I learnt that this may actually be the best long term plan.	Andreas	business owner

2022-07-15 08:14:18	Western Cape		Yes I do	Nuclear	South Africa must open up for alternative energy sources and suppliers for the good of the people. We are a mineral rich country with plenty of sun and none of this is being used to our advantage due to government control. Solar, nuclear, mineral should all be considered. Unfortunately the problems at Eskom are too ingrained politically and with corruption for there to be a solution. The country should move on and consider all energy solutions and give municipalities the right to buy independently away from Eskom.	Lisa	business owner
2022-07-13 19:17:17	Western Cape		Yes I do	Nuclear	I know nuclear is cleanest most efficient way to get a lot of energy to all the people who need it. I am not in favour of coal because we are a BRICS nation and the Chinese uses the lowest standards when it comes to coal mining to save on cost per output unlike their European counterparts uses cleaner more efficient coal plants. Solar and wind are not nearly good enough output wise to give us as South Africa enough energy with the amount of outside investment to produce the enough energy will wind and solar options it will eventually land on the consumer to pay back the investment which will drive up energy costs for the guys on the street. I vote for immediate action to privatize energy output in South Africa and believe Eskom is long past its due to fix the current energy crisis. I believe privatization of energy is the only way we will fix both our long and short term energy problems in this country. It will also supply Eskom with much needed consequences and motivation to deliver a superior product at lower price if they want to continue to exist and make money. It will win for everyone except for those that are busy with corruption which adding to problem in way we will recover from if we do not act now.	Jozua	business owner

2022-07-13 09:24:14	Gauteng	Yes I do	Nuclear	<p>Hi, Eskom has been in a monopoly for too long. They are misusing their position of power being the sole supplier and have no need to produce affordable electricity.</p> <p>Eskom is the single biggest reason for the economic downfall of our country as electricity users, small to large industrial consumers, have no other choice. I have seen how businesses have tried to cut back on expenditure every time there is a price increase. Initially capital expenditure, the operational expenditure in terms of maintenance, upgrades, repairs, training etc. and lastly letting staff go and allowing for the remaining - very thankful - they still have a job staff, do much more than they should. This all while the "fat cats" in government departments are getting above average increases and massive benefits at the expense of the people that keeps the economy alive.</p> <p>This has now reached a point where the disposable income of the average consumer has been depleted to a point where electricity is now a luxury if you can afford it, and if you can not - electricity theft is the answer. This is evident if the current non-technical losses of supplying authorities are compared to 20 years ago. These used to be single digit figures below 5%, this has now increased to double figures in the order of 25%+!! This means that the 75% being sold is not only 33% more expensive to recover the 25% loss, it is also due to the corruption, incompetence, over spending, irregular supply contracts and many other illegal business practices in Eskom. Where in the world, please tell me, do you supply the main component of an operation by the truck load while conveyors from the mines and railway access is available but not maintained or actually, consciously and maliciously terrorized and damaged to ensure that lucrative supply contracts by road are maintained?</p> <p>The IPP's should not be managed by the current corrupt government, it should be totally independent from the start. Analysis, processes, acquisition, evaluation, appointment, regulation, policing every single aspect of the IPP's MUST be done absolutely and totally independent from any government involvement, connections and trade unions. It must be absolutely transparent and competitive even if it means shutting Eskom down as the most inefficient producer in the world. NERSA should not even get close to this in any way as they are puppets of the government and just as inefficient. If they only did any half decent and looked after the consumers as they should, electricity might have been 50% cheaper that we are paying now.</p> <p>These prices are killing our economy, products are imported from foreign countries and landed in in our country for much cheaper that we can produce it...Why?? Because of our input costs of which energy and labor is the most expensive commodities.</p> <p>There must be more than 1 IPP to stimulate competition and drive cost efficient electricity supply tariffs. For once the consumer must have the choice of his supplier just as the choice they have when buying essentials like food.</p> <p>No new power plants should be built by Eskom as the designs are up to nuggets, budget is always 4 - 5 times more that what was budgeted for. This all due to incompetence and corruption. Things that we as a society can not afford any more. If we do not turn this ship around soon, due to our government being in lala-land and living the ignorant lifestyles they do, in the 15 car convoys, and 20 VIP body guard entourages without remotely experiencing what they have thrown the rest of the South African citizens into.</p> <p>Take everything away and live like the rest of us do and lets see if they enjoy that and still manage the way they do.</p> <p>I am just sick and tired of the total downfall of all system and infrastructure in our country. We have seen this so many times before around us, economically sound and stable communities falling into total chaos and poverty. I do not want to be in the situation where I am asked what South Africa were using before candles and have to reply.....Electricity.</p>	Jan	business owner
2022-07-13 09:18:32	Western Cape	Yes I do	Nuclear	<p>Despite views of the EU, we have seen first hand how France has had to provide power to the rest of Europe in this energy crisis. If an energy provider can supply nuclear, we never have to worry about days with no wind, cloud cover, battery storage (lithium mining) for storage. We create our own isotopes in SA and can provide our own future irrespective of other government decisions.</p> <p>The future of SA energy can be in the hands of the people. The ANC has continued to fail to public in a gross manner while keeping taxes as high as first world countries. It is obvious that SOEs will continue to fail and now is an opportune time to take the future into our own hands. On a side note, after 15 years of an isotopes decay, the residual waste matter wont take more than a basketball court of space and can be stored on site. When looking at this issue, let us judge the value of the outcome by previous energy track records and not the "kind" intent of a politician looking to make the "best" decision for the people.</p>	Sean	business owner

2022-07-12 20:04:17	KwaZulu-Natal	Yes I do	Nuclear	<p>We should have more power suppliers in this country. Load shedding has affected our economy in a way that is catastrophic, people will bear the brunt of this in years to come. We need to immediately get new energy sources or our country will no longer be this once beautiful South Africa.it once was. Why is this government still holding on to allowing only Eskom when they are bad news.</p>	Mohamed Akeem	business owner

2022-07-12 19:56:17	Gauteng	Yes I do	Nuclear	Modern nuclear plants and waste management is of the lowest costs per unit if power generated. Although it would take time to develop and a short term solution will also have to be implemented...such as a solar rebate from government for all private and solar installations with grid tie inverters.	Morne	business owner
2022-07-12 19:36:11	Western Cape	Yes I do	Nuclear		Raoul	business owner
2022-07-12 19:26:07	Western Cape	Yes I do	Nuclear	Nuclear is efficient , clean & safer than anyone expects and can deal with crisis on long term... instead of constantly paying catch up	Louise	business owner
2022-07-12 18:06:23	Gauteng	Yes I do	Nuclear	It is obvious that the ANC government is incapable of insuring reliable power through its corrupt parastate. Nuclear power has been proven, in France, to be reliable, efficient, and not environmentally damaging.	Jacques	business owner
2022-07-12 16:14:49	Western Cape	Yes I do	Nuclear	What happened to the pebble bed nuclear plants, they were supposed to be small and highly effective. Safe smaller nuclear plants are by far the most productive energy sources - like those that power aircraft carriers and similar. Next would be Solar and Wind. All three have environmental impacts. Bio-mass generation (burning of bio mass) is another source. Allowing 1000s of 25MW IPPs, for instance, using different methods of power generation at hyper-local levels would allow the grid to become stable and impervious to corruption and plant down-time.	Richard	business owner
2022-07-12 15:30:30	Free State	Yes I do	Nuclear	WILL NEVER GO OUT	Gerald	business owner
2022-07-12 14:59:25	Western Cape	Yes I do	Nuclear	Cleanest and most reliable	Eugene	business owner
2022-07-12 14:18:41	Western Cape	Yes I do	Nuclear		Stephane	business owner
2022-07-12 14:18:41	Western Cape	Yes I do	Nuclear		Stephane	business owner
2022-07-12 14:03:42	Gauteng	Yes I do	Nuclear	From what I understand nuclear power is *misunderstood* to be a dangerous option. I believe it to be an excellent alternative to coal in the medium term as an inexpensive, safe and environmentally friendly source of power.	Michael	business owner
2022-07-12 13:33:34	Gauteng	Yes I do	Nuclear	As a small business owner, we need reliable power and we need it now!	Timothy	business owner
2022-07-12 12:57:19	Western Cape	Yes I do	Nuclear		Carol	business owner
2022-07-12 12:30:18	Gauteng	Yes I do	Nuclear	Any form of power generation that offers the quickest time to bring it in line should be adopted. Whether nuclear solar or coal	Roberto	business owner
2022-07-12 12:11:01	Western Cape	Yes I do	Nuclear	Motivate individuals to add solar to their houses and business. Scrap the monthly connectivity fee that is charge, and scrap the maximum kilowatts they allowed to produce. By allowing business and individuals unlimited grid tied power we can reduce load. They add miniature modern nuclear power stations as they are doing in Canada and others.	Warren	business owner
2022-07-12 10:36:00	Gauteng	Yes I do	Nuclear	Sun and wind is "Green" options but will not be sufficient to address South Africa's needs for electricity. Therefore I support nuclear options like the Pebble bed reactor or one of the newer nuclear technologies that will be a safer option than the existing nuclear stations (Koeberg).	Daniel	business owner
2022-07-12 08:55:51	Gauteng	Yes I do	Nuclear	Pebble-bed nuclear power reactors are by far the cleanest and safest means of generating electricity. The inherent nature of a pebble-bed nuclear reactor is that it wants to shut down - it defaults to shutdown. In other words, unlike traditional nuclear reactors that want to melt down, the pebble-bed reactor needs to be constantly kept going. It is a safe technology. It is also possible to build quite small units, suitable for even small towns. It does not need constant access to a massive amount of water. It is also quicker to build than coal powered generators. In my opinion, coal driven generation is second best, after pebble-bed reactors. I support both.	Jacs	business owner
2022-07-12 08:53:38	Western Cape	Yes I do	Nuclear	The latest nuclear power option has a small footprint, is cost effective because of lifespan and has a significant lower visual impact on the environment	Greg	business owner
2022-07-12 07:34:16	North West	Yes I do	Nuclear		Henno	business owner
2022-07-12 06:48:14	Gauteng	Yes I do	Nuclear	They are already build you just need to update them and run them Why they were putting out of commission no one knows	Pieter	business owner
2022-07-11 23:44:40	Western Cape	Yes I do	Nuclear	A combination of Nuclear, Solar and Wind is the solution. SCRAP THE RED TAPE!!	Linda	business owner
2022-07-11 21:48:32	Gauteng	Yes I do	Nuclear	Load shedding is wreaking havoc on our country's economy and we need to do something NOW to stop these adverse effects! It's time to find a producer that can meet the country's energy needs. Renewables will not provide sufficient energy to meet the country's needs. Dirty power has numerous significant health impacts. Nuclear is the most reliable, safest and most cost-effective energy source for our country.	Lee-Ann	business owner
2022-07-11 21:05:10	Western Cape	Yes I do	Nuclear			business owner

2022-07-11 20:02:35	Western Cape		Yes I do	Nuclear	Although its very expensive to build, its the best solution to supply SA with electricity for many years to come. Take Koeberg for an example if only it was regularly upgraded and better managed, it could still last for much longer and its efficient although dangerous if not properly managed.	Daniel	business owner
2022-07-11 19:22:48	Gauteng		Yes I do	Nuclear		Michelle	business owner
2022-07-11 18:43:12	Western Cape		Yes I do	Nuclear		Dawie	business owner
2022-07-11 18:05:03	Gauteng		Yes I do	Nuclear		Garth	business owner

2022-07-11 14:38:53	Western Cape		Yes I do	Nuclear	Nuclear gives us a sustainable and affordable energy solution. I think all renewable sources should be considered.	Pieter	business owner
2022-07-11 14:34:14	Gauteng		Yes I do	Nuclear	I believe we should prioritise the use of nuclear and solar as far as possible for environmental reasons and that we should move away from entrusting anything to SOE's where activities are badly managed.	Jennifer	business owner
2022-07-11 14:19:50	Gauteng		Yes I do	Nuclear		Peter	business owner
2022-07-11 14:16:42	Western Cape		Yes I do	Nuclear	Our present situation necessitates the use of existing coal, gas and nuclear,. Solar and wind farms will give the ESKOM time to procure new Power stations for the future and to close down the old ones that have gone passed their design dates.	David	business owner
2022-07-11 14:04:44	Western Cape		Yes I do	Nuclear	The Nuclear pebble bed reactor system would be simpler to install and would limit the areas that are affected by outages as they are designed to supply +/- 5000 households. These reactors are capable of supplying continuous power and do not rely on the vagaries of nature! A proven system in operation currently in Europe.	Jonathan	business owner
2022-07-11 14:01:43	Gauteng		Yes I do	Nuclear	Nuclear power is the way to go because it will meet the countries energy demands way int the future. It must be built and run by an overseas company from countries such as China, Japan or France who are leaders in this field. Eskom must have nothing to do with it.	Herman	business owner
2022-07-11 13:39:57	Western Cape		Yes I do	Nuclear	I think a combination of solar, wind and nuclear is best.	Carol	business owner
2022-07-11 13:23:05	Western Cape		Yes I do	Nuclear	We need a cross-source approach. No single solution. Lead times for major capital projects are many years. We need an immediate smaller scale solution through IPP's.. eg solar, wind, smaller power stations etc. Whatever it takes!	Will	business owner
2022-07-11 13:22:23	Western Cape		Yes I do	Nuclear	If the ANC did not stop the previous government to continue with the extended Nuclear Program they had in place, we would never have had the country be stolen so blindly by Eskom. Goal is bad news, and so corrupt, the only sustainable power is Nuclear Power. No corruption can take place, no bad goal can be delivered etc.	Rene	business owner
2022-07-11 12:49:48	Western Cape		Yes I do	Nuclear	Nuclear is the cheapest, greenest and most stable way of making sure the energy supply is never under stress. Wake up you morons!	Norman	business owner
2022-07-11 12:39:40	Western Cape		Yes I do	Nuclear	PBMR - Pebble bed modular reactors can be put up in a relatively short time , the technology is far safer , the source is dependable and cn be placed close to where its needed PBMR in conjunction with solar and wind	marlene	business owner
2022-07-11 11:47:59	Eastern Cape		Yes I do	Nuclear		Glenda	business owner
2022-07-11 11:31:31	Gauteng		Yes I do	Nuclear	Eskom is being captured as a SOE stemming from the Zuma/Gupta era and therefore totally ungovernable. Unqualified and overpaid staff including sabotage should be addressed as a matter of urgency failing which Eskom should be replaced by independent private electricity suppliers. Electricity supply is a essential service and should not be subjected to any union strikes at all as these strikes should be totally illegal. Solar electricity for domestic use should be subsidized by government and any other form of cheap electricity generation for industrial use for example Nuclear , hydro, wind and solar should be implemented.	Anton	business owner
2022-07-11 11:19:19	Gauteng		Yes I do	Nuclear		Koos	business owner
2022-07-11 11:00:54	Gauteng		Yes I do	Nuclear	First of all, fire Minister Mantashe for delaying all alternative solutions. Then, investigate Nuclear in a fair and transparent process!	Ken	business owner
2022-07-11 10:53:45	KwaZulu- Natal		Yes I do	Nuclear		Jenny	business owner
2022-07-11 10:43:29	Free State		Yes I do	Nuclear	Nuclear is used by big economies and is sustainable.	THABO	business owner
2022-07-11 10:22:11	Gauteng		Yes I do	Nuclear	At this point, any type of generation will be better generated through private means rather than through the failing ESKOM. Nuclear has recently been classified as green in Europe, and is a viable and powerful solution for large generation capacity, as long as it is done privately.	Laura	business owner
2022-07-11 10:21:39	Gauteng		Yes I do	Nuclear	What ever our opinion is , if we still have a mafia government, no matter how positive our solution, it will never be implemented.	Hakim	business owner

2022-07-11 10:11:21	KwaZulu-Natal		Yes I do	Nuclear	It is quite obvious that our government has a policy in place and a method of operation to produce power in South Africa that is not working. Within a few years we will be in a situation where power will only be available every few days. It's time to bring in a system such as in the USA or UK where there are privately run and competitive power suppliers so that costs are kept down and production is kept high.	Nick	business owner
2022-07-11 10:03:45	Gauteng		Yes I do	Nuclear		Johannes	business owner
2022-07-11 09:48:12	Mpumalanga		Yes I do	Nuclear	Though Nuclear does pose long-term pollution to the environment, there have been newer technologies introduced like thorium reactors that are much more stable and less toxic. All methods pose long-term pollution problems in any case. Nuclear has better longevity and can be constructed and commissioned sooner at a lower cost for construction and of electricity.	Daniel	business owner
2022-07-11 09:45:03	KwaZulu-Natal		Yes I do	Nuclear	Nuclear is a very clean source of energy with minimal by product pollution. Way more efficient than coal.	Tim	business owner
2022-07-11 09:35:45	Western Cape		Yes I do	Nuclear	Renewables, Solar and Wind are obviously, the logical and common sense solutions, for both medium and long term. But, it appears that the powers to be are wasting time and playing politics. Power ships are also not the solution, nor is it cost effective. The current decisions regarding Powerships speaks for itself. There are already fingers in the pie and the consultative process is fraught with irregularities. Koeberg has served us well. However, it is nearing its end, with the powers to be seeking to extend its life by a further 20 years. For the medium to long term SA should build another Nuclear Power Station further along the west coast. We need security of power supply. Learn the lessons from other countries. Canada, for example has six (6) nuclear power stations. Their industries are thriving. They create jobs. There is a future fire the youth and school leavers., etc, etc. Because of Koeberg the assistance should once again be sought from France. And not Russia -with its inflated costs as became clear during the Zuma era. After, another, a second Nuclear Power is built, it will give us power security and the SA should go all out with the renewables, Solar and Wind etc. Gas? Mossgas?	Dudley	business owner
2022-07-11 09:34:18	Northern Cape		Yes I do	Nuclear		Rey	business owner
2022-07-11 09:11:40	Western Cape		Yes I do	Nuclear	Come on SA, smarten up. Make decisions that grow this country economically. Become a country people want to invest in and be part of. Do that, and we will all benefit in so many ways.		business owner
2022-07-11 09:09:20	Gauteng		Yes I do	Nuclear	we need private power suppliers as Eskom doesnt take its job seriously and just like when cellular and data came into the market, only then did Telkom start to work efficiently. The current system does not work and has no chance of working in the future. Let private companies offer power to the country.	Kyle	business owner
2022-07-11 09:09:13	Gauteng		Yes I do	Nuclear		Jana	business owner
2022-07-11 09:05:56	Gauteng		Yes I do	Nuclear	It is irrelevant which source of power is used, the problem is not the source of power, but the extreme level of incompetence within the current power utility. Over and above that the government has allowed the extremely high power cost increases to be milked out of the "cash cow" called the South African tax payer. We know that cadre deployment does not breed competence, efficiency or competitiveness. So convert Eskom to a private entity and let them compete in a capitalist market for business against others. Nuclear power will immediately produce the power required, and is not dependant on environmental conditions (wind is not guaranteed, sun sets once every 12 hours, and has a period of non generation), green energy can come when the base load that the country needs is secured. Hydrogen should also be considered as a source of green energy.	Claude	business owner
2022-07-11 08:57:01	Gauteng		Yes I do	Nuclear		Nkhensani	business owner

2022-07-11 08:52:51	Western Cape	Yes I do	Nuclear	<p>The best form of power for this country would be modular nuclear reactors, small ones placed strategically, to replace the existing power stations. With little to no investment the supplier would supply and install the reactor, charge for the electricity consumption to users and maintain the infrastructure.</p> <p>Immediately, a public-private partnership to implement nuclear thorium reactors that could replace over a period of time Koeberg especially where we have high consumption of electricity, South Africa will have clean renewable energy resources and it's completely safe.</p> <p>Solar and wind energy has a limited place but unfortunately pollution and the cost to manufacture and maintain the production facilities, especially wind farms, has turned into a nightmare across the world, a little research and one will realise that it is not a truly viable option. Secondly linked to our energy problem, we need to explore fossil fuel mineral deposits extensively south of South Africa ensure that we become a fossil fuel independent and stop harping on the fact that we going with electric vehicles when electric vehicles currently utilize electricity generated by fossil fuels to recharge. The long distances we travel in South Africa makes an electric vehicle impractical. Let us systemically utilise the resources we have and need to generate electrical energy as required and move us forward without financially crippling this country any further.</p> <p>Common sense and level heads need to prevail to ensure a future for the generations that follow us.</p>	Charles	business owner
2022-07-11 08:46:17	Eastern Cape	Yes I do	Nuclear		Gustaf	business owner
2022-07-11 08:23:42	Gauteng	Yes I do	Nuclear	Solar in the short term but for an industrialised society Nuclear is the only long term solution.	Gary	business owner
2022-07-11 08:23:26	Gauteng	Yes I do	Nuclear	We should absolutely allow independent power producers to join the SA market and Ban government employees from having any stock in these companies (cell phone companies are next). Solar and wind are not sustainable (wind turbines kill too many flocks of birds etc). If we have an open market, it will allow for companies / people to develop new creative solutions. South Africa used to be at the forefront with new inventions. We can be again.	Charnell	business owner
2022-07-11 08:19:35	Gauteng	Yes I do	Nuclear		Rishal	business owner
2022-07-11 08:12:28	Western Cape	Yes I do	Nuclear		Hermann	business owner
2022-07-11 07:41:06	Gauteng	Yes I do	Nuclear	<p>World wide. Science has proven that the most effective energy source is nuclear. Clean nuclear.</p> <p>Countries like Singapore, China have up there kw via these methods.</p> <p>Also army bases like this of the US run on mini nuclear stations the size of a home that are affordable, and can power cities.</p>	paul	business owner
2022-07-11 06:57:51	KwaZulu- Natal	Yes I do	Nuclear	What ever is available should be allowed to immediately feed into the grid.	Martin	business owner
2022-07-11 06:50:23	Western Cape	Yes I do	Nuclear	<p>We should we looking at all options right now and into the future. SA has a perfect climate for Solar / wind, these should be fast tracked immediately. I know there are a few projects completed and on the go, however nothing compared to what should be happening.</p> <p>Gas must be the next option with possible gas finds in SA.</p> <p>We have to become energy self sufficient, we cannot be using diesel as an energy solution.</p> <p>Private is the only solution (which might need a government shift to happen) however with our system of government right now we cannot win.</p>	George'	business owner
2022-07-11 06:36:17	Eastern Cape	Yes I do	Nuclear	<p>How, in a country where there is constant power cuts, can independent power producers not be allowed to generate electricity. Why is Eskom protected when it cannot fulfill its main duty, i.e to keep the lights on.</p> <p>Loadshedding is costing the SA economy billions and this is still up for debate.</p> <p>The priority should be that every business and household has power, regardless of where it comes from.</p> <p>The priority should not be to protect a state owned company which has been run into the ground by corrupt officials. The priority must always be the people of a nation, not to line personal pockets at the expense of a whole nation.</p> <p>The time has come to admit that Eskom cannot fulfill its first and main responsibility.</p> <p>The time has come to admit that the current legislation must be changed immediately to allow for independent power producers to help keep SA's lights on!</p> <p>Do it now!</p>	Nico	business owner

2022-07-10 21:38:27	Western Cape		Yes I do	Nuclear	For all the bad press Nuclear gets, it is still the most efficient and safest method of getting us all the power we need, reliably and cost effectively. The fear around Nuclear is blown out of proportion when you have well trained & well equipped staff to run the plant.	Mark	business owner
2022-07-10 21:32:02	KwaZulu- Natal		Yes I do	Nuclear	Probably the quickest solution.	Karum	business owner
2022-07-10 21:20:51	Gauteng		Yes I do	Nuclear	I believe a mix is the best. A mix between nuclear, gas, hydro, solar and wind. Coal can be used until current stations are decommissioned. No new coal needs to be built. To quickly, cheaply and effectively supply the energy we need, we need small modular nuclear reactors - built totally offshore (so as to avoid the extra cost of BEE and avoid any corruption) by players like Hitachi, Toshiba and Rolls Royce. We can buy the with a take off agreement - no capital outlay required, just a commitment (they build, own and operate the stations). This will be the cheapest, reliable, clean energy we can get. Hydro can be used like it is now (but needs to be expanded) to store excess electricity. Solar and wind, together with development of our gas fields, can be used more long term and to replace coal but only when cost effective and reliable vs the nuclear.	Henk	business owner
2022-07-10 21:12:45	KwaZulu- Natal		Yes I do	Nuclear		Swaleh	business owner
2022-07-10 20:58:44	Gauteng		Yes I do	Nuclear	It's the safest and cleanest type of energy	Josua	business owner
2022-07-10 20:54:58	Free State		Yes I do	Nuclear		Errol	business owner
2022-07-10 20:33:22	Gauteng		Yes I do	Nuclear	Nuclear power has been reclassified as green power. It is the greenest of green powers. France is going to build 8 new plants. China and India are connecting about one nuclear plant a month to their grids. The technology is bedded down. These plants can be constructed within 2 to 3 years - if corruption can be side stepped. It is the best way to get the much needed base load.	Antonie	business owner
2022-07-10 20:16:31	Gauteng		Yes I do	Nuclear	The SA economy is being strangled. As a small business owner and part-time student, Eskom's blunders are beyond unacceptable for myself and the entire country. Nuclear power if it is properly handled by private experts will offer clean and tremendous amounts of energy for our economy, for the lives of people that are even more impoverished than before this crises began in 2008. I ask that govt and Eskom get out of the way and let the experts take over. Renewables would be fantastic too, but they will not be enough I'm afraid.	Christoph er	business owner
2022-07-10 19:21:55	Gauteng		Yes I do	Nuclear		Eugene	business owner
2022-07-10 18:46:21	KwaZulu- Natal		Yes I do	Nuclear	As a business owner offering gaming attractions, loadshedding has set us back at least 5 years in terms of growth. We cannot compete in the market with no power. In Ballito ,sometimes we can only operate for about 2 hours. In those 2 hours, we have no business because people need to do other things while the power is on. We dont even have a fighting chance. If this continues, there can only be two options, stay and fail or immigrate and have a fighting chance.	Stanton	business owner

2022-07-10 18:17:40	Gauteng	Yes I do	Nuclear	<p>The question is the ... immediate... needs for electricity. The quickest form of generation would be Wind and Solar. We know these have their limitations, but they can add substantial power to the grid.</p> <p>Simultaneously plans should be put in place for at least six nuclear power stations located across the country to supply the growing needs of the country for electricity. These nuclear power stations should be strategically located across the whole of SA to minimise the need to transport electricity over long distances.</p> <p>Hydro electric power has been largely ignored in SA. There is no hydro-electric power generation on the Vaal River, Orange River, Haartebeestepoort Dam and other large river systems in South Africa. This could be installed reasonably quickly and one is not looking at massive installations, but they can supply a region with its power needs.</p> <p>Mini hydro electric stations could be installed at numerous locations in SA to supply towns and regions.</p> <p>The long term power needs (if there is a long term for South Africa) is nuclear power.</p> <p>However there could be several different types of power generation methods installed in many different locations.</p> <p>The government are too incompetent and corrupt to have a hand in anything. This has to be done by the private sector.</p> <p>Escom and the load shedding is simply a case of state capture. We all know Escom should be privatised. This will never happen because Ramaphosa and his family are too deeply involved in Escom.</p> <p>Just as the Railways and every SOE should be privatised, as should every municipality in SA, so should Escom.</p> <p>But to answer your question - yes all forms of red tape and BEE relating to electricity generation must be repealed and the private sector must be allowed to generate and supply and charge for electricity.</p>	John	business owner
2022-07-10 18:05:58	Gauteng	Yes I do	Nuclear	Cleanest fuel production, while it has. Bad reputation but is safest and cheapest	Fallon	business owner
2022-07-10 17:48:29	Gauteng	Yes I do	Nuclear	<ol style="list-style-type: none"> 1. Nuclear energy does not produce emissions that impact on air quality. It is therefore a very clean form of energy. 2. Nuclear energy installations do not require much land. 3. Nuclear energy produces very little waste. 4. Nuclear energy is a sustainable source of power. 	Robyn	business owner
2022-07-10 17:44:02	Gauteng	Yes I do	Nuclear	It has become clear that Eskom alone is not capable of supplying power, we need another solution as a country. We are already paying premium for the electricity as it is	Nombasa	business owner
2022-07-10 16:10:55	Western Cape	Yes I do	Nuclear		Garry	business owner
2022-07-10 15:42:39	Western Cape	Yes I do	Nuclear	Nuclear is the best way forward. Effective, safe and clean energy.	Marius	business owner
2022-07-10 15:27:19	Gauteng	Yes I do	Nuclear	Nuclear power is still the safest most efficient way to supply power. Koeberg is a perfect example of a successful nuclear endeavor and until recently was consistently delivering power to the grid. This unlike our two new corruption driven totally over budget coal power stations who are both still not operating at full capacity and both way over schedule.	Eli	business owner
2022-07-10 14:58:12	North West	Yes I do	Nuclear	Privatise eskom. And all other soe's as well. Take the power away from the corrupt anc and give it to businessman to run. The unions are destroying our country.	Mohammed	business owner
2022-07-10 14:54:35	Eastern Cape	Yes I do	Nuclear		Jon	business owner
2022-07-10 14:50:37	KwaZulu-Natal	Yes I do	Nuclear	Solar or wind is not the answer for industry.	carl	business owner
2022-07-10 14:50:33	KwaZulu-Natal	Yes I do	Nuclear	Independent power producers should have been operating years ago. Stage 6 load shedding has done significant damage to an economy that can ill-afford it.	Peter	business owner
2022-07-10 14:48:09	KwaZulu-Natal	Yes I do	Nuclear	<p>Independent power producers should have been operating years ago. Stage 6 load shedding has done significant damage to an economy that can ill-afford it. Nuclear is the cheapest and greenest energy, stop listening to the overseas evil people that lie to us continually.</p> <p>WE THE PEOPLE are not all stupid.. give us direct elections and get WEF and bill gates out of SA !!!!</p> <p>www.organichumanitymovement.org</p>	Elizabeth	business owner
2022-07-10 14:29:03	Gauteng	Yes I do	Nuclear	Nuclear power is the best alternative we have to supply consistent and carbon neutral power to the South African grid.	Haroun	business owner
2022-07-10 14:19:17	North West	Yes I do	Nuclear		Paula	business owner

2022-07-10 14:10:02	Western Cape		Yes I do	Nuclear		Rose- Marie Storm	business owner
2022-07-10 14:04:52	Gauteng		Yes I do	Nuclear	Small modular reactors.	Willem	business owner
2022-07-10 13:07:17	Free State		Yes I do	Nuclear	We need every last Watt of energy to power this economy, regardless of who generates it. We need the private sector produce as much energy as possible, to sell into the grid, whether solar, wind coal, gas or nuclear. I choose nuclear for its reliability and less pollution, rather than more coal plants. However, it must be run by the private sector to ensure the best people are brought in to manage the plant/s. Homeowners and businesses should be incentivised to generate solar electricity to sell into the grid during the day, and use other sources during the night, such as wind , gas , nuclear and coal. Break the monopoly of Eskom!	Pieter	business owner
2022-07-10 12:35:12	Western Cape		Yes I do	Nuclear		Hank	business owner

2022-07-10 07:20:59	North West		Yes I do	Nuclear	It is the cheapest form of energy, and less waist than coal	Christina	business owner
2022-07-10 07:02:21	Western Cape		Yes I do	Nuclear	Although it is not a short term solution, nuclear if done properly, is the cleanest form of energy. But in the mean time solar and wind projects should be encouraged by private enterprise to supplement the grid.	Doug	business owner
2022-07-10 06:38:39	Western Cape		Yes I do	Nuclear	Nuclear is clean and all others may take too long to implement	Cara	business owner
2022-07-10 06:30:25	Western Cape		Yes I do	Nuclear	Modular nuclear is quick to construct and maintenance much easier than full scale nuclear. It is also one of the cleanest energy out there.	Pieter	business owner
2022-07-10 06:08:30	Western Cape		Yes I do	Nuclear	Privatise Eskom. Pay households to go solar and feed back into the grid. Get rid of the government by getting the Western Cape declared independent!	Frans JC	business owner
2022-07-10 05:48:55	Western Cape		Yes I do	Nuclear		stephen	business owner
2022-07-10 04:18:16	Western Cape		Yes I do	Nuclear		Geoffrey	business owner

2022-07-10 03:53:16	Free State		Yes I do	Nuclear	Looks like nuclear will ultimately be the cheapest method if we all use it	HLATJWAY O MESHACH	business owner
2022-07-09 21:17:41	Gauteng		Yes I do	Nuclear	Sell Eskom to the private sector you guys are incompetent and corrupt and can never fix it! Just like SAA it's over admit it and move on.	Moynene	business owner
2022-07-09 21:14:44	Western Cape		Yes I do	Nuclear		Hertzog	business owner
2022-07-09 19:17:40	Gauteng		Yes I do	Nuclear		Leoni	business owner
2022-07-09 18:02:20	Gauteng		Yes I do	Nuclear	Load shedding needs to stop.	Joy	business owner
2022-07-09 17:22:39	Eastern Cape		Yes I do	Nuclear	I chose nuclear because of the speed with which the new micro nuclear plants can be established and moved to where they are needed but nothing should be discarded if feasible	Johannes	business owner
2022-07-09 17:11:00	Western Cape		Yes I do	Nuclear	There must be green alternatives to Eskom. Simple as that.	Robert	business owner
2022-07-09 15:46:27	Western Cape		Yes I do	Nuclear		Brad	business owner
2022-07-09 14:30:38	Gauteng		Yes I do	Nuclear		Schalk	business owner
2022-07-09 13:41:37	Eastern Cape		Yes I do	Nuclear		P	business owner
2022-07-09 12:43:04	Western Cape		Yes I do	Nuclear		Matteo	business owner
2022-07-09 12:16:53	Gauteng		Yes I do	Nuclear	Clearly the current government is incapable we therefore need to revert once again to the qualified expertise of the proven private sector WITHOUT any government involvement at all. The nuclear option is the most expensive initially but if private enterprise brought in France/Israel to build, produce & run these we would have not only a viable solution but they could dominate power in Southern Africa completely. Our deal could be negotiated in ten year allotments with set increases presubscribed every ten years. This would work.	Stuart	business owner
2022-07-09 11:38:34	Western Cape		Yes I do	Nuclear		Robert	business owner
2022-07-09 11:14:24	Gauteng		Yes I do	Nuclear	Nuclear is the most efficient method of providing energy. Place the smallish units in boats around the country and wherever else it's feasible. But get a move on. Stop dilly-dallying, and trying to find ways for looting and exploiting the people of South Africa. Comply with your mandate per the constitution to provide us with electricity. Enough, already!	Allison	business owner
2022-07-09 10:37:15	Northern Cape		Yes I do	Nuclear	I agree that IPP's should be used to assist with the power problem in SA, but; 1. No family connections to any MP or cabinet minister. ie Patrice Motsepe should NOT be allowed. 2. No company or front company or fake company acting on behalf of any member of parliament or elected officials may tender. It must be a free and fair process. 3. No taking of profits out of the country or "money laundering " all monies made must be reinvested in South Africa.	Rob	business owner
2022-07-09 10:14:00	KwaZulu-Natal		Yes I do	Nuclear	Eskom has failed at it's only job, try provide electricity. Private electricity generation would be cheaper and more efficient, reliable and most importantly more accountable. Issue with Eskom is they're not accountable for anything. There are no consequences for their failures.	ryan	business owner
2022-07-09 10:09:50	Western Cape		Yes I do	Nuclear	To address the immediate needs as well as simultaneously creating a consistent electricity generation rate for the entire country nuclear power is the answer. It is a cleaner form power generation and individual nuclear units can provide consistent electricity to large populace areas of the country. As a long term plan solar can be phased in over time with nuclear creating a stable power generation and solar (sustainable) power being gradually phased in without causing power generation issues.	Brian	business owner
2022-07-09 09:25:24	Limpopo		Yes I do	Nuclear	Contrary to what people think nuclear is the cleanest and safest, and causes the least deaths by far in the long run. Nuclear power will also provide the great need we have. Coal is "dirty" power, with a toll on health that's not worth it. Solar is incredibly expensive and needs huge portions of land. Wind is ever more expensive, making it a no go. Hydro, could be an option, but we live in a sub-sahara country with erratic rainfall. South Africa needs a solution now! Eskom must be privatised. Government hands off, and unions demands reduced. Drastic action needs to be able to be taking against trouble makers, intimidators and vandals. Sabotage should be viewed as domestic terrorism, with the tracking down and prosecution of these perpetrators. South Africa is suffer yet again because of government incompetence.	Olga	business owner

2022-07-09 09:13:13	Western Cape		Yes I do	Nuclear	Nuclear is the cleanest source of energy. Koeberg still has its waste on site since it was opened over 40 years ago. I also believe that a combination of renewable and nuclear is the way to go. Renewable energy generation is not really environmentally friendly as batteries and wind turbines etc have a shortish lifespan and then its getting rid of them afterwards that creates environmental issues.	Wendy	business owner
2022-07-09 08:20:07	Eastern Cape		Yes I do	Nuclear		Peter	business owner
2022-07-09 08:14:38	Eastern Cape		Yes I do	Nuclear	Cleanest, most efficient and most reliable. Nuclear has gotten a bad rap, but properly managed and competently run nuclear facilities produce the cleanest power. It's madness to use fossil fuels to power an entire country. And 'renewables' like wind and solar are not nearly as efficient or clean due to their massive carbon footprint. Nuclear is the only logical way to go to solve the problem.	Nicola	business owner
2022-07-09 07:01:14	Gauteng		Yes I do	Nuclear		Lynn	business owner
2022-07-09 03:43:43	Western Cape		Yes I do	Nuclear	All those options have issues, but any one of them is still better than Eskom.	Mike	business owner
2022-07-08 22:11:20	KwaZulu- Natal		Yes I do	Nuclear	Nuclear is probably the best long term solution (if we can afford it). It provides reliable baseload electricity but will take many years to commission. In the short term, solar and wind with battery backup (like Tesla did in Australia) would help but is best for peaking power supply. We also have the option of gas in the short term. Having said that, I am no expert.	Brian	business owner
2022-07-08 21:54:33	Western Cape		Yes I do	Nuclear	Unfortunately solar and wind power production can never supply the needs of SA at peak times. Coal is best in the immediate time frame. But not Eskom! Nuclear is the best alternative but is not an immediate solution. WHAT A DILEMA!	John	business owner
2022-07-08 20:57:58	Gauteng		Yes I do	Nuclear		Laura	business owner
2022-07-08 20:38:39	Free State		Yes I do	Nuclear		Pieter	business owner
2022-07-08 19:00:46	Western Cape		Yes I do	Nuclear		Eugene	business owner
2022-07-08 18:34:02	KwaZulu- Natal		Yes I do	Nuclear		Jacs	business owner
2022-07-08 18:31:19	Western Cape		Yes I do	Nuclear	Eskom has proven they cannot handle the countries needs, before this surge in pricing due to the war eskom has handled everything poorly, it's time others get a chance to fix what eskom has broke. Nuclear is a good clear and safe energy option providing its in a location that doesn't affect tourism. The risks with nuclear energy is far below coal etc, people need to understand the risks are incredibly small, the reason why it seems bad is that when things do go wrong, they go wrong, but it hardly happens at all which is the point people need to also realise.	Ashley	business owner
2022-07-08 18:29:11	Eastern Cape		Yes I do	Nuclear		Anushka	business owner
2022-07-08 17:47:17	Gauteng		Yes I do	Nuclear	Although solar, wind and hydro-electricity are power solutions, storing such power remains a problem and expensive. Yes, homes can utilise solar energy to lessen the pressure on Eskom but a long term power solution is necessary as well. Allowing private power suppliers to step in on an emergency basis, would allow for the power utility to attend to long overdue maintenance and restructuring. Coal plants are no longer feasible and Eskom as a government institution is a failure due to corruption, poor management, unions, BEE and complete incompetence. The time has come for matters to change. Allowing private suppliers to relieve the power issues, will also allow for competition and new inventions or solutions to be found for future implementation. These providers will create much needed jobs and create stability for the failing economy. It is one of SA's greatest deterrents to future investment. It will also allow for the employment of capable people rather than quotas or nepotism and cronyism. Laws and regulations would need to be adapted or implemented to regulate standards and practice going forward but it could work.	Che	business owner
2022-07-08 17:10:39	Free State		Yes I do	Nuclear		Eugene	business owner
2022-07-08 16:51:49	Western Cape		Yes I do	Nuclear	Use the mini nuclear plants which have proven and run but which govt has mothballed. Within months the units can be set up close to where required and start delivering. The technology is in storage but ANC decided against it.	Michael	business owner
2022-07-08 16:43:45	Gauteng		Yes I do	Nuclear		Lyntom	business owner
2022-07-08 16:18:52	Western Cape		Yes I do	Nuclear	This is an emergency!! We should be utilising wind and solar in the middle to long -term, but we need an immediate increase in production, so 1. Open up to independent producers now and 2. Build several small nuclear power stations i immediately to support the grid.	Cedric	business owner
2022-07-08 16:16:40	Gauteng		Yes I do	Nuclear	We cannot continue as is, otherwise, the economy will due. The politics must be stop. We need full participation of everyone with the capability to generate power. This includes private companies, IPPS's and households. No limits should be placed on their ability to supply. South Africa needs to draw power from all sources (Wind, Solar, Nuclear, Hydro and Coal) for maximum energy security.	Jamie	business owner
2022-07-08 16:02:17	KwaZulu- Natal		Yes I do	Nuclear		Bianca	business owner

2022-07-08 15:57:32	Western Cape		Yes I do	Nuclear	The world in time will be forced towards dense forms of energy such as Nuclear. A country such as Germany has ploughed hundreds of billions into green energy and is now importing power from France. France is nuclear dominant. Yes South Africa has sun but to generate industry sustaining energy requires loads of electricity. For economic grow we need sustainable industrial power. Homes, solar, fine. Be aware of the 'green energy' band wagon. They will force you in a direction and when it suits them they will change and leave you bleeding. Can Africa manage nuclear, privately yes.	Brendon	business owner
2022-07-08 15:40:43	KwaZulu- Natal		Yes I do	Nuclear	ALL forms of electricity should be allowed with immediate effect. Nuclear is, in my opinion, the best long term solution but for now we should use anything and everything. For instance all new malls, business premises and townhouse complexes should be forced to install solar panels and batteries to back up municipal power. The stupid ban on private solar installations should be lifted immediately. The long term green agenda is valid but not at this moment. We need stable, affordable power NOW!	Barbara	business owner
2022-07-08 15:30:44	Western Cape		Yes I do	Nuclear	The government is unable to consistently manage and supply SA's power. We should outsource to independent power producers, and probably switch to modular nuclear energy. It's clean and takes 3 years to start producing energy.	Dominic	business owner
2022-07-08 15:22:23	Free State		Yes I do	Nuclear		Lehlohono lo	business owner
2022-07-08 15:20:22	Gauteng		Yes I do	Nuclear		Jamandus	business owner
2022-07-08 15:10:30	KwaZulu- Natal		Yes I do	Nuclear	1. Compared to fuels like coal and gas, nuclear energy emits very little CO ₂ 2. Keeps the air clean by removing thousands of tons of harmful air pollutants that contribute to acid rain, smog, lung cancer and cardiovascular disease. 3. Nuclear energy produces minimal waste 4. It's reliable and cost effective	Jackie	business owner
2022-07-08 15:03:00	Western Cape		Yes I do	Nuclear	Deregulate fast. But beware of what is happening in Australia, where their "ESCOM" is now imposing a dictatorship environment on the Independent Suppliers and re-establishing monopolistic price control. Our suppliers must ensure that ESCOM cannot dictate external supplier's pricing nor their supply. An INDEPEDENT regulatory board (Independent of Government and ESCOM) should control the process of supply, distribution and pricing. ESCOM must become just one of a multiple of suppliers, each treated equally. Probably the best thing would be to privatise it in the long run.	Mike	business owner
2022-07-08 14:49:36	Gauteng		Yes I do	Nuclear	The government has destroyed this country. It is becoming near impossible to live here. If it's tough for me I shudder to think what the poorest of the poor are experiencing. It's appalling. I am no longer proud to be part of this country because of how the government has bled the average citizen dry. Don't kill the goose that lays the golden egg!!	Elizabeth	business owner
2022-07-08 14:20:57	Western Cape		Yes I do	Nuclear	We are opening ourselves up once again for corruption if we allow the ANC and family members of Ramapoza to come forward with a brilliant plan to "Save" the nation from total collapse by either building Windfarms or Solar. I believe this whole outage was being planned to line their pockets for generations to come. Independent Nuclear Yes!!!	Andre	business owner
2022-07-08 14:04:21	Western Cape		Yes I do	Nuclear	Eskom is lost cause, with strikes, a government that couldn't care and malicious damage. A private company would not tolerate such actions. Sell Eskom and privatise all power plants in SA in order to curb corruption.	Anthony	business owner
2022-07-08 13:58:19	Gauteng		Yes I do	Nuclear		Timmy	business owner
2022-07-08 13:44:17	Gauteng		Yes I do	Nuclear		Lambert	business owner
2022-07-08 13:44:08	Western Cape		Yes I do	Nuclear		John	business owner
2022-07-08 13:44:07	Free State		Yes I do	Nuclear		Paul	business owner
2022-07-08 13:33:39	Gauteng		Yes I do	Nuclear	Nuclear is most efficient according to experts, however, I don't really care what energy sources are used, just as long as they aren't expensive and don't take long to set up!	Camilla	business owner
2022-07-08 13:22:35	Western Cape		Yes I do	Nuclear	We have seen how the privatisation of power producers has increased efficiency and reduced cost. A country like South Africa can produce so much power from independent power produces, farms and households. We should incentives and subsidies the private sector to use solar and wind to reduce the overall usage on the grid. Wasting money on a failed government power supply which burns money and cost the tax payer every day is surly the wrong way and only political motivated. Regards Georg Kirchners	Georg	business owner
2022-07-08 12:54:31	Western Cape		Yes I do	Nuclear	I think a mixture between Nuclear , Solar , Wind and Hydro is the way to go. The whole supply of electricity should be privatized government should be eliminated totally People who pre pay electricty should get a discount.	ANTHONY	business owner
2022-07-08 12:44:35	Western Cape		Yes I do	Nuclear	As long as there is no say in the governing of Eskom by the citizens of South Africa it will stay corrupt by government manipulation. Nuclear and Hydroelectric means are the best clean and constant ways to energy on the west coast of South Africa.	Thomas	business owner

2022-07-08 12:44:35	Western Cape		Yes I do	Nuclear	<p>Nuclear baseload (substantial) with 24/7/365 capability is infinitely preferable to the vagaries of most renewable sources and has the capacity to elevate our training, local engineering and LOCAL job creation at elevated levels will provide the certainty that our entire system needs. This can and maybe should be complimented with some wind, (visually disturbing), Solar (good but outside of peak load needs, without storage is just a nice to have) wave and any other newfangled widget type supplementation.</p> <p>We NEED baseload increase, renewables are less reliable than Nuclear. we should get 10 fold increase in Nuclear capacity</p>	Gordon	business owner
2022-07-08 12:23:40	Gauteng		Yes I do	Nuclear		Riaan	business owner
2022-07-08 12:23:12	Western Cape		Yes I do	Nuclear	All things considered Nuclear and Coal still seems the best route short-term, however growing toward more sustainable options with independent producers along with government incentives and subs essential.	Kneo	business owner
2022-07-08 12:16:58	Free State		Yes I do	Nuclear	Nuclear power has been proven over and over and over to be the most cost effective and safest long term means of supplying power. Coupled with it being cleaner than fossil fuel based power generation it is a no-brainer to use. Implementation/construction takes a while, yes, but the benefits will be felt for decades. A strong second choice for me personally would be hydro. Solar and wind simply cannot match the same low carbon footprint if the entire manufacturing and maintenance process are taken into consideration.	Werner	business owner
2022-07-08 11:55:53	Western Cape		Yes I do	Nuclear	<p>The only viable alternative to coal burning power stations is nuclear. There is unfortunately a mass stigma associated with nuclear do to the association between it and nuclear bombs. However nuclear power technology have improved greatly since the 1950's. Nuclear power has by far the greatest energy return per input unit compared to other energy sources. Nuclear is expensive at startup however is much more cost effective in terms of gross energy production and reliability than alternative energy sources and electricity cost will actually decrease with time as the nuclear power stations become more established. Wind and solar energy is massively expensive, take up large chunks of viable land that could have been used for something else, is unreliable, as the wind does not always blow nor does the sun always shine, and requires large battery storage and conversion to be able to enter the electricity grid which is grossly expensive. As a third world country in which a large amount of citizens live under the breadline, and source their energy from wood and animal dung, coal would be the next best thing. However our coal burning power stations rely on the supply of coal from our mismanaged coal mines and the maintenance of the power station, both of which are unreliable at best. Nuclear power stations will also create sustainable jobs, where citizens will be able to find employment for many years at these stations. In comparison, with renewable energy, employment is short and only necessary for installation and thereafter for scheduled maintenance done by very few experts. As to the source of nuclear power, South Africa has massive Uranium deposits and again if mining Uranium becomes a necessity it will create sustainable jobs in these mines unlike renewables where jobs are not sustainable. Using nuclear will also be advantageous to citizens as their electrical bill will be low as the cost per unit of energy in nuclear is much lower than that of solar and wind.</p> <p>If nuclear is not used the only viable renewable alternative which is somewhat comparable is geothermal energy. It is currently used in 26 countries. However South Africa has very few sites where such a power station can be built as our geothermal resources are scarc</p>	TC	business owner

2022-07-08 11:51:42	Western Cape	Yes I do	Nuclear	<p>The only viable alternative to coal burning power stations is nuclear. There is unfortunately a mass stigma associated with nuclear do to the association between it and nuclear bombs. However nuclear power technology have improved greatly since the 1950's. Nuclear power has by far the greatest energy return per input unit compared to other energy sources. Nuclear is expensive at startup however is much more cost effective in terms of gross energy production and reliability than alternative energy sources and electricity cost will actually decrease with time as the nuclear power stations become more established. Wind and solar energy is massively expensive, take up large chunks of viable land that could have been used for something else, is unreliable, as the wind does not always blow nor does the sun always shine, and requires large battery storage and conversion to be able to enter the electricity grid which is grossly expensive. As a third world country in which a large amount of citizens live under the breadline, and source their energy from wood and animal dung, coal would be the next best thing. However our coal burning power stations rely on the supply of coal from our mismanaged coal mines and the maintenance of the power station, both of which are unreliable at best. Nuclear power stations will also create sustainable jobs, where citizens will be able to find employment for many years at these stations. In comparison, with renewable energy, employment is short and only necessary for installation and thereafter for scheduled maintenance done by very few experts. As to the source of nuclear power, South Africa has massive Uranium deposits and again if mining Uranium becomes a necessity it will create sustainable jobs in these mines unlike renewables where jobs are not sustainable. Using nuclear will also be advantageous to citizens as their electrical bill will be low as the cost per unit of energy in nuclear is much lower than that of solar and wind.</p> <p>If nuclear is not used the only viable renewable alternative which is somewhat comparable is geothermal energy. It is currently used in 26 countries. However South Africa has very few sites where such a power station can be built as our geothermal resources are scarce.</p>	Leopold	business owner
2022-07-08 11:49:50	Western Cape	Yes I do	Nuclear	Nuclear powered plants rely on established technology and poses minimal environmental impact.	Pieter	business owner
2022-07-08 11:49:26	Gauteng	Yes I do	Nuclear	Dear Legislators. South Africa as a trend setter in Southern-Africa, sub-Sahara Africa, the SADC environment and in the AfCFTA cannot be tolerated in its present state of careless and corrupted decay! Energy supply must be restored, maintained and it must keep up with development demands. Citizens may NOT be held ransom due to bad governance and bad energy supply management. What happened to years of Pebble Bed reactor research and presentations, and how many other submissions over recent years? We have a vast coast line. Wave generators had been designed and tested. But, please, spare us more corruption, energy capture as in state capture and skyrocketing energy prices. Come now! Get it done ... seamlessly please. The power must stay on!	Johannes	business owner
2022-07-08 11:36:59	Gauteng	Yes I do	Nuclear		eve	business owner
2022-07-08 11:29:45	Western Cape	Yes I do	Nuclear	The time is now to implement radical change and bring about an electrical supplier or suppliers to remedy the dire situation we currently find ourselves in. Enough is enough! Privatisation is the only way to go with regards to electricity supply in South Africa and we as citizens should be free to pick and choose the best supplier at the most affordable prices. The presidency should have taken the necessary steps a long time ago. It only proves (once again) how useless and absolutely corrupt the ANC and most other political parties are in South Africa. Keep our lights on!	David	business owner
2022-07-08 11:27:22	KwaZulu- Natal	Yes I do	Nuclear	Yes to removing the Eskom monopoly. But I'm not in favour of going the same way that the West is going in scrapping coal sourced power and quickly trying to move to renewables. This causes huge problems in providing sustainable power to the nation. Man made climate change is a massive hoax and South Africa must not be dragged into it and scrapping coal fired power generation too early. Look at China and India. They're not buying the lie. For South Africa we should liberalize the power market and let independents to supply, fix Eskom and move to well priced nuclear plants for long term sustainability. Wind and Solar can only supplement the power generation; it cannot be the main source.	Steve	business owner
2022-07-08 11:18:46	Western Cape	Yes I do	Nuclear	Go for nuclear pebblebed reactors. It's safe and reliable.. Please let foreign companies build and maitain these reactors and just purchase the electricity from them.	Deon Goosen	business owner
2022-07-08 11:01:50	Gauteng	Yes I do	Nuclear	No answer needed if the incompetence continues and the government body stays in power the country will fail in totality	Gerrit	business owner

2022-07-08 09:43:47	Gauteng	Yes I do	Nuclear	I'm sure the only way to immediately solve the problem is to use Diesel generators, but this wouldn't be cheap. Solar would be the next quickest solution depending on availability of the hardware given the supply-chain issues. Every home owner and business owner who can afford it, has already or is most likely installing a solar system right now. This is not actually good news as they can only generate power for themselves... This will eventually result in demand for power from Eskom going down, therefore no load shedding in the short term, but in the long term it will mean increased tariffs which will impact the lower income households and small businesses that can't afford to get off grid. If we don't allow these people, and other IPP's to contribute to the grid then poorer people will suffer... Ultimately I believe we need to be using Natural Gas or Nuclear power long term. Solar and wind while 0 emmissions are extremely unreliable and any country using significant renewable sources also have to have large, if not 100% capacity of reliable (Nuclear, Coal or Gas) sources to compensate when there is no wind, no sun and no built up storage either in batteries or pumped hydro... My concern would be whether South Africa can safely operate nuclear plants. Nuclear is super clean, ZERO emission power but it has to be safe, and given the disastrous mistakes that Eskom keeps making I'm not sure I trust them with nuclear. Solar and wind are also not actually clean sources of power. While they generate power without emissions, the process of manufacturing them definitely does NOT, they also contain many rare minerals and non-renewable raw materials. Also if we were to shift to using wind and solar as the majority sources of power, we would be heavily dependent on imports for parts. There must be a way that we can utilise local sources..?	Jaime	business owner
2022-07-08 09:34:53	Limpopo	Yes I do	Nuclear	Pebble bed reactors are small enough so that each municipality can have its own and the by-product of this method of electricity generation is hydrogen, that can be used to drive vehicles.	Johannes	business owner

2022-07-17 12:31:50	Western Cape		Yes I do	Nuclear	Nuclear waste is only a problem in the mind of the public. It is not an engineering challenge. Nuclear waste has a low volume and can easily be stored in perfect safety, but nobody wants it near their own city, town, village or farm, owing to irrational fears whipped up by Hollywood and environmental lobby groups. Much nuclear waste can simply be reprocessed as fuel for new types of reactors, and the only challenge for the remainder is the not-in-my-backyard problem. Nuclear plants can operate at full tilt 24/7, unlike most other energy sources. That means they can be used as a source of heat for industrial processes. They can power large desalination plants so people in Gqeberha don't have to buy their drinking water at petrol stations. They can produce all that green hydrogen fuel for vehicles that Mr Ramaphosa is always on about. Nuclear and Gas is the way to go.	Michael	retired
2022-07-16 23:38:34	KwaZulu-Natal		Yes I do	Nuclear	I support private enterprise in this regard and I think that all forms of energy should be utilised including coal and gas. Monopolies should be outlawed in this regard so that there is healthy competition so that prices are always affordable and conducive to fostering prosperity for all in particular our lower income groups.	Lea-Anne	retired
2022-07-16 16:12:25	KwaZulu-Natal		Yes I do	Nuclear	IPP should be allowed immediately onto the grid. They still wont ne enough to halt the current scenario but the economy of this country cannot be held to ransom any longer. By far the best long-term solution is nuclear but we must source that expertise from known and trusted technologies - NOT those of Russia.	Nigel	retired
2022-07-16 14:47:51	KwaZulu-Natal		Yes I do	Nuclear		Carl	retired

2022-07-16 09:00:04	Eastern Cape		Yes I do	Nuclear	Nuclear for long term solution and every other clean energy solution for the short to medium term	John	retired
2022-07-16 05:23:52	Gauteng		Yes I do	Nuclear	I understand from various experts nuclear to be the safest and cleanest method and waste containers small and easily stored. Small nuclear reactors which are currently being erected in Russia, Argentina and many other countries seem the ideal solution. Wind turbines have proven not to be effective on large scale as evidenced in Texas during a recent cold winter and now even Germany, despite spending millions on wind power, has to fire up coal stations again. Obsolete solar panels require vast storage facilities which creates another problem.	Anne	retired

2022-07-15 18:28:22	Western Cape		Yes I do	Nuclear	We cannot just cater for the short term. South Africa's electricity shortage is a long term problem which we must cater for. We must also cater for an increase in sustainable base load which wind- and solar power generation cannot do.	David	retired
					<p>Prior to the inept and corrupt ANC government taking power with its Communist ideology, Eskom was an effective organisation producing electricity at one of the lowest costs in the world, without interruption. I am amazed that the presidency and public enterprise minister Pravin Gordhan are looking for an emergency solution to end the load shedding crises. I would have thought the solution was obvious, Stop, the allocation of personnel on race and gender quotas ignoring MERIT. Companies who require excellent results MUST only hire fully competent goal-oriented staff!</p> <p>IPP' must be immediately allowed to supply electricity to supplement ESKOM electricity supply and legislation to be amended if required. Nuclear power is the way to go, but the lead time for a nuclear plant to be constructed and commissioned is long and in the interim small modular reactors could be used. Many people other than the "greens" are coming to the conclusion that solar, wind and other renewable power sources might not provide sufficient power. The chairperson of Eskom' Board Juba Mabuza speaking at a media briefing on the state of South Africa's power supply in early April 2022, along with other Eskom executives and Public Enterprises Minister Pravin Gordhan, regarding the delays of the power stations Medupi and Kusile, which started in 2007 and 2008. The salient points are they have been hit by cost overruns, poor engineering designed and allegations of corruption. The cost to complete Medupi and Kusile is estimated to be R36 billion and take at least 5 years to complete and the question is, who designed the power stations, who managed the contracts and who were the contractors? – they have a lot to answer for their failure, to the citizens of South Africa. For this country to grow to reach its full potential reducing poverty and unemployment, must fully embrace the free - market economic system, based on supply and demand with little or no government control. The fiasco with Medupi and Kusile and the years of load-shedding has proved that ESKOM does not have the competence to operate effectively, thus reducing the countries growth potential and could cause demonstrations or rioting against the government due to the lack and cost of electricity.</p> <p>The first challenge is to restore ESKOM back to what it was prior to the ANC government coming into power, ASAP, using IPP' to assist in keep the lights burning, while new power stations are constructed not using fossil fuels. To achieve this the current employees of ESKOM from Management, Supervisors, Operators and Maintenance staff etc, must be fully evaluated to ascertain they meet the world class standards required to operate and maintain power stations and distribution cent res effectively. Automation must be used as much as possible to keep staff compliment to a minimum for obvious reasons! Personnel who do not meet the required standard are to be replaced ASAP with competent, experienced t personnel, to include former competent staff who were paid off due to "transformation", should there be insufficient competent staff available locally, they must be sourced overseas and placed on contract. All contractors must be fully competent and experienced to undertake work for ESKOM.</p> <p>It must be borne in mind that not all persons can be trained as this depends on their intellect!</p> <p>Many of ESKOM Power stations are old but even older plants with good maintenance and upgrades should be able to meet their designed capacity. It has been reported that sabotage has taken place at some of ESKOM power stations, how is this serious matter being handled?</p> <p>Any long-term solution to load- shedding will not be successfully unless competent, experienced and goal orientated employees are at work at ESKOM. The cost to achieve a secure supply of electricity for this country will be astronomical, but by clamping down on corruption and inefficiency in the civil service the cost would be acceptable.</p> <p>Once ESKOM is running effectively it must be privatised.</p>

2022-07-15 10:41:11	KwaZulu-Natal	Yes I do	Nuclear	<p>The South African Government seems to think it knows better than all the scientist in the world that have been working on how to save our planet! If only they would leave such matters to these eminent people and concern themselves with addressing matters involving the economy, corruption, education, problems with 80% of the municipalities, waste water, food wastage, curtail the use of harmful pesticides and herbicides that are polluting our waterways (rivers and seas), seismic blasting along our coast lines killing sea life, trophy hunting killing off our wild life, the electricity supply, coal, oil and gas, the last of which should stay in the ground where they belong!</p> <p>We have the climate to produce all the electricity with sun for solar power, wind for turbines and rivers and sea for hydro power that is required if only they would remove all the RED TAPE and let private enterprise get on with what they want to do at a fraction of the costs all South Africans are encumbered with now.</p> <p>'Quote' - The bill places a legal obligation on every organ of state to coordinate and harmonise their various policies, plans, programmes, decisions and decision-making processes relating to climate change.</p> <p>This is to ensure that the risks of climate change impacts and associated vulnerabilities are taken into consideration and give effect to the principles and objectives set out in the envisaged Act.</p> <p>Local officials – including mayors – will be required to undertake a climate change needs and response assessment within one year of the publication of the National Adaptation Strategy and Plan. The bill further requires a climate change response implementation plan to be developed within two years of undertaking the climate change needs and response assessment.</p> <p>It further requires a climate change response plan to be integrated into a province, district or municipality's development plan.</p> <p>Presidential Commission</p> <p>The bill provides for the establishment of the Presidential Climate Commission for organised labour, civil society and business to advice on the country's climate change response.</p> <p>The function of this commission includes providing advice on the country's climate change response and the long-term just transition to a climate-resilient and low carbon economy and society.</p> <p>The commission may also report on matters relating to reducing the emission of greenhouse gases and adapting to the effects of climate change.</p> <p>Targets and scenario-planning</p> <p>The bill provides for the establishment of 'adaptation objectives' in South Africa. These are aimed at establishing specific green targets that the country should hit and the associated timeframes.</p> <p>The minister of the environment is also required to develop 'adaptation scenarios' which anticipate the likely impacts of climate change in the country over the short, medium and longer-term.</p> <p>The scenarios must be developed within one year of the envisaged Act coming into operation.</p> <p>Greenhouse gases</p> <p>The bill will empower the minister, in consultation with cabinet, to determine, a national greenhouse gas emissions trajectory for the country. Until such time as the minister publishes a national greenhouse gas emissions trajectory, an interim trajectory has been provided as follows:</p> <ul style="list-style-type: none"> • The country's greenhouse gas emissions will peak in the period 2020 to 2025; • Plateau for up to 10 years; • From 2036 onwards, decline in absolute terms. <p>The bill provides for the mandatory review of this trajectory every five years as well as for a review at any other time should the circumstances require it.</p> <p>It also allows the minister to list the sectors and subsectors which are subject to the allocation of a sectoral emissions target. After having published this list, the minister must determine sectoral emissions targets for the listed sectors and subsectors.</p> <p>The minister must also publish a list of greenhouse gases and activities which they reasonably believe cause or are likely to cause or exacerbate climate change. They will also be responsible for identifying synthetic greenhouse gases which must either be phased out or phased down. – end 'Quote'</p> <p>28 years of corrupt ANC monopoly in energy generation and regulation through its parastatal ESKOM have ruined South Africa's economy beyond salvage. Calling this 'freedom', in truth, this ANC regime is holding 50 million people, their livelihood, industry and jobs ransom. In its greed for power and control, it has destroyed people's lives, reduced a once-vibrant industry and caused crippling inflation. Whilst the world at large is developing, promoting and subsidizing environmentally-friendly energy generation, our fossil fool Minister has, year after year, prohibited independent energy generators, the development of environmentally friendly and sustainable energy production in order to maintain ANC power and control.</p> <p>Transparency, clear communication & good governance is of the utmost importance but which our Government seems to know nothing about judging by past performances. This has to end NOW.</p>	Richard	retired

2022-07-11 11:06:06	Western Cape		Yes I do	Nuclear	SA urgently needs more Base Load capacity. Coal is becoming problematic from many perspectives and flies in the face of global warming and general pollution regulations. Renewable energy is the talk of the day but that does not provide base load capacity. Because wind is not consistent, the sun does not shine at night and the energy storage capability is not adequate. Thus the only option is nuclear. This may raise many objections but in SA's own experience, Koeberg's nuclear power has been consistently the most cost effective and reliable sources of power. Therefore please build another Koeberg right alongside the existing one. It has its own harbour, its own village and the people in the local environment are used to nuclear power and thus would have less resistance to another nuclear build.	Alan	retired
2022-07-11 10:56:30	Gauteng		Yes I do	Nuclear	If Independent Power Producers be allowed to supply South Africa with electricity immediately, it should be done with a stringent policy in place. No "connected" suppliers, or people connected to any politicians, should be allowed to supply energy. South Africa can not afford more corruption to take place. Nuclear could be the cheaper and safer solution to this energy crisis, with very low carbon emissions.	JJ	retired

2022-07-11 07:29:50	Gauteng		Yes I do	Nuclear	Our coal fired power stations cannot continue much longer, most of them are nearing (or have reached) end of life. Wind and solar must be included in the mixture that gets us powered up again, but on their own they will be insufficient. The mines are gearing up to generate all their own electricity, and all major manufacturers (whatever industry) should be given permission to generate their own electricity. Medium to small enterprises should be allowed to purchase electricity from local independent electricity producers. There has to be a good reason for regulation, and currently regulation is holding everything back and is clearly not in the best interests of business and industry. If it works, don't fix it. If it doesn't work (load shedding from Eskom) then every effort should be made to fix it - and the effort and investment should obviously be by the customer who can do it more efficiently than the government. All investment of power producing equipment by consumers from the biggest enterprises to the smallest units should not be taxable, to reduce the actual cost as far as possible.	Robert	retired

2022-07-10 18:57:24	Western Cape		Yes I do	Nuclear	Could we please stop talking about this critical issue & make a decision & stop trying to satisfy everyone with the normal CONCENSUS decision. Life does not work like that ... just make a decision.	Ken	retired
2022-07-10 18:38:24	Gauteng		Yes I do	Nuclear	Nuclear is the way to go	Diana	retired
2022-07-10 17:14:22	Western Cape		Yes I do	Nuclear	The first hurdle it to stop the Eskom monopoly. This would allow others to provide this essential service. It is never right to have all your eggs in one basket. Would also stop the ANC cadre corruption and incompetence.	Brian	retired
2022-07-10 16:48:37	Western Cape		Yes I do	Nuclear	It is a high priority to source electricity besides Eskom as businesses, especially smaller ones are going under. Although I have put down nuclear, I think we have to use whatever is available to us, whether it is wind, solar or hydro. We cannot depend on a powerless Eskom to supply all the power needs any longer.	Susan	retired
2022-07-10 16:43:45	Western Cape		Yes I do	Nuclear		Celeste	retired
2022-07-10 16:38:32	KwaZulu- Natal		Yes I do	Nuclear	Many smaller countries around the world have alternative means of providing extra power. Namely solar, hydro, and wind.	Rogers	retired
2022-07-10 16:33:50	Gauteng		Yes I do	Nuclear	Although nuclear is more expensive to build, long term it is cheaper and environmentally friendly to use. Far to many South Africans consider electricity a right. This misconception should be corrected. Electricity is a commodity that takes huge resources to generate and maintain.	Richard	retired
2022-07-10 16:31:43	Western Cape		Yes I do	Nuclear	Contact Prof Ennis Blom Kleine Monde Eastern Cope	Koela	retired
2022-07-10 16:25:09	Western Cape		Yes I do	Nuclear	On the longer term this option will provide a stable and reliable power sourde as renewable enrgy sources is a bit risky and and it is cleaner as coal.	Jurie	retired

2022-07-10 16:24:41	Mpumalanga		Yes I do	Nuclear	I have worked 40years in Eskom. Coal is the cheapest solution but corruption has destroyed the feasibility of coal. Corruption will never be stopped as there will never be any political will. Wind and sun need storage that is unaffordable to provide baseload power at a reasonable cost and can only help the wealthiest off grid users. Nuclear is our only option and cannot be supplied by Government or the corrupt State. The British company Rolls Royce builds and supplies the nuclear power that drives Giant Nuclear Submarines that can stay under water for years at a time. These Nuclear Power units can be used to power the grid. All caps must be removed of private power suppliers. Large private companies must be allowed to establish small nuclear power stations without any State involvement and they must pay for themselves from income paid by customers. The Government should only promulgate legislation to make it illegal to give power away for free to any customer. Rogue countries like Russia should be excluded as suppliers. Free Market principles must be applied and many suppliers encouraged to compete so that prices can regulated by the competition.	Adrian	retired
2022-07-10 15:59:18	KwaZulu-Natal		Yes I do	Nuclear		Diane	retired
2022-07-10 15:57:25	Gauteng		Yes I do	Nuclear		Joyce	retired
2022-07-10 15:31:39	Western Cape		Yes I do	Nuclear	A no -brainier. Nuclear and solar are the future of world power. Wind and hydro can augment but not replace the prime sources. The present questions on who can or can't produce electricity are puerile in the face of long term power needs	Tom	retired
2022-07-10 15:11:42	Gauteng		Yes I do	Nuclear	Modern scalable modular reactors can be installed quickly and safely by independent supply ers.	albert	retired
2022-07-10 15:00:26	Gauteng		Yes I do	Nuclear		Wilna	retired
2022-07-10 14:52:38	KwaZulu-Natal		Yes I do	Nuclear	Independent power producers should have been operating years ago. Stage 6 load shedding has done significant damage to an economy that can ill-afford it.	Keith	retired
2022-07-10 14:50:32	KwaZulu-Natal		Yes I do	Nuclear	It's taken more than two decades for the ANC government to destroy S.A.'s Electricity supply. It is now time for drastic measures and our population deserves better power supplies but this must be carried out by Non Government interference. Privatization is definitely the way to go.	Guy	retired
2022-07-10 14:43:18	Western Cape		Yes I do	Nuclear	Absolutely any source of electricity generation is acceptable at this point, but coal should be only be used if all else fails for the immediate future	Annette Rose	retired
2022-07-10 14:36:14	Gauteng		Yes I do	Nuclear	Independent power producers should have been operating years ago. Stage 6 load shedding has done significant damage to an economy that can ill-afford it. Let the private sector handle supplying power to South Africa. Eskom should be privatised as well.	Faizel	retired
2022-07-10 12:22:21	Western Cape		Yes I do	Nuclear	The government has tried but has failed miserably in good governance for the supply and demand of basic living necessities such as water, sanitation, policing, schooling, health, electricity, housing. Municipalities through out South Africa have been taking but not delivering and yet they are there to provide the very above service to the people. They are there to serve, not the other way round. This country was at one stage reaching first world status but now we are facing third world problems because we have a government who cannot and mostly will not see the wood from the trees only to fill their own pockets. To save what is left we need independent producers starting with electricity	Ettore	retired
2022-07-10 11:36:55	Western Cape		Yes I do	Nuclear		Abdool	retired
2022-07-10 11:34:16	Western Cape		Yes I do	Nuclear	Privatise Eskom so we have a reliable power supply.	Jenny	retired
2022-07-10 11:30:32	Gauteng		Yes I do	Nuclear	A combination of coal, nuclear and solar	Antoinette	retired
2022-07-10 11:18:21	Western Cape		Yes I do	Nuclear	The government has proved that it can run anything into the sewer, so let other people and companies do the job that the government can't do. Nuclear is the way to go for whole country, less mess and it producers power 24/7/366.	Graham	retired
2022-07-10 11:15:02	Gauteng		Yes I do	Nuclear	Nuclear energy is carbon free and will supply uninterrupted energy . Renewable energy is an alternative but available only when wind or the sun is available. Coal pollutes the environment during operation and causes environmental impacts	Nsipa	retired
2022-07-10 11:09:15	Mpumalanga		Yes I do	Nuclear	1) Red tape is a burden, especially in emergency situations. 2) Nuclear is currently the only source that can support power demand nationwide. During transition phase to nuclear private companies should be allowed to produce electricity.	Gian Paolo	retired
2022-07-10 10:46:32	Gauteng		Yes I do	Nuclear	This proposal is late by 20 years. It would take another 10 years to get this scheme off the ground, if approved. P.S. Whatever happened to the Lesotho (multi- Billion) pumped storage scheme?	Dan	retired
2022-07-10 10:39:55	Western Cape		Yes I do	Nuclear	Were in crisis and Government wants to discuss? Its been 15 years! Just do it! Nuclear is so much cleaner and easier and lest risky, plus waste can be very effectively handled.	Chris	retired
2022-07-10 09:43:30	Gauteng		Yes I do	Nuclear	Time is an issue especially for nuclear and, time this economy cannot afford. The quickest practical - wind, solar etc - route must be brought into play. Absolutely No Clue as to the severity of slow responses.	EAMON	retired
2022-07-10 08:39:30	Limpopo		Yes I do	Nuclear	Yes I support private entities to supply their own energy and even sell it by putting back into the grid. For house hold and small businesses' Solar will be ideal. But for Cities, towns and regions Nuclear will be ideal,	Thys	retired
2022-07-10 08:26:11	Western Cape		Yes I do	Nuclear	It is clean an reliable	Shayne	retired

2022-07-10 08:24:00	Mpumalanga	Yes I do	Nuclear	Proven over the world nuclear is the cheapest and cleanest and safest solution to energy supply in the longer term. Short term could be coal, hydro. Problem with government supplying power is influenced by corruption and political decisions for votes. Competition in power supply will keep prices competitive and effective.	Jan	retired
2022-07-10 07:40:22	Gauteng	Yes I do	Nuclear	Nuclear, solar, hydro should all be employed - use a both/ and rather than an either/ or approach. And privatize, at least in part!	Frederik	retired
2022-07-10 07:19:19	Gauteng	Yes I do	Nuclear		Johan	retired
2022-07-10 07:12:16	KwaZulu-Natal	Yes I do	Nuclear	Small Nuclear for immediate relief and long term renewable wind and solar. Also allow small producers to put excess production back into the grid.	Rob	retired
2022-07-10 06:47:34	Gauteng	Yes I do	Nuclear		Iqbal	retired
2022-07-10 06:36:26	Free State	Yes I do	Nuclear	Nuclear energy is clean and consistent unlike solar or alternate energy but it must be well managed. The technology is improving all the time so the cost is decreasing all the time. Other non-fossil sources should also be used to ensure a balanced supply away from fossil fuels.	Ikhraam	retired
2022-07-10 06:31:00	Gauteng	Yes I do	Nuclear	Nuclear power will do away with the corruption linked with the coal supply for traditional power stations. I am also in favour of renewable energy sources such as solar and wind. Any new suppliers must absolutely not be BBBEE "tenderpreneurs" due to their dismal track record in this country.	Paul	retired
2022-07-10 06:13:02	Gauteng	Yes I do	Nuclear	Nuclear because it's a easier procedure	Patsy	retired
2022-07-10 06:02:15	Western Cape	Yes I do	Nuclear	Need. To create competition for Eskom	Barry	retired

2022-07-10 05:25:58	Eastern Cape	Yes I do	Nuclear		David	retired
2022-07-10 04:42:34	Western Cape	Yes I do	Nuclear	I consider the combination of solar and nuclear is probably the best route: nuclear for sustainable larger stations on the long term and solar wherever there is space for it. Just a pity that we are not producing fuel anymore	Ruan	retired
2022-07-10 03:12:20	Limpopo	Yes I do	Nuclear		Charles	retired
2022-07-10 01:12:55	Western Cape	Yes I do	Nuclear	Plan of Action : 1. Accept reality, South Africa is all but ruined. 2. Accept ANC lacks any political will or capacity to change. 3. Accept South Africa is on the point of sovereign collapse. 4. The ANC has done its worst. 5. Now is the time to call in the Chinese.	Ron	retired
2022-07-09 23:13:42	Western Cape	Yes I do	Nuclear		Marius	retired
2022-07-09 22:12:07	Western Cape	Yes I do	Nuclear	This would be one method to be considered, but if we engage in the quickest, it would probably be Hydro. We need to use the private sectors to implement the quickest energy source, but also work on long term methods. In all cases, stop this nonsense of unqualified cadre's, and union manipulations, SA cannot afford our resources to go down 'the tubes' any longer !! Enough is enough !!	Edith	retired
2022-07-09 21:13:29	Western Cape	Yes I do	Nuclear	All the above is the correct answer to what sources to be used! Hydro, natural gas, water, nuclear, wind, solar.	Barbara	retired
2022-07-09 20:44:05	Gauteng	Yes I do	Nuclear	Although it may be dangerous it is accessible and clean.	Anna	retired
2022-07-09 20:04:38	KwaZulu-Natal	Yes I do	Nuclear	Unlike our illustrious Mr Malema's misguided and racist opinion, in which he supports nationalization of everything, we need to come to our senses and understand and accept that privatization is the only solution to our woes and that the white South African has an important role to play in the saving of the country. Do away with all restrictive red tape and embrace every workable option to produce the electricity the country desperately needs and kick the BEE policy into the dustbin !	William	retired
2022-07-09 19:22:24	Western Cape	Yes I do	Nuclear		Brian	retired
2022-07-09 19:10:33	Gauteng	Yes I do	Nuclear	Besides immediately opening the market IPPs, SA should start building nuclear power stations, but with the proviso that they will be built and run by the foreigners who build them, especially the French!	Max	retired
2022-07-09 18:55:44	Free State	Yes I do	Nuclear	There is a few methods to be used: Hydro, Solar, Nuclear, Wind, etc etc	Carolina	retired
2022-07-09 17:54:27	Gauteng	Yes I do	Nuclear	Nuclear is safe, and the new pebble bed technology allows quick and easy erection of power plants. Extra modules can be added as they are needed. Nuclear fuel is cheap and lasts a long time. There is no atmospheric pollution. Coal should also be part of the mix. We are in an existential threat and should not be forced to disregard coal just because the greens say we should. There doesn't seem to be a clear correlation between CO2 levels and climate change. Renewables can only play a minor role in the energy mix as it is not reliable, and needs to be stored at great cost. Wind turbines cannot be recycled and are more detrimental to the environment than nuclear or coal.	James	retired
2022-07-09 17:37:02	Western Cape	Yes I do	Nuclear		Catl	retired
2022-07-09 17:36:59	Western Cape	Yes I do	Nuclear		Catl	retired

2022-07-09 17:11:41	Free State	Yes I do	Nuclear	An expert task team made up of qualified engineers, financials, environmentalists and others (not govt officials, politicians or cadres) must be appointed to drive this scheme from beginning to end and then to oversee the workings of the finals. I have a question though, why has it taken so many years to come to this reality? It's time the responsible officials start doing their jobs I think.	WCA	retired
2022-07-09 16:17:10	Western Cape	Yes I do	Nuclear	Long term solution	Robert	retired
2022-07-09 15:23:49	Western Cape	Yes I do	Nuclear	Independent companies with various options of supply should be given with competitive pricing and to follow 1st world structures mainly UK. Government. The electricity act to be amended and with SA legislation on electricity as firstly it is a basic need of people and government must provide to avoid exploitation of disadvantaged communities at subsidised rates and there must be an independent body that oversees and regulates that operate the companies that operate energy in whatever form within South Africa to ensure no corruption government official privileges or other given ...but South Africa will require a system not easily sabotaged through theft laws will need to change to extreme measures of penalties to theft in any form supplier or consumer. Extreme competent educated experienced staff employed no inter family permitted giving rewards of non compliant staff ...Independent companies with the means to supply and competitive reliability options given to the consumer with free installation given from the source chosen if any required..	Marcia	retired

2022-07-09 13:29:14	Western Cape	Yes I do	Nuclear		Heinie	retired
2022-07-09 12:58:28	KwaZulu-Natal	Yes I do	Nuclear	South Africa must not fall into the Covid trap of lockdown and the destruction of jobs. Likewise the 5 year contemplated CO2 emissions legislation and red tape could inhibit electricity supply. In the short term any excess electricity generated by the private sector (IPP) should immediately be allowed into the national grid. In an article in the Mercury (July 8th) written by Banele Gindindza and who quotes the nuclear physicist Dr Kelvin Kemm provides solutions for the medium and long term. Investors from Europe would be willing to fund a number (4-5) of South African developed HTMR-100 reactors. As in Europe these reactors can be justified as an acceptable transition to green energy by 2035 and could be funded by the R100 billion green energy fund pledged to South Africa. A task team of companies in the private sector should be put together whose sole purpose would be to plan and implement the the provision of sufficient electricity into the national grid to meet the needs of all South Africans. This can be successfully achieved if there is good cooperation with the government Minister of Energy.	Eric	retired
2022-07-09 12:11:11	Western Cape	Yes I do	Nuclear	Nuclear is the best option and the technology is getting safer with smaller reactors becoming available.	Brian	retired

2022-07-08 19:51:35	Western Cape		Yes I do	Nuclear	Nuclear energy is clean and newer technologies have been developed to make it cheaper and safer in the long term. It, unlike wind and solar energy, can provide energy at all times and seasons.	Hilton	retired
2022-07-08 19:42:44	Western Cape		Yes I do	Nuclear	The black outs are doing more damage on the infrastructure like sub stations and transformer ,than is being taken into account, let alone on private property like computers,television, and many other sensitive appliances which escom doesn't meet the bill , definitely get the private sector in the ANC can only break things not even maintain.	Beat	retired
2022-07-08 18:34:17	Gauteng		Yes I do	Nuclear		John	retired
2022-07-08 18:31:05	Gauteng		Yes I do	Nuclear	Nuclear power needs to be used for major power use areas but backup power is necessary. Therefore nuclear power should be backed up with things like natural gas again (most people have gone that way in the world for cooking) and can be used in most households for geysers. Solar and wind power are not enough to carry the load. Both are useful additions but need to be price controlled. Right now they are way to expensive for normal households - and unfortunately also cause unrecyclable waste. Nuclear will also cause a waste problem as it has in the rest of the world but right now our choices of power are limited. We mine Uranium instead of exporting please use it for the people.	Anthea	retired
2022-07-08 18:29:34	Gauteng		Yes I do	Nuclear	Any altenate form of power production would be good at this crisis stage. In the long run Nuclear would be reliable and clean.	Estrellita	retired
2022-07-08 18:18:34	KwaZulu- Natal		Yes I do	Nuclear	Nuclear is a long-term solution. For SA's immediate needs? Anything constructive to move forward and get us out of this mess.	Graham	retired

2022-07-08 18:14:33	Gauteng	Yes I do	Nuclear	Why would our government not allow independent power producers unless, first of all they are never load shedded or second they can't earn big corrupt monies from allowing it. Is it because they just simply are not in the business of looking after the people they are meant to serve but only greedily serve themselves and their relatives? Politicians especially in the ANC are just not nice people but instead are lacking in conscience and simple decency!	Tom	retired
2022-07-08 18:09:47	Free State	Yes I do	Nuclear	Our sun is a massive nuclear plant and we could very well use man-made nuclear plants (small and larger ones) to increase the power supply rapidly to the country. This technology is now very well known and the risks are minimal. Just google to see what the possibilities are for rapid deployment.	dirk	retired
2022-07-08 17:53:22	Gauteng	Yes I do	Nuclear	Nuclear, but NOT Russian - the French need to be involved. I like the idea of independent suppliers. My third point is simply BEE is killing this country. How can 4 million whites be a threat to 60 million other races. Skin colour is not the issue, the issue is to get experts who can get this country working again. Anything on the left hand side - socialism to Marxism - is not going to save this country.	Lindsay	retired
2022-07-08 17:49:54	KwaZulu-Natal	Yes I do	Nuclear	No comment	Rachi	retired
2022-07-08 17:30:51	Free State	Yes I do	Nuclear	Planne moes lankal in plek gewees het. Addisionele bronne lankal gereed, hoekom nognie geimplimenteer nie. Patrice en Cyrill moet hulle geldgierigheid los en werk vir die mense van SA. Jeff R en Brian D moet uitbly uit die nuwe bedeling anders sal die volk moontlik self intree!!	Eddie	retired
2022-07-08 17:21:51	Eastern Cape	Yes I do	Nuclear	To allow only one selection is not viable. Nuclear then hydro where there are large bodies of water and ocean currents then clever placement of solar panels eg. roof areas and lastly wind turbines which is only viable in windy areas and not recyclable so not that environmentally great either. Coal, diesel, petrol, gas is the worst environmentally and needs to stop. Most of all the political corruption has to stop before any solution will work.	Linda	retired

2022-07-08 12:32:48	Gauteng		Yes I do	Nuclear	South Africans invented the pebble bed reactors but the ANC didn't want it because it was white people, and there was no way where they could graft. https://en.wikipedia.org/wiki/Pebble_bed_modular_reactor Now each and every home must get discounted solar, or we should get rebates. We also must be like Germany where houses with solar can put back the extra energy into the grid and there meters run backwards, they are also being paid.	Marlene	retired
2022-07-08 12:21:51	Western Cape		Yes I do	Nuclear		Bill	retired
2022-07-08 12:13:28	Eastern Cape		Yes I do	Nuclear	Nuclear is the only really efficient source of electricity. A nuclear power station produces many many times what is available from wind, solar etc. These renewable sources are viable to top up supply but will never be able to catch up or sustain the amounts of electricity needed by this country. In addition they are hugely expensive and not economically viable. Nuclear is the only viable alternative to catch up and also to replace the outdated and failing coal plants as well as halt the environmentally destructive coal plants. Nuclear plants are initially expensive but in the long term are vastly more economical than the renewable alternatives. the next nuclear plant is already 25 years overdue and is our only hope of turning the power crisis around. GET RID OF GOVERNMENT CONTROL AND INTEFERENCE IN ESKOM AND HAND ALL POWER GENERATION TO THE PRIVATE SECTOR, RUN BY PEOPLE WHO KNOW WHAT THEY ARE DOING, NOT THEIVING POLITICAL CLOWNS.	Chris	retired

2022-07-08 12:08:20	Western Cape		Yes I do	Nuclear	<p>This country has been held to ransom since the time of Zuma. If something had been done about the failing Eskom then, we would be out of the woods today. Instead Eskom was robbed blind by Zuma and Guptas and nothing has yet to be done to Zuma as punishment and "pay back SOME money. Even if something had been done in Ramaphosa's time much headway would have been made already. Our government is sorely lacking when it comes to the common man in the street but they make sure they feather their own nests with large salaries, two houses free flights even after resigning as an MP. Their own people are living on the poverty line, the very ones who put them in power and it's bloody disgusting. If other provinces had done what the Western Cape has done they would have some relief as we do. Solar and hydro power would have helped tremendously but the government is too inclined to hold on to the reins wherever and whenever they can.</p> <p>We have just witnessed how powerful the Eskom workers are with the whole country just at about a standstill - the new coverage of this will probably inspire other essential workers to follow suite. Thus we are held to ransom again by the ANC who pour millions of taxpayers levies into things like the Road Accident Fund which has already been depleted by corruption.</p> <p>We desperately need other sources of power and stop supplying other countries around as we do not have sufficient of our own. The only solution to this problem is to appoint several HONEST politicians who can do their job for the people of SA and not just for their own gain. Van der RUYTER HAS THE RIGHT IDEA IN REHIRING ALL THOSE WHO HAD TO LEAVE SOE's because of their colour. We need to get rid of illperforming useless workers and their leaders and make our country great again. You can say what you like about apartheid but even with that the strict sanctions placed on SA the country still ran and was classed as a first class world country - not the 5th class role it plays now! AND one could go on and on but even the president is tshoepstil at this time because he has made a complete idiot of himself and let the country down - maybe stick to farming ankole cattle!</p>	Dianne	retired

2022-07-08 11:57:42	Western Cape		Yes I do	Nuclear	<p>The only viable alternative to coal burning power stations is nuclear. There is unfortunately a mass stigma associated with nuclear due to the association between it and nuclear bombs. However nuclear power technology have improved greatly since the 1950's. Nuclear power has by far the greatest energy return per input unit compared to other energy sources. Nuclear is expensive at startup however is much more cost effective in terms of gross energy production and reliability than alternative energy sources and electricity cost will actually decrease with time as the nuclear power stations become more established. Wind and solar energy is massively expensive, take up large chunks of viable land that could have been used for something else, is unreliable, as the wind does not always blow nor does the sun always shine, and requires large battery storage and conversion to be able to enter the electricity grid which is grossly expensive. As a third world country in which a large amount of citizens live under the breadline, and source their energy from wood and animal dung, coal would be the next best thing. However our coal burning power stations rely on the supply of coal from our mismanaged coal mines and the maintenance of the power station, both of which are unreliable at best. Nuclear power stations will also create sustainable jobs, where citizens will be able to find employment for many years at these stations. In comparison, with renewable energy, employment is short and only necessary for installation and thereafter for scheduled maintenance done by very few experts. As to the source of nuclear power, South Africa has massive Uranium deposits and again if mining Uranium becomes a necessity it will create sustainable jobs in these mines unlike renewables where jobs are not sustainable. Using nuclear will also be advantageous to citizens as their electrical bill will be low as the cost per unit of energy in nuclear is much lower than that of solar and wind.</p> <p>If nuclear is not used the only viable renewable alternative which is somewhat comparable is geothermal energy. It is currently used in 26 countries. However South Africa has very few sites where such a power station can be built as our geothermal resources are scarce</p>	AJ	retired
2022-07-08 11:57:08	Western Cape		Yes I do	Nuclear	100MW Small Nuclear Plant can be added to MELBOS or DUINEVONTUIN by THE CITY OF CAPE TOWN under the ambit of NUCLEAR SAFEGUARDS at the KOEBERG POWER STATION	JOHN	retired

2022-07-08 11:06:21	Western Cape		Yes I do	Nuclear	I also support Solar and wind power. My concern over Nuclear is that we probably do not have adequate qualified people to run it and there are also idiots within our population that would attempt sabotage	Gerald	retired
2022-07-08 11:02:55	Gauteng		Yes I do	Nuclear	There are multiple solutions to exploit but participation without interference of the government in the form of kick backs looting and control etc. is the key. Aside from the above the government needs to entice and employ those that are qualified to restore, maintain and manage the power and other state enterprises. The populace are also to blame. Huge sections of the population don't even pay for electricity and this is obviously not sustainable. People need to get used to contributing for services they want and receive. They need to get used to paying taxes just like the 3% that are carrying the can at the moment. Transparency is paramount. and the private sector brought in to assist instead of being predated upon. This government with their cadre employment and ridiculous policies want to control every aspect of the economy but it's becoming more and more apparent that they are battling at every level and will end up with a failed state and no income at all.	Vivienne	retired
2022-07-08 11:02:55	Eastern Cape		Yes I do	Nuclear	Nuclear is the only answer our brand new coal powered stations cannot function properly due to coal supply, labour issues, etc. Nuclear is clean and an entire plant run by a minimal number of staff	Mark	retired

2022-09-15 15:24:15	Gauteng	Yes I do	Nuclear		Arnold	retired
2022-09-15 07:27:44	Gauteng	Yes I do	Nuclear	Nowadays nuclear is remarkably safe and it has the least impact on the environment. Other methods have a great impact if you take the pollution created by manufacturing into account. Pebble bed and other (much) smaller nuclear reactors are much cheaper and even safer - the reaction comes to a stop automatically and it is easy to restart. This means that they require only a few people to operate much smaller sites. We are also already manufacturing the "balls" required for fuel here in Pelindaba. Over the last 50 (or so) years SA has spent a lot of money to research other nuclear options and it is time that we get a return on that investment.	Johan	retired

2022-09-08 13:49:08	Mpumalanga		Yes I do	Nuclear	Its the safest greenest cheapest and longest lasting form of energy and mini nuclear plants can be built in about 2 years if anc did this 4 years ago we would not be where we are outdource as anc can clearly not do the job	Hester	retired
2022-09-01 22:12:34	Gauteng		Yes I do	Nuclear	Enige iets buiten die huidige, enige verandering dal n verbetering wees!!!	Alfons	retired
2022-08-29 15:10:05	Gauteng		Yes I do	Nuclear	Renewables will cost too much in the end	Sandra	retired
2022-08-29 15:08:42	Gauteng		Yes I do	Nuclear	Renewables are a pipedream	Arnold	retired
2022-08-04 19:38:01	Gauteng		Yes I do	Nuclear	The ANC announced intentions but no actions (as usual). We need for things to happen. Removing red tape is essential, but ministers and government departments have to be forced to make all these promises happen NOW. Nuclear is such an obvious choice that we should start moving on it now - South Africa has some of the foremost skills on pebble beds - we should use it NOW.	Johan	retired
2022-08-04 10:40:14	Gauteng		Yes I do	Nuclear	Policy makers are too stupid scientifically and do not know what's the best choice for the future.	Kouichi	retired
2022-08-03 16:28:55	Western Cape		Yes I do	Nuclear	It is ridiculous that government hinders the introduction of independent energy providers when Eskom is failing to do so.	Michael	retired
2022-08-03 16:26:22	Free State		Yes I do	Nuclear	We have an abundance of uranium which is easy to produce. Enrichment of uranium must only be entrusted to the scientists with integrity and not be bought by corrupt politicians and the super rich Stellenbosch mafia. This must be a company which must be paid for with the exorbitant taxes already paid for by the general public. ANC politicians or cadres and the super rich must be banned from being part of a power generating entity as they will kill off this idea with their lust for money.	Jacobus	retired
2022-08-03 12:38:36	North West		Yes I do	Nuclear	The government has clearly demonstrated its complete inability to provide constant and sustainable electricity that is vital for the economy. The Monopoly of ESCOM must be removed by allowing more suppliers of electricity to the country. These suppliers will be private sector and business who have far greater ability than an incompetent ANC government to maintain a steady supply of electricity for the country.	Patrick	retired
2022-08-02 14:50:47	Western Cape		Yes I do	Nuclear	Given we are in a Long term emergency, most red tape should be suspended and alternative trustworthy sources found and encouraged and supported to become long term strategic partners. Nuclear production may be costly but is the most harmless to the environment with low risks and low pollution and controlled waste. Labor costs are lower overall and efficient production is tangible and less likely to be sabotaged. Staff training will ensure an upliftment and create scientific opportunities that coal and wind cant.	Chris	retired

2022-08-01 10:45:47	Western Cape		Yes I do	Nuclear	At least with nuclear there are world wide controls which should bring our clowns under ethical control.plus it is clean.	Ken	retired
2022-08-01 10:19:26	Gauteng		Yes I do	Nuclear		Pavol	retired
2022-08-01 08:58:49	Gauteng		Yes I do	Nuclear	Nuclear is the safest and most reliable way to provide a base load. Solar/wind power are unreliable and not necessarily available at peak demand periods and the storage of power is very costly. The batteries used would also have a limited life span and would need to be replaced sooner of later.	Terry	retired
2022-07-29 10:01:08	Western Cape		Yes I do	Nuclear	While Hydro, solar and wind generated power would be cleanest, it might not be as practical in the short term. Fossil fuels add to global warming so we should move away from them asap.	Mark	retired
2022-07-25 13:55:13	Gauteng		Yes I do	Nuclear	I have chosen nuclear because I cannot select more than one method. If wind power is chosen, the turbines must be placed on unproductive land or in the sea as is done in Scotland. Solar must also be situated on unproductive land as we need all the good agricultural land we to produce food for domestic consumption as well as for export. Land for housing is also a much-needed commodity as housing is still, and always will be, needed, therefore land of that quality (for residential use) must also not be used for power generation. The story going around about a surcharge being charged for anyone generating their own power and not using ESKOM power must be discouraged. We all should have the freedom to chose whether to generate for own use and not be totally reliant on ESKOM. IPP agreements should be a natural matter in the country's best interests.	Christopher	retired
2022-07-19 15:30:54	Western Cape		Yes I do	Nuclear		Ethan	student
2022-07-19 14:43:53	Eastern Cape		Yes I do	Nuclear	Nuclear would allow for a cleaner, steady baseline supply of electricity which South Africa needs for stability in electricity supply. Other renewable energy generation stations would also be useful, even if they don't tend to generate the most at peak hours.	Josie	student

2022-07-15 10:26:37	Western Cape		Yes I do	Nuclear	Allow for external generation companies to come online and let eskom change its role to electricity distributor. Also fire Gwede, he's holding back renewables because of his love of coal.	Ethan	student

2022-07-12 11:22:08	Gauteng		Yes I do	Nuclear	South Africa has a need to improve its power production, as well as lowering its emissions and supporting Independent Power Producers to provide less fossil fuel based electricity would achieve both of these objectives.	Stefan	student
2022-07-11 20:25:05	Western Cape		Yes I do	Nuclear	Produce high amounts of electricity with very little amount of resources, and if managed properly very little amount of pollution by-product	Bertus	student
2022-07-11 12:33:58	Western Cape		Yes I do	Nuclear	At this point in our country, it is an economic imperative that we allow independent power producers. The central government is incompetent to provide this basic service and their desire to hold on to power will inevitably result in SA becoming a failed state by the end of the decade — that is, if nothing else is done until then. I pray that this will not be the case.	Graham John	student
2022-07-11 11:43:47	Gauteng		Yes I do	Nuclear	South Africa desperately needs independent power producers in order to increase the power capacity available on the national grid, as increasing the capacity does not seem to be possible solely within Eskom at this point. If the obstacles, including excessive red tape, currently facing independent power producers is removed these producers would be able to increase the capacity available on the national grid in a relatively short amount of time. In my opinion, a combination of solar and nuclear power would be the quickest route to increasing the amount of available power. Nuclear power, if the stations are built well, will also be an excellent long-term energy source for the national grid.	Charissa	student
2022-07-11 09:16:46	Gauteng		Yes I do	Nuclear	Loadshedding is going on for far too long. We have the brain power to sustainably power this country but politics are keeping us in the dark. This is getting beyond ridiculous.	Deneeshe r	student

2022-07-08 10:25:45	Mpumal anga		Yes I do	Nuclear	Nuclear is extremely efficient and eco-friendly. While nuclear does require a lot of capital it is cost effective through the amount of power it generates vs the cost.	Christian	student
2022-07-08 09:17:29	Western Cape		Yes I do	Nuclear		Aidan	student
2022-07-08 05:39:58	Western Cape		Yes I do	Nuclear	Wind and hydro generation is unreliable, and considering the current crisis, reliability is key. Diesel is also undesirable by virtue of the fact that the prices for diesel keep going up, making it more and more difficult to supply electricity at a stable cost. Coal is undesirable because of the effect it has on the environment in releasing greenhouse gases. In a case of emergency Coal is a better alternative than some, but nuclear is still the most desirable avenue. Nuclear power generation is reliable, stable and extremely effective. Solar power is difficult to use reliably for extended periods of time as a means of producing large scale amounts of electricity. Another option is to perhaps use a hybrid of several of these forms together (e.g. solar and nuclear and wind and coal).	Jonathan	student
2022-07-07 20:42:24	Free State		Yes I do	Nuclear	Short term: Wind, solar, tidal and wave and hydro power. Long term: Add Nuclear to ensure there is a reliable baseload power source that other renewables can build on. Nuclear power plants from France and other western countries would be acceptable. NOT RUSSIAN.	Stefan	student

2022-07-19 17:56:49	Eastern Cape		Yes I do	Wind	I'm actually not sure which is the best method of electricity production but private companies have spent a fortune erecting wind turbines all over the country. Surely the energy that they are able to generate should be allowed on the grid. Solar energy in sunny South Africa is also an obvious choice. I'm all for lowering carbon emissions globally.	Andrew	unemployed individual
2022-07-15 17:51:27	Western Cape		Yes I do	Wind	Wind farms have been going up like mushrooms over the past couple of years. Who do they supply? Surely a developer of a wind/solar farm would comply to the specifications/needs of the consumer (as even Eskom need to do), otherwise it would be a waste of money. Is it again the case of not paying the right person the prescribed amount of money under the table to get them all connected????	Fred	unemployed individual
2022-07-15 16:31:53	KwaZulu- Natal		Yes I do	Wind		Gerald	unemployed individual
2022-07-14 18:52:31	Western Cape		Yes I do	Wind	As I recall we have great Wind options that are already in use and should be ramped up. It is inconceivable that our economy is being held to ransom because certain politicians have deals with coal suppliers We already pay too much for power and the longer this carries on, using diesel and other options, the worse this is for us economically The newly commissioned power stations are not working and have not resolved the problem, we are throwing good money after bad Productivity is being affected country wide and making most products unaffordable Businesses are collapsing and unemployment is rising - the most vulnerable are the most affected which is unacceptable Skills are leaving our country in droves, a loss we cannot afford as when we get back to normality there will not be adequately trained people to pick up the growth and we will lose further investment	Merle	unemployed individual
2022-07-14 12:43:07	Western Cape		Yes I do	Wind		Christine	unemployed individual
2022-07-14 09:08:05	Gauteng		Yes I do	Wind	We have vast areas that cannot be occupied that we can use for all sorts of energy production. Our problems can be solved if our geriatric government will just step aside.	Melony	unemployed individual
2022-07-13 11:24:42	Western Cape		Yes I do	Wind	Immediately start renewables today. The ANC government has stuffed up this country. Tax payers should be the only voters.	Peter	unemployed individual
2022-07-13 10:53:57	Western Cape		Yes I do	Wind			unemployed individual
2022-07-13 09:47:22	KwaZulu- Natal		Yes I do	Wind	The cape is known for its strong wind. Along the coast too. SA has plenty of strong wind. Businesses are losing money with all the Loadshedding. Kids struggle to do homework & study in the dark. We need a solution as soon as possible.	Desirée	unemployed individual
2022-07-13 05:39:15	KwaZulu- Natal		Yes I do	Wind	Much cleaner, green energy	Leon	unemployed individual
2022-07-13 02:52:37	Gauteng		Yes I do	Wind		Marinda	unemployed individual
2022-07-12 20:00:36	Gauteng		Yes I do	Wind		Shirley	unemployed individual
2022-07-12 17:46:39	Gauteng		Yes I do	Wind	Carefully select non corrupt , suppliers . They must be qualified to do the job . South Africa needs non partial panel to select suppliers that have no family in our existing corrupt government .	Robert	unemployed individual
2022-07-12 12:59:27	Gauteng		Yes I do	Wind	We have all over SA the space to put all the wind turbines, why do they still going on and on with the coal!!! wasting the money of all our tax payers and the people actually paying for their electricity.	M.	unemployed individual
2022-07-12 12:35:17	Western Cape		Yes I do	Wind	I fully support that all Independent Power Producers in all regions of South Africa be allowed to immediately supply our country with electricity. Whichever type of generation the IPP's are able to supply that generates clean energy and have the capacity. May it be Wind, Solar or Hydro or other. The IPP's have work hard for over 10 years to make a difference especially in the Western Cape. Removing the red tape is long overdue.	Adèle	unemployed individual
2022-07-12 12:20:29	Limpopo		Yes I do	Wind		Eunice	unemployed individual

2022-07-12 12:06:13	Western Cape		Yes I do	Wind	Wind and Solar power is options in a country with sunshine and wind in great supply. There are already wind farms in operation but not utilized to their full potential. Get outside providers to help upgrade and utilize the system to incorporate these. Sunshine is a abundant and free resource and government should subsidize this source so that it is available to the general public to use. The more people off the grid the better for ESKOM or other providers to supply the rest of the population. ESKOM is not working, use other suppliers/providers to get our electricity supply up and running without problems and without hurting nature.	Elri	unemployed individual
2022-07-12 10:16:06	KwaZulu- Natal		Yes I do	Wind		Liesel	unemployed individual
2022-07-12 07:19:50	Western Cape		Yes I do	Wind	I could only choose one option but ANY option would be fine to get rid of Eskom once and for all	Veronica	unemployed individual
2022-07-12 06:33:54	Free State		Yes I do	Wind	In that way we don't destroy the environment and if it works for other countries why can't it work for us. Why must we support eskom? They don't supply us with a stable supply of electricity. We pay for it but don't get it. The government does not care they are killing us hard working south africans making us pay for more. This must stop. We need a better and economic power supplier that does meets our needs and not the corruot government of this country.	Teresa	unemployed individual
2022-07-12 05:08:07	Eastern Cape		Yes I do	Wind	Wind, Solar and Hydro ABSOLUTELY NO NO NO to Nuclear! Especially with the Brain Drain that is currently happening in that field, we cannot afford Nuclear-mishaps due to lack of competency OR sabotage OR strikes as seem to be the current state of affairs in our beloved country.	Corne	unemployed individual
2022-07-11 23:31:34	KwaZulu- Natal		Yes I do	Wind		Rashid Ahmed	unemployed individual
2022-07-11 20:52:06	Gauteng		Yes I do	Wind		Gerda	unemployed individual
2022-07-11 18:54:25	Western Cape		Yes I do	Wind	Absolutely, not just wind. We are blessed with so much sun. Tap into the solar resources too. Just so grateful we at least are in a COCT and so are not affected as badly as others in our country! This is hell for the economy and businesses are struggling enough as it is post Covid. Enough of the stealing and pillaging of the Eskom coffers! The ANC thieves should be ashamed of what they have done! De Ruyter is trying to keep the ship afloat, but other power sources need to feed the grid or supply directly ASAP! Non negotiable!	Lisa	unemployed individual
2022-07-11 14:32:41	Western Cape		Yes I do	Wind	Firstly, A huge thank you to City of Cape own for taking care of her citizens, by keeping us a stage lower than the National Stage, whenever possible. The current performance of Eskom, as a State Owned Enterprise, is absolutely disgusting. Our energy is being sold to other countries, while we suffer darkness. When I drive around, I see so many wind farms, which are not allowed to contribute to the national grid. Add these farms to the grid and a huge difference will be made. It is high time for South African Citizens to demand that the ANC led Government, stop enriching themselves and think of the man on the street. Wind generated and Hydro generated energy would be the best and easiest to implement.	Mark	unemployed individual
2022-07-11 13:30:09	Gauteng		Yes I do	Wind	Anything to free us from the abysmal Eishkom.	Erica	unemployed individual
2022-07-11 11:03:12	Gauteng		Yes I do	Wind	All possible resources should be allowed	Gerda	unemployed individual
2022-07-11 10:50:33	Mpumal anga		Yes I do	Wind	We are fortunate to have parts of our beautiful land with plenty of sunshine and we have parts with lots of wind. Why not use that to support our daily living needs?	Anneke	unemployed individual
2022-07-11 10:32:08	Eastern Cape		Yes I do	Wind	I think that having various sources of power available to the people to choose what suits their environment and their pocket is absolutely essential. Having private companies providing this essential service will not only make electricity more affordable but competition will enable people to make a better decision and it will keep the SP's on their toes by providing competitive pricing and benefits.	Brigetta	unemployed individual
2022-07-11 10:25:41	Western Cape		Yes I do	Wind		Wayne	unemployed individual
2022-07-11 10:04:24	Western Cape		Yes I do	Wind	Our government is incapable to solve any problems since 1994. Bring back the people that has the ability, drive and knowledge so solve SA internal problems, that all of us can live.	Johanna	unemployed individual

2022-07-10 08:09:59	Western Cape		Yes I do	Wind	Having multiple private entities will keep prices low for the consumers. And many private companies would want to get a head start before competition comes along.	Steve	unemployed individual

2022-07-10 08:07:34	Western Cape		Yes I do	Wind	South Africa needs IMMEDIATE ACTION regarding Electricity. Let Independent Contractors supply the Power initially and Utilize the Wind to generate Electricity. These systems take time. Let the work begin.	Natalie	unemployed individual
2022-07-10 07:33:17	Western Cape		Yes I do	Wind		Karin	unemployed individual
2022-07-10 06:40:42	Western Cape		Yes I do	Wind	I don't know what kind of power generation would be best, but it cannot be state controlled or Eskom. Neither are up to even the most basic standard.	Lizanne	unemployed individual
2022-07-10 05:42:18	Western Cape		Yes I do	Wind	Actually anything would be better than the expensive non functioning present part-time provider. Gatvol!!!!!!	Carol	unemployed individual
2022-07-10 05:26:51	Limpopo		Yes I do	Wind	A renewable energy source without creating a lot of pollution. Wind power is efficient and does no damage to nature. Eskom should be privatized, which will give a more reliable service and help fight the corruption and bad service delivery.	Sunette	unemployed individual
2022-07-10 00:08:49	Western Cape		Yes I do	Wind		ELISE	unemployed individual
2022-07-09 16:50:35	Gauteng		Yes I do	Wind	The government have no knowledge and are too incompetent to understand the disasterous road they are travelling. Use the natural resources we have to create clean energy.	Monica	unemployed individual
2022-07-09 16:03:25	Western Cape		Yes I do	Wind	Wind, solar, renewables. But not imported stuff and outside contracts. There is so much new technology available out there.	Marcell	unemployed individual
2022-07-09 15:48:53	KwaZulu- Natal		Yes I do	Wind		Shayista	unemployed individual
2022-07-09 13:58:11	KwaZulu- Natal		Yes I do	Wind	My first option is to privatise Eskom in its entirety. Interim arrangements is to allow independent people to supply the grid with immediate effect	Tharsu	unemployed individual
2022-07-09 13:50:47	North West		Yes I do	Wind	I would prefer solar but the panels will be stolen. Wind works and delivers enough power if it is set up correctly. Go for it and stop wasting our economy with rubbish BEE policies!	Jacqui	unemployed individual
2022-07-09 10:25:37	Western Cape		Yes I do	Wind		hayley	unemployed individual
2022-07-09 09:16:42	Western Cape		Yes I do	Wind		Herschel	unemployed individual
2022-07-08 22:21:45	Western Cape		Yes I do	Wind	We need renewable energy.	Jane	unemployed individual
2022-07-08 20:56:05	Western Cape		Yes I do	Wind	Independent Power Producers should be allowed to immediately supply South Africa with electricity. Gas, wind, water, and solar may be used to generate electricity.	Bianca	unemployed individual
2022-07-08 20:51:28	Western Cape		Yes I do	Wind	Yes, allow the Independent Power Producers to immediately supply to the grid, with no strings attached. Allow solar and wind energy and energy that is sustainable for our earth. Eskom has had a monopoly long enough.	Andrea	unemployed individual
2022-07-08 20:42:00	Western Cape		Yes I do	Wind		Esther	unemployed individual
2022-07-08 20:04:45	Western Cape		Yes I do	Wind		Searle	unemployed individual
2022-07-08 19:36:41	Gauteng		Yes I do	Wind	We must be allowed to buy from our preferred suppliers without interference from the government. This is our constitutional right! And the ANC recklessly ignores this fact and by doing so is bringing this country to it's knees.	Veroshka	unemployed individual
2022-07-08 18:52:39	Gauteng		Yes I do	Wind	All our coastal cities have wind Shirley we can use that to produce clean power	Theo	unemployed individual
2022-07-08 18:01:17	Western Cape		Yes I do	Wind		Maya	unemployed individual
2022-07-08 17:14:55	Western Cape		Yes I do	Wind	It is actually scary and absurd at the same time that deregulation is not on the cards yet. Given our crises we are it is crucial that we look at independent power sources to ensure our small to medium businesses can survive, this will also lessen the load on diesel and create an additional stream of jobs all over South Africa, in time it will also bring the cost of putting a household on some form of renewable energy source an affordable reality. Ot onky is it about saving our power supply now but also saving our earth down the line from the negatives that cone with coal generation. What a change it will have if you can source Labour and skills without BBEE as yuur current labour force will be abke to provide more efficient labour given the compete landscape that will arise.	Chris	unemployed individual
2022-07-08 15:46:05	Gauteng		Yes I do	Wind	Wind krag-opwekking word reeds in verskeie lande suksesvol gebruik. In Europa is selfs baie boere wat wind krag-opwekking op hulle plase het en krag verkoop aan die netwerk.	Antonie	unemployed individual
2022-07-08 15:25:36	Eastern Cape		Yes I do	Wind	Wind power is non invasive and something we have a lot of.	Maria	unemployed individual
2022-07-08 15:21:25	Western Cape		Yes I do	Wind		Andri	unemployed individual
2022-07-08 14:28:06	Western Cape		Yes I do	Wind		Dewald	unemployed individual
2022-07-08 12:52:39	Gauteng		Yes I do	Wind	For far too long, Eskom has riddled this country with poor service delivery. It is high time that we introduce competition in this vital element, before it is too far gone and SA cannot recover.	Anthony	unemployed individual
2022-07-08 12:41:13	Western Cape		Yes I do	Wind	Eskom clearly is a huge mess bring in some competition as many as possible but supply south Africa with cheap reliable electricity for all south Africans it will create jobs ,wake up anc stop controlling this country ,let go and light up our country	Cheryl	unemployed individual
2022-07-08 12:02:32	Gauteng		Yes I do	Wind		Frans	unemployed individual

2022-07-08 11:38:26	Western Cape		Yes I do	Wind	The Northern Cape has so much space and sun, solar would be perfect and wind with this blasting South Easter and also the Northwest wind in winter.	Susan	unemployed individual
2022-07-08 11:13:12	North West		Yes I do	Wind		Lizette	unemployed individual
2022-07-08 09:44:10	Eastern Cape		Yes I do	Wind	I agree that private energy supply should be allowed immediately with no red tape and restrictions to generating capacity . Seeing that government can't be relied on to even supply enough to keep the lights on. As it is currently a lot of business will be closing or downsizing. There is no way to grow the economy in the current situation.	Delroy	unemployed individual
2022-07-08 06:52:02	Gauteng		Yes I do	Wind	Wind is free, so is sunlight for solar and water for hydro. All these can be utilized to generate enough electricity.	Etiene	unemployed individual
2022-07-08 06:49:46	Gauteng		Yes I do	Wind	We need this . The country is failing.	Louise	unemployed individual
2022-09-17 14:55:21	Western Cape		Yes I do	Wind	Well the wind are constantly blowing in parts of Cape Town. There are alot of unused space around Cape Town. Unfortunately I can only choose one. Solar panels in the Northern Cape where the sun is shining about 4000 days out of the 365.	Jurgens	unemployed individual
2022-08-25 23:22:40	Western Cape		Yes I do	Wind	If overseas can do it for their people why can't our people also benefit,it's proven to work all over the world	Roberta	unemployed individual
2022-08-25 23:16:14	Western Cape		Yes I do	Wind	I feel if overseas can accomodate their people with wind power and it's proven to work WHY CANT South African gov do the same for our people	Roberta	unemployed individual
2022-08-05 18:00:02	Western Cape		Yes I do	Wind		Brian	unemployed individual
2022-08-02 13:53:40	Western Cape		Yes I do	Wind	Wind or Solar definitely not Nuclear or coal.	Peter	unemployed individual
2022-08-02 07:16:52	KwaZulu- Natal		Yes I do	Wind		Leon	unemployed individual
2022-08-01 23:40:33	Eastern Cape		Yes I do	Wind		Riaan	unemployed individual
2022-08-01 14:58:00	Gauteng		Yes I do	Wind		Roger	unemployed individual
2022-08-01 08:24:39	Western Cape		Yes I do	Wind		Gerda	unemployed individual
2022-08-01 06:43:59	Western Cape		Yes I do	Wind	South Africa has an abundance of wind and sun so it should be used. As for electricity generation it should be put in private hands. Government cannot be trusted with taxpayers money. Their track record has proven this.	Esther	unemployed individual
2022-07-21 10:44:35	Western Cape		Yes I do	Wind	South Africa needs a Change. Eskom been a Monopoly is not Good. To much government involement is much hindrance.	greg	employed individual
2022-07-20 14:27:18	Western Cape		Yes I do	Wind	Tired of load shedding so let the private electricity producers help	Jacques	employed individual
2022-07-20 12:35:39	Western Cape		Yes I do	Wind	Our SA society is collapsing, and people are literally fighting to survive. The poor are stealing and killing and taking over the streets with squatter camps. The middle class is trying hard to maintain what little they have left. And the rich are trying to create what the ANC FAILED to do.... namely, provide us with our BASIC NEEDS to keep the country running! I find it shocking that the government wants to charge local owners that are capable of any electricity production, for having the initiative to provide electricity, when the ANC so terribly failed to do so in first place. In my opinion, the government should be doing WHAT EVER IT TAKES to create sustainable electricity such as WIND, HYDRO, SOLAR, which we have abundance of. Especially wind here in the Cape of storms! SCRAP the policy red tape for Independent Power Producers! At least until we have a government that actually provides a sustainable solution again. Thank you for your time.	Bianka	employed individual
2022-07-20 09:33:39	Gauteng		Yes I do	Wind	I can select quite a few from the list, Wind, Hydro, solar. Sustainable, environment friendly, and above all - consistent electricity from a reliable source!	Theresa	employed individual
2022-07-19 19:37:07	KwaZulu- Natal		Yes I do	Wind	Hi I selected wind as a method of electricity production cos I could only choose one option. I really feel that we should not be confined to having only one method of electricity production and should be looking to use a number of different options and I would suggest all of the below Wind Solar power Coal Diesel : as long as it would not majorly affect the cost of electricity	Roland	employed individual
2022-07-19 16:26:33	Gauteng		Yes I do	Wind	Its a no-brainer. The only right way is obviously to go green. Wind or solar.	Joseph	employed individual
2022-07-19 13:58:56	Western Cape		Yes I do	Wind	Wind or solar would work	Talya	employed individual

2022-07-19 13:58:54	Western Cape		Yes I do	Wind	Wind or solar would work	Talya	employed individual
2022-07-19 07:39:22	Western Cape		Yes I do	Wind	It is a necessity for the future and sustainability of our economy and environment that we privatize electricity supply and change over to a greener method of generating electricity.	Pieter	employed individual
2022-07-18 13:33:30	Western Cape		Yes I do	Wind	Wind power is already up and running and very successful, as well as the fact that the Cape has a lot of wind !	Nathalie	employed individual
2022-07-18 07:50:54	Western Cape		Yes I do	Wind	I fully support scrapping any form of red that results in the loss of power production capabilities. If IPPs can provide reliable and relatively clean energy, then this should certainly be considered as a method to improve Eskom's reliability and to reduce their carbon footprint. For the Western Cape at least, the primary source of electricity should be a combination of various renewable energies such as wind, solar and hydro. This could be augmented with the traditional fossil fuels and nuclear during peak hours.	Ian	employed individual
2022-07-18 05:50:56	Gauteng		Yes I do	Wind		Cecilia	employed individual
2022-07-18 05:43:29	Eastern Cape		Yes I do	Wind	Our province is renowned for its windy conditions. Mankind have generated with this weather patterns generated sustainable energy before, let's rope out throughout SA the resources available in every region, to be less dependent on one power supplier.	Anton	employed individual
2022-07-17 19:21:39	Western Cape		Yes I do	Wind		Janita	employed individual
2022-07-16 22:41:18	Western Cape		Yes I do	Wind		Bruce	employed individual
2022-07-16 10:37:27	KwaZulu- Natal		Yes I do	Wind	Eskom has shown time and time again that they are incapable of providing uninterrupted flow of electricity to South African homes and businesses. It is about time that we remove all Red-tapes and allow private energy production into the national grid. This should be done as a matter of urgency, as we can not the situation to continue as is. Enough is enough	Bheki	employed individual
2022-07-16 07:54:48	Western Cape		Yes I do	Wind	I can't say it will suit the entire South Africa's needs but definitely on all the coastal regions. Eskom is a corrupt monopoly and it's time to allow South Africa to allow private energy producers to enter the market and give South Africans a choice of who they want to use. It will also force Eskom to price their power better and run more efficiently	Kate	employed individual
2022-07-16 07:28:45	Western Cape		Yes I do	Wind		Adele	employed individual
2022-07-15 20:16:53	Gauteng		Yes I do	Wind		Judy	employed individual
2022-07-15 17:08:10	Gauteng		Yes I do	Wind	I believe that we should let the independent people have their own business in supplying power to the country. This will generate more income Jobs and honest tax paying business without corruption from the government. This will increase the earn and spend rate of the people of South Africa.	Toni	employed individual
2022-07-15 11:31:27	KwaZulu- Natal		Yes I do	Wind	The government has shown that they are not capable to run this themselves. Let this be privatised to bring in the right expertise and be managed effectively as an efficient business and not an extension of an ineffective government. Private suppliers will serve the public effectively to ensure proper electricity supply to the country for private consumption and importantly, to businesses. Load shedding is harshly affecting the public personally and crippling businesses. Private suppliers will create competition to bring down costs and implement more modern, environmentally friendly ways to supply electricity.	GREIG	employed individual
2022-07-15 09:29:08	Gauteng		Yes I do	Wind	Dear Please the country is has been for more then 10 years with power cuts and this as to stop.	Naeem	employed individual
2022-07-14 18:35:27	Western Cape		Yes I do	Wind		Elizabeth Maria	employed individual
2022-07-14 15:00:32	Gauteng		Yes I do	Wind	We need to love forward and go green.	Elsabe	employed individual
2022-07-14 13:39:23	Western Cape		Yes I do	Wind	It is so sad that for many years government just don't seem to get things right...Corruption Crisis, Power Crisis, Water Crisis, Social Crisis and of cause Crime Crisis....It seems that South Africa is heading into direction of total Crisis...I am not negative about our Country, but at how we as a Country are governed...We cannot follow Communism as that is what is happening, Government deciding, What, Who. How, When and Where and in the meantime Corruption overrules all decisions...What is Democracy? No the people need to stand up for what is right...for too long we are sitting and just following Governments decisions...We need to take back power for the people.	Ronel	employed individual
2022-07-14 12:11:43	Western Cape		Yes I do	Wind	I wish I could select 2. Wind in the Western Cape is definitely an option. I would also say Solar throughout South Africa - we are fortunate enough to get a lot of sunshine and I'm sure this can be of immediate solution.	Tanya	employed individual
2022-07-14 10:51:00	Eastern Cape		Yes I do	Wind		Shelley	employed individual
2022-07-14 10:04:21	Gauteng		Yes I do	Wind		Tracy	employed individual
2022-07-14 09:19:47	Eastern Cape		Yes I do	Wind		Chantelle	employed individual

2022-07-14 08:53:17	Western Cape		Yes I do	Wind	I chose wind as Cape Town and other provinces near the coast are normally windy., However solar is a good go to as well. Also having it on each roof of buildings and subsidising surplus power on to a grid to "feed" others is also a very good idea. The problem with the latter idea is that governments will lose out on making money. It seems making money is more important than actually helping people. This is the biggest problem of all. Greed. Infrastructure like Electricity, and water has not been properly upgrading for the people and as a result we are having these issues due to Government looking out for itself rather than the people it should look out for. My 2 cents.	Ettienne	employed individual
2022-07-14 07:38:33	Gauteng		Yes I do	Wind	Like in Europe, we can erect wind turbines in the sea at the West coast where the wind hardly ever stops blowing. That way we can have a good portion of sustainable energy. The system can be upgraded with time and new units added as time goes by to add to our green energy project.	Annemarie	employed individual
2022-07-14 06:17:15	Western Cape		Yes I do	Wind		Sharleen	employed individual
2022-07-13 23:36:53	Western Cape		Yes I do	Wind	wind,solar,water	Aaqiel	employed individual
2022-07-13 23:35:00	Western Cape		Yes I do	Wind	wind,solar, water	aaqiel	employed individual
2022-07-13 20:40:42	Western Cape		Yes I do	Wind	We already have so many wind turbines that it should be relatively easy to source electricity from them. Alternatively, solar power is also an option - we do live in SA after all! Lots of sun = lots of opportunity to utilise this natural resource.	Nikki	employed individual
2022-07-13 20:33:09	Western Cape		Yes I do	Wind	With our climate we are able to harness energy on wind farms as well as use Solar energy for our energy needs. We no longer need to be playing with nuclear or coal which is dangerous and cannot be managed (nuclear) and is not good for our global warming (coal). As a country need to look at better safer ways for energy production and we are able to do so.	Lee	employed individual
2022-07-13 15:42:44	Eastern Cape		Yes I do	Wind		Peter	employed individual
2022-07-13 15:38:34	Western Cape		Yes I do	Wind	It is beyond time to support and encourage Independent Power Producers. This will have many positive effects in the country such as: 1. Reduce our reliance on Eskom and the corruption that goes along with that organisation. 2. Eliminate loadshedding probably in its entirety. 3. Promote a competitive environment to allow for cheap electricity prices which increase with inflation. 4. Reduce our use of fossil fuels and promote a green future. 5. Allow homes to use grid tied systems where we as homeowners can sell electricity back into the grid.	Tony	employed individual
2022-07-13 15:19:46	Western Cape		Yes I do	Wind		Vaniah	employed individual
2022-07-13 14:41:36	Western Cape		Yes I do	Wind		Janice	employed individual
2022-07-13 12:05:09	Western Cape		Yes I do	Wind	Renewable sources of energy should be prioritized since these have the least impact on the environment.	Luke	employed individual
2022-07-13 11:58:23	Western Cape		Yes I do	Wind		Vuyiswa	employed individual
2022-07-13 11:35:00	Western Cape		Yes I do	Wind	Wind power would be the obvious choice . For a long term solution we need 2 more nuclear power plants.	Hermanus	employed individual
2022-07-13 11:30:07	Gauteng		Yes I do	Wind	We can do off shore projects. The wind is very consistent at sea and we have the perfect conditions for wind farming. Even underwater turbines will work perfectly.	Schaun	employed individual
2022-07-13 10:29:41	Eastern Cape		Yes I do	Wind	It depends in which region, I wish I could select multiple answers. But in the Eastern Cape, the wind blows constantly with several BIG wind farms situated around the coast, this province has a great capacity to supply the grid with electricity generated from wind. In the karoo again, solar would be your go to since the sun shines most of the time there at higher temperatures than in the rest of the country. Bottom line, have private companies supply the grid immediately.	Zaan	employed individual
2022-07-13 10:09:31	Western Cape		Yes I do	Wind	A plan must be made. Eskom just get bailed out the whole time and is going to cause this country to further collapse. In South Africa, we have wind, we have sun and we have dams that can be used as a form of electricity. Why not use these while being kind to the planet as well? I decided to fill in the form, but I don't think it will help as the government won't let go of Eskom. They will rather let the country and the people of this country suffer.	Michelle	employed individual
2022-07-13 09:52:24	Gauteng		Yes I do	Wind	Electricity generation with wind has benefited other countries and is a good way of combatting climate change. Though the installation maybe expensive, in the long run it is cost effective and will assist with sustainable development of energy self-sufficiency for South Africa. Wind is always available and cannot be restricted by anyone or anything. The environmental impact is minimal.	Thandeka	employed individual
2022-07-13 09:22:48	Western Cape		Yes I do	Wind		Christine	employed individual

2022-07-13 08:27:21	Gauteng		Yes I do	Wind	Solar and wind energy. We have both the sun and wind so use it.	Beverley	employed individual
2022-07-12 20:34:35	Western Cape		Yes I do	Wind	I am of the opinion to solve our electricity crisis any form of renewable energy would suffice. We are sitting with a crises which needs governments immediate attention. We are paying exorbitant sky high prices for electricity. How long do we have to feed the Eskom high prices for electric. We can't get increase though everything groceries, water, rates, petrol to name a few goes up. Can't our government hear our cries, will they not listen to us who voted them into power, are they now untouchable, making decisions for us, not worrying about the consequences of their decisions. We are moving in the direction of Zimbabwe. Please end our load shedding crisis, it's killing our economy.	Richard	employed individual
2022-07-12 20:12:47	Western Cape		Yes I do	Wind	We have alot of open land available for wind farms or even solar farms. Then we still have our costal area where we could also build solar panels on the water. Between the solar and the wind farms we should be able to generate enough energy for the entire RSA.	Randall	employed individual
2022-07-12 20:08:29	Gauteng		Yes I do	Wind	With rising prices on everything, we should look at solar and wind energy, Government should not be in charge of everything as money is not being used and the systems are not maintained and funds are stolen. We have perfect weather to sustain wind energy. USA is using this why can't we. Load shedding is costing citizens and companies money and this needs to stop	Natalie	employed individual
2022-07-12 19:40:37	Gauteng		Yes I do	Wind	The pandemic & floods in KZN have caused much devastation & loss. Lives have been unnecessarily lost & unemployment figures have skyrocketed to unprecedented levels. I believe ripping through the red tape to allow independent power producers will bring much needed jobs & end out power crisis.	Lynette	employed individual
2022-07-12 19:26:18	Western Cape		Yes I do	Wind	Over the years, I've seen many windfarms going up, and heard of people getting employment in that field. And then everything went quiet. I heard that people stopped erecting windfarms as government regulations were making these alternative energy sources non-viable. To cope with the current loadshedding chaos, barely coming out of 2 and a half years of global Covid-19 pandemonium is proving to be too much for many people, myself included. My mental health, overall feeling of wellbeing, and financial status deteriorated drastically in the recent past. The thought of a total collapse of the electricity grid, is so overwhelming, that, after allowing myself to think about the catastrophic implications for one day, I realized that I might go into full-blown depression. As a single woman, not earning a big salary, but, contributing to the tax pool, and completely self-sufficient, not relying on any government assistance, I claim the right to make my voice heard, and call on the powers that be, to allow alternative energy sources with the greatest of urgency. Stop the madness now!	Elsa	employed individual
2022-07-12 18:21:39	Gauteng		Yes I do	Wind	All renewable energy resources must be allowed on the electricity grid immediately.	Max	employed individual
2022-07-12 17:00:29	Gauteng		Yes I do	Wind	subsidies must be provided for all renewable energy providers	Zainool Aberdeen	employed individual
2022-07-12 16:10:14	KwaZulu-Natal		Yes I do	Wind		DEBRA	employed individual
2022-07-12 15:47:56	Limpopo		Yes I do	Wind		Odette	employed individual
2022-07-12 15:28:39	Gauteng		Yes I do	Wind	There are a number of different methods to help production of Electricity. Most of it can be natural. Solar, wind, hydro and so on. Why are we wasting time when everything is getting so expensive, and what little industry we still have left is facing closures.	Madeleine	employed individual
2022-07-12 15:06:00	Gauteng		Yes I do	Wind	Renewable is the only way to go. Wind or Solar.	Gareth	employed individual
2022-07-12 13:16:41	Eastern Cape		Yes I do	Wind	I believe we need to create policy to open numerous avenues and methods for the realization of independent power sources, no doubt within SABS requirements, but wholly available to independent power producers for relief on the Eskom grid and empowerment of the private sector. Keeping businesses sustainable without fear of load shedding. This way mitigating job security fears, keeping people employed and further enhancing job creation through private sector co-championing this opportunity.	Lee	employed individual
2022-07-12 13:12:38	Western Cape		Yes I do	Wind	Combination of hydro, solar and wind depending on the location.	Dalena	employed individual
2022-07-12 12:50:41	Western Cape		Yes I do	Wind	Wind power is a quick solution and we have alot of wind in Western Cape	Morne	employed individual
2022-07-12 12:24:35	Western Cape		Yes I do	Wind	Eskom needs to be alleviated of its constant strain on its national grid, we have many natural resources in Sunny South Africa at our disposal to utilize as Eskom has let us down the past 14 years. Onwards and upwards to natural sources of Energy also great for the environment	Sergio	employed individual
2022-07-12 12:07:55	Western Cape		Yes I do	Wind		Lyndley	employed individual
2022-07-12 11:56:00	Western Cape		Yes I do	Wind	We need to urgently move away for coal and use the capital to rather subsidize wind and solar farms - allow everybody to generate theri own electricity and enable them to sell it onto the grid. Now is the time to move to renewable energy - train our people to work in this field and move away from coal and pollution.	Monique	employed individual
2022-07-12 11:18:34	Gauteng		Yes I do	Wind		Eric	employed individual

2022-07-12 10:58:27	Western Cape		Yes I do	Wind	For starters, Gwede Mantashe must go. According to a professor of renewables, South Africa was only saved from collapse during the recent strikes as a result of wind power.	Gail	employed individual
2022-07-12 10:24:45	Western Cape		Yes I do	Wind	Wind as we already have so many wind turbines and our wind is sufficient to supply our region. Solar as we have sun 8 months of the year, hydro as we have 70 percent of coast. Why are we still pussyfooting , coal is being supplied to China daily and we have been sold out by our current regime	Gavin	employed individual
2022-07-12 10:02:24	Western Cape		Yes I do	Wind	SOLAR EVERYWHERE IN THE COUNTRY AND WIND IN THE WESTERN CAPE. DO AWAY WITH ESKOM.	WENDY	employed individual
2022-07-12 09:53:02	Gauteng		Yes I do	Wind		Casper	employed individual
2022-07-12 09:46:26	Western Cape		Yes I do	Wind		Karin	employed individual
2022-07-12 09:45:17	Gauteng		Yes I do	Wind	Any and all of the above options would work at the moment, Eskom needs to release the monopoly on power production because they CLEARLY cannot keep up. Allowing IPP's will also allow Eskom the space to fix it's infrastructure, and become a global leader in power production once again.	Brad	employed individual
2022-07-12 09:38:27	Gauteng		Yes I do	Wind	Anything the ANC touches falls, these guys must go and electricity suppliers from all of globe can come in and supply, just like cell phone companies	Olivian	employed individual
2022-07-12 09:37:53	Western Cape		Yes I do	Wind	I believe that IPP's should be allowed to produce as much as they can - ESKOM clearly is falling apart!!! Renewable energy in any form should be encouraged - WIND/SOLAR - the more effective of the two is not dependent on an opinion, but rather a technical study based on initial startup costs and subsequent running costs. I do however believe that both WIND and SOLAR have their rightful place in producing power.	TERRENCE	employed individual
2022-07-12 09:31:27	Gauteng		Yes I do	Wind		Carmen	employed individual
2022-07-12 08:54:20	Western Cape		Yes I do	Wind		Esmerie	employed individual
2022-07-12 08:52:14	Western Cape		Yes I do	Wind		Viv	employed individual
2022-07-12 08:09:06	Western Cape		Yes I do	Wind	I think wind energy is safer and we have the space to accommodate these wind turbines.	Abigail	employed individual
2022-07-12 07:59:14	Mpumal anga		Yes I do	Wind		Christina	employed individual
2022-07-12 07:42:33	Western Cape		Yes I do	Wind	just put things in place and let us have proper electricity whats haaaping now is unaccepted ANC government is killing our people emosionly and spiritually they must service God and his commanments then things will come right pagan worshippers	charles	employed individual
2022-07-12 07:32:57	Gauteng		Yes I do	Wind	Good clean power is what we need	Gordon	employed individual
2022-07-12 07:30:30	Western Cape		Yes I do	Wind		Marianne	employed individual
2022-07-12 05:16:01	Western Cape		Yes I do	Wind		Nicolene	employed individual
2022-07-11 23:08:26	Western Cape		Yes I do	Wind	For the life of me I don't understand why we should tolerate this from Escom. They ruined a once effective world class government entity. Why should we wait on them to make decisions on our behalf. Bunch of thieves looters and greedy workers. To hell with Escom	Stephan	employed individual
2022-07-11 22:40:21	Eastern Cape		Yes I do	Wind	We already have wind farms set up. Continue with our best quality coal and expand the solar option.	Dale	employed individual
2022-07-11 21:37:25	Eastern Cape		Yes I do	Wind		Hendrick	employed individual
2022-07-11 21:29:31	Western Cape		Yes I do	Wind	The people of SA should be allowed to use whatever means they can access without government interference. We should be moving towards renewables for the sake of our children as quickly and cheaply as possible. We are a country of sunshine & wind. THATS WHAT WE WANT TO USE with as little government interference as possible	Denise	employed individual
2022-07-11 20:13:06	Western Cape		Yes I do	Wind	Not wind only, but solar as well. SA do have lots of wind and sun that can produce energy. Other option as well is to privatise Eskom...government to sell it to people that know what they do.	Daniel	employed individual
2022-07-11 19:55:32	Gauteng		Yes I do	Wind	Hydro and wind should be developed and implemented. Cost-effective and sustainable	Karien	employed individual
2022-07-11 19:48:44	Gauteng		Yes I do	Wind			employed individual
2022-07-11 19:41:30	Western Cape		Yes I do	Wind	I think we need to look at different generating options and put them all to use, wind, solar, coal and nuclear and then phase in more renewables as we can afford to replace the old systems . The country and its people can not be held ransom anymore to incompetence and criminal activities from our own government. It is time to take back our power	Katia	employed individual
2022-07-11 19:11:24	North West		Yes I do	Wind		Glen	employed individual
2022-07-11 18:38:58	Eastern Cape		Yes I do	Wind	The area's potential should be used. For example, in the coastal and other areas that have a lot of wind, wind power should supplement the traditional power supply. In areas where there are a lot of sunshine, solar power should supplement the traditional power supply, and so forth.	Elizabeth	employed individual
2022-07-11 18:03:02	North West		Yes I do	Wind		Andre	employed individual

2022-07-11 17:33:13	Western Cape		Yes I do	Wind	Die regering moet individue toelaat om krag te voorsien, maar soos dit is sal hulle weer dit amper onmoontlik maak vir die individu om krag te voorsien. Hulle sien nou weer net geld om te maak en te steel. Moenie die ekstra krag voorsieners dood maak om op die "grid" in te kom nie. Help die probleem oplos en vergeet die geld maak storie. Plaas vir eens die Suid Afrikaanse publiek eerste en nie hulle gatsakke (beursies) nie.	Rudi	employed individual
2022-07-11 17:28:24	Eastern Cape		Yes I do	Wind		Stephen	employed individual
2022-07-11 17:26:15	Western Cape		Yes I do	Wind	Being without electricity for about 9 hours a day is not acceptable. This is due to a lack of management and maintenance. We require urgent attention and assistance.	Wilanie	employed individual
2022-07-11 17:18:59	Eastern Cape		Yes I do	Wind	There is no excuse for any and all red tape not to be lifted for IPPs especially in the midst of this energy crisis. The gravy train of Eskom must come to an end now.	Cassie	employed individual
2022-07-11 17:06:07	Gauteng		Yes I do	Wind	Wind Turbines used to generate electricity by the coast seems to work very effectively and efficiently. Together with solar and hydro methods I don't see how we can have a shortage of electricity and our tariffs could be low as well.	Audrey	employed individual
2022-07-11 16:39:49	Gauteng		Yes I do	Wind		Vanessa	employed individual
2022-07-11 16:21:07	Western Cape		Yes I do	Wind	I believe that both wind and solar power generators should be allowed to transfer electricity into our national grid. As a country we have an abundance of these forms of energy that is renewable. It is sad that legislation is stopping us from solving our energy crisis. We have the means: JUST DO IT!!!	Quinton	employed individual
2022-07-11 15:59:40	Gauteng		Yes I do	Wind	Government should allow the Independent Power Producers to supply the short fall needed to end the problem once for all.	ernest	employed individual
2022-07-11 15:44:54	Eastern Cape		Yes I do	Wind	South Africa has a lot of wind to generate electricity without any pollution.	Theo	employed individual
2022-07-11 15:39:29	Northern Cape		Yes I do	Wind		Johan	employed individual
2022-07-11 15:36:03	Western Cape		Yes I do	Wind	Any kind of renewable energy solution will be best to bring in and allow the companies who have the expertise to come in and do it - in turn it will even bring new investment into this country!	Karen	employed individual
2022-07-11 15:21:03	Western Cape		Yes I do	Wind	The Western Cape has sufficient wind areas and wind farms can be located at sea. In addition, the Western Cape has sufficient sun and solar power in conjunction with wind power should be used.	Sidney	employed individual
2022-07-11 14:53:17	Gauteng		Yes I do	Wind	Person should be allowed to pump their surplus electricity back into the grid.	Nompumelelo	employed individual
2022-07-11 14:42:57	Western Cape		Yes I do	Wind	Coastal region for wind. Solar everywhere. Start with EFFECTIVE solar water heaters for all individual houses. Get private companies to set up solar and wind farms close to the town, especially smaller towns. Take smaller towns off the grid. Imagine the savings on losses in supply, maintenance of many kilometers of infrastructure and giving communities independence from the chaos that is Eskom, corruption, the incapable government and corrupt officials.	Willem	employed individual
2022-07-11 14:09:50	Western Cape		Yes I do	Wind		Bruce	employed individual
2022-07-11 13:54:23	Eastern Cape		Yes I do	Wind	I cautiously support the scrapping of red tape. My concern remains that the end-user / consumer should remain protected from spikes and troughs in pricing like it is done in the USA and the atrocities of ENRON in the early 2000s. I support the immediate utilisation of what is already in place, i.e. all the wind farms standing idle because of red tape. Solar is cheap. I suggest Eskom and government follow another project of getting consumers of the grid with high consuming items such as geyser (with a subsidised solar geyser programme or something similar). Rich and poor can gain by being allowed to invest in greener energy production capabilities, making the consumer also a producer, even if it is only self-supplying. In the end, you want the consumer to step "aside" so business can continue to run, providing employment. For that, the state will have to help consumers invest. Additionally to the above, consumers need help disposing of batteries responsibly. Batteries are expensive and have a limited lifespan, but throwing those out to landfills are known detrimental practices for the environment, but the alternative is simply elusive.	Brody	employed individual
2022-07-11 13:10:13	Western Cape		Yes I do	Wind		Mzolisi	employed individual
2022-07-11 12:54:42	Eastern Cape		Yes I do	Wind	There are fully functional wind farms in the Eastern Cape as well as other parts of the country. And its far less harmful to the environment. WHY ARE THEY NOT BEING USED? Not to mention solar power.	Karen	employed individual
2022-07-11 12:34:10	Western Cape		Yes I do	Wind		Anthony	employed individual
2022-07-11 12:26:53	Western Cape		Yes I do	Wind	The sooner this country moves away from Coal as one of the main electricity components, and uses WATER, WIND AND AIR we will hopefully find solutions to the problems. From reports we have all read, a large number of government and private people have lined their pockets at our expense off the COAL train, so it is time to stop this practise.	SHEREEN	employed individual

2022-07-11 12:19:50	Gauteng		Yes I do	Wind		Patrick	employed individual
2022-07-11 12:12:16	Eastern Cape		Yes I do	Wind	I feel renewable enviro-friendly electricity production must be put to the fore. Electricity supply to other countries must be curbed if power production is inefficient. Management of power production must be held accountable for lack of production and no management should receive annual bonuses if load-shedding continues.	Lee	employed individual
2022-07-11 12:07:20	North West		Yes I do	Wind	DAAR IS ALREEDS N KLOMP WERKENDE WIND PLASE. GEBRUIK HULLE OM ONS TE HELP IN HIERDI KRISIS ASSBLIEF.	HESTER	employed individual
2022-07-11 12:01:17	Western Cape		Yes I do	Wind	I can't suggest what the alternative is but I 100% agree that alternatives need to happen and Eskom needs to stop holding this country to ransom with its incompetence	Candi	employed individual
2022-07-11 12:00:27	Western Cape		Yes I do	Wind	Allow IPPs to produce, sell and distribute energy. People in charge of IPPs won't hollow out their own companies, like what is being done with ESKOM !!! Also, SA had plenty of wind and sun available for cleaner sources of energy.	Jaunine	employed individual
2022-07-11 11:59:57	Western Cape		Yes I do	Wind	I believe that South Africa should leverage its wind farm resources to harvest electricity supply for the national grid from more private suppliers and that we should be relying more on renewable resources for electricity production. I definitely feel that in the current climate, the government would do much better to outsource production of electricity to lighten the load on Eskom, which is clearly unable to support the level of demand on the grid.	Morgana	employed individual
2022-07-11 11:18:47	Western Cape		Yes I do	Wind	To be honest, we need all the resources that we can get now except nuclear. Please do away with the red tape so that those who have been ready and those who are getting ready can add power to the grid. And pay them fairly for it from the start. Let everyone participate, even the smaller business/entrepreneurs.	Salome	employed individual
2022-07-11 11:18:10	Gauteng		Yes I do	Wind		Fred	employed individual
2022-07-11 11:06:25	Gauteng		Yes I do	Wind	With the load shedding getting ridiculous it is time for the Government to allow households to choose. There is NO maintenance done at our current power stations and seems like ESKOM do not want to accept competition. Why not have healthy competition and up your standards? We are legal citizens that pay for our electricity but it seems like the people who have illegal connections have more rights than us who do pay....	Cindy	employed individual
2022-07-11 11:04:34	Western Cape		Yes I do	Wind	Cape Town have constant wind suitable for the generation of electricity. Individuals should be allowed to generate their own electricity without paying penalties. Illegal squatters is to be disconnected from the grid. No payments equal no electricity.	William	employed individual
2022-07-11 10:58:12	Western Cape		Yes I do	Wind		Liz	employed individual
2022-07-11 10:51:28	Western Cape		Yes I do	Wind	We need to add wind and solar power generation to the grid as a matter of urgency. In fact, all IPP's must be allowed to add power tot the grid immediately.	Victor	employed individual
2022-07-11 10:31:16	Gauteng		Yes I do	Wind	Frankly anything BUT NUCLEAR . They have no skilled workers left who know how to handle that. The debacle at Koeberg shows we are in a dangerous state already. Don't make it worse.	Michael	employed individual
2022-07-11 10:30:20	Western Cape		Yes I do	Wind		Avril	employed individual
2022-07-11 10:24:23	Gauteng		Yes I do	Wind	Due to corruption and miss management of funds we are in this situation that affects every South African Citizen. This has to stop. I am not sure what the solution should be because I am not equipped for such a decision but if we can all stand together and change this unacceptable problem.	Sophia	employed individual
2022-07-11 10:21:48	Western Cape		Yes I do	Wind	Solar and wind are free and renewable so lets go.	Dniel	employed individual
2022-07-11 10:21:10	Western Cape		Yes I do	Wind	i dont know what the best electricity production would be but i know i am so done with this constant load shedding, the government should allow private and independent power producers to supply the country immediately and end load shedding for good. why should we all live like this when there is a viable solution at hand!	Kerry	employed individual
2022-07-11 10:18:09	Western Cape		Yes I do	Wind	We need to open this up to independent power producers or we are going to be held ransom by one company for the rest of our lives	Jen	employed individual
2022-07-11 10:14:30	Western Cape		Yes I do	Wind		Schalk	employed individual
2022-07-11 10:06:09	Gauteng		Yes I do	Wind	I believe solar could be okay, but it has an effect on the earth (in the manufacturing of solar panels) , so wind and hydro would be better for the environment. I think power should be produced by anyone who is able to do so, to help this country, otherwise we are facing a worse future than we are already facing in this country. Companies cannot be expected to run manufacturing, mining, etc without the needed power supply by Eskom . Eskom should wake up to the fact they cannot supply, so hand it over to competent people who can supply the country with electricity .	deanne	employed individual
2022-07-11 10:03:16	Western Cape		Yes I do	Wind	We, in South Africa, have a lot of potential for renewable energy. This can be a cheaper and more reliable option for power generation. Create more jobs and a sustainable power solution.	Johannes	employed individual

2022-07-11 10:02:30	Western Cape		Yes I do	Wind	I think use can be made of more than just one type of resource. Wind, solar and hydro between the three we should be able to supply more than sufficient electricity to the whole country. I also don't understand why we are supplying other neighbouring countries with electricity for less than we pay AND we don't have enough for ourselves. Same as the petrol situation and the government doesn't need all the tax they put on the petrol either. Charity begins at home! Look after your own country/people first. Our government have forgotten they are PUBLIC SERVANTS they are supposed to serve OUR best interests not theirs.	Bronwyn	employed individual
2022-07-11 09:57:51	Western Cape		Yes I do	Wind		Kevin	employed individual
2022-07-11 09:57:22	Western Cape		Yes I do	Wind		Dee	employed individual
2022-07-11 09:56:49	Western Cape		Yes I do	Wind		Silu	employed individual
2022-07-11 09:42:56	Western Cape		Yes I do	Wind		Mandy	employed individual
2022-07-11 09:40:29	KwaZulu- Natal		Yes I do	Wind	Whether wind, hydro, or solar, or a combination of all three, we need to urgently change the sources of power in our country to make it sustainable and environmentally protective.	Kathy	employed individual
2022-07-11 09:29:01	Mpumal- anga		Yes I do	Wind		Koos	employed individual
2022-07-11 09:19:49	Western Cape		Yes I do	Wind	We need a quick response, using renewables like wind, solar is much faster than building nuclear or coal etc. Nuclear power stations should already start being built in the meantime.	Stuart	employed individual
2022-07-11 09:16:45	Gauteng		Yes I do	Wind	Wind and Solar can be used as alternatives. How can an entity that fails to produce a service get increases every here, staff get increases? AND THERE is no service (Electricity) What are we paying for? They failed miserably and will and cant recover from where they are at the moment. We need to adjust quickly and do need red tape regarding supplying private electricity? What are they trying to protect, an entity that can not deliver a service? What are we paying them for?	Daniel	employed individual
2022-07-11 09:13:44	Western Cape		Yes I do	Wind	The ANC has messed up a perfectly functional country. And how can Eskom not know where R1.2 billion in parts are, is just sickening	Lee-Roy	employed individual
2022-07-11 09:13:32	Western Cape		Yes I do	Wind	We have a lot of wind in certain areas.	Laura	employed individual
2022-07-11 09:05:44	Eastern Cape		Yes I do	Wind	I do believe that dependent Power Producers should be allowed to operate in the country. I think there shouldn't be a monopoly when it comes to where we get our supply of power from. Because if there is an issue with the only supplier, the whole country is affected.	Melissa	employed individual
2022-07-11 09:05:12	Western Cape		Yes I do	Wind	I support anything other than Eskom so it does not matter to me what the alternative is, just as long as there IS an alternative	Sharon	employed individual
2022-07-11 08:31:37	Gauteng		Yes I do	Wind	We have enough wind on the coast and Germany already wanted to help us. Take the help, our economy and education sector has really suffered enough.	Mariska	employed individual
2022-07-11 08:25:54	Western Cape		Yes I do	Wind	Anything at this stage would work whichever is faster available and more sustainable than the current method of electricity supply.	Anzelle	employed individual
2022-07-11 08:25:31	Gauteng		Yes I do	Wind	Wind turbines use blades to collect the wind's kinetic energy. Wind flows over the blades creating lift which causes the blades to turn. The blades are connected to a drive shaft that turns an electric generator, which produces (generates) electricity. this is better than solar since solar need heats / sun to generate heat	mapule	employed individual
2022-07-11 08:24:06	Western Cape		Yes I do	Wind		Leo	employed individual
2022-07-11 08:23:07	Eastern Cape		Yes I do	Wind	Wind and Solar energy will alleviate our problems.	Andre	employed individual
2022-07-11 08:21:55	Western Cape		Yes I do	Wind	Wind, solar and hydro depending on the area.	Lisa	employed individual
2022-07-11 08:21:25	Western Cape		Yes I do	Wind	It's time for change. Eskom can no longer meet the needs of South Africans and Independent producers should be allowed, without restriction, to take their rightful place in society. Eskom is tipping us all off and we suffer. They increase prices but cannot supply. Enough is enough. We deserve alternatives	Juanay	employed individual
2022-07-11 08:20:38	Western Cape		Yes I do	Wind		SIDNEY	employed individual
2022-07-11 08:19:00	Western Cape		Yes I do	Wind		Patricia	employed individual
2022-07-11 08:14:24	Western Cape		Yes I do	Wind	We can use wind in the Western Cape, we have allot of it	Aubrey	employed individual
2022-07-11 08:11:16	Western Cape		Yes I do	Wind	Wind or solar are easily accessible power sources for us in South Africa	Joseph	employed individual
2022-07-11 08:05:43	Western Cape		Yes I do	Wind	We have the space as well as the wind in Cpt! Put up wind pumps! Those few in the west coast is perfect example.	Yzahn	employed individual
2022-07-11 08:04:32	Free State		Yes I do	Wind	Wind or Solar I think, is more sustainable	Eugene	employed individual

2022-07-11 08:03:44	KwaZulu-Natal		Yes I do	Wind	Both wind and solar are options but wind is available day and night. Excess wind power at peak hours can be stored or used to generate hydrogen and ammonia for fertiliser or to desalinate water in areas suffering from drought. Building new coal power stations is not an option as they take too long and are too vulnerable to corruption. SA can become an energy and hydrogen or ammonia exporter to the region. The power shortage in SA is an artificial problem. There is no technological or financial obstacle to having surplus power. Voters aren't stupid, they know what the real problem is. Energy in SA could be very cheap, with the poor given free electricity, and lower tariffs as incentives for new businesses to employ people. SA could power sub-Saharan Africa. But don't worry, other African countries will be considering this too and could attract the investment meant for us. If we don't do it, one of our neighbours could soon be solving the problem for us, at huge profits to them.	Richard	employed individual
2022-07-11 08:00:33	Gauteng		Yes I do	Wind		Gia	employed individual
2022-07-11 07:52:53	Gauteng		Yes I do	Wind		Albert	employed individual
2022-07-11 07:52:47	Western Cape		Yes I do	Wind	Let's give Eskom to the Chinese once and for all. They will run it sufficient. They will build new power stations. They will do whatever it takes to make Eskom work. There will be no outstanding debt. There will not be any cable theft. They will run Eskom with the correct means and discipline! So simple! But then it won't be done as this will show a finger at the poor way the government is running this country as they have got a huge say in Eskom. They are milking Eskom and if Eskom is given away, where would they be able to steal money? Eskom is huge and at a huge company it is easy to steal money. We're on a path to nowhere. The people don't count!	Johan	employed individual
2022-07-11 07:48:36	KwaZulu-Natal		Yes I do	Wind	SA needs to be progressive and set an example for the rest of the world, showing how we can be industry leaders in moving away from carbon based energy solutions. Government needs to have and allow clean power solutions, which are already been put in place, to contribute directly into the national grid.	Christian	employed individual
2022-07-11 07:43:28	Eastern Cape		Yes I do	Wind	Our country's economy is being destroyed by load shedding, economic growth and jobs is dependent on being able to access affordable, reliable electricity. South Africa has vast pieces of land which can be used to harness wind power and a sunny climate to utilise solar power. Remove all barriers that are crippling our people and plunging us into darkness.	Nikki	employed individual
2022-07-11 07:41:48	Gauteng		Yes I do	Wind	The constant power outages are just too much. Eskom charge a phenomenal rate for a service they simply can't provide. We should be able to get power from the private sector in this situation. Our Very selfish government, expect us to accept this. We are not being compensated for our generators and the fuel that needs to run it. This is impoverishing a large number of our people who can barely put food on the table, now need to make alternative arrangements for generators etc. The time is now for change. The apartheid government managed to keep the lights on. What are we doing differently??	Vivienne	employed individual
2022-07-11 07:36:28	Gauteng		Yes I do	Wind		Angela	employed individual
2022-07-11 07:31:35	Western Cape		Yes I do	Wind	Wind and solar - sustainable, renewable. Cannot rely on poor grade / wet coal feeding the current supply.	Allison	employed individual
2022-07-11 07:25:33	Gauteng		Yes I do	Wind		WILLEM	employed individual
2022-07-11 07:23:46	Western Cape		Yes I do	Wind		Jose'	employed individual
2022-07-11 07:23:22	Eastern Cape		Yes I do	Wind	We have great opportunities to make the most of wind farms	Emile	employed individual
2022-07-11 07:18:55	Western Cape		Yes I do	Wind	Either solar or wind - clean energy is the solution for our country.	Jessica	employed individual
2022-07-11 07:17:22	Western Cape		Yes I do	Wind	Wind and solar is my choice, but could not choose both. We are a large sunny country with many open spaces where solar and wind arrays can be installed. These open areas are away from cities and will boost economy of these open areas such as Karoo, northern Cape, free State, Northwest province, etc. We should invest in electrical storage technology that makes renewable energy not only a long-term solution for our energy crisis, but will see us through a time when coal is becoming less desirable, less economic viable and the quality of mined coal is deteriorating. Best of all it is good for the environment to go renewable. It is good for climate change amelioration to go renewable too.	Lieze	employed individual
2022-07-11 07:12:37	Eastern Cape		Yes I do	Wind	It seems an absolute no-brained that independent power suppliers should be encouraged in this country as they are overseas - Eskom clearly cannot keep up with the demand, and the South African public clearly cannot continue to pay their ever-increasing tariffs. Come on people, why are we suffering like this under the weight of corrupt, selfish and incapable politicians?	Jessica	employed individual
2022-07-11 07:03:31	KwaZulu-Natal		Yes I do	Wind	Power production should be generated by any economical and safe means, allowing a competitive market of producers who can get the job done, without all the corrupt and overpaid employees.		employed individual
2022-07-11 06:55:03	Western Cape		Yes I do	Wind	I feel that Eskom is out of control, already we have such high unemployment in this country and people are going to lose more jobs, high prices to a point of that some people hardly can come through with their salary, I say scrap the red tape and let's get South Africa working again nothing worse than sitting in the dark especially on special occasion, eg: was Eid yesterday but yet lots of Muslim could not cook due to load shedding... it's a shame, sies Eskom	delia	employed individual

2022-07-11 06:53:13	Eastern Cape		Yes I do	Wind		Ronel	employed individual

2022-07-11 06:23:47	Western Cape		Yes I do	Wind	Solar and wind, and reduce and reduce environmental risk limitations.	FANIE	employed individual
2022-07-11 06:23:44	Western Cape		Yes I do	Wind	Wind and Wave action of the ocean should be use as South Africa has a large coast lots of onshore and offshore windy areas	Eustace	employed individual
2022-07-11 06:16:23	Mpumal anga		Yes I do	Wind	SA is not, should not and never will be a communist state.	Kelly	employed individual
2022-07-11 06:13:32	Western Cape		Yes I do	Wind	Both Solar and wind	Maxie	employed individual
2022-07-11 05:50:47	KwaZulu- Natal		Yes I do	Wind	Use a combination of alternative power generators.	Letshego	employed individual
2022-07-11 05:49:41	Gauteng		Yes I do	Wind	I think that we need sustainable forms of energy that also have less of an impact on climate change. The cost to the average consumer is also important and therefore competition is necessary.	Natalie	employed individual
2022-07-11 05:45:42	Gauteng		Yes I do	Wind		Rebecca	employed individual
2022-07-11 05:35:17	Gauteng		Yes I do	Wind	Wind is more sustainable and can continue to generate power even at night since it does not depend on 5 hours of sunlight during the day	Godwin	employed individual
2022-07-11 04:33:57	Western Cape		Yes I do	Wind	We are going to run out of natural resources soon.	Ghassan	employed individual
2022-07-11 04:21:51	Western Cape		Yes I do	Wind	In the Western Cape is a lot of wind why not use it? Privatise it.	Hester	employed individual
2022-07-11 04:13:57	Gauteng		Yes I do	Wind		Cornelis	employed individual
2022-07-11 03:25:13	Western Cape		Yes I do	Wind		Elizabeth	employed individual
2022-07-11 03:24:48	Eastern Cape		Yes I do	Wind		June	employed individual
2022-07-11 02:44:03	Gauteng		Yes I do	Wind	Government should subsidise citizens to install solar systems in their private dwellings. All government buildings be supplied with solar power	Paulina	employed individual
2022-07-11 00:51:07	Eastern Cape		Yes I do	Wind	There are plenty of wind tunnels just been built on the East Coast why is Eskom not using that?	Vivian	employed individual
2022-07-11 00:30:48	Western Cape		Yes I do	Wind	Harness what the cape has an abundance of.	Theresa	employed individual
2022-07-11 00:25:55	Western Cape		Yes I do	Wind	Sustainable energy is definitely the best way to go. It will be ineffectuated by price increases in the same way that fossil fuels are, as their source is not finite or effected by politics. Privatising will create a healthy competitive market, where suppliers will be encouraged to deliver services at competitive prices to win the customer over.	Sarah- leigh	employed individual
2022-07-11 00:19:52	Western Cape		Yes I do	Wind	Anything that's works so we have constant electricity this really is not a joke anymore.	Suzette	employed individual
2022-07-11 00:18:23	Gauteng		Yes I do	Wind	We need an immediate, low environmental impact solution. We cannot have a solution that will have a detrimental impact to our communities and possibly have an even worse impact on people's lives. Whatever solution is readily available and safe must be added to the grid ASAP!	Jerome	employed individual
2022-07-11 00:00:41	Western Cape		Yes I do	Wind	We are supposed to be living in a free market economy so let it be a free market. We need to allow as many players as possible as soon as possible to be able to invest in independent energy production of whatever type possible. Wind, Solar, Nuclear.	Bruce	employed individual
2022-07-10 22:55:41	Western Cape		Yes I do	Wind	Daar is reeds soveel opgesit en reg om gebruik te word.	Stephnie	employed individual
2022-07-10 22:54:40	Western Cape		Yes I do	Wind	In the Western Cape we have an almost constant supply of wind and we should and MUST harness this energy!	Lee	employed individual
2022-07-10 22:54:39	Western Cape		Yes I do	Wind	In the Western Cape we have an almost constant supply of wind and we should and MUST harness this energy!	Lee	employed individual
2022-07-10 22:17:13	Gauteng		Yes I do	Wind	With the failure of many of our SOEs in the country, including Eskom, there is a HUGE need for a reliable source of electricity and power supply as this will be the only way the country will be able to increase production capacity in various industries. Privately owned companies should be allowed to independently produce power and sell it as a commodity and product like anything sold in the country on the free market without any limitations or red tape restrictions.	Benjamin	employed individual
2022-07-10 22:10:18	Western Cape		Yes I do	Wind		Rosie	employed individual
2022-07-10 22:04:59	Free State		Yes I do	Wind		Meyer	employed individual
2022-07-10 22:04:13	Western Cape		Yes I do	Wind	Wind all year round	Paul	employed individual

2022-07-10 21:33:11	Eastern Cape		Yes I do	Wind	All red tape that has to do with electricity generation and the sale of electricity should be done away with	Timothy	employed individual
2022-07-10 21:12:46	Gauteng		Yes I do	Wind		Lizmari	employed individual
2022-07-10 21:07:24	Western Cape		Yes I do	Wind	We need to move away from fossil fuels asap and invest in solar and wind energy.	Sandy	employed individual
2022-07-10 20:55:53	Western Cape		Yes I do	Wind	Anything is better than the current situation.	Yolanda	employed individual
2022-07-10 20:50:11	KwaZulu- Natal		Yes I do	Wind	I would support any alternative power supply except nuclear	Kandy	employed individual
2022-07-10 20:50:03	Western Cape		Yes I do	Wind	Anything else would be better than what the government is doing, because their choices are bad and definitely not working for almost 30 years now...	Melanie	employed individual

2022-07-10 20:11:09	Western Cape		Yes I do	Wind	Renewables definately	Mark	employed individual
2022-07-10 20:08:43	Western Cape		Yes I do	Wind	Wind and solar is abundant in WC, EC and northern cape. The bottle neck is the distribution infrastructure. Many munis and producers would contribute to infrastructure development in this regard, or ask the IDC. It should reach the economies of scale to make it feasible. They can sell it back to "eskom transmission" after it unbundles or keep operating and repaying the finance wherever it comes from	Gary	employed individual
2022-07-10 20:05:07	Gauteng		Yes I do	Wind	Please allow independant power providers to supply power to the national grid. These power cuts are costing us more than we have.	Elizabeth	employed individual
2022-07-10 19:56:31	Western Cape		Yes I do	Wind		Bryan	employed individual
2022-07-10 19:40:32	Northern Cape		Yes I do	Wind	ESCOM is useless.	Stuart	employed individual
2022-07-10 18:37:19	Western Cape		Yes I do	Wind	Why do we have to supply other countries with electricity when you can't even supply the country with sufficient electricity	Abigail	employed individual
2022-07-10 18:29:44	Western Cape		Yes I do	Wind		Deidre	employed individual
2022-07-10 18:21:51	Western Cape		Yes I do	Wind	Eskom and the Government has tried for years to resolve our power issues. Its time to let other private companies helps, wind, solar and hydro are all proper ways to assist in this regard	Thys	employed individual
2022-07-10 18:20:32	Gauteng		Yes I do	Wind			employed individual
2022-07-10 18:20:31	Gauteng		Yes I do	Wind			employed individual
2022-07-10 18:20:27	Gauteng		Yes I do	Wind			employed individual
2022-07-10 18:12:34	KwaZulu- Natal		Yes I do	Wind		nojoko	employed individual
2022-07-10 18:08:13	Eastern Cape		Yes I do	Wind	Many Wind turbines around is waiting for authorization to use	Minnie	employed individual
2022-07-10 17:42:58	Gauteng		Yes I do	Wind	Quite simply Eskom cannot meet the demand. It's time they to face up to their inability to run a profitable and effective entity and allow private sector to supply power to meet the demands. Eskom board, executives, members, employees etc - you have ruined an economically viable parastatal , stop making the citizens of the country pay for your incompetence with more that financial hardships - loadshedding is a disgrace which can be avoided by allowing private sector to intervene.	Kari	employed individual
2022-07-10 17:29:33	Gauteng		Yes I do	Wind	We need to look to other more sustainable alternatives to power produ ruin in SA. It's clear that the government a not be the sole provider of power in this country. Give private energy production the power. Please let us recover as a nation. Please.	Jade	employed individual
2022-07-10 17:08:54	Mpumal anga		Yes I do	Wind	From 1994 the new government was warned by Eskom that we needed to build new power stations but they chose to ignore this to date and blatantly refuse to take responsibility. A power station or hydro scheme take long to build. Nuclear is out of the question because look at were we stand with Koeberg! Solar relies on sun so is not a hundred percent solution, as for diesel it is way to expensive and not suitable enviromently as is coal. The fastest and most economically viable would be wind generation. ANC please do the right thing as you should have done twenty-eight years ago.	Graham	employed individual
2022-07-10 16:39:35	Gauteng		Yes I do	Wind		Tessa	employed individual
2022-07-10 16:29:05	Free State		Yes I do	Wind	In terms of generating electricity, South Africa can look to countries such as Norway, who uses garbage to generate electricity, as well as other renewable sources such as hydro, solar and wind, that is also good for our environment!	Jaun- Marie	employed individual

2022-07-10 16:20:07	Western Cape		Yes I do	Wind	<p>South Africa is ideal for Wind, Solar and Hydro electricity production. Cape Town itself is known for being extremely windy. South Africa is famous for its sunshine – an average of 2,500 hours of sun every year. Not to mention the ability to produce electricity using Hydro methods.</p> <p>There are plentiful of ways for us to produce electricity in a more environmentally friendly way, without needing to solely rely off Eskom.</p> <p>Eskom and the Government is causing our country to not progress.</p> <p>Allow the people to help during the loadshedding crisis! Allow Independent Power Producers to assist!</p>	Nicola	employed individual
2022-07-10 16:08:47	Gauteng		Yes I do	Wind	<p>A company called Venture manufactured wind turbines in South Africa, but our short sighted and uneducatable people in government did not want to apply wind turbines propably because the CEO refused to pay bribes. He sold the company devision to Holland. Only stopping corruption can this be turned around</p>	Karl	employed individual
2022-07-10 16:03:37	Eastern Cape		Yes I do	Wind	<p>Look at the USA. Wind farms are plenty. We put up 30 wind turbine at random places. Wasting space. USA has like 100 in one square block.</p> <p>The government must stoo sucki g the electricity payers dry.</p> <p>Go to the townships. How many illegal connections are there thet they are not managing?</p> <p>So solve that problem first.</p> <p>Switch the whole townahip off.</p> <p>If everybody in the township just pays 50 rands a month, wont that help?</p> <p>But no...</p> <p>A lot of people are always intitled to free flippen everything.</p>	Tinus	employed individual
2022-07-10 14:38:34	Gauteng		Yes I do	Wind	<p>After 27 years of non maintenance and the ignorance of Eskom's proposition in 1996, this government and Eskom have failed the population. This has resulted in some 15 years of loadshedding with no solution being made. The stranglehold on Eskom is due to the grave train that it is. This is the reason that the regulations are not being relaxed as they know the gravy train will probably stop running if that happens. Therefore I believe that the only solution to the current energy crisis is to relax the red tape, in fact srाप it, and allow other producers to come and supply the grid. In this way I believe that the procurement of wind turbines will be quicker that solar but solar is also a better solution that coal and will also be a quicker solution. I have a brother-in-law in Denmark where they manufacture wind turbines and export them to the world. Many farmers in Denmark have wind turbines on their property for their own needs, however, any excess is fed back into the grid and they get paid for that. This is a system that could easilly be implemented here in South Africa. We could even start manufacturing our own wind turbines. The same applies to solar for us. Another thing in Denmark is that there is not only 1 main provider of electricity to the grid. I understand there are 2 and you can choose who you want to deal with. Additionally you can change your provider if you are not happy with the service they are giving you. That is democracy.</p>	Mark	employed individual

2022-07-10 10:12:28	Western Cape		Yes I do	Wind		Dirk	employed individual
2022-07-10 09:59:12	Eastern Cape		Yes I do	Wind		Arno	employed individual
2022-07-10 09:55:07	Gauteng		Yes I do	Wind	<p>We need cheaper better alternatives seriously</p>	Chantel	employed individual
2022-07-10 09:52:11	Western Cape		Yes I do	Wind	<p>We have solar and wind energy producers already established in parts of the country, time to make use of them now!</p>	Bianca	employed individual

2022-07-10 09:46:42	Gauteng	Yes I do	Wind	My suggestion is that there should be a focus on renewable energy, such as wind and solar. South Africa has lots of space in the Karoo and Kalahari that is eminently suited for this kind energy generation. And because there is no transportation necessary for fuels to be delivered and stockpiled, it should in the end prove cheaper than a reliance on fossil and nuclear-fueled solutions.	JFW	employed individual
2022-07-10 09:42:39	Western Cape	Yes I do	Wind	Eskom and the ANC is crippling our country beyond repair! Immediate action is needed to allow independant organisations to supply power into the grid!	Nicky	employed individual
2022-07-10 09:16:55	Western Cape	Yes I do	Wind		Zelda	employed individual
2022-07-10 09:01:31	Western Cape	Yes I do	Wind	Wind or hydro - yes	Michelle	employed individual
2022-07-10 08:48:15	Eastern Cape	Yes I do	Wind	I am fully in favour of independent producers supplying electricity using renewable sources such as solar and wind.	Tarryn	employed individual
2022-07-10 08:40:47	KwaZulu-Natal	Yes I do	Wind	Wind turbines should be attached to every cellphone tower as a start	paul	employed individual
2022-07-10 08:27:55	Western Cape	Yes I do	Wind	The Western Cape province is blessed with wind and sun for most of the year. There are already Independent Power Producers that generate extra electricity. Under current legislation, that excess cannot be utilised and we need to change that as soon as possible.	Hendrik	employed individual
2022-07-10 08:24:23	Western Cape	Yes I do	Wind	South Africa has some of the best climate for the generation of both Solar and Wind energy! It is free resources with very very low impacts to eco systems, nature & global warming! Allowing Independent Power Production can also mean that electricity can be put back into the grid which can mean that Eskom can provide more electricity to the neighbouring countries as well.	Melissa	employed individual
2022-07-10 08:11:24	North West	Yes I do	Wind		Anita	employed individual
2022-07-10 08:06:24	Western Cape	Yes I do	Wind	Wind AND solar energy is renewable and will add benefits such as: - Uninterrupted power supply. - Reduce impact on environment. - Job creation. - If privatised, minimise corruption. - Make SA more attractive to foreign investors	Ani	employed individual
2022-07-10 08:01:35	Western Cape	Yes I do	Wind	Independent suppliers can better manage their own product at the moment. Eskom should move into a managing and distribution role, being the Trustworthy link being suppliers and the general public to make sure that everyone has access to electricity. Private individuals supplying solar should also be allowed to feed electricity back into the grid at a rate that would motivate them to want to do so, without so much red tape, and in a manner that enables them to be paid effortlessly.	Derek	employed individual
2022-07-10 08:00:31	Western Cape	Yes I do	Wind	The producing of power shots be completely private as it is more cost effective. The distribution of power can remain with government.	Cliff	employed individual
2022-07-10 07:57:12	Gauteng	Yes I do	Wind		Richard	employed individual
2022-07-10 07:54:07	Gauteng	Yes I do	Wind		David	employed individual
2022-07-10 07:42:08	Western Cape	Yes I do	Wind	Electricity is a basic need that the ANC has nor provided in a long time. We need Electricity NOW. Cut the red tape and serve the people. We have wind and we have sun. Use it and provide Electricity.	Dalene	employed individual
2022-07-10 07:41:33	Western Cape	Yes I do	Wind	Wind will work the best. It is everywhere	Lizel	employed individual
2022-07-10 07:40:30	Eastern Cape	Yes I do	Wind	We have a lot of wind so this method would be liable to us	Michelle	employed individual
2022-07-10 07:39:29	Western Cape	Yes I do	Wind	We need to be working towards Carbon Neutral 2050 goals in order to keep foreign investment interest. At the same time we need more power being fed into to grid immediately. We have a lot of work wind farms ready to do this. It's a win win. The government needs to stop trying to hold onto to all the money for their own greedy sake.	Ross	employed individual
2022-07-10 07:27:43	KwaZulu-Natal	Yes I do	Wind	Remove Red Tape and urgently use private entrprise to provide power to a crippled and dying Eskom. Leave coal and nuclear power alone.	Richard	employed individual
2022-07-10 07:23:21	Gauteng	Yes I do	Wind	i would go with coal as thats the way SA is set-up most efficiently at this stage and same with nuclear bit it seems power that be is unable to manage that, so wind turbines could be the way to go...	Janine	employed individual
2022-07-10 07:20:17	Western Cape	Yes I do	Wind	We need to have incentives for all to use solar power devices in homes and in businesses but wind farms will also be ideal in the Cape in particular. Coal should be a last resort and only used as back up .	Colleen	employed individual
2022-07-10 07:11:01	Western Cape	Yes I do	Wind	Wind and solar power is the only immediate short term power supplies that will provide an immediate proven solution to load shedding. No other existing power production capability is available to solve the generation problem Eskom has. These solutions will require localised implementation based on load requirements. We also need to asses exactly how much power we are importing and exporting to neighbouring countries to manage South Africa's internal and external commitments. I support the immediate changes to the short term processes hampering implementation of wind and solar power generation by third parties.	Martin	employed individual
2022-07-10 07:09:29	Western Cape	Yes I do	Wind	Energy production from Wind is a proven, efficient source of energy specific in the Northern, Western and Eastern Cape.	Nick	employed individual
2022-07-10 07:06:27	Gauteng	Yes I do	Wind		Natasha	employed individual

2022-07-10 06:24:25	KwaZulu- Natal		Yes I do	Wind		Patrick	employed individual
2022-07-10 05:59:35	Gauteng		Yes I do	Wind		Melanie	employed individual
2022-07-10 05:58:17	Western Cape		Yes I do	Wind		Sally	employed individual
2022-07-10 05:10:02	Western Cape		Yes I do	Wind	Independent producers will create more jobs and that is what we need. This will also help alleviate the burden on Eskom. Let's use any viable source available to create electricity.	Amanda Jane	employed individual
2022-07-10 04:56:32	Gauteng		Yes I do	Wind	And solar, the least impact on environment, parallel run nuclear as it can replace coal. How ever possible get the skelm useless fossils out of energy generation an leave it to competent people who's objectives is not for their own pockets	Caesar	employed individual
2022-07-09 23:52:26	Western Cape		Yes I do	Wind		Anja	employed individual
2022-07-09 23:08:03	Gauteng		Yes I do	Wind		Marius	employed individual
2022-07-09 22:40:02	Gauteng		Yes I do	Wind	The use of wind farms in the coastal areas would add immense value to help alleviate the electricity shortage in our country.	Craig John	employed individual
2022-07-09 22:36:36	Western Cape		Yes I do	Wind	The government fail us as public all the corruption from government the strike of escom workers and we as taxpayers had to pay for all the corruption pathetic government privitize ESCOM let Andre de Ruyter work with independent bodies to get escom back as before the ANC government with their corruption and cadet appointments took over GO corruption free Taxpayers	Roelf	employed individual
2022-07-09 22:14:22	Western Cape		Yes I do	Wind		Jen	employed individual
2022-07-09 21:14:19	North West		Yes I do	Wind	Not only wind but water and solar as well. Eskom is not capable to produce to our needs and has become very expensive, time for more options without penalties or fines, payments must also be made straight to eskom not through municipalities if you dont pay you get no power especially thinking of places like Soweto and then example Parys where some pay but have to sit without power due to their municipality	Retha	employed individual
2022-07-09 20:29:08	Eastern Cape		Yes I do	Wind	We have high wind potential and it can be put in place rapidly	Willem	employed individual
2022-07-09 20:21:42	KwaZulu- Natal		Yes I do	Wind	This needs to be assessed by experts, so my guess would be dollar or wind... But seriously anything that is sustainable and keeps our lights on!	Megan	employed individual
2022-07-09 20:09:15	Eastern Cape		Yes I do	Wind		Joan	employed individual
2022-07-09 20:06:01	Gauteng		Yes I do	Wind	We are already suffering the outages because of governments interference as using eskom for political gain.. We need to change this and take our electricity supply back into private independent suppliers	Michelle	employed individual
2022-07-09 19:17:55	Mpumal anga		Yes I do	Wind	Dear Sir or Madam. It is quite evident that the serious shortage of electricity is killing the South African economy and the competitiveness of South Africa on the world stage. The ever increasing unemployment rate has and is causing a serious sosio-economic catastrophe in the country. This may lead to serious public unrest. I chose wind power but actually it should be a combination of various sources in order to spread the risk of sustainability.	Michael	employed individual
2022-07-09 18:14:03	Eastern Cape		Yes I do	Wind	Considering the number of wind farms already established in the Eastern Cape, already producing electricity, much of which just goes to waste due to present government red tape, I feel that the red tape must be removed with immediate effect as this can reduce much of the load shedding by using power already available. It is a shame on the present powers that be that electricity is going to waste, disgusting.	Leigh- Anne	employed individual
2022-07-09 17:50:28	Gauteng		Yes I do	Wind		Richard	employed individual
2022-07-09 17:04:18	Western Cape		Yes I do	Wind		Matt	employed individual
2022-07-09 16:37:43	Western Cape		Yes I do	Wind		Lisl	employed individual
2022-07-09 16:09:40	Western Cape		Yes I do	Wind	Anything would be better than what we have now. We need to do anything.	Angelique	employed individual
2022-07-09 15:49:26	Gauteng		Yes I do	Wind	We have thousands of kilometres of coast line that always had wind blowing. We should have a coastline covered in wind farms producing clean electricity. We can no longer rely on the government or Eskom to keep the lights burning	Dudley	employed individual
2022-07-09 15:03:38	Gauteng		Yes I do	Wind	This issue has been going on for years and just like everything else our government is involved in they drag their feet and only act once it's too late... because they don't personally feel the effects. I would support most other means of power generation - wind, hydro, solar - we have all the resources.	Jos	employed individual
2022-07-09 14:30:55	Western Cape		Yes I do	Wind		Louise	employed individual
2022-07-09 14:26:57	Western Cape		Yes I do	Wind			employed individual
2022-07-09 14:16:42	Western Cape		Yes I do	Wind		Adriaan	employed individual
2022-07-09 14:08:07	Western Cape		Yes I do	Wind	A monopoly like Eskom is sabotaging the future of South Africa with the lack of electricity production at the required continuous level. What is needed, is competition which can be achieved with alternative sources of power generation among a number of independent power producers.	Leon	employed individual
2022-07-09 13:27:26	Western Cape		Yes I do	Wind	I don't care what type of production they have to use to produce electricity.....I would just like to be able to 'HAVE' electricity!!	JACQUI	employed individual

2022-07-09 11:28:26	KwaZulu-Natal		Yes I do	Wind	We have lots of area for the installation of wind turbines	Gavin	employed individual
2022-07-09 11:00:55	Western Cape		Yes I do	Wind	Ek dink as daar nie vinnig n verandering binne die volgende maand of 2 kom nie moet dit ernstig oorweeg word om krag uit te gee na onafhanklike maatskappy, n mens kan nie so werk en leef nie en nie almal het geld vir alternatiewe vorms van elektrisiteit nie. Ek weet nie regtig watter vorm van energiere nie want ekt nie kennis van dit nie.	Annalene	employed individual
2022-07-09 10:36:35	Western Cape		Yes I do	Wind		Annemie	employed individual
2022-07-09 10:10:55	Western Cape		Yes I do	Wind	Invest in renewable energy- wind, solar, hydro, wave - all of it No dirty fossil fuels, no nuclear Renewables all the way for long term success	Ruth	employed individual
2022-07-09 09:56:57	KwaZulu-Natal		Yes I do	Wind	Policy and red tape have been holding up construction of large wind farms on the northern parts of the west coast. This is one of the most consistently windy areas in our country and this development WILL produce! However, due to red tape it's been on hold for many years. Cut the red tape and get environmentally friendly, sustainable power production going again.	Phillip	employed individual
2022-07-09 08:52:03	Outside SA	United Kingdom	Yes I do	Wind	Wind is sustainable energy and something SA has in abundance, on and off shore. Other forms of energy are detrimental to the environment and SA needs to commit to being greener while ensuring a constant supply to ensure economic growth. SA needs to review and apply policies and methods from countries who are successfully, such as the UK. Move away from 1 fat cat supplier. Nothing is free in life, stop the stealing of energy and the corruption. Its not an immediate solution but a sustainable one. Look at countries who DONT have energy supply issues and do the same. The current situation is crippling the country	Sandra	employed individual
2022-07-09 08:35:37	Western Cape		Yes I do	Wind	We live in a country of extreme wind (some provinces) and glorious sun for the most part of the year. We have all the natural resources abundantly available to us to sustain a green, healthy and functioning system to supply the country adequately. I am in favor of privatization, in this manner will we not only return to a functioning country but it will eradicate one arm of corruption from our despicable politicians. I vote yes !!!	Paula	employed individual
2022-07-09 08:20:02	Western Cape		Yes I do	Wind	We already have some existing wind farms in western cape and have have constant wind	Christian	employed individual
2022-07-09 08:13:22	Western Cape		Yes I do	Wind	Power is holding South Africa back. Besides all the business lost due to power cuts, there are all the businesses that have been lost forever and that would never be because we don't have the power capacity to supply them. Having multiple companies generating power will be good to lower costs as long as they are allowed to compete for customers. We should tap all energy options but wind, tidal and solar should be added asap as we have all 3 in abundance.	Meyrick	employed individual
2022-07-09 08:05:23	Gauteng		Yes I do	Wind	Using natural things is key to avoid pollution while generating electricity.	Phumzile	employed individual
2022-07-09 07:48:04	Gauteng		Yes I do	Wind	Spur Africa can immediately implement wind generation facilities in both land and ocean. Its faster and more cost effective to implement, with great energy output. Less damage to environment. Local materials and skills are already available to implement and maintain.	Elzane	employed individual
2022-07-09 07:02:20	Western Cape		Yes I do	Wind		Daniel	employed individual
2022-07-09 06:50:25	Limpopo		Yes I do	Wind	we need to use lots of methods like sun and wind every town or city that have more then 10k risedents living there need its own wind & sun electricity production to supply 30% to 50% of electricity for there town or city and the rest from Eskom. and it cariards also job's for them	Andrew	employed individual
2022-07-09 06:34:07	Western Cape		Yes I do	Wind	The crisis to keep the SA economy afloat necessitates the laying down of any and all agendas with acknowledgment that government has failed and is not able to accomplish what is required. Humbly accept the expertise that is available and save our land.	Marita	employed individual
2022-07-09 06:32:20	Western Cape		Yes I do	Wind	We are in a crisis! The power outages are killing the economy and disrupting our lives and this can no longer be tolerated.	Gail	employed individual
2022-07-09 06:01:58	Gauteng		Yes I do	Wind		Bev	employed individual
2022-07-09 05:58:58	Western Cape		Yes I do	Wind	how about making available small scale wind turbines in the form of a wall/ screen to generate power for the household/business	Li	employed individual
2022-07-09 00:25:03	Western Cape		Yes I do	Wind		Clinton	employed individual
2022-07-08 22:48:45	Western Cape		Yes I do	Wind		Brent	employed individual
2022-07-08 22:45:17	Gauteng		Yes I do	Wind	All renewables would suit. Fossil fuel burning must end asap. Immediate would be other. Independents should be connected and add to the current insufficient supply.	Sandy	employed individual
2022-07-08 22:32:32	Western Cape		Yes I do	Wind	Renewables are the most sustainable and can be infinitely used. Many areas in South Africa would be the ideal place to have wind farms/ turbines.	Alethea	employed individual
2022-07-08 22:14:26	Western Cape		Yes I do	Wind	Wind and solar power is plentiful all year round in South Africa. New establishments should all have solar panels. We have to change to renewable energy, there is no future in extracting fossil fuels.	Jacqui	employed individual
2022-07-08 22:04:53	Mpumalanga		Yes I do	Wind	Wind, solar and hydro are clean energy sources and can be made available by private providers.	Pat	employed individual
2022-07-08 21:49:35	Mpumalanga		Yes I do	Wind		Antony	employed individual

2022-07-08 21:45:18	Gauteng		Yes I do	Wind		Tommie	employed individual
2022-07-08 21:25:56	Western Cape		Yes I do	Wind	Take the monopoly away from our corrupt government. A combination of all renewable resources is what is needed.	Karen	employed individual
2022-07-08 21:12:10	Western Cape		Yes I do	Wind		Mark	employed individual
2022-07-08 20:57:38	Gauteng		Yes I do	Wind	Sadly this seems to have been the plan of certain government officials for a while hence why they were sabotaging Eskom. Unfortunately we are at a point where we need independent power producers to save our economy, again sadly even though it will only enrich certain government officials more it will however assist our economy	Brendon	employed individual
2022-07-08 20:51:09	Gauteng		Yes I do	Wind	Solar and wind energy. We have both the sun and wind sobuse it.	Beverley	employed individual
2022-07-08 19:42:23	Western Cape		Yes I do	Wind	Wind, water, solar nearly ANYTHING except coal, nuclear and diesel	Samantha	employed individual
2022-07-08 19:41:12	Mpumalanga		Yes I do	Wind	Hydro and wind will the most environmentally friendly way and definitely do able.	Rizwana	employed individual
2022-07-08 19:39:15	Western Cape		Yes I do	Wind	The red tape in south Africa is beyond insane. And the tariffs we pay, low and middle class can not keep up with the increases Definitely wind give the cape pretty much has wind the year round.	Mary-Anne	employed individual
2022-07-08 19:34:14	Western Cape		Yes I do	Wind	Definitely Wind (green) and Private sector to give competitive tariffs. Government is working very hard to charge us as much as possible while money are being lost every second. Wake up South Africa, Eskom can never succeed as Government's ANC governed Municipalities have been stealing moneys that were paid by us, the working class, from Eskom and still they are sitting governing our municipalities without any punishment what so ever.	Soretha	employed individual
2022-07-08 19:12:36	Western Cape		Yes I do	Wind		Karen	employed individual
2022-07-08 18:46:43	Western Cape		Yes I do	Wind	Wind mills like Germany created and is now being used in UK	Mogamad	employed individual
2022-07-08 18:31:24	Western Cape		Yes I do	Wind	We have plenty of wind in the Western Cape, I believe it is safe and hence this choice	Cyril	employed individual
2022-07-08 18:29:01	Western Cape		Yes I do	Wind	Cutting the red tape will stop the continuous fraudulent tenders and the ongoing sabotage to Eskom plants and crippling our beautiful country.	Monja	employed individual
2022-07-08 18:16:50	KwaZulu-Natal		Yes I do	Wind		Sue	employed individual
2022-07-08 18:02:50	Western Cape		Yes I do	Wind	Our infrastructure across the board on every level in our Country is collapsing! To then restrict private production of energy is a hard slap in the face ! we all live with the aftermath of corruption that's destroying and damaging our Country beyond repair!. Let the people decide not the Politicians what's best for the people!	Leandra	employed individual
2022-07-08 17:54:51	Western Cape		Yes I do	Wind	I would've suggest wind and solar. Especially in the Western Cape we 've got a lot of wind in the Helderberg area . We also do 've enough sunshine for solar power	Jacques	employed individual
2022-07-08 17:40:59	KwaZulu-Natal		Yes I do	Wind		Sarah	employed individual
2022-07-08 17:28:47	Western Cape		Yes I do	Wind	Use all and any cheap green energy . Try's yes yes	Craig	employed individual
2022-07-08 17:11:18	Gauteng		Yes I do	Wind	You had 27 years to ensure sustainable electricity production and distribution, ,you failed /refused /neglected to secure our future as a country, an economy, by allowing criminals (Guptas, Xuma) to steal our money, capture our economy and take away a necessity (electrical power), playing the blame game at every corner. Man up and get us out of this mess ASAP, it's your responsibility, otherwise we are ALL doomed!	Lillian	employed individual
2022-07-08 16:55:50	Western Cape		Yes I do	Wind	Anything other than Eskom! Thank you	Marcelle	employed individual
2022-07-08 16:54:18	Gauteng		Yes I do	Wind		Helen	employed individual
2022-07-08 16:46:58	Eastern Cape		Yes I do	Wind	Coal is environmental unfriendly and expensive but wind is readily available and cheap.	NB	employed individual
2022-07-08 16:29:34	Gauteng		Yes I do	Wind	Scrap the red tape and allow more wind power!	Albertus	employed individual
2022-07-08 16:15:08	Western Cape		Yes I do	Wind	Competition brings out the best out of people.	Theodore	employed individual
2022-07-08 16:15:06	Western Cape		Yes I do	Wind	Competition brings out the best out of people.	Theodore	employed individual
2022-07-08 16:13:02	Eastern Cape		Yes I do	Wind	We have tons of wind turbines in south Africa already. Where is that power going. Solar is also a big deal.....	Ronetta	employed individual
2022-07-08 15:52:22	Gauteng		Yes I do	Wind		Louis	employed individual
2022-07-08 15:50:48	Western Cape		Yes I do	Wind	I am no energy expert but it seems to me that we need to use the natural resources we have ie sun and wind to try solve the problem that our coal plants can't due to being poorly maintained. If there are wind or solar producers out there they should immediately be able to provide on to the grid.	Sarah	employed individual
2022-07-08 15:46:20	Western Cape		Yes I do	Wind	Red tape should have been ousted long ago along with the ANC. They have monopolised everything and destroyed it.	clint	employed individual
2022-07-08 15:29:37	Western Cape		Yes I do	Wind		Jules	employed individual
2022-07-08 15:21:05	Gauteng		Yes I do	Wind		Estee	employed individual

2022-07-08 15:18:51	Gauteng		Yes I do	Wind		Bernie	employed individual
2022-07-08 15:18:10	Gauteng		Yes I do	Wind		Gerald	employed individual
2022-07-08 14:54:48	Western Cape		Yes I do	Wind	Moving towards a carbon free future for electricity is necessary. a combination of wind and solar energy on a large scale, supplied by independent producers can contribute significantly to the country's power crisis.	melissa	employed individual
2022-07-08 14:42:19	Eastern Cape		Yes I do	Wind	WHERE DO U THINK MUST PEOPLE JUST FORK OUT MONEY TO PAY FOR INCREASES EACH TIME?	HERMAN	employed individual
2022-07-08 14:37:28	Western Cape		Yes I do	Wind		John	employed individual
2022-07-08 14:17:56	Western Cape		Yes I do	Wind	This country has suffered with over 14 years of loadshedding under Eskom's monopoly, which has only dug us into a deeper and deeper pit. It's time to relinquish that monopoly which clearly is not working. Between wind and solar power, we have both the technologies and huge supply of these resources to generate our power supply on short notice. Hydro and nuclear would take longer to implement, but would also be good options - provided the companies responsible can be trusted to keep up with the necessary maintenance.	Daniel	employed individual
2022-07-08 14:16:59	Gauteng		Yes I do	Wind	I all over Europe wind turbines. Also solar is great, only had one option to select.	Dana	employed individual
2022-07-08 14:12:13	Gauteng		Yes I do	Wind	Good day, all comments already mentioned have iterated good reasons at the end of the day we can no longer rely on ESKOM and need other options where we can choose, after all, we are the people paying for the supply and after 15 years the Government has not proven that they are capable of being In-charge of being relied upon for this daily necessary commodity. We need IPP's urgently.	Nicky	employed individual
2022-07-08 14:07:30	Gauteng		Yes I do	Wind		Sandy	employed individual
2022-07-08 14:07:21	Limpopo		Yes I do	Wind	Lets explore better, cleaner forms of electricity. Wind, solar and Hydro is a great place to start.	Ernst	employed individual
2022-07-08 14:03:04	Mpumalanga		Yes I do	Wind		Andries	employed individual
2022-07-08 13:56:35	Eastern Cape		Yes I do	Wind		Rodney	employed individual
2022-07-08 13:55:49	Western Cape		Yes I do	Wind	Being bound by Eskom is crippling the community and the economy. The government says its trying to solve the unemployment crisis, but new energy resource companies cannot be established because of red tape, which means thousand of potential jobs are lost, along with current jobs being crippled as eskom raises prices and cuts off our power simultaneously.	Lucielle	employed individual
2022-07-08 13:30:59	Western Cape		Yes I do	Wind	The economy cannot operate with continual load shedding with no end in sight . We have an abundance of wind and sun - lets use it...	Angela	employed individual
2022-07-08 13:29:21	North West		Yes I do	Wind	Wind or solar or hydro power will all work in south Africa. But not the incompetence of eskom/peskom	Charles	employed individual
2022-07-08 13:27:16	Western Cape		Yes I do	Wind	Sal eintlik die deskundige vra om besluit wat ons die beste pas maar Weskus het taamlik wind.	Andries Stephanus	employed individual
2022-07-08 13:15:39	KwaZulu-Natal		Yes I do	Wind	I would like wind turbines and solar resources to be implemented to supply power.	Michele	employed individual
2022-07-08 13:06:37	Mpumalanga		Yes I do	Wind	We need more green electricity. Use what we get for free to generate electricity. The sun, water and wind.	André	employed individual
2022-07-08 13:03:59	Eastern Cape		Yes I do	Wind		Anthea	employed individual
2022-07-08 13:02:52	Free State		Yes I do	Wind	Throwing good money after bad has never made good business sense. Those of us who are actually paying for electricity at astronomical rates are definitely not getting value for money. Since the minister states that electricity is a luxury we should be allowed to choose the provider of this luxury.	Leah	employed individual
2022-07-08 12:56:57	Western Cape		Yes I do	Wind		dalene	employed individual
2022-07-08 12:33:38	Gauteng		Yes I do	Wind	Definitely need independent power suppliers. Eskom have proven their incompetence over the past years. The government has proven their incompetence to supply electricity over the past years.	Marion	employed individual
2022-07-08 12:28:06	Gauteng		Yes I do	Wind	South Africans don't deserve to constantly be paying more and more for electricity and receiving nothing back in return, the situation is now desperate to say the least. We urgently need and want a permanent solution and that solution doesn't involve have patience with Eskom.	Faz	employed individual
2022-07-08 12:25:11	Western Cape		Yes I do	Wind	All the red tape to drop we need reliable energy in a failing state	Maria	employed individual
2022-07-08 12:19:29	Western Cape		Yes I do	Wind		Ingrid	employed individual
2022-07-08 12:16:26	Western Cape		Yes I do	Wind	Wind and solar !!!	Gail	employed individual
2022-07-08 12:15:14	Free State		Yes I do	Wind	This has gone on toooo long. Every year we believe Eskom would have sorted itself out, or at least minimized the damage, but every year gets worse!!! We need new solutions fast!	Lorraine	employed individual
2022-07-08 12:14:59	Western Cape		Yes I do	Wind	A combination of wind and solar power will be beneficial for South Africa as we have the wind and sun to facilitate these options.	Yolanda	employed individual
2022-07-08 12:14:39	KwaZulu-Natal		Yes I do	Wind	Not only wind, solar as well and of course industries as the sugar milling sector have excess electricity which they could feed onto the grid straight away.	Colleen	employed individual
2022-07-08 11:51:36	Western Cape		Yes I do	Wind	Both wind and solar are good alternatives and Banks are open to lend money to these types of projects.	Thinus	employed individual

2022-07-08 11:39:59	Western Cape		Yes I do	Wind	Both wind and solar would be able to increase production and can be implemented fast. Another key item would be will be the need to add large scale battery storage which should also be incorporated	Dean	employed individual
2022-07-08 11:31:04	Eastern Cape		Yes I do	Wind		HB	employed individual
2022-07-08 11:30:48	Western Cape		Yes I do	Wind		Stefanie	employed individual
2022-07-08 11:26:11	Gauteng		Yes I do	Wind	The country is in crisis, something needs to be done urgently	Gert	employed individual
2022-07-08 11:14:39	Gauteng		Yes I do	Wind	I have done extensive systems and dynamic investigations on this regard, and wind power has the best, sustainable, economic and socio-economic advantage for South Africa. The investigations that I conducted has in-depth recommendations on the impact of policy and how the policy should be reshaped to advance South Africa. The techno-economic evaluations substantiate this.	Zane	employed individual
2022-07-08 11:11:56	Gauteng		Yes I do	Wind	Quick to implement just need battery storage capacity for low wind conditions	Chris	employed individual
2022-07-08 11:07:50	Western Cape		Yes I do	Wind	Any other option would be better than the current situation! In fact scrap the red tape in all departments!!	Jennifer	employed individual
2022-07-08 11:06:28	Western Cape		Yes I do	Wind	In long run - We have so much areas where there's wind on most days - e.g. coast lines, mountain areas etc. Immediate: Contact retired Eskom employees to assist with manpower. The fire those that are striking illegally & are not grateful for the work they have - older generation has a lot of knowledge & can train a new generation that will hopefully be grateful for a job opportunity, training etc.	Wilna	employed individual
2022-07-08 10:56:43	Eastern Cape		Yes I do	Wind		Jessica	employed individual
2022-07-08 10:51:00	Western Cape		Yes I do	Wind	We need to get rid of the parasite draining our tax monies. The only reason why there is so much red tape is these parasites will no longer have access to the tax monies they are looting. With years and years of degradation of the infrastructure, we need alternative solutions. Our tax money needs to be used in other initiatives to solve the electricity crisis we are faced with.	Cynthia	employed individual
2022-07-08 10:50:16	Western Cape		Yes I do	Wind		Moray	employed individual
2022-07-08 10:45:29	Gauteng		Yes I do	Wind	Any renewable generation system that is not creating pollution or is potentially hazardous (nuclear). The system should be geographically suitable (ie. windy in windy areas, sun in arid areas). The sooner they are allowed to start the sooner the crisis can be avoided and a limit to output capacity should not be a restriction.	Neil	employed individual
2022-07-08 10:45:25	Western Cape		Yes I do	Wind	Lets do away with this electric ransom we experiencing from Eskom. We have lots of mountains and empty land where we can get enough wind or even solar will serve us best. We can't go for a solution that involves water because as a country we are in short of water. Thank you		employed individual
2022-07-08 10:37:49	Gauteng		Yes I do	Wind	At least the inconsistency of wind is more consistent than Eskom	Leanne	employed individual
2022-07-08 10:26:41	Western Cape		Yes I do	Wind		S	employed individual
2022-07-08 10:24:41	Western Cape		Yes I do	Wind		Tali	employed individual
2022-07-08 10:23:09	Limpopo		Yes I do	Wind	The system only allows for one selection, but I feel all available resources should be used: wind, solar and Hydro (Caborra Bassa). All red tap should be scrapped immediately to allow independents into the grid. This is a matter of national security, how is it possible NOT to act???	Mathys	employed individual
2022-07-08 10:23:08	Western Cape		Yes I do	Wind		Bev	employed individual
2022-07-08 10:14:41	Eastern Cape		Yes I do	Wind	Thus is what south africa needs now to get it out of these rolling black outs ,and to bring ease to the already stressed population ,to sucure jobs and to bring the price of electricity down.	Douglas	employed individual

2022-07-08 09:26:01	Western Cape		Yes I do	Wind	<p>Renewables are definitely the way to go. Go green!!</p> <p>Wind farms proliferate in the Eastern Cape. This I think is the quickest way to bring existing infrastructure online, as there is no build time required.</p> <p>Solar in the Northern Cape & Karoo regions.</p> <p>The drawback to renewables is uneven supply. Use the smelters cooling jackets to regulate the supply to grid. Wind turbines can also adjust their blades to regulate supply.</p> <p>There was also some interesting independent offshore ship gas generation facility that was undergoing EIA in Richards Bay if I'm not mistaken. Definitely worth looking at.</p> <p>The less we rely on a single supplier the more robust our generation supply will become. This is basic business, never have all your eggs in one basket. Split the load over several technologies and several suppliers.</p>	Stuart	employed individual
2022-07-08 09:23:19	Gauteng		Yes I do	Wind	<p>Bou meer windplaasse en stop Eskom se monopolie. Ons betaal ten duurste vir krag en diense en ons kry dit nie. Stop kragvoorsiening na die buurlande toe ook hulle moet maar hulle eie planne beraam</p>	Beatrix	employed individual
2022-07-08 09:20:19	KwaZulu- Natal		Yes I do	Wind	<p>South Africa needs to diversify to source sufficient energy for our needs and use our natural resources, wind, sun, gas as well as further nuclear along our extensive coast line. The government has displayed its inability to manage these needs, the unions or the entrepreneurship to innovate along new ideas. Please scap the red tape so that independant power producers can function to help resolve this crisis.</p>	Judith	employed individual
2022-07-08 09:15:22	Western Cape		Yes I do	Wind	<p>If our president has his way, then African Rainbow and Power, owned by his brother-in-law, Patrice Motsepe will get the monopoly tender for which they are aiming. I therefore support the use of wind turbines as we have enough coast line to support this clean project.</p>	Shelley- Lynne	employed individual
2022-07-08 09:02:58	Western Cape		Yes I do	Wind	<p>In the Western Cape we always experience a lot of wind. It would be easier and in my view, cheaper option</p>	Eugene	employed individual
2022-07-08 09:02:39	Gauteng		Yes I do	Wind	<p>Hi.</p> <p>yes WIND and Solar Power must be harnessed. the Ony Problem is that this nation does not respect anything,</p> <p>and putting a solar farm and /or Windfarm up , requires so much additional Money for Security and Anti Theft systems</p> <p>we dont use Backup or solar power for Traffic Lights.. why? because it will get Stolen.. so now we just have load shedding and a free for all.. no Lights.. no Rules.</p> <p>Municipalities should also allow Home users to Legally Export Excess Solar power to the Grid.. there can be a National Tax rebate based on the power sent back to the Grid...</p>	Paul	employed individual
2022-07-08 08:55:16	Western Cape		Yes I do	Wind	<p>I think it is ridiculous that we are supplying other countries while we are unable to supply our own country. Eskom has had enough time to get their ducks in a row and have proven that they will never do it. Nothing wrong with a bit of healthy competition.</p>	Chantelle	employed individual
2022-07-08 08:55:09	Gauteng		Yes I do	Wind	<p>Renewable</p>	Andre	employed individual
2022-07-08 08:45:26	Western Cape		Yes I do	Wind	<p>At this stage we need all the capacity(solar/wind etc.)</p>	Pieter	employed individual
2022-07-08 08:45:13	Western Cape		Yes I do	Wind	<p>Between Solar and wind power we could make up the power deficit, but we also need to fix the corruption that is bringing Eskom to its knees.</p>	Marlise	employed individual
2022-07-08 08:45:10	Western Cape		Yes I do	Wind	<p>Between Solar and wind power we could make up the power deficit, but we also need to fix the corruption that is bringing Eskom to its knees.</p>	Marlise	employed individual
2022-07-08 08:45:10	Western Cape		Yes I do	Wind	<p>Between Solar and wind power we could make up the power deficit, but we also need to fix the corruption that is bringing Eskom to its knees.</p>	Marlise	employed individual
2022-07-08 08:45:10	Western Cape		Yes I do	Wind	<p>Between Solar and wind power we could make up the power deficit, but we also need to fix the corruption that is bringing Eskom to its knees.</p>	Marlise	employed individual
2022-07-08 08:43:09	Gauteng		Yes I do	Wind	<p>Wind, Solar is key for SA. The govt has had 14 years to avert a complete blackout. Years later, the govt still has no clue on how to resolve it. We are on the brink of a total collapse if not, already there. Main reason is that the govt is busy trying to figure out a method to cash in and loot from the IPP's. Privatize City Power and get accountability back with experts in the trade. Gwede and co MUST be sacked for incompetence. They are clueless and do not have the interest of the masses at heart.</p>	Dinal	employed individual
2022-07-08 08:41:26	Western Cape		Yes I do	Wind		Stefan	employed individual
2022-07-08 08:29:29	Western Cape		Yes I do	Wind	<p>We have all the wind turbines, all the solar plants, over and above the current coal that is being manipulated towards their own corrupt agendas.....</p> <p>We buy pre paid electricity, pay in advance and then they tell when we can use what we have bought.....</p>	Liana	employed individual

2022-07-08 08:22:15	Gauteng		Yes I do	Wind		LYNETTE	employed individual
2022-07-08 08:09:42	Eastern Cape		Yes I do	Wind	More cost effective	Cheness	employed individual
2022-07-08 08:07:45	Gauteng		Yes I do	Wind	The sad thing is that we supply power to other countries and in the meantime we are without electricity. How does that work. Is it really necessary for only the government to be a supplier!!!! No!!!	Elize	employed individual
2022-07-08 07:57:46	Gauteng		Yes I do	Wind		ANNE	employed individual
2022-07-08 07:52:07	Gauteng		Yes I do	Wind	We need to embrace renewables and move away from coal. And to reduce the opportunities for more ANC thieving.	Geoffrey	employed individual
2022-07-08 07:52:07	Gauteng		Yes I do	Wind	We need to embrace renewables and move away from coal. And to reduce the opportunities for more ANC thieving.	Geoffrey	employed individual
2022-07-08 07:46:42	Gauteng		Yes I do	Wind	It is a free source, only going to cost money to install the windmills to generate the power.	Madelaine	employed individual
2022-07-08 07:44:48	Eastern Cape		Yes I do	Wind	For a number of well known reasons it is crucial that we move to renewable sources of energy	Matthew	employed individual
2022-07-08 07:17:39	Eastern Cape		Yes I do	Wind	Hand over what you succeeded to break. Let's see how it should be done when Eskom don't have the monopoly.	Jacques	employed individual
2022-07-08 07:07:04	Western Cape		Yes I do	Wind	We can't afford to "save" Eskom. And the economy is taking a bashing, unemployment is already too high for this to continue.	Kumarie	employed individual
2022-07-08 07:07:03	Western Cape		Yes I do	Wind	We can't afford to "save" Eskom. And the economy is taking a bashing, unemployment is already too high for this to continue.	Kumarie	employed individual
2022-07-08 07:01:34	Western Cape		Yes I do	Wind	I just want a better electricity production in SA, the current infrastructure we have is failing and has failed. We cannot keep SA in such ruins anymore. Its absolute nonsense that in this day and age, we are forced to have to endure such atrocity as Load Shedding. We already pay so much to get electricity currently and then have to just be okay with a few hours a day. Not to mention the appliances its destroying and the food sources being lost because of it. Coal and Gas cannot be a solution going forward. We MUST get something else. It cannot go on like this. I am tired of being at the mercy of the government and Eskom.	Nicolina	employed individual
2022-07-08 07:00:27	Western Cape		Yes I do	Wind	I just want a better electricity production in SA, the current infrastructure we have is failing and has failed. We cannot keep SA in such ruins anymore. Its absolute nonsense that in this day and age, we are forced to have to endure such atrocity as Load Shedding. We already pay so much to get electricity currently and then have to just be okay with a few hours a day. Not to mention the appliances its destroying and the food sources being lost because of it. Coal and Gas cannot be a solution going forward. We MUST get something else. It cannot go on like this. I am tired of being at the mercy of the government and Eskom.	Nicolina	employed individual
2022-07-08 06:57:27	Western Cape		Yes I do	Wind	Energy producers should not have to deal with red tape. There is a real energy crisis and Eskom is not succeeding. The legislation should be amended so as to immediately allow independent LOCAL energy producers - NOT crooks like Karpowership - to supply us with energy.	Armand	employed individual
2022-07-08 06:52:20	Western Cape		Yes I do	Wind		Pierre	employed individual
2022-07-08 06:52:19	Western Cape		Yes I do	Wind		Pierre	employed individual
2022-07-08 06:51:30	Western Cape		Yes I do	Wind	The West Cape coast region is the perfect solution for Wind Turbine farms. WHY are'nt we using this obvious source of energy ?	Judy	employed individual
2022-07-08 06:50:01	Eastern Cape		Yes I do	Wind		Caroline	employed individual
2022-07-08 06:47:02	Gauteng		Yes I do	Wind		Rene	employed individual
2022-07-08 06:42:32	Gauteng		Yes I do	Wind	As a country we have more than enough natural resources (wind, hydro, solar) to use to help in the production of electricity, it is sad that this hasn't been implemented years ago and we continue to struggle with constant load shedding impacting our daily lives and lively hood.	Chantal	employed individual
2022-07-08 06:42:08	Western Cape		Yes I do	Wind		Godfrey	employed individual
2022-07-08 06:38:59	Gauteng		Yes I do	Wind	Eastern Cape is already called the Windy City it will be quicker to generate electricity	Swazi	employed individual
2022-07-08 06:35:58	KwaZulu-Natal		Yes I do	Wind	Parts of the country uses wind to generate power, when drive along farm owners uses wind mills to generate power, also invest on solar panels.	Kasavel	employed individual
2022-07-08 06:31:46	Gauteng		Yes I do	Wind	We are one of the countries with the most natural resources to provide electricity. Solar, wind, water. Why has Eskom been allowed to monopolise and terrorise SA citizens for so long? Our government are not equipped to run anything. All of these companies should be privatized its the only way things will change for the better. Eskom must fall!	Karien	employed individual
2022-07-08 06:29:32	Free State		Yes I do	Wind		Carin	employed individual
2022-07-08 06:29:02	Western Cape		Yes I do	Wind	We need fast executed projects	Paul	employed individual

2022-07-08 06:28:15	Mpumalanga		Yes I do	Wind	There are certain parts of the Country that experience a regular high speed of wind which can generate energy, e.g. Cape town,	Sipho	employed individual
2022-07-08 06:18:23	KwaZulu-Natal		Yes I do	Wind		Bryan	employed individual
2022-07-08 06:13:49	Western Cape		Yes I do	Wind		Dries	employed individual
2022-07-08 06:13:47	Western Cape		Yes I do	Wind	It's free	Maritsa	employed individual
2022-07-08 06:06:52	Western Cape		Yes I do	Wind	There is absolutely no need for loadshedding with wind and solar energy available. Holding the country back to hold onto a antiquated company that's been ransacked to keep face and further cripple the country with over pricing a resource . Eskom needs to let go of the reigns and create a competitive market for electricity providers giving the people the choice .	Megan	employed individual
2022-07-08 06:06:35	Gauteng		Yes I do	Wind		Angela	employed individual
2022-07-08 05:59:40	KwaZulu-Natal		Yes I do	Wind	The current power supplier cannot cope with demand for many reasons. Mainly totally incompetent leadership put in place by government. Get rid of all red tape and allow private enterprise to assist.	Kim	employed individual
2022-07-08 05:52:07	Western Cape		Yes I do	Wind		Carmen	employed individual
2022-07-08 05:49:49	Eastern Cape		Yes I do	Wind	IN THE EASTERN CAPE WE HAVE THOUSANDS OF WIND TURBINES WHICH POWER GOES INTOI ESCOM'S GRID, IF WE COULD USE THIS LOCALLY AND DIRECTLY OUR PROBLEM WOULD BE SOLVED! ALSO MAKE THE MUNICIPALITIES LOCAL AND KNDEPENDENT AGAIN, THE METRO'S DO NOT WORK! RMOVE THE LEGISLATIONS AND ALLOW FREE ENTERPRISE FOR POWER SUPPLIERS!	Claressa	employed individual
2022-07-08 04:25:04	Eastern Cape		Yes I do	Wind		Stuart	employed individual
2022-07-07 23:40:41	Eastern Cape		Yes I do	Wind	Any sustainable power source would be very welcome . It would also bring a bit of competition in the business sector	Tanya	employed individual
2022-07-07 23:02:08	Gauteng		Yes I do	Wind		Tony	employed individual
2022-07-07 22:06:26	Limpopo		Yes I do	Wind		Liza	employed individual

2022-10-04 18:01:40	Eastern Cape		Yes I do	Wind	At the moment it deems to be one of the safest for global warming solutions I think.	Estelle	employed individual
2022-09-21 11:54:17	Western Cape		Yes I do	Wind	I support a variety of electricity production methods, including wind, solar, hydro, and nuclear. I do not support the construction of new infrastructure for energy production from coal or gas. Existing coal or gas plants should merely be maintained to produce energy cost-efficiently until the end of its lifespan. Private businesses and individuals should be allowed to produce power with minimal red tape and other governmental regulations or levies/taxes.	Marika	employed individual
2022-09-13 12:58:30	Gauteng		Yes I do	Wind			employed individual
2022-09-06 15:07:33	Gauteng		Yes I do	Wind		Tarryn	employed individual
2022-08-22 06:50:13	KwaZulu-Natal		Yes I do	Wind	In my own opinion wind is the most efficient	Fika	employed individual
2022-08-17 20:38:31	Gauteng		Yes I do	Wind	Solutions differ for different areas. Wind for areas which have good winds. Solar for areas with good sunshine although the making of batteries is destructive. Hydro excellent but not always manageable in a water starved country. The big thing is getting PEOPLE POWER IN and pushing OUT corrupt and inefficient government control s.	Jacqueline	employed individual
2022-08-17 02:50:11	Western Cape		Yes I do	Wind	Wind is the cleanest energy for the environment, it's the most affordable as well.	James	employed individual
2022-08-16 11:23:46	Eastern Cape		Yes I do	Wind		Jeanine	employed individual
2022-08-08 17:01:47	Western Cape		Yes I do	Wind	Yes! Please let other entities help solve the energy crisis in South Africa.	Ulrich	employed individual
2022-08-05 06:56:41	Western Cape		Yes I do	Wind	Solar, hydro and wind depending on the province	Lynette	employed individual
2022-08-04 08:58:17	Western Cape		Yes I do	Wind	We need to make use of greener electricity solutions, i,e a combination of wind, solar, and hydro which would be eco friendly, the other options should be explored then as an after thought to supplement as opposed the other way around.	Lizelle	employed individual
2022-08-04 07:55:11	Western Cape		Yes I do	Wind	We need to promote where the advantage is beneficial for the whole Country not be negative and controlling.	Kenny	employed individual
2022-08-04 07:48:40	Western Cape		Yes I do	Wind	Clean renewable energy is critical for the preservation of the earth and humanity.	Rozelle	employed individual
2022-08-03 21:51:55	KwaZulu-Natal		Yes I do	Wind	Wind and sun is abundant in South Africa. They are energy sources that will never run out and will not damage the environment	Linda	employed individual
2022-08-03 10:45:56	Western Cape		Yes I do	Wind		Gabrielle	employed individual
2022-08-03 01:30:59	Eastern Cape		Yes I do	Wind		Jürg	employed individual
2022-08-02 13:57:45	Western Cape		Yes I do	Wind		Laura	employed individual

2022-08-02 07:39:40	Gauteng	Yes I do	Wind	Enough is enough with electricity increases and still we get power cuts and the funds just get stolen. The municipality is in a mess, Government has no control on the criminals. We need another solution instead of constant energy increases. The money it just gets stolen and we are back to where we started.	Patricia	employed individual
2022-08-01 09:19:24	Gauteng	Yes I do	Wind	Eskom cannot supply us with power. Yet we make it impossible for other to do so. Also, Eskom wants to punish homes with ridiculous connection fees for going off a grid that cannot even supply them with power. We are helping you solve the problem YOU created, why must we pay for your ineptitude?	Struan	employed individual
2022-08-01 08:23:44	Gauteng	Yes I do	Wind	Off-shore wind can pick up the slack when solar goes to sleep for the night. Solar can support the grid for industries during the day, with off-shore wind production at night	Leon	employed individual
2022-08-01 06:14:04	Western Cape	Yes I do	Wind		Ross	employed individual
2022-07-31 21:44:19	Western Cape	Yes I do	Wind	Wind or solar as we have both options in SA. Hydro would take too long to build and to agree on tariffs so wind and solar are well advanced and already have tariffs agreed	Peter	employed individual
2022-07-27 11:55:27	Western Cape	Yes I do	Wind		KEVIN	employed individual
2022-07-26 20:45:56	Western Cape	Yes I do	Wind		Phillip	employed individual
2022-07-26 06:49:33	Western Cape	Yes I do	Wind		Steven	employed individual
2022-07-25 13:26:25	North West	Yes I do	Wind	I would recommend renewables or other sources. Not nuclear energy because the work ethic in South Africa is not conducive to run a nuclear plant, what if workers decide to strike and leave their work undone?	Marjaan	employed individual
2022-07-22 12:38:30	Western Cape	Yes I do	Wind	Wind, Solar, Hydro - all are clean energy sources that could be instituted relatively quickly. It would serve objectives of production and delivery whilst remaining conscious of environmental concerns.	Natalie	business owner
2022-07-20 09:28:18	Western Cape	Yes I do	Wind	Simply put, energy from renewable sources (solar and wind) is the most logical and direct solution to the dire problem that we are currently facing. Eskom is clearly unable to provide sufficient power to the country of South Africa at this time and, all measures must be taken to rectify this issue immediately.	Halen	business owner
2022-07-19 17:27:27	Western Cape	Yes I do	Wind		Kevin	business owner
2022-07-19 06:49:59	Western Cape	Yes I do	Wind	South Africa must allow IPPs to generate electricity urgently, and connect it to the grid	Pramod	business owner
2022-07-18 14:16:07	Western Cape	Yes I do	Wind	It is free power once the structures are up and spinning. Good long term investment for the owners without fear for any corruption or theft----- don't forget the bribes!	Pierre	business owner
2022-07-17 14:33:02	Western Cape	Yes I do	Wind		Iona	business owner
2022-07-15 08:30:01	Gauteng	Yes I do	Wind	Combination of wind where most effective, solar (with good security, to prevent theft), and hydro.L Legalise solar installations by individual households, and allow them to feed power back into the grid (paying for this feedback would encourage citizens and companies to install larger solar and possibly wind power systems).	Hester	business owner
2022-07-15 08:16:26	Eastern Cape	Yes I do	Wind	I believe we have the capacity, space and technology to ramp up all renewables immediately. It is beyond belief that the entire country is being held to ransom by the dept of Energy's outdated and suicidal alliance with fossil fuels. No oil, no gas, no nuclear, no coal. Only renewables.	Jo	business owner
2022-07-14 20:26:42	Gauteng	Yes I do	Wind	Other than solar energy, which we have in abundance, why haven't we installed wind turbines in the flat areas and coastal areas where we have an abundance of wind all year round?	Candice	business owner
2022-07-14 05:05:13	Eastern Cape	Yes I do	Wind	Wind, Solar and Hydro should be used to generate electricity in South Africa	Terence	business owner
2022-07-13 21:16:05	Western Cape	Yes I do	Wind		Patricia	business owner
2022-07-13 16:47:39	Gauteng	Yes I do	Wind	Scrap all red tape. Red tape only stands in the way for progress. Increase the Build Limits of all future REIPPPP Bid Windows to Double or Treble of what they are at present from 2600MW to 5000MW or even 7500MW. Start now with BW6. This will put an end to load shedding once they are built in 18 to 20 months. Continue the REIPPPP with increased pace and size. Revise the IRP2019 upwards and remove all Build limits. Just use the cheapest solution which is renewables and storage. We need excess power to also cater for the hydrogen economy which requires an almost doubling to the total capacity of our present grid. We also need to increase grid capacity for EVs charging to green electricity. We need 4000MW / 22000MWhr capacity immediately or double more is better. Our Elon Musk can supply Lithium in pronto short time as for OZ. And so can Bushveld Energy with long term Vanadium liquid batteries.	Frans	business owner
2022-07-13 14:46:54	Western Cape	Yes I do	Wind		Martia	business owner
2022-07-13 11:19:06	Gauteng	Yes I do	Wind		Juliet	business owner
2022-07-13 10:18:28	Northern Cape	Yes I do	Wind		Nadia	business owner

2022-07-13 09:45:46	Western Cape		Yes I do	Wind	We have large open space were we can have solar or wind farms producing our own electricity. I.E. The west coast for the wind is amazing. This could be business and job creation for our people.	Pauline	business owner
2022-07-13 09:41:31	Western Cape		Yes I do	Wind	Wind and solar energy are God given energy systems for us to use freely.	Mona	business owner
2022-07-13 09:28:47	Western Cape		Yes I do	Wind		Lisa	business owner
2022-07-13 09:02:09	Western Cape		Yes I do	Wind	Wind is freely available. It is cost effective	Thomas	business owner
2022-07-13 08:41:28	KwaZulu- Natal		Yes I do	Wind	This government has proven time and again that they are clueless, detached from reality and have no idea how to run a country let alone fix Eskom. There has been no sense of urgency despite the crisis! Independent Power Producers will make a huge difference in turning around our electricity crisis within a short period of time and ending load shedding. This govt ruined everything it touched with its dirty paws , now there is just DOOM, GLOOM & DESPAIR	Shireen	business owner
2022-07-13 08:03:43	Western Cape		Yes I do	Wind		Otto	business owner
2022-07-13 07:53:37	Western Cape		Yes I do	Wind	South Africa has enough sunlight and wind to generate enough power for all.	Willem	business owner
2022-07-13 07:26:01	Eastern Cape		Yes I do	Wind		Sha	business owner
2022-07-12 22:39:26	Western Cape		Yes I do	Wind		Sean	business owner
2022-07-12 21:30:47	KwaZulu- Natal		Yes I do	Wind	Let us as a country find solutions and prevent the country going to ruin due to a lack of power! We need every capable hand on deck!	Adine	business owner
2022-07-12 19:55:05	Gauteng		Yes I do	Wind		Johan	business owner
2022-07-12 19:09:49	Western Cape		Yes I do	Wind		Theunis	business owner
2022-07-12 18:14:30	Gauteng		Yes I do	Wind		K	business owner
2022-07-12 17:17:58	Gauteng		Yes I do	Wind	The government needs to urgently be able to adequately supply all South Africans with electricity, however one must remain cognisant of climate change and protecting the environment. Any form of clean energy is welcome	Clorinda	business owner
2022-07-12 15:49:34	Western Cape		Yes I do	Wind	Dear Government We, the tax paying people of South Africa are suffering because of load shedding. You have had ample time to maintain and improve our electricity infrastructure yet because of mismanagement , strikes and fraud we have a failing system which in turn is causing our business owners and whole economy to slide into desperation for a reliable energy supply. I support any green sustainable option, including wind, solar, hydro. We should allow independent companies with the financial resources the opportunity to build up a cost effective energy supply grid nationally we could empower people with solar at their homes and businesses which could sell their excess energy back to the grid !!!!!!! LETS MOVE SOUTH AFRICA FORWARD WITH PRIVATISING OUR ENERGY SUPPLY !	Michelle	business owner
2022-07-12 12:37:03	Western Cape		Yes I do	Wind	I do not profess to know a lot about energy but we need the fastest method of producing electricity. Although wind energy will take some time to produce, it seems like a more permanent arrangement.. I am really struggling to keep my business going under these really poor conditions. (load shedding 3 times a day!)	Ronnie	business owner
2022-07-12 12:11:21	Western Cape		Yes I do	Wind		ivan	business owner
2022-07-12 11:49:09	Western Cape		Yes I do	Wind		Dirk	business owner
2022-07-12 11:27:17	Gauteng		Yes I do	Wind	We need to generate extra electricity urgently. Electricity generation by independent power producers using wind and solar energy would appear to be the best way to achieve this in an environmentally friendly way. The government has proved itself to be inept in providing a reliable energy supply.	Daryl	business owner
2022-07-12 11:17:47	KwaZulu- Natal		Yes I do	Wind	Independent suppliers must be of high quality. Eskom can still do Wind, hydro, and solar generation of power. Drop nuclear and coal and diesel.	Jan	business owner
2022-07-12 10:52:15	Gauteng		Yes I do	Wind	wind and solar which there is in abundance . I don't think we can solve our problem in the short term as there is no will by the government	Angelo	business owner
2022-07-12 10:35:59	Western Cape		Yes I do	Wind	I suggest wind power to suit our energy needs, but it should actually be a combination of renewable sources, definitely not coal or diesel.	Henning	business owner
2022-07-12 07:15:42	KwaZulu- Natal		Yes I do	Wind	Combine wind gas solar and hydro	Taddis	business owner
2022-07-12 06:31:38	Western Cape		Yes I do	Wind	There is not a single answer. Deregulate, get rid of bee and put a structured plan into place. Open the market for private enterprise. Eskom has been destroyed. Time for next gen that the ANC cannot get their theiving fingers into	David	business owner
2022-07-11 23:21:13	Western Cape		Yes I do	Wind		John	business owner

2022-07-11 21:40:22	Western Cape		Yes I do	Wind	Well where do i start...best to keep it simple short and sweet... Cut the red tape, any form of reliable power source at this current moment in time is vital for everyone and everything. there are many options available my selection is just one. As long as an idea thats put into action works any private company should be allowed to proceed to make it work.	patryk	business owner
2022-07-11 21:04:17	Gauteng		Yes I do	Wind	Major wind farms are already built or in production, this could be scaled significantly supporting jobs in rural communities, and instantly adding to the grid.	Amanda	business owner
2022-07-11 19:45:16	Gauteng		Yes I do	Wind	Punch off	Gunther	business owner
2022-07-11 19:32:57	Eastern Cape		Yes I do	Wind	We will need to use a combination of solar and wind to help get us out of the trouble we in.	Gareth	business owner
2022-07-11 19:03:29	Eastern Cape		Yes I do	Wind	This is capitalism! Let the people generate viable opportunities to meet the needs through private enterprises! Enough politics! Please!	Guy	business owner
2022-07-11 18:54:32	Western Cape		Yes I do	Wind	There are many options, but for the Western Cape, wind is the obvious choice. The ANC has run Eskom into the ground. It is time for the private sector to step in and take over. Loadshedding is killing this country. Companies are closing down and this creates even more job losses.	Cathy	business owner
2022-07-11 17:48:48	Western Cape		Yes I do	Wind		Diana	business owner
2022-07-11 17:28:02	Western Cape		Yes I do	Wind	We need to scale renewables (solar, wind, geothermal) rapidly. Specifically molten salt solar plants have the potential to produce 24/7. Further investment in fossil fuels are futile. The red tape for Independent power producers needs to be removed, however, energy sector can't be fully privatised and state needs to regulate and keep control.	Michael	business owner
2022-07-11 16:37:54	Western Cape		Yes I do	Wind		Paul	business owner
2022-07-11 15:58:24	KwaZulu- Natal		Yes I do	Wind		Morris	business owner
2022-07-11 15:05:09	Free State		Yes I do	Wind	Ek is oortuig dat dit nou tyd is om Son- en Wind energie aas verbruikers beskikbaar te maak om sodoende beurtkrag te vermy. Ek kan nie verstaan dat die simpel anc regering dit nie kan verstaan nie. hul hardkoppige onnoselheid kos oms land se verbruikers miljarde. Stop die diefstal uit steenkool en raak ontslae van `n fossiel soos Mantashe.	Johannes	business owner
2022-07-11 14:57:03	Eastern Cape		Yes I do	Wind	We do have a lot of wind farms which are not supplying us with electricity, but instead it is supplying foren countries. These wind farms are on SA soil & should be working for SA & not other countries.	John	business owner
2022-07-11 13:58:55	Western Cape		Yes I do	Wind		Dee	business owner
2022-07-11 13:45:49	Gauteng		Yes I do	Wind	Rens	Rens	business owner
2022-07-11 13:07:07	Western Cape		Yes I do	Wind		byron	business owner
2022-07-11 12:44:00	Western Cape		Yes I do	Wind	South Africa'a energy crisis is solely the doing of an incompetent and corrupt government. Any energy solution except one that can be hijacked for personal gain by goverment officials will help alleviate the immediate energy needs.	Leon	business owner
2022-07-11 12:23:07	Gauteng		Yes I do	Wind	The minister has his own solar power so he doesn't care plus he doesn't pay for it, we pay so why should he care. The ANC has failed us and is about time they go, to much looting and corruption. Where is the 20billion rand the Municipalities waisted last financial year but they quick to increase the tariffs. VERY SAD STATE OF AFAIRES.	Jacques	business owner
2022-07-11 12:17:29	Western Cape		Yes I do	Wind	Fire - Everyone who is not qualified to work at the Power Station. You can say what you like about the Apartheid System - Things Worked We in South Africa have enough Wind to work for us and we also have one of the best climates for Solar Power Generation. We need change lets go Private, so that Jobs and Lives are saved. We Now Only Need - Honest People who will work for the good of the country, so that we All Benefit.	Elda	business owner
2022-07-11 12:17:22	Western Cape		Yes I do	Wind	Ultimately, South Africa has some of the best renewable energy resources on the planet in terms of sun, wind and wave energy. We should be harnessing this energy on a mass scale. Particularly in the building of natural batteries and other. Once these assets are built they last far longer than manufacturers guarantee and we would be on a trajectory to having some of the cheapest costing energy over the next 50 years. But, we need to start building this infrastructure today! It will be best funded by private entities first and with government subsidies that and then later on handed over to the people once sufficient returns have been made by the private sector.	Kenny	business owner
2022-07-11 11:50:41	Mpumal anga		Yes I do	Wind	I strongly believe that all sources of electricity production should be welcomed with open arms. We need electricity to get this country back up and running. URGENTLY! If we have a choice, renewable sources of electricity should be weighed on most heavily. Wind, Solar, Hydro sources are least disruptive to our country's ecosystems and will provide sustainable and renewable sources of electricity. IPProducers must be allowed to start immediately without any further hindrance from government.	Friederike	business owner
2022-07-11 11:48:43	Western Cape		Yes I do	Wind	Immediate focus on renewable energy is vital to stabalise the economy	Anya	business owner
2022-07-11 11:44:38	Western Cape		Yes I do	Wind	Urgently something has to be done as we are losing productivity which is costing us a great deal, yet SARS insist on tax payments.	Yash	business owner

2022-07-11 11:44:24	KwaZulu-Natal		Yes I do	Wind		Brad	business owner
2022-07-11 11:41:57	Gauteng		Yes I do	Wind	Solar, wind and hydro are a suitable options to avoid depleting resources. Perhaps and additional option as back up. But relying on Eskom as a primary source is over.	Jesse	business owner
2022-07-11 11:23:20	Western Cape		Yes I do	Wind		Sue	business owner
2022-07-11 11:19:57	Western Cape		Yes I do	Wind		Matthew	business owner
2022-07-11 11:17:10	Western Cape		Yes I do	Wind	It has been too long that this load shedding has been crippling this country, about 14 YEARS already!!!! Clearly what you are doing is not working, so there needs to be immediate emergency action taken to remedy this, that does not benefit Eskom in any way. The new plan needs to remove Eskom and all of it's employees from the equation altogether. They are holding an entire nation hostage and stealing from the taxpayers pockets on a daily basis.	Gareth	business owner
2022-07-11 11:13:57	Eastern Cape		Yes I do	Wind	Frankly I dont care what method you use. I would prefer solar or wind but beggars can't be choosers. I do however completely support independent supply. No brainer really.	Dave	business owner
2022-07-11 11:03:31	Gauteng		Yes I do	Wind	IT IS USED WORLD-WIDE AND IS MUCH QUICKER TO BUILD THAN POWER STATIONS	Graham	business owner
2022-07-11 10:46:56	Western Cape		Yes I do	Wind	For the love of all things holy and light, please can someone step in and fix the shit show that is Eskom. The sooner the better. The current (sorry) situation beggars belief; we've been subjected to load shedding for 14 (!) years and the excuses simply don't hold up. Cable theft etc? where is that going and who is buying it? And maybe stop selling our electricity to other countries while we sit in the dark.	Bianca	business owner
2022-07-11 10:23:27	Western Cape		Yes I do	Wind	Firstly get rid of all the spongers and useless people at Eskom then stop paying the crazy salaries to all these incompetent people in te ANC who are so busy stealing money from the country. Use other methods of providing electricity such as windmills,solar,hydro electric etc. There was many many terrible things done by the previous government but everything worked,SAA was great the roads were good hospitals were fantastic etc etc Now under the ANC the country is falling apart with immigration at an all time high	Albert	business owner
2022-07-11 10:23:27	Western Cape		Yes I do	Wind	Firstly get rid of all the spongers and useless people at Eskom then stop paying the crazy salaries to all these incompetent people in te ANC who are so busy stealing money from the country. Use other methods of providing electricity such as windmills,solar,hydro electric etc. There was many many terrible things done by the previous government but everything worked,SAA was great the roads were good hospitals were fantastic etc etc Now under the ANC the country is falling apart with immigration at an all time high	Albert	business owner
2022-07-11 10:11:20	Gauteng		Yes I do	Wind		Peter	business owner
2022-07-11 09:38:03	Western Cape		Yes I do	Wind	Its about time we sought independent power producers who can run it as a business, and not a way to enable more corruption. We need a stable business, no corruption, no politicians, purely the business of producing power for a country that desperately stable power solutions, so that we can grow, and business can grow. We can do nothing with no power, look what it is doing to the economy.	Judy	business owner
2022-07-11 09:24:55	Eastern Cape		Yes I do	Wind	We have a lot of wind	Judiana	business owner
2022-07-11 09:20:10	Western Cape		Yes I do	Wind	What took you so long to address the power issue ? Let private power producers supply Eskom. Put up wind towers. If you cant figure it out - look at the rest of the world - they have gone wind power / etc etc long long ago.	henry	business owner
2022-07-11 09:12:10	Gauteng		Yes I do	Wind	Combination of wind and solar to take maximum advantage of resources	Jane	business owner
2022-07-11 08:35:22	Western Cape		Yes I do	Wind	I really don't know much about the workings of electricity supply but what I do know is that all the load shedding that I have experienced is affecting my life and the lives of the citizens of this beautiful country. It looks like we have put our trust in politicians that are working for their own benefit and don't care about the rest of us. I pray that God will give us leaders with integrity and accountability and that we will soon be able to continue running our businesses and lives without the threat of equipment breaking down because of load shedding. I don't know for how long I can continue to finance all the breakdowns.	Claudia	business owner
2022-07-11 08:35:14	Mpumalanga		Yes I do	Wind	SA HAS LOTS OF WIND YOU NEED LESS EMPLOYEES /NO COAL CORUPTION	N ICK	business owner
2022-07-11 08:30:11	Eastern Cape		Yes I do	Wind		Cara	business owner
2022-07-11 08:13:48	Western Cape		Yes I do	Wind		Michelle	business owner
2022-07-11 07:58:13	Gauteng		Yes I do	Wind		Beth	business owner

2022-07-11 07:52:41	Eastern Cape		Yes I do	Wind		Philip	business owner
2022-07-11 07:51:57	Eastern Cape		Yes I do	Wind	Any form of renewable energy would help solve this crisis of loadshedding and the crippling of the economy.	Cathy	business owner
2022-07-11 07:38:19	Western Cape		Yes I do	Wind	Any form of alternate energy will be welcomed right now	Brian	business owner
2022-07-11 07:26:14	KwaZulu- Natal		Yes I do	Wind	Wind or Solar. There are so many farms with Wind Turbines already operational that could produce enough electricity as an alternate to SA. I think we should also be given the choice of going off the grid completely with solar power should we so choose.	Sandra	business owner
2022-07-11 07:05:43	Gauteng		Yes I do	Wind	Clearly Eskom is incapable of supplying out me country's energy needs on its own. We need additional suppliers urgently to build up our economy and help businesses to thrive. Renewable energy is cheaper and better for the environment. And in South Africa we have ample sun and wind to generate power. We need to utilize these resources as quickly as possible to supply additional power to the grid.	John	business owner
2022-07-11 06:11:27	Western Cape		Yes I do	Wind		sias	business owner
2022-07-11 04:16:57	Western Cape		Yes I do	Wind	In the Cape we have wind. Plenty of it. Let's use it. Solar is also a great option which I would have liked to include but I am not keen on the batteries required	Harriet	business owner
2022-07-11 01:08:26	Gauteng		Yes I do	Wind	hatever form of power that will allow the country to function and people to be able to work, manufacturers, investors etc etc .. we need power desperately and soon. As long as there is no corruption and greed and power providers genuinely want to provide power for everyone's good There may be a short term, medium term and long term options so whichever form it comes in .. so ITB the amount of sunshine that the country has there really should be more solar available more readily for individuals but I understand that an effective infrastructure takes time to build and be a reliable supply	Magda	business owner
2022-07-10 23:12:30	Mpumal anga		Yes I do	Wind	The current reliance on 1 energy supplier managed by government has proven to disastrous, mixed power supply would be ideal to move SAout of this mess and anyone who has means to produce energy should be allowed to support failing grid.	Thato	business owner
2022-07-10 23:10:46	Western Cape		Yes I do	Wind		William	business owner
2022-07-10 22:42:52	Western Cape		Yes I do	Wind		Bruce	business owner
2022-07-10 22:29:53	Western Cape		Yes I do	Wind	Come on IPP's. We need more power.	Mark	business owner
2022-07-10 21:53:52	Western Cape		Yes I do	Wind		Lloyd	business owner
2022-07-10 21:20:47	Eastern Cape		Yes I do	Wind		Danie	business owner
2022-07-10 21:17:45	Western Cape		Yes I do	Wind		Pienkie	business owner
2022-07-10 21:03:47	KwaZulu- Natal		Yes I do	Wind		Prakash	business owner
2022-07-10 21:03:29	Free State		Yes I do	Wind		Johann	business owner
2022-07-10 21:03:17	Eastern Cape		Yes I do	Wind		Helen	business owner
2022-07-10 21:02:07	Western Cape		Yes I do	Wind	Ww have enough wind resoirces in our area to supply our local needs in george ans surrounding areas.en why rely on eskom ifbwe can do it ourselves in our area	herman	business owner
2022-07-10 20:44:59	KwaZulu- Natal		Yes I do	Wind	Wind and Solar	Lynn	business owner
2022-07-10 20:10:30	KwaZulu- Natal		Yes I do	Wind		Deana	business owner
2022-07-10 20:09:35	Western Cape		Yes I do	Wind	Private Energy Producers should be allowed to supply the grid, seeing as though the current system is unable to produce and corruption will keep it down.	Therese	business owner
2022-07-10 19:58:10	Western Cape		Yes I do	Wind	Between Solar, wind and Hydro we should be able to cope with the demand in the Western Cape. Nuclear is also an option Koeberg	Anna- Marie	business owner
2022-07-10 19:44:56	Western Cape		Yes I do	Wind	we need a source that is self sustaining	Gary	business owner
2022-07-10 19:22:19	Western Cape		Yes I do	Wind	I am not an expert on energy production, but it is quite obvious that eskom is not sustainable. Allow the experts to use wind or solar or whatever they deem workable	Louise	business owner
2022-07-10 19:07:02	Western Cape		Yes I do	Wind	There is no time to waste. Businesses, education, the health sector, the economy are grinding to a standstill due up the intermittent power supplies. Independent companies able to provide power from renewable sources need to be encouraged and actively supported to step in and fill a woeful gap	Glen	business owner
2022-07-10 18:55:18	Western Cape		Yes I do	Wind	The recent grants received from Europe should be used for wind and solar farms. We have much of this resource which can be harnessed fairly quickly with the lowering of cost of such any infrastructure.	Wayne	business owner

2022-07-10 18:51:35	Western Cape	Yes I do	Wind	The remote Western and Northern Cape regions are ideally situated to generate wind and solar power. Allowing independent power producers into the market would spark a flurry of economic growth in remote areas particularly, while helping to ensure a stable power grid. This could help alleviate many of the whole country's economic woes.	Thomas	business owner
2022-07-10 18:19:46	Western Cape	Yes I do	Wind	Quick to construct, low maintenance required and low operating costs.		business owner
2022-07-10 18:04:54	Western Cape	Yes I do	Wind		Lana	business owner
2022-07-10 17:32:18	KwaZulu-Natal	Yes I do	Wind	Wind and sunshine is the way to go! It's free and daily available!	Rebecca	business owner
2022-07-10 17:29:24	Western Cape	Yes I do	Wind	The use of renewable energy and the purchase of supply from wind farms at sustainable prices long overdue.	Suzette	business owner
2022-07-10 16:29:46	Western Cape	Yes I do	Wind	I think any company that has even 1 government employee as a shareholder, should be banned from submitting a tender and no government entity should be allowed to tender. Only 10% privately owned companies and the entire process of selection and allocation should be completed within 3 months. Suppliers must prove that they can come online within the shorted time frame as per an independent study. Fixed price for set up and running. No Medupi power station bullshit, still not running and the costs are so above the expected project cost. If the supplier cannot come in on time and within budget, their loss!	Ingrid	business owner
2022-07-10 16:21:58	KwaZulu-Natal	Yes I do	Wind		Sally	business owner
2022-07-10 16:21:47	Limpopo	Yes I do	Wind	Wind power can get cheaper over time	Coenraad	business owner
2022-07-10 15:57:47	Western Cape	Yes I do	Wind		Frances	business owner
2022-07-10 15:33:11	Western Cape	Yes I do	Wind	Independent power producers must immediately come forward and take over the entire power supply. Kragvoorsiening moet onmiddelik privatiseer word	Petrus	business owner
2022-07-10 15:21:29	Western Cape	Yes I do	Wind		Estelle	business owner
2022-07-10 14:39:56	Western Cape	Yes I do	Wind	Cause somehow someone need to have a fat bank account with wind turbines everything will become so much better yet there are people who is dragging our country to the ground	Bronvan	business owner
2022-07-10 14:10:26	Western Cape	Yes I do	Wind	First of all, anything electricity related needs to be privatized. Government has proven beyond any doubt whatsoever that they are incompetent to run State Owned Entities, Eskom being one of them. I selected "Wind" as it is clean energy - Solar is another option - and we have plenty of both in the Western Cape. I will not speak for the rest of the country, so it is clear that it should be driven by the Provinces, i.e. to establish themselves which one works best for them. Another issue: There is no such thing as free electricity for all, in what ever form, so we should move towards a metered system in every household. If you don't buy electricity, you don't get electricity. Those communities members who have no finances to buy electricity must prove that they insufficient income for this purpose, and must then apply for grants whereby they get a certain amount free of charge - once that is used up, sorry, you need to wait for next month. Anyone who lays his own cables or piggy-backs off other households, must be charged with theft of electricity, booked and face the appropriate punishment. We need law and order again. Repeated violations are punishable with jail sentences. Those individuals must be used to erect new pylons, maintain roads, etc., not just sit in jail and waste tax payers money, but contribute to society.	Michael	business owner
2022-07-10 13:04:48	Eastern Cape	Yes I do	Wind	The government is holding us ransom by allowing eskom to be the only energy supplier for the country. They aren't able to supply the country because of political fighting. Privatise it and they will be forced to pull up their socks. But if they are the sole providers there is no need for them to improve. They are just milking the working class dry to fill their pockets.	Chantelle	business owner

2022-07-10 10:44:27	Eastern Cape	Yes I do	Wind	Wind and solar. The advantage of wind is that it generates at night. There is usually wind somewhere in the country so spread them out. Hydro Power storage could work well with solar, ie use some of the excess solar power to pump water up to storage reservoirs during the day and run it down through turbines when electrical demand requires.	Janice	business owner

2022-07-10 10:38:37	Western Cape		Yes I do	Wind		Marinda	business owner
2022-07-10 09:28:17	Gauteng		Yes I do	Wind		Lennie	business owner
2022-07-10 09:28:15	Western Cape		Yes I do	Wind		Gayle	business owner
2022-07-10 09:20:05	KwaZulu- Natal		Yes I do	Wind	Clearly our biggest obstacle for investment is power and Eskom can't supply since 2008 so open up to private enterprise with no red tape No BBBEE and we will have sufficient power within 2 years	jonathan	business owner
2022-07-10 08:44:37	Western Cape		Yes I do	Wind	excellent small scale options can be made available for domestic & small business; more environment friendly than solar	Lee	business owner
2022-07-10 08:38:47	Western Cape		Yes I do	Wind	We have plenty wind in the Western Cape . All renewable means should be considered according to their area appropriateness	Renee	business owner
2022-07-10 08:35:29	Eastern Cape		Yes I do	Wind	South africa has good sunshine for solar and wind for turbines, this is renewable energy at our doorstep. Let the private sector get involved and it will create jobs aswell. Cut the red tape asap and get going again.	Elaine	business owner
2022-07-10 08:29:07	Western Cape		Yes I do	Wind		Amy	business owner
2022-07-10 08:19:32	Western Cape		Yes I do	Wind	Wind, solar, water turbine systems require immediate approval.	John	business owner
2022-07-10 08:12:49	Limpopo		Yes I do	Wind		Lucinda	business owner
					I believe the time for allowing independent power producers is now critical. All forms of renewable energy and even potentially nuclear energy is necessary. Cape Town manages to stay slightly protected from the current loadshedding due to Koeberg and steenbras hydro. Why are other cities not afforded the same opportunity to have power. We it government has destroyed then infrastructure it inherited and now it's time to hand over production to private producers.

2022-07-10 00:32:28	Gauteng		Yes I do	Wind		Shayne	business owner
					Allow independent power producers, and private consumers, to contribute excess electricity to the grid for financial gain. They should be credited at a reasonable rate, consistent with their value to the grid and not just a net reduction of usage. So they will be paid at a lower rate than they are charged. Coal and nuclear power are best used for base load generation, with wind, solar, and pump storage solutions lowering peak demand. It is important for capacity planning to be used to initiate the construction of new power stations in good time, and competent preventative maintenance teams should be employed to support existing infrastructure. In addition, all power generation sites and grid infrastructure should be protected by "Key Point" legislation. Sabotage of electrical infrastructure should be prevented, including by use of lethal force. Use the army to stand guard at key points. Industrial action should be permitted at least 500 meters away from a key point, but intimidation of workers should be prevented, by force, if necessary.

2022-07-09 11:47:37	Western Cape		Yes I do	Wind		Frans	business owner
2022-07-09 11:31:44	Gauteng		Yes I do	Wind	Using wind powered energy in the coastal areas where it is very windy, especially the Western Cape will free up some of the grid for the rest of the country. Hydro electricity should also be seriously considered where appropriate. Coastal areas should also be using energy generated by the sea.	Elizabeth	business owner
2022-07-09 11:14:20	Western Cape		Yes I do	Wind		Yolisa	business owner
2022-07-09 10:56:49	Western Cape		Yes I do	Wind	Why we have not fully endorsed this year's ago is beyond me.	Michelle	business owner

2022-07-09 10:41:32	Western Cape		Yes I do	Wind	1. In the long term nuclear energy is the cleanest and most cost-effective way forward. 2. In the interim power generation and supply has to be deregulated. 3. Governments role has to be reduced to one of funding, or alternatively, providing guarantees to fund IPP projects, including nuclear energy. 3. BBBEE restrictions have to be removed.	Robert	business owner
2022-07-09 10:20:41	Gauteng		Yes I do	Wind	I am all for private enterprise to enter into agreements with escom to alleviate our current electricity crises. However there must be no link to any government individuals and that certainly includes RAINBOW ENERGY AND POWER owned by PATRICE MOTSEPE. That has to be stopped as then the crises just changes hands . Government linked to that of government owned. It would be an absolute sham and we will be held hostage to major price increases.	Grant	business owner
2022-07-09 09:03:53	Northern Cape		Yes I do	Wind	It is time that the politicians let go of their ego's and understand that the damage they have incurred in neglecting Eskom or populating Eskom management with unqualified cadres, cannot be corrected without the immediate intervention by private enterprise investing in green energy projects like wind and solar. This will afford Eskom time to correct itself without the pressure of generation while in ICU.	Len	business owner
2022-07-09 08:30:54	Western Cape		Yes I do	Wind	Solar, wind, whatever renewable energy sources can be used - they get my vote.	Carolyn	business owner
2022-07-09 05:02:27	Western Cape		Yes I do	Wind	The current Government and by extention Eskom has become a Kleptocracy decaying economic progress of SA.	George	business owner
2022-07-09 00:04:12	KwaZulu- Natal		Yes I do	Wind	All renewable energy sources should be harnessed. Plus hydrogen, burning wood by products from forestry, biogas (eg methane from rubbish and animal dung), Regulation about manufacture of components in South Africa must be changed to permit 100% importation. Regulations on BBEEE removed Lack of electricity is crippling the economy and is a national emergency	Sally	business owner
2022-07-08 22:46:10	Gauteng		Yes I do	Wind		Bartholomew	business owner
2022-07-08 20:06:23	Northern Cape		Yes I do	Wind	Both solar and wind have proven to be highly successful, particularly in the Northern Cape where it supplies villages with reliable and sustainable energy, the energy that is needed urgently in other provinces as well. All solar power plants in the Northern Cape are run by private companies who deliver Eskom with the necessary power that is needed. Give these companies immediate excess to land so that the building of plants in other provinces can start. A bit depending on how big the plants need to be, installation can be done within 1 year and not 110 years with coal plants.	Renate	business owner
2022-07-08 20:00:14	Gauteng		Yes I do	Wind	wind and solar must be used alongside one another to quickly address the electricity shortfall. The government restrictions which prohibit quick actions must be removed or at best put on ice so that progress can be made to solving this crisis.	Antony	business owner
2022-07-08 19:10:19	Gauteng		Yes I do	Wind		clifford	business owner
2022-07-08 19:02:31	Gauteng		Yes I do	Wind		Edwin	business owner
2022-07-08 18:56:20	Western Cape		Yes I do	Wind	We do NOT need more unsustainable, dirty, politicked energy. We have renewable, cleaner energy such as wind & solar at our fingertips and we have the technology and industrial competence to make it work. Considering - how many people in South Africa are living without basic services such as electricity, and - the tax burden on the diminishing population who are footing the bill for "free" services & connections for many You'd think it's a no-brained to open the electricity grid up to independent power producers - we would have an excess of power, like Germany does. This is besides the glaring fact that Eskom's decades of utter mismanagement and endemic corruption are now at a point of causing the devastation of hundreds of thousands of businesses who are limping through after the effects of covid. The economic destruction caused by just the latest level of loadshedding will be felt for years to come, especially in hardest hit industries such as travel and hospitality, which are barely hanging on as it is. Remove the red tape. Open up the grid. Encourage competition to provide the basic services to all at a lower cost of living. It's the right and OBVIOUS thing to do.	S	business owner
2022-07-08 18:45:13	Western Cape		Yes I do	Wind	Let's see, I'm sitting in the dark writing this because the inverter I paid a lot of money to install to keep me powered up with wifi and lights to continue working during loadshedding, can now only run the wifi because the battery has taken so much strain with all the power cuts it's barely getting me through the 2.5 hours of loadshedding. I opt for wind power because it needs less land space to occupy and coming from a windy city it makes total sense. Solar next because, well, South Africa. Hydro last. The oceans have suffered enough at our hands. And SA has suffered enough at Eskom's hands. The economy needs Independent Power Producers.	Joanne	business owner

2022-07-08 18:23:49	KwaZulu-Natal		Yes I do	Wind		Doug	business owner
2022-07-08 17:57:38	Western Cape		Yes I do	Wind	Pity it doesn't allow for more options. Pretty much anything is worth looking at as an immediate solution to what is going on right now.	M	business owner
2022-07-08 17:54:38	KwaZulu-Natal		Yes I do	Wind	More than one source should be used. Wind....solar.....hydro...we have them all	Pete	business owner
2022-07-08 16:27:47	Eastern Cape		Yes I do	Wind	The Government is corrupt and incompetent to supply South Africans with the required electrical power and services to grow and sustain our daily living and economy. Their incompetence will destroy our country.	Hannes	business owner
2022-07-08 16:23:14	Western Cape		Yes I do	Wind	And solar. We have an abundance of wind and sun in the Western Cape. Let's be kind to the planet in the quest for power.	Paula	business owner
2022-07-08 16:18:56	Gauteng		Yes I do	Wind	Wind, once set-up is clean and free thousands of people are at home on electric OXYGEN GENERATORS 24/7 to stay alive. load shedding is disastrous for them, between life and death.	Marthinus	business owner
2022-07-08 15:50:21	Western Cape		Yes I do	Wind		Janine	business owner
2022-07-08 15:41:59	Gauteng		Yes I do	Wind		Katie	business owner
2022-07-08 15:20:51	KwaZulu-Natal		Yes I do	Wind		Howard	business owner
2022-07-08 15:20:18	Gauteng		Yes I do	Wind	We have so much open flat land available that we could easily (and at a much more affordable rate than with coal or nuclear energy) get a lot of our electricity supply from wind. It is also renewable energy. However, in the current crisis, the most readily available independent renewable energy should be considered and because of the deficit in the budgets - the cheapest option should be used.	Tanya	business owner
2022-07-08 15:18:14	Gauteng		Yes I do	Wind	We have the space. South Africa's desertification is growing, use the desert, use every sq centimeter of land that is not arable, Wind and solar. We have PLENTY of both. Fund each household to put solar panels/batteries/converters into their homes, use stored battery power at night and feed into the grid in the day. Pay when extracting power, get paid when supplying. This scheme will be to pay back the money loaned for the solar installation Removing household demand from EISHKOM allows it to focus on Industry and keeping business supplied with power so the economy can start to reboot	Margi	business owner
2022-07-08 15:07:59	Western Cape		Yes I do	Wind		Ed do ie	business owner
2022-07-08 15:05:15	Gauteng		Yes I do	Wind		Steve	business owner
2022-07-08 14:50:22	Western Cape		Yes I do	Wind	Wind and Solar energy should immediately be allowed. The problem is that ESKOM's power network is struggling to meet demand and service the old and may I add the two newest coal powered plants, where Billions of Rand have already been stolen by our corrupt government (mafia). Solar and Wind energy projects will not cost the government (tax payer) a single cent. What is our corrupt government waiting for? The only reason why our corrupt government does not open the private sector to produce clean energy is that there is nothing in it for the corrupt officials to get their greasy paws on paybacks and other corrupt methods used by these cretins running our country into the ground.	Aubrey	business owner
2022-07-08 13:45:50	Western Cape		Yes I do	Wind	Wind is available all the time - no cost to wind. At sea level wind blows all the time. To put up wind turbines are cheaper than Nuclear or solar. The footprint is less than solar. Install them in the sea.	Tom	business owner
2022-07-08 13:39:19	Western Cape		Yes I do	Wind	Wind, Nuclear and Solar are the cleanest and most reliable options	Raoul	business owner
2022-07-08 12:54:07	Gauteng		Yes I do	Wind	I think that the only solution to our electricity problem is renewable energy AND a totally new government.	Ronnie	business owner
2022-07-08 12:48:36	Western Cape		Yes I do	Wind	IPP should not be charged to supply power, they should benefit from it also. We really need them, and charging them discourages them from taking part. Renewable sources should be the number one priority. We MUST move away from fossil fuels.	Alison	business owner
2022-07-08 12:44:43	Gauteng		Yes I do	Wind	Wind, Solar and Hydro would be the best as this keeps the air clean and is sustainable and reduces carbon footprint and gas emissions and is the easiest and quickest to install (although Hydro might take a bit longer).	Charles	business owner
2022-07-08 12:36:52	Western Cape		Yes I do	Wind	As this is being used in most countries and we in South Africa especially CPT and PE have wind. Mr Ramaposa and his cousin who has 90% of the solar renewable energy sources should not be allowed to participate this loadshedding can be avoided just by proper skilled and experienced staff to maintain. We do not need energy and waste money. We need to get rid of corruption in the government and employ the correct individuals to do the job. Or hire private companies to provide maintenance services that have the expertise to do so. Loadshedding can be prevented and wasteful spending on new projects	Jonathan	business owner
2022-07-08 12:31:49	Gauteng		Yes I do	Wind	Wind energy works day and night and is very efficient.	Dawid	business owner
2022-07-08 12:06:26	Western Cape		Yes I do	Wind			business owner
2022-07-08 11:54:25	Western Cape		Yes I do	Wind	Western Cape is more prone to power generation through wind turbines. To be honest, any way of generating power (including coal) is fine as long as uninterrupted power supply is attained.	Carel	business owner

2022-07-08 11:51:23	Western Cape		Yes I do	Wind	Personally, wind-generated electricity is useful. Our current bills have made it challenging for the multitude and businesses to operate successfully due to profits going to gas and power. This country is out of control financially for all to live a comfortable life through the seasons to remain warm. The POWERS THAT BE need to curve their enthusiasm for their constant greed and nepotism..... Whatever SA is able to achieve by reducing the cost of power, SA MUST do.	Inez Joy	business owner
2022-07-08 11:47:27	Gauteng		Yes I do	Wind	Wind, Solar as one of these natural resources is available EVERYWHERE.	Jeremy	business owner
2022-07-08 11:42:06	Western Cape		Yes I do	Wind	The sooner a cheaper source of electricity is available the better. The ANC must stop dragging their heels and get moving.	Craig	business owner
2022-07-08 11:33:12	Western Cape		Yes I do	Wind	Solar and Wind Systems is the exclusive agent throughout the SADAC region for high class wind turbines from 1kW to 100kW output. The product range involves both Vertical Axis Wind turbine up to 30kW which spin like a carousel, and also includes the conventional Horizontal Axis Wind turbine with blades. Senwei wind turbines can be fitted with mag-lev bearings and the noise generated is generally less than 50 dBa. The solar potential in South Africa's southerly coastal areas is very limited due to the lower Direct Normal Irridiance available and the high humidity that general is present in these areas. The most efficient solar panels can capture and convert about 23% of sunlight into energy. Not bad, but wind turbines turn roughly 60% of captured wind into energy. Admittedly in South Africa wind is less abundant than solar except for the coastal areas and the escarpements. The red-tape (mainly municipal regulation) involved in installing small wind turbine is excessive amd should reviewed to permit small wind turbine to be more easily installed.	Stefan	business owner
2022-07-08 11:30:49	Gauteng		Yes I do	Wind	Jail everyone (with no bail option - min 50 year sentence) Charge with terrorism + attack on SA economy Everybody who is found guilty of stealing from Eskom (all offences such as sabotage or theft of any items used for generating power, such fuel, cable, spares, corruption via Eskom contracts, unions and political interference, strikes, contract or any other type of fraud, anybody who delivers coal that has been tampered with (like adding steel and other items to falsify weight) Ensure all money stolen is recovered and jail the perpetrators + their family (any syndicate members found to be directly involved with any type of crime committed which directly impacts SA economy and creates a threat to the populations well being and safety)	Dudley	business owner
2022-07-08 11:29:16	KwaZulu- Natal		Yes I do	Wind	Wind power, particularly along the Cape Coast is not dependent on sunlight, but this needs to be backed up by solar and then nuclear in the long term. IPP's can and are working much faster than the government juggernaut which is mired down in self interest.	Steffen	business owner
2022-07-08 11:27:45	Western Cape		Yes I do	Wind	Eskom clearly needs help with supplying the grid. Our entire economy is collapsing and we run the real risk of becoming a failed state. It is obvious that the only way forward is with renewable energy sources as climate change has already made itself felt. Solar and wind together.	Vivienne	business owner
2022-07-08 11:19:32	Western Cape		Yes I do	Wind	Why strangle the economy more??? WHY?? Why not empower SA's businesses to do what they are here for - grow the economy and create jobs?? This Eskom loadshedding is resulting in job losses. If the government does not allow Independent Power Producers, it is just another confirmation that they are COMMUNISTS that wants to suffocate their people to poverty in order to gain supreme power over them.	Rensche	business owner
2022-07-08 11:17:05	Western Cape		Yes I do	Wind	Whilst ALL alternative methods have merit, wind is the most sustainable and viable. All and every option should be explored, extensively researched and an alternate emergency plan put into place.	Nicola	business owner
2022-07-08 10:58:58	Mpumal anga		Yes I do	Wind		Garth	business owner
2022-07-08 10:50:35	Gauteng		Yes I do	Wind	We should have a combination of WIND and SOLAR as we have an abundance of both in this country and i am sure there will be many companies who will jump at the opportunity to participate	Lionel	business owner
2022-07-08 10:39:08	Western Cape		Yes I do	Wind	Wind and solar power is the future. We have the natural resources and should be harnessing power in more effective ways. Our economy and livelihoods should not be held ransom by a system that is collapsing around us due to negligent management by the ANC government.	michelle	business owner
2022-07-08 10:27:28	Western Cape		Yes I do	Wind	If you remove the profiteering and corruption motives from the equation, then why are the authorities that are in place, and here I will include not only the ANC but also the DA (as far as profiteering is concerned) not willing to go for a good balance of renewable's. For heavens sake the wind is free, the suns solar powers are free, Water, although relatively scarce is also free so why should we have to pay for Diesel, coal, uranium etc, except for the profit gratification of a few, whereas if we capture the resources that mother nature has given us ALL (rich and poor) for free, if used diligently will surely benefit all mankind. So come on lets have renewable electrical generation in the form of Wind, Solar and Water powered generation, we can do it we just need the political will to do what is right for mankind as a whole	Des	business owner
2022-07-08 10:27:25	Western Cape		Yes I do	Wind	Combined wind, hydro and solar with battery storage for dull days	David	business owner
2022-07-08 10:23:36	Gauteng		Yes I do	Wind	Basically anything except nuclear. We no longer have the technical expertise to use it safely and it is already a danger to the public. A combination of other sources would be best then we wont be dependent on just one supply, which can be manipulated and stolen at will.	Wendy	business owner

2022-07-08 10:13:39	Western Cape		Yes I do	Wind		Rohan	business owner
2022-07-08 10:11:08	Gauteng		Yes I do	Wind	or solar or hydro just not more coal.	jane	business owner
2022-07-08 10:08:49	Eastern Cape		Yes I do	Wind	Wind, hydro, solar are all great solutions to the crisis! Definitely needed	Laura	business owner
2022-07-08 10:08:46	Eastern Cape		Yes I do	Wind	Wind, hydro, solar are all great solutions to the crisis! Definitely needed	Laura	business owner
2022-07-08 10:07:16	Western Cape		Yes I do	Wind	Cape Town has sufficient wind to generate a substantial amount of electricity. Ultimately, we need a combination of 2-3 options to ensure continuity during unforeseen events. Wind, solar and OCGT together with a fully operational power utility. This needs to be run as a business without political interventions.	ANN	business owner
2022-07-08 10:07:00	Western Cape		Yes I do	Wind	Cape Town has sufficient wind to generate a substantial amount of electricity. Ultimately, we need a combination of 2-3 options to ensure continuity during unforeseen events. Wind, solar and OCGT together with a fully operational power utility. This needs to be run as a business without political interventions.	ANN	business owner
2022-07-08 10:06:50	Western Cape		Yes I do	Wind	Cape Town has sufficient wind to generate a substantial amount of electricity. Ultimately, we need a combination of 2-3 options to ensure continuity during unforeseen events. Wind, solar and OCGT together with a fully operational power utility. This needs to be run as a business without political interventions.	ANN	business owner
2022-07-08 09:57:29	Western Cape		Yes I do	Wind	The problems we face with the supply of power can be overcome with the free market principle of supply and demand. We have now seen that a government run power producer is not sustainable and this affects the economy and thus every single citizen. Now is the time for deregulation and immediate direct contribution from the private sector. The best solution is a blend of all available power generation resources, i.e. Wind, Solar, Coal, Hydro, and Nuclear.	Jaques	business owner
2022-07-08 09:48:42	Gauteng		Yes I do	Wind	It is more eco friendly next to solar power and it will be an uninterrupted power source.	Nina	business owner
2022-07-08 09:13:26	KwaZulu- Natal		Yes I do	Wind		Liesl	business owner
2022-07-08 08:54:31	Western Cape		Yes I do	Wind		Andre	business owner
2022-07-08 08:51:08	Gauteng		Yes I do	Wind	it cant be only one..we have to look at solar and hydro too	karin	business owner
2022-07-08 08:50:11	Gauteng		Yes I do	Wind	it cant be only one..we have to look at solar and hydro too	karin	business owner
2022-07-08 08:46:23	Western Cape		Yes I do	Wind		Bethan	business owner
2022-07-08 08:33:51	KwaZulu- Natal		Yes I do	Wind	The Quickest will be to buy Nuclear generated Electricity from Russia, while we build our renewable energy privately as quick as Possible.	Waldemar	business owner
2022-07-08 08:33:38	KwaZulu- Natal		Yes I do	Wind	The Quickest will be to buy Nuclear generated Electricity from Russia, while we build our renewable energy privately as quick as Possible.	Waldemar	business owner
2022-07-08 08:32:53	KwaZulu- Natal		Yes I do	Wind	The Quickest will be to buy Nuclear generated Electricity from Russia, while we build our renewable energy privately as quick as Possible.	Waldemar	business owner
2022-07-08 08:29:11	KwaZulu- Natal		Yes I do	Wind	We should be investing in renewable sources of energy such as solar, wind and hydro. Ways for households to generate energy that can be fed back into the grid so that energy for households is free and businesses pay to use energy excess energy. We do not need to use gas, nuclear, coal or diesel as these will destroy and pollute our environment.	Amisha	business owner
2022-07-08 08:04:53	Eastern Cape		Yes I do	Wind	I think a combination of wind and solar would be best as we have these in abundance in our country and they are kinder to the environment. There are many wind farms in our area, but I don't know if these are linked up to the national grid.	Gene	business owner
2022-07-08 07:01:45	KwaZulu- Natal		Yes I do	Wind	Actually there three : wind , solar & hydro All the above is God given natural resources . All we have to do is discover inexpensive methods to implement strategically. Furthermore SA generally experience very high temperatures right thru' the year making way for solar heating effective, wind there vast vacant dessert land that can be used to create windmills to generate electricity which currently is happening in the Johannesburg area. Hydro , we blest with water around us ...the cold Bheula current and the cold Mozambique current., using massive creative manmade dams with sea water can help build this hydro generation. And we do have river mouths leading into the sea. So yes God has created it all , all we have to do is discover not destroy. And we shall be blest .	Jenifer	business owner
2022-07-08 06:58:44	KwaZulu- Natal		Yes I do	Wind	I once worked at Eskom, when I left Majuba was being mothballed because we did not need the excess power, look at us now, what a disaster, wind and solar are the quickest solution and if this was implemented 10 years ago as it should have been instead of some corrupt ministers stopping private suppliers supplying electricity to the grid, load shedding would have been a thing off the past five years ago.	ian	business owner

2022-07-08 06:58:16	KwaZulu-Natal		Yes I do	Wind	I once worked at Eskom, when I left Majuba was being mothballed because we did not need the excess power, look at us now, what a disaster, wind and solar are the quickest solution and if this was implemented 10 years ago as it should have been instead of some corrupt ministers stopping private suppliers supplying electricity to the grid, load shedding would have been a thing off the past five years ago.	ian	business owner
2022-07-08 06:47:05	Western Cape		Yes I do	Wind	I believe the wind option would be the better option for power generating in the Western Cape which area is known to be windy. Private supply is undoubtedly the answer and should be up for immediate consideration as our government does not have the funds for such a project and the need is now!!!	Nick	business owner
2022-07-08 06:45:21	Western Cape		Yes I do	Wind	Wind is the most reliable and do not need battery backup! Solar needs battery backup at night huge space (foot print) The best is a combination of wind and solar	Hendrik du	business owner
2022-07-08 06:40:18	KwaZulu-Natal		Yes I do	Wind	Investment into renewable sources of energy is critical, the engagement with private enterprises will deliver increased productivity and ultimately at a reduced cost to the consumer, it supports the countries effort to address our part of a global climate challenge.	Colin	business owner
2022-07-08 06:40:04	KwaZulu-Natal		Yes I do	Wind	Investment into renewable sources of energy is critical, the engagement with private enterprises will deliver increased productivity and ultimately at a reduced cost to the consumer, it supports the countries effort to address our part of a global climate challenge.	Colin	business owner
2022-07-08 06:37:53	Western Cape		Yes I do	Wind	Any renewable energy is better and faster than coal or nuclear. The ANC just do not know how to steal from it yet.	Johannes Petrus	business owner
2022-07-08 06:30:55	Gauteng		Yes I do	Wind	There is many other methods to create electricity. And also many cleaner methods. Eskom is NOT the alfa and omega. And government dont own us. This monopoly dictatorship that they force on us. Must end. Also. Eskom can produce enough power- but government give our electricity AWAY to other countries. While we as South African get fucked by them	Lizette	business owner
2022-07-08 06:28:09	Western Cape		Yes I do	Wind	Wind is plentiful in the Western Cape. If the government give subsidies to solar installers people will install solar on their rooftops and this will also solve the problem in small steps.	Peter	business owner
2022-07-08 06:28:05	Western Cape		Yes I do	Wind	Wind is plentiful in the Western Cape. If the government give subsidies to solar installers people will install solar on their rooftops and this will also solve the problem in small steps.	Peter	business owner
2022-07-08 06:22:49	Eastern Cape		Yes I do	Wind	We have wonderful wind resources in some areas of SA. it is also the Cheapest and there are massive projects which are well advanced. Solar dovetails beautifully with wind certain areas. It also produces at the time solar does not. Solar is very suitable and quick to market but requires storage to be effective. reliable daytime only. Hydro will always be the best but is seriously hampered by red tape, grid connective issues etc. It is also limited in SA and every obstacle should be removed and all projects supported. With enough Wind solar and Maybe some 1000MW Hydro, we would have enough base load with our current Coal stations. Nuclear must be looked at in the long term. The pricing is however not feasible and more expensive that Solar plus Battery Storage. The new innovations in Battery technology will change this significantly, especially the new Liquid metal batteries. So for now, lets get all our Renewables going as fast as possible.	Brandon	business owner
2022-07-08 06:20:55	Western Cape		Yes I do	Wind		Michael	business owner
2022-07-08 06:16:10	Gauteng		Yes I do	Wind	We don't need all this Load shedding in business as it will lead to Job Losses	Louis	business owner
2022-07-08 06:11:51	Western Cape		Yes I do	Wind	We need to utilise our natural resources like wind, solar in order to supply the increasing need for electricity. Good planning and management with good financial ethos will ensure a success and trust in the system. Come on, let's build this Country again! Amen!	Deon	business owner
2022-07-08 05:56:56	Eastern Cape		Yes I do	Wind	Use wind , solar or hydro	Cecil	business owner
2022-07-08 03:57:02	Western Cape		Yes I do	Wind	We need to get Solar and wind up and running while we build at least 2 more Nuclear Plants	Jan	business owner
2022-07-08 01:14:50	Gauteng		Yes I do	Wind		Lilian	business owner
2022-07-07 20:30:15	Western Cape		Yes I do	Wind		Barry	business owner
2022-07-07 19:41:16	Eastern Cape		Yes I do	Wind	Please let us feed the grid with other power sources and get rid of the red tape!!	Caera	business owner
2022-08-27 10:03:21	Western Cape		Yes I do	Wind		tony	business owner
2022-08-16 14:10:34	KwaZulu-Natal		Yes I do	Wind		David	business owner

2022-08-04 08:34:56	Eastern Cape		Yes I do	Wind		RENDO	business owner
2022-08-02 18:19:46	Western Cape		Yes I do	Wind	Hidro Wind And solar!!!	Natasha	business owner
2022-08-02 09:43:57	Gauteng		Yes I do	Wind		Shayne	business owner

2022-08-01 09:02:39	Western Cape		Yes I do	Wind		Wendy	business owner
2022-08-01 07:31:52	Western Cape		Yes I do	Wind		Simon	business owner
2022-07-25 15:39:26	Eastern Cape		Yes I do	Wind	Our energy crisis is a crisis of mismanagement. If we have sufficient energy to supply other nations, albeit at a reduced rate but limit the supply to our own nation, there is a definite problem. If you cannot supply the demand, the obvious solution is to allow independent power producers to help meet the demand. The audacity to suggest charging those who have found alterior power solutions, shows that the end game is not to meet the nations demand but to take money from those who have tried to alleviate the problem.	Dione	business owner
2022-07-25 09:56:20	Gauteng		Yes I do	Wind	I am not knowledgeable on the methods .. but why does Mr Motsepe wait .. or is he looking to pick eskom up for a penny .. make a scoop and then do his thing?? 🍀	Ronnie	retired
2022-07-25 08:08:53	Eastern Cape		Yes I do	Wind	Also, solar and hydro are suitable options. In principle so too is nuclear. However, state entities should not do the construction, as there would be a possibility that corruption would cover up shoddy workmanship leading to the danger of a major disaster.	Nigel	retired
2022-07-23 13:40:54	Western Cape		Yes I do	Wind	Rhamaposa, leave power to people who can solve the issue and supply economically. You have proved your inability to our cost. Get out!.	Derrick	retired
2022-07-22 12:25:56	Gauteng		Yes I do	Wind	We do have a lot of wind in South Africa and it would be safer than Nuclear power. Hydro might not be a good option due to the shortage of water in a lot of areas. Wind may also be cheaper I would think. I am not happy that Eskom is not encouraging us to use solar power even on a small scale. I could also say Solar because Israel has been very successful in implementing solar power stations. We have a major problem with theft which would mean we would have to appoint an army to guard the solar power stations would also be corrupt. Catch 22	Anton	retired
2022-07-21 22:34:24	Eastern Cape		Yes I do	Wind	Wind & Solar are currently available as is coal, so what are we waiting for - a total collapse of the economy; country; unemployment; crime; protests; corruption +++?	Basil	retired
2022-07-21 10:53:50	Western Cape		Yes I do	Wind	Windturbines & solar power is the future. Energy should be green. Powerproduction consistent.	Willemina	retired
2022-07-21 09:20:46	Western Cape		Yes I do	Wind		Tim	retired
2022-07-20 08:45:33	Limpopo		Yes I do	Wind	Different renewable energy options should be implemented, as long as the 'green tender' is not awarded to Patrice Motsepe, who is part of the World Economic Forum.	Melitza	retired
2022-07-20 05:34:36	Western Cape		Yes I do	Wind		Mary	retired
2022-07-19 12:20:26	Western Cape		Yes I do	Wind	Or Hydro, with so many rivers wasting into the sea on a daily basis. To support Wind, I have travelled extensively from East London (via mostly coast roads) to as far as Langebaan and Lamberts bay and am surprised by the hundreds (if not thousands) wind turbines on this coast line, either locked out (on brakes) or just ticking over, for no reason at all. This wasted action, while the country is suffering such serious issues at Eskom, just seems such a extreme waste of energy, that could be put to constructive generation. This decision, besides Production & multiple Investments, would also save the fiscus R m's (no, R bil's) annually, giving the (remaining) technicians valuable time to repair and maintain our overworked coal units. Yes, change the policies to support allowing IPP to contribute. The cost difference between the (possible) increased rate from IPP against the loss of production during load shedding would be negligible (I believe).	Gerald	retired
2022-07-18 15:21:21	Western Cape		Yes I do	Wind		Matthea	retired
2022-07-18 12:04:57	Gauteng		Yes I do	Wind		Mario	retired

2022-07-18 11:52:21	Eastern Cape		Yes I do	Wind	I really think it is time that our Government started thinking about the people of SA and scraped all the red tape that it costing people their lively hood and open the electricity production market to everyone who can produce clean green power. The greed of those in power in the Government, is making life impossible for all people in this beautiful country that we call home. The Government have proved that they have no idea how to service and maintain equipment and machinery, hence our power system is in the mess it is in, instead of using all power that is available from the Wind Farms that exists around the country, The Government is holding the whole country to ransom with high tariffs and load shedding. Please open the electricity production market and save South Africa.	Lynda	retired
2022-07-18 10:47:01	Western Cape		Yes I do	Wind	Wind or Solar energy can involve many different groups of people working together in the private sector to help fix our electricity problems.	Maureen	retired
2022-07-18 09:30:19	Gauteng		Yes I do	Wind		Maryna	retired
2022-07-17 21:51:21	Western Cape		Yes I do	Wind	No power to be made and given to or sold to other neighbor countries. Power ONLY for South Africa. No government power controlling also due to the fact that this corrupt government misuse their power for self gain to get rich at the cost of the general public.	Adeline	retired
2022-07-17 20:11:28	Western Cape		Yes I do	Wind		Azetta	retired
2022-07-17 11:46:35	Western Cape		Yes I do	Wind	why must the government always be in control? electricity is a huge problem which will not go away on short term. Eskom was broken down from a well operational institution to where we are today. why is it so difficult to get independent power producers on board to help to reduce the shortage we currently have? the current situation influence the healthy and the poor. can government for once not start to create a situation where they also look after the poor and not only after themselves.	J	retired
2022-07-17 07:58:22	Western Cape		Yes I do	Wind	Eskom needs to relinquish its control. If it fails, the entire country goes down. Unfortunately though, the extent of deterioration and damage is probably extensive and would be expensive for any body taking over the running of the national power supply. It does however need to be privatised and invigilated somehow. The way things stand now, the entire country and its businesses and livelihoods are in the balance.	penny	retired
2022-07-17 07:06:54	North West		Yes I do	Wind	The ANC should stop taking our country down and allow independent power producers to give us power seeing they won't privatise ESKOM!	Vyvyan	retired
2022-07-16 21:16:40	Western Cape		Yes I do	Wind	South Africa has got a wealth of potential power sources: Wind mills Solar panels Sea waves Why not! No further coal/diesel/oil should be considered	Irma	retired
2022-07-16 16:41:54	Limpopo		Yes I do	Wind	Unfortunately you let me choose only one way of renewable power as it must be a combination of renewable sources. RSA has plenty of sunshine thus solar in daytime is a YES, followed by wind, This could be followed by hydro from the Cahora Basa plant (get the capability to full capacity) and lastly invest in modern nuclear plants..	Thinus	retired
2022-07-16 13:55:42	Gauteng		Yes I do	Wind	it is better than wgat we have now	Andre	retired

2022-07-12 19:29:53	Western Cape		Yes I do	Wind		Jacques	retired
2022-07-12 19:00:00	Western Cape		Yes I do	Wind	The delivery of wind power is quick, with component manufacturers geared up and already functioning. Building wind turbines is a relatively quick and simple process. Land is available all along our coastlines, although some object to their "view being spoiled" which is a selfish view when the country at large is the beneficiary of a single spoilt view. The South African Coast line has plenty of wind. Particularly the South West, South East, and Southern coast lines. The West Coast in particular is wholly suitable for power generation through wind turbines. Only the months of May and June show average windspeeds of below 5 meters per second. The rest of the year is windy, with November through to February producing wind-speeds of between 7m/s and 12m/s. Storage of power between periods of high demand and high generation capacity remains an issue, but the use of purpose built storage dams with hydro-electric facilities in the Western Cape mountain ranges, in the Drakensberg, and elsewhere can be the solution for the storage of excess wind and solar power. Pump the dams full during high generation/low demand periods, and run the water back down through the hydro-electric generators when demand is high ad generation capacity is low. There many other potential solutions that will drag us away from fossil fuels and 40+ year old power stations.	Bill	retired
2022-07-12 18:39:52	Western Cape		Yes I do	Wind		Shirley	retired
2022-07-12 18:03:41	Eastern Cape		Yes I do	Wind	the matter is very urgent.	GERALD	retired
2022-07-12 17:27:39	Western Cape		Yes I do	Wind	A combination of abundant wind and solar energy could help rescue the economy, at least augmenting the grid during daylight hours. Much of the infrastructure is already in place, and only needs the red tape obstacles to be removed in order to increase its contribution to the grid. For the sake of the health of both people and planet, phase out our dependence on coal asap. Re-skill those employed in the coal sector to have a meaningful role in the green economy.	Elizabeth	retired
2022-07-12 17:26:38	Western Cape		Yes I do	Wind		Magdalena	retired
2022-07-12 17:21:56	Gauteng		Yes I do	Wind		Linda	retired

2022-07-12 16:26:27	Western Cape		Yes I do	Wind	It's a no brainer for the brainless. How dare the ANC put the country in this position. How dare they they sit on their tin thrones and allow the country to self destruct, imposing more and more red tape to suit their needs. Wake up ANC, if you don't change your attitude soon, the people will change it for you. Enough is enough!	Linda	retired
2022-07-12 16:09:13	Western Cape		Yes I do	Wind	I would like to see us using wind and solar. There are so many wind farms<what is happening to the power generated ? it seems to that there are so many options, but we get stuck with Eskom, and load shedding is destroying the country, let alone the inconvenience caused, as well as damage to appliances.	Alton Phillip	retired
2022-07-12 15:49:28	Gauteng		Yes I do	Wind	I believe wind and solar generated electricity would be best for our country	Pat	retired
2022-07-12 13:38:16	Western Cape		Yes I do	Wind		leanette	retired
2022-07-12 13:09:45	KwaZulu- Natal		Yes I do	Wind		Margot	retired
2022-07-12 12:43:37	Mpumal anga		Yes I do	Wind	Coal can still be used but must be phased out gradually as more wind and solar energy are phased in. Eskom must manage this process and not private energy suppliers that are eagerly waiting to rob the SA public. Our own President was in charge of Eskom and he failed to get Eskom out of its spiralling fall. Fact is, every person in this country who have access to Eskom supplied electricity and water must pay their fare share so that these entities can end their state of bankruptcy.	Marius	retired
2022-07-12 12:37:33	Western Cape		Yes I do	Wind		Annette	retired
2022-07-12 11:54:15	Western Cape		Yes I do	Wind	There is abundant wind and sunshine in the Western Cape which would give us much needed electricity.	Karen	retired
2022-07-12 11:09:05	Eastern Cape		Yes I do	Wind	What is the use , as long as we are governed by the ANC and corrupt people we cannot win.	Marthinus	retired
2022-07-12 10:33:00	Eastern Cape		Yes I do	Wind		Hennie	retired
2022-07-12 10:32:35	Western Cape		Yes I do	Wind	It is quick to set up and there are enough wind open spaces to do so	Willie.	retired
2022-07-12 10:27:05	Western Cape		Yes I do	Wind	Wind power is well established globally and would be a reliable source of power in the Western Cape.	Mike	retired
2022-07-12 10:03:33	Western Cape		Yes I do	Wind	It makes so much sense to allow independent power producers to prop up the national grid. Why there is so much "gerry mandering " about this really confuses me. It is almost like someone in Govt has an ulterior motive for stalling as long as possible.	IAN	retired
2022-07-12 09:58:53	Mpumal anga		Yes I do	Wind		Felicity	retired
2022-07-12 09:51:58	Western Cape		Yes I do	Wind	Solar and wind. I'm currently in Spain and they use mostly wind,partially solar power. Also desalination plants for water. Works like a charm and no corruption	Elizabeth	retired

2022-07-11 21:54:47	Western Cape		Yes I do	Wind		Leon	retired
2022-07-11 21:23:43	Eastern Cape		Yes I do	Wind		Ela	retired
2022-07-11 20:56:42	Western Cape		Yes I do	Wind	Obviously a whole mixture of different methods of production, depending on the specialist field of the individual IPP, would make the most sense. Let potential producers who can offer, inform NERSA or other bodies of their intentions wrt production. then a sensible spectrum can be constructed from out of these.	Greig	retired
2022-07-11 19:25:52	KwaZulu- Natal		Yes I do	Wind		Erik	retired

2022-07-11 19:25:20	Western Cape		Yes I do	Wind	South Africa has already built a number of Wind farms to cleanly generate electricity, so building on that experience should not be too difficult to increase the production capacity in a short time. I also believe there should not be just one main source of electricity generation looked at. Solar is another very strong contender for clean, reliable, "low labour" renewable energy. the technology for that kind of power generation is also well proven in many countries, and the generation of power can be from small units to extremely large units, this can enable individuals or small businesses, right to huge corporations to invest in their own interruption free power generation and supply systems.	Kobus	retired
2022-07-11 19:20:06	Western Cape		Yes I do	Wind	Anything better than Eskom	Ena	retired
2022-07-11 19:06:26	Eastern Cape		Yes I do	Wind	There is an abundance of wind at the coast. All private suppliers of wind produced power along our coastline should be allowed to supply coastal cities and towns immediately. All red tape should be reduced to an absolute minimum immediately. This is simply a no brainer.	Edwin	retired
2022-07-11 18:40:08	Western Cape		Yes I do	Wind	The time has come and is in fact long overdue to turn to the private sector for assistance. The most cost effective method (solar, wind or nuclear) should be selected to assist Eskom for supplying power within the national grid. The small amount of additional power supplied by Cape Town city to its citizens and local businesses has had substantial benefits in reducing load shedding problems. National government should do the same for the country.	Eugene	retired
2022-07-11 18:38:26	Western Cape		Yes I do	Wind	wind en solar. Dit is gratis en maklik bekombaar	Louise	retired
2022-07-11 18:14:09	Western Cape		Yes I do	Wind	This electricity crisis is destroying S.S. economy and jobs. It must be resolved without further delay. Competition is always good.	Louise	retired
2022-07-11 17:40:39	Western Cape		Yes I do	Wind	Any and All renewable and sustainable options should be undertaken with immediate effect by anyone who can supply it. As Power (Electricity) is aligned with our modern Life to sustain it, the Right to Electricity is inherently a given to All. No Government or claimed "authority" has exclusive right to harness Nature, Life Itself and provide it at their discretion to others. All such action is what they themselves term "Criminal". So permission does not even need to be asked nor granted, as it is a Natural Given. But additionally, market competition provides a healthy environment which minimises corruption which happens through the monopoly of Greed. As the more competing suppliers there are, the less opportunity there is for exorbitant and exacerbated prices. Only Criminals like to keep systems going where they are in monopoly. All resistance to such Freedom of the People is Unconstitutional, and therefore Unlawful and Invalid in the first place.	Eugene	retired
2022-07-11 17:36:42	Western Cape		Yes I do	Wind	Coal power generation is a serious danger to the environment and human health. Nuclear is too expensive. Green energy is the future: wind, solar and ocean waves. If obstacles are removed and green energy generation privatised loadshedding can disappear soon. We are fed up with the dragging of feet by the minister and other key decision makers. The longer load shedding is allowed to continue, the more votes the governing party will be losing.	Jacobus	retired
2022-07-11 17:09:25	Eastern Cape		Yes I do	Wind	Wind and solar power are the most realistic solutions given the relatively low costs of installing and running the systems, and the very low carbon imprints. But the addition of electricity supply via IPPs is wasted if the electricity has to flow through gateways imposed by incompetent and corrupt municipal administrations such as Makana Muni. The Makana Muni record of non-payment to vendors so it can divert revenues to its own employees is so lengthy and demonstrable that there is every reason to remove Makana Muni from any control over the flow of Eskom energy to private residences and businesses. The fact that an incompetent and corrupt city metro municipality can insert itself as gatekeeper between producer and consumer is intolerable. No municipal administration should be allowed to control the flow of energy which it is no role in producing.	Douglas	retired
2022-07-11 17:04:49	KwaZulu- Natal		Yes I do	Wind	I was 9nly allowed 1 selection. Any renewable power source is good,. Choose from wind, hydro, solar geothermal, etc. Let's start taking electricity seriously. Let's bring down the cost of supply.	George	retired
2022-07-11 16:52:06	KwaZulu- Natal		Yes I do	Wind	We had enough of loadshedding our money are good enough but we don't get what we pay for.... And even the water is not up to standard... Enough is enough... Anc must fall	Meisie	retired
2022-07-11 15:53:29	Western Cape		Yes I do	Wind	Solar or Wind, with tenders monitored vigilantly.	Patrick	retired
2022-07-11 15:48:39	Western Cape		Yes I do	Wind	My opinie dit bly net by praat en geen oplossing eskom is 'n melkkoei vir die korruptes	Louise	retired
2022-07-11 15:47:19	Gauteng		Yes I do	Wind		Chris	retired
2022-07-11 15:46:29	Western Cape		Yes I do	Wind	It is clear that Eskom is unable to supply power consistently to South Africa. The ramifications are enormous for the economy. It make sound economic sense for independent suppliers of energy to push capacity into the grid, and the government would be wise to facilitate this by scrapping the policy red tape, not only to the big players, but also to domestic power supply - South Africa is the only country in the world that taxes domestic installations of solar power instead of encouraging it and providing tax incentives to those who do so.	Elise	retired
2022-07-11 15:45:03	Western Cape		Yes I do	Wind	Wind turbines	SUSAN	retired

2022-07-11 15:14:40	Western Cape		Yes I do	Wind		Janice	retired
2022-07-11 15:04:02	Western Cape		Yes I do	Wind	Wind is immediately available. Also solar	Mariette	retired
2022-07-11 15:01:15	Western Cape		Yes I do	Wind	Many of the Western Cape areas are windy. Coastal areas generally have a lot of wind. Looking at countries where wind has been harnessed to generate electricity why has South Africa lagged so far behind? Solar energy is so obvious in a country with a climate which leads to enough sunshine generating power to be able to sell it internationally.	Rene	retired
2022-07-11 14:55:05	Western Cape		Yes I do	Wind	Wind and solar energy are available for free and without procurement red tape. Use these resources to generate electricity and open up the current suppliers for supplying the grid with electricity, whilst urging Eskom to extinguish the generation backlogs, infrastructure theft, electricity theft and corruption. One can never manage free electricity to the poor, if it is not measured or quantified.	Neels	retired
2022-07-11 14:50:50	Eastern Cape		Yes I do	Wind		Elizabeth M	retired
2022-07-11 14:50:25	Western Cape		Yes I do	Wind	All of the clean renewables - wind, solar and hydro - should be utilised ASAP. By hydro, I refer to harnessing the power of the ocean, as well as rivers, as the Ocean generated power technology is starting to mature. Advocates for coal, gas and nuclear are living in a mind-space that refuses to see the obvious destruction of nature going on all around them.	Sean	retired
2022-07-11 14:49:15	Eastern Cape		Yes I do	Wind	Move fast to change, the lack of electricity is destroying businesses our people need to be employed.	Sandra	retired
2022-07-11 14:43:53	Western Cape		Yes I do	Wind		Adrien	retired
2022-07-11 14:38:43	Western Cape		Yes I do	Wind	Nuclear is the best solution in the long term. Wind and Solar is the best option for the short term solution.	Greg	retired
2022-07-11 14:31:37	Western Cape		Yes I do	Wind	If we would have had wind power installed in from 2017 onwards we would not have had loadshedding. But then the wind power people don't give kickbacks.	Gerhard	retired

2022-07-11 13:36:55	Western Cape		Yes I do	Wind	There is adequate wind in the Western Cape . Gas can be as a back up in the event that wind is very weak	Sieg	retired
2022-07-11 13:26:36	Western Cape		Yes I do	Wind	My onvermydelike keuse was wind, omdat ek teen die kus woon, maar ek sou eerder 'n kombinasie van wind- en sonkrag kies as 'n instrument vir die onmiddellike verligting van die huidige krisis. Met ons lang kuslyn is die tap van golf-energie natuurlik 'n opwindende moonlikheid, hoewel 'n meer langer termyn oplossing. Op die lange duur sal 'n uitbreiding van hidrokrage waar die moontlikhede bestaan, selfs in ons buurlande, 'n meer volhoubare opsie wees. Afgesien van transmissielyn se visuele besoedeling, is dit minder steurend as windlaaiers. En natuurlik moet kragopwekking geprivatiseer word en die wetgewing moet aangepas word om dit sinvol en produktief te reguleer. Ons het te veel sotlike wette wat besigheid doen in SA belemmer en onnodig duur maak. Die minister kan sommer begin om 'n klomp van hierdie maatreëls te skrap en waar nodig maatreëls en prosesse in plek stel om sake doen te vergemaklik en te bespoedig! Dit is net swak regerings en burokrate met outoritêre neigings wat aanhou wette maak wat nie bydra tot 'n land se welsyn en vooruitgang nie.	Daniël Willem	retired
2022-07-11 13:22:14	Gauteng		Yes I do	Wind	The continuous price escalations for non-services, the adverse effects on appliances and food is costing us R1000's, while empty promises are being made in an attempt to appease the consumer. This is no longer acceptable and a change is required	Marion	retired
2022-07-11 13:18:45	Western Cape		Yes I do	Wind	Adding IPP to the grid would help the current shortages and allow the restoration process to proceed	Lylanie	retired

2022-07-11 09:20:58	Free State	Yes I do	Wind	We have an abundance of wind and sun. We need to use it.	Robin	retired
2022-07-11 09:18:09	Gauteng	Yes I do	Wind	Ek voel dat alle moontlike maniere in gespan moet word in oorleg met kundiges om hierdie probleem optelos. Bring die kundiges terug om Escom se probleme optelos en op te gradeer met die volle ondersteuning van die regering.	Jannie	retired
2022-07-11 09:16:41	Western Cape	Yes I do	Wind	Allow existing IDP's to supply power immediately . Fir future develop renewable power such as windows & Solar	Dr Matthew Derick	retired
2022-07-11 08:56:55	KwaZulu-Natal	Yes I do	Wind	I believe that there should NOT be only one (1) solution. Wind, Solar, and any other means whereby individual entities can - LEGALLY - produce, make, engineer power, electricity ; and are able to move it around, should be, MUST be empowered to do so .	Gareth	retired
2022-07-11 08:55:04	Gauteng	Yes I do	Wind	The wind method is one of the safest methods for our invironment. No polluted air. We need to get Eskom off our grids as it is milking the public and a huge depleater of tax payer's money.	Charmaine	retired
2022-07-11 08:55:04	Gauteng	Yes I do	Wind	The wind method is one of the safest methods for our invironment. No polluted air. We need to get Eskom off our grids as it is milking the public and a huge depleater of tax payer's money.	Charmaine	retired
2022-07-11 08:55:02	Gauteng	Yes I do	Wind	The wind method is one of the safest methods for our invironment. No polluted air. We need to get Eskom off our grids as it is milking the public and a huge depleater of tax payer's money.	Charmaine	retired
2022-07-11 08:55:01	Gauteng	Yes I do	Wind	The wind method is one of the safest methods for our invironment. No polluted air. We need to get Eskom off our grids as it is milking the public and a huge depleater of tax payer's money.	Charmaine	retired
2022-07-11 08:50:56	Gauteng	Yes I do	Wind	Long overdue. Wind, hydro any clean method.	Kathy	retired
2022-07-11 08:42:58	Eastern Cape	Yes I do	Wind		Nick	retired
2022-07-11 08:39:28	Western Cape	Yes I do	Wind		Charlotte	retired
2022-07-11 08:26:55	Eastern Cape	Yes I do	Wind		Graeme	retired
2022-07-11 08:21:15	Western Cape	Yes I do	Wind	Wind and sun can be used to great benefit to our electricity shortage i n a short period of time. Implement as quick as possible.	Deville	retired
2022-07-11 08:16:29	Western Cape	Yes I do	Wind	Why aren't we having different methods of electricity generation already. There are so many different methods, why not use the brains we do have in SA to come up with the best & most practical ways to get our country out of the mess it is in now.	Cherrill	retired
2022-07-11 08:13:19	KwaZulu-Natal	Yes I do	Wind	Yes it is about time these necessities are being left im private hands to handle. We are sick of this Government who has fooled every single one of this country's citizens since 1994. We must also not stop before every single one has been jailed fir bringing us down to the state we are in now. It must end here and now and soon.	Susann	retired
2022-07-11 08:13:03	Mpumalanga	Yes I do	Wind	Their is enough wind on the Highfield to generate electricity. The pollution cause by old power stations are really bad for all residents in the region. The fact that there are terrorist operating to sabotage our country we need to get something stable to allow businesses to create jobs again.Hopefully this will stop theft and cables belonging to Eskom.Also all scrapmetal dealers should be closed down.If they buy copper or rail tracks from a person they should be fine a heavy fine and never open again	George	retired
2022-07-11 08:12:16	Western Cape	Yes I do	Wind		Melodie	retired
2022-07-11 08:09:34	Gauteng	Yes I do	Wind	This decision needs to be taken in real time, not african time.	Mike	retired
2022-07-11 08:08:46	Eastern Cape	Yes I do	Wind	In the Eastern Cape coastal area, we have numerous wind turbine farms. The electricity generated by them can be sold to the local municipalities for additional power into the grid. Every region will have different alternatives. Water rich areas hydro electricity is an option, but not an immediate plan. Solar farms in Karoo and Northern Cape can be established. Escom is clearly failing to maintain and supply power to the country and the economy suffers. No investor will consider SA if we can't even supply the basics.	Martha	retired
2022-07-11 08:05:13	KwaZulu-Natal	Yes I do	Wind		Sheila	retired

2022-07-11 08:01:40	Western Cape		Yes I do	Wind	We live in province that truly gets so much wind as we have mountains and seas Eskom is keeping us hostage and makes us despondent we definitely need other sources of energy	Gerterude	retired
2022-07-11 07:56:06	Western Cape		Yes I do	Wind	While I have selected wind energy I need to point out that I am not sufficiently qualified to say which energy is best for RSA. However I would like to state strongly that it must be really sustainable - so - wind, hydro or solar!! Thank you! Kindly note I am overseas at present but will be back in RSA 15th August 2022. My cell no here is +6140 5887913 in RSA 0729130170	Joanna	retired
2022-07-11 07:48:37	Western Cape		Yes I do	Wind	Government needs to immediately allow IPP's to be able to add to the electricity grid. Stop all the corruption in all government departments and use the money where it should be used, i.e. electricity. The Ministers involved need to immediately remove all the red tape. As a long term solution smaller coal plants could be constructed to supply energy in the areas where coal is mined. Smaller units with new technology will not be as damaging to the environment. Immediate action is required by government to sort out this crisis.	John	retired
2022-07-11 07:48:37	Western Cape		Yes I do	Wind	Government needs to immediately allow IPP's to be able to add to the electricity grid. Stop all the corruption in all government departments and use the money where it should be used, i.e. electricity. The Ministers involved need to immediately remove all the red tape. As a long term solution smaller coal plants could be constructed to supply energy in the areas where coal is mined. Smaller units with new technology will not be as damaging to the environment. Immediate action is required by government to sort out this crisis.	John	retired
2022-07-11 07:48:01	Western Cape		Yes I do	Wind	I have no evidence to support this selection but in the Cape we have wind and sun so maybe solar. My concern is the additional cost, having already paid for the coal at Eskom to all the thieving criminals and this appears to continue with the collaboration of the authorities. Criminals still appear to run Eskom and continue to supply defective coal. While this situation continues the power stations will never function effectively.	Keith	retired
2022-07-11 07:44:25	Gauteng		Yes I do	Wind	As the electricity produced from coal appears to be inadequate for the demand, and lots of people (including myself) cannot afford or install the solar generated electricity it would be wise, in my opinion to ADD the wind generated module. ALL POSSIBLE SUPPLIERS SHOULD BE GRANTED PERMISSION IMMEDIATELY TO CONTRIBUTE AND TAKE PART IN THE GENERATION OF ELECTRICITY AS SOON AS POSSIBLE.	Monique	retired
2022-07-11 07:42:18	Gauteng		Yes I do	Wind	We have failed to maintain and develop our energy strategy which has now left a struggling population after COVID with little hope for the future The government needs to shoulder responsibility get out of their ivory towers and give the nation their plan if action	Cathy	retired
2022-07-11 07:40:40	Eastern Cape		Yes I do	Wind		Norman	retired
2022-07-11 07:38:47	Western Cape		Yes I do	Wind		Jill	retired
2022-07-11 07:34:43	Gauteng		Yes I do	Wind	To make use of nature is logic, so, wind, solar and even hydro (water of overflowing dams) schemes is SA's way forward. Only issue is that the current hydro schemes at the dams that do have a hydro system is not fully functional and not maintained by current government.	Deon	retired
2022-07-11 07:18:23	KwaZulu- Natal		Yes I do	Wind	It is critically important to our nation to use the methods that are quickest in sourcing power, renewable and safe so as not to end up like Sri Lanka	Mic	retired
2022-07-11 07:17:43	KwaZulu- Natal		Yes I do	Wind	In my opinion we require an urgent result. Wind turbines in areas that are windy like Port Elizabeth these turbines could be installed rather rapidly and improve the supply of electricity.	Charles	retired
2022-07-11 06:56:50	Gauteng		Yes I do	Wind		Tania	retired
2022-07-11 06:52:09	KwaZulu- Natal		Yes I do	Wind	Wind and solar power could be implemented and not negatively effect the environment. And it could be done relatively quickly. Beyond that more hydro schemes could also be implemented if privately run could in my opinion be a good solution with no carbon foot print	Anthony	retired
2022-07-11 06:48:32	Gauteng		Yes I do	Wind	Renewable energy sources are readily available in selected regions. The energy sources supplied by nature should be harnessed for electricity generation and distribution. Allow private companies to supply clean renewable energy.	Barry	retired
2022-07-11 06:27:30	Western Cape		Yes I do	Wind	We should be using a combination of coal and renewables with the objective of increasing renewable energy at a faster pace.	Johan	retired
2022-07-11 05:58:49	Western Cape		Yes I do	Wind	Wind energy will be the quickest way to make an impact on the energy crisis.	Brian	retired
2022-07-11 05:47:35	Western Cape		Yes I do	Wind		Marja	retired
2022-07-11 05:25:12	Eastern Cape		Yes I do	Wind		Matts	retired
2022-07-11 04:42:17	KwaZulu- Natal		Yes I do	Wind	I will say to go to wind or solar that can work because we are paying a lot of money for it. The electricity just go up and up and the CEO is getting paid R7,000,000,000,00 a year but Eskom is falling apart. How can he get that type of money for a salary and the worker +- R61000,00 a month it is radicalise	Ferdie	retired
2022-07-11 04:22:48	Gauteng		Yes I do	Wind	Wind het geen nuwe effekte wat skade aan mens dier en omgewing kan veroorsaak.	Lina	retired

2022-07-11 01:48:57	Gauteng		Yes I do	Wind		mario	retired
2022-07-11 00:34:57	Eastern Cape		Yes I do	Wind	If Eskom doesn't go public we are in big trouble. Long term nuclear would probably be best provided we had competent managers but the next best is wind. The average citizen cannot afford solar.	Wendy	retired
2022-07-10 23:29:46	Western Cape		Yes I do	Wind	I select due to my knowledge i hv under the current gymnt thy are not in a position to bring us on the best needs electricity because thy fight fr power my motivation is we hv a good system fr solar because so far i can remember the DA ruling party is busy with Solar but the anc must learned to ask fr support if thy cannot manage to served the country	Mary	retired

2022-07-10 17:38:38	Mpumal anga		Yes I do	Wind	Once installed the cost will be minimal - God gave the wind for free to all of us	Piet	retired
2022-07-10 17:19:24	Eastern Cape		Yes I do	Wind		Phillip	retired
2022-07-10 17:15:43	Western Cape		Yes I do	Wind	Wind and SOLAR are the way to go	Jaap	retired
2022-07-10 17:05:19	Western Cape		Yes I do	Wind	Free once ercted, except for maintenance. We have the space and productive farming can still be done under the wind turbines. Realatvely cheap and quick to construct	Andre	retired
2022-07-10 16:59:46	Eastern Cape		Yes I do	Wind		Alfred	retired
2022-07-10 16:58:57	Gauteng		Yes I do	Wind		Clive	retired
2022-07-10 16:42:42	Gauteng		Yes I do	Wind	Urgently connect already constructed wind/solar systems to the grid.	Phil	retired
2022-07-10 16:42:39	KwaZulu- Natal		Yes I do	Wind	There are many ways to generate electricity without polluting the environment. Examples : wind, garbage, hydro and solar. Eskom has failed us miserably since our democracy started and the big question is how did a profitable, efficient entity collapse. Factors such as corruption, incompetent employees, theft the list goes on could be sighted as some of the reasons. It's time South African citizens got value for their money.	Rachel	retired
2022-07-10 16:37:07	North West		Yes I do	Wind	In terms of generating electricity, South Africa can look to countries such as Norway, who uses garbage to generate electricity, as well as other renewable sources such as hydro, solar and wind, that is also good for our environment!	Christina	retired
2022-07-10 16:36:47	Western Cape		Yes I do	Wind	I support wind, solar and hydro for the electricity production. What I can't understand is the government dragging its feet when the economy is grinding to a halt. Any option at this time to keep the economy turning, supplying jobs and thus keeping millions of people starving is an option right now. WAKE UP NOW WHAT IS THE NEXT CATASTROPHE THAT HAS TO HAPPEN BEFORE WE DO SOMETHING NOW!!!!!!	Donald Albert	retired
2022-07-10 16:27:31	Western Cape		Yes I do	Wind	The one thing we are not short of in the WC is wind. This could be followed/ supported by solar and hydro in numerous other regions.	Richard	retired
2022-07-10 16:27:06	Western Cape		Yes I do	Wind		Karen	retired
2022-07-10 16:26:38	Eastern Cape		Yes I do	Wind		Lynnette	retired
2022-07-10 16:19:19	Western Cape		Yes I do	Wind	We need to make a change quickly as SA is losing so much money because of load shedding. Small businesses are closing down everyday and people are struggling to survive because of Eskom and it's unacceptable. Overseas investors will think twice before investing in SA. There is much more to this load shedding than meets the eye.	Cheryl	retired
2022-07-10 16:02:16	Western Cape		Yes I do	Wind	I firmly believe that wind and solar should be used as our prime source of power. SA has plenty of both. An independents should be able to start supplying right now!!	Suzette	retired
2022-07-10 15:59:44	Gauteng		Yes I do	Wind		Anne- Marie	retired
2022-07-10 15:53:28	Western Cape		Yes I do	Wind	Please allow independent energy generation. Our country is dying...	Errol	retired
2022-07-10 15:53:09	Western Cape		Yes I do	Wind		Petro	retired
2022-07-10 15:28:19	Western Cape		Yes I do	Wind	Solar and wind, of which SA has ample. Pebbled nuclear of which there was talks long ago but was unfortunately scapped also looked like a good option.	Marti	retired
2022-07-10 14:49:13	KwaZulu- Natal		Yes I do	Wind	Scrap the red tape for independent powers producers to start supplying power to the grid before this country colapses into total disfunctionality.	Graham	retired
2022-07-10 14:29:56	Gauteng		Yes I do	Wind	Current government has demonstred that it is incapable of managing electricity supply, as it has done with all of the infractrure in SA. This monopoly must end!	Hilton	retired

2022-07-10 14:23:06	Western Cape		Yes I do	Wind	There is already quite a number of wind turbines erected along the coastal areas. What's happening to the power its presently generating. Surely more research could be done to establish more areas to erect these turbines. The Netherlands even erects theirs in the ocean,the same in New Zealand where they don't have other alternatives. However with our country already on the verge of collapse and totally bankrupt my personnel opinion is no matter what best alternative we propose to rescue the electricity fiasco nothing will be done. We are just another failing African state.	Henry	retired
2022-07-10 14:19:48	Gauteng		Yes I do	Wind		Ronel	retired
2022-07-10 14:13:52	Gauteng		Yes I do	Wind	Any method should be used: wind, solar, gas, coal , nuclear, and others; as long as it lifts the irritating load shedding SA is held hostage with.	Lydia	retired
2022-07-10 13:45:34	Eastern Cape		Yes I do	Wind	As we procrastinate on power issues , wind turbines are turning away generating possible power that no one is using. possibly hundreds of turbines!. Come on government- do something! And what of the Hectares of solar farms also not fully utilized.	Phil	retired
2022-07-10 13:32:15	Western Cape		Yes I do	Wind		Hans	retired
2022-07-10 13:31:54	Gauteng		Yes I do	Wind	I believe there is massive opportunity to use wind generated power in the Northern Cape and areas like that where we are selling that power to Botswana and anybody else who wishes to buy it from us and of course solar energy would work just as well.	Avryl	retired
2022-07-10 13:23:30	Western Cape		Yes I do	Wind	In Montagu we have so much wind caused mainly from the mountains, clean free power can be generated hete	Sharon	retired
2022-07-10 13:14:59	Western Cape		Yes I do	Wind		Andre	retired
2022-07-10 13:00:53	Mpumal anga		Yes I do	Wind		Jonathan	retired
2022-07-10 12:52:03	Western Cape		Yes I do	Wind	Remove red tape and privatise all energy resources to South African suppliers. Government should not partispate in these transactions.	Stephen	retired
2022-07-10 12:45:05	Western Cape		Yes I do	Wind	Obviously WIND in Western Cape is ideal plus Hydro Power Leave coal alone. Pretoria certainly not	Robbie	retired
2022-07-10 12:39:33	Western Cape		Yes I do	Wind		Maria	retired
2022-07-10 12:35:17	Western Cape		Yes I do	Wind	In our little corner of the country, wind is a great back up system from the South-easters and North-westers which are fairly regular visitors to us.	Avril	retired
2022-07-10 12:30:55	Western Cape		Yes I do	Wind	Your questionnaire only allows one choice. My answer really would be any method that can supply power as soon as possible. My leaning would be towards environmentally friendly methods but then beggars can't be choosers	Everard	retired
2022-07-10 12:26:59	KwaZulu- Natal		Yes I do	Wind	we need wind ,solar &hydro	ron	retired
2022-07-10 12:20:08	Western Cape		Yes I do	Wind	SA needs a common sense decision to fast track wind and solar power generation installation within 2 years. And to allow for households to sell excess energy generated at their homes to the Eskom grid by end of 2022.	Sullivan	retired
2022-07-10 12:03:48	Gauteng		Yes I do	Wind	At this stage any thing are better than what we have. And the solution for better electricity is available. So take the opportunity. Regtig keelvol . vir kragonderbrekings	Mariet	retired
2022-07-10 12:03:46	Gauteng		Yes I do	Wind	Wind or solar	William	retired
2022-07-10 12:00:08	Gauteng		Yes I do	Wind	Either wind or solar , the wind being more practical .	William	retired
2022-07-10 11:58:11	Western Cape		Yes I do	Wind	I believe Hydro, Water and Solar are the solution. We have the sea, plenty of wind and sunshine in South Africa. I believe it's time for other / private power providers to be allowed to supply electricity for South Africa. Eskom is a total failure and our government keeps supporting them. They are not just draining us of electricity, but of our hard earned money as well. Our appliances are breaking and our safety and security is being compromised. It's time for new power providers in South Africa, in fact it's long overdue !!!!!!!	Pauline	retired
2022-07-10 11:48:02	Eastern Cape		Yes I do	Wind		Johann	retired
2022-07-10 11:45:31	Western Cape		Yes I do	Wind	We live in the Western Cape which is known for it's hectic wind. I am for cleaner air and to take the pressure off the grid. We are also surrounded by water. Why not use hydro and wind. Our economy cannot take anymore loadshedding.	Dulecia	retired
2022-07-10 11:42:55	Western Cape		Yes I do	Wind	We need other reliable sources of power supply in South Africa in order for the economy to flourish, to create jobs and to rebuild our beautiful nation. It's very simple, allow the experts to feed into the building of our nation. Bring in other providers of electricity.	Karen	retired
2022-07-10 11:42:49	Western Cape		Yes I do	Wind		Sandra	retired
2022-07-10 11:41:48	Western Cape		Yes I do	Wind		TOM	retired
2022-07-10 11:37:35	Gauteng		Yes I do	Wind		Ivonne	retired

2022-07-10 11:30:12	Eastern Cape		Yes I do	Wind	For industrial HT-electrical production (Wind turbines) which are available for mass production. For domestic LT-electrical production (Solar systems) which are also available for mass production. I believe Government should compensate domestic users who have or want solar systems as they will contribute electrical surplus back to the main grid. Both solar and wind generation have close to zero carbon emissions if compared to (diesel / coal powered), nuclear generation is not an immediate solution but is definitely long term.	Thomas	retired
2022-07-10 11:20:34	Gauteng		Yes I do	Wind	Son en windkrag ... skoon !!	Linda	retired
2022-07-10 11:17:49	Gauteng		Yes I do	Wind	Wind turbines may be the quickest route to generating electricity (as per the wind turbine fields outside Gqeberha. South Africa has plenty of vacant land, as well as affording farmers the opportunity to derive an income from installing wind turbines , especially when crops fail due to bad weather conditions. Solar power should also be harnessed as we have the perfect sunny weather for this adaption. Solar power installations in private households could also be subsidized by the Government - cheaper than maintaining power stations with inept, incompetent workers who do not have the expertise to efficiently maintain or repair ancient power stations.	Carol	retired
2022-07-10 10:58:22	Western Cape		Yes I do	Wind		Maggie	retired
2022-07-10 10:58:20	Western Cape		Yes I do	Wind		Maggie	retired
2022-07-10 10:54:41	Western Cape		Yes I do	Wind	In Germany nearly every private roof is covered by photovoltaic systems although they have much less sun than we here and they are forcing to catch the wind for producing electricity and all the not personally unused energy goes into the grid.	Tanja	retired
2022-07-10 10:54:20	Western Cape		Yes I do	Wind	The Western Cape is extremely suitable for the erection of wind turbines to increase the amount of megawatts in the current electricity grid. The Government should, as a matter of urgency, allow the private sector to contribute towards electricity supply and the current restrictive legislation and regulations should be amended without further delay to expedite private sector participation.	Hardus	retired
2022-07-10 10:51:01	Western Cape		Yes I do	Wind		Shirley	retired
2022-07-10 10:40:41	Western Cape		Yes I do	Wind	There is so much wind in the Cape, why not build more of these windmills, there are lots of open land for it to function properly, It can also be secured so that no sabotage or stealing of lines is possible. This should have been started many moons ago!!!!!!	Louise	retired
2022-07-10 10:29:52	Western Cape		Yes I do	Wind	Wind and solar. There are already existing solar and windfarms ready to connect to the grid. Install more wind and solar projects together with storage facilities. Nuclear is good, but very expensive and given the poor performance and corruption of the present govt undertaking projects, no. Unless private enterprise builds and manages them.	Richard	retired
2022-07-10 10:26:12	Western Cape		Yes I do	Wind	Maybe wind power would not work for all provinces but I have lived in the Eastern Cape and now in Cape Town and I am absolutely amazed that there are so few wind farms - it's just ridiculous. A small country like New Zealand has a wind farm on every hill and they also utilise wave power extensively. You only make allowance for one choice here, but the potential to use wave power is endless	Suzanne	retired
2022-07-10 10:25:35	KwaZulu- Natal		Yes I do	Wind	There are wind farms already set up which we've seen in the Western Cape and Eastern Cape. Sadly I understand the Solar thermal Power system that was being erected near Upington (2015 we met one of the Spanish engineers working on the project) was put on hold by the government ??? Solar & Wind is the way to go	Dale	retired
2022-07-10 10:22:55	Gauteng		Yes I do	Wind	Keeping in mind the state of the planet and the call for renewable energy in order to save the planet; it is essential to stop burning fossil fuels, eg coal which is an enormous polluter. We have plenty of sunlight, even in winter, and it makes sense to install huge solar panels to capture this form of clean energy. Furthermore, every house should have solar panels for energy. The government should assist the population with this, and make it a condition of nay new building being erected, be it a domestic home or indeed a warehouse or commercial building. Come on people, wake up!!!	Lesley	retired
2022-07-10 10:22:43	Western Cape		Yes I do	Wind	There is always a breeze. Solar is good but at night and rainy days it is lacking. so a combination of both would be good.	Jill	retired
2022-07-10 10:20:28	Western Cape		Yes I do	Wind		Christoph	retired
2022-07-10 10:16:19	Western Cape		Yes I do	Wind		Coral	retired

2022-07-10 06:46:23	KwaZulu-Natal		Yes I do	Wind	Bring in some competitors. We need skilled workers who are trained to do their job. Their positions should be earned on merit ! We as a nation are surely better than this.	Danielle	retired
2022-07-10 06:28:47	KwaZulu-Natal		Yes I do	Wind		Suzette	retired
2022-07-10 06:18:11	KwaZulu-Natal		Yes I do	Wind	Wind farms are being built in 18 months. I believe some that are already complete have not been fully commissioned due to so much red tape	Janice	retired
2022-07-10 06:08:43	KwaZulu-Natal		Yes I do	Wind	I believe a combination of wind, solar, some coal(initially) and hydro is the answer. it is essential that comprehensive environmental investigations are undertaken by reputable organisations prior to the granting of any license to produce power. It is of paramount importance that the control of this essential service is taken out of the hands of the ANC immediately.	Lesley	retired
2022-07-10 05:20:29	Western Cape		Yes I do	Wind		Sandra	retired
2022-07-10 05:16:19	Eastern Cape		Yes I do	Wind			retired
2022-07-10 05:15:02	Gauteng		Yes I do	Wind	Wind power is efficient and does no damage to nature. Eskom should be privatized which will give a more reliable service and help fight corruption.	James	retired
2022-07-10 04:49:05	Eastern Cape		Yes I do	Wind	South Africa is rich in renewable energy resources. Geographically we have enough sunlight to generate sustainable power for our needs. Solar power is used to purify water, heat water, is reliable and can reduce costs. It will also create more jobs for the unemployed.	Marie	retired
2022-07-10 03:47:10	Western Cape		Yes I do	Wind		Vinanda	retired
2022-07-10 03:35:26	Western Cape		Yes I do	Wind	marythompson213@icloud.com	Mary	retired
2022-07-10 02:56:55	Western Cape		Yes I do	Wind		Lesley	retired
2022-07-09 22:40:18	KwaZulu-Natal		Yes I do	Wind		Patrick	retired
2022-07-09 22:22:38	Gauteng		Yes I do	Wind	I would have chosen wind (for areas like Western Cape and others with lots of wind) and Solar for the rest of the country.	Marlena	retired
2022-07-09 22:16:00	Eastern Cape		Yes I do	Wind	By using renewable energy it is safe for our environment and not harmful to our planet. We need to use the resources available without helping to destroy our planet!	Charlotte	retired
2022-07-09 22:14:03	KwaZulu-Natal		Yes I do	Wind	We have huge vacant land that we can build windmills to supply our country at a quarter of the price and these are natural resources. SA should have gone this route years ago and we would not be in the situation we in currently. This would be able to help the less fortunate tremendously	Cynthia	retired
2022-07-09 22:07:17	Gauteng		Yes I do	Wind		Patricia	retired
2022-07-09 21:52:29	Western Cape		Yes I do	Wind	I have been involved in renewables for years. All forms of generation are needed, solar, wind, nuclear and coal. A lot of solar is being built, but wind should be more and more exploited. Solar is quickest to build. Wind takes more effort and takes a bit longer. Nuclear and coal take 10 years per power station. Solar 1 to 2 years, and wind 2 to 3 years, but we have to have all forms because when the sun does not shine, and the wind does not blow, we need coal and nuclear. Private generation needs to be encouraged, it is the only quick solution. Eskom has no possibility of improving for at least 5 years. Every house should have solar panels with inverters and batteries, and there should be huge incentives to do just that. PH	Patrick	retired
2022-07-09 21:47:48	Gauteng		Yes I do	Wind		Patricia	retired
2022-07-09 21:46:18	Gauteng		Yes I do	Wind	The process should have started long ago. Government must stop using Eskom to syphon money out of the public, wind and solar could produce much cheaper energy Eskom should be closed down as soon as possible.	Brian	retired
2022-07-09 20:54:42	Free State		Yes I do	Wind		Maryna	retired
2022-07-09 20:45:52	KwaZulu-Natal		Yes I do	Wind	It certainly will be a vast improvement as it is working well in countries all over the world. It is imperative that SA SA DON'T rely on ESKOM. Those who owe ESKOM money should be dealt with by a strong arm of the law, if that is possible.	Lorraine	retired
2022-07-09 20:42:21	Western Cape		Yes I do	Wind	Wind is almost always available, and that at no extra cost.	Harald	retired
2022-07-09 20:20:03	Western Cape		Yes I do	Wind	Solar vand wind,,,, its almost for free...	Ernst	retired
2022-07-09 20:01:36	Gauteng		Yes I do	Wind	Our country is losing loads if money, businesses and agricultural performance and job oppertunities because of loadshedding. We need alternative solutions as soon as possible to save S A from going completely bankrupt!	Valerie	retired
2022-07-09 19:58:52	Western Cape		Yes I do	Wind	Solar and Wind are the most environmentfriendly methods of power production!	Ottomar	retired

2022-07-09 19:49:17	KwaZulu- Natal		Yes I do	Wind		Colin	retired
2022-07-09 19:49:12	Western Cape		Yes I do	Wind	Wind and Solar generation is free we just need to install the equipment, we also do not need to sell electricity to neighboring countries while our own people sit in darkness. Any source that is currently in use can be used. Just give us what we pay Escom to do. Escom is the only place where you do not have to do your work to get a (7%) increase.	Pieter	retired
2022-07-09 19:05:43	Western Cape		Yes I do	Wind	The wind driven facilities are already in place and should with immediate affect put the extra electricity generated on the grid to stop the load shedding that damage our economy. I am a concerned pensioner who can no longer accept that my pension keep on reducing year after year since 2015 due to the incompetence of the ANC while crimenals fraudulently keep on filling their pockets with our hard earned monies.. The ANC have no other plan than to empower their families and friends and keep on looting whatever is left in the state coffers.	Gerhardus	retired
2022-07-09 18:43:55	KwaZulu- Natal		Yes I do	Wind	We have various options for environmentally friendly energy! Use them ! Wind and solar	N	retired
2022-07-09 18:36:16	Gauteng		Yes I do	Wind			retired
2022-07-09 18:23:04	KwaZulu- Natal		Yes I do	Wind	Solar and wind would be viable alternatives. Definitely not nuclear!	Philippa	retired

2022-07-09 17:28:08	Western Cape		Yes I do	Wind		Elizabeth	retired
2022-07-09 17:10:58	Eastern Cape		Yes I do	Wind	If they had stared building wind turbines along the whole coastline ten years ago, we would not be in this power crises. The wind blows all the time so power can be generated 24 hours a day not like solar that can only do so in daylight	BRIAN	retired
2022-07-09 16:50:36	Mpumal anga		Yes I do	Wind	Besides my reasons there are something else. I would like to see the scrapping of BBEEEEEE. Get people who understand the system, not the comrades employment. Get some of the previous engineers so while fixing the problems to educate people to resolve problems. Do better and more regular maintenance.	Danie	retired
2022-07-09 16:19:58	Gauteng		Yes I do	Wind		Janet	retired
2022-07-09 16:10:56	Western Cape		Yes I do	Wind		Robert	retired
2022-07-09 16:00:35	Eastern Cape		Yes I do	Wind	Living on the coast, there is plenty of of wind for turbines to feed into the grid. I'm not sure of the region, but somewhere between Grahamstown and Bedford , there are dozens if not hundreds of wind turbines. Are they connected to the grid? 10 years ago the then president said there would be NO MORE LOAD SHEDDING with the construction of Mdupi and the other one. Lying politician. Now the politicians say another two years of load shedding if the do away with the red tape holding the president back. The only colour tape holding the president back is green, yellow and black and the corruption behind it.	Elliott	retired
2022-07-09 15:40:13	Western Cape		Yes I do	Wind	I support both wind and solar power. Red tape is and has always been a means to slow down going forwards and our government have had ample times in years to maintain our power stations. How er they have elected to ignore all the warning signs and their preferences have been directed at cadre deployment wherein lies the massive problem South Africa is now facing. People not sufficiently educated are running the country and obviously running it into the ground . No one person is held accountable and stepping aside does not work, neither does pompous corruption for that matter. All the years of wasted governing our ministers will one day realize they too will be in the cold and dark.....	Lindy	retired
2022-07-09 15:33:04	Western Cape		Yes I do	Wind	Wind power is cheap, relatively quick to install and light on pollution.	Viv	retired
2022-07-09 15:21:22	KwaZulu- Natal		Yes I do	Wind		Faheem	retired
2022-07-09 14:38:55	Eastern Cape		Yes I do	Wind		Miranda	retired

2022-07-09 14:12:45	Western Cape		Yes I do	Wind	Private sector managed power supply the only way for immediate response	Graham	retired
2022-07-09 14:12:40	KwaZulu- Natal		Yes I do	Wind	Mr Ramaphosa and the Motsephes already have a plan for the wind turbines.I dont know why the they are wasting our time.Will pensioners be able to afford it is another story.They shouls also install solar for sassa recepients.	Vicky	retired

2022-07-09 14:04:07	Eastern Cape		Yes I do	Wind	Wind & Solar generation is already in place - probably not enough, so YES encourage additional development as fast as possible.	Oswald	retired
2022-07-09 13:50:21	Western Cape		Yes I do	Wind		Barbara	retired
2022-07-09 13:34:52	Western Cape		Yes I do	Wind	The current Supplier of electricity is failing miserably in there task and should be removed from office with immediate effect and charged with treason. Private, capable and trustworthy Staff are to be introduced with immediate effect. Also, the persons requested should be screened before employed. A vast knowledge of the power generation system is to be one of the factors required, together with an SAPS background clearance check.	Robin	retired
2022-07-09 13:20:36	Western Cape		Yes I do	Wind	The infrastructure to produce power from wind turbines is already in place across the RSA, especially in the Western Cape. This is clean energy and should be utilized where needed. At present it is not in use. Why not?	Thea	retired
2022-07-09 13:07:24	Northern Cape		Yes I do	Wind		Hannetjie	retired
2022-07-09 13:04:30	Western Cape		Yes I do	Wind		caherine	retired
2022-07-09 13:02:25	Western Cape		Yes I do	Wind	Wind power is by far the cleanest energy source and together with Solar. Unfortunately Solar does not work at night, therefore wind generation is the best.	David	retired
2022-07-09 12:41:56	Western Cape		Yes I do	Wind		John	retired
2022-07-09 12:41:12	Eastern Cape		Yes I do	Wind	We already have a factory for turbines. just increase production. Wind is day and night so we have a more even power load on the electrical grid .Selling power to public is more controllable . We actually need both solar and wind. Every bit of industry creates jobs for installer and maintenance guys alike. Solar may provide more jobs since it is accessible to home owners and city complexes	Calvin	retired
2022-07-09 12:33:51	Western Cape		Yes I do	Wind	Too many considerations for an ordinary citizen to make a recommendation.	Mitch	retired
2022-07-09 12:22:56	Gauteng		Yes I do	Wind		Philip	retired
2022-07-09 12:09:50	Western Cape		Yes I do	Wind	Wind en son energie is gratis!	Wessel	retired
2022-07-09 11:49:04	Western Cape		Yes I do	Wind	There is more than adequate wind all year round in the western cape. Wind power is green and there is plenty of open space to erect the turbines. Wind turbines can be easily and quickly erected and brought on line, the energy is cheaper than coal. The manufacture, supply and erection of the wind turbines can create employment immediately. Can be brought on line quickly.	Maureen	retired
2022-07-09 11:45:54	Western Cape		Yes I do	Wind	Eskom kan nie voldoen aan die aanvraag van elektrisiteit nie en daar is baie krag wat gelewer kan word deur die privaat sektor. Die regering wil net sy eie stempel op alles afdruk deur te bepaal wie mag krag voorsien, en hulle het geen begeerte om na die bevolking van die land om te sien nie. Ek is oortuig daarvan dat nie een van die ministers onder beurtkrag deurloop nie.	James	retired
2022-07-09 11:34:42	Gauteng		Yes I do	Wind	Immediate use of IPP's using wind, solar and any other viable source of alternative energy is the only viable option in the current power crisis which the government has allowed the country to descend into. There has to be pragmatic control on selection of IPP's. Legislation has to ensure that producers are truly INDEPENDANT and that government officials, their families and associates have absolutely no financial interest.	Bruce	retired
2022-07-09 11:34:35	Gauteng		Yes I do	Wind		Tinah	retired
2022-07-09 11:01:48	Gauteng		Yes I do	Wind	I believe that wind and solar are our best options. Solar panels in hot regions of this country and wind turbines in the more windy regions. That said, we have enough options of regions that lends itself to both solar and wind turbines. We are then using nature to provide and climate change will be minimized due to atmosphere not being polluted.	Ria	retired
2022-07-09 10:30:26	Western Cape		Yes I do	Wind		John	retired
2022-07-09 10:22:47	Western Cape		Yes I do	Wind	Wind is clean, available both day and night and some regions have more than enough of it! However, a package based on sound scientific research most probably will be best. Only provisio should be that our corrupt government should not be allowed to "run the show" an independent commission should be in charge.	William	retired
2022-07-09 09:34:50	Western Cape		Yes I do	Wind	Wind or solar makes sense with our climate. Used all over the world	Roy	retired
2022-07-09 09:34:36	Eastern Cape		Yes I do	Wind	1.) Scrap any legislation which causes any kind of delay in private enterprise contributing towards producing alternative energy with immediate effect. 2.) Re-employ as many people with expertise to run Eskom efficiently, scrap cadre deployment, and curtail the unions. Eskom was 100 % efficient before the ANC employed their cronies and stole it blind. Prosecute any employee and suspend them immediately if they are found to sabotage or intimidate any colleague . Employment contracts should allow for this. 3.) Look to the private sector to contribute in any way possible.	Monika	retired
2022-07-09 09:34:18	Western Cape		Yes I do	Wind	I feel wind power combined with solar power are the best solutions, as our country has plenty of wind and sunshine.	Cheryl	retired

2022-07-09 09:31:26	Western Cape		Yes I do	Wind		Adinda	retired
2022-07-09 09:26:29	Western Cape		Yes I do	Wind	In the end all energy sources should be used due to the inconsistencies relating to only solar or wind power. A reliable base power source will always have a place in the bigger picture.	Juan	retired
2022-07-09 09:14:04	Gauteng		Yes I do	Wind	The responsible private sector and not the officials looking after their own pockets an kadres should be allowed to make the decisions about our power suppliers, Eskom should be taken away from the corrupt government and handed over to people that can make it work, get rid of all the people in high positions and keep only the people that can do the job.	Eric	retired
2022-07-09 09:10:11	Western Cape		Yes I do	Wind	There is almost always wind and it is free. This applies to solar as well. The ANC government must stop talking and start doing.	Anthony	retired
2022-07-09 09:08:54	Gauteng		Yes I do	Wind	Its clean .	JP	retired
2022-07-09 09:01:53	Western Cape		Yes I do	Wind	Wind and the sun provides enough energy that can be stored for night time usage and relieve the pressure on Escom thus reducing the need for high levels of load shedding	Lourens	retired
2022-07-09 09:00:27	Eastern Cape		Yes I do	Wind	We should invest a combination of resources, e.g, Solar during our sunny days, and wind which even blows at night. These are supplemental to other methods which may include nuclear. However, first, we must purge ourselves of corruption, nepotism and cadre deployment.	Bill	retired
2022-07-09 08:58:24	Western Cape		Yes I do	Wind		Loraine	retired
2022-07-09 08:50:20	KwaZulu- Natal		Yes I do	Wind	When driving around Germany you see wind generators in every available industrial space	Geoff	retired
2022-07-09 08:49:57	Western Cape		Yes I do	Wind		Beverly	retired
2022-07-09 08:26:52	Western Cape		Yes I do	Wind	The State is not in a position to supply in the needs of its citizens as it was 25 years ago. At least nobody can steal the wind or sell it under corrupt contracts to the electricity producers!	Christie	retired
2022-07-09 08:18:17	KwaZulu- Natal		Yes I do	Wind	I support using clean energy sources; wind, solar, hydro. We have the natural resources to do this in South Africa. Reliance on a single power supplier must go; they cannot deliver and allowing independent suppliers can improve the situation quickly.	Ann	retired
2022-07-09 07:55:34	Eastern Cape		Yes I do	Wind	In the short term tax should be removed from solar systems to allow the public to implement their own solar systems solutions at home. The problem with the power supply is not the method but the management. This starts with implementation of BEE. Stop implementing laws to benefit a certain group of people and allow every on to participate. Start of by scrapping BEE and you will see a huge improvement in all areas.	Wessel	retired
2022-07-09 07:55:03	Western Cape		Yes I do	Wind		Mike	retired
2022-07-09 07:37:18	KwaZulu- Natal		Yes I do	Wind		Heino	retired
2022-07-09 07:19:31	Mpumal anga		Yes I do	Wind	Already available Can contribute safe electricity	Susan	retired
2022-07-09 06:15:58	Western Cape		Yes I do	Wind	Obtaining electricity from more than one source would be the answer, this being dependent on where in the country one is. Wind in the coastal regions would be a good start. Hydro would be an additional option. These two options afford the least environment impact. Solar is another option, although a lot of environmental damage is caused in the mining to obtain what is needed to make up the solar panels. Nuclear would be the last option, mainly because the country no longer has the trained people to use the technology. The red tape should be scrapped to allow independent sources to supply the country's electricity, The Unions should be held accountable for their part in bringing the country to it's knees. This holding the country hostage while they negotiate an impossible wage dispute, wanting far more than a bankrupt entity is able to pay is an act of treason. I do think though that the upper management are being paid far above what they should be earning.	Barbara	retired
2022-07-09 06:05:00	Eastern Cape		Yes I do	Wind	As usual there is way too much red tape when it comes to this incapable government. They probably want full control AND all the compensation and credit. We are in a crisis. Wake up ANC	William	retired
2022-07-09 05:56:30	Western Cape		Yes I do	Wind	We have vast coastal areas where wind turbines can be used to supply energy. Businesses are suffering from constant load shedding.	Carina	retired
2022-07-09 02:59:43	Mpumal anga		Yes I do	Wind		Jan louis	retired
2022-07-08 23:43:35	KwaZulu- Natal		Yes I do	Wind		Tina	retired
2022-07-08 23:41:37	Gauteng		Yes I do	Wind	There is no other sustainable option. Eskom proved that they are not capable of producing the required electricity	Emily	retired
2022-07-08 23:29:05	Eastern Cape		Yes I do	Wind	My choice is solar as well as wind generation. All of this should be placed in the hands of the private sector and this needs to happen now. We have seen how govt involvement in the state owned enterprises has been a negative exercise in futile mismanagement. Govt has managed to take a highly successful organisation, which was rated as the worlds best power utility supplier and turn it into a shadow of its former self. The problem is that this Govt is good on talk and useless on productive action. One should ask the question of our Billionaire State President. Would he run or allow his businesses to be run in the negligent manner in which he oversees the interests of South Africa?	ROGER	retired

2022-07-08 22:07:00	Western Cape		Yes I do	Wind	Save our environment and use its potential such as wind and solar for energy. Gas may become a future shortage globally.	Gillian	retired
2022-07-08 22:00:46	Eastern Cape		Yes I do	Wind		Russell	retired
2022-07-08 21:54:26	Eastern Cape		Yes I do	Wind	Wind turbines are best solution immediately with scraping the red tape. Port Elizabeth isn't called the WINDY CITY for nothing. The wind is free and God's gift to humanity let us use it.	Nomthan dazo	retired
2022-07-08 21:43:13	Eastern Cape		Yes I do	Wind	Can be relatively quickly built and brought online. Also solar .	John	retired
2022-07-08 21:35:02	Free State		Yes I do	Wind	Winde is nie beperk tot daglig nie. Dit is n onuitputlike bron. Die opwekking van krag is redelik eenvoudig. Daar is min ekologiese skades moontlik. Die produksie van opwekkers en die bou van windtorings kan vinnig en deur n groot groep kontrakteurs onderneem word maw dit is werkskeppend.	Gideon	retired
2022-07-08 21:23:46	Eastern Cape		Yes I do	Wind	Wind and solar us renewable and eco friendly. In our area both available. Municipalities should be allowed to buy directly from independent providers	Aletta	retired
2022-07-08 21:18:17	Gauteng		Yes I do	Wind		Elizabeth	retired
2022-07-08 20:56:04	Eastern Cape		Yes I do	Wind	An emergency plan could suspend the IRP and expand private energy production massively. Change the legislation in favour of private enterprises to produce electricity to the government for consumer use.	Elana	retired
2022-07-08 20:49:37	Gauteng		Yes I do	Wind		Daphne	retired
2022-07-08 20:49:35	Western Cape		Yes I do	Wind	Agreements should have been signed more than a decade ago for IPP to supply power to South Africans. All renewable energy sources should be used in conjunction with nuclear	Ivy	retired
2022-07-08 20:41:40	Gauteng		Yes I do	Wind	Any type will do as long as the government is not involved and there are employment opportunities for youth from other races as well. As it stands currently only black youth are given employment opportunities. Scrap the red tape and tender procedures as this involves corruption and nepotism. Please hurry this process along as spiralling increases are biting deep into our pockets.	Wasela	retired
2022-07-08 20:39:41	Gauteng		Yes I do	Wind	We have great opportunities to harness wind energy in SA	Lesley	retired
2022-07-08 20:08:25	Western Cape		Yes I do	Wind		Rose	retired
2022-07-08 19:55:42	Gauteng		Yes I do	Wind		Eneth	retired
2022-07-08 19:50:00	KwaZulu- Natal		Yes I do	Wind	Privatize and add more power to the grid. Bring more experts and skilled personnel on board do away with job for pals.	MADGE	retired
2022-07-08 19:39:56	KwaZulu- Natal		Yes I do	Wind	The wind usually blows a lot down the South Coast		retired
2022-07-08 19:34:53	Gauteng		Yes I do	Wind	IPP's are essential to inject into the power grid. This should have happened some time ago. The government needs to give SAA a blind side and invest the money to get Eskom purchase the necessary spares to replace worn and or broken equipment at the respective power stations. The funds must include paying for extended (24 Hour) maintenance staff and bring back personnel who are experienced in repairing broken equipment.	Albert Edward	retired
2022-07-08 19:19:17	Western Cape		Yes I do	Wind	Wind and solar must be the choice. Nuclear is too dangerous, especially considering that we can't dispose of nuclear waste in a safe manner. As the current workforce is unable to keep the machinery in a running condition, Eskom must re-employ former people who know how to keep our lights on! Race must not be a point of contention, Eskom must just get on with the job of supplying electricity.	Ute	retired
2022-07-08 19:13:59	Western Cape		Yes I do	Wind	Eskom must fall !!! The ANC are to blame ! They can't run a bath the idiots ! There is not much more they can stuff up. Privatize electricity asap	Lee	retired
2022-07-08 19:13:37	Gauteng		Yes I do	Wind	Loadshedding is destroying the economy, privatize Eskom, allow alternate supply but not oil, gas, coal or nuclear. We have abundant sunshine and wind, use what nature has provided. Also more importantly root out all the theft and corruption. Put cable thieves in jail, they are operating daily in the townships. The economy cannot sustain with no power.	Natalie	retired
2022-07-08 19:04:14	Gauteng		Yes I do	Wind	Wind is freely available therefore no extra costs involved	Aletta Dorothea	retired
2022-07-08 18:59:02	Gauteng		Yes I do	Wind		Annie	retired
2022-07-08 18:58:25	Western Cape		Yes I do	Wind	We delayed acting for years while the government fought over policy and now we are paying the price. We need urgent deregulation and incentives for private producers to invest. Eskom has now effectively split out the distribution arm of the business. Yes, mistakes will be made, but these could in no way be compared with the consequences of a slow response to this crisis.	Andre	retired
2022-07-08 18:55:44	North West		Yes I do	Wind		Marietjie	retired
2022-07-08 18:52:59	Eastern Cape		Yes I do	Wind		Susan	retired
2022-07-08 18:42:59	Western Cape		Yes I do	Wind		Marieke	retired

2022-07-08 18:29:23	Western Cape		Yes I do	Wind	The government is unable and unqualified to manage the country's requirements, give someone else the opportunity to make it work	Brenda	retired
2022-07-08 18:18:19	KwaZulu- Natal		Yes I do	Wind		Trevor	retired
2022-07-08 18:09:24	Western Cape		Yes I do	Wind	Clean energy	Elizabeth	retired
2022-07-08 18:07:24	Western Cape		Yes I do	Wind	Get back All the stolen monies from the zuma's, gupta's and their buddies. That will definitely ensure sufficient funds to finance enough electricity for every user in SA. We should not let them get away with our taxes.	Hosea	retired
2022-07-08 18:03:40	Gauteng		Yes I do	Wind	Most of the 3 rd world counts are using the wind turbines & if not the solar as we have so much sun available to be used effectively.	Marie	retired

2022-07-08 17:32:51	Eastern Cape		Yes I do	Wind	Wind and solar power generation facilities are currently expanding at a fast rate across the country so it shouldn't take much at present to connect up to the grid.	Vernon	retired
2022-07-08 17:32:00	Western Cape		Yes I do	Wind	To allow only one selection is not viable. Nuclear is long term and expensive. Hydro is effective in large rivers which are limited in SA & also long term. Solar is an excellent solution as we are blessed with lots of sunshine as is wind turbines which is viable in windy areas. Solar & wind, although renewable, is not recyclable, so not that environmentally great either. Coal, diesel, petrol, gas is the worst environmentally and needs to be reduced drastically. Most of all the political corruption has to stop before any solution will work. Solar and wind have positive options with the apparent ability to be deployed faster than sources requiring larger infrastructure investments and long periods to complete. These will obviously be prone to more corruption by various participants.	Barend	retired
2022-07-08 17:31:56	Western Cape		Yes I do	Wind	To allow only one selection is not viable. Nuclear is long term and expensive. 2022-07-08 17:10:09	Western Cape		Yes I do	Wind	Plus solar and hydro where possible even nuclear but that takes time to build	Gail	retired
2022-07-08 17:10:08	Western Cape		Yes I do	Wind	Plus solar and hydro where possible even nuclear but that takes time to build	Gail	retired
2022-07-08 17:03:38	Eastern Cape		Yes I do	Wind	Wind & Solar takes less space & look @ Europe where is the bulk of their input beside OIL / fossil fuels Corrupt govt	Hilton	retired
2022-07-08 16:57:28	Western Cape		Yes I do	Wind	Having a 2000kms coastline should offer us plenty of locations where wind could be harvested, but solar is probably just as efficient. Our problems are the bureaucratic barriers, simplify the whole process and encourage home owners to install solar panels and not, as is the case at the moment, discourage them from doing so by way of municipalities levying surcharges on solar installations, as is the case in Cape Town. Government is dragging their feet because alternative energy sources will impact on their comrades at Eskom, the coal mines and municipalities! Thus we indirectly pay for the ANC to stay in power! Wake up folks, it's time for them to be voted out!	Klaus	retired
2022-07-08 16:54:47	Eastern Cape		Yes I do	Wind		Merlene	retired
2022-07-08 16:52:26	Western Cape		Yes I do	Wind	Need anything that will elevate this loadshedding completely and get investments back to this country.	Doug	retired

					Wind and solar as some of it is already in place, start looking in sea water motion solutions as water never stands still, also looking into use hydrogen generators and/or converting diesel/petrol generators into hydrogen generators.		
2022-07-08 16:51:18	Western Cape		Yes I do	Wind	Supply all households with 2-4 solar panels to generate some power and connect it to the grid.	Johan	retired
2022-07-08 16:48:47	Eastern Cape		Yes I do	Wind		Colin	retired
2022-07-08 16:48:20	Western Cape		Yes I do	Wind	South Africans have had enough. It is now time to change legislation to enable private, independent producers to supply electricity to the grid.	Louise	retired
2022-07-08 16:42:39	Western Cape		Yes I do	Wind	Well Cpt has the wind, a no brainer use the wind to our benefit	Sherydene	retired
2022-07-08 16:35:50	Western Cape		Yes I do	Wind		Paul	retired
2022-07-08 16:32:28	KwaZulu-Natal		Yes I do	Wind	wind is free and i dont think it will take up a lot of space to install ie cost affective	thomas	retired
2022-07-08 16:30:27	Western Cape		Yes I do	Wind	Wind is a natural power source here in the Western Cape, we have an abundance of it.	Dudley	retired
2022-07-08 16:27:12	Gauteng		Yes I do	Wind	Will the ANC led government ever change their way of leading the country. Red Tape justifies their existence, so why change. However if they do not see the writing on the wall with the present red tape involving supply of electricity total darkness awaits us. Power generation from the IPPs must be fast tracked at all costs. Eskom must be allowed, no supported, to bring back expertise from former employees and OEMs	Hennie	retired
2022-07-08 16:26:49	Western Cape		Yes I do	Wind		Petra	retired
2022-07-08 16:16:24	Western Cape		Yes I do	Wind	Wind and solar ,with incentives to household panels,and not to register same for the gaining of levies as it was [and still may be] would be. Obviously the people allready trying to enter the market,and are prevented should get first choice for what they have erected on their farms. Eskom are charging farmers r1000 to get power to their household from the mainlines. instead of gaining their support	johan	retired
2022-07-08 16:03:38	Western Cape		Yes I do	Wind	I think it is appauling and a disgrace that we have loadshedding especially during winter time and many hours per day. It is a shame that this government cannot get their act together and see alternative ways to solve our electricity problems.	Martie	retired
2022-07-08 16:03:29	Gauteng		Yes I do	Wind	We have an enormous coastline and mountain range where wind is always a constant factor, making wind turbine generation a safe and viable source of energy.	Colin	retired
2022-07-08 15:58:43	Western Cape		Yes I do	Wind	We have a lot of wind in the Western Cape & although construction of those huge windmills is high, wind is free! There will be no striking from the wind! This has proved a very efficient energy source throughout Germany	Alma	retired
2022-07-08 15:55:42	Western Cape		Yes I do	Wind	Particularly in the Western Cape it is windy and there are already a few wind farms so by adding more they will definitely help towards power generation. I also believe in solar power as SA has the capacity for solar production. These 2 methods are also environmentally friendly.	Rosemary	retired
2022-07-08 15:55:02	Western Cape		Yes I do	Wind	Although I am a socialist by heart, I am convinced that we radically need to stop the current trend of corruption and abuse of power(excuse the pun). I believe that it is high time to deregulate our electricity services and privatise Eskom immediately.	Francis Charles	retired
2022-07-08 15:52:32	Western Cape		Yes I do	Wind	Private electricity producers is a no brainier and long overdue. Green generation options offer quicker and cleaner generation solutions. The lack of urgency on the party of government is strangling our growth potential and ultimately creating increased poverty	Clive	retired
2022-07-08 15:50:24	Western Cape		Yes I do	Wind	Wind is free it is environment friendly it can save our industry and country	Miki	retired
2022-07-08 15:41:06	Western Cape		Yes I do	Wind	The use of both wind and solar would minimize the possibility of monopolies	John	retired
2022-07-08 15:39:47	KwaZulu-Natal		Yes I do	Wind	Wind farms and solar farms are a free renewable source of energy that is readily available to the national grid. The stumbling block is the government with its all its red tape....and the corruption that goes with it!!!	Vic	retired
2022-07-08 15:35:46	Western Cape		Yes I do	Wind		Lenie	retired
2022-07-08 15:30:05	Gauteng		Yes I do	Wind		J	retired
2022-07-08 15:28:20	Western Cape		Yes I do	Wind	A variety of different options combined together to bring our electricity supply up to scratch	Les	retired
2022-07-08 15:22:47	Western Cape		Yes I do	Wind	I fully support solar or windpower or a combonstion of both for the generation of power becuse that will cause the less air pollution. Leave the fat cats for the creeping and hunting Leopards and will get stringed.	Frederick	retired

2022-07-08 15:22:37	Western Cape		Yes I do	Wind	<p>Great problem - This option should allow for more than one choice.</p> <p>Please Note: There is not only one solution, but a multitude of renewable solutions.</p> <p>IMMEDIATE:</p> <ol style="list-style-type: none"> 1) Retire and release Minister of Energy, appoint new scientist minister. 2) Open Eskom to private enterprises to manage. 3) The obvious solutions are to expand Wind and Solar energy. 4) Continue with our limited Hydro solutions. No time to create more Hydro plants. South Africa is NOT a water rich water country. 5) Embark on massive Research on Wave energy. 6) Clean up the corruption with Coal supply 7) Only use Power stations that work and keep them working. 8) Outsource power stations to private sector for next 5 years 9) Start massive research and prototype on Wave energy- this works all over the world already. 10) Totally rebate tax for home owners and business to install Solar systems <p>MOTIVATION:</p> <ol style="list-style-type: none"> 1) South Africa has the longest coastline in Africa 2) Huge deserts 3) Mostly Sunshine 4) Much Coastal Wind 5) Excellent businesses acumen to take over Power stations. 6) Wave energy (although deemed expensive) is one of the most suitable long-term solutions as there is water right around South Africa. <p>MEDIUM</p> <ol style="list-style-type: none"> 1) Install Wave energy systems to aid the grid. 2) De-commission old Power stations. 3) Expand smaller Wind turbines, like Netherlands with small units in industrial areas. 	Dr Stuart	retired
2022-07-08 15:22:23	Gauteng		Yes I do	Wind	<p>Wind generated power is not necessarily encumbered with having to create large storage infrastructure as, as long as suitable areas are identified around the country, there will always be some areas generating wind power - one cannot say that wind power throughout the country as there will always be some generation of wind powered electricity (i.e. an advantage over solar power) so it is not only an intermittent supply source.</p> <p>My support is for commercially viable large capital projects funded by the private sector who have a proven track record in this regard, less so for Eskom initiatives in this regard as these have a high probability of being hijacked/ corruption enabling opportunities as for Mudupi/Kusile .</p>	Frank	retired
2022-07-08 15:20:41	Western Cape		Yes I do	Wind	All environmentally clean energies must be explored. Independent producers must produce and distribute. Government must simply pass enabling legislation. Nothing else.	Doreen	retired
2022-07-08 15:19:26	KwaZulu- Natal		Yes I do	Wind	Europe has moved to wind and gas... what are waiting for.	Jose	retired
2022-07-08 15:06:33	KwaZulu- Natal		Yes I do	Wind		Mary	retired
2022-07-08 15:04:09	Western Cape		Yes I do	Wind	I would be so pleased to see the end of load shedding. However, I wish to commend The CEO and Jan Oberholzer as well as Minister Pravin Gordhan for the amazing work they are currently achieving.	Yvonne	retired
2022-07-08 14:56:49	Gauteng		Yes I do	Wind	<p>To the government Of SA.</p> <p>Please stop dragging your feet, and scrap all red tap.</p> <p>This is a disgrace how the ANC ran SA into the ground.</p> <p>It is unthinkable how all our big government institutions are so mismanaged and all the corruption that took place during your reign .</p> <p>How is it possible that Eskom, Denel, the Mining Industry, our entire Railway entity came to an absolute standstill. Our healthcare are an absolute disgrace. I have been a qualified nursing sister, and the shocking state as well as mismanagement and corruption is unthinkable. You don't even care how the poor people that get convinced before every election with small food parcels, and t-shirts. And then you don't care at all that they die due to neglect and poor health care people receive that can not afford private health care. I can tell you straight! Neither will your NHI work. You don't have the capacity, neither the will to make it work. You will not convince me in 100 years to make use of it all your corruption is unthinkable and state capture. Are you mad.</p> <p>I openly oppose all your suggestions, and ideas. Maybe you have already thought of new plans to rob SA.</p>	Margaretha	retired
2022-07-08 14:56:45	Western Cape		Yes I do	Wind	I think Solar, hydro & gas should also be used as well as Wind. The Government needs to move forward fast on allowing private enterprise to get involved. The government running of Eskom over the years has been an outstanding disaster, particularly under Zuma. Why would anyone want to invest in this country with the electricity supply being as it is.? The Government need to move fast in trying to do something about this dire situation.	Christine	retired
2022-07-08 14:55:19	Western Cape		Yes I do	Wind		KEVIN	retired

2022-07-08 14:51:15	Western Cape		Yes I do	Wind	Escom is useless	Sue	retired
2022-07-08 14:49:00	Western Cape		Yes I do	Wind	Independent power suppliers should immediately be allowed to supply electricity & get rid of Gwede Matasha for he is not capable of supporting his own family.	sakkie	retired
2022-07-08 14:48:55	Western Cape		Yes I do	Wind	Independent power suppliers should immediately be allowed to supply electricity & get rid of Gwede Matasha for he is not capable of supporting his own family.	sakkie	retired
2022-07-08 14:42:32	KwaZulu- Natal		Yes I do	Wind	We should use this opportunity to get away from coal burning energy	Ian	retired
2022-07-08 14:39:22	Western Cape		Yes I do	Wind	I also recommend the use of solar	Graham	retired
2022-07-08 14:27:58	Western Cape		Yes I do	Wind		Shane	retired
2022-07-08 14:24:07	KwaZulu- Natal		Yes I do	Wind	South Africa has an abundance in solar, wind and hydro electric generation capabilities. These three also require much less labour and time to set up as opposed to building fossil fuel and nuclear power plants. South Africa should move away from mega plants and focus on producing electricity locally in it's districts, but still be interconnected: this will also greatly reduce maintenance downtime -and maintenance cost.	MARETHA	retired
2022-07-08 14:19:38	KwaZulu- Natal		Yes I do	Wind	Either solar or wind. Both methods would work. Free wind and sun.	Susan	retired
2022-07-08 14:08:38	Western Cape		Yes I do	Wind	Cape Town needs to be entirely removed from the grid urgently. The cost of electricity supplied by Eskom is totally unaffordable. I am a SASSA pensioner & we are not even considered for a discount. We also have the wind for Wind Turbines which I'm sure would be much more affordable than solar panels.	Lorraine	retired
2022-07-08 14:07:32	Gauteng		Yes I do	Wind	Free Enterprise is always good as it allows competition, and the ones that offer good services at a cheaper rate is what we need now. Expenses far exceed incomes.	Lorraine	retired
2022-07-08 14:03:07	Gauteng		Yes I do	Wind	It would be best to allow free enterprise to set up independent power. The Types could be limited to 4 or 5 options : electrical, wind, solar, harnessing the waves for hydroelectric depending on the area. But whatever the user can afford is the major consideration. Preferably something that is cheaper than current electricity prices. We are struggling under the cost of living as it is.	Lorraine	retired
2022-07-08 13:58:08	KwaZulu- Natal		Yes I do	Wind		Marge	retired
2022-07-08 13:50:25	Western Cape		Yes I do	Wind	Use RSA's resources!!! Wind, water and Sun!!!!	maria	retired
2022-07-08 13:49:03	Western Cape		Yes I do	Wind		eddie	retired
2022-07-08 13:47:31	Western Cape		Yes I do	Wind	There is plenty of wind in places such as Cape Point, PE the "Windy city" bottom of Sir Lowry's pass etc. I would also support solar power but the wind blows at night too so there can be a steady supply.	Lyn	retired
2022-07-08 13:45:32	Gauteng		Yes I do	Wind	I fully support the provision of electricity by private producers on the condition that the government does not give consent and/or provide licences for this purpose to companies where they or their cronies have interest in and benefit from. Regulations in this respect should not be selective and should be open to any private company. Government should not be involved in any way with such private companies!	Rudi	retired

2022-07-08 12:41:25	Western Cape		Yes I do	Wind		Trinette	retired
2022-07-08 12:40:11	KwaZulu-Natal		Yes I do	Wind	Solar, hydropower are also useful additions to get power	Margaret	retired
2022-07-08 12:36:25	Mpumalanga		Yes I do	Wind		Chrostiaan Lourens	retired
2022-07-08 12:34:41	Western Cape		Yes I do	Wind	I have no idea but this load shedding is killing our country and making it impossible for businesses to survive and ha to stop, so do what needs to be done to put a stop to this.	Yvonne	retired
2022-07-08 12:34:34	Gauteng		Yes I do	Wind	We live in a country that can use wind , solar and IPP that can fed their power into the current system. Short term re employ those engineers and technicians that were made redundant through BEE schemes to get current power stations back up to regular power production.	James	retired
2022-07-08 12:26:36	Western Cape		Yes I do	Wind	Make use of all existing and new windfarms	Christo	retired
2022-07-08 12:22:56	Western Cape		Yes I do	Wind		Margot	retired
2022-07-08 12:21:54	KwaZulu-Natal		Yes I do	Wind	Any alternate source of energy that is green should be considered - also isn't there a way to make coal cleaner	Yvonne	retired
2022-07-08 12:21:48	KwaZulu-Natal		Yes I do	Wind	Any alternate source of energy that is green should be considered - also isn't there a way to make coal cleaner	Yvonne	retired
2022-07-08 12:21:13	Gauteng		Yes I do	Wind		David	retired
2022-07-08 12:15:07	North West		Yes I do	Wind			retired

2022-07-08 12:12:01	Gauteng		Yes I do	Wind	Just for once, just once, think about the people in the country you pretend to serve. Just once.	Wendy	retired
					The current situation with ESCOM is going to do irreparable damage to our already fragile economy and should be treated as a critical and high priority emergency! Do whatever is needed to increase electricity production immediately, whatever is the quickest to get of the ground. The longer term considerations can be attended to afterwards. Stop the doddering, inform the public and keep them informed.		
2022-07-08 12:07:54	Western Cape		Yes I do	Wind	I would give preference to proven green systems, wind, solar and would not object to Nuclear as well for longer term stability.	Cornelis	retired
2022-07-08 11:59:55	Western Cape		Yes I do	Wind	Scrap all regulations now!!	Dianne	retired
2022-07-08 11:57:42	Western Cape		Yes I do	Wind	A combination of wind & solar would be cheaper & quicker to generate electricity for this country. Let private people do it. The ANC certainly can't.	Wendy	retired
2022-07-08 11:55:34	KwaZulu-Natal		Yes I do	Wind	Wind, solar or hydro No more pollution please	Ruth	retired
2022-07-08 11:55:29	KwaZulu-Natal		Yes I do	Wind	Wind, solar or hydro No more pollution please	Ruth	retired
2022-07-08 11:54:44	Limpopo		Yes I do	Wind	South Africa can benefit from wind, solar and hydro for its energy needs.	Melitza	retired
2022-07-08 11:49:29	Western Cape		Yes I do	Wind		Laura	retired
2022-07-08 11:49:14	Gauteng		Yes I do	Wind	Wind farm work all over the world and would work in South Africa	Sheila	retired
2022-07-08 11:45:48	Gauteng		Yes I do	Wind	We have vast spaces where windturbines could be built and power generated.	Hannes	retired
2022-07-08 11:44:54	Western Cape		Yes I do	Wind	Hoe gouer krag voorsiening geprivatiseer word hoe gouer sal ons krag toevoer regkom	Jan	retired
2022-07-08 11:44:38	KwaZulu-Natal		Yes I do	Wind	A mix of options must be considered	George	retired
2022-07-08 11:40:40	Gauteng		Yes I do	Wind	wind and solar, i THINK would be the most beneficial, without doing much harm to the environment. The sooner this process starts, the sooner we will not be reliant on eskom.	anne	retired
2022-07-08 11:39:20	KwaZulu-Natal		Yes I do	Wind	Firstly, Gewede Mantashe must be fired. Actually, all the present ministers should be fired. The time for dithering is now over, we are in a crisis. Scrap red tape and allow independent producers to keep production uninterrupted.	Susan	retired
2022-07-08 11:39:17	Western Cape		Yes I do	Wind		Derrick	retired
2022-07-08 11:33:26	Western Cape		Yes I do	Wind	Law should be changed that private companies can sell electricity to Eskom at a regulated price - and that includes solar	Johann	retired
					There has to be a short and long term solution and the ANC need to ditch their racist/BEE attitude and re employ the qualified and experienced workforce they replaced with corrupt, inexperienced cadres. We do not need imported technicians & management as they are already here. Time to Man Up for the Government and actually do something positive for the country! Throughout the world there are countries who have solved their basic energy challenges, take their offers of assistance before this beautiful country is ruined beyond repair.		
2022-07-08 11:15:15	Western Cape		Yes I do	Wind	Wind alone is not the answer but coupled with solar we will all benefit naturally.	Clive	retired
2022-07-08 11:14:13	Western Cape		Yes I do	Wind	Geen kommentaar	Samuel Alten	retired
2022-07-08 11:10:49	Gauteng		Yes I do	Wind		Hendrik	retired
					If Eskom is not going to collect it's debts and use the money to repair and update their facilities, then they must allow private industry to assist in the production and distribution of power.		
2022-07-08 11:02:52	Western Cape		Yes I do	Wind	When I retired in 2006 power cost me R0.4492 per KWh It is now costs me around R2.91.	Rhett	retired
					In a country blessed with so much coast-line, and with so much wind (particularly in the Western Cape), I cannot see why wind farms - so long proposed by private developers yet rejected by the SA government - could not be set up? Give the private sector a chance to show how swiftly this could be done, at least supplementing the pathetic and corrupt existing Eskom circus, and at most returning the public to some form of normal existence! I can hear future generations bemoaning the fact that our era was LOST in this respect. Please let us leave the children of this country an inheritance of foresight if nothing else! I WOULD ALSO SUPPORT HYDRO-POWER	Lesley	retired
2022-07-08 10:54:26	Eastern Cape		Yes I do	Wind	My opinion is WIND for immediate additional supply to the grid, followed by a combination of SOLAR, NUCLEAR, COAL. The red tape surrounding IPP's must be abolished IMMEDIATELY and get that power onto our grid.	Vivienne	retired

2022-07-08 10:51:57	Western Cape		Yes I do	Wind	It 's cheaper than solar , but we need a mixture of wind and solar, especially in places where the wind doesn't blow day and night. Whatever benefits us as consumers must be taken into account for the final decision.	Johanna	retired
2022-07-08 10:50:59	Gauteng		Yes I do	Wind		Marion	retired
2022-07-08 10:49:34	Western Cape		Yes I do	Wind	I live in the garden route where there is always a breeze. Wind farms would be ideal along the mountain ridges as well as the coastline. The one obstacle would be getting buy-in from SanParks or the controlling body in the area. They have already blocked a possible wind farm close to Sedgefield!	GLENN	retired
2022-07-08 10:49:09	Western Cape		Yes I do	Wind		Jens	retired
2022-07-08 10:47:24	Western Cape		Yes I do	Wind	The future of electricity production is either wind or solar. The production of electricity by a private supplier can only be an improvement. As a private concern it will be a lean and efficient method, unlike Eskom which has an unusually large number of employees and should not be hampered by maintenance and negative staff problems. Unrealistic wage demands will not be a drawback for a private enterprise.	Graham	retired
2022-07-08 10:42:58	Western Cape		Yes I do	Wind		Ryan	retired
2022-07-08 10:42:23	Western Cape		Yes I do	Wind	Any renewable form of power will do. We should have CLEAN energy. Break the stranglehold that escom enjoys !!	Sarel	retired
2022-07-08 10:41:09	Western Cape		Yes I do	Wind	A study developed an SA wind atlas that showed there is enough wind in SA, across the country, to keep almost constant generation. It is the cheapest form of new electricity generation, it has a quick turnaround time from authorisation to generation; it has a short time to shut down and to come back online; it's fuel is free; energy is clean - no air pollution or carbon emissions; there are many companies ready and able to build wind power in SA; a CSIR study showed that it saved SA around R6bn in deferred diesel costs by not having to use the expensive diesel power generation as much as normal during an earlier set of loadshedding . There is constant new research in wind energy so we can capitalise on the latest technology. Wind energy is adaptable - can be as big or as small as required.	Melanie	retired
2022-07-08 10:40:44	Gauteng		Yes I do	Wind	We need to use renewable energy. Cut all red tape.	Christine	retired
2022-07-08 10:37:43	Western Cape		Yes I do	Wind		Eric	retired
2022-07-08 10:34:30	Western Cape		Yes I do	Wind	We have lots of it in CT	Helmut	retired
2022-07-08 10:34:14	Eastern Cape		Yes I do	Wind	I do not want nuclear as it would be too dangerous as they will not maintain it.	Robin	retired
2022-07-08 10:34:13	Eastern Cape		Yes I do	Wind	I do not want nuclear as it would be too dangerous as they will not maintain it.	Robin	retired
2022-07-08 10:34:10	Eastern Cape		Yes I do	Wind	I do not want nuclear as it would be too dangerous as they will not maintain it.	Robin	retired
2022-07-08 10:31:39	Western Cape		Yes I do	Wind	Wind & solar from IPPs immediately, nuclear added for long term.	John	retired
2022-07-08 10:28:19	Eastern Cape		Yes I do	Wind	Any other form of electricity generation is supported except coal and nuclear; All competition in this field will benefit the country as a whole as competition should keep power costs down.	Jean-Francois	retired
2022-07-08 10:25:34	Eastern Cape		Yes I do	Wind	Personally all the red tape just ties up everything and is completely unnecessary. Too many of the hierarchy are milking the system - what's changed!! They don't want to see change because they won't be able to milk the system any longer. The sooner we put all those wind turbine farms to use the better. We have lots of wind and sun - use what we have - its only common sense - not rocket science. By tying up with red tape it could take years and we all know they don't really know what they are doing. It just needs one signature and that's Cyril's. Easy!! We must take everything that has a kickback away from government control.	Gale	retired
2022-07-08 10:24:42	KwaZulu- Natal		Yes I do	Wind		PADDY	retired
2022-07-08 10:23:35	Limpopo		Yes I do	Wind	As long as the thugs in Parliament doesn't get their greedy paws on the income generated	FREDRICK	retired
2022-07-08 10:20:06	KwaZulu- Natal		Yes I do	Wind	SA has fallen way behind we have ideal conditions for solar & wind energy to be placed in almost any region of our country to fill power shortages & ample gas reserves to help with heating . It is just the greed of the ANC preventing this as they won't be able to get their hands on the coffers, the thugs they are . Thanks	Clive	retired
2022-07-08 10:17:28	Western Cape		Yes I do	Wind		Fanus	retired
2022-07-08 10:15:38	Gauteng		Yes I do	Wind		Karen Margrethe	retired
2022-07-08 10:14:16	Western Cape		Yes I do	Wind	We need to replace the failed coal based system with clean energy as quickly as possible .	John	retired
2022-07-08 10:12:11	Gauteng		Yes I do	Wind		Ronald	retired
2022-07-08 10:11:26	Western Cape		Yes I do	Wind		Andre	retired

2022-07-08 10:07:20	KwaZulu-Natal		Yes I do	Wind	The wind is a more efficient power source than solar. Wind turbines release less CO2 to the atmosphere. A wind turbine produces 4.64 grams of CO2/1kWh while the solar panel produces 70 grams of CO2/1kWh. Wind power consumes less energy and produces more energy compared to solar panels.	Petronella	retired
2022-07-08 10:05:50	Western Cape		Yes I do	Wind		Sandra	retired
2022-07-08 10:03:59	Western Cape		Yes I do	Wind		Tobie	retired
2022-07-08 09:55:44	Western Cape		Yes I do	Wind	Without immediate action (And this should have been done some 10 years ago) there is very little chance of South Africa being in a position to reset the direction currently in place - down! We need to address and contain costs as far as is possible !	Barry	retired
2022-07-08 09:55:34	Gauteng		Yes I do	Wind	I would prefer solar and wind as they are environmently friendly	Gedion	retired
2022-07-08 09:55:33	Gauteng		Yes I do	Wind	I would prefer solar and wind as they are environmently friendly	Gedion	retired
2022-07-08 09:55:26	Gauteng		Yes I do	Wind	I would prefer solar and wind as they are environmently friendly	Gedion	retired
2022-07-08 09:54:21	Western Cape		Yes I do	Wind	We need to immediately start implementing alternative energy Wind and solar. Nuclear power is not safe and toxic waste, coal is effecting climate change at a rapid rate and gas is environmentally unfriendly South Africa needs to get into the 21st century	Katrin	retired
2022-07-08 09:54:01	Western Cape		Yes I do	Wind	We need to immediately start implementing alternative energy Wind and solar. Nuclear power is not safe and toxic waste, coal is effecting climate change at a rapid rate and gas is environmentally unfriendly South Africa needs to get into the 21st century	Katrin	retired
2022-07-08 09:33:59	Outside SA	Germany	Yes I do	Wind	As one can only select one answer above, I would like to add Solar to my above answer as well as excess power which could be available from Sugar factories which burn the trash after extracting the juice.	Egmont	retired
2022-07-08 09:25:55	Gauteng		Yes I do	Wind	there are already wind generators around and wind is free. they would need to take precautions to protect the birds.	Robert	retired
2022-07-08 09:06:59	KwaZulu-Natal		Yes I do	Wind		Michiel	retired
2022-07-08 09:05:41	Eastern Cape		Yes I do	Wind	Wind is there, it's always there, and it's clean, let's use it.	Cedric	retired
2022-07-08 09:04:24	Western Cape		Yes I do	Wind	The incompetence of Eskom to provide a service is now a joke and we are the laughing stock of the world. How can you fire all the white engineers that know what they are doing and replace them with uneducated, untrained monkeys and expect the service to run smoothly. We have gone from the worlds leading supplier to a non-supplier in a few short years. At the current rate of decline we will soon have total blackout! The whole economy will crash and we will have to beg the world for aid that will be skimmed off by the elite ANC cadre.	Don	retired
2022-07-08 08:54:35	Gauteng		Yes I do	Wind	We have many options in SA with wind, hydro, solar...any and all options should be developed and used. Without even interfering with climate	Marlene	retired
2022-07-08 08:53:50	Gauteng		Yes I do	Wind	We have many options in SA with wind, hydro, solar...any and all options should be developed and used. Without even interfering with climate	Marlene	retired
2022-07-08 08:13:35	Limpopo		Yes I do	Wind	It's a proven fact that there is enough wind energy generated to keep SA afloat. Manthase and his cadres have their hands in the cookie jar to prevent any form of other renewable energy as they will loose their backhanded income Remove this ungodly government and replace with a God fearing government and God will lead this country back to the hilltop	Adriaan	retired
2022-07-08 08:01:49	Western Cape		Yes I do	Wind	It is time for Eskom's looting monopoly to be ended.	Fuad	retired
2022-07-08 07:35:11	KwaZulu-Natal		Yes I do	Wind		Patricia	retired
2022-07-08 07:30:24	Gauteng		Yes I do	Wind	Our country is suited for wind and solar power generation. Giving private enterprises the right to power generation will be good as long as no government linked parties are allowed to join like Patrick Motsepe who has conveniently everything in place to generate power but inconveniently are family of Cyril Ramaphosa.	Mike	retired
2022-07-08 07:29:52	Gauteng		Yes I do	Wind	Our country is suited for wind and solar power generation. Giving private enterprises the right to power generation will be good as long as no government linked parties are allowed to join like Patrick Motsepe who has conveniently everything in place to generate power but inconveniently are family of Cyril Ramaphosa.	Mike	retired
2022-07-08 07:05:51	KwaZulu-Natal		Yes I do	Wind	The Durban Coast is renowned for wind and lots of sun. We need to immediately REWARD the resourcefulness of our KZN citizens by allowing full and UNFETTERED access to development of these energy sources. We should also investigate power production from the wave activity off our Eastern Coast (the UK has experimental stations already) - we have the expertise & initiative which MUST NOW BE RELEASED.	richard cairncross	retired

2022-07-08 06:57:52	Gauteng	Yes I do	Wind	Instead of wasting money on trying to keep Eskom providing enough power to keep our lights on , the government should embrace IPP's and abolish any limitations on the amount of power they can add to the grid! Added to that, spend the money on building wind farms as soon as possible. We are blessed in this country with plenty of wind to keep the turbines running to supply electricity to power the nation! And lastly, keep Gwede Mantashe out of any decision making process because he will still advocate for Karpower!! ???	Geoff	retired

2022-07-08 09:40:09	Western Cape		Yes I do	Wind	It is time for Eskom to go - its own CEO has noted that even at full capacity (which will never be permitted to happen - the looting, corruption, sabotage and profiteering will never end - why should it?), Eskom will never be able to meet more than 69% of SA's needs. Just to get it to meet environmental standards will take a R300Bn bailout. It is failed, utterly corrupt, and a case study in cadre-ism - there is zero point in propping it up and allowing the economy to tank at its feet. We have more than ample sun, wind and hydroelectricity potential. Get rid of Eskom before what little is left of a post-covid, raped economy, is decimated.	Erica	
2022-07-08 06:24:17	Western Cape		Yes I do	Wind	Get private power suppliers to immediatly supply to the grid.	Ritap	
2022-08-03 14:53:47	Western Cape		Yes I do	Wind	Solar en wind krag kan opgewek word waar daar grond lê wat vir niks gebruik kan word nie	Jan	
2022-08-01 14:50:19	Eastern Cape		Yes I do	Wind	A combination of solar, wind and small nuclear units should do the trick. My worry on the small nuclear units is this, do we have the mental capacity and managerial skill to run them safely?	Percy	
2022-07-29 16:07:03	Western Cape		Yes I do	Wind		Linda	
2022-07-20 16:38:26	Gauteng		Yes I do	Other	There needs to be a mixture of power generation technologies, with strong emphasis on the 'renewables'; with coal and diesel being completely phased out. The recent suggestion of a second state owned power utility is absurd. Every state owned or parastatal enterprise is a disaster with incompetent management, apathy and corruption being the order of the day. The most recent proposal by Eskom to charge households with solar capacity a +R900 monthly levy is equally absurd. Solar is relatively expensive to install in households and therefore the owners need to see as best a ROI as possible; Eskom should be offering rebates (as they used to), not 'taxes'! Eskom and government's inability to managed and plan has largely led to this crisis. Eskom's customer base is shrinking and they're trying desperately to hold onto their income, that combined with an inflated workforce that adds little value. To succeed, SA needs to address the strangle hold of organised labour on the economy!	Colin	unemployed individual
2022-07-20 14:39:31	Western Cape		Yes I do	Other	Hydro, solar, and wind depend on what area in South Africa and use the coastlines for wind farms as in the UK. It doesn't damage sea life and needs little wind to generate power. Escom shouldn't have a monopoly on supplying electricity.	Ilse	unemployed individual

2022-07-19 15:59:52	Western Cape		Yes I do	Other	<p>I Choose RENEWABLE Energy:))</p> <p>1. Renewable energy is energy derived from NATURAL sources that are REPLENISHED at a HIGER RATE THAN THEY ARE CONSUMED. Sunlight, water, and wind, for example, are such sources that are constantly being replenished. Renewable energy sources are PLENTIFUL and ALL AROUND us.</p> <p>2. Fossil fuels - coal, oil and gas - on the other hand, ARE NON-RENEWABLE resources that take HUNDREDS OF MILLIONS OF YEARS to form. Fossil fuels, when burned to produce energy, cause HARMFUL greenhouse gas emissions, such as carbon dioxide.</p> <p>3. GENERATING RENEWABLE ENERGY CREATES FAR LOWER EMISSIONS than burning fossil fuels. Transitioning from fossil fuels, which currently account for the lion's share of emissions, to renewable energy is KEY to addressing the ELECTRICITY CRISIS, ENERGY CRISIS, AND CLIMATE CHANGE CRISIS!!</p> <p>4. RENEWABLES are now cheaper in most countries, and GENERATE THREE TIMES MORE JOBS than fossil fuels.</p> <p>#HERE ARE A FEW COMMON SOURCES OF RENEWABLE ENERGY:)</p> <p>1. SOLAR ENERGY</p> <p>Solar energy is the most abundant of all energy resources and can even be harnessed in cloudy weather. The rate at which solar energy is intercepted by the Earth is about 10,000 times greater than the rate at which humankind consumes energy.</p> <p>Solar technologies can deliver heat, cooling, natural lighting, electricity, and fuels for a host of applications. Solar technologies convert sunlight into electrical energy either through photovoltaic panels or through mirrors that concentrate solar radiation.</p> <p>Although not all countries are equally endowed with solar energy, a significant contribution to the energy mix from direct solar energy is possible for every country.</p> <p>The cost of manufacturing solar panels has plummeted dramatically in the last decade, making them not only affordable but often the cheapest form of electricity. Solar panels have a lifespan of roughly 30 years, and come in variety of shades depending on the type of material used in manufacturing.</p> <p>2. WIND ENERGY</p> <p>Wind energy harnesses the kinetic energy of moving air by using large wind turbines located on land (onshore) or in sea- or freshwater (offshore). Wind energy has been used for millennia, but onshore and offshore wind energy technologies have evolved over the last few years to maximize the electricity produced - with taller turbines and larger rotor diameters.</p> <p>Though average wind speeds vary considerably by location, the world's technical potential for wind energy exceeds global electricity production, and ample potential exists in most regions of the world to enable significant wind energy deployment.</p> <p>Many parts of the world have strong wind speeds, but the best locations for generating wind power are sometimes remote ones. Offshore wind power offers tremendous potential.</p> <p>3. GEOTHERMAL ENERGY</p> <p>Geothermal energy utilizes the accessible thermal energy from the Earth's interior. Heat is extracted from geothermal reservoirs using wells or other means.</p> <p>Reservoirs that are naturally sufficiently hot and permeable are called hydrothermal reservoirs, whereas reservoirs that are sufficiently hot but that are improved with hydraulic stimulation are called enhanced geothermal systems.</p> <p>Once at the surface, fluids of various temperatures can be used to generate electricity. The technology for electricity generation from hydrothermal reservoirs is mature and reliable, and has been operating for more than 100 years.</p> <p>4. HYDROPOWER</p> <p>Hydropower harnesses the energy of water moving from higher to lower elevations. It can be generated from reservoirs and rivers. Reservoir hydropower plants rely on stored water in a reservoir, while run-of-river hydropower plants harness energy from the available flow of the river.</p> <p>Hydropower reservoirs often have multiple uses - providing drinking water, water for irrigation, flood and drought control, navigation services, as well as energy supply.</p> <p>Hydropower currently is the largest source of renewable energy in the electricity sector. It relies on generally stable rainfall patterns, and can be negatively impacted by climate-induced droughts or changes to ecosystems which impact rainfall patterns.</p> <p>The infrastructure needed to create hydropower can also impact on ecosystems in adverse ways. For this reason, many consider small-scale hydro a more environmentally-friendly option, and especially suitable for communities in remote locations.</p> <p>5. OCEAN ENERGY</p> <p>Ocean energy derives from technologies that use the kinetic and thermal energy of seawater - waves or currents for instance - to produce electricity or heat.</p> <p>Ocean energy systems are still at an early stage of development, with a number of prototype wave and tidal current devices being explored. The theoretical potential for ocean energy easily exceeds present human energy requirements.</p>	Jolanda	unemployed individual

2022-07-19 10:19:09	Gauteng		Yes I do	Other	I support a hybrid of renewable solutions with immediate effect by independent producers. Solar, Wind and Hydro. Eskom and its political inspired corruption has failed just like every other State owned entity. Get over yourselves.	Glenn	unemployed individual
2022-07-18 20:36:54	Eastern Cape		Yes I do	Other	Scrap Eskom is all I have to say. They have failed and will continue failing. We can no longer afford their failures and gross theft. Let's go independent!	Janeen	unemployed individual
2022-07-16 07:53:02	Western Cape		Yes I do	Other	Oil is the second most available fluid on earth? Diesel and Petrol prices should be R7-00 per liter? The Government should stop with all their lies and give us the truth and then one can make suggestions and decisions. I am real tired of all the lies in this country.	Johan	unemployed individual
2022-07-14 19:03:29	KwaZulu-Natal		Yes I do	Other	Use multiple alternate methods of electricity. Different regions and cities require different methods. The end result should be to ensure there is enough energy for all at a reasonable price. We need competitive suppliers to allow for growth.	Angelique	unemployed individual
2022-07-14 12:29:41	Gauteng		Yes I do	Other	South Africa is arguably one of the richest countries in the world regarding its geography, climate and natural resources. South Africa is a viable candidate for hydro power, wind power, nuclear and solar power. My suggestion is the following: We cannot go back to a broken system or back in time to fix it when it should have been upgraded. There's no going back. The only way is forward and the smartest way is the most sustainable and enduring one. The entirety of the country should take steps to moving towards solar power sustainability, residentially and commercially. Families and commercials could pay a standard fee to an independent agency to install the solar software. This standard fee should do a few things; 1. It should in part go toward settling the country's debt (no1 is going to do this but the citizens sorry peeps) 2. The fee should be reasonable to the client and vendor. Once setup and having taken the load of their family or business off the electrical grid, families and commercials should be rewarded with tax returns and incentivised through the tax system. This is where the government comes into play, not to take over and redirect funds but to make some sort of return the the people and independent agencies for carrying their load. I don't know too much about hydro energy in our country. But we have numerous lakes and dams so that should be an option. Our coastlines and costal cities should be riddled with wind power generators. Gauteng has a nuclear facility in Hartebeespoort and as the nations hub Johannesburg and Pretoria should run on nuclear power and solar. In the nations power resolution the government should not be involved at all, especially financially, unless they are fulfilling the roll of providing tax returns to citizens carrying the load. Also, if families/businesses can pay for the solar upgrades of their surrounding families/businesses, they should be incentivised to do so. NB! sustainable power solutions should not incur long term charges, that is why it is sustainable. Citizens should not be fined for harnessing the power of the sun etc. When the government cannot provide power they cannot then turn to the citizens to fine and forbid them from getting power in other ways. They HAVE no power. All the citizens of this country should recognise that the South African government is in fact powerless in many ways.	Adrienne	unemployed individual
2022-07-14 12:14:35	Gauteng		Yes I do	Other	Whatever policies are put in place should allow businesses and private owners to set up their own electricity generation. Also especially for the IPP's who would want to provide electricity to the grid and sell to their own clients as well. I think the method of electricity production should be a combination of solar, wind, conventional and renewable strategies. There are enough professionals in the various fields to help SA get to that point but the unions and workers are making it too difficult.	Alma	unemployed individual

2022-07-13 18:21:59	Western Cape		Yes I do	Other	<p>ALL ENERGY IS GOING TO BE FREE: https://www.researchgate.net/publication/327534493_Nikola_Tesla%27s_Free_Electricity_Electronic_Circuit#39;s_Free_Electricity_Electronic_CircuitEnergy</p> <p>Environmental Impacts of Geothermal Energy: https://www.ucsusa.org/resources/environmental-impacts-geothermal-energy</p> <p>Environmental Impacts of Hydroelectric Power: https://www.ucsusa.org/resources/environmental-impacts-hydroelectric-power</p> <p>Environmental Impacts of Hydrokinetic Energy: https://www.ucsusa.org/resources/environmental-impacts-hydrokinetic-energy</p> <p>Environmental Impacts of Wind Power: https://www.ucsusa.org/resources/environmental-impacts-wind-power</p> <p>Environmental Impacts of Solar Power: https://www.ucsusa.org/resources/environmental-impacts-solar-power</p> <p>The Russians are quietly preparing to release free energy technology and they will do that as soon as the power of the dark forces (Governments), is diminished sufficiently that it is safe to do so: https://csglobe.com/free-energy-breakthrough-russia/</p> <p>https://pressclub.ch/transmutation-delements-chimiques-par-la-methode/?lang=en</p>	cheri	unemployed individual
2022-07-13 13:56:25	Western Cape		Yes I do	Other	Use a variety of power generating option, just as long as small businesses and individuals can survive and generate an income ...just get the economy moving and generate jobs	Anita	unemployed individual
2022-07-13 07:09:11	Western Cape		Yes I do	Other	<p>Eskom has stated many times that it cannot produce enough electricity to supply the needs of South Africa. Surely it makes common sense to purchase electricity elsewhere in order to sustain the infrastructure of the country. How this electricity is produced in the current circumstances is not relevant. The procurement process in its current form is drawn out and must be scrapped or replaced. There, I am sure is sufficient regulations in place to control the manufacture of electricity. So lets get on with it and purchase electricity elsewhere support the needs of the country. By not making sure that we do not have sufficient electricity will only serve to slow the creation of infrastructure which in turn will slow job creation. And we can go on and on about this and its effects on the country as a whole.</p> <p>It is simple. Go to the shops where electricity is sold and make a bulk buy offer. It would boost the economy etc. Need I say more.</p>	Peter Ralph	unemployed individual
2022-07-13 07:09:09	North West		Yes I do	Other	Let IPP chose the better and cheap method to supply power, as long as we wont experience loadshedding anymore	Modise	unemployed individual
2022-07-13 03:51:12	KwaZulu- Natal		Yes I do	Other	I have chosen other as method as I feel, under the current circumstances, any method of generating electricity is better than no electricity. My household was without electricity for 13 hours on Monday 11/07/2022 and on an average day we experience 3 load shedding sessions and often these schedules which are sent out to citizens around which we must plan our living and working, are extended without notification or reason. I read information relating to how municipalities are not tolerating illegal electricity connections, destruction of property, illegal protesting etc. but my question is so what are these Municipalities doing about it?? I went onto to reading how households earning less than R5 000 may apply for free electricity. There is no such thing as "free" anything. When people arrange illegal electricity connections, they are stealing from Municipalities and in my opinion, when "free" anything is being offered, this is stealing from tax payers. If every person living in this country paid towards what they were receiving, South Africa would be a better run and more successful country and we would all benefit from cheaper rates due to more people contributing instead of fewer citizens having to carry the financial load for a greater number of non-payers. I find it very disappointing that so few citizens have had their say on this topic - does this mean that South Africans are becoming compliant and accepting of unreasonable living conditions?? I don't think there is a register of how many lives have been lost directly or indirectly due to load shedding. Old people who may not be able to handle the cold Winters and those needing medication attention that requires a stable electricity supply, may be dying so effectively the mismanagement of Eskom may be killing people. Businesses that have suffered due to lack of stable electricity supplies many be closing down and families are loosing their income as a result - this may result in hardships that may also result in deaths. Wake Up! South Africa Wake Up! Have your say and politicians LISTEN! to your citizens	Antoinette	unemployed individual
2022-07-12 20:29:48	Gauteng		Yes I do	Other		Bongani	unemployed individual
2022-07-12 18:56:38	Northern Cape		Yes I do	Other	A combination of solar, wind and diesel/biodiesel - each household in SA has at least one of these resourses at a time where another may not be viable.	Remie	unemployed individual

2022-07-12 17:43:41	Western Cape		Yes I do	Other	<p>It's time for the government to admit they are useless, and to leave energy to the experts.</p> <p>Government to get out of the way, cut the red tape, and let the experts do what they do best.</p> <p>Like the government, I am not an expert. However, I think we need to go for whatever is quickest to get us out of this terrible situation we find ourselves in and implement solar as much as possible.</p> <p>This is all government's fault. Experts have been calling for more power generation for years, but government chose to LOOT and steal and now they are protecting their cadres sitting in Eskom and government being useless. Give De Ruyter a break and let him fire the people he needs to so that we don't have a complete breakdown of the power system.</p>	Carol	unemployed individual
2022-07-12 14:44:42	Gauteng		Yes I do	Other	South-African government exhaust its supplies by also supplying other countries and places with the very necessary coal that is formed on our soil. It is important to look at safe, economical ways to first save the economic from further crippling.	Ria	unemployed individual
2022-07-12 13:22:03	Gauteng		Yes I do	Other		Saroja	unemployed individual
2022-07-12 12:36:26	Gauteng		Yes I do	Other	All and any kind	Gert	unemployed individual
2022-07-12 09:52:49	Gauteng		Yes I do	Other	<p>Kern krag sal die goedkoopste wees. met dien verstande dat daar 100% verantwoordelike persone aangestel sal word om die krag sentrale te bedryf.</p> <p>Solar sal die ander alternatief wees. Gebruik die resource want God gee dit gratis.</p> <p>Die korupsie moet uitgeroei word dan sal al die dienste wat reg bestuur was, weer kan reg kom.</p> <p>Verwyder die ANC uit die prentjie wat die land in die afgrond in dompel.</p>	marius	unemployed individual
2022-07-12 08:17:25	Gauteng		Yes I do	Other	I think all legislation should be dropped regarding generation of electricity. We should encourage free thinking and invention to come up with new, cheap, sustainable energy production rather than the antiquated ways we produce power at the moment.	Lesley	unemployed individual
2022-07-12 03:25:47	Gauteng		Yes I do	Other	In my opinion due to the state of our Power Supply in the Country, any available source that can supply power should be allowed to do so for the sake of the Country. It's obvious to even the most critical observer that Eskom is teetering on the brink of collapse. What is more important, the bolstering of Eskom or the welfare of the Country? In my opinion, if Eskom does crash then the Country will follow suite. So for the Country's sake, let the independent Electric Suppliers supply the Grid until a more stable situation arises.	Andrew	unemployed individual
2022-07-11 20:56:29	Gauteng		Yes I do	Other		Elsa	unemployed individual
2022-07-11 20:53:45	Gauteng		Yes I do	Other	<p>My question is. Does the President as well as the cabinet members and the rest of Government experience loadshedding? We are going back in time.</p> <p>This is ridiculous. How come nothing has been maintained to avoid this? What has happened to becoming the New South Africa? Promises have continuously been made and never kept. Who does one really believe at election time? Just a thought. What is going to happen to the next generation? How are they going going to survive?</p>	Marlene	unemployed individual
2022-07-11 15:57:21	Gauteng		Yes I do	Other	I believe that ESKOM has proven beyond a shadow of a doubt that they are incapable of providing electricity to South Africa. Give private businesses an opportunity to meet the electricity demand and give the public a right to choose their service provider.	Heila	unemployed individual
2022-07-11 15:46:45	Western Cape		Yes I do	Other	Selectin of electrical power	Sally	unemployed individual
2022-07-11 15:46:24	Mpumal anga		Yes I do	Other	<p>There are a lot of independent power producers in this country, why can't they tap into the power grid and help supply South Africa with power.</p> <p>Eskom can supply power to other countries without load shedding, but they are useless in supplying their own country with power and we have to just suffer the consequences</p>	Robert	unemployed individual

2022-07-11 15:23:46	Western Cape		Yes I do	Other	<p>The fact that government still has it's fingers in the electrical supply to individual South Africans is an unprecedented mess.</p> <p>Legislation should be amended to allow both corporations and individuals to produce electricity by what ever means they find most economical.</p> <p>The ONLY role government should play in terms of this, is to make sure that all implementations meet safety standards. Not just locally, but internationally.</p> <p>We can't wait for government to get off of it's collective posterior to bring us Nuclear power, it's too damn late in the game for that. It will take at least 5 years to construct a Nuclear power plant and we all know with the ANC in charge, that won't come online for at least another 30 years, because of all the palm-greasing that would have to happen.</p> <p>What we need, are solutions that will stop this idiocy right now!</p> <p>i.e. No person or corporation who elects to solve their electrical needs using alternative energy sources, should have to jump through any bureaucratic red tape, with respect to ANYTHING other than current electrical safety specifications.</p> <p>Individual South Africans need independence from all things corporate and government with respect to seeing to their own energy needs. This is the only way forward now, the ANC has been stuffing things around for too long. There is no single solution that will bridge the gap between what we need right now, and what the government will be able to do within any acceptable time frame.</p> <p>Simply stated: Get government's corrupt grubby fingers off of our energy supply, and let us solve the problem for ourselves. At least then when the power goes out, we can solve the problem ourselves.</p>	Dirk	unemployed individual
2022-07-11 12:38:24	Gauteng		Yes I do	Other	Anything that is going to end loadshedding	Edward	unemployed individual
2022-07-11 12:04:06	Western Cape		Yes I do	Other	I have no clue what kind of energy should be adopted. That is up to experts. However if we don't get independent providers ASAP, our country will cease to function. We will enter a famine due to lack of production, refrigeration etc. There will be looting and rioting etc. Does Mantashe not understand the outcomes of going dark??? Where is Cyril??? Oh, #CyrilFailsAgain	Carmen	unemployed individual
2022-07-11 12:03:51	Gauteng		Yes I do	Other	Any form of renewable energy, be it Hydro, Solar or Wind or a combination of all three. It would also greatly decrease the carbon footprint on this earth. Another suggestion is to install desalination plants around our coasts to alleviate the constant water shortages our country experiences	John	unemployed individual
2022-07-11 11:42:17	Western Cape		Yes I do	Other	I think that we need to take a varied approach to solving our energy crisis. Each solution comes with its own challenges, so a combination of wind, solar, gas etc will offer a broader range of options. The red tape should be scrapped so that independent organizations can provide energy.	Teri	unemployed individual
2022-07-11 11:07:31	Gauteng		Yes I do	Other	I do not care what method they use to generate power as long as a long term solution is found.	Nowell	unemployed individual
2022-07-11 09:42:49	Western Cape		Yes I do	Other	While transitioning - Eskom should make fuel from plastic waste for the diesel generators. Plastic pyrolysis Secondly, you need fractionalizing generating capacity through solar. Ask me how and what I mean by this	Ian	unemployed individual
2022-07-11 09:12:34	Western Cape		Yes I do	Other	A combination of wind and solar to relieve the pressure of load shedding which has impacted us on all levels for example, business, labour, crime, unemployment and poverty. We should also have an alternative energy provider as competition to Eskom who is currently riddled with corruption, malfeasance and incompetence.	louis	unemployed individual
2022-07-11 09:01:07	Outside SA	United Kingdom	Yes I do	Other	It would need to be a mix of renewable, there is already an investment of renewables in SA	Trudi	unemployed individual
2022-07-11 08:56:00	Mpumal anga		Yes I do	Other	There are so many established, tried, tested and new technologies to facilitate alternative additional power generation. This will have new employment and many economic opportunities too.	Boris	unemployed individual
2022-07-11 08:55:57	Mpumal anga		Yes I do	Other	There are so many established, tried, tested and new technologies to facilitate alternative additional power generation. This will have new employment and many economic opportunities too.	Boris	unemployed individual
2022-07-11 08:46:42	Western Cape		Yes I do	Other	I think a balanced combination of resources should be used. Private suppliers will stop the monopoly and annexation of the country.. We can no longer afford to be held hostage by a failing electricity supplier as Escom where there is more political interference for self gain.	Liselle	unemployed individual
2022-07-11 08:45:36	KwaZulu- Natal		Yes I do	Other		Vana	unemployed individual
2022-07-11 08:14:10	Western Cape		Yes I do	Other	RENEWABLE - whether it is solar, wind or hydro. These must be serious options.	L	unemployed individual
2022-07-11 08:05:59	Gauteng		Yes I do	Other	Not interested even the bananas are expensive and we on a banana country	Lorry	unemployed individual
2022-07-11 07:12:08	Mpumal anga		Yes I do	Other	All possible power generation avenues should be allowed play in the space to produce power, so long it's not harmful to mankind, animals and the entire biosphere.	Nkululeko	unemployed individual

2022-07-11 06:59:38	Western Cape		Yes I do	Other	Wind, solar & hydro power supply should be investigated as these are abundantly available in SA. Initial set up costs may be high but over time would be inexpensive & environmentally friendly.	Paul	unemployed individual
2022-07-11 06:31:34	KwaZulu- Natal		Yes I do	Other	Definitely renewables.	Ernest	unemployed individual
2022-07-11 06:22:19	Western Cape		Yes I do	Other	Enough is enough we buy but can't use what we buy price goes up for whose benefit? There's got to be another way out.	Robin	unemployed individual
2022-07-11 06:15:48	Gauteng		Yes I do	Other	Although I don't understand, what I have to choose but whatever will make south Africa to have electricity is ok with me, as long as the loadshedding stops.	Nestar	unemployed individual
2022-07-10 23:26:04	Eastern Cape		Yes I do	Other	I selected "other" as I want independent producers to be allowed to create electricity. Doesn't matter what it is derived from, gas, hydro, coal etc. Either remove Eskom or remove the unions.	Jenni-Lee	unemployed individual
2022-07-10 22:42:10	Outside SA	Germany	Yes I do	Other	Combination of fixing up old coal stations and allowing private sector to provide renewable energy. We also have more than enough waste that could be burnt for energy. Zero to landfill. Also no regulations or requirements to provide to the grid that opens it up for fraud. Companies must be allowed to procure directly to the consumer.	David	unemployed individual
2022-07-10 20:25:46	Gauteng		Yes I do	Other		Sandy	unemployed individual
2022-07-10 19:56:14	KwaZulu- Natal		Yes I do	Other	It is time, and there are so many options for South Africa to choose from, nuclear being the last option. Eskom cannot do it alone.	Heidi	unemployed individual
2022-07-10 18:17:47	Free State		Yes I do	Other	The government should stop exporting our electricity to Zimbabwe, Lesotho, eSwatini, Namibia, Botswana, Mozambique and Zambia. They should focus on supplying electricity to the increasing population of South Africans only. The government should not have all the monopoly on electricity generation but instead allow private companies or individuals to produce it and thus creating a free market. This can also help bring down the prices of electricity since there will be competition.	Sabrina	unemployed individual
2022-07-10 16:35:51	Western Cape		Yes I do	Other	Decentralization of energy generation, preferably down to the household/ neighbourhood/community level, should become widespread and normal across the socio-economic spectrum. The specific method is of secondary importance, but mere economic practicalities in context would tend towards renewables. Diversity is more important: have as many sources as practical feeding into and supplementing one another.	Dawie	unemployed individual
2022-07-10 15:17:44	Gauteng		Yes I do	Other	The current situation can not be allowed to continue.	Theo	unemployed individual
2022-07-10 15:03:07	Gauteng		Yes I do	Other	All of the options.	Odette	unemployed individual
2022-07-10 12:28:39	Free State		Yes I do	Other	First off. Forget about renewables. At least in the sense of longterm solutions. The criminals, I mean anc government will still figure out a way to tax independent providers to make initial investments not worth it for the amount of gains. Nuclear is the way to go for longterm power needs. But please rather stay away because our bbbee and aa hiring and contractors policies will cause leaks and explosions that will leave Southern Africa a Mad Max like apocalypse landscape. Witch brings me to the real solution. So first they hired de Ruyter to be head of Eskom, but they tied his hands. He was not allowed to hire the necessary people with the necessary skills to get Eskom back on track. The solution is real easy. Get the right people with the correct skill sets to get Eskom back to the world leading energy producer it was before 1994. Stop hiring on ideological principles and start getting the right people for the job. These illegal strikes have to be handled correctly. The union bosses should be arrested and made to pay for their transgressions. They are holding this country ransom for their own selfish gains. Fire the surplus useless workers who do nothing but sabotage and steal equipment, and strike selfishly for undeserved wage increases. If you cost the company more than you bring in then you are not an asset, you are a drain on production. Also make unions illegal. There is a reason China has such a powerful workforce and means of production and that is no unions. Perhaps to stop exploitation, unions are still necessary for the time being, but they should still be phased out and probably be replaced by a better system like heavy penalties and fines for companies that exploit their workers. But that won't work for state owned entities. Witch just brings me back to hiring people who can do the job and who are altruistic. We are stuck at the moment with a workforce who believe and are convinced that they are owed everything for doing nothing. I suppose due to the fact that as long as Eskom is a state owned entity we can forget about it being fixed. So independent power providers will be the next obvious step. But all red tape needs to be cut. That means no bbbee and aa hiring policies. And fair pricing for the power that is provided and fed into the grid. I did some research, and at the current pricing one gets paid for putting surplus power back in the grid, which includes licenses, etc, you will be able to pay off your setup in about 50 years. And if you put all your solar into the system without using any of it for yourself as a private individual, it will take 20 years to make good on your investment. Where is the incentive? And that's it. Let the independent producers use whatever way they can to power up this country. How long do these criminal government cronies think this country can go on like this?	Duke	unemployed individual

2022-07-10 12:01:09	Eastern Cape		Yes I do	Other	I am no expert, but we need too look at a long term solution from many sources. Wind and solar seam to offer the more renewable energy, but I don't know the costs involved in setting up and running these, long or short term. But if we have many providers all competing for the best price without ruling party syphoning off the cream, it will free up businesses large and small to empower this country to move forward again....in my opinion.	James	unemployed individual
2022-07-10 11:16:43	Gauteng		Yes I do	Other	We have the right to choose no other person or group has the the right to make choices for us. All parties must be in agreement but the governments do it for us which is actually ilegal.	Ters	unemployed individual
2022-07-10 11:08:33	KwaZulu- Natal		Yes I do	Other	I choose other because I don't want to limit the ways in which electricity can be produced	Samkelo	unemployed individual
2022-07-10 08:05:02	Eastern Cape		Yes I do	Other	ANY form of power production should be allowed, as long as it conforms to environmental regulations.. The government / Eskom are not providing sufficient electricity. Other people / businesses being able to provide electricity would allow the need to be met more easily. There is no reason not to allow other businesses to produce electricity, other than greed & corruption.	Kim	unemployed individual
2022-07-10 06:59:17	Western Cape		Yes I do	Other	Yes Government must allow independente Power producers to help stir the economy to the right direction, because the way it's going now, it's heading to disaster. If it continues with the load shading.	Joao	unemployed individual
2022-07-10 06:25:40	Gauteng		Yes I do	Other	Op die huidige stadium word Suid Afrika se mense deur regerings departemente aan die neuse rondgelei deurdat daar vir ons vertel word dat Eskom in sy maai is, terwyl die EINTLIKE probleem van KORRUPSIE, en DIEFSTAL, nie uitgesorteer word nie. Daar is hoeveel kundige mense op grondvlak wat die probleem kan uitsorteer, maar gebrek aan befondsing (omdat dit op bestuursvlak GESTEEL en VERDUISTER is) is buite die kwessie. Intussen ly mense honger, as gevolg van werkloosheid en niemand neem die inisiatief om net die vrot appeals uit die regering sak UIT TE HAAL, en die REGTE besluitnemers aan bewind te stel, nie. Ek sê: 1. Kry die TOP STRUKTUUR in orde; 2. Gee mense wat IETS WEET, 'n kans om dit wat hulle positief kan bydra, 'n KANS om hulle kennis teen vergoeding te kan implementeer; 3. Lei mense op, sodat wanneer punt 2 se kenners moet aftree, die geleentheid ALREEDS geskep is om die volgende geslag kenners te kan akkommodeer, en sodoende word daar WERKSGELEENTHEDE geskep vir ons volgende generasie; 4. Begin soos VOLWASSENES dink. As jy nog nooit geleer het om vir jouself te begin dink nie, is hierdie 'n goeie oefening om dit te BEGIN doen. EERLIKHEID, en INTEGRITEIT word in jou DNA gesit as jy die dag gebore word en JY kies of jy dit wil gebruik, en of jy eerder KORRUP of ONINTEGRITEIT in jou lewe wil toelaat. JOU KEUSES, het egter verantwoordelikhede ook, en as jy 'n verandering wil sien, moet ELKEEN SELF KIES OM DIE VERANDERING TE WEES, maar daar is net krag in die moontlikheid wanneer MENSE SAAM BESLUIT OM 'N POSITIEWE VERSKIL in mekaar se lewens, te maak. Ek hoop en vertrou dat iemand wat 'n daadwerklike invloed in hierdie netelige saak het, IETS DAADWERKLIK kan doen om hierdie HAGLIKE omstandighede in Suid Afrika te KAN OPLOS. Want ons woon in 'n land waar daar soveel PRAGTIGE mense, met die WONDERLIKSTE inisiatiewe woon. Ons kinders wil nie meer in Suid Afrika woon nie, want hulle SIEN hoe ONS (hulle ouers), OPGEE omdat ONS nie vir ons KINDERS meer 'n toekoms WIL gee nie, want ONS LAAT TOE DAT ONS LAND DEUR KORRUPTE regerings departemente BINNE IN SY MOER geploeg word.	Lizelle	unemployed individual
2022-07-10 06:09:29	KwaZulu- Natal		Yes I do	Other	There are many south african 's empowering themselves by doing what government cannot. I know and have seen systems built and put in place so that loadshedding is a thing of the past. However to assist the entire South Africa, government will have to help. As many of our people are either unemployed, or on grants, the affordability of such equipment is unattainable.	Jasmin	unemployed individual
2022-07-10 05:46:47	Gauteng		Yes I do	Other	I actually don't care what the source of our electricity is. South Africa needs power. The cheaper and more speedily it's provided the better.	Anne	unemployed individual
2022-07-10 05:29:39	Free State		Yes I do	Other	Ever possible source to generate electricity should be used seeing what we currently have is clearly not enough and have a negative impact on our economy	Lourens	unemployed individual
2022-07-10 05:00:28	Gauteng		Yes I do	Other	Hydro, Solar, Wind and or any of the free energy generation devices that have not yet been subverted or suppressed by the vested energy mongers. Also the remuneration required by whomever provides said capability must make economic sense lest it become yet another corruption imposed on the public as usual.	Alf	unemployed individual

2022-07-08 17:12:55	Gauteng		Yes I do	Other	Whatever it takes to stop this crisis. Be it some or all of the suggested solutions as long as it is not a rip off to the public and also managed properly I am all for it.JUST DO IT PROPERLY!	Stephany	unemployed individual
2022-07-08 17:11:57	KwaZulu-Natal		Yes I do	Other	All of the above in a hurry. We have enough unemployed people to provide massive labour for not ridiculous pay because we want to work. We dont care for protests we are starving in the dark.	Victor	unemployed individual
2022-07-08 17:00:52	Gauteng		Yes I do	Other	Which ever one are cheap but relayeble. This loadshedding crap needs to end.	Ursula	unemployed individual
2022-07-08 16:41:59	Western Cape		Yes I do	Other	we have an abundance of sun and wind (mostly politicians, but that's another story). africa should be at the forefront of solar energy farms because of our climate, but we are stuck in medieval times with coal because that's what the corrupt powers have the most to gain from. we can make africa great again by working smartly so that we're not seen as "the shithole of the world" (thanks, trump). the apartheid era should not be perceived as when things were run well. the anc needs to buck up or get the hell out if they can't sort out the country's issues. they've had 30 years to meet and chat. no employee EVER gets that long to meet their KPIs.	Dominique	unemployed individual
2022-07-08 16:27:23	KwaZulu-Natal		Yes I do	Other	One has to look at the alternatives and consequential impacts therein. The best practice environmental option must be determined.	Zareef	unemployed individual
2022-07-08 15:51:55	Gauteng		Yes I do	Other	This should have been scrapped 10 years ago already. I dont know what the best power source is, but as long as it makes the lives of South Africans better. The way we are going under the government we will soon be sitting in the dark.	Danny	unemployed individual
2022-07-08 15:45:44	Gauteng		Yes I do	Other	In view of the corruption and miss-management of Eskom, any ideals set for 2030 needs to be put on the back-burner and focus needs to turn towards rescuing the failing power grid. Eskom, and the government has not made significant realization of this goal and need to start looking towards the private sector for solutions and assistance towards recovering the Failed energy network as a matter of urgency, meaning the suspension, and I hope reimagining of the IRP using practical sense and reason. A more diverse approach towards energy generation needs to be taken in order to not be reliant on a singular source, which threatens the shutdown of the network during times of scarcity of raw materials. The failing national infrastructure as a whole, means that there's no longer time or room to quibble about who gets a particular job but rather who gets the job Done.	Andre	unemployed individual
2022-07-08 15:20:45	KwaZulu-Natal		Yes I do	Other	It has become clear that Eskom cannot keep the lights on in this country. It is therefore necessary that independent suppliers are brought into the picture. Renewable do have a part to play in the supply mix, but I do not believe that they alone are the answer as they require a tremendous amount of Storage capacity in order to supply a constant amount of power. One therefore has to consider what will supply the power when the renewables cannot meet the demand. I one does not wish to use fossil fuels to achieve this end, then one will have to look at nuclear as part of the mix.	Jean-Pierre	unemployed individual
2022-07-08 15:01:28	KwaZulu-Natal		Yes I do	Other	I suggest all of the above, to ensure a speedy recovery. However, the government should be forcibly removed from Eskom and private, qualified workers hired from the private sector. The government should also "sponsor" those owners who wish to install solar panels and go off the grid. We should also STOP supply other countries at rates far lower than we South Africans pay.	Theresa	unemployed individual
2022-07-08 14:01:23	Gauteng		Yes I do	Other	Hydro, Solar, Nuclear, Wind. We have to move to greener energy systems. Moving away from carbon energy will in itself sever SA from Eskom holding us hostage.	Marlette	unemployed individual
2022-07-08 13:05:00	Gauteng		Yes I do	Other	We need reliable producing energy suppliers. This load shedding is affecting the small businesses	Sherene	unemployed individual

2022-07-08 12:42:34	Western Cape		Yes I do	Other	<p>Absolutely immediately and with the highest urgency, red tape and legal restrictions preventing private producers producing any amount of electricity that they would like to produce should be reduced to the absolute minimum (e.g. just the condition that they sync to the grid correctly and nothing else).</p> <p>South Africa needs electricity absolutely desperately to save employment opportunities and have a hope of growing the economy and lifting millions of people out of demeaning poverty and unemployment. Private enterprises should be allowed to choose to take the risk on any type of technology that they want to, and be allowed to create a power plant of any size without limitation (i.e. the 100 MW "licensing limit" should go and the red tape surrounding below 100 MW should be scrapped).</p> <p>We do not need legislation prescribing what types of technology are chosen by private enterprises any more than we need to prescribe to private business what technology they will use to produce clothes, toothpaste, buttons, milk, airline seats or any of the millions of other consumer products on the market. The private investor takes the risk as to whether there will be a purchaser at a suitable price to give a decent return on his investment. If not, they made a bad choice and will pay the price.</p> <p>As a matter of interest, Andre de Ruyter (CEO of Eskom) has publicly made all of the claims above; and I believe he is well briefed and is assessing the situation in a non-ideological manner.</p> <p>The purchasers can define different prices for different quality of electricity against their needs: i.e. each purchasers can define the price they will pay for dispatchable electricity (on demand, which is normally coal, nuclear, hydro or renewable with storage) and for as-and-when available electricity (produced by renewable without storage), and for night time and day time, peak or off peak etc. Some will be sensitive to the source of the electricity (renewable vs. not) because of international import requirements. Some will not. If an entrepreneur can find a suitable niche in the market for a suitable producer, s/ he should be able to sell electricity produced in any way he or she chooses: i.e. nuclear, coal (presumably with proper modern gas scrubbing), hydro, solar, wind etc. The risk and choices should be devolved to those with skin in the game: the electricity producing entrepreneurs and the consuming customers. I personally believe there is space for a mix of nuclear (especially small modular), clean coal, current coal (in that we are absolutely desperate for any type of electricity), hydro, gas, wind, solar and pumped storage. But I am not taking the risk of putting up billions of Rands to create a power station that may or may not have a suitable return over its lifetime of 20 to 60 years. I do not have the risk of selling products produced by the electricity into markets with politically defined considerations on "sustainability". So, frankly without skin the game, I shouldn't get a say.</p> <p>If I could choose electricity from various providers at various prices based on the method of production and reliability of availability, I would make my own choices; as would millions of South Africans. Then, we would get a fully democratic choice of production methodology. The people (i.e. the market) would govern in all of these choices.</p>	Richard	unemployed individual
2022-07-08 11:12:57	KwaZulu- Natal		Yes I do	Other	I chose "other" because we have plenty of solar, hydro and wind for generating electricity. The case that we have to fork out so much money, because of the govt, is ridiculous to be able to keep our lives going. Lots of people now have inverters and generators because of the red tape that the govt ties us up in. I would love to install solar to my house, but it is too expensive, the only inverter I can afford is one for my computer to keep money coming in. The fact that the govt. has also been so short-sighted about not converting the existing grid so that people can sell back electricity to the grid is pathetic. As far as I am concerned, water, electricity and fuel should be de-regulated to create more competition and make it more affordable for the consumers to live.	Michael	unemployed individual
2022-07-08 10:57:53	Gauteng		Yes I do	Other		Matthys	unemployed individual
2022-07-08 10:47:38	Outside SA	United Kingdom	Yes I do	Other	A combination of renewal energy should be used. Wind, hydro and solar will all work in SA.	Reneé	unemployed individual
2022-07-08 10:35:15	Eastern Cape		Yes I do	Other	<p>I feel Solar farms/wind power and hydro-electric should all be able to contribute to the grid.</p> <p>Not only would it alleviate the costs to business's who have to invest in generators/but also factories that have to bear the brunt when it comes to higher stages in load-shedding.</p> <p>Jobs are being shed, large business's will move out of SA, thereby contributing to the already high unemployment rate.</p> <p>Smaller business's feel the brunt of this as not everyone can afford not only to buy a generator to keep their "lights on" but with the high cost of fuel; they will close.</p> <p>How do they expect people to even invest in electric cars if there is no power to charge them.</p> <p>Time to see the light, literally, and move away from fossil fuels into a cleaner, better future for this dark and dismal failed economy of ours</p>	Susan	unemployed individual
2022-07-08 10:21:11	Western Cape		Yes I do	Other		Leslie	unemployed individual

2022-07-08 09:57:51	Gauteng	Yes I do	Other	<p>First of, many companies will be able to enter the IPP section of the economy to scale if the government would consider bringing back Section 12J Venture Capital investments from private capital of citizens. Having IPP companies would generate profit on their behalf which is taxable from government's side without being directly involved with the troubles of electricity generation.</p> <p>Older existing IPP's such as Kelvin Power Station should be brought back to full generation capacity.</p> <p>Existing coal power stations could rather be retro fitted with newer technology.</p> <p>No nuclear options, as government does not have the means to handle a catastrophe. Break down of any other generation source is far less catastrophic.</p> <p>Gas generation should be brought in-line with MozGas as another feasible back-up.</p> <p>Solar should be drastically scaled in especially the Northern Cape. Existing technologies should be sought after which makes Solar panels far more efficient. There are patents available where the cells are of honey cone shape in 3D which optimizes sun generation from very early to very late in a day. It is now possible to with heat difference between a solar panel and the environment in the evening to generate some amount of electricity. This would be especially greater in the Northern Cape due to extreme heat in the day and extreme cold in the night.</p> <p>All the excess solar daily energy could be stored in Redox batteries (see Kibo Energy [JSE listed]). The excess energy could with agreement also be stored via the incomplete Lesotho highlands water hydro project.</p> <p>Wind power should also be brought in wherever possible. Current technologies exist with vertical turbines which are far more efficient than current horizontal turbines.</p> <p>South Africa's power generation should be diverse and especially directed towards our resource availability such as coal and solar especially. All power sources should be scalable to stand in for other sources which through market cycles might become to costly or through seasonal cycles might become undependable.</p>	Koert	unemployed individual
2022-07-08 09:52:53	Western Cape	Yes I do	Other	SA can use most renewable energy sources - specifically wind (with all the construction already in place) and solar (hardware available in household sized units) but nuclear would be the future option of choice: some infrastructure already exists in the country. Since coal is available and clean when compared with other countries and gas is not locally obtainable, allowing more role players to provide in the needs of the people is imperative.	Lizette	unemployed individual
2022-07-08 09:51:55	KwaZulu-Natal	Yes I do	Other	All forms of green power production (wind, solar, hydro) should be implemented, they are renewable resources	Gordon	unemployed individual

2022-07-08 08:56:52	Gauteng	Yes I do	Other	Any and all forms of generation should be used to address the electricity crisis in South Africa. Remove all regulations and allow people to get alternative ways to generate electricity affordable for their needs. The government have not shown that they can address this situation at Eskom and the monopoly should come to an end as they cannot resolve this crisis. The electricity situation is getting worse and worse. And now illegal strikers are being rewarded for their actions and are being paid money that isn't there as the budgets were not used correctly by the people in charge previously. People with actual knowledge should be employed to get a plan of action together for immediate action and then compile a proper plan going forward.	Lindi	unemployed individual
2022-07-08 08:32:33	Western Cape	Yes I do	Other	<p>The method of power supply throughout South Africa will have to vary from region to region as each environment is different. Cape Town and PE for instance have the wind at their disposal, while the Karoo has none. A different method will then have to be found for there to generate electricity. In another, hydro will be more suitable.</p> <p>It is important to keep the effect on the environment in mind when deciding which way to go, rather than just the urgency of it. Long-term repercussions should be considered.</p> <p>The community/individuals of this country should be allowed to generate their own electricity, with guidelines to abide by for safekeeping and to be environmentally friendly.</p>	Heidi	unemployed individual
2022-07-08 07:45:23	Western Cape	Yes I do	Other	Any that will not impact on the environment.	Moutie	unemployed individual
2022-07-08 07:41:23	Gauteng	Yes I do	Other	<p>Wherever the production of electricity can be efficiently generated be it solar, wind, nuclear, ...</p> <p>Given the current state of electricity production its a fact that the government is incapable of planning and managing this vital resource the country needs. The private sector needs to be allowed to produce for the country needs.</p>	David	unemployed individual

2022-08-18 09:56:16	Gauteng	Yes I do	Other	We should use all renewable sources available to us. Not only will it be cleaner for the environment, but it will create more jobs, and it will upskill the people who serve in the industry. We need to stop being reliant on Eskom as we are being held hostage by a monolithic organisation that is unable and possibly unwilling to change its ways fast enough to be economical for the country to rely on. They are crippling us financially, we need new solutions	Pieter	unemployed individual
2022-08-13 08:24:01	Eastern Cape	Yes I do	Other	I don't know which one would offer the best Immediate solutions, but I believe it would be good to open up to private producers immediately as I am sure there are already options and solutions thy are offering to help solve the power crisis. It's been proven year after year that Escom is no capable of doing that, so we need to open up to other NON governmental solutions!	Annere	unemployed individual
2022-08-02 07:23:26	Gauteng	Yes I do	Other	mix of renewable/ fossil	Sabine	unemployed individual
2022-08-02 00:06:05	Gauteng	Yes I do	Other	Being reliant solely on solar could prove to be difficult if completely off the grid and the solar is dependent on sunny days and not days of cloudy or wet weather. A mix of Eskom and solar would be ideal. Biogas could be a good option and wind.	Patricia	unemployed individual
2022-07-29 12:21:18	KwaZulu-Natal	Yes I do	Other	Climate Change and so called global warming are real to a point but man does not influence these things nearly as much as some would have you believe!! Fossil fuels are not the huge problem the greenies think.....just go back to the basics on how plants grow and what they give us reveals the bullshit everyone is being told!! This stuff is not rocket science but intelligent people have been brain washed by a whole lot of bullshit. A wide spectrum of energy generation can be safely used to generate power it is such a pity that greed and control over people have taken precedence over what can work!!	Magnum	unemployed individual

2022-07-25 15:26:09	Western Cape		Yes I do	Other	The state and the corruption that closely follows it everywhere are directly responsible for the state our country is in. Neither the state nor politicians should have full control of our energy supply ever again. Legislation should immediately be amended to allow other means of power generation to alleviate our mounting energy problem. At the same time, we should do everything necessary to get the existing electricity supply out of the grip of the state. We should ensure that it never falls back into the hands of the state or politicians to prevent it from ever being used for financial or political gain. To me as a lay person, the solution that seems best at present would be to allow increased private energy production without delay. Once we are in the clear, then we can start to look at other long term energy solutions. Moreover, citizens should definitely NOT be penalised by means of levies or taxes for turning to other means of electricity generation amidst our loadshedding crisis upon loadshedding crisis. In fact, they should receive tax relief for their participation in alleviating grid strain and the prevention of possible collapse. As the state has not come up with a single workable solution beyond political posing and lip service; and seeing that they have only played a very negative and destructive role thus far, electricity generation should be left to those who are capable of getting us out of their mess – even if it means privatisation of electricity supply.	Marne	unemployed individual
2022-07-25 12:11:55	Western Cape		Yes I do	Other	As a concerned South-African, I feel that the cost for paying electricity is heavy and I am not coping with high inflation, etc.. Our country is a rich country thus the sun, wind and water can be used to provide all South-Africans with energy without having to pay huge amounts on paying electricity bills. Everyone can pay a levy for the upkeep and maintenance for equipment that will be used to generate electricity. All the money that would have been made if we were to pay Eskom can then be used to other projects that will benefit South-Africans. Government DO NOT OWN the natural elements. Why must solar power be billed monthly to those that do not rely on Eskom? It is another way for the Government to steal from law-abiding citizens and enrich themselves while the struggling and poor are trying to survive; something that the Government and the MP's do not go through everyday. No, to want to force this on law-abiding people will not be well thought out. What person will gladly pay their hard earned money for this monthly bill? Government had gone too far. When every household in South-Africa know that there will be no more load shedding and everything that occurs if alliances breaks as a result of the continues power outages; then a problem would have been solved. Government; ALLOW the people to make use of the elements, it belongs to No-one on this earth.	Jenna	unemployed individual
2022-07-25 12:11:54	Western Cape		Yes I do	Other	As a concerned South-African, I feel that the cost for paying electricity is heavy and I am not coping with high inflation, etc.. 2022-07-20 15:43:30	Western Cape		Yes I do	Other	<p>Choice: Multiple methods Considering the population growth, growing uncertainty of the economic, environmental and social dynamics of the country. Diverse selection of methods need to be developed and implemented. This allows for more job creation, skill development across a variety of energy producing disciplines and collaboration of knowledge. Most importantly in any dire situation we face in the future, there will be viable alternatives available to utilize. Having all our energy in one basket has not only proven to be inadequate but also irresponsible and irrational in a developing country.</p> <p>There are pros and cons for each method, especially against the environment however if they are not the only option then % of damage could decrease significantly if counteracted by another method and given time to be analyzed to its full extent. History has proven in so many ways that applied diversity in any situation creates resilience in the long-term.</p>	Jacinta	employed individual
2022-07-20 13:42:07	Gauteng		Yes I do	Other	<p>A mixture of Solar and Wind Power would assist in the generation of energy. However, any proposal or suggestion by Eskom to levy a tax on solar power usage is totally unacceptable and proves yet again how corrupt the Govt SOE is. I believe we are still in State Capture in South Africa...everything points to this. Eskom are a disgrace. That the govt is only talking about alternative energy now is ridiculous and absurd, and proves they are not fit to govern...they were warned decades ago. It is immoral to suggest that households would pay Eskom for using their Solar power captured at their own expense</p>	Llewellyn	employed individual
2022-07-20 09:26:27	Western Cape		Yes I do	Other	<p>Given our location, we are in a perfect position to utilise various forms of natural energy production ranging from; solar, wind, wave, hydro. Holding on to a lost cause like Eskom, not only sets us up for economic and energy failure but has now opened us up for manipulation as well as seen during the July debacle.</p> <p>Let us move forward in search of an even more sustainable and viable future of energy production for SA.</p>	Abubakar	employed individual
2022-07-20 06:51:18	Gauteng		Yes I do	Other	<p>A combination of existing power generation and wind and solar</p>	Leone	employed individual
2022-07-19 15:00:41	Gauteng		Yes I do	Other	<p>South Africa should allow all types of generation by everyone that can. That includes everything from big mining operations and corporates, to home owners that are able to produce excess electricity via solar. Another point is that emergency contracts should not exceed 5 years. Also, a national tax incentive would encourage more people to invest in power generation. It would for example, assist with the cost of installing the required electrical meter needed for homeowners who want to sell electricity to their municipalities.</p>	Johnny	employed individual
2022-07-19 14:26:05	Western Cape		Yes I do	Other	<p>Any power supply will do as long as it puts an end to the load shedding, Eskom is useles</p>	C	employed individual
2022-07-19 10:24:26	Western Cape		Yes I do	Other	<p>We need to take a dependency on Escom away. In Cape Town we are next to the sea for Hydro and along the West Coast is the birthplace of all wind. Use what we have to our benefit. Get investors to carry the cost Make all dealings open to the citizens of our country, so that we can keep an eye on the corrupt officials that steal the bread from the mouths of the babes. This is also a great way of creating job opportunities</p>	Theresa	employed individual

2022-07-19 09:25:21	Western Cape		Yes I do	Other	It does not make sense to enforce a monopoly on something as vital as the countries power. It simply creates a single point of failure. In addition, Eskom has consistently demonstrated a singular lack of ability to deliver on its power deliverables, and to contain and control the inherent corruption within Eskom. The countries power is far to vital to allow for this to go on. I believe that we need to allow for additional, approved producers of power, and that we cannot simply rely on Eskom anymore. Further, I do not necessarily believe that one single power source is the answer. We need to encourage the growth of renewables as much as possible, as we have abundant renewable resources. The power problem however is complex, and we cannot simply ignore readily available power sources, when we have such a significant lack of power. We need a balanced, hybrid approach that balances our needs, and secures power from a number of sources. The one exception is potentially nuclear. We have lost too much money to corruption, and there is simply too much risk that a large nuclear project like the one planned with the Russians, will not end up in additional, massive losses due to corruption.	Julian	employed individual
2022-07-18 15:01:00	Western Cape		Yes I do	Other	Wind and Solar will be the most environmentally friendly.	Kay	employed individual
2022-07-18 12:54:36	KwaZulu- Natal		Yes I do	Other	This following was an amazing way that Australia conquered a similar challenge of frequent blackouts despite they have many sources of electricity. They managed to prevent blackouts in the following way. If the grid was under pressure they would add stored battery power to add to the grid. Various areas had container size battery storage units placed which were charged up by the grid when resources were good and no maintenance occurring. When under pressure they switch over inverter style to take power from the storage units for a few hours preventing blackouts in those areas. And who was behind this method, Elon Musk - That is someone who has been trying to help South Africa but the amount of red tape from the Government has frustrated him and he has withdrawn offers of his ideas from the table and Government has not been transparent that a solution like this is available right now.	Mike	employed individual
2022-07-18 08:31:50	KwaZulu- Natal		Yes I do	Other	Allowing private energy producers to provide electricity to the grid is the only way to solve SA's energy crisis. Eskom has proved incapable of self-correction. All forms of renewable energy should be implemented going forward as a more sustainable long-term solution.	Keith	employed individual
2022-07-18 07:48:13	Western Cape		Yes I do	Other	South Africa should be using this opportunity to move away from fossil fuel energy. We have an abundance of seasonal wind and solar energy that we need to be harnessing. We need to provide incentives for private businesses and individuals to invest in solar power for their own use and to be able to sell any surplus back to the national grid	Cathryn	employed individual
2022-07-18 00:33:12	Western Cape		Yes I do	Other	I believe in renewable green energy and I motivate for solar, wind and hydro electricity. Depending on the location.	Natalie	employed individual
2022-07-17 19:30:17	Gauteng		Yes I do	Other	All sustainable methods of electricity production should be utilised within South Africa for South Africa. The current monopoly and single government controlled and totally corrupt mismanaged utility is not economically sustainable for South Africa. Independent privately owned entities must be allowed to generate and supply electricity as needed. However proper oversight of this would be essential The ANCs indentured corruption and gross mismanagement needs to be stopped; private electricity generation is essential to reviving South Africa's economy.	Kevin	employed individual
2022-07-17 15:26:49	Gauteng		Yes I do	Other		Hilde	employed individual
2022-07-16 20:25:15	Gauteng		Yes I do	Other	All sources can help. The problem is that only Eskom is allowed to provide electricity. How can there be a crisis with providing electricity and in the same breath the staff get an increase in salary. Give independent, private institutions the opportunity to provide to the public. Also MAINTENANCE is key to sustainability.	Retha	employed individual

2022-07-15 21:17:33	Western Cape	Yes I do	Other	<p>When it comes to power generations sources we have reached the point of everything and anything. We are in dire straights and need to alleviate as much load from Eskom as possible while still being able to keep the lights on for the economy. Most people like to be able to cook, have lights and so on in the dead of winter when the days are short and the nights are long so it can not just be solar. Industry needs to run whether the wind is blowing or not so it can not only be wind power.</p> <p>Unfortunately nuclear plants take a long time to build but if the economy can survive the next eight years or so then we will still need the power that can produce come rain or shine, wind or calm.</p> <p>We are so short of electricity that at this point any source will help. I am in the process of putting up solar panels at great expense to myself but at least I will cease to be a burden on the grid. Effectively I'll be permanently load shed which should help take a little bit of strain off of Eskom.</p> <p>We need to get more solar panels into the country at a low cost as they seem to be sold out at almost every reasonably priced supplier.</p> <p>Solar panels can make such a difference to any business or organisation that runs during the day. Schools with power, shops that can sell and so on. All while reduced the load on Eskom so that the peak emergency generation and pumped storage schemes do not have to be depleted during the day.</p> <p>Encouraging people to use gas heaters and improve the insulation in their homes will help save electricity too. Scrapping old appliances and mandating that new appliances are more efficient help too. I have already implemented all this so it will not benefit me but I offer it to try and help others.</p> <p>By encourage I suggest allow tax deductions for solar panels, gas heaters, reversible (heating) air conditioners, heat pumps and so on as that will really help drive the adoption. We really should be pulling out all the stops to make things happen. We are running out of time before we get stuck in a downward spiral of the decreasing energy production and a shrinking economy.</p>	Liam	employed individual
2022-07-15 20:27:44	Gauteng	Yes I do	Other	<p>Other, because (not just in South Africa, but worldwide) we should be developing ALL forms of energy production, at ALL levels - residential, business, suburban, municipal, regional, provincial, national...</p> <p>Here in Mzansi, KEEP a government-monitored and maintained central grid based on coal and hydro, support it with nuclear, and new offshore or rural wind/solar/wave facilities... Then DISCOURAGE individuals from using it, prioritising it to support manufacturing, production, business - ECONOMIC GROWTH.</p> <p>Then incentivise communities to use LOCALLY produced power - their own solar inverter, the wind farm in the valley, the hydro-powered generator on the farm-dam next door... Central power is available for emergencies or back-up, but it comes at a price.</p> <p>Australia, Germany, the States - they're all experiencing what we are - old-fashioned, inflexible energy-production solutions that are insufficient to meet the rapidly escalating demand.</p> <p>And the situation will only get worse.</p> <p>Open the doors to innovative solutions!</p>	Martin	employed individual
2022-07-15 19:17:09	Gauteng	Yes I do	Other	<p>I approve of the removal of all the horrible bureaucratic processes that are hindering and preventing us from doing what is absolutely necessary to get decent power supply to the grid. I am not sure what the best route to take is and there are more intelligent people out there that can make the necessary calls to ensure the right kind of power is supplied to the grid.</p> <p>For me, we need to allow the private sector to be released from its shackles, not just in terms of power production but in general. Our government is totally unable to deliver and they are unwilling and unable to come to the table with solutions (that will actually realize and follow through to completion).</p> <p>I do have a concern; once the red tape is removed, what will that mean when we start receiving bills at the end of the month? Will some form of anarchy ensue where no red tape is present? Will people be taken advantage of? I don't know what that would look like and I don't know how that would be solved since we can't really trust our government to properly handle anything but maybe they can still enforce some parts to ensure order is maintained. So whoever is ripping up the red tape should just bear this in mind when doing so. However, I guess we are better off with some turmoil while good amounts of power is produced than the chaos that we're having right now (that's steadily increasing).</p>	Dandre	employed individual
2022-07-15 13:30:53	Gauteng	Yes I do	Other	Nuclear, Gas	Charmaine	employed individual
2022-07-15 13:22:31	Gauteng	Yes I do	Other	All of the above means of electricity productions are acceptable, as long as it is environmentally friendly and sustainable. Just get it done!	Audrey	employed individual
2022-07-15 13:06:58	Western Cape	Yes I do	Other	SA must use the methane produced on farms to make electricity. It is already done, works super well and is not expensive.	Yvane	employed individual

2022-07-15 12:00:54	Gauteng		Yes I do	Other	I would say Nuclear, But as we know our government is to incompetent to doe maintenance so the only option I see is to privatization and Independent Power Producers	Andrew	employed individual
2022-07-15 09:08:27	Western Cape		Yes I do	Other	I don't believe Government should play any role n supplying our Country with energy anymore... there is too much corruption, games and lying going on. We KNOW Eskom is not having energy supply issues. ALL ENERGY MUST AND WILL BE FREE IN THE NOT TOO DISTANT FUTURE: https://www.researchgate.net/publication/327534493_Nikola_Tesla%27s_Free_Electricity_Electronic_Circuit#39;s_Free_Electricity_Electronic_CircuitEnergy We KNOW the Russians are also busy with free energy technology. Governments and their Cabal Elite Handlers will be dissolved including South Africa's... there will be no elections in 2024 I can promise you	wayne	employed individual
2022-07-15 05:54:25	Gauteng		Yes I do	Other	There are several industries that can provide electricity immediately to the grid. One example is Sappi that produces electricity when recovering their black liquor. The problem is that these industries are not allowed to provide electricity to Eskom. The should be able to provide electricity to the grid immediately, to assist with reducing load shedding. That will help short term. Long term, we need to invest in nuclear, coal and renewable energy to increase capacity and to prevent any form of load shedding.	Eugene	employed individual
2022-07-14 18:19:14	Western Cape		Yes I do	Other	We need more than 1 power supplier and it depend whom is available in the region or town that can assist with this. There is more than 1 way to supply power, wind, hydro, solar. Make use of what is available in the specific area.	Louise	employed individual
2022-07-14 16:01:36	Gauteng		Yes I do	Other	The repercussions of loadshedding black outs are devastating and far-reaching. The ANC government caused this national nightmare and severe economic hardship. Open up the grid to IPPs! What other choice is there?! DO IT NOW!	Mia	employed individual
2022-07-14 15:29:01	Eastern Cape		Yes I do	Other	Renewable, renewable, renewable... You cannot go on using coal, water which is already a problem to obtain. We cannot continue using people as suppliers who line their own pockets and who do not care about the rest of South African citizens. The economy is going down the drain- every day you see the worsenning decline in this country! We pay, but get nothing in return!!	Cindy	employed individual
2022-07-14 14:16:16	Western Cape		Yes I do	Other	We should allow external power providers to provide power immediately to help easy the current strain on the power grid.	Erik	employed individual
2022-07-14 13:57:32	Eastern Cape		Yes I do	Other	Short term: Solar. It can easily be implemented on small scale by households and businesses. Long term: Coal and nuclear. This is still the best option going forward. If legislation is changed, private companies can start construction on larger power stations.	Gerhard	employed individual
2022-07-14 13:47:54	Western Cape		Yes I do	Other	I could not select a specific method of electricity production as I believe a mix is needed. For instance I would like to see smaller independent producers (perhaps even down to the level of individual homes with excess power) be able to contribute to the grid. The wider the ecosystem the more stable it could be, However for major power producers I'd ideally like to see renewables (solar/ wind) get preference. Hydro power would also be nice but I'm not sure of the feasibility of that in most of SA. Nuclear power should also be an option to help stabilise the grid. I would not like to see additional fossil fuel sources come online, but if smaller efficient stations could be build to help stabilise the grid in the short term, that would be acceptable.	Duncan	employed individual
2022-07-14 13:04:35	Gauteng		Yes I do	Other	It makes no sense why Eskom has been allowed to maintain its monopoly when it can't supply electricity reliably yet gets rate increases at will and stunting the growth of our economy. Independent energy producers utilising sustainable energy solutions that are environmentally friendly have been available for a long time in South Africa and are able to end Eskom's monopolistic ransom hold on our economy and allow the economy to growth and the people of SA to thrive. End this politically motivated madness now.	Cas	employed individual
2022-07-14 12:12:06	Gauteng		Yes I do	Other	I believe it should be a combination of thing not one spesific method of power production. We have an abundance of natural power. So hydro, gas, wind, solar and nuclear power ontop pf the current coal generation is a good answer to capacity	Richard	employed individual
2022-07-14 11:58:46	Western Cape		Yes I do	Other	All alternative measure to generate electricity should be opened up for exploration. Loadshedding is contributing to a large extent to businesses struggling.	Suné	employed individual

2022-07-14 07:55:05	Gauteng		Yes I do	Other	<p>Thank you for allowing for comments.</p> <p>I do believe that the method of electricity production is not just one source. We live in a country with multiple possibilities. The combination of wind, solar and nuclear would provide a more sustainable source of electricity.</p> <p>My reason for supporting "Scrap the red tape" is due to the inabilities and corruption of the South African government and all the rot within Eskom. When looking at other forms of electricity production, it would be crucial that no government member, nor any family member of any government member - direct or indirect- are allowed to be awarded any tender. This must be done to the benefit of the people of South Africa and the growth of the economy. It must not be to the benefit of large corporations and elites.</p> <p>Regards</p>	Eddie	employed individual
2022-07-13 18:13:40	Western Cape		Yes I do	Other	<p>South Africa needs a lot of different types of power supply methods that are used instead of fossil fuels and it should be stable and affordable to the consumers, independent without government having stake holding in them preventing the same as with Eskom. We don't need municipalities to control and use it as an income for their abuse and over-taxing us. We desperately need to move forward in order to save our dying economy and still help the consumers to financially cope.</p>	Alroy	employed individual
2022-07-13 18:12:56	Western Cape		Yes I do	Other	<p>I say "other" as I want to emphasize that our immediate needs are beyond caring what source the electricity is generated from. I prefer nuclear as a long term but you can't set those up quickly. Solar via something like mirror arrays to boil water/salt is much better than the panels households usually buy.</p> <p>All in all I support scrapping as much red tape as we can while still maintaining safety. I can't approve of any old legal entity being able to feed into the grid without battle-tested equipment. Unsynchronized frequencies and such are a big problem, I hear.</p>	Kyle	employed individual
2022-07-13 17:57:34	Western Cape		Yes I do	Other	<p>Independent Power Producers should be allowed to easily supply South Africa with all renewable sources of energy that do not pollute, for example solar, wind, hydro etc as well as being allowed to build any battery storage required to offset days when renewables are unable to keep up with demand (like has been done in Australia).</p> <p>We should look to other countries who are successfully implementing renewables and moving away from coal and other pollutants.</p> <p>Clearly Eskom will be unable to implement this without independent companies and outside analysis and advice.</p>	Lindsay	employed individual
2022-07-13 13:34:29	Gauteng		Yes I do	Other		Jason	employed individual
2022-07-13 11:57:06	Western Cape		Yes I do	Other	<p>The current power situation is a national crisis threatening business and the economy daily. We need to do something immediately to enable growth and sustainability in our country. If that means skipping bureaucratic red tape in order to implement solutions right away, so be it. Our government has proven beyond measure that even with red tape corruption is rife. Without the possibilities are just as bad. One thing is sure however, we need to implement feasible and sustainable solutions without delay in order to salvage what we have left of this country.</p>	Rentia	employed individual
2022-07-13 11:27:06	KwaZulu-Natal		Yes I do	Other	<p>It must be a combination of the above in the transition to fossil-free production.</p>	Mark	employed individual
2022-07-13 10:51:28	Gauteng		Yes I do	Other	<p>there is no simple answer which one. it must be different sources, in case of one fail, the other can cope. because of present infrastructure coal for now shall be dominated and all effort shall be put to restore this one, of course without neglecting others (hydro, atomic) already existing.</p>	Ted	employed individual
2022-07-13 10:46:16	Western Cape		Yes I do	Other	<p>I'm not sure what the best solution will be for the whole country at this moment - that the experts on power will be able to say. For individual houses, solar is the best way to go - and not be penalized for using solar energy.</p>	Alida	employed individual
2022-07-13 10:42:55	Western Cape		Yes I do	Other	<p>South Africa needs to encourage home solar and wind systems feeding into and being paid for feeding into the grid. It is criminal that we pay increasingly more, the more electricity we use. We pay a premium for the privilege of having loadshedding.</p> <p>If there were definite structured cheaper rates for different times of the day, buying from the grid and selling to the grid.</p> <p>With structures like this in place, businesses can be encouraged to invest in massive battery farms (as they do in other countries) where they buy at night as sell at peak, so making a profit.</p> <p>There are enough examples in the world of the system running correctly.</p> <p>Private enterprise does not tolerate the waste and corruption of the Eskom model.</p>	Benn	employed individual
2022-07-13 10:32:10	Mpumalanga		Yes I do	Other	<p>It is important, that the people need to decide to decide themselves on what energy they want to use/generate. NOT FOR GOVERNMENT, TO GET THERE OWN IN LIKE AT MOMENT/ BROTHER IN LAW!</p>	Johanna	employed individual
2022-07-13 09:51:29	Western Cape		Yes I do	Other	<p>I put "Other" as we will probably need a combination of many of the above and making use of many of them diversifies risks.</p> <p>Solar and wind probably best in this country but I don't know much about them all as I am not an expert in this field. Immediate need also limits the options in the short term as many production methods will have expensive and long set-ups, but SA (and the world) urgently need to get this on track as quickly as possible!!</p>	NM	employed individual

2022-07-13 07:39:53	Gauteng		Yes I do	Other	There needs to be a mix of production methods. Renewables would be first prize, but we know that something like solar will require a lot of storage capacity. Nuclear might be an option to provide a baseline in stead of coal until renewables can one day carry the whole load.	Andre	employed individual
2022-07-13 06:38:55	Gauteng		Yes I do	Other	A rational energy mix makes the most sense. To supply industry reliably, we will need a nuclear component, though under no circumstances can we purchase the technology for this from Vladimir Putin's odious regime. To power homes, we should look to renewables where they can be practically connected to the existing grid, and augment that by allowing private homes who opt for their own solar installations to sell surplus power back to the grid during the day.	Willem	employed individual
2022-07-13 06:26:42	Gauteng		Yes I do	Other	There's no one size fits all solution here. A combination of as many different methods is required. Help the average Joe Soap to become an IPP by helping him afford to power his house and put a few extra panels on his roof to feed back into the grid.	Leigh	employed individual
2022-07-13 05:30:38	Western Cape		Yes I do	Other	Primarily the government should be providing for the taxpayers - not making a loss and if there is a profit, ploughing it back into infrastructure. This is not happening. So private power suppliers should be able to push power into the national grid and be suitably remunerated for that. It should, however, not be a monopoly so that costs are kept reasonable.	Ann	employed individual
2022-07-12 20:24:42	KwaZulu-Natal		Yes I do	Other	Bring back skilled teams to salvage what is salvageable to get us off the ground and out of the hands of the ANC.	Elaine	employed individual
2022-07-12 20:15:16	Gauteng		Yes I do	Other	Anything will do at the mome. Just take the decision away from government who are either serving their own narrow agenda or procrastinating too much.	Rudi	employed individual
2022-07-12 16:50:45	Western Cape		Yes I do	Other	We need to use a mixture of energy sources so that our power supply is not dependent on one type of energy source.	Howard	employed individual
2022-07-12 16:07:01	Gauteng		Yes I do	Other	1- As South African we should be leading the global market when its comes to power generation, we have the expertise and we have the people available . 2 - Remove red tape and cost for waste handling. 3 - Remove red tape and cost for fuel manufacturing. 4 - We must open up the market to all the solutions that are available. 5 - Include Waste to Energy as a contributor. 6 - Privatize Eskom 7 - Privatize Energy Supply right down to the Municipality Level. 8 - Provide Funding for start ups in the renewable sectors.	TROYE	employed individual
2022-07-12 15:52:50	KwaZulu-Natal		Yes I do	Other	Patents by Stanley Meyer prove a method of extracting hydrogen gas from water to burn as fuel for steam turbine power generation. This is proven.	Michael	employed individual
2022-07-12 15:30:55	Gauteng		Yes I do	Other	FIRSTLY, GET RID OF ALL THE DEAD WOOD IN ESKOM, AND REHIRE PEOPLE THAT ARE COMPETENT AND KNOWLEDGEABLE, NOT AFFIRMATIVE ACTION PLACEMENTS. WE KNOW CYRIL AND HIS PEOPLE LIKE PATRICE AND JEFF RADEBE AND THE FORMER CEO FROM ESKOM ARE BUSY WITH THEIR POWER PROJECT, AS SOON AS ESKOM COLLAPSES.	Abu Baker	employed individual
2022-07-12 15:14:50	Gauteng		Yes I do	Other	The crisis needs a short-term (something that is able to get power into the grid in 1-3 months, no matter the method) and long-term solve that is sustainable, these should be viewed as separate initiatives. For the long-term solve, I am in favour of sustainable methods of production (like wind, hydro, solar) but these may take time to setup.	Cara	employed individual
2022-07-12 15:04:08	Western Cape		Yes I do	Other	I do not have the required expertise to deliver an opinion on which method of generation should be used (Solar & wind would of course be great if it is practical for SA's situation). However, I 100% support allowing IPPs to contribute to the grid in any way they want to. We can not afford to keep limping along only relying on Eskom while they are unable to resolve their problems.	Richard	employed individual
2022-07-12 14:53:41	Western Cape		Yes I do	Other	Any method as long as its not dependent on Eskom	Anna	employed individual

2022-07-12 14:17:41	Western Cape		Yes I do	Other		Ingrid	employed individual
2022-07-12 14:06:53	Western Cape		Yes I do	Other	Solar and wind for a country like ours is best - renewables and enviro friendly. Govt should step back and NOT be involved.	Darth	employed individual
2022-07-12 14:06:51	Western Cape		Yes I do	Other	Solar and wind for a country like ours is best - renewables and enviro friendly. Govt should step back and NOT be involved.	Darth	employed individual
2022-07-12 13:31:26	Western Cape		Yes I do	Other		Mariska	employed individual

2022-07-12 13:01:34	Gauteng	Yes I do	Other	<p>We have to use a mix - renewables, plus coal plus nuclear.</p> <p>Eskom can no longer cope - corruption and bad leadership from the State and terrible management practices have destroyed it. We need private providers - in the shortest time possible. The current rolling blackouts are destroying the middle class and jobs.</p> <p>Municipalities should allow households to feed surplus solar power generated in private homes back into the grid. Cities should pay a fair price for it - offset against what an individual consumer owes the municipality.</p>	NJ	employed individual
2022-07-12 12:42:28	Western Cape	Yes I do	Other	<p>We have abundant sun, wind, potential hydro etc. renewable options available. Utilising this optimally will make a significant impact to start off with.</p>	Emile	employed individual
2022-07-12 12:39:29	Western Cape	Yes I do	Other	<p>We have the means to use nuclear, wind and solar if we let the people that know how to do it do their jobs.</p> <p>stop the corruption, the government and the cadre deployments.</p>	Nick	employed individual
2022-07-12 12:07:39	Gauteng	Yes I do	Other	<p>I think Nuclear would be the best solution but I do not what is available to solve the problem straight away. We have the coal but the politicians seem to be an obstacle in making the process run smoothly.</p>	Paul van der	employed individual
2022-07-12 11:28:20	Western Cape	Yes I do	Other	<p>Alternative energy such as solar, wind and hydro. A very good method of implementing change and improvement with immediate effect was outlined by somebody called Jacques in the list of comments. Time is not on our side - too many livelihoods have been and continue to be destroyed by the unreliable supply of energy. And this does not even address the rise in depression and anxiety as a direct result of the situation. Good on the government if they scrap the policy red tape; but shame on them for leaving it this late.</p>	Jeanne	employed individual
2022-07-12 11:18:34	Eastern Cape	Yes I do	Other	<p>There is a lot of wind farming experimenting Solar experimenting? Implementation at hospitals, schools, businesses etc What about the old electricity stations of the past? Other options must be looked at ASAP. Loss is occurring on a daily basis due to break ins at houses and businesses. Household Implements breaking, batteries not function properly for i.e. motor sliding gates. Batteries of computers etc. The batteries cannot reload properly with all the loadshedding and what about insurance claims? This is a vicious circle of a declining economic climate due to all the loadshedding.</p>	WILNA	employed individual
2022-07-12 11:18:34	North West	Yes I do	Other	<p>The simplest and most immediate opportunities that can save us in the short term is not even on the list.</p> <p>First, introduce a competitive "Feed-in Tariff" without any restrictions and allow individuals and businesses to feed their excess power from PV on their roofs and/or private batteries back into the grid.</p> <p>Second, immediately provide subsidies for residential PV and battery installations. It can be a sliding scale that would allow even the lowest income earners to access this market. E.g. the first 1kW of every PV installation could be made "free", the second kW at 75%, the third at 50%, the 4th at 25% and then you pay the full price if you want more.</p> <p>This will take a huge load off Eskom and will motivate rapid take-up of PV in the residential and commercial sectors.</p> <p>Third, roll out utility scale battery storage (through IPPs) next to the existing power plants in Mpumalanga at at each of the REIPPP projects already in operation. They typically have less than 12 month delivery times. This will also save on grid connection costs.</p> <p>Four, allow all existing IPPs to pump their excess into the grid (to charge said batteries above).</p> <p>After we've done this (or in parallel), we can move on to new additional Utility Scale PV and Battery projects (which will be the cheapest, quick solution).</p>	Jacques	employed individual
2022-07-12 11:07:06	Gauteng	Yes I do	Other	<p>All alternatives should be explored! Eskom has lost all credibility and ability to produce power. It's time to do what is best for the people of this country.</p>	Amy	employed individual

2022-07-12 10:32:51	Gauteng	Yes I do	Other	<p>We have existing power station. Get them to work properly. It is not difficult to follow the maintenance procedures provided by the manufacturers - just do it right without taking shortcuts. But make sure you have people that can actually do the work (makes me worried if the Eskom staff can actually do the work seeing every single power station is collapsing with them working there).</p> <p>There is no magic bullet for power provision. Use everything at our disposal. - Wind works well when there is wind - Solar works well when there is sun - Biogas-to-energy works well when there is biomass to produce the gas - Coal and nuclear is existing and is a must for base load.</p> <p>If all the Sappi's, Mondi's, Hulets, Illovo, etc get's incentivized, together they can build hundreds of additional steam generation to their existing plants and provide 4000 MW power continuously (that is another Medupi or Kusile in capacity) within 2-3 years.</p> <p>If all households get incentive to add solar panels and they export 1kW per household to the grid we can easily look at 5 million houses providing 5000 MW power to the grid. Yes it is only in the day but that 6-8 hour window can prevent loadshedding during the day - businesses can at least operate without disruption with a smaller impact on the economy.</p> <p>Why is Eskom "rewarding" putting power back on the grid at such a ridiculous rate? You get charged the full rate for using power but putting power back on the grid you get rewarded 50-70% of the charge rate. There is no incentive to do that! Eskom should reward you at least 90% plus of your base charge rate.</p> <p>Why is Eskom not charging the workers that participated in the illegal strike criminally under the National Key Point Act?</p>	Ferdi	employed individual
2022-07-12 09:59:11	Gauteng	Yes I do	Other	<p>We need power and Eskom needs competition! South Africa has the option of generating electricity harvested from solar and wind. The power generated can be fed back onto the grid. The options are there, we must use them as we cannot afford to continue under the current circumstances. Our economy won't survive. It is in the interest of ALL to scrap the currently policy.</p>	Deborah	employed individual
2022-07-12 09:12:35	Gauteng	Yes I do	Other	<p>I put "Other" as I cant select more than 1 option. Coal, Solar and nuclear are our best bets as our current power plants run on coal and nuclear. We have an abundance of solar energy in Africa and land to support solar farms.</p> <p>The only reason there is kickback to private energy providers is the loss of corrupt revenue that some in our parliament and government will feel. Greed is ruling here. Sickening.</p>	Steven	employed individual
2022-07-12 09:06:45	Gauteng	Yes I do	Other	<p>I strongly support any form of natural energy. We have beautiful sunny days during the winter months.</p> <p>Most people charge all their appliances from the grid as soon as the loadshedding time is over. This still saps the available Eskom energy.</p> <p>In my small way, I contribute towards less ESKOM usage by recharging appliances using a solar panel during the sunny days and therefore take some load off the grid. My solar charged lights are then used at night.</p> <p>People who are buying inverters only, are not assisting ESKOM as they recharge them from the ESKOM grid.</p> <p>My selectikon of other above means utalising all means of natural energy.</p>	Ingrid	employed individual
2022-07-12 09:02:25	Mpumalanga	Yes I do	Other	<p>The ruling party has proved that any government, given too much power, will destroy itself and everyone else with it. The creation of regulations should not be given to ignorant, uneducated, narcissistic, dishonest thieves. The evidence is all around us. This government must, and owes its citizens, to scrap all regulations relating to power and energy, allowing the private sector to fill the gaps created by the government.</p>	David	employed individual
2022-07-12 08:52:47	Gauteng	Yes I do	Other	<p>I am not sure which option would be the cheapest to generate electricity, but what I do know is that we are in dire need of a solution to the energy crisis.</p>	Anthea	employed individual
2022-07-12 07:57:56	KwaZulu-Natal	Yes I do	Other	<p>Electricity production should be across all possible forms,without reliance on one form.</p>	Moosa	employed individual
2022-07-12 07:28:44	Western Cape	Yes I do	Other	<p>I feel that the situation has gotten completely out of hand, tthis is more of a problem than the plandemic. I feel that every avenue should be utilised in order to get SA up and running electrically again. DEREGULATION is the only way to go! Start taking care of our own country before you start supplying to other African countries. This is about the people now, government needs to remember they work for us!</p>	Gaynon	employed individual
2022-07-12 06:58:05	Gauteng	Yes I do	Other	<p>We urgently need to open up the market for as many different electricity production methods as possible. Not one single method will alleviate our problem of electricity supply. The lack in growth in the energy sector is holding back the economic growth of the country. We deserve better!</p>	Mariette	employed individual
2022-07-12 06:51:55	Western Cape	Yes I do	Other	<p>At this stage the frustration is so high - that any solution just to have power and give the economy a fair chance would be an option</p>	Sune	employed individual
2022-07-12 06:51:13	Western Cape	Yes I do	Other	<p>Any method of electricity production that can be implemented immediately would suit sa's current need.</p>	Leandi	employed individual

2022-07-12 06:13:54	Gauteng		Yes I do	Other	Let anyone who can feed into the power grid and pay them half of the electricity rate until Eskom recovers and can supply at lower rates.	Jaco	employed individual
2022-07-12 06:07:21	Limpopo		Yes I do	Other	All means available as it comes at a price that the people won't afford.	norman	employed individual
2022-07-11 22:19:23	Western Cape		Yes I do	Other	I am in favor of any method of electricity production, obvs the greener the better, however right now I am not sure SA is in a position to be picky. We need an option both immediate and longer-term, that a) helps to solve this terrible situation we are in before we get past the point of return . We need to act quick and we need to open this up to independent power producers asap. b) longer term - that is ideally sustainable and planet-friendly and not open to further corruption.	Bronwen	employed individual
2022-07-11 21:37:43	Gauteng		Yes I do	Other	Motivation for IPP does not require a specific renewable energy type. Eskom has been a monopoly for too long. They were once a very reputable company. They have cost every individual in this country way too much for way too long. Individuals and companies have only received losses in every respect for their money. Open up the competition quick. It's proven in other countries.	Joaquim	employed individual
2022-07-11 21:00:20	Western Cape		Yes I do	Other	Use the most efficient combination of locally available solar, hydro and wind energy...please for pity's sake get rid of the dinosaurs in government's monopoly of energy generation! The government has provided long and painful proof that its greed and ineptitude are pulling our once promising nation into a failed state! Let smarter younger minds take over, move over and open up this sector of the market so it can WORK thereby saving our country, saving our economy.	Ingrid	employed individual
2022-07-11 20:25:55	Gauteng		Yes I do	Other	All of them of it could help us get out of this mess	Lafras	employed individual
2022-07-11 20:24:53	KwaZulu-Natal		Yes I do	Other	A combination of various independent producers using different methods, would best suit SA needs., ultimately aiming for more eco friendly methods such as solar and wind.	Karen	employed individual
2022-07-11 20:18:27	Gauteng		Yes I do	Other	Variety between the various methods available	Amanda	employed individual
2022-07-11 19:29:43	Gauteng		Yes I do	Other	It depends what is the most economical and quickest to solve the challenge. I also think that other service providers should be allowed to supply electricity.	Magda	employed individual
2022-07-11 19:06:16	Gauteng		Yes I do	Other	Die regering moet nou daadwerklik besef hulle is nie instaat om die krag kriesis wat ons nou beleef te hanteer nie, en om instansies wat nou n verskil kan maak die kans te gee om dit te kan doen, hetsy met son krag of wind krag, en hierdie is nie nou die tyd om teen wit beheerde maatskappye of instansies te diskrimineer en te verhoed dat hierdie krag probleem opgelos kan word. Ons het die kundigheid en vermoë om dit te kan doen.	Albert	employed individual
2022-07-11 18:58:34	Western Cape		Yes I do	Other	The question is actually a "no-brainer"; whether we are having load shedding or not we should be using alternate methods of generating power; we have all the elements in this beautiful country; wind, hydro and solar ...	Anwar	employed individual
2022-07-11 18:29:31	Gauteng		Yes I do	Other	A combination of power generation should be allowed, with support and authorization for private companies to select and quality control supply of materials e.g. coal if that is the choice for generation. A proven method for load balancing is to use extra power production e.g. when solar gets high output during a sunny day to pump water into a hydro-electric dam, and then when extra power supply is required, the water is allowed to run out the dam with hydro-electric generation e.g. during night when solar cannot add capacity to the grid.	Manus	employed individual
2022-07-11 18:09:52	Gauteng		Yes I do	Other	Government should have a broad view on supplemental electricity production. Who ever supplies electricity to the grid should have total freedom how such power is generated for the simple reason that if it is viable for them and the power generated conforms the the standard required by the grid every body gains. The system must allow the smaller guy to participate not just the major corporates.	Steven	employed individual
2022-07-11 18:08:08	KwaZulu-Natal		Yes I do	Other	I think we must be allowed to generate electricity the way each one wants to. I think to go mostly solar and gas. And just to use part of the grid if necessary. It is important for the country to still have power stations for supplying the grid but more people must get the opportunity to generate their own electricity.	Arend	employed individual
2022-07-11 17:58:20	Western Cape		Yes I do	Other	Hydro, water and solar. Time to get rid of coal as this is the cause of the problem. In these new developing times new innovations are needed. In South Africa all these are obtainable and there is no excuse for this not happening. Government must stop the corruption, inflation and rising costs in this this energy crisis. There are many ways and means to solve this situation. But government does not want to let go. So sad, frustrating and yet we sit in the dark losing business.	Sallyjane	employed individual
2022-07-11 17:07:45	Free State		Yes I do	Other	Absolutely anything would be better than current situation!!! I suppose solar is my first choice but anything that workswillbe great!!!	Lieschen	employed individual
2022-07-11 16:47:43	KwaZulu-Natal		Yes I do	Other	Whatever we can get in the shortest amount of time at the most reasonable cost is what is needed	Kyle	employed individual
2022-07-11 16:02:55	Gauteng		Yes I do	Other	We need electricity24/7. That means that solar alone is not the only solution. Coal is no good for the environment and nuclear will take 5-7 years before it will supply electricity. Gas and Hydro is also expensive and will take time to have it up and running. Wind and solar is the only two options that can supply electricity quickly and is also cheap.	pieter	employed individual
2022-07-11 15:57:20	Western Cape		Yes I do	Other	A Combination of Gas, Coal and Solar would be ideal.	Laurika	employed individual

2022-07-11 15:54:43	Gauteng	Yes I do	Other	<p>Any kind of renewable energy solution will be best to bring in and allow the companies who have the expertise to come in and do it - in turn it will even bring new investment into this country!</p> <p>A renewable solution is definitely the way forward and solar is an excellent option for sunny South Africa. It must be coupled with an adequate energy storage solution for less sunny seasons and weather and can certainly be augmented by other renewable solutions to chip in and keep a constant power input available to the grid.</p> <p>In my opinion, opening up the policy to include independent power producers, specifically home producers, who have excess power, would decentralise the power production, which would stabilise it and prevent a total shutdown of power generation.</p> <p>We need independent power providers to ensure a stable power network and competition as well. Eskom is failing and we need competition to take away the monopoly from Eskom. It will also ensure that there is competition and that prices will be affordable for everyone.</p>	Brian	employed individual
2022-07-11 15:53:03	Free State	Yes I do	Other	<p>South Africa is the only country in the world that taxes domestic installations of solar power instead of encouraging it and providing tax incentives to those who do so.</p> <p>We have sun and wind, that we can use.</p>	Sue	employed individual
2022-07-11 15:23:17	Western Cape	Yes I do	Other	<p>There should be different variations of power supply to not have all your eggs in one basket. Nuclear could work but the black government with its racial BBEEE implementations will blow up this whole country. We are limited with the ruling corrupt and useless black government...</p>	Vernon	employed individual
2022-07-11 15:20:48	KwaZulu-Natal	Yes I do	Other	<p>I don't think there is a magic bullet that can solve all our problems. The quickest turnaround times is likely to be solar, but the most efficient and ironically the most environmentally "friendly" is nuclear. It has a better safety record and less impact on the environment according to environmental activist Michael Shellenberger</p>	Mark	employed individual
2022-07-11 14:47:57	Free State	Yes I do	Other	<p>Immediate - SOLAR. We were given the sun by our Heavenly Father, for free, now we can use it.</p> <p>ALSO - we have so much waste - why can't that be used as a source of energy. When the right people are employed, surely plants can be set up to use that waste to produce energy. We have brilliant minds in this country, they just need to be given an opportunity!!!</p>	helette	employed individual
2022-07-11 14:40:46	Western Cape	Yes I do	Other	<p>SA has a Waste problem and an energy problem. We should be converting mixed solid waste into energy by gasification</p>	Pamela	employed individual
2022-07-11 14:22:26	Gauteng	Yes I do	Other	<p>I support everything so long as it does not involve corruption, we should not be penalized if we put solar power</p>	Tasneem	employed individual
2022-07-11 14:20:47	Western Cape	Yes I do	Other	<p>All types should be allowed except nuclear power</p>	Gideon	employed individual
2022-07-11 14:11:42	Western Cape	Yes I do	Other	<p>Anything is better than nothing. Flip the switch Alan Winde</p>	Ronell	employed individual
2022-07-11 14:09:31	Gauteng	Yes I do	Other	<p>A combination would be best. We cannot rely on one medium.</p>	Riaz	employed individual
2022-07-11 14:03:05	Western Cape	Yes I do	Other	<p>Rigging up solar panels on the roofs of willing and able houses and buildings could supplement energy use. Coal should be phased out as soon as possible and a combination of wind, solar, tidal and hydro should be incorporated into the grid from private entities. Nuclear is also an option, but needs to be managed responsibly.</p>	Dorothy	employed individual
2022-07-11 13:42:53	Gauteng	Yes I do	Other	<p>A combination of renewable energies are available and must be explored, Solar, Wind and Tidal energy</p>	William	employed individual
2022-07-11 13:42:42	Gauteng	Yes I do	Other	<p>Any means of producing energy for electricity at this stage would be welcome</p>	Jacobus	employed individual
2022-07-11 13:39:27	Gauteng	Yes I do	Other	<p>I think that a combination of methods could work but we cannot solely rely on Eskom for power supply.</p>	Alex	employed individual
2022-07-11 13:31:33	Gauteng	Yes I do	Other	<p>I support the use of whatever is available from independent power producers if it is in a controlled manner and in the best interest of the consumer.</p>	Sean	employed individual

2022-07-11 13:13:01	Gauteng	Yes I do	Other	<p>I foresee three scenarios</p> <p>1 In the present crisis we need to make available the fastest means of producing TEMPORARY reliable power but this will come at a premium cost as it will be either off shore power , that is power generating ships or imported diesel or gas running our own on-shore systems .</p> <p>2 Continue to actively encourage the larger and wealthier consumers to go off-grid for example shopping centres and commercial parks that do not have high power draw equipment for example furnaces or other equipment that needs a critical and steady stiff power supply. Off-grid can be what ever is the best application for that consumer, e.g hydro, gas, solar , wind. Let them make the choice.</p> <p>3 Scrap any legislation and red tape that prevents surplus private renewable power systems feeding back into the grid. Rather encourage a National or ISO standard for the quality of power fed back into the grid, ie frequency control, purity of sine wave [no harmonics] , voltage stability etc. The technology already exists -make use of it.</p> <p>We all know that the current Eskom distribution model is unsustainable. Accept that fact .</p> <p>Accept also that the power distribution organisation needs to be separate from the power generation organisations [note that it is plural].</p> <p>Finally we need to encourage people to use less energy. We need to place energy conservation in the same priority box as nature conservation.</p> <p>We must educate the Millennial generation in particular that streaming videos, games and calling up friends continuously on their phones, Ipads and PCs generates power consumed in "cloud" computers that at present are a significant % of global electricity consumption.</p>	John	employed individual
2022-07-11 12:57:37	Gauteng	Yes I do	Other	Use every bit of what is immediately available to change the current situation and then focus on the long run on electricity with renewable resources.	Werda	employed individual
2022-07-11 12:50:18	KwaZulu-Natal	Yes I do	Other		Sue	employed individual
2022-07-11 12:49:29	Gauteng	Yes I do	Other	All of the above. Whatever will assist us quicker and is sustainable.	Godlief	employed individual
2022-07-11 12:37:48	Western Cape	Yes I do	Other	<p>If the Government is incapable of supplying adequate power, they must let those who can produce power, do so. All these delays are probably just because the corrupt ANC officials are trying to find a way to skim funds off the top of every deal.</p> <p>Throw out these self gratifying, useless, unqualified thieves and employ competent qualified staff - not these Gogo's and Madala's who have no education who are robbing the country blind.</p> <p>Allow those who are able to sort out this mess, do so</p>	Alec	employed individual
2022-07-11 12:26:56	KwaZulu-Natal	Yes I do	Other	<p>Should Independent Power Producers be allowed to immediately supply South Africa with electricity? YES</p> <p>Is there a need to immediately amend legislation? YES</p> <p>What is best suited – renewables, coal, nuclear, hydro, gas, imports or other forms of generation? BEST SUSTAINABLE OPTIONS</p>	SHARON	employed individual
2022-07-11 12:21:54	Western Cape	Yes I do	Other	<p>We are in a state of disaster, or we should be. The government should do everything practicable to stop load shedding immediately and in the medium to long term - to allow IPP's to compete with Eskom as electricity generators.</p> <p>Please treat this with the same level of urgency that you did with Covid.</p>	Allan	employed individual
2022-07-11 12:02:39	Gauteng	Yes I do	Other	Looking at the costs of running the current coal and diesel power plants, it would make sense to look into using nature and thus cleaner power production. We have nice strong winds in the immediate areas where I stay for instance as well as nice sunny days. Use solar and wind production in those areas and hydro at the coast and rivers and dams. Government should stop wanting to monopolize everything and accept help from independent power producers to help us get out of this rut we are currently in. Only a combined effort here will get us up and running again.	Cobus	employed individual
2022-07-11 11:55:30	Gauteng	Yes I do	Other	It needs to be a combination between existing coal and nuclear with additional support from solar, hydro and wind. They should also allow residential customers to feed any additional electricity into the grid and receive a credit for that. Similar to what is being implemented in some of the western cape municipalities.	Jaco	employed individual
2022-07-11 11:54:25	Western Cape	Yes I do	Other	Solar, hydro and wind are an obvious choice.	Myles	employed individual
2022-07-11 11:54:25	Western Cape	Yes I do	Other	Solar, hydro and wind are an obvious choice.	Myles	employed individual
2022-07-11 11:46:44	Eastern Cape	Yes I do	Other	It is time that private enterprises are allowed to provide electricity to the country. Eskom cannot meet the demand and has been plundered into this dire situation due to mismanagement by the previous management.	Craig	employed individual
2022-07-11 11:46:05	North West	Yes I do	Other	We need independent power suppliers to solve our problem immediately. Our problem is so big we cannot exclude any method of electricity production at this stage. Private sector must be allowed to immediately add power to the grid. Green energy should be the long term aim but we first need to solve this problem NOW!!!	Cornelia	employed individual

2022-07-11 11:39:47	Free State		Yes I do	Other	Though independent providers' feasibility and reliability must be evaluated and monitored, red tape beyond that ought to be scrapped. As for the type of energy - low-emission/environmental impact is of course the preference. That being said, given the emergency state we find ourselves, more easily accessible fossil fuels may have to be the go-to until our grid is more stable, and/or renewable energy can be made available.	Maricka	employed individual
2022-07-11 11:33:15	KwaZulu-Natal		Yes I do	Other	Independent Power Producers be allowed to immediately supply South Africa with electricity by any means necessary. The country is currently on its knees with Eskom's incompetence. We need a quick solution to this power crisis or our economy will completely collapse.	Dhanwant hie	employed individual
2022-07-11 11:28:43	Gauteng		Yes I do	Other	Anything that is going to get us out of this crisis. It is a crying shame that our president has remained tight lipped over this Eskom debacle, not even addressing the nation. Man up and sort your country out, or stand down!	Margaret	employed individual
2022-07-11 11:24:01	Gauteng		Yes I do	Other	SOEs are a mess. This government are incapable of running a bath. The lack of power provision has reached critical levels. In addition to independent generation Eskom should be broken up and sold to the private sector far away from stealing ANC hands.	Carl	employed individual
2022-07-11 11:18:55	Gauteng		Yes I do	Other	Unless independent power producers are allowed to step in to save South Africa's economy, this country is facing a very dark future. Renewable energy is the way to go! Please save our country!	Louise	employed individual
2022-07-11 11:12:41	Eastern Cape		Yes I do	Other		Murray	employed individual
2022-07-11 11:10:55	Gauteng		Yes I do	Other	Eskom are at the brink of failing completely - they need all the help they can get - This help should come from as many viable sources as possible and also incorporate many varied types of energy production.	Gillian	employed individual
2022-07-11 11:09:26	Gauteng		Yes I do	Other	A combination of generation methods should be used, as only then can one see what the actual costs and flexibility of these methods is. Furthermore, the government should not be both the referee and a material player, otherwise political games will be played to the benefit of one or more player, as opposed to being for the benefit of the whole country. The recent NUMSA-led unprotected strike is clear proof of this.	Alex	employed individual
2022-07-11 10:59:56	Western Cape		Yes I do	Other	I don't have enough knowledge to suggest a production solution, but I agree with the fact that independent Power Producers should be allowed to step in.	Jeandré	employed individual
2022-07-11 10:58:52	KwaZulu-Natal		Yes I do	Other	I believe that no one source of power production is the answer. I think that a combination of solar, wind, hydro and etc is the way forward. I think that independent producers should be allowed to supply power to eskom/the grid. I believe that the supply will be far better and greater if privatized suppliers are allowed to supply, because the private sector actually needs to be competitive and supply, in order to stay in business, whereas an SOE such as Eskom does not have that incentive.	Keith	employed individual
2022-07-11 10:58:40	Gauteng		Yes I do	Other	I don't care how this is done or what competition is brought in, as long as there is competition to the Power Producers. Eskom has been holding the power and they are incompetent. We need someone that will provide liable power to the whole country with excellent prices. We are currently paying top prices for electricity we don't even have!	Rene	employed individual
2022-07-11 10:58:38	Gauteng		Yes I do	Other	Cut the red tape, stop the corruption and get SA back to stable electricity.	Melissa	employed individual
2022-07-11 10:53:51	Western Cape		Yes I do	Other	Given the state of ESKOM and other SOE's, I feel that each region should be allowed to supply electricity to their districts completely independently of ESKOM. We can no longer be held captive by corruption and badly-run state enterprises.	Petula	employed individual
2022-07-11 10:53:31	Gauteng		Yes I do	Other	There is no single method of energy production that presents the full solution. It's about getting the energy mix right. The best way to achieve this is through deregulation which will allow market forces to shape to supply capacity. South Africa enjoys some highest levels of sunshine hours in the world, so solar is an obvious component, but the problem with solar is that it often does not produce when the energy is needed the most. In broader terms, the challenge in energy supply is in dealing with peak demand. There are demand side changes that can be made to help smooth out the demand curve, which can made alternative supply options more feasible. For example, implementing an off-peak tariff will help incentivize private households to invest in battery storage, which can be charged in off-peak and used during peak, thereby alleviating some of the supply constraints in peak periods. Eskom and/or government could go one step further and subsidize these, with the ability to control when the batteries can be charged, somewhat akin to the ripple control on geysers. Even with the current capacity, private investment in battery storage could reduce load shedding by smoothing out the demand curve.	Justin	employed individual
2022-07-11 10:52:33	Gauteng		Yes I do	Other		Cherise	employed individual
2022-07-11 10:51:22	Eastern Cape		Yes I do	Other	All forms of renewable energy systems need to be brought on line and immediate scrapping of rep tape to IRP's needs to be introduced. We cannot allow the country to be brought to its knees due to political agendas.	IAN	employed individual

2022-07-11 10:41:00	Western Cape	Yes I do	Other	<p>In my opinion,</p> <p>We should allow each province as the see fit to outsource their own electricity that suits their needs detaching themselves on the reliance of Eskom and the ANC.</p> <p>Each province should be allowed to source privately viable power sources.</p> <p>We should be leaning on all our natural energy sources including, Solar, Wind and Wave power generation.</p> <p>Nuclear is to dangerous to be left in the hands of incompetent, corrupted leadership and Psuedo-government with no actual technical, political and economic skill.</p> <p>Electricity like water is a basic human right! Is it illegal be kept from our critical services, businesses and citizens?</p> <p>The red tape is a mechanism for the corrupted to continue stealing from Eskom in the guise of appalling policies, management and mis-appropriated leadership.</p>	Medford	employed individual
2022-07-11 10:38:07	Gauteng	Yes I do	Other	<p>Power to the people of SA, not other countries. And Eskom must reduce its number of employees - currently about double that necessary . Government misuse tax payers money</p>	Wilma	employed individual
2022-07-11 10:35:26	Western Cape	Yes I do	Other	<p>I think there should be a mix of alternative clean , efficient systems available and individuals producing excess must have th option of supplying back to the grid.</p>	Greg	employed individual
2022-07-11 10:31:52	Western Cape	Yes I do	Other		Heleen	employed individual
2022-07-11 10:31:28	Gauteng	Yes I do	Other	<p>Escoms prices are exorbitant and we are paying for a service that we never have it is especially killing our small businesses where everyone is just trying to survive it is unacceptable</p>	Janet	employed individual
2022-07-11 10:29:39	Gauteng	Yes I do	Other	<p>Power to the people of SA, not other countries Why no load shedding where government officials live ?</p>	Stephen	employed individual
2022-07-11 10:25:27	Western Cape	Yes I do	Other	<p>SA already has independent power producers, from companies to individual house holds. Make this process easier. Let producers supply their own surrounding areas. SA has the ability to use various sustainable resources: water, wind & solar. Do NOT impose "penalty" charge for people making use of their own paid for resources.</p>	Rentia	employed individual
2022-07-11 10:25:03	Western Cape	Yes I do	Other	<p>A combination of the electricity production methodology would resolve SA's issues in the fastest of timeline. By opening it up to private corporates, who then supply's Eskom would be based on their individual expertise, thereby maximising capacity and turn-around times.</p>	Mervin	employed individual
2022-07-11 10:20:27	Western Cape	Yes I do	Other	<p>Any possible way to address the current problem</p>	Brad	employed individual
2022-07-11 10:07:04	Free State	Yes I do	Other	<p>The method of power generation should not be limited to a single type. Each method has advantages and disadvantages. The power supply monopoly should be scrapped and encouragement of competition is necessary to promote growth and sustainability. It is through this manner that cost to client is kept at a minimum.</p>	Ronald	employed individual
2022-07-11 10:03:36	KwaZulu- Natal	Yes I do	Other		Neil	employed individual
2022-07-11 10:01:05	Western Cape	Yes I do	Other	<p>Privatize the energy sector it must be taken away from the government.</p>	Corneli	employed individual
2022-07-11 09:50:54	Gauteng	Yes I do	Other	<p>For the moment all methods for producing electricity should be used to get the country back on par. Then only clean energy should use. HERE IS THE CONCERN - The ANC has their fingers in everywhere and that is why we have load shedding. They blame it on everything else but in the means time they have their fingers in the solar industry and with the load shedding more and more people go solar and again, they just keep on pocketing. THE ANC MUST FALL !!!!!</p>	Gerrit	employed individual
2022-07-11 09:50:19	Eastern Cape	Yes I do	Other	<p>Solar, wind and hydro</p>	Amanda	employed individual
2022-07-11 09:42:09	Mpumal anga	Yes I do	Other	<p>Solar alone will not solve our problem. A combination wind, solar and other methods of generation should be implemented and anybody that can help in solving the shortage should be welcomed without any red tape and smaller individuals who can generate more electricity than they need should also be allowed to feed excess into the grid in stead of threatening them with higher tarrifs when they use the grid.</p>	Fanie	employed individual
2022-07-11 09:40:59	Western Cape	Yes I do	Other	<p>What ever method most practical, with the exception of coal power.</p>	Kathryn	employed individual
2022-07-11 09:31:22	Mpumal anga	Yes I do	Other	<p>Why not burn our refuse that would just end up in landfill to create power. Or you could use a combination of green energy and human energy. Hear me out, people pay to go to the gym, give them incentives to create power with their exercises?</p>	Carien	employed individual
2022-07-11 09:26:50	Western Cape	Yes I do	Other	<p>A combination of hydro, wind and solar could work - we have so many renewable resources in this country, why aren't we using them?</p>	Sarah	employed individual

2022-07-11 09:26:24	KwaZulu-Natal		Yes I do	Other	All possible and efficient methods should be used to end this crisis. All IPP should be allowed to sell their available capacity to municipalities, the government should stop monopolising the supply of electricity and allow private companies to supply at fair prices.	Monika	employed individual
2022-07-11 09:16:46	Western Cape		Yes I do	Other	The country needs a hybrid system of generation. Solar and wind as well as other storage methods such as hydro and battery storage. during the day solar can be stored in hydro systems released when the the need arises probably at night.	Greg	employed individual
2022-07-11 09:16:20	Gauteng		Yes I do	Other	We need an urgent solution as ESKOM is not capable of providing yet we pay higher and higher amounts every month....which increase even during loadshedding....Its ridiculous!! Smaller grids for independent power producers should be considered. If that is the case, hybrid solutions should be the first option where the independent power producer should be 100% renewal energy of both solar and/or wind generation, and additional feed for where it is required still from the municipality. Government can even offer these low interest rate loans and earn some interest to substitute for the loss in tax revenue.	Estelle	employed individual
2022-07-11 09:11:11	KwaZulu-Natal		Yes I do	Other	Its complete foolishness and once again, incompetence on the part of the ANC to NOT allow other forms of energy production to be brought forward with immediate effect. I thought this was meant to have happened in 2019/20... it's 3 years later and still nothing has been done. For heavens sake, Govt ministers, get moving, fast... It won't necessarily resolve our energy crisis immediately, but at least, will definately assist with energy supply in the mediate to long term, so it must be done, as it should have been in the past.	Denise	employed individual
2022-07-11 09:07:56	Western Cape		Yes I do	Other	A problem cannot be resolved by the same level of consciousness which created it. The ANC or ESKOM is incapable of resolving the power issues in South Africa, because they created them. What is needed is for them to get out of the way and allow capitalists and industrialists to resolve the issues that their avarice and corruption, and short sightedness have created. Absent that this country is headed for sub third world status. Communists only know how to steal and destroy and never to create. We have been ruled by communists since 1994 and it shows in all areas of our society and culture.	Niall	employed individual
2022-07-11 09:02:14	KwaZulu-Natal		Yes I do	Other		Meggan	employed individual
2022-07-11 09:01:37	Western Cape		Yes I do	Other	WE SHOULD MAKE USE OF ALL THE METHODS OF CREATING ELECTRICITY AND FEED THE GRID OF ANY EXCESS	TERESA	employed individual
2022-07-11 09:01:12	Western Cape		Yes I do	Other	I feel that SA should be experimenting with different types of power sources, to determine what is best suited. The reality is we cannot rely solely on one source and we need contingency plans for when one source of power is short or unavailable. Eskom needs to stand back and allow other independent power providers to assist South Africa out of this terrible mess of chronic load shedding and the unsustainable rise in cost of electrical power.	T	employed individual
2022-07-11 08:58:31	Gauteng		Yes I do	Other	There are so many established, tried, tested and new technologies to facilitate alternative additional power generation. This will have new employment and many economic opportunities too.	Andrea	employed individual
2022-07-11 08:55:41	Western Cape		Yes I do	Other	I think SAs electricity needs can be met by a mixture of hydro, solar and wind production. We need to be using our elements and steering away from relying on the rest of the world and out dated forms of energy production such as coal and gas	Lila	employed individual
2022-07-11 08:42:48	Gauteng		Yes I do	Other	Sustainable and ecologically sound methods of electricity generation.	Juliet	employed individual
2022-07-11 08:38:43	Gauteng		Yes I do	Other		Tebogo	employed individual
2022-07-11 08:33:30	Western Cape		Yes I do	Other	People around the country are trying to generate their own income - through regular employment or entrepreneurship - and the failure of overstaffed, overpaid Eskom is their single biggest barrier to leaving poverty. Stop holding back creative minds from solving this problem!	Michael	employed individual
2022-07-11 08:33:14	Free State		Yes I do	Other	Please urgently generate extra electricity capability and treat it as a matter of extreme emergency.	Eric	employed individual
2022-07-11 08:33:05	Gauteng		Yes I do	Other	WInd farms, solar farms all are ready but are not connected to the grid... Look into malten salt as energy storage and well make a dent in the energy crisis	Hendrik	employed individual
2022-07-11 08:31:52	Western Cape		Yes I do	Other	Personally, I think that a mix of green energy (solar and wind), along with nuclear energy for the base load, is the way to go. And immediately, as ESKOM's inability to supply the country with its energy needs is impacting the economy radically. It is time to take emergency action and get alternate energy suppliers hooked to the national grid as a matter of great urgency!	Jacques	employed individual
2022-07-11 08:29:27	Gauteng		Yes I do	Other	Our country suffers from an excess of red tape in all areas of our economy, get rid of permits licences and official's with rubber stamps and our countries economy will take off	chris	employed individual
2022-07-11 08:23:17	Gauteng		Yes I do	Other	Government has to stop procrastinating and do something. Every person living in Soth Africa has had enough of the continual lies, corruption, etc. Just get our power back on line - and many other things too! These blackouts are affecting people mentally too!	sally	employed individual

2022-07-11 08:20:44	Free State		Yes I do	Other	We need to consider a mix that's right for the country, don't think one is the only way to go, some areas are better suited to wind farms, other areas to solar. The country is surrounded by oceans on the east, south and west and we need to examine possibilities around that too.	Darren	employed individual
2022-07-11 08:20:39	Gauteng		Yes I do	Other	All methods should be used to generate power. Allow independent producers to provide power to the grid and market forces will dictate the methods. Although hydro takes a long time to install, it is probably the best long term solution with the least side effects - Government should focus on investing in hydro. Government should focus on implementing auditing and regulatory controls for IPPs.	Dylan	employed individual
2022-07-11 08:19:00	Western Cape		Yes I do	Other	To be perfectly frank I have no idea what method of electricity production would suit our immediate needs. What I do know is that we CANNOT rely on the current method and have not been able to do so for a number of years. Our country is literally holding us all hostage to its incompetence and corruption. Our dysfunctional government is well aware that Eskom is completely inefficient (not to mention ridiculously priced) to serve our nation. They are also well ware of what this inefficiency is doing to our economy and general well being of our people, Yet despite all this they REFUSE to relinquish control to more efficient methods and better ways to do doing things. Shame on them for putting their own personal greed above the people they swore to serve. Perhaps they should be reminded that they work for us - not the other way around.	Marisa	employed individual
2022-07-11 08:18:47	Western Cape		Yes I do	Other	Anything possible	Jan	employed individual
2022-07-11 08:16:34	Western Cape		Yes I do	Other	The most effective, realistic and immediate solutions to the energy crisis should be given the green light immediately.	Louise	employed individual
2022-07-11 08:14:25	Gauteng		Yes I do	Other	Whatever it takes to stabilize a secure power supply to our country. This is destroying our economy!	Jenny	employed individual
2022-07-11 08:08:44	Mpumalanga		Yes I do	Other	In Mpumalanga especially around Secunda, sasol is a prime example to supply electricity to our town. Generating with steam and turbines. The whole process must be taken away from the government	Pieter	employed individual
2022-07-11 08:07:37	Western Cape		Yes I do	Other	All forms of power production should be included.	Steve	employed individual
2022-07-11 08:06:57	Western Cape		Yes I do	Other	anytign that fixes the issue but the most enviornmentally friendly option is the most important going forward. There should be a mix of power production methods in future and everyone should be allowed to choose what they want to use, who they want power from and how much to pay. The ANC clearly cannot run the country, their job is done (over done) and they should make way for a real government that knows and understands how to run a country.	Cristine	employed individual
2022-07-11 08:04:07	Gauteng		Yes I do	Other	A combination of ALL different types of Independent Power Production facilities would be most effective	Catherine	employed individual
2022-07-11 07:57:12	Eastern Cape		Yes I do	Other	The fact that we have to draw up a petition to get the SA government's attention to the state of our nation and electricity supply, show how deep in the dark our government is. We need to draw of every possible resource to produce electricity and feed the grid. We can start cutting Eskom and their monopoly out of the picture.	Gideon	employed individual
2022-07-11 07:54:09	KwaZulu-Natal		Yes I do	Other	Various methods can be used, we don't have to select only one. Independent Power Producers should have immediate rights to proceed. Eskom is in the past, and they desperately need competent help.		employed individual
2022-07-11 07:53:44	Western Cape		Yes I do	Other	Time for gvt to step back and allow those who KNOW what they are doing, to take over and sort this shit out. Tired of loadshedding, missing shows, having to work life around no power. This 9th world country needs to get back to being a 2nd world country, where we were before 1994! So yes, I wholeheartedly support moving forward with private sorting this out.	Beverley	employed individual
2022-07-11 07:52:31	Western Cape		Yes I do	Other	All of the above, it should not be limited to one type of electricity generation.	Tanya	employed individual
2022-07-11 07:38:10	KwaZulu-Natal		Yes I do	Other	We need a solution! Remove corruption, incompetence and self serving.	Destiny	employed individual
2022-07-11 07:35:55	Eastern Cape		Yes I do	Other	I think we should open up the private sector permanently, for power generation, but there should be limits. We should limit it to renewable generation , as it is good for the environment and it is becoming more and more cost effective every year, 2019 report by Irena: https://www.irena.org/costs/Power-Generation-Costs Regulation should still be strict about implementation, we should be looking at perma culture approaches. EG. Solar panels over farm crops that require shade, solar shade over pedestrian walk ways. This should allow us to reduce the amount of destroyed environments and habitats. Additionally, the private sector could reduce costs for citizens as they will be competitive.	Kelly	employed individual
2022-07-11 07:25:55	Gauteng		Yes I do	Other	Any other sources available. Get stolen money back There are too many Escom employees with high salaries. Get rid of them and apply money to fix this mess	Teresa	employed individual
2022-07-11 07:25:36	Gauteng		Yes I do	Other	Wind, solar, nuclear, basically all renewable and/or sustainable sources are good for South Africa (not coal)	Lauren	employed individual

2022-07-11 07:22:12	Gauteng	Yes I do	Other	To continue with existing Solar / Hydro / Nuclear / Wind. to cut the red tape and allow the IPP to produce power as we need it urgently Suggestion to use a wind turbine but have the unemployed power it with a bike/ treddle/lever type machine. They get to do a learnership to get skills while powering SA	Emile	employed individual
2022-07-11 07:22:01	Gauteng	Yes I do	Other	The country must use multiple sources available to provide energy .	Kedibone	employed individual
2022-07-11 07:06:26	Gauteng	Yes I do	Other	Let Independent Power Producers supply South Africa with electricity immediately! Amend legislation as soon as possible. Best suited electricity production?? ALL OF THEM – renewables, coal, nuclear, hydro, gas, imports! Anything to end load shedding and stop the decline of South Africa's economy.	Ryan	employed individual
2022-07-11 06:55:25	Limpopo	Yes I do	Other	All forms of power generation is desperately needed in South Africa. We do not have the luxury of choosing only one source. When rolling blackouts is a standard daily part of life, we have long passed the point where any and all power should be utilised. Just don't buy Russian oil or anything else from Russia!	Marco	employed individual
2022-07-11 06:46:39	Gauteng	Yes I do	Other		Melissa	employed individual
2022-07-11 06:44:39	Mpumalanga	Yes I do	Other	The use of wind mills like in USA and Europe could help tremendously as there is space in the Cape regions of SA. The need for independent producers is very high as clearly Eskom fail to produce electricity in our country due to lack of competent personnel and poor planning.	Ronelle	employed individual
2022-07-11 06:42:52	Gauteng	Yes I do	Other	My opinion is that additional sources of power are needed with immediate effect to avoid damaging the economy further. The method to provide that power would need to be done on a region to region basis as some areas have a wind the whole year like down on the coast and would be suited for a wind farm whereas other areas have minimal wind but have sun most of the year so could do solar. Perhaps a project could be launched so that most houses could have solar installed, even just for part of their electricity requirements, and thus reduced their electricity requirements. Perhaps if warehouses and shopping malls were to install solar as well the need would not be so great on the country's electricity infrastructure. If street lights could go solar and robots as well, that too would help. The alternate electricity must be clean, so that too must be taken into account.	Susan	employed individual
2022-07-11 06:42:50	Western Cape	Yes I do	Other	Government cannot ,CANNOT dictate the citizens of this country in every single way.What happened to free South Africa in order to sustain what this government fail to do people those who can should be allowed to choose..They cannot provide sufficient power sufficient funding cause they steal and yet all the regulations are put in place to continue with their dictatorship.This is not free South Africa for a long time now .No Red Tape	Denvor	employed individual
2022-07-11 06:19:07	Gauteng	Yes I do	Other		Celeste	employed individual
2022-07-11 00:13:35	Western Cape	Yes I do	Other	We all produce 100. ton of garbage every day. This should be separated even more efficiently and the residual waste should be incinerated in waste incineration plants. They can produce a lot of electricity and thus solve my waste and energy problem. Furthermore, if I produce green hydrogen via wind and or solar in addition to the waste incineration, I can convert the CO2, via chemical processes, and the hydrogen into menthol... which I can in turn use as fuel for generators ... to produce electricity ... or as fuel for ships ...	Mike	employed individual
2022-07-10 23:25:23	Western Cape	Yes I do	Other	A hybrid model comprising renewables wind, gas, hydro and solar together with coal which should be phased out over time	André	employed individual
2022-07-10 23:05:58	Eastern Cape	Yes I do	Other	Solar, wind, hydro, and any other "green" options.	Natalie	employed individual
2022-07-10 22:45:44	Gauteng	Yes I do	Other	I think a combination of solar and wind, being renewable, would work best, provided storage capacity is also taken into consideration. I don't know much myself but have heard some experts discussing the issue on the radio and they said the above. We have to bear in mind that climate change is a very real threat that is already affecting many countries and we need to be very cautious in the methods we choose. I think the government could have avoided this problem if they had instituted better policies. Cadre deployment, mismanagement and corruption all on a very large scale has got us into this mess. It's like trying to drive a car with the brakes on!!!!!! If they could cut some red tape quickly there may be some hope.	Sandra	employed individual
2022-07-10 22:41:08	Gauteng	Yes I do	Other	A combination of green energy sources.	Jeanette	employed individual
2022-07-10 22:38:07	Western Cape	Yes I do	Other	Consult with experts like Israel for effective new technologies and combination of modalities	Pola	employed individual
2022-07-10 22:04:30	Western Cape	Yes I do	Other	For immediate needs we need a plant that can be set up quickly. Probably gas or diesel. However in the Western Cape wind could also be looked at. For the slightly longer term coal or nuclear could be looked at.	Jean Pierre	employed individual
2022-07-10 21:48:18	Gauteng	Yes I do	Other	Our government are using funds to repair and maintain therefore we have constant breakdowns, we need an independent company to supply power	Debbie	employed individual
2022-07-10 21:45:21	Western Cape	Yes I do	Other	Anything that is more effective than the old methods which are obviously not meeting the needs	Louw	employed individual

2022-07-10 21:40:45	Western Cape		Yes I do	Other	I Suggest that Solar should be more cheaper to buy and install into our houses, as during the day sun light will run our house and at night Via Eskom. it would be a Very good start to fix south Africa Power issues. But First South Africa must first get rid of the Corrupt Government. As its the government actions that we are all in this Hot mess	normen	employed individual
2022-07-10 21:40:15	Western Cape		Yes I do	Other		Reinhold	employed individual
2022-07-10 21:23:03	North West		Yes I do	Other	Am no expert n can't say which source of energy is suitable, I rely on experts out there who can make an informed decision on this matter, but legislation change is a matter of ergency, its like it should have been changed yesterday, Minister responsible should wake up, it might be mantashe if my memory serves me well.	Phekolang	employed individual
2022-07-10 21:20:31	Western Cape		Yes I do	Other	We need to cut out the monopoly of Eskom, which include the government of corruption. Smaller enterprises needs to come into play here, and government needs to supply all municipal households with subsidence aswell. All can't afford solar and inverters, and the rising of electricity we also can't afford. Plans needs to be made urgently	Juan-Mari	employed individual
2022-07-10 21:20:18	Gauteng		Yes I do	Other	Combination of Solar, Wind and Hydro. Environmentally friendly. Also believe it should be somewhat regulated so it doesn't become unaffordable to the man on the street, it is an essential need.	Mick	employed individual
2022-07-10 21:12:35	Western Cape		Yes I do	Other	There needs to be an energy mix hence "other". In an "ideal" world nuclear should form a part of the zero carbon mix but the big issue with SA is that the level of brain drain and brittle public finances it isn't really a practical option. We need to scrap the red-tape go all out on renewables and ensure our baseload requirements are met with hydro-carbons.	Andrew	employed individual
2022-07-10 21:08:41	Western Cape		Yes I do	Other	I am not qualified to say which method of electricity production is best, but I hope that those who do make the decisions keep in mind that their business should be for the good of the community first and for profit second. If you sacrifice the community for profit, you'll run out of customers. And I'm including ecological wellbeing as "for the good of the community"		employed individual
2022-07-10 20:52:34	Western Cape		Yes I do	Other	The above question on which method to use for electricity production is an answer that is more than one. Hydrogen is something to look into Wind and solar has developed excellently over the past years. This should definitely be a source of electricity that is available to all! Why not make it that every house can have solar panels and the unused power generated is pumped back into the grid? That I can see may be an innovative solution to make a big impact. I dont know an awful lot about the grid, i just know that we need more than 1 electrical supply in SA and there are other eco friendly sources.	Justin	employed individual
2022-07-10 20:51:36	Western Cape		Yes I do	Other	We need a mix of clean, sustainable energy - from a mix of efficient sources that move fast and have a two pronged focus: 1. Quick creation of sufficient power 2. Job and project and skills creation	Celia	employed individual
2022-07-10 20:36:10	KwaZulu- Natal		Yes I do	Other	Any and all combinations must be immediately brought online to provide as stable a supply as possible. Longer term solutions can then be explored once a stable supply is achieved. However the ANC should be nowhere near the implementation of such	Stuart	employed individual
2022-07-10 20:31:07	Gauteng		Yes I do	Other	Red tape should be scrapped. There are few problems, however. This looks like ANC cadres are looking forward for new opportunity to enrich themselves. Alongside with this there should be motion to scrap BEE requirements, allow any sort of electricity production, followed by strict environmental regulations and enforcing them. On top of that, any politician and their extended family should be forbidden to become IPP.	Sasa	employed individual
2022-07-10 20:27:51	Outside SA		Yes I do	Other	Preferably green renewable energy, but since the needs are urgent, whatever is immediately available to supplement the existing insufficient supply.	Marylou	employed individual
2022-07-10 20:24:18	Eastern Cape		Yes I do	Other	Any other means that would keep our lights on	Andrea	employed individual
2022-07-10 20:13:57	KwaZulu- Natal		Yes I do	Other	South Africa needs a multifaceted approach.....wind, solar, water energy private providers	Darian	employed individual
2022-07-10 20:09:43	Western Cape		Yes I do	Other		All forms of energy contribution should be acceptable and is necessary to sustain the grid	employed individual
2022-07-10 20:04:34	Gauteng		Yes I do	Other	Private Energy Producers should be allowed to supply the grid, seeing as though the current system is unable to produce and corruption will keep it down.	Morné	employed individual
2022-07-10 20:03:42	Western Cape		Yes I do	Other	Anything besides Eskom	Clint	employed individual
2022-07-10 19:40:57	Western Cape		Yes I do	Other		Chantell	employed individual
2022-07-10 19:37:33	Mpumal anga		Yes I do	Other	Apparently Thorium is more abunted than Uranium and much safer.	Gizbar	employed individual

2022-07-10 19:18:27	Gauteng		Yes I do	Other	I am not an expert, however combinations of technologies will be required depending on the area.	Andre	employed individual
2022-07-10 19:15:28	Gauteng		Yes I do	Other	Open accessibility to all sources of power and find what works best in each region. We cannot afford to be picky! The energy crisis is ruining the country!	Esther	employed individual

2022-07-10 18:41:46	Gauteng		Yes I do	Other	Co-Co Solutions Waste to Energy is the way to go. Get rid of waste and generate electricity at the same time. A plant right next to a waste dump can work miracles and create many jobs as well.	Michael	employed individual
2022-07-10 18:38:59	Western Cape		Yes I do	Other	Solar, wave and wind power are at our disposal. We just need to be allowed to harness it efficiently and in line with sustaining the environment. We should not have to deal with oligarchic CEOs, with their corrupticians and miles and miles of bureaucratic malarkey to power our homes and businesses. One more thing: WE REFUSE TO BE TAXED FOR USING ENVIRONMENTAL RESOURCES. IF WE'RE NOT ON THE GRID, WE WILL NOT BE 'FINED' FOR IT!	Lori	employed individual
2022-07-10 18:28:04	Western Cape		Yes I do	Other	A combination of renewable energy sources to produce the most effective solutions to the problem.	B	employed individual
2022-07-10 17:07:47	Gauteng		Yes I do	Other	All types of renewable energy, including solar, wind and hydro. We should try to go green to save the planet	Joan	employed individual
2022-07-10 17:02:58	Gauteng		Yes I do	Other		Dawn	employed individual
2022-07-10 16:49:31	Gauteng		Yes I do	Other	Any solution is better than no solution. This is a crisis that needs a speedy response to promote investment and improve the economy for all citizens not the select few in government.	Sue	employed individual
2022-07-10 16:17:41	Western Cape		Yes I do	Other	Various regions would be suited to different methods, so any form of production should be welcome.		employed individual
2022-07-10 16:14:11	Western Cape		Yes I do	Other	Anything else would be better than ESKOM.. THIS loadshedding is unacceptable, it messes up one's routine, life, appliances, TIME, AND COSTS LOADS.	Stef	employed individual
2022-07-10 15:40:57	KwaZulu-Natal		Yes I do	Other	Where is the electricity? No work.	Scott	employed individual
2022-07-10 14:32:29	Gauteng		Yes I do	Other		Matthys	employed individual
2022-07-10 13:45:05	Western Cape		Yes I do	Other	Export to import skill, knowledge and intimidate and eradicate corruption. Internationals to employ 70% South Africans thus lessening poverty increase employability and international relations. That's the main reason why I chose other	Simiso	employed individual
2022-07-10 13:23:34	Free State		Yes I do	Other	Allow people with solar to sell back to the grid, so surcharge from government for people with solar. Allow private enterprzes to sell power when i worked for Telkom SA, if Telkom's service was out for 2 weeks or more you could apply for a full waiver of your rental fee. Now i understand that our power is not out that much, but if all the hours are added up then we should only pay a percentage of the electricity availability fee, municipalities charge us and municipalities should claim from escom the percentage of time electricity was not available - we still need to pay for our usage but same logic, if i pay for refuse removal and they dont come then i need to be refunded for the weeks they dont come. Not life just goes on, You delive we pay, you dont deliver , we dont pay the availability fees in full a digital solution needs to be reached to manage illegal connections to our grid, people who dont pay we sell power chaper to other countries probably because they actually pay, maybe this should be re-evaluated.	Craig	employed individual
2022-07-10 13:13:56	Gauteng		Yes I do	Other	Long term There should be competition in the energy markets. Eskom does not even have to be privatised, just allow private players to enter the market asap. Competition will lower electricity costs for consumers and ensure a sustainable energy market for the future of the country. Short to medium term Renewable power can be connected to the grid in the shortest time-frame. We urgently need to get solar and wind installations going. We also need to supplement with battery storage which can help during base-load times. Get professional engineering firms to manage the build and ensure delivery within 2 to 3 years. Get the middle class to install renewables at home by providing tax incentives for renewable installations.	Dylan	employed individual
2022-07-10 13:11:53	KwaZulu-Natal		Yes I do	Other	It is evident that our current energy supplier has been unable to meet the needs of the country for quite a few years now. which is contributing to a lowered GDP. I believe that there should be a choice available to consumers of the best energy requirement that would suit their pockets and energy requirement.	Debbie	employed individual

2022-07-10 12:43:58	Western Cape		Yes I do	Other	Each municipality should be allowed to tender for their own electricity supplier. Be it what ever form of power generation that will best suit that municipality. Municipalities must become self sufficient in this regard and then sell excess electricity to Eskom and feed the main grid. This would create jobs where they are needed and generate an income for the municipality.	Mark	employed individual
2022-07-10 12:28:56	Western Cape		Yes I do	Other	We need an immediate change before its too late! Eskom is doomed!	lynn	employed individual
2022-07-10 12:28:54	Western Cape		Yes I do	Other	We need an immediate change before its too late! Eskom is doomed!	lynn	employed individual
2022-07-10 11:53:22	Western Cape		Yes I do	Other	The red tape regarding electricity supply should be scrapped with immediate effect. It is clear to all that Eskom cannot supply electricity to South Africa (while supplying electricity to neighbouring countries). The priority of Eskom and Government is obviously not to better South Africa. Loss of electricity for hours on end is the death of many small businesses. Even the large companies are struggling to keep up their generator bills. Allow municipalities to source energy for any available source. If you live in a town you are a customer of that municipality for electricity, and not Eskom. Where the electricity comes from is not my concern. I pay availability for a product that is not available 24-7-365. We have resources available in many areas already. We have a wind farm outside our time that can supply the whole town with electricity by using two or three of their 37 wind turbines. Allow the municipality to buy directly from them. Municipalities should be able to buy from any available source. I do think their should be pricing regulations for the reselling of electricity though	David	employed individual
2022-07-10 11:45:39	Gauteng		Yes I do	Other	I believe that we should have a combination of energy sources for electricity. Government should stop trying to tax people that have already gone solar - instead, subsidise households to go solar as this will alleviate stress on the failing grid. South Africans are being compromised in a country rife with crime by cutting power and leaving us in the dark at nights. People come home from work to stage 4 and higher power cuts which essentially is the only time they really use electricity (cooking, bathing, studying etc). For most the day most likely most people have a fridge and some other items drawing electricity. What has also heppened is that many people now have battery backups which load from the grid when there is power - so they are still actually using the power so they have some sort of power at night. Government and Eskom are short sighted and desperate to be in control. You could even, when needed, have approved and subsidised installations feeding back to the grid at a small or no cost. If I am subsidised with a proper solar system that caters for my needs and then some I would consider that....(dependent on detail of such a scheme - but, thinking they would just try to rob us again and want control of my system.... maybe not such a good idea). But an idea at least.	Tina	employed individual
2022-07-10 11:35:32	Gauteng		Yes I do	Other	As Eskom is going to take too long to get back to full operation we will need to take action and look at additional/other energy producing methods. Eskom is one of the issues holding our economy back, and Solar, Wind & Hydro power generation will add to the power generation, and hopefully will surpass the generation of Eskom, and we will therefore be rid of the government monopoly with the only power generator in South Africa. As I suggested in a previous poll, get all communities access to solar with rebates from the government, and sell off Eskom assets once community or 3rd party generation surpasses that of Eskom and Eskom can be disbanded once the community/municipalities have full 'control' over their energy generation needs.	Frans	employed individual
2022-07-10 11:14:13	Gauteng		Yes I do	Other	Use whatever method/s is best in the area or available and financially viable to all. We cannot continue as we are. It's unacceptable - the price has increased but no service. Many people have had no salary increase for more than 2 years but have to keep paying more for everything. I feel for the very poor; they're suffering. God help RSA. I'm a born South African so should have English selection with an RSA flag. ??	Janine	employed individual
2022-07-10 10:30:30	Gauteng		Yes I do	Other	A combination of methods. Renewables mostly.	Don	employed individual
2022-07-10 10:26:38	Western Cape		Yes I do	Other	Any form of renewables would suit South Africa's need right now. South Africa needs electricity generation. Eskom is close to collapse. Other sources of electricity generation should have been engaged years ago already.	Debra	employed individual
2022-07-10 09:43:14	Gauteng		Yes I do	Other	IPP as alternative to Eskom has been looked into since mid 2000. Remuneration for power was unrealistic-so exit established IPP. Many companies had excess energy from processes available to the grid- remuneration proposed was unrealistic and legislation onerous- loss of potential power. It is time this was all rationalized and the good of our country put first. South Africa is being suffocated by bureaucracy, inefficiency and theft.	Barbara	employed individual

2022-07-10 09:36:50	Gauteng		Yes I do	Other	Any alternate green form of power generation will do, depending what is suitable for our area. I am not an expert and cannot state a preference as it will need extensive studies per area to determine what is available and viable. Anything other than coal!	Mart	employed individual
2022-07-10 09:31:10	Gauteng		Yes I do	Other	Any form of electricity production should be accepted as the current rolling blackouts is actually a disaster for our economy at large. Why can't home owners with excess electricity produced from solar, feed back into the grid as an emergency measure?	Morné	employed individual
2022-07-10 09:18:10	Gauteng		Yes I do	Other	It is a combination of renewable and coal.	Leon	employed individual
2022-07-10 08:59:41	Western Cape		Yes I do	Other	I support any sustainable method to produce energy.	Andre	employed individual
2022-07-10 08:56:25	Gauteng		Yes I do	Other	Ideally renewable sources but at this stage anything will do. The question is just "what's going to be an immediate solution!". These things take time. Solar would probably be the fastest solution to implement and start taking pressure off our failings grid.	Andre	employed individual
2022-07-10 08:54:36	KwaZulu-Natal		Yes I do	Other	I do not know what the best solution for SA's immediate need, however I do not think that Electricity should be controlled by an SOE.	Roger	employed individual
2022-07-10 08:40:47	Western Cape		Yes I do	Other	Currently the minister is more worried about job losses at ESKOM and the mines that provide coal for power generation, than the economy and the paying customers of this country. Power generation should be privatized.	Jacques	employed individual
2022-07-10 08:37:53	Western Cape		Yes I do	Other	I do believe we need a mix of hydro, wind, solar and gas can help our strained system work. We will likely not be able to phase out existing methods of generating energy, but we could reduce them significantly. Naturally, the storage of energy for the dry months is a major challenge.	Lourens	employed individual
2022-07-10 08:35:59	Gauteng		Yes I do	Other	I believe we need a blended approach to electricity generation. We have reached the stage where Eskom does not have the ability to turn around its ageing fleet of power stations for various reasons. Multiple smaller privately owned producers will be more efficient and productive. Let the private sector find solutions to the energy crisis. They have a proven track record of efficiency and responsiveness to needs in the economy. We also need more independent power producers to remove the stranglehold the Eskom labour force has on Eskom and the economy.	Gerrit	employed individual
2022-07-10 08:35:18	Gauteng		Yes I do	Other	Generate clean energy from you organic waste and reduce our carbon footprint	Pam	employed individual
2022-07-10 08:31:59	Gauteng		Yes I do	Other	All methods to be made available to IPP's	Eric	employed individual
2022-07-10 08:26:14	Western Cape		Yes I do	Other	Any other independent form of power would improve the current situation	Jackie	employed individual
2022-07-10 08:25:06	Western Cape		Yes I do	Other	Different regions have different resources or capacity to generate electricity. A combination of a few of the above choices, across different provinces is the way to go.	John	employed individual
2022-07-10 08:06:19	Western Cape		Yes I do	Other	The monopoly in existence by the SOE owned ESKOM needs to be removed immediately with Independent Power Suppliers opened up country wide. The method of producing required power should be geared to the most appropriate method for the different areas of the country - be it coal, hydro, solar, wind, gas. The criteria of what method to use should be what and which will meet the immediate needs for production and should not be limited/restricted to one method.	Pieter	employed individual
2022-07-10 08:06:08	Western Cape		Yes I do	Other	We are country of sunshine yet not powered by it - surely that should change - utilize the wind and sun and make available to all	Cathy	employed individual
2022-07-10 08:01:25	Gauteng		Yes I do	Other	Any power supply is needed as the current government controlled institute has been falling for so long already that the fact that we have not already made this change proves how bad the current government is and has been since its start!	Leonard	employed individual
2022-07-10 07:54:39	Mpumalanga		Yes I do	Other	We need a combination of methods for energy production in South Africa.	Cheryleen	employed individual
2022-07-10 07:46:10	Gauteng		Yes I do	Other	It does not matter how electricity is produced we need it far to urgent to care as loadshedding is further damaging the economy of SA and putting various institutions in danger of closure if this continues. Remove eskoms menopoly and we should quickly see them get their act together plus reducing their prices. As per us allow private home owners producing more electricity than needed to feed back into the grid, allow private electricity companies and give us a choice to which you would like to be connected to or even better fire all the management at eskom and replace with a new team not paid so much and with actual proven experience and track records and give them a cut off time frame to fix things as current eskom management is clearly incompetent to do their job	Simonn	employed individual
2022-07-10 07:41:53	Western Cape		Yes I do	Other	Eskimo has failed. Lack of planning and pillaging Eskoms coffers has destroyed the energy producer. We need alternative sources of energy. We have opportunities for geothermal energy production as well as wind and solar. Independent and private energy production must be allowed to help SA's economic recovery.	Andron	employed individual
2022-07-10 07:36:46	Gauteng		Yes I do	Other	Use everything available to your disposal. Immediately	A	employed individual
2022-07-10 07:34:54	Gauteng		Yes I do	Other	Any other source, wind, solar is in abundance in South Africa, it's just a question of cost again.	Marlize	employed individual

2022-07-10 07:34:54	Gauteng		Yes I do	Other	Unbundling our electricity supply would not only give a much needed boost to our economy but also eradicate the inherent issues that Eskom is facing. Competing electricity suppliers would eventually bring the cost of electricity down and without doubt deliver a much more reliable service.	Andre	employed individual
2022-07-10 07:29:45	Western Cape		Yes I do	Other	We need a mixture of different sources. Depending on what resources are available, weather it is solar, wind, wave, hydro or nuclear power. As a last resort coal power.	Johan	employed individual
2022-07-10 07:23:41	Gauteng		Yes I do	Other	While we search for long term solutions I vote for renewable resources. Definitely not drilling for gas near the coast I do realise that energy generation comes at a price but it has to be carefully considered and not driven by old political loyalties and corruption.	Lieza	employed individual
2022-07-10 07:23:39	Gauteng		Yes I do	Other		Yolanda	employed individual
2022-07-10 07:21:40	Gauteng		Yes I do	Other	Electricity created by using mother nature ie wind, sun etc non polluting environment friendly and inexpensive to consumers we pay taxes but dont get the service that should be delivered.	Samantha	employed individual
2022-07-10 07:19:23	Eastern Cape		Yes I do	Other	Whatever is available should be employed to keep power on. Not having power is bad for business - whichever way you look at it.	Johan	employed individual
2022-07-10 07:14:01	Western Cape		Yes I do	Other	I do support scrapping the policy red tape for independent power producers but still feel there needs to be some form of regulation that protects the consumer. Not that can be exploited by Government but that can regulate the companies from exploiting South Africans.	Bryan	employed individual
2022-07-10 07:11:59	Gauteng		Yes I do	Other	I dont know enough to comment	zipora	employed individual
2022-07-10 07:10:39	KwaZulu-Natal		Yes I do	Other	Whichever method is most cost-effective and stable enough to keep the lights on. We may need different methods for different areas eg wind may work well in the Cape but not somewhere where there is less wind!	Susan	employed individual
2022-07-10 07:09:59	Western Cape		Yes I do	Other	All possible methods should be employed. Open the grid. Allow all entrepreneurs to set up power station and connect to grid.	Dedre	employed individual
2022-07-10 07:04:42	Gauteng		Yes I do	Other	Whatever method is stable and can keep the lights on, without the need for loadshedding.	Branden	employed individual
2022-07-10 07:02:46	Free State		Yes I do	Other	We need electricity as Eskom is failing dismally. Let independent producers create electricity and add a surplus to the grid, or allow companies to create their own power. The more people create their own power the less pressure is on Eskom. Eskom cannot keep up the power station maintenance as it is, plans are being made to take power stations offline due to age. Let independent producers take the burden for large companies and energy producers, so that the small companies and consumers can still have electricity from Eskom and have electricity. In closing, let the people decide what they want as Government cant make all the decisions as we are not a Communist state we are a Democracy and in a Democracy the people have the say.	Roelof	employed individual
2022-07-10 06:57:45	KwaZulu-Natal		Yes I do	Other	Look at all solutions that are derived from renewable resources: hydro, solar, wind. Make them cost effective for the consumer, particularly solar installation on the roofs of private households, to encourage homeowners to go this route, thus reducing the demand on the national grid.	Diane	employed individual
2022-07-10 06:57:04	Western Cape		Yes I do	Other		Gerard	employed individual
2022-07-10 06:14:29	KwaZulu-Natal		Yes I do	Other	South Africa desperately needs independent power producers! We need to end the government monopoly now! Solving our energy crisis does not involve fixing Eskom. It involves supportive policy changes for a fair and open energy market in SA. This is one way to end the corruption through competition. Coal and non renewables are definitely not the way to go. However we will in all likelihood need a diversity of options in the beginning, with a clear vision of progressing to renewables within a 10 year timeframe. We need to incentivise decentralisation of sustainable energy provision by allowing people to feed back power onto the grid and be paid for it, and subsidising solar panels for private homes. South Africa is a sunny country, we should not be allowing or incentivising dead roof space. Likewise policies should be put in place for commercial zones: malls and offices should not be allowed to be built without sustainable design: I.e. at an absolute minimum solar panels on their roofs for energy generation as well as rainwater harvesting. The energy-water-good nexus should be considered, not just energy in isolation. South Africans are creative. But we need supportive policies to allow business to flourish in the energy production industry. This in turn will allow other businesses to flourish, in turn, with positive impacts on the economy and morale.	Alanna	employed individual
2022-07-10 06:07:07	Gauteng		Yes I do	Other	Any form of independently produced power is better than what we have.	Brian	employed individual

2022-07-10 05:50:17	Western Cape		Yes I do	Other	A combination of renewables need to be added including solar, wind and hydro, to add to gas, coal and nuclear that exists. The current fleet of power stations need to be maintained to provide what they were designed to and slowly retired as necessary, and as more less environmentally harmful energy comes on stream	Gisela	employed individual
2022-07-10 05:36:53	Western Cape		Yes I do	Other	South Africa should allow any entity to supply power to the country by any means that is environmentally friendly and sustainable, as long as such entities adhere to stipulated regulations and guidelines that are carefully considered and put in place, not to obstruct business, a free market and competition, but to protect the country, its natural resources and its people.	Juanita	employed individual
2022-07-10 04:48:12	Gauteng		Yes I do	Other	Electricity can be derived from multiple sources and all of these sources should be used. The availability of the source needs to be ascertained and then the appropriate source used. This includes solar nuclear	Renate	employed individual
2022-07-10 04:34:25	Gauteng		Yes I do	Other	An combination of power options needs to be implemented immediately. Allow private suppliers immediately.	Phillip	employed individual
2022-07-10 04:05:12	KwaZulu- Natal		Yes I do	Other	Any other source of electricity will do because the government can't supply our needs.	Donovan	employed individual
2022-07-09 23:23:39	Gauteng		Yes I do	Other	I think we should make use of all available energy sources.	Stephan	employed individual
2022-07-09 21:27:37	KwaZulu- Natal		Yes I do	Other	Firstly, supply of power should be provided by competent, responsible individuals - ESKOM has neither. Hydro, solar, and wind are options that are already used in other countries. The only reason it has not been actively pursued in SA is because of the easy opportunity to STEAL by Eskom individuals and government. NOBODY IS BLIND TO THIS! Hire competent, honest individuals, irrespective of their color, and start taking responsibility for what they get paid for. This is not rocket science. The ANC has failed miserably in running this country and they do not care. It's time for many more of these initiatives to take back our country.	MTO	employed individual
2022-07-09 20:17:10	Gauteng		Yes I do	Other	Hydro, solar, nuclear, wind. Let PRIVATE South African engineers assist South Africa with energy production. The government requires assistance. Eskom clearly can't keep up with the countries energy requirements. Allow private companies to produce energy in South Africa.		employed individual
2022-07-09 19:58:43	Western Cape		Yes I do	Other	The various renewable energy technologies have matured to such a degree that they are viable additions and replacements for the aging and ecologically damaging fossil fuel power station. Allowing independent power suppliers to feed energy into the grid would ease the pressure on Eskom to actually diversify their mix and do proper maintenance on their own fleet. We need a better mix of power. Our long ongoing power crisis is affecting our ability to do expand South Africa's economy. The IRP processes cannot continue if we do not have energy security. In order to benefit the entire South African citizenry we need stability. Home users that are able to implement their own generation capability should also be given some form of assistance to do so, with the understanding that any additional capacity that they may have can also be fed back into the grid, with certain credits or benefits, maybe in the form of credits against something like tax credits or cost credits with Eskom against any actual usage that they may use from the national grid. It is no longer feasible to operate in the current manner. This impacts the lower echelons of society in a more direct manner than it does those that have means to isolate themselves from the direct impact. There needs to be a direct, transparent, non-corrupt mechanism put in place to prioritize this implementation of a migration to a mix of renewable energies to also isolate ourselves from international price fluctuations of the international market. We will not be an attractive investment destination if we do not start focusing on creating a stable environment; something we cannot do without getting our energy crisis under control.	Sonja	employed individual
2022-07-09 18:57:20	Gauteng		Yes I do	Other	I think a combination of energy usage is an option. Residential power could be provided through renewable natural energy sources and industry could be supplied by the SOE. This would take the pressure of supplying to homes but ensure that SAs industry is supported by government.... Obviously this would mean Eskom would have to sort out their current shortcomings and cutting their red tape would allow this to happen more rapidly.	Meagan	employed individual
2022-07-09 18:56:35	KwaZulu- Natal		Yes I do	Other	This a no brainer. It's obvious that Eskom and its antiquated coal plants cannot supply SA power needs. We need environmentally friendly options to be set up immediately, independent producers will ensure there is a competitive market, with much more reasonable prices. The govt and Eskom have had the monopoly for far too long.	Julia	employed individual
2022-07-09 18:48:52	Western Cape		Yes I do	Other		Rickus	employed individual
2022-07-09 18:32:07	Western Cape		Yes I do	Other	S.A. needs to use all available power sources, solar, wind and hydro power included. This is vital if we are to kick-start our economy.	Sue	employed individual
2022-07-09 18:22:19	Gauteng		Yes I do	Other	All possible energy should be sourced	Franciska	employed individual
2022-07-09 18:13:15	Western Cape		Yes I do	Other	Eskom to be privatised and must compete with other alternative energy producers, there must be diverse pool of various energy source suppliers	Eugene	employed individual

2022-07-09 18:08:03	Western Cape		Yes I do	Other	Any means necessary for electricity. There are many ways to generate electricity. I believe a diverse network using sun, wind, hydro, coal and nuclear to generate is the way forward. That way we are not reliant on one source for generation and it is more sustainable. The big thing... procurement needs to be a transparent process. And as soon as a service deliverer is out of line... they need to go. We can't afford another Kusile	Johan	employed individual
2022-07-09 17:17:38	Western Cape		Yes I do	Other	I would be happy with any other form of power generation as long as puts an end to the load shedding. I am only concerned about the use of nuclear power. If not properly maintained could be disastrous.	Bernard	employed individual
2022-07-09 17:09:21	KwaZulu- Natal		Yes I do	Other	Immediate needs can only be met with more coal available to the present production plants and better maintenance of these. The future lies in solar, wind, and nuclear power though and should be thought of concurrently with the alleviation of the immediate needs.		employed individual
2022-07-09 16:57:24	Western Cape		Yes I do	Other	Any and all options to produce power, as long as it is privatised and thus good service will be rewarded with constant clientelle. If it were privatised, we would NOT have loadshedding. Enough of useless government action. Let people who want to work do a good job, and work. Privatised electricity supply and everyone will win.	Lee	employed individual
2022-07-09 15:48:55	Western Cape		Yes I do	Other	Not sure which method of production now but something desperately needs to be done with absolutely NO state involvement, not even an uncle of government's sisters ex-husband's daughter in-law!	Georgina	employed individual
2022-07-09 15:47:49	KwaZulu- Natal		Yes I do	Other	Any and all methods of electricity production that can assist the country to have enough energy supply must be considered.	Johan	employed individual
2022-07-09 15:40:32	Western Cape		Yes I do	Other	I really don't care about what sort of power we use in the short term to stop the constant outages during the work day. We cannot continue to do business in the current environment. We cannot keep producing employment opportunities if we are to see 5 hours of power outages during the working week. Any type of emergency power would be welcomed. We need to find cheaper electricity production to make Eskom honest and having to keep their costs under control and be better at collecting their massive debts. Currently they are surcharging those who are paying to appease those who vote for the ruling party and don't pay their bills. Longer term I would like to see sustainable green power but having power is more important than how it's produced.	Simon	employed individual
2022-07-09 15:32:48	KwaZulu- Natal		Yes I do	Other	The government must allow Eskom grid to procure as much as possible electricity from independent power producers from all types of power sources, whether solar, wind, coal. It does not matter. We pay huge taxes to the South African government and very expensive rates for electricity which is not available more often than it is actually available. The government has shown that they have failed to hold Eskom in generation capacity to account and that things at Eskom generation has dilapidated to such an extent that it can't even deliver 50% of the capacity that it was able to do 25 years back. Government must remove all red tape and let independent private power producers to provide electricity to the national grid as private companies have boards and shareholders who actually hold the company to account on what happens to their money. Government must allow private electricity producers to come on board ASAP in order to keep the economy from collapsing further.	Derik	employed individual
2022-07-09 15:28:19	Gauteng		Yes I do	Other	All possible avenues of power generation must be explored to rescue the country from the precipice of economic disaster. Methods which are renewable and do not contribute to the rampant climate disaster must be explored.	Karen	employed individual
2022-07-09 15:27:02	Free State		Yes I do	Other	Get another supplier for power. Eskom is useless	Rosetta	employed individual
2022-07-09 15:16:22	Gauteng		Yes I do	Other	There are technologies available on the market that conduct pyrolysis of waste. These include portable, plug and play solutions that don't produce any emissions. These could be available in every industrial and commercial complex in the country as well as in townships as they fit into a standard 20ft shipping container. Companies' waste is pyrolysed on site, producing an unrefined paraffin equivalent that could be fed straight into generators (adapted for this fuel). In this way, commercial waste, especially plastic, is given an economic value. This solution also avoids the costly and polluting transport of the waste and fuel as it would all be produced and consumed on site. This would therefore contribute greatly to environmental management by reducing landfill and unnecessary consumption of imported fuel. However, this technology is governed by the PP Act, the NEMA and other onerous municipal regulations that make the investment prohibitive. Legislative amendment should therefore be a priority to encourage investment into micro-level energy solutions like this.	Nicolas	employed individual

2022-07-09 15:09:14	Gauteng		Yes I do	Other		Amanda	employed individual
2022-07-09 14:50:42	Western Cape		Yes I do	Other	If we stop shipping good quality coal to China and use it here for the time being so as to incorporate another energy source, then out-phase the coal and introduce another that doesn't cost an arm and a leg over the long term to replace or maintain and falls in line with global care and concern, environmentally, I'd be happy.	Jonathan	employed individual
2022-07-09 14:30:55	Gauteng		Yes I do	Other		Makoma	employed individual
2022-07-09 14:14:25	KwaZulu-Natal		Yes I do	Other	Anything and everything will help at this stage, including no longer exporting to our neighbours. It's time to put South Africa first. We all know the ANC is against IPPs because it means there's less for them to loot at Eskom, but they need to realise that destroying the country (as they are currently doing) will ALSO result in less to loot. It's also time they stopped blaming apartheid. You don't drive your car for 30 years without servicing it, so how do they expect Eskom to provide electricity when they've looted all the money that should be used for maintenance?	Sharon	employed individual
2022-07-09 14:05:46	Western Cape		Yes I do	Other	I suggest any and every alternative method of Electricity Supply. If Govt was obtuse and irresponsible enough to not have vision, oversight and solutions decades ago then every avenue had to be used immediately to keep the country supplied with electricity and none of the fake promises they make in SONA every year - we not interested to hear it any more.	Diana	employed individual
2022-07-09 13:36:18	Western Cape		Yes I do	Other	Implement ASAP all possible options for power generation that could solve the crisis in the short to medium term.	Isak	employed individual
2022-07-09 13:19:17	Western Cape		Yes I do	Other	It is time for the government to relinquish the monopoly over the power supplied to SA homes - as it is failing the people hopelessly. It is time to - with immediate effect - allow private power producers to supply the people with renewable and clean energy that does not rely on coal. There are companies like Mahube already in this field. We live in a country that is blessed to have a long coast line for wave energy and if you live at the coast there is a lot of wind to be harnessed. We have beautiful sunny weather, solar power is there for the taking with no risk to it being in short supply. No foreign war in a distant land can affect the sunshine. My only caution would be to ensure that there are checks and balances to stop nepotism and the corrupt granting of tenders to buddies of those that are in government. Come on South Africa - this is your chance to lead Africa during this global energy crisis. To be the light on the Southern most tip of Africa both physically and leadership wise. Start a legacy that will be remembered and spoken of by future generations.	Fern	employed individual
2022-07-09 12:12:19	Western Cape		Yes I do	Other	Government get out of the damn way!! You and your Eskom are killing the whole nation. Voetsek man!! Allow the private sector to generate the power so we can get some hope for the future! The private sector will do it properly and on a sustainable trajectory. They WILL make profit. ALLOW them! You will just steal at least a 1/3 of that in taxes to go and waste on corruption, anyway! The poor are dying in agony and hunger due to an economy that can't feed them and that is ALL on you!! Get out of the flippen way!	Dewan	employed individual
2022-07-09 11:55:55	KwaZulu-Natal		Yes I do	Other	A combination as different regions have different needs and resources	Jonathan	employed individual
2022-07-09 11:46:24	Western Cape		Yes I do	Other	We could do a combination of hydro, solar and wind. We just need to be careful of the environmental impact and not make a wrong decisions like using nuclear or destroying the earth (which in essence we're already doing by using coal) because we're so desperate to keep the lights on.	AJ	employed individual
2022-07-09 10:46:29	Gauteng		Yes I do	Other	South Africa is rich in natural resources and we should tap into those that are economically viable to sustain every day life and trade. There should be choice as to what vendor and sources you want to use or combine.	Jeffry	employed individual
2022-07-09 10:38:25	Western Cape		Yes I do	Other	We need to look at a good mix of renewable energy and think outside the box with regards to producing biodiesel from waste streams.	Dyanne	employed individual
2022-07-09 10:17:03	Western Cape		Yes I do	Other	Alternative energy providers need to be encouraged and supported as Eskom is unable to meet the demand to support our beleaguered economy. The current lack of supply is due to inherent corruption, an entitled workforce and lack of political will to resolve the SOE's poor performance. This would not be an issue in a competitive market.	Helen	employed individual

2022-07-09 10:12:23	Western Cape	Yes I do	Other	<p>To ask the public the question now on what method we feel is suitable is for starters really a bit too late as everything including power supply in our country is a mess because of not resolving things at the root. In my opinion people and their decisions are the problem here. We as a country has been going in circles for a long time allowing all this to happen to the point where our law abiding,tax paying citizens are so quiet that questions now have to be raised at them to get a response .</p> <p>My question to you is? How are we to answer what the resolution is to our failed power supply when systems and trained/educated/ knowledgeable people ,on electric supply systems and structure have been put in positions to ensure that what is currently happening in our country is not to be the case.</p> <p>Most of our citizens are not blind . We have been observing how our country has been miss managed in different sectors for years. This electricity issue is just one of the sectors. Everyone has been seeing this day coming so no should be surprised .</p> <p>Yes,if we don't deal with the root of the issue ,we will be back with discussion s come next year, and the following because that has been the trend for South Africa for a very long time.</p> <p>Good luck with resolving just another broken down system as we as the citizens of SA in a whole is not electrical engineers ,so posing most of these questions regarding electric supply system resolutions, we can not answer.</p>	Allister	employed individual
2022-07-09 10:04:50	Eastern Cape	Yes I do	Other	Every town must have it's own power supply and a person with good knowledge about it, must be appointed to run it.	Hester	employed individual
2022-07-09 09:41:29	Gauteng	Yes I do	Other	Eskom will not be able to recover in the near future. IPP's should be allowed to invest in various forms of energy generation (solar, wind, hydro, etc.) and to supply to the electrical grid. Private households must be encouraged to invest in solar and wind power generation to ease the pressure on the grid. The immediate needs of SA would need to focus on solar, followed by wind and hydro. The mess at Eskom must be considered as a state of emergency and all those holding the country at ransom must be dealt with accordingly.	Paul	employed individual
2022-07-09 09:28:04	North West	Yes I do	Other	Combination of some of the above	Marinda	employed individual
2022-07-09 09:20:03	Eastern Cape	Yes I do	Other	South Africa should allow the public and private sectors to produce electricity in any means they desire and acquire that electricity from whichever producer is cheapest. The principles of economics will drive competing companies to produce electricity efficiency and sustainably. It is important to note that the majority of South Africa's electricity is currently produced by coal (the worst method from a environmental perspective), so irrespective of which method independent companies choose, it will not be worse than the status quo. Additionally, and perhaps more importantly, all stakeholders should recognise the stake government holds in Eskom and the corruption and mismanagement that has lead to this predicament. Adding more stakeholders to an already fragile system fraught with deep seated bureaucratic overreach and crime may not be the best idea, but it should play a role in moving the sector in the direction of privatisation which is the only true solution.	Daniel	employed individual
2022-07-09 08:49:37	Gauteng	Yes I do	Other	Hulle moet beslis van enige ander plan gebruik maak. Ons land gaan nou te vinnig agteruit. Alles word toegelaat (menseregte) maar intussen kan alles tot stilstand kom.	Aletta	employed individual
2022-07-09 08:29:06	Gauteng	Yes I do	Other	<p>Dear Pravin</p> <p>Please allow private producers to get on with generating power so that we do not have to rely on Eskom. Please push for a focus on renewables (solar, wind, hydro, tidal (Richards Bay) and turbines for pressure let-down stations in water pipelines. Please do NOT do nuclear as it is a bomb waiting to happen.</p> <p>Regards</p> <p>Charles</p>	Charles	employed individual

2022-07-09 08:27:28	Gauteng	Yes I do	Other	<p>Hybrid solutions needed. More renewables required (need to meet climate change commitments). Solar plants can be quickly built.</p> <p>Allow private micro solar plants (eg small factories and residential installations) to sell excess power to the grid (even if it is at a lower rate) - many of these people are already producing excess power and it will encourage new installations and ultimately grid stability. This can immediately add significant capacity to grid, although not during peak hours it allows emergency sources to be used during peak hours and not during the day.</p> <p>Wind is also required. Coal, gas, nuclear all long builds and expensive.</p> <p>IPPs may put pressure on ESKOM and it's supply chain to cut prices (due to corruption and inflated prices). ESKOM is currently at the mercy of the supply chain, if they refuse to pay the overpriced supplies, they have to loadshed, so ESKOM pays and corruption investigations don't take place.</p> <p>Private industry is ready to add capacity and the economy and the poorest of the poor need this change to happen.</p>	Mike	employed individual
2022-07-09 07:49:43	Western Cape	Yes I do	Other	<p>At this stage any type of electricity production would help, renewables are the way forward but to address the immediate crisis is the pressing issue. These blackouts are very disruptive and are costing the country enormous amounts in lost productivity etc.</p> <p>The more electricity producers we have the better, it might help in bringing the costs down if there was more competition. Coupled with the rising fuel costs and general cost of living increasing the current situation is untenable and causing irreparable to this wonderful country!</p>	Paul	employed individual
2022-07-09 07:49:08	Gauteng	Yes I do	Other	<p>The only criteria for an IPP should be to conform to Grid requirements to ensure grid stability is not compromised. The IPP needs to be able to wheel and sell to whomever is willing to buy its electricity.</p> <p>South Africa should look at an energy mix, as not one single generation technology is a "silver bullet".</p> <p>The emphasis should be on moving to gas generation as this also has the potential of creating critical mass for a gas economy with downstream benefits in producing chemicals etc. This is also a step towards the hydrogen economy.</p>	Frank	employed individual
2022-07-09 07:37:50	Western Cape	Yes I do	Other	<p>It is very clear ESKOM cannot meet South Africa's needs. Independent supply is a necessity. This cannot be limited to one source but should preferably be clean, renewable sources. It may be necessary to allow other sources such as coal and diesel short-term but the goal must be to move away from these sources in the long-term as these sources are limited and will run out. In addition these sources are also not clean and pollute our environment.</p>	Gary	employed individual
2022-07-09 07:22:59	Mpumalanga	Yes I do	Other	<p>Solar power is the most efficient way to harness and produce energy, but nuclear is also an option considering the massive demand currently required.</p>	Jay	employed individual
2022-07-09 07:03:59	Gauteng	Yes I do	Other		Moi	employed individual
2022-07-09 06:55:53	Western Cape	Yes I do	Other	<p>There are lots of companies able to generate electricity which can be connected to the grid.</p>	Steve	employed individual
2022-07-09 06:46:16	Gauteng	Yes I do	Other	<p>It is with my submission that solar and nuclear energy is needed in South Africa to stabilise the crude as we got the weather in the Karoo for solar and nuclear is much viable to sustain the gride.</p>	Nhlanhla	employed individual
2022-07-09 06:41:50	KwaZulu-Natal	Yes I do	Other	<p>Solar, wind or hydro are all options. The point is that what is in place at present is not working & an alternative needs to be found.</p>	Alison	employed individual
2022-07-09 06:30:11	Western Cape	Yes I do	Other	<p>Independent power producers would be more reliable as long as it's not a repeat of the COVID PPE scandals we have seen over the past 2 years.</p> <p>Also, it would be advisable to have competent people in vital positions.</p>	Dirk	employed individual
2022-07-09 06:00:47	Eastern Cape	Yes I do	Other	<p>All available resources must be looked in to and be explored. We can not go on like this it is destroying our future and our economy which they haven't got a clue of they must also explore the mear fact of getting rid of the ANC's and their cader deployment that got us here in the fist place.</p>	François	employed individual
2022-07-09 05:04:45	Gauteng	Yes I do	Other	<p>Stop talking and start acting. This economy is on it's belly let alone its knees. Do something before it has gone forever</p>	Lee	employed individual
2022-07-09 02:38:58	KwaZulu-Natal	Yes I do	Other		hrndrico	employed individual
2022-07-09 00:38:44	Western Cape	Yes I do	Other	<p>A combination of renewables can be used to supply SA. Solar and wind farms in strategic areas for day use and whatever is left of eskom to supply at night combimed with hydro. Coal isnt an answer anymore and with how infrastructure is maintained in this country Nuclear is a high risk. The fact that Koeberg is being stretched way beyond its lifetime is already a major concern.</p> <p>Create jobs by producing local solar solutions and making the product more affordable as its being mass produced locally. They money remains in country which will help the economy and a lot of middle men can be avoided that also take a cut from selling these type of products. Regulation and control is paramount to get rid of this corruption and opportunities to stash cash under a mattress!</p>	Theo	employed individual
2022-07-09 00:29:01	Gauteng	Yes I do	Other	<p>South Africa needs an energy mix, for the baseline power we have an abundance of coal, South Africa can build efficient coal power stations in the immediate to long term, with a limited nuclear power stations as well. The government must consider subsidies for homes and SMME to encourage them to use renewable energy such as solar, excess power can be fed back to the grid. Solar and wind farms can also be built in the short to medium term to reduce the levels of load shedding. Municipalities must also come to the party and invest in self production solutions, instead of solely relying on ESKOM.</p>	Eric	employed individual

2022-07-08 22:44:55	Western Cape		Yes I do	Other	Any of the above methods for electricity production would suit SA's needs. Better than what we currently have now.	Nadia	employed individual
2022-07-08 22:13:33	Western Cape		Yes I do	Other	A combination of wind, coal, hydro, solar etc. must be used.	Barend	employed individual
2022-07-08 21:17:26	Mpumal anga		Yes I do	Other	Not one renewable resource will be the solution but a combination of all. That will only happen if as many as possible sources are allowed access to the grid because that will allow a mix of resources to feed energy into the mix.	Corne	employed individual
2022-07-08 20:32:38	Western Cape		Yes I do	Other		Brenden	employed individual
2022-07-08 19:58:50	KwaZulu- Natal		Yes I do	Other	A combination of Hydro and nuclear, it's clean and has been used with success in South Africa.. its important to maintain all our imperative needs: water, energy and food supply, this our government has failed to achieve with a fatal effect nationally, they should all resign as they have failed to achieve their mandate to the South African citizenry. Instead they have stolen assets belonging to the people of South Africa which is theft and treasonous acts!	Sandra	employed individual
2022-07-08 19:32:05	Free State		Yes I do	Other	Its about time we realise that our power supply of electricity is corrupt....no one in the working class can afford the high price of electricity....we pay tax upon tax upon tax just to supply salaries of humungus amounts to those high rank workers in Eskom....so to stop this down right looters of looting money of the innocent hard working middel class section of the nation let us turn to a much affordable way of producing electricity by going to other ways of private production of electricity so thay all may benefit without having to turn the rand in our pockets more than once to pay for our lights to remain on.	Suzanna	employed individual
2022-07-08 18:57:51	Western Cape		Yes I do	Other	We have great natural resources that can produce power and we should use as many of them as possible with the least possible effect on the natural balance. Also we need to teach people to stop consuming excess and being wasteful. Allow power supplies relative to household occupants and industry type at a reduced rate and every watt there after at a penalty rate.	Daniel	employed individual
2022-07-08 18:51:22	Eastern Cape		Yes I do	Other	We have all seen what level 6 load shedding looks like. Business shut down for 4 hours at a time. So anything that keeps business going like keeping the power on is good. The quickest way to generate new jobs and get unemployment numbers down is to do whatever is necessary to get small business going. The firs step for these businesses to provide enough income to employ people is to be able to have enough power to keep business hours and not only do 4 or 6 hours of business as day. Also load shedding during night time gives criminals the added advantage of the cover of darkness to commit their crimes. So just having enough lights will also reduce crime. Since crime and unemployment are the 2 things most South Africans are worried about and keeping the power and lights on to get business going is the quickest way to improve everybody's life. With this in mind anything that will keep the power grid functional and lights on are to be implemented asap. So any red tape that slows down the process of generating more power must be scrapped with immediate effect. Sure by all means try to go green where possible but the most important criteria for the next 2 to 5 years is to make sure that the power grid is fully operational and won't collapse leaving us all in the dark. Once the power grid sustainability is assured there can be a gradual move toward going green and phasing out coal and diesel over say a 10 year period. Take note the pollution from burning tyres, buildings and trucks or cars when anarchy reigns due to unemployment and crime will exceed the pollution from coal or diesel production.	Albert	employed individual
2022-07-08 18:50:54	Western Cape		Yes I do	Other	Everything is needed now. You cannot choose anymore.	Dennis	employed individual

2022-07-08 17:08:19	Gauteng		Yes I do	Other	<p>Whatever resources are available to put an end to the present fiasco.</p> <p>Plus an urgent need to replace incompetent ministers and leadership in any way associated with energy.</p>	Judy	employed individual
2022-07-08 17:05:42	Western Cape		Yes I do	Other	<p>Implement my DBI World New Super Internet proposal from South Africa and the daily income of Billions of US Dollars into South Africa will Solve ALL of South Africa's financial woes!</p>	Wilhelm	employed individual
2022-07-08 17:03:56	Western Cape		Yes I do	Other	<p>Mixture of all , solar , wind , coal and nuclear. Get moving or continue to slide backwards, hire the professionals and get rid of the politicians involvement in the project.</p>	Edward	employed individual
2022-07-08 16:50:11	Gauteng		Yes I do	Other	<p>I believe that we need to better utilize renewable energy sources like Hydro, Solar and Wind power. We should not continue relying on Coal power.</p>	Jacques	employed individual
2022-07-08 16:45:22	Western Cape		Yes I do	Other	<p>We need to move over to renewable energy! Hydro, wind, solar!</p>	Natasha	employed individual
2022-07-08 16:44:11	Gauteng		Yes I do	Other	<p>We need to make alternative energy available immediately and at a competitive price. I don't think we should look at a single method of energy generation, but rather at all possible renewable sources where appropriate while still taking care not to damage the environment.</p>	Richard	employed individual
2022-07-08 16:30:13	Gauteng		Yes I do	Other	<p>I think we should look at a combination of solar, coal and nuclear. We have plenty of coal and we need to use it while we can, provided it is a "clean coal" process that doesn't pollute. Solar of course because we have plenty of sun so it is an obvious one, except when you have cloudy days and it is expensive at present. Nuclear should also be in the mix.</p> <p>There are currently about 2 600 MW of renewable power being tendered from independent suppliers and about 9 000 MW have actually been submitted from prospective vendors. Why not taking the whole lot when we are in trouble?? That would make a difference.</p>	Diomedes	employed individual
2022-07-08 16:29:18	Western Cape		Yes I do	Other	<p>I am not an expert on Power Producers but the problem with Eskom is hurting our Country economically and our people already are suffering financially. Any solution at this stage will be great.</p>	Juanita	employed individual
2022-07-08 16:24:43	Gauteng		Yes I do	Other	<p>It doesn't matter what method of electricity production is used - what is obvious is that government should drop the red tape preventing independent producers from adding to the national grid. I call on the presidency to immediately allow for independent producers to either sell to Eskom or add to the grid in their own manner.</p>	Stephen	employed individual

2022-07-08 16:14:02	KwaZulu-Natal	Yes I do	Other	Various, i.e. wind, solar, etc. Whatever is needed to ensure South Africa can generate its own energy. Why wait? Thank you.	Jenny	employed individual
2022-07-08 16:08:30	KwaZulu-Natal	Yes I do	Other	We need to explore all energy sources. IPP must be incentivised to quickly produce alternative power solutions. Individuals and companies should be offered subsidies to produce excess power to feed into the grid.	Andrew	employed individual
2022-07-08 16:04:16	Gauteng	Yes I do	Other	Wind and solar	Shaun	employed individual
2022-07-08 16:01:23	Northern Cape	Yes I do	Other	No idea. I think perhaps each province or area might have a different solution depending on what's more readily available. Certainly competition is always good and privatization for better management. Government has proved beyond doubt that they cannot manage, control or offer a good service!	Michelle	employed individual
2022-07-08 15:54:35	Gauteng	Yes I do	Other	Allow for factories and smelters to produce their own power off the grid, for example: Aluminium smelters use too much electricity, if they produced their own (clean) power, the grid would not be so strained.	Liam	employed individual
2022-07-08 15:44:01	Western Cape	Yes I do	Other	A combination of various methods should and can be used depending on location and availability of natural resource in that area. Dont waste time, do it now. Save our economy, create employment.	Yolande	employed individual
2022-07-08 15:34:54	Gauteng	Yes I do	Other	It is difficult for me to answer the above as I believe all methods of electricity production are needed right now. This situation is completely dire. Please ANC, stop intentionally failing South Africa. The people will rise up and not allow SA to fail - be part of that; be part of the solution. Stop feeding your pockets and feeding the rest of us to the UN!	Kelly	employed individual
2022-07-08 15:32:20	Free State	Yes I do	Other	Up until Eskom can provide sufficient energy, private should not be charged to put electricity into system. Economic growth will solve all problems. Eskom should also be made a "NOODSAAKLIKE DIENS" (sorry can't get to English words). To prevent them from striking and costing Economic billions. And should have performance clauses in contracts. Unions have to be big of a say in all this. Going private is for now in my opinion not the solution. And take everything from those who contributed to this mess	Ruan	employed individual
2022-07-08 15:25:49	Gauteng	Yes I do	Other	Any clean, environmentally friendly, sustainable method of generating electricity must be accepted and welcomed. If a person/company/industry already generate excess electricity, this must be supplied to the national grid to take the load off of Eskom's assets to allow Eskom the time required for proper maintenance and reliability improvements.	Johannes	employed individual
2022-07-08 15:23:55	Free State	Yes I do	Other	I am not knowledgeable enough to know what method of energy production is better - so perhaps a hybrid and dependent on the use and better in terms of long-term impact on the environment and maintenance. I think the Independent Power Producers will have the skills and drive to maintain and be able to meet the demand but will it also be led by greed? What will stop them from being corrupt and mismanagement or overcharging too? Some governance or accountability must be in place. How can electricity just be affordable and made available to all South Africans all the time and consistently. It needs to reach the consumer and be affordable and sustainable.	Carlyn-Sue	employed individual
2022-07-08 15:20:46	Gauteng	Yes I do	Other	Due to corruption, lack of maintenance, and the Trade Union influence, Eskom is no longer able to provide this country with electricity effectively resulting in already devastating consequences for the people of South Africa. It is time that independent, professional producers of electricity to also be allowed to provide electricity. Free enterprise should be allowed as competition has always been good for good service and fair prices. All SOEs, especially Eskom should be privatised and policies such as BEE should be abolished.	Marlene	employed individual
2022-07-08 15:12:38	Western Cape	Yes I do	Other		Suzanne	employed individual
2022-07-08 15:11:47	Gauteng	Yes I do	Other	I selected other because I firmly believe that South-Africans have the ability to create a working electricity supply should they be allowed to. This could be the first step where people start caring for each other again. I understand that modern smaller nuclear power stations are efficient and safe. Nuclear waste is less and even if that is extremely difficult to dispose of efficiently and contain for millennia. At least we'll have reliable and affordable power and new technologies may be discovered and introduced while the half-life of the waste is dissipating. Some of it might be re-usable. South Africa need electricity NOW, without the threat of Government messing it up. People with medical conditions all over South Africa require treatment that uses electricity. It is unethical to withhold electricity from people - no matter what it is used for: businesses, health, just one fridge or luxuries. I am positive that South African will provide a multitude of individual solutions to this one problem created by Government to be abused for their own greed once again.	Daleen	employed individual

2022-07-08 15:11:04	Gauteng		Yes I do	Other	A combination approach to the production of power is all that will work	Willie	employed individual
2022-07-08 15:03:30	Western Cape		Yes I do	Other	Our South African economy is staggering under loadshedding yet we have an abundance of solar, wind and water energy... open up the channels to allow independent energy producers to provide the energy our own national provider is unable to. it really is just that simple...sometimes the best aid to progress is to just move the obstacles out of the way.	marc	employed individual
2022-07-08 14:59:52	Western Cape		Yes I do	Other	We need multiple methods of Electricity Production, spreading the profits over multiple role players so no particular person or entity benefit, ensuring SA citizens have options, our needs are met and monopoly of Electricity is a thing of the past. But this is SA so let's see who profit	Belinda	employed individual
2022-07-08 14:59:04	Western Cape		Yes I do	Other	Any means by which we can get reliable stable power	Arlene	employed individual
2022-07-08 14:58:39	Western Cape		Yes I do	Other	A combination of whatever IPP's have available now, e.g. Solar and Wind	Debbie	employed individual
2022-07-08 14:35:16	Eastern Cape		Yes I do	Other		Johan	employed individual
2022-07-08 14:25:53	KwaZulu-Natal		Yes I do	Other	Each of the power producers has a draw back. We need to invest in more Wind and solar as these technologies can be developed quickly. Concurrently long term projects like new Nuclear stations need to be constructed to meet up with future demand.	Peter	employed individual
2022-07-08 14:25:25	Western Cape		Yes I do	Other	Government, Eskom and NERSA have for too long acted as gatekeepers to prevent IPPs from taking away Eskom's revenue, at enormous cost to our country. It is essential to decentralize electricity generation for better security of supply and create market competition to keep electricity producers honest. The regulatory process has to be streamlined, and important steps in the process fast-tracked: eg the country can no longer wait years for environmental impact studies etc to be processed before moving forward. A mix of electricity generation sources would be best. PV (solar) is likely to be the fastest to implement, although challenging on the scale needed and energy storage for night-time consumption is a problem. Rooftop PV for residences and industry should be properly incentivized and facilitated across the country: this provides multiple benefits at both generation and transmission/distribution level.	Dennis	employed individual
2022-07-08 14:21:24	KwaZulu-Natal		Yes I do	Other	I think a variety of the mooted solutions may be necessary to supply the entire country based on where they are situated and what is needed. Obviously the cleaner options are first prize.	Carol	employed individual
2022-07-08 14:14:34	Gauteng		Yes I do	Other	We're dealing with 12 hours of load shedding daily on some days. Trying to work from home or run a business is becoming increasingly more difficult and expensive. With the soaring cost of petrol, something needs to change and quickly. We've just had further increases in water, levies, electricity. What are we paying for exactly? Eskom has had more than enough time to get their act together. I have zero faith in Eskom or our government to sort this out.	Renee	employed individual
2022-07-08 14:10:57	North West		Yes I do	Other	Different solutions can be used in different regions eg. wind turbines in PE and the Western Cape, solar in N/Cape, N-West etc. Wind, sun and sea water are for free, we just need to install what works best for each of them. Time is long gone for suppliers that has a monopoly in this country.	Casper	employed individual
2022-07-08 13:56:22	Gauteng		Yes I do	Other	There should be no limit on producing power and selling it, other than safety regulations and an open economy - a free market system should prevail, instead of these communist/socialist attempts to retain control and legislate price per unit of power. It just doesn't work. Never ever has nor will. It's a shitty way to control people's lives. So stop trying to make it work. Bite the bullet. Be honest, logical, responsible, and intelligent. Open the field to ALL players, regardless of size, colour, or political affiliation. Scrap all "minimum prices". And then just get out of the way and watch our country grow.	Charles	employed individual
2022-07-08 13:46:33	Gauteng		Yes I do	Other		Derek	employed individual

2022-07-08 13:39:12	Gauteng	Yes I do	Other	<p>I think independent power producers would be welcome, this would also allow for competitive pricing as with the mobile operators, monopoly is bad, competition is good.</p> <p>I would also look into giving home owners the ability to be able to push additional generation back into the grid, maybe also give a rebate to owners to install solar and generate more power. pushing into the grid during the day and using at night. This happens in many other countries and works well.</p>	Pieter	employed individual
2022-07-08 13:23:34	Western Cape	Yes I do	Other	<p>This is a no-brainer!! The entire country and its economy are suffering by relying wholly on the failing SOE Eskom. Small businesses (the back bone of the nation) suffered for 2 years during the pandemic, now even more people are losing their jobs because of loadshedding. Why would the ruling party not leap at the chance to support its citizens???</p>	Jennifer	employed individual
2022-07-08 13:21:31	KwaZulu-Natal	Yes I do	Other	<p>Why not implement subsidies to households that use inverters and store energy in batteries? What about LPG gas which is naturally available?</p>	Brian	employed individual
2022-07-08 13:17:47	Western Cape	Yes I do	Other	<p>Gas, Hydro, Solar, Wind A suitable solution for a specific area. A single solution is not ideal. If it fails or maintenance required, there needs to be an available alternative</p>	Louretta	employed individual
2022-07-08 13:16:11	KwaZulu-Natal	Yes I do	Other	<p>Commercial independent power producers should be allowed to supply the national grid, municipal grid, and any other network of power users. This should be possible with minimal red tape, at prices that incentivize independent power production without increasing the price paid by end-users. Prices for supply and consumption to fluctuate according to demand.</p> <p>Encourage residential and commercial power users to install their own (emergency) power supply systems, such as solar and generators. As long as such systems are electrically safe, no additional regulations and compulsory registration should apply. Sell-back to the grid should be encouraged and should essentially be at the same price the consumer pays for their supply. Tariff structures should incentivize and not penalize residential solar.</p> <p>South Africa should capitalize on its abundant renewable energy potential and strive to become a global center of excellence. Educational institutions, private sector, and government should collaborate herein.</p>	Willem	employed individual
2022-07-08 13:15:17	Western Cape	Yes I do	Other	<p>Anything that will relieve us from Eskom and not ruin the environment</p>	Maurene	employed individual
2022-07-08 13:14:05	Western Cape	Yes I do	Other	<p>The most important question here is why has government not already relinquished control of power production to other competitive entities who are better suited, and frankly better managed and far more capable of providing this basic service (not luxury!).</p> <p>A mix of sources would be best suited - we don't want to become chained to another single monopoly.</p> <p>Government's role is that of oversight, on behalf of and for the people, not government's own over-stuffed pockets and over-reaching power.</p>	C	employed individual
2022-07-08 13:13:48	Western Cape	Yes I do	Other	<p>I believe a combination of renewable power sources (wind, water, solar) should be used to generate power.</p>	Blythe	employed individual
2022-07-08 13:12:28	Gauteng	Yes I do	Other	<p>Any type of sustainable and renewable energy like wind and hydro.</p>	Susan	employed individual
2022-07-08 13:09:00	Western Cape	Yes I do	Other	<p>Independent Power Producers should be allowed. The more collaboration we have on this problem the better for everyone. All methods of electricity production are welcome, to explore options, and find sustainable solutions.</p>	Maretha	employed individual
2022-07-08 12:56:13	Western Cape	Yes I do	Other	<p>Have listened to a lot of experts in the field, and South Africa will need a magnitude of different Power producing technologies to cater for our growing energy demands.</p> <p>Things like Solar, Wind and the like should be up and running as soon as possible to ease the load. Then we as South Africa could become the world leaders in Small modular reactors (SMRs), a new technology in the world, but a 50-year-old technology in Russia. Hydro electric should also not be forgotten.</p> <p>Futher more, each household could and should be grated the oppertunity to generate their own electicity supply. Be it by means of tax incentives, a type of Pay-per-use model or even a stokvel model.</p> <p>There are multiple sullutions, we just need willingness, and a go-getter attitude to solve the issues at hand.</p>	Jan	employed individual

2022-07-08 12:52:39	Western Cape		Yes I do	Other	<p>The problem is the crisis, while predicted by industry many years ago, is with us and the lead time to new generation capacity is years not days.</p> <p>The optimal mix of technologies, to meet the various drivers, in my opinion should be affordable nuclear as base load, with coal filling the gap until the nuclear is online and more renewables providing opportunity energy. In the short term a far better SSEG tariff should be offered to all interested parties, to provide assistance to Eskom when they can. The relaxation of some of the stumbling blocks in the IRP, the acceleration of the approval and financial closure processes within the REIPPP would also help, but the approval to grid export is too long for the current crisis.</p> <p>This will have to of necessity be facilitated through a centralized energy brokering system.</p>	Carl	employed individual
2022-07-08 12:52:29	Gauteng		Yes I do	Other		Moneera	employed individual
2022-07-08 12:48:54	Gauteng		Yes I do	Other	<p>Any other source. Eskom should also revert back an sell directly to the end user and not make use of municipalities as they steel the money. We pay every month but have to sit without power because of LS BS.</p> <p>Giving power free the previously disadvantaged is also bull shit as they do not get power cut or power bills. Like the minister said power a luxury so stop giving it for free and let us that pay for it every month have it as we did pay for it.</p> <p>Thanks</p>	Stephan	employed individual
2022-07-08 12:35:17	KwaZulu- Natal		Yes I do	Other	I thing multiple sources are the solution.	Bernard	employed individual
2022-07-08 12:34:05	Free State		Yes I do	Other	<p>The current crisis with electricity production has made it clear that South Africa needs to have alternative electricity production companies, not just Eskom. I'm in favour of renewable resources such as solar and wind, Hydroelectricity is also a possibility.</p> <p>No matter what method is used it needs to be available as soon as possible, not within the next 5 years. We need solutions now.</p> <p>Nuclear power is not an option. The risks are just too high to consider.</p> <p>It is my humble opinion that already established companies should step in to provide electricity. New Companies can be formed, but we need a solution fast and safe.</p>	Hekkie	employed individual
2022-07-08 12:29:57	Western Cape		Yes I do	Other	A mix of Solar, wind, and Nuclear is needed, with Nuclear at the top of the list. Big industry cannot operate on green energy alone.	Bradley	employed individual
2022-07-08 12:29:37	Gauteng		Yes I do	Other	Solar, wind and hydro will benefit South Africa as we have all the resources for said methods. This will all help to eliminate loadshedding that is costing our economy millions.	Marko	employed individual
2022-07-08 12:27:07	Western Cape		Yes I do	Other	All sources of emery can be implemented. It should not be limited to only 1 or 2 options. Private companies must be allowed to product power and the customer can buy electricity of any provider it chooses.	Pieter	employed individual
2022-07-08 12:23:13	Limpopo		Yes I do	Other	SA needs a balanced approach , no one energy is sufficient to meet the current demand, from a time perspective Solar and wind would be quickest. Red tape needs to be scrapped but with proper controls in place to prevent corruption.	Charles	employed individual
2022-07-08 12:20:09	Gauteng		Yes I do	Other	Short term - Wind and solar Long Term - Nuclear	Jacques	employed individual
2022-07-08 12:19:56	Gauteng		Yes I do	Other	WIND AND SOLAR	Annerie	employed individual
2022-07-08 12:18:56	Free State		Yes I do	Other	I think in order to address the immediate crisis any method of electricity production which is more reliable and available than Eskom should be used and currently that would probably be solar and wind. In the long term there are various factors to consider: Managed by suitably qualified and competent experts of international standard, Nuclear would be the cheapest and safest option by far in the long term, but definitely not in the hands of our corrupt government and their cadre brand of "experts". That would be utterly disastrous. Building a nuclear facility is also very expensive. Solar and wind farms are also expensive to establish and disruptive to the environment but seems to me to be the best option to take the pressure off Eskom and to give them time to upgrade their existing facilities and sort out their politics and labour issues which brought us to this mess in the first place.	Dalene	employed individual
2022-07-08 12:12:23	Gauteng		Yes I do	Other	<p>Blended approach of solar, wind and run the coal plants to the end. Nuclear and natural gas CHP to supplement.</p> <p>Storage systems need to be prioritized and smart grid solutions</p>	Fouzia	employed individual

2022-07-08 12:12:01	Gauteng	Yes I do	Other	<p>A mix of energy sources is required to resolve immediate needs, even EXISTING coal, nuclear and diesel (if cost does not exceed benefit) should be utilised to prevent load shedding. The cost of load shedding to the economy is too high.</p> <p>Should all IPPs sell their energy to Eskom? Where appropriate networks and supply agreements exist (or can be negotiated quickly), local authorities could be the buyers, otherwise Eskom. Corruption prevention measures will probably be required.</p> <p>For the medium to long term only green energy sources (solar, wind) should be considered.</p> <p>If Eskom unbundling had been completed, Eskom Distribution (or maybe Transmission, depending on the input voltage) would probably have been the preferred controlling body for IPPs.</p> <p>Can NERSA be trusted to regulate prices to provide a REASONABLE return to IPPs?</p>	Leo	employed individual
2022-07-08 12:10:27	Gauteng	Yes I do	Other	<p>Private sector suppliers should be allowed to generate electricity. The current government has not contemplated a public / private partnership.</p> <p>The supply of electricity should be a variety of resources we have at our disposal e.g. solar (abundance of sunshine in SA), coal, hydro, nuclear.</p> <p>We should not have to put up with government that is totally incompetent regarding running a business (all the failing SOE are testimony to this), has a total disregard for its people and seems to lack the will to do the right thing.</p>	Ilse-Marie	employed individual
2022-07-08 12:09:08	Eastern Cape	Yes I do	Other	All including sugarcane	Theunis	employed individual
2022-07-08 12:07:45	Western Cape	Yes I do	Other	<p>The current power crises requires a combination in immediate availability of power by using competent external independent contractors (not Eskom employees) to repair our power stations</p> <p>At the same time we need to tackle both short term and longer term power implementation project such as Solar and Nuclear respectively</p> <p>The key is to make it private and visible to root out corruption and to appoint suitably competent Professionals to manage both immediate actions and the medium and longer term Project Plans</p>	Andre	employed individual
2022-07-08 12:02:20	Western Cape	Yes I do	Other	<p>A hybrid of options is required.</p> <p>Unfortunately for the DA in WC it is about the money. money money money. The more they can tap out of the few who do pay the better.</p> <p>So what us is going solar, off grid, or becoming a private producer? All the government entities want is more money to cover no payment from the majority of users. Buying the vote, screw the middle class.</p>	Willem	employed individual
2022-07-08 12:01:54	North West	Yes I do	Other	Any solar or wind power solution will do. Eskom cannot keep the lights on so allow others to do so.	Tersia	employed individual
2022-07-08 12:01:54	North West	Yes I do	Other	Any solar or wind power solution will do. Eskom cannot keep the lights on so allow others to do so.	Tersia	employed individual
2022-07-08 12:01:51	North West	Yes I do	Other	Any solar or wind power solution will do. Eskom cannot keep the lights on so allow others to do so.	Tersia	employed individual
2022-07-08 11:58:02	Gauteng	Yes I do	Other	<p>South Africa is rich in wind power, sun power and other alternatives.</p> <p>The government has a hidden agenda with Patrice and his cloneys (and most probably darker forces behind them) who plan to take over the total electricity production in SA. There will then be no control over them.</p>	Magda	employed individual
2022-07-08 11:56:13	Gauteng	Yes I do	Other	I think different regions in the country may be better suited to different kinds of generation. Whichever produces the quickest results at the best prize should be implemented with long term plans put in place now. We need a combination of methods.	Nadia	employed individual
2022-07-08 11:55:49	Western Cape	Yes I do	Other		Yolandi	employed individual
2022-07-08 11:49:59	Gauteng	Yes I do	Other	<p>There are various options available that are green</p> <p>Solar - South African has a lot of sun that can be harvest and used</p> <p>Wind - Wind farms once again the same there are area in South Africa that have lot of wind eg, coastal</p> <p>Gas - South African has Moss Gas that can be used as well</p> <p>Eskom and undependable and burning fossil which is polluting the environment</p> <p>Nuclear comes with all the assosicated risk of radiation and a risk to the public in the event of a failure</p>	Diederick	employed individual
2022-07-08 11:47:46	Western Cape	Yes I do	Other	All power sources sufficient to feed back into the grid would be highly useful. Wind, Solar, Hydro, Nuclear, it doesn't matter	Jonathan	employed individual
2022-07-08 11:45:25	Western Cape	Yes I do	Other	I believe renewable resources such as wind and solar should be utilized fully. Other means of generating power should also be expleored and allowed in the interim so that our economy can survive and the poor aren't pushed to destitution. This requires providing electricity for small business to thrive .	Heather	employed individual

2022-07-08 11:36:40	Gauteng		Yes I do	Other	Any EXCEPT coal or diesel. Nuclear has cost and safety issues. ALL Eskom employees should be subject to performance management and those who do not prove to contribute to generation, transmission or distribution should be retrenched. Ministers of MRE and PE to be replaced with forward-thinking persons of integrity.	Adrian	employed individual
2022-07-08 11:36:15	Gauteng		Yes I do	Other	That we have to even ask if alternatives are necessary seems ridiculous - one would think the answer is obvious. We need a combination of wind, solar, hydro and even coal to meet our electricity needs. Long term nuclear is, and should be another solution as this offers clean energy too. Get away from the dependency on an inept SOE, and privatise for long term sustainability!	Sean	employed individual
2022-07-08 11:34:02	Western Cape		Yes I do	Other	Wind and solar would be best immediate options. I am opposed to gas and nuclear. A) Government would eventually turn their greedy eyes towards fracking and allow the environment to be destroyed so they line thier pockets. B) Definitely not nuclear cause we barely have the qualified(and competent) staff to man and attend to Koeberg even. Plus once again government have already shown the type of underhanded deals they would make to achieve this. And should a strike occur at a nuclear facility, as happened with Eskom recently, it would cause a seriously dangerous situation.	Sheldon	employed individual
2022-07-08 11:33:37	Western Cape		Yes I do	Other	Nuclear, coal or renewable. We are at as srare of disastef. We need some form of affordable electricity	Juanita	employed individual
2022-07-08 11:31:49	Gauteng		Yes I do	Other	Hydro, wind, solar, and nuclear are all viable options to generate the additional required electricity. We're currently at the mercy of one electricity supplier who is struggling with aging fleet and multiple breakdowns. The more players in the game, the better for the country and economy.	Tiaan	employed individual
2022-07-08 11:31:19	Western Cape		Yes I do	Other	Whatever we have right here...we use. And I know we have ample of what we need to sustain ourselves.	Paul	employed individual
2022-07-08 11:29:58	Gauteng		Yes I do	Other	The Ideal source of energy for country would be reusable (Solar, wind, Hydro) i.e. God's natural sources. however this will take years to set up, and should've been started decades ago, instead of lining the pockets of corrupt leadership. In my opinion, South Africa should enable private suppliers to provide power to the country, whether this be through private generation or corporations with the capacity and capability to do so. The South African people would benefit from a little competition in this segment.	Rich	employed individual
2022-07-08 11:03:49	Limpopo		Yes I do	Other		Lodewyk	employed individual
2022-07-08 11:01:47	Eastern Cape		Yes I do	Other	South Africa would profit from mixed use tending to renewables with time. This would include rooftop solar feeding back into the grid when excess is available. The focus on coal is utterly unsustainable and moored in the previous century.	Neil	employed individual
2022-07-08 10:53:02	Western Cape		Yes I do	Other	The issue is what IPPs can provide at shortest notice. We can debate the most appropriate mix AFTER this dismal winter of discontent. Right now we need IPPs who can fill in while the broken power stations are being fixed.	Jenny	employed individual
2022-07-08 10:52:20	Gauteng		Yes I do	Other	There are shipping companies standing by for immediate assistance, and that will force the monopoly away from ESKOM that is currently holding the hole country captive & running the economy in to the ground.	Theo	employed individual
2022-07-08 10:51:26	Gauteng		Yes I do	Other	Get rid of the SOE - Eskom and allow private businesses to supply. It will be more efficient, cheaper and get rid of loadshedding. The country can get back to work instead of all this negativity and sitting waiting around.	Beverley	employed individual
2022-07-08 10:51:24	Limpopo		Yes I do	Other	It is prudent that we have additional power suppliers as Loadshedding is indeed a massive crisis. I think that solar, hydro and wind power generators needs to be implamented in different combinations depending on the region it it braught in to maximise efficiensy. Not only will this help with the power supply problem ,but it will help generate more jobs and create competition that will help with the cost thereoff as well. Another thing is that it would be better for the enviroment as well. An all round solution to multiple problems	Frik	employed individual
2022-07-08 10:50:10	Gauteng		Yes I do	Other	I am no expert but general knowledge this incompetent government should start to listen to the experts and stop thinking of themselves. they were aware of this problem for years but what did they do nothing and what are they doing still nothing. there are solutions, wind, solar, hydro but they are fighting among themselves who is responsible . we always just hear apology start to solve the problems find solutions, why don't our president do something or even say something , this government have done nothing this past 26 years to better the lives of all citizens , they destroyed this country in all aspects, crime, health, education , employment, municipalities, water, electricity, economy	Amanda	employed individual
2022-07-08 10:49:56	Northern Cape		Yes I do	Other	There are a lot of solar energy farms in the northern cape, why dont we get our power from them?	Kenneth	employed individual
2022-07-08 10:48:23	Mpumalanga		Yes I do	Other		Zandile	employed individual
2022-07-08 10:42:49	Gauteng		Yes I do	Other	Anyone will do, as long as we don't have to deal with eskom.	Trewin	employed individual

2022-07-08 10:42:27	Gauteng	Yes I do	Other	Responsible private independent power production can only be a good thing. I would suggest coal be considered. I think private companies should would consider the small pebble bed nuclear reactor. I believe solar energy is over priced, but if somebody wants to do it then fine. Finally I would vote strongly against wind energy as those things are absolutely useless, just look at every country that has tried to implement them. They are so expensive, break often, and generate so little for what it takes to create them. It's a scam.	Nicolas	employed individual
2022-07-08 10:40:47	Gauteng	Yes I do	Other	Eskom is in big trouble financially (huge debt), infrastructural (constant breakdowns), human resource (sabotage), political (ANC is divided about what to do). Private providers will have far more incentive to make it work as no electricity production means no income. The method they choose should be up to them. Personally I believe solar on its own will not work as the sun only shines during the day. I would suggest a combination of solar and hydro. During the day use some of the energy produced to pump water up and at night use that to generate electricity. But as I already said let the private guys figure it out without giving unnecessary road blocks.	Willemien	employed individual
2022-07-08 10:37:33	Western Cape	Yes I do	Other	All non carbon emitting methods should be used, based on reliability of supply and affordability. The Build-Own-Operate (BOO) Model should be considered for capital-intensive methods such as nuclear. Domestic consumers should be credited for self-generated power fed back into the grid, as is done in many other countries.	Colin	employed individual
2022-07-08 10:35:38	Western Cape	Yes I do	Other	I reckon we should be able to choose which energy source works best based on area and availability of resources along with affordability. It should also be a straight forward process with no hidden attempts to control the other sectors. E.g. Built in gas hobs that require electrical current for ignition! The consumer should have the choice and should be able to base their decision on need, cost and personal preference and not be held to ransom or hostage by one or two industry's	Judith	employed individual
2022-07-08 10:29:02	Western Cape	Yes I do	Other	This question is a no-brainer for anyone that has the well-being of the country at the forefront of their decision-making. Any decision-makers (government) that resist allowing independent power producers to contribute to the energy grid have a secondary agenda - (i) old-fashioned ideology, (ii) do not want to relinquish power and control over resources that are ripe for squandering, (iii) do not want to admit they have been wrong for decades. If SA persists on the path it is currently on the outcome will be dire, even for the "pigs-at-the-trough".	Mike	employed individual
2022-07-08 10:28:20	Gauteng	Yes I do	Other		jacobus	employed individual
2022-07-08 10:23:44	KwaZulu-Natal	Yes I do	Other	I don 't think we need to be tied to one alternative source of power. Solar and wind power are obviously major possible sources which can be accessed quickly. We have dams all over the country, so hydro electric power should also be considered. Back in the 1960's or thereabouts there was a comprehensive plan to provide hydro power on a large scale but it was never developed - perhaps now is the time. We need as many sources as possible, so that country has plenty of scope for industrial development and creation of jobs. Cheap and plentiful power is a necessity.	Jane	employed individual
2022-07-08 10:23:33	Gauteng	Yes I do	Other	I support any form that is sustainable, energy efficient and good for the economy! Eskom being the only supplier and forcing whatever dumb decisions they make becoming our downfall. 100 electric trains, what a joke! Sick and tired of utter nonsense, government corrupt, theft and misuse of funds. When are they going to be held accountable for the damage they are causing. Get rid of them, the only supplier that encourages you not to use their product!	Wendy	employed individual
2022-07-08 10:23:02	Gauteng	Yes I do	Other	What we are experiencing as a nation with the constant loadshedding is a national disaster. It has been clear from day one of the ANC ruling that they haven't a clue how to maintain anything and they disregarded advise years ago that we would sit in this situation if they did nothing. The government should be doing everything and anything and exploring all options to get this sorted. Cut "the red tape" and allow competent people who have the solutions and know how to fix this problem to fix it.	Tania	employed individual
2022-07-08 10:21:48	North West	Yes I do	Other	Hydro, wind and solar are some of the ideas of providing power to South Africa. We can also include nuclear. What we need to look at most is the monopoly the government has on power supply, if there is any power supply. That system is collapsing even if they can hype up prices as they feel like. There is no healthy composition between any power companies to create a good eco system and controle to regulate prices and to provide a service which we pay for. When you don't like a compony's service you can move on to someone else after contract expires. But in the current system that option does not exists at all. So we are stuck with an incompetent company that came from the worlds best to non existent because of corruption and fraud, while the parties responsabel for this fiasco is not punished, but protected by red tape. As well as the company itself being protected by res tape, because if that company is shut down, we sit without power. So a new solution needs to come to create a service and more work for South Africans. More companies, more work and more investors. Where the current company is actually chasing workers and investors away. And thus creating problems for the country rather than fixing it.	William	employed individual

2022-07-08 10:20:34	Western Cape		Yes I do	Other	The type of electricity production is irrelevant. Let the market decide. We should be using renewables and nuclear, but in practice people are running small petrol and diesel generators to stave off loadshedding, these are MUCH worse than coal power plants in terms of emissions. So just to stop loadshedding, all bets are off. Pick whatever can come online the quickest.	Lucas	employed individual
2022-07-08 10:13:41	Gauteng		Yes I do	Other	Remove the government first, then place professionals in to implement the best solutions, which could include coal.	Terence	employed individual
2022-07-08 10:00:20	Eastern Cape		Yes I do	Other	I think a combination of various methods is the best approach as each area of the country is individual and not every method will work in all areas.	André	employed individual
2022-07-08 09:58:30	Gauteng		Yes I do	Other	The clear failure of Eskom to provide a stable network is further crippling the economy. Businesses and individuals are struggling with continued rolling black outs and the financial losses are impossible to recover. Hydro, Solar, Wind and Nuclear should be utilised to generate electricity. De-centralising the supply of electricity will also assist in bringing down the ridiculous prices.	Natasha	employed individual
2022-07-08 09:49:51	Limpopo		Yes I do	Other	All commercially viable methods should be considered so long as they don't impact our power stability. Solar seems especially promising since the majority of load shedding happens during daylight hours.	Jackob Jackobus	employed individual
2022-07-08 09:45:59	Gauteng		Yes I do	Other	Any and every other energy source available that is either provided by Eskom and that isn't provided by Eskom needs to be made available to the public through private entities if the government entities cannot provide the basic right to electricity.	Ursh	employed individual
2022-07-08 09:39:22	Western Cape		Yes I do	Other	This option should be filled with a multitude of green power solutions. Wind, solar, wave, etc. Dont limit the solution to one source as green power needs to overlap. Being powered by a dirty source is only going to take the country backwards. Opening to private suppliers is long overdue.	Chris	employed individual
2022-07-08 09:39:01	Western Cape		Yes I do	Other	There are many options to power - which is the best? Each region is individualised and a power system that is able to be local, without the destruction of environment i.e. like biofuel is which requires huge input to produce, would be logical and practical as well as create jobs and skills in the local environment which, by default, helps the economies of the region, especially if business can operate with lower overheads and households can function with less financial stress and challenge. Old power systems are not feasible and their days are over if we wish to have any hope of creating a future that is healthy and wise.	Bernie	employed individual
2022-07-08 09:38:29	Western Cape		Yes I do	Other	The government is clearly not able to provide or sustain infrastructure, and as electricity and other energy sources are crucial to economic and social sustainability, anyone should have the right to generate power for their own needs. There needs to be a framework to safely generate power taking into account, legality, safety and environmental concerns. There should be no tax on private power generation, unless the power generation is sponsored by the government.	Francois	employed individual
2022-07-08 09:29:50	Free State		Yes I do	Other	I firmly believe that Independent Power Producers should be allowed to contribute to the SA Power grid. Not only will this alleviate the burden on Eskom, but it will also create a healthy, competitive environment which will ensure proper service delivery and reduced electricity tariffs throughout the whole of SA. It will also result in the creation new jobs and renewed infrastructure. Furthermore, I believe that the method of generation should not be restricted, given that it complies with all safety & environmental standards.	Tommie	employed individual
2022-07-08 09:27:24	Gauteng		Yes I do	Other	1, There is no doubt that we need independent power producers in South Africa, Eskom needs the competition 2, We have coal but it is not necessarily the most environmentally friendly way. however due to the infrastructure that we already have on hand we will have to continue this way 3, Solar power will do great in South Africa because of our climate. it is also a cleaner source of power for the country. it would be great to explore the Hydro option-the issue is just the water shortage in the country	Agisanang	employed individual
2022-07-08 09:25:42	Free State		Yes I do	Other	Not nuclear as there have been more than 11 nuclear explosions worldwide and we know SA is not in the business of maintaining anything. This is sunny South Africa, we have plenty of sun for solar generation as well as wind for wind farms. We have existing solar farms and wind turbines that are not being used? Independent power producers should definitely be allowed to generate electricity... actually in Bloemfontein all services should be taken away from govt and privatized as not as much as a street lamp is replaced by govt. The country is abuzz about the deterioration of Bfn. Where are all our tax money, rates and taxes going? We keep paying plus we have to pay private institutions in any ways to remove rubbish etc. ENOUGH! We are sick and tired of no water, no electricity, potholes, mountains of rubbish. Bloemfontein is no more the city of roses, it looks like crap....thanks to Mangaung mun.	Jaqui	employed individual
2022-07-08 09:24:27	Gauteng		Yes I do	Other	I feel that at this point, ANY power company would be better than Eskom.	Emeldah	employed individual

2022-07-08 09:22:04	Limpopo		Yes I do	Other	Any! We need electricity and we need it now, government can't have the monopoly on electricity generation especially since they cannot deliver. The private sector can solve our impending grid collapse problems and in the long run healthy competition in the private sector will deliver electricity cheaply for all South Africans to benefit from it. Now is not the time to see whk can get the biggest slice of cake, our country's future is literally at stake.	Divan	employed individual
2022-07-08 09:22:01	Western Cape		Yes I do	Other	I support ANY method of electricity production at the moment. The simple fact is that government's monopoly on power generation and lack of maintenance over the years have put us in this position. We don't really have a choice at the moment but to get every little bit of electricity generation onto the grid. We can look at long term alternatives once we have loadshedding under control. For now just get as much power onto the grid as possible.	Willem	employed individual
2022-07-08 09:20:36	Limpopo		Yes I do	Other	Any! We need electricity and we need it now, government can't have the monopoly on electricity generation especially since they cannot deliver. The private sector can solve our impending grid collapse problems and in the long run healthy competition in the private sector will deliver electricity cheaply for all South Africans to benefit from it. Now is not the time to see whk can get the biggest slice of cake, our country's future is literally at stake.	Divan	employed individual
2022-07-08 09:14:22	Gauteng		Yes I do	Other	We should use various methods and definately not exclude coal. Scrap fake narrative about carbon emissions - CO2 is vital to life. All government involvement should be stopped .	Anoushka	employed individual
2022-07-08 09:13:06	Free State		Yes I do	Other	Not nuclear as there have been more than 11 nuclear explosions worldwide and we know SA is not in the business of maintaining anything. 2022-07-08 09:09:17	Western Cape		Yes I do	Other	<p>It is clear that Eskom SA cannot and will not in future be able to produce reliable electricity due to failing and inferior new infrastructure. Not mentioning the overpaid, over-employed and largely untrained and incapable workforce that is holding the country at ransom with strikes and vandalism. Electricity is not a nice to have.. it is our country's life blood. It should not be in the hands of anybody that can not even self govern. Let independents produce and supply to the grid...all that can. This will create sustainability and availability.. This in turn will drive the cost way down .As a country we can show the world what it really looks like when electricity can cost your people next to nothing when everybody pulls together.</p>	Jacques	employed individual
2022-07-08 09:02:58	Gauteng		Yes I do	Other	<p>There are multiple ways of generating electricity in a country as vast as ours:</p> <ol style="list-style-type: none"> 1. Solar - using all households and factories to generate and supply 2. Kinetic - using the highways (see australia) we have a road system that is vast and well used that can be used to generate the needs of the country. Roads are always being maintained (or should be!) so building solar/kinetic panels into them should be relatively simple as part of that maintenance 3. Wind - there are all sorts of areas in the country that can be used to create wind farms to generate all the power we need!!! <p>While these may be expensive to implement, they become cost effective over time and do NOT need fossil fuels to run - all use and harness available resources already available</p>	Caroline	employed individual
2022-07-08 09:02:21	Gauteng		Yes I do	Other	Ideally green power, but nuclear may be an option	Garth	employed individual
2022-07-08 09:02:18	Gauteng		Yes I do	Other	Ideally green power, but nuclear may be an option	Garth	employed individual

2022-07-08 08:54:22	Western Cape		Yes I do	Other	All forms of renewable power should immediately be prioritised.	JJ	employed individual
2022-07-08 08:53:56	Eastern Cape		Yes I do	Other	If Eskom cannot provide sufficient energy to sustain the country, then privatization should be considered. This goes for any SOE	Ayanda	employed individual
2022-07-08 08:51:33	Limpopo		Yes I do	Other	At this stage any form of energy generation would help, as long as it is not controlled by this government. Solar, Wind, Hydro, Hydro thermal, Methane gas, all of which is better than coal and nuclear. Methane gas can be a quick and better alternative to coal. We have abounded of chicken, beef, pig and sewerage farms in this country which produces a lot of methane that can be put to good use. It burns cleaner than coal and the bi-produced can be used as fertilizer again...	Fred	employed individual
2022-07-08 08:45:48	Gauteng		Yes I do	Other	Any combination of renewable energy will work, as coal will need to be phased out before the end of life of the units. Allow private generators to be used to help ease the load as long as they pass certain quality inspections as not to be a source of more problems due to phase drifting.	Philippus	employed individual
2022-07-08 08:45:22	Gauteng		Yes I do	Other	Any combination of renewable energy will work, as coal will need to be phased out before the end of life of the units. Allow private generators to be used to help ease the load as long as they pass certain quality inspections as not to be a source of more problems due to phase drifting.	Philippus	employed individual

2022-07-08 08:45:09	Western Cape		Yes I do	Other	I think any means of generating power should be allowed. My 11 year old son asked me the other day - if Eskom can not supply the power why are we doing business with them. If an 11 year old can figure that out why can our government not see that this is not working. The only way to save this country is to have competition on power supply. May the best supplier win. I am in the animal feed business. We are struggling to keep our animals alive because there is just not enough hours in a day to produce the feed that our farms need. If something does not change soon you will have no meat, eggs or milk .	Joline	employed individual
2022-07-08 08:43:31	Western Cape		Yes I do	Other	Any and all forms of generation should be used to address the crises. Start by acknowledging that there is a crises. Remove all regulations and allow people to help themselves. Days of Eskom monopoly should be over. Electricity situation is getting worse and worse. And now illegal strikers are being rewarded for their strike also, giving money that isn't there.	Maghriet	employed individual
2022-07-08 08:39:52	KwaZulu- Natal		Yes I do	Other		Elrien	employed individual
2022-07-08 08:38:15	Gauteng		Yes I do	Other	As many independents must be incorporated. Even households with excess capacity from their own sources. Installations, training and maintenance will create many more jobs than big power stations and it will make for better redundancy. Any and all means must be incorporated and decentralised. Government must keep their sticky fingers out of it.....	Theo	employed individual
2022-07-08 08:25:10	Gauteng	South Africa	Yes I do	Other	We need a combination because of the various potential methods varying in the provinces. Also if the wind farms are not doing well then hydro could pick up the slack etc.	Kenneth	employed individual
2022-07-08 08:21:24	Gauteng		Yes I do	Other	All available sources and methods of generation should be pursued	Hermann	employed individual
2022-07-08 08:19:51	KwaZulu- Natal		Yes I do	Other	A mixture of electricity power production would suit South Africa's energy security. Additionally, home owners should be incentivised to install solar power by being provided with the ability to be paid for the power that they contribute to the power grid.	Christoph er	employed individual
2022-07-08 08:15:07	Western Cape		Yes I do	Other	Battery technology is getting better and better and could be coupled with solar power would relieve the grid of stress. The Tesla Mega Pack should be an option. And also the Health Ranger Report on Brighteon posted this yesterday: "Situation Update, July 7, 2022 - EU declares fossil gas to be "green" energy as climate change narrative face plants" https://www.brighteon.com/36dab3f2-9258-4241-9a5a-af366c4499ee	Antoinette	employed individual
2022-07-08 08:13:41	Western Cape		Yes I do	Other	Any cost effective method that will solve immediate problems but also have long term in mind.	Hendrik	employed individual
2022-07-08 08:13:23	Western Cape		Yes I do	Other	A combination of Solar, wind and other. This will ensure competition, not allow ONE entity to hold consumers at ransom. Similarly ALL future Power generation entities/utilities MUST be declared a essential service, and have NO RIGHT TO STRIKE, and this must carry severe penalties and criminal charges. Making the same mistakes again, simply will be pure stupidity. Unionization, cadre deployment has destroyed this Country. NO Racial and BEE policies must be allowed to infringe on essential services suppliers.	L.R.	employed individual
2022-07-08 08:12:05	Western Cape		Yes I do	Other		TRACY	employed individual
2022-07-08 08:10:35	Gauteng		Yes I do	Other	Whatever is available now.	Berni	employed individual
2022-07-08 08:07:14	Gauteng		Yes I do	Other	The sad thing is that we supply power to other countries and in the meantime we are without electricity. How does that work. Is it really necessary for only the government to be a supplier!!!! No!!!	Elize	employed individual
2022-07-08 08:02:13	Western Cape		Yes I do	Other		Harold	employed individual
2022-07-08 07:58:28	Gauteng		Yes I do	Other	I would support an approach where there is a combination of renewable energy used such as Solar, Wind and Hydro. Additional to this it would be good to investigate new technology being tested which makes use of wind and solar to charge a CO2 Battery. A successful POC has been done on the island of Sardinia . I do not support anything like Nuclear as we clearly do not have the skills in South Africa to support this type of technology and renewable is the way the world needs to go Changing legislation to allow the entry of IPP is good but there must still be Governance set in place or we run the risk AGAIN of a Power Grid Capture by outside individuals.	Peter	employed individual
2022-07-08 07:55:28	Western Cape		Yes I do	Other	Eskom is broken and not getting fixed anytime soon. Allow the people to fix it themselves by allowing us to use IPPs	Josef	employed individual
2022-07-08 07:51:26	Gauteng		Yes I do	Other	This is really a no brainer. IPP should be allowed to construct and deliver electricity with nothing holding them back. We would still need a solid base load (Coal in all likelihood), but any form of wind/solar should be invested in. Also, what about some proper subsidies to give them a head start! Even house holds, if they can get a helping hand to get over the initial investment of buying the hardware, a lot of load will be taken of the grid at peak times.	Hendel	employed individual
2022-07-08 07:48:42	Gauteng		Yes I do	Other	South Africa cannot rely on only one source of power production method. Several methods can be applied and incorporated to produce the required power every home, business, industry, institution requires.	Barend	employed individual

2022-07-08 07:47:25	Gauteng		Yes I do	Other	A combination of Hydro, Wind and Solar	Karin	employed individual
2022-07-08 07:41:24	Western Cape		Yes I do	Other	All renewables	Stephen	employed individual
2022-07-08 07:40:41	Western Cape		Yes I do	Other	All renewables	Stephen	employed individual
2022-07-08 07:40:09	Western Cape		Yes I do	Other	All renewables	Stephen	employed individual
2022-07-08 07:34:59	Gauteng		Yes I do	Other	I believe a mix of several electricity production options is required to overcome the current power situation. Allow private energy producers (and private home owners) to supply electricity to the grid A private home owner with a solar array very possibly has surplus solar energy during sunlight hours. This could be exported into the grid to help the economy. Burning diesel to fill the supply shortfall would be reduced during sunlight hours and could be used during the night.	Andre	employed individual
2022-07-08 07:32:26	Western Cape		Yes I do	Other	I don't know enough about the immediate costs of "green" electricity production , neither about timeframes . At this stage the experts must select the most cost-effective solution, taking into account the timeframe for such to have an effect. Solar, wind and hydro would be my first choice but we need immediate action. Quite apart from rolling blackouts causing an economic crisis, the mental and emotional health of our population is at risk. Lockdown has resulted in many more mentally ill people. Rolling blackouts, if continued as they are at present, will only exacerbate the mental health crisis.	Louise	employed individual
2022-07-08 07:26:51	Gauteng		Yes I do	Other	Any that suits the region as long as it's environmentally friendly and is cheaper than the present and is reliable , we can't carry on in this state with constant load shedding and the length of time power is off. The economy is suffering greatly and business .	LEON	employed individual
2022-07-08 07:26:28	Gauteng		Yes I do	Other	I doesn't matter which way we get Electricity, as long as we can get a constant enough supply so that we can cut down and eventually eliminate loadshedding	Dirks	employed individual
2022-07-08 07:26:12	Western Cape		Yes I do	Other	I think that we should open up the market to all possibilities whether that be coal, nuclear or gas it does not matter. What is most important is we get a solution that can stabilize our electricity supply and end our reliance on Eskom. The Government is responsible for this mess & is making it worse by interfering & having all this red tape when South Africa is on the brink of a total blackout. We need to open up our electricity to the private/free market and consider all options and make the best decision based on cost & time to market.	Brett	employed individual
2022-07-08 07:25:06	KwaZulu-Natal		Yes I do	Other	Let's get over the inequalities of the past: If there are any real educated politicians, let them stick to politics, but let successful entrepreneurs and qualified individuals take care of our beautiful country's economics, education, healthcare, transport and policing before it is too late!	Flip	employed individual
2022-07-08 07:18:59	Western Cape		Yes I do	Other	We do have nuclear and renewable at the moment, so use it. If the so called educated people that run this country could actually think in a pro active manner then there is a few ways to reduce the load on eskom, but alas.... that would be like expecting them to be honest, righteous and caring.	Werner	employed individual
2022-07-08 07:18:58	Gauteng		Yes I do	Other	We should be looking at mix of renewable energies, I don't think this would be a one shoe fits all. Nuclear energy is definitely not the way to go. Looking at energy storage as well Like hydro power storage solutions for short term and when units need maintenance. The main obstacle is the corruptions and everyone want to get their slice of the pie, as politician's have always demonstrated the needs of the people are second to their own greed.	Jodie	employed individual
2022-07-08 07:06:10	Western Cape		Yes I do	Other	There should be a combination of various methods of electricity production in order for us to get out of this situation and ramp up electricity production. I feel that coal is not something we as a country should invest in on a large scale due to the environmental effect it has.	Salome	employed individual
2022-07-08 07:05:14	Limpopo		Yes I do	Other	This is a no brainer. Of course we need to do something about this crisis. In terms of alternatives: a diversity of environmentally friendly, yet pragmatic, options that are adapted to our diversity of local contexts. Also, encourage home owners to sell back to the grid. i.e., a hybrid approach that increases competition between producers and closes loopholes that can be opened for future corruption. Above all: do not replace one monopoly with another.	Chris	employed individual
2022-07-08 06:51:47	Western Cape		Yes I do	Other	All forms of renewable should be harnessed for the production of electricity, especially: Solar, Wind, and Hydro.	Waldo	employed individual
2022-07-08 06:45:38	Western Cape		Yes I do	Other	Wind, solar and gas are the most immediate sources of power and need to be allowed to supply to the national grid.	Michael	employed individual
2022-07-08 06:45:11	Gauteng		Yes I do	Other	Alle hernubare energiebronne moet gebruik word	Ernest	employed individual
2022-07-08 06:45:04	Gauteng		Yes I do	Other	Alle hernubare energiebronne moet gebruik word	Ernest	employed individual
2022-07-08 06:44:03	Gauteng		Yes I do	Other	Any private form of safe energy generation should be allowed in the private sector	Cas	employed individual
2022-07-08 06:42:48	Western Cape		Yes I do	Other	A combination of renewable resources for energy production should have been implemented 10 years back and must, without delay be put in place asap!!	Mike	employed individual

2022-07-08 06:38:51	Gauteng	Yes I do	Other	We need an energy mix solution for SA; 1. Eskom subsidises residential solar system 2. Sea wave turbines 3. Wind turbines 4. Force organic waste fines on industry to go bio digestion/ solar rather than dumping to waste plants 5. Get municipality sewage to energy via ch4 6. Fund nuclear fusion development 7. Coal should supplement the balance energy	Magan	employed individual
2022-07-08 06:37:06	Western Cape	Yes I do	Other	We are too use all available, economical renewable energy resources to bring immediate relief and end the power crisis which further cripples our economy i.e. besides the corruption, the thievery of state funds.	Glenville	employed individual
2022-07-08 06:34:29	Gauteng	Yes I do	Other	It is not the form of generation that matters, but rather the regulation. A free market system (with oversight, instead of regulation) is the only option to ensure an optimal allocation of resources according to the specific supply gaps that exist. Market forces will allocate according to time requirements also. Appropriate generation types for short term and for long term, according to the actual need.	Fouche	employed individual
2022-07-08 06:30:35	Western Cape	Yes I do	Other	I selected other, as I have no knowledge about what would be best, but I can tell you one thing and that is that ANYTHING would be beter than what we are currently dealing with.	Michelle	employed individual
2022-07-08 06:30:08	KwaZulu-Natal	Yes I do	Other	We need electricity production that will be safe to the environment and sustainable. We need eskom to get a run for its money. We are paying with money we just don't have anymore and us citizens are punished for the evil deeds of the anc killing everything they touch.	Coert	employed individual
2022-07-08 06:24:01	Western Cape	Yes I do	Other	Solar and wind - combination	Irina	employed individual
2022-07-08 06:07:25	Gauteng	Yes I do	Other	We need a combination of above mentioned alternative power generation	Hanlie	employed individual
2022-07-08 06:04:07	Gauteng	Yes I do	Other	Any power producers to get rid of Eskom. Tired of the excuses and waste of taxpayers money.	Siegfried	employed individual
2022-07-08 06:02:59	KwaZulu-Natal	Yes I do	Other	I feel the government need to stop the corruption and steal because all of that is leading to everything going up that's the solution thank you	Matthew	employed individual
2022-07-08 05:58:17	Gauteng	Yes I do	Other	The most readily available method would be necessary to end load shedding, after which a more sustainable power method should be put into place.	Mark	employed individual
2022-07-08 05:47:07	Western Cape	Yes I do	Other	All renewable solar, wind, hydro including sea wave and current turbines, recycling of industrial and consumers byproducts should be prioritized.	Frederic	employed individual
2022-07-08 05:09:42	Gauteng	Yes I do	Other	Any of the above in a sustaineble efficient application should be considered	Gabriel	employed individual
2022-07-08 05:03:35	Western Cape	Yes I do	Other	No restrictions should be placed on immediate relief of the severe power supply shortfall. The economies of the various alternatives must be evaluated fairly against each other to determine the best solution. Adherence to whole of lifecycle environmental cost should be used on a case by case basis to decide on best mix for RSA. This needs to include manufacturing and disposal/ decommissioning environmental costs.	Graeme	employed individual
2022-07-08 04:42:19	Western Cape	Yes I do	Other	I selected other as Isolar and wind are good options-depending where in South Africa we are. In oversea countries solar panels and wind are used successfully , although they have freezing cold winters. South Africa wants dictatorship and supports corruption. A minister came to a family member's farm which produces coal and promised his family the family.	Sue	employed individual
2022-07-08 04:42:01	Western Cape	Yes I do	Other	Any environmentally-friendly options will be great! Use what we have - the sun, the wind.... what's frustrating is that this could have all been implemented years ago. Wasted years.... we are tired of watching this beautiful country be driven into the ground by total incompetence.	Jacqueline	employed individual
2022-07-08 01:53:05	Western Cape	Yes I do	Other	We need an alternative plan in place asap as this load shedding is crippling SA!!!!	Kerry	employed individual
2022-07-07 23:47:44	Limpopo	Yes I do	Other		Rudi	employed individual
2022-07-07 22:35:45	Gauteng	Yes I do	Other	To immediately alleviate the current situation, various forms of electricity supply should be allowed to add to the grid. Private companies should be allowed to use different methods to supply electricity.	Oloff	employed individual
2022-07-07 21:44:58	Gauteng	Yes I do	Other		Jason	employed individual
2022-07-07 21:03:29	Eastern Cape	Yes I do	Other	Tesla's free energy.	Bernadette	employed individual
2022-07-07 20:31:20	Western Cape	Yes I do	Other	I think that different options should be available to everyone in different areas. The different weather patterns as well as other factors would likely help influence the decisions.	Anthea	employed individual
2022-07-07 20:20:55	Gauteng	Yes I do	Other	I'm not sure what method of energy production would suit South Africa's needs, but the monopoly that Eskom holds on the nation needs to be broken for progress to be made. We need to allow more private suppliers to enter the energy market without hindrance from the government or Eskom.	Alan	employed individual
2022-07-07 19:39:15	Eastern Cape	Yes I do	Other	The government has clearly demonstrated that it's incompetency knows no bounds, time to throw off the strangling chains and let South Africans try to fux what the ANC destroyed.	Nicki	employed individual
2022-07-07 19:37:15	KwaZulu-Natal	Yes I do	Other	how about we stop selling coal to other countries until we get our sh1t together at home first?	Erroll	employed individual
2022-07-07 19:19:25	Mpumalanga	Yes I do	Other	Solar or coal is good and if its done right there should be no loadshedding	Isak	employed individual

2022-09-14 17:56:31	Western Cape		Yes I do	Other	Solar and wind You see the problem is the corruption within the people currently running our country and power suppliers. They are the problem	Tristan	employed individual
2022-09-07 18:13:51	Western Cape		Yes I do	Other	Electricity is too expensive, Eskom too corrupt and incompetent. We should explore all possible alternatives i.e. wind, solar and gas. Scrap Eskom, allow real competitors into the market	Herbert	employed individual
2022-09-04 12:15:54	Western Cape		Yes I do	Other		Steve	employed individual
2022-09-03 13:18:40	Western Cape		Yes I do	Other	This is South Africa the options are endless. Wind Cape town is not called the windy city for nothing. Solar i mean really now. Hydro, harvesting the energy caused by waves...we are almost surrounded by sea. All these energy options and we are still stuck in the coal age because we have old crusty backward thinking politicians only worried about lining their own pockets. Lastly it is time to end Eskom's monopoly on electricity supply they need competition and consumers have the right of choice.	Lydia	employed individual
2022-08-28 09:18:46	Gauteng		Yes I do	Other	Open the market to independent power producers, Eskom is another failed ANC owned enterprise.	Brad	employed individual
2022-08-25 20:13:11	Gauteng		Yes I do	Other	There are many individuals and companies who have gone off the grid and have excess energy that could be supplied to the grid. Eskom and the government apparently are refusing for this to be made possible. Legislation should be put in place for the purchase by Eskom to the energy supplies that are available from these individuals or companies. Eskom should also put plans in place for building new power stations. They cannot continue to rely on the current power stations that are aging and have not been properly maintained.	Fiona	employed individual
2022-08-12 10:42:28	Free State		Yes I do	Other		matlai	employed individual
2022-08-07 23:15:59	Gauteng		Yes I do	Other	It's past the time that an inept and corrupt government step aside and allow citizens to fix what the government has almost completely destroyed	Shelley	employed individual
2022-08-07 08:31:39	KwaZulu- Natal		Yes I do	Other	Wind in the windy provinces and solar in the sunny provinces	Carol	employed individual
2022-08-04 15:23:41	Gauteng		Yes I do	Other	Anything that will work and make energy available to the grid	Ronel	employed individual
2022-08-04 10:43:39	Western Cape		Yes I do	Other	Tidal energy.	Patrick	employed individual
2022-08-03 12:44:15	Gauteng		Yes I do	Other	Yes I support the scrapping of all red tape to produce electricity cause it benefits the whole nation in the long run. You get the option to choose government power or private power. Furthermore the cost goes down too so we end up paying less	Siyabonga	employed individual
2022-08-03 10:49:50	Gauteng		Yes I do	Other	Dependent on where in South Africa would depend on whether solar, wind or hydro would be a better option. For large companies to obtain environmental authorisation for renewable energy facilities is a painstaking task. Environmental affairs rejects projects with no ground. The red tape to achieve anything is unbelievable.	Michelle	employed individual
2022-08-03 08:41:06	Gauteng		Yes I do	Other	Hybrid we must be practical.	David	employed individual
2022-08-02 15:52:05	Gauteng		Yes I do	Other		Chantelle	employed individual
2022-08-02 15:13:35	Western Cape		Yes I do	Other	- I believe there should be: - Maximum sustainable, rational, ethical, economical and science-based incentives for increasing the production of low to zero carbon energy. - Maximum sustainable, rational, ethical, economical and science-based disincentives to drive a reduction in dependence on carbon-based energy production.	Peter	employed individual
2022-08-02 15:11:09	Gauteng		Yes I do	Other	There is no silver bullet for the immediate scrapping of coal to be replaced immediately by alternative energy sources. However, there must be no delay at all in cutting red tape to allow IPPs to operate and provide a viable and sustainable alternative to a dying and monolithic Eskom. Ultimately, the goal must be that IPPs provide sufficient alternatives to Eskom, thereby reducing its load and perhaps becoming more efficient in the areas that it will continue to serve.	Byron	employed individual
2022-08-02 11:55:10	Gauteng		Yes I do	Other	The point is simply that Independent Power Producers should be allowed to supply electricity to the South African grid. In terms of what type of generation would suit SA's needs, this would have to be a general policy along the lines of highlighting sustainable and green power production, which means limiting, or ruling out coal power, and pushing towards solar, wind, wave, and nuclear. Nuclear would be a difficult ask for an independent power producer but it should definitely be an option.	gustav	employed individual
2022-08-02 10:30:29	Gauteng		Yes I do	Other	SA needs a combination of all types of electricity production. Let the "free" market decide what is best for it. Open the industry up to private producers. This will take a big strain off the Government. The price of electricity will be competitive, and better for the consumer.	Angela	employed individual

2022-08-02 09:21:43	Western Cape		Yes I do	Other	Solar is the fastest way for the average South African to gain access to clean energy but allowing private companies to build the infrastructure for hydro and wind energy should also not only be allowed but incentivised as this will allow companies that can afford it to give communities electricity which will stimulate economy, decrease risk of fires, etc	Robyn	employed individual
2022-08-02 07:41:41	Western Cape		Yes I do	Other	The need of electricity should be on the top of priority list. Rather stop wasting time about debating the flag, street & town's names & spend that time discussing & coming up with ways to get Independent Power Producers immediately "on the grid" Solar/wind/water - so many	Wilna	employed individual
2022-08-01 22:44:36	Gauteng		Yes I do	Other	Not 100% for Solar as you still need electricity.	Benita	employed individual
2022-08-01 09:37:59	Gauteng		Yes I do	Other		Trewin	employed individual
2022-08-01 09:11:31	Mpumal anga		Yes I do	Other	Any electricity contribution will be welcome at this point	Dirk	employed individual
2022-07-29 17:54:13	Western Cape		Yes I do	Other	Solar, Hydro & wind	Arno	employed individual
2022-07-26 15:09:08	KwaZulu- Natal		Yes I do	Other	I would go for a combination of renewable and nuclear. Renewable is quick to install and nuclear if well run and maintained is a cheap form of clean energy. Private producers I expect will maintain their assets, unlike Eskom so expect more reliability in the long run. I also expect some competitive pricing which will benefit us all.	Jean- Pierre	employed individual
2022-07-25 15:11:21	Gauteng		Yes I do	Other		mokolote di	employed individual
2022-07-23 10:43:56	Eastern Cape		Yes I do	Other	A combination of all available technologies provides a better solution with contingencies and varieties of supply around the country should collectively deliver the volume of supply required. Everyone from SMME's to big corporates are ready to be a part of this network but government is fighting all of this as they fear losing control by allowing is to make ourselves independent	Wayne	business owner
2022-07-22 09:53:33	Gauteng		Yes I do	Other	Okay so solar would be sufficient for residential and putting back into the grid, however would not work for industrial. Neither would gas, wind or hydro. I go with coal or nuclear for industrial. Solar is also a very expensive exercise and could be inconsistent.	Samantha	business owner

2022-07-21 00:23:51	Gauteng	Yes I do	Other	<p>The reason Other is my choice is, there is a need for more than one Source of Power Generation to help Alleviate our Energy Crisis in SA.</p> <p>1. Wind Power is an obvious choice but not a secure solution. Not all areas in SA have Wind conditions which are Constant or of Sufficient Strength to Generate a Reliable Energy Source But must form part of the solution where Wind conditions are Favorable.</p> <p>2. Solar is the best choice for the "Mostly" Reliable Power Generation Source. "Mostly" because SA does experience consecutive Overcast and or Rainy Days which will reduce the Generation Capacity one would expect from Solar Power Generation. This in conjunction with Wind are the way to go.</p> <p>This leaves SA with a partial solution to our Energy Crisis:-</p> <p>Coal is a Definite No in the Medium to Long Term. A Necessary Evil until New Environmentally Friendly Power Generation Sources are brought On-Line. Coal burning Power Stations must be phased out.</p> <p>Hydro is pretty much a Non-Starter as SA is a Water Poor Country. We do have the one Hydro System which is great as long as there is enough Precipitation to Sustain it as a Functioning Part of the Grid. Relying on Imported Hydro Energy Leaves Us Vulnerable to the Whims and Politics of the Hydro Generating Country. This Power Generating Method is also Vulnerable to Drought which is becoming an ever increasing phenomenon. On top of all of this, is the Cost of Importing Hydro Power. An added burden to the Consumer.</p> <p>Nuclear is a DEFINITE NO. We do not have a Responsible or Trustworthy Government that can be relied upon to Safely and Securely Store Nuclear Waste. With all the Terrorism in North Africa and its insidious Proliferation Downwards through the Continent, we as a Nation Cannot Allow any Nuclear Waste to become easily obtainable by producing additional Nuclear Waste from New Nuclear Plants as being Advocated by The ANC Government. New Nuclear Plants will make us an Economic Slave Nation to a Foreign Power or Powers (BRIX).</p> <p>As for Gas or Diesel, these would be a Huge Financial Burden on the Country due to these being Commodities being Imported and based on our Pitiful Rand/ Dollar exchange rate. These two Power Generation Methods are also a Significant Contributor to Climate Change. Our Current Diesel Generation Capacity should not be De-commissioned nor Unmaintained but Kept in Reserve and used as a Last Resort to Boost the Power Grid (if absolutely necessary) During the Countries Power Generation Transition Period.</p> <p>What we really need is for Political Will and an Effective Police Force to put an end to the DESTRUCTION OF OUR CURRENT ELECTRICAL INFRASTRUCTURE. Get a grip on the Totally Out Of Hand Organized Crime Syndicates and of COURSE "CORRUPTION".</p>	Greg	business owner
2022-07-20 15:00:11	Western Cape	Yes I do	Other	<p>At this stage, it doesn't matter what method is used, as long as there is a constant supply of electricity. Once the country has electricity, then we can look at what method is most sustainable.</p>	Will	business owner
2022-07-20 13:22:49	KwaZulu-Natal	Yes I do	Other	<p>At this stage we not ALL role players and sources of electricity production available. This is crucial to the survival Of this country. Allowing wind, solar and gas and no red tape to hinder these processes. We have a wonderful opportunity to allow innovative and groundbreaking solutions to our beloved country and its people!</p>	Charmaine	business owner
2022-07-19 15:42:28	Western Cape	Yes I do	Other	<p>A well considered mix of energy sources to be employed. The current essential emphasis on SOLAR AND WIND is required.</p> <p>This needs to be available to private enterprise. Financial support mechanisms to be in place to encourage individuals to generate power.</p> <p>No 2nd ESKOM under any circumstances - State owned enterprises (SOE's) have failed throughout.</p>	Steven	business owner
2022-07-18 19:09:57	KwaZulu-Natal	Yes I do	Other	<p>Eskom is an intentional failure. It is government manipulation at its most obvious. Load shedding was twice proven in the high court to be fraudulent and unnecessary.</p> <p>The strings of political power need to be cut so that ANY viable form of electricity generation is allowed.</p> <p>It should have been allowed in 2008 when the load shedding scam was first unveiled on the unsuspecting public.</p> <p>Furthermore, the shareholders and politicians involved should be taxed all lost revenue since 2008 calculated with sompound interest. Payable back to the tax payers.</p>	Alistair	business owner

2022-07-18 10:58:46	Eastern Cape		Yes I do	Other	Any of the above, except diesel and gas (except from sea source) that will solve the issues in the short, medium and long term. Government not capable to manage anything, including SOE's. I believe less redtape and private sector participation will bring the prices down and make it more affordable.	francois	business owner
2022-07-18 10:52:20	Western Cape		Yes I do	Other	Of course it is absolute necessary to deregulate the production of energy. Because this problem has been 'ignored' by government for too long any solution is going to take time to implement. In view of the global situation and the set goals for addressing the climate change, I propose to focus on the 'clean' energy together with the respective upgrade of the power grid infrastructure and Hydrogen storage. There must be no size restriction on the IPPs. Energy production from individual residential producers to large scale producers must be allowed to tie into the grid. Yes it is complex but the technology is available. If we can have multiple ISPs on a shared fiber infrastructure and the same for mobile communication, then we can do the same for the energy distribution! I further propose that the purchase of energy is VAT free. Oh and I also propose that no government employee may have any stakes in any companies, be that shares or any other form of involvement (Mr Cyril Ramaphosa, you must either be our president or an entrepreneur, but not both!).	Manfred	business owner
2022-07-18 08:49:12	KwaZulu- Natal		Yes I do	Other		FRANK	business owner
2022-07-18 07:58:58	Gauteng		Yes I do	Other	I have chosen Other because SA needs to formulate an electricity policy which urgently addresses immediate needs (improve Eskoms current processes by acting against the corruption and saboteurs, doing the necessary maintenance etc but most important allow the private sector to immediately contribute whatever electricity they can into the grid) and then for the future to push ahead aggressively with wind and solar and allow maximum private sector participation.	Beverley	business owner
2022-07-17 22:37:47	Gauteng		Yes I do	Other	Any other energy other than Eskom will do right now, the government has run everything they've touched into the ground and the citizens are paying a high price for their greed and corruption.	Donna	business owner
2022-07-17 20:19:15	Eastern Cape		Yes I do	Other	Any green energy, solar or wind or combination which can also prevent sabotage or labour issues like strikes etc. But solar panels need also to be made theft proof as these can be stolen and sold on black market.	Maureen	business owner
2022-07-17 17:01:01	Gauteng		Yes I do	Other	A complete solution mix of all of the above except for nuclear will work just fine with allowance for all to feed excess into the grid. Not hard to do. Just a wiring add to any and all systems.	Svend	business owner
2022-07-17 15:23:03	Gauteng		Yes I do	Other	we will have to go mainly with the existing power stations for the moment but the red tape from the government caused a company that must have been given the go ahead to generate electricity about 5 years ago to go bankrupt . Battery technology is advancing very quickly so solar is looking good for the future also Nuclear can produce very reliable power.	Bruce	business owner
2022-07-17 09:22:09	Western Cape		Yes I do	Other	As long as there is healthy competition regarding the energy sector, it will be good for the country and also intice outside influence. Wether it be coal, gas, or hydro the company must ensure safe practice a local job creation.	Thomas	business owner
2022-07-15 21:41:28	Gauteng		Yes I do	Other	Look into sand battery storage from Finland. Use solar or wind to generate enegy and store for months in sand silos.	Andrew	business owner
2022-07-15 20:17:27	Gauteng		Yes I do	Other	A combination of electricity generating methods would be most suitable. Nuclear is one of the cleanest forms of generating power. But I would not trust our current government with the maintenance on a nuclear power station.	Marique	business owner
2022-07-15 10:04:50	KwaZulu- Natal		Yes I do	Other		Tracey	business owner
2022-07-15 08:34:58	Western Cape		Yes I do	Other	Whichever power production does not matter . All energy production has an influence on the environment.	Leon	business owner
2022-07-15 00:27:02	Western Cape		Yes I do	Other	At this stage I think any and all sources of energy generation should be looked at. We need short-, mid- and long term solutions to keep up with demand.	Elmar	business owner
2022-07-14 19:31:57	Limpopo		Yes I do	Other	I think SA needs a combination of sources for electricity production. Coal, solar, wind, hydro electric . IPP s shoul be able to sell to individuals or other companies or put excess energy into the grid	Mariette	business owner
2022-07-14 15:59:57	Mpumal anga		Yes I do	Other	Is the government making secret deals with outside investor's	Rex	business owner
2022-07-14 14:12:02	Northern Cape		Yes I do	Other		stuart	business owner
2022-07-14 12:01:21	Western Cape		Yes I do	Other		William	business owner
2022-07-14 10:43:10	Eastern Cape		Yes I do	Other	We need base load capacity from coal and nuclear in the short to medium term together with a blend of greener renewable energy solutions such as wind, solar, hydro and methane gas. The renewable energy will become more efficient and cost effective over time.	Craig	business owner

2022-07-14 07:58:15	KwaZulu- Natal		Yes I do	Other	I am not an expert on power supply and do not know what the best alternatives would be. I know, however, that our business cannot run with rampant loadshedding and that planning and living under these conditions is depressing and counter-productive. I am not the only South African who is struggling with this. The truth is, independent power supply will mitigate Eskom's control and relieve us of their ineptitude and lack of accountability to a country that is continuously on its knees because of their lack of ethics and simple failure to do what they are supposed to do - provide power. Give us alternative power solutions. Whatever they are, they can only be an improvement on the current situation.	Jenny	business owner
2022-07-13 20:57:12	Western Cape		Yes I do	Other	Right now South African businesses are suffering huge productivity losses , as are farmers who need to water orchards and fields with pumps which are dependent on electrical power. Many are being forced to move to solar at huge cost which is putting more pressure on an already economically terrible 3 years. If it is governments end goal to get rid of the small business owner then they are doing a good job. So IMMEDIATE needs? Get rid of the KNOWN corruption at Eskom, stop the KNOWN theft of coal, and GIVE US electricity. THEN work on future more sustainable ways to provide our electricity needs. BUT RIGHT NOW- identify and get rid of the corruption and vested interests, That would be a good start.	liz	business owner
2022-07-13 18:50:58	Western Cape		Yes I do	Other	Need anything at this stage. Don't trust our presidents brother in law. Motsephe. It's in their interest for eskom to go down. And it will!!!!	Wim	business owner
2022-07-13 16:04:27	Western Cape		Yes I do	Other	The scrapping of any legislation that forbids competition with Eskom needs to be completed immediately. A combination of every kind of power supply we can get our hands on in the short term and an direct (not via Eskom) supply of far more renewable energy quickly to municipalities is critical. Stop supporting coal unions at the expense of the country.	Allan	business owner
2022-07-13 15:15:10	Western Cape		Yes I do	Other	All methods of power creation should be welcomed as we sit in the dark. The ANC has failed dismally and destroyed a world class power supplier. Any form of power supply required by the public must be allowed, be encouraged and the public must not be penalized for creating other alternatives as we are paying for service not rendered and the economy is being destroyed even further. ANC must go!	Karin	business owner
2022-07-13 14:50:15	Western Cape		Yes I do	Other	First and foremost the lights must stay on, from there we can prioritise the most enviro friendly and cost effective options.	Alastair	business owner
2022-07-13 13:56:16	KwaZulu- Natal		Yes I do	Other		Brett	business owner
2022-07-13 10:44:06	Western Cape		Yes I do	Other	At this stage we dont have an option to select the method. All forms of energy production that are viable need to be employed. Red Tape needs to be done away with NOW if we are going to save South Africa.	Michael	business owner
2022-07-13 10:18:01	Western Cape		Yes I do	Other	the privatisation and decentralisation of energy production are long overdue. I have seen it happening in Germany. Every citizen can choose their energy provider and pays their prices accordingly. All are using the same grid. We should look into making energy from waste. Sweden is paying other countries for waste since they used up all their own waste to produce energy. Imagine, South Africans could make money by picking up waste. Long-distance energy transport has up to 75% energy loss. Energy production needs to be decentralised.	Soenke	business owner
2022-07-13 09:16:40	Western Cape		Yes I do	Other	Whatever method of power can be safely managed for distribution even at very small grid level. Let communities create their own power and sell excess if required less power to government and more control to the people.	Donovan	business owner
2022-07-13 08:30:12	Western Cape		Yes I do	Other	I have no clue which method should be used to solve the problem in South Africa. With that, part of the solution would be to remove the governments control over power plants. Having independent suppliers would greatly help as they would not be government run	Shiloh	business owner
2022-07-13 08:21:27	Gauteng		Yes I do	Other	I believe the electrical supply will be hybrid a combination of coal solar wind nuclear etc. We have many sefl supplied solar installation in our neighborhood whi can supply the grid. I myself made and supplied the grid with nearly 3MWh but the electrical supplier is now penalising us for doing so wheras before we enjoyed an incentive in doing so.....	Morne	business owner
2022-07-13 08:05:29	Gauteng		Yes I do	Other	I say "other" as it's a nuanced question. Immediate need would mean immediate availability so whichever method is most easily available at present would be my choice. That doesn't mean it should be the long-term choice. Nuclear is our best bet in the long term but nuclear plants need to be well managed by qualified people. The private sector is more likely to hire better in that regard. On a smaller scale, solar should be used where possible. The private sector would maintain panels and equipment better than a governmental operation. No matter what method of production we're talking about, private electricity generation should be allowed. It's the only way we can avoid the ongoing disaster that is Eskom and the longer we take to allow this to happen, the deeper in trouble the entire country sinks.	Cinzia	business owner
2022-07-13 07:18:03	KwaZulu- Natal		Yes I do	Other		Alan	business owner
2022-07-13 06:46:01	Gauteng		Yes I do	Other	A combination. Allow IPP to choose which power generating solution will best suit the local requirements.	Vossie	business owner

2022-07-13 06:44:53	KwaZulu-Natal	Yes I do	Other	ALL power producers need to work together. SA needs to make this to happen, we can not rely on the government, they do not have the needs of the country/people at heart. Crime, corruption and greed need to be removed from Eskom. We need to give Eskom competition. Eskom used to be one of the best and cheapest energy producers in the world, by allowing competition from the private sector, we can make that happen again!	Ken	business owner
2022-07-12 22:38:49	Western Cape	Yes I do	Other	I chose "other" as is no option for "all of the above". Whatever it takes to keep us all powered up is important! We are wasting so much time in discussion around what is better. Right now we are expending so much effort and energy in just trying to keep the economy from falling apart, still while the upper echelon are raping us. Stop fart-assing and get the energy wheels going. ... AND GET GWEDE MANTASHE OFF HIS SILLY HIGH HORSE AND OUT OF HIS ABUSIVE POSITION!!!	Gunter	business owner
2022-07-12 19:21:12	Gauteng	Yes I do	Other	Government have been sitting on the solution to this crisis for years. They have the solution but prefer to feather their own nests. It is about time that the population of this country put an end to their disgraceful stance. The country comes before any greed. There are hundreds of Independent Power Producers who could feed into the grid. At the moment if Government don't get a cut nothing happens. They are prepared to destroy the lives of millions putting their greed above anything else. This is apart from what it has cost individuals.	Clive	business owner
2022-07-12 19:06:37	Gauteng	Yes I do	Other	Hybrid power producers should be allowed unlimited opportunities to end the energy crisis. A referendum may be needed both in regard to government policy and Eskoms future.	Kesval	business owner
2022-07-12 17:52:04	Gauteng	Yes I do	Other		Linda	business owner
2022-07-12 17:48:57	Gauteng	Yes I do	Other	With an abundance of sun and wind, we need never have become crippled due to lack of natural resources. We have become crippled by a government that is only interested in ANC cadre-ship,(em) powering, excuse the pun, their own agenda.	Linda	business owner
2022-07-12 17:47:20	Gauteng	Yes I do	Other	Whatever it takes to solve the electricity crisis!	Helen	business owner
2022-07-12 16:59:20	KwaZulu-Natal	Yes I do	Other	Combination of solar - coal - hydro - supplied by private and parastatal enterprises	Mary Anne	business owner
2022-07-12 16:52:50	Western Cape	Yes I do	Other	We require a combination of energy sources and resources. (1) Firstly the Government needs to maintain, protect and repair existing ESCOM infrastructure . All ESCOM infrastructure to be classified as strategic assets and protected by the Military. (2) NUMSA and other Labour Unions to be held accountable for sabotage, damage and delayed production due to uncalled striking actions. (3) A combination of wind, solar and Hydro energy to be introduced (4) Local Governments to be allowed to produce own electricity (5) ESCOM to engage in legally committing to a guaranteed buy-back price per electricity unit from the Public, Business and Local Governments who produces excess electricity (6) Legislation to be amended to allow for private and commercial generation and distribution of own energy (7) The Government to disclose which companies and institutions have been granted licenses to produce and distribute alternative energy (8) All electricity being exported to neighboring countries , if any, to be limited until the situation has been stabilised in SA. In short a combination of privatization and use of existing structures for the short to medium term.	Daniel	business owner
2022-07-12 16:02:35	KwaZulu-Natal	Yes I do	Other	BioGas, Hydro, Solar and Wind with future energy storage as Hydrogen.	Mark	business owner
2022-07-12 12:18:27	Western Cape	Yes I do	Other	I conditionally consent to the provision of independent power suppliers to provide electricity on condition that the National power grid is controlled by Eskom only when the demand requires it. Also that the National grid is protected by Eskom who would coordinate such provision to ensure the safety of the grid	Robert	business owner
2022-07-12 12:15:11	Western Cape	Yes I do	Other	I feel that we should open to power sources that are more sustainable and harness natural resources with as little harm as possible, like solar and wind	Karin	business owner
2022-07-12 10:52:06	Western Cape	Yes I do	Other	I agree with everybody's comments before me in that if Government are serious, they can bye pass legislation by making subordinate legislation to move forward. Then allow the Private sector to pursue solar, wind turbines and gas - particularly for smaller homes and businesses. Its at 'grass roots that any country grows the economy. If not, the ANC will go down in history as the organization that put the lights out in South Africa. That will be a terrible legacy.	Colin	business owner
2022-07-12 09:49:19	Gauteng	Yes I do	Other	We can't solve this emergency with just one option. So the only correct answer is "all of the above". Until we have enough affordable energy for the poorest people in our country, we can't take any option off the table. Any person/business who has a solution should be allowed to pursue it. Why is this even a question at this point?	Sarita	business owner
2022-07-12 09:39:59	Mpumalanga	Yes I do	Other	Wind and solar have very low availability and false cost information (cost/MW does not take into account the low load factor. A better yardstick for cost comparison is the cost per MW divided by the annual load factor). Coal and combined cycle gas are still needed to power the main grid. Red tape and restrictions on domestic / small solar and wind need to be removed. Multiple local projects up to 100MW of any viable generation mechanism need to be actively encouraged and supported.	Craig	business owner

2022-07-12 09:13:59	Gauteng	Yes I do	Other	At this stage, I think it would be wise to use as many methods that are commercially viable to supply power. We cannot afford to be held ransom to the strikers and as soon as they realise that they are not the sole suppliers of power to the nation, maybe their attitude will change. This latest power shortage was the ideal time to bring the IPP's on board, so that our reliance on the coal powered stations is reduced. Surely some of our dams can provide hydro power after the good rains we have had this past summer.	Gayle	business owner
2022-07-12 09:08:08	Western Cape	Yes I do	Other	Biogas / Bioenergy; Solar; Hydro; Geothermal	Justine	business owner
2022-07-12 08:58:51	Western Cape	Yes I do	Other	No one specific power source will solve our short and long term problems. A combination of sources is necessary with a longterm look at nuclear. What is clear is that the ANC government caused this problem is utterly incapable of solving it. They need to get out of the way and allow private production of energy.	Carl	business owner
2022-07-12 08:41:13	Western Cape	Yes I do	Other	We need a combination of options to power our growing population. Nuclear is best but will take years to implement. If we get on top of the corruption, theft and sabotage at Eskom, it certainly does have the capacity to keep all our lights on. One thing I have realised from the covid fiasco is that this inept government can make things happen if they want so sorting out the Eskom crisis is amazingly not what they desire!! So called green energy is not very green - it produces relatively little energy and leads to more waste than people realise. However, the infrastructures that have been built should immediately be allowed to feed into our grid to help our current problems. Our people are unemployed and hungry and a reliable source of electricity is critical for economic growth.	Grant	business owner
2022-07-12 08:07:22	Gauteng	Yes I do	Other	I'm not educated enough on the subject to know what is the better option.	Tshepo	business owner
2022-07-12 07:56:12	Western Cape	Yes I do	Other	Any method of power that's available to generate electricity should be used. Oil/gas are the most readily available and must be used as stop gap until a more suitable source is identified, for me nuclear (managed by the correct people) is probably the cleanest available now. We just can't have the totally inept ANC involved their track record of breaking (or stealing) everything that they touch will stand as a case study for historian's into perpetuity.	Neville	business owner
2022-07-12 05:34:49	KwaZulu-Natal	Yes I do	Other	We should be using any and every available means for electricity production	Owen	business owner
2022-07-11 23:29:40	Gauteng	Yes I do	Other	We need a combination of Coal Fired as Primary Power to Start with. Present Coal Fire plants must be converted to utilize / supplement Green Fuel and Hydrogen fuel. PLUS: Supplemented with Solar and Wind in ever increased capacity. Over generation must be converted to Hydrogen and 'Green Fuel' for Night time and Inclement Weather Consumption.	Rulph	business owner
2022-07-11 23:29:38	Gauteng	Yes I do	Other	We need a combination of Coal Fired as Primary Power to Start with. Present Coal Fire plants must be converted to utilize / supplement Green Fuel and Hydrogen fuel. PLUS: Supplemented with Solar and Wind in ever increased capacity. Over generation must be converted to Hydrogen and 'Green Fuel' for Night time and Inclement Weather Consumption.	Rulph	business owner
2022-07-11 22:37:18	Western Cape	Yes I do	Other	I am in favor of any method of electricity production, obvs the greener the better, however right now I am not sure SA is in a position to be picky. We need an option both immediate and longer-term, that a) helps to solve this terrible situation we are in before we get past the point of return . We need to act quick and we need to open this up to independent power producers asap. b) longer term - that is ideally sustainable and planet-friendly and not open to further corruption.	adri	business owner
2022-07-11 22:32:28	Western Cape	Yes I do	Other	The energy crisis in South Africa can easily be resolved. Years ago already Greenpeace said that if bearucrats like NERSA really understood what they were doing, the gate for private owners of solar PV to export their excess electricity to the grid, could have been opened a long time ago. There are hundreds of Megawatts of electricity sitting on the roofs of private houses, farms and industry. Many of these people have been intimidated by Eskom that they may under no circumstances export their excess power. I personally know of many farmers that would immediately install extra solar panels if they could get a 1:1 credit ratio that is not capped and does not expire. Many many households in municipal areas are prohibited from exporting their excess electricity. All that energy could be utilised to support the grid if intelligent people were in charge. So the options are: allow private solar PV owners to export at a 1:1 credit or even at a remuneration or keep on applying load shedding for a long time. Hundreds of Megawatts could be exported into the grid almost immediately if this were to happen. This is not rocket science. This is how Ger,any and the Netherlands have been operating for years. There is no reason why it should not be allowed here too, except for the wrong people that have been opposing it for their own sinister purposes.	Gerhard	business owner

2022-07-11 22:16:14	Gauteng	Yes I do	Other	It is absolutely unacceptable that after all these years of load shedding we are sitting in this position - worse than the start. It is inconceivable that Eskom has been allowed to continue without competition from other sources of alternative energy. We should be using all the energy sources we have and allow free trade with businesses which offer energy. We should also be allowed to transfer any excess energy we have stored back into the grid. In short: Remove the monopoly from Eskom and allow free trade.	Debbie	business owner
2022-07-11 21:43:05	Western Cape	Yes I do	Other	At the moment we need all but in the future renewable is the way		business owner
2022-07-11 20:31:37	Western Cape	Yes I do	Other	This gov has got to get out of the way of allowing others to solve the problems this govt has created. The govt would do well to focus on freeing up the economy, and rather focus on tax collection and a fair budget and distribution of taxpayers money to keep schools, hospitals, roads, sassa, etc going.	Julie	business owner
2022-07-11 20:18:32	Gauteng	Yes I do	Other	I selected "other" as "anything" was not an option. We want investors to come over, and we have no basic living conditions. The moment is "NOW", not to say "yesterday"	Daniela	business owner
2022-07-11 18:14:26	Gauteng	Yes I do	Other	Government should have a broad view on supplemental electricity production. Who ever supplies electricity to the grid should have total freedom how such power is generated for the simple reason that if it is viable for them and the power generated conforms the the standard required by the grid every body gains. The system must allow the smaller guy to participate not just the major corporates.	Suzelle	business owner
2022-07-11 18:12:21	Gauteng	Yes I do	Other	Government should have a broad view on supplemental electricity production. Who ever supplies electricity to the grid should have total freedom how such power is generated for the simple reason that if it is viable for them and the power generated conforms the the standard required by the grid every body gains. The system must allow the smaller guy to participate not just the major corporates.	Johan	business owner
2022-07-11 17:52:16	Western Cape	Yes I do	Other	Use a combination of Hydro, Wind and Solar	Chantal	business owner
2022-07-11 17:08:24	Gauteng	Yes I do	Other	Tesla technology - proven, safe and inexpensive	Yvonne	business owner
2022-07-11 17:02:22	Gauteng	Yes I do	Other	I think it should be a mixture of what is most sustainable but as to the immediate situation surely there are people with experience that can come in and get Eskom fully trained and managed properly.	Barbara	business owner
2022-07-11 16:29:45	Western Cape	Yes I do	Other	Solar PV and Wind are the two cheap energy sources South African has in abundance. End the restrictive legislation and let the country get on with their business; which nobody can do now owing to multiple power failures daily.	Lawrence	business owner
2022-07-11 16:26:23	Gauteng	Yes I do	Other	A combination of solar, wind and hydro would be the best option for South Africa's electricity. We have ample sunshine, constant wind in some areas and a multitude of rivers, not to mention the long coastline. Money should be directed towards the benefits of the citizens and the land instead of lining the pockets of officials.	Zibeth	business owner
2022-07-11 16:03:09	Western Cape	Yes I do	Other	Right now, is right now! Coal - Although dirty it is still the MOST prolific energy in the world. So allow for IPP coal stations. They will run cleaner and burn better. Most don't want to hear this and roll their eyes but look at the facts. Stop this unscientific climate change nonsense for now. Fact: 1. Coal is readily available now. Fact 2: An IPP can kick off and supply a reliable power supply into the grid. Fact 3: Existing skills in SA available. Fact 4: Economic recovery with coal! It will jump start a desperate and dying economy. Allow smaller IPP coal stations in smaller towns which will liven the economy up again. Fact 5: Solar and Wind is proven to be more expensive and UNRELIABLE. Don't shelve just augment with these green technologies until a proper solution is available. Coal is first prize right now. Fact 6: The clean energy argument is a emotional one so stick to logic points 1-4. The answer lies before us but globalists don't care. Second Option: Hydro station - This is proven in Lesotho highlands Hydro project but may have limited Kwh capacity. Ramp up and start new ones where possible. Nuclear - This is a proven, marginally clean, efficient energy source but will take a decade to launch and new IPP so it cannot take first prize.	Charl	business owner
2022-07-11 15:48:56	Gauteng	Yes I do	Other	South Africa undoubtedly needs power, and we need it urgently. Any form of independent power will make a huge difference in the daily lives of citizens and businesses. As long as the ANC and its cadres are excluded from supplying this need.	Jeannie	business owner

2022-07-11 15:48:40	KwaZulu-Natal	Yes I do	Other	<p>The supply of energy has for too long been placed into a comfort zone. i.e. the government supplies, and the consumer pays.</p> <p>However, the Government is not and will never be in the business-of-business. It can only rule, based on legislation and the law of the country.</p> <p>The private sector is in the best position to provide services, because it affects the bottom line - profits. If they do not produce the goods, in this case, enough electricity, then it does not make any profit.</p> <p>I am in favour of privatizing some State run entities, to improve efficiency and to root out much of the corruption that goes with people breaking the law without any recourse.</p> <p>There are other forms of energy generation, most of them known, and some still to be discovered, which will benefit mankind. Once the shackles of the red-tape are removed, then creativity and scientific research beyond current boundaries can proceed and we will all benefit from advanced technology.</p> <p>The next Nicola Tesla (No, not the bubblegum Elon Musk) is out there yet to be discovered.</p> <p>Remove the barriers. Yes.</p>	Shan	business owner
2022-07-11 15:35:01	Western Cape	Yes I do	Other	<p>Any source will do for now eventually favoring more efficient suppliers. What's happening is an unforgivable disgrace and theft of our children's future. By government pandering to a unionized and patently corrupt and broken State supplier, we will continue to see SA on a downward spiral to eventual collapse.</p>	Alan	business owner
2022-07-11 14:58:55	Free State	Yes I do	Other	<p>"OTHER" = All other methods of electricity production available to replace the current dependency on coal fired power facilities.</p> <p>The deterioration of South Africa's ability to provide adequate electricity at an affordable price has over the past 25 years brought the country's economy and inhabitants to it's knees - the latter in prayer for a government coming to it's senses to start executing all the grand plans and projects formulated especially for the energy sector over the past 25 years. In 1995 the RSA was regarded as the country with the lowest cost per kWh, but has lost this position due to incompetence and state capture.</p> <p>The country's climate lends itself to the generation of electricity by various natural ways, i.e. wind farms in coastal regions and solar plants in the more arid regions i.e. the Karoo and Northern Cape, North-West and Free State.</p> <p>ESKOM's initiative to bring back the knowledge of former employees who were laid off due to turn and empowerment strategies to keep the current coal-fired power stations performing at capacity in the absence of sabotage, will give enough time to allow the existing alternative and independent electricity producing facilities to be linked into the existing grid of ESKOM.</p> <p>What happened to the contracts that were awarded by Jeff Radebe in 2019 to allow independent power producers to sell to ESKOM??</p>	Edrick	business owner
2022-07-11 14:32:06	Gauteng	Yes I do	Other	<p>We have enough sun and enough wind to use more than one system; and there are more advances happening all the time. Which ever direction we go in, it should be privately managed: Eskom has proved that our corrupt and inefficient government is incapable of delivering to the electorate who voted for the hollow promise of "a better life for all".</p>	Judy	business owner
2022-07-11 14:30:54	KwaZulu-Natal	Yes I do	Other	<p>Any form of clean energy</p>	Rob	business owner
2022-07-11 14:22:04	Western Cape	Yes I do	Other	<p>Its way overdue, and time to end the monopoly.</p>	Walter	business owner
2022-07-11 14:04:14	Free State	Yes I do	Other	<p>I do feel solar is an option but what about biomass gasification ? Not one landfill area in small towns in the Free State are in a working condition. This can be used to cook food and in used gas geysers to heat up water.</p>	Elmari	business owner
2022-07-11 14:02:01	Gauteng	Yes I do	Other	<p>Any green energy that is viable in South Africa</p>	Wayne	business owner
2022-07-11 14:01:58	Gauteng	Yes I do	Other	<p>Any green energy that is viable in South Africa</p>	Wayne	business owner
2022-07-11 14:01:07	Western Cape	Yes I do	Other	<p>Green (Water/Wind/Solar) combined with batteries to store electricity for national use. The technology is already available... Government are dragging their feet!!</p>	Stefan	business owner

2022-07-11 13:53:55	Gauteng	Yes I do	Other	<p>This country can benefit from a mixture of a lot of different types of energy generation.</p> <p>Pumped storage is being used at Sterkfontein, and I believe that Cape Cape Town are now using it with the Steenbras dam.</p> <p>The problem we have in this country is that the government don't want white people fixing the problems. They want white people to tell them how to fix the problems so that the ANC can fix the problems, get all the credit for doing so and then share all the profits among themselves (that is what BEE is all about, isn't it?)</p> <p>The government don't want to educate the people properly, but they want these uneducated masses to provide solutions to the country's problems?</p> <p>They have entrenched the concept of theft in the minds of the masses, but they expect things to work?</p> <p>They look to Russia and China for pointers of how to run a country?</p> <p>How do these countries deal with crimes such as murder, theft, rape, etc.</p> <p>The government need to grow up.</p> <p>Things don't work just because the president wants them to work.</p> <p>There are sufficient qualified people in this country to make things work again, but these people are white, so they won't be asked to assist unless it's along the paths of corruption that the government prescribe.</p> <p>So this shows that we are dealing with a government that is corrupt, are thieves and racist.</p>	Dave	business owner
2022-07-11 13:29:19	Eastern Cape	Yes I do	Other	Combination of Wind ,Solar and Hydro . Is Needed	ronnie	business owner
2022-07-11 13:25:38	KwaZulu-Natal	Yes I do	Other	No single method of production , but rather a combination of them , with renewables taking first priority for future capital outlay. Current infrastructure has latent capacity, but not being utilised optimally, because of human resource issues, competencies, and possible sabotage and political agendas. Declare an 'emergency', as this is a national key point of priority lto stability of the state , and security. Zero tolerance of any sign of corruption and irregularity of due processes for public spending , and management of SOE's, must be exercised , like as is done in Singapore.	Preggie	business owner
2022-07-11 13:18:48	KwaZulu-Natal	Yes I do	Other	WE HAVE ENOUGH TIDE POWER TO SUPPLY THE WORLD. IT WOULD ALSO BE CHEAPER THAN NUCLEAR. COSTLY TO SET UP, BUT IT IS THEN AVAILBLE FOREVER. PROBABLY HAVE NOT GOT THE KNOWLEDGE TO DO THIS!	PHIL	business owner
2022-07-11 13:17:06	Western Cape	Yes I do	Other	Scrap central planning monopoly. Supply electricity by whatever means - clean coal (which we have in abundance), nuclear, private suppliers - preferably not too much solar & wind which have proved to be prohibitively expensive wherever they have been installed and are not conducive to reliable grid supply either and are by no means the answer to the greens as being "carbon neutral" which they most certainly are not. Government must not have control of this either as its open to the widespread corruption we have witnessed already.	Tessa	business owner
2022-07-11 12:54:13	Gauteng	Yes I do	Other	Any solution is better than no power, come on we live in the 21st century and have to use candles and gas stoves. Our current government is most definitely not going to sort out the problem!!	Linda	business owner
2022-07-11 12:51:46	Western Cape	Yes I do	Other	Our city has sun and wind... Subsidize solar grids for homes and create wind turbine farms on the west coast,	Mujahied	business owner
2022-07-11 12:48:57	Western Cape	Yes I do	Other	It is our human right to take care of our own energy creation without any government control under common law as free living men on the soil! All governments under maritime law is evil.	Carina	business owner
2022-07-11 12:36:53	Western Cape	Yes I do	Other	<p>I've selected "other" because I don't believe any single source will be the best option, for various reasons.</p> <p>Long term - nuclear, if the expertise is there to manage it - this is possible, but currently I'm not sure if the experts we have here are likely to stay. It's also guaranteed to be a massive centralised project, so the potential for corruption is enormous.</p> <p>Gas is a shorter term option, similar corruption risk given the record of the fossil fuel industry.</p> <p>Best would be complete decentralisation - anyone capable of generating surplus power, by whatever diverse means they have available, should be allowed to sell that excess back to the grid. There is more than enough private capital in SA that we'd easily be able to meet the current shortfall in a few months, and each owner would have a vested interest in maintaining their investment, rather than allowing the levels of neglect and sabotage that have caused the demise of Eskom.</p>	Andrew	business owner
2022-07-11 12:21:16	Western Cape	Yes I do	Other	Get rid of the top heavy structure, allow IPP's to provide power. No penalties and red tape to produce your own power. Do away with the top heavy structure in human resources and the corruption. Even if we have the electricity, the grid is not equipped to handle more power. Government should only invest in the infrastructure and allow individuals to deliver to the grid to help those who cannot afford to be independent. It is time we look after each other in our village and the government should only provide the structure. Let them stay out and get out of service delivery - they do not know how to honourable.	Sue	business owner

2022-07-11 12:14:13	Gauteng	Yes I do	Other	<p>I definitely believe we should remove all obstructions to procuring power from independent power producers as quickly as possible, even if this means working around the existing legislation until it can be amended, under some kind of special dispensation adopted as an emergency measure within the next week or two.</p> <p>I am not qualified or knowledgeable enough to give a valuable opinion about which method of producing electricity will be best for our needs. Suffice to say whatever method can be safely produced in the quickest possible time must be the favoured method, at least until such time as sufficient power is provided for load shedding to severely drop to once a day at maximum or be eradicated all together.</p> <p>Only then can be afford to be selective in determining whether we should resort to renewables, coal, nuclear, hydro, or gas but definitely not anything imported given our current exchange rate, as that will be excessively expensive. Also if produced locally this will provide additional job creation, which we desperately need</p>	Evelyn	business owner
2022-07-11 12:05:57	North West	Yes I do	Other	<p>Immediate deregulation of the producer market must be implemented so that private companies can be incentivized to invest as the Republic's public coffers are empty because of mass corruption & criminality. Solar is good for right now to supply the shortfall during daylight hours but at night there is going to be an issue and battery banks like that from Tesla has issues as some of them have burnt down. The medium & long term solution is new coal fired plants such as those in some EU states that is based on the latest clean burning technologies. Nuclear power is the best using the GE / Hitachi PRISM fast breeder small modular reactors (SMR) alternatively one can consider the Russian BN-800 or BN-1200 reactors. Regarding nuclear there is an inherent serious problem though, it is politics and/or the mindset of some organized labor that says: we must force everyone to feel the pain we feel so as to achieve our demands, so imagine a group of employees that decides to sabotage the safety systems of such a plant and hey presto, meltdown!! So ultimately nuclear is not viable for that reason, but economically and environmentally it is the best choice. One might alternatively say to the USA ok we will give you land on the west coast as part of your embassy and you build and operate a series of PRISM reactors there to generate the electricity..... Use it don't use it.</p>	F	business owner
2022-07-11 11:55:20	KwaZulu-Natal	Yes I do	Other	<p>Let people generate their own electricity and incentivize solutions in areas that need it the most!!!!</p>	Sonia	business owner
2022-07-11 11:49:04	KwaZulu-Natal	Yes I do	Other	<p>Right now all options need to be looked at and all options need to be allowed while a master plan needs to be put in place and worked towards. Things like solar geysers are a must on all new buildings. Reducing Eskom staff compliment is an urgent priority. Making everyone pay for their electricity usage. Stop illegal connections.....this is the biggest and quickest result</p>	kevin	business owner
2022-07-11 11:44:49	Limpopo	Yes I do	Other	<p>A combination and mixed-use portfolio of base load, carbon captured coal + nuclear + hydrogen for industrial applications with additional capacity for residential through solar, biogas, wind-turbine, hydro-turbine and biowaste... Micro-grids formed from local area networks and wide area networks provide access onto the grid whilst also providing communities the opportunity to generate private power onto the grid for SADC supply and demand. Discounted rates and offset savings to communities will ensure a responsible tax-paying citizenry.</p>	Nicholas	business owner
2022-07-11 11:29:36	Western Cape	Yes I do	Other	<p>Government is incapable of attending to the problem. Independent power producers seem to be the only solution.</p>	errico	business owner
2022-07-11 11:21:55	Western Cape	Yes I do	Other	<p>The use of biogas is an option produced at landfills</p>	Sanri	business owner
2022-07-11 11:17:21	Gauteng	Yes I do	Other	<p>all of the above</p>	Anne	business owner
2022-07-11 11:13:36	Gauteng	Yes I do	Other	<p>A combination of generation methods should be used, as only then can one see what the actual costs and flexibility of these methods is. Furthermore, the government should not be both the referee and a material player, otherwise political games will be played to the benefit of one or more players, as opposed to being for the benefit of the whole country. The recent NUMSA-led unprotected strike is clear proof of this.</p>	Jeremy	business owner
2022-07-11 10:37:10	Gauteng	Yes I do	Other	<p>I have Funding for a Gasification Plant to be built here in SA. Why does the Government lift the 100mw limit of independant producers, say yes & let the funds come in??</p>	Lionel	business owner
2022-07-11 10:36:29	Gauteng	Yes I do	Other	<p>I'm no expert so whatever works best. Clearly government is unable to provide adequate power and as a business owner the current status quo is unacceptable and unsustainable. Privatization is way</p>	Michelle	business owner
2022-07-11 10:29:13	KwaZulu-Natal	Yes I do	Other	<p>All forms of sustainable eco-friendly generation systems should be used - hydro, solar, wind - and fossil fuel should be phased out (particularly coal). No new coal-fired power stations. And Eskom must reduce its number of employees - currently about double that necessary - but keeping those who actually work.</p>	Jim	business owner

2022-07-11 10:24:01	Western Cape		Yes I do	Other	We've reached breaking point and our economy is fast approaching stagflation, a crisis for which load-shedding is largely responsible. It is long past time that South African law be changed to accommodate independent (i.e. private/commercial) energy production, and I advocate IMMEDIATE amendment of relevant legislation. I strongly support independent energy production through renewable, hydro and nuclear means.	Rob	business owner
2022-07-11 10:22:33	Western Cape		Yes I do	Other	The ANC seems to want to hang on to energy production(in this case through Eskom) with all their might. That is because its a good money spinner(well it was). The ANC have run it into the ground and the ANC(through Eskom) have shown that they are not able/capable of having the responsibility of supplying SA with Electricity. All rules except for safety and perhaps some pricing regulations should be scrapped in favour of allowing all who can to produce electricity to save South Africa.	Mark	business owner
2022-07-11 10:04:44	Western Cape		Yes I do	Other	Allow the people who generate more than they need to push it back into the grid to alleviate the strain there is and make it more attractive for people to switch to solar etc by not taxing them but giving them tax cuts for helping.	Janette	business owner
2022-07-11 09:57:53	Western Cape		Yes I do	Other	I believe this country needs to 1) break up and privatise Eskom (as with Telkom), 2) private power producers that can serve as competition and 3) proper checks and balances both from government side and from the market side to prevent the level of inefficiency we have seen while also protecting the consumer. In addition, instead of wanting to tax people who have their own generation capacity e.g. solar power, the government needs to find ways to allow private individuals and corporations such as SASOL (which has excess generation capacity that could have kept us out of loadshedding ages ago) to feed excess power into the grid, with a tax incentive for the individuals who can afford it to install their own generation capacity. Renewables are good, but battery technology can't keep up, so feeding into the grid and offsetting the cost when people need power due to battery failures etc. is a great way to relieve pressure off the grid while also encouraging people (and making it cheaper) to install renewable energy where possible. Furthermore, renewable energy is arguably the fastest way to relieve pressure off the grid, but whether people want to admit it or not, if we want to permanently solve this problem in a way that doesn't contribute to global warming, we need to go with nuclear generation. However, that comes with some caveats: we need the best technology to be used, we need the best people to maintain the generators, and we need appropriate disposal methods – none of which is cheap. That said, I think we can all safely agree we are about 15 years too late for cheap solutions and old solutions that don't work to be implemented.	Misha	business owner
2022-07-11 09:42:17	Western Cape		Yes I do	Other	We have a solution,so talk to us....this government is bleeding us dry,only interested in power and money, the ugly greed factor is key in their eyes, this should be changed!	Andrew	business owner
2022-07-11 09:35:45	Western Cape		Yes I do	Other	At the moment, we cannot quibble - anything that will get us a sustainable and constant supply of electricity. Let the experts decide - I do not have the required knowledge.	Duane	business owner
2022-07-11 09:26:09	Western Cape		Yes I do	Other	A mixture of energy production is the only way to get out of this ANC inflicted mess right now. Stop talking and start acting and get rid of people like Gwede Mantashe who is way past his sell by date and keeping us in this ridiculous situation while protecting patronage and corruption. Stop red tape immediately and get as many IPPs up and running so that we can try to save this beloved country from total collapse.	Deborah	business owner
2022-07-11 09:21:22	Gauteng		Yes I do	Other	All available options should be pursued and investigated	Mark	business owner
2022-07-11 09:20:05	Western Cape		Yes I do	Other	I put other as it should not be limited to only one. There could quite easily be a combination for redundancy. Nuclear is a great idea IF IMPLEMENTED CORRECTLY, NOT BY OUR SOUTH AFRICANS, BUT THOSE WHO KNOW WHAT THEY ARE DOING This was put in capitals for a reason. First prize would be to declare the crime cabals as terrorists and treat them as such, since if not for their theft and disruption, the crisis would be sorted out to a large degree.	Michael	business owner
2022-07-11 09:13:43	Gauteng		Yes I do	Other	Any other eco friendly technology that is available.	Ian	business owner
2022-07-11 09:12:48	Western Cape		Yes I do	Other	In order to have a stable and sustainable electricity supply we need to use solar, hydro, wind and nuclear power generation. Using only one of these will not solve our problems. There should be massive subsidies from government to businesses and private homes to generate large amounts of their own power. The sooner we bring alternative power generation onboard the sooner we get out of the dark ages.	Zane	business owner
2022-07-11 09:08:06	Western Cape		Yes I do	Other	We should allow any means of energy production which does not damage or detract from the environment	Alastair	business owner

2022-07-11 09:07:18	Gauteng		Yes I do	Other	It's imperative that a combination of quick-to-implement renewable energy sources are acquired immediately, with later addition of larger, more capital-intensive long-term projects such as nuclear to ensure adequate production for a growing economy.	Matthew	business owner
2022-07-11 09:03:20	Gauteng		Yes I do	Other	I know there is a lot of people that can start effective ways to provide electricity to the public and I think they should be allowed to start business in this area. It will make available a lot of job opportunity for the public as well. It will also motivate providers to provide service and products that work in order to keep their clients. (not sure what will be the best solution for the best method as I have no knowledge on this topic)	Amore	business owner
2022-07-11 09:01:00	Gauteng		Yes I do	Other	Solar wind gas, whichever is environmentally green and friendly. SA is as always behind the rest of the world. With over population, and high unemployment, the current situation just exacerbates every day life and hampers SA to grow economically. It's a NO BRAINER!	Andrew	business owner
2022-07-11 08:54:24	KwaZulu-Natal		Yes I do	Other	The present minister of energy should be removed as he is the major stumbling block to progress. We need to open the supply chain to whomever can generate electricity without pollution, examples being solar and wind power. We need to examine "best practice" on a world wide basis and work toward incorporating it here.	PETER	business owner
2022-07-11 08:45:58	Outside SA	Austria	Yes I do	Other	You need to assess the natural resources per region to identify the most suitable resource to convert energy to electricity. It will thus be different for each region. Nuclear power is a political agenda implemented through the UN IAEA which takes the money of taxpayers and transfer it to international private companies. It is also NOT renewable and extremely harmful to the environment and society irrespective of what the so called "experts" say. Nuclear Power should thus NOT be an option.	Helena	business owner
2022-07-11 08:41:15	Eastern Cape		Yes I do	Other		Kevin	business owner
2022-07-11 08:39:31	Gauteng		Yes I do	Other	I think a combination is what's needed. Solar is great but, with frequent rain and a potential shortage of lithium batteries because of electric cars, it's probably not the only immediate answer needed but, it could definitely help.	Theo	business owner
2022-07-11 08:25:27	KwaZulu-Natal		Yes I do	Other	Any power supply. We need power end of story	Kyle	business owner
2022-07-11 08:20:55	Gauteng		Yes I do	Other	We need to start any means to get power, and please keep politics out, if it is a white owned business and they can!!! let them, if its black owned and they can let them!!!! Solar is good for day time usage	Denzil	business owner
2022-07-11 08:15:41	Free State		Yes I do	Other	Any means of production of stable energy should be allowed. This will increase the supply of power and make the prices go down, because of the competition.	CHRISTIAAN	business owner
2022-07-11 08:12:30	KwaZulu-Natal		Yes I do	Other	The definition of insanity is doing the same thing and hoping for a different result. Private Power Producers need to be engaged to supplement failing Eskom. There is no other sane solution.	Peter	business owner
2022-07-11 07:57:36	Western Cape		Yes I do	Other	Not concerned about the short term type. Just NB to end load shedding as it cripples the economy. In the longer term it is NB to move away from fossil fuels.	Richard	business owner
2022-07-11 07:50:05	Gauteng		Yes I do	Other	Combination of nuclear and renewables seems to make sense.	mike	business owner
2022-07-11 07:49:26	Gauteng		Yes I do	Other	Let independent companies produce power with whatever means they can. If they can do it and sell it let them.	Lynn	business owner
2022-07-11 07:44:05	Gauteng		Yes I do	Other	There are numerous new, sustainable, carbon negative energy producing methods that have been halted by legislation. Get rid of the red tape and let the innovators save our country! We cannot afford further economic collapse, exacerbated by load shedding that is needless!	Daniel	business owner
2022-07-11 07:34:44	Gauteng		Yes I do	Other	Businesses in SA needs to survive and the power situation is making it impossible to run a profitable business. Between fuel prices, power disruptions, higher interest rates, minimum wages that keeps going up despite affordability and the slow markets where clients can not afford normal spending like prior to covid, smaller businesses who supply work can not afford to keep open their doors. Businesses needs POWER DESPITE WHO SUPPLY AND HOW!!! Cut the red tape and save the economy!!!!	Helena	business owner
2022-07-11 07:27:58	Western Cape		Yes I do	Other	I am sure there are several effective ways to produce electricity.. Step 1 is to take this out of the hands incompetent government, in other words to remove ANC from control.	Ian	business owner
2022-07-11 07:11:14	Gauteng		Yes I do	Other	Stop supplying other countries with electricity. Let's support South Africa first.	Nikki	business owner
2022-07-11 06:54:41	Gauteng		Yes I do	Other	The answer is that all alternative methods can be used to support the demand and that Eskom supply what ever is short, by doing this Eskom will give it self the chance to catch up on maintenance and get rid of hooligans' that sabotage the capacity.	Johannes	business owner
2022-07-11 06:52:57	KwaZulu-Natal		Yes I do	Other	Whatever method that is viable sustainable and cheaper as well as eco friendly	Mrs I	business owner
2022-07-11 06:38:12	Western Cape		Yes I do	Other		Michael	business owner

2022-07-11 06:37:48	Eastern Cape		Yes I do	Other	Ideally, a mix of renewables as appropriate to each region. But absolutely steer clear of coal, gas, nuclear and diesel.	Nick	business owner
2022-07-11 06:26:53	Gauteng		Yes I do	Other		Katlego	business owner
2022-07-11 06:22:09	Mpumal anga		Yes I do	Other	Allow independent power producers to put excess power produced back onto the grid.	Avril	business owner
2022-07-11 03:06:45	Western Cape		Yes I do	Other	Jirre anything else that's not Eskom will work	Kashiefah	business owner
2022-07-11 01:06:52	Free State		Yes I do	Other	Privatization!!!! Use whatever resources SA has to produce electricity!!! Bad leadership has caused SA to be where we are now....corruption, bad management etc. Allow the people with the know how to step in and fix what is "broken" Get rid of the incompetence!!!	Charlene	business owner
					Depending on any one, single source is going to leave us in the same position as we are now, so all possible sources for creating electricity should be supported, with the exception of nuclear power stations. As far as I am aware, independent power producers feeding into the grid is more complicated than just plugging the supply into the grid: the alternating current has to be synchronized. However, it would certainly take a whole load of pressure off the grid if, for example, (a) the mining industry and other large industries with production lines were encouraged to generate their own power for their needs. (b) each household was supplied with (or at the very least heavily subsidized) a solar water geyser and a couple of solar panels feeding into an inverter with a battery that is connected to the lights and plugs for computers, television/CCV systems and cellphones. That would at least ensure education does not come to a grinding halt and that online employees can continue to work. (c) all street lights should be replaced with solar lights. That would be a huge energy saving. They can still be connected to grid for those days of inclement weather, but for the most part, they would be amply supplied with energy from the sun. If that were achieved, Eskom would become a back-up to solar rather than solar a back-up to Eskom. Households would depend on Eskom only for those appliances that have motors (like fridges, freezers) or draw hug power (ovens and heaters). All electricity coming from a central power plant should be pay as you go. No more municipalities (and corrupt officials) putting their hands in the cookie jar and then not paying Eskom. I cannot see us ever not needing a central production of electricity to which each house is connected, but there is a great deal that can be done to take the pressure off the grid. In short, there is no one solution to this problem. So, (a) people need to be educated about how to go about becoming less reliant on Eskom for their energy needs, (b) systems need to be made available at low cost for example, solar geysers, solar lights, cooking on gas. (c) perhaps the less electricity used, the cheaper the electricity should be. That might encourage people to turn lights off in a room they are not using and/or seek alternatives, for example, cooking on gas rather than electricity or even adopt a healthier raw food diet.		
2022-07-11 00:51:31	Western Cape		Yes I do	Other			business owner
2022-07-11 00:39:54	Western Cape		Yes I do	Other	A combination of renewable and traditional methods should be used in a free market ro determine the most cost effective and sustainable solution...all away from the hands of a corrupt Eskom and government.	David	business owner
2022-07-10 23:10:53	Western Cape		Yes I do	Other	Wind, hydro and solar power can be increased in the fairly short term. Not only the production but also the distribution of power should be decentralised and de-nationalised.	Catherine	business owner
2022-07-10 22:48:44	Gauteng		Yes I do	Other	A combination of power sources where they are available should be used to supplement the existing national grid. Solar in the deserts. Wind at the coast. Nuclear in a few years when it can be built. Coal plants near coal producers. Hydro near sustainable water sources. Once the power is on the grid I believe it can be used almost anywhere in the country but conditions in certain areas determine what can easily be produced there.	Malcolm	business owner
2022-07-10 22:05:50	Western Cape		Yes I do	Other	A combination of wind, solar and hydro. After that, we then use the other fuels for meeting demand.	William	business owner
2022-07-10 21:49:34	Gauteng		Yes I do	Other		Louise	business owner

2022-07-10 21:34:07	Gauteng		Yes I do	Other	The whole bidding model is wrong, why does Motsepe get everything? Allow IPPs to apply for licenses for as much power as they want to, reduce the taxes on batteries and other energy products	Dumisani	business owner
2022-07-10 21:32:19	Gauteng		Yes I do	Other	I believe that in the very short term, Gas and gas from coal (e.g. early part of the Sasol process) will provide fast short term solutions, in addition solar and wind arrays as well as bio mass reactors can be allowed to produce power, if the grid can be stabilized with the erratic solar and wind power. However in the medium and longer term the drive should be towards the highest energy density system and Nuclear is the greenest and lowest environmental impact power generation with the highest power density. Significant effort should be used to update and implement Thorium based nuclear reactors. A number of thorium reactors were implemented in the 1950's but due to the cold war research favoured uranium and plutonium reactors. Currently a team in Canada's Saskatchewan province are trying to licensed a thorium reactor and would very likely be available to deliver the same in South Africa. The benefits of thorium reactors is that they can't melt down, thorium cannot be used in nuclear weapons and thus does not represent any kind of nuclear terrorism or nuclear armaments' threat, these reactors are simpler to implement on a smaller scale (city size) power generation capacity and can be used to power towns rather than feeding long transmission lines with the saving in both power losses as well savings in stabilising power grids. They can use existing nuclear plant waste in the reactor, reducing the accumulation of these waste streams, and some of the waste products are suitable for nuclear medicine. Additionally South Africa in the 1950's produced a significant portion of the worlds thorium from a mine in the Western Cape called Steenkampskraal (owned by Anglo American then) which has high grade thorium reserves and can quickly be brought into production. By allowing the registration of this technology South Africa could very quickly move to the forefront of this power generation capacity and be a world leader in clean energy production.	Nick	business owner
2022-07-10 21:31:41	Western Cape		Yes I do	Other	Solar and wind - we have opportunities for both	Angela	business owner
2022-07-10 21:26:00	KwaZulu-Natal		Yes I do	Other		Beth	business owner
2022-07-10 21:19:15	Western Cape		Yes I do	Other	Waste to Energy and Biogas need to be made available right now for us. I said this 12 years ago and no one listened at NERSA.	Gary	business owner
2022-07-10 21:14:24	Western Cape		Yes I do	Other	I think we need to be open to multiple sources of energy production, allowing smaller communities to also be incentivised to produce local power, whether wind, solar Renewable sources need to be a priority	Cheryl	business owner
2022-07-10 21:11:25	Gauteng		Yes I do	Other	PRIVATISATION & PARTNERING WITH EXPERTISE.	Bridget	business owner
2022-07-10 21:10:25	Gauteng		Yes I do	Other	Long overdue as this f*ck**g ANC government, Eskom and SOC's are useless & corrupt thieves, it will never ever change until they are completely removed from every say and decision making process in our entire country!!! Fu***t people, when will you finally grasp and understand that all they're doing is filling their OWN pockets and satisfying their OWN interests, since 28 years!!! You don't have to stay up just for me, in case you feel like sleeping early tonight, we can always talk tomorrow. I'll only call you once I receive a WhatsApp from you! Good night and sleep tight, should we not talk again...	Michael	business owner
2022-07-10 21:10:01	Gauteng		Yes I do	Other	Combination of coal and limitless renewables for now.	Michael	business owner
2022-07-10 20:44:27	Gauteng		Yes I do	Other	We need a mix of energy methods to be embraced/adopted as soon as possible. One method will not deliver the desired capacity. Open all types of generation to the private sector to help Eskom .	Colin	business owner
2022-07-10 20:41:13	Western Cape		Yes I do	Other		Nathan	business owner
2022-07-10 20:33:25	Western Cape		Yes I do	Other	All of the above choices except nuclear.	Ilham	business owner
2022-07-10 20:23:25	KwaZulu-Natal		Yes I do	Other	The South African Government has proved that it is not capable of providing effective services. In respect of electricity, I proposed that we enable private producers to generate electricity from a range of renewable sources, Solar, Wind, Sugar Cane Mills, Hydro etc	Peter	business owner
2022-07-10 20:22:30	Gauteng		Yes I do	Other	Any alternative sources would be useful at present. Renewals would be preferable in the long run.	Zelda	business owner
2022-07-10 20:19:42	KwaZulu-Natal		Yes I do	Other	Any and every electrical supply solution should be sought regardless of type.	Michael	business owner
2022-07-10 20:17:29	Western Cape		Yes I do	Other	We have proved the use of wave energy to augment the grid. Red tape sank the project for Mossel Bay.	ryan	business owner
2022-07-10 20:14:26	Western Cape		Yes I do	Other		Damien	business owner
2022-07-10 20:12:56	KwaZulu-Natal		Yes I do	Other	There are opportunities to generate electricity from biomass such as wood cuttings (garden trimmings) and alien vegetation (syringa trees being eradicated). These can be used for gasification. The gas is a renewable fuel that can power generators. The technology is being used in European countries like Finland.	Wolf	business owner
2022-07-10 19:52:37	North West		Yes I do	Other		Sandy	business owner
2022-07-10 19:52:33	North West		Yes I do	Other		Sandy	business owner
2022-07-10 19:49:08	Gauteng		Yes I do	Other	Independent power producers providing any safe form of power production should be able to sell into the national grid.	Andrew	business owner

2022-07-10 19:47:57	Western Cape		Yes I do	Other	Any and all forms of energy need to be utilised to amend the energy problem in SA	Ruan	business owner
2022-07-10 19:46:45	Eastern Cape		Yes I do	Other		Basil	business owner
2022-07-10 19:33:39	Gauteng		Yes I do	Other	Hidro, son en wind kan in kombinasie gebruik word afhangende die streekgebiede. Laat die experts bepaal watter metode die mees effektiefste is. Nie politici nie. Hulle dryf slegs hulle eie selfsugtige agendes ipv die van die mense wat hulle eintlik moet bedien.	Pieter	business owner
2022-07-10 19:12:53	Gauteng		Yes I do	Other	We need sustainable green energy going forward, but for now please bring in external energy. This energy crisis is killing our country!!!!!!	Penny	business owner
2022-07-10 19:09:11	KwaZulu- Natal		Yes I do	Other	Different solutions for different regions. Wind for w..Cape, solar for karoo, coal for mpumalanga, nuclear for Eastern cape, biomass for KZN. Hydro from any source you can get it.	David	business owner
2022-07-10 19:06:55	Western Cape		Yes I do	Other	A mix of generation sources is the way to go since each generation method has its own challenges that may be mitigated in combination with other. Why is wave generation not considered?	Cobus	business owner
2022-07-10 18:41:37	Gauteng		Yes I do	Other	Eskom is the problem!. The corruption is ever present, there's not enough skill and know how! The greedy & selfish fat cats that are sucking the organisation dry are useless., the skilful capable engineers were fired for racial and political reasons, and Eskom is now run by BBEEE politically correct useless bunch!	Armando	business owner
2022-07-10 18:24:32	Western Cape		Yes I do	Other	It's clear that Eskom has major problems with no immediate fix. So yes, we need to privatize immediately and perhaps use a combination to get us in the clear and then move to wind and solar. The ANC need to be fired!! Bring back everyone who originally built Eskom and get rid of the dead weight!!	Carolyn	business owner
2022-07-10 17:36:02	Gauteng		Yes I do	Other	Different areas in the country can be utilized to generate electricity more suitable to the environment. Solar cannot work at the coast but can work inland. Wind can work in coastal regions but not inland. We have resources to help but if this poll is trying to say the only way is nuclear, then I disagree. Eskom is outdated and don't seem to want to cooperate with the Metaversal principles. Serve others with cooperation and let everybody support the grid in whatever way they can.	Estie	business owner
2022-07-10 16:54:27	Gauteng		Yes I do	Other	1. We need to tap into a multitude of energy sources, especially renewables like solar and wind, but we also need to use other forms of energy including the existing coal plants and gas turbines. 2. The Eskom dinosaur needs to be disbanded immediately and its assets sold off to private energy operators who will be able to run the assets efficiently and at lower cost to the tax payer. The ANC government has shown over and over again that they have ZERO management ability!! Every single parastatal is basically bankrupt and a huge drain on the tax payer and the economy. Every year for the past 25 years, all we have heard are excuses and so called "plans" to resolve the issues, but NO ACTION is ever taken!! Eskom is going to destroy this country and its ability to grow out of this disaster we find ourselves in if it is not disbanded!!	Remo	business owner
2022-07-10 16:41:47	Gauteng		Yes I do	Other	We have been offered hydro .wave . Wind solar from other independent 1st world supplier, because the government can't get a hand out it never gets passed in the gazette, also no more free power the majority will have to pay	Alun	business owner
2022-07-10 14:43:31	Western Cape		Yes I do	Other	We need to deregulate the grid completely so that anyone with the capacity to supply electricity to the grid can do so. This means incentivizing by paying producers the same unit price that Eskom requires customers to pay them. Once private producers go online, which includes grid feeds from homeowners, prices will start to drop dramatically. We need a diversity of sources of energy and it is time South Africa started looking into the world of free energy, energy from hydrogen, from ammonia, from the Ether, which Tesla pioneered and scientists have continued to develop independently ever since. This is the most viable energy generation system as it taps into the infinite source of energy that permeates the entire universe, known as the Ether, and has none of the limits that mechanistic systems of energy generation that require friction. It is time for government to stop supporting vested interests and bow to the needs of humanity and the truths of cutting edge science. Until then there will always be a scarcity of energy and problems related to its generation.	Kent	business owner
2022-07-10 14:30:43	Western Cape		Yes I do	Other	All forms of energy generation should be allowed to add to the reliability of the south african grid. All methods of competition should be allowed. Only the strong should be allowed to survive. Without strong and competitive players in the power generation space, we will continue having unsustainable and environmentally unfriendly power generation continue to persist in this country.	Taariq	business owner

2022-07-10 13:15:34	Western Cape	Yes I do	Other	<p>www.cocosolutions/waste to energy CO CO SOLUTIONS PLASMA WASTE TO NEGRY</p> <p>Turning waste i(MSW AND BIOMASS) nto renewable energy</p> <p>Benefits of PlasWEn < Opportunity for renewable energy supply < Promotes a smaller carbon footprint < Solves various waste problems, including municipal, medical, nuclear and organic waste < Reduces pressure on traditional electricity supply < Reduced greenhouse gas emissions < Leads to job creation < Waste can be traded for energy security</p> <p>What is plasma?</p> <p>Plasma-chemical processing is used in various industrial applications, especially waste treatment. The Plasma Technology Group of the South African Nuclear Energy Corporation (Necsa) specialises in high temperature and plasma chemistry and the development of advanced plasma systems and applications. The Necsa technology The Plasma Waste-to-Energy Project (PlasWEn) is a plasma gasification system through which waste materials, including municipal, tyre, medical, organic and nuclear waste, is converted into useable and versatile syngas, which is a mixture of N2, CO and H2. The syngas is then converted into various renewable energy sources, including electricity, methanol, methane, steam, heat and hydrocarbon fuels and associated products.</p> <p>The need and gap South African companies are operating in an economically strained environment and are therefore trying to reduce operational cost through projects such as waste disposal and energy savings. Much focus is being placed on the role that renewable energy sources can and should play in the country's energy mix.</p> <p>CO CO SOLUTIONS WASTE TO ENERGY value proposition The PlasWEn system is small, mobile and very easy to operate, with relatively low risk, and will allow small waste producers to convert their waste into a source of renewable energy. For larger applications, the PlasWEn system could be scaled to sizes up to 100 tons per day of waste. Since each system will be custom-made for the specific user, the technology is very flexible with respect to feedstock (raw material), capacity and the type of energy product produced. Once in operation, the PlasWEn system is self-sustaining with regard to electricity supply.</p>	Jan	business owner
2022-07-10 12:15:11	Gauteng	Yes I do	Other	<p>I think a combination of private power generating solutions need to be implemented. Where there is an abundance of wind, wind should be used; where an abundance of sun, solar; hydro power generation should be looked at at our costal areas where the power of waves can be harnessed etc. It is time that Eskom get some healthy competition instead of holding the whole country at ransom because they are the only power generation company allowed to do so, and they can't even do that right.</p>	Saretha	business owner
2022-07-10 12:12:03	Western Cape	Yes I do	Other	<p>I think we need a combination of power supply options</p>	Chris	business owner
2022-07-10 11:53:34	Mpumal anga	Yes I do	Other	<p>Allowing the general public to link into the grid and sell to grid. Then give give the general public subsidies to buy the necessary equipment to do this. This will unlock the creative ability of people to think up ways to do this. Solar is the easiest one for now, but others can be developed, depending on communities situations. Government restrictions do not help this creative entrepreneurial environment. Rules do only benefit individuals, never the community at large has been found in research.</p>	Raymond	business owner
2022-07-10 11:49:48	Gauteng	Yes I do	Other		Magnus	business owner
2022-07-10 11:38:40	Gauteng	Yes I do	Other		Johannes	business owner
2022-07-10 11:34:55	Free State	Yes I do	Other	<p>A combination of what can be deployed fastest. Wind, Hydro and Solar are most accessible to third parties, so start there. This is a no brainer.</p>	Anton	business owner
2022-07-10 11:27:38	Gauteng	Yes I do	Other	<p>I believe in the use of a combination of available resources in order to optimise the most quickest solution. I also believe that a solution not only lies in the use of resources, but the shaping of the supplier. The country should focus on less corruption and improved work efficiency. That way we should be able to cope with maintenance as well as future upgrade and manufacturing of power.</p>	Pieter	business owner
2022-07-10 11:00:32	Gauteng	Yes I do	Other		Andrew	business owner

2022-07-10 10:42:59	Western Cape		Yes I do	Other	SA has a huge number of irrigation canals. Hydrokinetic solutions are easy and cheap to install in these canals. Massive energy can be generated this way. Red tape stops this.	jerome	business owner
2022-07-10 10:21:51	Western Cape		Yes I do	Other	The red tape should be scrapped immediately. Alternative power sources should not be restricted to any one source in the short to medium term. In the short to medium term, whatever is available should be incorporated immediately to alleviate Eskom's poor supply to initially stabilise the power grid. Medium to long term requires a later conversation and should not rule out any sustainable options including nuclear. The grid needs to be stabilised first, future power after. Stop the damage then recover.	Clint	business owner
2022-07-10 10:21:03	Western Cape		Yes I do	Other	Eskom should provide the grid and independent people and companies should be able to supply electricity through it. AND be able to supply electricity to anyone they want, with or without the grid. Time for the government to give power to the people to make them independent of the state. State dependence is the road to collapse.	fotini	business owner
2022-07-10 10:20:22	Eastern Cape		Yes I do	Other	It will require decentralization of the National grid . We require permission for mini grids with various sources of independent power producers to solve the problem. Substations are constantly exploding due to irregular power feed in and illegal connections to the lines. We do not only need permission to produce, we also need permission for more power distributors and traders. I am more than willing to participate in assisting with the structuring and applications of such decentralized distribution systems.	Debra	business owner
2022-07-10 10:11:46	Western Cape		Yes I do	Other	Asking us to choose between solar, wind, nuclear, coal etc. is not right. It needs to be a combination of solar, hydro and wind. Privatised but regulated. Then every house is a potential power station. As people install solar and wind in their houses, they can feed surplus into the grid. We cannot rely on our power stations any more; they are ancient, unmaintained, old tech and pollute.	William	business owner
2022-07-10 10:02:30	Western Cape		Yes I do	Other	Simple, get rind of the ANC! I propose firstly that anyone has the right to generate their own electricity needs should they desire to do so (within the law for safety reasons). This included businesses and mines. It is quite obvious that since 1994, little maintenance and even less plant succession planning has occurred at Eskom rendering the once world leader in large generation utilities, broken and in a state which is impossible to rectify quickly. While the ruling mob are intent on feathering their own nests at the expense of all, we are never going to go far. Independent power producers should be allowed to generate their own power (within safety guidelines which exist), and should they choose to sell excess capacity to others. The most suitable technologies for south africa currently are Nuclear (Terrapower most suitable), Solar, wind and storage systems such a pumped and Tesla Megapack battery. This is the magic combination.	Philip	business owner
2022-07-10 10:01:39	Western Cape		Yes I do	Other	Any and all methods of electricity production should be used to provide reliable electricity to RSA. Our economical growth depends it.	Christof	business owner
2022-07-10 09:57:48	Western Cape		Yes I do	Other	Every type of energy production should be implemented in support of each other with due regard to waste and environmental implications. One thing Eskom can do is stop paying their inept directors & employees huge salaries & bonuses (fire the inept ones) and push those funds towards improvements. If the most powerful institutions in the country, the banks, can downs size, make employees redundant, close branches and pay employees a pittance then other institutions like Eskom can do it as well. Maybe the banks should push some of their profit towards helping SA's power 'problem'.	Jimi	business owner
2022-07-10 09:42:30	Western Cape		Yes I do	Other	All Renewable Energy such as Solar, Wind, Biomass and Waste to Energy should be prioritised.	Hein	business owner
2022-07-10 09:14:07	Gauteng		Yes I do	Other		MJ	business owner
2022-07-10 09:00:53	Gauteng		Yes I do	Other	Our energy situation is not so simple, to allow selecting only one option. Most fundamentally, I would say that supporting our people to be enterprising is the best way of addressing our electricity needs. Government should facilitate this. Make the soil fertile for conducting good business, and get as much friction out of the legislative system. There are enough clever and innovative people in the country to solve this problem when we release the death grip government currently has on our energy sector. The pressure is not on government to come up with all the answers, they should simply support and regulate. I know we can trust our people to get this right, beyond what anyone could expect.	Johan	business owner
2022-07-10 08:52:59	Western Cape		Yes I do	Other	Let IPP do their homework what source of energy and method of storage to choose	Tomek	business owner
2022-07-10 08:34:07	Western Cape		Yes I do	Other	A combination of solar and wind energy South Africa, to avoid continuous destructive loadshedding, urgently needs far more energy on the grid, and the fastest and safest in terms of global warming are renewables. In addition, cities, companies and individuals should be able to generate their own power, with the limit considerably raised so companies and individuals can feed back into the grid. We can look longer afford the criminal postponement and cadre deployment we have had so far. So if ministers such as Mantashe continue to interfere with the REIPP's, they should be immediately fired.	Lance	business owner
2022-07-10 08:17:44	Western Cape		Yes I do	Other	South needs a mix of energy solutions gas, hydro, solar and wind, the enery sector should be privitized to allow competition and innovation to flourish	Peter	business owner

2022-07-10 08:10:26	Gauteng		Yes I do	Other	The ANC is the cause of load shedding. Why would they take the load shedding away when they have found the perfect way to steal from South Africans. Brent crude prices are not related to R27 per litre. Therefore fuel consumption has doubled so the gov can steal money from hiked prices. Also they can supply other countries with power and pocket the funds. Load shedding is here to stay. It is what is feeding the ANC mongering fools. Greed at its highest. Also, it voting should now be transparent. Let's see who is keeping us in the dark and in poverty. They should be shamed. Anyone who votes for an organised criminal party deserves to have sweet F all. They country is led by an example of theft at the highest degree and all the youth are following suit.	Brett	business owner
2022-07-10 08:02:15	Gauteng		Yes I do	Other	It's time that we change over to only using all available renewable sources. Stop raping this beautiful planet.	Michael	business owner
2022-07-10 08:02:10	Gauteng		Yes I do	Other	It's time that we change over to only using all available renewable sources. Stop raping this beautiful planet.	Michael	business owner
2022-07-10 08:00:37	Gauteng		Yes I do	Other	The implementation of alternative energy sources should be immediately implemented and all red tape concerning this be scrapped effective immediately. SA has an abundance of sun and wind as well as coal and uranium. Our power should come from a variety of resources as when one resource is low it will not cause a crisis because power is readily available from all the other resources	Anita	business owner
2022-07-10 07:53:10	Western Cape		Yes I do	Other	Some years ago there was work on a pebble bed reactor, which is the safest cleanest energy available currently, and that was scrapped. Pebble bed is not normal nuclear power but it the cleanest safest energy available at the moment. We should A allow independent energy providers to sell energy and/or put back into the grid B begin working on building pebble bed generators.	Lionel	business owner
2022-07-10 07:50:17	Free State		Yes I do	Other	All should be used initially to boost the economy. Nuclear takes very long to implement, solar, wind etc pick up the slack until the plants are established-. Eventually weaning us onto the most efficient, effective and affordable. Minimal government involved- too corrupt	Lyn	business owner
2022-07-10 07:43:53	Western Cape		Yes I do	Other	A variety of different options are available. Wind farms can already feed into the grid, so with solar and then hydro electricity is definitely a clear option. Cut the red tape immediately.	Jules	business owner
2022-07-10 07:42:54	Gauteng		Yes I do	Other	Whatever gives our country immediate relief from loadshedding must be implemented.	Alan	business owner
2022-07-10 07:42:16	Gauteng		Yes I do	Other	Good day, no electricity solution by itself can work in the future. One has to combine the best suited to the grid and demand. Most likely wind, solar, hydro (fresh and sea water) and most importantly storage capacity.	Nat	business owner
2022-07-10 07:37:57	KwaZulu-Natal		Yes I do	Other	From the research that our family has done, different methods are appropriate and sensible for different areas. Hydro is the best (cleanest and most affordable /sustainable) in areas where you have ample running water, while wind or solar would make most sense in areas that are very windy or sunny. A variety of methods makes most sense.	Gwen	business owner
2022-07-10 07:32:24	Western Cape		Yes I do	Other	Independent electricity production is crucial for the survival of SA and it's economy and everything else!! It is very clear what government has failed!!	Claire	business owner
2022-07-10 07:27:42	Eastern Cape		Yes I do	Other	Why select one source of power? All should be utilized. Learn from other countries who are successful in this arena. Individuals & communities should be encouraged to be self-sustainable in every way and not penalized for being progressive.	Karen	business owner
2022-07-10 07:21:12	Western Cape		Yes I do	Other	All the given options should be altered and then assessed on their own merits.	Eugene	business owner
2022-07-10 07:17:02	Gauteng		Yes I do	Other	We have a good system, it just needs upgrades and maintenance. Instead of the corrupt people currently running it, the money should go to upgrades and maintenance, instead of large undeserving salary. Scrap Eskom and sell to a private business who has pride.	Kade	business owner
2022-07-10 07:11:16	Gauteng		Yes I do	Other		Gail	business owner
2022-07-10 06:53:33	Western Cape		Yes I do	Other	I think a combination of sources utilising our natural assets - wind, solar and at the coast hydro And nuclear is also an option We can no longer watch our economy and country slide into an abyss because of lack of basic infrastructure and service delivery!	Ilse	business owner
2022-07-10 06:48:51	Gauteng		Yes I do	Other	We need independent energy suppliers who provide a variety of energy possibilities	Dan	business owner
2022-07-10 06:47:18	Western Cape		Yes I do	Other		Greg	business owner
2022-07-10 06:44:26	Gauteng		Yes I do	Other	None of the options stated is capable of covering our energy needs immediately. It is possible that the energy requirements could be reduced considerably by providing tax incentives to the heavy single users - mines and aluminium smelters - to go off Eskom power and generate their own without a 100MW limit. In the interim, we need to build a power backbone of renewable as well as nuclear as nuclear is the safest and most consistent.	Grant	business owner
2022-07-10 05:27:05	Western Cape		Yes I do	Other	A mix of all types of power is urgently needed to move Eskom - and SA - beyond coal. It's a slow process but it needs to start immediately.	Gillian	business owner

2022-07-10 03:54:16	Gauteng		Yes I do	Other	Eskom is useless and can not supply the country with electricity, so anyone that can do it better must do so now	JA	business owner
2022-07-10 01:25:26	Free State		Yes I do	Other	We have many options for power generation but the government has mismanaged and lost a lot of essential skills. This easing of the regulations would help private sector producers to compete fairly and improve the overall electrical supply.	Stefan	business owner
2022-07-09 23:06:30	Western Cape		Yes I do	Other		Heather	business owner
2022-07-09 22:07:48	Gauteng		Yes I do	Other	All solutions should be considered, at the end of the day the most efficient cost effective solution should be one that warrants energy independence for the South African citizens for many generations to come. Kicking the can down the road is not a legacy we should leave for our children and their children. Have a beautiful day Bob	Bob	business owner
2022-07-09 21:37:32	Western Cape		Yes I do	Other	Eskom/Gov is incompetent. Definitely allow independent power suppliers. Use solar, wind, Hydro, Nucler - anything but coal.	Patrick	business owner
2022-07-09 20:39:01	Western Cape		Yes I do	Other	Our power needs to come from a number of independent sources eskom is no longer able to supply. Cut the red tape.	Alan	business owner
2022-07-09 18:59:56	Gauteng		Yes I do	Other	We need a mix to balance renewables and base load requirements. We need to be impartial to the means whilst we have loadshedding. Once the crisis is averted we can build a greater focus on renewables	Dorian	business owner
2022-07-09 18:27:23	Gauteng		Yes I do	Other	No single one method. All should be implemented in order to serve various needs.	Adri	business owner
2022-07-09 18:19:11	Western Cape		Yes I do	Other	We should include all options of renewable energy: hydro, solar and wind - we have all in ample supply..	Melissa	business owner
2022-07-09 18:00:40	Mpumalanga		Yes I do	Other	Our Company - Busby Power received "Preferred Bidders Status" in 2014 in window 4.5. Our project reached financial close by 2015 and we would of been ready to start supplying into the grid in 2016. We have been waiting 8 years to receive the Power Purchase agreement. Delay after delay without anybody giving the final signature. We are one of 20 projects in round 4.5.	Fritz	business owner
2022-07-09 17:05:35	Western Cape		Yes I do	Other	Whatever will supply SA with the quickest solution. We know coal often gets wet and another reason for power cuts, so we can't rely on coal.	mimi	business owner
2022-07-09 17:05:31	Western Cape		Yes I do	Other	Whatever will supply SA with the quickest solution. We know coal often gets wet and another reason for power cuts, so we can't rely on coal.	mimi	business owner
2022-07-09 16:00:46	Western Cape		Yes I do	Other	Please allow as many non-Eskom entities to supply power to the grid as possible, even down to individual homes with excess solar / small shopping malls. We need as much electricity added to the grid as quickly as possible. I support all the forms of energy, even portable micro-nuclear, leased for 5 years.	Evan	business owner
2022-07-09 15:29:07	Gauteng		Yes I do	Other	Time to release free energy Tesla worked on!!!	Lore-lei	business owner
2022-07-09 15:18:38	Western Cape		Yes I do	Other	a combination of wind, solar and hydro as IPP with nuclear and coal as a back up	grant	business owner
2022-07-09 14:21:08	Eastern Cape		Yes I do	Other	There is no stand alone solution that would eliminate our crisis but rather a combination of all possibilities as long as it is run by the private sector in a competitive manor to make it affordable for the public sector and above all a sustainable solution for the long run. Having this said, generation must be carefully allowed as not to give away monopoly ownership to foreign country investors. There should be advantage to local investment FIRST (but also not allowing the same old un effective BEE) and only after that foreign investment. We should empower our own citizens. We are not a small country and we own sizable resources to make ourselves heard on the global market.	Herold	business owner
2022-07-09 13:47:19	Western Cape		Yes I do	Other	As a short term solution ; implement and use whatever resources are available. Independant service providers ; to keep the lights on....machines going , people in jobs ; and stabilise our economy! Long term ; investigate and use professional consultants so that we too can become a solar powered country! Let's all together make South Africa great!	Glynda	business owner
2022-07-09 12:07:00	Gauteng		Yes I do	Other	Not an expert but seems we need to get power from a several sources	Premilla	business owner
2022-07-09 12:05:15	Western Cape		Yes I do	Other	Eskom is a failed and bankrupt organisation. No excuses are acceptable anymore for their poor performance which is currently destroying this country. Electricity provision should be privatised with immediate effect. The method of production should not be prescriptive and legislation should provide as much possibilities / opportunities as possible. Different municipalities might require different solutions and the legislation should therefore allow flexibility in this regard.	Martin	business owner

2022-07-09 11:27:31	Western Cape		Yes I do	Other	<p>There is currently no incentive to spend my AFTER TAX MONEY ON ELECTRICITY GENERATION USING SOLAR AT MY OFFICE OR RESIDENCE.</p> <p>IT IT PURE LUNACY INSANITY!</p> <p>CITY OF CAPE TOWN ARE CYCLOPS IN ATTITUDE AS WELL AS GOVERNMENT.</p> <p>1. no tax incentive. 2. impeding the introduction of self generated power into the grip with massive delays to obtain permission 3. I MUST PAY TO INTRODUCE THIS TO OBTAIN PERMISSION AT HUGE EXPENSE. 4. THE REFUND IS LESS THAN HALF THE COST OF WHAT UNITS OF ELECTRICITY COSTS! THEREFORE THE CITY OF CAPE TOWN AT MY EXPENSE ARE MAKING MASSIVE MONEY ! 5. I cannot make more than i consume. how idiotic when the entire country desperately needs spare electricity! 6. Theft of electricity is not being dealt with clearly a political disaster, affecting everyone who actually pays for it! 7. EVERY HOUSEHOLD SHOULD HAVE SOLAR NO MATTER HOW SMALL. GOVERNMENT SHOULD BE GIVING EVERY HOUSEHOLD A MINIMUM OF A FEW LIGHT BULBS OF POWER FROM PORTABLE SOLAR ! THAT WILL REDUCE THEFT, FIRES IN SHACKS ETC! ARE THESE OFFICIALS STUPID BLIND AND IN THE DARK (AGES???)</p> <p>SEE THE LIGHT (ON OF COURSE)</p>	JEM	business owner
2022-07-09 11:13:12	Western Cape		Yes I do	Other	My Company can build zero fuel power stations within 9 months and covert all existing power stations cheaply starting immediately by replacing all prime movers in very quick succession. Our IPR have to be guaranteed.	Dr Jacques	business owner
2022-07-09 09:47:36	Gauteng		Yes I do	Other		Janine	business owner
2022-07-09 09:21:57	Gauteng		Yes I do	Other	For now we need electricity from any source	Susan	business owner
2022-07-09 09:13:49	KwaZulu- Natal		Yes I do	Other	The tenets of a JUST TRANSITION must be followed. The resources and fuel that SA is endowed with cannot be ignored. The lessons learned from European countries who gave away their energy sovereignty must be heeded. SA must never create a dependency on resources it does not have. An energy mix using available resources is the way to go. Push technologies and practices that continually reduce the carbon foot print towards a specific REALISTIC target without compromising cost, productivity and industrialisation. No pitting of technology against the other; but employ each technology appropriately. Industry cannot be driven by wind or solar with expensive batteries. But these still have a place in the energy mix. For industrialisation nuclear is the best way to go, however, clean coal and biomass technologies with carbon capture use and sequestration should be a gateway to lowering the carbon intensity.	Hlubi	business owner
2022-07-09 09:13:40	Gauteng		Yes I do	Other	Any cost effective, environmentally friendly source would be my preferred option. The state should NOT have all this 'power'! We should have the option of choosing a service provider that suits our individual needs.	Mareza	business owner
2022-07-09 08:59:15	Eastern Cape		Yes I do	Other	The Government should work out an infrastructure that combines the most efficient and and cost effective power sources combining Coal, Diesel, Solar etc bearing in mind the Green policy deadline needs to be met. They should use Cape Town as a blueprint to start from and develop a medium and long-term plan to make SA power independent. Another action ? that while we are at Stage 6 loadshedding the Government is exporting huge, huge amounts of our Eskom power to neighbouring States at below cost this must stop. South Africa First!!	Ernest	business owner
2022-07-09 08:22:19	Outside SA	United kingdom	Yes I do	Other	Just Solar alone wouldn't at this point of time solve the load shedding issue it's a combination of Hybrid system need to be put in place for sustainable supply of electricity	Sriram	business owner
2022-07-09 08:15:47	Gauteng		Yes I do	Other	It is so urgent, that we may have to make use of several options. I am not keen on the nuclear option, as the waste is removed by trucks, and we know what happens to some trucks on our roads- accidents, burning etc. This could cause serious contamination. 1. The generation of power from the lifts in mine shafts, as they descend they can generate power. this is being looked at internationally. It almost replaces the power used in ascent 2. Wave power-Kwazulu Natal	Yvonne	business owner
2022-07-09 07:57:04	Free State		Yes I do	Other	All methods WAS and could be efficient if managed properly without interference from unions , government and stealing from ministers and government officials in "High Places" Wrong management wrong harvest !	Peter	business owner
2022-07-09 07:49:10	Eastern Cape		Yes I do	Other	Solar, Wind and Hydro	Derek	business owner
2022-07-09 07:26:11	Gauteng		Yes I do	Other	Our electricity security should be a combination of the most viable green energies that are available to SA.	Wayne	business owner

2022-07-09 07:12:11	Gauteng	Yes I do	Other	Finally we come to this. It is always the same: Problem - Reaction - Solution. Problem: wreck Eskom and by extension, the economy Reaction: The inhabitants get fed up, frustrated and super hungry for any solution but the current situation. Solution: Open wide the flood gates for the cronies whom for their sake, Eskom was literally undone as a functioning entity. Now the billions can be made by those cronies. Let there be balanced and ethical rules and regulations to guide the new entrants lest the pain and burden falls squarely in the shoulders of the 'ordinary' citizens who are already stretched to the brink of snapping.	Johnpaul	business owner
2022-07-09 07:07:35	Gauteng	Yes I do	Other	It is important to allow IPP's to not only generate power but to store power for night/ poor weather electricity needs. South Africa and its neighbours have massive gas reserves. Gas works well in Europe. Government is protecting the coal mining companies for obvious reasons	Tony	business owner
2022-07-09 06:21:19	Western Cape	Yes I do	Other	We live in a realm of energies. Energy is everywhere, always. The solution: free energy: free electricity forever. These mechanisms exist. Design, plan, organize and establish the free electricity market for all people everywhere on Earth! REJOICE!	Nicolas	business owner
2022-07-09 04:43:37	Western Cape	Yes I do	Other	We have options to use other forms of energy supply, not just one, wind and solar could be added but definitely the private sector should be involved in supply. Cut all the nonsense with red tape. Enough is enough . Beside how this load shedding is killing what is left of our economy, how can we ever get any new investment and job creation with this nonsense going on	June ingrid	business owner
2022-07-09 04:43:36	Western Cape	Yes I do	Other	We have options to use other forms of energy supply, not just one, wind and solar could be added but definitely the private sector should be involved in supply. Cut all the nonsense with red tape. Enough is enough . Beside how this load shedding is killing what is left of our economy, how can we ever get any new investment and job creation with this nonsense going on	June ingrid	business owner
2022-07-08 23:02:26	Gauteng	Yes I do	Other	A combination of solar and then moving towards nuclear - but with as little input or interference by government as possible. The ANC government is unable to move beyond their centralized control formula which has historically throughout the world proven to be unworkable and failed the most needy. Nuclear power has proven to be the most cost effective and long lasting - if correctly designed, built and operated - none of which the current government is able to do. The private sector can do this and have done this elsewhere - all government has to do is to keep their hands in their pockets, appoint professional, qualified, non political experts to manage the process from start to finish and then subsequent operation by qualified non-unionized personnel.	Chris	business owner
2022-07-08 22:11:44	Gauteng	Yes I do	Other	If each household can subtract the cost of solar power installed from their tax, you IMMEDIATELY have loads of extra power available because everyone will be willing to install solar. And you create job opportunities for local people installing solar power. ?	Karien	business owner
2022-07-08 21:11:45	Gauteng	Yes I do	Other	Both, Solar and wind, we have both available to us and should make use of it	Via	business owner
2022-07-08 20:01:55	Gauteng	Yes I do	Other	I think we need a wide variety of options to solve the immediate problem and then over time use other options over the long term to sort the electricity problems out in this country. I don't have the expertise but we must get an immediate solution now and then look at bigger projects and options to solve this huge problem. Eskom must never be in a position to control and rule our electricity again. It should be run independently and autonomous of the government.	Sabrina	business owner
2022-07-08 19:22:29	Western Cape	Yes I do	Other	A mix of solar, wind and gas with large battery storage capacity to control the shifting loads and shortfalls. And possibly modular nuclear following the grid recovery.	Steven	business owner
2022-07-08 19:06:04	Gauteng	Yes I do	Other	Please privatise this industry.	melissa	business owner
2022-07-08 18:57:46	Western Cape	Yes I do	Other	Independent power producers should have been enlisted 27 years ago already to produce power by whatever means, last on the list being diesel, coal or nuclear. We have enough sun, wind and water to power the country, and we have the brains to do so - just not in government. Employ the best people for the job, like any civilized country would do.	Keri	business owner
2022-07-08 18:56:04	Gauteng	Yes I do	Other	Free, clean electromagnetic energy is available from the aether. I guarantee the current interim government knows about this. All that's needed is Tesla towers. So convert the current 5G towers into Tesla towers and you'll have free, unlimited energy for all.	Wendy	business owner
2022-07-08 18:46:44	Gauteng	Yes I do	Other	I am for: solar, wind, coal, gas	Rudolf	business owner
2022-07-08 18:41:19	Gauteng	Yes I do	Other	Other in the sense of karpowerships which of course use gas. Yes, they cause environmental damage. Yes, they pose a huge climate risk. But there's not much point in saving the planet if the whole country starves to death.	Liz	business owner

				<p>SEVEN POINTS OF COMMENT</p> <p>1) Eskom single biggest risk to SA economy, warns Goldman Sachs</p> <p>http://www.fin24.com/Economy/Eskom/eskom-single-biggest-risk-to-sa-economy-warns-goldman-sachs-20170922? shared via @Fin24</p> <p>2) BLACKOUT: 10 things in Dentons report Eskom has kept hidden</p> <p>http://www.fin24.com/Economy/Eskom/blackout-10-things-in-dentons-report-eskom-has-kept-hidden-20170209? shared via @Fin24</p> <p>3) Eskom report smoke and mirrors of a dying institution - expert</p> <p>http://www.fin24.com/Opinion/eskom-report-smoke-and-mirrors-of-a-dying-institution-expert-20170130? shared via @News24</p> <p>4) 7.2 million tons of coal destined for China from Richards Bay Harbor refers:</p> <p>36 Chinese ships are waiting for coal to be loaded in Richards bay Harbor.</p> <p>Where is the shortage now, Eskom?</p> <p>Each ship takes about 36 hours to be loaded.</p> <p>200 000 tons of coal per ship average</p> <p>It is Grade A anthracite.</p> <p>The informant also says that Eskom have huge stockpiles of coal.</p> <p>They lie because they want that 15% increase in electricity tarriffs.</p> <p>Will send pics as they arrive.</p> <p>All flying is suddenly 'restricted ' over Richards Bay the reason is now obvious ! This is not just an Eskom deal - it's an ANC deal / ploy ! (How can government not know about this ? Just one big criminal organization !</p> <p>5) ORDER OF MAGNITUDE FIGURES FOR ESKOM</p> <p>On average generating plants consume 0.6 kg of coal per kW and it use 2.6 liter of water per kW.</p> <p>A coal fired power station with six units generating 600 MW each consumes between 850 000 to 980 000 tons of coal and approximately 2 600 MI of water and consumes approximately 83 GWh of its own power it generates to keep the station on load.</p> <p>6) Private electricity genertation</p> <p>When the amended Electricity Regulation Act (ERA) comes into force, it will regulate the use of small scale electricity generators by requiring registration with the National Energy Regulator of South Africa (Nersa).</p> <p>This is according to Lizele Oberholzer and Jarrett Whitehead, attorneys at Norton Rose Fulbright, who say that the regulation will likely have far-reaching effects, as private use of small scale electricity generators has increased dramatically in South Africa.</p> <p>"It has been reported that private electricity generation from photo-voltaic solar panels alone has increased from 35MW in 2015 to 159MW in 2016," said Norton Rose Fulbright.</p> <p>"Before parliament, the Department of Energy expressed concern with the loss of revenue that municipalities and Eskom are experiencing as a result of increased private generation of energy. These concerns were echoed by Nersa, which supported the presentation."</p> <p>New regulations</p> <p>Published in December 2016, the "Draft Licensing Exemption and Registration Notice" expresses the minister of energy's intention to exempt various categories of generation facilities and electrical resellers from the requirement to hold a licence under the ERA.</p> <p>Under these regulations, instead of requiring a licence, listed activities will need</p>		
--	--	--	--	--	--	--

2022-07-08 18:37:35	KwaZulu-Natal		Yes I do	Other	Having independent Power Producers sounds wonderful, but who will be these producers? If any of them come from the current Eskom mafia group then we might as well quit while we're ahead. For me personally I believe we should have gone down the road of solar and wind power years ago. Having said that though, here in KZN and probably somewhere in the the Western Cape we could look into hydro. I'm not sure if the layout for this would justify the years it would take to recoup this cost in money and years of construction.	Alan	business owner
2022-07-08 17:33:07	KwaZulu-Natal		Yes I do	Other	All renewable sources of power are great, and it's better to have a range rather than relying on only one, e.g. solar, wind, hydro can all be used depending on the area. ESKOM clearly is unable to cater for our growing power needs as proven by worsening outages which are damaging our economy. Using a variety of independent power providers and eliminating the red tape is the only way to go move forward.	Enrico	business owner
2022-07-08 17:29:31	Western Cape		Yes I do	Other	The centralised power @ Eskom was built for industrial purposes way back when. It was never designed to sustain the growing population and infrastructure we use today. Allowing private power producer to intergrate into the existing power grid would allow less pressure to be put onto eskom and help destabilise.	Jürgen	business owner
2022-07-08 17:14:29	Western Cape		Yes I do	Other	At the moment, a mixture of solar, hydro and wind-power i.e. all three combined, would be best utilized to get this Country out of the current problems experienced with Eskom and load shedding - all these areas should be built-upon and expanded in the foreseeable future, together any other available 'clean-energy' developments.	Trevor	business owner
2022-07-08 16:04:54	Western Cape		Yes I do	Other	No idea. I think perhaps each province or area might have a different solution depending on what's more readily available . Certainly competition is always good and privatization for better management. Government has proved beyond doubt that they cannot manage, control or offer a good service!	Susan	business owner
2022-07-08 16:04:51	Gauteng		Yes I do	Other	Your "method of electricity production" lists; Coal Gas Hydro Nuclear Solar Wind Diesel I have selected Other: My meaning? Any or all of the options should be used where viable Given the extreme urgency of the situation any feasible option should be used Most important is who would be responsible for: Option selection Terms and conditions Appointment of competent vendors Design, Install, Commission QA. QA. QA The past performance of the government indicates that it is not competent to undertake this massive task Perhaps a Government of National Unity should have the responsibility THIS IS NOT ABOUT PARTY POLITICS. IT IS ABOUT PATRIOTISM	gordon	business owner
2022-07-08 16:03:22	Western Cape		Yes I do	Other	No idea. I think perhaps each province or area might have a different solution depending on what's more readily available . Certainly competition is always good and privatization for better management. Government has proved beyond doubt that they cannot manage, control or offer a good service!	Marius	business owner
2022-07-08 15:44:38	Mpumalanga		Yes I do	Other	It is clear by the years of loadshedding that Eskom cannot supply the necessary power for the country to function optimally. The supply of electricity should therefor be privatized as alternative to Eskom supply with immediate effect to allow businesses and households to function at full capacity.	Nico	business owner
2022-07-08 15:43:57	Western Cape		Yes I do	Other	A blend of all forms of power generation. We cannot use one source exclusively.	John	business owner
2022-07-08 15:35:53	Gauteng		Yes I do	Other	Nuclear is the most viable solution but I say this with with hesitancy, as we are currently unable to manage a coal fired infrastructure. If nuclear was implemented it needs to be independently managed by competent management & staff with out government interference and without BBEEE . "The right person for the job" is paramount with nuclear to ensure the safety of everyone. Proper implementation of individual grid tie rooftop systems with proper specifications could help almost immediately However it is a two way street there can be no ludicrous feed in tariffs and the the buy back tariff should also be fair, something like 60% of council tariffs this still allows funding toward maintenance of infrastructure. I believe a fair structure would be motivation for more people and businesses incur the huge expense of installing solar.	Daryll	business owner
2022-07-08 15:34:07	Gauteng		Yes I do	Other	We should use a combination of solar, wind and our own coal (with fairer deals) until other sources can fulfill our needs. Long term, some nuclear should be added, but only if the ANC have NOTHING to do with it	Irene	business owner

2022-07-08 15:23:24	Gauteng	Yes I do	Other	A mixture of various effective—ideally renewable—electric generating technologies, unencumbered by politics and corruption should be allowed. Not only should Independent Power Producers be allowed to operate, but all individuals and businesses should also be able to freely—without administrative hurdles—generate electricity, and their surplus should be able to feed back into the grid (a) without penalty to them and (b) with market related remuneration. The power should be produced by South Africans, not foreign entities, to safeguard our economy.	Paul	business owner
2022-07-08 15:12:46	Gauteng	Yes I do	Other		Robin Allan Greaves.	business owner
2022-07-08 15:10:18	Gauteng	Yes I do	Other	A combination of many of the above options is what is needed, and soon.	Darien	business owner
2022-07-08 15:09:58	Gauteng	Yes I do	Other	Need a mixture. Phase out coal as others become feasible. Current renewables. Nuclear in the foreseeable future. Must be allowed to create your own energy for your own business.	Robin Allan Greaves.	business owner
2022-07-08 15:02:11	Western Cape	Yes I do	Other	The Minister of Energy should have been fired years ago. Eskom should have been privatised a long time back - it has only got worse and worse as the corruption and syndicates were uncovered. He should have allowed independent producers to sell power to the grid when the first problems arose. What about solar power? What about wind power? These can all add to the grid to relieve the pressure on Eskom.	DIRK	business owner
2022-07-08 14:58:33	KwaZulu-Natal	Yes I do	Other	I selected "other" under method as I believe any and all methods should be used. Coal, gas and nuclear would be preferable as they provide cheap electricity and when it comes to coal and gas we can for the most part get the fuel sources ourselves and not need to import or rely on foreign aid. This would create even more job opportunities. Once we are in an energy surplus and are enjoying the privilege of cheap energy that the developed world enjoyed for generations we can look into developing renewables... though even Germany is firing up coal again so the viability of that venture is dubious at best. Rather we should (and France is an example of this) develop a fleet of the latest generation of nuclear power plants and become a literal and figurative power house in Africa.	Steven	business owner
2022-07-08 14:56:25	Western Cape	Yes I do	Other	I'm no expert. It would appear that a combination would be best. Solar, gas, wind, water, coal etc. Reduce red tape. Cut bloated workforce. Hire experts. Combat corruption theft and sabotage. Tall order	Carol	business owner

2022-07-08 14:52:49	Gauteng	Yes I do	Other	Greetings - This is a challenging question for sure, especially as it is being asked at this stage in South Africa, ie the government run companies and along with load shedding in the case of ESCOM is the 'financial load shedding' also with no 'STOP' sign in sight. Now the load shedding appears to be their answer to their unaddressed decisions around the decline except of course the eternal excuse 'needing additional monies' to top up the 'missing' or not so missing unaccounted for monies. It is always a great idea to have some people at higher levels - or at least listen to those that have come and gone - with some idea of forward planning and not the crisis basis that is in SA; There is no quick fix. Nuclear is out by nature of the Planet and the dangers (except for individuals scheming their financial windfalls from this); Coal is already an issue notwithstanding the pollution; Hydro, how ? when they do not keep the dams they have functioning and water plants not cleaning water properly; Solar is an obvious but how to maintain - install - every household ? It is expensive to run and what about the batteries, if this is the route no doubt it will be directed by cheap purchases from China (with kickbacks as happens already); Wind power, where to place the equipment, the First Nation Khoi San are not allowed to roam the dessert free as their ancestors did, now they want to put wind equipment there, which makes a noise and disturbs flying creatures such as the birds and the bats - if technology and the G-forces were not destroying nature fast enough and blindly so. The answer is first get people with the real intellectual know how to do the necessary planning on each of these options (except nuclear which is out) and then obviously costing and 'how to implement' because the amount of people effecting the current situation is clear to many of us, ie being a failure to plan ahead, a failure to maintain infrastructure that existed, and offering 'free' electricity while increasing the costs to us who happen to pay. The more of us who can invest in 'helping' ourselves the less income they will derive to support the looting - but then where will that leave the 'free' entitled that was promised Talk is cheap, action takes effort. Like the answer to water problems is not everyone have a borehole it is the correct management of the resources that were available, and if someone says a powerstation can cope to service 10 million people and 40 million are tapping into the system for free (though the illegal installers of same do charge the people in the shacks!) then it does not take a brain surgeon to understand it is unsustainable - and eventually those paying end up not affording it either - we are going towards equality - we will all be at the bottom while those that created this situation will be fine dining on the proceeds and loss that they have robbed us of systematically and without shame or remorse. The same people have taken away our phone system (on some feeble excuse) we cant post a letter etc while making everything battery and electricity dependent then standing back and switching the switch that puts us in this case all 'in the dark' both figuratively and in reality are they concerned - you betcha no. Now where is my next cash inflow going to be coming from? i am a pension that has to work but eventually it is impossible to keep up with the downward spiral of their inability/unwillingness/unruleyness -	Jennifer	business owner
2022-07-08 14:40:59	Western Cape	Yes I do	Other	Invite ContourGlobal to take over supply of power to paying customers in South Africa. ContourGlobal is an international, innovative, renewable energy-generating organisation, e.g. they supply a large percentage of power for Rwanda from the methane gas given off by a toxic dam. They turned a geographic threat into an energy asset.	Des	business owner
2022-07-08 14:22:39	Western Cape	Yes I do	Other	Right now, I don't think any method of power production should be off the cards. Nuclear would be the best in the long run, but we are in a state of crisis, and any power produced is a bonus	Lynne	business owner
2022-07-08 14:15:18	Western Cape	Yes I do	Other	We need greedy Gwede to get off his high horse and allow some REAL experts to determine SA's power needs as he is simply not up to task. We need any viable decentralized energy sources not obtained from fossil fuels and we need them quickly. We need all contractors to be independently audited to ensure they are not connected to the ANC or any of SA's construction mafia in any way. We need to stop listening to these clowns who run the country as they only thing they have done well... is run this beautiful land into the ground.	Lee	business owner
2022-07-08 14:08:22	Gauteng	Yes I do	Other	we need to use a combination of power production resources and not be dependant on any one in particular	alan	business owner
2022-07-08 13:53:29	Gauteng	Yes I do	Other	1. The utilisation of coal cannot be discontinued straight away., it has to be phased out. 2. Solar is probably the easiest in most areas, but in some the wind. However, no one must think that both these usages is 100% friendly. It is not as wind mills kill birds, solar panels cover vast areas where other life is thriving, keep that in mind. 3. Allow pvt homes to generate as much as possible own electricity without the pvt home- or business owner to pay any form of taxes, levies etc. By this way they don't strain the network and the government is able to supply the less fortunate. 4. Water generators are also an option.	Uli	business owner
2022-07-08 13:50:02	Eastern Cape	Yes I do	Other	Environmental experts need to manage the other options in order for unforeseen further damage to be prevented. Wind/solar/hydro all have spin-offs to the environment that must be handled and boundaries put in place. It seems obvious to take all the power out of Eskom's hands when they are mismanaging it.	Karen	business owner

2022-07-08 13:44:00	Gauteng		Yes I do	Other	A mix ! Solar (thermic method like in Spain) with mirrors in the north west province desert. And allow for solar locally.	Thorgal	business owner
2022-07-08 13:35:41	Free State		Yes I do	Other	All types of power generation should be allowed IF the company can do it safely for them selves and the environment.	DJ	business owner
2022-07-08 13:32:07	Western Cape		Yes I do	Other	A combination of hydro, solar, wind, gas, and small nuclear stations across all of SA, run by IPP's.	Jaco	business owner
2022-07-08 12:59:19	Gauteng		Yes I do	Other	Anything other than the ANC and their municipalities that are as corrupt as them! Municipalities have NOT been able to deliver for very many years and I feel this is mostly due to corruption and thieving of Tax Payers money. Let the ones who are honest and able come in and build SA a new Electricity grid separate from the corrupt!	Terence	business owner
2022-07-08 12:56:03	KwaZulu- Natal		Yes I do	Other	Allow private companies and individuals to produce electricity - clearly Eskom is not able to meets the needs of the country. There is way too much corruption involved and Eskom having the monopoly of electricity supply is ludicrous if they are in so much debt. They keep increasing the price of electricity but can't supply. This backs consumers into a corner as we don't have an alternative supply without it costing a great deal (which a lot of people cannot afford) Power cuts during load shedding disrupts business and then transformers and other equipment that hasn't been maintained over the years end up blowing and we end up having more power outages. It's just not acceptable. If there are other service providers out there, it will give Eskom a chance to revamp and repair and also give them opposition to keep their service in better condition.	Michele	business owner
2022-07-08 12:53:14	Gauteng		Yes I do	Other	1. The ANC CAN NO LONGER be trusted, to do something like solve the huge problems with SA Electricity supply.Only their monthly pay-cheque, is on time. Businesses and Citizens have been kept waiting, for far too long. 2. The facts speak for themselves- over the period PRECEDING 2007 -TO THE PRESENT. 3. The Anc were advised in the mid 1990's , warned and copius Reports passed to Anc leadership regarding electricity needs- but they, elected to procrastinate. 4. Businesses , and Citizens and Municipality's- should NOT have to "wait to the point of destruction" to fix the Electricity System. 5. Unlike Anc Governance,-- Businesses know they have to do the job, properly and cost effectively. Hence let them do so, without getting the highest Courts in the land ,to have to tell the ANC to step back and let the job be done by competent people. Those, who are NOT, related to current President or ex- Presidents. 4.	ADRIAN	business owner
2022-07-08 12:52:31	Gauteng		Yes I do	Other	In the first place the complete dominanace of trade unions must be addressed urgently and immediately. The capitulation to workers when the ANC government is ruled by them and demands are on a plate when they are among the most overpaid workforce who in most cases cannot do their jobs or do bugger all is absolute lunacy. Sabotage and intimidation is rewarded with 7% when charges of treason should have been laid and prosecution applied. Who suffers most? Pensioners who cannot draw their money at wait for hours at outlets because of no power. It is absolutely disgusting!! Restrictions should be lifted, private enterprises given the mandate to produce renewable energy as is being done in many places. Shut the bankrupt Eskom down, retrench the high living workers, troublemakers and law breakers, generate work for those who need it and will do it properly. Look at a mix of solar, wind and water generated power where this is feasible.	Jaco	business owner
2022-07-08 12:49:23	Western Cape		Yes I do	Other	With a combination of different methods of power generation using independent power producers (private generation AND management of power resources), we can ensure employment of skilled, competent people.	Deborah	business owner
2022-07-08 12:41:07	Eastern Cape		Yes I do	Other	A combination of different methods - but definitely using Independent power producers - our economy cannot survive this - the mental health of people is being compromised in a massive way - first lockdown and fear and stress and now this is adding to stress which of course affects our immune systems and both our physical and mental health!!!!	Pam	business owner

2022-07-08 12:36:31	Eastern Cape		Yes I do	Other	<p>There could be more than one mode of generating electricity. Probably most importantly, is to get Eskom out of the bungling, autocratic, thieving, horribly incapable hands of the government. PRIVATIZE!!!</p> <p>The tax payer is paying billions upon billions for this bloody useless, incompetent, autocratic government's bugged up after bugged up & thievery. Interesting to note, Eskom's credit rating was better than the old government's - now, if possible, it is worse. I don't know how De Ruiters has stuck it out?????</p> <p>The quickest solution, maybe a cumbersome one, is fire everyone that's not essential staff, & then the people who want their jobs back can apply, The dead wood would not be re-employed. Everything this government puts their hand to seems to turn horribly brown!!!</p> <p>The problem again is, as I see it, a quick fix can't be done - there is no QUICK fix!! How do you quick fix a huge organization like Eskom which slid into the mire over many years??</p> <p>Dream on - just as this bloody useless government lives in a fools paradise.</p>	Paul	business owner
2022-07-08 12:24:31	Gauteng		Yes I do	Other	<p>It's a combination of nuclear, renewables and coal. A developing country cannot rely solely on either.</p> <p>Also the after life wastage from solar panels, wind turbines and batteries needs to be considered seriously. Nuclear waste is minimal to contain, as is ash from coal..</p> <p>Government should subsidise households to switch by relieving or writing off back taxes so they can switch to gas or solar solutions. Installations can be verified for tax relief. A Energy subsidy. Households will allocate the subsidy more efficiently than Eskom.</p>	Uven	business owner
2022-07-08 12:19:55	Western Cape		Yes I do	Other	<p>We need a mixed powered future. See https://www.linkedin.com/pulse/staffing-roof-top-solar-revolution-africa-lipschitz-bsc-hons-mba/</p>	David	business owner
2022-07-08 12:18:31	Western Cape		Yes I do	Other	<p>I support ALL these forms of power.</p> <p>I am a director of a company that has stunning advanced energy, energy management, energy distribution and energy storage, including Thorium modular nuclear power, that is a 1/10th of the price of a nuclear plant. WE KNOW WE HAVE SOLUTIONS FOR SOUTH AFRICA, BUT HAVE BEEN THROTTLED WITH ANY ADVANCEMENT. This move is 100% imperative, and therefore I talk not from emotion, but from fact, and solution based.</p>	Lorelei	business owner
2022-07-08 12:00:50	Western Cape		Yes I do	Other	<p>Given the urgency, the fastest environment friendly system must surely be the priority?</p>	Peter	business owner
2022-07-08 11:56:13	Gauteng		Yes I do	Other	<p>Focus on various power sources that can be quickly installed + BATTERY TYPE Backup.</p> <p>Hence renewables incl solar wind could be installed</p> <p>Issue is to quickly install from long term credible suppliers- limited (BEE) middlemen that add limited value AT THE RIGHT MARKET PRICE to allow Eskom to get its pricing and supply in line .</p>	JUAN	business owner
2022-07-08 11:52:48	Western Cape		Yes I do	Other	<p>We need a combination of power sources, but mostly we need cadres/cadavers out and competent people in.</p> <p>And the sooner the better, before the anc's zombies completely destroy the infrastructure...</p> <p>Leaving the successors with only ashes to work with.</p>	Andrew	business owner
2022-07-08 11:52:46	Western Cape		Yes I do	Other	<p>We need a combination of power sources, but mostly we need cadres/cadavers out and competent people in.</p> <p>And the sooner the better, before the anc's zombies completely destroy the infrastructure...</p> <p>Leaving the successors with only ashes to work with.</p>	Andrew	business owner
2022-07-08 11:34:57	Western Cape		Yes I do	Other	<p>We need a free market hybrid electrical power supply. No single source as it can always result in the current situation being perpetuated. Each province has capacity to generate via natural ways and should focus mostly on that as it is the least dependent on human input (eg wind in PE & CT, solar country wide, hydro where rivers,dams & oceans permit</p>	Andrea	business owner
2022-07-08 11:34:05	Mpumal anga		Yes I do	Other	<p>The currant plan to provide power to the country is failing. Get rid of the red tape and allow people to procure power from any means available to them.</p> <p>Less pressure on the grid is better for everyone including the economy.</p> <p>Government wants too much regulating power and is jeopardicing growth</p>	Maritsa	business owner
2022-07-08 11:26:48	Gauteng		Yes I do	Other	<p>A mixture of renewables - solar and wind in particular - would make the most sense in terms of available resources. Green hydrogen should be added next.</p>	Elaine	business owner
2022-07-08 11:26:19	Western Cape		Yes I do	Other	<p>Whatever suits the area/situation best. As long as there is red tape, we will be held at hostage at the incompetence of our ruling party. Privatize the supply of electricity and then let the market dictate what recourse will be most efficient.</p> <p>Remove legislation that prevent participation in supply of electricity. We will need either nuclear or coal fired power stations as none of the renewable supply a constant electricity supply 24/7.</p> <p>The technology are there so that resources can be used at small or large scale to suit the situation, at municipal/ district / province or state level.</p>	Eben	business owner
2022-07-08 11:21:11	Gauteng		Yes I do	Other	<p>Government & Parastatal agencies have failed miserably in a reprobate manner to carry out their mandate as per our world class constitution driving the country, its citizens and economy to complete disaster and failure of massive unprecedented proportions, even when viewed by any standards. Thus independant power producers should be given immediate permission to supply power on whatever scale without prejudice, penalty or taxing of any nature. If able they should be able to add this to the grid of the country to help recover what little remains of our country in this sphere. Red tape and "clap trap regulations" should be waived. Action of a positive nature are urgently required!!!</p>	LESLIE	business owner

2022-07-08 11:18:46	Western Cape		Yes I do	Other	In this time of crisis any form of generating energy should be explored. That there is still red tape holding up IPP's is ridiculous. We need an uninterrupted power supply or this country is doomed	Bjorn	business owner
2022-07-08 11:15:12	Western Cape		Yes I do	Other	Small scale Hydropower In Pipe Hydropower Run of river hydropower	Mike	business owner
2022-07-08 10:59:25	Western Cape		Yes I do	Other	All renewable energy sources would suit SA's immediate needs. Hydro, wind, solar. Put the people with the experience and know how in the driving seat.	Julian Beth	business owner
2022-07-08 10:56:05	Eastern Cape		Yes I do	Other	I've read through the Meridian note thoroughly and support the recommendations made. I believe that government should act swiftly to adopt these recommendations and that the red tape constraining the contribution of Independent Power Producers needs to be eliminated as soon as possible. With regard to what method of electricity production would best suit the country's immediate needs, I believe a hybrid system is the only option we have. Because of our immediate capacity needs, we have to continue using existing coal-fired and nuclear facilities, but I believe there should be a total moratorium on the construction of any more of these facilities and that viable plans should be put in place to phase them out. Allowing for independent power producers to supply power to multiple users would immediately alleviate some of the bottlenecks in the system, as would support for additional IPPs to feed power into the grid. Other than that, we absolutely HAVE to focus on decentralised and renewable sources of energy from now on. THERE IS NO OTHER WAY.	Lee	business owner
2022-07-08 10:55:46	Gauteng		Yes I do	Other	Method of production cannot be identified as we should use ALL available methods. Anyway, the function of government is to ensure our safety and the safety of our possessions, and co-ordinating the natural development of infrastructure. EVERYTHING else can be done by free enterprise better, more economical and just plain superior than what government is doing it. That includes energy supply of all sorts.	André	business owner
2022-07-08 10:55:37	Western Cape		Yes I do	Other	Combination of LNG, Solar, Wind and solid backbone infrastructures for distribution.	Danie	business owner
2022-07-08 10:50:27	Gauteng		Yes I do	Other	I would suggest a combination of Hydro, Solar and Wind, as they are all renewable sources and will not pollute the environment, like other sources like gas and coal, which are not sustainable.	Candice	business owner
2022-07-08 10:50:09	Gauteng		Yes I do	Other	I think any power solution is viable at this point as we need to get stable power and a stable economy.	Grant	business owner
2022-07-08 10:48:58	Gauteng		Yes I do	Other	I will support any form of power generation that makes economic and ecological sense in the area where it is to be applied. South Africa certainly requires a diverse policy of power generation. The important aspect of the issue is that power generation is competitive and in private hands, as anything the government is or gets involved in, is doomed to failure.	Karl-Heinz	business owner
2022-07-08 10:48:37	North West		Yes I do	Other	All types of independent power should be allowed and actively encouraged. Pricing must be fair - not this rubbish of we pay you 40 % per unit to supply into the grid and charge 100 % for what goes out of the grid.	Scott	business owner
2022-07-08 10:40:25	KwaZulu- Natal		Yes I do	Other	I think that all possible resources should be utilised. The economy is in tatters and only getting worse with all the load shedding. Let's cut the red tape and use whatever resources we have. At the moment the government is sitting back and watching it crumble. Let people, companies etc feed back into the grid if they have excess. We need to do what is right for the country and not what is right for a few individuals. Everyone is suffering!!!!	Christina	business owner
2022-07-08 10:31:50	Western Cape		Yes I do	Other	Diversify power, let the people who know what they are doing help and show the way. Get the power on ASAP for our sanity and the economy, any which way you can and ensure that if nuclear is used it is in the hand of a competent private sector. Just get the power back now, this is doing immeasurable damage to our beloved country.	Helen	business owner
2022-07-08 10:28:07	Western Cape		Yes I do	Other	Wave energy is constant and powerful, let's use it.	Candice	business owner
2022-07-08 10:27:01	Gauteng		Yes I do	Other	Right at this very moment there are hundreds, if not thousands of companies in this country who could feed their excess power into the grid. This is not a time for anyone to be sticking their grubby hands into the process. This is of national benefit. These independent producers should be brought online immediately. I am the owner of two small businesses and I am suffering because of the load shedding and I believe that the Government is to blame. I am suffering losses and soon I will be investigating instituting a Class Action Lawsuit against the Government for these losses.	Clive	business owner
2022-07-08 10:19:21	KwaZulu- Natal		Yes I do	Other	All forms of independent power generation need to be encouraged. ESCOMS monopoly is clearly not a success. Independent suppliers with specific areas of reticulation and maintenance are needed.	Andre	business owner
2022-07-08 10:16:17	Gauteng		Yes I do	Other	You need to do hybrid solutions on the power Combination of renewable energy combined with storage and old energy	Alwyn	business owner

2022-07-08 10:13:12	Gauteng		Yes I do	Other	The ANC has created the Eskom disaster and the loadshedding. The obvious answer is to immediately allow anyone who wants to produce any amount of power to do so. This power can either be supplied to the grid or used for own purposes (thereby not taking any power from the grid).	Willem	business owner
2022-07-08 10:11:10	Gauteng		Yes I do	Other	A couple of years ago I learnt about using waste products, namely manure as fuel for power stations. It is a freely available material that can be retrieved from cattle farms if their waste is collected, and equine stud farms and other larger equestrian centres who regularly send their stable waste products to either compost farms or some other dumping site. Manure and other household waste is the perfect source or renewable green energy!	Amy	business owner
2022-07-08 10:10:47	Western Cape		Yes I do	Other	All renewables (wind, solar, gas, hydro and thermal are suited, but for a full-encompassing HYBRID model all municipalities should include waste-to-energy or energy-from-waste as this is classed as baseload.	Colin	business owner
2022-07-08 10:07:56	KwaZulu-Natal		Yes I do	Other	Decentralization and privatization of the electricity supply will allow competition, better prices., better service and a drive to renewables.	Shirley	business owner
2022-07-08 09:59:58	KwaZulu-Natal		Yes I do	Other	I could go into all the reasons why Eskom needs to be challenged but essentially, them not having the monopoly would hopefully start weeding out the garbage. I believe South Africa has the right natural resources for wind, solar and hydro power to be safely considered as an alternative.	Cheyne	business owner
2022-07-08 09:58:02	Gauteng		Yes I do	Other	Our coal power stations are a good quality but corruption has infiltrated the supply chain. This leads to higher cost and poor quality coal being used. We also have sabotage and incompetent appointed positions forcing out the people who actually know what they are doing. This needs to be addressed immediately. Restoring the existing power stations will be quicker and cheaper rather than installing new power stations. It is imperative to allow private entities to contribute regarding the technologies they can bring to the table e.g. with thermal solar being a good option. It should also be made easier for ordinary citizens to install solar power on their premises, alleviating the load on the grid. However, this could be too expensive for most citizens.	Ailsa	business owner
2022-07-08 09:56:28	Gauteng		Yes I do	Other	You have no option, but i believe all the methods should be used. It is important not to rely on one source.	Sheelagh	business owner
2022-07-08 09:55:39	Gauteng		Yes I do	Other	You have no option, but i believe all the methods should be used. It is important not to rely on one source.	Sheelagh	business owner
2022-07-08 09:52:03	Western Cape		Yes I do	Other	I support 'scrapping policy red tape for Independent Power Producers' Regarding the method of electricity production... I believe we should use what we have in abundance: Sun, and coal South Africa is a 3rd world country with a failing infrastructure. To me it makes the most sense to use every option available to generate electricity at the most cost effective manner possible. By allowing independent power generation the whole 'go green movement' will develop without need for government intervention.	Phillip	business owner
2022-07-08 09:51:56	Western Cape		Yes I do	Other	I support 'scrapping policy red tape for Independent Power Producers' Regarding the method of electricity production... I believe we should use what we have in abundance: Sun, and coal South Africa is a 3rd world country with a failing infrastructure. To me it makes the most sense to use every option available to generate electricity at the most cost effective manner possible. By allowing independent power generation the whole 'go green movement' will develop without need for government intervention.	Phillip	business owner
2022-07-08 09:51:52	Western Cape		Yes I do	Other	The reasons are abundantly clear. The government cannot maintain critical structures like ESKOM.	Pierre	business owner
2022-07-08 09:51:51	Western Cape		Yes I do	Other	I support 'scrapping policy red tape for Independent Power Producers' Regarding the method of electricity production... I believe we should use what we have in abundance: Sun, and coal South Africa is a 3rd world country with a failing infrastructure. To me it makes the most sense to use every option available to generate electricity at the most cost effective manner possible. By allowing independent power generation the whole 'go green movement' will develop without need for government intervention.	Phillip	business owner
2022-07-08 09:50:05	Free State		Yes I do	Other	Stop cadre deployment and Escom cash-cow deployment and bring back the workforce to around 12 000 people, which we know are enough to run the company smoothly. Stop paying such exorbitant salaries and benefits - there is no competition, thus no scarcity of workers. Stop trying to make billions in profit - Escom needs to make enough profit for maintenance and growth, no more. Allow police investigations, forensic audits at all power stations (guarded if necessary), to find the culprits that steal the company blind and those responsible for breakages and sabotage. Allow immediate dismissal of people guilty of subordination, refusal to work and not having the necessary skill to do the appointed work. This will provide the company with enough profits to do overall maintenance and necessary replacement, as well as future growth on a mixed bag of production methods, including coal.	Cornelius	business owner
2022-07-08 09:49:55	KwaZulu-Natal		Yes I do	Other	The government has proven that since late 2000's it has a total inability to keep the lights on. It should be completely privatized and removed from the governments hands, as even if independent regulators were allowed to feed into the grid, they probably wouldn't maintain the grid and that too would fall over.	Brett	business owner

2022-07-08 09:49:55	KwaZulu-Natal		Yes I do	Other	The government has proven that since late 2000's it has a total inability to keep the lights on. It should be completely privatized and removed from the governments hands, as even if independent regulators were allowed to feed into the grid, they probably wouldn't maintain the grid and that too would fall over.	Brett	business owner
2022-07-08 09:49:54	KwaZulu-Natal		Yes I do	Other	The government has proven that since late 2000's it has a total inability to keep the lights on. It should be completely privatized and removed from the governments hands, as even if independent regulators were allowed to feed into the grid, they probably wouldn't maintain the grid and that too would fall over.	Brett	business owner
2022-07-08 09:49:53	KwaZulu-Natal		Yes I do	Other	The government has proven that since late 2000's it has a total inability to keep the lights on. It should be completely privatized and removed from the governments hands, as even if independent regulators were allowed to feed into the grid, they probably wouldn't maintain the grid and that too would fall over.	Brett	business owner
2022-07-08 09:49:37	KwaZulu-Natal		Yes I do	Other	The government has proven that since late 2000's it has a total inability to keep the lights on. It should be completely privatized and removed from the governments hands, as even if independent regulators were allowed to feed into the grid, they probably wouldn't maintain the grid and that too would fall over.	Brett	business owner
2022-07-08 09:49:26	KwaZulu-Natal		Yes I do	Other	The government has proven that since late 2000's it has a total inability to keep the lights on. It should be completely privatized and removed from the governments hands, as even if independent regulators were allowed to feed into the grid, they probably wouldn't maintain the grid and that too would fall over.	Brett	business owner
2022-07-08 09:49:13	Free State		Yes I do	Other	Stop cadre deployment and Eskom cash-cow deployment and bring back the workforce to around 12 000 people, which we know are enough to run the company smoothly. Stop paying such exorbitant salaries and benefits - there is no competition, thus no scarcity of workers. Stop trying to make billions in profit - Eskom needs to make enough profit for maintenance and growth, no more. Allow police investigations, forensic audits at all power stations (guarded if necessary), to find the culprits that steal the company blind and those responsible for breakages and sabotage. Allow immediate dismissal of people guilty of subordination, refusal to work and not having the necessary skill to do the appointed work. This will provide the company with enough profits to do overall maintenance and necessary replacement, as well as future growth on a mixed bag of production methods, including coal.	Cornelius	business owner
2022-07-08 09:31:54	Gauteng		Yes I do	Other	Right now we need power from every single viable source. Plans should be fast tracked to introduce long-term sustainable power supply. Privatise power generation to avoid irregular contract allocation and spend. Medupi and Kusile as examples of what NOT to do. I think it's unlikely that only one form of power generation will help South Africa at this stage. A combination of green, coal, and nuclear will likely be the only long-term solution. I would recommend to remove the local content requirement on green power generation equipment to ramp up that sector as soon as possible. Offer rebates to households to install solar to supplement power supply. The main message here is to MOVE. No more analysis paralysis and words. now is the time for ACTION!	Catherine	business owner
2022-07-08 09:27:04	KwaZulu-Natal		Yes I do	Other	We have had decades of dithering and Government interference in power generation (it started with Mbeki's disastrous public/private partnership nonsense). This has resulted in the expansion of power generation to meet growing demand falling behind and the resultant destructive load shedding. Power generation must be put in the hands of the private sector and driven by supply and demand. If Government wants to subsidise the poor, that is a political issue and subsidy funding must be sourced and provided to independent producers. There is always a need for some form of basic control and I would support simple registration and compliance to specifications to protect the integrity of the Grid. This long-winded phasing is bureaucracy for the sake of bureaucracy and takes too long. Alternative energy sources such as solar and wind-driven can provide significant short-term supply but ultimately, there needs to be a balanced mix of energy generation options that are flexible enough to meet growing demand. There will always be a need for some degree of nuclear power but this must be with the proviso that adequate safety controls and standards are in place and that proper pro-active measures are in place to safely dispose of/store nuclear waste. Power ships are a short-term solution and should not be contracted for, for more than 5 years at the most. 20-year contracts are a waste of money and smack of profiteering and corruption. There are never 20 year emergencies.	Arend	business owner

2022-07-08 09:26:41	KwaZulu- Natal		Yes I do	Other	We have had decades of dithering and Government interference in power generation (it started with Mbeki's disastrous public/private partnership nonsense). This has resulted in the expansion of power generation to meet growing demand falling behind and the resultant destructive load shedding. Power generation must be put in the hands of the private sector and driven by supply and demand. If Government wants to subsidise the poor, that is a political issue and subsidy funding must be sourced and provided to independent producers. There is always a need for some form of basic control and I would support simple registration and compliance to specifications to protect the integrity of the Grid. Power ships are a short-term solution and should not be contracted for, for more than 5 years at the most. 20-year contracts are a waste of money and smack of profiteering and corruption. There are never 20 year emergencies.	Arend	business owner
2022-07-08 09:20:24	Western Cape		Yes I do	Other	Not nuclear as there have been more than 11 nuclear explosions worldwide and we know SA is not in the business of maintaining anything. This is sunny South Africa, we have plenty of sun for solar generation as well as wind for wind farms. We have existing solar farms and wind turbines that are not being used? Independent power producers should definitely be allowed to generate electricity.... actually in Bloemfontein all services should be taken away from govt and privatized as not as much as a street lamp is replaced by govt. The country is abuzz about the deterioration of Bfn. Where are all our tax money, rates and taxes going? We keep paying plus we have to pay private institutions in any ways to remove rubbish etc. ENOUGH! We are sick and tired of no water, no electricity, potholes, mountains of rubbish. Bloemfontein is no more the city of roses, it looks like crap....thanks to Mangaung mun.	Deon	business owner
2022-07-08 08:52:10	Western Cape		Yes I do	Other	At this point a one solution option will not be the answer. The solution would rather consist of private participation in a combination of methods. And in this effort steer away from coal, gas and diesel options in an effort to look at environmentally friendly options.	Gert	business owner
2022-07-08 08:50:56	Western Cape		Yes I do	Other	Independent power producers should be brought in long ago. The suppliers should not be limited in the method they use to supply electricity.	Vernon	business owner
2022-07-08 08:47:16	Western Cape		Yes I do	Other	I think it is important that we make the process of getting private electricity producers onto the grid as soon as possible with the least amount of red tape. We also cannot just focus on one method of generation, we need a combination of different methods	Andre	business owner
2022-07-08 08:30:47	KwaZulu- Natal		Yes I do	Other	Any and all forms of generation should be used to address the crises. Start by acknowledging that there is a crises. Remove all regulations and allow people to help themselves. Days of Eskom monopoly should be over. Electricity situation is getting worse and worse. And now illegal strikers are being rewarded for their strike also, giving money that isn't there.	Antoinette	business owner
2022-07-08 08:30:09	Gauteng		Yes I do	Other	The SA government needs private companies who are able to look at ANY alternate source of renewable energy dependant on each specific area and their needs. There is no blanket quick fix for the catastrophic state of power supply in this once thriving economy. It is incomprehensible that a government who claims to be pro the people can continue to line their own pockets and lay the blame at the feet of the past government nearly 30 YEARS down the line while their own people suffer. You, the ANC, have made SA the laughing stock of the free world and a puppet to communist countries for self-gain. Enough destruction of our resources and people, DEMOCRACY and the PRIVATE SECTOR without BEE limitations needs to be able to act swiftly and decisively if we are to begin to save this once prosperous country.	Ursula	business owner
2022-07-08 08:29:48	Gauteng		Yes I do	Other	The SA government needs private companies who are able to look at ANY alternate source of renewable energy dependant on each specific area and their needs. There is no blanket quick fix for the catastrophic state of power supply in this once thriving economy. It is incomprehensible that a government who claims to be pro the people can continue to line their own pockets and lay the blame at the feet of the past government nearly 30 YEARS down the line while their own people suffer. You, the ANC, have made SA the laughing stock of the free world and a puppet to communist countries for self-gain. Enough destruction of our resources and people, DEMOCRACY and the PRIVATE SECTOR without BEE limitations needs to be able to act swiftly and decisively if we are to begin to save this once prosperous country.	Ursula	business owner

2022-07-08 08:21:16	Gauteng	Yes I do	Other	<p>All and every form of power production should be made available immediately from every single sector and producer.</p> <p>All restrictions, caps, red tape and race based procurement policy should be abolished ASAP.</p> <p>As in now!</p> <p>Government should also offer tax rebates to the consumer if installing solar, etc, and should allow them to also feed back to the grid.</p> <p>This must end NOW!</p>	Bruce	business owner
2022-07-08 08:19:45	KwaZulu-Natal	Yes I do	Other	<p>I would encourage the government to consider private enterprises that wish to produce electricity for the country. I would encourage renewable power generating options and ensure they are appropriate for each respective area. We already have the competitions act in place so this will ensure the price of electricity remains fair for all. Eskom, and our country, are in desperate need of some stability. By allowing private enterprises to produce power for the grid, we can allow Eskom to regroup and hopefully streamline their resources. Our country needs power for business and much-needed jobs. We can't afford the losses incurred by the lack of productivity.</p>	Jacqui	business owner
2022-07-08 08:18:00	Western Cape	Yes I do	Other	<p>The minister should immediately grant the permits to the shipping company to relieve the stress on the system. in tandem with that he should allow IPP's to develop and connect wind and solar farms that have been ready for decades to supply energy to the grid.</p>	Kobus	business owner
2022-07-08 08:10:19	Western Cape	Yes I do	Other	<p>Different methods of electricity production should be considered on the grounds of being environmentally safe, economically sustainable and with the longest lifespans.</p> <p>But this proposed solution still leaves all the power (pun intended) with Eskom and the Government. The BEST solution overall for South Africans would be to privatise Eskom and so break their monopoly on rates as well as their death-grip on paying consumers.</p>	Mariska	business owner
2022-07-08 08:05:47	Gauteng	Yes I do	Other	<p>A combination of renewables would be best option for sustainability. Also the ability for households and business to feed back excess into the grid during periods of low demand should be explored, batteries technology is improving all the time to assist storing this excess.</p>	Lesley	business owner
2022-07-08 07:34:56	Gauteng	Yes I do	Other	<p>Solar farms, Mirror farms, Wind turbines and Nuclear already exist in SA, why all the red tape, there is enough electricity in this country to not have any loadshedding!!! I suppose there is a bigger picture behind all this, greed and selfishness!! Follow the money to see who owns what.</p>	Johann	business owner
2022-07-08 07:34:29	KwaZulu-Natal	Yes I do	Other	<p>We should be looking at mix of all renewable energies, I personally don't think this would be a one shoe fits all. I believe nuclear energy is definitely not the way to go.</p>	Tyrone	business owner
2022-07-08 07:33:32	KwaZulu-Natal	Yes I do	Other	<p>We should be looking at mix of all renewable energies, I personally don't think this would be a one shoe fits all. I believe nuclear energy is definitely not the way to go.</p>	Tyrone	business owner
2022-07-08 07:33:25	KwaZulu-Natal	Yes I do	Other	<p>We should be looking at mix of all renewable energies, I personally don't think this would be a one shoe fits all. I believe nuclear energy is definitely not the way to go.</p>	Tyrone	business owner
2022-07-08 07:33:22	KwaZulu-Natal	Yes I do	Other	<p>We should be looking at mix of all renewable energies, I personally don't think this would be a one shoe fits all. I believe nuclear energy is definitely not the way to go.</p>	Tyrone	business owner
2022-07-08 07:33:02	KwaZulu-Natal	Yes I do	Other	<p>We should be looking at mix of all renewable energies, I personally don't think this would be a one shoe fits all. I believe nuclear energy is definitely not the way to go.</p>	Tyrone	business owner
2022-07-08 07:32:51	KwaZulu-Natal	Yes I do	Other	<p>We should be looking at mix of all renewable energies, I personally don't think this would be a one shoe fits all. I believe nuclear energy is definitely not the way to go.</p>	Tyrone	business owner

				<p>I recently listened to a video recording by Nelson Mandela recorded pre 1994 where he accused the NP government of corruption and wasting taxpayers money and where he promised that the ANC will root out all corruption. Well today we see the opposite of the promise he made. I always use our rights as vested in our Constitution when I comment on certain problems, our rights as written in Chapter 2, Clause 15.1, Clause 16 and Clause 18. It is senseless commenting on problems in South Africa treating the symptoms and not addressing the root cause.</p> <p>As background I want to state that Nelson Mandela declared himself as a Christian, as our current President did with his inauguration, but the fruit of the tree is the problem and I want to quote the following from the Word of God:</p> <p>Matthew 7 King James Version 1 Judge not, that ye be not judged.</p> <p>2 For with what judgment ye judge, ye shall be judged: and with what measure ye mete, it shall be measured to you again.</p> <p>3 And why beholdest thou the mote that is in thy brother's eye, but considerest not the beam that is in thine own eye?</p> <p>4 Or how wilt thou say to thy brother, Let me pull out the mote out of thine eye; and, behold, a beam is in thine own eye?</p> <p>5 Thou hypocrite, first cast out the beam out of thine own eye; and then shalt thou see clearly to cast out the mote out of thy brother's eye.</p> <p>12 Therefore all things whatsoever ye would that men should do to you, do ye even so to them: for this is the law and the prophets.</p> <p>13 Enter ye in at the strait gate: for wide is the gate, and broad is the way, that leadeth to destruction, and many there be which go in thereat:</p> <p>14 Because strait is the gate, and narrow is the way, which leadeth unto life, and few there be that find it.</p> <p>15 Beware of false prophets, which come to you in sheep's clothing, but inwardly they are ravening wolves.</p> <p>16 Ye shall know them by their fruits. Do men gather grapes of thorns, or figs of thistles?</p> <p>17 Even so every good tree bringeth forth good fruit; but a corrupt tree bringeth forth evil fruit.</p> <p>18 A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit.</p> <p>19 Every tree that bringeth not forth good fruit is hewn down, and cast into the fire.</p> <p>20 Wherefore by their fruits ye shall know them.</p> <p>21 Not every one that saith unto me, Lord, Lord, shall enter into the kingdom of heaven; but he that doeth the will of my Father which is in heaven.</p> <p>22 Many will say to me in that day, Lord, Lord, have we not prophesied in thy name? and in thy name have cast out devils? and in thy name done many wonderful works?</p> <p>23 And then will I profess unto them, I never knew you: depart from me, ye that work iniquity.</p> <p>What we see today is exactly what the Word of God teaches us will happen if you do not obey the commandments of God the Almighty, not the gods of the books which are religion. The current ANC regime can be compared to a rugby team exercising for a match passing the ball from one player to another. The match is about to happen soon and the rules will determined by the people, not the government as per our Constitution. Nelson Mandela was the first player who scrapped the ten commandments and the new commandment from the table of the current temple and I want to write God's instruction for the Minister to see before commenting on the problems we are facing as tax payers and citizens in South Africa and I quote:</p> <p>Exodus 20 King James Version 1 And God spake all these words, saying,</p> <p>2 I am the Lord thy God, which have brought thee out of the land of Egypt, out of the house of bondage.</p>

2022-07-08 06:59:35	Western Cape		Yes I do	Other	We should not depend on only one supply, we should have a few options, but coal needs to go!	Anthea	business owner
2022-07-08 06:55:55	Gauteng		Yes I do	Other	Eskom has the monopoly. By permitting other independant forms of power they will no longer be able to ruin the economy of the whole country. It is imperative that they lose their stranglehold on South Africa. They have proven they are totally incompetent.	Pat	business owner
2022-07-08 06:53:09	Mpumal anga		Yes I do	Other	There is no silver bullet for a quick fix. It's tempting to say Solar is the answer, but whether solar can provide sufficient energy I don't know. As scary as nuclear power is in terms of safety, I believe that nuclear power could be a viable part of the solution, but it's not a quick fix and without stringent safety controls and protocols strictly maintained, it could become another can of worms. Renewable energy is the safest and possibly the fastest to implement but whether it can fully supply the country's needs is in question.	Tracy	business owner
2022-07-08 06:48:49	Western Cape		Yes I do	Other	South Africa needs a combination of renewables and conventional power. Gas and renewables short term and nuclear longer term.	Don	business owner
2022-07-08 06:47:35	Gauteng		Yes I do	Other	I think we need a mix of energy sources..since we cant simply scrap coal and convert to another source...it will have to be a gradual transition This corrupt government must stop their constant regulation of SOE?'s....since their only motivation is to bleed them dry to self enrich...and the people suffer as the 'intended result'.. Yes...I think the ANC deliberately intends to keep the majority of voters subjugated uneducated and poor...to ensure the party's longevity in govt. IPP is the future for SA's energy needs The first step however is to deregulate not only Eskom's monopoly..but also the govt stranglehold on all SOE's As well as the govt's 'need for power'...pun intended. And fire all the incompetent ministers togrther with their padded administration....they are all clueless. They must be fired immediately and replaced with competent knowledgable honest citizens.. Unfortunately we have to wait for national electiions to fire the entire ANC	Zuleigha	business owner
2022-07-08 06:41:11	Gauteng		Yes I do	Other		Neels	business owner
2022-07-08 06:40:39	Western Cape		Yes I do	Other	Eskom clearly cannot supply enough electricity. There is an additional need for green energy. We need green light to be able to independently work on and supply greener solutions.	Marion	business owner
2022-07-08 06:35:39	Eastern Cape		Yes I do	Other	I have put 'other' in the block above, as you have no 'all' in the category list. we should have had independent suppliers YEARS ago, then we wouldn't be in this situation now. ESKOM should not have the monopoly & should not be in a position to approve/sign off on independent supplier deals. They have been deliberately holding off on independent supplier agreements, as a means of retaining their monopoly, to the detriment of us all. Allow all independent energy suppliers NOW!	Bramley	business owner
2022-07-08 06:34:21	Western Cape		Yes I do	Other	We need to allow private partnerships to supply energy to ensure a mix of private and government supply. Recent unprecedented load shedding is crippling the economy. Allow the private investors to generate and pay them appropriately. This can be a combination of wind, solar, hydro, biomass generated energy and coal. We cannot get away from coal!	James	business owner
2022-07-08 06:19:34	KwaZulu- Natal		Yes I do	Other	As a business owner in the steel fabrication industry, any means of supplying uninterrupted power must be pursued. Should loadshedding be implemented in Ethekeweni as in other parts of the country, we will ihave no alternative but to implement short time and layoffs. Our power requirements cannot be met with generators. The current damage to our economy and labour is unfathomable. Current policies do nothing to assist in growing our economy and enabling job creation which is what SA needs if we are going to avoid a revolution. The country is already on its knees and further job losses will only compound all our existing social ills of poverty and inequality.	Lisa	business owner
2022-07-08 06:16:11	Gauteng		Yes I do	Other	south africa needs a mix of energy production. With coal and renewables to form the bases in the medium term with longer term policies geared more towards Green sources. However we need to use whatever is most readily available in the medium term to urgently address the energy crisis as it is killing our country and economy.	Richard	business owner
2022-07-08 06:12:38	Western Cape		Yes I do	Other	I support any form that will allow an immediate solution	Konrad	business owner
2022-07-08 06:10:58	KwaZulu- Natal		Yes I do	Other	I believe it should be a balance between solar, wind and nuclear. Coal can be phased out	Martin	business owner
2022-07-08 06:06:56	KwaZulu- Natal		Yes I do	Other	A combination, anything that gets us out of the immediate crisis.	Michèle	business owner
2022-07-08 05:48:24	Western Cape		Yes I do	Other	I am not well enough informed to make recommendations. BUT urgent change is needed or we will implode SA's economy to a point of no return! Whatever is needed to save our country short term and then long term needs to be the priority , whether it is solar or nuclear does not matter. It does seem that coal is going the way of the dinosaurs, EXTINCTION.	Petrus	business owner
2022-07-08 05:08:30	Western Cape		Yes I do	Other	Unfortunately we have bunch of stupid morons in government that do not seem to get it that our power grid is on the brink of collapse due to their corruption. Businesses are folding causing massive job losses and strife. We will eventually have violence and a failed state. Power generation should be totally legal for everyone	Martin	business owner
2022-07-08 04:31:57	Gauteng		Yes I do	Other	All options should be used for immediate relief	Sharon	business owner

2022-07-07 23:16:54	Free State		Yes I do	Other	It is unfortunate that this legislation was passed from the old regime. Since then government is still clinging to ays of monopolies that is feeding the pockets of corrupt people and has no benefit for the people. In so doing they can set price monopoly on every thing they have power of. Do away with government monopoly and creat sustainable development to grow the country.	Jacques	business owner
2022-07-07 22:50:33	Outside SA	Australia	Yes I do	Other	Immediate action can be accomplished by means of repaired, repurposed and remanned existing damaged powerplants, and coal is in ample supply, but other sources and methods will be a powerful solution, disempowering corrupt officials and stimulating new and varied participation.	Ronél	business owner
2022-07-07 22:37:59	Western Cape		Yes I do	Other	Solar or wind	Hannes	business owner
2022-07-07 22:15:25	KwaZulu-Natal		Yes I do	Other	At this late stage it is more important to keep the lights on if we want to improve the economy. Short term solutions should be permitted until such time as longer , more suitable term solutions are found.	Heather	business owner
2022-07-07 21:40:28	Gauteng		Yes I do	Other	I don't think I know enough about all the different sources to comment. Maybe a combo. Whatever is going to work fast and not incur too great an expense and be good for the environment. We have to move fast.	Nina	business owner
2022-07-07 21:23:43	Eastern Cape		Yes I do	Other	I'm not sure what the best source of energy would be but Eskom's monopoly needs to be removed in order for the South African energy crisis to be resolved.	Debra	business owner
2022-07-07 21:15:48	Gauteng		Yes I do	Other	Allow private sector freedom to generate and distribute electricity, at their best price, subject only to independent monitoring of safety standards.	Martin	business owner
2022-07-07 21:04:52	Gauteng		Yes I do	Other	I believe the red tape is still there to ensure that only people the cANCer deem "suitable" are at the helm of renewable power sources. This, however, does little for the suffering of South Africans and the economic crisis the continuous load shedding is causing. If my theory is incorrect then let the cANCer explain why the red tape still exists	Tracy	business owner
2022-09-19 19:05:30	Gauteng		Yes I do	Other	I would say a combination of independent power production options is the way to go solar and mass power storage solutions, wind energy, wave energy, small nuclear installations etc. With emphasis on privately funded and run and supplying a national powergrid. Move away from political interference, central state energy producer, political manipulation, political exploitation, corruption, and the like. That just shows that it cannot work.	Brian	business owner
2022-09-16 20:08:57	Western Cape		Yes I do	Other	The Paris accord of 2030 is am.ost upon us and we have to move away from fossil fuels. Sun is unlimited. Wind is intermitant. Go big or go home....We need to be planning to have hydrogen energy for household and business. and vehicles. We are surrounded by sea....What is water...H2O. Chuck out the salt and oxygen so create hydrogen cells. Cheaper than electricity. Cleaner green fuel is what to aim for. 0825777988 for info	Annabelle	business owner
2022-08-16 16:51:26	Gauteng		Yes I do	Other	We should use all renewable sources available to us. Not only will it be cleaner for the environment, but it will create more jobs, and it will upskill the people who serve in the industry. We need to stop being reliant on Eskom as we are being held hostage by a monolithic organisation that is unable and possibly unwilling to change its ways fast enough to be economical for the country to rely on. They are crippling us financially, we need new solutions	Deena	business owner
2022-08-08 10:26:19	Gauteng		Yes I do	Other	anaerobic digester to produce bio-gas from organic waste collected/ stored in our land fills. multiple little bio-gas units placed around areas can help not just power small unit suppliers, but also benefit other fuel based uses like cooking and heating	Max	business owner
2022-08-08 06:20:23	Gauteng		Yes I do	Other	Yes get rid of the ESKOM and the ANC then the power will be available for those who pay and cheaper. There will also be no more stealing and fraud.	Willie	business owner
2022-08-05 14:01:06	Gauteng		Yes I do	Other		Jamie	business owner
2022-08-05 13:10:35	Western Cape		Yes I do	Other	Eskom is a sham, with massively corrupt executives, holding massive control in government monopoly. They are bringing SA to it's needs by their draconian controls. They must immediately remove red tape for IPP's	Laura	business owner
2022-08-04 13:14:00	Gauteng		Yes I do	Other	Let Independent Producers feed into the Grid, whether it is Coal, Hydro, Wind or Solar generated. As long as it helps SA meet the energy requirements so we do not have down times or excessive load on the current grid. And the IPs should be given incentives to do so, not penalised in any way. That includes households who are hybrid or totally off the grid.	Jackie	business owner
2022-08-03 13:40:50	Limpopo		Yes I do	Other		Jan Albert	business owner
2022-08-03 07:11:52	Western Cape		Yes I do	Other	I believe I collaboration.. We need a quick fix and a long term plan. Both of these need not be mutually exclusive. First off.. we need to break the monopoly and the power (pun intendet) that escom holds. And getting rid of the red tape will help with that. Getting the private individual and the private business sector involved will be helpful in the quick fix. Renewable energy resources need to be utilised and need to be made attractive. Coal and gas production over time need to be reduced because they just don't seem to be viable. I am praying for a reducing of the one and the increasing of the other. Ultimately we need a variety of power generation sources. Not one single one will be sufficient and safe enough .	Andrea	business owner

2022-08-02 15:48:54	Gauteng	Yes I do	Other	Private and Independent Power Producers need to be able to produce and supply electricity to the national grid without oversight from Eskom. Citizens should also be allowed to install and produce their own electricity, free from tax, and allow that to be shared to their community if so desired.	Pieter-Adriaan	business owner
2022-08-02 15:00:18	Western Cape	Yes I do	Other		Niel	business owner
2022-08-02 13:19:35	Western Cape	Yes I do	Other	We need the producers to support that grid as much as possible and creating 'barriers to entry' will not help the cause.	Helen	business owner
2022-08-02 08:52:52	Western Cape	Yes I do	Other	Opening the door for competition in this sector will most certainly relieve the shortage and create jobs.	Paul	business owner
2022-08-02 08:52:37	Free State	Yes I do	Other	Scrap the policies and privatize Eskom.	Edrick	business owner
2022-08-01 22:25:01	Western Cape	Yes I do	Other	A selection of the named methods with coal, gas nuclear, wind solar and hydro will enable us to not only supply our needs but also very an exporter of power.	Daniel	business owner
2022-08-01 08:24:56	Gauteng	Yes I do	Other	What about Hydrogen. There are two municipalities using it in England Clean and free	Thomas	business owner
2022-08-01 07:56:30	Western Cape	Yes I do	Other		Karen	business owner
2022-08-01 06:17:20	Gauteng	Yes I do	Other	A combination of different renewable energy supplies, together with private generation and supply, storage and smart grids would be the ultimate, smartest and most reliable solution to South Africa.	Christiaan	business owner
2022-07-25 12:53:20	Western Cape	Yes I do	Other	I know that South Africa and Cape Town specifically is one of the areas of our country with the most daylight sun hours per year, this resource needs to be harnessed. There are more options to make use of solar power than using Solar (Photo Voltaic Panels) to generate electricity, although this is also a viable option. We also have the opportunity to harness tidal energy as many countries like the Netherlands and some of the Scandinavian countries have done successfully. South Africa and Cape Town specific have strong winds that blow 8 months of the year. We have an immense opportunity to harness solar energy and set the global standard for free consumption without damage to our national environment and by so doing free up financial resources and rethink an outdated municipal financial model that relies heavily on the sale of an environmentally costly and non-renewable resource. A green economy is the future and we need to start that process, to follow suite with the world sooner than later in order to shield our economy from further and future instability. We need to give the people of South Africa more Tax incentives with subsidisation of locally produced renewable products to assist the people to get off the power grid and alleviate Eskom and in doing so also create job opportunities. This way Eskom can provide for those that arent able to get off the grid and provide for hospitals and government institutions. Renewables must be made economically available through tax breaks on locally produced products to help create more job security for our people. Eskom needs to partner with the people and should focus on smart grid connections and two-way transmission. It is absolutely ridiculous for Eskom to propose a fine for generating capacity this is the opposite that needs to happen making us reliant on a broken system will not help South Africans and build our economy. We need to have forward-thinking leaders, and a competitive market model and we desperately need to stop monopolising state-owned industries. This monopolisation is destroying our economy.	Tian	business owner
2022-07-25 08:33:41	Western Cape	Yes I do	Other	In my opinion a combination of hydro, solar, and wind should be used to generate electricity as SA has enough natural resources for all three. Instead of wasting money continually bailing Eskom out, the government should offer incentives to all citizens to install solar panels or mini wind turbines to not only generate enough electricity to run their homes and business but also to sell the excess back to the grid. This would be a win-win situation for all concerned instead of taxpayers always having to bear the brunt of funding Eskom's mismanagement while, at the same time, suffering the inconvenience of endless load shedding.	Jean	retired
2022-07-24 18:43:53	Gauteng	Yes I do	Other	We live in a country that can be dependent on clean ways to generate power - wind, & solar as well as renewables. Red tape has to go to all give many unemployed jobs.	Monika	retired
2022-07-24 10:46:10	Eastern Cape	Yes I do	Other	Solar and wind energy. Pay individuals for their excess supplied to grid.	Cheryl	retired

2022-07-23 20:37:15	KwaZulu-Natal	Yes I do	Other	<p>The global warming claims do not stand up to proper scientific scrutiny. The IPCC is a political body, not a scientific body. Not one of their computer models have been correct yet and are a giant scam funded by governments. All real scientists who have questions about these claims have been shut down as climate deniers. Why won't governments listen to the other opinions. Simple, their plans aren't to be questioned.</p> <p>CO2 represents between 0.5 and 1.5% of atmospheric gasses most of the rest is water vapour, which may be much more important. It appears that plants need CO2 to survive and die if the levels drop below 150ppm. They are currently sitting at about 180 ppm and the earth has greened more over the past 20 years. We need to phase out our coal, gas and diesel over time and look at modern small nuclear plants which are much greener. Wind and solar have been a failure in Germany and the UK this year and storage is a major problem. Raw materials to build them are also scarce. They are very expensive and are not recyclable. Their components are also dangerous to the environment.</p> <p>Mr President, do not sign the agreement with the USA or EU on reducing our coal powered electricity grid and go solar and wind. They will bankrupt this country on a scam and not supply the power we need.</p>	Don	retired

2022-07-15 14:32:17	Gauteng	Yes I do	Other	<p>The scrapping of red tape should already have been implemented. Our President in one of his addresses to the Nation advised that Independent Power Producers would be allowed access to the Eskom grid but again nothing has been done to achieve this. NERSA continues to be a stumbling block. The persistent inaction by the Governing Party has brought the country to this crisis point and exposed our country to frequent loadshedding. This crisis was then compounded by Eskom workers being allowed to embark on an illegal and violent strike in order to hold the country to ransom. The Governing Party is like a dog sitting on a thistle. It does not want to relinquish its control over SOE's as this facilitates Cadre deployment and ensures their elite lifestyles.</p> <p>South Africa will still need to rely on coal, existing nuclear and other forms of generation until sufficient renewable energy sources become available. The storage of adequate renewable energy will also need to be addressed.</p>	Theresa	retired
2022-07-15 10:49:03	Gauteng	Yes I do	Other	<p>A combination of coal, nuclear, solar and wind electricity generation should be implemented. Get rid of the red tape and BEE rubbish and allow anybody to generate electricity and supplement the grid. Get rid of cadre deployment at Eskom and employ qualified, trustworthy, corruption free individuals with integrity to service and run the generation plants. Also get rid of the dead wood at Eskom.</p>	Michael	retired
2022-07-15 07:03:49	KwaZulu-Natal	Yes I do	Other	<p>Something has to be done ASAP. Either they bring back competent people to work in Eskom or else allow alternate suppliers to produce electricity. This problem of load shedding has been caused by greed and corruption.</p>	Maira	retired
2022-07-15 06:35:31	KwaZulu-Natal	Yes I do	Other	<p>There are many providers out there that can give immediate relieve by supplying energy to Eskom or other customers, as Eskom cannot pay them. The red tape ensure that we will always be in the dark and it will get worse as there is no accountability by government to stop the rot. Eskom is a cash cow for corruption, give the power to the people that can actually supply the country.</p>	Kristien	retired
2022-07-14 21:36:50	Western Cape	Yes I do	Other	<p>Solar as suggested in mail to etv. The solar could be supplied to every private citizen at less than most of the Eskom salvage loans. The main ailing generation could be used for industry. The biggest solar manufacturing plant could employ a large number of Eskom staff, supply local demand and export. But then there is the N machine and the Tewari machine, (India) so why are we playing power control, whilst screaming global warming .</p>	Donald	retired
2022-07-14 17:14:54	Western Cape	Yes I do	Other	<p>I think local producers should be allowed to add to the power grid. No imports. Over the long term possibly Nuclear energy can be harnessed as a cost effective, reliable, sustainable and environmentally friendly manner to provide us with cost effective energy.</p> <p>We should stop coal and dirty power supplies. Solar/wind is a possibility, but the costs have to be reduced first and also these methods take up enormous spaces of land and look very very ugly. They are not always friendly to the environment with the production of parts and maintenance can be costly. South Africa needs cheap, sustainable, clean energy that will help this country prosper into the future. The government needs to think about the Big Picture future and stop thinking about filling their own pockets over the short term.</p>	M.	retired
2022-07-14 16:48:29	Western Cape	Yes I do	Other	<p>Solar and wind are currently touted as the alternative sources of electrical power, the problem with these is that with current technology there are not yet storage methods that are adequate to provide sustainable power due to the vagaries of weather and lack of sunlight. The solution with wind power apart from enhancing battery storage methods is to have sufficient widespread locations generating power. although their carbon footprint is substantial. Solar can produce steam and direct power but only when the sun shines . it is therefore essential to retain a conventional fossil fuel generator to ensure constant and sustainable power. accelerated research must go into solving these problems.</p>	Noel	retired
2022-07-14 14:06:12	Western Cape	Yes I do	Other	<p>I believe all forms of energy production should be used. Whether it be wind, solar, water, nuclear - all are useful and can be utilized to produce energy. This can also promote jobs if smaller companies are allowed to be producers.</p>	Lorna	retired

2022-07-12 19:06:15	KwaZulu-Natal		Yes I do	Other	A combination of options will ensure more consistent electricity supply	Jan	retired
2022-07-12 18:32:46	Gauteng		Yes I do	Other	A combination of solar. wind and other renewables. It's a no-brainer. ESKOM under the inefficient auspices of the ANC will never get to generate power cost-effectively. Too many years has gone by whereby this institution was allowed to waste, steal - and borrow to make up short-falls. The economy needs uninterrupted electricity to recover. Not another day should be lost. Give South Africans the opportunity to put SA back on the MAP!	Nicolette	retired
2022-07-12 18:15:24	Western Cape		Yes I do	Other	Ek is maar 1 van die lae inkomste groepe alleen vrou my yskas nou ingeggee agv kragonderbrekings. Kani hom vervang nie wie se skuld is dit. ANC VERNIETIG ONS!!!!!!!	Annemarie	retired
2022-07-12 17:54:26	Western Cape		Yes I do	Other	It has become very clear that a government entity cannot be relied on to provide all the power required for our growing economy. As can be said for many other government entities that SA relies on for its basic infrastructure, Eskom has also been destroyed by government corruption, politics and ideology. In whatever mix of methods of electricity production that can provide a short term solution to this disaster, all obstacles should be removed immediately, be it legislation, ministers, regulations to enable real progress in the very short term.	andre	retired
2022-07-12 16:54:17	Western Cape		Yes I do	Other	Right now we need more than one method of power generation, preferably Nuclear, Solar, Wind, Gas and Coal, to get over the Immediate Power Shortage, but as the economy grows we should take any form of power generation and then once stable, and the economy is growing start thinking how to reduce our carbon footprint	Theo	retired
2022-07-12 15:59:48	KwaZulu-Natal		Yes I do	Other	We really need a mix. Cost, efficiency, scale all play important parts. Impact on enviroment is also important but this can be overplayed by certain parties. Solar power on the rooftop could help take some load off the grid but it is still too expensive. Government could do a lot more to encourage competition and bring down the prices.	Vedprakash	retired
2022-07-12 14:40:20	Gauteng		Yes I do	Other	Soth Africa have sufficient experties to assist to enhance the core to supply electricity to justify economic growth apart from Escom whom fail in their attempt due to Politcal intereferece	Christo	retired
2022-07-12 13:41:51	Gauteng		Yes I do	Other	We need a combination of methods to generate electricity in South Africa. Firstly there is a need to keep our coal generating and 1 x nuclear power plant working efficiently and effectively without the corrupt influence of politicians and officials at Eskom, whilst the process to establish IPPs is underway. The way in which the R106 Billion green energy loan granted to South Africa is spent needs to be a completely transparent process with oversight by the World Bank, the involvement of our Finance Minister Godongwana, FairFinance South Africa and the Life after Coal Campaign organizers. This loan should be focused predominantly on the generation of Green Energy through the Independent Power Producers and in fixing and maintaining our current fleet of coal and nuclear power plants.	Charmaine	retired
2022-07-12 13:28:35	Western Cape		Yes I do	Other	I support all generation methods including nuclear, but, with the exception of fossil fuels. It is also my opinion that with the proper management carbon emissions could be controlled and possibly put to good use.	Mervyn	retired
2022-07-12 13:16:11	Gauteng		Yes I do	Other	We should have a diversity of power generation, preferably renewable so that the country is not reliant on one source of power and service provider. It also provides competition and fits in with the UN requirement to reduce greenhouse gas emissions. We have a very long stretch of coastline to combine both wind and wave power generation as well as arid areas for solar farms. We need to move away from fossil fuels and nuclear as they are not only expensive to erect & maintain, but they produce tons of gas and radioactive waste harmful to us and our planet. Privatisation of power generation will greatly speed up the shortage of power in the country.	Keith	retired
2022-07-12 13:16:04	KwaZulu-Natal		Yes I do	Other	With all SA's current systems unable to oblige, a combination of wind turbines, solar and gas as the component supplies for these are readily available and can feed into the national grid within a short duration.	Barry	retired

2022-07-12 12:44:30	KwaZulu-Natal	Yes I do	Other	Any form of renewable fuel to provide either direct energy (eg solar/wind) or indirect (eg steam for T/A) will do the trick. The biggest problem is distribution and the infrastructure. Government can "rent" the grid to independent power producers.	Tim	retired
2022-07-12 12:19:28	KwaZulu-Natal	Yes I do	Other	This IPP debate has been going on for far too long. Just do it.	Annetjie	retired
2022-07-12 11:49:43	KwaZulu-Natal	Yes I do	Other	Hou op om ons steenkool en petrol weg te gee vir buitelandse gebruik terwyl Eskom en die regering hulself verryk en die armes nog meer laat verarm.	Paul	retired
2022-07-12 11:46:29	Western Cape	Yes I do	Other	Use IPP's.	LOUIS	retired
2022-07-12 11:21:18	KwaZulu-Natal	Yes I do	Other	SOLAR AND WIND WILL BE THE QUICKEST	Donald	retired
2022-07-12 10:58:44	Gauteng	Yes I do	Other	Wind and Solar as they are both free and renewable.	Heté	retired
2022-07-12 10:41:57	Gauteng	Yes I do	Other	I don't care what they use, as long as they do NOT use corrupt and incompetent people! Maybe they should privatize the country by privatizing the corrupt government. We need a desperate change!	TREVOR	retired
2022-07-12 10:37:25	Western Cape	Yes I do	Other	We Need power- stop talking utter nonsense to the public. Tell the ministers whose wife's and family members who have interests in Eskom to give up and let this country go back to normal. We are tired of Eskom and the rot and corruption. We want our country back. Give it back to the people who knew how to run it	Bruce	retired
2022-07-12 10:08:50	KwaZulu-Natal	Yes I do	Other	Initially I would hire sea going power stations and put them at suitable Ports. A short term solution only. It has been proved that Nuclear is the safest and best long term solution. Gas and solar and wind as a combination is the best other short term combination if one wants power 24hrs a day.	Charles	retired
2022-07-12 10:00:27	Western Cape	Yes I do	Other	I support the use of all methods to generate electricity, in each region where the local conditions favour the respective technology. In areas where the prevailing winds blow, wind energy, in the low rainfall areas solar, where coal and gas are abundant the respective power source.	John	retired
2022-07-12 09:55:33	Gauteng	Yes I do	Other	I support the use of all methods to generate electricity, in each region where the local conditions favor the respective technology. In areas where the prevailing winds blow, wind energy, in the low rainfall areas solar, where coal and gas are abundant the respective power source.	Andrew	retired
2022-07-12 09:37:18	KwaZulu-Natal	Yes I do	Other	Any and all on that list - whatever it takes!!!!!!	Cheryl	retired
2022-07-12 09:25:12	Western Cape	Yes I do	Other	Solar and wind farms is the better way to go. Come on South Africa, lets for once stand together and derail the fat cats gravy train. Have you ever wondered how many of them (government) are exempted from the power cuts? And what about the Eskom employees? Do they pay the same for their personal electricity usage as the rest of us? Or nothing at all?	Cecile	retired
2022-07-12 09:15:24	Western Cape	Yes I do	Other	Wind Farms and Wave Farms. Wave turbines are common in Europe eg Irish Sea.	Theresa	retired
2022-07-12 08:32:11	KwaZulu-Natal	Yes I do	Other		Michelle	retired
2022-07-12 08:26:10	Western Cape	Yes I do	Other	South Africa, needs a mix of all forms of power generation. We need to cater for periods where there is no solar or wind. We need a base generating facility, to provide a reliable, affordable alternative when the renewables are not available. The mix should include, nuclear, gas, wind, hydro, solar as well as storage facilities. These entities must be properly structured, iundeendant, financially secure and not subject to the governments interfering ways.	Peter	retired
2022-07-12 07:53:02	Western Cape	Yes I do	Other	A combination of alternate power sources produced by independent power producers input to the grid	Margaret	retired
2022-07-12 06:37:56	Eastern Cape	Yes I do	Other	It is unacceptable that all the citizens is held at gunpoint by Unions. This link need to be broken without delay. Power generation from any source that is responsible and economical viable for that region. Grid need to belong to all but user must have a choice to buy from any supplier anywhere in the country. This will ensure that that the best service providers will move forward and solve the problem in shortest time possible. Hopefully. Also all users must be given the opportunity to feed back in the grid with credit for use cost at any other convenient time in future. This may alleviate supply with 10% or more in very short timeframe. (Guestimate)	Eric	retired
2022-07-11 22:38:58	Western Cape	Yes I do	Other	whatever it takes to get rid of this useless and incompetent power supplier called Eskom and stop the thieving and corruption!	Eunice	retired

2022-07-11 20:40:59	Gauteng	Yes I do	Other	Various types of power generation could be employed. Each option has positive and negative attributes. Solar relies on batteries which require lithium and which have a relatively short life-span. Wind turbines similarly have a fairly short life span. Nuclear is clean but involves disposal of nuclear waste, while coal at present in this country is a very polluting method of generation and diesel is very costly. An overall approach to power generation for the country is needed and it would be a positive step forward to involve independent producers to contribute to the national grid.	Helen	retired
2022-07-11 20:08:34	KwaZulu-Natal	Yes I do	Other	We have the space and environment to have a range of renewable energy sources such as wind, solar, wave and tidal. All these technologies are proven and available	Geoff	retired
2022-07-11 18:35:08	Mpumalanga	Yes I do	Other	Stop these savages at all costs to further destroy our once beautiful country.!!!	Anne-Mari	retired
2022-07-11 18:20:03	Gauteng	Yes I do	Other	Government should have a broad view on supplemental electricity production. Who ever supplies electricity to the grid should have total freedom how such power is generated for the simple reason that if it is viable for them and the power generated conforms the the standard required by the grid every body gains. The system must allow the smaller guy to participate not just the major corporates.	Maryann	retired
2022-07-11 18:05:40	Western Cape	Yes I do	Other	Wind, solar, hydro - just cut all the nonsense of prolonging the procedures and get going.	Marinda	retired
2022-07-11 17:58:52	Mpumalanga	Yes I do	Other	A combination of all means to produce electricity. Electricity supply should not be left in one basket. Use what is naturally available and allow other parties to produce electricity.	Philippus	retired
2022-07-11 17:35:24	KwaZulu-Natal	Yes I do	Other	A combination that will be the most effective.	Johan	retired
2022-07-11 17:32:54	Western Cape	Yes I do	Other	I think a combination of production methods would be required. We cannot continue to be inconvenienced day after day with load shedding, not to mention the cost of constantly having to replace security alarm batteries, gate motor batteries and appliances - all additional costs to already economically challenged consumers ! Our economy and business generally, cannot afford to continue like this.	Heather	retired
2022-07-11 17:10:17	Gauteng	Yes I do	Other	Power supply should be directly to the end user by the supplier, cutting out the middle man (municipality). We should also not be limited to only one type of power generation - all available resources should be used as appropriate and practical. The end user, and payer, must have the choice of supplier and resources. This may eradicate power theft and non-payment of this service. Government must not be involved in power generation and supply in South Africa - they have already proven how everything they touch turns to rubbish.	Elmarie	retired
2022-07-11 17:09:59	Eastern Cape	Yes I do	Other	Unfortunately the answer to this is not simple. South Africa needs a long term solution that is independent of political interference and incompetence. It will be a mix of methods. Initially coal and nuclear being phased into renewables in the medium to long term. We need to have solar geysers on all residential and industrial units. There should be government subsidies and tax breaks for those who do this. Another Minister of Minerals and Energy should be appointed who has the initiative and knowledge to implement such a policy. The present incumbent is more interested with solidarity with the ANC than finding solutions. The Minister of Public Enterprises is now out of touch with reality with his communistic leanings. Capitalism has its own problems but presently private enterprise must be involved to solve our immediate energy problem the IPPs.	Alan	retired
2022-07-11 16:44:04	KwaZulu-Natal	Yes I do	Other	Access to boost the national grid should be made available to anybody or organisation who are in a position to lawfully assist. Apart from creating another job-providing industry our country is in desperate need of increased energy sources. Scrap the red tape and make it easier for the public to participate .	George	retired
2022-07-11 16:38:17	Western Cape	Yes I do	Other	Several of the above should be used. Wind, solar and Nuclear.	Ruth	retired
2022-07-11 16:22:17	Gauteng	Yes I do	Other	Any of the globally established and proven means of electricity production must be used. The Government has already failed terribly by not already having such a process established already. Why does this Government always talk about "planning" (if we're lucky) but is not able to talk "what we have done already". Power in RSA is woefully lacking, is a massive obstacle for businesses and growth in RSA and likewise a major obstacle for employment opportunities. SOLAR - YES!! HYDRO - YES!! WIND - YES !! And other means that innovative South African citizens can advance with. Government is the MAIN OBSTACLE to success here. Yet again, not doing what it is supposed to do . Get on with it for god's sake!	Stephen	retired
2022-07-11 16:13:56	Mpumalanga	Yes I do	Other	The country is in a state of disaster in the electricity sector. Any and all IPPs should be empowered to change the path of the economy.	Daan	retired
2022-07-11 16:04:14	KwaZulu-Natal	Yes I do	Other	A combination of all forms of energy generation is acceptable as long as it is done in a combined effort between all players.	Peter	retired
2022-07-11 15:51:34	Free State	Yes I do	Other	We need a concrete plan and the quickest possible solution anyone can find. All I do know is we need a government who has leaders that are proactive and not a hindrance to new policies and new methods even if it is privatization. The country is not going to survive on the route it is on now	Frances	retired
2022-07-11 15:48:00	Gauteng	Yes I do	Other	Solar Wind and Nuclear. It has the least impact on the environment.	Cedric	retired
2022-07-11 15:07:21	Gauteng	Yes I do	Other	Other - standing for ALL available. We are in a growing emergency so drastic action is needed.	Patrick	retired

2022-07-11 14:51:58	Western Cape	Yes I do	Other	<p>"OTHER" = All other methods of electricity production available to replace the current dependency on coal fired power facilities.</p> <p>The deterioration of South Africa's ability to provide adequate electricity at an affordable price has over the past 25 years brought the country's economy and inhabitants to it's knees - the latter in prayer for a government coming to it's senses to start executing all the grand plans and projects formulated especially for the energy sector over the past 25 years. In 1995 the RSA was regarded as the country with the lowest cost per kWh, but has lost this position due to incompetence and state capture.</p> <p>The country's climate lends itself to the generation of electricity by various natural ways, i.e. wind farms in coastal regions and solar plants in the more arid regions i.e. the Karoo and Northern Cape, North-West and Free State.</p> <p>ESKOM's initiative to bring back the knowledge of former employees who were laid off due to turn and empowerment strategies to keep the current coal-fired power stations performing at capacity in the absence of sabotage, will give enough time to allow the existing alternative and independent electricity producing facilities to be linked into the existing grid of ESKOM.</p> <p>What happened to the contracts that were awarded by Jeff Radebe in 2019 to allow independent power producers to sell to ESKOM??</p>	Paul	retired
2022-07-11 14:49:23	Gauteng	Yes I do	Other	<p>It is not just a pick and choose exercise!</p> <p>A proper economic study should be done using the known national demand curves and the cost cost of the different generation options (Capital and operating costs and green house gas emissions).</p> <p>There a re many qualified entities in South Africa that can conduct such an exercise.</p>	Dave	retired
2022-07-11 14:46:41	KwaZulu- Natal	Yes I do	Other	<p>Country in crisis mode, and then into further economic crisis, so the all of any clean energy should be allowed. And in the interim of establishing any other energy the country has plenty of coal to hand. Plz stop selling it to another country whilst we suffer the consequences. Worst plz stop supplying free electricity to neighbouring country or free to local, at South Africa's expense. Thank you.</p>	Lydia	retired
2022-07-11 14:22:43	Gauteng	Yes I do	Other	<p>Nuclear is long term and expensive for the current need, especially in a time of increasing cost of finance.</p> <p>Independent Power Producers must have their hands untied and be free to provide power as they see fit. They will do their homework to see what will be best for the regions they have available, solar, wind or hydro. Small plants for local use may relieve the pressure on the grid but they need to be able to provide electricity at a competitive price and not take advantage of what may end up as a "captive" market.</p> <p>There must be more than one supplier to ensure the supply to the grid remains competitive. The price must not be dictated by Government or Eskom.</p>	Douglas	retired
2022-07-11 14:14:36	Western Cape	Yes I do	Other	<p>This is far too complex to just select one...probably a combination of many of the above.</p> <p>to be determined doing proper research and feasibility studies if not done already.</p>	GJ	retired
2022-07-11 14:13:49	Western Cape	Yes I do	Other	<p>A major effort needs to be made to move to a combination of renewable sources. Sun and wind seem the easiest for RSA, combined with gas and nuclear to create long lasting energy reserves</p>	Bruce	retired
2022-07-11 13:49:58	Gauteng	Yes I do	Other	<p>Use whatever to improve our electricity output</p>	Anita	retired
2022-07-11 13:24:16	Eastern Cape	Yes I do	Other	<p>Do away with government control and corruption. Government should not be running businesses. All forms of electrical supply should be considered but solar & wind is expensive, unreliable, not suitable for supplying the grid and certainly not "green" - it can only be used as "top-up supply". We have an abundance of coal and new forms of supply are far cleaner than ever before. Nuclear is a great reliable source too but open to corruption - checks and balances and total transparency are needed on all new large or small plants funded by the fiscus.</p>	Barry	retired
2022-07-11 13:22:13	Western Cape	Yes I do	Other	<p>Use what ever is required to generate electricity and store it as long as it is up to existing accepted polution standards</p>	Tim	retired
2022-07-11 13:17:57	Gauteng	Yes I do	Other	<p>I would like the loadshedding to end!! The best to change this is ok with me</p>	Reinette	retired
2022-07-11 13:10:21	Gauteng	Yes I do	Other	<p>Renewable electricity is the future for South Africa.</p>	Beryl	retired
2022-07-11 13:10:19	Gauteng	Yes I do	Other	<p>Renewable electricity is the future for South Africa.</p>	Beryl	retired
2022-07-11 12:58:15	Gauteng	Yes I do	Other	<p>Waves and solar and wind</p>	Phillipa	retired
2022-07-11 12:56:11	KwaZulu- Natal	Yes I do	Other	<p>I suggest wind, solar and hydro, but unfortunately the ANC government cannot get over their ideological stumbling blocks to make any decisions, they are not interested in governing, only destroying.</p>	John	retired
2022-07-11 12:54:38	KwaZulu- Natal	Yes I do	Other	<p>Allow independent power producers to supply electricity</p>	Sue	retired

2022-07-11 12:51:59	Western Cape		Yes I do	Other	In the longer term I support nuclear, but in the interim, it will have to be a combination of all sources with coal still being a mainstay for the foreseeable future. Cut the red tape/corruption nonsense immediately and replace Gwede Mantashe as a matter of urgency.	Gene	retired
2022-07-11 12:49:14	KwaZulu- Natal		Yes I do	Other	I do not have the know how to advise on what method would work best, however anything which will get our country back on track will work for me. Obviously, the more eco friendly the better.	Jean	retired
2022-07-11 12:48:52	Western Cape		Yes I do	Other	I chosr other because we need s combination of all available sources to supplement the current coal power stations thst are not able to supply enough electricity due to age and malfunctioning.	Henri	retired
2022-07-11 12:40:35	Western Cape		Yes I do	Other	Eskom has clearly lost control of the situation. It would be ideal to replace the people running Eskom with competent and honest people who can turn that enterprise around. In the interim we might have no choice but to allow private suppliers. We should also free Eskom from government control and politics and let them concentrate on what they are supposed to do, that is providing electricity to South Africa. I do not think that wind and solar are the way to go because of their enormous space requirements and their volatile output, which is difficult to manage. That being said they can still be selectively employed in the private sector as supplementary power sources. The best way to go is still with conventional power stations and constantly working towards reducing their emissions. Nuclear power is tricky because of the dangerous radioactive waste. The provision of nuclear power must go hand in hand with the safe handling and storage of nuclear waste. Nuclear power can only be chosen selectively when strict conditions regarding environmental safety are being met.	James	retired
2022-07-11 12:08:56	North West		Yes I do	Other	A combination of all of the possibilities would be best as we need all the power we can possibly get access to. It is preposterous that independent power suppliers are prohibited from helping out because of politics.	Marina	retired
2022-07-11 12:01:45	Western Cape		Yes I do	Other	A workable combination of wind , solar, hydro and gas	Moira	retired
2022-07-11 12:00:18	Gauteng		Yes I do	Other	It needs to be a combination between existing coal and nuclear with additional support from solar, hydro and wind. They should also allow residential customers to to feed any additional electricity into the grid and receive a credit for that. Similar to what is being implemented in some of the western cape municipalities.	Edward	retired
2022-07-11 11:58:54	Gauteng		Yes I do	Other	It needs to be a combination between existing coal and nuclear with additional support from solar, hydro and wind. They should also allow residential customers to to feed any additional electricity into the grid and receive a credit for that. Similar to what is being implemented in some of the western cape municipalities.	Ed	retired
2022-07-11 11:53:19	Mpumal anga		Yes I do	Other	At this stage any power available should be employed immediately. This covers all types. There are advantages and disadvantages to each type, but buy it now, we cannot go on like this.	Trevor	retired
2022-07-11 11:45:47	Western Cape		Yes I do	Other	eradication of government red tape to make use of private business generation of wind, solar and hydro energy. Excess energy from these resources to be uploaded to the national grid for use by the public. Government needs to allow competition in the energy provision sector. To license business AND government energy providers, independence of these energy generation entities needs to prove that there are NO links (family, friends or contacts) It is very evident that Patrice Motsepe has been chosen and prepared and sponsored to be the next 'provider' and directly benefit the ANC gluttons. It's absurdly disgusting at the level of looting that the ANC leadership is guilty of with no shame from the majority.	Georgia	retired
2022-07-11 11:34:51	Gauteng		Yes I do	Other	The eradication of government red tape to make use of private business generation of wind, solar and hydro energy. Excess energy from these resources to be uploaded to the national grid for use by the public. Government needs to allow competition in the energy provision sector. To license business AND government energy providers, independence of these energy generation entities needs to prove that there are NO links (family, friends or contacts) to members of parliament. The granting of licenses to energy provision entities MUST be subject to audit by (yearly rotating) private audit firms. These audit reports need to be available to the public. Digitalization and digitation of energy providers should be one of the requirements to obtain a license to generate and upload energy to the national grid. Obviously, cost effectiveness needs to be a parameter in granting licenses as the public must not carry the burden of ineffective and inefficient business practices of these energy providers.	Aneli	retired
2022-07-11 11:34:04	Western Cape		Yes I do	Other	The ANC really don't have a clue! They couldn't run a bath!!! Eskom has no chance of recovery! Even the best CEO would not have a chance. Eskom is simply a conduit for corruption! IPP have to take charge and create a staged recovery using all available sources of energy; including coal! power up the grid first, then consider switching to "green" energy!	LOUISE	retired

2022-07-11 11:27:22	Western Cape		Yes I do	Other	Building anything is medium to long term answers, so not short term for immediate action. Immediate action is stop giving Eskom a hard time. Stop the graft and corruption which is being done by your cadres. Stop any form of BEE. Having got rid of all the expertise because they were white, start selection based on merit. When equally qualified then choose the non-white. Where necessary change any/all legislation that makes life tough on Eskom, including Govt. control. Eskom is meant to provide CHEAP energy so the country can improve, so stop looking on it as a profit centre and rather see it as a cost centre. Run it properly as a business, kick out all the political appointees. Medium to long term use any technology that produces power as cost effectively as possible without Govt. subsidies. These are not long term answers since they work part time. Base load is needed so use nuclear, with possibly the PBMR approach. Stop considering any hydrocarbon as a fuel. What about the hydrogen approach as a fuel. With the switch to electric vehicles we need even more electricity, so fix Eskom PROPERLY, no stop gap actions please.	John	retired
2022-07-11 11:24:00	Eastern Cape		Yes I do	Other	Our government has disgraced our country and its people badly and they should be fired for their dis-service. The government should: 1). The country has many technically capable people that have been dismissed but are still willing to help correct the situation - politically, leadership has not embraced this option and they should do so immediately! 2). A state run monopoly such as Eskom is a double disaster - embrace IPP's immediately to stimulate national growth and competition with good governance and industry control. 3). Green solutions such as Solar, wind, etc. should be exploited immediately but should also include other medium term solutions / plans for Nuclear or other innovative considerations such as tidal, hydro designs. 4). Its time to unite, stop talking and do something material now!	Henri	retired
2022-07-11 11:21:27	Gauteng		Yes I do	Other	There should be a combination of all types as well as a number of Independant producers, so that we can choose which option we prefer as well as the cheapest for our needs. The UK has a number of energy producers and each customer chooses which company they want to use. We urgently need to get out this mess which has been created!	Stephanie	retired
2022-07-11 11:12:21	Gauteng		Yes I do	Other	Solar, Wind, Hydro and Nuclear.	Ralph	retired
2022-07-11 10:58:34	Free State		Yes I do	Other	Scrap the red tape, open the regulatory gates to allow any private addition to power generation to go forward unhindered. We are currently, and in the near future, even more so, in danger of a total blackout, if we do not reconsider unnecessary restrictive regulatory mechanisms. Privatize Eskom and see what private enterprise can achieve. Importantly, stop the local authorities from exploiting us by using this as a cash cow, through adding excessive mark-ups on electricity, and if they do not comply, let Eskom do the distribution, and collect the fees directly.	David F	retired
2022-07-11 10:58:13	Western Cape		Yes I do	Other	All electricity production that are currently available which will not harm the enviroment should be allowed. Red tape should be reduced to emergency and urgent statis. The current loadshedding regime can be classified as a national disaster	Terence	retired
2022-07-11 10:55:54	North West		Yes I do	Other	We can use multiple methods	Christine	retired
2022-07-11 10:51:26	Gauteng		Yes I do	Other	Use ANY form of alternate electricity production that is cost effective and sorts out the crisis. The problem is that stealing electricity (illegal connections) is one of the HUGE issues and MUST be stopped. I cannot afford to heat my home, but most of the surrounding areas where I live have heaters on all the time while there is electricity as the electricity is free as it is stolen! The other ENORMOUS issue is recover ALL the monies owed by ALL the local municipalities and ALL neighboring countries (which run into countless BILLIONS of rands) Eskom should be scrapped as a power provider since they are useless and holding SA to ransom with their outrageous electricity charges. Etc, etc, etc.	Brian	retired
2022-07-11 10:50:46	Gauteng		Yes I do	Other	Renewable Options the only way forward.	Brendon	retired
2022-07-11 10:48:48	Western Cape		Yes I do	Other	First we are where we are due to BEE coupled with incompetent people. Training of our effective skilled labour force as was done in the past and worked was disbanded by the ANC. The same exists in all spheres of education. This is where the problem starts not only with Eskom but all SOE's including our very own government. So to go forward we first need to go back. I am further not convinced that solar & wind power can be the solution to our problems. Besides the destruction & impact on our landscape there seems no way of knowing how they will get rid of renewables once lifespan is complete creating a even bigger monster. Having said all that the time has clearly come for independent power producers. Of that there can not be any doubt anymore	Deon	retired
2022-07-11 10:46:17	Eastern Cape		Yes I do	Other	A mix of solar and wind. Also look at wave/ocean driven energy.	Chris	retired

2022-07-11 10:44:09	Western Cape		Yes I do	Other	Eskom should be privatized. The public should be able to choose their own service provider, making electricity supply competitive and cheaper. We do not have sufficient battery storage for solar power and affordability is a problem. Wind mills were traditionally used to grind wheat, thus I don't think this is a practical option.	Sandy	retired
2022-07-11 10:44:09	Western Cape		Yes I do	Other	Eskom should be privatized. The public should be able to choose their own service provider, making electricity supply competitive and cheaper. We do not have sufficient battery storage for solar power and affordability is a problem. Wind mills were traditionally used to grind wheat, thus I don't think this is a practical option.	Sandy	retired
2022-07-11 10:42:00	Gauteng		Yes I do	Other	South Africa should follow a multi pronged approach at a regional level (inclusive of our neighbours) to harness the best possible power resources available in the region . For this to happen we however need a capable government , which is a far cry from the greed driven ANC tribe that rules our country .	Nico	retired
2022-07-11 10:41:52	Free State		Yes I do	Other	Renewable options are the way forward, there are enough said already about this	Riana	retired
2022-07-11 10:18:27	Free State		Yes I do	Other	Stop exporting power to other countries in the region!	groenie	retired

2022-07-11 10:06:00	Gauteng		Yes I do	Other	The government has proven conclusively that it is incapable of providing sufficient power and must allow private generating of electricity to prevent the total destruction of the South African economy	linda	retired
2022-07-11 10:04:19	Gauteng		Yes I do	Other		Dale	retired
2022-07-11 09:46:24	Western Cape		Yes I do	Other	It would be ideal to depoliticize the supply of electricity and to have a coalition of government and business working together to supply the requirement from a variety of sources. (wind, coal, sunshine etc.) Unfortunately we cannot legislate depoliticization.... so next best is to deregulate (intelligently) and put whatever mechanisms possible and practical to ensure honest implementation and cost-effective operation.	Cedric	retired
2022-07-11 09:39:48	Gauteng		Yes I do	Other	Everything possible that is available. This corrupt government has close to destroyed Eskom..sickening	Val	retired
2022-07-11 09:35:03	Gauteng		Yes I do	Other	Right now we need anything that can generate cheap and reliable electricity and with the shorter the delay the better. A mix of all types in private control will be needed and without government intervention	Andre'	retired
2022-07-11 09:34:45	KwaZulu- Natal		Yes I do	Other	Coal and nuclear are competitive at present, moving forward other alternatives should be considered.	Ray	retired
2022-07-11 09:03:22	Western Cape		Yes I do	Other	The destruction of the country's electricity supply is a disgrace of immeasurable proportions. All the doing of the infamous ANC political party especially since 2020. the generation of South Africans born after 1990 do not know what governance should be. They only know ANC power struggles against each other and for themselves. A deep social tragedy.	Yvonne	retired
2022-07-11 09:01:05	Free State		Yes I do	Other	Solar , Wind , Water Energy South Africa has them all.	Floris Petrus	retired
2022-07-11 08:46:16	KwaZulu- Natal		Yes I do	Other	There is a mix of sources that be used i.e. solar, wind, sugar mills(already have generating units) & hydro. We have a source for generating electricity using hydro power without having to build large dams by installing turbines in the aqueducts that feed most of the water treatment plants in our cities as there is always a constant flow of water to these plants. These might be smaller in terms of capacity but the power supplied from these might be capable of supplying the water works requirements and or nearby businesses / communities, this without having to use coal, diesel, nuclear or any other source of energy to generate electricity.	Ralph	retired
2022-07-11 08:14:52	Western Cape		Yes I do	Other	We need all of these items. We have to have alternatives!	Anne- Marie	retired
2022-07-11 08:14:23	Western Cape		Yes I do	Other	I say "other" as being the correct approach, to the catastrophic electricity power supply situation, that South Africa has been plunged into. It has to be a well engineered combination of all the appropriate & available potential, power supply sources. A sustainable base load has to be provided with absolute security. This will have to be augmented with economic & reliable power generation from renewables. So, lets leave to the real experts to come up with the most ideal solutions & to do this as quickly as possible. The hitherto, disastrous approach, & the complete failure of the ruling authority to ensure the most fundamental need of our country i.e. power supply, has to brought to an urgent end. That has to be done before the government ruins every chance we ever had of creating a stable & far more prosperous economy. One that will provide the desperately needed income sources for all South Africans. The main task of any government is to provide a stable environment for all its people. This includes a stable, reliable & sustainable power supply. The message is simple - "get on with it & deliver the goods without any further delays".	Michael	retired
2022-07-11 07:56:20	Free State		Yes I do	Other	Wind and solar would be the best options. However, nuclear is also a solution as it is not fossil fuel and does not affect the climate. Also, nuclear can produce large amounts of electricity. the problem with nuclear, is having competent people in the know to run the plant, which we do not have. Thus wind and solar are our best bet.	Garth	retired
2022-07-11 07:46:46	Gauteng		Yes I do	Other	Independent Power Producers	Des	retired

2022-07-11 07:43:21	Gauteng		Yes I do	Other	All natural forms are to be considered but particularly solar and wind which are plentiful . Give incentives to scholars and companies to come up with easy ways to power formal and informal habitations	L	retired
2022-07-11 07:36:30	KwaZulu-Natal		Yes I do	Other	we need a variety of green energy sources. asking us to choose one is silly. Solar and wind seem best suited but climate conditions and topography play a big part in appropriateness of technologies. But to deal effectively with the immediate problem including issues of carbon emissions, a broader plan must be mapped out to include the adaptation of clean technologies across the board including green methods of building communities beginning with houses and the necessary services that go with them (health, education and welfare); a distinct, non-partisan rejuvenation plan for revamping crumbling townships.; and from grade R, knowledge, attitudes and skills development based on the future of our environment of local, continental and global import.	Karen	retired
2022-07-11 07:26:27	Eastern Cape		Yes I do	Other	As I see it, any combination of the alternative choices offered , we don't have to choose one only. Certain situations may call for solar, others for gas. One thing I do know for sure, the red tape is stopping people from going off the grid and selling solar back to Eskom. They want to have and to hold us hostage, while over charging us and load shedding us. This government must fall. It must fall now! The solutions are freely available. Let us move toward the light	Lauren	retired
2022-07-11 07:24:05	Gauteng		Yes I do	Other	Ek verstaan net nie wat die Regering se probleem die afgelope jare is om alternatiewe krag so te staan nie. Sou hulle dit toe al toegelaat het sou ons nie die probleem gehad het nie. Alternatiewe krag moet toegelaat word.	Frikkie	retired
2022-07-11 07:17:39	Western Cape		Yes I do	Other	A combination of wind, solar and if and where feasible, natural gas. There should be an immediate complete decentralisation of power production by private firms, businesses and individuals, also local authorities where capability exists. There should be an immediate start to allow Eskom to outsource green power projects on its land in Mpumalanga. The Defence Force to be deployed to protect power stations from sabotage.	Theo	retired

2022-07-11 07:02:49	Eastern Cape		Yes I do	Other	Combination of wind & solar. Not nuclear because it has problems with disposal of nuclear waste.	Rolly	retired
2022-07-11 07:01:19	Mpumalanga		Yes I do	Other	Get wireless connection via satellite from other countries. Quicker and cheaper than this bunch of losers trying to build or erect any other sources of supply. 1994 Matupi and Kasula plant where almost complete but due to their corruption and stupidity of bringing in B-EEE we are now sitting with a country that cannot support themselves and causing mass unemployment .	Lance	retired
2022-07-11 07:01:14	KwaZulu-Natal		Yes I do	Other	We need to find a sustainable, reliable source of power to prevent SA going back to the dark ages. It must also be safe for our environment. Let private enterprise take over where government has failed dismally.	Gaynor	retired
2022-07-11 06:57:26	Western Cape		Yes I do	Other	We are SO blessed AND privileged to be Citizens of this beautiful Country which offers us more than one source of alternative power to the traditional forms of coal and gas! In the opinion of this insignificant and unimportant school teacher, we should be using a combination of the following as alternative sources of power: hydro, solar and wind and only tapping into our (failing radically) sources of traditional power when absolutely necessary.	Averil	retired
2022-07-11 06:26:04	KwaZulu-Natal		Yes I do	Other	After 3 decades of abuse and degradation, the useless state needs to step away and free the private sector to solve the electricity crisis. Experts rather than politicians/thieves. By whatever short-term means are necessary - coal, diesel, whatever. With the long-term goal of sustainability - solar, hydro, whatever, not excluding nuclear.	Peter	retired
2022-07-11 06:23:39	KwaZulu-Natal		Yes I do	Other	Whatever is available and probably all of them	Cheryl	retired
2022-07-11 06:03:44	Western Cape		Yes I do	Other	Not everyone in this country can afford solar. Solar is expensive and every 10 years you need to buy new batteries and most of our people in this country cannot afford it. So there should be a other alternative solution to our electricity crisis that will be costs efficient to each and every one of our citizens. Wind power will also costs this country a lot of money and that will also come out of our citizens pockets. We must be careful that Cyril Ramaphosa will give his bother inlaw the opportunity to supply energy to our country. This will give the anc another opportunity for corruption and another opportunity to enriched themselves. So there should be another way where each and every citizen of our country can benefit.	Carmen	retired
2022-07-11 05:41:33	Northern Cape		Yes I do	Other	I am of the opinion that coal and nuclear should be the base until problems are solved. Bring back the people who ran the most efficient power in the world	Carol	retired
2022-07-11 05:31:17	Gauteng		Yes I do	Other	It is clear that we cannot continue like this, and a mixture of solar and wind power would be the answer. The current government has proved to be utterly incompetent, and independent producers might at least keep the lights on!	Gail	retired
2022-07-11 05:15:17	Western Cape		Yes I do	Other	A MIX OF SOLAR AND WIND . READY AND WANTING TO SUPPLY	ARTHUR	retired

2022-07-11 03:17:04	Western Cape		Yes I do	Other	Multiple methods of production that are renewable and can be developed into permanent supply installations. No temporary quick fix waste of money government managed 'solutions'. Create a central power coordinator that purchases power from all sources including from the individual Eskom power producing units. Review all export supply and pricing. Allow imports from renewable sources.	John	retired
2022-07-10 23:21:03	Gauteng		Yes I do	Other	All the above-diversity, just get the right people to operate the different types, and stamp out corruption. Fire and charge them with hard labour working from concentration camps- reinstate chain gangs to work on farms and cleaning up the country. But first the county leading party must be disbanded by whatever means, for they have openly admitted that the idiots and stuffedup Rsa.	Douglas	retired
2022-07-10 23:01:30	Western Cape		Yes I do	Other	There is no single solution, in terms of energy production type, that is suited to all regions of South Africa. Solar is good in some areas, wind in others. The most important is decentralization of the power generation process and a true bi-directional grid. Allowance for micro grids, surplus feed back to local grids, and fault resilience are what's needed, not huge megawatt generation facilities.	Ed	retired
2022-07-10 22:42:39	Gauteng		Yes I do	Other	Other selection above means that I select more than 1 option only. Solar Wind Hydro	Lenard	retired
2022-07-10 22:32:13	Western Cape		Yes I do	Other	All the infrastructure in place should be used to produce as much supply to the power grid. No source should be left out. If the infrastructure is there it should be utilized at its maximum. New infrastructure needs to be put in place to support the demands on the nation. This should NOT be in one direction only. With technology developments all sources of electricity supply should be investigated and developed and not only in one direction. We cannot allow South Africa to fall to the demands of a find minority who jet around the world in their jets while demanding the every day person my live off their proposed green fuels which are not necessarily green.	Carla	retired
2022-07-10 22:31:54	Eastern Cape		Yes I do	Other	Ocean waves are in perpetual motion. Surely there are ways to tap into that power?	Em	retired
2022-07-10 22:31:27	Western Cape		Yes I do	Other	Combination of wind, gas and solar	Sanita	retired
2022-07-10 21:48:22	Gauteng		Yes I do	Other	Time is of the essence. It follows that we do not have the luxury or options for what may be best or cleanest in the long term. I am therefore in favour of a practical mix that may well include solar, wind and gas. It is possible to build gas powered generators that could come into operation in as short as 18 months. But, please no 20 year "short term" very expensive Turkish ships. At the same time it seems as if the major block is red tape / administrative delay.	Faan	retired
2022-07-10 21:22:30	Gauteng		Yes I do	Other	Ek dink Suid Afrika het juis potensiaal om verskeie metodes van hernubare energie aan te wend. Ek dink solar en wind is 2 metodes wat uitstekend gebruik kan word in Suid Afrika want dit is natuurlik baie beskikbaar. Dit is 'n dringende saak en Solar en wind plase kan baie vinniger opgerig word as wat steenkool kragstasies gebou word.	Alta	retired
2022-07-10 21:12:23	Gauteng		Yes I do	Other	All forms need to be investigated and implemented asap. Renewable cannot address base load electricity reliability. Nuclear is not feasible in the current economic climate as it is expensive to build in line with international nuclear standards. Government has proven that they can't do this development with Kusile and Medupi. Hopefully private producers will be less prone to corruption and provide the stability that we need. All of it will take time.	Elbs	retired
2022-07-10 20:40:56	Western Cape		Yes I do	Other	At this stage the producing of electricity is urgent and we cannot afford to be picky. A mix of coal, gas, nuclear and renewable energy is urgently needed. Not only do I believe that this is 20 years too late but I also believe that it is high time that some of Eskom's assets (even as little as 10%) needs to be sold to private investors. This will be great for competition and the drive to lower electricity prices.	Attie	retired
2022-07-10 20:25:47	Free State		Yes I do	Other	Eskom needs help. Get private producers to supply elect	Emma	retired
2022-07-10 20:20:35	Gauteng		Yes I do	Other	All available resources & Technology should be applied by the Public & Private sector without unnecessary restrictions, control & interference by the Government. A Free-enterprise mentality should allow all Entrepreneurial efforts at any scale to address SA's Power Supply problems, within only those common-sense limits of Economic Viability, Safety, Cost, Quality, Sustainability and Security. Environmental considerations should be strictly fact/science based with ZERO political interference. The anti Coal, Oil & Gas Lobby should stay away from this issue & rather focus on job creation, fixing all the collapsed Municipalities & myriad of other problems killing our economy through incompetence, crime, corruption, greed & general mismanagement. The immediate abolition of all BEE legislation/regulation is also long overdue.	Erno	retired
2022-07-10 20:20:17	Western Cape		Yes I do	Other	No to nuclear power. Yes to any other means like wind, solar etc. Let everyone get in board and get rid of the red tape. Something should have been done long long ago. Eskom is a failure.	Louisa	retired

2022-07-10 19:44:03	Western Cape		Yes I do	Other	Allow private enterprise to propose solutions.	Franc	retired
2022-07-10 19:29:07	Western Cape		Yes I do	Other	A combination of different energy sources. In a country like South Africa solar energy should be encouraged. Solar energy planning needs to be incorporated in all future building projects.	Ruth	retired
2022-07-10 17:29:40	Western Cape		Yes I do	Other	The source of electricity (Eskom) should be split up into several independent sources such as one for each province. Each source of electricity should manage its own materials procurement, electricity production, transmission, distribution and finance functions. The electricity production function of each source would include an important maintenance unit which would require close monitoring. Every effort should be made to employ only skilled, trained, and motivated people at all levels who report regularly about their function.	Gordon	retired
2022-07-10 17:28:36	Western Cape		Yes I do	Other	Anything that can actually produce power. We are not in a position to be picky.	Alwyn	retired
2022-07-10 16:56:47	Western Cape		Yes I do	Other		Stephan	retired
2022-07-10 16:21:51	KwaZulu- Natal		Yes I do	Other	Dear Minister Mantashe, Please consult with experts who know what they are talking about, rather than take uninformed, or self-serving opinions from politicians or cadres. We need to consider the long term future of South Africa and what we leave to posterity, NOT what suits us personally at present.	Rona	retired

				<p>South Africa, like all other countries must use a combination of different energy resources, but as was the case in Australia, Vietnam, Germany, and a range of other countries, the first and immediate approach should be to use solar energy as far as possible. This can only be done by adopting the generation model that was used elsewhere in the world successfully and relatively quickly. Allow households, farmers, and any commercial companies to generate their own electricity using solar panels, and get the private electricity distribution companies (without any State involvement in any way) buy the excess electricity from the households through a supply reticulation grid at a slightly (marginally) lower price than the price at which electricity is sold by the private sector supply companies to the same households through the same reticulation grid. (the private reticulation grid can then also be so developed to cut out cable and electricity theft). This supply can obviously only take place during daylight hours, but the energy demand is also the highest during daylight ours. Any excess supply on the grid can off-course be stored using any one of a number of alternatives, eg water pumping from reservoirs to supply dams higher up and thus generating hydro-power for the grid at night, the German alternative is to use the excess electricity to produce hydrogen, which is used for hydrogen fueled power generation at night and peak hours, the third option is to use battery storage (not the best option), to use the energy released during overnight cooling cells with eutectic melts (sodium-potassium chloride mixtures is used in some prototypes, etc), and even for the harvesting of tidal energy using the excess energy to pump water into tidal reservoirs as is done in some parts of the world) etc. This supply system overcomes the need for massive capital expenditure by suppliers, corruption and mismanagement by City Councils, Central Government etc) because they allow the private sector companies to spread the capital investment to thousands of households (share holders), whom they will reward by supplying very cheap electricity (difference between what they sell and what they buy) over a 20 plus years. This system has been so successful in Australia and Vietnam that an oversupply of electricity was achieved in a very short time (about 1 year).</p> <p>Off-course nobody in his right mind will trust ESCOM or the Government to manage this, their failures have proved they are too corrupt and/or too dumb to manage this even on a minuscule basis.</p> <p>The remaining part of the energy mix could be hydro-electricity (but our resources in this area are very limited), wind (but I think that the long-term climate impact of wind is not yet well enough understood, because the harvesting of wind energy must have an impact on the atmosphere-hydrosphere coupling and the energy transfer from the atmosphere to the hydrosphere. Harvesting of the ocean currents (in our case the Mozambique current) is probably the simplest and cheapest source of energy available to us - but again the environmental impact resulting from the reduction of the speed and flow-volumes of the current is not yet understood and could also be severe. Lastly the nuclear option is probably the most sustainable (if breeder reactor technology is commercialized - which will happen sooner or later) but in this field South Africa has since 1994 gone back to the "Stone Age" technologically and in any case we are too poor to consider this option at present. We must recognize that the coal-option is no longer viable, our resources of low quality coal is an environmental disaster (as we have now) and the little bit of high quality coal that is still left is far too important as a reductant for our massive ferrous metal resources than to burn it to produce energy. All we will achieve if we continue this way is to sterilize perhaps our only natural resource still left. The only hydrocarbon option open to us is to import natural gas from Cabo Delgado in northern Mozambique (if the insurgency there can be controlled ?) and/or to hope that we can produce gas from the Continental Slope south of the country (Total project), but with the high velocity of the Mozambique current on the continental slope in a hostile physical environment, I would not hold my breath waiting for the development of this resource.</p>

2022-07-10 14:54:01	Eastern Cape	Yes I do	Other	All forms of private power generation are required: including hydro, wind, and solar	gavin	retired
2022-07-10 14:45:42	Western Cape	Yes I do	Other	I think that both solar and wind power are well suited to the Western Cape . Independent Power Producers should be allowed to immediately start production	Tony	retired
2022-07-10 14:39:16	Gauteng	Yes I do	Other	Subsidised battery backup system using solar panels, lithium batteries and hybrid inverters. Homes become less reliant on Eskom. Eskom feeds commercial power.	Paul	retired
2022-07-10 14:04:09	Western Cape	Yes I do	Other	We should continue using coal, along with wind, solar and any other methods that are immediately to hand. It is therefore vital to allow Independent Power Producers to supplement South Africa's electricity demands. We can no longer rely on Eskom as is abundantly clear. Eskom will cause the complete collapse of our economy and our country.	Stephanie	retired
2022-07-10 13:55:00	Western Cape	Yes I do	Other	Any form of renewable energy is necessary right now. But we need to get rid of Mantashe as well. This is far overdue!	Melanie	retired

2022-07-10 12:50:45	Western Cape		Yes I do	Other	A combination of alternative sources should be used. Wind, Solar, Hydro. No fossil fuels and no Nuclear as we have seen what devastation this can cause.	Peta	retired
2022-07-10 12:42:18	Western Cape		Yes I do	Other	Any renewable source. S.A. does not appear to have the competence to safely maintain nuclear power stations. We have to follow the rest of the world and move away from fossil fuels. Power from renewable sources is the way to go. Its time to put aside personal greed and get this country up and running again.	Jacqueline	retired
2022-07-10 12:26:58	Gauteng		Yes I do	Other	The private sector is the only way to permanently resolve the energy crisis in South Africa; the government has sufficiently demonstrated that they are incapable and incompetent to run any business. The solution therefore is a combination of government taking the responsibility for the grid, privatising the coal plants, and getting private sector on board with the supply of solar and wind electricity. The way to go is wind and solar, but this will take time. The end goal should however be renewable energy. Solving SA's energy crisis immediately can only be achieved if participation is widened and the efficiency of the private sector is introduced.	Stephan	retired
2022-07-10 12:21:28	Western Cape		Yes I do	Other	Independence is the only workable solution. No National disaster such as "Load Shedding" can be possible if power is generated by thousands of individual producers. Outages [if at all] would be very local. All methods of electricity production has their usefulness, depending on the location. Examples are Port Elizabeth - Wind; Karoo - Sun; Gariep River - Hydro and so forth. Nuclear is not for South Africa as it is dangerous because of the violent nature of the majority of citizens. A riot / terrorist attack such as July 2021 can destroy this country. Energy production should not be in the hands of this Country's incapable Communistic Government. There is nothing they are good at except the ability to destroy. They are at present issuing IPP licenses, but when the plant is ready for production, they refuse to allow it to operate. Typical Communistic behavior.	Pieter	retired
2022-07-10 12:20:54	Western Cape		Yes I do	Other	I believe electricity can be generated from multiple sources and all of these sources should be investigated. - determine which source/s are available.(I suppose this have already been done). - utilise the appropriate source/s. - The appropriate sources should inter alia include photo-voltaic , wind and a number of other sources, including nuclear, depending on cost effectivity and geographical challenges.	Franciscus	retired
2022-07-10 12:20:51	Western Cape		Yes I do	Other	I believe electricity can be generated from multiple sources and all of these sources should be investigated. - determine which source/s are available.(I suppose this have already been done). - utilise the appropriate source/s. - The appropriate sources should inter alia include photo-voltaic , wind and a number of other sources, including nuclear, depending on cost effectivity and geographical challenges.	Franciscus	retired
2022-07-10 11:57:33	Gauteng		Yes I do	Other	Clearly the current ANC Government and their Service Provider for Energy Eskom is failing dismally in providing electrical energy to the Country. Therefore I suggest to bypass and scrap the red tape and these corrupted bunch of people and engage in experts from abroad to build and provide the Country with Electrical energy using whichever natural recourses we have to our exposal in SA!	Chris	retired
2022-07-10 11:55:04	Mpumal anga		Yes I do	Other	Eskom needs to privatized and repaired to provide in the immediate needs of SA. SA will not be able to move away from coal within the foreseeable future. Private companies must be allowed to generate electricity, be it solar, wind or any other means of generation, and be able to put it back into the country wide network to support Eskom. The monopoly with the ANC has over Eskom must be broken if SA wants to survive.	Johannes	retired
2022-07-10 11:44:48	Western Cape		Yes I do	Other	I will leave it to the experts to decide what method will be used.	Rodney	retired
2022-07-10 11:39:34	Western Cape		Yes I do	Other	Utilize all available sources of electricity generation. Build a new power station (nuclear or coal) for long-term solution and stability.	Fanie	retired
2022-07-10 11:31:57	Gauteng		Yes I do	Other	I chose other because whichever is the most viable for each region in South Africa should be used	Lynette	retired
2022-07-10 11:29:08	Western Cape		Yes I do	Other	Privatise ESCOM Privatise the distribution network. Introduce PRIVATE supply to the grid. NO GOVERMENT INVOLVEMENT!!!!	Braam	retired
2022-07-10 11:23:50	Western Cape		Yes I do	Other	We need independent power producers and Eskom should be privatised. Our priority is to expand and stabilize the grid by whatever means possible. We need to go greener as part of this process.	Laura	retired
2022-07-10 11:22:41	Gauteng		Yes I do	Other	Eskom gaan te lank neem om uitgesorteer te word en ons moet dringend na alternatiewe metodes kyk wat wel ook bekostigbaar is vir almal. Ons ekonomie kan nie langer so deur Eskom vernietig word nie. Ek het "other" gemerk, omdat ek wind en solar verkies.	Alfreda	retired

2022-07-10 11:22:13	KwaZulu-Natal	Yes I do	Other	<p>There's no one answer to the question of immediate needs. Seeing as Eskom is intent on bringing the country to its knees, it is evident that they are not the answer.</p> <p>Support private producers and any other means of generation so long as it does the job and not at the continued expense of the tax payer or business through lack of an economy.</p> <p>Government must learn to be a support structure to the country's development and NOT the perceived answer to every problem, especially in the area of provider and administrator of power and energy.</p> <p>All state owned entities must be handed over to the private sector to control and manage.</p> <p>End Government regulation, litigation, bureaucracy and its resultant corruption and maladministration for ever by taking these structures off their hands now.</p>	Marq	retired
2022-07-10 11:21:21	Western Cape	Yes I do	Other	A combination of "green" production allows this country options which they certainly do not have at present!! It is a complete "no brainer" to scrap all the red tape preventing our country to supply reliable power. This situation is further sending South Africa into a "downward" spiral we will not recover from socially or economically unless we do something drastic. The corrupt, incompetent ANC has "dragged" us down far enough and we need "action, action action!!" NOW!!	Barbara	retired
2022-07-10 11:20:12	Western Cape	Yes I do	Other	Privatize Eskom. Let it be run by people who know what they do. Get rid of the ANC!	PIET	retired
2022-07-10 11:16:40	Western Cape	Yes I do	Other	I said "Other", because this should be a multi-prong approach. I prefer the green options - Solar, Wind and Hydro.	Letitia	retired
2022-07-10 11:12:16	Western Cape	Yes I do	Other	A combination of the above	Ralph	retired
2022-07-10 11:12:14	Western Cape	Yes I do	Other	A combination of the above	Ralph	retired
2022-07-10 11:10:19	Mpumalanga	Yes I do	Other	<p>I said "Other", because this should be a multi-prong approach. I prefer the green options - Solar, Wind and Hydro. This country however should have at least one more Nuclear power station that could supply a reliable base-load at a very competitive cost - it is also environmentally "clean" - the initial cost to construct is high and it will take a long time.</p> <p>Now what about promoting Small Scale Embedded Generation Roof-top Solar systems - make it attractive for the general public and small businesses - this will over time put less pressure on an Eskom and will be very good for the environment as well as distributing load on the distribution power system.</p>	Johan	retired
2022-07-10 11:07:22	Gauteng	Yes I do	Other	Being on the grid is still the best power you can have. Solar, gas and other is just a temporary solution. They also break and believe me when they do you will have to spend a lot more to have it fixed. So I say privatise Eskom. Let people that now what they are doing fix Eskom's problem.	Laetitia	retired
2022-07-10 10:47:55	Gauteng	Yes I do	Other	<p>Mr Minister what is wrong with you and your absolutely idiotic continual stopping of private power suppliers.</p> <p>Out there, there are very and seriously electrical and electronic educated people who have some serious degrees and diplomas in their respected fields who could rescue this Titanic from its eventual death. It is close to 30 years with our Eskom from a pilot electric company world wide respected and admired, to today in debt and the laughing stock all over the world.</p> <p>Allow wind power, solar power and natural gas to be implemented by private enterprises this will definitely in time bring about relief from this economically disastrous situation in which you and your forerunners in Eskom have brought about.</p> <p>Take this letter seriously otherwise we will be exactly in the same as each and every country north of the Limpopo River is power wise.</p>	Anthony	retired
2022-07-10 10:42:43	KwaZulu-Natal	Yes I do	Other	Eskom not coping Feel best solution investment of private alternatives	Gloria and Grant	retired
2022-07-10 10:42:43	KwaZulu-Natal	Yes I do	Other	Eskom not coping Feel best solution investment of private alternatives	Gloria and Grant	retired
2022-07-10 10:37:06	KwaZulu-Natal	Yes I do	Other	<p>Sugar Industry should be allowed to generate electricity into the grid.</p> <p>The Industry is currently generating its own power, allow excess to be fed into grid where available. Encourage and incentivise Industry to increase its generation capacity. This will be a win win all round.</p> <p>Encourage and incentivise power generation from biomass.</p>	Rattankumar	retired
2022-07-10 10:37:05	Eastern Cape	Yes I do	Other		Mike	retired
2022-07-10 10:21:38	Eastern Cape	Yes I do	Other	The use of all renewables should be encouraged wind, sun and hydro energy should be harvested and fed into the grid or use privately ASAP. We have the most self serving and narrow minded ANC government mismanaging every aspect of our lives... solar energy harvesting in its many forms is changing lives	Annette	retired
2022-07-10 10:18:21	Limpopo	Yes I do	Other	We need a combination of production. Nuclear can work but we don't have time now, it will take too long to do. The answer is a combination and allowing private enterprises to supply their bit.	DB	retired
2022-07-10 10:18:18	Limpopo	Yes I do	Other	We need a combination of production. Nuclear can work but we don't have time now, it will take too long to do. The answer is a combination and allowing private enterprises to supply their bit.	DB	retired

2022-07-10 10:06:45	Eastern Cape		Yes I do	Other	Various forms of power could be installed in different areas where it could be best utilized.	Shaan	retired
2022-07-10 10:00:21	Gauteng		Yes I do	Other	The source which can be introduced the soonest before Mantashe destroys the country and its people. NO COAL FIRED SOLUTIONS PLEASE.	Samuel	retired
2022-07-10 09:55:35	Western Cape		Yes I do	Other	Multiple variations of electricity production are needed to keep the lights on in SA, So let all producers join the grid without all the red tape the ANC government have put in place.	David	retired
2022-07-10 09:48:25	Gauteng		Yes I do	Other	ANYTHING THAT GETS US PAST THE ESKOM BLACKMAIL OF THE CITIZENS OF OUR COUNTRY!	Kathleen	retired
2022-07-10 09:47:18	Western Cape		Yes I do	Other	Any method of electricity production should be performed, subject to internationally agreed / accepted safety / oversight regulations. ALL inhibiting regulations / policies (like cader deployment, BEE in whatever shape or form, price & conditional tender rules, etc) must be scrapped UNCONDITIONALLY & SPEED HASTE. The rule should be South Africa first - without government control as government should only create the environment in which private enterprise can blossom, function and perform their entrepreneurial function for which government is ill equipped.	Kobus	retired
2022-07-10 09:33:35	Western Cape		Yes I do	Other	Wind & solar power are the answer. South Africa has plenty of both! The problem with wind turbines is what to do with them when they are kaput. But I'm sure that can be solved renewably.	Hilary	retired
2022-07-10 09:30:42	Eastern Cape		Yes I do	Other	Unfortunately SA cannot afford to put up more nuclear power stations which I believe would be the long term answer, but right now, as Eskom currently cannot generate enough power, the govt MUST allow the private sector to produce energy for the national grid in order to stop the loadshedding which is really hurting our economy	Caroline	retired
2022-07-10 09:28:39	Gauteng		Yes I do	Other	I believe we need multiple methods of power production A mix of renewables, coal and the small nuclear reactors . Equally, we should have multiple large and small producers feeding into the grid. Escom should be divided into production and distribution companies. Up for sale , present staffing both numbers quality and honesty evaluated and retained. The less we have owned and gov controlled with free and fair competition No BEE the better for everyone	Jennifer	retired
2022-07-10 09:24:18	Western Cape		Yes I do	Other	The situation is so dramatic that only a combination of sources will do. Let's harness them.	Michael	retired
2022-07-10 08:58:21	Gauteng		Yes I do	Other	Without diminishing the well intended objectives of this questionnaire, asking laymen/ women about their preference as to the energy source to solve the immediate problem is and can only be an exercise in PR because if an immediate solution isn't formulated, there might not be an industrial future for the country. There are two problems; an immediate " get out of jail" one and a long term sustainable solution one. As others have said, the Government has many times in most arenas of endeavor proven to be incompetent in everything they have undertaken; to the point that they can claim success in having vacuumed the country of incompetent people into a collection center so that the private sector is free to have a clear run at finding solutions if given the freedom to do so. If one reads the Meridian Report, then the urgency of execution of a solution is brought into sharp focus because their timeline for action is already 12 months behind events and urgent action was called for then! What's it going to take; a complete shutdown?	Malcolm	retired
2022-07-10 08:45:19	Gauteng		Yes I do	Other	Private entrepreneurs have put forward solutions to solve these circumstances	Baruch	retired
2022-07-10 08:09:27	Gauteng		Yes I do	Other	Presently ESKOM has too many issues and as usual people stiking instead of putting the shoulder to the wheel and supporting the country the way it used to be! Present Government has proved themselves useless and to blame for the corrupt ways in which the residents of this country now find themselves!!! Time for new Governance and new ways and good ideas of creating power utilities that will bring this country out of it's spiral spin. There are enough Solar and Windfarm ideas already in use and even Coal that is being shipped out over out borders! Why is the Coal an issue!! Hundreds of trucks per day leaving for Maputo with tons of Coal along the N4.	Philip	retired
2022-07-10 08:06:18	Eastern Cape		Yes I do	Other	We need a variety of energy sources. Solar, wind, hydroelectric are all renewable which if unblocked by red tape, could greatly enhance our energy production.	Helen	retired
2022-07-10 08:02:30	Western Cape		Yes I do	Other	The monopoly in existence by the SOE owned ESKOM needs to be removed immediately with Independent Power Suppliers opened up country wide. The method of producing required power should be geared to the most appropriate method for the different areas of the country - be it coal, hydro, solar, wind, gas. The criteria of what method to use should be what and which will meet the immediate needs for production and should not be limited/restricted to one method.	Edwina	retired
2022-07-10 07:58:19	Gauteng		Yes I do	Other	All alternative sources should be explored.	Alida	retired
2022-07-10 07:47:58	KwaZulu- Natal		Yes I do	Other	We need multiple methods & suppliers to generate power. All our eggs are in one basket.	Robbie	retired
2022-07-10 07:37:30	Gauteng		Yes I do	Other	Energy supply in SA should be open to any and all supplies. The most competitive will survive and benefit all South Africans, no state interventions except health and safety	Raymond	retired
2022-07-10 07:29:46	Gauteng		Yes I do	Other	All of the above	Gail	retired

2022-07-10 07:12:01	Eastern Cape		Yes I do	Other	it is only logical that the escom monopoly be ended any form of electricity should be looked at - the cheaper the better and the less impact on the environment the better all government red tape should be done away with - this is an emergency situation and time is of the essence - obviously the aim must be to get rid of load shedding as soon as possible and to become less dependent on escom the government should keep their nose out of any form of regulating power as our government is unable to control anything properly	Charl	retired
2022-07-10 07:05:40	Gauteng		Yes I do	Other	Renewable energy production	Johan	retired
2022-07-10 07:04:06	Gauteng		Yes I do	Other	What we have works if operated correctly. Bring justice to corruption and criminal activities. Scrap racism in the work place and put competent qualified people in charge. If government doesn't stop criminal activities then even competent peoples hands are tied.	Andre	retired
2022-07-10 06:52:57	Western Cape		Yes I do	Other	All options need to be open	John	retired
2022-07-10 06:02:36	Gauteng		Yes I do	Other	As many natural and renewable methods should be used as possible, wind, solar, hidro, wave , etc. Private sector should be used to investigate , create, build and manage these initiatives. Coal, gas and nuclear should be used until other forms of generation gets established. However Private sector should be used to make these as cost effective and reliable as possible. Egos of legislators should be put aside and national interest be prioritized.	Hendrik	retired
2022-07-10 05:49:59	Western Cape		Yes I do	Other	Electricity is the lifeblood of any modern conomy. Restrict it and the consequences will be severe. We have a crisis. Under the watch of the ANC government Escom (once the world's most cost rffective generator of electricity) was mismanaged into a failure. The time to act is NOW. To design a solution it is important to create an enabling environment within which all parties can optimally function and is conducive to new entrants into the energy sector. Amongst others, this entails: 1. Remove restrictive legislation that prevents or hinders any sector to generate, distribute or sell electricity. Of course aspects like environmental impact, health and safety, etc cannot be ignored. 2. Change legislation to effectively prevent labour at state institutions to strike or embark on other forms of industrial action that cripple service delivery. Establish a dispute resolution mechanism to address workers' grievances. Workers partaking in such illegal action should be summarily dismissed. 3. Electricity generation should not be restricted to only a few methods but should be opened up to enable any form and any size. 3.1 Small scale solar generation by individual households or small businesses can be "sold" to Escom by way of reverse running electricity meters. This will free up a lot of electricity to power the rest of the economy and should be implimented immediately. Local solar panel manufacturing and reverse enabled electricty meter-manufacturing should be encouraged. 3.2 Generation that can run at night should be developed and encouraged to balance the additional generation from 3.1 This can be wind, water borne generation like the Sterkfontein dam facility in the Oliviershoek pass, energy from waves or tidal activity, etc. 3.3. Large manufacturing concerns that generate a lot of heat as part of their production process, TSB, Iscor, etc. should be motivated to utilise this energy for electricity generation. 3.4. Storage dams that have the potential to be converted to generate electricity should be made available for proposals by the private sector or local authorities. The same applies to the water flowing from Lesotho which enters South Africa through supply tunnels near Clarens in the Free State. 3.5. Natural resources like the Augrabies falls should be treated in the same way as 3.4 3.6 Electricity and or energy sources purchased from neighbouring countries should be increased and expanded. 4. Existing distribution infrastructure should be utilised to feed newly regenerated electricity into the grid. 5. Get rid of Gwede Mantashe. He is a serious stumbling block. 6. Regional and local aithorities should be encouraged to purchase energy from alternative suppliers and develop new generation in their areas. 7. Escom generation should no longer be protected from competition and a workforce reduction should be done to ensure a more cost effective utility.	Anton	retired
2022-07-10 05:32:25	Western Cape		Yes I do	Other	A good example is Singapore. South Africa can't get rid of all the garbage. Burn it to generate electricity. We will never run out of garbage. It will also keep our Country clean.	Jossie	retired
2022-07-10 05:31:08	Gauteng		Yes I do	Other		Kevin	retired
2022-07-10 05:28:38	Western Cape		Yes I do	Other	Solar and wind are our best current additional options and red tape is simply there to aid corruption. (It must be remembered that we have sufficient power production from our current installed plants but mismanagement, overstaffing, exorbitant repair and spares costs due to BEE/BBBEE etc . are crippling these facilities and urgent and drastic corrective action is needed here or all the solar and wind energy we install will not be enough.)	Richard	retired

2022-07-10 05:23:03	Gauteng		Yes I do	Other	We need a mix of various power generation models in our country and sustainable, renewable power from various sources needs to be brought on board ASAP. Lack of power is crippling our economy and if something isn't done soon, there will not be an economy to save	Jane	retired
2022-07-10 04:38:51	Gauteng		Yes I do	Other	I believe electricity can be derived from multiple sources and all of these sources should be used. The availability of the source needs to be ascertained and then the appropriate source used. This includes solar nuclear wind and a number of other sources.	George	retired
2022-07-10 03:49:28	Western Cape		Yes I do	Other	Wind, solar, renewables, a mix	Anne	retired
2022-07-10 00:52:16	Gauteng		Yes I do	Other	What ever is needed to keep the lights on to prevent the worst case of disaster in our country.	George	retired
2022-07-09 22:19:06	Western Cape		Yes I do	Other	All economically viable energy options should be allowed to suppliment or replace Eskom... independent suppliers must be allowed to decide how to generate	Andrew	retired
2022-07-09 20:09:54	Western Cape		Yes I do	Other	Combination of various energy sources	Berthold	retired
2022-07-09 20:09:52	Western Cape		Yes I do	Other	Combination of various energy sources	Berthold	retired
2022-07-09 20:04:16	Western Cape		Yes I do	Other	There are many options available, all we need is a commitment from the ruling party to serve SA with honesty and integrity The ANC is responsible for the mess this country finds itself in We need qualified experienced people We need to recover the state capture looted millions We need defaulting municipalities to pay Eskom	Esmé	retired
2022-07-09 19:59:08	Mpumal anga		Yes I do	Other	Our present Coal Fired Electricity Power Plants need a properly trained and skilled workforce to bring the maintenance of these power plants up to standard and to keep these maintenance standards. Trade unions are hampering the process of access to a skilled workforce based on skills and not on race. Trade unions are mainly in pursuit of their own interests and not in the interest of the present electricity energy crisis in the country. Is necessary to bring Solar, Wind and even Hydro renewable-energy producing industries into the grid without delay / red-tape, to ease pressure on the national electricity grid. Lastly; Electricity is not for free but must be paid for by everyone who is making use of it and this policy must be enforced.	Hartmut	retired
2022-07-09 19:54:59	Eastern Cape		Yes I do	Other	Wind, solar, wave action	Marilyn	retired
2022-07-09 19:51:33	Western Cape		Yes I do	Other	SA desperately needs a renewal and fresh look at all options, preferably options which is operated like and/or excludes SOE's Disaster is looming	Esmé	retired
2022-07-09 18:19:57	Gauteng		Yes I do	Other	I believe in diversity, not all your eggs in one basket, but with specific focus on solar, wind and hydro. ESKOM should be privatized but in a clear and transparent manner. NO MONOPOLY, encourage competition such as in cellphone service providers.	Ada	retired
2022-07-09 18:07:03	Eastern Cape		Yes I do	Other	Private enterprizes should be allowed to generate alternate power using all available options in the short term. For the future, a combination of wind, solar , hydro and nuclear.	Antjony	retired
2022-07-09 18:00:57	Gauteng		Yes I do	Other	Eskom failed	Elizabeth	retired
2022-07-09 17:55:46	Western Cape		Yes I do	Other		Rosemary	retired
2022-07-09 17:55:22	KwaZulu- Natal		Yes I do	Other	Anything that works should be brought forth. Eskom has failed!!!!	Guy	retired
2022-07-09 17:47:31	Free State		Yes I do	Other	Privaat maatskappye wat hernubare krag opwek behoort toegelaat en aangemoedig te word om so gou as moontlik so veel as moontlik krag aan Escom te lewer om te help om ons van beurtkrag te onthef. Daar is nie een enkele kragbron wat in Suid Afrika se kragbehoefes kan voorsien nie. Dit sal n kombinasie van verskillende bronne moet wees maar klem moet gelê word op hernubare krag omdat dit op die lange duur volhoubaar sal wees.	Cornelia	retired
2022-07-09 17:04:02	KwaZulu- Natal		Yes I do	Other	We need as many safe reliable means of power generation as possible with a huge push for green generation	A A	retired
2022-07-09 17:03:33	KwaZulu- Natal		Yes I do	Other		Therersa	retired
2022-07-09 16:56:07	Western Cape		Yes I do	Other	GA micture of solat/ wind which is the way the first world has gone would be best. G ood clean air and wind and sun are all easily available .	Eileen	retired
2022-07-09 16:51:03	Western Cape		Yes I do	Other	Use whatever works best so that we can have power again.	Sue	retired
2022-07-09 16:47:47	Western Cape		Yes I do	Other		Yvonne	retired
2022-07-09 16:43:28	Western Cape		Yes I do	Other	I am no sure which method of electricity production would suit South Africa. I would leave that to the experts to decide.	Bernie	retired

2022-07-09 16:41:57	Western Cape		Yes I do	Other	Whatever is the most economical solution.	Robert	retired
2022-07-09 16:41:32	Gauteng		Yes I do	Other	Solar is an option, however, SA produces sufficient day time electricity. What they lack is evening power and sufficient peaking power for short periods. Therefore either solar with battery / supercapacitor storage or gas peaker units. Long term options are also required. Nuclear (NOT Gov owned) is best base power option. We need more IPP producers, less ESKOM generation. Municipalities should be allowed to contract directly with IPP.	W	retired
2022-07-09 16:24:09	Western Cape		Yes I do	Other	There is only one reason why we are in emergency mode to produce electricity for our country, the mismanagement of SA by RAMAPHOSA AND HIS CABINATE OF THUGS is directly responsible for our situation, fire the lot so our country can return to normal. Take the necessary steps to get our power up and running, by whatever method and means, the safety and environment to get first priority. Death penalty which includes the guilty scrap merchants for cable thieves apply, harsh measures for a criminal thriving country.	GREGORY	retired
2022-07-09 15:36:43	Western Cape		Yes I do	Other	Biomethane power	Lucy	retired
2022-07-09 15:30:55	Western Cape		Yes I do	Other	There has to be a combination of all technologies to ensure sustainability. To ensure cost effectiveness the use of coal in the short term has to be optimised - get Mossgas back on track and sort out ESKOM's problems - state of emergency for Eskom and get competent management back for operations and maintenance.	Louis	retired
2022-07-09 15:16:37	Western Cape		Yes I do	Other	I am no energy expert the reason I chose other, we need an immediate solution to the problem and would welcome a change from this useless system that we have had problems with since 2005 escalating year on year to 2022, which is now the end! Shut them down and please let's move forward away from this arcade age and government! Thank you	Sandy	retired
2022-07-09 15:06:22	Western Cape		Yes I do	Other	Unleash private enterprise and the problem is solved. It is a no brainer	Donald	retired
2022-07-09 14:59:51	Western Cape		Yes I do	Other	My answer above is "Other" as we need a combination of methods to provide us with power. However, I think it should be made easy for each individual, family or community to generate their own power so as to get us mostly off the grid.	Coen	retired
2022-07-09 14:49:00	Western Cape		Yes I do	Other	Red tape and all regulations, including BEE and local content requirements, that prevent, restrict or unnecessarily delay independent power producers from supplying as much power as they are able to generate to the Eskom or Municipal grids should immediately be suspended. The method of electricity production should be left to the IPP. The only limitations should be compliance with necessary technical and safety requirements and meeting a demand that Eskom is unable to reliably meet at a lower cost from their own generation plants.	Bryan	retired
2022-07-09 14:38:25	KwaZulu- Natal		Yes I do	Other		Cherry	retired
2022-07-09 14:26:39	Western Cape		Yes I do	Other	What ever is needed to keep electricity on is needed. SOE's should not be run by government	Denise	retired
2022-07-09 14:12:15	Gauteng		Yes I do	Other	Allow ANY METHOD to save businesses and not lose more job opportunities through loadshedding	Maria	retired
2022-07-09 13:55:45	Western Cape		Yes I do	Other	With the help of professional consultants and independent energy providers we could become a wind and solar powered country at affordable rates.	eleanor	retired
2022-07-09 13:51:15	Western Cape		Yes I do	Other	Workable short-term solutions must be researched and implemented urgently to provide additional capacity. A multi-pronged approach that includes renewables, coal (though this should be phased out over time), nuclear, hydro, gas and imports, is needed for long term sustainability.	Wendy	retired
2022-07-09 13:39:22	Gauteng		Yes I do	Other	A multi pronged approach is required for long term sustainability . However short term actions are required to provide new generation capacity as soon as possible. Options include subsidising or giving some tax relief to households, commercial enterprises and manufacturing plants to go solar or increase existing capacity. Longer term provision should be made for households and businesses to sell back into the grid but this requires new legislation and processes. There are many excellent examples of other countries who have gone this route. The longer term ix should include wind, solar, nuclear, clean air coal, gas and nuclear. Legislation for IPP's needs to be amended yesterday - this all started in about 2010 with a bang and then fizzled out. The big concern is accountability, transparency and sustainability - all of which SA government has a shocking track record. The Covid procurement fiasco being the most recent example. Combining speed, transparency, accountability and cost in the procurement legislation is probably one of the biggest challenges. Monitoring execution and delivery must be a priority and built into any legislation. so short term, medium term and long term all need to be considered without raising debt to even higher overwhelming debt.	Eileen	retired

2022-07-09 13:31:44	Gauteng		Yes I do	Other		Frederik	retired
2022-07-09 13:21:56	Eastern Cape		Yes I do	Other	Any energy supply will be better than what we currently have from Eskom. Scrap the red tape and go green in the future.	Gail	retired
2022-07-09 13:20:40	KwaZulu- Natal		Yes I do	Other	A blend of all sources in order to speedily and responsibly address the existing critical shortages mindful of the adverse effect the current shortage is having on job creation and using international best practices / experience together with independent professionals and without the continued involvement of all the ANC cadres which have enriched themselves whilst reducing Eskom from its previous position of prominence to the wreck it is currently	Will	retired
2022-07-09 13:03:55	Western Cape		Yes I do	Other	Whatever works to get South Africa . I would agree to nuclear only if the supplier is credible (not Russia) and it's somewhere else than the West coast.	ethne	retired
2022-07-09 12:49:07	Western Cape		Yes I do	Other	Whatever form of power and soonest to ease the failing Eskom	Lindsay	retired
2022-07-09 11:52:06	Gauteng		Yes I do	Other	We could use a combination of different forms of alternate energy.	Pam	retired
2022-07-09 11:50:33	Western Cape		Yes I do	Other	I think more than one type of electricity production is necessary to meet the needs of the country's electricity requirements. To go for just one type of electricity production would be stupid. A combination of all, using what we have and including what private producers make onto the grid would go quite a way to making our system more stable. Nuclear would PERHAPS be the best producer but to build another nuclear power station would take 20+ years and we need to fill the gap in production in the meantime?	Angela	retired
2022-07-09 11:43:18	Eastern Cape		Yes I do	Other	We should use every resource possible. Complete de-regulation - Eskom cannot cope with the demand, the various alternatives should complement each other. This burden should not be carried by the taxpayer - everyone should pay for electricity, or go without. Cable thieves & copper wire buyers should be charged with treason/sabotage and locked up for at least 10 years. The root cause of the problem must be addressed - all this political talk with no enforcement does not work for the victims, who are actually customers that are not being serviced.	Brian	retired
2022-07-09 11:38:49	Western Cape		Yes I do	Other	A combination of solar , wind & gas as well as coal until renewables are able to deliver enough capacity. Allow more renewables Yesterday already. Eskom will fail to deliver while we have a workforce that does not deliver , sabotages , and still demands an increase. We cannot allow a few to hold the country to ransom !!!!! Another problem is poor Political Leadership that allows these people to get away with Murder. De Ruyter and co will never succeed without the support of the Political Leadership , and I am afraid it is never going to happen.	Alan	retired
2022-07-09 11:32:10	Free State		Yes I do	Other	God Almighty blessed each country with earthly sources, habitats, resources to assist and help all people in a particular country. Use all sources available in SA based on all relevant constitutional and honest, reliable, sustainable governance and best practices and at an affordable cost to all. Pensioners and disabled people should get water and electricity free of charge or at least at a much lower cost than average charges. The same in other sectors eg fuel , travel, medical aid, housing.	Martha Jacoba	retired
2022-07-09 11:05:17	Western Cape		Yes I do	Other	Look at AREP , look who owns the company and the links to the State President and family. This includes the Minister of Energy etc, etc. Do some research and you will find out that they are set to take over as the monopoly suppliers of alternative energy in South Africa after Eskom fails as an energy supplier. Beware! The ANC will control energy in the country!	Willem	retired
2022-07-09 10:52:37	Western Cape		Yes I do	Other	Solar is great but needs backup when there is no sun. We already have solar but we need Eskom on rainy dull days. So a wind, gas, hydro would be great as a back up.	Mary	retired
2022-07-09 10:52:11	Western Cape		Yes I do	Other		Marlene	retired
2022-07-09 10:48:56	Gauteng		Yes I do	Other	Good morning to the DSA Team, if the government does not have the resources to maintain and run the power supply required by both the itiens and the industry, then should relinquish the power thereof (excuse the pun) to be run by more capable people and dissolve 'ESKOM' in it's entirety. Finances have been pilfered and it has also been reported that whistle-blowers are being threatened. The South African citizens are TIRED of the " load shedding " saga to which the president seems completely oblivious as to which level the public has to contend with on a daily basis. Let me not include the loss we suffer of frozen foods which has to be thrown away due to 'ROT' as well as burglaries and other crimes which the unsavoury characters have 'carte blanche' during the load shedding periods??????	Enver	retired
2022-07-09 10:46:59	KwaZulu- Natal		Yes I do	Other	Here we asking for legislation to be changed and then what type of energy? We should focus on all energies from coal, wind ,sun etc. Coal polution can be reduced with new technologies, SA has huge coal reserves, lets utilise all energy options to put and end to load shedding. Never put all your eggs in one basket. Change the Legislation because ANC is not capable of organizing a piss up in a brewery.	Stephen	retired

2022-07-09 10:42:22	KwaZulu-Natal	Yes I do	Other	<p>Make all of the above free for private supply as each way has its drawbacks (renewal wind generators are high maintenance machines, sun power is cheap by day but not easy to store for the night) Secondly; bind Mantashes powers to put "a spoke in the wheel" (to hinder)).</p> <p>Thirdly: there are some very good concepts for new style wind driven machines; encourage research, because it's the propellers and gearboxes that need expensive maintenance presently.</p> <p>Finally; it's about survival now, so get out of the global carbon reducing agreements. Our plant life needs the carbon anyway).</p>	Martin Heinrich	retired
2022-07-09 10:34:51	KwaZulu-Natal	Yes I do	Other	<p>There is no silver bullet to this problem. Coal should be the initial solution - wind and solar supplementing and reducing the dependency on coal, but ultimately nuclear should be the final goal. Koeburg has served faithfully over the years</p>	Richard	retired
2022-07-09 10:11:30	Limpopo	Yes I do	Other	<p>We need a combination of everything EXCEPT COAL AND NON RENEWABLE RESOURCES</p>	SHEELAGH	retired
2022-07-09 10:09:54	Gauteng	Yes I do	Other	<p>Solar and wind</p>	Rianna	retired
2022-07-09 09:42:01	Western Cape	Yes I do	Other	<p>I think we need a combination of the methods suggested above since weather conditions in our county vary so dramatically, e.g. some areas are known to be windy while others hardly ever experience wind; there is water to be harnessed in some places to produce electricity but certainly not all over our water-poor land. I think this is one of the reasons Independent Power Producers are such a good idea: they will be nimble by their very nature and therefore swift and effective in choosing the most cost effective method to produce power in any particular region. I am wary of nuclear on principle and the same goes for coal.</p> <p>Another reason is that although burdened with this pernicious BEE which boils down to forcing square pegs into round holes, Independent Producers can at least select pegs who are interested in becoming round and eager to succeed. As the country has just experienced at great cost, the actions of a disloyal team, committed only to its own interests, this would be an invaluable gain. I would like to say, in conclusion that, in my opinion, Independent Power Production will only succeed under two conditions: 1) that would-be producers need only register with Eskom Head Office, NOT a wholly inefficient government department and 2) NO Minister or government official has authority to interfere in the business of private providers. All communication with private providers shall be managed by Eskom Head Office and Eskom Head Office will keep Minister Pravin Gordhan fully informed at all times. I am forced to say this because the Government has demonstrated times out of number that it is not to be trusted.</p>	Rosemary	retired
2022-07-09 09:29:11	Western Cape	Yes I do	Other	<p>The private sector always outperforms government institutions. Why on earth should Independent Power Producers be disallowed?</p>	Arthur	retired
2022-07-09 09:28:42	Gauteng	Yes I do	Other	<p>First stop the fiasco regarding Eskom's shortage of skills. It is entirely the ANC's fault with their BEE policy. So no matter what method is employed to generate electricity make sure that there are people OF ALL RACES that have the educational qualifications, experience and practice in their operating the selected system. Our education falls so short that even farmers have to send their future employees to school to read and write before they can employ them because they cannot read instructions, even how to drive a tractor!.</p> <p>South Africa has suffered enough from cadre employment and now we face contracts been only given to black businesses so no other competitor no matter how effective and cheap their system might be, will not be considered. The ANC has choked our economy. Even those who remember Tesla's method of using lightning striking the ground to light up light bulbs might come up with a surprise to alleviate our electricity suffering.</p>	Theresa	retired
2022-07-09 09:23:26	Gauteng	Yes I do	Other	<p>We currently need all the electricity, that can possibly be produced, to prevent a total system, collapse!</p>	Hubert	retired
2022-07-09 09:21:03	Western Cape	Yes I do	Other	<p>We should be using all the renewable energy sources I.e wind solar etc.</p>	Keih	retired
2022-07-09 08:51:42	Gauteng	Yes I do	Other	<p>Solar, wind, hydro plus nuclear under qualified and responsible management.</p>	Bev	retired
2022-07-09 08:44:14	Gauteng	Yes I do	Other	<p>What is wrong with the stupids in government who are supposedly "controlling" electricity generation and supply??? Why only NOW has this issue suddenly become an emergency? It was already an emergency 28 years ago, but was totally ignored by those who thought they were clever and knew better! Nowadays there are Power Ships. There were also Pebble Bed Modular Reactors. If the pebble bed modular reactors had been put in place DECADES AGO, we, the public, would not have to put up with all the shit that Eskom is dishing up to us now! WAKE UP IDIOTS!!! You should be utterly ashamed of yourselves and all of you resign, because you have no clue! Always waking up far too late to be of any use, as the country is hit with a never-ending crisis! There ARE solutions, but they should have been implemented decades ago. There's probably no IMMEDIATE solution. It's been left far too late! Give the engineering and design to suitably qualified electrical engineers instead of useless pen-pushers and cadres who are simply wasting taxpayers' money and causing hundreds of thousands of job losses!! The engineers will make things happen, and it won't take three decades to sort out!</p>	Carol	retired
2022-07-09 08:36:17	Gauteng	Yes I do	Other		Carol	retired

2022-07-09 08:32:05	Limpopo		Yes I do	Other	The current capability of existing power supply infrastructure seems sufficient for the needs of SA's power consumption, however it has been badly neglected to the extent that it has gone out of commission. The future of power supply I believe lies in a combination of what sources already exists with the condition that it is repaired to 100% working order as a priority and then phasing in renewable energy fed into the grid. It is obvious that the ANC government need to be removed in totality from ESCOM for private concerns to take over and manage the grid. The ANC has become totally untrustworthy and can not be entrusted with a vitally important institution like ESCOM. They need to be fired. Installation of nuclear power with the ANC in charge would be ludicrous and suicidal for the country. Just imagine the current situation and nuclear power stations of which bad maintenance will have far worse consequences, instead of what exists now.	Harry	retired
2022-07-09 08:22:04	Western Cape		Yes I do	Other	Solar, wind, sea water	Abida	retired
2022-07-09 08:14:30	Gauteng		Yes I do	Other	Solar, wind	Cathi	retired
2022-07-09 08:08:49	Gauteng		Yes I do	Other	We have sunshine most of the time that should be harnessed to generate power without harming the environment. Think of the vast stretches of land in the Karoo and Northern Cape. There must be opportunities for wind power along our vast coast-line. This renewable power may also assist to pipe water to drought stricken areas or build desalination plants. Hydra may be more difficult due our water shortages in many areas. I would like to see qualifying criteria for IPPs outside of just BBBEE - stick with the experts even if they are not South African. Include criteria for local skills development and ESG. We have brilliant environmental scientists in South Africa, let's ask them to help plan out the programme. Government should not be in control of this programme. Oh and this is urgent!	Henriette	retired
2022-07-09 07:50:37	Gauteng		Yes I do	Other	A hybrid of all renewable energy solutions are IMMEDIATELY required. Allow independent power producers to immediately feed into the system and take it from there. We need immediate, intermediate, AND long term solutions but start with the most viable options NOW.	Helen	retired
2022-07-09 07:50:37	KwaZulu-Natal		Yes I do	Other	1.) I wonder how Mr President live with himself to know he has no experience of load shedding whatsoever. If he don't hear about it, he wouldn't know about it. How does he feel not to buy one liter of fuel for a generator at his government price. 2.) The government should've accept the foreign offer to help South Africa with alternative electricity. But the moment they discover they would not get money for that, they realized there was nothing in for them. No money available to steel. No deal. 3.) The solution is in SOLAR, WIND and/or HYDRO. NUCLEAR is far to dangerous for these uneducated morons. Imagine they maintain a nuclear plant like they do on coal plants. 4.) I don't know why educated people like Pravin Gordan still looking for local solutions on supplying electricity while the whole wide world already designed the wheel. 5.) A good friend of mine always said there's only two things in life that's important: a.) you either make excuses or b.) you achieve success.	Friedel	retired
2022-07-09 07:48:05	Gauteng		Yes I do	Other	Tell the ANC just to get on with it! It's bee 14 years now.	Dave	retired
2022-07-09 07:41:00	Gauteng		Yes I do	Other	Stop your crap!!! We the people are the power, we have a right to choose, it's not for you to decide. Your time is over, make peace with yourself and your ancestors. You have committed more than just treason.	Mags	retired
2022-07-09 07:39:44	Outside SA	Australia	Yes I do	Other	All renewables could be brought into power (no pun intended) depending on where the provinces are. Nuclear is obviously the best, but would have to be owned, built and maintained by professional personnel from outside the country, and leased to SA. The government proves on a daily basis that it cannot run any of its departments with success, and the ANC most certainly has neither family nor friends that the can give patronage to.	Zena	retired
2022-07-09 07:33:00	Western Cape		Yes I do	Other	ALL AND ANY MEASURES NECESSARY TO OVERCOME THIS ABOMINATION... GRANT THE PEOPLE OF THIS COUNTRY THE URGENT NEED TO "MAKE A LIVING" POSSIBLE. DO NOT DESTROY THE ECONOMY FURTHER. WE ARE ON THE PATH TO INSTABILITY, FROM WHICH THERE IS NO REDEMPTION.	HERBERT	retired
2022-07-09 07:32:49	Gauteng		Yes I do	Other	Wind and Solar. And other renewables	Peter	retired

2022-07-09 07:05:43	Free State		Yes I do	Other	In hierdie stadium moet die regering enige privaat entiteit, wat elektrisiteit kan opwek, aanvaar . Dit moet nogtans reguleer word, maar daar moet geen politiek betrokke wees nie. Die aards verwarming kwessie moet heroorweeg word. Die ryk lande will arm lande net "omkoop" sodat hulle (die ryk lande) nie nodig het om hul inkomste op te offer daarvoor nie maw om hul steenkool en diesel verbruik te verminder nie en die "omkoopgeld" gaan in elk geval nie by die arm burgers uitkom nie. Enige metode behoort oorweeg te word, weereens, solank politiek nie betrokke is nie en dit reguleer word. Ek is amper seker daar is nog plek vir hidro-krag. Baie water loop see toe. Is die moontlikheid van seewater al oorweeg, met terselfdertyd 'n drinkwater aanleg?	Roy	retired
2022-07-09 07:00:24	Gauteng		Yes I do	Other	Sonkrag en windkrag. Streke soos die bo-karoo het reeds groot sonplase en wind opwekkers. Waarom vas klou aan die ou steenkool stasies..... oftewel, ons weet almal.	Piet	retired
2022-07-09 06:32:52	Gauteng		Yes I do	Other		Howard	retired
2022-07-09 06:26:45	Eastern Cape		Yes I do	Other	I don't believe that there's one single solution for power security. I do however believe that any green energy solution is needed. I also believe that with the absence of infrastructure in the country and the current corruption that outsourcing our power to private enterprise has to happen. It would be best to explore the opportunity that coastal rainfall presents by providing additional dams for hydro electric power facilities and re-engineering dams for this.	Brynn	retired
2022-07-09 06:14:53	Gauteng		Yes I do	Other	All forms that are immediately available	Pat	retired
2022-07-09 05:43:26	Gauteng		Yes I do	Other	First of all the employees of Eskom and the two unions involved in this recent power cuts should be treated as terrorists against South Africa. Where have you ever seen or heard of a hand full of people keeping the whole country hostage . They should all be locked up and the keys thrown away never to see daylight again. Pravin Gordan just as useless with our president. Get the supply of power out of these hands and the governments as they have no will to save SA. Wind and Solar should be the way to go for clean options. Do not know enough about nuclear	Linda	retired
2022-07-08 23:45:00	Western Cape		Yes I do	Other	The red tape should be scrapped immediately in order to allow IPP's to provide power to the grid. It is a matter of national urgency and importance as many lives and livelihoods are at stake. Failing to do so is failing our nation. Pride and party politics should be put aside and we should join hands to improve the situation. If the political will is there, we can collectively prevent our country from total darkness and collapse. Stop blaming and making excuses and start acting decisively in the best interest of the people of this gsautiful country.	Matthew	retired
2022-07-08 23:37:33	Western Cape		Yes I do	Other	Get rid of the ANC	Jeanette	retired
2022-07-08 23:21:23	Gauteng		Yes I do	Other	Allow Independent Power Producers to immediately supply SA with electricity what ever will help in the short term and plan for long term solutions. Allow home owners to use solar means of creating power and sell excess power to the grid. Subsidise repayment interest rates providing some power is exported to the grid. Make deposit free loans available, for developing home generation power, and recover cost by selling surplus power to the grid. The government must stop trying to do it alone they are not able to do this. Get companies and consumers to help.	Frank	retired
2022-07-08 23:20:21	KwaZulu-Natal		Yes I do	Other	KZN enjoys lots of sun throughout the year and the solar energy could be harnessed and be the prime source of power. This can supplemented by hydroelectric and wind power. These are all clean forms of energy and therefore environmental friendly	Farouk	retired
2022-07-08 22:34:52	Western Cape		Yes I do	Other	Our country can use wind , solar and ULTIMATELY energy drawn forth from the ether.We live in an electrical universe ie energy is all around us & Tesla wanted to share that technology with us.Legalise IPP to feed their power into the current system. Short term re employ those engineers and technicians that were made redundant through BEE schemes to get current power stations back up to regular power production.It is time we took back our sovereignty & decentralised government.Government has proven itself totally fallible & corrupt.Energy State Capture is of a magnitude unseen so far.Let us not fall into the trap that AREN are setting ie collapse & break the current system to the point where we are desperate for a saviour!Our energy minister has secret deals with 26 as yet unnamed Sustainable energy suppliers...Nepotism of a scale unseen with Patrice Motsepe & Ramaphosa etc etc.No!!!! enough is enough....Let IPP supply & forget any Future deals that fills the wallets of the Corrupt!!!	Jenny	retired
2022-07-08 21:23:28	KwaZulu-Natal		Yes I do	Other		Paul	retired
2022-07-08 21:18:42	Western Cape		Yes I do	Other	Eskom and the State cannot support the electricity needs of South Africa. Politics, power, theft, sabotage, terrorism and lastly, High Treason. This is what is provided. So many independent and natural resources available. But the state insists in torturing its citizens(barrel to the head)	Mark	retired

2022-07-08 21:14:02	Gauteng		Yes I do	Other	Anything that will help the Consumer to have Electricity at not such an expensive rate... Think of people who are on pension and unemployed..... Kind Regards.	Marlene	retired
2022-07-08 20:44:56	Limpopo		Yes I do	Other	Scrap the red tape. Diversify producers, suppliers and methods used to produce electricity to reduce risk. And offer competitive pricing. Stricter employee management and control to combat sabotaging of electricity suppliers. Introduce life long jail sentence for looting and stealing to rid the country of all these crooks and inside traders/conflict of interest.	Mari	retired
2022-07-08 20:40:30	Outside SA	Saudi Arabia	Yes I do	Other	We should allow for the appropriate use of energy resources to be implemented within our beloved country. We need safe, reliable, cheap energy to our people. Without energy we cannot rebuild our economy. Parliament should be be scraped as it has shown us that they are not effective in their decision making. In fact we should call for immediate elections of a totally new and all inclusive government.	shaffique	retired
2022-07-08 20:32:17	Western Cape		Yes I do	Other	Combination of Coal/Hydro/Wind & Solar	George	retired
2022-07-08 19:09:04	Western Cape		Yes I do	Other	Whatever is suitable. Combination of solar, wind or even nuclear. Motivate households to supply electricity to the network. Stop talking and take action. Allow private initiative to get involved.	Conrad	retired

2022-07-08 17:08:47	Western Cape		Yes I do	Other	A combination of wind turbines, Solar panels and Hydro-Electric power should be explored to the maximum and with much urgency. This is firstly enviro friendly and secondly will take huge pressure of Eskom to produce electricity in plants that are in urgent need of maintenance which will not happen in the foreseeable future due to lack of fund allocation.	Steve	retired
2022-07-08 17:08:40	Western Cape		Yes I do	Other	A combination of different production methods should be used. Open market to encourage competition. A transition away from polluting methods can then be made over time as technology and storage capacity improve.	Terry	retired
2022-07-08 17:08:20	Western Cape		Yes I do	Other	Some or all of the above to be directed by professionals in their field	Beverley	retired
2022-07-08 17:08:09	Western Cape		Yes I do	Other	I feel a mixture of all , solar , wind , coal and nuclear. The government must get moving or continue to slide backwards, hire the professionals and get rid of the politicians involvement in the project. Politicians seem to have only their interests at heart not the countries.	Chris	retired
2022-07-08 17:07:08	Western Cape		Yes I do	Other	Combination of the various options. It is our only hope	Berthold	retired
2022-07-08 16:54:30	Free State		Yes I do	Other	More than One option must be implimented Coal, Solar and wind turbines.	David	retired
2022-07-08 16:44:31	Western Cape		Yes I do	Other	To meet SA's immediate needs the following sources are suggested: 1. Reduce sales of cheap power to neighboring states (who seem to be unable to pay us anyway!) 2. Charter power ships and moor them in all our major ports. 3. Pass legislation to encourage private households to install various generation sources (solar, wind, etc.) and feed excess back into the grid.	Gillian	retired
2022-07-08 16:40:52	Western Cape		Yes I do	Other	Solar and wind coupled with stored cacity	Mentz	retired
2022-07-08 16:40:17	Western Cape		Yes I do	Other	The selection offered is too restrictive. There is no single solution but a combination of different solutions. The only criteria that I would say is vital is that the ANC keep their filthy hands off it.	Robert	retired
2022-07-08 16:36:04	Eastern Cape		Yes I do	Other	which is ever the best solution. Coal is not.	Gwen	retired
2022-07-08 16:34:53	Western Cape		Yes I do	Other	We have short term emergency needs and long term sustainable requirements. Would advocate using systems which can be turned on quickly to alleviate the current crisis whilst fully investigating longer term green solutions which are sustainable and the country can afford. Keep the government out of the investigative process to provide impartiality of choice.	Christopher	retired
2022-07-08 16:30:13	KwaZulu- Natal		Yes I do	Other	Renewable energy such as solar, wind, hydro / ocean, geothermal, bio-thermal should be the first choice. More important however is to have a panel of energy specialist to advise and MANAGE what needs to and can be done to resolve SA's dire energy supply position. To date, there is NO evidence that energy specialists are consulted AND LISTENED TO in any way. The contrary is true. This panel MUST include OLD energy specialist who have an intimate knowledge of ESKOM's network and operation. Piecemealing energy networks will be a disaster, right from the outset. An holistic approach with a long term view is of paramount to make a success thereof.	AVDB	retired
2022-07-08 16:24:37	Limpopo		Yes I do	Other	A combination of solar and wind will be my choice. There is enough space in RSA to do that and enough recourses to justify solar and wind. Nuclear is to risky with the current government clearly showing it cannot be trusted with recourses of this nature. Had the solar wind option been explored the day the present government came into power, just imagine how much further we would have been now with a government only intent on state capture. The prove is there to see clearly and still no one charged! Think of the country and its citizens for a change first before thinking of cadres and how to get rich quick. Put South Africa first please!!!!!!!!!!!!	Stephanus	retired
2022-07-08 16:23:31	Gauteng		Yes I do	Other	Coal fired power stations will take a while to get off. Whilst winding down coal fired power stations and getting the benefit of the electricity of the remaining working power stations, new forms of energy in combination should be supplementing coal fired power stations such as gas, wind and solar. Definitely NOT nuclear. I think the final electricity combination will have gas as it's major contribution, with solar and wind supplementing.	Syd	retired
2022-07-08 16:19:11	Western Cape		Yes I do	Other	A combination of existing coal power stations, along with wind, solar, hydro and nuclear would enable Eskom to have time and space to repair and maintain existing power stations, whioule enabling the country to move on econoically.	Pixie	retired
2022-07-08 16:18:38	Gauteng		Yes I do	Other	Any source. Hydro, coal, nuclear (technology/safety evolved), hydro, solar ... anything to get away from state monopolies (not only electricity supply).6	JARY	retired
2022-07-08 16:13:00	Western Cape		Yes I do	Other	I have selected "Other" because every power generation option has a unique place in the energy generation field, and to focus on or ignore any option would be massively short sighted.	Tony	retired

2022-07-08 16:12:26	Western Cape		Yes I do	Other	Whichever is the most cost effective. I speak as a Pensioner. If We have something which is unaffordable, (Like Eskom) We're back to square one.	Frank	retired
2022-07-08 16:10:45	Western Cape		Yes I do	Other	all new buildings should install solar panels	SHIRLEY P	retired
2022-07-08 16:06:33	Gauteng		Yes I do	Other	We should be using many different ways of producing electricity - whatever works. And get rid of the monopoly so that there is a choice of providers. This will stop Eskom workers holding the country to ransom	Shirley	retired
2022-07-08 16:05:26	Mpumal anga		Yes I do	Other	A generation mix with renewable power growing exponentially.	Ish	retired
2022-07-08 15:50:54	Gauteng		Yes I do	Other	All the above. We cannot eliminate coal in the short term else we will have no power. Solar and wind can work long-term but it is extremely expensive. to set up and produce. There is plenty of water around the coast, so why not Hydro? This would be a good option as Solar and Wind farms look even worse than coal-fired power stations. Sell off Eskom as this government is not capable of running a bath, never mind a company or a country. Make all the procedures for power producers seamless and quick with little or no obstacles in place. What needs to be done must be done quickly, not with more meetings, discussions, or delays. Unless this government puts the country above all else, we are always going to have problems. The first thing that must be done is to fire all communists from leadership positions. They have never been elected and will pull this country down. Get rid of Patel, Ex Mrs Zuma, Cele and all other Zuma's in the background. If not, this country will only go down. Competence is needed, not selfish ANC enrichment policies. I would not trust this ANC government with anything I own or have dealings with. They are a pathetic bunch of thieves.	Jeff	retired
2022-07-08 15:47:50	Northern Cape		Yes I do	Other	Any combination of these different energy types.	Meryl	retired
2022-07-08 15:42:55	Gauteng		Yes I do	Other	Independent power suppliers should be the answer. Maybe we will get some competition and lower the price of electricity which at the moment is sky high. Eskom should be dissolved and private enterprise should come first.	gusta	retired
2022-07-08 15:42:30	Gauteng		Yes I do	Other	My reason for choosing other is, at the moment, beggars can not be choosers, so any form of electricity production over and above what we have would obviously be welcome to all SA citizens	Peter	retired
2022-07-08 15:41:14	Western Cape		Yes I do	Other	We need to get out of this crisis as soon as soon as possible.	Pierre	retired
2022-07-08 15:40:44	KwaZulu- Natal		Yes I do	Other	I am a 76 year old woman and do not know anything about the production of electricity, but I know this..... I was born and raised in this country. As a child, then a young woman, and then middle aged, I never ever experienced being without electricity. Now in my doddering old age I have to take myself to bed carrying a torch, shivering with cold, and unable to wash as the pumps of the local reservoir supplying our area with water are dead because there is no power and apparently the backup generator was stolen. So yes, PLEASE get rid of Eskom and bring back some incorruptible brains to get this country back from the dark ages to being a civilised country again. Take away the monopoly on power supply, and open it up to other power suppliers and allow them to be independent of governmental interference	michale	retired
2022-07-08 15:37:46	KwaZulu- Natal		Yes I do	Other	Privatization	Shirley	retired
2022-07-08 15:37:37	Gauteng		Yes I do	Other	I believe that Eskom has failed the country miserably due to Government's policies and unbelievable corruption. The only way to save the country economically is by allowing 'independent' businesses to take over responsibility for power generation in this country. By independent I mean without any involvement of Government entities and affiliated cadres - especially from ministers, or minister's family members who have only one purpose, namely, to line their own pockets without any concern for the wellbeing or future of this country or its populace. As for the nature of the power production processes, they must be free of 'greenhouse gas' emissions and, as far as possible, non-polluting. I therefore favour a combination of Solar, Wind and Nuclear depending on local conditions. In the latter case I believe that many mini-nuclear stations are appropriate (should the technology be available) rather than only two or three large installations. In the meantime, I believe the privatisation of Eskom cannot come quickly enough.	John	retired
2022-07-08 15:35:44	Western Cape		Yes I do	Other	All and every means must immediately be used to generate electricity. First imprison all those involved in corruption and sabotage regarding electricity generation.	clive	retired

2022-07-08 15:35:25	Western Cape		Yes I do	Other	I selected other, as you don't have an option for all of the above or a selection. There is no doubt that this should happen, and the government should promote private home owners to feed into the grid with a reasonable return and not the expensive fees to have a feed in. Look at Australia that has shutdown many coal fired power stations due to installation of solar panels on private homes and feed into the grid. They now have an issue, that there is too much power from solar. What a pleasure to be in this situation. SA Government get your act together and earn your monthly salaries and get this country out of the quagmire it is currently in.	Paul	retired
2022-07-08 15:35:22	Western Cape		Yes I do	Other	Any hybrid forms professionally run by real engineers / qualified people , and not overpaid non professionals. Pricing systems to be fair and equitable.	Carol	retired
2022-07-08 15:31:06	Western Cape		Yes I do	Other	We should only be looking at any source of energy other than coal which is environmentally acceptable. Why coal powered generation was considered over nuclear is also a big question in my mind.	Frank	retired
2022-07-08 15:27:12	Western Cape		Yes I do	Other	Eskom is a dinosaur, it's initial mandate was to provide power for the mining industry. Eskom was established in 1923, when mining was gaining momentum in South Africa, now almost 100 years later that is no longer the case. Originally municipalities had a mandate to provide power to its jurisdictions. However after the 2nd world War, South African cities especially Johannesburg & surrounding areas were growing expediently, municipalities couldn't keep up, so they asked Eskom for help, this became the poison chalice & why S.A. has power issues currently. The solution is I.P.P's, but not just renewables, there must be a mix, as renewables are not reliable due to weather conditions, the mix should be nuclear, coal, gas, & renewables, each will compliment each other. If Eskom continues its current course, it will collapse within 20 years, like all the other S.O.E's have. When this happens, what happens to the people who work for Eskom? Citizens are paying more than 350% for electricity since 1994, yet Eskom is delivering less electricity today in 2022, with more employees than it did in 1994, & has the monopoly on electricity supply? To quote Margaret Thatcher " socialism works until you run out of other people's money ". Time to change our reliance on Eskom & get alternatives urgently. S.A can't afford any further power disruptions.	John	retired
2022-07-08 15:24:01	Western Cape		Yes I do	Other	(1) Geo-thermal: Any disused mineshafts in proximity of geothermal sources should be the start of the exploration of such possibilities. (2) Wind: The southwestern Cape coast frequently experiences gale force south easterly winds that are untapped energy sources. If deserving/indigent households are subsidized, commercial household wind turbines will serve as a supplement to domestic solar heating systems, especially for any new residential developments on the Cape Flats.	Michael	retired
2022-07-08 15:11:33	Western Cape		Yes I do	Other	The most important is that no government people or their family and friends should have anything to do with the private projects. Government should also stop exporting power and fuel to other countries. I choose other because we should look at a range of ways to produce power. We should look at wind, sun, hydro and coal. We should also look at hydro power from the sea.	Jesica	retired
2022-07-08 15:10:26	Western Cape		Yes I do	Other	A combination of wind, solar & gas. Also, don't let the cANCer anywhere near it or it won't work! The only thing this government has achieved is to ruin everything they've touched! Plus, if they get their hands on it they'll steal all the money.	Andrew	retired
2022-07-08 15:10:17	Gauteng		Yes I do	Other	All renewables: Extremely important to get Regulations , Policies etc. in place without any further delays.	Willie	retired
2022-07-08 15:03:56	Western Cape		Yes I do	Other	What we know for sure is that ESCOM will NOT solve the problem within the next 5 years, possibly even longer. It appears that the CEO has problems getting any support from any quarter. In terms of the method of electricity production I believe that we don't have a choice as any way is better than no way. Only one restriction and that is no state capture, All costs subsidized are fully forensic auditable by independent auditors. Any subsidized effort must be fixed costs with penalties for non performance.	Richard	retired
2022-07-08 15:01:38	North West		Yes I do	Other	Renewables	John	retired
2022-07-08 14:50:50	KwaZulu- Natal		Yes I do	Other	It is a total waste of time thinking about how to make electricity while the country's infrastructure to distribute it is in a terminally disastrous condition. I worked as a municipal electrical engineer for almost thirty years during which time I was part of a team responsible for the development of a n advanced distribution system. This system now barely functions and many millions of rand of damage have been caused by a failure to undertake simple maintenance procedures. The electronic equipment that included a sophisticated incoming power load control system and which saved millions of rand each year, failed many years ago due to lack of understanding and failure to undertake basic routine maintenance. All of this is due to BEE - the employment of management and staff of a preferred race regardless of their lack of training and competence.	Martin	retired

2022-07-08 14:50:12	Western Cape		Yes I do	Other	There has to be a combination of various methods to produce electricity in the short term. BUT enough of the blame game, all must get together around the table and sort out the mess and get in those with the knowledge. Trade unions should be held to account for their role in this mess.	Catherine	retired
2022-07-08 14:45:26	Western Cape		Yes I do	Other	I think we could have a mixture of wind, hydro, solar, wave power as most of our coast line can generate wave power, battery storage and the latest technology of heating sand silos as they do in Finland.	Sydney	retired
2022-07-08 14:39:42	Gauteng		Yes I do	Other		Jean	retired
2022-07-08 14:33:47	KwaZulu- Natal		Yes I do	Other	Hydro electricity would be the least impactful on the environment, but this takes time to get going. Wind turbines and solar power can be installed quickly. In the light of the urgency, let anything that can generate electricity efficiently, let it be used and then over time, cull out those that leave a big carbon footprint on the environment	Richard	retired
2022-07-08 14:30:59	Gauteng		Yes I do	Other	This should have happened years ago. I have selected "other" for method, as I am not an expert in this field.	Rose	retired
2022-07-08 14:30:44	Western Cape		Yes I do	Other	A diverse mix.	Johan	retired
2022-07-08 14:30:08	Western Cape		Yes I do	Other	A Combination of solar and wind and any other form of renewable energy	Dirk	retired
2022-07-08 14:20:51	Gauteng		Yes I do	Other	Government needs to give urgent attention to other alternatives, this has been going on for 14 years, first it was called black outs now loadshedding. Who's fooling who	Mogamad Budroedie n	retired
2022-07-08 14:14:00	Eastern Cape		Yes I do	Other	Unacceptable running of this country needs to stop now. Corruption is an ongoing nature of the ANC and won't stop. Oranja is self sustainable. If the ANC won't stand down then we need to make the Western DA region an area that is self governed. STOP NOW Open business to anyone who can deliver where the ANC arent	Lesley	retired
2022-07-08 14:07:45	Eastern Cape		Yes I do	Other	I don't have much knowledge regarding this problem but I know and I can feel the effects of the power supply and so do all South Africans. This government is crippling our economy with the current power supply! Whatever Dear SA need to do I support it as they care for our country and it's people greatly!	Daniel	retired
2022-07-08 14:02:33	Gauteng		Yes I do	Other	Combinations of all methods as the environment is different in each area.	Donald	retired
2022-07-08 14:01:05	Gauteng		Yes I do	Other		Rentia	retired
2022-07-08 13:58:29	Gauteng		Yes I do	Other	Any of the above mentioned. At this stage the one that can be implemented immediately.	JC	retired

2022-07-08 13:58:24	Western Cape		Yes I do	Other	<p>The Government should have absolutely nothing to do with the control and running of any industry. They are politicians haggling among themselves to get the highest level of office and the highest amount of income for themselves at the expense of the general public. Their control should be limited to maintaining the infrastructure and safety of the public and create an environment that is safe and secure and which encourages businesses to make as much money as possible and thus create jobs and training to upgrade people in each industry without interference of the government. The government must stay out of industry and leave it to individual business people who have studied and have the expertise each in his own field.</p> <p>Having said that, when it comes to Eskom and the production of power, there are a number of different methods in which power can be generated, be it coal, nuclear, gas, diesel, solar, wind, waves, hydro electric, satellite or anything else that has been invented. To supplement the immediate power crises, the public should be allowed to utilize ANY of the systems available that individuals have been able to create, and sell their excess power back into the grid.</p> <p>It is a well know fact in industry that to vary one's sources of income creates a more secure and stable business. The same is true for having electricity generated from as many different sources as possible, which then gets fed into the grid, which will stabilize the power supply, plus it will ensure a cost effective rate as diversity prevents people escalating prices due to the fact that they have the monopoly.</p> <p>This will then kick start industry to grow, and create jobs for all. The level of unemployment will be at an all time low, the economy will skyrocket which will draw in foreign capital and the rest will be history. South Africa will rise to a higher level of profitability than it ever had in it's entire history and it will encourage educated people to return and further grow the economy to the benefit of every individual.</p> <p>Eskom can then proceed to upgrade itself to produce the most cost effective form or various forms of bulk electricity and it too will become viable and can get back into the situation that it continually upgrades itself for 20 years in advance to keep up with the growth of the country. Systems must be put in place where politicians CANNOT put their hands into the electricity pot for their own interests.</p> <p>This will also enable Eskom to sell power throughout Africa and thus draw huge amounts of foreign currency back into the country. This entire process will be the catalyst for South Africa to be counted among the leading countries in the world, making world decisions beneficial to South Africans instead of the FAILED STATE THAT WE NOW ARE.</p>	Coleen	retired
2022-07-08 13:56:04	Western Cape		Yes I do	Other	<p>Independent power producers would need some regulation, but not the massive amount currently in place. A mix of sources would be best, with caution about "green" energy, as much of it is not quite as green as it seems.</p>	Jennifer	retired
2022-07-08 13:47:54	Gauteng		Yes I do	Other	<p>SA urgently needs electricity to develop economically and to create jobs. Short term - allow any method. Medium to long term - only renewable sources and methods.</p>	Andries	retired
2022-07-08 13:47:35	Western Cape		Yes I do	Other	<p>Any renewables will do - Solar, Wind, Hydro - as long as we get rid indeed of the red tape!!! The sooner the better. We need to get rid of Eskom now.</p>	D	retired
2022-07-08 13:46:53	Western Cape		Yes I do	Other	<p>Coal for sure for now plus Koeberg still operating. Jump immediately to Solar & Wind. BUT WITH >>> NO / ZERO / BEE BULL-SHIT>>> that promotes billions of Rand CORRUPTION and ZERO building a NATION. We are tired of the BEE rubbish, especially after 28 years. All future projects MUST be OPEN irrespective the old rubbish and ownership. If you ignore the above, all future efforts will soon go down the drain as well. Why keep on ignoring the ONLY PRINCIPLES FOR LIVING RIGHT >>> The Byble > the 4th Book of Numbers. It is all there.....Wake up!!!!</p>	Ockert	retired
2022-07-08 13:42:14	Western Cape		Yes I do	Other	<p>The current load shedding is an absolute disgrace to the government who have had more than enough time to fix the problem. If I was a government minister and anything to do with electricity I would be so ashamed. There is enormous damage being done to the economy because of the load shedding and guess who is being affected the most. Yes, the poor whom the government purport to support the most.</p> <p>That being said, we need to urgently update how we supply power to the nation. I believe that we should do away with coal fired power plants as soon as possible. Global warming is a reality and it cannot be denied now. We should go for a number of different technologies including wind, solar, hydro and nuclear.</p> <p>The red tape around independent power suppliers should be scrapped and competition allowed. However any power supplier must be compelled to show that they are not damaging the environment in any way. For example building dams for hydro power can cause many other problems downstream if the environmental impact (and there always is to some degree) is not considered and mitigated to the best degree possible.</p> <p>Come on government, show some leadership and get things done to sort this problem out and help build SA into the powerhouse (no pun intended) that it can be.</p>	Rick	retired

2022-07-08 13:42:10	Gauteng	Yes I do	Other	With such a huge shortfall on Electricity production, South Africa should surely use any means necessary to produce more power i.e. wind, solar etc. Why not privatize Eskom and also allow other role players to enter the market. Then the paying customer can choose. This free market principal can only improve services and drive the price of electricity down. Does capitalisms and free market principals go against the ANC's socialistic values and thinking ? Have a look at SAA !!!	Hennie	retired
2022-07-08 13:40:44	Western Cape	Yes I do	Other	All of the above as best advised by acceptable experts in the field NOT politicians	louw	retired
2022-07-08 13:40:08	Western Cape	Yes I do	Other	All of the above as best advised by acceptable experts in the field NOT politicians	louw	retired
2022-07-08 13:39:56	Western Cape	Yes I do	Other	All of the above as best advised by acceptable experts in the field NOT politicians	louw	retired
2022-07-08 13:29:44	Mpumalanga	Yes I do	Other	Urgent need to proceed with both solar and pebble bed nuclear reactors as originally developed in RSA	Emil	retired
2022-07-08 13:28:34	Gauteng	Yes I do	Other	we need a mix of energy sources as only nuclear can cover all hours and low carbon requirements but are anything but clean also some areas have good wind and others have good sun.	David	retired
2022-07-08 13:25:50	Gauteng	Yes I do	Other	Any form of ele tricity generating should be encouraged. We do not have the time or money to discriminate.	Woutrine	retired
2022-07-08 13:21:26	Gauteng	Yes I do	Other	Solar, Hydro, Wind: depends on area.	Mariette	retired
2022-07-08 13:11:09	Western Cape	Yes I do	Other	A mixture of wind power, solar for businesses & private homes (surpluses to be fed back into the grid), and "sea / wave power" for the Western Cape - there are proven (and highly effective) methods of generating electricity by means of floating turbine platforms.	Johann	retired
2022-07-08 13:07:35	Western Cape	Yes I do	Other	It is high time that the ANC corrupt government cease the monopoly and allow private enterprise to produce and provide clean power through all available methods. This should have been done 20 years ago, but as we know the ANC has no foresight, cannot plan, and are just hell bent on stealing and destroying every SOE. This is long overdue and needs urgent intervention and implementation. Get rid of Gwede and Pravin and the whole of the ANC so that this country and begin to recover from all the theft.	Pat	retired
2022-07-08 13:02:54	Western Cape	Yes I do	Other	Even if this goes against a government policy of controlling everything (controlling rather badly), we cannot destroy the country with this foolish notion of state control of every kilowatt of energy produced which is now being revealed as a catastrophe for citizens. Government should simply play an oversight role and leave production to entities that have the skill to supply clean, reliable and cost-effective power. South Africa should look to a mix of renewables to accomplish the energy requirements for growth and development. South Africans are exhausted by the ANC's overreach into all aspects of our lives.	Michael	retired
2022-07-08 13:02:44	Gauteng	Yes I do	Other	A dynamic mix of power sources to make sure there is always power and earth warming optimally controlled.	Hans	retired
2022-07-08 13:02:09	Western Cape	Yes I do	Other	All of the above, perhaps in competition, but certainly managed to be effective , competitive, and clean in environmental security fashion. Also with a central monitoring organisation, such as Eskom, but without the direct government interference that killed Eskom. The most important issue is to keep this country and all its population supplied with the required amount of electric power, consistently, and to maintain an active economy, and then, and only then, to be able to earn income by also exporting power in the world market. As Eskom used to do before it was taken over and stifled by the ANC and their buddies. This is not a racial issue, it is simply a need to employ the people who know best how to do it.	Ian	retired
2022-07-08 12:59:08	Eastern Cape	Yes I do	Other	This country needs as diverse supply of power as possible as quickly as possible, as far away from the dabbling hands of government as possible. This will reduce the risk of incompetence and corruption as much as possible which are the primary reasons why we are in this situation in which we now find ourselves.	Steve	retired
2022-07-08 12:56:57	Western Cape	Yes I do	Other	If Eskom can't produce enough electricity we need to bring in private suppliers.	Lynne	retired
2022-07-08 12:55:42	KwaZulu-Natal	Yes I do	Other	The economic situation is in emergency mode. Use all other affordable options, and share the market with independent companies PLEASE	Sylvie	retired
2022-07-08 12:54:38	Western Cape	Yes I do	Other		Karin	retired
2022-07-08 12:52:18	Eastern Cape	Yes I do	Other	A progressive and accelerated introduction of a privatised mix of hydro, wind and solar energy connected to the power grid is an obvious effective solution to the power generation problems faced by RSA' and the quickest and most economical way of reducing RSA's dependence on fossil fuels. Investment into research and enablement of energy consumption efficiency and small off-grid household systems is essential for relief and future proofing energy supply. Energy procurement and supply must be uncoupled from political control which has a ever growing track record of corruption, incompetence and inability to serve the demand for electrical energy procurement and supply.	Lance	retired
2022-07-08 12:40:56	Western Cape	Yes I do	Other	We need a broad spectrum of electricity generation technologies with emphasis on those that are available in the shortest time. In the longer term green energy must be the priority.	Conrad	retired
2022-07-08 12:36:56	Gauteng	Yes I do	Other	Just now Eskom is also being sold for R58.00 to a undisclosed buyer. Scrap red tape and privatised.	Emma	retired

2022-07-08 12:27:22	Western Cape		Yes I do	Other	<p>For SA's immediate needs: use whatever we have, duh!!!!</p> <p>Longer term: Plan properly, invest wisely and don't allow anybody to STEAL anything. Focus on whatever we have skills and money for and don't get us into unaffordable debt by setting our country up as collateral to devious countries that pretend to provide funding.</p> <p>Generally: Use mercenaries to secure and protect power installations, loyal staff and clever thinkers against saboteurs, greedy politicians, greedy corporations and opportunistic trade unions.</p>	Joe	retired
2022-07-08 12:27:21	Western Cape		Yes I do	Other	<p>The Government in all its years of administration have used and very much abused their powers. ! Trillions of Rand has just disappeared.</p> <p>Escom once won a worldwide prize for the best electricity power- station in the world. !</p> <p>So, we would very much welcome reputable private institutions to do a better job!</p>	Sharolyn	retired
2022-07-08 12:27:13	Western Cape		Yes I do	Other	<p>Solar, wind, hydrogen. Maybe nuclear but that's long term thinking. Need to have technically trained people so not dependent on foreigners</p>	Sue	retired
2022-07-08 12:23:49	Gauteng		Yes I do	Other	<p>Please do something to stop loadshedding. Fire all that sabotage the powerstations and those that dont want to work and just want to strike</p>	Emmie	retired
2022-07-08 12:20:48	Free State		Yes I do	Other	<p>The arguments about whether we should have this or that type of electricity generation is not important and just side tracks everyone in arguing about what is not now important. Air pollution, water pollution, environmental protection etc are all important, but we are in a battle for survival. We can have all those things protected in the long run, but now we need to get out of the doldrums and get things going. Politicians, get out of the way that the real people can solve the problems.</p>	Deryck	retired
2022-07-08 12:19:10	North West		Yes I do	Other	<p>There is so many other ways to put in place for this power problem, give other people the chance to generate electricity and let government stand back, they have shown for years they are not capable of doing so.</p>	Magdalen a	retired
2022-07-08 12:16:00	Gauteng		Yes I do	Other	<p>All and any method used by independent power producers will be a winning. Cutting off all illegal connections will be a good start.</p>	johanna	retired
2022-07-08 12:14:26	Gauteng		Yes I do	Other	<p>A hybrid basket of power solutions is required as listed in the options list.</p>	Geoffrey	retired
2022-07-08 12:10:51	Western Cape		Yes I do	Other	<p>Any method to keep the lights on and our economy functioning!</p>	Robert	retired
2022-07-08 12:09:58	Western Cape		Yes I do	Other	<p>Any combination of electricity production methods to get us out of this mess that the ANC has created. There have so many suggestions by businesses how to solve the power problem but the government will not listen unless they get a huge cut which is a shocking shame. They really only care about themselves and don't have any common sense. I have always tried to stay positive but even I have had enough.</p>	Anna- Maria	retired
2022-07-08 12:09:50	Western Cape		Yes I do	Other	<p>The government must allow IPPs to produce their own electricity without delay and by whatever method is best for them BUT must produce 10-15% more than they need to feed to the grid. Self generation + feeding to the grid could produce national capacity of 2 Gigawatts within 2 years. Government MUST step aside and stop all the politics and looting within these self generating projects.</p> <p>Get government must be reduced to half the capacity and halve the staff at Eskom. Jobs will be available in IPPs.</p>	Geoff	retired
2022-07-08 12:07:22	Western Cape		Yes I do	Other	<p>Is it even necessary to ask this question? I mean, good grief, how long does it take to realise that changes (red tape/legislation) need to be made??????</p> <p>I have selected "other" regarding the method question, as perhaps a mix to ensure electricity production may be required due to the dire straits we are currently in. So... perhaps coal plus the addition of nuclear? (There is new nuclear technology available in case some are not aware!) Green/renewables will NOT solve the problem quickly enough, and it appears will not provide sufficient electricity ever.</p>	Karen	retired
2022-07-08 12:05:56	Gauteng		Yes I do	Other	<p>All the options listed are problematic. The cost for any of these options are not a one-time event. Solar panels and batteries have to be replaced at intervals and the prices for these items increase all the time. All these options rely on very expensive resources that will run out and the others depend on sunshine or wind, on which one cannot rely.</p> <p>These options listed can all work well, but a very thorough investigation is required. Coal is okay, but see what the government has done to Eskom and infrastructure. For this reason, none of the options will work. We can be sure that equipment will be stolen or sabotaged or maintained. From this point of view, nothing will change and the infrastructure will be run into total destruction as is evident with all other government owned services and infrastructures.</p> <p>There is only 2 options: privatisation and/or decentralization. The options listed can work, but there is another option. I do not want to mention it at this point.</p>	Anton	retired

2022-07-08 12:05:23	Gauteng		Yes I do	Other	All and any method used by independent power producers.	John	retired
2022-07-08 12:02:01	Western Cape		Yes I do	Other	With this crisis we have to grab whatever power is easily available to stop the further impact on the economy. Too many businesses are suffering and jobs are being lost.	Annalie	retired
2022-07-08 11:59:03	North West		Yes I do	Other	I have selected other because considering the urgency of the situation the broadest possible compatible mix should be allowed. All the hurdles hampering the urgent deployment should also be immediately removed.	Jat	retired
2022-07-08 11:52:14	Western Cape		Yes I do	Other	I would be inclined to go for multiple technologies including the use of tidal turbines in order to eliminate the shortfalls of sun hours and wind.	Ray	retired
2022-07-08 11:51:46	Gauteng		Yes I do	Other	I think it is a good idea for other options.	Tina	retired
2022-07-08 11:50:59	KwaZulu- Natal		Yes I do	Other	Declare a state of emergency iro Eskom, with armed protection (the army, if you must) for the people that want to get to work and arrest anyone picketing or causing disruptions and promulgate emergency regulations to do so with extremely heavy penalties for transgressors. Lift the cap on the amount of power the independents can generate, immediately. Get rid of NERSA, or get people there that actually know what they are doing and that can make decisions a hell of a lot sooner. Put a time limit on how long they have to finalise applications etc. Recruit as many as possible of all the retrenched people that had worked there before in mentorship programmes (I know they are doing this, but they are constricted by finances and more red tape - resolve that)	Hendrik	retired
2022-07-08 11:50:18	Gauteng		Yes I do	Other	SA needs multiple sources to avoid over-dependence on a single supply.	James	retired
2022-07-08 11:46:27	Gauteng		Yes I do	Other	Surely there could be more than one source?	Michael	retired
2022-07-08 11:41:29	Western Cape		Yes I do	Other	A viable mix... invite people with knowledge, experience and environmental awareness to have their say.	Briar	retired
2022-07-08 11:41:19	Gauteng		Yes I do	Other	We should get rid of red tape immediately and let private firms/individuals supply any alternatives to the grid eg. solar, wind and then determine if nuclear can be done as well but Eskom is not going to survive with the sabotage and looting of everything in Eskom. And government is not accepting responsibility for all the state capture that is still going on and Mr Mantash is not accepting responsibility so we must take initiative and develop alternative solutions.	Astrid	retired
2022-07-08 11:38:44	Gauteng		Yes I do	Other	Solar to start with and any other affordable options to ensure that South Africa is not left in the dark. Unfortunately Eskom cannot supply and other alternatives must be found which government is not capable of doing.	Dalene	retired
2022-07-08 11:37:25	Western Cape		Yes I do	Other	the mix of power types will ensure that we are not locked in to one energy source getting rid of red tape and the ability of the municipality to pay for the power would greatly enhance business and allow personal households to not be frustrated by a central government that lacks the skills or know how to keep a continuous flow of power needed to sustain and grow a vibrant economy and produce jobs and skills necessary to lift people out of poverty	Andre	retired
2022-07-08 11:36:58	Western Cape		Yes I do	Other	Get Eskom out of government hands or its going to crash and burn along with the country. Make it a private business run by qualified professional people. Bring in a mix of nuclear, wind, solar and hydro.	Craig	retired
2022-07-08 11:34:34	Gauteng		Yes I do	Other	The method of electricity production would be recommended by truly trusted professionals for the benefit of all.	Mandy	retired
2022-07-08 11:31:11	KwaZulu- Natal		Yes I do	Other	A mix of solar, wind, hydro, limited coal	Rajasekharan	retired
2022-07-08 11:27:46	Western Cape		Yes I do	Other	First the grid should be stabilized and functioning properly and then SA must start looking at different sources for our energy requirements .. Definitely need to privatize !	Vanessa	retired
2022-07-08 11:25:35	Northern Cape		Yes I do	Other	Large Man made Tidal Lagoons. Tidal energy.	Peet	retired
2022-07-08 11:23:43	KwaZulu- Natal		Yes I do	Other	It is a no brainer to let the independent power producers onto the grid immediately which, although it won't solve all the problems, will assist. A mix of solar, wind and coal along with the IPP could then help keep the economy from shrinking further.	Pamela	retired
2022-07-08 11:18:31	Gauteng		Yes I do	Other	There is not only one energy source which can be employed. A mix will be the right way, as long as it is a fair competition free of corruption.	Gerhard	retired
2022-07-08 11:18:03	Western Cape		Yes I do	Other	There is not a 1 fit answer. What SA needs right now is what ever can be to generate additional electricity as quickly and "cheaply" not over run costing as is possible which could be a combination of solar and wind. Personally as Koeberg has been such a success to date, also most of the world is against nuclear power ours has been very good to the country regarding reliability the problem is how long it would take to build a new plant less alone the cost.	Gavin	retired
2022-07-08 11:15:30	Western Cape		Yes I do	Other	Scrapping the policy red tape for Independent Power Producers immediately will allow any Independent Power Producers (and not eventually only a pre-selected few) to prop up the ESCOM shortfall for our needs with speed and as this extra supply increases we will see that production at ESCOM will also improve as planned strikes and sabotage there will not have such a significant effect on our economy any longer. Solar everywhere and seawater in coastal areas or whatever other means as determined by Individual Producers.	Schalk	retired
2022-07-08 11:11:39	Western Cape		Yes I do	Other	If we don't get a solution this madness quickly we are doomed. Any solution is better than what we're dealing with.	Moira	retired
2022-07-08 11:08:54	Western Cape		Yes I do	Other	Whatever method works best for immediate relief for the country. Alternative methods which are more economical should be planned now so that they can come into place in the near future	lyn	retired

2022-07-08 11:08:42	North West		Yes I do	Other	Scrap the ball and chain red tape. We should use every practicle and economical way to get out of this. Allow people to generate as much power as possible by using wind, hydro, gas, coal and even solar. Not diesel because it does not help the food producers to limit and raise the availability of diesel. Why not produce cheaper petroleum to use for generators Subsidise producers	Lieb	retired
2022-07-08 11:08:18	Eastern Cape		Yes I do	Other	The solution lies in installing best fit to the area; Nuclear is an option provided it is NOT Russian or Chinese - their past history should tell all you all you need to know on that point. Small units similar to the French/Japanese designs are best. Solar and wind should be at house/suburb level. Hydro combined with large dams on suitable rivers should also be considered as these would bring more optional uses of water [i.e. Tunnels to Eastern cape]- The sea has huge potential - the Benguela and Agulhas currents have the speed and power to drive multiple devices, Tidal are also options. The quickest solution is to fire up any old power station on a short term while coal generated power plants are built [fluidised bed] and coal gasification should be considered long term. Use the local Universities partnered with European Universities to carry out research for further options.	Paul	retired
2022-07-08 11:04:45	Western Cape		Yes I do	Other	Kombinasie van sonkrag, wind, steenkool, gas. Dank al die onbevoegde sogenaamde "werkers" af., beginnende by die stakers/terroriste. Verminder "werksmag" met 45%	Louis	retired
2022-07-08 11:03:28	Western Cape		Yes I do	Other	Fully privatise the industry and create healthy competition . State-owned entities can be part if they are competitive Government should legislate against monopolies and price-fixing	Phillip	retired

2022-07-08 10:58:36	Western Cape		Yes I do	Other		Johan	retired
2022-07-08 10:58:31	Gauteng		Yes I do	Other	we need a mix of renewables, maximize use of hydro, gas as an interim which we could have had had our government agencies not blown billions on fruitless search for oil etc in various parts of Africa. we should relax our laws governing power suppliers but should not consider anyone eg Karpower ships. new technologies should be expedited eg Hydrogen	Wolfgang	retired
2022-07-08 10:52:31	Western Cape		Yes I do	Other	A combination of SOLAR, WIND, BATTERY, HYDROGEN and Hydro should be used. All technologies are available including smaller hydro generators for slow moving rivers. Additionally, the RED TAPE and cost of approval for roof top solar Installations on Households (+/- R20,000 for Drakenstein WC) should be removed to encourage households to move to PARTIAL self generation of power and a move from Inverter / battery ONLY which still required ESCOM power.	Alastair	retired
2022-07-08 10:52:05	Western Cape		Yes I do	Other	coal to help immediately then other	Joan	retired
2022-07-08 10:43:34	Mpumal anga		Yes I do	Other	Die eskom moet geprivatiseer word dan sal ons gewonne mense nie sonder krag sit en die hooggeplaastes het krag. Hulle weet nie wat dit is sonder krag. Jy betaal meer aan krag met die krag wat afgeskakel word. Eskom mense is hoopeloos.	Sophiaj	retired
2022-07-08 10:43:05	Western Cape		Yes I do	Other	No idea which is the best for the future as the experts should work that out . Just something that works to get electricity as the country is dead broke from corruption and bad management . SO SAD	Hilary	retired
2022-07-08 10:41:57	Eastern Cape		Yes I do	Other	Wind and solar would be the quickest method to get going but the newest nuclear methods - small reactors using existing infrastructure and deep thermal (currently being developed) should also be considered.	Pieter	retired
2022-07-08 10:41:29	Western Cape		Yes I do	Other	i am not up to speed with all the pro's and con's of the various power products but at this stage of the game with the ANC Eskom in the state it is, IPP are the only answer to our present situation , the ANC only interest is how much they can gain out of any deal where as IPP have the country at heart not themselves!	terry	retired
2022-07-08 10:41:27	Western Cape		Yes I do	Other	Our country is in an economic crises - the biggest threat now is the inconsistent power supply that causes business to lose working ours. The losses are many millions (if not more). Government has failed miserably in keeping ESKOM maintained. They do not deserve to have a monopoly in power supplies. The time for private companies to join the main electricity network is now. Scrap the red tape and allow SA to prosper!	JOEY	retired
2022-07-08 10:40:30	Gauteng		Yes I do	Other	Whatever it takes to restore full electricity supply to SA. This useless and inept government have lost the plot stolen the state, and ruined our once world class economy. We cannot rebuild with red tape, get the power back on by any means preferably with climate friendly generation!	Colin	retired
2022-07-08 10:40:15	Gauteng		Yes I do	Other	Whatever it takes to restore full electricity supply to SA. This useless and inept government have lost the plot stolen the state, and ruined our once world class economy. We cannot rebuild with red tape, get the power back on by any means preferably with climate friendly generation!	Colin	retired

2022-07-08 10:30:29	Mpumalanga		Yes I do	Other	<p>I am not fully conversant with how other forms of electricity are made. We hv gas hobs & gas heating & a solar panel which is linked to the geyser. We have a 5.5 generator which services the house during loadshedding but the cost of petrol is becoming prohibitive expensive. As pensioners we can only use this shorter periods of time.</p> <p>We saw in the UK some years ago the windmills & presume they work very well. We also hv friends who hv invertors but these can become extremely expensive. I dont hv an answer for the right or wrong use of any of the items & with World environmental problems we r literally "up the spout without a way out".</p> <p>I would agree that we urgently need indepent companies selling their electricity that we can use but then "at what cost & to whom". The poorest cannot have any more burdens on their shoulders & neither can the normal people with children earning minimal money cope. Pensioners are also falling into this group - with fixed monies.</p>	Jan	retired
2022-07-08 10:28:25	Gauteng		Yes I do	Other	<p>1. Eskom should first supply South Africa with electricity as a priority. 2. Eliminate load shedding to South Africa, and only sell SURPLUS electricity to neighbouring countries. 3. Allow independent power producers to produce and supply electricity to South Africa - only sell SURPLUS electricity to neighbouring countries.</p>	HEIDI	retired
2022-07-08 10:27:40	Western Cape		Yes I do	Other	<p>Time is long overdue that the incompetent Government steps back and stops interfering with Eskom for personal gain/corruption and cadre deployment . Legislation needs to be immediately changed to allow private companies to generate power.</p> <p>Renewable energy unfortunately does not work, look at Europe massive wind farms taking years to install and this supplies less than 2 % of the energy to the UK .</p> <p>Immediate intervention is needed, Power Supply Ships brought in (keep government and cadres away and sticky paws off !!) this will alleviate short term crisis . Then fix Eskom and allow private energy suppliers to construct infrastructure to generate consistent reliable supply to meet demands. Cut off supply to neighboring countries immediately and divert that consumption back into our dying grid. I say our grid, this belongs to all peoples of South Africa not the government, not the anc , not the cadres</p>	Chris	retired
2022-07-08 10:27:38	Gauteng		Yes I do	Other	<p>I sincerely believe that electricity supply should be privatised. Without trying to be fascesious we have experienced the result of government run SOE's that has proved that the current state of affairs simply cannot be allowed to continue. Please keep politics out of this.</p> <p>Short-term, medium term and longer term solutions need to be identified. Please consider the safest and least obvious source of hydro eledctricity. Although not cheap to set up, this can be a "green" long term life saver. Take into consideration that where fast flowing rivers do not exist, such as for example the Vaal river, a hydro system can be built with a dam feeding the necessary water to the turbines and the electricity produced in turn used to pump the water back to the dam to be fed to the turbines over and over again. Wind turbines in the corectly identified areas, solar farms in others and a small number of coal powerstations seem the obvious choice as long as the latter can be kept out of the hands of SOE's and government. Coal is available in SA, let us use it wisely with new technology to minimise pollution.</p> <p>The so-called most efficient long term use of nuclear power has proven catastrophic in many a first world country. In SA it should preferably not be considered because of the possibility of disaster. Even if you believe it is safe, remember there is a chance that something could go wrong. When in doubt, leave out. We cannot build a nuclear power plant - so why let our ZAR be spent on letting foreign companies build, maintain and benefit life long.</p>	Nico	retired
2022-07-08 10:25:01	Gauteng		Yes I do	Other	<p>We need a variety of options from multiple sources. The ANC's jobs/tenders for pals policies forced upon Eskom turned it from the powerhouse of Africa to a bankrupt shell, plagued by chair warmers, corruption, sabotage and general incompetence because the competent personnel have been dismissed as ethnically inappropriate.</p> <p>We need power supplies which are OUTSIDE government control.</p>	Kathleen	retired
2022-07-08 10:23:23	KwaZulu-Natal		Yes I do	Other	<p>Any systems that are available to bring on line as soon as possible , sabotage of Eskom equipment needs to be addressed urgently , this will also increase power available to S A</p>	Steve	retired

				<p>This question is badly formulated. Electricity is generated by multiple methods, not just one. South Africa has a shortage of firm generation. Renewable proponents have demonized the word "baseload". but the word has a clear meaning. Over a long period, typically a year, perhaps the best choice is the year to date, demand for electricity never drops below a certain level. That's the value of the baseload. The best suppliers of baseload are firm generators. If coal and gas are rejected then at the scale required, there is one and only one option remaining, nuclear power. South Africa should be starting in NOW, building multiple units. South Korea is currently completing four units of 1.4GW for the UAE. That's 5.6 GW. That's stage 6 load shedding dealt with in one project. Which cost USD 24.4 billion.</p> <p>https://www.enec.gov.ae/news/latest-news/enec-and-kepco-announce-financial-close-for-barakah-nuclear-energy-plant/</p> <p>Instead of tackling the problem we face realistically, South Africa is choosing to respond with microprojects which are poor technology and eye-wateringly expensive. Take the Redstone CSP plant. With a name plate capacity of 0.1 GW it's a pinprick which is projected to cost 0.789 billion USD. You'd need to build 56 of these to match the Barakah NPP (56x0.789=44.184) and you'd still have technology which is fatally flawed; the heat source CSP relies on is absent (on average) for half the day. As a result this plant is projected to have a capacity factor (CF) of roughly 50%. Barakah will have a CF of just under twice that - so you will need almost two the number of Redstones (56x2 = 112, 44.2x2 = 88.4) to produce the same amount of electricity as Barakah.</p> <p>https://www.nsenergybusiness.com/projects/redstone-concentrated-solar-project/ and https://flsnova.com/2021/05/10/100-mw-redstone-concentrated-solar-power-with-12-hours-daily-thermal-energy-storage-closes-financing/</p> <p>0.789 billion USD? The links above use an exchange rate of ZAR 14.7 per USD. Building 96 Redstones would be superficially equivalent to 9.6 GW of nuclear power. $96 \times 0.789 \times 14.7 / 1000 = 1.113$ trillion Rand. Nuclear - which is almost twice as productive as CSP - is too expensive at a trillion Rand for 9.6 GW but CSPs are fine even though they end up costing almost 2 trillion Rand after actual production is taken into account.</p> <p>South Africa needs a long-term plan (and nuclear power is at the top of that list) and a short-term plan to get us out of the hole we've dug for ourselves. This short-term plan cannot be addressed by wind and solar alone. Batteries must be included. Wind and solar and batteries (WASAB) have limited lives, perhaps 20 years at most. They may help get us out of the current hole - but relying of them to power an industrialized society is an Idiocy, hence the acronym WASABI. Batteries must be described by at least two attributes, two numbers. The GW value (the maximum instantaneous output) and the GWh value (the total output). Lithium-ion batteries currently have a technological limit of about 4 hours. So. if you have a 1.4 GW battery it's probably able to output that amount for at most 4 hours. Load shedding is a 24-hour occurrence., so you will need 6 of those batteries to output 1.4 GW for a day. It does not help to say that wind and solar will also be contributing. The point is that all the PV panels and wind turbines sending electricity to the grid must be matched by PV panels and wind turbines charging batteries. South Africa currently needs in the region of 6 GW of generation. 6 GW of wind and solar will not be sufficient. For every GW of batteries, you'll need a fraction of a GW of wind and solar to charge those batteries. Note that 6 GW of CSP (think solar + batteries) would cost $60 \times 0.789 \times 14.7 / 1000 = 0.7$ trillion Rand - before the cost of transmission is added. South Africa is in dire straits, needing huge investment NOW if the future is to be secured.</p>

2022-07-07 20:21:38	Western Cape	Yes I do	Other	In my opinion climate change is the next planned hoax for the world by the usual suspects! CO2 is required by all life in earth, in fact we are too low if you ask the non paid for climate experts. Therefore oil and gas are still the most efficient and abundant, Solar only when there is Sun. Wind turbines cost more energy to build than they provide and the vibrations disturb bird, insect and fish life. Hydro could be a good option when perfected. But IPP must not be monopolised and include everyone without BEE discrimination!	Maria	retired

2022-07-07 19:46:18	Gauteng		Yes I do	Other	We need to save our country from corruption and few businesses can stand the current mismanagement. No power twice a day. Fire everyone and get competent people to run and work in Eskom. We were THE best. What happened? The ANC and milking the Eskom cow happened. Streamline!!!!	Desiree	retired
2022-07-07 19:44:11	KwaZulu-Natal		Yes I do	Other	Any independent power producer should be able to supply electricity using whatever method they choose. Eskom are incompetent and unable to supply the country anymore having lost all of their expertise.	David	retired
2022-09-17 16:19:57	Gauteng		Yes I do	Other	Let Independent Producers feed into the Grid, whether it is Coal, Hydro, Wind or Solar generated. As long as it helps SA meet the energy requirements so we do not have down times or excessive load on the grid. IPPs should be given incentives to do so, not penalised in any way. SA has amongst the highest number of sunny days per annum worldwide, combined with huge tracts of unarable land. It is shocking that a European country such as Belgium that has limited sunshine is able to harness solar energy while South Africa with over 300 days of sunshine annually has made very little progress.	Charles	retired
2022-08-19 09:47:13	Free State		Yes I do	Other	We should be using green energy, Solar, Wind, tidal and hydro	Clive	retired
2022-08-16 07:54:36	Gauteng		Yes I do	Other	A combination of all available power generation technologies appropriate to the geographic region should be deployed.	Norman	retired
2022-08-10 16:52:41	Western Cape		Yes I do	Other	The cheapest way is solar BUT that only supplies during the day. Wind may help a bit. Long term for night supply would be nuclear since there currently isn't a way of storing huge quantities of electricity reliably.		retired
2022-08-10 16:36:59	Gauteng		Yes I do	Other	The reality is Government cannot control any of the State Owned Enterprises. We now need to make them step aside and explore the alternatives for the survival of South Africa. Electricity is vital in all spheres and the economy is being seriously affected by the continuous interruptions.	Coen & Olivia	retired
2022-08-10 14:43:06	KwaZulu-Natal		Yes I do	Other	The monopoly held by government needs to be relinquished. as they have proved beyond the shadow of a doubt they are incapable of running any of the state owned facilities. Power is crucial to any country and should be treated as such. However wind and solar have been proven less than ideal in other parts of the world, so realistically we should continue with our coal resources until we have a proper solution AND the funds to pursue a satisfactory alternative. Great strides have been made with pressurised hydrogen and there are many great minds working frantically on a solution to the problem as we speak. The "global warming " scare is proven to be a farce by statistics taken from satalite data, the most accurate available , so we don't need to resort to hysteria and rush into expensive and useless alternatives . Just keep looking for the best alternative. It will be found.	Sue	retired
2022-08-08 20:22:55	Western Cape		Yes I do	Other	It is time for government to own up to their mismanagement, poor decisions and lack of planning regarding energy supply. ESKOM has been a disgrace for more than a decade. Future planning needs to focus on greener energy sources, but for now, any source of power supply must be considered and optimised. And that includes allowing any one who is in a position to provide power, to do so. All spheres of government must pay their electricity bills and free supply of energy must be stopped. South Africa is simply not in a position to hand out electricity for free to anyone. Tax payers and businesses should not have to carry (yet another) burden to cover for government's poor decisions.	Marita	retired
2022-08-08 16:19:42	Gauteng		Yes I do	Other	Remove ALL red tape, Consider ALL forms of renewable energy sources. Get your priorities right, Think further than YOUR pocket, consider SOUTH AFRICA and ALL natural and heritage sights, We in South Africa are suffering because of YOUR short-sightedness.	Desmond	retired
2022-08-07 21:09:47	Gauteng		Yes I do	Other	I am not qualified to suggest the method of electricity production but since South Africa is in such a mess, several methods could be employed as soon as possible, whatever would guarantee an uninterrupted power supply.	Jean	retired
2022-08-07 16:58:26	Gauteng		Yes I do	Other	Solar for the short term. Government should subsidise home owners and small businesses to enable them to put up Solar panels for own electricity use connected into the grid where access generation goes into the grid. This works great in other countries like Australia and Spain.	Nieuwman	retired

2022-08-04 17:42:02	Gauteng		Yes I do	Other	anything that will work for the good of the country	Susan	retired

2022-08-04 09:09:46	Western Cape		Yes I do	Other	<p>Solar, wind and hydro power.</p> <p>immediately</p> <p>stop the rot ; improve the economy</p> <p>get rid of corruption.(including that corruption of giving tenders with favours out to wind or solar power corporates.)</p> <p>The public are not that naive</p>	jem	retired
------------------------	-----------------	--	----------	-------	--	-----	---------

				<p>All forms of electricity production should be used, except any nuclear power should be phased out as the damage from an accident can remove the land from human use for hundreds of thousands of years or cause degenerated human health as has been found decades after Chernobyl where the area continues to remain an invisible radiation danger to humans nearly 40 years after the meltdown.</p> <p>Those who claim that global warming should be solved by reducing carbon dioxide have followed propaganda created without peer review at the Rio de Janeiro conference about 3 decades ago. Carbon dioxide is part of the life cycle where it is absorbed by vegetation and trees that in turn expire out oxygen for the humans and animals to breathe in and expire out carbon dioxide for the vegetative world. We have a depletion of oxygen in the atmosphere which indicates that the solution is planting more vegetation, more trees for nature to balance the oxygen levels in the air.</p> <p>Apparently wealthy persons and even dominant nations fly planes with chemtrails that spread aluminum, heavy metals, and other toxins which cause harm to living organisms, make humans sick, poison and weaken trees that dry up and turn brown, and contribute to huge forest fires that release huge particulates into the air that harm the lungs of humans and animals that breathe these toxins. It is irrational that the world has blindly followed the path they have been manipulated into as a trap that will not solve the problem.</p> <p>Instead, the climate has long been known to be changed by events in the ionosphere which was named such when ions were observed building up there and contributing to the weather changes. The weather forecasting textbooks from the 1960s used in the USA's top public universities identified that climate change originated by changes in the ionosphere when ions built up and created thunderbolts that transferred these negative electrons elsewhere, usually back to the earth where it contributes to the constant stabilization of the Schumann Resonance, which is the electromagnetic frequency of planet earth itself, which is a totally natural and healing EMF at 7.82 Hertz.</p> <p>Climate change is driven by imbalances in the ions created by EMFs. We need to regulate and discontinue EMFs to the widest extent possible if we wish to stop earth's vital systems from collapsing to the point of possibly becoming a much more dead planet. EMFs constitute wifi, bluetooth, cell phones, cell towers and antennas, radio and tv towers and waves, radar, satellite transmissions, 5G, Internet of things, and the HAARP system around the world. All global warming plans that do not address the major reason for pollinator death and insect death from EMFs will cause great suffering and deprivation upon the people of earth without fixing the problem. The solution focuses primarily on immediate removal of man-made EMFs with all their inherent radiation, which inherently contains ions and electrons that build up unnaturally and interfere with the proper function of the electrical systems in the heart and nervous system of man and with the magnetic system in the brain of humans and animals. It is no coincidence that these diseases became epidemic at major increases of man-made EMFs. Please read "Rainbow Warrior" by Arthur Firstenberg, Dane Wigington at http://www.danewigington.com, and meteorology textbooks and college weather forecasting textbooks written in the 1960s when weather forecasting was extremely accurate when man-made weather change had barely begun to alter the earth's life support systems.</p> <p>The so-called protection agencies long ago succumbed to the revolving doors on the big corporations that rewarded supposed government employees charged with protecting the public in ways that corrupted the original intention. Corporations need to be held accountable not for what is inherent in their industry, but for using the best available recapture technology for emissions and other wastes that should not be allowed to escape into our air, water, and land to pollute it and make life forms sick and for high quality mitigation that actually restores ecosystems in as many ways as possible.</p> <p>What needs to be addressed and made criminal offense is whomever passes down the script for the narrative. Why do gag orders exist on the regulatory agencies that regulate these things, but especially ionizing and non-ionizing radiation which create heat, often heat that is not recognized nor recorded. In the case of ionizing radiation, the heat can be so intense that the human body is evaporized as we observed in Japan after dropping the bomb. Non-ionizing radiation was incorrectly assumed to not be a heat source, but that has now been overruled.</p> <p>The climate system contains over 50 feedback loops. There is extensive weather modification being applied to the planet, which is warming it up---not Carbon Dioxide. As Dane says, we are in over our heads, and this is a bad case of eyes wide shut. The EMFs need to be turned off, except for Emergency Broadcasts and perhaps a couple radio and tv stations with local broadcasts. The planet needs to be allowed to naturally recover, but the global controllers did not put this in their game book. It is totally man-made control when Las Vegas has record floods stalling cars in the streets, but other areas of the western plains are in severe drought. This is not natural. It is man-made. Heavy rain and drought and extreme heat waves that intensify are unnatural. The Ionosphere heater has intensified.</p>

2022-08-02 12:04:14	Gauteng		Yes I do	Other	Like it or not SA is stuck with coal for the foreseeable future. No thought has been given to the economic implications for the towns, communities and businesses built around the coal industry. Millions stand to lose their livelihoods. All restrictions on power generation from all sources should be scrapped and a combination of coal, wind, solar and gas should be implemented. There are no other options!	Maggie	retired
2022-08-02 11:00:11	KwaZulu-Natal		Yes I do	Other	We have got to get to a point where we can get power from any legal reliable source.	Michael	retired
2022-08-02 10:58:59	Western Cape		Yes I do	Other	Coal, nuclear and gas - with all their danger and fallout - can be scrapped very quickly in favour of other already proven renewables - bio-fuel, wind, sun, wood, sea, water. These methods and techs are already fully available and tested and can supply every kind of energy (plus much else!) that we need, without damaging or depleting the environment further. They can also be used off grid at a micro-level, liberating homes and industries from the tyranny of centralised stupidity. All the above is a no-brainer. Tried and tested. Just suppressed by very clever foolishness that wants short term Huge Profit and Control without real long term responsibility. As long as Independent Power suppliers comply with the above mentioned alternative tech solutions, let them free for Goodness Sakes!!	Rob	retired
2022-08-02 09:43:42	Eastern Cape		Yes I do	Other	Hydro and nuclear are the better options, Nuclear is clean and does not damage the environment. The ANC need to stop trying to own everything, because they have no business sense at all. They have brought about the crisis all by themselves with interference, cadre deployment and corruption.	Michele	retired
2022-08-02 09:07:24	Mpumalanga		Yes I do	Other	Since the government took over full control of Eskom, Eskom which had been seen worldwide as the best electricity producer with the lowest cost per unit, took a nosedive and became a disgrace. Producing electricity a critical recourse for development must be privatized in order to be managed economically, affordable and far away from government interferences and looting. Any electricity producer, wind, solar even well managed nuclear should be allowed to immediately supply South Africa with electricity. The electricity producing company should have a new name incorporating the present Eskom and all the different electricity producers.	Hartmut	retired
2022-08-02 08:35:08	Western Cape		Yes I do	Other	Make for all to afford.	Alna	retired
2022-08-02 08:31:35	Western Cape		Yes I do	Other	Good old fashioned cooking by the fire!! Seriously - cut back on all the non essentials. Wind kills birds - solar is probably best... nuclear calls for disaster - coal calls for destroying the forests and earth..	Jennifer	retired
2022-08-02 07:52:18	Western Cape		Yes I do	Other	I support a combination of all clean energy power, and that private industry and individuals can produce and add power to the grid	Leslie	retired
2022-08-02 05:53:49	KwaZulu-Natal		Yes I do	Other	We need a variety of power production methods as a hybrid solution. For metros I would like to see the rubbish being used. It is the most expensive yes but it also creates many opportunities for jobs and creative minds in finding uses for byproducts	David	retired
2022-08-02 05:26:18	KwaZulu-Natal		Yes I do	Other		Debbie	retired
2022-08-01 23:10:09	Western Cape		Yes I do	Other		Catherina	retired
2022-08-01 18:06:39	Western Cape		Yes I do	Other	It is nearly past midnight for SA, in all respects, but most visibly and damagingly, electricity supply. Relegate Eskom to history or, at best, a minor supporting role - the organization, as it has stood for the past two decades, has conclusively demonstrated that it cannot produce the goods. From what I have read, no one supply source will be adequate, so let's combine all possible sources where possible. At the same time, we must not fail to protect the planet by use of the least environmentally harmful solutions.	Colin	retired
2022-08-01 09:40:06	Gauteng		Yes I do	Other	Procurement from private power producers and neighboring states with access power	Lourens	retired
2022-08-01 08:29:51	Gauteng		Yes I do	Other	If it becomes private owned you may think it will increase the price, it mite in the beginning but they will soon see, with the economy and competition it will balance out and the money monkeys will die. If the government wants there finger in the pie they could control the distribution only and pay those private individuals how can feed back into the system. The means for the individuals to make the power we must leave it to the experts not the politicians and money grabbers.	Cliff	retired

2022-07-31 20:11:44	Gauteng		Yes I do	Other	We can have a mix of coal, wind, solar	Pamela	retired
2022-07-31 19:28:38	Gauteng		Yes I do	Other	Hydro, solar, wind, nuclear	Michael	retired
2022-07-31 11:41:31	Gauteng		Yes I do	Other	The following to be implemented to increase available electricity by up to 15%(20%?) soonest: a) All existing legal connections to the "Grid", to be normalised by renewed contracts to each consumer. b) All other illegal connections(theft) to the "Grid"be disconnected permanently. c) A permanent and routine/continuous inspection of the "Grid" be implemented by all Supply Authorities. This process will create many new jobs paid for by the savings thus created by qualified staff.	Niels	retired
2022-07-29 11:05:12	Western Cape		Yes I do	Other	South Africans have plenty of wind and sun access. There is scope for new, actual modern, clean technology, excluding potentially dangerous and pollution producing technologies . Solar, wind, harmonics, come on, let's step into the new world and leave behind ancient polluting energy generation.	Charlene	retired
2022-07-28 20:53:17	Gauteng		Yes I do	Other		Hlobisile	retired
2022-07-26 15:30:25	Eastern Cape		Yes I do	Other	The problem with Eskom is: 1. The government's unconstitutional and white racist policy called BEE. Purge this disease from the country and it shall be healed and will prosper. 2. Because the government is set on becoming a tyrannical communist state, it go so far as to refuse any other solution offered by citizens and even punishing private solar providers (which eases the burden on Eskom) by planning to increase basic access fee. 3. No credible effort is made by the government to determine, charge and prosecute criminal and fraudulent elements within this and other state entities. Wonder why... Eskom is just the outcome, a visible example, a mirror of the 'success' of current state policies and therefore its future. For the government to obsessively cling to its failed communist racist policies is like clinging to its failure, public embarrassment and eventual self-destruction.	Engela	retired
2022-07-25 14:54:41	Limpopo		Yes I do	Other	The best immediate solution is to get our current power plants to work 100% as intended. In the future we can look at solar - we have the sunshine, and wind which we also have.	Rudi	retired
2022-07-25 11:11:40	Western Cape		Yes I do	Other	We cannot use a single source of power - so we need to make the best use of whatever is economically viable. ESCOM - who used to be a world class company - has become the equivalent of a Minibus Taxi - barely able to cope with the next overloaded group of passengers! ESCOM has also become an entity being manipulated by various groups with their own agendas, each looking after their own interests! For this reason, we need to drop all hindrances for IPP's, so that their power generation can be made available to the users / municipalities that are able to pay for it. The IPP's need to be competition for ESCOM, and market forces need to apply for the price of different energy producers. I also believe that each power station should be privatised and ring fenced and run independently - so that the best performing units will be able to reward good management and efficient supply. Those who are unable to get their units up and running, should be transferred to new management that are able to do the job! Also, there should be NO quotas and BEE, the time for this is over. There are very competent people available who used to run ESCOM efficiently, who al;so have a good work ethic. Employ people with skill, knowledge experience and a willingness to WORK, not just a desire to MANIPULATE.	Gerhardus	retired
2022-07-14 22:40:57	Western Cape		Yes I do	Other	I think we should use whatever is efficient and abundant, climate change due to carbon emissions is a load of shit, plants/trees turn carbon dioxide into oxygen. Governments must get off Bill Gate's band wagon of taxes. If it works, use it, we have plenty of wind and sunshine in the Cape, use it!	Brendon	student
2022-07-14 15:38:42	Gauteng		Yes I do	Other	South Africa is positioned uniquely for a variety of ways to produce electricity. SA can produce electricity via solar, wind, hydro and coal, depending on location. The private sector can be of great help and the government should be more open to working together with the private sector.	Morrison	student
2022-07-13 14:10:10	Gauteng		Yes I do	Other	Both coal and solar, where privatisation is not 100% but just the other 50% of a partnership with government, so that electricity is subsidised by the government because we are paying taxes towards that. Also so that there will no longer be any loadshedding problems.	Jabulile	student

2022-07-11 15:57:32	Western Cape		Yes I do	Other	There are large private companies that have approached the government and eskom with alternatives to generate electricity such as biofuel from timber harvesting for example, but no support is provided in either encouragement or financial support. I would think that alternatives like that would benefit the entire country.	Jackie	student
2022-07-11 09:04:22	KwaZulu- Natal		Yes I do	Other	Use more than one method, we have the recourses, it just needs to be implemented competently. Private Producers can take a massive load off Eskom so Eskom can adequately supply electricity to the remaining people who won't be able to afford private electricity.		student
2022-07-10 18:13:14	Gauteng		Yes I do	Other	Independent power producers mean: NO individual or group from any government now or previously should be allowed to be an independent power producer. Including Ramaphosa and Motsepe. There should be a board - made up of all leaders of all aspects of the economic industry which determines the criteria of who qualifies as an independent power producer. Previously involved people have a conflict of interest. As far as power generation is costed - completely without profit motive. Business is the result of Society collaborating to supply each other with what it needs to survive. Energy should be a level playing field, at cost plus real expenses - and out of the hands of those who seek to use it as a weapon.	Pierre	student
2022-07-10 17:34:19	Gauteng		Yes I do	Other		Nicky	student
2022-07-10 13:36:06	Gauteng		Yes I do	Other	Anything really.	Dylan	student
2022-07-10 11:19:56	Western Cape		Yes I do	Other	Die rede hoekom ek "other" kies. 'n Mens sal nie net op een metode van krag verskaffing kan staat maak nie. Suid-Afrika het 'n unieke klimaat. Ek sou graag wou meer as een opsie kon kies.	Emile	student
2022-07-08 15:08:57	Western Cape		Yes I do	Other	There should be an immediate call for businesses who have excess energy from solar to feed into the grid. Big companies who don't use their solar on the weekend for example can do this. Homes should be subsidised with solar panels to generate their own energy and feed excess to the grid if possible. This can free up Eskom to start running their fleet properly and not fixing broken plants. There should be a state of emergency to attend to corruption and destruction of infrastructure at eskom. This should be immediately made treason! All types of energy should be used, wind/solar/gas/coal/wave energy/ocean current energy. Put the power to generate power into the people's hands. If investors from europe and north america are allowed to generate electricity then secure the training and employment of our citizens. Make energy exempt from BBBEE and BEE legislation. We need skilled people not political appointments.	Karin	student
2022-07-13 14:42:34	Western Cape		Yes I do	Other			Non-profit
2022-07-13 12:18:10	Western Cape		Yes I do	Other	While renewable natural resources and the science behind the best way to make use of them for our energy production needs, is definitely the answer to the issue facing ESKOM currently, I do not agree that energy generation with the introduction of one large source provider for an entire country will be the most effective way forward either. A call for and referendum on 3 national potential energy research facilities collaborating, but also working on 3 different energy generating concepts should be financially supported. One of these facilities could for example research the use of electromagnetic energy as the basis of their studies and the engineering of this energy, while a provider would collaborate with engineers to install and maintain the energy installation either into individual homes or on a substation level. While financial support is provided for the research facilities, installation and maintenance of the energy generating system should be open to private companies, trained and regulated by the three facilities. Also, resources that work in harmony with nature are more desirable for the present moment, but our reliance on electricity and mechanics should also be addressed if sustainability and the health and well-being of all life-forms is to be ensured.	Ursula	Non-profit

2022-07-11 15:24:37	Western Cape		Yes I do	Other	Renewable Energy cannot provide all, and eventhough it is a cleaner energy, there must be a balance that is steady and affordable.	Lizelle	Non-profit
2022-07-11 14:02:54	Gauteng		Yes I do	Other	I am not an expert - perhaps a combination of different sources; what is most available, most affordable, sustainable and best for environment	Lisa	Non-profit
2022-07-10 20:10:36	KwaZulu- Natal		Yes I do	Other	I am not an expert. Only people who are fully qualified and experienced should be considered for positions at Eskom. There is no room for selection by race.	Sally	Non-profit

2022-07-10 09:49:56	Gauteng	Yes I do	Other	<p>The current electricity crisis is utterly unacceptable, had Eskom been managed properly, this crisis would never have happened. The country was already reeling financially after Covid, now petrol prices and especially non supply of electricity are causing the final demise of our country.</p> <p>I cannot comment on alternate sources of electricity, as that is totally outside my field of expertise, but clearly some drastic measures need to be taken to solve this rapidly deteriorating electricity supply from Eskom. Why has nothing been done by the ANC to find a solution as Eskom has admitted they are on the verge of a total collapse!</p> <p>Surely experts should have been called in a decade ago already to find alternative solutions. It is obvious that Eskom cannot provide electricity for the country anymore, despite their now exorbitant pricing structure for consumers, so it is utterly urgent that their monopoly be taken away and alternate providers be given the opportunity to assist in saving our collapsing economy.</p>	Lorna	Non-profit
2022-07-09 21:55:41	Gauteng	Yes I do	Other	<p>It is high time that competent, honest and keen individuals be hired to do what needs to be done, so that load shedding comes to an immediate permanent end!!! All sources of energy should be utilised in all sorts of efficient procedures.</p>	Paul	Non-profit
2022-07-09 13:54:35	Western Cape	Yes I do	Other	<p>I have selected other as we are a very resourceful country. We have a number of energy sources available to us, in particularly, wind, solar and water, and we should be making use of it.</p> <p>Inland, can probably rely more on solar, whereas our coastal areas can rely on the wind and the oceans for our energy.</p> <p>Government should not be holding all the power. Making use of these natural resources, will create jobs for a number of people and in this way, we can start to stop the cycle of poverty.</p>	Cecilé- Ann	Non-profit
2022-07-08 10:46:01	Gauteng	Yes I do	Other		Kopano	Non-profit
2022-07-08 10:33:06	Mpumal anga	Yes I do	Other	<p>Renewable energy sources seem to remain untapped, although proven effective by many.</p> <p>It does not seem feasible for government to continue throttling attempts at economic recovery by not approving IPP's supply to the grid which continues to cripple an already struggling country.</p>	Leigh	Non-profit
2022-07-08 08:39:17	Mpumal anga	Yes I do	Other	<p>S.A. has both high Solar coverage and good prevailing winds in various areas. Private companies could easily accomplish what the incompetent and corrupt ANC has been unable to resolve for the past 15 years. The solution does not lie in one method only, but in applying different methods in different areas. For example in the eastern and western cape wind turbines would function well. In gauteng and mpumalanga solar would function well. Private companies must be allowed to launch whatever mechanism of generating power is applicable, to begin augmenting and even finally replacing the totally useless and corrupt Eskom facility. Government cannot be permitted to block any private enterprise from doing what the ANC is clearly unable to do, i.e. sustain the life and economy of what used to be a world leader country instead of the pathetic junk status nation that we have become under their corrupt, useless leadership</p>	Eugene	Non-profit
2022-07-08 07:57:25	Gauteng	Yes I do	Other	<p>A diverse energy generation system with large and small scale providers, that allows for a variety of power sources and incentivises research and development is ideal. Shack with solar panel roofing could enable currently unemployed families to earn towards their daily bread by selling in to the network. Hydro sources near rivers and oceans make sense. In some areas wind farms. Gas and combustible solids from compostible waste can be used in local setups especially as research and development investments yield increasingly safer and more efficient ways to utilize such sources. Research, development, and micro local networks should be actively incentivised with public competitions, publicity, and prizes for innovative ideas in addition to simply income for actually generating power. Each building should be empowered and actively supported to supply at least a portion of its own needs to take the load off centralised grids. Red tape should exist for safety reasons and deal exclusively with safety concerns. Safety should be the one and only restriction, we can not afford to strangle our energy network as we have to date for merely political and economic interests.</p>	Jeanna	Non-profit
2022-08-02 14:39:20	Eastern Cape	Yes I do	Other	<p>1 We need have reliable energy providers. Restrictions that narrow the ability for provision are not helpful for the country. The Government is there to govern not charge or tax people at every opportunity. The red tape makes it almost impossible for us to move forward. This must be removed.</p> <p>Type of Energy. I think the type must be environmentally sustainable, and it is up to the individual companies to make it profitable. They are responsible for making their businesses efficient and effective. The governments job is not to get in the way but to facilitate so South Africans can benefit. The government mustn't make conduits or avenues available for themselves to steal, this they do by setting up red tape and taxes that prevent these types of business.</p>	Robin	Non-profit
2022-08-01 09:44:34	Western Cape	Yes I do	Other	<p>We find ourselves with loadshedding. With foresight and planning of alternative energy supplies we would not be in this situation. Wind farms, solar panels, should be available for every household.</p>	Natalia	Non-profit

2022-07-19 13:29:44	KwaZulu- Natal		Yes I do	Other	A combination of sources to be used. Every area in the country is different. Wind, solar, coal, diesel.	Annemarie	
2022-07-18 04:53:29	Gauteng		Yes I do	Other	Any available method except for Diesel and Gas.		
2022-07-18 04:52:09	Gauteng		Yes I do	Other	Any available method except for Diesel and Gas.		
2022-07-18 04:50:31	Gauteng		Yes I do	Other	Any available method except for Diesel and Gas.		
2022-07-18 04:49:09	Gauteng		Yes I do	Other	Any available method except for Diesel and Gas.		
2022-07-16 12:55:04	Western Cape		Yes I do	Other	The immediate execution of a revised energy resources mix.	Pierre	
2022-07-13 21:52:58	Gauteng		Yes I do	Other	At this point in time, electricity must be created by any means possible.	Shaun	
2022-07-13 18:22:35	Gauteng		Yes I do	Other		Pat	
2022-07-13 17:36:50	Gauteng		Yes I do	Other	A combination would be best, some for immediate provision and some looking long term.	Michelle	
2022-07-13 16:23:22	Western Cape		Yes I do	Other	Introduce current 'free energy' technologies that have been banned by the 'fossil fuel' industrialists for over a hundred years, thereby making cheap, pollution-free energy available at a fraction of current costs to all in the country!	m	
2022-07-12 18:56:56	Western Cape		Yes I do	Other	a combination of renewables with gas and coal! Seek out independent providers. South Africa cannot continue under one entity that has the monopoly over energy!!!	Michelle	
2022-07-12 16:55:49	Gauteng		Yes I do	Other	I am not clued up on what sort of power should be used. Certainly not Nuclear. But I would like to emphatically say I am and thousands of South Africans, I am sure, are sick of load shedding It is ruining our lives ruining businesses. When we lose electricity we also do not have water and I find this situation terrible. Things are going from bad to worse. I hope and trust that DA will be able to do something about this.	Margaret	
2022-07-12 14:20:53	Mpumal anga		Yes I do	Other	Stop supplying neighboring countries with electricity!	Willie	
2022-07-11 17:37:01	Western Cape		Yes I do	Other	Any and All renewable and sustainable options should be undertaken with immediate effect by anyone who can supply it. As Power (Electricity) is aligned with our modern Life to sustain it, the Right to Electricity is inherently a given to All. No Government or claimed "authority" has exclusive right to harness Nature, Life Itself and provide it at their discretion to others. All such action is what they themselves term "Criminal". So permission does not even need to be asked nor granted, as it is a Natural Given. But additionally, market competition provides a healthy environment which minimises corruption which happens through the monopoly of Greed. As the more competing suppliers there are, the less opportunity there is for exorbitant and exacerbated prices. Only Criminals like to keep systems going where they are in monopoly. All resistance to such Freedom of the People is Unconstitutional, and therefore Unlawful and Invalid in the first place.	Dewaldt	
2022-07-11 14:25:17	Gauteng		Yes I do	Other	For immediate results they need to look at a diversity of power generating solutions. As the installation and implementation of wind, hydro etc is going to take too long to kick off and we will still have the same problems	Veronica	
2022-07-11 10:51:39	Gauteng		Yes I do	Other	The problem is both management and technical skills. But the ANC don't really seem to care about the citizens or the country as a whole, and cadre employment is clearly the problem. We need to generate every possible source of power that we can using numerous methods from both private and the state. Excess can be sold to other struggling African countries...surely.	Ivan	
2022-07-11 10:39:29	Gauteng		Yes I do	Other	Anything else will be better, as long as there won't be any further corruption and fraud.	Anna	
2022-07-11 08:24:27	Gauteng		Yes I do	Other	Absolutely anything that is cost efficient and takes the control out of the hands of government	Dave	
2022-07-10 21:27:20	Western Cape		Yes I do	Other		Cheryl	
2022-07-10 20:11:53	Gauteng		Yes I do	Other	all. Throw everything at it. Absolutely everything. Eskom holds could make a small income for themselves. Eskom is just too expensive, pay wages that are just too high, cost of building the power stations was corrupt, then municipalities are not paying Eskom or state enterprises.		
2022-07-10 19:41:39	Western Cape		Yes I do	Other	A combination of wind, hydro and solar generation facilities would be well suited for Cape Town.	Denville	

2022-07-10 17:11:05	Gauteng	Yes I do	Other	<p>I believe fossil fuels are the way to go despite what the lying climate activists say...</p> <p>Solar panels and wind turbine blades cannot be recycled and therefore will create more problems in the future as these parts have a limited life expectancy, also the costs to install and to maintain these failing alternatives are astronomically expensive, which means electricity will only be available for the rich who can afford it.</p> <p>Anyone who does their research will learn that although the planet is heating up, it is at a much slower rate than what the climate activists will have you believe.</p> <p>Please note that every prediction these activists have predicted has proven to be false.</p> <p>Oil and gas are the safest and most reliable energy we have today and therefore we show keep using it until a more reliable and cheaper source is found or invented.</p>	Robin
2022-07-10 09:24:12	Eastern Cape	Yes I do	Other	Combination of sources.	Quinton
2022-07-09 20:54:56	Western Cape	Yes I do	Other	A sustainable combination including dubdidised solar and wind on all existing and new buildings.	Gill
2022-07-09 16:08:15	Gauteng	Yes I do	Other		Anthony Swanepoe I
2022-07-09 12:14:53	KwaZulu- Natal	Yes I do	Other		Sharon
2022-07-09 11:20:37	KwaZulu- Natal	Yes I do	Other	<p>SA Needs Anything that they can get Once the need is met then we can pick the best option</p> <p>The Government managing supply is the worst option.</p>	Leon
2022-07-09 09:58:00	Western Cape	Yes I do	Other	The ANC government has destroyed our power producing capacity and continues to have cadres in place who are sabotaging facilities. Step one is to route out and fire all those saboteurs. Secondly, remove all legislative obstacles and allow private electricity producers to augment the grid. At this stage we need a combination of solar, wind and hydro as well as squeezing whatever life is left out of the coal facilities that are already in place. Furthermore, alternative clean and sustainable sources such as geothermal and nuclear fusion should also be investigated.	Deon
2022-07-09 09:03:44	Western Cape	Yes I do	Other	This should have been complimented when we first started having power problem but those in power first had to deal as much as possible. Stop the corruption let the IPP run with their solutions. Make a rate that is fair for both parties a d let's solve one of our problems asap.	Michael
2022-07-08 20:50:53	Western Cape	Yes I do	Other	We should use all so that we are not dependent on only one source, so if one fails, the others are there.	
2022-07-08 18:03:00	Western Cape	Yes I do	Other		Sabrina
2022-07-08 13:20:26	Mpumal anga	Yes I do	Other	The South African economy needs a stable electricity supply. Please cut all red tape, and allow IPP's to operate and even put forward incentives for IPP's with tax cuts, to speed up electricity generation in SA.	Dom
2022-07-08 13:13:18	Western Cape	Yes I do	Other	Nikola Tesla invented a tower where free wireless electricity is generated by electro magnetic frequencies where electricity is harvested from the atmosphere. There are a lot of information on this subject on www.ThriveOn.com	Lionel
2022-07-08 11:03:57	Western Cape	Yes I do	Other	A combination of Wind, Solar and Hydro	Jutta
2022-07-08 09:43:42	Gauteng	Yes I do	Other	The sooner the red tape is scrapped and the IPPs can supply the power SA needs the better. Eskom have proved that they can't meet the needs of this country. Things need to change very quickly.	S
2022-07-08 06:53:23	Western Cape	Yes I do	Other	<p>Let's move out of archaic policies and embrace the future. We have the technology and we should use it!</p> <p>Renewable energy resources are plentiful in our country; there are many windy areas that can provide wind power. Solar power is a no-brainer. Nuclear and Hydro might take a bit longer to implement than wind and solar, but it is not out of reach.</p> <p>The ease (or removal) of these strict policies will help bring South Africa out of the darkness. It will also encourage healthy business competition, remove the monopoly owned by Eskom, and enforce stronger accountability across the various providers.</p> <p>Let's be better!</p>	Paul
2022-07-08 06:40:02	Eastern Cape	Yes I do	Other		Mike
2022-07-08 06:39:42	KwaZulu- Natal	Yes I do	Other	Any renewable energy source. Especially those that would be best suited to that area. Solar. Wind where there is sufficient wind etc.	Michele
2022-07-08 06:37:15	Gauteng	Yes I do	Other	Solar uses battery to save power. To invest in solar is not the be all and end all. Gas is a route to go but we need to use hydrogen to generate. So either internal combustion engines running on hydrogen. I believe each house hold should be allowed to generate elec and sell it once excess into the grid !	Len
2022-09-10 10:11:06	Western Cape	Yes I do	Other	A combination of solar, wind, wave /tide and some gas until the transition to renewables is complete.	Mike

2022-09-09 15:16:35	Gauteng	Yes I do	Other	<p>Firstly, I'm in favour of South Africa making use of a combination of all its energy producing resources, but with an emphasis on green/renewable sources.</p> <p>The current status of Eskom will never be fixed, even with the best intentions of De Ruyter. The damage is too severe and the corruption and incompetence runs so deep that nothing will fix it as there is no political will and too many ANC stumbling blocks.</p> <p>All small, private companies, citizens and IPPs should be allowed to generate power, independent of the corruption that is the ANC.</p> <p>In addition, there should be incentives for individuals to produce their own power or to supplement the Eskom grid, and not be penalised as is currently being proposed.</p>	Peter-John	
2022-08-08 08:43:11	Western Cape	Yes I do	Other		Andre	
2022-08-05 13:26:06	Western Cape	Yes I do	Other	<p>Put South Africa first.</p> <p>Stop selling electricity to neighboring countries or at least loadshed them instead of SA!</p>	Jack

2022-07-11 17:10:36	Gauteng		Yes I do	Gas	You don't have an "all of the above" option here otherwise I would have selected that. I don't think we have the luxury of choice at the moment so anyone that can add to the power grid by any means possible should be fast tracked in order for them to do so...	Adrian	employed individual
2022-07-11 16:41:28	Western Cape		Yes I do	Gas	At this stage I would be open amd accepting of any suggestions or alternatives that are put forward -whether its solar, wind generated, gas or coal. Whatever is sustainable and affordable for the masses, because this electricity crisis is devastating to our already struggling (and suffering in some cases) nation. Something has to change. You cannot block independent suppliers from solving the problem. It's nonsensical.	Kim	employed individual

2022-07-11 14:50:24	Eastern Cape		Yes I do	Gas	Scrap all the red taper, get the electricity going. Let Private Business take over. We can not carry on the way things are going. This will just lead to more businesses closing, more jobs lost and more people with no work = a starving nation!!!!	Karen	employed individual
2022-07-11 14:13:35	KwaZulu- Natal		Yes I do	Gas	uitable for a large range of power generation from 0.5 MW to 100 MW plus. Not dependent on weather conditions. Can be switched on and off fairly fast.	Derick	employed individual
2022-07-11 14:07:45	Gauteng		Yes I do	Gas	Suitable for a large range of power generation from 0.5 MW to 100 MW plus. Not dependent on weather conditions. Can be switched on and off fairly fast. Cleaner burning than coal with a higher specific energy. Technology is tried and tested.	Johan	employed individual
2022-07-11 13:56:39	Free State		Yes I do	Gas	I am not an expert in these matters however it is clear we are not adequately resourced and need to open up the door and expand on other options and cheaper options as well.	Gretchen	employed individual
2022-07-11 12:49:33	Western Cape		Yes I do	Gas	Quick to get up and running, inexpensive and can be very clean. Energy dense enough to actually run furnaces and industry, unlike the expensive scam of green energy. We also have a crapload of reserves to capitalize on if we can get rid of the communist government that caused this mess in the first place. Seems like the perfect way to uplift people if you ask me.	Brendon	employed individual
2022-07-11 12:30:55	Mpumal anga		Yes I do	Gas	I Truly believe that the Karoo shale gas projects should be executed without delay this will remove the dependence on global linked Brent oil and firmly place South Africa as an oil and gas producing nation. This will allow South Africa to burn much cleaner gas as opposed to coal as base load energy. Yes renewables is the future but we as a developing nation can not and should not be limited by our environmental laws - many countries has over the last decades has burned and is still burning carbons to develop their nations. Africa should be allowed to do this - yes with limitations but not with restrictions. Sasol should be instructed and mandated to explore gas power generation as electricity baseload provider as renewable energy is phased in and coal generation ends.	Daniell	employed individual
2022-07-11 11:03:39	Eastern Cape		Yes I do	Gas		Julian	employed individual
2022-07-11 10:59:50	KwaZulu- Natal		Yes I do	Gas	While I believe that SA can generate electricity from multiple sources, what we cannot do is carry on as we are currently doing. Stage 6 load shedding hurts the economy and people are fed up.	Nadira	employed individual
2022-07-11 10:59:35	Western Cape		Yes I do	Gas	Nuclear is probably the best solution in the long term but gas makes more sense in the immediate future. There is absolutely no reason that energy production should be a government monopoly ever.	Donald	employed individual
2022-07-11 09:33:08	Gauteng		Yes I do	Gas	eskom has been monopolising the electricity supply for too long and have been incompetent in delivering to the majority of paying clients. we require a serious competitor with better & cheaper prices together with better service delivery. please consider the sick & aged in our communities.	FAIZEL	employed individual
2022-07-11 09:12:42	Western Cape		Yes I do	Gas	Gas will be the quickest and most reliable in terms of continuity of supply. Longer term planning, i.e. the IRP, needs to be implemented but we need cheap power now, even at the expense of the environment - at least until cleaner and more sustainable solutions, which should already start being built, can provide stable power, and negate the need for emergency generation.	Robert	employed individual
2022-07-11 08:18:48	Gauteng		Yes I do	Gas		Diana	employed individual
2022-07-11 07:28:53	Gauteng		Yes I do	Gas	We have more than enough waste (plastics/sewage) that we can change into gas.	Michelle	employed individual
2022-07-11 06:57:55	Gauteng		Yes I do	Gas		Deon	employed individual
2022-07-11 06:28:56	Gauteng		Yes I do	Gas		Deriek	employed individual
2022-07-11 06:18:19	Gauteng		Yes I do	Gas		Amulda	employed individual
2022-07-10 23:23:58	Gauteng		Yes I do	Gas	Allow private fuel and electricity companies to give us fuel for power. Not only Eskom. They dont own everything.	Emma	employed individual
2022-07-10 23:23:55	Gauteng		Yes I do	Gas	Allow private fuel and electricity companies to give us fuel for power. Not only Eskom. They dont own everything.	Emma	employed individual
2022-07-10 22:12:04	Gauteng		Yes I do	Gas	South Africa has many different resources that can be used as an alternative to coal. I thinking using all of them combined we can create enough electricity for everyone	Tshegofats o	employed individual
2022-07-10 19:49:40	Gauteng		Yes I do	Gas		Heath	employed individual
2022-07-10 19:18:30	Western Cape		Yes I do	Gas	We can't depend on Eskom	Bradley	employed individual

2022-07-10 18:44:12	Western Cape		Yes I do	Gas	<p>The quicker we move towards power being generated by companies outside of Eskom the better. South Africa needs cheap and reliable energy. Forget about wind and solar - it is too unreliable and energy dilute. Wind and Solar only supply electricity 10-30% of the time and there is no good way to store this energy. Further, wind and solar also requires massive amounts of land.</p> <p>South Africa needs to get extra mega watts on the grid that is independent of Eskom but also supplies reliable baseline power. At this stage it doesn't matter if the power is generated from diesel, coal or natural gas. The cost of not having power now is much more detrimental than any potential long term effects. Natural Gas is reliable and much cleaner than coal. It would make sense to perhaps start using gas from Mozambique to generate power. I know expert like Ted Blom has also mentioned that gas infrastructure can be built fairly rapidly so it makes sense.</p> <p>Another, option is for private companies to start operating Eskom's plants for them, much like is done with water treatment in various municipalities. This is a first step to privatize Eskom and get the plants up to standard again.</p>	Martin	employed individual
2022-07-10 17:26:28	KwaZulu- Natal		Yes I do	Gas	Gas turbines will deliver the quickest electricity in the short term	Andre	employed individual
2022-07-10 15:55:03	KwaZulu- Natal		Yes I do	Gas	I agree with an immediate solution. A cautionary note here regarding any solution; whatever solution is procured , the financial and sociological impact must be equitable and safeguarded against monopolies and corruption.	Harvey	employed individual
2022-07-10 15:55:03	KwaZulu- Natal		Yes I do	Gas	I agree with an immediate solution. A cautionary note here regarding any solution; whatever solution is procured , the financial and sociological impact must be equitable and safeguarded against monopolies and corruption.	Harvey	employed individual
2022-07-10 15:50:08	Gauteng		Yes I do	Gas	Can Black Women have a stake as well in this initiative	Molwane	employed individual
2022-07-10 15:35:36	Gauteng		Yes I do	Gas	The government must not have control over hoe SA resolves the electricity issue. They just take all the money from the people	Anel	employed individual
2022-07-10 14:53:38	KwaZulu- Natal		Yes I do	Gas		Anya	employed individual
2022-07-10 14:53:36	KwaZulu- Natal		Yes I do	Gas		Anya	employed individual
2022-07-10 14:17:02	Gauteng		Yes I do	Gas	I feel that we are at a point that we should allow any power producer to supply electricity regardless of what ever method they use. The country needs power and it needs it now. Get rid of all the red tape because the regulations will only allow the politically connected to sell power to the state.	Ockert Johannes	employed individual
2022-07-10 13:41:07	Limpopo		Yes I do	Gas	As in the US where gas is supplied directly to homes for use in stoves and heating might be an alternative to electricity.	Abri	employed individual
2022-07-10 12:16:54	Eastern Cape		Yes I do	Gas	<p>We are facing a massive electricity crisis which is expediting the economic death spiral of the South African economy which is the livelihood of 60 million people.</p> <p>For a modern growing industrial economy (which can lift millions of people out of poverty), we need a stable and reliable base supply of electricity, supplemented by auxiliary electricity streams (hydro, solar, wind, gas).</p>	Werner	employed individual
2022-07-10 10:13:41	Gauteng		Yes I do	Gas	I'd have chosen any that will displace Eskom and that will allow us to rebuild an economy crippled by chronic barriers like power outages.	Guinivere	employed individual
2022-07-10 10:07:33	Outside SA	United Kingdom	Yes I do	Gas		Danielle	employed individual
2022-07-10 08:05:13	Western Cape		Yes I do	Gas	Off shore natural gas ships / rigs can prvide capacity to end current load shedding. Koeberg must be renewed or rebuilt so that we cab follow the European Nuclear model as soon as possible!	Heinrich	employed individual
2022-07-10 07:51:26	Gauteng		Yes I do	Gas		Alexander	employed individual
2022-07-10 07:48:31	Gauteng		Yes I do	Gas	<p>Look at capital required per MWh and operating cost.</p> <p>SA has lots of coal that can be gassified.</p>	Pierre	employed individual
2022-07-10 07:48:27	Gauteng		Yes I do	Gas	<p>Look at capital required per MWh and operating cost.</p> <p>SA has lots of coal that can be gassified.</p>	Pierre	employed individual
2022-07-10 07:37:24	Gauteng		Yes I do	Gas		Amanda	employed individual
2022-07-10 06:52:58	Gauteng		Yes I do	Gas	We need a hybrid approach	Jaco	employed individual
2022-07-10 06:14:14	Gauteng		Yes I do	Gas	We need to be more flexible in how we source our energy. Need to open up the market to allow for more options and increase competitive pressure to decrease prices.	Tshepo	employed individual
2022-07-10 02:58:45	Gauteng		Yes I do	Gas	It is quiker to build and it is green energy	Ntwaetsil e joel	employed individual
2022-07-09 22:49:38	Gauteng		Yes I do	Gas	<p>There is a surfeit of gas easily available from Mozambique.</p> <p>Some of our old coal fired stations are easily accessible and should be repurposed.</p> <p>All new builds will take longer than this to get up and running, but in the short term wind and solar are the quickest to get to market. Probem is with the base load though - wind doesnt always blow etc - so massive amounts of expensive storage (batteries) become and issue.</p> <p>As far as long-term reliable base load is concerned, I still think nuclear is an option (without the almost compulsory corruption of course).</p>	Garry	employed individual

2022-07-09 21:03:40	Gauteng		Yes I do	Gas		Victor	employed individual
2022-07-09 20:06:08	Western Cape		Yes I do	Gas		Desiree	employed individual
2022-07-09 18:16:27	Gauteng		Yes I do	Gas	We need to use gas on our open cycle turbines instead of diesel. Mozambique has loads of gas and Sasol burns off TONS of it a day (see the chimneys with flames in Secunda) Also, the red tape means that it takes 12-18 months to get power into the grid, this needs to be done in less than 6 months	Clinton	employed individual
2022-07-09 18:07:22	KwaZulu-Natal		Yes I do	Gas	There are still smart engineers left in this country. They have actually studied! Solutions are being blocked by little gwede because him and his friends won't benefit from a fair tender. Bloody ridiculous	Justin	employed individual
2022-07-09 14:06:28	Eastern Cape		Yes I do	Gas		Johan	employed individual
2022-07-09 13:10:04	Western Cape		Yes I do	Gas	Ive got nothing to say but all i know is something needs to change. Open up the market and let there be affordable competition in the energy sector	Rachel	employed individual
2022-07-09 11:23:54	Western Cape		Yes I do	Gas		Dean	employed individual
2022-07-09 08:22:21	Gauteng		Yes I do	Gas	As we have natural gas deposits I feel this should be used to drive generators. Gas would be more reliable than coal - coal can be unreliable due to corrupt tenders, the gas price is regulated so therefore closing the gap for crippling corruption. Electricity and water should be privatised with immediate effect, eskom can be liquidated as a SOC and turned into a governing body where independent electricity producers would join and engage with government.	Janus	employed individual
2022-07-09 07:47:02	Gauteng		Yes I do	Gas		Tsholofelo	employed individual
2022-07-09 06:45:21	Western Cape		Yes I do	Gas		Barend	employed individual
2022-07-09 03:53:57	Eastern Cape		Yes I do	Gas	A combination of solar , wind and gas. Solar by its self without batteries will only work when there is sunlight. At night or when it is overcast one would need an alternative.	Sorrel	employed individual
2022-07-09 03:12:18	Western Cape		Yes I do	Gas	The government is clearly not capable of supplying power to the country. Privatised all power supply by selling current supplies on open market with public transparency in the sales by business rescue. Allow international players to supply a range of power supplie options.	Robert	employed individual
2022-07-08 22:55:22	Gauteng		Yes I do	Gas		Cecil	employed individual
2022-07-08 21:58:00	Gauteng		Yes I do	Gas	Off shore gas turbines could be leased and brought to SA shores for a short term yet immediate solution whilst allowing long term civil construction projects such as Nuclear and Renewable to be built. We need an immediate short term, combined with a long term view to this economic crisis that can allow entrepreneurial spirit of South Africans to blossom. Short term off shore gas turbines could moline the our extremely aged fleet and our pitiful planning of building a coal powered station in an area where coal extraction has already met its original life span. Short term off shore gas turbines will also ensure our most neediest of families can survive the current bleak reality while greater generation and distribution networks are built.	Andrew	employed individual
2022-07-08 21:47:48	Mpumalanga		Yes I do	Gas	In Mpumalanga there are 1000's of people working in sawmills. Sawmills need electricity to operate and with current loadshedding lots of workers will loose their jobs. Gasification will be best in our area as there is millions of tons sawmill waste and bio fuel that can be used to generate electricity.	Thinus	employed individual
2022-07-08 21:03:23	KwaZulu-Natal		Yes I do	Gas		Calvin	employed individual
2022-07-08 20:49:37	Western Cape		Yes I do	Gas	Independent Power Producers should be allowed to immediately supply South Africa with electricity. Gas, wind, water, and solar may be used to generate electricity.	Rudolph	employed individual
2022-07-08 18:09:43	Gauteng		Yes I do	Gas	Cheaper reliable and clean	Grant	employed individual
2022-07-08 16:59:12	Western Cape		Yes I do	Gas		Megan	employed individual
2022-07-08 16:28:27	Gauteng		Yes I do	Gas	In terms of quick startup and capacity power barges is the top choice. Solar will be a close second. A common hurdle is that if Eskom can provide the necessary infrastructure for whichever technologies are introduced to hook up into grid.	Andre	employed individual
2022-07-08 15:29:17	Gauteng		Yes I do	Gas	There is no solution that will immediately suit (or meet) SA's needs particularly if the government has its grubby paws in the mix. I am not qualified enough to pronounce on a solution but in my opinion nuclear energy is the way to go. We do have an abundance of coal for the medium term plans and whether we like it or not it has served this country well until the ANC entered the picture and ignored the warnings about the ageing coal fired power stations. We are now living through their indecisiveness and corruption first hand	David	employed individual
2022-07-08 14:17:50	Outside SA	United Kingdom	Yes I do	Gas	The only real solution is gas plants - quick to build or rent in an emergency - it's a no brainer - however it doesn't solve the problem of a totally inept and corrupt government who will still get in the way of it and try to skim it for them and thier bed fellows	Paul	employed individual

2022-07-08 14:00:58	Gauteng		Yes I do	Gas	I goneslty believe that South Africa is running out of coal. Gas is the next option and whilst using gas, other means of production should start building power stations. I am very concerned with nuclear because of the low standards of current artisans and engineers. There is a need for competition towards eskom. They keep on pushing the price of electricity up and nothing happens, the loadshedding is just getting worse. And while we are at it, stop this bbeeeeeeee bullshit and let people with experience work and get the job done properly.	Christo	employed individual
2022-07-08 13:27:33	Gauteng		Yes I do	Gas		Berna	employed individual
2022-07-08 12:12:07	Western Cape		Yes I do	Gas	The karpowerships would be a good short term solution but the extended contract with those make no sense, since they are intended for emergency generation they should only stay until the supply problem is fixed using renewable energy and nuclear. Micro nuclear reactors would be a good solution.	Rikus	employed individual
2022-07-08 12:11:19	Western Cape		Yes I do	Gas		juannel	employed individual
2022-07-08 11:53:10	Eastern Cape		Yes I do	Gas		Noloyiso	employed individual
2022-07-08 10:51:51	Western Cape		Yes I do	Gas	Our only hope is in Jesus Christ.	Jurgens	employed individual
2022-07-08 10:38:59	Eastern Cape		Yes I do	Gas	Whatever stops loadshedding, what a belated question...?! Put energy decisions in the hands of the Private sector as quickly as possible, then you will see real change. An energy mix starting with renewables, and gas. Why aren't the recent discovered gas fields not given TOP priority?? Or is the big wiggs too busy figuring out first how to pocket first??	Ricus	employed individual
2022-07-08 10:38:53	Gauteng		Yes I do	Gas	South Africa is facing an unprecedented and crippling energy crisis, which has brought the country to the brink of economic disaster. Policy and legislative changes need to be made IMMEDIATELY to make it possible for independent power producers to supply citizens with electricity, for the sake of businesses and private households alike.	Wikus	employed individual
2022-07-08 10:07:56	Western Cape		Yes I do	Gas		Gareth	employed individual
2022-07-08 10:07:28	Western Cape		Yes I do	Gas		Michelle	employed individual
2022-07-08 09:29:37	KwaZulu-Natal		Yes I do	Gas		Marthinus	employed individual
2022-07-08 09:24:50	Gauteng		Yes I do	Gas	The lead time for gas power generation is considerably less than for other base load power generation methods such as coal, hydro, and nuclear. SA does have abundant usable gas, and the alarmism regarding fracking is reactionary and ill-informed. SA's gas deposits are generally much deeper than those exploited elsewhere around the globe which means that environmental effects, including water table compromise, are much less severe.	Patrick	employed individual
2022-07-08 09:06:05	Gauteng		Yes I do	Gas	It can not be Government controlled All government controlled departments have FAILED BADLY	Elene	employed individual
2022-07-08 08:42:47	Western Cape		Yes I do	Gas	Gas is the source which could be installed in the quickest time frame	F	employed individual
2022-07-08 08:42:31	Western Cape		Yes I do	Gas	Gas is the source which could be installed in the quickest time frame	F	employed individual
2022-07-08 08:42:21	Western Cape		Yes I do	Gas	Gas is the source which could be installed in the quickest time frame	F	employed individual
2022-07-08 08:22:46	Gauteng		Yes I do	Gas		james	employed individual
2022-07-08 08:22:46	Gauteng		Yes I do	Gas		james	employed individual
2022-07-08 08:22:45	Gauteng		Yes I do	Gas		james	employed individual
2022-07-08 08:21:52	Gauteng		Yes I do	Gas		james	employed individual
2022-07-08 08:21:51	Gauteng		Yes I do	Gas		james	employed individual
2022-07-08 08:21:51	Gauteng		Yes I do	Gas		james	employed individual
2022-07-08 08:21:51	Gauteng		Yes I do	Gas		james	employed individual
2022-07-08 08:21:51	Gauteng		Yes I do	Gas		james	employed individual
2022-07-08 08:21:51	Gauteng		Yes I do	Gas		james	employed individual
2022-07-08 08:21:51	Gauteng		Yes I do	Gas		james	employed individual
2022-07-08 07:58:10	Gauteng		Yes I do	Gas		Ri-Meij	employed individual
2022-07-08 07:57:15	Gauteng		Yes I do	Gas		Ri-Meij	employed individual
2022-07-08 07:46:16	Western Cape		Yes I do	Gas	Honestly any source of power should be allowed, obviously focusing on the cheapest and quickest to setup options first. Everyone talks about solar & wind, but I think Gas & bio-gas is still a very viable option which should be explored. If there are buyers for the energy then have at it!	Nathan	employed individual
2022-07-08 07:42:12	Gauteng		Yes I do	Gas	Eskom should definitely not be governed by the Government of SA. They have shown time and time again that they are unable to manage under the rule of the Government.	Alta	employed individual
2022-07-08 07:37:30	KwaZulu-Natal		Yes I do	Gas		Thomas	employed individual

2022-07-08 07:33:54	Western Cape		Yes I do	Gas	We need nuclear power as well, which is sustainable and repair	Ian	employed individual
2022-07-08 06:53:40	Western Cape		Yes I do	Gas	Mosselbay is ripe for gas power generation . Mosselbay can provide power for the whole of the southern and western cape Give us the opportunity	LANGDON	employed individual
2022-07-08 06:48:13	Western Cape		Yes I do	Gas	Technically any method of power generation will be suitable in this time of need.	Ryan	employed individual
2022-07-08 06:31:33	Gauteng		Yes I do	Gas	Why must government have the monopoly? Why can South Africans not help each other when government fails to come up with a alternative.	Riaan	employed individual
2022-07-08 06:25:54	Western Cape		Yes I do	Gas	Gas offers a good medium term solution for energy generation. Coal is very damaging to the environment and renewable energy generation methods are not yet able to store power cheaply and efficiently for use during peak time. Gas burns much cleaner than coal and can be used any time of the day, making it perfect. Gas power stations have been used for a long time, which should make them cheaper and faster to get up and running.	Adam	employed individual
2022-07-08 06:11:27	Gauteng		Yes I do	Gas		Willem	employed individual
2022-07-07 20:36:45	Free State		Yes I do	Gas		Jaco	employed individual
2022-09-08 10:44:17	Gauteng		Yes I do	Gas		Manqoba	employed individual
2022-08-31 09:59:37	Western Cape		Yes I do	Gas	Gas is energy dense and relatively cleaner than other fossil fuels, with various projects in Southern Africa. Nuclear also seems to be a good solution, however it is not a short-term solution and would have to be publicly funded, and I am dubious about SA leadership's ability to appoint the best companies/people to construct/operate. This could be a long-term solution if we get our act together.	Soleil	employed individual
2022-08-03 11:36:04	Western Cape		Yes I do	Gas	Currently citizens are paying insane amounts of money for the supply of electricity that is off for periods of time due to loadshedding. We need to have other options and also a more affordable alternative energy solution. Thus we should support the use of alternative energy providers. Our citizens are suffering due to a monopolized energy supplier with high tariffs and being held hostage by this as there are no alternatives. There are endless times of loadshedding as well. It places the lives of citizens in danger and makes things unbearable. There are more environmentally friendly options and more cost effective options in the long run.	Olivia	employed individual
2022-08-03 09:31:36	Gauteng		Yes I do	Gas	Gas (through fracking and offshore drilling), Solar & Wind need to be given the green light with no obstacles with immediate effect to sort out the short term needs and plug the Eskom shortfall IPP's should be able to sell direct to the public if they have set up the infrastructure or use Eskom's existing infrastructure for a fee. This way Eskom get their cut - just like when Cell C first arrived in South Africa and paid the other cell phone companies for using their cell towers Long term we need to build more Nuclear. Small Modular Reactors need to be explored. These can be built off site and shipped to South Africa for assembly. Much much quicker than building another Koeberg and can generate up to 300 MW(e) per unit (about 1/3rd of a traditional reactor). And they can be laid in series with additional units added at any time	Duane	employed individual
2022-08-02 19:06:06	Western Cape		Yes I do	Gas	Country need reliable baseload energy. Nuclear is also a great solution	Ian	employed individual
2022-08-02 12:57:06	North West		Yes I do	Gas	Frack the Karoo & bring the gas. But do it as an intermediate solution i.e. for 20 years max to allow us to transfer from coal to gas to renewables + batteries.	Jacques	employed individual
2022-08-02 12:23:55	Gauteng		Yes I do	Gas		Shaun	employed individual
2022-07-25 10:37:28	Gauteng		Yes I do	Gas	Gas is 1 of the foreseeable short term solutions that would be cost effective & reliable to power SA from an industry & household point of view. We need to take action now.	Olivia	business owner
2022-07-21 12:24:18	Free State		Yes I do	Gas	There is natural gas in abundance that could be tapped into. The double weight of Gravitricity Energy Storage solution can also be tested and deployed faster than any other solution and produce much MW we so desperately need currently.	Oupa	business owner
2022-07-18 10:49:48	Gauteng		Yes I do	Gas	I believe that it is too early for developing countries to move away from fossil fuels and that natural gas is the cleanest form of fossil fuels. Cheap energy is a massive help to economic growth	Taylor	business owner

2022-07-13 10:07:36	Free State		Yes I do	Gas	Gas is ready and will be more affordable and environmentally sustainable. I believe each may prefer energy needs according to their ability to provide such reliably and sustainable	Tshepiso	business owner
2022-07-13 09:02:51	Mpumalanga		Yes I do	Gas	The tragedy of what HAS BEEN ALLOWED TO HAPPEN to what was once one of the best power supplying companies in the world, is similar to the tragedy of the demise of SAS. Both were destroyed by pathetic Government. So, TAKE OUT GOVERNMENT.	Ian	business owner
2022-07-12 18:31:30	Western Cape		Yes I do	Gas	Immediately bring the ships online to supply interior power. Go gas the country using mosgas. We did it in the embargo before independence. Bring all vrey hair teams back. Put every currently appointed manager on immediate internship program within eskom, go gas and wind. They need to learn. 20 years of down graded everything is totally unacceptable. Stop all new developments of estates and infrastructure of commercial and residential until the current crisis is managed.	Christian	business owner
2022-07-12 16:14:18	Western Cape		Yes I do	Gas	Deregulate the power supply, it worked wonders in the United Kingdom when Thatcher introduced it. The more competition to supply power to clients the more the end consumer saves because of choice of supplier. Allow certified and legal supply from various 3rd parties and you'll spread the risk of national break downs. Eskom must become a delivery system because of existing infrastructure not a generator. The ANC government must not be involved at all, as soon as we have more suppliers they will destroy the delivery network because that is just what they do, they break and destroy what has been built by others.	Willem	business owner
2022-07-12 10:15:53	Gauteng		Yes I do	Gas		David	business owner
2022-07-11 21:11:24	KwaZulu-Natal		Yes I do	Gas	Gas is good in the short term but electrical energy should eventually be primarily wind and solar once battery manufacturing can meet the demand for stationary storage.	Andre	business owner
2022-07-11 18:55:52	Gauteng		Yes I do	Gas	Moss gas should be fully utilised and recommissioned the old gas power stations at salt River, Soweto and East Rand	Charles	business owner
2022-07-11 18:54:25	Gauteng		Yes I do	Gas		Cyril	business owner
2022-07-11 18:27:39	Western Cape		Yes I do	Gas		Keatlaetshe Faith Jostinah	business owner
2022-07-11 18:04:36	Eastern Cape		Yes I do	Gas	The load shedding needs to come to a end I can not cope with it anymore it is destroying one of my small business I have to run a machine for 18 hours at a time and I have not been able to run it since the start of loadshedding as I get it twice a day 12h apart so I lose roughly 14k a month this needs to come to a end immediately.	Dennis	business owner
2022-07-11 16:41:03	Gauteng		Yes I do	Gas		Jan	business owner
2022-07-11 15:35:31	Eastern Cape		Yes I do	Gas	Per the World Bank, the entire continent of Africa contributes to less than 5% of CO2 emissions. Not being allowed to use the natural the Coal and Gas resources we have in Africa because Asia and the USA are polluting the world is unacceptable. Africa does not have the luxury of being "green" while its people are impoverished. We can talk again when Africa is a super-power and only if it is guilty of being a major contributor to CO2 pollution. "Western funded science" that has CO2 to be the main greenhouse gas is in dispute. The argument that a rise in CO2 from 0.035% to 0.04% of the atmosphere is causing global warming is non-sense when 95% of the actual cause is water-vapour. Western oppression of Africa needs to be resisted.	Patrick	business owner
2022-07-11 13:32:42	Gauteng		Yes I do	Gas	The impression I got is that gas is quicker for short-to-medium term and clean. This will enable the country to gradually transition from coal to an energy mix that will be sustainable, cost-effective and environmentally friendly.	Samuel	business owner
2022-07-11 12:19:02	Western Cape		Yes I do	Gas	With more private companies there will be more competitive prices for people to choose from and not a company that holds everyone ransom to their demands and faults	Sherol	business owner
2022-07-11 11:45:59	Free State		Yes I do	Gas		Frank	business owner
2022-07-11 08:59:56	Western Cape		Yes I do	Gas	Many businesses are not going to survive at level 4	Charles	business owner
2022-07-11 07:46:39	Gauteng		Yes I do	Gas	Sustainability is easiest with the many sources available for gas.	Grace	business owner
2022-07-11 07:46:19	Gauteng		Yes I do	Gas	The municipalities need immediate, reliable 'peak' capacity - i.e. early morning and early & late evenings. This unfortunately excludes solar and wind. The winning bidder must be on a strict cost-plus contract and only for a few years. The contract must include reinvesting most profits into renewable. The tender must be completely open-bid.	Brent	business owner
2022-07-11 07:18:31	Gauteng		Yes I do	Gas	Build gas power stations next to existing power stations for ease of transmission.	Frans	business owner

2022-07-11 06:53:14	Western Cape		Yes I do	Gas		Howard	business owner
2022-07-10 23:19:43	Western Cape		Yes I do	Gas		Phillip	business owner
2022-07-10 21:24:46	Western Cape		Yes I do	Gas			business owner
2022-07-10 21:03:45	Western Cape		Yes I do	Gas	I don't actually care what the solution is (I'm not keen on fracking nor nuclear) but we cannot go on like this. My businesses are going down the tubes and I feel like emigrating but I've used all my reserves and am stuck financially. This is a disaster!	Claire	business owner
2022-07-10 17:35:16	Gauteng		Yes I do	Gas	Gas can be brought n line quite quickly. For the future: - base line: clean coal, gas and nuclear - significant subsidies for home solar and battery backup systems Wind is not cost viable over time	Dave	business owner
2022-07-10 16:53:09	Gauteng		Yes I do	Gas	I choose gas because to me it is more immediate. Solar, wind and nuclear will take too long and we want to stop load shedding NOW! However, they are my next choices. Also, there are massive gas reserves locally and in Mozambique.	Wayne	business owner
2022-07-10 15:56:57	Western Cape		Yes I do	Gas	Independent power producers will bring about the end of corruption and inefficiency. The cost of power to the consumer will come down	Carol	business owner
2022-07-10 13:41:57	Mpumal anga		Yes I do	Gas	Gas can be quite a clean energy with modern technology and as far as usable energy during day and night cycles, it can work well if implemented correctly. Solar and wind will work well, but is not a good alternative to completely replace coal. Thus I believe that gas and Nuclear are the best options for main supplies, with wind and solar as minor alternatives to fill in the blanks. This also versatile grid coming from multiple sources. Coal can still be mined, but mainly for export, which won't impact the job market for now, giving the country time to restructure the job market and skills development for the future.	Willem	business owner
2022-07-10 10:35:19	Western Cape		Yes I do	Gas		Tony	business owner
2022-07-10 09:37:01	Western Cape		Yes I do	Gas	Totalenegie recently discovered a massive gas deposits off the Mosselbay coast called Brulpadda and they're not sure how to use it yet. Let Mossgas make them as offer and install gas turbines to start producing electricity.	Shuan	business owner
2022-07-10 08:37:23	Western Cape		Yes I do	Gas	My view is that the generation or production of electricity for the Nation should be in the hands of IPPs dotted around the country with responsibility for the supply and distribution of power to agreed areas. This will ensure that IPP suppliers compete to secure supply and distribution rights for specific areas, it will facilitate the establishment of better organised and tighter managed operations using best up to date technology with much smarter personnel employment and training processes to support the technology in respect of both management and engineering personnel. In the new South Africa business environment, smaller, competitive and agile is definitely better. I vote that we immediately take steps to bring to an end the centralised generation and distribution of electricity in South Africa and Africa for that matter.	Allan	business owner
2022-07-10 06:34:26	Gauteng		Yes I do	Gas		Nico	business owner
2022-07-10 06:11:53	KwaZulu- Natal		Yes I do	Gas		Mike	business owner
2022-07-10 03:20:15	KwaZulu- Natal		Yes I do	Gas	TBH. question is to simplistic. A mix based on location , cost , demographic of society and multiple factors would influence call regarding what is best power source for electricity production	Peter	business owner
2022-07-09 23:09:42	Western Cape		Yes I do	Gas	Anything to remove this unnecessary burden.	Ann	business owner
2022-07-09 14:29:57	Western Cape		Yes I do	Gas	We need immediate dispatchable power capable of supporting increased renewable energy in future	Allan	business owner
2022-07-09 11:36:14	Gauteng		Yes I do	Gas		MARIA	business owner
2022-07-09 11:35:31	Gauteng		Yes I do	Gas	Since Eskom is totally incompetent to have the monopoly to provide power to South Africa, Independent suppliers who are ready, willing and able to supply power should be permitted to do so with immediate effect, using every safe available source of power. South Africa must be one of the most backward countries in the world to have allowed this disaster to persist for years without showing any ability or intention to correct it.	Pat	business owner

2022-07-08 22:52:26	Gauteng		Yes I do	Gas		Mokgadi	business owner
2022-07-08 20:59:22	Western Cape		Yes I do	Gas	Solar and wind power are great but difficult to store that power, so can't be counted on for base load power. Gas stored and can be turned on and off quickly in turbines or boilers, so in combination with the renewables, where the gas is used as the balancing base load could work. In the short term, use everything that can generate power to keep the economy going. None in the ANC government have every run a factory or business, so are clueless as to the consequences of this destructive load shedding. Power production needs to be privatised as ANC are incapable.	Albert	business owner
2022-07-08 20:04:05	Western Cape		Yes I do	Gas	Liquified natural gas . This would be by far the quickest way to build base load capacity while still based on fossil fuel it comes with established technology and it can be scaled up. Not fracking but imported ljquefied natural gas. At the same time massive investment in solar and battery. Wind also but like solar will not give us reliable baseload.	MICHAEL	business owner
2022-07-08 17:11:17	Western Cape		Yes I do	Gas	Gas exploration should be allowed off West Coast and developed. To supplement other sources already identified around the country. With maximum viable growth of wind, solar and storage solutions with out restrictions. The above will create economic growth in SA as well as address power disruption without the need to create suspicious relationships with mafia state authoritarian regimes.	Steven	business owner
2022-07-08 15:39:43	Western Cape		Yes I do	Gas	Mozambique Basin has the third biggest natural gas deposit in the world. There have been new gas discoveries off Mosselbay as well. SA needs base load and the quickest will be to convert coal power stations to gas. Gas is much cleaner than coal. Immediately/urgently private electricity should be allowed to build and supply both wind, solar and gas generation. The more independents we have will allow competition to bring down the price of electricity or at least stabilise it. Eskom has been a dismal failure by the government in its management and corruption who should not be involved in the private sector nor should they compete. This has been proven around the world.	Peter	business owner
2022-07-08 15:15:58	KwaZulu-Natal		Yes I do	Gas		ANTHONY	business owner
2022-07-08 13:53:55	Gauteng		Yes I do	Gas	At this point in time, it does not matter what method of electricity production should be used; this is an emergency, the country is falling apart. We need electricity NOW. The amending of policy will take a while longer. Ideally, we have enough sun and wind to generate electricity, but this is for the future.	Lungile	business owner
2022-07-08 13:30:49	Gauteng		Yes I do	Gas	We need what is best for the people of South Africa, especially the poor. Not ideologies, political or other that can't deliver.	Tim	business owner
2022-07-08 12:48:34	Gauteng		Yes I do	Gas	Cheap reliable baseload electricity is required for South African regional development, and economic growth and development is directly linked to having such. Anything else is dabbling at the edges. South Africa and Africa need to develop their economies and must ignore this new wave of colonisation by offshore (as well as local) green ideogogues who do not have the region's interests at heart. And to do so means enabling cheap baseload power, and plenty of it, including coal, gas and nuclear energy.	Antonio	business owner
2022-07-08 11:23:38	Western Cape		Yes I do	Gas	Gas generators can be turned on and off when needed. There are available, proved effective. Give every town village and city the right to deliver its own power to its own inhabitants and leave Eskom to provide the heavy stuff to steel works and large factories. That will ease the burden on Eskom and give it time to clean the Augean Stable it has turned into under the ANC.	Malcolm Andrew	business owner
2022-07-08 10:33:45	Gauteng		Yes I do	Gas		Kyle	business owner
2022-07-08 08:04:33	Gauteng		Yes I do	Gas		David	business owner
2022-07-08 07:27:14	Gauteng		Yes I do	Gas	Lets face facts here, The ANC government has fail dismally to make any single one area of governance a success, even less so serving the people of South Africa, they are incompetent is every aspect of governance, except in paying themselves extremely high salaries, taking from the poor to sustain themselves, there is not one single state owned organisation that is not corrupt, give the people the power to provide power to a failing STATE not only eskom, well done ANC, you ran the country right into the ground	Lionel	business owner
2022-07-08 06:29:23	Gauteng		Yes I do	Gas	Waste to Engery.. Biogas!! CLEANING LANDFILLS ,convert it to Electricity! No Brainer!!!	Etienne	business owner
2022-07-08 05:51:55	Western Cape		Yes I do	Gas	We have a world class bulk LPG import terminal in Saldanha We just need to increase its throughput and add gas to power generators That can be done quickly	David	business owner

2022-07-08 05:25:57	Western Cape		Yes I do	Gas	Focus on immediate short term power supply using gas turbines and available Independent suppliers on short term contracts (3 to 5 years) Start with short to medium term renewable generation systems. Longer term work with leading technical nuclear providers to capture latest technological advances (please stay away from the Russians!!) Open the market to public private partnerships to rid the state of the additional capital burden.	Douglas	business owner
2022-09-12 21:45:17	Western Cape		Yes I do	Gas	Get rid of that dinosaur Gwede and open the market to independent power producers. The salaries of politicians should be tied to the performance of the economy. Then we would quickly see red tape around IPPs being dropped! Because guess what, no electricity = no growing economy, STUPID!	Angela	business owner
2022-08-02 20:28:03	Gauteng		Yes I do	Gas	We need the speed and flexibility of the private sector to step in with solutions. for baseload energy to power the economy. In the short term gas augmented with renewable generation & storage and longer term modular nuclear. I do not support coal - the destruction of infrastructure, pollution and playing filed for corruption ,makes a coal undesirable. We need new-age viable alternative to ESKOM.	Jaap	business owner
2022-08-02 11:22:42	Gauteng		Yes I do	Gas		David	business owner
2022-07-21 21:51:22	Mpumal anga		Yes I do	Gas		Francis	retired
2022-07-18 04:47:42	Eastern Cape		Yes I do	Gas	Gas does not pollute like coal. It's faster to cook with.. but mostly i would like the people with the correct expertise to come back and lend a helping hand. I have absolutely great faith in ou people	Christine	retired
2022-07-15 11:00:37	KwaZulu- Natal		Yes I do	Gas	I live in Newcastle, and we had a company called Newcastle Co-Generation using jet engines, powered by gas and it supplied electricity into the grid for at least 30,000 homes daily. A small enterprise but their system worked very well. On a bigger scale it would be fantastic, and a quick way to increase productivity for power for a large number of businesses as well as homes. From what I understand (open to correction) it closed down, as Eskom did not pay them regularly and on time for their expenses in running their jet engines.	LAURA	retired
2022-07-14 20:48:43	Gauteng		Yes I do	Gas	RSA has access to the natural gas from the fields in Mosambique. The construction of gas turbines is - compared to other technologies - quick. The design should be such that that they can be converted to close cycle during operation to maximise the energy extraction.	Leo	retired
2022-07-14 15:42:32	Western Cape		Yes I do	Gas		Margie	retired
2022-07-13 12:24:29	Western Cape		Yes I do	Gas		Quinton	retired
2022-07-12 22:43:57	KwaZulu- Natal		Yes I do	Gas	Please Eskom, just drop the frigging red tape a d jur DO IT	Mandy	retired
2022-07-12 17:32:54	Western Cape		Yes I do	Gas	SA's immediate needs are best supplied by new gas turbine generation by an Independent Power Producer (IPP) . Freed of RED TAPE , gas power can be relatively rapidly installed , it provides industrial scale power right around the clock at an affordable price (but not on a Government kickback contract !). Coal is going to be used for a long time yet , whatever the West might say , and , if burned cleanly , provides safe stable and cheap baseline power . In the longer term , nuclear power provides stable industrial scale power that every country needs for industrial activity and development . So don't scrap existing nuclear and coal plants if they are working well . In the medium term nuclear fission , perhaps in the form of Small Modular Reactors (SMRs) will provide stable affordable power until in the yet longer term nuclear fusion will be our main power source . Then we can drop nuclear fission . To level the playing fields , let the IPPs compete on their ability to supply dispatchable power by whatever means , the kind of power needed by industry and you and me . Solar and Wind have a place in providing useful fossil fuel sparing energy when available but , in the present state of technology , cannot provide the stable industrial scale power needed for industry and development of a country . If and when cheap industrial scale electricity storage becomes available that could change things , but there are no signs whatever of such a development as yet . It would be foolish to build policy on yet to be discovered technology . The UK , Germany and Australia amongst others have shown us that weather dependent renewables in grid application are today very expensive and unreliable . Wind and solar electricity do however have a very useful place at sites which cannot be economically reached by a national grid .	Gustaf	retired
2022-07-12 16:36:52	Western Cape		Yes I do	Gas	Legislated BEE and AA appointments at power utilities to be scrapped immediately. Diesel heated steam turbines to be converted to natural gas turbines. Additional photo voltaic generation and wind generation with longer term hydro power generation.	Jan	retired

2022-07-12 14:37:46	Western Cape		Yes I do	Gas	SA's immediate needs are best supplied by new gas turbine generation by an Independent Power Producer . Freed of RED TAPE , it can be relatively rapidly installed , it provides industrial scale power right around the clock at an affordable price (but not on a Government kickback contract !). 2022-07-11 14:07:30	Western Cape		Yes I do	Gas	It is about time they allowed it They the government have been delaying too long and it must be done immediately	Jeffrey	retired
2022-07-11 13:47:59	Gauteng		Yes I do	Gas	Krag is onbetaalbaar vir pensionarisse. Ek het n autistiese kleinkind wat by my woon ... Vertel vir die menses hoekom is daar nie krag nie as hulle tv wil kyk. Hoe bly mense wat op ventilators is aan die gang. Normale mense kan nog n plan maak maar mentally disabled mense verstaan nie hierdie goed nie.	STELLA	retired
2022-07-11 13:18:18	Western Cape		Yes I do	Gas	Fossil fuel is still the most reliable and cheapest. We have good coal reserves. Solar and wind are expensive and not reliable sources. If there is no wind or sun there is no power. Windmills in Texas froze due to freak snow and 3 million households were without power for days. Moreover, batteries are not good for storage because they are expensive and difficult to get rid of. Hydropower is clean, but water is a problem unless we can do something with seawater. Nuclear power is the cleanest but we haven't the expertise to build, maintain and run nuclear power stations safely and efficiently. Gas is clean, relatively cheap and efficient. I am just not sure of the supply. Whatever the supply, the main consideration should be to privatise without government interference and control. And finally, users should be taught that electricity is a utility to be paid for, not a human right.	Elaine	retired
2022-07-11 12:36:19	Gauteng		Yes I do	Gas	Combined cycle gas turbines are by far the most efficient machines for converting fossil fuels into electric energy. SASOL at Secunda and Sasolburg already have access to natural gas. If these turbines were installed the power consumption of the facilities could be reduced to zero and the electrical infrastructure presently used to import power could be used to export it. For smaller users connected to the gas pipelines in Gauteng and the Free State gas engines, similar to the one at Secunda could be installed. These could be started rapidly to supply the owner and the grid.	Michael	retired
2022-07-11 12:20:01	Western Cape		Yes I do	Gas		Brian	retired
2022-07-11 12:19:06	KwaZulu- Natal		Yes I do	Gas	Hi, If the gov. does not relax the red tape and allow new producers we will soon have a total black out. There is no experience in the maintenance departments as all the knowledge was told to move on, or was felt that they were not wanted and it became awkward to work there.	Michael Douglas	retired

2022-07-11 10:35:59	Western Cape		Yes I do	Gas	We need Power now. Lett the people that is clever take over! We can not allow this to go on much longer. Please SAVE SOUTH AFRICA!!!	Ria	retired
2022-07-11 10:10:25	Western Cape		Yes I do	Gas	Gas should be imported from Mozambique.	Cornelius Johannes	retired

2022-07-11 09:27:34	Western Cape		Yes I do	Gas		Tanya	retired
2022-07-11 08:42:28	Western Cape		Yes I do	Gas	Gas power stations can be established fairly quickly. I know that these are used in Tanzania and one is used in the Coega IDZ. Also cheaper than the other methods of generation.	Arthur	retired
2022-07-11 08:32:18	Gauteng		Yes I do	Gas	I'm not an expert but long term solutions wont address immediate needs and we need to find an alternative that takes the load (excuse the pun) off Eskom in the short term	David	retired
2022-07-11 07:51:30	Western Cape		Yes I do	Gas		Louise	retired
2022-07-11 07:28:38	Gauteng		Yes I do	Gas	South Africa needs to solve the energy crisis as a matter of urgency. The country can no longer rely on the current government policy to correct the problem. There is therefore a need to cut through government regulations and red tape to solve the crisis. While gas would probably be the quickest in application, the are additional sources that must be explored, such as wind and solar.	Martin	retired
2022-07-10 23:20:41	KwaZulu- Natal		Yes I do	Gas	Natural accessible supports immediate needs. Cheaper initially then solar	Valerie	retired
2022-07-10 22:33:36	Western Cape		Yes I do	Gas	For the immediate future gas is in my opinion the answer. Wind and solar come next but must be implemented simultaneously. The latter take longer to commission. The gas plants can then be used on standby when wind and/or solar is in short supply due to climatic conditions. No long term gas supply contracts to be entered into but exploration and implementation eg Brulpadda/ Mozambique to proceed immediately. Only to be used when necessary. New nuclear technology should not be ignored to supply future base loads. Battery and additional pumped storage also needed. Western and Eastern Cape, Natal, Mpumalanga, Lesotho and Swaziland to be explored and exploited for more pumped storage schemes. Tidle schemes eg Sundays and Bushman's River should also be explored.	Richard	retired
2022-07-10 22:16:44	Free State		Yes I do	Gas	In Parys the local municipality delivered poor service to us residence due to internal problems with Eskom. The owe R1.8 billion to Eskom since 2018 and nothing was done. We wish to do away with this corrupt municipality and buy electricity directly from an independent power supply with no political attachments.	Susan	retired
2022-07-10 22:03:01	Western Cape		Yes I do	Gas	Although gas may not be green, it's better than coal, available from neighbouring African countries and quicker to implement for our immediate needs. It is suitable for base load while renewables are being rolled out. The longer term solution is wind and solar, combined with large scale (battery or other emerging technology) storage. I would like to think that I am speaking with some authority, since I am a retired professional electrical engineer with many years of experience behind me.	Henri	retired
2022-07-10 21:44:10	Limpopo		Yes I do	Gas	To me gas is the best option as it is environment friendly and it is powered by sun or wind that are not available everytime. The danger of nuclear are well known to all hence this country must not invest in it. Some studies that I read very recently indicated that gas is plenty in Limpopo particularly in the area of Vhembe.	Khathutsh elo	retired

2022-07-10 10:51:41	Western Cape		Yes I do	Gas	The country is in an electricity crisis. Eskom has enormous problems both internally and externally. Eskom should in the short term concentrate on what can be done by combating fraud, vandalism, staff problems and outstanding debts of municipalities and SOE's and certain Government Departments. In the short term the Government , electricity regulator, Nersa and Eskom should mobilize and allow all and every renewable power production to connect to the grid and pay for such services by processing account credits with installed meters. They should further and immediately, unconditionally and without restrictions look at electricity generation through the following mediums by the private sector including Eskom: - biomass - solar - wind - waves - hydro and Gas.	Petrus	retired
2022-07-10 10:09:17	Western Cape		Yes I do	Gas	Gas would be sustainable. Wind and solar need huge storage.	Jan	retired
2022-07-10 09:50:38	Gauteng		Yes I do	Gas	Gas is freely available and is relatively pollution free compared to coal burning.	Ian	retired
2022-07-10 08:42:30	Western Cape		Yes I do	Gas		William	retired

2022-07-10 08:21:58	Western Cape		Yes I do	Gas	South Africa needs a quick solution to generate power onto the grid. Combined cycle gas turbines, although expensive, is a quick solution. In parallel more coal fired power stations must be built. Nuclear would be the ultimate solution but takes time to build. Wind turbines have limited use. That power is only available when the wind blows and is expensive in the long run. Solar farms need to have large areas and also need a lot of maintenance to keep them effective. In order to maintain industry requirements you must have large power supplies 24 hours a day. Solar and wind are not the answer	John	retired
2022-07-10 08:07:22	Western Cape		Yes I do	Gas	Gas is the cleanest & quickest energy source. Also, get rid of Mantasha.	Jim	retired
2022-07-10 08:03:41	KwaZulu- Natal		Yes I do	Gas	I would rather not on paper what I think of the 6 baboons running this country into the ground	David	retired
2022-07-10 07:47:04	Western Cape		Yes I do	Gas	Short term solutions can use multiple applications, but long term may need to include renewables: solar, wind etc, and if necessary nuclear.	Mike	retired
2022-07-10 07:45:22	Western Cape		Yes I do	Gas	Kindly note that the Eskom load-shedding is having a devastating effect on the whole country, including businesses, individuals and all involved in trying to earn an income. It is therefore abundantly clear that Eskom cannot supply SA with anything like the power it needs. Consequently, the time has come to scrap all "red tape" and allow all companies & persons to get off the Eskom/Municipal grid by generating their own power supply. This can be done by a number of means, but has to suit the business concerns, where in some cases, continuous power needs to be supplied, as in the case of an aluminium smelter. So, this can be done by solar/wind power, hydro schemes, mechanical generators, nuclear power plants, gas generation etc, but if something is not done in the immediate short term (this year) the country will sink into the third world of useless African nations that cannot generate power to suit their needs, if not already done so! Legislation must change to get Eskom off the monopoly it has, due to the corrupt and incompetent Govt., and allow independent power suppliers to generate capacity this country urgently needs. We all know how long it takes to get any power plant up and running, so now is the time to scrap all protection of Eskom and allow others to produce power ASAP.	Roy	retired

2022-07-09 10:44:23	Western Cape		Yes I do	Gas	Gas is available from offshore. It is clean and only part of the combustion product is carbon dioxide. What about wave power?	William	retired
2022-07-09 09:13:56	Gauteng		Yes I do	Gas		Johan	retired
2022-07-09 08:52:59	Gauteng		Yes I do	Gas	In SA we have an immediate problem with power supply which can only be addressed with coal fired generation. In the medium term gas would be a quick and quite acceptable method to fire generation but in the long term it is believed that a family of separate nuclear plant would be the best option. Renewables are touted as the saviour of the world but should be seen as supplemental rather than core sources. They are not really properly tested as reliable and their foibles are not yet understood. It was notices that some European countries that claim to live of wind generated power do have occasion to buy power from their neighbours every now and again. We can't do that. Romance and lofty ideals won't bring the bacon home..	Hendrik	retired

2022-07-08 13:53:44	Western Cape		Yes I do	Gas	To suit SA's IMMEDIATE BASE LOAD needs we need to, unfortunately, stay with coal and introduce ASAP gas. Renewables are good but unfortunately, until battery technology improves sufficiently to store the power required for base load they cannot solve our problem. The sun does not shine and the wind does not always blow when base load power is required. Nuclear is the answer, but unfortunately it takes years to bring generation plants online. Not to mention the problems we have with corruption and poor construction ethics in building power stations.	David	retired
2022-07-08 13:38:47	Western Cape		Yes I do	Gas	the country is in a desperate situation. Any form of power, except nuclear and coal, will relieve the immediate problem	Anthon	retired
2022-07-08 13:04:58	KwaZulu- Natal		Yes I do	Gas	Initially gas to power up but definitely assist those who have made the solar choice and make it worth their while to sell back to Eskom	Lesley	retired
2022-07-08 13:04:38	Eastern Cape		Yes I do	Gas	GAS, HYDRO, and SOLAR can be built erected in a fairly short/shorter space of time and is also cost effective. We already have so many Wind Turbines especially here in the Eastern Cape and into the Western Cape, and yet we're stuck with Load-shedding. Then we also have a number Dams all over the countryside, that are not being utilized for generation of power. Further to this issue there is the option of the erection of Solar Farms, as well as, Industry themselves, rather installing their own power generation plants to alleviate the strain on the Countries grid, as ESCOM are clearly is not winning the battle, as depicted by the CEO in an interview several weeks back. Freedom of speech is enshrined in the constitution, as well as freedom of association, THEREFORE it should be the choice of individuals and industry and business to choose where and how they wish to be powered by or from. "IF WE CONTINUE ON THIS ROAD WE CURRENTLY TRAVEL, WE ARE FAST ON THE WAY TO THE STONE AGE" and will be there sooner than later.	Wayne	retired
2022-07-08 12:53:31	Western Cape		Yes I do	Gas	Cleanest of the fossil fuels....reasonably cost effective and available, quick to upscale....	Dion	retired
2022-07-08 12:26:16	Western Cape		Yes I do	Gas	Immediately lift ALL restrictions on IPP's - whether solar, wind or whatever - and provide for their contribution to immediately be linked to the national grid . Remove all the red tape and sack any minister who tries to block the move . Also immediately open a link into the grid all surplus generation from the private sector .Privatise Eskom generation ASAP. No government interference whatsoever both in Eskom generation and the open market. Market forces will resolve which prevails on the basis of service and price . In the short term, coal and gas must be kept and phased out as IPP 's are able to contribute a greater percentage. In the long term small nuclear power stations need to be considered in the mix. Consider proclaiming Eskom a strategic operation and ban all union activity in the organisation . Reduce staff levels at Eskom via natural attrition and early retirement options.	Joseph	retired
2022-07-08 12:26:13	Western Cape		Yes I do	Gas	Immediately lift ALL restrictions on IPP's - whether solar, wind or whatever - and provide for their contribution to immediately be linked to the national grid . 2022-07-11 18:56:56	KwaZulu- Natal		Yes I do	Hydro	Firstly Eskom should stop supplying power to our neighbors. Government should encourage the use of solar power, they should explore all the possibilities and encourage more energy supply businesses.	reshma	unemployed individual
2022-07-11 17:25:24	Gauteng		Yes I do	Hydro	There's no one solution to this situation we live in. We face a genetic problem in sub-Saharan Africa. Mozambique, Angola, Zimbabwe, Tanzania, Nigeria, DRC are all but the same examples. After Independence, the new governors, the new leaders don't know how to Administer, to Govern, to Manage their new countries. This is reality, not racism. I would like to see Solar, Hydro, wind & gas to take priority in our lives.	Pomba	unemployed individual
2022-07-11 17:20:15	Gauteng		Yes I do	Hydro	Absolutely!	Gerda	unemployed individual
2022-07-11 09:31:55	Western Cape		Yes I do	Hydro		Nicole	unemployed individual

2022-07-11 07:40:04	KwaZulu- Natal		Yes I do	Hydro	The ANC Government seems hell-bent on destroying SOE's and the amount of corruption and maladministration at SOE's is at a dangerous point of no return. Our economy has suffered severely through the Covid pandemic and the July riots of 2021, we can not afford to be knocked down further by loadshedding. This has to stop as a matter of urgency. Our energy sector must be privatized as soon as possible to ensure the survival of our economy and livelihoods. We have natural sources of energy available with an untapped market. Why is the option of wind and hydro so limited in SA when the source is so abundantly available? This could be implemented in conjunction with our electricity grid to start with and expanded going forward. . . . I fear that the main reason for loadshedding is political, and needs to be moved out of political clutches. According to inside info, the existing alternative power supply from wind turbines in South Africa , if included into the grid would negate the necessity for loadshedding already.	Sonja	unemployed individual
2022-07-11 06:24:40	Mpumal anga		Yes I do	Hydro	There are numerous hydro electric plants around South Africa that don't work (eg. Blyde river canyon), due to lack of maintenance. Eskom has proved its incompetence year after year, mainly due to lack of maintaining existing coal stations. They tried to build new coal stations to fill the gap, but can't even do that. I suggest repairing the existing hydro plants to support the current system maintenance, and ultimately go to renewable energy systems(solar, hydro and wind turbines). This will not only benefit the electrical crisis, but also the environment, as a saver cleaner energy.	Michael	unemployed individual
2022-07-11 05:59:18	Gauteng		Yes I do	Hydro	South Africa has huge potential for generating hydro-electric power which has not been utilized. HEP is cheap and clean. Coupled with solar power, which is also clean energy, can meet the nation's power needs.	Crispin	unemployed individual
2022-07-10 22:18:39	Western Cape		Yes I do	Hydro		Jared	unemployed individual

2022-07-10 18:42:46	Gauteng		Yes I do	Hydro	I don't know enough about the different type to be able to make any useful suggestions. I do know that we have to do something because we cannot carry on like this and Eskom seems to be a lost cause.	Annelize	unemployed individual
2022-07-10 18:25:01	Western Cape		Yes I do	Hydro	South Africa is a country surrounded by water, it is a big country though yet I'm sure if enough effort is put towards Hydro we could be looking at a long-term solution that imo should have been implemented years ago- Solar and wind should (tbh should have-) also be looked into. We are a very nature-driven country and could be using the resources already gifted to us by nature instead of leaning towards toxic/harmful electricity production which (once again) we should have ditched years ago!	Concerne d	unemployed individual
2022-07-10 16:55:27	Gauteng		Yes I do	Hydro	Besides Hydro, South Africa has got a lot of waste. Why can't waste be used as an alternative? As for the scrapping of the red tape, as long as importers does not get the full advantage of any product being introduced. And as long as a selected few only, does not get everything. Per region, fair availability. No point in paying constant import fees if you can't even eat. Thus businesses need to decide their capacity and availability of products. Education videos need to be released to the public as to the safety method , maintenance and operations of the various products available, thus not one size fit all solution but a mix to really assetain the best product as a whole going forward. Wind disturb bird flying patterns and might cause ground erosion, the only thing thing growing under wind is grass. Nuclear current and as in the past, will have international challenges for parts thus money which the tax payers don't have. Not to be a pessimist, but RSA will have to work on trail and error, specially where various wind and weather patterns are concerned for long term sustainability, thus long term solutions.	Vee	unemployed individual
2022-07-10 16:11:13	Western Cape		Yes I do	Hydro	We have a vast area of sea that we can use for hydro electricity. We can use gas and nuclear, solar and wind for electricity. The rest won't work. This will create jobs and relieve the electricity grid.	Caren	unemployed individual

2022-07-09 01:44:37	Western Cape		Yes I do	Hydro	I think that it's time that we get our lives back. We just came out of a COVID crisis now this. People are just starting to rebuild their lives and now Eskom is causing more people to lose their job. Businesses simply cannot survive another crisis. South Africans cannot survive another crisis. We need immediate action.	Avril	unemployed individual
2022-07-08 22:28:27	Eastern Cape		Yes I do	Hydro	Using the current of the ocean to generate electricity makes sense to me - a No Brainer!	Jane	unemployed individual
2022-07-08 20:52:33	Western Cape		Yes I do	Hydro	Independent Power Producers should be allowed to immediately supply South Africa with electricity. Gas, wind, water, and solar may be used to generate electricity.	Debbie	unemployed individual
2022-07-08 20:17:36	Western Cape		Yes I do	Hydro	Sick of being robbed of my hard work because half the time I have no electricity	Paula	unemployed individual

					Any source of power generating solutions should be considered creating a competitive market and supplied by private parties outside the government, expanding private energy production at affordable prices.		
--	--	--	--	--	---	--	--

2022-07-08 18:37:26	Gauteng		Yes I do	Hydro		Sandra	unemployed individual
2022-07-08 17:38:26	Western Cape		Yes I do	Hydro	Hydropower is best for our immediate need as water can produce electricity constantly. It's also cheaper to produce than wind energy and perhaps even solar energy still. If we are moving towards a green economy, we should only consider renewable energy sources, including green hydrogen.	Monica	unemployed individual
2022-07-08 16:28:44	Western Cape		Yes I do	Hydro	We have the Ocean, wave energy makes sense along coastlines. Solar and Wind inland. It's important for it to be competitive, more than one provider and fully vetted to make sure that none are owned or shares etc by any Government/Big Business (local or International) member and or family etc.	Magda	unemployed individual
2022-07-08 16:06:34	KwaZulu-Natal		Yes I do	Hydro		Tesmika	unemployed individual
2022-07-08 10:12:20	KwaZulu-Natal		Yes I do	Hydro		Jorge	unemployed individual
2022-07-08 06:59:41	Western Cape		Yes I do	Hydro	If more electricity are produced by individual companies, it is not in governments to see to it	Dawie	unemployed individual
2022-07-07 22:23:07	Gauteng		Yes I do	Hydro		Sue	unemployed individual
2022-07-07 21:11:24	Gauteng		Yes I do	Hydro		Anida	unemployed individual
2022-09-10 17:40:20	KwaZulu-Natal		Yes I do	Hydro	The immediate and short term need is to install solar, wind and hydro with wave technology as an option as well. Gas should be a last resort, as well as coal power producers. Nuclear power was an option but the current government would not be able to maintain in case they have the one in the Cape and tenders will be fraught with fraud and mismanagement of funds. We have an ocean surrounding our country which could provide cheaper hydro power. Yes. Time to find alternatives immediately to Eskom using independently owned solar and hydro power stations.	Corinne	unemployed individual
2022-08-02 19:16:00	Gauteng		Yes I do	Hydro		Anida	unemployed individual
2022-07-30 13:26:21	Western Cape		Yes I do	Hydro		Rolene	unemployed individual
2022-07-19 23:12:15	Gauteng		Yes I do	Hydro	South Africa is facing enough issues and crises, without the loadshedding on top of it - which is just compounding the problem! It's like you looking for problems instead of solutions?	Natalie	employed individual
2022-07-19 07:55:42	Gauteng		Yes I do	Hydro	Hydrogen is the future going forward and if we don't act on it we will fall even further behind....its time to wake up	Jan	employed individual
2022-07-16 13:24:16	Gauteng		Yes I do	Hydro	it's long overdue for South Africa to get an independent power supply provider it will be in the interest of the South African resident. I feel that we should have the option to choose who we buy our power from, not get dictated to when you are allowed to have power due to rotten crime infested ANC. The country is ready for change jobs and the government wants to rule this country and not plunder it!	Shane	employed individual
2022-07-14 15:47:39	Western Cape		Yes I do	Hydro	Dear Minister, The energy and climate crisis is fuelled by fossil fuel extraction and industries. We need to move to renewable/cleaner, more sustainable sources of energy (e.g. hydro, solar, wind) and fast way would be to scrap the red tape and encourage alternative power producers to build and the market to be encouraged. With the suitable policies to support sustainable transition into a cleaner energy source and removing red tap, we will ensure an equitable transition towards a fossil-free South Africa.	Skye	employed individual
2022-07-14 14:59:20	Western Cape		Yes I do	Hydro	Must cheaper and quick for now best longterm would be nuclear or solar (green)	marnus	employed individual
2022-07-14 14:06:07	Gauteng		Yes I do	Hydro	We need more green energy that is cost effective. Eskom should not be the only energy supplier to South Africa. We should have a choice of which supplier we want to go with. Eskom needs some competition because rate payers are carrying the cost of people not paying or stealing electricity.	Christoffel	employed individual
2022-07-14 11:54:11	Western Cape		Yes I do	Hydro		Thania	employed individual
2022-07-14 08:19:54	Western Cape		Yes I do	Hydro	To be reliant on one producer is the reason why we are in the situation we are. Reason for hydro - the sea is rising and there is abundance of water to go the hydro way. It is environmentally cleaner and safer	Warren	employed individual
2022-07-14 02:55:59	Gauteng		Yes I do	Hydro		Rudi	employed individual
2022-07-14 02:14:57	Western Cape		Yes I do	Hydro	We need clean energy, and more independent energy companies.	Patrick	employed individual
2022-07-13 23:54:01	Western Cape		Yes I do	Hydro	The moving water is already there - no need to wait for rain, sunshine or anything - build hydro plants at every dam and you have electricity to the surrounding areas.	Hadiyah	employed individual
2022-07-13 20:37:25	Western Cape		Yes I do	Hydro	We need to now take action, if nothing gets done, we are SCREWED! We also need to protect the environment so hydro would work very well	Carla	employed individual
2022-07-13 19:47:56	Gauteng		Yes I do	Hydro	As long as there is movement, you can harness that for electricity. Engineers can tell you that. But we will build it ourselves, and smile, when you are in darkness. Beware the intellectual few that know...	Stefan	employed individual

2022-07-13 15:26:55	Gauteng		Yes I do	Hydro		c	employed individual
2022-07-13 10:56:32	Gauteng		Yes I do	Hydro		Desiree	employed individual
2022-07-13 10:33:00	Western Cape		Yes I do	Hydro	We need a solution now the means does not really matter although hydro seems the most appropriate and immediate solution, we are in a crisis as more and more South Africans are getting into greater debt with the increase of fuel and electricity prices. South Africans are facing a dark pit of debt that they will never be able recover from.	Warren	employed individual
2022-07-13 09:59:57	Gauteng		Yes I do	Hydro	There are plenty dams and rivers that could be used and it will be clean energy that is produced	Anthony	employed individual
2022-07-13 08:22:59	Mpumalanga		Yes I do	Hydro	It currently rains about 2000mm per year in Sabie. All that water goes to waste. Previously the government planned to build a hydro power station in Sabie, but the project got cancelled in favour of Eskom monopoly. Perhaps that decision should be reversed no that Eskom is clearly failing to supply the country with power.	Jasper	employed individual
2022-07-13 07:30:16	Western Cape		Yes I do	Hydro	Since loadshedding, gas is also not available. We all know the trouble with coal, so hydro is my choice.	Valeska	employed individual
2022-07-13 07:09:23	KwaZulu-Natal		Yes I do	Hydro	I truly believe with all my heart, that this is the answer. To let South African citizens help the country, by encouraging them to create their own electricity and where possible can also sell back to Eskom, if they have excess. If everyone is encouraged to do this, imagine the possibilities! Job creation etc! It is a win-win.	Mari	employed individual
2022-07-13 06:14:05	Western Cape		Yes I do	Hydro		Lizette	employed individual
2022-07-13 05:33:08	Western Cape		Yes I do	Hydro	Learn from Sweden	Humeri	employed individual
2022-07-12 20:42:23	Eastern Cape		Yes I do	Hydro	I support Hydro as in my non specialist opinion Hydro is the greenest option. But so much has already been spent on the other option in private sector they ANC Government must just allow them to join the grid and Eskom Blackouts (load shedding) will be over and done with immediately as their is more than enough waiting for the go ahead.	Colin	employed individual

2022-07-12 15:41:47	Gauteng		Yes I do	Hydro	It is the cleanest, cheapest and provides a lot more benefits than just electricity....read up on it. It's Good for the Environment. ... It's a Renewable Resource. ... It's Reliable and Highly Efficient. ... It's Flexible. ... It's Safe. ... It's Economical. ... It's Great for Recreational Use. ... It's a Fundamental Vehicle for Development. AND LET'S FACE IT.... we need more dams anyhow or has our government forgotten about that as well ?????	Janice	employed individual
2022-07-12 15:25:38	Gauteng		Yes I do	Hydro	Please don't give it in the hands of politicians owning power companies which will be making them rich at the expense of all the citizens of South Africa There should be strict rules regarding private suppliers. They must not be affiliated with any politician or political group whatsoever. Politics an corruption has destroyed our once beautiful country South Africans have had enough of politics dictation and destroying our lives Corruption regarding Eskom should be dealt with and all that were with their hands in the cookie jar should be prosecuted	Jaco	employed individual
2022-07-12 11:06:12	Mpumalanga		Yes I do	Hydro	There are several Hydro station in Mpumalanga that can be utilised and upgraded in a short period of time. Solar and Wind must also be utilised	Daan	employed individual
2022-07-12 10:36:33	Gauteng		Yes I do	Hydro		Stephanie	employed individual
2022-07-12 09:51:30	Mpumalanga		Yes I do	Hydro		Mandie	employed individual
2022-07-12 08:26:48	Western Cape		Yes I do	Hydro	Any of the renewable energy options would be much better than what we have now. We are already behind and suffering so lets just start with what we can do the easiest and work up from there! I dont know enough about the different methods to say but thats why we have experts in the field to teach us	Kelly	employed individual
2022-07-12 07:35:33	Gauteng		Yes I do	Hydro	Hydrogen is clean. Produce a clean environment.	Ladislaus	employed individual
2022-07-11 23:35:18	Western Cape		Yes I do	Hydro	We have the space for solar and wind farms and with some regulation changes this will also bring foreign investment to SA. I think there should be a look into hydrogen energy generation as well. This is an opportunity to detach our economies growth from Eskom and dependency on a failed state owned enterprise.	GP	employed individual

2022-07-11 20:36:52	Gauteng		Yes I do	Hydro	Honestly, the solution could be Hydro, Renewables, Solar, or Wind. The risk of nuclear, with the lack of proper maintenance cycles and planned outages to upgrade / maintain our current coal powered stations, is just too high. A lot of privately owned companies are exploring alternative methods of power generation including solar and other Carbon Neutral Energy storage solutions like Hydro. With enough spare capacity to feed back into the grid to support South Africans in a personal and business level. Moving away from Coal is the only realistic long term solution for the decades to come. The state owned Eskom solution has never been performance driven because like any other state owned institution, like home affairs, if they don't perform we can't treat them like the private sector and go to a competitor because of non performance. Perhaps if the option was there to move to independent private power producers, like in the US... Eskom would start performing like a business that would lose customers if they don't perform.	Hannes	employed individual
2022-07-11 16:41:58	Western Cape		Yes I do	Hydro		Trudie	employed individual
2022-07-11 15:05:52	Western Cape		Yes I do	Hydro	Hydro power is the cleanest and most renewable of all the power sources. We have rivers that can be used for hydro power, although a hybrid model with different sources should be used. Avoid nuclear and coal as much as possible.	Jeffre	employed individual
2022-07-11 15:02:03	Gauteng		Yes I do	Hydro	With an abundance of water surrounding our country the oceanic currents could be used with dynamometer's to produce independent and low cost power generation.	Claudio	employed individual
2022-07-11 14:45:42	North West		Yes I do	Hydro	South Africa has many rivers that can be utilised to produce electricity without harming the environment.	Z	employed individual
2022-07-11 14:25:23	Gauteng		Yes I do	Hydro		Chris	employed individual
2022-07-11 14:25:22	Gauteng		Yes I do	Hydro		Chris	employed individual
2022-07-11 14:09:51	Western Cape		Yes I do	Hydro	To be fair, any renewable resource is a good idea going forward for South Africa. Coal supply is limited and has gotten wet before, leading to power limitations. Hydro seems the best because the ocean can be used to create electricity, as has been used in other countries. Wind and solar are also good but are more weather dependent. Fuel dependants aren't a good idea as they're linked to the rise and fall of said fuel supplies. Nuclear has risks. There needs to be more ways of us getting power so we can continue to live and work, otherwise we will lose businesses and international interest that could help grow our economy	Erica	employed individual
2022-07-11 12:32:31	Gauteng		Yes I do	Hydro	Anything other than Coal, Gas and Eskom.	Melissa	employed individual
2022-07-11 11:32:35	Western Cape		Yes I do	Hydro	The first question that should be asked is, why should Eskom have the only monopoly on electricity and why must it be so difficult for additional electricity suppliers to be part of the supply. Second question to why is who is to benefit the whole time from this monopoly. Once we have more than one electricity supplier, competition will encourage development and competitive pricing to the users. South Africa has so much potential to use clean methods for electricity. The only thing now happening is electricity cost goes up so the big CEO types can get big salary increases, everything else gets sabotaged or stolen and the user must keep paying. Paying for what, salary increases. I am an exceptional performer in my occupation and I don't even get a salary increase	Justin	employed individual
2022-07-11 11:16:15	Gauteng		Yes I do	Hydro		Louise	employed individual
2022-07-11 10:14:20	Eastern Cape		Yes I do	Hydro		Teana	employed individual
2022-07-11 10:05:54	Western Cape		Yes I do	Hydro	The country needs to consider all options to produce more electricity. The sea, water, wind and sun in this country could benefit us greatly in producing electricity, if done correctly and without corruption.	Pierre	employed individual
2022-07-11 09:47:37	KwaZulu-Natal		Yes I do	Hydro	Our government is totally inept going private is the only viable option.	William	employed individual

2022-07-11 08:46:20	Western Cape		Yes I do	Hydro	Being in the western cape, we can use wave movement to generate power. We can use solar or wind since we have the south Easter blowing most of the summer months. All the others are still short term solutions and not good for the environment.	Kelly	employed individual
2022-07-11 08:36:52	Western Cape		Yes I do	Hydro	We need to consider sustainable environmentally friendly energy sources whether Hydro, Solar and or Wind. Solar and gas equipment needs to be made more affordable for households to relieve strain from the main power suppliers. Other independent companies should be allowed to supply electricity to avoid one company having the Monopoly and affect the end users negatively.	Rozelle	employed individual

2022-07-11 08:25:30	Western Cape		Yes I do	Hydro		Thean	employed individual
2022-07-11 08:13:43	Free State		Yes I do	Hydro		Margaret	employed individual
2022-07-11 07:57:25	Western Cape		Yes I do	Hydro	As a lay person, hydro electricity make the most sense as far as environmental impact goes, but that said. The best way forward is to employ experienced people who are trained to find the most sustainable and cost effective ways to produce electricity for our country. The first step would be to appoint them. The next step would be to stop the ridiculously high salaries earned at eskom for untrained staff. The last and probably MOST IMPORTANT step would be to first heal our own country amd the energy issues before selling all our energy to other African countries. You can not supply others if you can't look after yourself first. A good example is Ethiopia- where grains and wheat were sold to the rest of the world to feed cattle, when their own personal were dying daily from starvation.....	Norah	employed individual
2022-07-11 07:54:45	KwaZulu- Natal		Yes I do	Hydro		Chiven	employed individual
2022-07-11 07:51:15	Gauteng		Yes I do	Hydro	I think that solar can also be a solution. Something must be done as soon as possible. Everyone is suffering.	Michelle	employed individual
2022-07-11 07:46:48	Gauteng		Yes I do	Hydro	There is a massive need for Independent Power Producers to step in and provide SA with electricity. Yes, businesses are taking strain, but no one is taking into account that people have routines. When people break from routine there are verified psychologist who can tell you that the depression rate (and therefore the suicide rate) will go up. These things inevitably have an effect on mental health as well. We cannot continue to live in such circumstances where a simplicity like electricity cannot even be provided to our nation. This government is so corrupt that they are helping one another steal from every single one of us. With Independent Power Producers I believe the risks would be significantly reduced of us being without power.	Angeniqu e	employed individual
2022-07-11 07:44:59	Gauteng		Yes I do	Hydro		Susan	employed individual
2022-07-11 07:41:12	KwaZulu- Natal		Yes I do	Hydro		Sarah	employed individual
2022-07-11 07:36:41	Gauteng		Yes I do	Hydro	With our beautiful country being surrounded by ocean on three sides, it makes sense to make use of what nature is supplying to us for free. Follow that logic - we have three huge natural resources available to us - why not use them? Solar has just as much potential as hydro, not to mention wind (Eastern & Western Cape). Whilst in development, allowances should be made for private companies to supply power; even if just to industry for now; to allow Eskom much needed time to conduct "preventative" maintenance (something that's probably not featured in their plans previously). Coal is a fossilized (pun intended), form of power production, but the syndicates that pay for it to remain the number one choice for power production, will take a lot of "persuading" to make it less so - you can't substitute coal with scrap metal, rocks and pigs, to make up the weight, when using hydro, solar or wind, and that is where the problem comes in.	Mark	employed individual
2022-07-11 05:36:21	Gauteng		Yes I do	Hydro	Electricity supply must be privatised as the ANC is not capable to protect our current resources not to fix the issues that is causing this destruction. It's urgent very urgent.	Amanda	employed individual
2022-07-11 02:29:08	Gauteng		Yes I do	Hydro	Good day, I think we all are experiencing the effects of climate change Therefore, South Africa should have multiple energy source to power the country, thus eliminating monopoly of energy companies. Give the people the freedom to choose between suppliers and what type of energy they require for their business and homes. Bearing in mind the impact each energy source has on the environment and health of the people. Amandla Amandla Amandla!	Mapaseka Prudence	employed individual
2022-07-10 23:30:49	Western Cape		Yes I do	Hydro		Mescha	employed individual
2022-07-10 23:27:49	Gauteng		Yes I do	Hydro	Eskom is incapable of producing enough electricity for south africa. it is high time that we get more operators in to help generate electricity. so, once more - eskom cannot provide the electricity that south africa requires. we really need somebody that is capable of handling the job to start helping.	riaan	employed individual
2022-07-10 22:11:19	Gauteng		Yes I do	Hydro	All energy sources have consequences, but if existing dams can all be transformed and upgraded to become hydro plants, it may help reduce the current load on the coal-run grid.	Marica	employed individual
2022-07-10 21:32:59	Western Cape		Yes I do	Hydro	Solar, wind and hydro would all use the natural resources we have in south Africa.	Bronwyn	employed individual
2022-07-10 20:58:55	Western Cape		Yes I do	Hydro	I don't know what the best alternate power solution would be, but i do know that after 15 years Eskom electricity is both more expensive and less reliable than ever. Its time to bring alternative energy on board.	Lauren	employed individual
2022-07-10 20:56:13	Limpopo		Yes I do	Hydro	Ndi khou tikedza uri Afrika Tshipembe ri shumise mudagasi wa madi (Hydro) ngauri a u tshikafhadzi mufhe.	Mulatedzi Enos	employed individual
2022-07-10 20:35:29	Gauteng		Yes I do	Hydro	SA desperately needs a solution to the electricity crisis. Governments responsibility is to provide infrastructure to the nation and it is failing in its duty. It is really drastically impacting life and productivity. Urgent call to government for alternative solutions and moving away from the monopolisation of energy supply.	Diane	employed individual

2022-07-10 19:56:38	Free State		Yes I do	Hydro	Stop providing others ,let's sort our problems first	Portia	employed individual
2022-07-10 19:49:50	Western Cape		Yes I do	Hydro	We should use all options available to us as south Africa. We have so many rivers and dams in this land. Western cape is usually always windy. Gasses are rich. Nuclear power is here but under utilized. Stop providing power to neighbour lands till we sort ourselves out first.	Darryn	employed individual
2022-07-10 19:49:47	Western Cape		Yes I do	Hydro	We should use all options available to us as south Africa. We have so many rivers and dams in this land. Western cape is usually always windy. Gasses are rich. Nuclear power is here but under utilized. Stop providing power to neighbour lands till we sort ourselves out first.	Darryn	employed individual
2022-07-10 19:49:20	Western Cape		Yes I do	Hydro	We are surrounded by oceans....common sense to go hydro.	Michael	employed individual
2022-07-10 18:25:49	North West		Yes I do	Hydro		Kealeboga	employed individual
2022-07-10 18:25:49	North West		Yes I do	Hydro		Kealeboga	employed individual
2022-07-10 18:23:34	Gauteng		Yes I do	Hydro	In addition to hydro I also think solar and wind energy is a great option for South Africa. The only reason I say hydro first is due to the high theft rates in South Africa which leaves the wind turbines and solar panels vulnerable however they can be secured I guess. We have so many river systems that could accommodate different sizes of hydro farms dependant of electricity usage in the given areas. We also have so much vacant land all over South Africa which were once farms that could be better utilised to create wind and solar farms. This will help with the current crisis we are having by giving the people a choice as to who they want electricity from instead of us sitting in the dark most of the time when we also supply neighbouring countries with electricity and they have absolutely no power interruptions. It's an absolute disgrace that this happens when we most probably pay more for the electricity. Thanks eishkom!!! NEXT!!!!	Cuan	employed individual
2022-07-10 17:49:44	Western Cape		Yes I do	Hydro	Quite simply Eskom cannot meet the demand. It's time they to face up to their inability to run a profitable and effective entity and allow private sector to supply power to meet the demands. Eskom board, executives, members, employees etc - you have ruined an economically viable parastatal , stop making the citizens of the country pay for your incompetence with more that financial hardships - loadshedding is a disgrace which can be avoided by allowing private sector to intervene.	Fanie	employed individual
2022-07-10 15:07:08	KwaZulu- Natal		Yes I do	Hydro		Blaise	employed individual

2022-07-08 19:11:03	Western Cape		Yes I do	Hydro	Definitely time for a change! HEALTHY competition is the only way to go and it is enough of the crap we have to suck up and loadshed killing business, homes and freedom of movement	Samantha	employed individual
2022-07-08 18:59:57	Western Cape		Yes I do	Hydro	Eskom clearly is currently not able to supply South African citizens with uninterrupted electric power. The government should be mature enough to ask for help and to accept help from independent power producers for the benefit of all South African citizens.	Zuzanka	employed individual
2022-07-08 18:17:40	Gauteng		Yes I do	Hydro	We are surrounded by water and they haven't to explode it like other country with a 1/10th of our coast line. Eskom is running a monopoly being the only power supplier in the country	Joe	employed individual
2022-07-08 16:42:32	KwaZulu- Natal		Yes I do	Hydro	Eskom and their whole energy system is not functioning. Get rid of Eskom and go with another energy solution. Enough is enough.	Natasha	employed individual
2022-07-08 16:40:59	Western Cape		Yes I do	Hydro	What South Africans have experienced over the past few weeks, has reached unacceptable levels. The government has totally let its citizens down. They deserve no regard or respect anymore. They don't offer solutions because they don't want them. They want to just continue filling their pockets from state coffers and keep the people, the masses hostage, in bondage, dependent, in darkness... We have the means (sea all around the country, many rivers and dams, lakes and other water bodies) to be able to produce electricity. We have enough wind in many areas to use wind force for electricity. We actually do have enough coal, but it is in the wrong hands - the production, the handling of it, the decisions and choices surrounding it - we need to have private companies with different offers from which citizens can democratically CHOOSE their source. Free us from this greedy government. Deliver us from evil, Lord, and get rid of those who don't care that they are running this promising, sterling country into the ground.	Bobbi	employed individual

2022-07-08 15:46:46	Western Cape		Yes I do	Hydro	Solar would be the quickest, which we need. But hydro should also be done. It takes long to build but gives clean energy and has the added advantages that it stimulates the building industry, helps conserve water in a country that regularly experiences draughts, can assist with Agriculture. It can also deliver power at night when solar plants cant deliver. There are a number of places along the Orange and other rivers where small to medium hydro plants can be built.	Jacques	employed individual
2022-07-08 15:01:15	Western Cape		Yes I do	Hydro	I think we have to move away from only one energy supplier and be at their mercy..what other countries have you heard of that has loadshedding..we not even a third world country but slowly moving towards it.	Leigh- Anne	employed individual
2022-07-08 13:56:41	KwaZulu- Natal		Yes I do	Hydro	Eskom is in a terrible mess due to mismanagement and severe corruption. We, the citizens are really fatigued by excessive load shedding and exorbitant electricity tariffs. Therefore, an independent service provider is imperative.	Pamela	employed individual
2022-07-08 13:55:05	Western Cape		Yes I do	Hydro	I'm not clued up on which would be best, but we have an abundance of sunlight, wind, and flowing water. Anything that is viable and competitive in price would be great!	Megan	employed individual
2022-07-08 13:51:23	Western Cape		Yes I do	Hydro		Simone	employed individual
2022-07-08 13:32:03	Western Cape		Yes I do	Hydro	Please note this needs to fulfill two purposes: sustainable alternate power that is always on and affordable to all. We do not need another eskom.	Barry	employed individual
2022-07-08 11:59:40	Gauteng		Yes I do	Hydro	It is ridiculous that the government waits for a crisis before they take action. Our economy is suffering big time, people are grumpy and many quality people are leaving our country. We have water and wind, so utilise these natural products to their fullest.	Judy	employed individual
2022-07-08 11:48:36	Western Cape		Yes I do	Hydro	The sooner all the red tape is abolished the quicker our economy can get back to its feet and jobs being created to sustain families in this already tough environment. why are we still keep on supporting this Eskom electricity mafia while their infrastructure is falling apart and the consumer has to bear all the costs of their incompetence, the good ones excluded. Bring in some competition it is good for business and will lift up service delivery for a change. we can use solar , gas and all types of renewable energy as long as we just deliver service to house holds and businesses in this country . come on minister Gordhan lets build a prosperous economy .	roger	employed individual
2022-07-08 11:40:09	Gauteng		Yes I do	Hydro		Lee-Anne	employed individual
2022-07-08 11:34:47	Western Cape		Yes I do	Hydro	A combination of all possible sources would be needed. No single source will be sufficient. However, environmentally friendly sources should be prioritized.	Anscha	employed individual
2022-07-08 11:14:11	Western Cape		Yes I do	Hydro	Our country is in desperate need of a stable supply of electricity. Every hour of load shedding is damaging our productivity and economy, and is ultimately costing people their jobs and a means to provide for their family's basic needs. Legislation to ensure the use of locally sourced labour can be implemented later when our country has people with the necessary skills and training. In fact, government should rather focus their efforts on promoting such training and education to upskill our local workforce instead of making it an impossible problem for independent power producers to solve in time to save our economy from the brink of disaster. I'm not an expert on energy production, but I think hydro power could be a good option if it is implemented cleverly, because the advanced infrastructure around our rivers could simultaneously help prevent future flooding and improve our nation's water supply.	Trish	employed individual
2022-07-08 11:13:34	Gauteng		Yes I do	Hydro	I think anything will be better than what we are getting at the moment. Eskom doesn't have competition, they can't look after the grid. It is totally outdated and has not been maintained. That is why we are sitting with the chaos we have today. It's costing people unnecessary money to run generators and people need a solid solution. Not everyone can afford to go off the grid	Laura	employed individual

2022-07-08 09:19:21	Gauteng	Yes I do	Hydro	<p>There are various opportunities and feasibility studies done on projects ready for execution but never gets off the ground. Some of these projects have a payback period of 2 years. With constant water release from dams from the Lesotho Highlands Projects, Water Transfer Schemes and Environmental Release from dams. This constant flow of water is the ideal solution to increase our base demand energy capacity as it does not have the limitation of wind and solar needing large battery (or other) energy storage.</p> <p>Some old plants can be refurbished with new mechanical and electrical equipment and be reinstated for service without major capital required for civil infrastructure or environmental processed to unlock the potential. Within Gauteng lies major opportunities in our water networks (with excess pressures from Rand Water in Tshwane and elsewhere) to remove the reliance of the water sector on Eskom. Hydropower can therefore increase our water security and reliance on Eskom.</p>	Janco	employed individual
2022-07-08 09:14:45	Gauteng	Yes I do	Hydro	AT THIS STAGE ANY ALTERNATIVE WILL DO. THE MORE OFF THE GRID, THE BETTER. SOLAR IS MORE A SHORT TERM OPTION. BUT THEFT WILL ARISE WITH SOLAR AGAIN. WIND MAYBE ALSO A SOLUTION, BUT THEN THERE MUST BE SECURITY OTHERWISE.....	MADELEIN	employed individual
2022-07-08 08:20:48	Gauteng	Yes I do	Hydro	Government should allow independent power producers to assist in providing a basic need to all South Africans. Renewable energy sources can be harnessed and will boost economic activity (which also is in desperate need of renewal).	Celia	employed individual
2022-07-08 08:19:29	Outside SA	Yes I do	Hydro	It is probably the cheapest ad most renewable of all the options - if they can do it !	Victor	employed individual

2022-07-12 17:02:21	Western Cape		Yes I do	Hydro	We have dams like Steenbras, Theewaters etc	Michelle	business owner
					<p>Short to medium term energy solution - Free the market of red tape</p> <p>There are many innovative renewable energy technologies emerging in power generation and storage. But renewable energy from solar and wind is intermittent. Therefore storage and renewable energy red tape needs lifting at the same time to effectively enable renewable private energy generation and storage. This will help create much more home, commercial and industrial private energy. Regulation and permissions hinder generation and storage investment by private energy investors.</p> <p>Investment needs to be encouraged LOCALLY where ever possible because transmission of electricity is restricted and expensive on Utility power lines. Wheeling of electricity from any energy supplier to any off taker must be properly enabled through simplified legislation and uniform regulation of wheeling charges by municipalities and Eskom in an affordable way. This will allow for a rapid increase in generation and storage of energy which private companies WILL develop and sell to their customers (Bespoke off takers). Here solar and wind economy of scale will be reached quickly releasing the immense pressure on Eskom to supply a market throttled and shrinking poor energy supply with rocketing costs to end users.</p> <p>The Energy Cinderella in SA</p> <p>However existing storage of energy from renewable generation is very expensive and currently its LCOE is not good enough to be really viable except in real emergencies (mostly LiFe batteries). Hydro and gravity storage is Capex heavy but remains the best long term storage system. Pumped hydro offers generation and storage at the same time at a very affordable rate over its 80 year life time. Pumped hydro generates base load energy and peak energy needs for the grid or for bespoke off takers nearly instantaneously and continuously to support our aging coal fired energy base load needs. It can easily replace the gas and diesel peak demand generation from the utilities in South Africa with excellent LCOE which is sustainable and viable.</p> <p>The New SA Gold Energy Mine Solutions - medium/long term solution.</p> <p>South Africa has a unique asset and resource to generate pumped hydro electricity in conjunction with solar and wind farm. We have hundreds of kilometers of deep mines and mine shafts in SA that can be the source of clean power or "gravity energy assets" that generate energy and store it cheaply. The cities of the Witwatersrand were built on gold and now those mines are mostly abandoned. Deep mines can generate and store huge amounts of base load and instantaneous renewable clean energy to solve many of SA's energy challenges.</p> <p>Reducing red tape in generation, energy storage and energy wheeling will open the door to build pumped hydro from the hundreds of deep mine shafts in South Africa.</p> <p>With the support from Government, international green renewable energy funders (R8.5 billion pledged to SA at Cope 26) and private investors, mine shafts can be turned into the New Gold Mines of SA. At a fraction of the Capex cost of coal power plants and massive ecologically questionable hydro electricity dam developments, the existing mine shaft infrastructure will generate renewable energy (wind & solar) and stored energy; over the medium and long term; at an LCOE rate below that available now or in the future compared to existing solutions to our energy crisis. the mine pumped hydro projects need to be understood, feasibility seed funding, supported by government grants, is essential and then PPP partnerships will be built to take SA energy out of the current industrial and commercial death spiral we find our country in.</p>		
2022-07-12 11:51:06	Gauteng		Yes I do	Hydro	Alan Roxton Wiggill: STI Energy - Renewable Energy Innovation	Alan	business owner
2022-07-12 11:42:02	Western Cape		Yes I do	Hydro	<p>SA cannot go nuclear, as the ruling party cannot even maintain a coal fueled power station, so going nuclear would not be an option.</p> <p>Hydro power is more sustainable and manageable...either way the ONLY way for SA to get back on track is for the ANC to step down and hand the country to a ruling party that can operate, without such blatant corruption and bad management.</p> <p>ANC must fall!</p>	Liam	business owner

2022-07-12 07:29:23	Western Cape		Yes I do	Hydro	It's working well in CT where the City generates keeping us a stage below eskom during LS. So, no reinventing the wheel, tried and tested. But it could be a mix of ipp, depending on the area, eg. use what is most suitable, hot dry area use solar, wind in the windy areas and hydro in others.		business owner

2022-07-11 11:19:02	Gauteng		Yes I do	Hydro	We need base load electricity and the best, cleanest but most expensive is Nuclear. Solar is the next best for inland areas like Gauteng but is not continuous. Hydro is best to deliver immediate power to meet peak periods and we should develop at least two more pumped storage schemes for that. There are areas suitable for that. Otherwise there are a lot of possibilities to generate small hydro in the order of 750 kW upwards from releases from dams for environmental purposes. China has > 1000 small schemes like this , all added together make up a lot of power. We just have to think laterally .	Peter	business owner
2022-07-11 11:10:50	Western Cape		Yes I do	Hydro	The draconic, cumbersome regulations that currently block alternative energy suppliers must go. It is laughable that the same regulations are expected even from home owners that are not even putting electricity back into the system. For too long, Eskom has been compromised by self-serving politicians and crime cartels. Eskom has to be disbanded in total, to be replaced by localized, private companies and private owners.	Tinus	business owner
2022-07-11 10:51:30	Western Cape		Yes I do	Hydro	Utilize the quickest way to get the grid populated with adequate energy for our country. I've suggested hydro but I'm not an expert ; if any other mechanism can achieve this in a shorter time span then so be it! Make long term decisions after that. We're in a state of crisis, for God's sake.	Roland	business owner
2022-07-11 10:16:00	Gauteng		Yes I do	Hydro	It is so obvious that the Government is trying with all its might to keep 100% control of this country by not allowing a monopoly of users. Greedy fat cats, that's what they are.	Rene	business owner
2022-07-11 09:14:16	Gauteng		Yes I do	Hydro	Our continued power outages are crippling our economical and business growth , causing severe stunting of the natural forward momentum to becoming a first class modern country.	Ernst	business owner
2022-07-11 08:50:54	Gauteng		Yes I do	Hydro	A more balanced combination of resources should be used. Private suppliers will stop the monopoly and annexation of the country. We cannot afford to be held hostage by a failing electricity supplier like Eskom where there is more political interference. The political pariahs seem set on collapsing the power grid for self-gain.	Monica	business owner
2022-07-11 08:50:49	Gauteng		Yes I do	Hydro	A more balanced combination of resources should be used. Private suppliers will stop the monopoly and annexation of the country. We cannot afford to be held hostage by a failing electricity supplier like Eskom where there is more political interference. The political pariahs seem set on collapsing the power grid for self-gain.	Monica	business owner
2022-07-11 08:29:35	KwaZulu- Natal		Yes I do	Hydro	Cost Effective, Easier and quicker to install. Use natural elements . Satisfies the "Go Green" initiative.	Anand	business owner
2022-07-11 08:18:42	KwaZulu- Natal		Yes I do	Hydro		Lisa	business owner

2022-07-11 08:09:29	KwaZulu-Natal	Yes I do	Hydro	Hydro is an Energy source that is frequently overlooked. Midmar Dam in the Natal midlands releases one Cubic meter of water per second. Building a Turbine unit/s could supply enough electricity to power the whole of Howick. This is a constant release from the dam. How many other dams release water and the energy goes unharnessed?	Edward	business owner
2022-07-11 07:48:43	Western Cape	Yes I do	Hydro		Julia	business owner
2022-07-11 07:46:00	Gauteng	Yes I do	Hydro		David	business owner
2022-07-11 07:13:19	KwaZulu-Natal	Yes I do	Hydro	There are several "moth-balled" hydro electric plants (under correction but, Albert falls dam used to be one of these) that could be brought back online. There is a proposed damming of the Umkomaas river - (Deep dale section) - there is enough drop in elevation and waterflow to create several Hydro-electric dams in this area. As a business owner, it is increasingly difficult to maintain operation without stable and reliable electricity.	Andrew	business owner
2022-07-11 06:59:27	Western Cape	Yes I do	Hydro	Large coastline with little impact on environment. Cleaner energy. Less impactful on society and environment should future state capture cause the inevitable deterioration and destruction of the implements	Marc	business owner
2022-07-11 06:52:55	Western Cape	Yes I do	Hydro	In the short term, solar and wind have the most potential for providing swift, large scale energy production while providing lower levels of emissions and having a smaller environmental impact. Coal, diesel and gas are not suitable alternatives, and should be phased out completely. Long term focus should be on building new nuclear and hydro plants as these have the most potential for high-capacity, clean and sustainable energy production for the long-term.	Joshua	business owner
2022-07-11 05:37:35	Western Cape	Yes I do	Hydro	We should implement various forms of electricity generation presently to get us out of the mess the ANC has created. The process should be transparent with the private industries involved and not just government and their cronies..	Mark	business owner
2022-07-10 23:40:22	Western Cape	Yes I do	Hydro		Pierre	business owner
2022-07-10 21:42:08	Free State	Yes I do	Hydro		Antionette	business owner
2022-07-10 21:39:32	Western Cape	Yes I do	Hydro	Green energy is high on the agenda of all countries in the world. South Africa needs to start generating power on the Orange and other river's in the country. We also have the strongest seacurrent on the east coast of South Africa to generate green energy. Nowadays, generated hydropower from river turbines is one of the cheapest ways to produce electricity. Hydropower can be implemented in South Africa to supply domestic electricity due to the increase in loadshedding. River Turbines is yet another hydroelectric initiative in the creation of clean green energy. Situated on a moored barge, the turbine would automatically rise and fall with the water level and could be placed in almost any river or canal setting for pollution-free electricity. This research gives an idea about the effective use of water turbines in a river flow, which gives power generation with low cost. It also describes the working principle, design and calculations, applications and challenges along with future scope of using river turbines. The modern turbines are made from plastic which have many functions as a new technology, promising no harmful effects on the environment. Modern turbines will be used to produce the electricity through attaching the turbines to generators with help of a gear arrangement, so the electrical energy is resulted from mechanical energy. The full bridge rectifier is used to transmit electricity in its most efficient form i.e. from direct current into pure direct current while the regulator is used to regulate the current, and the battery helps to store it. https://www.facebook.com/100006734144044/posts/3379228165644955/?app=fbl	Emile	business owner
2022-07-10 21:28:14	Gauteng	Yes I do	Hydro	I think that Eskom should redirect surplus capacity that it exports and supplies to other countries back to our grid to alleviate the pressure	Tefo	business owner
2022-07-10 21:19:03	Gauteng	Yes I do	Hydro		Janine	business owner
2022-07-10 18:04:42	Western Cape	Yes I do	Hydro	Hydro, solar, wind... All of these are resources we have in abundance, and ought to be utilising please	Roxy	business owner
2022-07-10 18:00:12	Gauteng	Yes I do	Hydro	Hydro energy is the most efficient and serviceable type of energy generation. Large scale to micro we have the water forms (rivers,etc) to do so.	Tessa	business owner

2022-07-10 16:31:59	Western Cape	Yes I do	Hydro	Eskom is clearly a monumental failure, which is being operated as a private piggy bank by corrupt syndicates, who enjoy the protection of our corrupt and criminal government. Power is a fundamental need for our society and Eskom has proven, repeatedly for years, that it cannot/will not supply us with sufficient power. It is no closer to doing so now than it was, years ago, when the problem of insufficient supply became clear. If our government continues to protect this corrupt monopoly from competition, no solution is possible and the only, inescapable, result is the continued downfall and decay of our society. Allowing open competition in the energy sector would quickly remedy the problem. Failure to do so is just one more clear and obvious message that our government is nothing but a mafia whose sole concern is to extort and cripple the people of this country.	Gavin	business owner
2022-07-10 13:52:44	Western Cape	Yes I do	Hydro		Gina	business owner
2022-07-10 12:36:41	Western Cape	Yes I do	Hydro	Hydro and solar is the WAY to go in the western cape because there is a lot of strong flowing rivers and dams	Paul	business owner
2022-07-10 09:02:07	Western Cape	Yes I do	Hydro	Hydro doesn't have the storage drawbacks of solar & wind.	Chris	business owner

2022-07-09 12:01:08	Western Cape	Yes I do	Hydro	I support scrapping the African National Congress and Privatize all Government Entities.	Anthony	business owner
2022-07-09 10:40:00	Western Cape	Yes I do	Hydro	South Africa should be working towards sustainable and clean energy production. South Africa has great opportunity to introduce large scale generation from Renewables and Hydro. Solar power industry is established in South Africa, there are many suppliers and producers, review of existing solar technologies to investigate strategies that can provide sustain energy over dark periods will be great and enable small scale generation to feed the grid. Government should make small scale generation more accessible, as it offers great opportunities too rapidly expand and support our energy needs however currently many municipalities and Eskom have high costs when feeding back into the grid, making it not feasible for small scale farmers like myself. I have my own land and with the right mechanism and agreements, I would gladly contribute a section of my land to generation power and feed back into the grid. Lastly, we've had an energy monopoly for far too long, more providers, more resilience, more capability and so forth. We have a history with monopolies, Telkom was a dominant monopoly for a long time, since we've opened South Africa has Telecommunications has dramatically improved and rapidly becoming world class standard. I encourage Government to follow a similar path and open the energy sector, especially for the guy on ground, the small scale producers. The African (Ubuntu) way of inclusion :)	Seelan	business owner
2022-07-09 08:16:25	Gauteng	Yes I do	Hydro		L	business owner
2022-07-09 08:09:58	Western Cape	Yes I do	Hydro	I think maybe in the coastal regions in proximity to high lying escarpment, a hybrid system of solar, wind and hydro should be investigated. Solar and wind generation to pump water up to storage and released to drive turbines?	John	business owner
2022-07-09 06:13:46	Mpumal anga	Yes I do	Hydro		Alan	business owner

2022-07-08 17:56:19	Western Cape		Yes I do	Hydro	Allow independent energy producers to feed into the grid. Diversify sources of electricity - diversify producers and types of generation. Invest in the future by making use of more environmentally friendly sources of energy.	Emma	business owner
2022-07-08 17:54:38	Gauteng		Yes I do	Hydro	Need to look at a combination of generating electricity as quickly as possible by de-centralizing to private users who can sell back to the grid. Need hydro pump storage to store the electricity when there is an over supply from solar wind etc. so that it can be used during peak periods	g	business owner
2022-07-08 17:14:48	KwaZulu- Natal		Yes I do	Hydro		Maggie	business owner
2022-07-08 16:40:15	Eastern Cape		Yes I do	Hydro	Also solar and wind. Any other form of electricity production that would help the crisis for now. Independent Power Producers should be actively supported possibly with tax incentives. Red tape should be eliminated. Eskom has proved over and over again that is unable to produce enough power to supply our country and in the process is bringing South Africa to its knees.	Liz	business owner
2022-07-08 16:01:55	Western Cape		Yes I do	Hydro		Catherine	business owner
2022-07-08 15:50:43	Western Cape		Yes I do	Hydro	Our company put in a proposal back in the early 2000's for micro-hydro which was rejected by the NER. We imported micro/mini turbine generator which lies idle in the Eastern Cape.	Jeremy	business owner

2022-07-08 14:42:49	Western Cape		Yes I do	Hydro	Independent power suppliers should immediately be allowed to supply electricity	Dudley Bruce	business owner
2022-07-08 14:14:30	Western Cape		Yes I do	Hydro	We are surrounded by water, why can someone not build a Hydro electrical system for electricity. There are already people who have hanced electricity from the tide.	Pippa	business owner
2022-07-08 13:02:19	KwaZulu- Natal		Yes I do	Hydro	There are numerous hydro plants in SA. Some not used. More can be utilized. Also wind and solar, as is the case in Australia. People pump it back into the grid and get paid for it. We have a sea from east to west. Some countries uses wave energy to produce electricity. What about converting all or some of the sewage plants to gas operating units for electricity.	Thys	business owner
2022-07-08 12:36:17	Eastern Cape		Yes I do	Hydro	Also solar. Most obvious one for this country. And most available at this stage.	Ciska	business owner
2022-07-08 12:09:16	Gauteng		Yes I do	Hydro			business owner
2022-07-08 11:58:31	Gauteng		Yes I do	Hydro	Any type of generation is fine as long as the ANC is not involved in the companies otherwise its will be a wasted exercise.	Wessel	business owner
2022-07-08 11:50:38	Western Cape		Yes I do	Hydro		Jacob	business owner
2022-07-08 11:39:31	Gauteng		Yes I do	Hydro	the economy needs to grow so more people can get work and this way we feed more south africans also then we stop the needy corrupt government and his few friends from controlling the electricity supply and the costs . it is also a fact that the government has no idea how to run Eskom except run the country into ruin	Ana	business owner
2022-07-08 11:20:26	Western Cape		Yes I do	Hydro	Small scale Hydropower In-line hydropower Run of river hydropower	Mike	business owner
2022-07-08 11:15:05	Western Cape		Yes I do	Hydro	The stranglehold on the economy and lives of South Africans through the marginalising of any competition for Escom is nothing short of treasonous to the Republic.	Jeremy	business owner
2022-07-08 10:46:19	Gauteng		Yes I do	Hydro	Hydro i believe is most efficient and a renewable source. I believe though that WIND, SOLAR are ideal as well in this country. I wouldn't trust SA with a nuclear path as it currently stands. Coal still works providing govt does not interfere. Geothermal i hear affects climate change although i am no expert at all. Biomass could be useful with the use of burning agricultural waste. The bottom line though is that NO govt interference and no govt "connected" officials be involved eg: Cyril, Patrice with price set by private companies and not govt to bring about price competition. Same should apply to petrol/diesel.	Paul	business owner

2022-07-08 10:43:31	Gauteng	Yes I do	Hydro	Honestly, I feel that on such a huge scale only Hydro or wind production would solve the problem.. These are all renewable and would not be as taxing on the countries resources and environment such as gas/diesel/coal and especially nuclear power. Nuclear power can be super safe now with modern advances in tech however, the long term environmental damage is unacceptable. Nuclear power would be such an easy fix but it isnt worth it. I would also pick Hydro and wind as solar or gas cant be used on a massive scale as successfully and I feel these 'solutions,' would end up with massive costs to the end user or the most vulnerable people in the lower or middle classes in South Africa which are generally already under massive strain. However, if there is a way to create massive solar collector fields, which SA has the space for, this could also be a great solution... Hoping that the costs behind this isnt insanely huge, which I fear it will be and the expense on electricity will be too high.	Franco	business owner
2022-07-08 09:57:07	Gauteng	Yes I do	Hydro	Clean power is the way to go - no pollution. It will be cheaper (I suspect), than the use of coal. There is less chance of corruption, and theft	Art	business owner

2022-07-19 10:13:29	Western Cape		Yes I do	Hydro	Hydro power is the best solution but due to climate change and our dams running empty across the country it is not viable in the long run. Wind turbines are an alternative but they kill thousands of birds as they are normally put up in the prevailing winds that migrating birds travel on, so in my opinion nuclear is the best way to go but with this governments track record it would be dubious at best (look at what is really going on at Koeberg). Apart from Hydro which i believe is the cleanest less destructive form there must be another way.	Klaus- peter	retired
2022-07-18 10:33:48	Western Cape		Yes I do	Hydro	ALL I EVER WANT TO HEAR IS THE DEATH OF ESKOM AND THE NEVER-ENDING DESTRUCTION THE FAILURES HAVE AND CONTINUE TO CAUSE THIS COUNTRY. UTTER DISGRACE. WHATEVER INDEPENDENT AND EDUCATED AND QUALIFIED ENGINEERS CONSIDER BEST WAY FORWARD IS GREAT FOR ME - BUT SHUT ESKOM ASAP - HOPEFULLY BEFORE I KICK THE BUCKET!	CHARLES	retired

2022-07-07 19:24:12	Western Cape		Yes I do	Hydro		Cheryl	retired
2022-08-19 21:39:12	Western Cape		Yes I do	Hydro	Why can't we use hydro. We have the coastline and some large dams. Instead of wasting water when the dams are overflowing by opening the the gates to let the water just run away. Surely that water could be used for electricity. Build more dams. Solar panels also could help. Allow people with solar to sell their electricity without trying to grab money from those people who paid for their solar panels.	Wendy	retired
2022-08-15 20:40:04	North West		Yes I do	Hydro		Willem	retired
2022-08-03 19:10:01	Western Cape		Yes I do	Hydro	I support opening up the electricity market to independent power producers. If South Africa does not do this, their power problems will simply continue to grow. I believe that no single method of electricity production should be isolated, but favour gas, hydro, solar energy, and other forms of renewable energy. I reject nuclear power as being too unstable and dangerous; coal is a huge pollutant and a finite source, uranium is toxic and the cost of wind farms is prohibitive and a danger to bird life.	LYNN	retired
2022-08-02 17:11:44	Western Cape		Yes I do	Hydro	Knysna's tidal flow in and out of the heads should be evaluated.	Malcolm	retired
2022-07-23 10:33:30	Western Cape		Yes I do	Hydro	2 Stroke Diesel, Hydro Electric and Nuclear are the best three choices in terms of balance between efficiency, availability of materials and emissions. The diesel generators can run off of vegetable oil if need be. Nuclear would have been my first choice in an ideal world, but with the ANCs level of mismanagement and corruption, I fear we might see our own Chernobyl event. Thus, Hydro Electric is my first choice as it is the least destructive if it all inevitably falls to decay. Additionally, we have a wealth of strong rivers to power the Hydro plants, uranium for nuclear and surplus farmland for bio-diesel	William	student

2022-07-13 13:45:18	Gauteng		Yes I do	Diesel	Electricity generation by Diesel engine or turbine will be the quickest solution but expensive to run. We also need a long-term solution which in my opinion would be nuclear-powered electricity generation	Eric	business owner
2022-07-10 21:37:32	Western Cape		Yes I do	Diesel	We should consider the diesel power generating ships as an immediate solution in the short term while allowing independant power generating companies to establish long term permanent renewable energy solutions.	Handre	business owner
2022-07-10 08:55:01	Gauteng		Yes I do	Diesel	Diesel is the easist way for mediate power solution Its more important to keep our economy going than to sustain eskom thats only a cashcow for the government	Zeric	business owner
2022-07-12 19:43:11	Western Cape		Yes I do	Diesel	In the Cape region there is nearly always winf	Bram	retired
2022-07-10 11:45:47	Western Cape		Yes I do	Diesel	I think Diesel is possibly the only option for immediate supplementation, assuming this is for a top-up scenario. Longer term would favour gas or nuclear. Solar makes sense at a household level assuming battery banks.	Justin	retired
2022-07-10 07:27:15	Western Cape		Yes I do	Diesel	Wind and Solar will be an intermediate and long term solution. There are several wind turbine farms that could join the grid quite quickly. Short term solutions will be more diesel ported generation units and the dreaded "power ships"	Richard	retired
2022-07-08 20:39:28	Western Cape		Yes I do	Diesel	Diesel (or gas) engines can be installed and commissioned in a very short space of time, although operating costs are very high - you did ask about a solution for our IMMEDIATE needs! Some form of encouragement / incentive for people to install solar systems for home use (or even industrial use) would also be welcome!	Geoff	retired
2022-07-08 13:25:21	KwaZulu- Natal		Yes I do	Diesel	Need an immediate electric generator input Only peaking power diesel generators can fill the gaps in a very short space of time	Rob	retired
2022-07-08 06:46:42	Gauteng		Yes I do	Diesel	This is due to an incompetent and criminal government. This inability is the source of the unreasonable penilty everybody is funding	Leon	retired
2022-09-03 22:57:53	Gauteng		Yes I do	Diesel		driekie	retired
2022-07-10 20:00:55	Gauteng		Yes I do	Diesel	There was a scandal earlier this year or late last year about people who attempted to steal diesel. My point is there's a huge supply of diesel in South Africa can could be a solution to the problem.	Olwethu	student
2022-07-25 10:30:47	Western Cape		No I do not	Nuclear		Oscar	unemployed individual
2022-07-12 08:57:53	Western Cape		No I do not	Nuclear	These are important decisions and should not be made in haste. There needs to be proper planning. Climate change is being used as an excuse to push a 'green energy solution' on us and other countries and a few connected people in this country are going to make trillions from us. Look at Germany today. Their green energy didn't work. The cost of electricity is going to sky rocket and the supply drop. Do some alternate research, away from main stream media and you will see that we are being conned. Again.	Mike	unemployed individual

2022-07-11 11:27:18	Gauteng	No I do not	Nuclear	Solar electricity as a replacement for a large power grid is a huge lie...soar electricity is good to have but it can not sustain heavy duty electrical factories or appliances on a country let alone world wide scale. What's worse is they know it's a lie..their intentions are evil and greed based. Selling the country and humanity out for money. Only the satanist will have electricity..the public will be reverted back to the stone ages only having enough electricity to use a cell phone with which they will monitor track trace and enslave all of humanity. They know it's a lie but they dnt care..why not nuclear..all the lies on tv to make ppl afraid of something better safer to use and 100 times cheaper. The public must re educate themselves about the reality of nuclear energy. This is all about control not kindness.	Michael	unemployed individual

2022-07-15 11:27:52	Eastern Cape		No I do not	Nuclear	A mix of electricity production methods will assist the country in cutting down on loss of power due to load shedding. Developed nations are going back to coal (which happens to be coming from our shores) now because of its reliability so we should not scrap its use.	Mava	employed individual
2022-07-14 18:38:09	Gauteng		No I do not	Nuclear	The proposed nuclear power that was disputed by DA and supported by this Ramaphosa Administration could have helped this situation we are finding our in	Anthony Fana	employed individual
2022-07-14 10:08:44	Gauteng		No I do not	Nuclear	We have proved for years that Coal and nuclear are our baseload. Renewables can never have a similar impact on our energy needs. Again why is the survey coming from Department of Public Enterprises. DMRE is best positioned to explore this better. The excuse of lead time in building this power stations cannot be the reason good-enough as SA has known of power challenges for the 15 yrs. This could have been done. Do not choose 1st of a kind technology but something that has worked before. this is informed by the problems we are experiencing at Medupi and Kusile coal power stations.	Herbert	employed individual
2022-07-13 10:30:19	Gauteng		No I do not	Nuclear	South Africa needs not to be put in the corner into agreeing with doing away with coal for green energy by powerful countries who are looking to benefit in that transition. Can we afford to move away from coal to green energy? Does the current power stations that we have support green energy? What will happen to the current existing power stations which have already costs the country billions of rands? We are not in a position to completely move away from coal to green energy and is our weather going to support such a move? Will we have stable electricity? IPPs will not supply everyone with electricity for free and or at discounted rate, their aim is to make profit and the government's aim is to roll out electricity to everyone and make sure that every inhabitant of South Africa have electricity. We cannot just say policy must be amended to make way for IPPs to produce electricity to South Africans. As they are corporate companies that wants to produce electricity they must have their own power stations and start producing electricity to compete with Eskom so as to see the reliability of their output. We want to be able to compare between the services we receive from Eskom and them. They must start building power stations and rollout electricity to those who are will to purchase it from them. We cannot allow the infrastructure of the government built at taxpayers pockets to be sold for nothing by Jamnandas Gordhan to his friends. Eskom is being sabotaged intentionally so that this big corporate companies can move in and produce electricity to those who can afford to have electricity, because it will not come as cheap look at the flights tickets before and after privitisation. IPPs can wait and the country must continue to produce electricity using coal. What about all the people working in those coal mines? Where are they going to get employment under this climate? What about all those assests? Nah, we good.	Ngcebo	employed individual
2022-07-13 10:10:37	Gauteng		No I do not	Nuclear	The Nuclear was the best plan to end load shedding. Private sector is not a solution at all. Poor people won't afford electricity under private sector. They are profit based and do not care about the poor.	Siyanda	employed individual
2022-07-12 22:11:39	Western Cape		No I do not	Nuclear	I personally think nuclear is a superior method with little toxic waste every 20yrs that last 100yrs Coal being the 2nd best is still the best solution for us for now only if we nationalized one or two mines which will create a very affordable electricity for all. Compared to solar which is useless without storage/batteries and also a lot of toxic waste of batteries when they pack up every 3 to 7 year's and let's not forget about the COST of those panels and batteries which will create a very expensive electricity	Vusi	employed individual
2022-07-12 15:57:25	Western Cape		No I do not	Nuclear	The obvious and immediate solution for South Africa is to make the required and necessary repairs to the existing ESKOM grid. stabilize this and stabilize our economy! OBVIOUS to any intelligent citizen. Answer to the call that we are all making now to spend the required money to stabalize ESKOM and from here on forward we can make calm and intelligent decisions based on what is best for the power grid. What is safest and most affordable and stable given the populations and their needs. Kind regards Sarah Mackie	sarah	employed individual
2022-07-12 12:45:13	Western Cape		No I do not	Nuclear	It should be state controlled because it will keep price of electricity low. Currently the crisis is deliberate to enable private stakeholders to not only enrich themselves but increase prices exorbitantly	Brian	employed individual

2022-07-11 08:50:03	Gauteng		No I do not	Nuclear	Private power production would mean an increase in electricity prices	terrence	employed individual
2022-07-11 08:24:24	KwaZulu-Natal		No I do not	Nuclear	Coal or nuclear are the only options. green energy is a con because it still requires coal to generate in one way or another. Eskom is a GOOD company and the Government needs to stop hamstringing it using their gangsters and thieves and take some of the multibillions stolen from we the people to upgrade. Any energy company coming in from the outside will NEVER be tolerated by we the people especially if Ramaphosa and his cronies and his family and their cronies are heavily invested in these options in order to make multi billions off the backs of we the people.	Wendy	employed individual
2022-07-11 07:58:04	Limpopo		No I do not	Nuclear	Nuclear * power is the best solution in these loadshedding juncture...we want long term investment into power generation,,,these quick fixes are not gonna work for our children in the future	Itumeleng	employed individual
2022-07-11 07:25:45	Gauteng		No I do not	Nuclear	At this point of time there is no real loadshedding in our country expect political propagandas influences by those who wants to SOE down. South Africa Eskom being the supplier of electricity in all its neighbors sisters like Zimbabwe, Botswana, Namibia, and Mozambique shows that we have more than enough on the grid. Either way, if renewable energy like Solar or wind are going to be pushed, Eskom should be allowed to create such projects independently. Renewable energy don't contribute much to the grid and account to less than 5% even after they have occupied large land and are costly. Nuclear will be the best, but currently there is no lack of electricity on the grid. What needs to be dealt with is the hands of dirty politicians who wants to pull SOEs down who are willing to run companies down and the economy just to drive their narrative.	Max	employed individual
2022-07-11 06:26:53	Gauteng		No I do not	Nuclear	Nuclear and Coal should be core infrastructure for energy, wind and solar are not suitable solutions but a nice to have as they cannot generate electricity at certain conditions!!!!	Isaac	employed individual

Zithulele	business owner
2022-07-14 10:56:20	Gauteng		No I do not	Nuclear	It seems to be established fact that coal and nuclear is our baseload. Is it likely that Renewables can have a similar impact based on our energy needs? SA has known of power challenges for more than a decade, the excuse of lead time in building these power stations is simply due to inept government and political expediency, exacerbated by corrupt practices at ministerial level locking SA into coal, thwarting objectively addressing the energy issue in SA. It could have been done. It would also be advisable not to choose between solutions that worked before. We should have learned a lot from the problems/challenges experienced at Medupi and Kusile coal power stations. Should the survey be coming from Department of Public Enterprises? Is DMRE not positioned best to explore solutions to SA's energy crisis. This process should be augmented by the best brains in South Africa . It is an unmitigated crisis that has lead South Africa's economy to the very precipice a junk economy	Johann	business owner
2022-07-13 08:03:06	Gauteng		No I do not	Nuclear	Pravin Gordhan must evacuate that office, he is purposely killing SOEs. Ramaphosa is a thug. Dear South Africa is a bunch of pathetic biased losers, you should be advocating for the removal of Pravin, Cyril and De Ryter, not this rubbish of pushing for IPPs and ignoring the elephant in the room! You must be disappointed with yourselves! You are all going to hell for this agenda of putting capital before the people of South Africa.	Mofelehet si Moses	business owner
2022-07-11 20:35:17	Gauteng		No I do not	Nuclear	The Eskom issues are created to ensure there is a motivation to exactly do what they are now proposing. They plan emergency procurement and sell off our state assets for a pittance to the former capitalist bosses. The Public Enterprises Minister, the President and Eskom CEO must account to citizens at to how we are in this quack mire. Why are Woman not included in the procurement as announced by President that 40% procurement must be set aside for women procurement?	Johanna	business owner
2022-07-11 18:38:15	Gauteng		No I do not	Nuclear	Load shedding is staged by the corrupt ANC government. SA does not have electricity problem. This is done intentionally in order to privatize Eskom to white owned companies and benefit Dick-head Pravin Gordhan and Big nose Cyril Ramaphosa and Motsepe.	David	business owner

2022-07-11 14:07:56	Gauteng	No I do not	Nuclear	We have a financial issue rather than a resource issue. Give ESKOM the rights/ power to recover all funds owed to them and cut those who do not pay. Then consider a model that makes business supplement residential areas. Rather fund ESKOM to get them to produce renewable energy solutions. IPP's should not even be considered	Silumko	business owner
2022-07-11 08:33:22	Western Cape	No I do not	Nuclear		Victor	business owner
2022-07-10 23:14:08	Western Cape	No I do not	Nuclear	IPP should not be allowed,Pravin Gordon has been working tirelessly to make sure that Eskom collapses to allow these IPP to come in.The same way we lost SAA,this is terrible.	Isheunesu	business owner
2022-07-10 09:53:07	Western Cape	No I do not	Nuclear	The president and Pravin are lying thieves in the pockets of corporate powers. Renewables are a scam insofar it won't meet the energy needs of industry and the materials employed to manufacture the renewables are not environmentally friendly. The true cost of renewables are not explained to the public and because we are not a truly sovereign country, decisions are not taken in our interest, but in the interest of the presidents handlers.	Reza	business owner
2022-07-10 09:33:29	KwaZulu-Natal	No I do not	Nuclear	Unfortunately, I know the electrical crisis needs to be fixed so ordinary South Africans have access to power. I do not believe that privatisation will work in the long term as it will only make prices rise and be open to external ownership...ie Wall street owning SA's power grid. Has that ever ended well? More inequality..more price gouging...	Carlos	business owner
2022-07-10 07:30:05	KwaZulu-Natal	No I do not	Nuclear	South Africa is capable. It's the government that is corrupt. Their aim is to sell the SOE"s. All that is needed is to remove ANC from power. We cannot privatize everything.	Mabu	business owner
2022-07-09 17:01:24	Free State	No I do not	Nuclear	Nuclear is cheaper and clean.	Jannie	business owner
2022-07-09 16:12:29	Gauteng	No I do not	Nuclear	Nuclear is clean energy with Russia to provide. Not the rotten western NATO war mongerers. Tired of that hegemony. The world is tired.	Omar	business owner
2022-07-09 12:01:43	Gauteng	No I do not	Nuclear	From my own point of view and research. Most countries who are supplied by the private sector are also experiencing loadshedding. I have friends in Nigeria (Abuja) where they are supplied by IPP's, i can gladly say that, they do experience power cuts here and there and most of the time the state can't HOLD these private companies accountable. All these billions of rands we kept spending for bailing out eskom, was supposed to be used to build energy infrastructure. Municipalities should work close with its communities in making sure that we build our own energy infrastructure, rather than being reliant on eskom. As a resident of tshwane, i wouldn't mind chipping in some of my pennies to make that a dream come true. NECSA should come on board in ensuring that we build sustainable infrastructure which will contribute positively to the environment.	Kgomotso	business owner
2022-07-09 05:27:28	Gauteng	No I do not	Nuclear	I believe Nuclear will solve our problems faster. Its more effective than Independent Power supply.	Lubabalo	business owner
2022-07-08 20:14:12	Gauteng	No I do not	Nuclear	We will under NO circumstances accept the handing over of our national power supply grid to foreign entities that can then: 1) Charge us exorbitant prices for energy 2) Dictate how we should use and consume energy 3) Enslave us even further to corporate control 4) Cut off our energy via the smart meters when it suits them or when we exceed the carbon allotment, they want to dictate to us, or even when we criticise or say something they don't like. STOP destroying Eskom. We know who owns the alternative "green" energy suppliers. We KNOW that you want to manipulate us with increasing loadshedding to accept these foreign entities. We know that the president and his family own large stakes in these companies including other high-profile politicians. We are sick and tired of the lies and manipulation. South-Africans know what you are up to. Just stop it. WE WILL NOT ACCEPT! WE DO NOT COMPLY!	Linita	business owner
2022-07-08 17:10:31	Gauteng	No I do not	Nuclear	South Africa needs clean baseload energy to sustain its industrialized economy. IPPs are more geared for small renewable energy plants that deliver small amounts of intermittent electricity that is not getting us out of this energy crisis, even after 10 years of empty promises from the IPPs. They are not held accountable for load shedding. Why?	Des	business owner
2022-07-08 16:26:25	KwaZulu-Natal	No I do not	Nuclear	1. Hidden agendas, certain motives and poor management renders ESKOM utility not reliable 2. IRP's are good as a back up system, expensive, not reliable nor efficient 3. Gas is expensive 4. Coal is cheap, abundance commodity in SA, though use of this fossil is discouraged, we see a high rise in demand globally, during this sanction period of Russia. 5. Nuclear, though infrastructure is expensive, it requires less maintenace, is very reliable, clean energy and is utilized globally.	Mandla	business owner
2022-07-08 15:16:50	Limpopo	No I do not	Nuclear		Sekwala	business owner

2022-07-08 13:55:30	KwaZulu-Natal		No I do not	Nuclear	Coal and nuclear are the best obtains for South Africa. IPP are nothing but useless methods of milking eskom.	Mxolisi	business owner
2022-07-08 13:55:27	KwaZulu-Natal		No I do not	Nuclear	Coal and nuclear are the best obtains for South Africa. IPP are nothing but useless methods of milking eskom.	Mxolisi	business owner
2022-07-08 13:29:39	Free State		No I do not	Nuclear	By the coal was best in this beloved country but Corruption and Malpractices including Tender System failed us decimal hence I am Supporting Nuclear	Enock	business owner
2022-07-08 13:19:05	Western Cape		No I do not	Nuclear	Solar is not dispatchable. It will not help end load-shedding. In fact, it might make it worse. Short-term: we need coal. Long-term: nuclear is the most reliable and cleanest.	Francois	business owner
2022-07-08 11:02:25	Western Cape		No I do not	Nuclear	Your selection of what to vote for is UNCLEAR - to say the least Off course I support the usage of introducing other/extra Independent Power Producers But I am NOT sure if that is what I voted for above -English is messy bests/arie	Arie van Vugt	business owner
2022-09-18 16:10:54	KwaZulu-Natal		No I do not	Nuclear	Privatise the current Eskom entity or put in a competent management team without Bee interference of political governance. This is treason with Government accountability	Wayne	business owner
2022-08-04 08:54:40	KwaZulu-Natal		No I do not	Nuclear	Let not try experience something that is not practical as all the powerful countries like America, China, and all other EU countries still rely on grid that come from Nuclear energy because there are limitations when it comes to solar, wind and other green house producer's. Let not fool ourselves to this we always have son and the wind, climax is getting worse as you can see the changes currently.	Herman	business owner
2022-08-01 08:15:05	Eastern Cape		No I do not	Nuclear		David	business owner
2022-07-18 22:34:59	Free State		No I do not	Nuclear	we do not need IPPs, we only need proper regulations and competent government officials on board along with qualified Eskom board. As for the type of power poduction, nuclear is a renewable energy which is far stable and sustainable. As to back-up my stand Koeberg is the most stable base power plant in the country despite its aging state, we just need few of them on the grid.	Sechaba	student
2022-07-10 11:13:02	Gauteng		No I do not	Nuclear	The study shows that renewable energy is expensive and unsustainable. Let us fix coal powered plants that we already invested on and consider nuclear energy.		student
2022-07-09 16:32:40	Gauteng		No I do not	Nuclear	Blackouts affect me greatly as a student because it is difficult to plan my study timetable.	Henry	student
2022-07-23 16:13:35	Gauteng		No I do not	Nuclear		Ben	
2022-07-11 10:34:15	Gauteng		No I do not	Nuclear	Nuclear for now but MAINTENANCE of the plants are very important but also think that SA cannot provide skilled people for that.	Hannie	
2022-07-10 14:09:55	KwaZulu-Natal		No I do not	Nuclear		Senzo	
2022-07-25 08:24:50	Gauteng		No I do not	Other	I feel that all possible means of power generation should be used to supplement the grid. This will encourage investments and create jobs. No person will invest in a country that cannot even supply electricity without load shedding. It is harmful to businesses. Cut the ridiculous red tape. It is only there so that corruption can continue. .	Cassidy	unemployed individual
2022-07-19 05:24:44	Western Cape		No I do not	Other	Stop the. monopoly and do what is right in the eyes of God. Stop with bee and give South Africans that is competent the job. With draw Eskom power from other countries and bring Eskom to where it is suppose to be. Our household bill is R800 for the month do you think it is fair. Then there are PEOPLE that don't PAY a sent who steal from Eskom. In Jesus Name stop what you are busy with and do the right thing.	Jenifer	unemployed individual
2022-07-11 18:41:50	North West		No I do not	Other	The entire p1 of the document is based on false information! 1. The "pandemic" has nothing to do with 30 + years of no proper maintenance, corruption etc. of ESKOM and government. 2. You're insinuating that climate change is due to humanity. This is false! 3. Wind has never been an environment friendly solution, in fact, none are. The cleanest is hydro-electricity. 4. Electricity can be generated through the ionosphere - for free! Nicola Tesla's technology has been patented a very, very long time ago. It exists - you're playing according to the global agenda, of which the only purpose is to further enslave people! 5. Big industries like mines etc. could've generated their own clean electricity a long time ago. It's not in their interest. 6. Your cadres are waiting in the wings to profit from this, like Ramaphosa's brother in law! In closing, NOTHING coming from government should or could be trusted. You've looted, pillaged and destroyed a rich and once prosperous country. Your time is up!	Lindi	unemployed individual
2022-07-11 04:34:51	Gauteng		No I do not	Other	Get rid of incompetence in Eskom and give Eskom a team of people that does the work and is NOT compensated by a devious wealthy minority that is set out to sabotage things from within. To have their own independent companies created since Eskom was set up for failure and called "incapable".	Jonelda	unemployed individual

2022-07-09 18:17:26	KwaZulu- Natal	No I do not	Other	Green Energy is a good buzzing word, yes it sounds well and perfect. Wind and Sun seem to be what everyone is talking about. Privatisation of electricity in a third-world country will mean being controlled by those who pull the strings, the rich internationals. Independent Power Producers are international companies, can an ordinary SA afford electricity from REIPPP? What would happen to coal mining communities working in the coal mining sector? Do we know that RE demissions within a shorter time than coal and nuclear power stations? RE companies do not need massive employment, so what will happen to those working in the coal industry?	JuD	unemployed individual
2022-07-09 15:31:39	Gauteng	No I do not	Other	At the moment we are stuck with what we have. Certain elements in the ANC have already gone forward with Hydro power because family members are involved. We need to stop this Cadre behaviour all together and allow new ideas and proper checks in place for different private power sources to be allowed and carefully monitored for any corruption.	Norma	unemployed individual
2022-07-09 08:40:36	Western Cape	No I do not	Other	My life y choice. We pay tax and what are they dining with taxpayers money, the way they do it at the moment look if we don't pay for it. They want to dominate our lives in all the ways possible	Naomi	unemployed individual

2022-07-08 15:47:31	Western Cape	No I do not	Other	I don't understand why now we need private help from somewhere I think this country has more than enough resources to make all the necessary means for electricity. As I was looking at what must I select for a suitable energy system I'm looking and see we have everything here namely we have coal,gas , the sun ,solar the wind. God made this country as well as other countries complete with everything that we would require and need for us to live. There is no shortage of things here, the only thing that I can say is short is the right people in their right position to do the right thing. This is just a ploy to frustrate us as citizens in thinking that we are in great danger we are not. We only have a very corrupt government who is being bullied by a certain group of people who has their own agendas, that is what is happening at the moment in our country. Let us open our eyes and fight for our liberty and our freedom as people of South Africa. We still enjoying the rain and the sun and the wind isn't it. So the earth is full of the Glory of God yes it is the earth is full of the goodness of God. We are not short of nothing at all when it comes of resources we have the abundance of them. The only thing we need and are desparately short of is the right governance. I arrest my case. Thank you.	Celiwe	unemployed individual
2022-07-24 01:35:20	Gauteng	No I do not	Other	In Helsingborg, about 50 trucks per day pay to dump their trash at the Filborna plant, which is permitted to receive up to 160,000 tons of trash per year. The trash is burned to create steam, which turns a steam turbines to produce electricity. we have TONS OF TRASH why not do this ? it will make SA cleaner in the process, it will cut costs on coal	Jean	employed individual
2022-07-12 18:29:45	Gauteng	No I do not	Other	In countries like Netherlands where they did privatize, there is more than one supplier, they never have outrageous tariffs, never without electricity, the suppliers actually bid against each other. The Minister who declared on media he will not allow it, please do your research, and speak to the countries where it works, the economy the individual, the tariffs, the service levels. Our country are in dire straits, we need private suppliers. Also privatise the different divisions in Eskom, if the division make more money than their budget, ALL STAFF must get incentives, from Management to ground level. They will never strike again, if they get paid incentive bonuses by offering a service, minimising the turn around time and also you appoint people in these divisions for your debtors who must collect all the monies outstanding from the municipalities, the government places like Deeds Offices, to name a few., suburbs, all who get the services. Once you have cash availalbe and a cash flow all substations can be serviced, Municipalities can get out of their bad debts, corruption can stop, and you create a fair deal for all, and all South Africans will work together. If you really cannot see what this do to the country, and within a year you will loose even more professional and skills to other countries. You have to override some in your government who want to stop this, they have everyday electricity, but businesses will close, I am an agent, you don;t know how many people want to immigrate after experiencing no solutiong for electricity and many areas water problems, no service levels strikes at Eskom, Deeds Office closed, SARS people strike because of salary increases. Honestly you can do this for our normal residents. Sandra Snyman 0829085579 Pay these staff incentive bonusse if they bring down your debtors accounts.	Sandra	employed individual

2022-07-12 14:06:34	Mpumalanga	No I do not	Other	This is a utmost priority! No electricity no growth, we are loosing our manufacturing capacity and competitiveness in sub-saharan Africa! No electricity no jobs. Nuclure is a defenite solution that must form park of the basket.	Johannes petrus	employed individual
2022-07-11 15:25:53	Gauteng	No I do not	Other	To burn our rubish	Ansie	employed individual
2022-07-11 08:59:10	Western Cape	No I do not	Other	Privatising power generation could very well lead to further impoverishment of the less fortunate. This happens in a capitalist society where you pay for what you need however electricity, although not a basic right, is a requirement in order to grow rural economies and unless there is legitimate oversight in favour of underprivileged communities, we will find those hardest hit become violent in their strife. This is exactly what we are trying to avoid. Melt down of this country in favour of the corrupted government by the corrupted private global organisations.	Russell	employed individual
2022-07-09 14:41:48	KwaZulu-Natal	No I do not	Other	In my opinion right now with the current affairs of eskom any private entity who is consistent and credible and can supply electricity continously without greed or corruption should be given a chance, cause the South African Citizens have suffered far to long at hands of eskom and there's no end in sight, as a result of eskom and loadshedding investors have pulled out, business are being shutdown many jobs are lost, also many are going on short time, and the government has no plans to rectify this situation it now seems like the government and eskom are holding South Africans at ransom, so yes the government should try to get private electricity suppliers on board to release some pressure off eskom and give eskom time to rebuild.	Raviesh	employed individual
2022-07-09 00:19:34	Gauteng	No I do not	Other	FIX ESKOM!!!!!!	Elsabe	employed individual
2022-07-08 12:27:58	Gauteng	No I do not	Other	I don't know what method of electricity production would suit as I don't know how it works or what is available ect. All I know is that if Private Companies can do anything, they should be allowed to do so. The Government is pathetic and cannot be relied upon.	Monique	employed individual
2022-07-08 08:28:13	Gauteng	No I do not	Other	I am not an electricity expert but electricity can not be a monopoly, we need other participants to supply electricity asap. Competition is a necessity	Riana	employed individual
2022-07-08 05:46:43	Eastern Cape	No I do not	Other	Just like the tender system it's the politicians and their families that will benefit as even now they are the ones who benefited even on the land claims etc. The people are getting poorer everyday while the fat cats manage to take everything away from them. Look at the mines now they belong to these fat cats no wonder they want to supply electricity	Sihle	employed individual

2022-07-08 11:26:32	Western Cape	No I do not	Other	Tesla energy is the way to go, the Government was given a perfectly operational energy supplier, now they want to crash Eskom and fill their pockets by handing over to private entities which will belong to their own cadre's, and then charge whatever they feel is necessary. Tesla energy is free and comes from the Earths energy and no carbon emissions from Coal, Nuclear, Fuel, etc.	Mike	retired
2022-07-08 10:58:00	Gauteng	No I do not	Other	The ANC does not know what it is doing. Call on experts regardless of race to get us out of this disaster. Put the private sector in charge. Stop looting! Fire those responsible for the mess. CUT the red tape, but ensure NO LOOTING will happen. We want companies to invest local and foreign. Do you really think companies would want to invest but then the ANC tells them you may be without power for up t 12 hours a day!	Janette	retired

2022-08-05 10:37:18	Gauteng	No I do not	Other	Whe have the sea in which the waves could be used to generate power. Look at coastal cities in Europe it has been done with immense success. Wind power, gas from munisipale refuse dumping sites, Hydrogen from Virginia in the OFS, solar voltaic power etc etc. South Africa has got the brain power to get this off the ground. Stop this BEEE and call back the brain power you got rid of. Then we will be able to get back to Pre 1994. Where there was absolutely no power failures.	Anthony	retired
2022-08-01 06:47:18	Western Cape	No I do not	Other	Cut red tape. Eskom is already unable to pay its bills due to past corruption. Stop making the citizens suffer because you allowed this Corruption. Now cut red tape and allow independent production from renewables as well as feed back into the grid by domestic homes that have already installed PV elec. DO NOT charge domestic PVec users for installing panels at their own v great expense.	Mary	retired
2022-07-13 06:18:04	Gauteng	No I do not	Other	It is not a matter of change in law, but rather a change of government. A government doing their work properly and not to their own pockets.	Hans	business owner
2022-07-12 13:18:41	Gauteng	No I do not	Other	I think the government must stop playing games with its citizens, Eskom can be fixed if willing. We cant have privatized energy source in South Africa where whites and foreigners (white) would be the main beneficiaries. whatever that can be done which is known by experts already must be to the benefits of SA citizens - by not privatizing a basic need, how would people in townships afford electricity when they can't now. And enough with created crisis (load shedding) so the minority can benefit.	Mapaseka	business owner
2022-07-12 08:12:08	Gauteng	No I do not	Other	There is a need in South Africa for a number of different types of generation. We have pumped storage which works successfully at Sterkfontein and at Steenbras dams. We have nuclear which works successfully at Koeberg. We have a proposed site for nuclear which would successfully near Port Elizabeth. We have a number of coal fired power stations which are working successfully but which are getting to the point where they need to be decommissioned. We have photo voltaic generation which is being installed by government and private sectors. We also have some wind driven generation being installed by government and private sectors. We have a lot of interference in electrical generation coming from politicians who know absolutely nothing about electricity generation (and this is our main problem in South Africa). Why did politicians get involved with the installation of Medupi and Kusile? Why were the boilers at these power stations not properly designed for the coal that is used at these power stations? Because of interference from politicians who know absolutely nothing about electricity generation. I saw a sign at a workshop once. It said that mechanics charged R200 per hour for work done, except that if you wanted to stand and watch while the work got done, the cost of labour went up to R1000 per hour. This may be too subtle for some, but the point is - if you do not have some engineering qualification, keep your opinions to yourself regarding Eskom and how to solve it's problems	Dave	business owner

2022-07-08 13:09:33	Gauteng	No I do not	Other	I do not support the scrapping of "red tape" or should I say the need to have independent watchdogs, from outside the industry and political spectrums to oversee the correct implementation of alternative power supplies purely due to the fact that without them the corruption that has been seen in all aspects of government, large private organisations, the banking sector & small business will just flow over into this aspect of South Africa life. It is endemic in Africa and will never change. Regarding the question of what method of electricity production would suit SA it has to be a combination of different types, the most logical is most likely solar & hydro. Hydro on the rivers of the Eastern Cape & KZN coast that flow eastwards. Wind must also be used and SA needs to move away from old and new badly designed and built, because of corruption, coal powered power stations. Nothing will help unless BBEEE is scrapped and intelligent well educated experienced people are attracted back to SA and that will never happen	Charles	business owner
2022-07-08 11:27:21	KwaZulu-Natal	No I do not	Other	Fix eskom and their shit	Dr. Alex	business owner
2022-07-08 10:58:46	Eastern Cape	No I do not	Other	Natural energy source like water wheel, wind, solar systems to power us. Eskom has been good to me for over forty years and may Eskom continue the good service.	Abdon Errol Johnson	business owner
2022-08-09 10:50:43	Gauteng	No I do not	Other	If we want power to add to the grid why must we choose the source of energy because it has to be all that is available or all of the above without limitations. Eskom is more than capable to produce power the problem is the Minister of Public Enterprises and his sinister motives together with incapable leaders at the power utility.	Fezile	student
2022-07-22 10:53:09	Gauteng	No I do not	Coal	The government needs to take responsibility, and root out the corruption they have allowed to fester. Clean up your house!!!!!!!!!!!!	Gary	unemployed individual
2022-07-21 12:14:41	Gauteng	No I do not	Coal	The government is pulling a blind one on us because they want to push through renewable energy because they will make more money off of it and screw us even more. I know people don't see it, but that is the plan of the New World Order - Renewable Energy and a Green environment. We cannot allow this to happen. They are pretending that there are issues with coal when in fact they are trying very hard to make us believe we will not survive without renewable energy and IPP's.	claire	unemployed individual
2022-07-20 14:02:21	Gauteng	No I do not	Coal	Many jobs will be lost if we privatize this, and some of know that Ramaphosa deliberately sabotage Eskom so that we can we can be enough of loadshedding for him and his brother in law to sell Eskom like they did with SAA, they have shares with that private supply company, we're not fools, this will collapse the economy even worse ANC must fall, Ramaphosa is an evil man	Tsholofelo	unemployed individual
2022-07-18 09:44:48	Limpopo	No I do not	Coal	Any other energy should be provided by eskom... Eskom should establish on its on a divison for green energy and all other kinds of energy not IPP	Aluwani	unemployed individual

2022-07-09 11:17:18	Mpumalanga		No I do not	Coal	IPP are not the solution. Living in Mpumalanga my whole life, I know how power stations and coal mines have created employment for millions of South Africans and help boost a lot of businesses ie transportation of coal. South Africa needs to have a state owned power utility! Eskom has enough capacity to supply the whole of South Africa with electricity. The problem here is a political one of greed and unethical so called leadership. Open your eyes South Africans! Our neighbouring countries, which South Africa provides electricity to don't have load shedding, yet we do! How is that even possible? The answer is mismanagement of this SOE for privatisation. There is absolutely nothing wrong with Eskom! It's being sabotaged to privatise it! This is a big problem! Private companies are only interested in profit. Can you imagine how expensive the private sector will sell electricity for? They can price it anyway they want without any benchmarking or other power utilities to compare the rates with.		unemployed individual
2022-07-09 08:46:34	Gauteng		No I do not	Coal	Experts have always said that we have excess energy, Eskom must be properly managed in order to end loadshedding. the president must fire the current CEO and appoint a suitable candidate, this must be a Senior Engineer who has more than 10 years experience at Eskom.	Buti	unemployed individual
2022-07-08 21:08:16	Free State		No I do not	Coal	Europe and related countries are reverting to coal, but are pushing others (underdeveloped and exploited) countries to use renewables. Underdeveloped countries have been economically hollowed out and exploited for years. Corruption and mismanagement by so-called liberation heroes further destroyed the growth potentials of these countries. After that, the destruction was exacerbated by the lockdowns from which recovery is still an illusion at this stage. Past loan obligations from China, IMF, ADB and WB are also making it impossible to recover economically, especially for African countries. Rising oil prices, the western (NATO, EU and partners) fuelled war between Russia and Ukraine together with abovementioned factors have driven majority of people further into poverty. The reliability of renewables is not a fullproof option either. And because private business is profit and shareholder value driven, and has no obligation towards poor and struggling consumers, we can't claim that their loyalty lies with the struggling people across the globe. So no, the argument doesn't fully address the longterm solution that is needed to revive the economies of struggling countries and leviate the burden of the majority of citizens battling day-to-day financial challenges.	Brian	unemployed individual

2022-08-11 20:10:14	North West		No I do not	Coal	It is not in the best interest of south africa to contract independent power suppliers. Coal electricity is readily available it is also effective, reliable and sustainable energy. Eskom powerstation has unlimited coal supply from coal plus mines and other south african mine, Coal is a domestic raw material. It is my argument that eskom only collapsed because power stations were not maintained for over the years it is that part that needs to be tackled and more stations to be built. I also submit that other energy methods are not sustainable and reliable a case study can be made with reference to the UK and USA, until today the UK rely on coal and they actually import and hoard it from South Africa. Electricity is holding our economy, people's lives at health facilities also depends on it, therefore we should stick to coal for the benefit of south africa by not contracting independent energy suppliers more especially if the have the autonomy of their institutions they won't be able to account to anyone because they would be business entities that are driven by profit it will also jeopardise access to electricity to the poor.	itumeleng	unemployed individual
2022-07-22 00:05:09	KwaZulu- Natal		No I do not	Coal	We have enough coal mines to power eskom electricity without any load shedding we have done it before this current loadshedding and we can do it again if we sell Eskom to private sector we will be undermining the basic human rights of all south africans to have easily accessible and cheap electricity because the private sector is only interested in profits nothing else,as we speak we are selling a large quantity of coal to America whilst we are in the middle of this problem of electricity and we are selling electricity to 7 SADC countries yet we have daily load shedding stopselling electricity to foreign countries then we will have more than enough electricity to power our nation	smanga ndumi	employed individual
2022-07-21 09:59:44	Western Cape		No I do not	Coal	The red tape needs to be kept in place to prevent this unscrupulous ANC government from running Eskom into the ground and selling it for a pittance like they did SAA. This New World Order, Climate Change, Covid-19, Build Back Better, Smart City rubbish needs to be STOPPED IMMEDIATELY!	Didier	employed individual
2022-07-20 20:38:34	KwaZulu- Natal		No I do not	Coal	We have alot of coal in our land that can provide us with low stable electricity for generations to come. Privatization is not a solution as its priority is interest driven while many of our people do not have jobs. PLEASE DO NOT PRIVATIZE ESKOM.	Sabelo	employed individual
2022-07-20 14:54:45	Gauteng		No I do not	Coal	Emergency is allow feeding from those with solar. Why to scrap it now? How will it be regulated and proper reporting and transparency. I dont want Eskom replaced with same thing except private uncontrollable sector this time. Unclear summary on pricing and how it will be sold to municipalities and then consumers? Those companies and people with solar, why can they not feed the grid excess generation? This should also be covered then.	Vaughan	employed individual

2022-07-19 08:14:14	Gauteng		No I do not	Coal	Ramaphosa and Pravin must stop being greedy Eskom was functioning well under Zuma and Guptas why change it if not broken why fixit actually we know their plan is the same independent power producers	Zukisile	employed individual
2022-07-17 16:12:36	Free State		No I do not	Coal	This will provide more jobs for the people. And the services will be cheaper for the south african.	Lemomba Ephraim	employed individual
2022-07-16 17:58:25	Gauteng		No I do not	Coal	Problems with power production are not because of coal or the fact that only Eskom is allowed to supply electricity. Loadshedding is a result of gross mismanagement of resources and corruption. If the government leaders in the energy sector would be held accountable, we will have more than enough electricity. Other sources of electricity are either expensive or are not as green as they are portrayed to be e.g solar power, which is both expensive to buy, maintain and also not environmentally friendly. Solar panels cant be disposed (it becomes a big solid waste), the minerals in them are highly toxic when disposed and most of them have half lives of up 100 years. Again solar power uses black panels, that will create a very hot micro climate which will affect peoples health and the same "environment" we are trying to save. So coal is our best shot, as long as we remove corruption from the pipeline. We have enough supplies of coal in the country, and the burning of coal has less emmissions of CO2 compared to other industries, this has been scientifically proven!	Patience	employed individual

2022-07-09 14:25:28	Gauteng		No I do not	Coal	<p>Easy, IPPs are "private" and I do not care what people say as private companies have always and will always have a core single objective and that is to make a profit. Practices around how that profit is made may deter the progress of the potential progress of our working class, poor class and middle classes. Secondly, the original grid was designed for 5 million people and of course strain on the system would not occur with such a number. So what I can see is that Eskom a capacity problem which needs to be resolved by the state. I can live with SAA being private as most of the population cannot afford to fly anyway. But to want to allow private players into a state CORE asset, that's unacceptable! Eskom must solve its capacity problem over the next 5 years and stop placing a band aid on every injury as sometimes corrective surgery is needed.</p> <p>Also, this country cannot go on the whims of the first world. The first world had its industrial age using the likes of coal and oil to develop. We need high levels of MW/h produced to be able to develop and grow the country as with so much land at our disposal we only need access to cheap energy which I can tell you the private sector will NOT do, in order to have all the ailments of our country potentially corrected. In this regard, coal is the only option which can create electricity at a reliable level as we can control the factors of input and hence dictate our output. Keep the current method and just increase the facility's capacity and let's have the privatization agenda which I see as ridiculous really, end!</p> <p>Adding on, how many hours a day can we use coal? If you guessed 24 hours, well you are indeed correct. Now... How many hours do we have access to sunlight and wind respectively? The former at least we know we'll have more often than not, but what about the latter? It's impractical. This wokeness of "green" talk is annoying as if the production of batteries isn't a highly gas emitting process. The only thing ideal for this country besides coal is Nuclear, but with terrorist groups having such easy access to our country coal is clearly the better choice of the two as due to terrible state security we cannot trust any of our "protector" institutions to protect Nuclear plants at all costs.</p>	Siyabonga	employed individual
2022-07-09 08:47:45	Gauteng		No I do not	Coal	Solar and wind are definitely not a way to go for now as they're unstable and unreliable. You cant run industries on them. And this narrative that Eskom is monopolizing production does hold. It is deliberately run down to force these IPPs down our throat. If the IPPs want to distribute let them do so on their infrastructure	Sen	employed individual

2022-07-09 07:21:16	Mpumalanga	No I do not	Coal	South Africa has coal as a natural resource. Coal is relatively cheaper for this country and the most reliable method for power production. As a country we need to get people like Brian Molefe , experienced and had dealt with this problem before and conquered .	Eddy	employed individual
2022-07-09 03:41:31	North West	No I do not	Coal	This crisis was created purposely and this will result in more cost to the consumers. Base load must come from coal. Why did we construct new power stations?	Thokozani	employed individual
2022-07-09 00:23:41	Eastern Cape	No I do not	Coal	We have enough Coal in this land... We can Mix energy usage... President, Pravin & their Tjotsies think we are stupid.. We are watching them.. Just follow the Money and you'll understand... Amandla!	Edwill	employed individual

2022-07-08 16:55:54	Gauteng	No I do not	Coal	We have coal to last this country for more than 40 years. Also be invested billions of rand to build the new power stations such as Medupi and Kusile and also created jobs in the process. Green energy is not sustainable as we have seen from some of the European countries such as Germany, that are going back to fossil fuel. Besides only a few people, from Europe, will benefit from IPP and this will make energy very expensive for the poor. IPP will also enable government to sell off bits and pieces of Eskom and shrugged its responsibility of supplying electricity to the poor and to subsidise the struggling middle class. Only crooked politicians and their handlers will benefit from IPP>	zingisa	employed individual
2022-07-08 16:10:02	KwaZulu-Natal	No I do not	Coal	These is a resource that we have & all the first world countries have used to drive their economies. We're where we are globally because of the first world countries CO2 emissions now that they're in a good position to use renewable energy they want to force it on us. Let's the other power suppliers follow the same policies as other services providers & if the government wants to scrap the red tape it must start with scrapping all other SCM policies that prohibits quick payment to small medium enterprises	PHILANI	employed individual
2022-07-08 11:09:51	Limpopo	No I do not	Coal	The European countries like UK and Germany have restarted their coal powwred energy generation plants recently and are still consuming 90% fossil and nuclear energy. Why should South Africa be dictated to by such hypocrites to close down coal energy? We have massive coal deposits. Coal mines and fossils powered energy industries like Eskom, Sasol and other refineries, the plastics industries and fertilizer utilize coal to varying extents employing more than 50% SA labour force. A percentage that increases with households benefits down stream. IPPs benefit those involved in their state capture machinery. Eskom is bleeding billions to IPPs, who are selling kwh at inflated price than Eskom sells to consumers. IPPs are a parasite movement hellbend to destroying SA economy and usher in an elitist state. We stand with India and China who still stick to their coal energy like coal grows on trees. Otherwise, we have plenty uranium for nuclear power. Our president Ramaphosa needs to be arrested for sabotaging SA economy. Him, Motsepe and Radebe are traitors selling our country to highest bidders.	Matsholela	employed individual

2022-07-15 16:25:30	KwaZulu-Natal		No I do not	Coal	There are too many unknowns at this stage. Firstly, who exactly is going to be given contracts? From what I can see so far the companies wiring in the wings are all related to elected officials. Another opportunity for state capture. I do not believe the climate change agenda. The population are confusing climate change with pollution which we can control. Personally I believe the climate/weather is being manunipulated by Geo engineering. The options available if energy from coal is scrapped all have serious disadvantages, more than using good quality coal. Neuclear waste is a huge problem as are wind turbine blades which can't be recycled. Solar, apart from being prohibitively expensive for the average South African, is also a recycling nightmare. All alternative power supplies rely on batteries, another recycling problem. South African is still exporting all our top quality coal. How come other countries are allowed to use it if we're not? China using vast quantities and now Europe is switching back to coal because of the Russian/ukaraine war. Government is just following the dictates of other countries because of the monetary incentives. What exactly has the senile president of USA, got to do with dictating how we produce power or any other member of the G7 for that matter. I am past believing anything our government tells us. No change is made for our benefit, just for the benefit of select individuals.	Mary	retired

2022-07-26 08:26:56	KwaZulu-Natal		No I do not	Coal	There are country that try other ways but going back to coal still the cheapest way for us	Roelf	retired

				<p>Greetings Rob</p> <p>Your email below is perhaps the most important one of the year! And several of us would like to join you in responding to the matter you outline in your call for comments.</p> <p>Let me explain: We are a group all of whom are allied in some respect to the energy scene in South Africa, with particular but not exclusive leanings towards coal. The organisation was initially the Fossil Fuel Foundation and this was re-named the FFF Carbon Foundation recently. The name change was designed to reflect the support for coal beyond that of an energy source (and a clean one at that) and to promote its additional benefit as one of the most valuable sources of carbon and chemicals known to man.</p> <p>Our answer to your posed question – should legislation be drawn up to cancel the IRP and allow IPPs to develop widely to provide energy to this country – is NO! The IRP presents a balanced portfolio of energy mix which should be maintained at all costs, possibly with greater emphasis on coal in the longer run for reasons outlined below.</p> <p>REASONS FOR CURRENT ESKOM PROBLEMS</p> <p>It is just so unfortunate that Eskom is going through such bad times at present – this cannot and must not be related to coal itself being blamed for current problems. The problems in Eskom relate to a history of mismanagement and poor judgement, to say nothing of corruption. The truth of the matter is the following:</p> <p>(i) All top and experienced engineers were disbanded and left Eskom at the behest of a former Chairman of the Board in the early 1990s leaving Eskom with NO experienced engineers in place and this remains the case today.</p> <p>(ii) This debacle was followed by the instruction of specific series of top CEOs to reduce plant maintenance and cancel plant replacements in the power stations (for cost reasons); and</p> <p>(iii) the final “cherry on the top” came with the instruction to reduce reliable and long-term coal contracts (for political reasons). Some power stations are now down to 2 days coal supply at any one time rather than the 20 or 40 days’ worth of strategic stockpiles, as has historically been the case. Acquiring coal in sufficient quantity currently is proving difficult and complex, not helped by the war in the Ukraine and the need for countries in Europe and elsewhere urgently buying up coal stocks including those from this country. All of this has resulted in the dire straits we are in today – AND none of this is the fault of coal per se!</p> <p>WHY RELIABILITY OF ENERGY SOURCE IS CRITICAL</p> <p>The key issue is - reliable energy is of paramount importance to this and every other industrialised country.</p> <p>South Africa’s only source of such reliable back-up energy, in fact, is coal (excluding Eskom issues). Nuclear is currently relatively minimal.</p> <p>Countries who have closed their coal-fired-power stations in favour of massive new renewable forms of power generation are now, for many reasons, re-opening their power stations. Renewable energy has failed in many countries and led to massive blackouts, not least of which was that encountered in Australia earlier this month where 8 million Australians were asked to cut their lights due to an extended energy crisis when renewables failed. Germany has suffered similarly, as has California and elsewhere. The costs of power in such renewable energy dominated countries have risen inexorably because, for every kilowatt of renewable energy, an equal kilowatt of reliable energy now has had to be built as back-up power. Many new coal-fired power stations are being built in China, India and elsewhere in the Far East for just that very reason.</p> <p>For these reasons the IRP must stand, IRP renewable plants can be installed to the extent indicated in the IRP and coal must be part of the energy mix (and possibly even higher in proportion) to act as back-up source of power.</p> <p>CAN COAL BE USED “CLEANLY”?</p> <p>To respond to environmental concerns about coal, Indeed it can! Technologies are now in use worldwide that utilise coal to very high efficiencies and these have the ability to capture all emissions of concern, either in-bed or post-combustion.</p> <p>Some modern technologies are now turning such emissions into marketable products which are utilised commercially, thereby resulting in the emitting of 99% clean flue gases (air). SOx is converted to sulphuric acid (South Africa imports most of its sulphuric acid), NOx is used to produce fertilisers for agriculture, CO2 may be stored or used as the source for carbon in the manufacture of a number of high value carbon products, and fly ash is used in road and building materials, cement and as a source REEs.</p> <p>THE DOUBLE VALUE OF COAL</p> <p>Apart from the ability to provide safe, storable, sound, secure and reliable energy - a factor which renewable energy sources cannot provide to the same degree – coal is the source for many products, of which few people are aware.</p>

2022-07-13 02:45:23	Western Cape		No I do not	Coal	Breaking down what we already have is not progress.	Luyanda	business owner
2022-07-12 13:00:53	Gauteng		No I do not	Coal	Solar and wind power supply is erratic. Solar and wind are far more polluting longterm than anyone cares to admit. The percentage of renewables is pittyful and on a large scale a money sink of epic proportions. Nuclear is a possible timebomb under the wrong management. The governments treatment of ESCOM doesn't inspire trust in good mangement. Fix and update the existing power stations and don't let people like Motsepe near it. Let the management of ESCOM decide where it is prudent to put new power stations without political interference and force them to commitments on performance. Let them decide where to buy coal without BEE interference and red tape. All the polititians are trying to do is to privatise the power supply in hands of their choosing to profit their private and political interests. SOUTH AFRICA had one of the CHEAPEST POWER GENERATION capabilities in the world. Our power stations were deliberately neglected with investments deliberately wasted to be able to introduce private investors. To run coal power units with scrubbers is cheaper than to change over to "renewables" that pollute just as much - but in differnt ways . Make POWER MANAGEMENT TRANSPARENT to reduce price and BEAR THE PAIN of rebuilding (and charge polititians responsible for the dilema for negligence and fraud). STOP THE ROT.	Helmut	business owner
2022-07-12 12:18:34	Gauteng		No I do not	Coal	Under no circumstances should the power generation be handed to independent companies . The power grid belongs to the people of South Africa and the governing body has a responsibility to it's electorate to ensure that the people owned power grid is productive, charges fairly, does not over employ staff, nor succumb to threats from it's workers over lavish salary and benefit demands. The people of South Africa must never be subjected to cadre and connected political individuals stealing the peoples property, ESKOM, and being held to ransom by gangster run private, independent power generation companies.	Dan	business owner
2022-07-12 09:46:33	Gauteng		No I do not	Coal	1) Scrap all Alternate / Independent Power Producers and other Sources Of Power 2) Deploy the ARMY at the Delivery Points of the COAL at the Power Stations. 3) Change and TRAIN New Staff at the receiving Points to check the coal. 4) CALL BACK the Engineers and original honest staff to ESKOM. 5) CALL ME to assist with Leadership (0834414161) Follow the example of USA, Germany and China. They Using COAL. What nonsense is this GOVERNMENT breeding about other sources. Call me to discuss further (0834414161)	Stash	business owner
2022-07-12 08:30:21	Western Cape		No I do not	Coal	Eskom is being sabotaged by those who want To benefit from IPPs, eskom can generate enough electricity if managed well without the interference of corrupt politicians like Pravin . Pravin should resign immediately, he is old. He must retire	Asanda	business owner
2022-07-11 19:45:41	Eastern Cape		No I do not	Coal	Time has come to firstly privatise power supply in SA and secondly allow alternative solution s to getting a reliable supply of energy. Government is not capable alone and was elected to serve the people and not their own agendas	Bernhard	business owner
2022-07-11 12:53:39	Eastern Cape		No I do not	Coal	Coal is the best source of energy and it creates sustainable jobs.	Sibusiso	business owner
2022-07-11 08:30:33	Gauteng		No I do not	Coal	I do not support privatization of Eskom in anyway, the lies perpetrated by the Zondo commission and sabotage of generation by grey beards at eskom should stop! 2017/2018 load shedding was stopped without burning excessive diesel and Eskom still made profit, workers were happy but some companies like Glencor were not because they wanted to monopolize coal supplies at unreasonable prices! The current leadership of eskom should go down with the president , only then eskom will reach its full potential.	Siphiwo	business owner
2022-07-10 23:21:05	Gauteng		No I do not	Coal	South Africa has enough coal to generate electricity at a very affordable rate. The government should stop creating a crisis through Eskom for the sole purpose of getting a third party company to provide us with electricity. The only reason the government will push for such an agenda is because the leaders involved will benefit financially from this deal. If we have coal to supply neighboring countries and China then we have enough coal to generate electricity. The bollocks of Eskom workers striking this being the reason of the recent loadshedding should stop now. STOP LYING TO YOUR PEOPLE !!'	Sumaya	business owner
2022-07-10 21:51:49	Gauteng		No I do not	Coal	These is no electricity crisis in South Africa. These people just want to buy eskom like they did with other state enterprises.	Mulalo	business owner
2022-07-10 21:34:59	Gauteng		No I do not	Coal	Fix the poorly maintained power plants in Eskom and stop the politics that's crippling our country. We have adequate coal resources in the country, just use what we have. Our carbon footprint is way to small to prioritise green energy right now.	Mpume	business owner
2022-07-10 16:11:55	Gauteng		No I do not	Coal	Another scam from a bunch of thugs, why has the Konami plant being turned off? I can't be fooled twice.	Makgutle	business owner
2022-07-10 15:30:42	Gauteng		No I do not	Coal	The only reliable baseload in South Africa is coal and nuclear that will be able to sustain and grow the economy	Mthokozis i	business owner

2022-07-10 13:18:30	Gauteng		No I do not	Coal	Coal has being running for years, it has job creation and is available locally.	John	business owner
2022-07-10 11:45:48	Gauteng		No I do not	Coal	We have 400 plus years of coal and vital for our development as a country with expertise on running stable energy which supply the SADC region. If there is need for IPP let them do it independently with no subsidy whatsoever to the State and Eskom. We need to send students for training and can revisit this in 10 years. We need to recovery from pandemic as a country and coal has proven beyond reasonable doubt it can give us sustainable energy.	Sizwe	business owner
2022-07-10 07:18:06	KwaZulu-Natal		No I do not	Coal		Nkosinathi	business owner
2022-07-10 05:58:46	Gauteng		No I do not	Coal	This whole Eskom thing is a lie. At the G7 meeting Ramaphosa signed agreement that SA will go green that is why there is problems with Eskom and now Ramaphosa and his friends will make money out of us. Can't you people see that Ramaphosa is killing this country	Gerrit	business owner
2022-07-09 18:30:39	Gauteng		No I do not	Coal	Just stop the high diesel bill and fix maintenance issues and get new coal supplies and give us cheap electricity and stable baseload. Simple!	Sifiso	business owner
2022-07-08 18:19:33	Mpumalanga		No I do not	Coal	Even overseas are moving back to coal I see the IPP are just away of looting the state money	Bongi	business owner
2022-07-08 18:19:29	Mpumalanga		No I do not	Coal	Even overseas are moving back to coal I see the IPP are just away of looting the state money	Bongi	business owner
2022-07-08 18:02:50	Gauteng		No I do not	Coal		Gilbert	business owner

2022-07-08 12:48:05	Western Cape		No I do not	Coal		Pieter	business owner
2022-10-01 11:07:34	Gauteng		No I do not	Coal	Coal is cheap and our natural resource. Europe is struggling now with gas and have increased imports of our coal while pushing South Africa to stop coal production! That is ironic. The evergreen contracts at Eskom must be reviewed. Fact is that there was no load shedding in 2015 and 2016 while Eskom made profit. That is documented. We must refrain from associating Zuma's presidency with Eskom problems because he is only persecuted for touching price inflating evergreen contracts. Unfortunately the bias affects us all.	Siphiwo	business owner
2022-08-02 08:38:52	Gauteng		No I do not	Coal	This is draconic - we never had any of this type of interference necessary before the ANC took control	Pierre	business owner
2022-07-16 08:31:19	Gauteng		No I do not	Coal		Karabo	student
2022-07-12 19:41:33	KwaZulu-Natal		No I do not	Coal	The Load Shedding problem came back when ANC failed to elect a Patriotic Leader at the 2017 Elective Conference. The current President must step down and Eskom CEO and the entire board replaced	Mondli	student
2022-07-11 08:25:26	KwaZulu-Natal		No I do not	Coal	South Africa should focus on building long-term infrastructure and accumulating capital. This will facilitate the use of cleaner power in future. For now, coal should be utilised as it is quick and cheap to produce power with. Expecting people to care about the environment when they are either poor or unemployed is hypocritical to say the least.	Pia	student
2022-07-11 08:19:01	Gauteng		No I do not	Coal	Coal is the best, there's a lot of mismanagement at Eskom due to the board and executive directors lacking knowledge and skills to manage Eskom. Load shedding is a political driven issue to sell Eskom which is wrong. Renewable energy is not sustainable Germany is a great example of that	Tshepang	student
2022-07-08 11:41:05	Gauteng		No I do not	Coal	We have invested so much in Medupi as it stands, why throw that all away for project that hasn't been implemented on a grand scale globally? We also stand the risk of losing jobs in the coal mining industry. Terrible idea.	Ntombi	student
2022-07-08 11:41:02	Gauteng		No I do not	Coal	We have invested so much in Medupi as it stands, why throw that all away for project that hasn't been implemented on a grand scale globally? We also stand the risk of losing jobs in the coal mining industry. Terrible idea.	Ntombi	student
2022-07-08 09:13:16	Gauteng		No I do not	Coal	South African Government should make use of the abundant natural resources which the country has for production of electricity i.e, Coal, hydro and nuclear. Eskom should be allowed a space to build the nuclear power stations and hydro power station in addition to the coal power stations.	Tshepo	Non-profit
2022-07-08 09:11:30	Gauteng		No I do not	Coal	South African Government should make use of the abundant natural resources which the country has for production of electricity i.e, Coal, hydro and nuclear. Eskom should be allowed a space to build the nuclear power stations and hydro power station in addition to the coal power stations.	Tshepo	Non-profit
2022-07-10 22:25:21	Western Cape		No I do not	Coal	The electricity generation capability, was and is destroyed deliberately. As to get independent private companies to enrich themselves, by handing over electricity generation. Who are the people, to whom the rights to generate electricity, will be allocated to. Suppose Matrise Motsepe, brother in law of Ramaphosa, would be the one to gain the most from such a decision. At what cost will we buy electricity then? Green energy is very high in maintenance and we the users will pay the bill.	Floris	
2022-07-10 00:13:35	Gauteng		No I do not	Coal		Lindiwe	
2022-07-07 20:00:06	KwaZulu-Natal		No I do not	Coal	Eskom needs to be fixed up. This was all deliberate to collapse Eskom! Get rid of the corruption and take back our country. Solar and wind are not suitable alternatives. Ask yourself why we export coal to China.	Julie	
2022-07-07 19:32:24	Eastern Cape		No I do not	Coal	Stop the criminal activity in Eskom. Prevent the gangsters coming in with their GREEN energy. It actually costs more. And anyway anything they touch turns to manure	Rose	

2022-07-17 10:24:03	KwaZulu-Natal	No I do not	Solar	The sun is free and natural and I don't see why these people must be told everything, all they know is to steal from us depriving us of our basic human rights because no one is more undermined than native African people. Instead of looking out for us they only look out for their own pockets and the poor gets poorer every day in Mzansi.	Nomgido	unemployed individual
2022-07-17 10:24:01	KwaZulu-Natal	No I do not	Solar	The sun is free and natural and I don't see why these people must be told everything, all they know is to steal from us depriving us of our basic human rights because no one is more undermined than native African people. Instead of looking out for us they only look out for their own pockets and the poor gets poorer every day in Mzansi.	Nomgido	unemployed individual
2022-07-16 11:26:50	Gauteng	No I do not	Solar	Why will they do it now!!!! For 23 years they did nothing to help Eskom's performance. To make mr R and his family richer!!!! WAKE UP SOUTH AFRICA!!!!!!	L	unemployed individual
2022-07-11 19:47:38	Gauteng	No I do not	Solar	Independent Power Producers should not be allowed to immediately supply South Africa with electricity. The private sector will never have the interest of people at Hart, except profit accumulation.	manabeng	unemployed individual
2022-07-11 15:50:06	Gauteng	No I do not	Solar	I feel that this Government has squandered the money from citizens for their greedy selves, Tgey should be sacked all of tgem tgere is too many cooks in the kitchen! What I'm saying is this Black Government us full of corruption! They should he held for the crime in their own country not giving neighbouring countries our resources so SA suffer badly! It's nonsense! I've been living here since 1983 until 1994 when ANC came into power & all the wheels fell off! Take a look at Africa on a whole!!! It's sad & look who is running each country! Not hard one here!!!	Cheryl	unemployed individual

2022-07-11 11:57:45	Gauteng	No I do not	Solar	I think the solar system can help because the sun is always there together with wind or hydro	Pontsho	unemployed individual
2022-07-11 11:57:45	Gauteng	No I do not	Solar	I think the solar system can help because the sun is always there together with wind or hydro	Pontsho	unemployed individual
2022-07-10 16:23:12	Gauteng	No I do not	Solar	These greedy And corrupt Anc politicians created the electricity problem so that their families and inlaws, etc can be given those billion rand deals. Criminals!!!	Jabu	unemployed individual
2022-07-10 09:26:10	North West	No I do not	Solar	We knew from the start the collapsed state enterprise was done deliberately by our leaders. We can see now that their intentions are clear to privatize the state enterprise. Let them step aside and let south african capable leaders to over. I do not agree with that because they want to enrich the minority. Do your research and let us know who are the independent powers suppliers	Tumelo	unemployed individual
2022-07-10 08:55:27	Gauteng	No I do not	Solar	Eskom is capable of doing things on its own,the problem is greedy people who are in control of this they need to be taken out and replaced with competent thinkers who are not in thos to fill their pockets.The government brought this problem on its own and wants to make it worse by having a solution that will keep the greed going.	Ayshia	unemployed individual
2022-07-10 08:39:09	KwaZulu-Natal	No I do not	Solar	The method to be adopted is like that of the Americans. Government should allow the private person to power his own property and not depend on the grid. Further by opening the supply up to Ramaphosa and gordans plan will only allow for further corruption. It would be in the countries best interest to stop supplying other countries which will allow for a better supply to our countries needs. Why should the south african people pay the price for our leaders greed? Our government should be putting our people first and neighbouring countries second. We are not getting special consideration and rates on commodities from other countries that south african power is supplied to we pay the same as every other buyer for cobalt, copper, diamonds goldand other stuff. So why are we supplying other countries with electricity from an already stressed grid when there is not gain to the people? It's only government officials and officials who make the money. When a south african is unable to pay his bill, he is cut off Can Zimbabwe pay its bill with money of less value that toilet paper?	Desmond Christopher	unemployed individual
2022-07-10 07:30:00	Western Cape	No I do not	Solar	We as a nation need to start producing and developing our own production line in renewable energy power and government must be flexible enough with those that in position to contrabution. Yes stop all newclear power and sell all our cole mines to USA as Biden needs it and rebuild our country with all the different renewable products energies.	Abdul	unemployed individual
2022-07-09 18:59:24	Gauteng	No I do not	Solar	We need power producers that can made it affordable to everyone. Not expensive power	Velly	unemployed individual
2022-07-09 15:17:54	Gauteng	No I do not	Solar	Get rid of all the incompetence at Eskom Don't insult our very well educated engineerrs n specialists. Stop accepting funding from private corporations, who don't have our best interests at heart. All they seek is control	Hamleta	unemployed individual

2022-07-28 13:01:12	Gauteng		No I do not	Solar	I DO NOT support privatisation, because I am concerned about how it will ultimately affect ordinary citizens in our country. I have recently watched this video, entitled: "An Economic Hitman Confesses..." Here is the link: https://www.youtube.com/watch?v=btF6nKHo2i0 I do not know whether this is enough to go by, but I believe that this is something that SHOULD be considered, prior to making final decisions regarding Eskom. We often hear of huge trucks of coal being transported to our neighbouring countries; and about such neighbouring countries not struggling with loadshedding. How is this possible and don't we have enough coal if we are able to share with neighbouring countries??? In South Africa, we were blessed with sunshine for a large part of the year. Perhaps, apart from coal, we should consider solar electricity??? I DO NOT support the scrapping of policy red tape for Independent Power Suppliers and / or the privatisation of Eskom. I DO NOT support it, because there are better alternatives - as mentioned. Thank you. Yours in Empathy, Andeline.	Andeline	unemployed individual
2022-07-26 03:21:36	Gauteng		No I do not	Solar		Shamila	unemployed individual
2022-07-25 09:31:19	Western Cape		No I do not	Solar	Renewables must be made economically available through tax breaks on imported goods. Eskom should focus on smart grid connections and two way transmission. The proposal by Eskom to "fine" anyone nearly R1000 a month for generating capacity is absurd.	Laurence	employed individual
2022-07-20 14:38:33	Mpumal anga		No I do not	Solar	I believe that the load shedding issue has not been handled constructively but as a solution to introduce the IPPs.Why would the government keep quiet in summer and not deal with the problems that are affecting the Power utility by sending delegates to the most affected power stations to prepare for the winter season and give daily updates to Parliament, these problems would have been flagged and attended to before any delays. IPPs will only benefit the few individuals who are rich and this will result in Eskom being neglected and later on affect mining industries.	Andrew	employed individual

2022-07-11 08:44:05	Mpumal anga		No I do not	Solar	There so mush sun and wind to great electricity, on the other hand did Eskom have the proper man power to install and maintain it. Wind power is the another option. I saw in Germany and Holland lots of these wind power generators.	Nico	retired
2022-07-11 08:34:22	Northern Cape		No I do not	Solar	Plenty of free sun in the country	Eve	retired
2022-07-11 08:26:39	Western Cape		No I do not	Solar	Tap into the sun, buy from everyone who has excess solar electricity like they do overseas. This is a short-term solution to boost local supply. Put immediate maintenance systems in place. Get rid of ILLEGAL connections, go on a campaign to stop this blatant theft. Most importantly, get rid of dead wood. Re employ staff who are qualified and competent. Get Ted Blom to Consult and manage the turn around.	David	retired
2022-07-11 07:48:52	Western Cape		No I do not	Solar	Apart by getting the scumbags that stole us blind at ex Kom to pay back our money. Industry and home owners with exses power should be able to sell back to e-commerce.	Victor	retired
2022-07-10 16:26:35	Eastern Cape		No I do not	Solar	With the exception of wind which causes environmental damage, noise pollution and ugliness in the landscape, all forms should be used: coal, solar, hydro and nuclear .	MIRA	retired

2022-07-10 11:57:42	Western Cape		No I do not	Solar	Solar could be the way forward! But not every one can afford the installation of it. Surely government can get everything on big scale a bit cheaper so that households can buy it..at a reasonable price so as for the installation. And no extra fees to municipalities after installation..unless a person wish to keep the Eskom connection..Dont constantly involve major companies..Give small taxed registered companies a chance If any other person have a better idea let him or her put it on the table. To prevent the further use of all our recourses,like coal,trees ,water. The sun is our option.. If nothing is going to work properly we must go back to basics.. Give only so much electricity to businesses and households. Exception...for hospitals and emergency services.. Households,businesses must get generators,gas and some non electrical implements. This will certainly cause more jobs and people can learn more what to do with their hands and brains when they start to think what to do ..rather than contantly rely on government to provide because people get spoiled..When you teach spoiled people another way..the ability to think for another option what is good and will work for them kicks in. Please dont go aboard to find solution. Which can put South Africa in further debt. Food ,energy and drinking and clean water is the most basic needs for any nation		retired
2022-07-10 08:56:10	Western Cape		No I do not	Solar	And wind and hydro. Private companies should work directly with municipality and instead of people paying eskom monthly they pay for for each home to receive a solar system and the area should look into wind and hydro energy depending on what elements are there to use. Permeculture should be our lifestyle and education on NATURAL ENERGY SOLUTIONS. Start taking down eskom systems as they are not sustainable and must be liquidated. Put the government control back to the people of the land.	Sami	retired
2022-07-10 08:54:57	Gauteng		No I do not	Solar	Hold all polititions out of the plan making of energy in South Africa. We need to get back into all Natural energy making as solar energy. God gave life to all in creation, thus it is best to receive from the Sorce of Life. Be you holy for I Am Holy, use solar to save the planet.	Justus	retired
2022-07-10 06:16:09	Gauteng		No I do not	Solar		Martie Van Wyk	retired
2022-07-09 17:57:05	Eastern Cape		No I do not	Solar	Solar is readily available to poor and wealthy. It is the means to generate it that is a challenge and it applies to wind generated electricity. Hydro is a good but SA dies not ha ve an abundance of water. Solar and wind generated energy are also environmentally friendly.	Thobeka	retired
2022-07-09 12:43:06	Gauteng		No I do not	Solar	At the immediate time we can rather rely on the elements (Sun and Wind) to generate power than on the Government. Long term solution would be nuclear power but that means very high capital outlay if you can plug all the drain holes in the system .	Willie	retired
2022-07-09 11:34:20	Gauteng		No I do not	Solar	We have abundant free sunshine so why not use it? The government needs to cut its own red tape cut taxes and encourage solar power. We have one small penal for our street gate that runs light and the gate. We could help people in the townships to have street lighting by using solar making life safer for those who have to go out at night. It's time Minister of Energy (joke), is removed and someone with some get up and go took his place in the meantime we have coal so let's use it. Like all South Africans I'm tired of no electricity when we have sun, wind and coal available. I know the risk of solar panels being stolen is real but let's get them on houses, shopping centres etc. we have to start somewhere Thank you.	Pauline	retired
2022-07-09 09:42:14	Western Cape		No I do not	Solar	Privatize with mix of solar, etc but keep this corrupt government OUT	Alison	retired
2022-07-09 09:15:00	Western Cape		No I do not	Solar	South Africa is in dire straits with our power shortage. We need honest, indepent producers that are able to run our power suffiently, where greed is not the motive.	Ronel	retired
2022-07-09 07:21:32	Gauteng		No I do not	Solar	Wind is also a option. We live in a sunny South-Africa with enough sun for solar.	Hennie	retired
2022-07-09 03:50:24	Eastern Cape		No I do not	Solar	Solar is readily available...	Marinda	retired
2022-07-08 23:36:14	Gauteng		No I do not	Solar	Mr Elan Musk from Tesla is also involved in a big way with solar energy and has helped quite a few countries already by installing his efficient and cheap to maintain solar battery combination power stations. The man is a miracle, very honest and delivers on time quickly and efficiently. This would be the cleanest and safest method, no more dirty coal, pollution and corruption opportunities and the most intelligent sensible move this government could make, culminating in a better prospect and image for the ANC. It will be like a breath of fresh air ! I suggest government gets in touch asap with Mr Musk This will be a winning move for the ANC to display that there are really some good brains around who do care and also start a new trend of seriously stopping corruption by taking a very firm stand against it. This would be the winning start!	Claude	retired
2022-07-08 22:20:07	Western Cape		No I do not	Solar		Tony	retired

2022-08-02 07:15:25	Gauteng		No I do not	Solar	We are country blessed with sun and wind why not make use of the natural resources.	David	retired
2022-07-31 23:32:50	North West		No I do not	Solar	The above question should have a comma so one can select more than one option. Gas can drive the turbo of a power station. Sun panels can be put up. South Africa has enough sun to put them to goos use. The thing that turn the arms can be put up in Cape Town and Port Elizabeth as the latter is known for the windy city.	Carol	retired
2022-07-31 19:43:31	Free State		No I do not	Solar		Chris	retired
2022-07-20 20:33:28	Gauteng		No I do not	Solar	It would be better to have solar as it consume less on coal and other form of gasses that are available, so our gov should just give these solar to eskom to continue supply us with electricity	Muzikayise	business owner
2022-07-18 14:54:53	Western Cape		No I do not	Solar		patricia	business owner
2022-07-12 08:57:52	Eastern Cape		No I do not	Solar	Clearly government is unable to meet the publics needs. Allow private companies to meet those needs. Why would the government not want south Africans to have power so we can run our businesses and homes!	Michaela	business owner
2022-07-11 09:54:27	Gauteng		No I do not	Solar		Jenny	business owner
2022-07-10 20:18:29	KwaZulu-Natal		No I do not	Solar	As Eskom can not offer a solution to the problem I think it should be offered to private parties immediately. Scrap the red tape or else SA will collapse.	Lindi	business owner
2022-07-10 07:14:27	Gauteng		No I do not	Solar	Our taxes are there for government to supply the citizens of South Africa with utilities amongst other amenities. Privatization of utilities will not help the immediate problem of loadshedding, as the private sector is not in a position to alleviate the supply problem. As a result they will request subsidies from the government in the hope to grow the electrical private sector, this is tax payers money. Essentially making it legal to have taxpayers money being misused. Governments payroll and salaries should be drastically reduced and all corrupt members, and all members with a criminal record (with exemted to members that were politically convicted during the apartheid area) dismissed and all their perks and salaries revoked, immediately. All government members, in the military, police, health, utilities, etc departments being investigated for any criminal activity, immediately be suspended pending the outcome of the investigation not filing charges. If found innocent all back pay is to be properly reimbursed to the member. All, members of government at all levels, are to be reminded that they work for ALL the citizens of South Africa and are there because they want the best for the citizens and not to enrich themselves or anyone else. The problem has to be rectified at the source immediately.	Peter	business owner

2022-07-10 06:49:11	Western Cape		No I do not	Solar	Not just one, but many renewable energy sources should be used	Kyle	business owner
2022-07-10 06:41:43	Limpopo		No I do not	Solar	We can be saving the planet whilst getting electricity	MOLOBE SARAH	business owner
2022-07-09 18:05:47	Gauteng		No I do not	Solar		Katy	business owner
2022-07-09 14:49:22	Gauteng		No I do not	Solar	THE LESS WE RELY ON THE GOVERNMENT THE BETTER. THEY CAN'T MAKE ANYTHING WORK AND THEY ARE FINANCIALLY RAPING SOUTH AFRICA.	Greg	business owner
2022-07-09 08:48:07	Gauteng		No I do not	Solar	I believe the government must find ways to supply the inhabitants of the country with basic needs like electricity and water. Giving private companies that privilege will be disadvantageous to the poor and will be difficult to control the companies in terms of which areas to supply. A private company is profit oriented and that is exactly what the companies are going to do.	Kaizera	business owner
2022-07-08 13:47:29	Mpumal anga		No I do not	Solar	We need urgent solution. I think a blend of the above options would work.	Sharon	business owner
2022-07-08 11:15:22	Gauteng		No I do not	Solar		Sean	business owner
2022-07-08 08:13:09	Western Cape		No I do not	Solar	We can not afford to drop the red tape for independent power producers, as the supply of electricity can easily be captured by private business and then we will not have a say in the electricity price anymore. Instead of that the red tape and especially the cost to set up your own solar system must be subsidized by government, that will not only ease the load on Eskom but can be paid back to government by supplying electricity that is not used by those systems, back into the grid free of charge. Last but not least is to manage load shedding in a more friendly way, by doing two things. Firstly to switch of non essential power consumers like street lighting and other non essentials, and secondly to switch off larger residential areas between 22h00 and 04h00.	Isak	business owner
2022-07-08 04:29:42	Western Cape		No I do not	Solar	I actually do not have an issue with scrapping any law regarding this. I say no because for this to be realized I would say that an independent commity must first sit down to see that who ever supplies this electricity may not be connected to the ramaphosa clan in any way. The ramaphosa family is and has been linked to the reason why eakom is not sorted, they have run eskom into the ground so this result happens.	Wayne	business owner
2022-08-11 17:42:39	Gauteng		No I do not	Solar	The state is almost left with nothing generating income, this would just cripple us more.	Poloko	business owner

2022-08-02 14:06:05	North West		No I do not	Solar	If Eskom cannot provide then independant power providers must be utilized. This will also help to grow our economy and put less strain on the government and consumer to try and keep this sinking shop afloat	Wendy	business owner
2022-07-11 21:59:07	Gauteng		No I do not	Solar	I believe if we us all the renewable energy sources based on the different weather in South Africa we could potentially not need to rely on coal, obvious it's going to cost a lot in the short term, but in the long term it's going to be a great investment.	Karabo	student
2022-07-11 01:14:44	Western Cape		No I do not	Solar	I believe the government should start investing in decentralised solar generation instead of replacing inefficient coal generation plants	Bea	student
2022-09-25 05:45:09	Free State		No I do not	Solar	We as South Africa should learn to be independent . We already depend on other Countries for lot of things, Not Electricity also. We should come up with ideas on how to fix this problem. I think solar Energy can work as back up. We should some how help Eskom, It will still be our main supplier. But each province should have there own solar power plant as backup. when Eskom shut down it should automatically takes over. and we will all still have power. It should also have prepaid meters. we buy Electricity on both meters . you buy on Eskom prepaid meter and also on solar prepaid meter if you want that back up.	Relebohile	student
2022-07-18 21:20:57	Gauteng		No I do not	Solar	There is no viable short term solution. Wind and Solar are the quickest and least expensive solutions. Karpower must be expelled from our ports. Eskom under de Ruyter is the best short term solutionent approval. All ministerial authority to write implement laws/sub ;aws must be removed from every ministry.	ross	
2022-07-10 21:40:34	Gauteng		No I do not	Solar		Donnah	
2022-07-10 13:01:25	Gauteng		No I do not	Solar	If you are really the government that works for people, I think it will be at the best interest to support each and every household to have their own Solar energy installed and produced at home.	Lindokuhl e	
2022-07-10 13:01:21	Gauteng		No I do not	Solar	If you are really the government that works for people, I think it will be at the best interest to support each and every household to have their own Solar energy installed and produced at home.	Lindokuhl e	
2022-07-10 21:41:54	Gauteng		No I do not	Wind	Because it is a natural element it won't run out or require human production	Nelly	unemployed individual

2022-07-10 11:33:59	Western Cape	No I do not	Wind	Now as my father would have said. " tyhat is now clever" meaning it in a sarcastic way. CAN NOT TAKE CHARGE OF THE WORKERS so what clever idea do they come up with. Oh yes, lets take away the work from the people and give it to " back pocket filling foreigners" they will hike the prices even higher because because the country have control, at any given time they can switch off the power. like , say before an invasion of ??/ immigrants. nothing will work and nothing can be processed. great that can maybe be controlled to a point. how about all the home boys sitting without work. ok, just hike up the taxes. allow the population to install power generators of their choice without hindrance but couple their system to the grid like they do in Europe. when your private power system is not used by you , it powers the grid. You will be surprised how much energy gets created by small enterprises. the stupid assumption that wind generators will harm the birds is such an idiotic thought. birds are not blind and that propeller does not rotate at a high speed like an aeroplane. wind int he western cape is in abundance and it is free. pure profit on investments. the ruling ministers can even have shares in the wind generators, it is not going to bother anyone. all we want is affordable energy	martin	unemployed individual

2022-07-10 04:04:53	Eastern Cape		No I do not	Hydro	No I do not support the I P P' s introduction to this matter and if I may ask what is it that they can do better which Eskom is failing to do? No need to immediately amend the legislation!	Y	employed individual
2022-07-09 16:05:50	Western Cape		No I do not	Hydro	In my opinion, the ANC government has failed miserably. An electricity state of emergency should be declared, all prohibitive laws dropped & society and private business work together to find quick, common solutions. Manhasset needs to be fired as he is an obstructive piece of coal.	Mersini	employed individual
2022-07-15 02:37:03	Western Cape		No I do not	Hydro		Ebrahim	retired
2022-07-11 06:01:03	Gauteng		No I do not	Hydro	It is time for some of the gurus to put their heads together and come up with something different, Wind power is not a good idea as the fans are not biodegradable (where do we put all the rubbish to come); Coal is a definite no-no due to the atmosphere, solar is horrendously expensive and the batteries are also not biodegradable;. Nuclear is definitely a no-no as is Diesel for any and all of the above reasons	Marianne	retired
2022-07-10 07:31:52	Gauteng		No I do not	Hydro	Good morning Sir/Madam and how is your Sunday morning? As a proud South African citizen, I am so glad to say something about a crucial energy resource, which seems to be a bit of problem in my mother land. I must say Hydro Electric source can be the best solution or Solar electric source, since both those resources are natural resources, an example H2O is a natural resource, have a look at Indian and Atlantic sea waters. The only problem can be the machines to convert Hydro source to electric energy. The same with solar, which is the energy from the heat of sun and to convert such heat energy will require sophisticated machines. I think our Government and Minister of Energy, Mr Gwede Mantashe must think along those lines and sit with his team and solve the problem of Eskom. I thank you Sir/Madam!	Madoda	retired
2022-07-08 15:43:15	Gauteng		No I do not	Hydro	The hydro-power can also help in other provinces, as a renewable source of energy that generates power by using the natural flow of a river or dam or other body of water. It relies on the endless, constantly recharging system of the water cycle to produce electricity, using a fuel—water—that is not reduced or eliminated in the process. That can reduce load shedding. An independent power producer, how much money do they have which government didn't have to service the country on electricity? Given to private company will be a greater disaster in a long run of high tariffs and other ugly aspects of services. The number one service people fight for, in our country is electricity which forces people to burn tyres and block roads. Will the private company manage such, if most failed will a simple salaries and wages?	Bethuel	retired
2022-07-10 16:48:45	Western Cape		No I do not	Hydro	As long they don't control and it is fair to all South Africa. Why is South Africa still supporting other countries with electricity	Adrienne	business owner
2022-07-10 06:42:45	Gauteng		No I do not	Hydro	Hydrogen freely available should be used in conjunction with coal which we have an abundance of.	Ndili	business owner
2022-07-10 08:48:56	Gauteng		No I do not	Hydro	Privatisation of energy supplies will sky rocket prices .South Africa should find means to repay the debt and then appoint credible leaders of Eskom . Electricity supply should be nationalised .	BLESSING	

2022-07-07 20:56:24	Gauteng		No I do not	Hydro	We need private sectors to provide electricity, ESKOM US CORRUPT!	Marelize	
2022-07-07 20:56:21	Gauteng		No I do not	Hydro	We need private sectors to provide electricity, ESKOM US CORRUPT!	Marelize

2022-07-09 07:11:10	Western Cape		No I do not	Gas	I honestly feel that Eskom should remain the responsibility of the government too much privatisation of government property They should remain accountable to their citizens and not make their families co-owners of Government property - look at SAA - this is all strategy to privatise our Eskom to their family and friend that are patiently waiting to come in - DA can see what happened to SAA and yet they are also wanting privatisation this to me is dirty politic -LEAVE OUR ESKOM ALONE	Veronica	employed individual
2022-08-01 10:13:05	Mpumalanga		No I do not	Gas		Bertrand	retired
2022-07-19 23:34:30	Gauteng		No I do not	Gas	eskom maak nie reg nie ons as afrikaaners sit in die donker asgefolg van eskom ons ly daar onder goed blaas in ons huis van an en af sit	juan	business owner
2022-07-10 21:21:03	Western Cape		No I do not	Gas	with independent power producers corruption will increase and electricity costs will explode!! Fix eskom and start putting people in jail!!!	frak	business owner
2022-08-01 09:58:03	Gauteng		No I do not	Gas	Rules are in paled for a reason. I agree that they need to be removed to facilitate smoother integration and procurement from IPPs but these need to be regulated to monitor and act against corruption and any other adverse effects that may arise from procuring energy from IPP. Look at what happened when red tape was removed from the procurement of PPE. I believe if they are removed for this, similar activities will take place	Karabo	business owner
2022-07-22 17:31:02	Gauteng		Not fully	Nuclear	Before any IPP agreements are signed the government needs to understand who is going to supply the BASE LOAD or what is the IPP commitments are going to be supplying Base Load. Anyone can put up a turbine or some solar panels and supply power , people do it at their homes and unless a lot of batteries are installed they are still dependent on Eskom and that is going to be the same for the IPP. IPP may not be the total solution. The very first thing to do is get rid of is all the ANC Comrades who are on the Eskom payroll and we will see a instant improvement. These ANC Comrades have been sucking Eskom dry both financially and intellectually. Any IPP that do get a licence should be subject to the same regulations as that of Eskom.	Brian	business owner
2022-07-12 23:24:28	Gauteng		Not fully	Nuclear	Nuclear power is in fact renewable energy in that it uses uranium to enrich the rods which in turn boil water to power turbines. This process does not require external energy to happen so I fully support nuclear more so because it also increases our technological capacity in all areas	Nkululeko	business owner
2022-07-12 12:44:21	Gauteng		Not fully	Nuclear		George	business owner
2022-07-11 21:15:56	Gauteng		Not fully	Nuclear	There is great cause for concern in private electricity producers and the costs of electricity production. Many countries abroad like the UK have very high cost of electricity as a result of the alleged constantly rising cost of production by these private producers however if you look at the resources used there is no correlation in these figures which show that the costs are in fact profits that these companies are trying to make more of. South Africa must not become so desperate for electricity that ultimately it is put at the mercey of these power producers and the mases suffer and carry the burden financially. TYhis is why power has always been produced by our national utility as it was supposed to allow the people of South Africa to be able to afford electricity and have access to what is a need in modern times. The national producer should be funded in part by taxes in the form of new facilities and the day to day running costs and repairs and maintanace coming from the usage costs paid by the consumer. It is not meant to be a for profit organistaion but for the people of South Africas benefit. Private producers are purely profit based and this will ultimately be to our demise. The only time a private company should be used is in the production of facilities and only on the basis of a controlled profit margin and by the lowest bidder on tender and by companies with no ties to the nation utility or government to avoid corruption.	Liam	business owner

2022-07-11 08:33:44	Gauteng		Not fully	Nuclear	I think that the country needs to allow Independent Power Producers who have a proper plan to build environmentally clean and sustainable energy solutions, to be allowed to be licensed and to start preparing to add to the energy grid. The government needs to look into building nuclear power stations. I think there needs to be an independent audit of the requirements to issue licenses to ensure that the requirements are fair and not overly onerous, and we need an independent body to police the issuing of licenses so that it is free from corruption. And we urgently need a way to fast-track the awarding of licenses to producers who meet the requirements. We need transparency in all of this and open tendering. The lack of energy is causing a loss of growth and is inhibiting our ability to pull out of the economic crisis we are in. We need affordable energy. And we need to put scrubbers on the coal power plants to clean their emissions. SA is failing international air pollution safety standards.	Kerrin	business owner
2022-07-11 06:58:37	Western Cape		Not fully	Nuclear	A combination of solar, wind and micro nuclear (totally safe). No private but politically linked initiatives, direct or indirect. No Karowerships (owned by politically linked people or companies) sailing in to rescue a failed Eskom.	Chris	business owner
2022-07-10 11:43:22	Gauteng		Not fully	Nuclear	Nuclear and coal power plants are the only viable solution for baseload sources in South Africa. Nuclear is very reliable and with very minimal carbon emissions. Koeberg nuclear power station is a perfect example of a reliable baseload source in South Africa, it has been operating for since 1984 without any major breakdowns and it will operate for the next 20 years. The cost of construction may be relatively high but the cost of ownership is very low when compared to other sources because it can reliably operate for 20 years	Ina	business owner
2022-07-09 11:02:57	Western Cape		Not fully	Nuclear	It can be scrapped but must make clear provision the suppliers and their families related to government officials may not be used for supplies or benefit from income of such proceeds	Cornelius	business owner
2022-07-08 16:08:54	Gauteng		Not fully	Nuclear	We need power over 24 hrs per day, not at 12h00 only when the sun shines or when the wind blows !!! Lets wake up and not fall in the "Greens" stupid pit, like Germany	Abraham F	business owner
2022-08-17 10:43:40	Gauteng		Not fully	Nuclear			business owner
2022-07-13 08:31:30	Western Cape		Not fully	Nuclear	I am against monopolies, I feel each Province or City should run their own. Whether it is nuclear, wind, solar etc. What will work for each Province or City.	SID	retired
2022-07-12 10:07:23	KwaZulu-Natal		Not fully	Nuclear	Supply of Water and electricity is a people's right in a world where people pay taxes and consumption money for services provided. These fundamentals must be supplied by Governments not profit seeking greedy people and companies. We live in a so called civilized world (peculiar to some). It abhors me when people seek gain from the destress of those not so fortunate.	Errol	retired
2022-07-11 13:20:30	Eastern Cape		Not fully	Nuclear	I suggest nuclear but doubt that what we have is sufficient to supply our total needs but we need to use the maximum available and immediately begin to do what is required to reach that goal.	Herbert	retired
2022-07-11 10:03:42	Western Cape		Not fully	Nuclear	Nuclear if handled correctly is by far the better producer of power with the least amount (but toxic) waste.	Kay	retired
2022-07-10 21:07:34	Western Cape		Not fully	Nuclear	Why nuclear? Gas, oil and coal are finite as well as heavy polluters. Hydro is far too reliant on water, something we already have precious little of. Solar and wind are weather reliant and can they meet the INDUSTRIAL demands of the country? Domestic maybe, industrial no. Geothermal be an option but are there enough reliable sources in what is after all a very stable country with very few geothermal sites. So what is left that can actually fulfil the current and projected needs of the country? Nuclear the only viable solution but it needs very stringent operating and maintenance systems both in place and functional.	jerrold	retired
2022-07-09 18:04:29	Western Cape		Not fully	Nuclear	IPP's might help to overcome loadshedding BUT AT A PRICE FOR ESKOM because it will shrink very much needed revenue income for ESKOM and that will cause huge tariff increases, which will affect us as the consumers quite bad. We already pay too much per kW.h	Pierre	retired
2022-07-09 15:20:20	Gauteng		Not fully	Nuclear	What regulation will be in place to control ipp's and avoid excessive costs being passed to consumers? This needs very careful consideration and the appointment of a citizen based regulator.	Jane	retired
2022-07-08 20:10:28	Western Cape		Not fully	Nuclear		Bernard	retired
2022-07-08 16:47:35	Western Cape		Not fully	Nuclear	Nuclear is expensive initially but pays off much quicker and is pollution free. Forget BEE, employ who is best. Tough if it's all Blacks, tough if it all coloureds. Just employ those properly trained.	Peter	retired

2022-07-13 00:59:49	Western Cape		Not fully	Nuclear	Nuclear power is a stable and cheap source of electricity. Too much renewables lead to grid instability.	Brent	employed individual
2022-07-12 15:56:10	Gauteng		Not fully	Nuclear	Opening the grid up so than any Tom Dick and Harry feed electricity into the grid is not entirely an easy thing to control. We need stable generation capacity, something wind and solar cannot do. Coal power stations are the best way to get stable generation capacity, provided the units are maintained and replaced timeously. This was not done, thank you Thabo Mbeki, and that is why we are having problems now. Medupi and Kusili was supposed to be additional generation stations, and that is great, but it doesn't help much if the fleet of current power stations are nearing (and in some cases exceeded) end of life. These units must still be replaced, and if it took this long to build Kusili and Medupi, I cannot imagine how long it will take to start replacing the old units. I know everyone is against nuclear power stations, but as soon as they have "paid themselves" they provide the cheapest electricity one can buy. I know everyone is concerned for the waste, but the waste produced is far less than all the batteries that needs to be "disposed of" from Solar and wind generations sites. The hope is that we will get an international company to build the nuclear power station and only hand it over to Eskom once done, so they can't get their grubby hands on the funds to build the power station. Corruption has most definitely destroyed our, once beautiful, country.	Gideon	employed individual
2022-07-12 08:36:32	Gauteng		Not fully	Nuclear	So, is this how and where Ramaphosa, Radebe and Motsepe finally get AREP positioned as the primary BBBEEEEEEEEEE electricity provider for SA? Honestly, I would rather go off-grid or emigrate, than support those corrupt bast*rd's any further - not that I can afford to do either.	James	employed individual
2022-07-12 07:45:48	Gauteng		Not fully	Nuclear	Independent sourcing of energy will be costly for the poor. What should be done and focused on is getting the government of the people by the people installed and ensuring that resources are distributed fairly.	Khalifah	employed individual

2022-07-11 09:09:47	KwaZulu- Natal		Not fully	Nuclear	It may have its downs, but for simple density and power production it is the best suited to solve this crisis. Then we can focus on renewables and sustainability.	Luvuyo	employed individual
2022-07-11 09:08:12	Gauteng		Not fully	Nuclear	Believe there should be multiple key players to help with electricity crisis. IPP cannot be the only solution but part of solution..they (IPP) are not always easy or cheaper to maintain. We need an energy mix to help with this crisis and the transparency of who those companies are so that we still support local businesses.	Lebo	employed individual
2022-07-11 09:04:46	Gauteng		Not fully	Nuclear	I believe that IPP's are not the solution. These technologies do not suitably interface with the grid, to ensure it's stability. Ultimately, IPP's are going to cost more money at the end of the day and tax payers and rate payers will bear the brunt. Stop the corruption, root out the sabotage and repair/replace components of the existing grid in a sensible manner.	Brandon	employed individual
2022-07-11 08:06:56	Western Cape		Not fully	Nuclear	We need to use nuclear power as a solution. There are so many countries around the world that can build it in a very short space of time. This will also boost our technical knowledge as these power stations will improve our poor mathematics in schools as kids can now see math principles in action. In turn we will have more jobs. This will also create other jobs that are created around nuclear energy projects. Solar and wind is not sustainable. We need a lasting solution with an impact on more than one aspect of this countries many challenges.	Ricardo	employed individual
2022-07-11 07:34:17	Gauteng		Not fully	Nuclear	Nuclear power is what we must resort to for now so that we can slowly move to solar energy. Renewable energy is the future but now we at the present and our technology does not allow of maximum collection of solar energy. This means if we want to use solar energy it will be more expensive to install the required gadgets. And their batteries will just keep wanting to be changed over time.	Bedwinne rs	employed individual
2022-07-10 22:34:08	KwaZulu- Natal		Not fully	Nuclear	People in Eskom had told me Niclear is the best way. I trust their opinion	Shaun	employed individual

2022-07-10 17:41:30	Gauteng		Not fully	Nuclear	So-called green energy sources have turned out to be not so green after all, given their less than desirable environmental impact and incapacity to sustain the power grid. Negative propaganda has, for a long time, painted a grim picture of the dangers of nuclear energy and such waste disposal, which it appears has been untrue to a large extent. The majority of proposed power alternatives appear to belong to some elite families, which opens the door to industry capture and sector control. Sequester an independent review by a diverse panel of independent energy experts to inform on how current power sources can be optimised while alternative options can be ethically, fairly and transparently rolled out.	Estelle	employed individual
2022-07-10 11:17:00	Gauteng		Not fully	Nuclear			employed individual
2022-07-10 07:44:42	Free State		Not fully	Nuclear	Solar and wind won't help. Solar will not help during peak loads and currently all IPPs are investment from overseas companies. Therefore all monies leave the country. Only way for stable power is nuclear.	C	employed individual
2022-07-10 07:43:21	Limpopo		Not fully	Nuclear	I fully support it provided anyone can be that supplier and not just a select few at the top which I fear would be the case.	Andreas	employed individual
2022-07-09 16:43:27	Western Cape		Not fully	Nuclear	Private electricity production should be allowed, but I am sure government would find a way to mess it up. No Russian deals and no Chinese deals, no corrupt dealings and it will be 100% perfect. No BEE restrictions No ANC Comrade-only companies No ANC hands in the pie Then I would be all aboard private electricity.	Marcell	employed individual
2022-07-09 13:12:35	Western Cape		Not fully	Nuclear	IPPs are a short term solution for a long term problem. Wind and solar are weather dependent and costly. In 1998 government opened up the space for IPPs to operate in SA, they declined because electricity was too cheap for them to operate for profit. We need to go Nuclear, nuclear will provide us with base capacity.	Ndumiso	employed individual

2022-07-13 20:37:50	Western Cape		Not fully	Nuclear	<p>The country needs stable base-load generation in order to support industry and manufacturing (ie coal and nuclear). We need manufacturing and industry so that we can produce our own local products and be self-reliant as a country, we have all the resources, skill and ability to do this.</p> <p>You cannot run industry and manufacturing (smelters, mining, refineries etc) on solar and wind, these "renewables" do not provide that and they can make the grid unstable because the sun does not always shine nor does the wind always blow so supply fluctuates and the grid must always remain stable.</p> <p>Due to the above, independent generators/providers should NOT be able to just connect and supply "willy-nilly" as this will destabilize the grid and cause problems. I propose that regulation be put in place (or if such already exists) where Eskom has control of WHEN independent producers can connect so that the timing is for increased or decreased demand to keep the grid stable at the proper frequency.</p> <p>The motives of foreign companies must also be questioned as foreign companies are likely eager to build generation capacity here at massive cost to the citizens of the country down the line, not to mention the foreign debt incurred, especially with regards to their bias towards "renewables".</p> <p>The cleanest, safest and most cost-effective long-term generation solution is nuclear and extra capacity at Koeberg plus an additional plant elsewhere would be so welcome. We have skilled people here who can make this work beautifully, overseen by international best practise.</p> <p>These are my thoughts after spending much time trying to understand these things as a layman, there is a lot of misinformation and ulterior motives manipulating people into making short-sighted decisions that will have negative consequences in our future. I hope the above is considered when decisions are made regarding this.</p>	Luke	unemployed individual

2022-07-12 19:25:24	Limpopo		Not fully	Solar	Although its a more expensive type of power generation, solar power in sunny SA may AID in helping to reduce the lack of capacity. A simple, effective, fast and low maintenance solution, is to EXPAND the existing solar farms and save costs by utilizing the EXISTING infrastructure connecting them to the national grid. Thus, procure the properties around the solar farms and just add panels, lots of panels. This is a non-negotiable fast solution A secondary AID will be for homeowners nationwide to be able to sell their solar power back to Eskom.	F	business owner
2022-07-12 12:02:46	Western Cape		Not fully	Solar	Wind is erratic and solar is a lot more cost effective than wind power generation. Also solar is a lot less intrusive than wind generation. Ever thought what will be done with the use structures and composite blades once these structures are decommissioned?	FH	business owner
2022-07-11 19:52:18	Mpumalanga		Not fully	Solar	All depends on how Independent Power Producers are going to be selected. If it is going to be the way other government contracts have been awarded it works in the hands of the state capturers which want to see Eskom fail so they can get their hands on supplying power to the masses. We need to ask ourselves if it is the right thing to be in the hands of the ANC Comrades outside of Government like the "Guptas" which will provide the power to solve the crisis but can then charge exorbitant rates to supply. It can not be awarded to a couple of "big" businesses but rather to plenty of smaller producers which will then level the playing fields and ensure proper market forces are in play.	Tola	business owner
2022-07-11 17:48:19	Western Cape		Not fully	Solar	Solar, gas and hydro are the best.	Herman	business owner
2022-07-11 09:23:13	Western Cape		Not fully	Solar	As a Aboriginal Indigenous Khoi and San woman,mother,Business owner and family member of this first nation we are the forgotten people and currently what we are experiencing in South Africa would never have happened if our borders for always giving other countries preference over those that were the custodians of the country.We are now in a predicament that could have been prevented if this country's Government just accepted the Aboriginal Indigenous First nation the Khoi and San as they have accepted the whole African Continent and even outside countries as to be the role players in this country. We just hope and pray that someday we will have our freedom of living and exercising our rights as all did in the last 30 years.We also want to be part of making the decisions of our lands minerals and how it is being used and shared with others.	Michelle (Khoi Noi Sores)	business owner
2022-07-11 08:45:00	Free State		Not fully	Solar	We live in South Africa... many many tourists comment on how fabulous and hot the African sun is... let us utilise this to the fullest possible extent. Allow people who already have a roof over their head to put up solar panels to power their needs and to provide power to the Eskom grid. This will empower Eskom to provide more energy to the people that do not have to capital available to put up solar panels. But, please do not tax the people who put up the solar panels even more... rather give them credit for trying to make a change to better everyone's lives. It does not need to be monetary relief, but at least do not tax them even more... it takes really really hard work and long hours to earn the money that gets put to use to buy solar panels... they are expensive	Elmarie	business owner
2022-07-11 08:42:50	Eastern Cape		Not fully	Solar	there was no space in the above question, to put a selection of answers. South africa has an abundance of natural resources. Sun, wind, land, sea. We should look at a variety of methods to produce clean energy suited to the geography of the area. We should also investigate producing in South Africa the components needed to supply the infrastructure for the various energy production. Solar panels can also supply shade in hot semi desert areas and food production can happen underneath.	louise	business owner
2022-07-11 08:11:17	Eastern Cape		Not fully	Solar	In my opinion there is legislation for a reason. If we abandon red tape completely, it may set a president for the future, causing the abuse of legal loopholes and country resources. However, I do support alleviating the energy crisis and in this particular case it would make a substantial difference to our economy.	Werner	business owner
2022-07-11 07:42:30	Gauteng		Not fully	Solar	I think solar can be implemented by small business and home owners, with maybe a tax benefit	Chris	business owner

2022-07-09 16:17:49	Western Cape		Not fully	Solar	This government runs EVERYTHING INTO THE GROUND with corruption, theft etc and cadets in positions that are paid salaries and benefits and THEY CAN'T DO THE JOB/RUN A POWER STATION NEVERMIND KNOWING WHAT TO DO EXCEPT MOVING MONEY INTO FRIENDS/CADERS POCKETS for "work" that are not done/or can't be done by "contractors"!!!! Now, let's do this:... RUN ESCOM INTO THE MUD/SEWERAGE and then the PRES's BROTHER in-law STEPS IN TO HELP SA... with his RAINBOW POWER/MINERAL AND ENERGY corporation!!! BRILLIANT...KEEP IT IN THE ELITE's FAMILY AND WE ARE SCREWED EVEN MORE!!!!????	Tere	business owner
2022-07-09 16:09:38	Western Cape		Not fully	Solar	Solar is more easily accessible to most households and small businesses	Karen	business owner
2022-07-09 12:31:37	Western Cape		Not fully	Solar	I think the red tape should be scrapped (mostly). Things as far as environmental protection and air quality should always remain firmly in place. Other than this all restrictions should be lifted. Since Eskom will still have mandate to distribute Electricity not other restrictions should be in place.	Hanno	business owner
2022-07-09 11:35:45	Western Cape		Not fully	Solar	I believe that we have vast expanses of land that could be utilised for solar-electricity-production. Much of this land is owned by government, so they need not buy or lease the land from some opportunistic owner. The technology today makes it cheaper than coal &, as far as we yet know, there are not many side-effects from this form of energy-conversion.	Chris	business owner
2022-07-09 11:22:31	Western Cape		Not fully	Solar	In Europe - with far less sunshine than South Africa - almost every second house has solar panels on the roof. In my opinion all the roofs facing NORTH should be enabled to purchase solar panels for their needs at the same cost as their average electricity use. If a household spends more or less R800 pm average on electricity that must be the amount used to pay off the solar panel. In this way many households will participate in using solar panels. If the extra supply can then be added to the grid, the problem can be solved in a short period of time. The same should be offered to businesses. And what about the poor communities - who will offer them solar panels with enough electricity for their needs? A solar panel to supply a cluster of homes will go a far way in reducing illegal connections.	Anna-Marie	business owner
2022-07-09 11:15:54	Gauteng		Not fully	Solar	how will pricing be regulated and will this bring down the cost of power, or is this a opportunity for the fat cats related to government again?	aslam	business owner
2022-07-09 07:29:08	North West		Not fully	Solar	Solar is in alignment with nature and is more likely to affect earth lesser if not manipulated. The independent power producers should be open to everyone in the community and not be limited to big companies and should be equally shared	Neo	business owner
2022-07-09 00:02:47	Outside SA		Not fully	Solar	Let households get a solar subsidy to install solar and feed back into the grid and receive credits. It is very successful in other countries. This should not be an opportunity for "Cronies" to steal from the government, by sabotaging Eskom and then selling power back to the grid at huge profits!!!	NICO	business owner
2022-07-08 19:36:37	Limpopo		Not fully	Solar	Make use of the sun, we have sufficient sunlight	Dolly	business owner
2022-07-08 19:25:48	Eastern Cape		Not fully	Solar	And wind. Small community based power generation or household level allowing us to feed into the grid please! Installation should be subsidised	Claire	business owner
2022-07-08 18:46:45	Western Cape		Not fully	Solar	Any emergency solution with a high variable energy cost should be restricted to peak time provision (say 2000h a year). It is insane to provide for 7000h per year availability of emergency generation. There are already three solar plus storage systems approved that do 16h a day of dispatch-able power. THAT is the model. It is cheap. It can last 20+ years. Gas systems will cost multiples as much per kWh and more than likely solar plus storage will deploy much faster.	Johan	business owner
2022-07-08 18:21:27	Free State		Not fully	Solar		Willem	business owner
2022-07-08 16:59:05	Western Cape		Not fully	Solar	We must allow for supply to come from outside Eskom, but we must have proper policy so we don't sell out to private entities something so important to all South Africans. Solar is the fastest green option that can help with emergency supply, but nuclear should be out mid term plan while other green options arise.	Joana	business owner
2022-07-08 15:25:20	Western Cape		Not fully	Solar	I don't support a knee-jerk removal of "red tape" - policies and regulations are necessary to regulate a sustainable industry, however I do support the identification of career bureaucrats who are blocking IPP progress, and then having the power to their homes permanently disabled. I'm very much in favour of Nuclear, Solar and Wind.	Louis	business owner
2022-07-08 14:39:04	Gauteng		Not fully	Solar	I fully support local IPP's being allowed to produce electricity for SA. I do NOT support any IPP's funded by or in any way connected to China or Russia. The red tape should be removed immediately to allow even households and any other producers of electricity to feed into the grid. Enough solar electricity is generated by businesses and households already to eliminate loadshedding during the day. Then Eskom only needs to focus on providing enough for nighttime.	Cecilia	business owner
2022-07-08 12:35:56	Western Cape		Not fully	Solar	There should be a subsidy for households wishing to install solar power onto their homes.	Gregory	business owner
2022-07-08 08:09:24	KwaZulu- Natal		Not fully	Solar	I believe that CR is trying to collapse Eskom so that Patrice can take over with African Rainbow Energy. Just my thought!	Michael	business owner

2022-07-08 06:43:30	Western Cape		Not fully	Solar	I do not think "red tape" should be removed in its entirety. Government needs to ensure that private energy suppliers provide energy in a sustainable way. Without policies in place we could see energy being generated in environmentally damaging ways. I selected solar power because it can be introduced at a household level, but there are many different sustainable energy options and all should be used - again ensuring that all environmental / sustainable energy boxes are ticked. Sadly there are no quick fixes	Philip	business owner
2022-09-26 16:03:04	Western Cape		Not fully	Solar	I would like to say scrap all the red tape, but some of it remains necessary to ensure a controlled and adequate power supply that will not rip the consumer off at the end of the day. Some regulations are required, but I believe that the lengthy time it takes to put systems in place is uncalled for. We have a crisis, and a solution is at hand. We have IPPs that can provide solar and wind power to the country at affordable rates. The government is simply trying to retain as much control as possible and milk these providers for as much as is legally possible. Eskom has the premises and the infrastructure to set up solar farms and connect them to the grid. What is the delay? Eskom clearly can't perform adequately, hence the need for alternatives. And then they want a tariff hike? Haha.	Chris	business owner
2022-08-30 15:57:06	Gauteng		Not fully	Solar	The home and small business owner cannot invest into any backup and supporting power programs when government flip flops about for months and years. If Germany can run the during the day nearly without base load being supplied by coal and nuclear, then solar and wind is ideal for South Africa, where we even have longer sun (though less wind). Eskom could do maintenance during mid morning to early afternoons, before running for the peak loads. The capital outlay > 150K - 250K, with the supposed <2 years write down for assets by SARS, makes all this hot air. In 5 years, 1/2 of the costs has to be reinvested for the battery backup so unless EVERYONE in government backs this, we are not going anywhere. In fact, even DTI funding has been used for local inverter design and development, but NOBODY will want to make the required investments unless government stops interfering with basic fundamentals!	Arno	business owner
2022-08-03 15:56:46	Western Cape		Not fully	Solar	While I think we need to solve the energy crisis as soon as possible pursuing green energy solutions, I do think some level of rules should be in place to prevent fly-by-night service providers scamming people out of their money. A solid framework and the ability to self-regulate, e.g. how do we as the community and ultimate users keep the service providers honest?	Itha	business owner
2022-07-20 21:04:54	Gauteng		Not fully	Solar		Doris	retired
2022-07-18 21:54:21	Western Cape		Not fully	Solar	Ramaphosa, Motsepe, Radebe and Motsepe's company have just signed multi-billion rand contracts with a host of independent power producers which would indicate the demise of Eskom. When they do start supplying South Africa with power it will cost more than Eskom-generated power. Considering the rent strikes by Eskom staff and what was yielded in favor of those workers, start teaching the man in the street how to generate his own power and do away with the rest	Daniel	retired
2022-07-18 19:43:21	Western Cape		Not fully	Solar	It is cleaner and the sun is free	Andre	retired
2022-07-18 16:34:49	Gauteng		Not fully	Solar	I suggest solar and wind power.	Louise	retired
2022-07-16 12:48:35	Western Cape		Not fully	Solar	The cost of alternative, green, renewable methods of electricity production have declined significantly in recent years. We must convert to solar, wind and hydro power generation as soon as possible. The coal power plants are at or nearing their end of life. Furthermore, green energy this will reduce our carbon emissions.	Tammy	retired
2022-07-14 15:22:12	Western Cape		Not fully	Solar	There is a need for control. Policy can be amended after a trial period of using renewable energy. Independent power producers should be allowed immediately to improve the current situation.	Freddie	retired
2022-07-13 12:17:05	Free State		Not fully	Solar	As far as I know are the independent electricity producers via solar or wind already integrated into the grid of the current power supplying grid and I cannot understand why we have such a breakdown in electrical supply. There are talks that there is a group of people who are creating this electrical chaos so that the country will opt for independent electrical suppliers. These alleged independent electrical suppliers are apparently linked to Ramaphosa and his family and friends which will benefit from it financially and it is said that this scheme will be much worse than the Zuma state capture case. If this is true then I will not support the independent electrical suppliers option. Eskom needs to enforce their recovery system and build in incentives to the municipalities to recover the great losses. They also need to do proper planning and budgeting and controlling all expenditure with the budgets. Proper assessments should be made regarding excessive staff and salaries and should be cut where necessary. If nothing is done we will all suffer the consequences in the years to come.	Frank	retired
2022-07-13 09:30:18	Gauteng		Not fully	Solar	Some legislation is necessary but every tool that the ANC can use to block rapid deployment of renewable energy must be removed.	Kassie	retired

2022-07-12 19:07:43	Western Cape		Not fully	Solar	We must stop exporting electricity to neighboring countries that do not pay. The money stolen from Eskom must be recovered and those responsible prosecuted. Solar energy plants can easily be installed all over the country. There are so many open spaces. The main downfall is going to be theft and vandalism of equipment. Severe punishment must be handed down for those responsible. The police must act and stop sleeping on the job.	Ebrahim	retired
2022-07-12 18:43:01	Gauteng		Not fully	Solar	I would pic a mix of solar, air and gas for the immediate future with hydro following and definitely not nuclear. Incentivise, from businesses to households to install Solar & Wind generation and feed excess power into the grid for full credit of units when they require electricity from the grid (e.g. at night or bad sunny & or windless days) Force very high consumption users to create their own power. Ensure (and police) lights in businesses and government buildings are switched off in the evenings - keep minimum illumination on (or motion controlled) in the evening for security reasons. Create a NGO that will really ensure consumers are not subjected to high prices and police corruption activities. All participating companies to make their books, directors , owners public. Build solar & wind component producing factories in the regions where solar and wind generation farms will be build. Do away with BEE etc regulations to attract the existing in South Africa and overseas skilled resources. Introduce the EU rules and standards for all aspects from manufacture, installation, ownership, anti-corruption, conflict of interest etc, etc.	Ermis	retired

2022-07-11 16:48:04	North West		Not fully	Solar	Renewable energy ..ala best practises world wide.SA needs to keep abreast of these developments and replicate where possible , conditional on the disconuaction of fossil fuel and other non acceptable enviromemtal solutions. Govt involvement in renewable energy should be limited to that of oversight and regulating electricity tariffs to ensure the non- formation of electricity cartels.	Glenn	retired
2022-07-11 14:45:03	KwaZulu- Natal		Not fully	Solar	I believe that any method is better than the current situation of 'no method.' Having read the President's weekly this morning, I am happy that Government is trying to put a stop to current theft of electricity as well as non payment. The current situation of load shedding and outages through lack of maintenance as in Hilton must be costing the country hugely in regard to working hours and productivity. The answer certainly does not lie in strike action or damage to property.	Bridget	retired
2022-07-11 14:20:51	Gauteng		Not fully	Solar	South Africa has to move away from coal or other fossil fuels both from an environmental and economic point of view. The country has to form part of the urgently needed move to reduce global warming, but also because the rest of the world will eventually move in that direction and it will become imperative to exist in a globally connected world. South Africa is a sunny country and also has the ability to utilise wind power. Other renewable energy sources must also be considered - many studies have been done and are available that can direct an optimal mix of alternative renewable energy sources. Such energy sources must include energy storage solutions as well as proper and continuous maintenance. It is important that very careful consideration be given to the utilisation and management of private power suppliers: red tape must be reduced. Emergency power supply, if utilised, must be evaluated and its cost considered in a long-term energy supply plan (20 - 30 years) , not only in the short term. It is extremely important that the country ensures that private suppliers are managed in a way that they provide continuous energy to the country. Energy is a strategic resource and critical for any country to grow and prosper. South Africa must ensure that under no circumstances will it be held at ransom by such suppliers as can be seen in other countries in the world. South Africa must be as independent as possible for its energy needs.	Ingrid	retired
2022-07-11 12:57:39	Western Cape		Not fully	Solar		paul	retired

2022-07-11 12:30:44	Western Cape		Not fully	Solar	As far as I know, an independent power supply cannot immediately just add to the grid. There are certain criteria to follow, so its not always an easy quick-fix. That being said, this country has the land space and plenty hours of sunshine for additional solar farms to provide only daytime power. The crux is the provision of NIGHTIME power. Therefore suitable Coal is still, unfortunately, relatively easy to procure and supply to power stations. The GRID requires a constant stable power supply at a certain frequency, which requires careful, constant vigilant management. Red Tape needs to be reduced, not totally removed and must enable a suitable quick-fix to emergency power supply.	Bruce	retired
2022-07-11 11:21:37	Western Cape		Not fully	Solar	The current constrained electricity supply situation in South Africa is killing the economy and job creation. Based on our current experience, the government does not have the skills nor the will to run Eskom. Power generation and distribution must not be driven by a political agenda. I believe we must make better use of solar and wind. Some form of regulation is required to determine standards. Encouraging home owners to install solar and paying a better buy-back rate will encourage this and reduce the load on the system.	Rodney	retired
2022-07-11 11:20:11	KwaZulu- Natal		Not fully	Solar	1: There are too many questions surrounding reasons that some areas in Okhahlamba do not experience any loadshedding at all. If every area had to have loadshedding , perhaps the benefits would have been achieved some time ago. 2: Due to shocking service delivery are we going to have our line charges reduced? 3) Is policing of illegal connections going to improve? or even happen? Stop cable theft. 4) In this difficult time for businesses/ farmers / tourism/ hospitals etc, why is there sabotage of the plants? 5) Get old plants back on line eg Colenso (on the Tugela) More jobs will be created. 6) Our days of sunshine and light is a huge benefit to all of us, so, introduce day-light saving. Bread winners etc will be home at a more reasonable time and less electricity would be used.	Maureen	retired
2022-07-11 10:46:39	Western Cape		Not fully	Solar	It would be short sighted to scrap the red tape until suitable alternates have been well researched with sensible and cost effective implementation. Both solar and wind in this country are strong contenders for the generation of power but coal will need to be used in the interim. The red tape could be suspended as an emergency measure until the energy debate comes up with a workable, cost effective and safe measure of energy supply. Given our history of corruption, inability to manage effectively, the process must be given high priority to ensure that the company / companies who undertake this service is very closely monitored to avoid any more looting of our country's resources. Eskom was a viable, efficient and well run entity years ago but it has been grossly mismanaged and looted by incompetent people over time. Steps must be taken to ensure that this debacle is not repeated.	Leonard	retired
2022-07-11 10:23:45	Western Cape		Not fully	Solar	Even Independent Power Producers need to be regulated, so that they don't destroy the land where they build. But everything needs to be speeded up. We have an abundance of sunshine. In Botswana every small house has a solar geyser - why not here? If every new and old building had to have a couple of solar panels for heating, and every office block was compelled to generate its own electricity with solar on the roof, we wouldn't have a problem.	Shelley	retired
2022-07-11 09:12:17	Western Cape		Not fully	Solar	you need some legislation applied to IPP's to ensure we provide environmentally acceptable power and safe distribution. i selected solar but all renewables would be my first choice and dependant on where in SA there are applied. Even coal and gas powered IPP's could be used where it makes economic sense and is operated according to good environmental standards.	Eric	retired
2022-07-11 08:15:07	Western Cape		Not fully	Solar	South Africa should switch away from coal which contributes to global climate change to solar and wind which are less expensive to build and which are less damaging to the environment.	Anne	retired
2022-07-11 07:20:58	KwaZulu- Natal		Not fully	Solar	In the interest of Global Warming, I favour ocean hydro plants/wind turbines and solar systems. Coal fired plants are not eco-friendly and should be scrapped asap, as with diesel generators! However, with the ANC, (Africa Needs Coal) attitude, their brainless approach to Africa's dire situation, much needed sensibility will not prevail.	Christine	retired
2022-07-11 07:18:12	Western Cape		Not fully	Solar	In a country such as ours, not only can the heat be converted to solar but also the UV Rays can be used. Yes, Solar panels are significant in the clean energy revolution. Today, however, a new kind of solar panel that harvests the unseen ultraviolet (UV) light from the sun has been developed. UV rays make it through even dense cloud coverage.	ARTHUR	retired
2022-07-11 05:43:40	Western Cape		Not fully	Solar	Instead of all this procrastination, why not help individuals to be subsidised by the state to have their own solar arrays at their homes?	John	retired
2022-07-11 03:48:33	Gauteng		Not fully	Solar	We are blessed with plenty of sun. Wind is also clean and renewable.	Ingrid	retired

2022-07-10 22:48:27	KwaZulu- Natal		Not fully	Solar	Solar is free and available in SA but I'm not sure that anyone can be trusted to get anything right in this country anymore. State-owned enterprises have gone to hell in the past 28 years. Just my opinion!	Sandie	retired
2022-07-10 21:32:14	Gauteng		Not fully	Solar	We live in a country where corruption is rife. We need to have some regulations for power producers. I am afraid that we will just have a new group of corrupt individuals being allowed to participate in power generation.	Mariette	retired

2022-07-08 14:47:14	Western Cape		Not fully	Solar	Solar is not used enough considering we have the best weather for it.	Charmaine	retired
2022-07-08 14:38:41	Gauteng		Not fully	Solar	There has to be more than one alternative to vote for, not simply one, ie Solar + nuclear, or Solar + Hydro Another option not mentioned, and considering the amount of stealing/illegal activities, is HIGH security at every power station and substation - freedom to shoot anyone that illegally comes within 100m of cordoned off power station.	Lynn	retired
2022-07-08 12:19:03	Gauteng		Not fully	Solar	Government should provide household with solar systems. As for 95% of South Africans this is too costly to install. I feel they managed the current system to failure , so it should be their responsibility to get alternative electricity to the people of this country	Stella	retired

2022-07-08 12:18:51	Gauteng		Not fully	Solar	In the current emergency situation, red tape needs to be scrapped in the interests of all SA citizens, especially the job creating small businesses. A combination of Solar and Wind supplementary power generation look like relatively short-term and ultimately long-term options. While new nuclear power stations should certainly be considered, these stations would entail vast capital cost and a very long lead-time to ultimate completion. New Hydro schemes would only seem to be feasible if topography and flowing water availability were present-similar to that used in the Cape(pumping water from lower to upper dams and then generating electricity via the hydro method). Permitting IPPs to supplement ESKOM power supply (which it seems is already being initiated according to reports of urgent activities of some major cities negotiations with IPPs) has merits and demerits. Increased employment is a positive factor. The principal demerit is labour problems. Employees would almost certainly demand unionisation and present IPP companies with problems such as illegal strikes when above CPI salary increases and other unacceptable demands are resisted. Being a poisonous gas atmospheric contamination factor(which affects world climate changes) use of coal for power generation will eventually be phased out when reserves run out or remaining deposits are no longer viable. Use of other fossil fuels is very much under review and implementation by world governments in the interests of "greening" the planet and reducing serious atmospheric and global temperature changes.	David	retired
2022-07-08 11:50:09	Western Cape		Not fully	Solar	Best would be if households could generate their own power by solar. Obviously, in certain housing areas, this would be subject to vandalism but the concept is sound and it works for many people. Wind and nuclear are also options but, if individuals and businesses can choose their source, that would be the best option. As long as it's out of the hands of central government, a way can be found.	Mary	retired
2022-07-08 11:43:31	Gauteng		Not fully	Solar	I say not fully, because if independent producers are brought in, will the producers have to be BBBE compliant, if so I see corruption and red tape as usual. Why has it taken the government so long to wake up. They have destroyed our economy pouring millions into SAA, when keeping the lights on 24/7 is a priority to grow the economy and create employment which includes the small and very important entrepreneurs who create employment. (I see you do not have municipality for Mbombela. I have relocated to White River)	Sheila	retired

2022-07-13 20:01:54	Gauteng		Not fully	Solar	Solar is the most "immediate" solution but should be better priced and not sure if that is the most sustainable in the long term. Independent power producers will not necessarily be cheaper and/or effective to deal with the demand, as they too would want to line their pockets. Stop the exporting of energy to neighbouring countries. Gas should be looked at too. More sub-stations should be built and a better grade coal should be used. Maintenance should be done when it should be done to avoid blow outs. Eskom employees should be paid less.	Van	employed individual
2022-07-13 15:27:33	Free State		Not fully	Solar	Independent Power Producers should be allowed to supply South Africa with electricity on an informed and organised way. Legislation need to be amended to make private supply possible, but quality and standards should be upheld. Renewables like solar, wind and hydrogen should be considered for generation.	Lynette	employed individual
2022-07-13 09:06:46	Gauteng		Not fully	Solar	Something must change !!!! Of this there is no doubt whatsoever. Being held to ransom by government at every turn is now unacceptable. Being forced to pay for facilities when they are not delivered is without question, tantamount to stealing from every South African citizen. In my opinion a combination of solar and wind energy is a no brainer, given that we have sunshine almost every day of the year. I also believe that private energy suppliers should work in tandem with government - this way everyone keeps an eye on each other to ensure that everyone is doing exactly what they should be. Personally, no power compromises my safety, security, well being and frankly I have had it all in chunks - and to add insult to injury, if I don't pay the utilities bill, the power is cut anyway. GOVERNMENT GET YOUR ACT TOGETHER. YOU ARE DESTROYING OUR COUNTRY - DAY BY DAY AND INCH BY INCH.	Dianne	employed individual
2022-07-13 07:35:42	Outside SA	United Arab Emirates	Not fully	Solar	I think all reasonable forms of production should be considered. Nuclear should not be considered as it should require a large amount of oversight that can only be reasonably managed by a government entity. In the near term, other forms of production should all be considered under emergency requirements. In the longer term only renewables should be considered to ensure that long term clean energy is incentivised and thus allowing for long term development of the sector.	Simon	employed individual
2022-07-12 20:13:42	KwaZulu- Natal		Not fully	Solar	Since south Africa Durban is a place with great weather I feel Solar p energy-efficient with be best suited.	Annelyn	employed individual
2022-07-12 19:18:09	Gauteng		Not fully	Solar	Considering the climate crisis and our own country's electricity crisis there is no doubt that we need more sources of power but I would absolutely in no way support and opening of policy to allow for non-renewable electricity providers to have space to sell climate damaging electricity. Do not put in place a policy which will enable further use of coal, gas, oil or other fossil fuels. Nuclear is safe and less damaging to the climate. But the best would be making use of our incredible solar resources as well as wind. I would not support hydro as it usually requires dams that destroy huge swathes of natural habitat, drowning out whole ecosystems and displacing people. It is essential that individual households with solar also be able to sell excess power back into the grid as happens in the UK and other countries. Please, no fossil fuels. Only renewables. For the sake of our children and their future on this planet.	Natasha	employed individual
2022-07-12 16:18:17	Gauteng		Not fully	Solar	Solar, wind and hydro could be employed. We have plenty sun across the continent, wind in the Cape and some water sources where hydro could play a role. The truth is however not wholly of source, but also of management and team work. It is my view that Eskom employees are deliberately sabotaging Andre de Ruyter's efforts. We need good resources and good people.	Ursula	employed individual
2022-07-12 14:58:17	Eastern Cape		Not fully	Solar		Elizabeth	employed individual

2022-07-12 10:00:03	Gauteng		Not fully	Solar	I would say a combination of solar, hydro, wind. We are well situated and our climate is great to consider solar options. The final choice would depend on the region and what is available. In scrapping red tape, we must still ensure that there are reasonable policies in place to prevent extortion and exploitation of the public by massive providers, cost control, and to ensure that the providers are truly independent and not subject to any form of outside or governmental influence.	Anthony	employed individual

2022-07-11 06:47:13	Western Cape		Not fully	Solar	In terms of red-tape, there still needs to be proper planning and basic approval to generate power to go into the grid, otherwise we might end up with half-planned, half-implemented IPP solutions. I do believe Solar is first prize in terms of IPPs, but a mix that includes wind and gas makes sense, especially gas for OCGTs during periods where demand spikes or is irregular. I am not against Nuclear, but Nuclear's biggest issue for me is the cleanup of spent material.	Jano	employed individual

					<p>It's okay to have independent power producers to help with electricity supply. However, corruption is one of the major issues including those who take advantage of the procurement processes in place.</p> <p>We need a way first to eliminate corruption and put strict procurement processes in place.</p> <p>Prices for procurement of electricity with independent suppliers by Government must be regulated. Each of the service providers must be properly evaluated to ensure fairness and accurate pricing.</p> <p>Another solution is to provide subsidy to households that are willing to move to solar. The more people move to solar the less pressure on the grid. Also this move can be regulated in a way that each of these households will have to feedback certain kilowatts back into the grid.</p> <p>We live in a country that has more sunlight to make solar power solution effective. The issue is the price of the solar system for most of the households.</p> <p>Many manufacturers have come up with energy sufficient products. However, this is not enough to eliminate pressure from the grid. Making solar power affordable will result in more households migrating to solar which in the long run will reduce the consumption of electricity from the grid.</p> <p>We honestly need to take advantage of such solutions to improve the current state. Also, businesses should be regulated to have solar solution to help reduce consumption from the grid. This way, productivity will increase during loadshedding and we will also see reduction in carbon emissions from those organisations who use generators during power loss.</p> <p>When it come to management of procurement of electricity from independent power suppliers, we can form committees that will ensure the procurement processes are transparent and corruption free. These committees can include the participation of the public to approve rates and procurement of electricity from independent electricity producers.</p>		
2022-07-11 06:38:18	Gauteng		Not fully	Solar	Furthermore, all of the above does not only improve the current state but will include an increase in employment opportunities.	Gordon	employed individual

2022-07-10 22:56:28	Western Cape		Not fully	Solar	Solar is free and available in SA but I'm not sure that anyone can be trusted to get anything right in this country anymore. State-owned enterprises have gone to hell in the past 28 years. Just my opinion!	FAEEZ	employed individual
2022-07-10 22:53:08	Gauteng		Not fully	Solar	As long as it doesn't only approve the contracts of Rainbow Energy or that belongs to Patrice Motsepe or Pres. Cyril Ramaphosa. If it is above board we would approve it. If it is corruption then we would be against it.	Bernadine	employed individual
2022-07-10 21:10:32	KwaZulu-Natal		Not fully	Solar	I feel the same thing will happen, as currently happening with tenders. There are people in high political power who own companies that involve mineral resources and energy is this not part to the plot to enrich certain influential individuals. Why cant the government build more power stations and expand Eskom's capacity.	Shabalala	employed individual
2022-07-10 21:10:06	Eastern Cape		Not fully	Solar	About 20 years ago Eskom incentivized homeowners with a subsidy for solar geysers to reduce peak demand. It was very successful and would have been more so had Eskom not phased it out. Similarly, homeowners should be incentivized with subsidies to install roof top solar including batteries to be more self-sufficient. The complication is that municipal networks are not designed to handle bulk exporting of excess power, so municipalities also need to be subsidized to modify their networks to enable bi-directional power flow where appropriate. Creative subsidy solutions need to be designed by experts, such as tax deduction incentives, or refunds from a transparently governed financing body set up for this purpose. This is but one of numerous solutions to transition to a carbon neutral energy solution. There are numerous precedents in Europe to guide us on implementation strategies.	Philip	employed individual
2022-07-10 20:45:18	Eastern Cape		Not fully	Solar	Easily Accessible and Sustainable	XoLi	employed individual
2022-07-10 18:12:34	Gauteng		Not fully	Solar	Renewable, quick for households to install. There should be no talk of licenses or penalties for people who use any renewable source and Eskom. And assist indigent poor people to get off the grid.	Verena	employed individual

2022-07-10 06:53:17	Eastern Cape		Not fully	Solar	I'm in-between decisions on this one. Why doesn't government just fire all the corrupt employees at Eskom, then assign competent people who can properly run the place and use state funds to fix Eskom like the ANC has been promising us they will do for years, instead of wasting our tax money on stupid things like R22 million flags, changing street names, moving parliament from one town to another, all their theft, hiding illegal money in furniture, etc, etc. Our government should be awarded first prize for mismanagement of funds. If they had to mange the money correctly and assign ot where it is needed, at the same time removing all the corrupt / rotten apples then things would be much better in our country. The problem I'm having with privately owned businesses is that Patrice & Ramaphosa have a company "Rainbow Something" that they are going to push onto everyone once they have totally crashed Eskom. They stand to make millions if not billions from this. The part that bothers me the most is that they make as if this is for our best interest, mean time it's all about increasing their profits at the end of the day. Another thing, our government screws up everything they touch, who's to say this won't also be a balls up. I feel the best option is to sort Eskom out "properly", like it should have been from day one. ANC are not to be trusted, they lie to us about everything.	Steven	employed individual

2022-07-08 10:36:30	Gauteng		Not fully	Solar	I don't care who generates the power as long as it's renewable, safe and without hazardous waste. Our country is a major polluter, contributing in the worst ways to climate change. We need to get off our dependance on coal and if the government doesn't have the political will to make that change then we need new players. But NOT if they are going to just tow the same line and pollute our rivers with frakking, or our water with radiation or our air with coal. It has to be clean, sustainable, and environmentally responsible. And also not reliant on partners with shocking human rights violations like Russia, China or the Middle East .	Nicola	employed individual

2022-07-08 10:28:31	Gauteng		Not fully	Solar	<p>Firstly, if you want to see what a fully privatized, largely unregulated electricity supply looks like, look to the great state of Texas, USA. If you squint, it looks similar to our situation, as in crumbling infrastructure, people dying because of power failures etc. So I am not convinced that "unleashing" the private sector will solve our problems.</p> <p>BUT there definitely can be a relaxing of relevant regulations to allow more players to enter the market, but it MUST be in a way that still benefits the maximum number of South Africans in the long term.</p> <p>We *can not* continue with fossil fuels. As things stand, we are globally, already on the brink of disaster. The next 10 years are going to be tough already in terms of natural disasters, driven by rising temperatures.</p> <p>Nuclear will take to long to develop. Wind is even less reliable than Solar. Hydro sounds good, but remember South Africa is actually a semi-arid country!</p> <p>That leaves, as the fastest, best proven option: Solar.</p>	Hendrik	employed individual
2022-07-08 10:13:25	KwaZulu-Natal		Not fully	Solar	<p>We need to use a mixture of solar, hydro and wind, depending on which suits each location best. Nuclear may be an option but i really do not trust the skill and corruption in this country with regards to nuclear. We need there to be no political road blocks, and government and political individuals need to stay out of the running of it. We need to run this as an efficient business, not an over weight SOE.</p>	Justin	employed individual
2022-07-08 08:54:42	Eastern Cape		Not fully	Solar	<p>Solar on roof (not at land) and wind energy (land only, not at sea) are the only sustainable options; sustainable regarding energy and energy waste, people and nature, money wise. These energy sources are the only ones who are sizable to local needs, so no overspill, and easy to expand.</p>	Saskia	employed individual
2022-07-08 08:52:55	Gauteng		Not fully	Solar	<p>We need as many suppliers as possible helping us out ideally from renewables however due diligence is necessary to ensure they are competent and not part of the gravy train. If we wish our country to have an economic future we cannot afford to have loadshedding at all.</p>	Alys	employed individual
2022-07-08 04:08:19	Gauteng		Not fully	Solar	<p>Solar and wind is the best option. Nuclear power has a very dangerous and toxic waste and where will that waste be dumped? I agree with the removal of the the red tape only if local companies are the ones to give us the energy that we need. This thing of always having to look to Europe or other countries shows that we cannot stand on our own as a country. Everything must be 100% local. We can look to foreign countries for their energy models and it ends there.</p>	Nompumelelo	employed individual
2022-09-07 15:35:51	Gauteng		Not fully	Solar	<p>Well competition will be too tight for those supplying energy unlike now its only Eskom</p>	Cebisile	employed individual

2022-08-11 09:58:43	Gauteng	Not fully	Solar	<p>Firstly I don't believe proper process and procedure should be removed, we need valid and transparent processes to avoid corruption more than ever now. We cannot allow the individuals in charge to allow things to get so bad that an emergency is declared and they are consequently allowed to do as they please.</p> <p>I believe we can solve the power supply problem very quickly without huge investment from government and with huge benefit to South African citizens and businesses. There are huge reserves of capital available in corporate South Africa that could be leveraged here. What I believe we need to do is allow individuals and businesses to sell power from their solar systems back into the grid through simple and transparent policy. The equipment to do so safely is absolutely available and can be specified or built into the meter at the individual or businesses cost. I believe these should be specified either broadly enough to allow a few options and any manufacturer should be allowed to apply for approval of their equipment and quality control.</p> <p>The advantages of this option are as follows:</p> <ol style="list-style-type: none"> 1. There will be a massive amount of clean power brought on-line quicker than any other option that I can think of at almost no cost to government. Also, the demand on the current infrastructure is reduced with every installation. 2. There would likely be sufficient demand for equipment for either local entrepreneurs or international manufacturers to set up local production which would create jobs and reduce the costs of these systems. Furthermore it would provide a massive boost to the installers of these systems who would have plenty of work and would no doubt be able to employ and train a lot of people. 3. Those who install solar systems for their own use are no longer lost to the power economy. When they are lost it reduces the demand, the economy of scale and the ability to subsidize power infrastructure and supply to those who cannot afford it. 4. With additional supply available Eskom will be more able to do the maintenance to their infrastructure that is so badly needed to stabilize their business and reduce their costs as breakdowns are more expensive than routine maintenance. 5. You instantly create the competition to Eskom that has been discussed lately to moderate the cost of power which is so badly needed. Furthermore that competition is not subject to the same pressures and influences that affect Eskom which removes the possibility of individuals or groups holding the country to ransom!! 6. It allows businesses who are facing ever increasing costs the ability to reduce costs and stabilize their own supply such that they are able to operate more consistently contributing massively to the countries economy. If they are able to be payed for any excess power produced it makes it more feasible to finance an installation if they do not have the capitol. 7. The people being made rich from the production of our power are more likely to be South Africans or at least South African Tax payers and definitely more broadly based than the current system. <p>The disadvantages of this would be as follows:</p> <ol style="list-style-type: none"> 1. Solar is not the most consistent source of power but if Eskom invested instead in storage systems we could take advantage of more and more of it. Furthermore the investment in ones own storage is then easier to make if the generation is subsidized by the sale of excess power. 2. It might be difficult to manage the countries total generation capacity but it may be more manageable with our eggs in thousands upon thousands of small baskets instead of all in one big basket. The price paid for power could be adjusted according to demand through transparent policy and equations. 3. There is a large amount of admin that comes with this system but the infrastructure for it to be done is largely in place already for the billing of power consumed. The additional administration could require more employees to do it but those are jobs as well and the cost thereof can be build into the price calculation. <p>I'm sure there are many more hurdles to be cleared in setting something like this up but the conversation needs to be started such that we can discover these hurdles and have as many people as possible thinking of ways to overcome them.</p>	Craig	employed individual
2022-08-03 21:07:18	Gauteng	Not fully	Solar	<p>The sun shines for about 9 hrs in day and it is free. The government should subsidise all house holds with solar and the power problem would be resolved after all eskom has been looted by the Guptas and members of the ANC government. It was once the most profitable S. O. E. with a surplus of energy now it is being bled to death by tender preneures and the like. A sad day indeed. A handle full makes the billion of Rands and the entire country suffers. Where is our leadership. Would they stand up please and act accordingly to save our beautiful country.</p>	Vinesh	employed individual

2022-07-17 12:17:39	Gauteng		Not fully	Solar	Eskom was producing the cheapest electricity in the world with no short falls, till the present government got involved. Large independent suppliers should be kept at the minimum, or they will be able to hold SA at ransom as the unions doing at present. A far better solution will be to make solar devices cheaper to enable home owners to provide their own electricity. The access electricity produced by homeowners can be fed back/ sold back to municipalities. This will stop people holding our nation at ransom. There will be no need in wasting large pieces of land to set up solar panels, mines ect. No sabotage of large instalations, stealing of billions will stop or is this what our present government want?	Rian	unemployed individual
2022-07-15 01:46:10	Gauteng		Not fully	Solar	If our government can hire qualified people we can have a problem of Electricity 10 years we did not experience loadshedding but this re shuffling people who are competent and replace with cader employment is the problem to South Africa	Mmakhu malo	unemployed individual

2022-07-25 13:09:31	Western Cape		Not fully	Solar	<p>Solar is our current best solution.</p> <p>Everyone should also be allowed to generate their own electricity via solar as the sun was provided to us all free by God.</p> <p>Independent power producers must be totally independent with no links to anyone in government or government linked organizations otherwise we'll just have more bribery and corruption taking place. Anyone caught being linked to someone in government or involved in bribery should immediately be imprisoned and this be listed in all contracts for independent electricity supply.</p>	D	

2022-07-18 11:26:02	KwaZulu-Natal		Not fully	Gas	Of course if you label something as "red tape" it is immediately negative and I'm sure much of the legislation falls into this category and therefore I'd say "scrap it". However, what I have heard from engineers involved in this very issue is that just opening up the grid is not as simple as it sounds. Therefore retain legislation that aims solely to ensure that the producers supply power that is sustainable and safely integrates with the grid (ie the required engineering standards etc) Scrap legislation that aims to help social transformation, just transitions, preferential procurement, green transitions etc. We cannot afford this at this time.	James	business owner

2022-07-08 12:22:09	Western Cape		Not fully	Gas	Power generation needs a 50 year lead time as we used to do. This is crisis management where the wrong long term solutions will be accepted. Frequency control is vital for baseload power to keep all timekeepers in the country on the same time clock. Ad hoc power suppliers will not be able to do this! Solar and Wind are short term both expensive and useless for dependency. The only short term solution worth anything is frack for gas and run the turbines on gas, not diesel and install more gas turbines. Also get competency into the workforce to be able to repair coal stations correctly. Stop vandalising the systems by cable theft. Extend Koeberg for 20 more years of baseload and install new nuclear power stations for long term. Start long term NOW as well as crisis management which actually has little chance of saving the neglect of thirty years of a once superb power supply system recognised as one of the best in the world. The recommendations of 1992 to install 4 more Koeberg type reactors not being implemented was the first of many continuing mistakes. Renewables will not get us out of this problem. Remember also that Storage is very expensive and the the MW megawatt rating of batteries is not as important as the energy capacity measured in MWh. that is megawatt hours ...how long the battery can supply the stated power. There are far too many advisers who do not really understand the reality of baseload, midrange and peak power distribution demands of a country. We need expertise in making these most challenging decisions.	Don	retired
2022-07-09 01:10:07	Gauteng		Not fully	Gas	We need a cleaner base load	Tumi	employed individual

2022-07-08 15:20:40	KwaZulu-Natal		Not fully	Gas	<p>The electricity situation will not be solved by scrapping legislation and allowing IPP's to freely start building power plants. This could cause numerous problems on its on. Monitoring and maintaining standards are just but one aspect that will be a challenge.</p> <p>One key component missing in Eskom is proper training to improve competency. Eskom needs to jack up training.</p> <p>Use of O&M contractors for the interim will help alleviate the poor competency levels and help bring the existing power plants to a reasonable operating level.</p> <p>Holding management accountable for the proper running of the power plants should be strictly adhered to. Poor and incompetent managers are partly to blame for the degradation of the power plants. Get seasoned competent people.</p> <p>Lastly get rid of the corrupt managers and employees.</p>	AKASH	unemployed individual
2022-07-17 17:07:53	Western Cape		Not fully	Other	I support scrapping a government that has broken the power supply system through cronyism. Any other approach would be to put the cart before the horse.	Marianne	business owner
2022-07-13 17:12:27	Western Cape		Not fully	Other	A combination of sources that are good for the environment. Neither coal or nuclear is good. Especially since the nuclear power plants are also experiencing periodic shutdowns. I would suggest a combination of wind, solar and natural gases.	Nisreen	business owner
2022-07-12 13:56:21	Western Cape		Not fully	Other	A combination of various resources. Do we not pay tax which funds government to supply electricity? If we provide private sources won't tax have to change as well	Karin	business owner
2022-07-12 10:25:37	KwaZulu-Natal		Not fully	Other	Fire Anc government and get white people back in power so they can fix anc corruption.	Raphael	business owner
2022-07-11 11:22:49	Gauteng		Not fully	Other	Whatever power is available right now, to push into the grid, needs to energise by whoever, whether wind, coal or solar. It is not just about the supplying, but also the cost to the end user, it should become affordable to all South Africans living in South Africa. it should create jobs for South Africans too so they can pay for the electricity. Not for Chinese not for Russians not for Americans not for the ANC, DA, EFF but for us South Africans.	kai	business owner
2022-07-11 08:31:23	Western Cape		Not fully	Other	I am for private energy production, however it will need to be a form of renewable or nuclear energy. We cannot allow private producers to use fossil fuels	Craig	business owner
2022-07-11 08:21:00	Gauteng		Not fully	Other	Large scale energy efficiency and load shifting programmes would be the quickest and most cost effective way to reduce pressure on the grid while additional generation capacity is being built. This must be implemented at energy users, with solutions targeted at specific sectors, including industry, households, SOE's and municipalities.	Craig	business owner
2022-07-11 08:16:19	Western Cape		Not fully	Other	We need a blend of solutions that are most appropriate for each context. From household and business roof top solar that can feed excess generation back to the municipal grid, to wind generated power at the coast, to new tech such as tidal or even micro scale hydro, where water resources exists (rare in our country). Most importantly, we need to select tech that will not damage functioning natural ecosystems and food production. And municipalities needs to do some careful calculations and see if they can subsidise this, especially at a household and business level.	Marie-Louise	business owner

2022-07-11 07:52:25	Gauteng		Not fully	Other	<p>Surely in this day and age we do not need to rely on everyone's personal opinion for matters in which they have little expertise. For mission critical decisions that influence our future in multiple ways there has to be sophisticated modelling of the all of the various alternatives and scenarios, not so much for prediction and prescriptive ranking of the options, but for rigorous exploration of the consequences of the various assumptions, with a range of all possible (known or predicted) outcomes evaluated, for their advantages and disadvantages. This is not for making predictions but to enable the best decisions to be made. The best models can then be presented with the variables adjusted for different scenarios and the best decisions should be apparent. Of course, the model development should be transparent and agnostic to political alignments. After all, we all have to live with the outcome.</p>	ML	business owner
2022-07-11 02:05:19	Gauteng		Not fully	Other	<p>This is not a clear cut solution that can be answered in one paragraph. There should be an independent business analysis completed on the the entire energy infrastructure to determine the root cause before even discussing the solutions. I am an engineering consultant and without first determining independently the issues and possible solutions this is bound to fail even more spectacularly than current operations.</p>	Jan	business owner

2022-07-10 22:48:55	Gauteng		Not fully	Other	With all the corruption we live with it is not that straight forward to simply privatize or buy power from independents aka moonlighting family and friends of government officials Why are we are we selling electricity outside of our borders given our own crises! We have terrific brainpower in businesses that should be collectively brought on board to brainstorm and implement the right solution. What happened to the Eskom that used to flight radio and tv adverts to bring the warmth of switching on a light into your homes!!! How many people can even remember those adverts. Companies and building owners should be penalized for leaving their building fully lit when empty especially at night	Patricia	business owner
2022-07-10 22:48:22	Western Cape		Not fully	Other	I feel that we should be treating the matter urgently, however, I do not support us selling out to China or any other country. I believe that Eskom was once a world class Company, it is only since the ANC came into power that it has not been sustained and with the right people in place it can be great again. We should be able use whatever method is going to work soon and perhaps even a combination of methods.	Cheryl	business owner
2022-07-10 19:19:36	Western Cape		Not fully	Other	PowerParks* provides the answer to most suburban and urban areas of the Western Cape. PowerParks offers a) A pet and child friendly park that provides enough green power to meet or contribute the needs of a community. b) PowerParks* combines immediate and available mixed sources of energy including low level wind, concentrated solar, bio mass to gas, energy from moving vehicles, energy from running streams. c) Powerparks* does not represent any manufacturer or specific technology. It applies the most suitable technology, design and equipment - to the specific site. The Powerpark* simulator measures all effective resources. PowerParks* offers a private public partnership with ownership handover.	Roy	business owner
2022-07-09 21:18:19	Gauteng		Not fully	Other	I read through one of the plans and honestly, government has proven it cannot handle the current electricity crisis... Generation capacity can only be transitioned over time, to solar, gas, hydro and wind. Right now, I'm not aware of any kind of plant or area, that has the capacity to immediately go full green for the entire nation - it will take some time, BUT, I do know there are various institutions that have setup large generation capacity to keep going under loadshedding, as if nothing has happened and that's where the feed-in tariff system was so crucial, but Eskom turned it off, because it found that people can quite easily zero or red their electricity bill to Eskom's side. Deregulation isn't the answer (though an easier entry point to the market is, such as a much higher capacity of generation has to be allowed and people have to be able to sign up with a competitor of choice - just like you have various internet service providers that share infrastructure). Nuclear HAS to be avoided at all cost. Koeberg was supposed to be decommissioned, but instead is still running. Gross negligence and incompetence will guarantee accidents and fatalities, especially in the handling of nuclear waste. It's not a good source of clean energy - it's probably one of the worst. MAJOR headsup - do something about the unions! They are supposed to be out for best of the workers and the nation, but crippling a nation with destructive and selfish behavior is NO okay. They need to be disciplined as well - especially when their members vandalize. Fining them to pay for the damages or removing their status as a legal union for a period, or something, but there has to be some retribution for the damage they cause.	Marius	business owner
2022-07-09 21:14:46	Western Cape		Not fully	Other	Red tape? Dear Lord, why have they not removed the red tape years ago? This issue with ESKOM is not new or was it more important to profit or steal from failing infrastructure. Scrap the import taxes on renewable energy sources, scrap the municipal registrations when you install renewable energy, scrap the basic you need to pay on the municipal account as you generate your own power. While we are at it, make the purchase tax deductible as you prohibited us from moving to renewable energy for years	mike	business owner
2022-07-09 21:12:20	Western Cape		Not fully	Other	Red tape? Dear Lord, why have they not removed the red tape years ago? This issue with ESKOM is not new or was it more important to profit or steal from failing infrastructure. Scrap the import taxes on renewable energy sources, scrap the municipal registrations when you install renewable energy, scrap the basic you need to pay on the municipal account as you generate your own power.	Ann	business owner
2022-07-09 14:42:52	KwaZulu-Natal		Not fully	Other	We will under NO circumstances accept the handing over of our national power supply grid to foreign entities that can then charge us exorbitant prices for energy or dictate how we should use and consume electricity. However we have to allow the private sector, municipalities, and private individuals to produce and feed into the grid. Our country cannot afford for our electricity to fail!!!!	Kerry	business owner

2022-07-09 13:15:47	Western Cape		Not fully	Other	<p>South Africa desperately needs additional electricity generating capacity. Eskom has been unable to develop needed capacity despite years of effort and hundreds of billions of Rand in debt. Independent Power Producer (IPP) projects are widely recognized as by far the most cost-effective mechanism for engaging the private sector in infrastructure service provision. IPPs are successfully used across Africa, even in the poorest countries. And South Africa has experience administering one of the world's most successful IPP programmes, the Renewable Energy Independent Power Producer Procurement Programme (REIPPPP). Between 2012 and 2015, REIPPPP attracted US\$19 billion in private investment in 92 IPP projects, totalling 6,327 MW, with wind and solar PV prices among the lowest in the world. The generating capacity added to the South African grid by the first four bid rounds of the program was more than the existing total installed capacity of every other African country. Over this period, South Africa ranked among the top ten countries globally in renewable energy IPP investments, ahead of Canada, Brazil, Spain, and France. According to research group Meridian Economics, South Africa's load shedding in 2021 could have been reduced by nearly 97% if the Zuma government had not stalled the REIPPPP in 2016, largely to preserve Eskom's dominance in the power sector and because of State Capture activities with the Guptas. Subsequent events, including mismanagement and corruption in Eskom, as well as the destructive load-shedding now underway, demonstrate that effectively halting South Africa's IPP program was a colossal and tragic mistake., and its impacting the majority of South African citizens the worst South Africa's IPP efforts must be restarted immediately.</p>	Ros	business owner
2022-07-08 21:18:26	Gauteng		Not fully	Other	<p>A mix of renewable energy is needed; both wind and solar and hydro where logical. All large scale applications need to go through environmental authorisation so must still follow legal processes.</p> <p>Political figures such as the Minister of DMRE, Mr Mantashe must step down from their positions and allow qualified, knowledgeable and experienced leaders to take the helm to lead South Africa to a sustainable and stable energy future.</p> <p>Politicians should not be holding ministerial positions unless they have a proven track record of success in the private sector in that specific field and have the required credentials. In the case of the DMRE, qualified and experienced engineers and economists should be making the decisions.</p> <p>Much has been done to define a just transition and the Presidential Commission for Climate Change has brought the NGOs and industry leaders together. The recommendations made to and by the Commission must be taken into account.</p> <p>Load reduction can also be encouraged in a number of ways:</p> <ol style="list-style-type: none"> 1. Subsidies for LED lights when swapping out halogen bulbs 2. Requiring all new developments and homes to prove energy sustainability during the building plan approval process. 3. Halting the construction of new shopping centres which are non-essential and heavy electricity users, unless a substantial need can be proven that a community is underserved by retail space. Where shopping centres are built to merely compete with each other, this is excessive and draining South Africa's resources. 4. Requiring any new large commercial buildings over 5,000m2 GLA to produce at least 30% of their own power through renewable technologies; excluding those in townships or marginalised areas. 5. Requiring insulation, shading and energy efficiency on construction of all new buildings valued over R 1 million. 6. Requiring all large office buildings to switch off lights at night when offices are not in use (excluding security lighting). 7. Requiring all large commercial buildings to install motion sensors to switch off lights when rooms are not occupied. 8. Revoking licenses for large outdoor and LED signage while we have insufficient generation capacity, to be reviewed only when excess generation capacity is achieved. 9. Biogas generators installed at landfills in the City of Joburg have never been commissioned - these can be commissioned to bring additional power online and rolled out in other municipalities. 10. Sewage treatment plants can produce their own power - Joburg Norther Sewage Works has this capacity and this can be rolled out to other sewage treatment works. 	Kristin	business owner

2022-07-08 10:51:22	Gauteng	Not fully	Other	<p>The entire Eskom issue is a fabricated disaster.</p> <p>I am personally aware of Eskom board members having informal meetings in 2003/2004 already, discussing how to implode Eskom from within so people will have no choice than to BEG for the problem to be fixed - by allowing private businesses to 'step in' and 'save them'.</p> <p>These board members and they business buddies were already setting up their corporations way back then to be ready and waiting with the solution to their perfectly designed problem...</p> <p>So if this route is followed at this stage, people should be wide awake and weary, checking to ensure there are NO connections with former Eskom board members way back in 2003/2004!</p> <p>That being said, the entire energy issue is a terrible scam at a much bigger level, as technology have been suppressed for well over a century that would make it possible for people to have an abundance of energy at NO COST!</p> <p>Obviously that have not, and will probably still not be allowed, because a lot of fat cats became loaded through milking the unsuspected populace.</p> <p>There are however concerted efforts under way to bring these facts to the knowledge of the general populace, and it is no longer that easy to just kill off every person coming up with the solution. The real Tesla's solution is still available, among others, and this should soon become general knowledge.</p> <p>Given that people are increasingly turning their backs on the lying mainstream media, all owned by the same Soros-backed corporations, and firmly in the hands of Vanguard and Blackrock at the top, we may at last see the truth starting to trickle through!!!!</p> <p>If this would go forward the way lots of very good people envisage, working tirelessly behind the scenes, the entire issue of 'companies generating power' and therefore cashing in on the killing fields, holding millions of people hostage to their whims, while those companies continue making loads of money, will die a natural and well deserved death! People will no longer have to be at the mercy of ruthless scum who make their profits by increasingly squeezing the last drop of real energy and effort from the people, while they continue manipulating the stock exchange!</p> <p>YOU CANNOT MAKE MONEY OUT OF NOTHING, BECAUSE AT SOME STAGE THE DAY OF RECKONING WILL COME, as the SHARE MARKETS and the RESERVE BANKS ARE ABOUT TO DISCOVER!</p> <p>BUT, you can get free and abundant energy from the ether!</p> <p>It's all around us!</p> <p>Waiting for 'permission' from our criminal government to save us from being raped by the system, with Ramaphosa working for Claus Schwab's WEF (World Economic Forum), funded by George Soros, is like begging to send in even more rapists!</p>	M	business owner
2022-07-08 10:45:42	Gauteng	Not fully	Other	<p>In a democracy like ours which has seen such corruption and inequity scrapping all regulation on providing power to the nation cannot be the solution. There needs to be some level of governance around this resource which I believe that each and every person residing in South Africa (that is a legal resident/legal foreigner) should be able to receive power.</p> <p>An unregulated industry with regards to this essential requirement for our people could potentially lead to extortion and abuse and that cannot be the way.</p> <p>We need a process that is fair, equitable, safe and affordable for all.</p> <p>With regards to a preferred source, I believe that in this country we are blessed with diverse topography and geography that we could pursue many of these different resources. I prefer utilising renewable energy though that would not necessarily deplete our natural resources. It is easier and probably more economical to replant trees as opposed to waiting for the earth to create more coal, gas, etc...Having said that I am not sure of the impact of burning wood on CO2 levels. What about using the waste from agriculture as a source of generating fuel?</p> <p>I think that this is a great opportunity to see a true PPP at work where everyone is able to contribute to the solution and not only the select few and those in power.</p>	Catherine	business owner
2022-07-08 10:19:40	Western Cape	Not fully	Other	<p>We should use a combination. Nuclear and hydro for base load, wind and solar to take up the slack. You cannot completely deregulate supply as it's dangerous to have independent producers just pushing power into the grid - you'll damage induction motors and various large power users if the supply isn't carefully managed. We do need to cut red tape, but it needs to be done sensibly.</p>	Kerry	business owner
2022-07-08 10:00:52	Gauteng	Not fully	Other	<p>Any size business (big or small) must be easily and quickly authorized to produce any electricity by any means necessary. Access to land and water for the production of electricity must be incentivised and expediently made available.</p>	Jose	business owner

2022-07-13 20:49:49	Gauteng		Not fully	Other	<p>My most obvious choice is biogas. It is the greenest of all with resources constantly and even cost free available. Sewage, garden refuse, dog poo, cow dung, pig manure, household and commercial food waste can all be used to cheaply and constantly produce electricity right where it's needed. Every town can have its own biogas plant. Every town will create jobs. Resources will need minimal transport costs. The byproducts can be used as fertilizer and even dehydrated and made into charcoal.</p> <p>Solar, wind, water are not necessarily green. Privatising things like water, electricity and health care leads to monopolies and much higher expenses. Just compare the price of electricity supplied by companies who resell electricity like Rural Free State or Orania Vs ESKOM. You pay twice for the electricity which is still generated by ESKOM and contribute to the expenses of both ESKOM and the resellers.</p> <p>Could the sudden urgency to scrap the red tape have anything to do with Patrice Motsepe's contract to produce power?</p>	Amanda	retired
2022-07-13 19:00:47	Gauteng		Not fully	Other	<p>Hydrogen Fuel Cells operate 24/7 and without pollution.</p> <p>Fixed installations can be designed for adequate safety.</p> <p>Hydrogen production plant can be designed for renewable power.</p> <p>South Africa used to have the capability for such a project.</p> <p>Longer term planning should have been ordering nuclear plants every 5 to 10 years. 2022-07-11 15:01:56	Western Cape		Not fully	Other	By other I mean hydro, solar, wind and only if France can be involved nuclear. If red tape is scrapped we DO NOT need another Digital Vibes scandal!!	Suzanne	retired
2022-07-11 13:25:55	Western Cape		Not fully	Other	It is hard to predict what will happen with the proposed changes but it is clear that changes need to be made not only urgently but also wisely for the medium and long term. It is unlikely that changes would be noticeable for the short term (<2 years). The only short term improvements would be tax rebates on home installations of solar power. The ideal is a single system which has excellent planning and involves running appropriate facilities by skilled persons and is environmentally favourable and sustainable. This makes for scale of economy and avoids complete commercial exploitation. My impression with the current system is bad maintenance, bad planning and corruption as well as probable sabotage and definitely non-payments. This could have been gained from funds that were corruptly wasted in this country albeit that they would be accounted for under other purposes. Similar problems could be encountered by a hasty introduction of medium and long-term projects. I have not been entirely convinced of the benefits of wind energy derived and have noticed impacts on environment.	David	retired
2022-07-11 10:13:46	Free State		Not fully	Other	What good will it do to introduce just one means of energy supply. I think government must man up. Stop making laws that burdens this country extra. What is needed is to stop BEE. Put competent people in their job positions. Manage our infrastructure properly. Stop the sabotaging of ESCOM powerstations. Stop the theft of copper cables. Stop the stealing of ESCOM coal. Stop the stealing of electricity in townships. See that municipalities stop pocketing the electricity money paid by users and pay ESCOM his due. Lastly. Pray for the conversion of hardened sinners that will not otherwise change.	Hertzog	retired
2022-07-10 16:45:45	KwaZulu- Natal		Not fully	Other	It worked GREAT decades ago... Then the people still needed to be qualified contribution dangerous jobs. This is MASSIVE, Now my question is... they new the situation, still didn't go to work, still demanded increase for just because we don't know what we are doing. Take that money they roll around and pay those people who had the guts and the knowledge to keep it all going. Your surely can see without fraud who can and who say they can do their jobs. What happened to the trial periods. People know the can't be fired they will just go to the union or...or... or... People pray for work... others just demand because they refuse failure to understand correctly. APPOINT PEOPLE YOU CAN DEPEND ON	Sariena	retired
2022-07-10 14:28:43	KwaZulu- Natal		Not fully	Other	We do not have the luxury of selecting one particular source of energy. Protection of the environment is very important, but the growing of the economy to support the unemployed and those sectors of the population in dire needs, even starving is also a responsibility that must be fulfilled. Therefore the solving of our energy crisis in a structured and balanced way is essential. Scrapping the IRP does not provide the ultimate answer. An IRP administered by unbiased and knowledgeable persons in a timely manner can go a long way to ensure that the right decisions are made, which are well thought out and make both environmental and economic sense. I don't think that is asking for the moon, but going one direction of solar and/or wind could be disastrous.	James	retired
2022-07-10 12:03:00	Gauteng		Not fully	Other	This is a matter to be investigated by experts I do not think it is a matter for the public to decide by a simple answer to a simple question It would be preferable to ask for public opinion/comment after reasonably detailed decisions have been expertly published	Peter	retired
2022-07-10 11:17:41	Gauteng		Not fully	Other	The grid is still the best way for power. Gas very expensive and it can also give problems . Solar when it breaks you need lots of money to have it fixed. Not going into detail .the other ways a big no no . Privatize Eskom. Employ people that can do the job to fix it	Nicky	retired
2022-07-10 04:39:20	Western Cape		Not fully	Other	Independent Power Producers should be allowed. Their affiliation, contacts, finance and expertise thoroughly investigated to exclude politicians of all tiers. A mix of Power Production should be allowed. Not one source of energy only.	Doris	retired
2022-07-09 19:57:14	KwaZulu- Natal		Not fully	Other	Energy supply should be multi pronged, we do not need to kill the other to avail the other. We should build in support of what we have not to sabotage readily available energy infrastructure but to come with other prongs ie gas, solar, nuclear etc. We should learn to be internally innovative without attracting outsiders to tell us what or how to solve our own problems. I think the main thing is to make energy available for our Country and others that are in need. And we should always go for what benefits us first.	Thabiso	retired
2022-07-08 21:44:13	Western Cape		Not fully	Other	If the law needs to be amended to allow private companies to supply electricity to South Africa then the law must be changed asap. After that the government needs to step out of the way, NO BEE, or any other nonsense and allow private businesses to do what needs to be done. The government and Eskom is clearly not able to provide the country with electricity, causing businesses large and small to close and people losing their livelihoods. It is a gusting shame that incompetent people are allow to hold the citizens of this country hostage to get salary increase which they clearly do not deserve. Union actions like the last Eskom strike needs to STOP.	Annatjie	retired

2022-07-08 11:40:40	Gauteng	Not fully	Other	<p>Renewable IPPs should have most red tape removed, however if these IPPs intend supplying power from remote areas with no transmission infrastructure they should be regulated as higher cost will be a reality. For immediate solution to power issues Eskom should make every effort to bring all the generating plants into to a state of repair as this will meet the current demand. Going forward the emphases should be to make South Africa an independent power producer. If we can get past the Environment Domesday Practitioners we should use every locally sourced material, be it coal, gas, oil, renewables and nuclear provided it can be done cost effectively. Let the First World polluters pay for South Africa's environmental protection actions.</p>	Philip	retired
2022-07-08 10:19:37	Gauteng	Not fully	Other	<p>Both Solar and wind are easily installable in smaller "transactions" and so each time a decent amount becomes available this should be utilised - eg - one wind turbine or one solar farm at a time.</p> <p>All domestic / business production that exceeds the localised usage amount should be allowed to trickle back into the network.</p>	Richard	retired
2022-07-08 08:47:49	Western Cape	Not fully	Other	<p>These are not questions that can be answered so simply. Without proper planning and management there is danger of a boom/bust cycle. Un-bundling Eskom may help.</p> <p>We should not expect Eskom to allow uncontrolled access for input to the grid so the term 'red tape' is dangerously loose. It is also clear that we have (hopefully) a short-term (5 years?) problem while Eskom gets it house in order but power generation is generally a long-term game. (The exception would be power ships) but a long-term (20 Year contract) for a short-term problem is inappropriate.</p> <p>Existing approved projects must obviously be accelerated.</p> <p>As regards what is most suitable and appropriate, I support the urge to move away from coal, but that is what we have. Apart from that I have no ideological preference for 'renewables' versus gas. Hydro would be my first choices for base-load but it's not clear that this is actually an option. My next choice would be nuclear.</p> <p>We may regret this rush to fix when we see the resultant pricing per kWh.</p> <p>Too few people actually have enough knowledge on these issues to have valid and meaningful comment. Surveys like this are a sticking plaster for a broken leg.</p>	Stephen	retired
2022-07-08 08:41:14	Gauteng	Not fully	Other	<p>The Independent power produces and specifically the Renewable Wind and Solar Industries must be subject to the same requirement to provide On Demand Power by the utility Eskom.</p> <p>For some absurd reason they are being allowed privileges that excuse them from the market requirement of On Demand Power that the other OCGT's are forced to meet to be an Independent supplier. This is preferential discrimination against the other competitors and must be anti-competitive behavior.</p> <p>Th issue is that they the RE Wind and Solar are actually exacerbating Eskom's problem in a number of ways.</p> <ol style="list-style-type: none"> 1. They are parasitic to the grid and increase the cost to Eskom disproportionately because Eskom are forced have to take the power first at a higher cost even when it is not needed at the time. 2. Addition costs that Eskom is burdened with is providing a 24/7/365 back-up o these industrial players including a spinning reserve. These costs are also passed on to the consumer an Taxpayers when the service provider should take responsibility for these costs. 3. Th facility are additionally burdened with addition cost to try and accommodate two incompatible energy types, that of deterministic and non-deterministic systems. So you end up with unnecessary duplication of costs which Eskom have foot the bill for two overlapping and redundant generation systems when you could have had just one . The costs are being passed through on to the consumer and Taxpayer which is a hidden subsidy and again should be passed back to the service provider. <p>If The presidency and Public Enterprises Minister Pravin Gordhan are seriously looking for emergency solutions. This should be the first priority. The Tax-payers should not be funding private enterprises who actually deliver nothing of any use.</p>	John	retired
2022-07-08 08:32:45	Western Cape	Not fully	Other	<p>All discussion is about increasing electricity production. It would be useful to tackle demand reduction, which would produce results more quickly than electricity -generating facilities can be built.</p> <p>I suggest helping householders to install solar hot water. Most are receptive to the idea, because it will save them money, but nervous about investing the capital required to do so.</p> <p>It is important that help should be conditional upon installing a non-existent - in practice, probably gas - backup, else a few cloudy days will have Eskom flat on its back.</p>	Bill	retired

2022-07-11 16:09:28	Western Cape		Not fully	Other	<p>There is a lot of renewables that is getting investment already. The best and quickest way to help this form of energy is battery storage. This will help both the variability of renewables to provide a more constant feed into the grid and also with unexpected loadshedding from unreliable coal power. It is a no-regret option with whatever future investment happens this will add significant security of supply.</p>	Daniel	employed individual
2022-07-11 13:51:49	Western Cape		Not fully	Other	<p>Although I do support the "scrapping of policy red tape for IPPs" I do think that a policy framework within which the IPPs work and supply power is essential. A free for all may not result in certain sectors of South African society benefitting at the expense of others. The basic principles of "minimum free" and/or partially subsidised must be in place to avoid exploitation for "profit" at the expense of societal integration.</p> <p>The South African context requires a mix of methods for power production. There needs to be a drastic increase in renewables while coal should use should be phased out/down. The present nuclear production may still be needed however, this should not be expanded.</p>	B	employed individual
2022-07-11 10:32:43	Outside SA	United Kingdom	Not fully	Other	<p>There is no quick answer. What is clear is that the current problem (highly inconsistent electricity supply to business and households) is not mainly a policy issue but a practical one: skills and experience; budget (it's enough but has not been used for its stated purpose - this is via mismanagement, theft and poor decision making); labour regulations that stifle the company.</p> <p>Wind and solar are expensive and not consistent enough. Hydro is badly managed and also not consistent enough. We need a mix.</p> <p>But Eskom is still the central pillar and needs to work properly. Management must be empowered to do their jobs fully - leave the politics for others.</p>	Paul	employed individual
2022-07-11 09:46:45	Gauteng		Not fully	Other	<p>I think it should be both Nuclear and Renewable energy. Renewable(Solar) energy will be quicker to setup and start generating, relieving strain on the current power generation systems at least during the day to allow them to be serviced and maintained. Nuclear can then be setup over time for the longer term solution. The bigger issue here is planning, this needs to be done regularly and keeping up with the population growth/demand that will increase continuously to avoid the current situation down the line.</p> <p>Residential house holds that have a solar generating system should be allowed to push electricity to the grid and it should be easier to do, yes there should be a process in place. But it should not be that difficult as to discourage people from contributing.</p> <p>Current infrastructure being stolen or damaged should be seen as terrorism and the punishment should be harsh.</p>	Francois	employed individual

2022-07-10 22:35:44	Gauteng	Not fully	Other	<p>One thing I would certainly not go for is bringing in Chinese-Funded, or Russian-Funded, Private companies to do as these countries have been doing all over the world: Implement infrastructure, and then when there is a default on repayment, these countries take ownership of South African owned resources, and deny the South Africans, that the SA Government is supposed to care about, the opportunity to participate in the wealth-creation of the country.</p> <p>As for which is the best type of electricity source to generate, all of them have their problems, because the root-cause of the global issues are not actually being communicated. Here are some examples of why I believe a blend of the different types of electricity generation is ideal.</p> <p>Our planet, just like all the other planets in our solar system, is experiencing forces such as</p> <ul style="list-style-type: none"> - increased radiation, - weakening of our magnetosphere, - increase in speed of Earth's magnetic pole migration, and - the heating up (all the planets are experiencing this) from the inside out. <p>Some predictions:</p> <p>SOLAR: will experience greater fluctuations in radiation which will cause this source to become increasingly unstable, and even damaging when sensitive equipment is overcharged.</p> <p>WIND: will experience ever-increasing number of freak winds destructive to wind harnessing equipment.</p> <p>MINING: will continue to destabilise, and perforate Earth's crust, and weaken it creating fractures and ever-increasing infrastructure-destroying earth quakes (SA may be a useful exception, however, acid-mine-water in a drought is destructive to the stability of the ground.</p> <p>COAL: is mostly open-cast mining, and by comparison, one volcano puts more carbon in the air than all of mankind globally can do over ten years, and besides, last I checked none of us humans are causing the overheating of the other planets.</p> <p>We are coming up for a reset. There is a solution to this, however, according to ancient prophetic manuscripts, we are doomed to repeat what they did in their past.</p> <p>Final Note. Whatever you do, Keep it in South Africa, for South Africa.</p>	William	employed individual
2022-07-10 22:25:01	Gauteng	Not fully	Other	<p>One single energy source cannot be relied on. The issue is one of leadership, skill, innovation and prevention of political meddling and freeloaders.</p> <p>Coal: South Africa has abundant coal (low grade) and coal based steam generation. This needs to be optimised. The carbon output should be offset by massive state carbon absorption projects (CO2 capture in the form of forestry and wood production - not as fuel but for manufacture of sustainable wood products, and synthetic fuel production from liquid CO2).</p> <p>Solar: Enable massive uptake of solar energy at residential and commercial level (Solar collectors for water heating, Solar PV with battery storage). Remove penalties for self consumption (allow equitable feed-in rates or one-off subsidies for going entirely off-grid.) 50% of all municipal loads could be met by rooftop solar PV and battery storage. Encourage and expand large scale PPP PV farms and thermal or battery storage. Can be rolled out very fast.</p> <p>Wind: Maintain what we have. Wind is not as abundant in SA as other energy sources.</p> <p>Nuclear: Maintain what we have. No new nuclear plants or expansion due to Eskom skills issue and resultant safety concerns.</p> <p>Pumped Storage & Peaking Plants: Be innovative. Use non productive mine shafts and underground reservoirs on the reef for pumped storage. Build compressed/liquified air storage systems.</p> <p>Hydro: Expand cooperation and joint projects in the sub continent. Kwanza river in Angola has huge power potential.</p> <p>Eskom & Engineering Skills: Eskom needs engineers, engineers, engineers with appropriate skills and extensive experience. Forget about BEE, just select on merit and get the right skills and experience.</p>	Iain	employed individual
2022-07-10 21:11:56	Eastern Cape	Not fully	Other	<p>A combination of power generation from available options should be pursued. In such an attempt to create a stable and sustainable power generation and supply, the government should try to devise methods that will not be costly and futile to future generations. Allowing independent power generators to tap into power utilities, ideally speaking, raises hope that Eskom's monopoly and dictatorship in electricity tariff may be curtailed. However, it may be hidden to most of us that those new entrants will need to have enormous capital injections to develop their own infrastructure. Some of them may opt for collaboration with existing Eskom's infrastructure across the country and consumers may still suffer Eskom's unavoidable costs regardless. Allowing independent power generators may be a long term solution and will definitely not be something that can occur overnight. The question that may arise when independent power generators are introduced in the market is that aren't the initial input costs going to be higher and affect the outputs? How is the economy going to absorb that? A well balanced plan will have to be devised to avoid any further disruptions, we have suffered too much regressive disruptions already as the country.</p>	Nzululwazi Olwethu	employed individual

2022-07-10 19:50:29	Gauteng		Not fully	Other	I think amox of poerr production will be best. South Africa has so many different climates that we can read tap into a lot of options for power production.	Lebo	employed individual
2022-07-10 07:54:17	Gauteng		Not fully	Other	1) let every producer (home owner with solar) sell back to the grid. 2) fire municipal managers who lever the street lights on during the day. 3) stop the Eskom corruption.	Philippe	employed individual
2022-07-09 10:30:06	Gauteng		Not fully	Other	Hydro, Solar, wind and wave action (power of the sea) might and could save us. Nuclear is NOT an option in my opinion. Lack of management, failure to repair anything, theft, lack of skills (and the difficulty of getting skilled personnel into this country because of new red tape and weird legislation) and corruption would probably lead to us having a nuclear meltdown within in months! Does not bear thinking about. If they cannot fix roads or water supply systems or waste management - why would we trust them to handle such a dangerous option as nuclear power??? However utilising our natural resources (other than gas and fracking which is a disaster in itself) like the sun, the power of the sea and wind might help us out if greed doesn't get the better of the people involved in the new energy crisis. Environmentally, these other options could work, if the proper ecological surveys and mitigation of damage to both environment and wildlife and people is done correctly. And that is a problem as well. Mining here has proven that they will fudge those reports too. We are in a catch 22 situation whatever we do...I personally don't trust anyone - private or government or corporate - to do a fair and honest job!!! Money and lining one's own pockets seems to be the norm here whatever good intentions are spouted at the beginning of anything.	Tamsyn	employed individual
2022-07-08 17:31:28	Gauteng		Not fully	Other	I fear international and local interests are waiting like wolves to get into and take over the SA power grid. These people are behind the sabotaging of Eskom.	Desmond	employed individual

2022-07-08 11:12:47	Gauteng		Not fully	Other	As far as I see, all forms of electricity generation have some or another drawback. IPP's should be able to select their mode of generation and be privatised. This should include Eskom when it collapses, or hopefully before, and run in a competitive market that will charge tariffs that are market related. This would be far better than the increasing of tariffs to a place where the public is buckling simply to maintain a cash cow that has a protected monopoly on the market. The better run suppliers will flourish, while the badly run IPP's will fade away - hopefully.	Bruce	employed individual
2022-07-08 06:33:34	Western Cape		Not fully	Other	Reduce regulatory red tape for wind and solar pv on the energy regulator side. But don't reduce environmental authorisation requirements, which have already been streamlined to create a more enabling environment for renewable energy projects. These projects need to come onto the grid as quickly as possible but with as little environmental impact as possible and best practice environmental management in place.		employed individual
2022-07-08 06:32:30	Mpumalanga		Not fully	Other	Electricity is essential to the economy and welfare of our society. If Eskom falls, then the country's social and economic structures will crumble, resulting in worsening unrest and possibly violence. Independent power production should be allowed in order to meet the shortfall while Eskom is restored. But this needs to be done in a manner that does not sacrifice the safety of all involved	Daniel	employed individual
2022-08-24 18:18:35	Gauteng		Not fully	Other	The crisis is created by the ANC and their not-so-innocent policies on the matter of electricity production. Private organizations should be allowed to generate power in competition with Eskom. The total corruption and the poor accountability to the people that made these criminal decisions should be brought to trial and their and their families that gained on our backs should be stripped of their assets to help cover the damages they incurred. then they should be put in jail and left to rot there till they die!	Xander	employed individual
2022-08-01 19:10:58	Mpumalanga		Not fully	Other	Alliw people to produce electricity for themselves and others. Johanna	employed individual
2022-07-26 08:31:59	Western Cape		Not fully	Other	I waited till the president made his proposal. The ideology still remains centralised and that is not acceptable. I have every faith in Pravin - he is honest - the reduction of red tape and outsourcing by the ANC gov is prone to corruption and cronyism. Yes, we need alternative power solutions. No, this should not be run by the gov. We require an independent ombudsman to oversee. And De Ruyter has done a great job under the circumstances. Bring the experienced guys back. The only red tape that should be cut is BBEEE. The WC is a perfect example of sound thinking.	Kathryn	employed individual

					<p>Energy is a human survival imperative and a critical component of sustainable development - we need a DEMOCRATISED ENERGY GRID not a privatised one. Every SA should be able to earn an income from contributing energy to the grid - schools, libraries, charities, NGOs, small businesses, malls, business parks, industries, farmers etc.</p> <p>Currently our poverty level stands at over 50% - the people of SA cannot afford for energy to be in the hands of private for-profit companies. People will die - especially women & children - due to energy poverty (directly & indirectly).</p> <p>While private enterprises can provide many services, there are certain basic services that need to be provided on a not-for-profit basis eg water, sanitation, basic food, basic clothing, energy, education, basic healthcare & other national infrastructure, including affordable housing.</p> <p>Privatising our energy industry would be a violation of our human rights to the basic services we require to survive & thrive.</p> <p>The technology is available, and more are being developed every day. Every area should use the tech that best suits the geophysical assets available - starting with conduit hydro, energy from human poop & human waste (must be clean). Other tech might include geothermal, solar, wind, tidal & other ocean energy tech, constructed whirlpools etc.</p> <p>An important aspect least discussed is energy efficiency in buildings, awa economic systems & processes. In terms of green buildings we need to think about passive building strategies, green roofs & walls, insulation, etc. Other strategies might include converting traffic light intersections to traffic circles (where appropriate) & using alternative street lighting - such as bioluminescence etc - where appropriate. In Curitiba (Brazil) all libraries are built as lighthouses providing the local area with street lighting. Elsewhere communities build their own low-cost solar LED lights using plastic soda bottles filled with water.</p> <p>Renewable energy does require the need for energy storage, and various tech is being developed. Some proven tech includes pumped hydro & sand batteries. I'm not terribly keen on lithium batteries, but these might be required in the short term to be replaced, hopefully, by tech such as liquid metal batteries & graviticity; oceanic wind storage (currently in development) also looks promising.</p>		
2022-07-18 09:33:14	Gauteng		Not fully	Other	<p>Whatever appropriate tech is chosen, it's critical that energy be sustainable, green, climate appropriate, resilient & AFFORDABLE.</p>	Wendy	unemployed individual

2022-07-11 13:57:59	Western Cape		Not fully	Other	<p>For the immediate future, the combination of coal and nuclear is sufficient IFF it Eskom is run by competent and non-corrupt officials. Residences and communities should be freely allowed to use and generate renewables with the ability to sell excess to the grid. Willy-nilly opening IPP will allow another monopoly to step in and leave us at their (and markets) mercy.</p>	Nathan	unemployed individual
2022-07-11 08:58:14	Western Cape		Not fully	Other	<p>Any form of renewed power will give the powers that be, that are killing our nation will only make electricity which is a necessity in affordable for most poor South Africans..</p>	Pascale	unemployed individual
2022-07-11 08:58:13	Western Cape		Not fully	Other	<p>Any form of renewed power will give the powers that be, that are killing our nation will only make electricity which is a necessity in affordable for most poor South Africans..</p>	Pascale	unemployed individual

2022-07-10 20:46:54	Gauteng	Not fully	Other	<p>The method of energy production is important but what is needed more is an attitude of setting a urgent and tight time goal of extra power to be generated for example extra 8000 MW by December. Then the most ethical and fast method should be used even if is an extra coal power station, seeing that the country is far away from replacing coal in any case (so coal can be an interim measure until more renewables or other methods can be used.) What about an out of the box thinking method of asking if any of the countries that has nuclear power have any old out of use coal stations that they are willing to sell. If so then the power station or at least some of the biggest parts can be loaded on a ship and reassembled in South Africa (desperate times sometimes calls for out of the ordinary solutions).</p> <p>I also suggest to increase the 100 mw limit to 1000 mw for private companies. Only necessary red tape should be kept and extra effort, resources and also time commitments (with disciplinary steps if not kept) should be be looked at to this regard (emergency mode).</p> <p>Seeing that the power generation under the current government control, leaves a lot be desired for a long time now, I think a lot more of the power generation if not all, should be privatised.</p> <p>South Africa not only need more power to supply current needs but also lots more to make more economic growth possible.</p> <p>Allow me to emphasize my original point again, I suggest to set a tight goal like December and then go into emergency mode and look at options and the do whatever legal and ethical to make this happen.</p> <p>An lastly but definitely not the least. Before starting on this project and throughout the project I suggest to pray for guidance and favour from God, because without His help, the project is bound to fail, no matter what method is used.</p> <p>Seeing that I see myself as a Christian, by the Grace of God, when I say pray my suggestion is to pray in the Christian context.</p> <p>Yeshua is King.</p>	Marius	unemployed individual

2022-07-08 11:11:54	Western Cape	Not fully	Other	<p>Independent Electricity Suppliers should be allowed under the provision that households can choose which provider they wish to use. It should be the same way as one chooses one's internet provider.</p> <p>We should use renewable energy, such as solar and wind power. The technology to do so already exists and can be implemented by creating stations that supply smaller areas, rather than building facilities to supply large areas.</p> <p>There should definitely be no nuclear power, as this form of energy supply has too high a safety risk, as the examples of nuclear power plant meltdowns have shown elsewhere in the world.</p>	Volker	Non-profit
2022-08-22 17:13:11	Limpopo	Not fully	Other	<p>a combination of wind generated power, solar power and efficiently managed nuclear power. ESKOM has proved its inability to meet the energy needs of the country and does not earn the right to demand fees for private energy generators selling surplus back to the grid. Every sector in the country is negatively impacted by the current situation. The government is there to serve the people and should do everything in its power to do exactly that. Did you know that the word "minister" in its essence means "servant"?</p>	Virginia	Non-profit
2022-08-01 16:52:42	Gauteng	Not fully	Other	<p>Price hikes can't be allowed anymore.</p> <p>Eskom for long time don't need to increase any electricity with all load sheddings involved.</p> <p>If it's the best solution to look at an independent way of electricitg supply, lots of research should be done, if not yet, to make sure SA CITIZENS don't pay more, but much lesser, cheaper for electricity, if at all needed</p>	Kobus	Non-profit

2022-07-11 12:58:05	Northern Cape		Not fully	Other		I believe a combination of the proposed solutions is the best approach. South Africa have coal resources and provided they can be mined and sold at reasonable costs it should be used. I believe home owners should be allowed to feed back excess electricity from a solar system into municipal grids.	
2022-07-09 21:10:36	KwaZulu- Natal		Not fully	Other	It simple...Pravin & Cyril needs to GO!!!!		Mandisa
2022-07-14 21:11:16	Gauteng		Not fully	Coal	It was Global Warming just a few years ago when Al Gore made all his predictions and got awarded a Nobel Prize - Nothing he predicted has happened. Now it is "Climate Change", what next? We cannot control the Weather - forget this carbon neutral stuff- If we cannot store base load power from renewables, we are stuffed anyway. South Africa has an abundance of cheap coal. Many of the existing power stations, even if old, could be brought back to life exp if run privately by competent companies with no BEE requirements like ESKOM has. I've had plenty of experience operating and fixing "old" plants - it can be done with competent engineers and managers and quite quickly too. The amount of additional base load MW that can quickly and reliably to the grid far outstrips any useless renewables. I support Nuclear in the long term too. Forget all these phony community investment schemes that power companies have to comply with. Let them do what they good at and that's generating power. The jobs provided by the economy that has stable electricity supply is were thee "community good" will be felt and far more sustainable too.	Donald	business owner
2022-07-13 00:08:30	Gauteng		Not fully	Coal	Have you heard of this old adage "Do not let a good crisis go to waste"? The difference with this say and our current situation is that the crisis we are facing is man-made. Create a crisis and create solutions that can only benefit crisis creators. It is every man for himself in this country. Why not use God given minerals and create systems that will ensure it does not pollute our environment? By all means introduce the new cleaner ways of making electricity, the so-called renewable energy/resources. The worst the government is doing is lying to people about this and that happening at Eskom.	Walter	business owner
2022-07-11 20:39:44	Western Cape		Not fully	Coal	No monopoly should be allowed to supply electricity. Towns and/or Municipalities should be able to produce there own electricity with members of a town/community having shares in such a power producing facility. The Electricity power station of such town/community must belong to those using from the facility. This will reduce the losses from transporting electricity over long distances. These facilities should preferably be of renewable sources.	Gottlieb	business owner

2022-07-11 17:29:37	Limpopo		Not fully	Coal	Independant producers shpuld be allowewd to supply electricity to the public - competition will increase the quality of service delivery and decrease prices. Any form of electricity should be allowed.	Sune	business owner
2022-07-11 07:23:27	Mpumalanga		Not fully	Coal	What we have is full coal infrastructure already, we can make the existing coal fired boilers work by installing the correct end point controllers. The existing end point controllers is not good enough. We need to UP the 'BOILERS"efficiency!! This exercise has ben done an proven to e a great success in the US and other countries globally. Please let me know what you think.	Sakkie	business owner
2022-07-10 07:09:01	Gauteng		Not fully	Coal	In my opinion, "green energy " is not so green. The products used and the methods used to source the materials are not fully disclosed. Coal and nuclear in SA has been efficient and cheap. Our power stations should have been maintained from Mbeki's time. Solar and wind is not efficient. How can you predict when there will be wind or enough sun to power up the stations? The "green deal" being pushed is just set up to fail to bring in nuclear fusion which is possibly another farse.	Paulo	business owner
2022-07-10 06:25:13	Free State		Not fully	Coal	Eskom is being captured by the solar produser with family ties to government. They are the ones on the inside sabotaging eskom. Let them supply to the grid, but at the cost of 1/4 of eskom rates.	Leon	business owner
2022-07-09 21:16:58	Gauteng		Not fully	Coal	Anything the government is looking into has alterior motives. Sack the Eskom heads and affiliates to current government, no nepotism. Fix Eskom. It will be cheaper in the long run. Employ competent people that actually WANT to work & take responsibility for their actions. Heaven forbid we have nuclear and these current clowns running that.	Mademoiselle	business owner
2022-07-08 22:02:05	Western Cape		Not fully	Coal	We currently have tons of natural coal resources. We also have coal fired power stations. To suddenly change that will take years. Sadly we exporting billions of toms of Caol to China currently so at some point it will run out. We cant trust this govt to move to Atomic Fusion , they cant even run Eskom with Coal, we will be 3 mile island or Chernobyl. If a privateer takes that over well then you in the hands of proberbly the Chinese or Russians out the gate - so lets solve our problems like responsible adults, if the ANC can live up to taking respon for anything ever!	Philip	business owner
2022-07-08 19:17:05	Western Cape		Not fully	Coal	My answer is based on your leading word, "immediate" The coal era is over but immediately, like now, coal is the answer for SA. A different question is where should we be headed and that would yield a different answer and that answer would be renewable obviously - air / wind / sun - everything the greedy do not want us to harness as they do not own these power sources	Christian	business owner
2022-07-20 04:18:53	Gauteng		Not fully	Coal	We have ample coal. The green thing is a political opinion of countries that dont have coal. RSA must use coal for our country first. No matter what the EU says.	Jan	retired
2022-07-19 14:50:52	Western Cape		Not fully	Coal	SA has a fleet of baseload stations that use coal. If they are properly maintained they are very reliable. Eskom needs to shed 20 000 overpaid staff and recruit 2000 experienced power station engineers. New capacity must be found urgently and Nuclear must not be discounted as it is well engineered and reliable as a base load provider. IPP's must be encouraged to add capacity but storage equipment must be developed for power.	Chris	retired
2022-07-17 11:53:35	Gauteng		Not fully	Coal	Their were nothing wrong with Eskom when it was Managed by competed people , nobody in this country has the right to demand the right to self enrichment, this type of semi government department was establish to serve the country, not self enrichment, get ride of the corrupted ANC government , get the traffic back to the Rail, SAA back on its feet, etc, and the RSA will a better place to live in. Get people to pay for a living, get rid of illegal immigrants., get people to do the jobs properly.	Jackie	retired

2022-07-14 09:16:08	Gauteng		Not fully	Coal	<p>South Africa has abundant coal supplies. Coal can provide power 24/7 What is needed:</p> <ul style="list-style-type: none"> *Bring expertise, knowledge, ethics back to ESKOM *Get rid of corruption, cadre deployment, tenderpreneurs at ESKOM *Repair and maintain the coal fired power plants *Do not close down coal fired power stations *Technology is available to clean the emissions - use it. It will be a fraction of the cost compared to building new solar and wind plants or converting coal fired power stations . *Don't be fooled by the "Green" and "Cheap" "Free" hype driven by governments, businesses, politicians, media etc . Solar farms, batteries and wind farms are not green and cheap, not energy efficient and the energy is not available 24/7. *Solar and Wind has a place, but not on a national level. It is good for smaller scale projects i.e. homes and farms. *Gas and (in the future) also Nuclear should be planned for to add to the energy needs - <p>But we need honest, accountable, educated, trained people to plan and implement. South Africa cannot afford the current breakdown in SOE's to continue</p> <ul style="list-style-type: none"> *Independent Power Producers should be allowed to buy and manage coal fired power stations 	Orpa	retired
2022-07-12 12:49:17	North West		Not fully	Coal	<p>Most of the power plants is using coal and just do not make sense to stop all plants utilizing coal....one should consider the economical fall out and how many people is going to lose work on a country with such high unemployment</p>	Morne	retired
2022-07-11 20:52:55	Eastern Cape		Not fully	Coal	<p>Coal is cheap why abandon what works for schemed up bull about clean green energy just to suite a band of greedy elites who want to monopolise the world's wealth. If households want to install solar panels it should be their choice. Nuclear is dangerous. Wind power is iratic.</p>	Cheryl	retired
2022-07-11 20:52:52	Eastern Cape		Not fully	Coal	<p>Coal is cheap why abandon what works for schemed up bull about clean green energy just to suite a band of greedy elites who want to monopolise the world's wealth. 2022-07-08 18:23:17	Outside SA	Brazil	Not fully	Coal	As a retired Environmental Scientist from Eskom/TSI, I have the following comments in order of their urgency: 1. Replace totally incompetent politically appointed Managers by engineers who know & understand the current problems with power generation ! (Example: Majuba PS was projected for 6 units, but after the first 3 dry-cooled units (to preserve water resources) were completed, the then Management decided extremely short-sighted that the remaining 3 units were not needed - and NOW we have the problem of power shortages "regulated" by "load shedding" !!! An absurd situation - power stations are planned & built decades ahead of anticipated future needs !!! 2. Immediately STOP corruption !!! 3. Electricity in South Africa (is) was traditionally cheap (compared to other countries world-wide), thanks to thermo-electric (coal-fired) Power Plants and easily available coal (mostly open pit)! Therefore, it is financially most viable to attend to the points below ==> 4. Further improve the various methods of removing fine particulates from emissions of coal-fired Power Stations. 5. Also improve the removal of SO2 emissions from coal burning processes (unfortunately, the Sasol plants in Secunda were not very successful). 6. YES, SA has plenty of sunshine & wind, but their conversion to electricity also requires vast amounts of investments. Furthermore, I consider these installations as grave "Environmental Pollution" !!! Also large fields of solar panels are well-suited in deserts, but in SA they would drastically diminish agricultural land urgently needed for food production !!! 7. Thanks to the ANC Government, Nuclear Power generation was considered bad - we used to have 2 well-functioning units in Koeberg, as well advanced research into small "Pebble Bed Reactors" - why abandon these resources ? YES, nuclear power is more expensive, but it would certainly be cheaper than enormous economic losses caused by the famous "Load Shedding" policy !!!	Gerhard	retired

2022-07-08 06:52:56	Western Cape		Not fully	Coal	Renewables are not cheap as is claimed, neither are they predictable or reliable. Patrice Motsepe is looking to be the major supplier of electricity to the government, through his company, AREP, which will sell predominantly renewable energy. The consumer faces increasing electricity costs if we go predominantly renewable energy. Germany, after many years of green energy is now facing economic collapse. Australia is finding renewables problematic and expensive. Most people are unaware of the subsidies involved with renewable energy supply which significantly increases electricity costs. Why is the Western world being advised to abandon coal as a cheap, reliable energy source while China can use coal? A MIT researcher has been working for 14 years to develop a means of restoring ailing coal power stations and making them carbon free. WHY IS THIS NOT BEING PURSUED to save our economies?? Another question: ARE OUR NEIGHBOURING STATES THAT WE SUPPLY ELECTRICITY TO ALSO EXPERIENCING LOAD SHEDDING? If not, WHY NOT? AND...China is allowed to use OUR coal to fire ITS coal driven power stations but WE CANNOT!?? Any thinking person should be asking: WHY IS CHINA ALLOWED TO USE CHEAP, EFFICIENT COAL BUT NO ONE ELSE CAN?? Maybe it's about more than so-called climate change...??? START THINKING, SOUTH AFRICA!!!!	Norma	retired
2022-07-08 06:08:40	Gauteng		Not fully	Coal	We should have the remaining Municipal power stations back into service. Kelvin in Joburg, Pretoria West and Rooiwal in Tshwane. Coal is plentiful and cheap.	Andrew	retired
2022-07-07 22:04:08	Mpumal anga		Not fully	Coal	We are struggling to maintain power stations because of the poor quality coal Eskom receives from the coal maffia, until that is sorted out we are in for a rough time ???	Henk	retired

2022-07-16 13:40:35	Limpopo		Not fully	Coal	SA used to be one of the biggest producers of electricity in Africa, supplying its' own electricity as well as selling to neighboring countries. What happened between 1994 and now? Bad management, corruption and the inability to collect outstanding money from users. Also the inability of law enforcement to take down illegal and pirate connections, thus costing Eskom and the law abiding electricity payer horrendous losses. It's not about finding alternative sources, it's about appointing competent and reliable people to run Eskom, cut the unnecessary parasiting employees, stop the syndicates looting and stealing, stop the free electricity to people who can actually afford to pay their bills, enforce the law on illegal connections and this country will be back in business with full electricity again.	Helena	employed individual
2022-07-13 09:17:08	Gauteng		Not fully	Coal	The road that the G7 and the WEF has planned ant that is been fast trekked by the USA in South Africa is going to collapse the total infrastructure of electricity supply, how can one man decide that that is good for the masses . It will brake the camels back. Durban last year will look like n walk in the park for that witch is coming !	August	employed individual
2022-07-12 15:37:06	Western Cape		Not fully	Coal	Well, we have more than enough coal to last at least 150 Years. We should not fall into the global warming trapp. I dont have a problem with solar, or wind energy. Only that it is not possible to replace coal. The whole world generates only 1,8% energy via solar and wind. And as we speak, Europe is scrambling for coal. South Africa should stop following, like headless chickens, the Biden and Al Gore global warming scam.	Gerald	employed individual
2022-07-12 14:42:54	Gauteng		Not fully	Coal	The BIG problem is yes we do need an alternate power provider and that is all good and well for the rich people who can provide that solution but the majority of us including myself just can not cope with the current situation with all of these increases and excuses. There is so much red tape and corruption and that needs to be sorted out. The government are laughing all the way to the bank and simply do not care. We really all need to come together and find a better way as the current government needs to be sorted out as they have been on the gravy train that they believe that they are entitled to for far too long. They must stop looking for help with outside countries as we have all we need here. The HUGE problem as with Petrol and electricity as we give away what we should be using for ourselves so that the people at the top and others can make money. We need to wake up and change our ways as we are all very stressed about the current situation. Enough is ENOUGH !!!!!	Margaret Ann	employed individual
2022-07-12 13:03:40	Western Cape		Not fully	Coal	I do not trust Cyril, I get the feeling he wants Eskom to collapse as he probably has he's fingers in an alternative solution where he makes money. Kick out the fat cats and get Coal working for us like it always has. Allow private solutions for those who can afford it but I cannot for the love of God understand how a government allows the gangsters to control Eskom unless he has other motives.	Arlene	employed individual
2022-07-12 12:53:24	North West		Not fully	Coal	South Africa has abundant coal and that should continue to be used to supply base load. I am not against renewables but weather dependent renewables will not be adequate to supply the whole of SA , I also feel the country needs to invest in the nuclear power as well for future. So basically coal and nuclear power is what I go for, renewables can be for personal use for wealthy South Africans/ private companies but as for the whole country we need stable,reliable and cheaper coal and nuclear power to sort out this crisis.	Aphafia	employed individual

2022-07-08 10:29:31	Gauteng		Not fully	Coal	<p>SA is currently in a major electricity/energy predicament among many other other predicaments. The electricity/energy issue should be resolved asap using all available methods, not just one particular method. It is also believed that the current coal electricity production can be much more sufficient provided it is managed and maintained by competent resources without the plundering that seems to be instigated by the South African government. One can only wonder why Eskom is in the state it is and who is going to gain the most using solar / wind for electricity production - One must also look at the lessons learned in AUS where all coal electricity production was replaced with solar / wind electricity production - Do not trust the motives of the South African government.</p>	Corinus	employed individual
2022-07-08 06:37:47	Gauteng		Not fully	Coal	<p>My concern with scrapping the bill completely is the like of the Ramaphosa ,Motsepe clan getting a monopoly. Which is and has been their intention. Nuclear power in South Africa will kill million as you can clearly see the maintenance needed on coal plants is not done ,can you imagine what would happen in the situation with nuclear plants..</p>	Shane	employed individual
2022-07-07 19:25:47	Gauteng		Not fully	Coal	<p>Coal powered power stations have not been a problem,it is the cadre deployment and handing out of coal tenders and other tenders that has put us in this current position .</p>	Pragasen	employed individual
2022-08-12 02:37:11	Free State		Not fully	Coal	<p>The government should strengthen Eskom as they were supposed to by building more power generation stations. And, at the same time people who have alternative power generation methods that are healthy, should be allowed to do so without any hindrance or interference by the government.</p>	Revival	employed individual
2022-07-14 09:40:33	Outside SA		Not fully	Coal	<p>I think scrapping regulatory powers of NERSA or even the DMREs IPP office will result in intermittent and expensive electricity that doesn't serve the poor majority of South Africa. The problem we have is not about capacity but availability. Neither the Presidency nor the DPE has control on IPP legislation anyway, so why is this survey not directed at the relevant department for it to be effective? Just like we are seeing with Uber and Glencore's global failures, it is not advisable to bulldoze your way into a market.</p>	Nthabi	unemployed individual

2022-07-14 08:18:10	Gauteng		Not fully	Coal	We are the largest producers of coal, but it goes to western countries. Fooling us, telling us that there's "climate change" - we must no longer use coal. But all of our coal is going to them, going out in large masses from Mpumalanga. Now Mpumalanga has over 400 abandoned mines, causing daily injuries for the local community.	Mongezi	unemployed individual
2022-07-12 20:58:56	Eastern Cape		Not fully	Coal	If you can take the anc out of ESKOM, bring back the skilled workers, we wouldn't have a power problem. Give ESKOM back to the dedicated people who used to run it and the future will be very bright. Renewable energy is just a BS term devised to cripple coal powered ESKOM. It's being hijacked by Cyril and his NewWorldOrder handlers.	Teresa	unemployed individual
2022-07-11 21:01:13	KwaZulu-Natal		Not fully	Coal	It's already been announced that SA will be scrapping coal fed power stations asap... Ramaposer has sold us out to the EU and American green deal nonsense. If we think power is expensive now, IPP's will double that overnight without Eskom !	Trevor	unemployed individual
2022-07-10 12:09:14	Mpumalanga		Not fully	Coal	If they scrap legislation for independent power suppliers, it will be again ANC cader and family members that will benefit from it. We all no it will be the Ramaposa family that will benefit, that is why they want to collapse Eskom. Coal is best source for electricity, get expertise in fixing the power stations	Jacobus	unemployed individual

2022-07-13 09:54:42	Gauteng		Not fully	Wind	As much as I would love to regulate electricity production in South Africa (so as to not alienate the poor) I believe the time has passed to ease into fixing the problem. Renewables and other local power sources should be used extensively. We shouldn't look outwards for solutions but instead use the resources we already have. South Africa has sun and wind and I think we should use them to our advantage. We should allow renewables and battery storage to sell power onto the grid because of the emergency we find ourselves in. If IPP's sell onto the grid, I propose that they be supported, not restricted. Also, we shouldn't add caveats like "procure locally" because our local supply is under-developed and comparatively expensive. We could've said "procure locally" 10 years ago when this issue first arose but now we can't, because we're desperate.	Siphesihle	employed individual

2022-07-11 07:49:47	Gauteng		Not fully	Wind	There is some government and private sector people that wants Eskom to fail. This is all strategies to implement private power producers so the profit can go into individuals pockets. There's nothing wrong with Eskom except those who wants it to fail. Get rid of the incompetent employees as to brake down the 47000 which half of them are doing nothing and getting paid. Then get rid of the incompetent corrupt upper staff which is the cause of employing the wrong candidates and stealing all the money. If you have a bad apple in the box all other are going to be infected and the end result is poor work and maintenance. Uganda's power supply is a good example of what is going on here. I would suggest that wind power is the number one to supply clean, ozone and environmental friendly power. Three quarters of our country borders has costal constant wind to operate the power wind Generators.	Rudolph	employed individual
2022-07-10 22:05:58	Eastern Cape		Not fully	Wind	There are many operational structures already installed to make use of wind, water and the sun's energy. Allow the owners to supply that energy to Eskom. If we work together, this loadshedding issue can be something of the past. Government should ensure that whoever is appointed from this moment on, should be qualified and have proper relatable experience in order to HELP and not cause additional hassles. Please bury the past! Apartheid is long gone. Face the facts and deal with the reality. The blame-game is just waisting time.	Maryke	employed individual
2022-07-08 19:49:39	Western Cape		Not fully	Wind	As much I want an end to load shedding I don't trust the ANC (government) to follow the correct process in acquiring an alternate energy supplier. I am happy to support another energy supplier coming onboard but only if the correct process is followed. Too many times the ANC has called for emergency legislative changes which have only come to bite the SA citizens in the bum.	Nathan	employed individual

2022-07-08 06:31:58	Western Cape		Not fully	Hydro	The City of Cape Town is currently using hydro power as it's emergency power supply. I'm sure other provinces can follow with their large dams. Or maybe see what each province can uniquely provide? The Northern Cape with solar, Eastern Cape with wind, KZN on the Drakensberg side with hydro.... Also, please stop selling our excess power to other countries. Or if not economically possible, then sell less.	Stacy	employed individual
2022-07-26 11:11:10	Free State		Not fully	Hydro	The best solution would be to build at least one new nuclear power plant - a pebble one would be the best. Nuclear energy is extremely safe to produce with about no harmful waste. If run by competent and well qualified personnel the risk of a meltdown or other problem is negligible . A nuclear power plant also take up far less real estate than other forms. Nuclear is far better than mining for coal - which has worse health and environmental implications. Solar on big scale is not practical or economical and disposing of old or broken solar panels is difficult to do safely. Base materials for manufacturing good storage batteries needs to be mined (some materials are highly toxic and also bad for the environment) and the batteries are a headache to be safely disposed of. The problem with wind turbines and wind farms are that they are noisy - no matter what the manufacturers say - and take up large quantities of agricultural land. The endanger wild life (esp. birds) and life stock.	ANDRIEKA	employed individual
2022-07-20 05:34:56	Gauteng		Not fully	Hydro	SA do have hydro facilities not in use for years now, why? We supply electricity to neighbouring countries which is not a bad thing, but why is their not loadshedding implemented cross border? Goal is also exported, we have enough supplies. Looking at alternative energy resources is good, BUT who gets the tenders? It should go to passionate SA entrepreneurs - (not semi-gov or any links within government, people who actually care for supplying the solution, maintaining it - not costing you an arm and a leg to have access to and not damaging the environment. 2022-07-19 20:33:20	Gauteng		Not fully	Hydro	I choose hydropower as South Africa's immediate need because looking at other electricity source some are not producing much power and are dependent on environmental circumstances like the solar. Another one is the nuclear ,I did a bit study about nuclear and it seems like it is highly used in the US, but it alleged that it may be depleted or cease to be used by 2025 although its benefits is that it does not contribute that much to the emission of gas in the atmosphere. However, Majority rely on the usage of coal as provided by Eskom, and this source of energy supply has taxed a lot of citizens , especially those that are pensioners, people paid more for less electricity. I would like South Afrika and Eskom to consider hydropower because it is proven to be effective, less expensive, and not contributing negatively to the atmosphere and the environment. This all depends on the state of our country. But my take is that the country should look at helping also citizens at large, especially households that receives pensions, single breadwinners. For me my mother is a widow, a pensioner and she pays more for less electricity, this should be locked into.	Margaret	student
2022-07-08 06:52:41	KwaZulu- Natal		Not fully	Diesel	So with I like the idea of there being competition with energy production but government can not regulate it like they do everything else there needs to be a free market, certain standards set democratically and based on sound science not pseudo science about climate change crap to justify only using one form of generating electricity like via solar or wind. Those are eco-friendly either!! Government also needs to all cannabis cultivation, as a hectare of cannabis grown for hemp can produce 300 gallons of bio diesel, that contains zero sulphates, and is a carbon negative fuel as growing a hectare of cannabis absorbs more CO2 than trees of the same area. I support independent power generation as communities, like oranja, can supply themselves independently of Eskom and this would represent a true expression of democracy, and not the tyranny we are experiencing. I support power generation that will allow for quick and easy access to consistent power so we can grow our economy again and have a stable power grid to encourage investment in South Africa.	Jason	employed individual
