2022-07-25 11:08:01	Gauteng		Yes I do	Solar	We have an immense opportunity to harness solar energy and set the global standard for free consumption without damage to our national environment and by so doing free up financial resources and rethink an outdated municipal financial model that relies heavily on the sale of an environmentally costly and non-renewable resource. The science weighs strongly in favour of this approach and our country needs thinkers who are able to problematise these national issues. A green economy is the future and we need to start that process sooner than later in order to shield our economy from further and future instability.	Stuart	unemployed individual
2022-07-25 08:33:34	Eastern Cape		Yes I do	Solar		Armand	unemployed individual
2022-07-24 16:18:16	Eastern Cape		Yes I do	Solar		Ma	unemployed individual
2022-07-24 05:11:53	Western Cape		Yes I do	Solar		Theresa	unemployed individual
2022-07-23 15:15:12	KwaZulu-Natal		Yes I do	Solar		Fathima	unemployed individual
2022-07-22 15:39:52	Gauteng		Yes I do	Solar	We currently produce more solar power than we need and would be happy to push back into the grid for some extra income. People should be allowed to do that.	Christa-Louie	unemployed individual
2022-07-22 15:26:46	Western Cape		Yes I do	Solar		Keith	unemployed individual
2022-07-22 13:03:40	Gauteng		Yes I do	Solar	I'm a bit confused by the monthly levy that one has still to pay to Eskom even if you are using Solar power	Fuzile	unemployed individual
2022-07-22 07:06:47	Free State		Yes I do	Solar	The SUN is FREE, the government does not OWN it , therefore does not have the authority to charge for it, & should rather appreciate so.me help. But we do understand their embarrassing situation of not being capable of maintaining ANYTHING , thus landing the country in this mess.	Virginia	unemployed individual
2022-07-20 21:08:01	Western Cape		Yes I do	Solar	Solar is a brilliant idea in most parts of our country, as we have plenty of sun days. This is good renewable energy.	Jade	unemployed individual
2022-07-20 10:55:08	Western Cape		Yes I do	Solar	This is a natural way of generating power for the people of SA. The previous method could be broken down /destroyed to break down our economy and impoverish our people. It should be a completely privately owned company ,run by capable people,who has the progress of our country and assistance of the people at heart. We need a better South Africa. The middle-class and lower class should also be taken into consideration. Independent power producers should be allowed to continue.	Angelica	unemployed individual
2022-07-20 10:13:21	Western Cape		Yes I do	Solar		Jenny	unemployed individual
2022-07-20 09:18:31	Free State		Yes I do	Solar	The sun is free energy and doesn't do any damage to the environment. It might just take a long time to completely only use the sun as energy source. Other power suppliers will be greatly beneficial.	Dorette	unemployed individual
2022-07-19 17:07:04	Limpopo		Yes I do	Solar	South African Government must amend the constitution to allow Independent Power Producers to provide South African Communities with electricity.	Tjumana	unemployed individual
2022-07-19 10:05:47	Western Cape		Yes I do	Solar	Solar energy is always available. Coal, gas and diesel are not environmentally friendly and negatively impacting the health of people near these plants as well as the environment.	Linda	unemployed individual
2022-07-18 21:19:11	Western Cape		Yes I do	Solar	I think solar is the best .The sun shine every day .and the Lord above will not disappoint us like Eskom.Eskom must go .they brake our appliances and they don't fix any thing .We as the poor must loose over and over . nonsense we tired of loadshedding.	Chrissie	unemployed individual
2022-07-18 16:33:59	Free State		Yes I do	Solar	Anything that can be done to assist in generating electricity should be allowed.Together we can accomplish more.Not get hungup on redtape and all sorts of rules that inveriably leave the man on the street in the dark. Being able to generate electricity will take a big load off ESCOM and give them more time to restore and improve their generating capacity.	Alec	unemployed individual
2022-07-17 23:16:44	Gauteng		Yes I do	Solar	Instead of keeping bailing escom out with millions subsidise each households to install solar that wy escom can focus on industrial needs under less preasure and price will be lower per household.Then send people concerned overseas to train how to build and maintain powerstations ensure training how to deal with corruption	willie	unemployed individual
2022-07-16 16:36:40	Eastern Cape		Yes I do	Solar		Analize	unemployed individual
2022-07-16 10:12:48	Western Cape		Yes I do	Solar	There are places with too much electricity. Perhaps if you allowed the private sector to join production SA would be one of them. Stop stalling, SA does not need more waiting, it needs good decisions fast. Free and support private power production by any means possible as you promised many years ago.	uwe	unemployed individual
2022-07-16 08:17:23	Gauteng		Yes I do	Solar	The government must provide subsidy for the basic installation of solar panels for all households with less income including the unemployed. Multiple property owners should have only 1 subsidy. We are blessed with beautiful sunshine in SA why not use it for the benefit it's created for. Schools and Teaching colleges should be changing the curriculum to provide training relevant to the now and future needs of SA. How to install a solar panel projects should be primary focus	Zoliswa	unemployed individual
2022-07-16 06:36:08	Western Cape		Yes I do	Solar		Bets	unemployed individual
2022-07-16 04:52:24	KwaZulu-Natal		Yes I do	Solar		Ruth	unemployed individual
2022-07-16 00:19:04	Gauteng		Yes I do	Solar		Elmaré	unemployed individual
2022-07-15					Our country needs power to attract overseas and local investors. Give new power suppliers to various investors that will attract more investors and our economy and country can grow and thrive. The current government has clearly		unemployed

2022-07-10 07:49:57	Western Cape		Yes I do	Solar		Sanette	unemployed individual
2022-07-10 07:28:37	Gauteng		Yes I do	Solar	Solar and wind is of great abundance in South Africa. This is obvious to the people of our country as well as government and Eskom. It is the duty of this state owned entity to supply electricity to our people. Eskom, it's management and executives are the downfall of our country's current economic crisis and the cause of possibly Billions in revenue and job losses. When an 'invisible enemy' as the government liked to called it, COVID was the problem, it was very easy for the president and the government to put in place emergency legislations mostly unnecessary and infringement on some of our rights, In order to 'save our country's people and our lives? However throughout the years that Eskom and ALL governments state owned entities have been plundered financially, causing great loss to our people not to mention lives, the president and government are doing nothing ? So if the enemy is invisible then Government can make changes very quickly to save people but if the enemy is known we can do nothing ?? It's time that the people of this country stand up and take charge !! We don't have to Live like this and WE DO HAVE RIGHTS AND WE DO HAVE A CHOICE of who makes the rules in this country!! Eskom has failed us, just as all other state owned entities have. State owned entities are supposed to provide services to the people of this country, therefore the employees of these entities are public servants, every single one of them right from the top down. Do these employees serve the public, me and you? NO THEH DON'T!! They serve themselves and their own needs and wants. STAND UP PEOPLE OF SOUTH AFRICA AND FIGHT FOR YOUR RIGHTS NOW!!! We have Solar and wind which is FREE, CLEAN AND SAFE and if we want ESKOM to make use of these FREE commodities WE THE PEOPLE OF THIS COUNTRY HAVE THE RIGHT TO CHOOSE!! Choose now before it's too late.	Melissa	unemployed individual
2022-07-10 07:28:33	KwaZulu- Natal		Yes I do	Solar	Everyone should be able to have affordable electricity.	Kobus	unemployed individual
2022-07-10 07:20:05	Eastern Cape		Yes I do	Solar	I think you have to many options from Solar, wind and hydro and even Nuclear. however I prefer cleaner system. The problem is cost in a broken country. Eskom needs to privatised , and we also need to allow private industry to sell energy. It has such an impact on our economy.	Jane	unemployed individual
2022-07-10 07:18:06	Mpumal anga		Yes I do	Solar	Although solar is expensive to initiate, it is clean and cheap in the long run.	Collin	unemployed individual
2022-07-10 06:58:57	Western Cape		Yes I do	Solar	Something has to be done urgently and solar is the best option.	Natalie	unemployed individual
2022-07-10 06:45:21	KwaZulu- Natal		Yes I do	Solar	I agree that private electricity suppliers get granted the opportunity to provide SA with power, as Eskom clearly can't do this anymore. If other countries can have multiple competitive power suppliers, SA should too!	Charné	unemployed individual
2022-07-10 06:37:03	Mpumal anga		Yes I do	Solar	Die steenkool vragmotors ry ons paaie stukkend & die regering beskik nie oor die nodige insig om paaie instand te hou nie. Die prys van steenkool skiet ook die hoogte in. Eskom kan nie in die land se elektrisiteit aanvraag voldoen nie. Eskom is ook baie duur	Hanlie	unemployed individual
2022-07-10 06:34:09	KwaZulu- Natal		Yes I do	Solar		Deon	unemployed individual
2022-07-10 06:25:54	Western Cape		Yes I do	Solar		Willem	unemployed individual
2022-07-10 06:12:33	Gauteng		Yes I do	Solar		Veronica	unemployed individual
2022-07-10 05:55:31	Mpumal anga		Yes I do	Solar		Carine	unemployed individual
2022-07-10 05:50:54	Gauteng		Yes I do	Solar	This decision is long overdue. As South Africans we cannot continue on this roller coaster ride with Eskom	Katy	unemployed individual
2022-07-10 05:04:00	Gauteng		Yes I do	Solar	State capture by criminals and criminals among Eskom employees put RSA electricity in a disasterous position. Nothing been done by government to correct this mess. Actually government seems in aiding and abetting these terrorist activities.	Andre	unemployed individual
2022-07-10 04:42:54	Western Cape		Yes I do	Solar	We have constant hot sunny weather	Jeremy	unemployed individual
2022-07-10 03:56:41	Western Cape		Yes I do	Solar	Firstly people need to start consuming less electricity and see it as a precious resource instead of just using as much as possible simply cause a person can afford. Then start with solar Geyer setups at affordable prices, conversion kits. Cheaper solar options, etc. Would be good with solar provided at discounted rates.	Francois	unemployed individual
2022-07-10 03:40:25	Gauteng		Yes I do	Solar	It is environmentally friendly and an under utilized resource in South Africa.	Johann	unemployed individual
2022-07-10 02:52:34	Western Cape		Yes I do	Solar		Giovanni	unemployed individual
2022-07-10 00:08:51	Western Cape		Yes I do	Solar		Nelia	unemployed individual

2022-07-09 21:02:01	KwaZulu-Natal		Yes I do	Solar	It is obvious that SA has more sun and we should use this resource to get going at once. Businesses cannot be expected to maintain while loadshedding takes place 4 times a day. How ridiculous and while a corrupt minority keep control of the entire nation charging us for services we don't receive??	Diana	unemployed individual
2022-07-09 20:58:52	Free State		Yes I do	Solar	As a house hold I purchased and installed solar power on my house. However the municipality would seem not too happy with the possibility of me exporting power, it would seem that if you, out of your own sacrifice, were able to they want to tax you in some way? Can it not be allowed for a private citizen to be independent and to sell the excess that there is? At this time every bit helps..... Please don't hurt those that are trying!	Sydney	unemployed individual
2022-07-09 20:38:43	Gauteng		Yes I do	Solar	All sources of renewable energy need to be utilised to maximum effect. The government must cut the red tape as a matter of extreme urgency. Loadshedding continues to weaken our economy with terrible consequences for the unemployed in our country. Shockingly, hospitals (at least in Gauteng - I don't know about other provinces) are also subject to loadshedding! Surely they should be exempt. No doubt loadshedding in hospitals has indirectly (if not directly) caused the death of patients.	Janet	unemployed individual
2022-07-09 20:26:59	Gauteng		Yes I do	Solar		Lalainya	unemployed individual
2022-07-09 20:26:26	Eastern Cape		Yes I do	Solar	Pity I can't choose more than one renewable resource. We need more power and need it immediately. I have seen first hand the devastation the unacceptable loadshedding is doing to everyday South Africans. Are ANY of the ANC bigwigs suffering? They can't be, otherwise they would sense the urgency. Something must be done now. Yet another basic human right being violated by conscienceless ANC	Kirsti	unemployed individual
2022-07-09 19:44:06	Western Cape		Yes I do	Solar		Leon	unemployed individual
2022-07-09 18:36:42	Gauteng		Yes I do	Solar	Our current situation is unstable and not not sustainable. Pricing is a huge concern for ourselves we have reduced our staffing hours by 50% indicating the knock on effect is rippling and effects beyond consumer. Businesses are being crippled by the current situation of non-supply. Furthermore Eskom is a provider supplying a service yet the consumer is charged for services rendered daily yet at times consumers can sit 6 hours or more without power yet are charged a daily rate of receiving no service. We is the rebate? Where is the service?	Liza	unemployed individual
2022-07-09 18:23:35	Gauteng		Yes I do	Solar	I'm so tired of this. We are living in darkness and not just the lights that aren't coming on. The government has failed . Eskom has failed. We are steadily being charged more and more for less and less. New service providers? Yes please but, I would rather that all taxation on solar systems, (meaning batteries, invertors and solar panels + wiring and whatever else goes with that) be lifted including the import taxes. I know importers are also being nailed within an inch of their lives/ sanity because Eskom doesn't want competition. Make solar as cheap here as in other places in the world then we don't have to rely on another useless agency that just keeps on taking out money. And also an investigation needs to be launched into the pre-paid electricity. It has come to my attention that units are being "lost" even with the power outages. I don't know if its a isolated incident, but I have my doubts. A neighbor that actually does a lot of calculations, has realized that they have "lost" almost R2000 where there should not have been any loss at all! Right now we are sitting in darkness. Again. Because the substation or wiring or stolen cables or wet coal (or whatever weird and wonderful new excuse or old excuse for that matter, they come up with this time) has failed again.	Debbie	unemployed individual
2022-07-09 18:22:37	KwaZulu-Natal		Yes I do	Solar	We need to save the planet so going solar will help ease the laid on our planet	Sharlene	unemployed individual
2022-07-09 18:14:48	Western Cape		Yes I do	Solar	With the excellent clear skies South Africa has in an abundance of areas throughout the country, we are in such an ideal position to produce electricity from solar. The continued reluctance and ridiculous delays to prioritise this source, can only be the result of individuals who can make it happen, benefitting from the delay.	Francois	unemployed individual
2022-07-09 17:56:53	Gauteng		Yes I do	Solar	SA has 60% sunshine year-round and every house in SA has a roof that can be filled with solar panels. Excess electricity generated can be pushed back into the grid and that will help greatly with the current generation issues we have with Eskom. This situation is NOT going to get better soon, thus we need to find a way to collectively produce a solution. If individuals can be allowed to sell their excess electricity to the grid, it can even become a more valid way of solving our power problems AND get everyone to buy into it.	Ian	unemployed individual
2022-07-09 17:30:36	Western Cape		Yes I do	Solar	I think a combination of Solar and Wind as both are plentiful in our country. The economy cannot survive the current situation which impacts on all communities who are already so beaten but exorbitant rising costs.	Linleigh	unemployed individual
2022-07-09 17:27:42	North West		Yes I do	Solar	Paying Eskom and sit more without electricity than with electricity is a scandal. Solar with independant people and not the government will be much better.	Marita	unemployed individual
2022-07-09 16:54:42	Gauteng		Yes I do	Solar		M	unemployed individual
2022-07-09 16:21:43	Gauteng		Yes I do	Solar		Dorian	unemployed individual
2022-07-09 16:00:08	Western Cape		Yes I do	Solar		Leona	unemployed individual

2022-07-09 15:39:34	Gauteng		Yes I do	Solar		Kim	unemployed individual
2022-07-09 15:35:26	Western Cape		Yes I do	Solar		Marlene	unemployed individual
2022-07-09 15:35:24	Western Cape		Yes I do	Solar		Marlene	unemployed individual
2022-07-09 15:23:10	Limpopo		Yes I do	Solar	We have sunshine mostly every day, year round. Other countries with far less access to the sun have used solar energy with great results. It's pure government red tape that has prevented this so far. Government is supposed to serve the people.	Rosalynd	unemployed individual
2022-07-09 15:15:40	Free State		Yes I do	Solar	Sun is free and should be used	Leendert	unemployed individual
2022-07-09 14:59:50	Northern Cape		Yes I do	Solar		Bilal	unemployed individual
2022-07-09 14:46:47	Gauteng		Yes I do	Solar		Melvin	unemployed individual
2022-07-09 14:43:59	Free State		Yes I do	Solar	I think this is stealing from people with prepaid meters for we have to pay to get electricity if we don't buy tokens the electricity is of so how can the coverment let loadshedding happen to people with prepaid meters who has to buy that's not fair nor rite and our home appliances give in who's paying for the fixing the stole the money and they didn't do repairs like they should they neglect every thing	Maritza Van Zyl	unemployed individual
2022-07-09 13:59:18	Gauteng		Yes I do	Solar	Solar, Nuclear and Wind is our best bets, it's better for the environment and solar and wind is highly suited to our mostly dry and windy country. We can't run out of these sources, it's our best bet	Tashreeq	unemployed individual
2022-07-09 13:35:38	Western Cape		Yes I do	Solar		Lorna	unemployed individual
2022-07-09 13:34:30	Gauteng		Yes I do	Solar	We need to make the move to renewable energy as a matter of urgency. The impact of coal fired energy production is incredibly high on the environment and we need to do something to mitigate that.	Caryn	unemployed individual
2022-07-09 13:28:43	Gauteng		Yes I do	Solar	We have an abundance of sunshine in South Africa, why not use it. If Eskom get rid of 50% of their workforce that sit in Megawatt Park doing nothing this would also alleviate the problem, seeing as the average wage is 700K a year and most are those managers that do nothing	Jumbo	unemployed individual
2022-07-09 13:23:52	Western Cape		Yes I do	Solar	Whatever is needed to solve the shortage. Just do it	Desireé	unemployed individual
2022-07-09 12:53:12	North West		Yes I do	Solar	Daar moet aan natuurlike opsies aandag gegee word. Wind turbienes is ook 'n opsie.	Hennie	unemployed individual
2022-07-09 12:28:35	Mpumalanga		Yes I do	Solar		Chris	unemployed individual
2022-07-09 12:07:33	KwaZulu-Natal		Yes I do	Solar	Power from sun is free and cost effective for set up also wind is free and cost effective for set up	Cliffy	unemployed individual
2022-07-09 11:58:05	Gauteng		Yes I do	Solar	We urgently need to fix what greed and corruption has caused.	Rene	unemployed individual
2022-07-09 11:55:19	Gauteng		Yes I do	Solar		Joy	unemployed individual
2022-07-09 11:27:17	Limpopo		Yes I do	Solar	Solar is the simpliest to aquire and install. It will be a quick solution than other who will take too long to complete and supply.	Phillip	unemployed individual
2022-07-09 11:25:25	KwaZulu-Natal		Yes I do	Solar			unemployed individual
2022-07-09 11:18:17	Western Cape		Yes I do	Solar	It is a no brainer. Plenty of sunlight available in South Africa. Challenge will be as with any SOE to adapt to the IPP philosophy because of the threat to the decision makers corrupt practices. Do it for the good of the country and the people who actually want to work and contribute to our nation.	Rowan	unemployed individual
2022-07-09 10:42:31	Gauteng		Yes I do	Solar		Nzumbulo Excellence	unemployed individual
2022-07-09 10:40:06	Gauteng		Yes I do	Solar	Eskom is unable to supply enough electricity for the needs of South Africa. We have an abundance of natural resources to create renewable energy and it is imperative that we start utilising it.	Leon	unemployed individual
2022-07-09 10:15:10	KwaZulu-Natal		Yes I do	Solar	The government doesn't seem to recognise the urgency of the power situation. We need to make alternative arrangements immediately. This government doesn't want to move away from coal because most of the ministers and some priveledged families are making billions from coal mining including our president.	Marcelle	unemployed individual
2022-07-09 09:41:10	Free State		Yes I do	Solar	It is time for a rethink of the policy-driven government control of the past. Energy is everyone's right and how to generate it should be the same. Grid tying can be governed but to the advantage of the people, not the government. There is a lot of private and corporate capacity to assist energy supply in South Africa. Initiatives should be welcomed in an era where systems, politics and governance do not have the capacity anymore to service the people it was intended.	Thinus	unemployed individual
2022-07-09 09:38:49	Gauteng		Yes I do	Solar	I think solar system will help South Africa with this problem of load shedding because it only needs natural sunlight to work and is very safe for our community.	Benida	unemployed individual
2022-07-09 09:13:27	Western Cape		Yes I do	Solar		Terence	unemployed individual
2022-07-09 09:12:24	Western Cape		Yes I do	Solar		Lauren	unemployed individual

2022-07-09 08:27:54	Gauteng		Yes I do	Solar	Solar and wind .. whatever quickest	Deborah	unemployed individual
2022-07-09 08:11:32	Western Cape		Yes I do	Solar	I feel that there can be a combination of power, solar, wind, renewables.	Delia	unemployed individual
2022-07-09 08:10:36	Gauteng		Yes I do	Solar		Shelley	unemployed individual
2022-07-09 08:09:15	Gauteng		Yes I do	Solar	Renewable energy is the way to go. I say so because coastal regions could make use of wind and regional areas of the country could make use of the sun. It is about time that we have a situation whereby we don't have to have our lives revolve around loadshedding.	Aadil	unemployed individual
2022-07-09 07:58:49	Gauteng		Yes I do	Solar	I think that independent power producers will aid greatly in supplying electricity to a country that is clearly not able to deliver adequate supply.	Marilyn	unemployed individual
2022-07-09 07:25:09	KwaZulu-Natal		Yes I do	Solar	Wind is good in windy areas as well. One has to consider environmental damage as well in choosing energy sources. Nuclear is dangerous. Gas is dangerous. Coal causes pollution. Impact of loadshedding is huge- 1. Unsafe for private homes at night. People cannot even get into their houses if electronic gates go down. Criminals take advantage of downed security systems. Average SA citizen does not have spare capital to purchase generators etc. 2. Impact on wifi is huge as cellmasts go down. People cannot communicate effectively under these circumstances. Entrepreneurs working from home are hugely impacted. Battery theft of cellphone masts has become a huge problem also. So business cannot be conducted properly as well, causing loss of income when unemployment is already so high. 3. Impact on traffic is huge. Increased accidents due to non-working traffic lights. 4. I tried to use a petrol card to pay for petrol on a recent trip away. Because of loadshedding, the card machines would not work. Luckily I had some cash to pay for the petrol or I would have been stuck!!! If everyone had to resort to using cash, the Reserve Bank could not print enough paper money!!!	Dianne	unemployed individual
2022-07-09 07:21:04	Limpopo		Yes I do	Solar	Small solar panel farms can be laid iut near towns and séctions of cities. Elon Musk had done it in . 40Mw in 6 months start to finish.	Mark	unemployed individual
2022-07-09 07:05:17	Gauteng		Yes I do	Solar		Lihle	unemployed individual
2022-07-09 06:50:37	Gauteng		Yes I do	Solar	We live in a country where the sun shines the most, so it makes sense to use our naturall resources. Look at what communities like Orania are accomplishing!! It can be done! Due to lack of maintenance on everything, our country is being messed up.... People are willing to help our economy, so let them!!	H.S.	unemployed individual
2022-07-09 06:47:39	Western Cape		Yes I do	Solar	Help the economy. Red tape is hurting, not helping...	Chanene	unemployed individual
2022-07-09 06:45:04	Western Cape		Yes I do	Solar	Quite simply, every business, farm, or household , willing to invest in electricity production in excess of "own needs" should be heavily and financially encouraged, and the country should be taking EVERY step to introduce this excess power into the grid. To take any other view in these days, and in these times, is plainly wicked.....	Wayne	unemployed individual
2022-07-09 06:38:14	Gauteng		Yes I do	Solar		Jo	unemployed individual
2022-07-09 06:29:03	Gauteng		Yes I do	Solar		Kobus	unemployed individual
2022-07-09 06:13:50	Gauteng		Yes I do	Solar	This is sunny SA, more chance to obtain energy from the sun, BUT having said that - NO levies and red tape to obtain Solar. The government didn't pay for the sun to shine. Just last night a house burned down in our neighbourhood, they don't have insurance - possibly due to constant loadshedding - who compensates them for losing their. entire livelihood?	Ursula	unemployed individual
2022-07-09 05:56:11	Western Cape		Yes I do	Solar	Sonpaneel kan duisende eenhede spaar. Elke geyser moet aan 'n sonpaneel gekoppel word. Sonpaneel moet ook meer bekostigbaar gemaak word sodat minder bevoorregtes dit kan bekostig.	Estelle	unemployed individual
2022-07-09 05:25:50	Western Cape		Yes I do	Solar	There are literally thousands of homeowners with solar installations far larger than required for their own needs. A simple inverter change will make this excess power available to the National Grid instantly. To overlook or block this readily available power source during this time of crisis equates to sabotage of the SA Economy.	Michael	unemployed individual
2022-07-09 04:35:28	Gauteng		Yes I do	Solar	Solar is the best as it is eco friendly. But I think other alternatives should be used for backup for in case there are days with no sun. You never know with climate change	Gift	unemployed individual
2022-07-09 00:43:19	Gauteng		Yes I do	Solar	We have a big free nuclear fusion energy generator in the sky. Use it!	Hannes	unemployed individual

2022-07-09 00:04:46	Western Cape		Yes I do	Solar	After totally destroying our power supply by incompetence and corruption. I am damn sure these SOE'S should be taken OUT IF GOVERNMENT control and into the hands of the private sector . Our government is a total failure and they all should be removed for what they have done to our beautiful country . I'd like to call for an urgent referendum to have the ANC removed from office before there's nothing left .	Marcelle	unemployed individual
2022-07-08 23:53:08	KwaZulu- Natal		Yes I do	Solar	The whole world is moving to green energy, which is natural and sustainable.	fana	unemployed individual
2022-07-08 22:31:55	Western Cape		Yes I do	Solar	I think there has to be a combination of renewable energy available. Every house and business should be motivated to produce electricity for them selves feeding back into the grid whatever extra they have.	Kobie	unemployed individual
2022-07-08 21:43:06	KwaZulu- Natal		Yes I do	Solar	Hi. We could use solar and wind energy	Malthee	unemployed individual
2022-07-08 21:35:57	Gauteng		Yes I do	Solar	Many people installed solar power during the past year and have additional power available to put back on the grid. It is there, available, why not use it to help with the electricity shortage?	Antonette	unemployed individual
2022-07-08 21:23:48	Gauteng		Yes I do	Solar		Junie	unemployed individual
2022-07-08 21:22:07	Western Cape		Yes I do	Solar	Our government has a monopoly on producing power, which is anti-competitive. How can a country grow when they do allow for competition.	Barbara	unemployed individual
2022-07-08 21:21:56	Western Cape		Yes I do	Solar	Our government has a monopoly on producing power, which is anti-competitive. How can a country grow when they do allow for competition.	Barbara	unemployed individual
2022-07-08 21:04:03	Western Cape		Yes I do	Solar	Most people can make use of solar because of our climate. Easy to install and clean	Glen	unemployed individual
2022-07-08 20:53:24	KwaZulu- Natal		Yes I do	Solar	I feel that using Solar power is a quick fix to stop loadshedding as soon as possible.	Nisha	unemployed individual
2022-07-08 20:40:57	Western Cape		Yes I do	Solar	It is long overdue that South Africa government should have made use of independent private providers to provide us with alternative electricity other than Eskom.	Mariam	unemployed individual
2022-07-08 20:31:08	Western Cape		Yes I do	Solar		Di	unemployed individual
2022-07-08 20:03:55	Western Cape		Yes I do	Solar	Solar is quickest to build. We need more wind power also, as well as battery storage. Renewable and green energy solutions only for the carbon free future.	Lance	unemployed individual
2022-07-08 20:00:16	Gauteng		Yes I do	Solar		FATIMA	unemployed individual
2022-07-08 19:52:40	KwaZulu- Natal		Yes I do	Solar	It's a no brainer. .should have been done 20 hrs, ago	Dennis	unemployed individual
2022-07-08 19:29:59	Western Cape		Yes I do	Solar		Aaaa	unemployed individual
2022-07-08 19:28:37	Western Cape		Yes I do	Solar	Solar, hydro and wind are readily abundant. Harnass these as a start and go green like the rest of the world!!!	S	unemployed individual
2022-07-08 19:28:35	Western Cape		Yes I do	Solar	Solar, hydro and wind are readily abundant. Harnass these as a start and go green like the rest of the world!!!	S	unemployed individual
2022-07-08 19:26:49	Gauteng		Yes I do	Solar	My input is short and simple: if there are private companies already being the intermediaries where prepaid meters are installed, why other companies, with proven experience and most importantly, real capabilities, are not allowed to operate? Solar is the option simply because we are in Afrika... hopefully, someone in the government knows the origin and meaning of this word.	Edgar	unemployed individual
2022-07-08 19:24:34	Gauteng		Yes I do	Solar	South Africa has plenty of sunshine which is not detrimental to our birdlife. Use solar power generation more extensively.	Theo	unemployed individual
2022-07-08 19:14:54	KwaZulu- Natal		Yes I do	Solar		Germaine	unemployed individual
2022-07-08 18:57:30	KwaZulu- Natal		Yes I do	Solar	I fully support scrapping the policy red tape - the independent power suppliers are not designed as competition for state owned power supplier but as aid to help remove pressure on eskom as the the single power supplier for the entire country, this has been quite a burden on Eskom seeing as they've been using fossilized fuel without any room to develop to renewable sources. Now to what can be used as an immediate solution is Solar, it may be expensive to purchase and establish Solar Farms around the whole country but you cannot argue with the fact that It will not require as much infrastructure re-development as other sources, it's already the way the world has been heading and setting up Solar Farms now starting in Provinces where Eskom struggles the most will permit it to reduce its load not only this, Government can work with privately owned companies that are already established in this country run by our own citizens and task them to develop these Solar Farms in large scale projects and also those working on smaller projects. Not only will this help develop the country speedily to what Government has already been pressured by trade nations to do but will undoubtedly put South Africa ahead of other nations who are still undecided on which method is suitable for their land. Yes we do benefit also from strong winds from time to time especially in the WC which allows that province to benefit both from Hydro and Wind methods of electricity production however, the First is quite expensive to develop and complicated and the latter may be useful from time to time but isn't guaranteed to be there when we need it. The Sun is definitely something we can count on to Rise from the East and set in the West, even on overcast days you are not full cut off because some power is able to be harvested and stored for use later.	Martin	unemployed individual

2022-07-08 18:56:46	Gauteng		Yes I do	Solar	Consumers should have the right too choose where power can be obtain from. Private solar/wind power farms should be brought in that the user can choose who supplies their power. And government should not be involved in this endeavour as government shown their corrupt and idiotic ways of running the country. People should be allowed too choose.	Pierre	unemployed individual
2022-07-08 18:39:07	Gauteng		Yes I do	Solar	This country is blessed with so many alternative energy sources, sadly this extremely corrupt government have interest in building a future for the people of South Africa. A perfect working example of self sustainability is Disney world, everything is reused, recycled, serviced daily, maintained daily, staff are selected according to their talents and passions, waste disposal and sorting is done constantly, sewerage is filtered using reusable wood chips and used on the grounds, plants and nurseries cared for and gardens and features are updated regularly, cleaning done daily / major cleaning done at night. Lighting always working - daily inspections done. Care is of utmost importance. We as taxpayers are getting nailed at every turn for the pure incompetence and greed of the public servants we pay! Enough is enough. Eskom is a SOE, the army should be handling security of all high / medium risk areas for cables / transformers / sub-stations, etc. It is truly embarrassing how 'faultless the gov officials and their cronies are', yet we suffer. Big change in favour of thr prople of SA is required very, very soon	Giesela	unemployed individual
2022-07-08 18:33:12	Western Cape		Yes I do	Solar		Bronwyn	unemployed individual
2022-07-08 18:32:12	Western Cape		Yes I do	Solar		Terssa	unemployed individual
2022-07-08 18:29:00	Gauteng		Yes I do	Solar	We have an abundance of sun, use it. Independent suppliers should make pricing competitive. Maybe corruption and theft can be held at bay too.	Cathy	unemployed individual
2022-07-08 18:28:27	Gauteng		Yes I do	Solar		r	unemployed individual
2022-07-08 18:26:28	Gauteng		Yes I do	Solar		Annarie	unemployed individual
2022-07-08 18:18:27	Gauteng		Yes I do	Solar	Lots of space AND clean,no danger	Salmon	unemployed individual
2022-07-08 18:09:51	Gauteng		Yes I do	Solar		Baile	unemployed individual
2022-07-08 18:06:11	Western Cape		Yes I do	Solar	Anything except coal. Renewal enigy ?	Faiza	unemployed individual
2022-07-08 18:03:35	Gauteng		Yes I do	Solar		Sharlene	unemployed individual
2022-07-08 17:59:35	Gauteng		Yes I do	Solar	There isn't just one solution to the energy crisis: we need solar, wind where appropriate, hydro if that is possible and as these come on line in numbers, coal must be phased out. Private enterprise has to be managed by not by the antediluvian Gwede M. Red tape ruthlessly trimmed. Municipalities have so far been useless re energy; perhaps they could be brought into this troubled century to play - but not control - their part.	Jenny	unemployed individual
2022-07-08 17:59:24	KwaZulu-Natal		Yes I do	Solar	Wind, hydro, and gas are also good alternatives	Clive	unemployed individual
2022-07-08 17:54:22	Gauteng		Yes I do	Solar	SA is blessed with natural resources and has one of the best climates in the world! We have sunshine throughout the year so Solar energy is a no brainer. It's more environmentally friendly compared to coal/diesel etc. And besides which we the taxpayers cannot afford to support Eskom any longer! They're useless as it is!	Roekshana	unemployed individual
2022-07-08 17:35:43	KwaZulu-Natal		Yes I do	Solar	Ok	Krishna	unemployed individual
2022-07-08 17:29:14	Mpumalanga		Yes I do	Solar	Actually any electricity generation can work to help end the loadshedding! This loadshedding is redicilous , we have great sinshine and plenty of wind to help our power grid . The sources are environmentally friendly and it could reduce the redicilous costs to consumers .	Francois	unemployed individual
2022-07-08 17:08:48	Gauteng		Yes I do	Solar		Maatjè	unemployed individual
2022-07-08 17:08:04	North West		Yes I do	Solar	No question about it, we must go for solar, wind turbines where possible, etc.	Charlotte	unemployed individual
2022-07-08 17:07:15	Western Cape		Yes I do	Solar	In a country with so many sunlight hours, such a long coastline with wind and tidal bore, alternative energy is the logical answer. Our family is off grid and it is possible for this great country.	Sue	unemployed individual
2022-07-08 17:05:03	Western Cape		Yes I do	Solar	Solar AND wind would work. Best to streamline funds into these platforms so we can become more 'green' and move away from nuclear as quick as possible. it's vital to our power supply as well as climate change. nuclear waste still has to go somewhere and it's not pretty for our future generations (if we still have those)	lizette	unemployed individual
2022-07-08 17:00:17	Western Cape		Yes I do	Solar	Given the fact that nobody wants to reduce their energy consumption, and the country wants economic growth, the only real, long term base load option, without fossil fuels is nuclear! Eskom cannot burn 2 million litres of diesel per day to keep the lights on. It's totally unsustainable and produces tons of CO2!!!	Sven Karl	unemployed individual
2022-07-08 16:52:41	Gauteng		Yes I do	Solar	We are now in a situation where the government has put us and them in a no win position. They have to find a power solution immediately. Eskom will fail very soon then what. Unfortunately the ANC will see this as another way for them to steal money. Which means processes MUST be put in place to prevent them from doing that.	Stewart	unemployed individual

2022-07-08 16:26:55	Gauteng		Yes I do	Solar	My business is suffering on both ends of the spectrum due to the high tariffs the outages and now fell expenses. At this time I am done with this nonsense and am unemployed now due this idiotic situation which no one wants or can take responsibility for or are able to fix. All they want is to line their pockets and have the job and pay but don't want to work a day in their lives and blame everyone and everything except for themselves.	Phillip	unemployed individual
2022-07-08 16:26:52	Gauteng		Yes I do	Solar	Cut the stupid red tape that is holding back the functionality of supply of electricity, so that our economy can improve.	Gloria	unemployed individual
2022-07-08 16:24:59	Western Cape		Yes I do	Solar		Theo	unemployed individual
2022-07-08 16:13:13	Gauteng		Yes I do	Solar	There is plenty of space to erect solar panels that will provide sufficient additional electricity to the struggling grid.	Mia	unemployed individual
2022-07-08 15:49:42	Gauteng		Yes I do	Solar	The state of the country's power supply has reached a critical point and this should have been addressed a long time ago. It is clear that the ANC government are not capable of running anything properly. There is no more time to mess around and anything and everything that can resolve the situation must be done immediately. Allow private enterprise to participate and the problem will be resolved.	Michael	unemployed individual
2022-07-08 15:28:09	Western Cape		Yes I do	Solar	Renewable energy via the Sun and Wind are the only feasible solutions to sustainable and ongoing power supply.	Tim	unemployed individual
2022-07-08 15:28:02	KwaZulu-Natal		Yes I do	Solar		Debbie	unemployed individual
2022-07-08 15:10:12	Western Cape		Yes I do	Solar	Seeing as renewable energy is to be used more (now that fossil fuels are to be used less), it would be the natural route to go. It would also be good to use a renewable energy company with NO ties to family members of the government.	Wilma	unemployed individual
2022-07-08 15:10:12	Western Cape		Yes I do	Solar	Seeing as renewable energy is to be used more (now that fossil fuels are to be used less), it would be the natural route to go. It would also be good to use a renewable energy company with NO ties to family members of the government.	Wilma	unemployed individual
2022-07-08 15:10:12	Western Cape		Yes I do	Solar	Seeing as renewable energy is to be used more (now that fossil fuels are to be used less), it would be the natural route to go. It would also be good to use a renewable energy company with NO ties to family members of the government.	Wilma	unemployed individual
2022-07-08 15:10:12	Western Cape		Yes I do	Solar	Seeing as renewable energy is to be used more (now that fossil fuels are to be used less), it would be the natural route to go. It would also be good to use a renewable energy company with NO ties to family members of the government.	Wilma	unemployed individual
2022-07-08 15:10:08	Western Cape		Yes I do	Solar	Seeing as renewable energy is to be used more (now that fossil fuels are to be used less), it would be the natural route to go. It would also be good to use a renewable energy company with NO ties to family members of the government.	Wilma	unemployed individual
2022-07-08 15:08:48	Gauteng		Yes I do	Solar	We can no longer depend on Eskom, nor live with the constant tariff increases and perpetual loadshedding	Gary	unemployed individual
2022-07-08 15:05:33	Western Cape		Yes I do	Solar	We need to have clean energy and we need this to be expedited. The policy issues of independent providers must surely at this stage be a no-brainer. Yes regulate the use, safety, distribution etc and consumer aspects but please get on with this already.	Greta	unemployed individual
2022-07-08 15:03:44	KwaZulu-Natal		Yes I do	Solar	It is pretty clear that the anc and their looting buddies have completely fucked up all SOE's including water and electricity provision. It is my humble opinion that you should step aside now and let the people that actually know what the hell they are doing, do the jobs and get this shithole african circus livable again for it's tax paying citizens. You have turned this country into one big racial circus with your insistent BEE (BULLSHIT ECONOMIC EXPECTATIONS) Now stand aside so that, like in ALL OTHER COUNTRIES IN THE WHOLE WORLD EXCEPT AFRICA, the professionals handle the real life issues.	Tiny	unemployed individual
2022-07-08 14:50:45	Gauteng		Yes I do	Solar	Eskom cannot meet the needs of the country. Well not everybody could afford pricey solutions as generators, convertors besides the already skyrocket for less and less electricity to be available for our household and our businesses. Therefore, IPP's should be allowed to produce electricity (solar, wind, etc). The third natural method besides solar and wind is the hydro one especially with the sea, the dams so all together, a lot of electricity will be produced. So it is high time for the electricity availability to be solved for good.	JOELLE HELENE CHRISTINE	unemployed individual
2022-07-08 14:45:14	Gauteng		Yes I do	Solar	It is very important that we use every available way of successfully generating power for electricity. With the population growing at an increasing rate and more demand for electricity it is ridiculous to have only one supplier	Benita	unemployed individual
2022-07-08 14:40:37	Western Cape		Yes I do	Solar	SA has plenty of sun and wind! Use it!!	Christa	unemployed individual
2022-07-08 14:32:54	Gauteng		Yes I do	Solar			unemployed individual
2022-07-08 14:32:41	Mpumalanga		Yes I do	Solar	Government is totally out of their depth in this issue at hand, these cancerous scumbags & their deployed cadres are nothing but common thieves who have basically destroyed South Africa over the last 28 years. They need to be held accountable and charged with Treason and Crimes against humanity. ???	Clem Lockhart	unemployed individual
2022-07-08 14:16:03	Gauteng		Yes I do	Solar	The Government should be encouraging private enterprises to come on board asap. We are being held ransom by incompetent oxygen/money thieves sitting in our government. The economy is being killed by ill-equipped persons making decisions without any business acumen.	Elmarie	unemployed individual
2022-07-08 14:13:55	Gauteng		Yes I do	Solar		Lesley	unemployed individual
2022-07-08 13:36:32	Gauteng		Yes I do	Solar	SA has great weather and solar power is a good option. While battery storage is expensive, solar can allow generation during the day to help cover the shortfall from Eskom. It is also fairly simple to install and can be scaled from a single panel up to massive installations	Mohamed	unemployed individual

2022-07-08 13:29:30	Western Cape		Yes I do	Solar		Mirna	unemployed individual
2022-07-08 13:27:22	Gauteng		Yes I do	Solar		Daphnè	unemployed individual
2022-07-08 13:26:17	Gauteng		Yes I do	Solar	Eskom should have been closed down years ago and a provider appointed that is actually competent to deliver a service. Eskom is currently a huge burden on the SA economy and the public must keep Eskom "alive" while the public suffers. Rather use solar or wind power, by a provider than can and want to deliver (and not just sit and earn a massive salary).	Gerhard	unemployed individual
2022-07-08 13:26:09	Gauteng		Yes I do	Solar		Dolly	unemployed individual
2022-07-08 13:21:45	Western Cape		Yes I do	Solar		Bernard	unemployed individual
2022-07-08 13:17:55	Outside SA	United Kingdom	Yes I do	Solar	This is incredibly long overdue. The Government has held a monopoly over an unsustainable and environmentally damaging method of generating electricity for far too long. It's absolutely ridiculous and makes no sense whatsoever when South Africa has viable natural alternatives available.	Quinn	unemployed individual
2022-07-08 12:41:43	Gauteng		Yes I do	Solar	The anc terrorists keeps SA hostage with their crap policies. This must stop so we can get a stable grid. Any options for energy generation should be considered that is not redicules expensive.	Andre	unemployed individual
2022-07-08 12:35:52	Western Cape		Yes I do	Solar		S heryl	unemployed individual
2022-07-08 12:34:59	Western Cape		Yes I do	Solar	South Africa is known for It's sunshine, we need to embrace it to turn the power tragedy around. If Eskom and the government can't supply the country with power, it is necessary to find other means to supply power.	Jessica	unemployed individual
2022-07-08 12:32:49	Gauteng		Yes I do	Solar		Michelle	unemployed individual
2022-07-08 12:32:27	Gauteng		Yes I do	Solar	Solar should be implemented directly followed by wind sourcing.	Herkie	unemployed individual
2022-07-08 12:22:21	Western Cape		Yes I do	Solar	Any renewable forms of power generation is welcome, as long as it does not pose any harm to the atmosphere and earth in general. Fossil fuels must be banned with immediate effect	Shamiel	unemployed individual
2022-07-08 11:52:20	Western Cape		Yes I do	Solar	Power generation via solar, wind and hydro are economical and (much) more environmentally friendly than coal, diesel or gas. Moreover, allowing independent companies to producers power has at least two benefits: (1) private funding to help build the power grid and (2) healthy competition in the power generation arena.	Gavin	unemployed individual
2022-07-08 11:51:14	Gauteng		Yes I do	Solar	We are tired of the ANC and other politicians who have messed up our country because of incompetence and who put people into positions that do not have the skills or experience to run that department and are just given the position to push the ANC's agency of power, bribery and corruption. The load shedding is ridiculous and is getting out of hand.	Wesley	unemployed individual
2022-07-08 11:47:53	Western Cape		Yes I do	Solar	Sunny South Africa, there is your answer right there. Stop ignoring it.	Les	unemployed individual
2022-07-08 11:45:29	Eastern Cape		Yes I do	Solar		Nick	unemployed individual
2022-07-08 11:37:10	Gauteng		Yes I do	Solar	I feel that if people are allowed to sell their excess solar power generated to the grid we will have some relief from load shedding although this would only be during the day. Long term nuclear power is still the best answer.	Albert	unemployed individual
2022-07-08 11:23:13	Western Cape		Yes I do	Solar		Jennifer	unemployed individual
2022-07-08 11:23:09	Western Cape		Yes I do	Solar		Karin	unemployed individual
2022-07-08 11:13:39	KwaZulu- Natal		Yes I do	Solar	Solar is more safer and clean..its constant and not dependent on ANC OR EFF..	Wayne Ralph	unemployed individual
2022-07-08 11:12:14	North West		Yes I do	Solar	A combination of alternative energy solutions will be the best option. Solar, wind, hydro and new innovative sustainable solutions ought to be used simultaneously to address our energy crisis. I am opposed to the use of nuclear or fracking solutions. Independent power suppliers should be allowed to immediately add energy into the grid, and there should not be a limitation on how much alternative energy may be entered into the grid, although it should perhaps be administrated well.	H	unemployed individual
2022-07-08 11:07:02	Western Cape		Yes I do	Solar	Open the bank of power that is already available	JJ	unemployed individual
2022-07-08 11:07:00	Western Cape		Yes I do	Solar	Open the bank of power that is already available	JJ	unemployed individual
2022-07-08 10:59:29	Western Cape		Yes I do	Solar		Al	unemployed individual
2022-07-08 10:58:47	Western Cape		Yes I do	Solar	People should be able to set up solar options without penalties from Eskom, and should be permitted to sell their excess power to the grid.	Erna	unemployed individual
2022-07-08 10:53:11	Western Cape		Yes I do	Solar		Lizette	unemployed individual

2022-07-08 10:51:55	Gauteng	Yes I do	Solar	South Africa is blessed with high Solar energy than most overseas countries, coupled with Wind power. Why the government are against promoting the use of these natural resources to boost our power supply which has proved to be an unmitigated disaster at Eskom is pure idiocy. Eskom in it's current state is nothing short of lunacy. They want to control everything instead of allowing free enterprise to boost our current disaster that is fraught with power outages, load shedding and aging inefficient power stations. This is nothing short of archaic and costly.	Roberta	unemployed individual
2022-07-08 10:48:47	Western Cape	Yes I do	Solar	The malfeasant and incompetent ruling party should not only be replaced for allowing Eskom to fail to the extent that it has, it should be prosecuted for culpable negligence. This is a state of disaster. Emergency measures need to be put in place. Independent power producers should be contracted immediately to bring a combination of different types of electricity generating capacity online as quickly as possible (including as much renewable energy as is feasible). As long as they employ as many local (competent) South Africans as they can (regardless of their skin colour). Take some of the pressure off Eskom and give De Ruyter a chance to restructure the organisation, get rid of the dead wood, re-employ some of the highly skilled former staff that are willing to return, decommission failing power stations, and get the newer power stations up to full generating capacity.	Bradley	unemployed individual
2022-07-08 10:46:24	North West	Yes I do	Solar		Corne	unemployed individual
2022-07-08 10:39:36	Eastern Cape	Yes I do	Solar		Tanya	unemployed individual
2022-07-08 10:35:53	Gauteng	Yes I do	Solar	Eskom is dead. Cadre deployment and unions killed it. They are unable to arrest the death spiral and our economy is paying the price. We need competition in power supply so that the people can afford this critical resource. Give us access to the solar panels we produce without forcing us to first export and then re-import our own produced items just for the sake of BBBEE. Let the population help in innovation of solutions to help us all. Cut the red tape, beurocracy, cadre involvement, corruption and fraud involved in power supply so that this country has a hope of job creation and getting off of junk investment status. We could do with more of all kinds of power generation, not just solar, but first let's alleviate the crisis before we look at nuclear, hydro or wind power (because those require specialists and a full environmental impact study)	Angie	unemployed individual
2022-07-08 10:35:28	Gauteng	Yes I do	Solar		Pieter	unemployed individual
2022-07-08 10:25:41	Gauteng	Yes I do	Solar	We desperately need independent power producers for a long time now and government has been stubborn. It is obvious to everyone that Eskom has not been coping for a long time. Eskom was not supposed to be ? state own enterprise. It was supposed to be 50/50, a parastatal. The government intentionally own ? to have access to Eskom finances. Now that the damage is done, the government acts like they care. Once again the citizens of SA are being treated like "we are stupid". The government's wickedness has been exposed for a while now	Emily	unemployed individual

2022-07-08 10:17:10	Gauteng	Yes I do	Solar	Reduce the cost of solar products to make it affordable for many. Any independent companies must be SOutH African.	Em	unemployed individual
2022-07-08 10:17:01	Northern Cape	Yes I do	Solar		Leah-Anne	unemployed individual
2022-07-08 10:13:14	Western Cape	Yes I do	Solar	Definitely NOT nuclear as that will cost too much and the waste is a disaster for future generations and the government is not able to deal with a nuclear disaster should it occur. Solar is the way to go in South Africa!	Samantha	unemployed individual
2022-07-08 10:05:46	Gauteng	Yes I do	Solar	Solar or Wind generated would be the most practical and affordable - the extra can be put into the grid. South Africa has a LOT of sunshine, so start getting assistance from companies that excel in renewable energy! For example, there is new Ground-Based Solar Panel technology that was recently developed which was unveiled at the opening of the 2022 MFCC Trade Fair by Virtue Solaris, a renewable energy company. These solar panels are similar to the conventional ones seen on the rooftops however, these panels can be lined over pavements, roads, car parks, driveways etc. and can be integrated into existing pathways without any need for infrastructural works .	Paige	unemployed individual
2022-07-08 10:03:41	Gauteng	Yes I do	Solar	SA is blessed with ample sunlight almost all year round and we should be taking advantage of that. Eskom is a spectacularly failed and deliberately mismanaged, looted entity being held together with prestik and prayers. They have no competition and cannot deliver. Time to let IPP's onto the market and help save this country, its economy and people.	Gabby	unemployed individual
2022-07-08 09:49:48	Limpopo	Yes I do	Solar	I am a person living with a severe physical disability and am dependent on a reliable electricity for the assistive equipment I need to take care of myself.	Janeen	unemployed individual

2022-07-08 09:49:23	Gauteng		Yes I do	Solar	Absolutely EVERYONE in South Africa that knows anything about politics, knows that the ANC are destroying SA. They are a corrupt, greedy, incompetent and destructive party that has destroyed absolutely EVERYTHING that they have touched! (Prove me wrong!?) We all know that the ANC are ONLY out to gain favour for the ANC party and have absolutely NO CONCERN for the people of South Africa. It is high time that the ANC be removed from power as the SA people are suffering more and more under this corrupted party! I am in full opinion that the ANC should have NO say over the power generation of this country and it should be run privately! We should be getting/moving away from fossil fuels for energy production and heading towards more sustainable sources of energy (Solar, wind, hydro, natural gases, etc, etc.) It is totally unacceptable that the ANC has known about the looming energy crises since the late 1990's and have done absolutely NOTHING about sourcing a solution to the problem since then. DOWN WITH THE ANC at ALL costs. Otherwise we might as well rename South Africa to "Zimbabwe South"!!!	Clifford	unemployed individual
2022-07-08 09:36:19	Gauteng		Yes I do	Solar	We have so much sun. Everybody comes here after the beautiful sunny weather. WHY ARE WE NOT USING ALL THIS SUNPOWER. It is cleaner and cheaper . I ask again why coal and diesel two of the most expensive why opening the system to the greed and corruption that the modern society seems to expect and promote. WHY!!!!!!!!!!!!!!!!??????????	Kathleen	unemployed individual

2022-07-08 08:43:01	Eastern Cape		Yes I do	Solar		Tanya	unemployed individual
2022-07-08 08:39:44	Eastern Cape		Yes I do	Solar		Tanya	unemployed individual
2022-07-08 08:32:36	Eastern Cape		Yes I do	Solar		Tanya	unemployed individual
2022-07-08 08:24:30	Gauteng		Yes I do	Solar	Solar electricity power stations! Because South Africa is known for its more than 200 days of sun in a year. We can harness that power and South Africans can have full electricity 24/7. Solar power is also eco friendly and won't take away jobs from Eskom or influence the economy badly. It will influence the economy in a good way and give South Africans a choice for which power company to use. If Municipalities installed a Solar power station and still owe Eskom money, the Municipality, and NOT the residents, should pay off what they owe Eskom. Residents should have the choice whether to use Eskom or Solar power.	Sonia	unemployed individual
2022-07-08 08:18:51	Western Cape		Yes I do	Solar	Our country is in a crisis at present. Government looting, corruption and inability to supply the most basic of needs needs to be addressed. If the people of this country can step in and assist we will not be held ransom to Eskom and their ridiculous inflated prices. We urgently need other alternatives before the country implodes. Red tape merely prolongs the situation which I believe can be dramatically improved.	Theresa	unemployed individual

2022-07-08 08:14:55	Gauteng		Yes I do	Solar		Roger	unemployed individual
2022-07-08 08:01:29	Western Cape		Yes I do	Solar	Do it now. We need it like yesterday.	Johann	unemployed individual
2022-07-08 07:41:56	Free State		Yes I do	Solar	All government own properties can utilize their building roofs to accommodate solar panels with a proper inverter. Generated power can be utilize for the host government building and the overflow can be placed back into the grid. This will mean no electricity costs for any government building or property No costs of hiring or rent to be paid. Only costs is originally costs to do installment of panels and system	jan	unemployed individual
2022-07-08 07:14:56	KwaZulu-Natal		Yes I do	Solar	I support the introduction of a mix of energy and long term power generation except new coal stations. I support the emergency medium term use of a power ship. The power problem in South Africa is an emergency and has been for years. There is no hope of improving the economy (and all the benefits to all the citizens) without a reliable power supply!	Gillian	unemployed individual
2022-07-08 07:07:06	Gauteng		Yes I do	Solar		Annebe	unemployed individual

2022-07-07 21:36:49	Western Cape		Yes I do	Solar		Marianda	unemployed individual
2022-07-07 21:20:31	Gauteng		Yes I do	Solar	Enough sunshine in the country and ANC can't charge you for it.	Maryka	unemployed individual
2022-07-07 21:07:11	KwaZulu-Natal		Yes I do	Solar		Dave	unemployed individual

2022-07-07 20:54:45	Western Cape		Yes I do	Solar	Subsidies and tax breaks for household solar power will allow millions of SA homeowners to become mini power stations, this coupled with existing, coal, hydro, wind and nuclear energy could end loadshedding.	Quintin	unemployed individual
2022-07-07 19:49:55	Western Cape		Yes I do	Solar		Annemarie	unemployed individual
2022-07-07 19:32:51	Western Cape		Yes I do	Solar	Solar, Wind, we have lots of it and for FREE!	L	unemployed individual
2022-07-07 19:21:34	Gauteng		Yes I do	Solar	The Uv rays belongs to God and He freely gave it to us.. It's corruption that's holding onto the current method of energy production. More and more people are slowly moving off grit anyways. It's inky a matter of time before the bulk of the population will be off gritt completely. They ought to wake up and smell the coffee	Herold	unemployed individual
2022-10-05 09:09:16	Gauteng		Yes I do	Solar	This is a no brainer. The sooner we get these other systems going, the cheaper i.e. solar or alternatives will become.	Arina	unemployed individual
2022-09-27 13:33:37	Gauteng		Yes I do	Solar	Coal. We currently overwhelmingly use coal for generating electricity. And it's not working. So why keep on doing something that doesn't work, repeatedly. That's literal insanity. South Africa has a lot of sun. This can be used effectively. So why not do it?	Charl	unemployed individual
2022-09-22 06:34:53	Western Cape		Yes I do	Solar		Fritz	unemployed individual
2022-09-15 09:57:01	Gauteng		Yes I do	Solar	For more than 10 years Eskom's methods didn't work. Time to use what South Africa has plenty of - sunlight. And seeing as Eskom's methods didn't work and the situatioN has, in fact, gotten worse, try something else. Don't try and force ideas and ideals that clearly aren't working.	Charl	unemployed individual
2022-09-14 21:17:53	Western Cape		Yes I do	Solar	Solar, wind and hydro. I would still like red tape for nuclear though.	Rebecca	unemployed individual
2022-09-14 00:41:31	Gauteng		Yes I do	Solar	IPP's can collaborate with homeowners to secure space for PV panels in return for reduced electrical provision. Especially in poor communities.	Lacy	unemployed individual
2022-09-13 11:25:33	KwaZulu- Natal		Yes I do	Solar		Shannon	unemployed individual
2022-09-13 09:01:40	Gauteng		Yes I do	Solar	This country is dying because of the stranglehold by ESCOM vultures. A healthy competition is always good for the growth of any economy.	Sam	unemployed individual
2022-09-11 18:11:08	Western Cape		Yes I do	Solar	Eskom clear cannot cope and we already pay way way too much for electricity even with all the loadshedding. We definately need Independant Power Producers. I'm all for Solar or Wind power.	Firyaal	unemployed individual
2022-09-05 17:20:50	Gauteng		Yes I do	Solar		Mohamed	unemployed individual
2022-08-29 21:34:35	Western Cape		Yes I do	Solar	SA has amongst the highest number of sunny days per annum worldwide, combined with huge tracts of unarable land. Solar is the obvious choice for renewable energy.	Kevin	unemployed individual
2022-08-22 16:26:12	Gauteng		Yes I do	Solar	Business and households require less power outages and government is there to serve the people, so I suggest that generating power not be hindered or delayed.	Glenda	unemployed individual
2022-08-08 08:24:03	KwaZulu- Natal		Yes I do	Solar	When I read " Scrap the red tape ", I become very angry and frustrated. Why is there any " red tape " at all? Governments and politicians all over the World, including South Africa, are constantly professing to acting in the best interest of the citizens - absolute rubbish and lies! All they are doing is enslaving people everywhere - people are trusting in those who really don't appear to care about their citizens. Taking taxes from citizens to give grants to others is firstly stealing from working citizens and enslaving those who have been fooled into depending on governments. It is better to give every individual the opportunity to earn a living, learn how to uplift themselves, give them the grounding to respect their own abilities instead of stretching out their hands for funds stolen from other working individuals. " Red tape " = " loss of Freedom " where are those " Freedom Fighters " that wanted a " New South Africa " let people in business offer opportunities to other South African citizens without " red tape " Wake Up South Africa! Wake Up!	Antoinette	unemployed individual
2022-08-07 01:39:43	Mpumal anga		Yes I do	Solar		Johan	unemployed individual
2022-08-05 11:43:49	Gauteng		Yes I do	Solar	South Africa has a long summer with lots of sunlight. We need to move forward and stop burning fossil fuels and get with the modern times. SA carbon footprint is bad		unemployed individual
2022-08-05 09:06:59	Eastern Cape		Yes I do	Solar	It is utterly ridiculous that we have solar farms/wind farms/hydro-electric capacity but they are refusing to allow them to assist Eskom until it is back to being a reputable/profitable company it used to be. Yet they 'sell' power to other neighbouring countries???? Why do they feel the need to strangle free enterprise in this country. Why do they feel the need to steal money from those who have taken the initiative; at GREAT EXPENSE; to go partial or fully over to solar. Those that have tossed electric stoves and gone over to gas (also no longer cheap) ; the proposed 'charge' to those who off grid. What a cheek. It makes one wonder if they refuse to use them as there is no 'kickback'.	Susan	unemployed individual
2022-08-04 21:52:38	Gauteng		Yes I do	Solar	We need to be able to install solar and not be penalised by our government for doing it, Eskom needs competition so it can sort itself out and not just keep increasing our monthly electricity costs - paying more for less electricity!	Gillian	unemployed individual
2022-08-04 16:51:01	Western Cape		Yes I do	Solar	I agree to scrapping the regulation on independent power suppliers however there must be a rate cap at which they charge the public for electricity.	Caren	unemployed individual
2022-08-04 08:33:06	Gauteng		Yes I do	Solar	As a country we have plenty of sunshine through the year and it's safe	Nosipho	unemployed individual

2022-08-04 07:08:01	Gauteng		Yes I do	Solar		Charmaine	unemployed individual
2022-08-03 20:13:05	Gauteng		Yes I do	Solar	Dis n natuurlike kragbron	Martie	unemployed individual
2022-08-03 14:59:31	Western Cape		Yes I do	Solar		Lesley	unemployed individual
2022-08-03 07:23:12	Western Cape		Yes I do	Solar		Cyril	unemployed individual
2022-08-02 22:35:49	Western Cape		Yes I do	Solar		Murray	unemployed individual
2022-08-02 17:04:23	Outside SA		Yes I do	Solar		Celeste	unemployed individual
2022-08-02 14:25:00	Western Cape		Yes I do	Solar	Solar energy is available all year round. Alongside this we need new improved green opportunities to lower electricity prices for our country and citizens.	Denise	unemployed individual
2022-08-02 13:04:47	Free State		Yes I do	Solar	Sunlight is free.	Leendert	unemployed individual
2022-08-02 09:04:24	KwaZulu-Natal		Yes I do	Solar	Eskom is incapable of meeting the country's electricity needs. This is impacting negatively on businesses and the economy as a whole. Independent suppliers of power should be permitted to supply electricity in any proven format to Eskom to relieve the load on the grid. General householders should also be permitted to sell excess solar power back to the grid. This will require that political egos are sacrificed for the greater good of SA.	Helen	unemployed individual
2022-08-02 08:53:41	Mpumalanga		Yes I do	Solar		Denise	unemployed individual
2022-08-02 06:49:35	Western Cape		Yes I do	Solar	Sonkrag is die veiligste en nie skadelik vir die natuur nie.	Estelle	unemployed individual
2022-08-01 23:19:45	Western Cape		Yes I do	Solar	Solar and geothermal. Solar power installations are easy and cheap to put up. It can reach rural villages. It is far less polluting than coal fired power stations where communities live 7 years less due to particles in their lungs, asthma, bronchial problems. Most of all, S.A. is the 7th largest emitter of greenhouse gases. We barely have time to reverse the climate emergency. S.A. must take action NOW. I will be marching in the biggest climate March ever, in September.	Wendy	unemployed individual
2022-08-01 22:02:30	Gauteng		Yes I do	Solar	Government must use every resource available to stop load shedding.	Yolande	unemployed individual

2022-08-01 20:50:17	Western Cape		Yes I do	Solar		John	unemployed individual
2022-08-01 19:48:30	Western Cape		Yes I do	Solar	Government is only corrupt and will keep on stealing doesn't matter how we contribute!!! So let us and the private sector save our country as our government only steals and break!!!	Riana	unemployed individual
2022-08-01 17:43:13	Western Cape		Yes I do	Solar		Ruth	unemployed individual
2022-08-01 14:49:37	Gauteng		Yes I do	Solar		Shelley	unemployed individual
2022-08-01 10:06:25	Western Cape		Yes I do	Solar	We have enough sun and wind and waste water to generate power. Let's use our natural resources that G9d has blessed us with.	Faeza	unemployed individual
2022-08-01 09:54:25	Mpumalanga		Yes I do	Solar		Erica	unemployed individual
2022-07-31 20:45:06	Western Cape		Yes I do	Solar		Stephen	unemployed individual
2022-07-31 20:44:24	Mpumalanga		Yes I do	Solar		Chris	unemployed individual
2022-07-31 14:58:04	Northern Cape		Yes I do	Solar	The infrastructure already exists and is in the process of getting installed, so using it would be the logical choice	Luthando	unemployed individual
2022-07-27 18:03:37	Gauteng		Yes I do	Solar	I am sure that there are enough experts out there that could get together and create sustainable and renewable energy which does not harm the planet - they just need to get the green light which then would end up being for the greater good of ALL. We do not have to wait for the rest of the world to dictate to us what is good for us - we have plenty of knowledgeable people who have the interest and wellbeing of ALL South Africans at heart including this beautiful country.	Petrae	unemployed individual
2022-07-26 15:44:11	Western Cape		Yes I do	Solar	As we are blessed with sunshine all-year round, I feel we should utilise that and have huge battery back-up. Private citizens should be encouraged to go solar, WITHOUT the ridiculous fines Eskom has suggested. How crazy is that.. the hopeless power utility cannot provide adequate services to its citizens, but want to then penalise them for creating their own.. Only this corrupt government!!	Christa	unemployed individual
2022-07-25 10:50:04	Western Cape		Yes I do	Solar	Solar Power would be most suitable for now, as it is most cost effective and easier to install. Independent Power producers would be able to speed up processes as well, as long as capping and tabs are being kept on all involved, with regard to pricing, quality, etc. It is ludicrous that people who are already living under the bread line would have to pay R900 for no service rendered of course.	Charlene	employed individual
2022-07-25 10:40:44	Northern Cape		Yes I do	Solar		f	employed individual
2022-07-25 09:39:50	Gauteng		Yes I do	Solar		EP	employed individual

2022-07-25 08:18:02	Western Cape		Yes I do	Solar	Eskom continues to prove that it is incapable of meeting South Africa's energy needs therefore independent service providers need to be allowed and supported to ensure that demand is met to mitigate the negative economic and social impacts of load-shedding. Renewable energy producers should be incentivised, not penalised. By lowering the burden to Eskom they can have the opportunity to upgrade their facilities and find ways to collaborate with independent energy providers to maximise local and accross boarder energy supply to everyones benefit.	Linda	employed individual
2022-07-25 08:11:06	Gauteng		Yes I do	Solar	I really think the solar panel could be a good electricity for the future of south africa and could help every house hold wish we could have it to help eskom keep the light on since eskom is struggling.	Polelo	employed individual
2022-07-25 04:40:39	Gauteng		Yes I do	Solar	Son sowel as windkrag is goed vir Suid Afrika, want ons is 'n sonnige en winderige land.	Mari	employed individual
2022-07-24 18:22:21	Western Cape		Yes I do	Solar	South Africa desperately needs to implement alternate measures as we can't depend on Eskom for a continuous supply of electricity. Eliminating the red tape will assist in taking South Africa forward.	Patricia	employed individual
2022-07-24 18:19:27	Gauteng		Yes I do	Solar		Paula	employed individual
2022-07-24 16:25:16	Gauteng		Yes I do	Solar	Nuclear being the most preferable but a long term solution. More needs to be invested in solar. Eskom is no longer able to provide SA with enough power and we desparately need help from another source	Madelein	employed individual
2022-07-24 12:36:22	KwaZulu- Natal		Yes I do	Solar	We need rebates and incentives for those that can afford the infrastructure in order to feed surplus production into our national grid. The time has come to set race issues aside and save our country.	Mary	employed individual
2022-07-24 07:59:43	Western Cape		Yes I do	Solar	We need to use things that we have alot of like the sun	Johannes	employed individual
2022-07-24 07:41:05	Western Cape		Yes I do	Solar		Reg	employed individual
2022-07-22 23:17:19	KwaZulu- Natal		Yes I do	Solar	SA has an abundant supply of solar energy. Harnessing this renewable energy source will go a long way in mitigating climate change.	Lorraine	employed individual
2022-07-22 16:55:08	Gauteng		Yes I do	Solar		Shaun	employed individual
2022-07-22 15:53:52	KwaZulu- Natal		Yes I do	Solar	We are blessed to have ample sun and wind in SA. If government could help subsidise solar power panels to homes, we could better use that for power as right now the cost for a solar infrastructure is exhorbitant. Also, make it compulsory that for all new developments from hereon have grey water systems, solar power infrastructure as well as water tanks for rain harvesting. Let's use some forethought for a change instead of running business (i.e. our country) in "panic mode". Lastly, let's stop the corruption and stealing and ensure our law enforcement is upheld because otherwise people will just steal the money from the tenders. Let's put the value on the people once and for all. Thank you.	Taryn	employed individual
2022-07-22 14:52:08	North West		Yes I do	Solar	Solar and wind energy is the best for people and nature. Nothing can beat them.	Philippus	employed individual

2022-07-22 11:22:05	Western Cape		Yes I do	Solar		Delphine	employed individual
2022-07-22 10:47:26	Mpumal anga		Yes I do	Solar		Lefentse	employed individual
2022-07-22 09:32:04	Western Cape		Yes I do	Solar	We get enough sunlight. so if the government can subsidize solar systems. Private House holds can sell generated electricity back to eskom	BERNARD	employed individual
2022-07-22 08:15:41	Western Cape		Yes I do	Solar	ANC and it's tripartate allies are holding the country ransom, bloated inept SOEs should be ended. People need jobs but that means that they actually have to work and work hard	Janet	employed individual
2022-07-22 07:20:38	Western Cape		Yes I do	Solar		Nicki	employed individual
2022-07-21 21:49:39	Western Cape		Yes I do	Solar	We need independent power companies. Eskom is defunct. We must have renewable energy like solar, wind or hydro. No more dirty power.	Wayne	employed individual
2022-07-21 20:42:53	Gauteng		Yes I do	Solar	I think Solar power is safer and can be more efficient if Solar panels can be improved to convert Sun light into a powerful energy.	Tabu	employed individual
2022-07-21 19:38:22	Western Cape		Yes I do	Solar	Only independant providers inside SA. I do not support forreighn entitys who want to take over the country as it will be a foot in the door for them to take controll of SA.	Louna	employed individual
2022-07-21 19:19:10	Western Cape		Yes I do	Solar	Also Allow people with solar at home to feed excess power back into the grid and get discounts on their electricity bill as payment.	Pascale	employed individual
2022-07-21 18:37:06	Mpumal anga		Yes I do	Solar	Solar powervis readily avaiable and is environmenty friendly	Amanda	employed individual
2022-07-21 14:02:06	Western Cape		Yes I do	Solar	Vietnam used residential solar and solved their power problems in 2 years. We have more money than Vietnam. We can solve it easily	David	employed individual
2022-07-21 13:52:57	Western Cape		Yes I do	Solar	We have sun, we have rooftops, we have land for grid connect solar solutions, we have the expertise in our own province powering Islands, towns, offshore- let's use what we have instead of staying with the archaic manner of power generation.	Sonya	employed individual
2022-07-21 12:48:05	Western Cape		Yes I do	Solar	If the public can have their own solar supply if electricity why not, this would be the same as an independent supplier. I want to have the choice to supply my own electricity needs.	Craig	employed individual
2022-07-21 12:26:43	Western Cape		Yes I do	Solar	We have this thing called "The Competition Act" in South Africa. It's literal purpose is to provide customers with competitive prices and product choices. We should never have been forced to use Eskom in the first place	Kaelon	employed individual

2022-07-21 12:04:08	Gauteng		Yes I do	Solar		Karin	employed individual
2022-07-21 11:59:21	KwaZulu-Natal		Yes I do	Solar	RSA is one of the sunniest countries all year round in the world!!!! Work smarter not harder. What is easier to use than exactly what you have at your perusal in abundance?? Simply look up guys.	ANNEKE	employed individual
2022-07-21 11:15:50	Gauteng		Yes I do	Solar		leon	employed individual
2022-07-21 08:15:11	Free State		Yes I do	Solar	Solar is a brilliant idea in most parts of our country, as we have plenty of sun days. This is good renewable energy.	Liza	employed individual
2022-07-21 07:45:35	Limpopo		Yes I do	Solar	In our community we have many pensioners and people receiving SASSA grants / pension. They can not afford ESCOM power , and if they want to change to solar they do not qualify for personal loans. A private company should make available different packages for solar power, i.e. 3,5 watt of 5 watt etc. Person who then want to switch can apply to the company , who will then install the system. Then instead of paying for electricity via ESCOM, they then pay for the solar package (with minimal interest) over a period of 3 - 5 years. This can result in a win win situation for government and the people. Clean energy, no surges, no loadhedding. This is specifically for persons living in rural areas at present using ESCOM direct.	Elsa	employed individual
2022-07-21 04:17:07	Limpopo		Yes I do	Solar	We need to have sustainable power supply that enables businesses to thrive uninterrupted	Lejane Lucas	employed individual
2022-07-20 20:30:46	Gauteng		Yes I do	Solar	It is ridiculous not to allow owners to generate their own power and even more so to make us pay for not using Escom power. They are only chasing more and more people to leave the country! Even we who never thought of going are looking out now.	Linda	employed individual
2022-07-20 19:15:06	Gauteng		Yes I do	Solar	Decentralised solar PV, there is plenty rooftop space available, let companies and private homes feed into the system	Ralf	employed individual
2022-07-20 18:27:57	Western Cape		Yes I do	Solar		Rudolph	employed individual
2022-07-20 17:56:47	Western Cape		Yes I do	Solar	In all honesty, why is this taking so long!	Tracy	employed individual
2022-07-20 17:35:33	Western Cape		Yes I do	Solar	Irrespective of what method is utilised, Eskom's ransom over the country's power generation desperately needs to be relinquished and independent power producers should be supported and motivated. If we look at the example of other countries like the United Kingdom, this not only alleviates the current crisis, but also promotes healthy competition and consumer options. I do believe that we have ample of areas where solar can be a key ingredient like the Karoo, which is not only ideal for power utility, but also supporting farmers during droughts. But we should also not be ignorant; I do not think any one method of generation is a magic bullet, but we most likely require a combination of methods to compliment each other (i.e. Wind generation might be a good candidate on stormy/cloudy days, while solar for wind still sunny days, or gas/diesel for peak time augmentation). With the high risks involved and our country's track record of poor maintenance I do strongly oppose nuclear though!	Johann	employed individual
2022-07-20 17:27:52	Gauteng		Yes I do	Solar		Sylvia	employed individual
2022-07-20 14:24:09	Eastern Cape		Yes I do	Solar		Frik and	employed individual

2022-07-20 14:07:14	Gauteng	Yes I do	Solar	<p>The red tape must be scrapped immediatly.</p> <p>Eskom has been unable to properly provide power since 1995, which is when we began having load shedding in Randburg.</p> <p>We definitely do not need anything dangerous such as nuclear power, considering that Chernobyl is still highly contaminated after 37 years, but certainly if we harness the wind, which blows in abundance in many places in SA, as well as solar power, because we have so many sunny days in this part of the world. Also, possibly hydro-electric power so that the means we use to generate power will be from a "clean" source. (that is if we have sufficient water.)</p> <p>There is a post going around, exposing the expenditure at Eskom, that their employees earn, on average, in the region of R70 000 per month! Most of us do not even earn a QUARTER of that. The Eskom salaries should be looked into and the very top earners must have their salaries slashed as soon as possible. I do wonder how many people there do not warrant an enormous salary like that, when it seems that they may not be doing very much.</p> <p>It is also disturbing to hear that people who have had to instal their own generators, inverters etc. are possibly going to be taxed. This is totally unacceptable. WE are the ones who pay our electricity accounts, yet we must sit in the dark!</p> <p>Those who are fortunate enough to have the means to afford to make use of alternative power sources should not have to pay fines to a parastatal which is unable to provide them with the services they are paying for!</p> <p>Let's get a solution, let the powers that be listen to those who can put forward solutions to stop the outages and to get our country back on track.</p>	Kathleen	employed individual
2022-07-20 12:39:48	Gauteng	Yes I do	Solar		Mari	employed individual
2022-07-20 12:23:35	Gauteng	Yes I do	Solar	<p>Although I am of the opinion that nuclear energy is the best way to see to the needs of the future, I do not think that South Africa has the expertise to launch effective nuclear power plants. The best way to fulfill the country's current needs, is solar power as South Africa is a sunny country. Small solar power plants could alleviate the strain that the existing power grid is under. Expanding these solar power plants is also a move in the right direction in terms of climate change and transitioning to a low carbon economy.</p>	Marisa	employed individual
2022-07-20 10:38:27	Eastern Cape	Yes I do	Solar	<p>The reason why i choose Solar as the best method it is because our country has more warmth from the sun, therefore i suggest solar energy. I cannot choose hydro because our country has scarce water reserves</p>	Siyanda	employed individual
2022-07-20 07:58:56	Gauteng	Yes I do	Solar	<p>The city of Cape Town has already implemented Solar which is helping the energy shortages. South African climate supports the Solar option. There are many energy providers in South Africa that are either charged for putting electricity back into the grid or unable to share their electricity with others. We need to work together to make a better South Africa.</p>	Kim	employed individual
2022-07-20 06:33:03	Western Cape	Yes I do	Solar		Monique	employed individual
2022-07-19 20:35:43	KwaZulu-Natal	Yes I do	Solar	<p>The time has surely come to harness clean, natural, reusable, resources like the sun and wind to generate our energy. Sunny, windy South Africa. It may cost to set up but then it's over to nature... It certainly seems like the answer.</p>	Anne Alexis	employed individual
2022-07-19 19:42:36	Western Cape	Yes I do	Solar	<p>the move to sustainable options will struggle against economic factors. This can be an ideal situation to facilitate the move and win in the long run.</p>	Stephanus Christiaan	employed individual
2022-07-19 18:58:14	Western Cape	Yes I do	Solar	<p>Sunny South Africa is the best place for solar energy and this has to be done rather sooner than later.</p>	Elna	employed individual
2022-07-19 18:07:26	Western Cape	Yes I do	Solar		Dawn	employed individual
2022-07-19 16:58:56	Gauteng	Yes I do	Solar	<p>I feel that The Unions have shown us that they are not planning on stopping the sabotage of Eskom, which puts people, their family's, bussinesses and belongings in grave danger. Without power Most if not all of mopdern South Africa would crumble into chaos. Therefore I stand by the idea to scrap coal electricity and Immediatly find other alternatives that are not government controlled.</p>	Ewan	employed individual
2022-07-19 14:43:07	Limpopo	Yes I do	Solar	<p>Any power supply will do as long as it puts an end to the load shedding, Eskom is useles!!!</p>	EJ	employed individual

2022-07-19 14:08:17	Gauteng	Yes I do	Solar		Zaahir	employed individual
2022-07-19 13:41:21	Western Cape	Yes I do	Solar		Siwongiw e	employed individual
2022-07-19 13:32:41	Free State	Yes I do	Solar	<p>It does not make sense not to use solar energy whem sunshine is so abundant in South Africa. It is not constitutional that government alone may generate electricity.It is a monopoly which is never good for the economy .I support solar power.</p>	Marie	employed individual
2022-07-19 12:12:43	Northern Cape	Yes I do	Solar	<p>To get rid of useless system that cannot supply</p>	Andry	employed individual

2022-07-19 11:10:57	Mpumalanga		Yes I do	Solar	Solar or any other electrical supply which is not out to benefit the government	Alta	employed individual
2022-07-19 10:39:50	KwaZulu-Natal		Yes I do	Solar	It's for the greater good of the people and the country. We are going down in flames. Let the people of South Africa do what they are best at; saving themselves and their communities. The government it too corrupt to help us now.	Marcelle	employed individual
2022-07-19 08:51:00	Gauteng		Yes I do	Solar		Satish	employed individual
2022-07-19 08:31:40	Gauteng		Yes I do	Solar	South Africa should use government land unsuited for agriculture and erect solar panels.	Theo	employed individual
2022-07-19 07:50:45	Gauteng		Yes I do	Solar	Although solar is expensive to setup initially I think it's a good option especially in the long run. Allowing independent power producers will help create a stable grid and a competitive market reducing the monopoly eskom has on the market.	Charne	employed individual
2022-07-18 21:50:24	Limpopo		Yes I do	Solar	It is a fantastic idea to get independent suppliers of electricity, this should have happened decades ago. Use sustainable and cheap options like solar or wind. A competitive supplier market is a healthy market and electrudity prices will consequently be competitive too. The top service provider will get the most clients. This is a healthy set up.	Ricolette	employed individual
2022-07-18 16:52:42	Gauteng		Yes I do	Solar	I am not saying that solar is the only one, but all alternatives like wind and hydro etc. combined can make a big difference. The best would be to reduce the input costs of say solar panels and Li ion batteries, so that every house has solar panels on its roof. That would make a big impact! Of course key is to remove all the nonsense redtape which is artificially protecting government ministers into coal profits. President Ramaphosa said it correctly, keep the government small and out of things like energy creation. Bussiness can take care of it.	Kurt	employed individual
2022-07-18 15:59:59	Western Cape		Yes I do	Solar	There are MANY other alternatuves. We have PLENTY of sun The GREED OF. THR ANC IS CRIMINAL.	Deborah	employed individual
2022-07-18 15:46:47	Western Cape		Yes I do	Solar	SA has an abundance of sunshine, especially in WC but it is not being tapped into, instead the policy seems to be clinging to traditional power production which is costly and not environmentally friendly.	Jeroen	employed individual
2022-07-18 15:08:00	Western Cape		Yes I do	Solar	Solar and wind power is the way to go. Eskom should not have the monopoly as they do not know how to successfully run a competent company. Rolling black outs and rising electricity costs is crippling the country.	Carien	employed individual
2022-07-18 14:45:56	Eastern Cape		Yes I do	Solar		Lance	employed individual
2022-07-18 14:37:52	KwaZulu-Natal		Yes I do	Solar	It is time for competition as is in other countries. The company giving the best and most affordable service will receive support causing companies such as eskom to up their game and stop their nonsense...	Frannie	employed individual
2022-07-18 14:00:06	Western Cape		Yes I do	Solar		Natalie	employed individual
2022-07-18 13:51:56	Western Cape		Yes I do	Solar	Renewable sources are the only wag to go	Barbara	employed individual
2022-07-18 13:27:51	Gauteng		Yes I do	Solar	Eskom has proven in the last decade that they are not currently capable of reliably supplying our country with power. In order for the country's energy supply to be secured, the private sector should be allowed to step in and provide power alongside Eskom - this would also alleviate the current pressure on Eskom and allow them to perform much needed maintenance in order to allow them to start moving forward again. There should be no restrictions on the amount of power that the private sector can deliver, or who they can provide power to.	Gerrie	employed individual
2022-07-18 13:14:27	Western Cape		Yes I do	Solar	The fact that PV power is an ideal and financially viable solution as alternative source of energy has been proven many times. The environmentally friendly solution is ideal for South Africa and should reduce reliance on fossil fuels. This economic segment could generate many work opportunities and boost the country's economy. I believe the less reliant we are on the national grid for our electricity, the less we have to worry about the consistent increases in energy prices, load shedding schedules, opportunities for corrupt practises etc. .	Nico	employed individual
2022-07-18 13:11:54	Gauteng		Yes I do	Solar	The government should spend money on solar power and independent solar distributors. As long as Motsepi doesn't get the contract or any form of foot in on this bill. Because I do not support the government's plan of forcing their so called independent provider to bring in Motsepi. I firmly believe the power problem is a game plan to give Motsepi to get the energy rights. So we should go solar, government must support and stop stealing the money.	Gadija	employed individual
2022-07-18 11:00:15	Gauteng		Yes I do	Solar	It is obvious that our government cannot supply the country with adequate power which is affecting our business operations and loss of income. We need alternate sources of electricity. People should also be given opportunity to make use of solar or other means to generate electricity and even put power back to the grid without any fear/intimidation that penalties will be imposed on those that use a hybrid system.	Ravi	employed individual
2022-07-18 10:22:05	Gauteng		Yes I do	Solar	We need to move away from one government owned entity that can hold the county to ransom. As an electricity user we should get the choice to say what supplier we want to go with.	Craig	employed individual
2022-07-18 10:16:57	Gauteng		Yes I do	Solar	Must not be a state owned enterprise. The individuals in the Government have shown that they can't be trusted to run any enterprise without blatant corruption. Need a practical alternative to Eskom.	Elizabeth	employed individual
2022-07-18 10:07:52	KwaZulu-Natal		Yes I do	Solar	Solar is a free source of energy and readily available in this country. We have the most incredible weather.	Allyson	employed individual

2022-07-18 09:40:46	Gauteng		Yes I do	Solar	As a country we are fortunate to have a LOT of sunshine. If we use this, we would not have to run out of electricity ever again. Sunshine is free, it is environmentally friendly and available to all. It is time that the government put the needs of the country first and stop trying to control everything so that they can pocket tax money. If you truly care about South Africa and want to see it thrive, solve the electricity problem by allowing Independent Power Producers to supply electricity to citizens, businesses and into the national grid.	Maryke	employed individual
2022-07-18 07:08:11	Western Cape		Yes I do	Solar		Angela	employed individual
2022-07-18 06:45:41	Western Cape		Yes I do	Solar	The citizens of South Africa needs to unseat ANC asap . They need to vacate office now . They create crises so that tax payers need to pay more . Look at the fuel and oil prices , it's ridiculous . The country is destitute while politicians live in luxury .	Natalie	employed individual
2022-07-17 22:32:44	North West		Yes I do	Solar		SAMPIE	employed individual
2022-07-17 21:28:02	Free State		Yes I do	Solar	I believe in the green environment that will help reduce fossils fuels that have global warming , if we turn to solar energy it will better up our enviro ment and help with sustainable energy supply better then this Eskom blackouts. Enough !!!!!	Sam	employed individual
2022-07-17 18:49:59	KwaZulu-Natal		Yes I do	Solar		Justin	employed individual
2022-07-17 18:30:09	Western Cape		Yes I do	Solar	Any form of green energy. (Solar or Wind). Also Should not be reliant on any large workforce who can influence the power generation by means of strikes, etc.	Llewellyn	employed individual
2022-07-17 15:32:55	Gauteng		Yes I do	Solar	Immediately allow consumers with solar panels to feed their energy back into municipal grids, and to be credited for the power they supply. This alone will immediately end the energy crisis. It will allow consumers to install panels without needing to afford an expensive battery and control system.	Matthew	employed individual
2022-07-17 14:23:34	Gauteng		Yes I do	Solar	I am not an expert in power, and which options would be best. However, what I do know, is that we urgently need power for South Africa and its people to continue living and working better.	Anculien	employed individual
2022-07-17 12:11:45	Gauteng		Yes I do	Solar	We have a sunny country with large areas that have low rainfall and many days of full sun. The sun is a free source of energy, use it. If solar is adopted as main source of supply of renewable energy, this will force the development of solar tech like batteries, panels etc.	Petria	employed individual
2022-07-17 12:08:12	Gauteng		Yes I do	Solar	South Africa needs cheap, renewable sources of Energy that are also good for the environment. Solar and wind are probably the 2 best options for our country.	Hoosain	employed individual
2022-07-17 12:07:53	Western Cape		Yes I do	Solar		Daniel	employed individual
2022-07-17 11:07:09	Gauteng		Yes I do	Solar	We have access to sun almostalmost 365 days a year. Stop building coal stations and use what is available while taking care of hte environment as well	Christa	employed individual
2022-07-17 10:52:50	Gauteng		Yes I do	Solar	Solar is one of the most cost effective and available sources of energy and not harmful to the planet.	Sheralee	employed individual
2022-07-17 10:43:49	Gauteng		Yes I do	Solar		d	employed individual
2022-07-17 08:34:08	Gauteng		Yes I do	Solar		Anette	employed individual
2022-07-17 08:19:36	Gauteng		Yes I do	Solar		Louisa	employed individual
2022-07-17 08:04:27	KwaZulu-Natal		Yes I do	Solar			employed individual
2022-07-17 07:52:16	Gauteng		Yes I do	Solar	Allow individual households to go off the grid and push electricity into the system which will not only alleviate pressure but assist in supplying where there is a surplus, and get a rebate	Jaylene	employed individual
2022-07-17 05:50:15	Gauteng		Yes I do	Solar		Chris	employed individual
2022-07-17 04:10:55	Western Cape		Yes I do	Solar	Solar, wind, gas and coal. Nuclear is too expensive and ANC will do as they have done with Medupi and Kusile , place inept individuals with 'correct' melatonin in positions they cannot manage.	Janet	employed individual
2022-07-17 00:41:07	Western Cape		Yes I do	Solar	Daar is nie meer tyd te mors om oor die saak te besluit nie.Dis al jare se gepraat hieroor.Son en wind is tog verniet en moes al lank reeds ten volle benut gewees het.Hou op tyd verspeel!	Fanie	employed individual
2022-07-17 00:29:51	Gauteng		Yes I do	Solar	Africa sun is allways available Save and effective source of energy Reliable God given	Rufus	employed individual
2022-07-16 17:46:40	Gauteng		Yes I do	Solar	Quickest to setup and connect.	Michael	employed individual
2022-07-16 16:58:52	Gauteng		Yes I do	Solar		Inge	employed individual
2022-07-16 16:53:49	Gauteng		Yes I do	Solar	A lot people have solar power installed for private use and are able to sell to the grid. Being able to do so will motivate more private participation and expansion. Private enterprises should be allowed free trade and therefore then will be motivated to supply the desperate need for electricity and saving the crashing economy. All forms of NATURAL/green power generation - solar, wind and hydro - should be promoted. Make the world a better place and save the planet. Mars is very far . . .	anna	employed individual

2022-07-16 16:30:44	Gauteng		Yes I do	Solar	South Africa has a lot of sunshine in most regions. Infrastructure to harness this natural resource will spare the environment and make electricity available to all. Communal solar power expenses outweigh individual solar expenses.	Micha	employed individual
2022-07-16 14:54:47	Western Cape		Yes I do	Solar	Combination of the available resources would be best option	Gail	employed individual
2022-07-16 13:44:18	Gauteng		Yes I do	Solar		Juanita	employed individual
2022-07-16 09:23:49	Eastern Cape		Yes I do	Solar	I feel strongly that independent South African producers should be given the go ahead to set up solar energy production plants. It is time that South Africans are given the go ahead to work for South Africa in an open market systems. This should NOT turn into another opportunity for countries like China and India to walk away with the spoils, at the same time creating more tender corruption opportunities.	Ilse	employed individual
2022-07-16 03:56:42	North West		Yes I do	Solar	if solar is used be once of and government must subsidise	Charles	employed individual
2022-07-16 01:19:44	North West		Yes I do	Solar	Our country sold to the highest bidder	mothusiot sile	employed individual

2022-07-15 19:07:36	Free State		Yes I do	Solar		Ina	employed individual
2022-07-15 18:25:14	Western Cape		Yes I do	Solar		Carl	employed individual
2022-07-15 17:50:25	Western Cape		Yes I do	Solar	Solar power from independent producers coupled with extra battery capacity to store fluctuating wind production could solve emediate issues, long term nuclear.	Joshua	employed individual
2022-07-15 14:50:21	Gauteng		Yes I do	Solar		Amoret	employed individual
2022-07-15 14:44:33	Gauteng		Yes I do	Solar		Naas	employed individual
2022-07-15 14:17:55	Gauteng		Yes I do	Solar	Based on country's climate	Liezel	employed individual
2022-07-15 14:01:04	Mpumalanga		Yes I do	Solar	Independent power producers must be able to supply to the grid. Even houses with solar systems have excess power which is wasted in the daylight hours and should be permitted to bank to a community battery farm We must watch for Cadre enablement of more theft during this procedure setup	Louise	employed individual
2022-07-15 13:51:27	Mpumalanga		Yes I do	Solar	I really think eiskom needs competition from other companies who can produce Electricity, and eventually get driven to the ground through all there corruption and looting, and municipalities must have no say in pricing.	Paul	employed individual
2022-07-15 13:46:23	Gauteng		Yes I do	Solar		Robert	employed individual
2022-07-15 13:42:11	Gauteng		Yes I do	Solar	Greener energy production options such as solar, wind and Nuclear power would be best suited to address our energy demands as they would fall in line with the future direction of the energy sector and encourage private production of electricity through eco friendly means.	Richard	employed individual
2022-07-15 13:39:03	Eastern Cape		Yes I do	Solar		Colin	employed individual
2022-07-15 12:38:06	Western Cape		Yes I do	Solar		Craig	employed individual
2022-07-15 12:26:19	Gauteng		Yes I do	Solar	An immediate solution to end loadshedding should be implemented as everyone is suffering; people as well as businesses. We have the benefit of strong sunshine and in places strong wind. These energy sources should be utilised without further delay. There are also possibilities in areas for hydro electricity. Let's go for good clean natural energy.	Dixi	employed individual
2022-07-15 11:12:54	Free State		Yes I do	Solar		Jack	employed individual
2022-07-15 10:35:55	Western Cape		Yes I do	Solar	Thanks to government rampant corruption SA needs to unregulate the industry and allow everyone to produce their own power and to be able to feed their excess and power production into the grid. We should follow the example of Germany where many small energy producers emerged thanks to their change in legislation. We have to move away from centralised power production and control and the huge loss of power while moving it across the country. Solar should also be far more utilised and municipalities should have total freedom to determine their energy sources and generate their own power as needed if desired. The scam of Eskom creating wind farms in areas where there is little wind then announcing it is not cost effective needs to be seen for what it is.	Faye	employed individual
2022-07-15 10:18:56	North West		Yes I do	Solar	I think it needs to be a combination of hydro, solar and wind. But we live in south Africa and the climate is ideal for solar especially	Shané	employed individual

2022-07-15 09:23:31	Western Cape		Yes I do	Solar	Magnetic motors, wind and solar are the way of the future. It is time to start moving over to sustainable clean energy. Independent providers are the link for bringing this to our people. The more of us who can afford to invest in this, the less pressure on the grid, the more affordable renewables become.	Rodah	employed individual
2022-07-15 08:56:16	Western Cape		Yes I do	Solar	Allow households to install solar systems and to sell access electricity to the grid.	David	employed individual
2022-07-15 08:48:11	Eastern Cape		Yes I do	Solar		Shannon	employed individual
2022-07-15 08:48:00	Western Cape		Yes I do	Solar	Places with a lot of sun will be able to create more electricity however wind could also be a great choice as there are hardly any day that there are no wind it just usually differs from strength.	Chandré	employed individual
2022-07-15 08:41:17	Gauteng		Yes I do	Solar	Allow residential PV plant as all PV plants to feed back into the grid at the same rate of repayment as what rate of pay is for consumption.	Riaan	employed individual
2022-07-15 06:23:34	Outside SA	United Arab Emirates	Yes I do	Solar		Henry	employed individual
2022-07-15 06:02:00	Western Cape		Yes I do	Solar	The red tape is stifling progress and allowing Eskom to have a monopoly on the power market in SA and intern allows Eskom to hold the country at ransom! The only way forward is to allow independent power producers to enter the market and the fact that it hasn't happened sooner is shameful. The country needs power to keep operating and Eskom is not delivering on promises. Eskom is broken and corrupt and needs to move aside	Tiffany	employed individual
2022-07-15 00:08:29	Gauteng		Yes I do	Solar		Theuns	employed individual
2022-07-14 22:31:08	Western Cape		Yes I do	Solar	South Africa has an abundance of sunny days throughout the year. If people are enticed to put solar panels on their roofs a lot more people will start doing it which would lessen the demand on the grid.	Steffan	employed individual
2022-07-14 21:24:02	KwaZulu- Natal		Yes I do	Solar		René	employed individual
2022-07-14 20:45:11	Gauteng		Yes I do	Solar	We have one of the highest hours of sunlight in the world. Yes solar is expensive now but in the long run it will benefit us immensely. Solar can be installed in areas near current power stations for easy access to the grid and to still benefit the local communities.	Faye	employed individual
2022-07-14 20:18:26	Eastern Cape		Yes I do	Solar	Government needs to declare a state of emergency to enable removing legislative restrictions on independent power producers so that they can supply the grid with a mix of renewable energy sources to complement the energy generation capacity in place in Eskom.	Sharon	employed individual
2022-07-14 18:37:55	KwaZulu- Natal		Yes I do	Solar	Solar power generation offers great opportunities to people all around the country. On a small scale level for households it is a costly system to install, especially due to batteries. The same holds true for business on any level. I feel solar energy should be allowed to be transferred into the grid during peak hours -i.e daytime; and drawn back at night (while the country's demand is lower). This would require either two electricity meters or a single meter that has the ability to work backwards too.	Guy	employed individual
2022-07-14 18:14:21	Gauteng		Yes I do	Solar	The privatization of energy production should have been done a long time ago. I selected Solar power but in the method column, but any power generation in the private sector would relieve or even solve our energy crisis. The government has clearly failed in this area.	Werner	employed individual
2022-07-14 17:33:07	Eastern Cape		Yes I do	Solar	The government must allow privatization of our country's energy supply. They have clearly failed to do so themselves through Eskom. The situation is critical. Every month wasted is millions of Rands lost. Let those who can help the people and use their resources and skills for the good of the country	HELEN	employed individual
2022-07-14 17:21:04	Western Cape		Yes I do	Solar	We need more power suppliers, especially more alternative energy producers. With reduced demand on Eskom customers using their power would have better supply.	Landia	employed individual
2022-07-14 16:16:19	Gauteng		Yes I do	Solar		Ilse	employed individual
2022-07-14 15:54:33	KwaZulu- Natal		Yes I do	Solar		Belinda	employed individual

2022-07-14 14:59:13	Gauteng		Yes I do	Solar	Solar and Wind will be the best and quickest ways of saving our sorry state of affairs with regards to the electricity crisis in SA. Problem is will our government listen this time around?!	Mandy	employed individual
2022-07-14 14:25:53	Gauteng		Yes I do	Solar	The quickest way to get electricity is by solar and wind	Richard	employed individual
2022-07-14 14:25:50	Gauteng		Yes I do	Solar	The quickest way to get electricity is by solar and wind	Richard	employed individual
2022-07-14 14:22:00	Gauteng		Yes I do	Solar	It is not just IPPs that need to be allowed to support the recovery. SSEGs, of which there are many, can also substantially assist in reduce the pressure on the grid in local and municipal areas.	Michael	employed individual
2022-07-14 13:57:36	Gauteng		Yes I do	Solar	We must try to become self sufficient - things in SA are really getting uncontrollable and out of hand. Government seems to mess up our country big time!!! Everything is going down the drain. Cable theft caused during the load shedding the norm now ... no laws!	SALOME	employed individual
2022-07-14 13:56:22	Gauteng		Yes I do	Solar	Solar and wind power. But we are not to be charged for having solar, solar uses will put the extra power into the grid and get paid for it.	Marchelle	employed individual

2022-07-14 13:52:30	Gauteng		Yes I do	Solar		Juanel	employed individual
2022-07-14 13:48:50	Western Cape		Yes I do	Solar	SA has one of the best solar resources on the planet. Solar PV is now the cheapest energy option on the planet, and PV plants and embedded generation can be rolled out rapidly. Of course intermittency and misalignment of peak demand and peak solar generation have to be compensated for by simultaneous grid modernisation and grid-scale storage. What needs to be guarded against is the "shock doctrine" where a crisis is simply converted into private monopolies that replace a public monopoly. Removing red tape does not mean the removal of effective regulation of a public good, like energy, in the interests of the public. In the longer term, we must also reconsider the prioritisation of demand, given that the bulk of electricity demand is still driven by extractive industry. Degrowth policies should be applied against industries that drive energy and material throughput and emphasis must be shifted to an economy that focuses on human well-being and the thriving of society, within ecological boundaries.	Ralph	employed individual
2022-07-14 13:38:25	Eastern Cape		Yes I do	Solar		CHARMAINE	employed individual
2022-07-14 13:25:09	Mpumalanga		Yes I do	Solar		Magdel	employed individual
2022-07-14 13:21:04	Gauteng		Yes I do	Solar	Solar is the only method right now that could quickly be implemented by the home-owning citizens of South Africa for private and small scale use. The upshot of this is that it would relieve pressure on the highly strained grids of established suburbs, municipalities and provinces. Unfortunately Solar would be unable to power the industries of south Africa and so Coal and Nuclear will still need to play a large role in the decades to come. Multiple small-scale, PRIVATELY-OWNED plants will need to be implemented to supply industrial power and begin helping jump-start the economy out of the current recession and jobless crisis. These would be located in the provinces which require more power and can be purpose built for areas of high electricity usage. My proposal would be the following: Firstly, Solar power desperately needs to have some form of subsidies and/or tax rebate system worked out at a national, provincial or municipal level because it is still quite expensive for the average household. This would be helpful when a capital amount is spent on a solar system. Secondly, specific Legislation to lower/control interest rates offered by financing companies on solar systems when paid for over multi-year terms would be extremely helpful. This would open up the market to people who cannot afford large capital investment, but have good credit and could finance a solar system over 3-5 years. The average solar system will last for 20 years so the investment is definitely worth it.	David	employed individual
2022-07-14 12:22:00	Eastern Cape		Yes I do	Solar	South Africans must be allowed to set up solar systems at their homes and sell excess electricity to the relevant electricity company (feeding it back into the grid). This move must benefit South Africans. We cannot have foreign (e.g. German and British) companies exploit our people with high prices. Our people must be empowered to add extra income for themselves via solar. This process has been happening in Australia since even before 2010.	Inge	employed individual
2022-07-14 10:52:54	Gauteng		Yes I do	Solar		Ann	employed individual
2022-07-14 10:45:26	Gauteng		Yes I do	Solar	We Have Sun everyday and it is immediately available . We can cover all the roofs of buildings wit solar panels to add energy to the grid .	Hannelie	employed individual
2022-07-14 10:30:49	Western Cape		Yes I do	Solar	Solar geysers can be installed in every household instead of electrical geysers. Botswana does it and so do our farm people. Solar lights are affordable and effective. I already use them. Solar power for a house is expensive, but we could surely have small wind turbines set up. We want to get one from a sustainable website and install it. The Cape wind is powerful!	Megan	employed individual
2022-07-14 10:01:36	Gauteng		Yes I do	Solar	The ANC is the problem here. They need to get rid of misnisters that drive their own agenda instead of SA's. Solar/Wind power installed by the private sector will bring more power to the grid which will drive prices down. Flocking the dead horse of coal power is not the answer.	Theo	employed individual
2022-07-14 09:39:34	Gauteng		Yes I do	Solar		Robert	employed individual
2022-07-14 09:37:21	Western Cape		Yes I do	Solar	Eskom has shown that it can supply or manage South Africa's electricity needs. The private sector has to be allowed to add extra capacity to the grid to ensure an uninterrupted supply electricity.	Ashley	employed individual
2022-07-14 09:36:03	North West		Yes I do	Solar		Monique	employed individual

2022-07-13 20:49:11	Gauteng		Yes I do	Solar	I head up Engineering for CCBSA. We have 1MVA installations on 11 of our 13 manufacturing sites. Our connected load varies from 1.8MVA to 7MVA. The projects were initiated when the previous 1 MVA cap was in place. We are eager to increase our generation to and average of around 80% of our connected load across all sites. We have the roof space for this and a partner ready to invest. However to make this work economically, we have to be able to sell excess energy back onto the grid. All but one of our sites are on municipal grids where the local municipalities have not worked out local legislation, processes and tariff structures to enable either net Metering, Wheeling or Power buy back possible. As our load is fairly variable, we are already incurring Deemed Energy Charges. Without an economic outlet for excess solar energy generated, we cannot viably expand our solar PV systems. This represents a grid generation opportunity loss of 30MVA. We need legislation to compel local municipalities to enable Net Metering, Power Buy Backs and Wheeling. Tariff structures should be gazetted by National Government and be set by an independent panel, with a link to the economics of generation to makes this viable.	JP	employed individual
2022-07-13 20:40:27	KwaZulu-Natal		Yes I do	Solar		Carl	employed individual
2022-07-13 20:13:02	Gauteng		Yes I do	Solar	We are a large country with vast amounts of space for Solar farms or wind farms. Besides supplying the country with the energy it needs, we could sell this energy to other countries, create jobs and reduce our carbon footprint. Government is crippling our country, they need to put an end to this before it's too late! SA could be a 1st World Country ! Come on, do right by the people!	Taryn	employed individual
2022-07-13 20:10:54	Gauteng		Yes I do	Solar		Bianca	employed individual
2022-07-13 20:10:48	Gauteng		Yes I do	Solar	We have so much access to sun.	Helena	employed individual

2022-07-13 18:47:16	Gauteng	Yes I do	Solar	The government should not be in charge of power and have Eskom as the sole provider. As we have seen time and again this cannot be managed properly. The supply of power should become independent from the government where citizens can have more than one choice of who supplies their power, thus providing competition amongst suppliers to provide the best rates and service....just like all business. Currently paying for a service that is not consistent nor dependable, which also becomes more expensive but the infrastructure keeps deteriorating is ridiculous. The whole power structure should be scrap and started from the ground up. Even if it means having investors from overseas manage the power supply because our government keeps proving by their track record that they are incapable and not up to the task. Solar, nuclear, and gas are best from Gauteng. The windier cities like PE and CT should have wind turbine as an option, and the same applies to hydro....a diverse form of power supply would improve our economy. But if we continue to let Eskom have sole monopoly then we might as well shut Eskom down and go back to the stone age of fires and candlelight.	Debbie	employed individual
2022-07-13 18:42:58	Gauteng	Yes I do	Solar		Shel	employed individual
2022-07-13 18:34:08	Gauteng	Yes I do	Solar	Solar power is clean, efficient and one of the most readily accessible resources in South Africa. Eskom's failure is the perfect example of why we need to move away from reliance on coal and archaic policies that prevent IPP's from connecting to the grid ASAP. Without stable electricity supply, this country WILL fail!!!	Darren	employed individual
2022-07-13 18:10:11	Gauteng	Yes I do	Solar		Jaco	employed individual
2022-07-13 17:43:19	Western Cape	Yes I do	Solar		Alice	employed individual
2022-07-13 16:54:20	Gauteng	Yes I do	Solar	Solar power can be implemented rapidly and should be introduced now. Hydro schemes take longer but would also be a great long term solution. Wind power will be suitable in areas such as the Eastern and Western Cape where it can generate enough energy. The Coal power stations should be bought out by private enterprises, so that they can be managed properly and not used as a means to siphon funds. Eskom will face job losses, but the above industries will open doors to increased employment.	Deanne	employed individual
2022-07-13 16:40:21	Gauteng	Yes I do	Solar	We have sun all year round and the mines all over the world are installing massive solar farms all over the world to supplement their power supply demand	Shawn	employed individual
2022-07-13 16:10:16	Gauteng	Yes I do	Solar		Martin	employed individual
2022-07-13 16:04:38	KwaZulu-Natal	Yes I do	Solar	To see light at the end of this gloom, salaries for Eskom staff should not be dictated by the unions; destructive or inefficient Eskom workers should be fired and jail sentences for saboteurs enforced. Bullying and threatening the diligent white staff for showing up their own laziness should also not be tolerated. The gravy train and refusal to encourage properly skilled people to want to stay in SA also has a lot to do with idiots running departments. No one took the advice given 20 years ago about Eskom and government supported BEE instead.	Sandra Louise	employed individual
2022-07-13 15:43:53	Limpopo	Yes I do	Solar	I believe solar is one of the methods that can be used to resolve energy problems in our country especially because we have a lot of sunshine especially in the Northern region of the country. I think independent power producers should be allowed to operate without all the red tape. This will help reduce the financial burden to most of us as the rates will be competitive. Thank you	Meriam	employed individual
2022-07-13 15:25:22	KwaZulu-Natal	Yes I do	Solar	Scrap the red tape! Allow independent producers to feed the grid now! We need power now! Focus on renewables allowing anyone who generates excess power (from small households to factories like Sugar Mills) to feed the grid ASAP then allow anything that's renewable to get the green light first and straight away, ie now! Feed the coal powered stations for base load and follow up with a Nuclear power plant or two to replace the coal fired power base load in a decade or two. PROVIDED THE NUCLEAR PROCUREMENT PROCESS IS TRANSPARENT! We have plenty of sun and Uranium. Use it! Now!!!	Byron	employed individual
2022-07-13 14:45:27	Gauteng	Yes I do	Solar	All other methods should be looked into to take pressure off the grid. Stop the corruption	Jackii	employed individual
2022-07-13 14:44:17	Eastern Cape	Yes I do	Solar	Eskom does not supply the needs. They continue to charge line fees etc but do not supply a service. South Africa has enough sun, it is freely available and does not use other resources and it is clean energy.	Shelly	employed individual
2022-07-13 14:28:13	Eastern Cape	Yes I do	Solar	Solar and wind power. Allow private homes to feed back into the system. What is governments aim here, to sort out the power problem or to try and screw over the population for more taxes.	Anton	employed individual
2022-07-13 14:19:27	Gauteng	Yes I do	Solar	Solar and wind power is the future. If Eskom will allow the push back of reserve energy produced by all the people that has solar plants installed on their property and rather encourage people to go green, supplementing the grid in off peak full sun days, then reserves will be higher, reducing the need for loadshedding. Instead I have heard the government want to introduce MORE taxes for homes utilising solar.	Lisa	employed individual

2022-07-13 13:12:09	Western Cape		Yes I do	Solar	Or hydro or wind	Beverley	employed individual
2022-07-13 12:50:31	Gauteng		Yes I do	Solar	Allow homeowners who have solar already to put power back into the grid, to start off with. Then also allow IPPs to put power into the grid at scale.	Andre	employed individual
2022-07-13 12:41:12	KwaZulu-Natal		Yes I do	Solar	Solar & coal. Instead of exporting our coal to neighboring countries, it should be used in SA. Solar is the way forward but unaffordable to most South Africans. We have the perfect climate in SA for this. Just look at the amazing work Oranje are doing.	Lauren	employed individual
2022-07-13 12:40:24	Free State		Yes I do	Solar	It's a no-brainer. But the fossil, who doesn't have a clue about nothing, refuse to sign the papers to get the ball rolling. Doesn't he lie awake at night about his refusal to help SA out of this situation.	Ria	employed individual
2022-07-13 12:31:16	Eastern Cape		Yes I do	Solar	Any form of renewable energy is preferable to fossil fuel. I prefer Solar, but Wind is also OK	Bruce	employed individual
2022-07-13 12:30:49	Western Cape		Yes I do	Solar	I feel do what is needed now, invest in professional technicians and companies to manage maintenance with a plan to go the fully renewable environmentally friendly route as quickly as possible. With Solar and Wind being our main power supply in very near future. And allow Solar ready residences to feed back into the grid and scrap the escalated fees charged to go solar, and provide a reasonable return on power fed into grid - perhaps using as a credit system. Encourage households to go solar, with rebates, and cost effective pricing structures. Embrace the solar route. Help South African's buy smarter, where SA can then again sell electricity across the continent and be smart about our incredible country, people and resources. Pls pls pls protect our planet and people.	Camille	employed individual
2022-07-13 12:03:53	Gauteng		Yes I do	Solar	More microgrid solutions in neighborhoods can assist the neighborhood and at the end of the day the city / town, which will have an overall impact to Eskom.	Jacques	employed individual
2022-07-13 11:55:31	Eastern Cape		Yes I do	Solar	The energy crisis in SA needs to be sorted out ASAP as the economy can't grow without it, I.P.P. will alleviate the problem. Any of the power sources except for nuclear power plants would work solar energy would be the fastest, but wind and underwater turbines would work well in S.A.	Mychel	employed individual
2022-07-13 11:30:57	Gauteng		Yes I do	Solar	I believe that independent power producers is the answer to the current problem we are facing as a country when it comes to Power Supply. This will allow for the relief of load-shedding, power outages and an inconvenience caused to every citizen. The situation has become so out of control that it is merely impossible to be rectified and alternate options should rather be accepted and looked in to		employed individual
2022-07-13 11:30:06	Gauteng		Yes I do	Solar	Quickest and easiest method	Rob	employed individual
2022-07-13 11:28:18	Mpumalanga		Yes I do	Solar			employed individual
2022-07-13 11:21:40	Limpopo		Yes I do	Solar		Michelle	employed individual
2022-07-13 11:21:26	Gauteng		Yes I do	Solar	By making it easier for independent companies or individual households to contribute to the grid, will encourage more independents/individuals to invest in solar or other renewable power generation. Our government no longer have investment power to provide sufficient capacity in a time frame that would meet this county's basic needs let alone future needs for development and growth. Sustainable energy sources are the future, and each able small business or household can make an investment and make a contribution to their greater community.	EZANNE	employed individual
2022-07-13 11:13:34	Western Cape		Yes I do	Solar	We have plenty of sun and rain, it's a no brainer.... this should have been implemented many years ago. No point moaning now, I know . The sooner we get going the better as it's hard to say how long SA folks are going to survive.	Laura	employed individual
2022-07-13 11:09:51	Mpumalanga		Yes I do	Solar	Solar can add power to the grid during daylight hours without the need for storing. Coal power stations are obviously under utilised currently, and the resurrection of proper management and maintenance will be a major focus in the long run. Illegal connections and maladministration at Municipal level must also be eliminated to support the effective management of electrical infrastructure.	Johannes	employed individual
2022-07-13 11:06:46	Gauteng		Yes I do	Solar		Costa	employed individual
2022-07-13 11:05:04	Eastern Cape		Yes I do	Solar		Thinus	employed individual

2022-07-13 10:58:59	KwaZulu-Natal		Yes I do	Solar		Jo-Ann	employed individual
2022-07-13 10:52:47	Gauteng		Yes I do	Solar	Any power production will be better than we have at this time	Denise	employed individual
2022-07-13 10:50:07	Gauteng		Yes I do	Solar	If Eskom cannot supply the electricity required for South Africa then we need independent electrical suppliers that can do the job. Solar, Wind and Hydro can easily be done in this country and are more Eco friendly than Diesel and coal.	Malcolm	employed individual
2022-07-13 10:46:47	Eastern Cape		Yes I do	Solar	Solar and wind are both environmentally friendly and readily available.	CINDY	employed individual
2022-07-13 10:46:29	Gauteng		Yes I do	Solar	Solar will work in our country, we can also look at generating electricity with the dams and also in areas where there are a lot of wind.	Karin	employed individual
2022-07-13 10:39:26	Gauteng		Yes I do	Solar	You have been stringing the country along for many years. You can solve this immediately but just stopping your undercover agenda	Damian	employed individual
2022-07-13 10:32:13	Gauteng		Yes I do	Solar		Sheralee	employed individual
2022-07-13 10:30:11	Gauteng		Yes I do	Solar	For an immediate need Solar might help . Get back our old engineers to train existing staff and get a proper plan of action in place for maintenance of existing structures. Cable thieves should be dealt with properly. Government should stop lining their own pockets with tenders and tenders should be opened to any supplier regardless of their BEE status	Marc	employed individual
2022-07-13 10:29:45	Gauteng		Yes I do	Solar		Manny	employed individual
2022-07-13 10:29:31	Gauteng		Yes I do	Solar	We have enough pollution as it is with the coal turbines and need a more cleaner sustainable form of energy like solar or wind. We need a solution now as our economy is in a nose dive. Businesses are closing, jobs are being lost and international investment is withdrawing. Enough is enough.	Fiona	employed individual
2022-07-13 10:26:31	Gauteng		Yes I do	Solar		Martie	employed individual
2022-07-13 09:54:35	Western Cape		Yes I do	Solar	solar or wind	Jolandi	employed individual
2022-07-13 09:52:30	Mpumalanga		Yes I do	Solar		Basie	employed individual
2022-07-13 09:50:36	Western Cape		Yes I do	Solar		Brett	employed individual
2022-07-13 09:28:14	KwaZulu-Natal		Yes I do	Solar	Though I strongly suggest solar energy, another option is wind. These options should be in the hands of independent power producers but through regulated guidelines to avoid price fixing and monopolies. At this point in time there is no argument or any doubt that an immediate solution needs to be found for the benefit of ordinary South Africans hence current legislation needs to be urgently amended.	Harnam	employed individual
2022-07-13 09:10:40	KwaZulu-Natal		Yes I do	Solar	BUT the government should keep their hands out of it.	Jairajh	employed individual
2022-07-13 09:00:30	Gauteng		Yes I do	Solar		Brian	employed individual
2022-07-13 08:57:42	Gauteng		Yes I do	Solar	Solar and Wind are natural resources that, if we could invest in, we would could reap great benefits.	Noxy	employed individual
2022-07-13 08:53:01	Gauteng		Yes I do	Solar		Daphne	employed individual
2022-07-13 08:50:42	Gauteng		Yes I do	Solar		Shawneez	employed individual
2022-07-13 08:32:29	Gauteng		Yes I do	Solar		Carol-Ann	employed individual
2022-07-13 08:28:17	North West		Yes I do	Solar	South Africa is a sunny country. If most home owners are self sustainable and provide additional power to the grid (even for free), we will overcome this challenge Kind regards	Jeanetta	employed individual
2022-07-13 08:22:43	Eastern Cape		Yes I do	Solar		Jacobus	employed individual
2022-07-13 08:17:41	Gauteng		Yes I do	Solar		Amu	employed individual
2022-07-13 08:14:24	Gauteng		Yes I do	Solar	If something does not get done immediately, we will loose all the capable people in this country and any chance of foreign investments. If that happens then this country is never going to recover.	Heidi	employed individual
2022-07-13 08:13:29	Gauteng		Yes I do	Solar		Natasha	employed individual
2022-07-13 08:12:38	Gauteng		Yes I do	Solar	Solar energy is the greener way... Eskom cannot sustain itself and are charging sa citizens exuberant rates to fund themselves... Their part of the problem... And this is also crippling our economy further... Eskom must go... We are sick of Eskom	Frances	employed individual
2022-07-13 08:10:29	Gauteng		Yes I do	Solar	Vietnam had a similar problem , they used solar to resolve. the same should be implemented here	karen	employed individual
2022-07-13 08:09:22	Limpopo		Yes I do	Solar		Callie	employed individual

2022-07-13 08:06:37	Mpumalanga		Yes I do	Solar	ANC in particular has failed us, come 2024 they shouldnt gorven this country. I think solar, and wind will do justice in SA. The sights next to the power stations can be used for either solar or wind power generation. There are places that has lot of sun either winter or summer, KZN north is an example as I come from that region. We also have lands that can be used is adequate assistance can be provided by the government. If financial capacity can be offered through banks, and also removing red tapes there. We are ready to assist and create employment but we lack financial capacity to do so, and to get assistance its not easy in this country. Like my self I have a piece of land that can be used for solar farm but I lack financial capacity and I don't know that if I invest using the small I have, will I get support, and also what are the requirements to connect on to the grid. Thank you	Sipho	employed individual
2022-07-13 08:06:36	Mpumalanga		Yes I do	Solar	ANC in particular has failed us, come 2024 they shouldnt gorven this country. I think solar, and wind will do justice in SA. The sights next to the power stations can be used for either solar or wind power generation. There are places that has lot of sun either winter or summer, KZN north is an example as I come from that region. 2022-07-13 08:02:28	Gauteng		Yes I do	Solar	We are tired of the electricity problems created by the ANC criminals in government. Scrap the red tape so that the people of South Africa can solve the problem for ourselves.	Morne	employed individual
2022-07-13 07:55:56	Gauteng		Yes I do	Solar	We need to change to renewable energy as this is the cheapest option for the public, all houses should be supplied with solar	Stuart	employed individual

2022-07-13 07:50:15	Gauteng		Yes I do	Solar	We are tired of these blackouts and the lack of willingness on the part of government to rectify this situation. They have lost control and are being held to random. We need any and all independent individuals that are able to supply power, to be given a chance. Our economy is not going to survive, otherwise. Solar is the way to go for a country with abundant sunshine and it's less harmful to the environment.	Lesebo	employed individual
2022-07-13 07:50:08	Western Cape		Yes I do	Solar	This whole country is struggling because of the power crisis. It is time that the government let go of their grip on the power situation and let the private sector jump in to help. People are closing businesses, jobs are being lost, why are we still only talking about this.	Yvonne	employed individual
2022-07-13 07:41:44	Gauteng		Yes I do	Solar	Any renewable energy as South Africa have the space and plenty of this type of energy. Also energy were you have as little possible union's or striking workers.	Wilma	employed individual
2022-07-13 07:35:40	KwaZulu-Natal		Yes I do	Solar		Sean	employed individual
2022-07-13 07:35:37	KwaZulu-Natal		Yes I do	Solar		Sean	employed individual
2022-07-13 07:28:03	Western Cape		Yes I do	Solar	I don't know much about the production of solar generation units (there may be environmental consequences) but I do think a LOT MORE GOVERNMENT FUNDING NEEDS TO GO INTO RESEARCH ALTERNATIVES. Swedish people heat their houses all winter using geothermal energy. We have tons of wind. Why aren't we using these? If safe, sustainable solutions exist already, allow everyone access immediately.	Marianne	employed individual
2022-07-13 07:25:44	KwaZulu-Natal		Yes I do	Solar	We need to have competition in the sphere of power provision to ensure businesses and Eskom remain competitive. Solar power is easily available... costs for solar installation should be subsidised or allow for a tax rebate.	Cathy	employed individual
2022-07-13 07:20:14	Western Cape		Yes I do	Solar	South Africa has an abundance of sunshine. This resource should be fully utilised to solve our power issues. Management of our current power provider needs to be taken out of the hands of government as they have had far too long to show they are able to manage Eskom and sadly have done an awful job of it.	Cheryl	employed individual
2022-07-13 07:15:20	Free State		Yes I do	Solar	With such a warm sunny climate electricity can be produced either with Solar, Wind or Water	Marelize	employed individual
2022-07-13 07:13:57	Free State		Yes I do	Solar		Shanelle	employed individual
2022-07-13 06:55:06	Western Cape		Yes I do	Solar		Anke	employed individual
2022-07-13 06:48:18	Gauteng		Yes I do	Solar		Beverley	employed individual
2022-07-13 06:24:56	Gauteng		Yes I do	Solar	I have been involved in the tender process for renewable energy, have seen the Solar farms and wind turbines up in De Aar, why aren't we using this solution . Why must we as citizens now acquire solar at our cost, when it is available .	Eurika	employed individual
2022-07-13 06:22:03	Gauteng		Yes I do	Solar	Allow independent households with solar power to feed into the grid. Subsidise solar geysers again.	Tamara	employed individual
2022-07-13 06:12:36	North West		Yes I do	Solar	We need a radical solution to a radical problem. First do not tax or charge householders for having their own power supply such as solar panels. These people are doing the energy system a favour by taking load off the system, for goodness sake. Second, allow self-generating households with clean energy (i.e. solar, wind) to upload to the grid for a small recompense - it doesn't have to be much, if anything. My household is completely offgrid on a solar system. I have excess power GOING TO WASTE for a few hours on a sunny day - PLEASE allow me to supply it up to the grid, I'm even willing to do it for free.	Helen	employed individual
2022-07-13 06:00:59	Mpumalanga		Yes I do	Solar		Anja	employed individual
2022-07-13 05:57:03	Mpumalanga		Yes I do	Solar	To effectively only allow Eskom to supply the country with electricity, creates a dangerous monopoly (which we have seen). Eskom is riddled by politics and corruption and if independent power producers can also have a foot in the door, Eskom might not be such a platform for "power play" and other less than desired activities. They will also then become more reliable electricity suppliers. Independent power producers will stimulate the economy because they will also grow infrastructure and create jobs.	Marika	employed individual
2022-07-13 05:34:55	Limpopo		Yes I do	Solar		Tumelo	employed individual
2022-07-13 05:26:21	Gauteng		Yes I do	Solar		andre	employed individual
2022-07-13 05:23:25	Western Cape		Yes I do	Solar	It is quite obvious that Eskom's and the government's current efforts are not enough. Load shedding I feel, is an infringement on our human rights and absolutely devastating to our economy. IPP's need to be brought in ASAP. Stop this monopoly that Eskom has and give citizens as well as businesses some relief and a hope for things to actually get better. Make it easier for households and businesses to utilise solar energy.	Rene	employed individual
2022-07-13 02:44:52	Gauteng		Yes I do	Solar	If Independent Power Producers are able to produce and provide electricity, they should be encouraged to do so not prevented in light of the loadshedding crisis we face.	Charlize	employed individual
2022-07-13 01:36:26	Gauteng		Yes I do	Solar	We have an average sunshine of 7 hrs a day year round. Subsidize/incentivise/accelerate solar installations for domestic and commercial uses. Offer rebates, tax incentives and revenue derived from feeding back into grid. Keep coal grid power for heavy duty industrial use, until phased out by future energy mix.	Karmlin	employed individual

2022-07-13 00:24:18	Mpumalanga	Yes I do	Solar	Independent Power Producers should be allowed to immediately supply South Africa with electricity? Subsidizing the current Eskom users to install solar geysers as well as subsidizing Solar panel installations will motivate Solar usage and decrease the high electricity load at Eskom. The main concern is that government is always LOOKING for solutions but never implement any solution that is presented by business people unless some cadre from the ANC may SCORE from it. The current ANC Cadre deployed all over with most unable to perform effective and efficiently lead to total deterioration of the economy with no consequence for failure and zero punishment for fraud and corruption.	Nico	employed individual
2022-07-12 23:31:05	Gauteng	Yes I do	Solar	Solar and wind energy	Gawie	employed individual
2022-07-12 22:46:23	Free State	Yes I do	Solar		Gerdi	employed individual
2022-07-12 22:46:20	Free State	Yes I do	Solar		Gerdi	employed individual
2022-07-12 22:43:04	Gauteng	Yes I do	Solar		Veressa	employed individual
2022-07-12 22:32:40	Gauteng	Yes I do	Solar	it is far cheaper than the diesel bill for the diesel generators eskom is currently using		employed individual
2022-07-12 22:08:35	Gauteng	Yes I do	Solar	Sun is everywhere and it is free. Fire Mantashe who is a fossil just like coal. Change legislation so shopping malls that generate solar power can put back in the grid	Erica	employed individual
2022-07-12 22:07:38	Gauteng	Yes I do	Solar		Jackie	employed individual
2022-07-12 22:05:29	Gauteng	Yes I do	Solar	Actually combination of solar and winds, mated to areas best suited. Quick to construct, cheaper to build than any other power plant, enough potential companies to deliver on multiple projects in short time, provided government doesn't enforce onerous ridiculous BEE constraints; although they amazingly waived it with Karpower, a Turkish company with ZERO BEE points or footprint in SA - so can be done, if someone just tells Gwede to Shut up! Shut up! Shut up! and keep his sticky fingers out of it. Also, try to increase offtake from Cahora Bassa, if there is spare capacity. How long to build & operationalise gas-powered power stations?	Herman	employed individual
2022-07-12 21:43:04	Western Cape	Yes I do	Solar	Consider solar installations on all large buildings, parking lots and open land where suitable. Give tax rebates to encourage building owners to produce own electricity. Encourage establishment of energy storage service providers which can also independently contribute to grid stability. Encourage more wind turbines on farms and open land where suitable. Give tax rebates or possibly zero rate VAT on installations done by home owners. Zero rate VAT on LED globes and solar geysers.	Wim	employed individual
2022-07-12 21:40:03	Gauteng	Yes I do	Solar		Paul	employed individual
2022-07-12 21:38:49	Gauteng	Yes I do	Solar	Sonlig energie is volgens my opinie die skoonste en mees ekonomiese opsie. Elke verkeerslig kan bv 'n klein sonligpaneel hê en opeenhopings en ongelukke vermy. Windenergie is ook 'n opsie, veral in kusstreke waar wind daaglik waai.	Maureen	employed individual
2022-07-12 21:12:05	Western Cape	Yes I do	Solar	Solar and wind power products will be ideal for western cape. As this is ideal to preserve the environment.	Paxton	employed individual
2022-07-12 20:54:08	Gauteng	Yes I do	Solar	Actually, all renewable energies are a great option and I support that. I don't support Nuclear and Fossil fuel energies.	Gideon	employed individual
2022-07-12 20:20:43	Western Cape	Yes I do	Solar		Colette	employed individual
2022-07-12 20:05:52	Gauteng	Yes I do	Solar		Glynnis	employed individual
2022-07-12 20:04:21	Western Cape	Yes I do	Solar	How is this even a question? ... everybody who wants south africa to improve on all levels, should help move obstacles out of the way of the inevitable solar supplying of a national grid.	marc	employed individual
2022-07-12 19:49:45	Gauteng	Yes I do	Solar		Nadia	employed individual

2022-07-12 19:31:47	Western Cape	Yes I do	Solar		Jayne-Leigh	employed individual
2022-07-12 19:16:01	Gauteng	Yes I do	Solar	An energy mix is the way forward, and solar is the most suitable for our climate, infrastructure, etc.	Darren	employed individual
2022-07-12 19:12:25	Western Cape	Yes I do	Solar		Bevis	employed individual
2022-07-12 19:12:22	Western Cape	Yes I do	Solar		Bevis	employed individual
2022-07-12 19:11:51	Gauteng	Yes I do	Solar	We need to solve this energy crisis immediately or else our country cannot grow socially and economically. It had now reached the desperate dire stage!	Vignash	employed individual
2022-07-12 19:10:46	Western Cape	Yes I do	Solar	We need to move to move away from traditional ways to generate electricity	Rohan	employed individual
2022-07-12 19:09:26	Gauteng	Yes I do	Solar	Allow individuals with spare capacity to push their excess into the grid with compensation.	Johan	employed individual
2022-07-12 19:03:04	Gauteng	Yes I do	Solar		LP	employed individual

2022-07-12 18:59:26	Gauteng		Yes I do	Solar		Stephen	employed individual
2022-07-12 18:59:13	Gauteng		Yes I do	Solar	Do whatever it takes to get electricity 364 days a year without load shedding. The economy can't handle this anymore. Small businesses are closing their doors permanently, farmers can't produce food without electricity and the public is stretched to the limit financially.	Irene	employed individual
2022-07-12 18:55:56	Gauteng		Yes I do	Solar		Johan-Louw	employed individual
2022-07-12 18:53:23	Gauteng		Yes I do	Solar		Leah	employed individual
2022-07-12 18:52:06	Gauteng		Yes I do	Solar	You as government have dragged the issue for far too long. The issue that eskom needs to give license if more than 100mw needs to be removed as eskom can't even maintain itself!!!!!! How can eskom that can't wait to even supply be the boss to issue licenses for more than 100mw when they can't even maintain themselves. There's enough land to put up SOLAR AND WIND PANNELS WHICH IS THE QUICKEST TO DO. ALL OVER MY FRIENDS ARE LOOSING JOBS DUE TO THE CORRUPTION GOING ON. HAVE YOU NO SHAME!?.	Jacques	employed individual
2022-07-12 18:39:00	Gauteng		Yes I do	Solar			employed individual
2022-07-12 18:37:51	North West		Yes I do	Solar	Eskom has failed, so we need immediate intervention that will equally benefit both the poor and rich.	Mildred	employed individual
2022-07-12 18:37:31	Gauteng		Yes I do	Solar	We have sun all year round!	Jacque	employed individual
2022-07-12 18:29:06	Gauteng		Yes I do	Solar		Kevin	employed individual
2022-07-12 18:25:56	Gauteng		Yes I do	Solar	We definitely need other sources of electricity and independent power providers have the role to play as long as there is clear information and legislation to guide this process. Eskom is no longer reliable anymore and it lacks leadership and direction from the government. I even doubt if they have a proper plan on how to fix loadshedding. I just wonder why it took Pravin Gordon and his members as long to allow independent producers and this is again a sign of lack of leadership and no sense of agency. Independent producers need also to be policed to ensure that they don't use cheap equipment and workmanship of low standard and quality otherwise we will see the repeat of what happened in medupi and khusile where the basics of designs are all wrong. Again by bringing independent producers I hope the cost of electricity will not increase ridiculously because sometimes competition does not necessarily mean things will be cheaper. This whole process must also be supervised by the independent body to ensure that the awarding of tenders does not go to the ANC linked cadres who don't even have skills and they subcontract other companies that actually know what they are doing.	Lungisani	employed individual
2022-07-12 18:21:34	Western Cape		Yes I do	Solar		Christel	employed individual
2022-07-12 18:15:51	Gauteng		Yes I do	Solar		Nokito	employed individual
2022-07-12 18:13:12	Mpumalanga		Yes I do	Solar	Eskom was the greatest energy supplier probably in the world prior to 2000. It was crippled by looters, thieves and the corrupt who hid behind political excuses of apartheid and equity to fill their pockets and bank accounts with all the gold and coins the poor company could spew out. This once great beast's legs were cut down and now that these selfish people can reach the head they will slay it. Before this happens, I am all for any other energy producer to join the grid. Prices must be reset and be very competitive between the different energy producers so we can have a healthy competition in rates and give everyone the opportunity to buy and use electricity with an equal price tag for all, from very poor to super rich. I would say that businesses can be charged more dependent on their size and energy usage.	Marc	employed individual
2022-07-12 18:12:07	Eastern Cape		Yes I do	Solar		Angelique	employed individual
2022-07-12 18:07:36	Gauteng		Yes I do	Solar		Abrie	employed individual
2022-07-12 18:07:24	Gauteng		Yes I do	Solar	We are a country with plenty of sunshine which is free!	Sharon	employed individual
2022-07-12 18:06:52	Gauteng		Yes I do	Solar	We need power that will be clean and should be available in a short period of time.	mohale	employed individual
2022-07-12 17:42:58	Gauteng		Yes I do	Solar	Definitely needed to have other energy producers. ANC has failed south Africa at every aspect, eskom is useless under the government.	Ray	employed individual
2022-07-12 17:38:35	North West		Yes I do	Solar		Margaret	employed individual
2022-07-12 17:34:32	Gauteng		Yes I do	Solar	SA has the Karoo which is ideal for solar and is ground that has no real other uses	Paul	employed individual
2022-07-12 17:17:18	Gauteng		Yes I do	Solar		THOMAS	employed individual

2022-07-12 17:13:25	North West		Yes I do	Solar	Use our natural resources to protect our earth and serve our needs! We have an abundance of sun power and even some places that can generate power with wind. Invest in a lasting future.	Lucinda	employed individual
2022-07-12 16:57:24	Gauteng		Yes I do	Solar		Esther	employed individual
2022-07-12 16:54:23	Gauteng		Yes I do	Solar		Odelia	employed individual
2022-07-12 16:50:21	Gauteng		Yes I do	Solar	We are crippling our country by being beholden to Eskom. There are so many hidden agendas, control and shenanigans going on, one would not be able to unpack it quickly. However, we all need to work together for a better South Africa, and our industry will shrink and die if we cannot rectify our current power situation. Too many fat cat pay checks riding the system, being supported by Eskom.	Twan	employed individual
2022-07-12 16:40:44	Western Cape		Yes I do	Solar	I can't believe that they haven't already put one of these renewable energy sources in place yet! It should have been done at the beginning of load shedding a couple of years ago	Kim	employed individual
2022-07-12 16:39:48	Gauteng		Yes I do	Solar	It is insane that in a country like South Africa where we have an abundance of sun light and wind, we are relying in fossil fuel to provide power, because the nuclear power production infrastructure has been so woefully mismanaged. We need to wake up! The first world is fully on board with renewable power - why are we sitting here like a bunch of cave men burning coal??? Time to upgrade the thinking to the future of power production!	Carin	employed individual
2022-07-12 16:35:42	Gauteng		Yes I do	Solar	Solar is the solution for South Africa. It can be deployed quickly. It will definitely remove load shedding during the day. This will improve economic activity and also assist Eskom to get more and better maintenance done.	Victor	employed individual
2022-07-12 16:27:08	Gauteng		Yes I do	Solar	We should use wind and sun	Tanya	employed individual
2022-07-12 16:24:20	Gauteng		Yes I do	Solar	I would also support Wind and Hydroelectric. All these elements are in abundant supply and could be utilised to generate enough power for the country. The only problem is Mr. Coal and the bureaucratic red tape stopping IPP's slotting onto the grid. I DO NOT support Coal, Gas, or Nuclear	Angela	employed individual
2022-07-12 16:23:46	Gauteng		Yes I do	Solar		Angelique	employed individual
2022-07-12 15:59:04	Gauteng		Yes I do	Solar		Muhammad	employed individual
2022-07-12 15:58:51	Western Cape		Yes I do	Solar	We have natural light from the Sun that can support our Solar Systems. Why it has not been put to use years ago is the big question. Even our wind here in the Western Cape can be used to supply the power and energy that the Western Cape needs. So many wine farms and agricultural farms are already using these systems. We would then not need to use coal to pollute the already polluted air.	Cheryl	employed individual
2022-07-12 15:55:26	Gauteng		Yes I do	Solar	We have so many days of sunshine in Gauteng that I think that would be the way to Generate solar, we also have so many buildings in Joburg that there would be no need to create a solar farm but instead you could consider using these building rooftops to generate the power they need and then to supply the extra power to the grid, also using alternatives to eskom would facilitate economic growth as loadshedding is a deterrent to investment	Russell	employed individual
2022-07-12 15:52:10	Gauteng		Yes I do	Solar	We cannot continue to destroy the Earth with our coal fired electricity and we need a reliable supply that is freely available.	Kristen	employed individual
2022-07-12 15:48:02	Gauteng		Yes I do	Solar	If we are allowed to connect to Solar and generate our own power we can alleviate high costs as well as get a quick solution. We can get a solution where we can pay off a solar installation.	Anton	employed individual
2022-07-12 15:47:47	Gauteng		Yes I do	Solar		lebo	employed individual
2022-07-12 15:47:19	Gauteng		Yes I do	Solar	We have sun wind and water which can be used for power, The government needs to stop thinking of the profit they can steel, and start thinking of it's people..	Jo-Anne	employed individual
2022-07-12 15:47:13	Gauteng		Yes I do	Solar	Solar in my view in SA is the cleanest and quickest source	joe	employed individual
2022-07-12 15:42:50	Gauteng		Yes I do	Solar	Solar as we have a lot of sunshine and open spaces for the panels. However theft of equipment might pose a problem. This is safer for our birdlife..	Rosa	employed individual
2022-07-12 15:41:36	Western Cape		Yes I do	Solar	As we are a country which is predominantly sunny with warm weather I would feel that solar energy would be the most feasible option with regards to energy solutions. Other than the cost to implement it I feel it would pay for itself further down the line. It is also not harmful to the environment. The fact is that corruption and forced BEE implementation is the root cause of failure in any government institution within Southern Africa. With severe levels of greed combined with a severe lack of education this outcome was to be expected and unfortunately it will not get any better unless government is completely removed from the equation!!!!	Jacques	employed individual
2022-07-12 15:32:47	Gauteng		Yes I do	Solar		Eben	employed individual
2022-07-12 15:30:59	Western Cape		Yes I do	Solar	South Africa is a country rich with natural resources like wind and sun. These should both be harnessed immediately. And all restrictions regarding the supply of energy by independent contractors should be facilitated.	Jacqui	employed individual
2022-07-12 15:19:08	Western Cape		Yes I do	Solar	Definitely high time the country moved to renewable energy. We have wind, solar, hydro, wave, and tidal power at our fingertips!!	Diane	employed individual
2022-07-12 15:11:26	Western Cape		Yes I do	Solar		Jean-Jacques	employed individual

2022-07-12 15:03:29	North West		Yes I do	Solar	It is unfair and inhumane to control our source of electricity in such a way that even people who are medically dependent on machines to sleep and to breath cannot survive. The quality of life and survival of all South Africans make it necessary to be free to find an alternative source when the government and Eskom fails to serve us.	Michele	employed individual
2022-07-12 15:03:25	North West		Yes I do	Solar	It is unfair and inhumane to control our source of electricity in such a way that even people who are medically dependent on machines to sleep and to breath cannot survive. The quality of life and survival of all South Africans make it necessary to be free to find an alternative source when the government and Eskom fails to serve us.	Michele	employed individual
2022-07-12 15:02:38	KwaZulu- Natal		Yes I do	Solar	South Africa has the sun all year round. Solar has a lighter foot print on the earth, is much cleaner , therefore should be cheaper to consumers.	Rozana	employed individual
2022-07-12 15:02:29	Gauteng		Yes I do	Solar		Jacquleen	employed individual
2022-07-12 14:59:22	Gauteng		Yes I do	Solar		Thandi	employed individual
2022-07-12 14:48:03	Gauteng		Yes I do	Solar	In a country that has so much sun the predominant supply of electricty should come from solar. With load shedding at such high - stages 5 and 6, millions of Rands are lost as many businesses suffer without electricity - it is a crisis. IPP should be able to provide electricity now, scrapping the red tape, to assist the failing government electrical supply.	Zoran	employed individual
2022-07-12 14:44:11	Mpumal anga		Yes I do	Solar	South Africa has the capacity to generate POWER by Solar and Wind, it is also better for our environment.	Heather	employed individual
2022-07-12 14:37:03	Gauteng		Yes I do	Solar		Joy	employed individual
2022-07-12 14:33:57	Gauteng		Yes I do	Solar	With the EU restrictions on coal, renewables are the only feasible option. Lots of coal plants are nearing end of life and a large RESPONSIBLE investment is needed for South Africa to have any chance at economic growth.	Petrus G	employed individual
2022-07-12 14:32:37	Limpopo		Yes I do	Solar	Our country is known as the land of sunshine. Use solar as well as wind where appropriate	Ansie	employed individual
2022-07-12 14:31:36	Gauteng		Yes I do	Solar	The Government has failed dismally ! Give independent producers a chance	Yasmeen	employed individual
2022-07-12 14:28:52	Gauteng		Yes I do	Solar		Colleen	employed individual
2022-07-12 14:27:38	Gauteng		Yes I do	Solar	Solar, hydro and wind provide the most immediate solution to our current energy crises as there are already players in the market who can start rolling out in the short term. Current legislative restrictions need to be lifted as this should be considered a state of emergency, far more critical than COVID ever was. Eskom must be privatized so that audits don't just verify adherence to budgets but scrutinize the income and expenditure of the company(ies) which will lead to less corruption (which is the only thing that the ANC excels at). On a longer term more nuclear power stations should be added to the grid as these are less dependent on battery storage and the technology has advanced dramatically. They are also safer for the surrounding communities than coal and gas. Ramaphosa needs to take immediate action to dismiss cadre employment and appoint people in executive positions who know what they are doing and are going to do the job properly instead of siphoning our taxes into their personal bank accounts. The Zondo commission report has provided an excellent starting point and he should use his executive power to take immediate action instead of sitting on the fence between the multiple factions within the ANC, most of whom want to remain in power to continue sucking at the teat of South African, rapidly decreasing, wealth.	Mariette	employed individual
2022-07-12 14:19:27	Western Cape		Yes I do	Solar		Lorinda	employed individual
2022-07-12 14:18:56	Gauteng		Yes I do	Solar	Surely Solar power would be an obvious choice in our country when we have the benefits of good weather. Of course I dont have knowledge on what is involved to setup solar plants but it should be looked into	Ann	employed individual
2022-07-12 14:18:49	North West		Yes I do	Solar		Willie	employed individual
2022-07-12 14:15:06	Mpumal anga		Yes I do	Solar	The sun shines most of the year, solar would be perfect for homes and businesses to carry on running.	Carrol	employed individual
2022-07-12 14:09:52	Western Cape		Yes I do	Solar	It's clear after 15 years of load shedding that the government is no closer than they were to fixing the power production than when the load shedding started. It's time for them to give up control of the countries power and let the private sector pull us out of this deep dark hole. Pun intended.	Lloyd	employed individual
2022-07-12 14:08:31	Gauteng		Yes I do	Solar	I don't care what gets done but anything anyone can do to end this loadshedding will be fantastic! Businesses are closing down more unemployed crime is at an all time high!! Only worry is people are already struggling to survive whoever or whatever gets done needs to be affordable otherwise all is wasted	Michelle	employed individual
2022-07-12 14:00:58	Gauteng		Yes I do	Solar	We need to move to renewables as fast a possible	Dirk	employed individual
2022-07-12 14:00:31	Gauteng		Yes I do	Solar	Solar power is favourable with South Africa's sunny weather conditions.	sheranie	employed individual
2022-07-12 13:59:08	Limpopo		Yes I do	Solar		margot	employed individual
2022-07-12 13:53:11	Western Cape		Yes I do	Solar	I really don't mind what source of power is used. I'd really hope that our government cares about the environment and heads our country into a direction of eco-friendly power supply such as wind and solar. As a 23 year old i really care about our futures and mostly the future of our environment. Let's strive to be better!	Taylor	employed individual

2022-07-12 13:52:52	Gauteng		Yes I do	Solar		Roberto	employed individual
2022-07-12 13:46:52	Western Cape		Yes I do	Solar	available now but also clean in long term	M	employed individual
2022-07-12 13:44:32	Western Cape		Yes I do	Solar		Benjamin	employed individual
2022-07-12 13:41:18	Gauteng		Yes I do	Solar	We have Copious amounts of sunlight and wind to get private Companies involved with generating power	Terence	employed individual
2022-07-12 13:38:07	Gauteng		Yes I do	Solar	OUR ELECTRICITY SITUATION IS A TOTAL DISASTER DUE TO THE PLUNDER AND THIEVING OF PREVIOUS ESCOM FAT CATS AND THE GUPTAS. THIS PROBLEM IS NOT GOING TO BE SOLVED ANY TIME SOON, WE ARE GOING BACKWARDS. LET THE PUBLIC GENERATE THEIR OWN ELECTRICITY AND START USING SOLAR FOR HEAVENS SAKE.	RICHENDA	employed individual
2022-07-12 13:33:35	Free State		Yes I do	Solar		Eben	employed individual
2022-07-12 13:28:55	Gauteng		Yes I do	Solar	I think we need to stop relying on the anc government to provide power to South Africa. They have proved over the last 28 years that they only care about themselves firstly and secondly for the anc. We need to allow the private sector to start producing power which ever way they can and start selling it into the grid. Eskom should be there to maintain infrastructure and eventually wind down the coal and nuclear stations. Individual solar users should be able to feed any excess back into the grid. There should be no limits in how much an Independent Power Producer can supply.	Sheleen	employed individual
2022-07-12 13:28:31	Gauteng		Yes I do	Solar			employed individual
2022-07-12 13:26:14	KwaZulu-Natal		Yes I do	Solar	The sun shines readily in South Africa and there are many roves of building (residential and Industrial). Put solar panels on these roves and we will have plenty power.	Gerald	employed individual
2022-07-12 13:15:52	Mpumalanga		Yes I do	Solar	South Africa should invest in Solar energy systems as it is clean energy and we have a sunny climate and we can harness that power	Siza	employed individual
2022-07-12 13:15:09	Mpumalanga		Yes I do	Solar	Solar power is the solution since the sun is extremely hot in this part of the hemisphere.	Gift	employed individual
2022-07-12 13:14:38	Western Cape		Yes I do	Solar	We need an immediate solution to the current power shortage, solar power can easily be distribute widely to all parts of South Africa. Residual power can also be put back into the grid to alleviate the pressure on the coal power stations.	Faldiela	employed individual
2022-07-12 13:11:59	North West		Yes I do	Solar		Lenti	employed individual
2022-07-12 13:11:56	North West		Yes I do	Solar		Lenti	employed individual
2022-07-12 13:10:57	Gauteng		Yes I do	Solar	There are so many examples of where solar is working effectively all over Africa and the world. It is not as complex to install and maintain as the case may be with Nuclear and Coal Fired Power Stations. It is safe and to some extent reliable. It can be deployed successfully within a year depending on the size of the installation. It may not be entirely feasible to entirely use solar however it can certainly supplement the grid especially if battery storage is included in the solar installation	Riccardo	employed individual
2022-07-12 13:06:55	Gauteng		Yes I do	Solar	We need an immediate solution to the current power shortage, solar power can easily be distribute widely to all parts of South Africa. Residual power can also be put back into the grid to alleviate the pressure on the coal power stations.	Reuben	employed individual
2022-07-12 12:59:27	Gauteng		Yes I do	Solar		Graziella	employed individual
2022-07-12 12:52:10	Gauteng		Yes I do	Solar	I selected Solar because it can be rolled out pretty quickly and businesses could put panels on their buildings which will have immediate results .	Diane	employed individual
2022-07-12 12:47:15	Gauteng		Yes I do	Solar		Steven	employed individual
2022-07-12 12:47:09	Western Cape		Yes I do	Solar	I agree with mainly solar, but I also welcome other alternative power supply methods which are not hazardous or dangerous like nuclear. Public should be freed from the corrupt terrorism of the anc and be allowed to choose who to use just like we choose food or cellular services. This is so very important in order for our economy to pick up again. And allowing alternative power supply will also create alot of jobs- so another boost against crime. Eskom may be allowed to operate for those in need for bigger power currencies. Or will we reconsider only after total collapse?	Paul	employed individual
2022-07-12 12:43:58	Western Cape		Yes I do	Solar	We need to be allowed to invest in more Solar and Wind producing methods of electricity. Our government is running our Country to the ground with all this corruption. We need a change.	Naelah	employed individual
2022-07-12 12:37:11	Western Cape		Yes I do	Solar	A combination of solar, wind and hydro immediately, as well as more nuclear facilities in the long term.	Maresia	employed individual

2022-07-12 12:25:23	Gauteng		Yes I do	Solar	Solar (and other renewable sources) with battery back up from private producers, is the only way to move forward, and stop the corrupt monopoly that is Eskom (in its current state) to further crippling the South African Economy	Michael	employed individual
2022-07-12 12:20:05	KwaZulu-Natal		Yes I do	Solar	We live in a sunny country - why not harvest this power to run what Eskom cannot? Solar installation costs need to be reduced, so that everyone can afford to make use of this resource. In addition, wind power should be utilised.	Susan	employed individual
2022-07-12 12:08:33	Gauteng		Yes I do	Solar	I'm no expert, but SA has adequate sun, wind and water that can be harnessed for electricity production. We need green, renewable solutions and Electrical Engineering experts (not Cadres)t o do this. They need to be allowed to operate in a free market system with minimal red tape, so that consumers have a choice, but are not ripped off or held to ransom by a monopoly	Veronica	employed individual
2022-07-12 12:07:15	Gauteng		Yes I do	Solar		Justin	employed individual
2022-07-12 11:58:41	KwaZulu-Natal		Yes I do	Solar		Sue-Ann	employed individual
2022-07-12 11:57:24	Gauteng		Yes I do	Solar		Hermien	employed individual
2022-07-12 11:54:26	Western Cape		Yes I do	Solar	The South African economy is taking a massive knock with loadshedding. Eskom cannot do it alone, we need IPP's and urgently. Let the people have a choice of where to buy their power. Ensure the power generation is sustainable and eco friendly. Get it done!!!	Marguerite	employed individual
2022-07-12 11:53:40	Western Cape		Yes I do	Solar	We need a combination of power sources. There is not just one source that will meet all our power needs. But we need the red tape removed to get us in a position to add more sources as our economy does not have the luxury to operate without electricity.	Jacobus	employed individual
2022-07-12 11:53:05	KwaZulu-Natal		Yes I do	Solar	We need to start moving forward with renewable energy and start fulfilling the promises/commitments we're making to other countries, investing in SA, about becoming more sustainable. It's time to walk the walk.	Julia	employed individual
2022-07-12 11:53:05	Gauteng		Yes I do	Solar	We will become independant Have a choice, gas or solar Be free from strikes, corruption and Increases in Electricity	Renata	employed individual
2022-07-12 11:51:33	Western Cape		Yes I do	Solar	South Africa is one of the best countries worldwide for solar power. Many regions of the country receive more than enough sunlight to power solar panels. This technology should be made more affordable so that it can be available to everybody. We HAVE TO stop using fossil fuels which contribute so much to pollution and are simply not sustainable. Please bring our country into the 21st century and act responsibly.	Loudine	employed individual
2022-07-12 11:41:02	KwaZulu-Natal		Yes I do	Solar		Brigitte	employed individual
2022-07-12 11:40:17	Gauteng		Yes I do	Solar	Empower users to produce own electricity and allow them to use excess by selling it back i.e. into grid in order to get more electricity available to people who cannot afford a system, but still need/use electricity.	Loretta	employed individual
2022-07-12 11:35:57	Western Cape		Yes I do	Solar	Decentralizing energy generation is going to be key to South Africa's success in the energy sector. Instead of continually taxing the hard-working citizens of this country, offer incentives for citizens to take energy generation into their own hands. Small-scale solar energy for the home, for example. This creates a sustainable energy culture for our nation. Decentralizing generation, while regulating the cost at which energy can be sold, is important. Competition is healthy, though it can also drive up energy prices. This is where the regulator would need to intervene to ensure municipalities can procure energy from independent power producers at a reasonable cost.	Matthew	employed individual
2022-07-12 11:32:17	Gauteng		Yes I do	Solar		Willem	employed individual
2022-07-12 11:27:53	Gauteng		Yes I do	Solar	I am open to any method of electricity if it means keeping the lights on. Do you have any idea what it's like to be a small business owner in this environment? It's killing us!	Charlotte	employed individual
2022-07-12 11:24:19	Gauteng		Yes I do	Solar	Wind and Solar as they are both free and renewable.	Candice	employed individual
2022-07-12 11:22:46	Western Cape		Yes I do	Solar	I urge the use of solar power due to the fact that it is environmental friendly and freely available.	Pieter	employed individual
2022-07-12 11:17:12	Western Cape		Yes I do	Solar		frikkie	employed individual
2022-07-12 11:06:05	Gauteng		Yes I do	Solar	Electricity crisis must be sorted out immediately. It is apparent that the government cannot run or manage anything.	Peter	employed individual
2022-07-12 10:42:25	Gauteng		Yes I do	Solar	Combination of solar, wind and hydro	MEDWYN	employed individual
2022-07-12 10:41:19	Gauteng		Yes I do	Solar	We have a lot of sunlight use what you have , also look at the best option for every area, I also think the existing structure can be fixed, or are they trying to sink ESKOM on porous.? Give the contract to the best qualified companies	Nadeen	employed individual
2022-07-12 10:33:06	Western Cape		Yes I do	Solar	There needs to be a variety of options available and operational. We cannot only name/depend on one surely?	Karen	employed individual
2022-07-12 10:29:41	Gauteng		Yes I do	Solar	We have lots of sun, and large tracts of empty land in desert/semi-desert areas that would be ideal for solar. We could also use the spaces above existing buildings to install solar panels. Installing solar panels on roofs would also help insulate buildings, allowing for better internal energy conservation.	Ella	employed individual

2022-07-12 10:23:11	Western Cape		Yes I do	Solar	Of all South African renewable energy sources, solar holds the most potential. Because of the country's geographic location, it receives large amounts of solar energy. Wind energy is also a major potential source of renewable energy.	Tim	employed individual
2022-07-12 10:19:08	Western Cape		Yes I do	Solar	A combination of renewable energy sources on a big scale will be necessary to solve the energy crisis. SA has it all: sun, wind, water and more. We just need investors and competition in the energy sector. The installation of private solar systems should get subsidized as well!	Eva	employed individual
2022-07-12 10:14:34	Gauteng		Yes I do	Solar	Any form of alternative, clean power solutions that will assist us to move away from the monopolistic dependence on Eskom's dirty and woefully inadequate electricity supply. Allow the private sector to be directly involved in solutions.	Byron	employed individual
2022-07-12 10:01:01	Western Cape		Yes I do	Solar	Government knows what it should do - it is just unwilling to do anything about the crisis.	Erich	employed individual
2022-07-12 09:58:09	Gauteng		Yes I do	Solar	We are a country with multiple natural energy solutions. We should use a combination of wind, sea and solar as well as other. There is not just 1 solution.	Brigitte	employed individual
2022-07-12 09:56:28	Gauteng		Yes I do	Solar	Any form of renewable energy on the whole and where existing independent users contribute back into the grid.	Villis	employed individual
2022-07-12 09:53:32	KwaZulu- Natal		Yes I do	Solar		MARCHEL LE	employed individual
2022-07-12 09:45:48	North West		Yes I do	Solar	It seems that we are already in a national energy crisis that is affecting the country from the economic perspective, safety and development of businesses in general. We should just find a way to move forward as a country. Let the electricity be affordable and available to all. It also needs to consider the environmental impact and sustainability aspects	Lebogang	employed individual
2022-07-12 09:42:59	Eastern Cape		Yes I do	Solar	Private companies must be allowed to generate electricity harvested from solar and wind and fed back access energy into the grid with financial compensation.	Frank	employed individual
2022-07-12 09:42:08	Western Cape		Yes I do	Solar	The sun comes up every single day, and is under utilized as a renewable energy source. Private individuals should be allowed to set up their own solar stations at home and at their work, and also be able to use wind as an additional form of energy (we live in Milnerton, so the wind is always blowing) to supply themselves with electricity, their neighbors if they get along or like them, and any overflow should be allowed to be poured into the Eskom grid, to provide others with electricity as well. This overflow should be credited to the small producers account for when they have to use Eskom. I understand this will take time, but if the government and municipalities and creative normal people and clever energy producers could get together, form a goal and ALL WORK TOGETHER towards the same goal, we will be able to save our economy and country from utter ruin. We all worked together during Covid, we can do the same with energy related issues.	Lileen	employed individual
2022-07-12 09:41:31	Western Cape		Yes I do	Solar	Short term immediate needs will most rapidly be met by small independent private producers of power and power-services, using tech that is quick to deploy such as solar. And currently, solar is also most cost-effective.	Schalk	employed individual
2022-07-12 09:38:07	Gauteng		Yes I do	Solar		Azraa	employed individual
2022-07-12 09:32:42	KwaZulu- Natal		Yes I do	Solar	Eskom has failed dismally over the years to provide the citizens with basic electricity. Ridiculously high salaries, under performance and blatant corruption have led to a failing system. As long as electricity is monopolised by the state they will appoint so called experts for political gain. Eskom enjoys its monopolistic form, and does not face any challenges from other suppliers which results in lower competition, high cost, poor service and ignore the interest of its consumers. Allow the consumers to choose between other competing producers, as by privatising our energy source will ensure that these producers will be forced to innovate and perform competently to be successful. We no longer need overpaid bureaucrats to plan and run our grids. We need our private energy source to be efficient, to be profitable, to reduce the costs of the energy supplied to its consumers. To depoliticise electricity, it has to be privatised. So YES please amend legislation and let us privatise this much needed energy source.	Julie	employed individual
2022-07-12 09:31:39	Western Cape		Yes I do	Solar	Help people to put up more solar to reduce the price of solar system for houses put subsidy for home owners for solar systems	Jacobus	employed individual
2022-07-12 09:26:35	Gauteng		Yes I do	Solar		Philip	employed individual
2022-07-12 09:26:03	Gauteng		Yes I do	Solar	We live in a very sunny country and a lot of people have already gone solar to some extent. We cannot be paying Eskom's exorbitant prices for services that practically no longer exist. Another failed SOE... thanks ANC	Victoria	employed individual
2022-07-12 09:22:23	Limpopo		Yes I do	Solar	In sunny South Africa, solar will do. Also coal since we produce a lot of it that's being exported.	Millicent	employed individual
2022-07-12 09:22:22	Western Cape		Yes I do	Solar		Sue-Marie	employed individual
2022-07-12 09:15:06	KwaZulu- Natal		Yes I do	Solar	The sun is a reliable and honest source which can't be tampered with	Caroline	employed individual

2022-07-12 09:07:55	Western Cape		Yes I do	Solar	The state is failing us. We need independent power producers to make the supply of electricity, not a monopoly. De Ruyter is doing the best he can and maybe with more time, he will turn the ship around. But we should not be reliant on one manufacturer of electricity. It should be open to the rest of the market. Create competition. That is how an economy grows.		
2022-07-12 09:07:30	Gauteng		Yes I do	Solar	Give the ability of households who generate electricity to also feed back into the system and make some money that way. You will empower South Africa!	Bianca	employed individual
2022-07-12 09:07:21	Free State		Yes I do	Solar	SOLAR OR ANYTHING ELSE THAT WORKS AND WE HAVE EDUCATED PEOPLE CAPABLE OF MAINTAINING THE SYSTEMS.	CAROLE	employed individual

2022-07-12 08:54:33	Mpumal anga		Yes I do	Solar		Janine	employed individual
2022-07-12 08:53:41	Gauteng		Yes I do	Solar	*Despite SA having excellent engineering capacity to build a nuclear plant, unfortunately the generally poor service attitudes among the people that will have to operate and maintain it (and the corruption that will not allow for necessary operational and maintenance funding) will cause nuclear disasters. Despite the government and some people thinking that SA is a first-world country, we are not fully. And if first world countries could not avoid nuclear disasters, all the LESS can SA. And SA can even less afford, and have less aptitude, to remedy or manage such a disaster. *Stop selling the power and resources to neighboring countries, especially power generated from the Wind Turbines. Supply to SA first! *Take away the monopoly from Eskom and give the people of SA a choice where/who they want their power from. *Allow for tax rebates and/or tax subsidized solar power to make it more affordable.	Corne	employed individual
2022-07-12 08:49:10	Gauteng		Yes I do	Solar		Petronella	employed individual
2022-07-12 08:40:54	Gauteng		Yes I do	Solar	Africa is the world's 2nd biggest continent with a population of 1.2 Billion people. Its rich in mineral resources and its a space that hasn't been fully tapped into. We have the sun shine 365 days a year yet more than 40 million people dont have access to electricity. If you compare and contrast it with Europe, when they have 3 months they celebrate and what disturbing is that the world's Energy headquarters are in Germany. There's always been a need for independent power producers not only in South Africa but in Africa as a whole. Eskom is the same story compared to SAA. There is no sense of accountability or responsibility. How is it that the country only SOE that carries the whole country is requesting for a bailout every financial year. As much as they're already independent solar suppliers why not cut the red tape and allow independent producers to extend their footprint. This will allow economic growth, employment and fair competition.	Delphia	employed individual
2022-07-12 08:33:50	Western Cape		Yes I do	Solar	I do not have enough knowledge, but we need to supplement electricity in whatever way possible.	Lebo	employed individual
2022-07-12 08:32:43	Gauteng		Yes I do	Solar		magdalena	employed individual
2022-07-12 08:32:27	Gauteng		Yes I do	Solar	If nothing is done now about the electricity situation the economy will crash. Business cannot continue like this and neither can the country. There needs to be a variety of power sources - coal, nuclear, solar, wind etc. Allow independent power producers to feed into the grid to help get us out of this mess, the constant frustration and disruptions. Most importantly maintenance needs to be done on a regular basis to the sources that we already have, just as you would service your car. Bring back the experts who knew what they were doing.	Karen	employed individual
2022-07-12 08:27:52	Gauteng		Yes I do	Solar	Any other method of production, especially a method that goes easy on the environment and is sustainable.	Liz	employed individual
2022-07-12 08:25:04	Gauteng		Yes I do	Solar		Wilna	employed individual

2022-07-12 08:22:19	Gauteng		Yes I do	Solar	Eskom can still supply electricity to other countries. While we have independent firms providing electricity which could be cheaper and more job opportunities are created, decreasing the unemployment rate	conrad	employed individual
						Matthew	employed individual

2022-07-12 08:20:00	Gauteng	Yes I do	Solar	<p>The red tape policy should have been scrapped years ago. How can a country rely solely on ONE power utility? Competition is good for any venture. The present state at Eskom would never have been allowed to get to the state it's in if there were over power producers - it would have gone under long ago, which in fact it has.</p> <p>The effect of Eskom's incompetency on the economy is devastating. How can we have let it get this way? Let others who can do the job properly come in and show Eskom how it is done!</p> <p>What is the government scared of - that someone can do a better job than them?? Admit that you have failed and get on with fixing it. Scrap the red tape and allow others to sort out your mess.</p> <p>This country has immense resources that can be utilized, not least of which is solar - use it!! There is also wind and hydroelectric. USE IT !!!!</p>	Jacqui	employed individual
2022-07-12 08:15:23	Gauteng	Yes I do	Solar	<p>I think both Solar and Wind energy should be explored. I also feel that great inclusivity and collaboration should be created between Government and other experts in these fields.</p>	Linda	employed individual
2022-07-12 08:14:05	Gauteng	Yes I do	Solar	<p>South Africans should have the right to produce their own power and be able to buy from other companies, as Eskom is failing to deliver, and it's costing the economy billions.</p> <p>Solar and wind supplies would be ideal.</p>	Elne	employed individual
2022-07-12 08:12:54	North West	Yes I do	Solar	<p>We have enough sun in our country to carry all the electricity needs.</p> <p>Solar and wind supplies would be ideal.</p>	Elizabeth	employed individual
2022-07-12 08:12:53	North West	Yes I do	Solar	<p>We have enough sun in our country to carry all the electricity needs.</p>	Elizabeth	employed individual
2022-07-12 08:09:19	Free State	Yes I do	Solar		Martha	employed individual
2022-07-12 08:05:47	Gauteng	Yes I do	Solar	<p>With South Africa's climate and large tracts of open land, solar energy would be a quick fix for SA's energy crisis. Additionally, people who have solar panels at their homes could also feed their unused solar-generated power into the electricity network.</p>	Gordon	employed individual
2022-07-12 08:05:41	Gauteng	Yes I do	Solar	<p>Solar is the future because Eskom has been consistent at being inconsistent always. We cannot trust them and they cannot be afforded the seat on the table.</p>	Manini	employed individual
2022-07-12 08:02:14	Gauteng	Yes I do	Solar		Karen	employed individual

2022-07-12 07:27:42	Gauteng	Yes I do	Solar	<p>Healthy competition is always the best for a market, this ensures that suppliers are kept on their toes, maintain infrastructure, and have competitive prices. It is about time that the power issue gets resolved and the only way to do that is to take the monopoly away from Eskom.</p> <p>An excellent option is Solar power. The government should adopt policies asap to allow people and reward people for going solar. E.g. give tax rebates / discounts / etc. for people who install solar and take pressure off of the grid. Make it worth while to spend the extra money to buy an Inverter that is grid tied and that can be used to sell power back to the grid. We live in a country with mainly sunshine days.</p> <p>Start investing in research to develop better and cheaper batteries.</p> <p>Etc.</p>	Ciara	employed individual
2022-07-12 07:27:24	Western Cape	Yes I do	Solar	<p>It is time to immediately allow alternate energy providers to start supplying electricity to the grid. How much longer can businesses sustain the crippling losses inflicted on them by load shedding? I call on the government to immediately amend legislation, and allow South Africa to start moving towards renewable sources of electricity. Clean, renewable and consistent energy is what we desperately need!!</p>	Nikki	employed individual

2022-07-11 19:46:31	Western Cape		Yes I do	Solar	there are already many solar units it must be just tied into the grid there are to much red tape	Gerrit	employed individual

2022-07-11 19:41:14	North West		Yes I do	Solar		Louis	employed individual
2022-07-11 19:41:12	Gauteng		Yes I do	Solar	Combination of solar and current use of electricity can work better, relax all these stringent policies and legislation for energy use. Obviously safety first.	Lenny	employed individual
2022-07-11 19:34:29	Gauteng		Yes I do	Solar	Wind farms are set up and can be used immediately, but solar will be more effective.	Rosemary	employed individual
2022-07-11 19:31:15	KwaZulu-Natal		Yes I do	Solar	Solar is presently in the market No need to further brainstorm	Kogie Sarah	employed individual
2022-07-11 19:30:00	Western Cape		Yes I do	Solar	Solar and wind	Miles	employed individual
2022-07-11 19:29:19	Western Cape		Yes I do	Solar		Ralph	employed individual
2022-07-11 19:25:48	Western Cape		Yes I do	Solar	Solar farms in the Karoo operated by private enterprise.	Nicholas	employed individual
2022-07-11 19:25:45	Western Cape		Yes I do	Solar	Solar farms in the Karoo operated by private enterprise.	Nicholas	employed individual
2022-07-11 19:21:51	Western Cape		Yes I do	Solar	I'm thankful that I live in Cape Town with the lessened loadshedding stages. Thank you.	Gaynor	employed individual
2022-07-11 19:20:40	KwaZulu-Natal		Yes I do	Solar	Solar is clean and cheap. Reinstate qualified people to run our coal powered plants.	Hugh	employed individual
2022-07-11 19:10:38	Gauteng		Yes I do	Solar		Ncamusile	employed individual
2022-07-11 19:10:19	Mpumalanga		Yes I do	Solar	The government is the cause of loadshedding. We cannot survive stage 6 or whatever they bring in the future... Stage 7, 8, 10? PRIVATIZE PLEASE!	Tatum	employed individual
2022-07-11 18:57:26	Western Cape		Yes I do	Solar	Please for the love of God let the many alternative power sources make eskom permanently redundant.	Lauren	employed individual
2022-07-11 18:53:37	Western Cape		Yes I do	Solar		Gregory	employed individual
2022-07-11 18:53:29	Mpumalanga		Yes I do	Solar		Nonhlanhla	employed individual
2022-07-11 18:52:54	Mpumalanga		Yes I do	Solar	We are all so tired of the corruption, vandalism , and downright lawlessness. A combination of Solar, Wind, and Hydro. We have to also be mindful about our Environment.	Charmaine	employed individual
2022-07-11 18:51:16	Gauteng		Yes I do	Solar	We have wasted enough time on political ideologies. Remove the red tape please.	Ian	employed individual
2022-07-11 18:44:49	Gauteng		Yes I do	Solar		Desire	employed individual
2022-07-11 18:38:48	Gauteng		Yes I do	Solar		Imran	employed individual
2022-07-11 18:24:48	Gauteng		Yes I do	Solar	Solar power has been gaining traction for residential and business purposes. Allowing Solar power to be fed back into the grid, and making this an attractive option for families and businesses could end the loadshedding crisis.	Bret	employed individual
2022-07-11 18:22:24	Gauteng		Yes I do	Solar	I would suggest that we cover the risk of supply for the future by ensuring there is competition and that each household may produce their own solar energy which can be fed back into the general use. We should have combination of energy supply for our country 1. Solar 2. Wind 3. Natural Gas Alternatively, renewable natural gas(RNG), also known as biomethane, is a pipeline-quality vehicle fuel. It is produced by purifying biogas, which is generated through anaerobic digestion of organic materials—such as waste from landfills and livestock—or through thermochemical processes, such as gasification. The list above should be the 3 most important energy sources and can be produced in South Africa and makes us less dependant on other countries.	Ines	employed individual
2022-07-11 18:21:45	Gauteng		Yes I do	Solar		Veramarie	employed individual
2022-07-11 18:16:44	Free State		Yes I do	Solar		Leonie	employed individual
2022-07-11 18:16:40	Gauteng		Yes I do	Solar	This country has suffered enough through corruption, theft, mismanagement of funds, cadre employment, fruitless spending through the ANC and EFF, where all the above lead to state capture to the detriment of the people of SA where these over R1Trillion lost over the past 28 years could have been used to subsidises and implement better schools, better hospitals, better roads, better education, better food supply, better petrol prices, better employment etc, better electricity, now being deprived from the people of SA due to the above	G	employed individual

2022-07-11 18:12:15	Limpopo		Yes I do	Solar	There are numerous private sector enterprises that can already assist in the supply of renewable energy to the grid. It is senseless not to buy into this. It also does not make sense to refuse expertise and help offered on the basis of color representativity. if we can use what is available we can save the day!	Petrus	employed individual
2022-07-11 18:11:33	Gauteng		Yes I do	Solar	This country has suffered enough through corruption, theft, mismanagement of funds, cadre employment, fruitless spending through the ANC and EFF, where all the above lead to state capture to the detriment of the people of SA where these over R1Trillion lost over the past 28 years could have been used to subsidises and implement better schools, better hospitals, better roads, better education, better food supply, better petrol prices, better employment etc, better electricity, now being deprived from the people of SA due to the above	J	employed individual
2022-07-11 18:07:18	KwaZulu-Natal		Yes I do	Solar	South Africa has good options for a combination of power producers solar wind hydro nuclear . Independent power producers that will be allowed to operate freely without BEE policies	Yvonne	employed individual
2022-07-11 18:05:20	Western Cape		Yes I do	Solar	The current electricity crisis is destroying the economy and decimating jobs. South Africa has an abundance of opportunities for renewable energy, and associated investment in research, technologies and skills. It should be a no-brainer!	Linda	employed individual
2022-07-11 18:00:50	Outside SA	United Kingdom	Yes I do	Solar	South Africa is struggling constantly with power issues and most 1st world countries are run as independent power producers as they then have a financial interest to provide a good service. This will create competition and improve investor confidence.	Ian	employed individual
2022-07-11 17:54:54	Gauteng		Yes I do	Solar	The ANC government failed to secure energy for South African instead they focused on self enrichment.	Nomana	employed individual
2022-07-11 17:48:50	Western Cape		Yes I do	Solar	Solar has least impact on the environment and is cheapest overall .	Tina	employed individual
2022-07-11 17:46:04	Free State		Yes I do	Solar	Solar is more green friendly and will assist the government with the crisis. Give every household solar and then let this household pay a levy on it.	Willie	employed individual
2022-07-11 17:38:46	Gauteng		Yes I do	Solar	South Africa is a warm country where most provinces has enough sunlight that can assist in producing extra energy. We can also utilise wind from specific areas depending on its high availability to reduce the burden in the current system of generating energy.	Tinyiku	employed individual
2022-07-11 17:36:17	Gauteng		Yes I do	Solar		Odette	employed individual
2022-07-11 17:36:06	Free State		Yes I do	Solar	Solar and wind, but wind not enough in Bloemfontein. Maybe in CT where wind is always blowing. But apparently at the moment the battery size is not enough to store sufficient power. Thus we still need to use coal. Gasstoves and solar geisers for now. Just a pity these items are more expensive than electric stoves etc. and not affordable for most. Wish government can intervene with prizes just for now so that everybody can buy or they need to subsidised it for EVERY BODY... not just the poor, even the middle class . More Private companies should definitely be approve to sell power. Maybe the government should let go of ESCOM and sell it to private company. Then they can use money to cover debt. Yes it might be more expensive, but at least these corrupt government officials wont be able to steel anymore. Sell is to a private company not to a consortium like SAA which is also government..... although they try to hide it.....	Janiné	employed individual
2022-07-11 17:33:20	Western Cape		Yes I do	Solar	We have so many sunny days in SA, so why not take advantage of this sustainable source of energy? We definitely need to bypass Eskom!	Tania	employed individual
2022-07-11 17:31:08	Western Cape		Yes I do	Solar	We have solar and wind energy in abundance. Go green	Mark	employed individual
2022-07-11 17:25:29	KwaZulu-Natal		Yes I do	Solar		Hester	employed individual
2022-07-11 17:24:35	Gauteng		Yes I do	Solar	We are blessed to have lots of sunny days in South Africa. This is a natural resource. Eskom cannot supply the electricity demand, and this is affecting the economy and citizens negatively. Amend legislation swiftly so the lights can stay on and the country can thrive again.	Carien	employed individual
2022-07-11 17:21:54	Western Cape		Yes I do	Solar	We have abundant natural resources and many service providers who could set up infrastructure in a short time. Eskom's monopoly on power generation and supply cannot be justified, and politicians without the qualifications, experience, or competence to spearhead these projects need to stay out of the whole process.	Andrea	employed individual
2022-07-11 17:17:30	Western Cape		Yes I do	Solar	Private sector power supply will stimulate better performance and competitive pricing. The negligence, corruption and outright theft of tax payer money through Eskom crime syndicates is an international embarrassment. Why can South Africa not do better? The people need a better vision of a more prosperous and cooperative future, one that is free of manipulation and crippling underhanded-ness. Grow upwards beloved South Africa!	Sean	employed individual
2022-07-11 17:15:55	Western Cape		Yes I do	Solar	I think solar us in cities the best solution. It can be mounted on most rooftops and is already bring used as such. Every household in South Africa should have access to Solar power. Wind farms and nuclear are environmentally unfriendly and can take up a lot of space.	Christine	employed individual
2022-07-11 17:10:17	Western Cape		Yes I do	Solar	South Africa would greatly benefit from solar as well as wind energy. It is much cleaner and we do have a lot of sun and wind in the country. Why not use our natural resources that do not require mining and killing the environment to our benefit?	Muriel	employed individual

2022-07-11 17:10:05	Mpumalanga		Yes I do	Solar	The use of wind, solar and hydro would be best for South Africa.	Riana	employed individual
2022-07-11 17:09:59	KwaZulu-Natal		Yes I do	Solar	There are many solar solutions available at the moment, but is not affordable for the general South African. Start setting up households with a solar panels, to alleviate the full need of Eskom's electricity, or invest in more Solar Energy Plants.	Candice	employed individual
2022-07-11 17:07:15	Gauteng		Yes I do	Solar		Pieter	employed individual
2022-07-11 17:00:55	Gauteng		Yes I do	Solar		Mandy	employed individual
2022-07-11 16:50:50	Western Cape		Yes I do	Solar		Skye	employed individual
2022-07-11 16:49:56	Western Cape		Yes I do	Solar		M	employed individual
2022-07-11 16:43:10	Limpopo		Yes I do	Solar	Please move away from dirty power generated with fossil fuels. Solar, and wind is more sustainable. People may loose their jobs if we have to say goodbye to coal, but so many new jobs will be created if we allow Independent Power Producers into the grid. Many businesses are marginal because of load-shedding!	Tjaart	employed individual
2022-07-11 16:39:19	Western Cape		Yes I do	Solar	Dear Mr Mantashe, It is clear that the only way to get us out of the power crisis is for you to immediately stop all burdensome regulations and allow IPP's to produce their own power, and put it onto the grid, as an emergency. It can be a mix of solar, wind, gas and nuclear (but predominantly solar). In five years time, once the crisis has been averted, you can re-introduce your long list of (mostly unnecessary) regulations, which at the moment are crippling the country. Regards Bruce Bartlett	Bruce	employed individual
2022-07-11 16:35:17	KwaZulu-Natal		Yes I do	Solar	Our country desperately needs the private sector to be able to provide infrastructure services.	Louise	employed individual
2022-07-11 16:32:23	Gauteng		Yes I do	Solar	Probably a combination. Hydro and wind (where applicable) can also be suited and it is crucial for our country to slowly move to clean or renewable energy sources.	Heleen	employed individual
2022-07-11 16:32:16	Gauteng		Yes I do	Solar		Mauro	employed individual
2022-07-11 16:31:09	Western Cape		Yes I do	Solar	And wind in Cape Town. Independent Power Producers should be allowed to immediately supply South Africa with electricity. Yes this is important competition is good keeps level of services high and competative.	Neil	employed individual
2022-07-11 16:22:39	Eastern Cape		Yes I do	Solar	South Africa has an ideal climate for harnessing solar as an electrical power producing source.	Quintin	employed individual
2022-07-11 16:18:48	Gauteng		Yes I do	Solar	Private Energy Production should be allowed with immediate effect. The current situation is destroying the economy. The ANC is trying to get the monopoly on electricity generation and distribution.	Johnny	employed individual
2022-07-11 16:18:13	Northern Cape		Yes I do	Solar		Alette	employed individual
2022-07-11 16:18:05	Gauteng		Yes I do	Solar	I am strongly supportive of any solution that adds power to the grid without adding additional pressure on the Earth's depletable resources. Solar, wind, hydro - all sounds good to me.	Charine	employed individual
2022-07-11 16:14:34	Gauteng		Yes I do	Solar	Vast expanses of unused Eskom land with no shortage of sunlight hours in parts of South Africa (Northern Cape/ North West). Solar is also relatively quick to install (in comparison to other power types such as Coal or Nuclear).	Mark	employed individual
2022-07-11 16:12:38	Western Cape		Yes I do	Solar		Debbi	employed individual
2022-07-11 16:09:12	Western Cape		Yes I do	Solar		Samantha	employed individual
2022-07-11 16:06:22	Gauteng		Yes I do	Solar	Renewable energy solutions are needed to urgently address the power crises and bring down the costs hereof over the long terms. Allow companies with expertise to provide the solutions. Solar is a viable option for sunny South Africa. Opening up power supply by changing the the policy to include independent power producers, specifically home producers, who have excess power, will be beneficial in the short term to help stabilize power supply and prevent a total shutdown of power generation. Solar is the way to go, wind next choice. Coal as back up, we have good supply in RSA we may as well use it. Citizens should be encouraged to supply energy back into the grid by making this legal and people earning below a specified threshold or on pension should be granted a tax rebate for installing solar systems which generate excess power for the grid.	Grant	employed individual
2022-07-11 16:01:11	Gauteng		Yes I do	Solar	Affordable solar power should become the norm for all South Africans	K E	employed individual

2022-07-11 16:00:13	Gauteng		Yes I do	Solar	Clean and immediate with storage We need overnight power supply to sort our economy so why not include independent producers. Stop worrying about how money should flow through the state in order to regulate and rule everything. We need secure power to run a economy	Jaco	employed individual
2022-07-11 15:58:12	Gauteng		Yes I do	Solar	South Africa has plenty of sun to generate solar power. Wind could also be used as it is in other places in South Africa already.	Michel	employed individual
2022-07-11 15:56:17	Gauteng		Yes I do	Solar	Renewables - Garbage/Litter scattered everywhere can be better used Solar - in parts of the country with a high percentage of yearly sun, Wind - in parts of the country with high wind rates	Madelaine	employed individual
2022-07-11 15:49:58	Gauteng		Yes I do	Solar	I think solar is the shortest-to-market solution and is completely scalable so would offer almost immediate relief with a small amount of electricity but is able to expand to eventually provide large amounts. The maintenance & running costs of solar are much lower than coal and nuclear which could ultimately be benefitted by the consumer. There's also the possibility to convert unused urban spaces such as rooftops and car parks into solar farms.	Darryl	employed individual
2022-07-11 15:49:37	North West		Yes I do	Solar	It is clear that ESKOM is unable to electrify SA. Allow others to assist. Let there be more than one company producing electricity and let the municipalities chose where they buy their own electricity.	Alice Tseleng	employed individual
2022-07-11 15:47:47	Western Cape		Yes I do	Solar		Stephanus	employed individual
2022-07-11 15:46:37	Western Cape		Yes I do	Solar	Any form of renewable energy will help. Government should wake up and scrap red tape. Private sector can sort out this issue out with eskom quickly if there are no red tape. The country needs power to grow the economy. Why would you not scrap red tape to improve energy supply ?	Christoffel	employed individual
2022-07-11 15:44:37	Western Cape		Yes I do	Solar		Analize	employed individual
2022-07-11 15:40:44	Gauteng		Yes I do	Solar		Cornelius	employed individual
2022-07-11 15:31:07	Western Cape		Yes I do	Solar		Brenda	employed individual
2022-07-11 15:29:15	Gauteng		Yes I do	Solar	We need a quick solution and independant Power Suppliers can come to the rescue. Eskom cannot fix the existing Power Station in a short time. We need a solution now	Stanley	employed individual
2022-07-11 15:25:48	Eastern Cape		Yes I do	Solar		Darron	employed individual
2022-07-11 15:18:48	Gauteng		Yes I do	Solar	Scrap the Red tape, allow IPP"s to immediately supply Electricity into the Grid. We are in a state of disaster where Eskom cannot meet the demand. Eskom through the state capture has lost so much money, money needed to replace the existing infrastructure. We need a permanent fix to the loadshedding, as Eskom are holding us to ransom with the loadshedding. Businesses cannot function, which means more people will be laid off. Households cannot function too. Home businesses cannot function either. How are we supposed to grow the economy when most of the time the lights are out. Loadshedding needs to end permanently.	Tracey	employed individual
2022-07-11 15:17:35	Western Cape		Yes I do	Solar		Theodore	employed individual
2022-07-11 15:14:26	Western Cape		Yes I do	Solar	I'd be happy for a combination of hydro, solar, wind and renewables to be used. The current dire situation is in no one's interest, it's beyond disgusting and we are all suffering.	Jane	employed individual
2022-07-11 15:11:34	Gauteng		Yes I do	Solar	To me, solar just make more sense, as it is readily available and for free, but if anything else will work better, then use it, as long as we get out of this crisis.	Anton Frederick	employed individual
2022-07-11 15:07:23	Gauteng		Yes I do	Solar	I think power production needs to be diversified, and it needs to be from more renewable energy sources. Nuclear is not the answer.	Michelle	employed individual
2022-07-11 15:00:32	Gauteng		Yes I do	Solar		Henk	employed individual
2022-07-11 14:56:51	Free State		Yes I do	Solar	Encourage solar owners to feed back into the grid without compensation, but they should at least be able to take back some portion of electricity which they take from the grid for free. They should pay for the specific meter that will allow power to be put back into the grid, but runs forward if they use. They should also pay for the installation themselves. In that way you help the grid and also the solar owners. In that way the load from the service providers should be reduced. Also it should be properly be investigated that no politician or their family has no connection to the new power service providers. This service providers should also have strict rules and regulations to follow. Also no Eskom worker who has received all these previous high bonus should be involved in any of these business. The corruption should be stopped to ensure that the less privileged should be getting advantage from these new service providers. Also their management structure should be verified on a frequent basis. Kind regards	Anton	employed individual
2022-07-11 14:55:35	Eastern Cape		Yes I do	Solar		D.	employed individual
2022-07-11 14:52:57	Gauteng		Yes I do	Solar		Robert	employed individual

2022-07-11 14:48:58	Western Cape		Yes I do	Solar	South Africa is sitting with a huge crisis due to corruption and lack of expertise. On top of this is solar installers using the situation to charge private citizens a fortune to install solar systems at their residences. Approvals from City of Cape Town also taking 3 months plus. In end we are suffering without power 2- 3 times a day for 2.5 hours at a time. Government should scrap application process at municipalities and allow solar installations to be tax deductible	Barbara	employed individual
2022-07-11 14:47:33	Gauteng		Yes I do	Solar	South Africa needs to move away from energy sources which are not renewable. We are dependent almost entirely on coal and what happens when coal resources run out. Wind would also be an option in areas where constant wind is experienced.	Sunette	employed individual
2022-07-11 14:46:31	Gauteng		Yes I do	Solar	South Africa is blessed with year round sunshine and this is a technology that has already been proven globally. It's comparatively inexpensive to build and maintain. In addition, there are many South Africans that currently have solar systems installed at their homes that can pump the excess electricity back into the grid, which could alleviate some of the burden right now. Finally there should be no "monopoly" on who can provide electricity to South Africans. Without competition in the market we will always end up in the same situation: High prices for hardly any service. These types of enterprises also need to be private so as to reduce corruption and increase accountability for incorrect decision making.		employed individual
2022-07-11 14:46:04	Western Cape		Yes I do	Solar	Solar is the best option all the other have issues with the enviroment	Margaret	employed individual
2022-07-11 14:42:48	Western Cape		Yes I do	Solar	We need to move to sustainable energy. Both Solar & Wind are suitable for South African climate. We need to consider this as we need to find a long term sustainable solution for the energy needs of the country. Independant suppliers would enable us to move forward and turn around the current electricity crisis.	Aleta	employed individual
2022-07-11 14:42:03	Western Cape		Yes I do	Solar		Christopher	employed individual
2022-07-11 14:39:21	Gauteng		Yes I do	Solar	Most parts of South Africa has a lot sun and I think it is sustainable and easy to maintain.	Joseph	employed individual
2022-07-11 14:38:22	Gauteng		Yes I do	Solar	so many days of sun in South Africa..we should not even think twice about solar energy..it is our future!	Amanda	employed individual
2022-07-11 14:36:20	Gauteng		Yes I do	Solar	Small scale concentrated solar power should be preferred due to fast build time and dispatcahble power	Renato	employed individual
2022-07-11 14:35:46	Gauteng		Yes I do	Solar		Salomé	employed individual
2022-07-11 14:30:40	Gauteng		Yes I do	Solar	Much more sustainable thank charcoal. Solar is environmental friendly. our national electricity problem will not be resolved in the next 10years.	Sonika	employed individual
2022-07-11 14:27:28	Gauteng		Yes I do	Solar	We have a country with amazing power from the sun and this option would be much more sustainable and less harmful to our planet	Erica	employed individual
2022-07-11 14:27:24	Gauteng		Yes I do	Solar	As a country that has access to the sun all year round I would practically say that it's a no brainer solution. The other upsides is that with solar the sun isn't running out or being depleted as the other other energy producing systems that were mentioned are such as oil and coal and the next thing to consider is the cost effectiveness and safety related to this type of energy source.	Stacey- Anne	employed individual
2022-07-11 14:26:15	Western Cape		Yes I do	Solar	Both wind ands solar are in abundance in our country. The trick is going to be how easy they can connect to the existing grid. This requires planning hence the sooner they cut the red tape the sooner the IPS can come online and assist in alleviating the disaster we now have.	Leonardo	employed individual
2022-07-11 14:25:54	Western Cape		Yes I do	Solar	South Africa has huge open spaces, lots of sun which make this a very good source for electricity. the production, installation and maintenance could create new jobs, more people would become trained in this important field and possibly start businesses with solar power production.	Hildegard	employed individual
2022-07-11 14:25:01	KwaZulu- Natal		Yes I do	Solar	We have so much of natural energy sources. Wind, solar and hydro. Why are we still not utilising our resources. Clearly this is all about money. Going this route will rob those who have been looting our coffers for the decades.	Shavani	employed individual
2022-07-11 14:24:31	Western Cape		Yes I do	Solar		N	employed individual
2022-07-11 14:23:56	Gauteng		Yes I do	Solar	We live in a country that has sunshine almost every single day, why cant we use that instead of destroying the environment. Mining leaves the earth in terrible shape, not to mention the costs involved.	Nicole	employed individual
2022-07-11 14:23:22	Mpumal anga		Yes I do	Solar		Belinda	employed individual
2022-07-11 14:22:56	Eastern Cape		Yes I do	Solar	Legislation constraining power generation capacity should be removed, to allow unofficial generators to sell surplus capacity. This would also encourage property investors to install larger, more efficient systems, servicing sections of areas. Local generators could be encouraged to install larger units and re-sell surplus. The focus for eskom should be on implementing power storage technologies across the country and build power balancing systems. Further regional and local generation should be encouraged.	tamas	employed individual
2022-07-11 14:21:01	Western Cape		Yes I do	Solar	Wind, solar and Hydro are good options.	Sharon	employed individual
2022-07-11 14:18:58	Gauteng		Yes I do	Solar	Home solar installations should be encouraged and subsidised. Allow supply back to the grid.	Steve	employed individual

2022-07-11 14:16:49	Western Cape		Yes I do	Solar	Solar is a natural and non destructive form of energy freely produced to be harnessed and used. Subsidise citizens to install solar systems and let us power our homes and sell back into the power grid. It's a win win situation. Deregulate. Please let wisdom prevail and permit our home South Africa to become a regional power supplier with natural solar energy.	MARILYN	employed individual
2022-07-11 14:14:30	Gauteng		Yes I do	Solar		Yvette	employed individual
2022-07-11 14:11:51	KwaZulu- Natal		Yes I do	Solar	It is well known that corruption has brought our power utility to its knees,we need to allow the private sector to get involved in electricity production, with strict oversight by an independent committee, without any political interference.The private sector should be allowed to use whatever method they deem will be profitable to them as well as affordable to the majority. This will again attract foreign investors into the country and allow for job creation and boosting the economy.	CHOOREN	employed individual
2022-07-11 14:09:50	Gauteng		Yes I do	Solar	Lots of sun	CP	employed individual
2022-07-11 14:09:46	Western Cape		Yes I do	Solar	Solar is the quickest solution. However, the cost of solar needs to be regulated. There is a tendency to increase price because of demand. Solar needs to be made affordable to all households. There is still plenty of scope for suppliers and contractors to make profits based purely on the extreme quantity of work that will come in.	Hellene	employed individual
2022-07-11 14:01:33	Western Cape		Yes I do	Solar	It's time to move away from what does not work, and move towards what does. This move is long overdue.	Benita	employed individual
2022-07-11 14:01:10	Gauteng		Yes I do	Solar	Eskom service delivery has deteriorated over the past decades. It seems to be rife with mismanagement, being brought to it's knees by corruption, sabotage and staff who are largely not prepared to do the jobs they are paid to do. Unless we want the country to fall into total collapse, the private sector must be allowed to get involved. Get rid of the red tape that will facilitate this to happen, sooner rather than later and before it is too late for the country and all her people.	Cheryl	employed individual
2022-07-11 13:59:45	Gauteng		Yes I do	Solar		Chantell	employed individual
2022-07-11 13:57:00	KwaZulu- Natal		Yes I do	Solar	Solar, Hydro & Wind Power is available & are immediate solutions for our energy crisis. A combination of these technologies should be considered, as it will harness the power of these technologies in relation to the specific requirements of a area/company/community/geographic location. It will also allow competition to thrive & all energy sources will have advances.	Sundren	employed individual
2022-07-11 13:56:25	Gauteng		Yes I do	Solar		Dassault	employed individual
2022-07-11 13:56:02	KwaZulu- Natal		Yes I do	Solar		Ross	employed individual
2022-07-11 13:51:43	Gauteng		Yes I do	Solar		Angela	employed individual
2022-07-11 13:50:55	Gauteng		Yes I do	Solar	I believe in renewable energy. But I also believe that a mix of renewable and other energy sources is what we need. What is clear is that as a country we need to reduce our reliance on eskom.	Itumeleng	employed individual
2022-07-11 13:50:45	Gauteng		Yes I do	Solar	Rigging up solar panels on the roofs of willing and able houses/living spaces could eliminate the need for additional property allocation, plus, pushing power back into the grid could provide incentives for those households. Nuclear could be a close second; we haven't blown anything up... yet. I also doubt that would happen in the future, since these facilities are almost self managed compared to the ones used at Chernobyl.	Chris	employed individual
2022-07-11 13:49:43	Free State		Yes I do	Solar		Motlatsi	employed individual
2022-07-11 13:48:56	Western Cape		Yes I do	Solar	Solar power should have been looked into years ago. Wind can also be used in the Western Cape also.	Valentino	employed individual
2022-07-11 13:48:28	Western Cape		Yes I do	Solar	Solar is quick to construct and we have plenty of the natural resource required. We can start adding power to the grid within the year. But all types of renewable will be beneficial and hydro could add more baseload power.	Deborah	employed individual
2022-07-11 13:47:44	Gauteng		Yes I do	Solar	Eskom clearly can't deliver energy reliably. Let other companies have a go and help move the country forward or many more smart young minds will leave South Africa.	Shavaugh n	employed individual
2022-07-11 13:46:53	Gauteng		Yes I do	Solar	There are abundant users already who can supply the grid we near clean green energy	Roland	employed individual
2022-07-11 13:42:07	Gauteng		Yes I do	Solar	Nuclear should be the long-term goal, but solar would suit the immediate needs. No one supplier should have the monopoly on energy supply. We've seen all too starkly what chaos this can cause.	Beverley	employed individual
2022-07-11 13:41:34	Gauteng		Yes I do	Solar		Son	employed individual
2022-07-11 13:41:11	Gauteng		Yes I do	Solar	Solar combined with big battery storage. Wind in Gauteng will not work. Metro Councils should allow people that have solar installations to LEGALY push excess power to the grid.	Willem Heinrich	employed individual
2022-07-11 13:40:31	Western Cape		Yes I do	Solar	Solar can be an immediate answer since we have Sun for most of the year. Wind can also be an option but its not as regular. Use our natural elements to power our electricity	Antoinette	employed individual
2022-07-11 13:39:38	KwaZulu- Natal		Yes I do	Solar		Leo	employed individual

2022-07-11 13:36:51	Gauteng		Yes I do	Solar	South African is a sunny country, and it really is a shame that we haven't started using solar energy on a large scale already. I also believe wind energy will be a great option in some areas. Use what God is giving us everyday.	Amorie	employed individual
2022-07-11 13:32:46	Free State		Yes I do	Solar		Gideon	employed individual
2022-07-11 13:31:38	Gauteng		Yes I do	Solar	THE SUN SHINES ON AVERAGE FOR MORE THAN 310 DAYS IN THIS COUNTRY.	NEIL	employed individual
2022-07-11 13:28:48	Gauteng		Yes I do	Solar		Wanda	employed individual
2022-07-11 13:28:23	Western Cape		Yes I do	Solar	<p>Firstly, I would include wind especially in my region.</p> <p>The reason for giving this as an immediate solution is because it is extremely quick and easy to setup and implement compared to building another coal or nuclear massive power station. Also this would distribute the powers at work much better which in return would lessen the risk of more incompetency and corruption that has become synonym with the ANC, Eskom, Transnet, etc.</p> <p>Also individuals who generate more energy than what they consume should be paid per kilowatt that they generate, but it should be a reasonable fixed rate. Municipalities should also have a free choice to use any alternative electricity provider. If anything Eskom might be able to earn a reasonable rental income from their infrastructure if it is used.</p>	Willem	employed individual
2022-07-11 13:27:00	Gauteng		Yes I do	Solar	<p>Whilst I selected Solar, a combination of green alternatives should be considered to solve our energy crisis. South Africa has access to piped gas from Mozambique, plenty of sun large parts of the northern Cape, etc. We just need to start somewhere and make it accessible for any role player to solve the problem.</p> <p>Government should force all role players (in local / provincial and national government departments) to enable any producer (from residential to large scale operations) to push surplus generation into the grid.</p> <p>For example, in Tshwane, a user need to register and pay R160/month for a special bi-directional meter. Surplus generation is purchased at 11.5c/kwh and resell this again to other residents with a 1600% markup. A normal resident cannot produce sufficient power to cover the R160/month, and therefore will not opt to push into the grid.</p> <p>Given the economic impact of loadshedding, these prohibiting policies should be scrapped with immediate effect and ALL users should be enabled to solve the energy crisis. We can no longer afford to be short sighted.</p>	Wynand	employed individual
2022-07-11 13:26:19	Gauteng		Yes I do	Solar	It makes sense to use methods that will be beneficial in the long term thereby avoiding future crisis	Arran	employed individual
2022-07-11 13:19:22	Gauteng		Yes I do	Solar		Joseph	employed individual
2022-07-11 13:18:40	Eastern Cape		Yes I do	Solar	Living in sunny SA, if independent power producers could install more solar powered plants, the entire SA will have more than enough electricity. We have the resources. Let's use them.	Danelle	employed individual
2022-07-11 13:17:28	Eastern Cape		Yes I do	Solar	Solar is the way to go	Jerry	employed individual
2022-07-11 13:16:37	Gauteng		Yes I do	Solar	We are tired of having to pay for something we do not receive and for our month bill to be exactly the same when we have loadshedding for half the day!	Lana	employed individual
2022-07-11 13:16:15	Western Cape		Yes I do	Solar		Phillip	employed individual
2022-07-11 13:15:30	Free State		Yes I do	Solar		Aletta	employed individual
2022-07-11 13:14:44	Gauteng		Yes I do	Solar	<p>solar and wind will be the way to go.</p> <p>these are natural sources, and have little to no impact on the environment. we already have this in place in numerous areas in the country, this just needs to be fed into the power grid.</p> <p>this has been halted at Gov level, as these are pvt entities and the Gov cannot use them as their cash cows.</p>	Anton	employed individual
2022-07-11 13:14:16	Gauteng		Yes I do	Solar	All alternatives should be explored and implemented immediately without the obstruction of those in power	coralie	employed individual
2022-07-11 13:11:49	Western Cape		Yes I do	Solar		Caro	employed individual
2022-07-11 13:06:58	Gauteng		Yes I do	Solar	Significant subsidies for both solar geyser manufacturing and installation and photovoltaic home solar manufacturing and installation would not only immediately help reduce demand, but it would also create thousands of jobs and grow a sustainable industry.	Matthew	employed individual
2022-07-11 13:04:08	Gauteng		Yes I do	Solar		Victor	employed individual
2022-07-11 12:58:15	Western Cape		Yes I do	Solar	To make solar and wind more viable the introduction of battery storage is critical.	Nicolaas	employed individual
2022-07-11 12:57:09	Western Cape		Yes I do	Solar	At this point I don't really care what the solution is Solar, Coal, Gas whatever but something needs to be done	Gareth	employed individual

2022-07-11 12:55:50	Gauteng		Yes I do	Solar	Eskom have had the monopoly for too long and have proven time and again that they cannot fix the numerous problems from within their own house. South Africans have had to bear the brunt of their recklessness as well as the rising costs which Eskom demand year-on-year to fix the problems but which, to date, have yet been done. South Africa, being fortunate enough to have year-round sunshine should take advantage of it's sunny skies and allow South African's affordable and sustainable solar alternatives without the recourse of penalties for not using the government electricity provider who actually cannot provide electricity to it's tax payers.	Janine	employed individual
2022-07-11 12:55:26	Gauteng		Yes I do	Solar		Andre	employed individual
2022-07-11 12:54:09	Western Cape		Yes I do	Solar	Escom has proved they cant supply sufficient electricity. Experts, in consultation with Escom/Government must decide how private companies can join the power grid as easily / fast as practical.	Lawrence	employed individual
2022-07-11 12:53:33	Gauteng		Yes I do	Solar	If Eskom cannot provide contant power then alternatives should be allowed.	Daryl	employed individual
2022-07-11 12:52:11	Gauteng		Yes I do	Solar		Steve	employed individual
2022-07-11 12:52:07	Western Cape		Yes I do	Solar		Kobus	employed individual
2022-07-11 12:49:51	Gauteng		Yes I do	Solar		David	employed individual
2022-07-11 12:47:33	Gauteng		Yes I do	Solar	Coal and diesel are too expensive due to the sanctions against Russia. Wind and solar need infrastructure but can be subsidised or companies/ individuals making the investment can receive tax rebates	Zelna	employed individual
2022-07-11 12:45:39	Gauteng		Yes I do	Solar	Eskom has clearly lost control of the situation. It would be ideal to replace the people running Eskom with competent and honest people who can turn that enterprise around. In the interim we might have no choice but to allow private suppliers. We should also free Eskom from government control and politics and let them concentrate on what they are supposed to do, that is providing electricity to South Africa. I do not think that wind and solar are the way to go because of their enormous space requirements and their volatile output, which is difficult to manage. That being said they can still be selectively employed in the private sector as supplementary power sources. The best way to go is still with conventional power stations and constantly working towards reducing their emissions. Nuclear power is tricky because of the dangerous radioactive waste. The provision of nuclear power must go hand in hand with the safe handling and storage of nuclear waste. Nuclear power can only be chosen selectively when strict conditions regarding environmental safety are being met.	Tilanie	employed individual
2022-07-11 12:43:42	Free State		Yes I do	Solar	Solar power is the way forward. If I could have chosen wind power also, that would be my second choice. In regards to solar power, there is no shortage of sun and space to erect solar panels in South Africa. If we for example put the whole of the Northern Cape under solar panels we will never have an electricity crisis again.	Hanneri	employed individual
2022-07-11 12:41:43	Gauteng		Yes I do	Solar	Alternative power is the future world-wide and in South Africa we won't move forward or upward without stable electricity. Independent Power Producers may be the only way to explore alternative, cleaner options and to ensure we are not falling behind.	Elsa	employed individual
2022-07-11 12:38:48	Gauteng		Yes I do	Solar	My answer would be a combination of multiple modes of electricity production, coal power for now, however we need to bring wind and solar online to support our coal power generating plants and thereafter we can look at generating electricity from our coastline meaning electricity generated from wave power and also building nuclear power stations when we have the money to do so in the future.	Rajee	employed individual
2022-07-11 12:37:00	Western Cape		Yes I do	Solar		Kate	employed individual
2022-07-11 12:36:39	Free State		Yes I do	Solar		Jan	employed individual
2022-07-11 12:34:58	Outside SA	Germany	Yes I do	Solar		Lussna	employed individual
2022-07-11 12:34:45	Gauteng		Yes I do	Solar	We have the perfect country to use solar for generating electricity and should be making use of this to enable us more affordable electricity as well as help the planet by not using so much coal.	Susan	employed individual
2022-07-11 12:31:19	Western Cape		Yes I do	Solar		Martine	employed individual
2022-07-11 12:30:53	Gauteng		Yes I do	Solar	no more load shedding	mark	employed individual
2022-07-11 12:28:41	Gauteng		Yes I do	Solar	Solar and wind We have a lot of land that can be used for this purpose	Janine	employed individual
2022-07-11 12:27:41	Western Cape		Yes I do	Solar		ELLA-MARIE	employed individual
2022-07-11 12:27:25	Gauteng		Yes I do	Solar		Mike	employed individual

2022-07-11 12:26:51	Gauteng		Yes I do	Solar		Andre	employed individual
2022-07-11 12:25:31	Western Cape		Yes I do	Solar	The energy sector in South Africa should be de-regulated immediately. Private power producers to be incentivised to leverage our abundant natural resources to focus on solar and gas in the short term, and hydro and nuclear in the long term. We also need to incentivise rooftop solar, and turn our sunny neighbourhoods in power generators instead of just power consumers. SOEs like Eskom don't work and have been proven not to work in multiple countries. Private sector generation is the only way forward and will also drive economic growth and create jobs (why would the government not want to create jobs?). If Eskom's debt cannot be sustained, privatise it. It's the only logical conclusion for an organisation mired in such corruption, poor planning and incompetence. Amend the relevant legislation without delay.	John	employed individual
2022-07-11 12:21:24	Gauteng		Yes I do	Solar	We need to allow IPP to supply us with power as soon as possible before this country collapses completely. Eskom needs help with power!!	Pam	employed individual
2022-07-11 12:20:21	Gauteng		Yes I do	Solar	Legislation needs to be updated to fulfill the needs of its people. Legislation / Gover should allow individual to sell to the grid and alleviate the strain. Subsidise individual household to install solar systems o at least solar geysers, like most countries.	Zuni	employed individual
2022-07-11 12:18:46	Gauteng		Yes I do	Solar	We have more than enough sun to be able to farm sun power far more effectively.	Dewan	employed individual
2022-07-11 12:17:44	Gauteng		Yes I do	Solar		ALISON	employed individual
2022-07-11 12:17:30	Gauteng		Yes I do	Solar	South Africa is in a crisis and there is no more time to play delaying tactics. For us to survive as a country we need to have alternative power producers as soon as possible.	Marthie	employed individual
2022-07-11 12:16:36	Gauteng		Yes I do	Solar		Andra	employed individual
2022-07-11 12:15:02	Gauteng		Yes I do	Solar		Lynda	employed individual
2022-07-11 12:14:52	Gauteng		Yes I do	Solar	We are in desperate need of electricity through private supply. For immediate supply solar might work and for long term, wind.	Antoinette	employed individual
2022-07-11 12:13:32	KwaZulu-Natal		Yes I do	Solar		Bonga	employed individual
2022-07-11 12:13:09	Gauteng		Yes I do	Solar		Naomo	employed individual
2022-07-11 12:11:38	Gauteng		Yes I do	Solar		Rudi	employed individual
2022-07-11 12:06:01	Western Cape		Yes I do	Solar	We live in SUNny SA for a reason. If the supplier can't meet the demands, we need more suppliers	Megan	employed individual
2022-07-11 12:04:00	Gauteng		Yes I do	Solar	Although Solar power is from the sun to store and distribute the power has become quiet expensive. But once the initial installation has been completed the recoup of costs can begin due to the sustainability of the power source. South Africa is not called "Sunny: for no reason. Therefore Solar power once installed will ease the power situation. There are many ways that also can ease the situation for instance water and wind once the area has undergone a feasibility study to determine which source will be the best for instance the flat open ground of the Free state is perfect for Wind farms, and cities situated close to the ocean could utilise the water from the ocean to generate power. There is absolutely no reason that ESKOM should have as much control as they do and then they abuse it.	Vivien	employed individual
2022-07-11 12:01:25	KwaZulu-Natal		Yes I do	Solar		Helene	employed individual
2022-07-11 12:00:46	Gauteng		Yes I do	Solar		Susan	employed individual
2022-07-11 11:58:16	Gauteng		Yes I do	Solar	I am not for one specific method of electricity, but a combination of a few. Each method has advantages and disadvantages which need to be considered when deciding best course of action. What I do stand for is the end to the monopoly that Eskom has over electricity supply in this country. Once that monopoly is gone, and they start competing with private companies, they'll be forced to improve (governance, services, etc) or shut down.	NOSIPHO	employed individual
2022-07-11 11:57:36	Free State		Yes I do	Solar	Enige en alle ander maniere van elektrisiteit opwek sal 'n plus wees. Ons kan nie langer so aan gaan nie. Die krisis is besig om ons land se ekonomie tot stilstand te bring en alle pryse bly net styg en die armes word net nog armer met al die prysverhogings. Wie gaan opeindig om vir hulle te sorg,...die goeverment en waar kry die goeverment die geld,...weer by die arme mense wat moet opdok met belasting en nog armer word. Vieslike sirkel. Dan word diefstal en moord en korupsie net nog meer. Waar gaan dit eindig?	Vivian	employed individual

2022-07-11 11:57:10	Gauteng		Yes I do	Solar	A renewable solution is definitely the way forward as the environmental impact of governmental decision-making can no longer be ignored, and solar is an excellent option for sunny South Africa. It must be coupled with an adequate energy storage solution for less sunny seasons and weather and can certainly be augmented by other renewable solutions to chip in and keep a constant power input available to the grid.	Cheryl	employed individual
2022-07-11 11:50:14	KwaZulu-Natal		Yes I do	Solar		Rodney	employed individual
2022-07-11 11:48:07	Western Cape		Yes I do	Solar		Caylynne	employed individual
2022-07-11 11:44:47	Gauteng		Yes I do	Solar	South African government needs to solve this asap. We are done with always paying the price for poor managed entities	Tiaan	employed individual
2022-07-11 11:44:08	Western Cape		Yes I do	Solar	Solar wind and hydro and other renewables should be opened up to private producers in order to allow them to step in and fix the problem caused over many years by an incompetent and corrupt government. Private companies are kept honest by competition whilst the government gets fat and sits pretty giving the people no other option	Nic	employed individual
2022-07-11 11:43:49	Gauteng		Yes I do	Solar		Hanlie	employed individual
2022-07-11 11:43:00	Western Cape		Yes I do	Solar	Solar Panels can be installed on all the buildings also to generate power.	Herman	employed individual
2022-07-11 11:42:26	Gauteng		Yes I do	Solar	Wind, hydro, nuclear and solar are all good alternatives to coal which omits carbon. They are more cost effective and do little harm to the environment	Dawid	employed individual
2022-07-11 11:40:36	North West		Yes I do	Solar		Cecilia	employed individual
2022-07-11 11:39:14	Gauteng		Yes I do	Solar	Sustainable power as well as adhere to the carbon footprint.	Conley	employed individual
2022-07-11 11:38:46	Gauteng		Yes I do	Solar		Kylie	employed individual
2022-07-11 11:37:32	Gauteng		Yes I do	Solar	I think government should remove red tape so private citizens could find suitable solutions to this power issue. Government through Eskom is clearly failing dismally.	Trevor	employed individual
2022-07-11 11:36:16	Western Cape		Yes I do	Solar		Sharn	employed individual
2022-07-11 11:34:38	KwaZulu-Natal		Yes I do	Solar	Please include hydro, wind and any other option which would be applicable and viable. We also need to ensure that this will be beyond corruption and that we, the people get the services we pay for.	Verushka	employed individual
2022-07-11 11:34:17	Gauteng		Yes I do	Solar	We have an abundance of natural renewable energy sources. Life is being turned upside down and productivity wasted due to the ongoing electricity supply issues.	Edwin	employed individual
2022-07-11 11:33:45	Gauteng		Yes I do	Solar	An incentive could be offered to private home owners and sectional titled homes to install Solar powered at a reasonable discount. This should sort out the huge short term supply needs for Eskom. Once a certain percentage of home owners have moved on to Solar supply a REASONABLE tax can be imposed on these home and the funds raised from these taxes to be used to bring Eskom back into the "black", as well as to assist the poorer communities to catch up on their arrears and help pay for the little power they use as compared to what the "Middle and upper classes use". This is not the perfect system, but I feel confident that it will go a long way to assist in the needs of electrical power needs in SA. This should be used in conjunction with other short term solutions.	Dario	employed individual
2022-07-11 11:32:50	Western Cape		Yes I do	Solar		Catharina	employed individual
2022-07-11 11:31:52	North West		Yes I do	Solar	I work at a mill, so besides the point that loadshedding is killing our economy. Loadshedding is causing people to go hungry. We simply can't meet demand with the few hours we can work. We can't keep up like this, every time the power comes on something has broken.	Lizel	employed individual
2022-07-11 11:30:05	Outside SA	Namibia	Yes I do	Solar	Solar combined with supporting production eg wind, hydro	Manda	employed individual
2022-07-11 11:28:31	Western Cape		Yes I do	Solar		Tritia	employed individual
2022-07-11 11:27:48	Gauteng		Yes I do	Solar	Stop the monopoly on power supply, the state do not have the ability to governing the country.	Francois	employed individual
2022-07-11 11:27:36	Western Cape		Yes I do	Solar	At this point, any alternative source is critical.	Barbara	employed individual
2022-07-11 11:27:02	Western Cape		Yes I do	Solar	Any and all appropriate types of Electricity generation should be used.	Grant	employed individual
2022-07-11 11:26:23	Gauteng		Yes I do	Solar	This government has shown that they are not capable of running anything. They should therefore make way for companies that can deliver. The less government is involved, the better off the country will be. If government subsidises solar and there are panels on most roofs and in the arid regions of the country then there will be an excess of power for the country. Solar is too expensive for individuals to afford. The more widespread it becomes the cheaper it will become.	Lyle	employed individual
2022-07-11 11:22:32	Gauteng		Yes I do	Solar	We need to use a sustainable environmentally safe energy production method, and solar energy is free except for the once-off expense of purchasing the equipment and then maintaining the solar panels. This should have been done YEARS ago and it's unacceptable that South Africans have to pay the price for the ANC's failings.	Christelle	employed individual

2022-07-11 11:20:59	Gauteng		Yes I do	Solar	1. End theft and corruption within ESKOM now. 2. Both Solar and Wind Turbine solutions are used worldwide to augment coal and/or nuclear systems with great success. Both are "green" and sustainable sources.	Etienne	employed individual
2022-07-11 11:17:47	Eastern Cape		Yes I do	Solar	Fully support solar energy. We can't rely on Eskom anymore. As we currently stand people are losing their livelihoods because businesses are relying on petrols generators which adds to already high overheads.	Luthando	employed individual
2022-07-11 11:15:36	Western Cape		Yes I do	Solar		Craig William	employed individual
2022-07-11 11:14:57	North West		Yes I do	Solar		Pierre	employed individual
2022-07-11 11:11:40	Gauteng		Yes I do	Solar	We have plenty of sun so lets use this natural asset.	Leigh-Ann	employed individual
2022-07-11 11:11:30	KwaZulu-Natal		Yes I do	Solar		John	employed individual
2022-07-11 11:10:22	Western Cape		Yes I do	Solar		Marcel	employed individual
2022-07-11 11:09:41	Gauteng		Yes I do	Solar	We have a thriving renewable energy sector which could work well to alleviate some of the power pressures we currently face. This would also drastically reduce our carbon footprint. We have a good climate to justify solar energy, however I think we need to seriously consider Hydro and Wind energy in conjunction with Solar. This would create a huge amount of jobs which is in desperate need. The more alternative sources of energy, the better, for citizens of the country, the economy and the foreign investment outlook.	Justine	employed individual
2022-07-11 11:08:21	Gauteng		Yes I do	Solar	Solar is a less costly alternative	Lavi	employed individual
2022-07-11 11:03:24	Gauteng		Yes I do	Solar	SA urgently needs IPPs to provide electricity as Eskom has failed dismally. The Energy Regulator, NERSA, which is supposed to protect the SA public and govt, fails dismally in its duty, as it is in bed with Eskom! Decisions are made prior to the public hearings being held and they don't care about what the public says! This is illegal ito the constitutive act of NERSA! Eskom is holding SA hostage to increase the electricity tariff, while the management of Eskom steals this country blind! Our economy is faltering due to Eskom! How can neighbouring countries be supplied with electricity produced in SA with our resources, at a cheaper rate than we pay and with no power disruptions! THIS IS UNACCEPTABLE AND CANNOT BE ALLOWED TO CONTINUE!!!	Jacqueline	employed individual
2022-07-11 11:02:46	Gauteng		Yes I do	Solar	We need to cut the policy red tape for Independent power producers to ensure that Eskom has a run for their money and that we can get reliable electricity. I choose solar because we have the most sunshine in the whole world! and in the Western Cape - use Wind.	Martin	employed individual

2022-07-11 10:58:48	Gauteng		Yes I do	Solar	I think we should be looking at Solar or wind production as they are more ecofriendly and we have Sunshine and Wind in abundance so it would make more sense	charles	employed individual
2022-07-11 10:58:11	Western Cape		Yes I do	Solar	This would appear to be the quickest to bring online, even feeding excess domestic/household production into the grid. Solar is becoming more and more efficient. We should also investigate heated sand technology as currently being explored in Iceland. Even cheaper and quicker to implement.	Mark	employed individual
2022-07-11 10:55:13	Western Cape		Yes I do	Solar	It is my opinion that relevant types of electricity production should be appropriate to the region's climate and conditions. This should be considered when deciding on the method of electricity production.	Mandy	employed individual

2022-07-11 10:54:36	Gauteng	Yes I do	Solar	<p>Firstly, I would suggest scrapping any intention of taxing the private household installation and use of solar panels (or other safe and sustainable personal power solutions). I do not believe that existing infrastructure justifies charging individuals for the installations of personal utilities, especially when considering that government utilities are generally not delivering on their services. Self-sufficiency is becoming more of a necessity for the common household.</p> <p>Secondly, solar energy is free for all, and should remain that way. If a household can afford to harness the solar energy for electrical power, then good for you. South Africa has an abundance of solar energy to be harnessed for the benefit of its citizens. I will however acknowledge that solar panels do come with their own costs and disadvantages (cost, maintenance, resources etc). I would then advocate wind, hydro and or nuclear energy as second alternatives, all with their unique pros and cons; however, all more beneficial and sustainable when compared to coal, diesel and gas. I would also advocate for the limiting of imports. I am not an economist, and I do believe that trade does bring value; however, the less we need to source from other countries the more self-sustainable we become. Independent power providers will also create a competitive market that helps to keep the cost of electrical power affordable while helping to encourage competitive service. Like most businesses, good service drives better business. Eskom should therefore be held to the same principles, and not be allowed to have a monopoly simply because they are state run and owned.</p>	Timothy	employed individual
2022-07-11 10:51:53	Western Cape	Yes I do	Solar	It is time to invest in green energy and offer new opportunities to entrepreneurs in South Africa	BYRON	employed individual

2022-07-11 10:27:06	Western Cape	Yes I do	Solar		Rudolf	employed individual
2022-07-11 10:26:26	KwaZulu-Natal	Yes I do	Solar	I am open to a multi-pronged approach to dealing with the current energy crisis, utilising hybrid methods for energy generation, with a focus (where possible) on regenerative resources such as solar. I think that by enabling independent providers to assist in lifting the country out of the current situation, we empower innovative thought and a new opportunity for partnership between government, community and private enterprise, for the betterment of our nation.	Carolyn	employed individual
2022-07-11 10:25:53	Limpopo	Yes I do	Solar	Die gebrek aan stabiele elektrisiteit is 'n noodgeval en moet as een hanteer word. Ons land is geseën met baie ure se sonlig en ons geniet langer dagligtyd as baie lande in die wêreld. Hierdie gratis energiebron moet gebruik word. Ons land se steenkool gaan nie vir altyd hou nie, dus gaan daar ieder geval na nuwe tegnologie gekyk moet word vir opwekking van krag wanneer die steenkoolbronne uitgeput is. Laat grootmaat opwekking deur private maatskappye toe, verskaf kontrakte vir 50+ jaar. Laat internasionale spelers toe, moenie B-BBEE afdwing nie. Subsidieer sonenergie - insluitend warmwater sonkrag, subsidieer off-grid en semi-off-grid installasies (verminder konneksie krag uitset breker / lont by die eindgebruiker - maw van 15 kW tot 3 kW, verminder energie prys vir lae volume verbruikers). Laat privatisering op groot skaal toe, en dwing ESKOM in 'n mededingende mark in. Ondersteun nie-omgewingskadelike maniere om elektrisiteit op te wek. Eskom kan duidelik nie meer die nodige krag aan ons land lewer nie, en dit is noodsaaklik dat ons alternatiewe vind en verseker dat nuwe verskaffers aan die netwerk nie deur burokrasie lamgelê word nie. Ons moet, in ons soeke na beter, meer betroubare energie, ook die impak op die omgewing in ag neem.	Karin	employed individual
2022-07-11 10:25:31	Gauteng	Yes I do	Solar		Charmaine	employed individual
2022-07-11 10:22:15	Western Cape	Yes I do	Solar	In SA we have beautiful loooong summers & loads of sunshine!! Those that right now cannot afford a solar system, can rent solar. We have South African's thinking out the box and have solutions! But oh boy, let them do what they need to do! STOP trying to control everything! It WILL lead to a revolt, mark my words.	Sharon	employed individual
2022-07-11 10:16:19	Gauteng	Yes I do	Solar	Yes I do agree! Most definitely without a question. The question here should not even be if, but , should or can we. The infrastructure at Eskom is falling apart due to no maintenance and long term corruption it has endured, this has a huge affect on our already super drained economy and the bottom line according to the media is that a possible blackout is constantly looming so there is no question about an alternative solution, ideally before this happens. If that means using independant power producers then so be it. As a country we need to keep the lights on for our livelihood. We need to move forward guys, not backwards as we have been at a heck of a rate. Common sense I would think, from a government perspective who should have already placed this in action long ago, instead of feeding a bottomless pit with taxpayers hard earned money. I'm no expert but solar, in my opinion, would be the most obvious and long term cost effective option with our climate but hydro and wind, if feasible would also be great options. A combination of all three wherever possible might also be beneficial depending on the area. Solar, hydro or wind MINUS the corruption this time would be great, cost effective options, compared to our current situation.	Charmaine	employed individual
2022-07-11 10:13:37	Gauteng	Yes I do	Solar	We have plenty sunny days in SA and all house holds can benefit from solar energy which is also less polution and more electricity with natural sources given by God to us.	Mathilda	employed individual
2022-07-11 10:11:36	KwaZulu-Natal	Yes I do	Solar	ANC is not capable of the simplest national requirement : - Racism - removing employees on the basis of colour , not competence , is the first mistake (Would you trust the ANC with upliftment ?) - " The Party " and disproven philosophies - read Solzinethsyn or " Animal Farm " - while the country's people suffer . - Gullibility and STUPIDITY of South African voters - almost self inflicted . The answer to power supply - and all other woes : REGIME CHANGE	Ian	employed individual

2022-07-11 10:10:43	Gauteng		Yes I do	Solar	We are a country blessed with many hours of sunlight and enjoy longer daylight time than many countries in the world. Harvest this free energy source. In the short to medium term, while putting the necessary infrastructure in place, buy from those that can already offer power to the Grid.	Ros	employed individual

2022-07-11 10:10:04	Gauteng		Yes I do	Solar	Nuclear and coal should be phased out. All other non environmentally damaging ways of generating electricity should be supported, by all means possible.	Helga	employed individual
2022-07-11 10:09:03	Gauteng		Yes I do	Solar	Our country cannot continue being crippled by an ineffective and unreliable power utility. If Eskom can no longer deliver the required power to the nation, it is imperative that we find alternatives and ensure new suppliers to the grid are not crippled by bureaucracy. It seems logical that, in our search for better, more reliable energy, we also consider the impact to the environment. Let us focus on cleaner, greener sources of power that can assist in stabilising the grid and keeping South Africa lit.	Nicole	employed individual
2022-07-11 10:02:31	Gauteng		Yes I do	Solar	Scrap the red tape yes, but please put somebody in charge who has no long fingers	Sebastian	employed individual
2022-07-11 10:00:39	Gauteng		Yes I do	Solar		Laura	employed individual
2022-07-11 09:59:16	KwaZulu-Natal		Yes I do	Solar	Eskom and government have proven time and again their inability to supply power reliably to the country	Shane	employed individual
2022-07-11 09:59:13	Gauteng		Yes I do	Solar	If Eskom cannot be privatized, then solar is the way to go.	Zulmira (Maxi)	employed individual
2022-07-11 09:59:10	Gauteng		Yes I do	Solar	Solar: South Africa has an abundance of sun and undeveloped land. With the speed at which solar installations can be completed, it really should be the obvious answer. Even without the energy storage component (batteries, etc.), having extra capacity to mitigate load-shedding during daylight hours will go a long way toward push starting the limping economy. Other green options should also be investigated for long term solutions; hydro, wind, etc.. We really don't need more pollution sources such as coal power plants, the air quality and greenhouse effect is bad already.	Gavin	employed individual
2022-07-11 09:57:59	Western Cape		Yes I do	Solar		Yvette	employed individual
2022-07-11 09:57:04	Western Cape		Yes I do	Solar	This is absurd like what country in the 20th century still experiences loadshedding? It is really absurd. Explains why so many SA's are moving to other countries for a better opportunity in life.	Nicole	employed individual
2022-07-11 09:55:56	Gauteng		Yes I do	Solar	This Red Tape nonsense has gone on to long. We could have been a long way down this road already if the leaders were forward thinking. Solar to my thinking is the quickest way to feed into the grid. Offer rebates to encourage homes to participate.	Mike	employed individual
2022-07-11 09:55:26	Western Cape		Yes I do	Solar	Looking at a scalable and viable quick solution the answer has to be solar. The best way to beat load-shedding would be to scrap tax on the component used in solar systems and give financial assistance to anybody wanting to put solar systems on their houses. Eskom needs to diversify and move from a consumable energy source to a renewable one. We have ample sunlight and wind and tidal power.	Daryn	employed individual
2022-07-11 09:55:12	Western Cape		Yes I do	Solar	South Africa is a diverse land and has many different choices of how to get power. Government should subsidise households which want to implement solar power. The surplus power produced by these homes could be sold back to the grid to have supply in winter.	Cyrlene	employed individual
2022-07-11 09:53:37	Western Cape		Yes I do	Solar	Solar, wind and hydro can immediately be introduced. If they already exist and are functional, that should be supplied and we should be able to buy directly from them and if that is not possible, at least put it in the Eskom grid, however, I really think separate private power supplies should also be put in place so one can have an option who to choose to put competition in place. A monopoly is what the problem is right now. If Eskom is not able to produce, then those who want to not use them, would be able to choose another supplied other than Eskom.	Hanneke	employed individual
2022-07-11 09:51:43	Gauteng		Yes I do	Solar	Please can we find a solution that does not include any form of corruption.	Estelle	employed individual
2022-07-11 09:49:50	Western Cape		Yes I do	Solar		Sven	employed individual
2022-07-11 09:49:13	Gauteng		Yes I do	Solar	Time for change	Ellen	employed individual
2022-07-11 09:48:49	KwaZulu-Natal		Yes I do	Solar	There is absolutely a solution to South Africa's current power problems and that lies with the private sector. It is silly to prevent those solutions from happening because of some political red tape. Between solar, wind, hydro and other forms of renewable energy, there is huge potential for long term energy solutions for this country.	Faye	employed individual
2022-07-11 09:46:20	Western Cape		Yes I do	Solar	Please scrap policy to save the economy. We need private help to substitute the failing Eskom. Inflation is creeping up quickly and we wont be able to sustain both loadshedding costs and challenges of the increasing signs of the recession which can quickly turn into a depression.	Jacques	employed individual
2022-07-11 09:45:08	Western Cape		Yes I do	Solar	It is time to get off the grid	Madeleine	employed individual

2022-07-11 09:44:10	Gauteng	Yes I do	Solar	<p>Firstly - the current Eskom rogues are not only load shedding us daily but they and their equally guilty counterparts, City of Joburg municipality are now also enforcing an undue tariff increase.</p> <p>With all the load shedding that is forced upon us, our own bill has now doubled!!</p> <p>Eskom is unable to keep up with demands. They have had the monopoly all the time and not a reliable, capable and competent supplier.</p> <p>It is imperative, for the lifeline of our economy to survive, that we have an IMMEDIATE resolve to the scarce reliable supply of electricity.</p> <p>Independent Power Producers (IPP) is a MUST.</p> <p>Eskom has proven their unreliability.</p> <p>Instead of trying to flog a dead horse, allow IPPs to provide electricity at a cheaper cost.</p> <p>As a tax paying SA citizen, I demand that Eskom be given notice and the Parliamentary ministers who have failed this country in regards to this SOE, be made accountable too.</p> <p>There is therefore an urgent need for an immediate legislation amendment in favor of IPPs.</p> <p>Our country has the means to supply electricity using hydro on our coasts (as is being done in Cape Town); gas; solar and wind... The ability to use all of these are possible. And the ability to do so at the most affordable price is definitely not out of reach!!!</p>	PATRICK	employed individual
2022-07-11 09:42:43	Western Cape	Yes I do	Solar		Belinda	employed individual
2022-07-11 09:40:39	Western Cape	Yes I do	Solar	South Africa has abundant sunshine and the space to instal solar panels on a large scale. A privately run system would be better managed and profitable.	Elisabeth	employed individual
2022-07-11 09:40:35	KwaZulu-Natal	Yes I do	Solar	I don't know enough about electricity production to know which one is best, I just know we have an abundance of solar energy and it might be the quickest to get started with in a crisis. South Africa has an energy crisis and it's going to speed up a total economic collapse if we don't do something quickly.	Melanie	employed individual
2022-07-11 09:39:30	Gauteng	Yes I do	Solar	Hurry up and listen to the experts who know what is best for our country to be economically successful. Put the interests of the people of SA first! You are paid to SERVE our nation and not LOOT your citizens as is clearly the case at ESKOM and the rest of the SOE's.	Linda M	employed individual
2022-07-11 09:39:19	Gauteng	Yes I do	Solar	Solar is maar die antwoord. Oral sien ek al meer hoe solar ons land se gat red. Ons gaan nie gou van loadshedding ontslae raak nie so maak n plan en gaan net solar!	Annette	employed individual
2022-07-11 09:38:47	KwaZulu-Natal	Yes I do	Solar		Saleem	employed individual
2022-07-11 09:38:07	Gauteng	Yes I do	Solar	Every household should be able to produce their own power. Eskom are beyond broken and we are all suffering because of greedy corrupt idiots who are milking our beautiful country dry. No only should we all be off grid - but the government should be subsidizing every one of us to get there.	Elsa	employed individual
2022-07-11 09:37:53	Western Cape	Yes I do	Solar	We need to explore alternative solutions. Relying on Government thus far is only succeeding in crippling our economy, and causing slow a slow death to our SME's. If our state owned enterprises are incapable (which they have proven they are) it's time to invite other players into the industry, who will get the shop done.	Tess	employed individual
2022-07-11 09:37:15	Western Cape	Yes I do	Solar		Elaine	employed individual
2022-07-11 09:37:10	Gauteng	Yes I do	Solar		Laurette	employed individual
2022-07-11 09:36:47	Gauteng	Yes I do	Solar	The solar option was the first one that came to mind. The wind option is equally important (at the top of my options) as there are regions of South Africa that have intense wind (Eastern and Western Cape provinces), and the vast coast line of South Africa is also a source for wind generated energy.	Anselmo	employed individual
2022-07-11 09:36:17	Western Cape	Yes I do	Solar	I mean by now it should be obvious that we have a power problem. Let people put Solar on their houses and businesses with minimal red tape. In fact, why not subsidize it like they did with solar geysers and heat pumps? Let independent power producers sync up to the grid and push whatever they have into the system. Our country has an abundance of sun, especially in arid areas where there is PLENTY of unused space. While we're at it, why not scrap any sort of tax on electric vehicles? A few simple policy changes can have a massive impact on the country and the economy if people would stop clinging to their red tape. Kom nou mense!	Renier	employed individual
2022-07-11 09:36:06	Western Cape	Yes I do	Solar		Deon	employed individual
2022-07-11 09:34:51	Gauteng	Yes I do	Solar	Eskom is finished. Bring in something else that works. Forget the employment for family members and cronies who know nothing about the business and are incapable of learning. Eskom is/has destroyed the economy.	Avril	employed individual
2022-07-11 09:34:43	Gauteng	Yes I do	Solar	We need to create competition in the market with regards to power supply. Surely Eskom is not a reliable provider. History proves that we cannot rely on any SOE's due to poor management. Independent providers are generally much better managed and a more reliable supplier. SA has sufficient sunlight throughout the country and throughout the year. Solar energy is would therefore be much more suitable. It is also a cheaper source of energy.	Ahmed	employed individual

2022-07-11 09:33:56	Gauteng	Yes I do	Solar	I believe that solar can be used aggressively to ramp up power supply in the short term, with wind and hydro-electrics as longer-term and more carefully planned solutions. I believe the finance institutions can play a powerful role in this - by allowing property owners easier access to finance specially tailored to backup energy supply. If someone can prove they have been paying their electricity account, why would paying an equivalent amount towards a renewable solution suddenly not be affordable. If more homeowners are empowered to install their own solar solutions, demand on the grid will be reduced (reducing loadshedding requirements), the demand for solar solutions will increase, creating jobs and all resulting in a stimulated economy.	Victoria	employed individual
2022-07-11 09:32:26	Gauteng	Yes I do	Solar	Small scale suppliers <5kW peak, can be supported by current infrastructure. A partially public funded controller / meter can be installed. Spending money on funding micro solar power similarly to the solar geyser rollout /subsidy / rebate will be a multiplier to public funds spent, vs the return on kWh achieved. New meters with time of use /generation can also be used to motivate private storage and better expenditure.	Barend	employed individual
2022-07-11 09:30:12	KwaZulu-Natal	Yes I do	Solar	WHATEVER NEEDS TO BE DONE MUST BE DONE IMMEDIATELY. THE GOVERNMENT ONCE AGAIN JUST SHOWS INCOMPETENCY	Jackie	employed individual

Both should be explored, privatisation would allow for the market to compete for best alternatives. Private citizens that produce solar power in their homes should be subsidised and allowed to sell power back into the grid.	Charl	employed individual
2022-07-11 09:18:20	Gauteng	Yes I do	Solar	I support any type of renewables. There is enough evidence throughout the world that this can work. We do not need coal, diesel, power ships or nuclear power. We are not that big of a country and I believe that we can be sufficient on what we can get from renewable energy. The problem is the government that wants it grubby paws in everything so that they can steal whatever is available. We should only have independent suppliers. There can be oversight by the government only to check that we don't get ripped off by scrupulous people worse than that we already have.	Eben	employed individual
2022-07-11 09:17:49	Gauteng	Yes I do	Solar	xxxxxx	Gino	employed individual
2022-07-11 09:17:45	Gauteng	Yes I do	Solar	Eskom needs to disappear completely as they are only in it to line their pockets and to hell with the people of SA. Independent power suppliers will be able to provide power at a fraction of the cost which would benefit the people from SA and ultimately save them from starvation because then majority of their money wouldn't need to go towards a corrupt power utility.	Cindy	employed individual

2022-07-11 09:13:35	Gauteng		Yes I do	Solar	We are in dire need of power, let the IPP's deliver as soon as they can.	Martin	employed individual
2022-07-11 09:10:30	Gauteng		Yes I do	Solar	Smaller grids for independent power producers should be considered, for example, in Estates. If that is the case, hybrid solutions should be the first option where the independent power producer should be 100% renewal energy of both solar and/or wind generation, and additional feed for where it is required still from the municipality. For industrial the grids will be larger and only 50% should be the minimum requirement for renewal energy. Thank you	Nico	employed individual
2022-07-11 09:10:13	Gauteng		Yes I do	Solar	I think households should be offered (very) low interest rate loans to install solar, wind etc power generating sources at their home. This will lower the immediate demand from Eskom allowing households to have power and companies and factories to remain operational until such time as Eskom can sort out their shit and other power providing businesses can be deployed to support the power needs. Government can even offer these low interest rate loans and earn some interest to substitute for the loss in tax revenue.	Nico	employed individual
2022-07-11 09:10:08	Western Cape		Yes I do	Solar	I do not believe that Eskom should have sole supply privileges when they are not able to keep the lights on, literally. If independent power suppliers are able to, they should be allowed to supplement the grid with additional power. In a democracy, the people of SA "own" the public services and if the people are able to contribute to the power to supplement a short-fall of power supply, then legislation shouldn't prohibit it.	Stephnie	employed individual
2022-07-11 09:10:08	Western Cape		Yes I do	Solar	Solar is an energy source which is easy to install and maintain. You do not need specialized maintenance and poses little risk to our environment or the use of finite resources like coal. Our warm summers make it perfect to capture this "free" energy and provides us with the opportunity to provide excess electricity to pump back into the grid. We do not have the skills in South Africa to build and maintain another nuclear plant, wind turbines cannot be recycled, and coal WILL deplete after a few years, making it impossible to sustain in the future. BP has predicted that by the year 2050, our fuel resources will start to dry up. Where does that leave South Africa? Solar is our best solution, requiring little skills to install and maintain. 2022-07-11 09:01:14	Western Cape		Yes I do	Solar		James	employed individual
2022-07-11 09:00:46	Gauteng		Yes I do	Solar	Government should allow private users to put power back into the grid and be compensated. Government should also roll-out an incentive scheme to reward individuals that make use of Solar or alternative power sources. I pray that Eskom will shrink in the next 5 years to 1/5 it size and get rid of corruption. I also pray that God will open a window to make alternative power sources much more affordable and sustainable so that everybody can afford it.	Hein	employed individual
2022-07-11 09:00:37	Western Cape		Yes I do	Solar	Why is this even a question. South Africa is a country with the natural recourses, most sunshine and we have regions that get so little rain, that power will be generated 90% of the day. There are farmers struggling with droughts, they can make a living with electricity generation.	Elsabe	employed individual
2022-07-11 09:00:31	Eastern Cape		Yes I do	Solar		Megan	employed individual
2022-07-11 08:59:54	Gauteng		Yes I do	Solar	Many houses have been forced to install solar as a back up to loadshedding. Individuals have taken the expense upon themselves to supply electricity to their house- however they get no reward for any extra power that they generate. Solar farms may be an option but costs can be divided if the maintenance and upkeep is placed on the individual. If every household has solar and can supply the grid with surplus power it will add up to a great deal. Government can also look into subsidizing households who completely switch over to solar power thereby decreasing pressure on the grid.	Charme	employed individual

2022-07-11 08:58:44	Gauteng		Yes I do	Solar	The government has displayed its incompetency time and again and Eskom and the countries power supply has got to be one of the best examples of that. The government and its poorly appointed, unqualified workers at all levels have no idea how to manage any system, financial or operational and need to just quit! they are bleeding the country dry and even with raised pricing, load shedding, new maintenance plans etc they are still not capable of rectifying their own mistakes because they are unwilling and unable to recognize these mistakes, take accountability and responsibility and do what is necessary to correct there errors! The first of which would be to take control the spending, correcting SALARIES to amounts that actually make sense and to control spending and STOP the corruption within the institution. The Government just needs to give up and give over to people who ACTUALLY know what they are doing and HAVE PRIDE is doing the job RIGHT and to the benefit of ALL! The country, the users of the provided service and the service provider themselves, not just the CORRUPT, UNQUALIFIED and INEPT tops employees of this disgrace of an institution and government.	Bianca	employed individual
2022-07-11 08:57:57	Western Cape		Yes I do	Solar	Eskom can no longer be trusted to supply the country with electricity. Any time there is a problem which has nothing to do with production and supply of electricity, they hold the citizens ransom so they can either increase the price of electricity or price of wages. South Africa can no longer support a company that doesn't serve the people. Other companies and experts need to step in to help with the flow of electricity. Hydro is a great option because we are surrounded by water that we can use to our advantage in economical ways that still treats the environment with respect. Solar is another great option that completely removes folks off the grid so no one needs to rely on Eskom, however it's incredibly costly for the average South African. We need better options to be able to afford this easily if you're in the middle class.	Siobhan	employed individual

2022-07-11 08:50:11	Gauteng		Yes I do	Solar	Solar and wind power are readily available in South Africa. There is no need to BUY it. The infrastructure needs to be put in place but there is AMPLE space in South Africa to put up wind and solar farms. It is environmentally friendly. It gives the opportunity for entrepreneurship which in turn will provide a bit of competition and therefore get the best and not the highest price for electricity.	Vannette	employed individual

2022-07-11 08:50:09	Gauteng	Yes I do	Solar	Solar is an obvious choice as we are blessed with lots of sunshine all over our country, but there is many other inventions that can be look at. There is sadly a stronghold of evil forces at work in our government and other sectors that actively seek to destroy all the good work that has been done over many years. We as Christians would not allow the darkness to overshadow our beautiful country, therefor we believe that we could overcome this evil by doing good, and that include our government that need to be looking for other means to keep producing electricity, improving the infrastructure and fight the evil ones, by the light from within each one of us that confess that Jesus is alive and able to give us what we need.	Marié	employed individual
2022-07-11 08:49:37	Gauteng	Yes I do	Solar		Anna	employed individual
2022-07-11 08:49:09	Gauteng	Yes I do	Solar	Solar is a good short term solution until Eskom can find its way again.	Frans	employed individual
2022-07-11 08:48:53	Free State	Yes I do	Solar	Independent power producers should be allowed but only in renewables. Other forms of power production are too dangerous to allow independent companies to operate, and we need to transition away from coal as quickly as possible to avert a climate crisis. In addition we already have a robust solar industry and technicians.	Siobhan	employed individual
2022-07-11 08:48:37	Western Cape	Yes I do	Solar	Solar power is 100% inexhaustible energy, which is renewable and free. No toxic or polluting emissions into the air.	Cheryl	employed individual
2022-07-11 08:48:19	Eastern Cape	Yes I do	Solar	South Africa has high temperatures and most of the Provinces land scape have more heat from North across the East to West Cape. People will be able to remain off the grid and to allow Eskom to operate fully	Simphiwe	employed individual
2022-07-11 08:48:06	Gauteng	Yes I do	Solar	Good morning I feel that both solar and wind power should be included in the increase of power producers - immediately! I cannot understand the lack of interest/desire within government circles to update to these easily obtained facilities. South Africa has many areas which get the sun all year round, and many areas which get good wind traction for power. Something must happen quickly in order for this country to improve - economically, financially as well as helping with reducing the unemployment situation. Surely these extra power producers could then educate and employ many.	Noreen	employed individual
2022-07-11 08:47:50	Western Cape	Yes I do	Solar		Corne	employed individual
2022-07-11 08:47:44	Western Cape	Yes I do	Solar	Allow individuals and business to continue living utilizing free and green eneregy	Willem	employed individual

2022-07-11 08:39:18	Gauteng	Yes I do	Solar	Sunshine is almost every day freely available (except when it's cloudy or rainy days), does not pollute the earth, and solar panels and their necessities are freely available nowadays. There is ample free space available to erect solar "farms".	LOUIS	employed individual
2022-07-11 08:37:38	Western Cape	Yes I do	Solar	Lack of power doesnt just impact on the commercial needs of the country, but the country's psyche as a whole. Support small business to survive.	Jonathan	employed individual
2022-07-11 08:37:29	Gauteng	Yes I do	Solar	We , have sunshine in excess, why not use it	Margo	employed individual
2022-07-11 08:37:10	Western Cape	Yes I do	Solar	In sunny South Africa it makes sense to use Solar power and it is the cheapest energy option. It is being used in many countries and is very effective. It has the least impact on the environment. Wind would be my next best option as we receive plenty of that in Western Cape.	Jackie	employed individual
2022-07-11 08:36:22	Western Cape	Yes I do	Solar	the question to embrace alternative energy is a no brainer as the current incumbent possess none and hence we have load shedding. The alternative has been available to us for a number of years, but our stubborn greedy leaders in government refuse to allow the solar powered farms to provide the necessary power needed to fill the shortfall of Eskom. I therefore support the change in policy to allow the much needed additional help and to end this disaster of Eskom and its ilk.	Tony	employed individual

2022-07-11 08:36:10	Gauteng	Yes I do	Solar	<p>It is critical that a national electricity crisis is declared, and that urgent measures are undertaken to bring on additional power supply into the electricity grid immediately. The power system is collapsing with load shedding, the economy is being severely undermined, and everyone is suffering economically and practically. We cannot continue to function in this manner. The electricity system is on the brink of collapse, and if the system collapses, the economy will collapse.</p> <p>The Department of Mineral Resources and Energy has dithered with ensuring the approval of additional Independent Power Production projects, and this has significantly worsened the crisis. This must immediately stop. It is vital that all types of renewable energy projects, in particular, including solar, wind, and other types of generation are fast tracked and brought on line. Other countries such as Viet Nam have built substantial independent power production projects within a year, we need to focus and implement such an intensive project in South Africa. Experts such as the National Planning Commission and others have developed feasible plans that could assist to resolve the energy crisis soon. The experts need to be listened to, the red tape needs to be removed, and the crisis needs to be addressed. The seriousness of the situation needs to be recognised, and urgent action is required now.</p>	Jeannine	employed individual

2022-07-11 08:26:21	Gauteng	Yes I do	Solar	In SA we have both sun and wind. Independent energy is long overdue. Eskom is no longer viable.	Jacqueline	employed individual
2022-07-11 08:25:09	Gauteng	Yes I do	Solar		Catherine	employed individual

2022-07-11 08:24:09	Western Cape		Yes I do	Solar	South Africa has an abundance of sunshine and it makes sense to use that to help generate enough electricity to power South Africa. Additionally, we should be moving towards less environmentally damaging sources of power than coal and this would help the transition, also in terms of upskilling workers. Wind energy is also a great option in less dense, windy areas. We have a crisis, yet we have all the resources available to help us power now and also transition. Keeping us tied to coal is bad for country as it stands and bad for the environment.	Iwona	employed individual
2022-07-11 08:23:01	Gauteng		Yes I do	Solar	I feel Eskom is incompetent to do their jobs and this is why we are sitting in the situation that we are in. Solar power can be generated easily and battery back ups in place will also help, providing nothing gets stolen. Each municipal region should be on pre paid electricity and the provider gets paid directly ensuring they get their money and the municipalities don't steal the money. The use of wind turbines can also be used to generate power.	Melinda	employed individual
2022-07-11 08:22:55	Gauteng		Yes I do	Solar	For long term, first choice would be nuclear (just not Russian) to provide a stable base load but it takes long to implement - followed by wind and solar as the main source of energy.	Paul	employed individual
2022-07-11 08:20:22	Gauteng		Yes I do	Solar		Philip	employed individual
2022-07-11 08:19:31	Eastern Cape		Yes I do	Solar	South Africa is a prime location for solar power production. This should be immediately developed to cover the inability of government to provide for the needs of the nation. The implementation of private power projects should however be closely monitored to ensure environmental impact is negligible, and that the people of the country rather than corporations and politicians are the primary beneficiaries. Corruption has and will continue to hamstring the country unless much harsher action is taken against implicated politicians and businesspeople, no matter what new systems are put in place.	Thomas	employed individual
2022-07-11 08:17:02	Gauteng		Yes I do	Solar	Solar and renewables - much better option	Beverley	employed individual
2022-07-11 08:17:02	North West		Yes I do	Solar		Isabel	employed individual

2022-07-11 08:09:26	Gauteng		Yes I do	Solar		Pieter	employed individual
2022-07-11 08:08:26	Western Cape		Yes I do	Solar	South Africa is blessed with extraordinarily good amounts of sunshine and its criminal that we have not tapped into it. The Western Cape also gets plenty of wind.	David	employed individual
2022-07-11 08:06:56	Western Cape		Yes I do	Solar	Solar is available all year round and is free So is wind power	Megan	employed individual
2022-07-11 08:06:55	Gauteng		Yes I do	Solar	This country is struggling to keep up production of goods throughout the industries! Why would a solution to the crisis not be allowed????	Terry	employed individual

2022-07-11 08:06:43	North West		Yes I do	Solar	The private sector is better equipped to deliver solutions faster and cheaper than government. This has been proven over and over. We urgently need to get rid of the restrictions and unbundle Eskom entirely. Distribution can be done by Eskom, with power supplied independently. I believe a combination of solar and wind would add a lot to our grid, with added environmental benefits. These technologies are both proven and freely available. They could be online in a matter of months if done by the private sector. Unreliable power supply is crippling our economy and this is extremely important and urgent.	Annie	employed individual
2022-07-11 08:06:12	Gauteng		Yes I do	Solar		Daniel	employed individual
2022-07-11 08:05:20	Western Cape		Yes I do	Solar	Allow the solar households the supply the local grid with surplus energy generated. Have powermeters that have the ability to build credit when a surplus is generated. Also have a cap on credit generated. Lastly don't tax the sun, it is free and we should use it.	Danie	employed individual
2022-07-11 08:04:16	Eastern Cape		Yes I do	Solar		Shaun	employed individual
2022-07-11 08:02:09	Gauteng		Yes I do	Solar		Zeldean	employed individual
2022-07-11 08:01:40	Gauteng		Yes I do	Solar	Sun is for FREE. USE IT TO BENEFICIAL SOUTH AFRICA RESIDENTS	Marie	employed individual
2022-07-11 08:00:21	Gauteng		Yes I do	Solar	We are not called Sunny South Africa for nothing, the abundance of sun is more than sufficient to power vast areas with solar power.	Andrew	employed individual
2022-07-11 07:59:34	Outside SA	France	Yes I do	Solar	Best to change the above to allow for multiple selections. Solar is cost effective but cannot work alone. To compensate with intermittency a combination with other sources (anything from the above list except coal or diesel, unless biodiesel).	Christine	employed individual
2022-07-11 07:59:17	Gauteng		Yes I do	Solar	Green power is the way to go, easiest to setup and maintain, albeit at a high initial investment. The challenge with green power is supplying the grid with clean power and not compromising synchronosity, which is a big challenge for our grid. But I'm sure engineers can figure it out, engineers don't mind the challenge, but government will have to take their input seriously - which will be the real challenge.	Warren	employed individual
2022-07-11 07:59:02	Western Cape		Yes I do	Solar		Julia	employed individual
2022-07-11 07:56:38	Western Cape		Yes I do	Solar		Adrian	employed individual
2022-07-11 07:56:18	Gauteng		Yes I do	Solar		Christa	employed individual
2022-07-11 07:55:48	Mpumal anga		Yes I do	Solar	Cheapest	Johannes	employed individual
2022-07-11 07:55:46	Gauteng		Yes I do	Solar	Why have we waited all these years and still the ANC has done nothing ,except divide us and make us weaker by the media . To be honest ,we are sick and tired of this and need a party to motivated this problem and make it private . The government has destroyed our beloved country.	Bertha	employed individual
2022-07-11 07:55:28	Western Cape		Yes I do	Solar	Eskom has failed miserably. Only private enterprise can save us. Solar is a very good option for SA.	Theo	employed individual
2022-07-11 07:54:31	Gauteng		Yes I do	Solar	We're in a crisis because electricity is managed by one corrupt government organization rather than by a mix of entrepreneurial private and government organisations that care for South African citizens or the economy of South Africa. So much needs to change to fix the electricity supply in South Africa. Allowing others to produce and contribute to the grid is a start. Solar is not the only answer but a quick start to fix the problem. The solutions need to be cheaper. R200K for a medium size house is too expensive. Nuclear is a long term option. There are pro's and con's of every method. Solar has the potential to have some negative environmental effects too	Linda	employed individual
2022-07-11 07:54:30	North West		Yes I do	Solar	Private sector can take over electricity supply with solar power plants. Government has proven countless times they can't effectively manage the countries needs. Private sector can and should.	Gerrie	employed individual
2022-07-11 07:53:53	Limpopo		Yes I do	Solar	Make use of all the renewable sources. Give the innovators a chance to proof their value!	Gerhard	employed individual
2022-07-11 07:53:20	Western Cape		Yes I do	Solar		Susan	employed individual
2022-07-11 07:53:07	Western Cape		Yes I do	Solar	Or Wind Power, IPP's should have been allowed long time ago, at least we will have a choice.	Adel	employed individual
2022-07-11 07:52:21	Gauteng		Yes I do	Solar		Chantelle	employed individual
2022-07-11 07:52:05	Eastern Cape		Yes I do	Solar	Solar - our sun is a great source of power generating facility. we need to use it to assist with the power situation . Wind is a next solution. - we need to use natural resources as much as possible.	Melinda	employed individual
2022-07-11 07:50:49	KwaZulu- Natal		Yes I do	Solar		Ryan	employed individual
2022-07-11 07:50:12	Gauteng		Yes I do	Solar	Wind & Sun is given for free by nature to support us. Why not use it to help us.	Marlize	employed individual
2022-07-11 07:49:44	Gauteng		Yes I do	Solar		Trevor	employed individual
2022-07-11 07:49:15	Gauteng		Yes I do	Solar	Please remove the red tape. Independant Power producers will be able to provide the additional capacity while Escom could then do the necessary maintenance required to sustain electricity supply	Thomas	employed individual

2022-07-11 07:47:55	Gauteng		Yes I do	Solar	I support amending the legislation to make way for IPP"s to add to the much needed electricity. Wind, water and solar can add significantly to the power grid and bring an end to loadshedding. The time has run out for Eskom to be the sole electricity supplier. Ways to make it affordable for the end user must be looked at as a matter of urgency	Marius	employed individual
2022-07-11 07:47:47	Mpumalanga		Yes I do	Solar		Armand	employed individual
2022-07-11 07:47:20	Gauteng		Yes I do	Solar		Carien	employed individual
2022-07-11 07:46:20	Western Cape		Yes I do	Solar	Most likely a combination of solar, hydro and wind, particularly in the windy Winelands region of Stellenbosch.	Josua	employed individual
2022-07-11 07:43:35	Western Cape		Yes I do	Solar		Laetitia	employed individual
2022-07-11 07:42:35	Gauteng		Yes I do	Solar	Independent power suppliers would definitely resolve all the issues we face with Eskom! It is never feasible to only have 1 company supplying power to the whole country with no contingency plans in place! This country is suffering at the hands of this government and their policies which are outdated and used for personal gain! Any resources would be valuable in scrapping loadshedding completely	Stacey	employed individual
2022-07-11 07:42:05	Gauteng		Yes I do	Solar	A combination of solar, wind and hydro would probably be best with the emphasis of using the appropriate energy generation in the region that has access to the most appropriate solution. We are lucky enough to live in a country that can offer all of the above options.	Claudia	employed individual
2022-07-11 07:39:58	Gauteng		Yes I do	Solar		Luis	employed individual
2022-07-11 07:39:13	Gauteng		Yes I do	Solar		Maria	employed individual
2022-07-11 07:39:03	Gauteng		Yes I do	Solar	We have ample capacity for solar energy and it's not near as harmful to the environment	Refilwe	employed individual
2022-07-11 07:36:35	Gauteng		Yes I do	Solar	There should be urgent and immediate investment in renewable energy solutions for the major energy users in the country. Solar panels can be erected at all industrial properties to supply the major energy demands of these clients and reduce their strain on the grid, as well as ensure business continuity and resilience in times of limited supply by Eskom.	Nadia	employed individual
2022-07-11 07:36:22	Western Cape		Yes I do	Solar		Christine	employed individual
2022-07-11 07:36:21	Gauteng		Yes I do	Solar		Marlene	employed individual
2022-07-11 07:35:39	Western Cape		Yes I do	Solar	It is high time we get rid of the dependency on coal and diesel and find cleaner and more sustainable ways to power our future, and in the same time help with climate change and pollution. Solar is an immediate step that can help in smaller scale, but nuclear is the way to go on a longer term.	Paul	employed individual
2022-07-11 07:34:58	Western Cape		Yes I do	Solar	South Africa is among the best-situated countries to embrace solar energy. Not only does solar energy rely on the sun. but solar panels can be placed on open government-owned land - of which there are plenty in South Africa.	JP	employed individual
2022-07-11 07:34:45	Gauteng		Yes I do	Solar	Solar and Wind. The shortest length of time to bring power onto the grid.	Michael	employed individual
2022-07-11 07:34:28	Western Cape		Yes I do	Solar		odessa	employed individual
2022-07-11 07:33:46	Gauteng		Yes I do	Solar		Demi	employed individual
2022-07-11 07:29:54	Gauteng		Yes I do	Solar	Eskom power stations are ruined by theft, vandalism, and syndicates! This will not be fixed ever! So, go for solar power now, directly into the grid, use this during the day, and Eskom power at night only. Solar is expensive when power to be stored in batteries, but into the grid will make it a cost effective option. The hydrogen gas has to be sourced if not ready in SA, so that we can start implementing this with the solar to take over Eskom completely! What a dream this would be if all these are operated by private companies, so that the ruin of theft etc will be tackled efficiently!	Marthie	employed individual
2022-07-11 07:29:13	Western Cape		Yes I do	Solar		Dawn	employed individual
2022-07-11 07:29:05	Western Cape		Yes I do	Solar		Sumaya	employed individual
2022-07-11 07:28:55	Eastern Cape		Yes I do	Solar	People should be able to go off grid and not be taxed for it. If Eskom can't supply us with electricity then solar and generators with gas should be the next option.	Courtney	employed individual
2022-07-11 07:28:27	Western Cape		Yes I do	Solar	ESKOM has failed to deliver and small businesses and service delivery in many aspects of our lives have suffered. Solar energy is cleaner and the advance in technology in the last 10 years has made this more affordable. Private home owners, businesses and the government can really benefit by allowing independent power and should cut the red tape. The government should stop threatening and penalising home owners who have spent private money on SOLAR energy solutions because they have mismanaged ESKOM.	Joanne	employed individual
2022-07-11 07:28:19	Outside SA	Namibia	Yes I do	Solar	Renewable energy is the way to go. SA has ample opportunity to make use of it - other countries like Germany has implemented successful renewable energy systems.	Clinton	employed individual
2022-07-11 07:27:58	Western Cape		Yes I do	Solar		Sjoerd	employed individual

2022-07-11 07:26:25	Western Cape		Yes I do	Solar	At the moment I would say wind/solar although I'm not an expert in this field. These 2 options are relatively inexpensive as opposed to the rising diesel prices as well as the coal and gas shortage. Especially if we are looking for an immediate solution.	Julie	employed individual
2022-07-11 07:24:48	Gauteng		Yes I do	Solar	A mix is needed but your options don't allow this. It is unworkable to only have supply coming from one source. Coal should still be part of the mix as SA has reserves and the process could be cleaned up a bit.	Sue	employed individual
2022-07-11 07:24:13	Western Cape		Yes I do	Solar	a mix of various option would be best, to weather this situation, especially sources that can cope with increased demand.	Rudolf	employed individual
2022-07-11 07:22:41	Gauteng		Yes I do	Solar	Solar is clean energy. Individuals that are producing their own solar energy should also be allowed to put their surplus energy back into the grid.	Sonja	employed individual
2022-07-11 07:22:07	Gauteng		Yes I do	Solar	We have sun most days of the year. We can't rely on the government.	Alet	employed individual
2022-07-11 07:22:06	Gauteng		Yes I do	Solar		Jacob	employed individual
2022-07-11 07:20:29	Mpumal anga		Yes I do	Solar	Solar is the future, let private coompanies and private individuals export their energy into the grid on their own cost , government is not capable.	Jan	employed individual
2022-07-11 07:19:31	Gauteng		Yes I do	Solar	I support all renewable energy solutions - at the moment we need a solution that can be rolled out as fast as possible and be flexible for further expansion	Renee	employed individual
2022-07-11 07:18:09	Western Cape		Yes I do	Solar	I believe there are already many small companies that are ready to tap into the grid and many more will follow when the red tape is scrapped. I mentioned 'solar' in the method, but it can be any form of renewable energy in my opinion e.g. Solar, Wind, Hydro and more if any. I also believe that for each lost job at Eskom many jobs will be created. Not only because of the renewable energy providers, but also because the economy will start to expand again.	Jako	employed individual
2022-07-11 07:17:55	Gauteng		Yes I do	Solar		Craig	employed individual
2022-07-11 07:17:15	Gauteng		Yes I do	Solar		Yvette	employed individual
2022-07-11 07:16:10	Western Cape		Yes I do	Solar	Solar is infinite, materials cheaper each year. Skills and expertise of solar already big in SA, use it. Create insentives for large industrail companies to generate own power on rooftops. Quickest way of reducing load on eskom. Pvt residential solar is to small to make an impact on load.	Dean	employed individual
2022-07-11 07:15:13	Western Cape		Yes I do	Solar	It cant be one but a combination of wind, hydro and solar all renewables	Roger	employed individual
2022-07-11 07:14:44	Gauteng		Yes I do	Solar	Renewables are being implemented in other countries to reduce the load and dependence on Coal, nuclear is a good alternative but the time to make this a reality is a challenge. Action is required immediately as solar devices and ancillary hardware is soon to be in short supply given the massive site being implemented in places like China	David	employed individual
2022-07-11 07:12:32	Western Cape		Yes I do	Solar	SA has abundant sunshine. Electricity from solar energy the perfect solution.	Brigitte	employed individual
2022-07-11 07:12:20	Western Cape		Yes I do	Solar		Max	employed individual
2022-07-11 07:11:58	Western Cape		Yes I do	Solar	Wind and Solar would be the quickest solution here. Even if the government helps people to install solar setups with grid tied inverters to feeb excess power back into the grid. With the current situation, alot of people that can afford it is going the solar/ battery route already. Why not help each household to do the same, and let the people who already installed also apply for the refund.	Riekert	employed individual
2022-07-11 07:11:51	Western Cape		Yes I do	Solar	Solar and wind are very easy and quick to install and start producing. Coal is extremely polluting and unreliable. Petrol will be even more scarce and expensive in the future as there's a limited amount and it's needed for transport. Hydro and nuclear could work but it will take long time to build them.	Leire	employed individual
2022-07-11 07:11:47	Western Cape		Yes I do	Solar	Solar and wind are very easy and quick to install and start producing. Coal is extremely polluting and unreliable. Petrol will be even more scarce and expensive in the future as there's a limited amount and it's needed for transport. Hydro and nuclear could work but it will take long time to build them.	Leire	employed individual
2022-07-11 07:09:21	Gauteng		Yes I do	Solar	Companies and investors have done all the groundwork, got lease agreements from landowners and gave been waiting for six years since then, for governmental approval. Escom are not interested in obtaining power from other sources. Once again it feels like political play; and not innocently so.! South-Africa is ideally suited for producing clean power via solar and wind and even waves. Everything is in place to stop the shortages except the legislation and perhaps the willingness to have South-Africa thrive economically.	Hendriena	employed individual

2022-07-11 07:06:24	Outside SA	Germany	Yes I do	Solar	In order to achieve market growth again it is necessary to have sufficient and sustainable energy supplies. With relative little investment and short installation and commissioning times solar produced energy is the way forward to give South Africans hope again.	Thomas	employed individual
2022-07-11 07:06:06	Western Cape		Yes I do	Solar	Allow solar at homes for self supply and supplementing with government supply. Easiest transition with many people on solar already.	Bianca	employed individual
2022-07-11 07:05:42	Mpumalanga		Yes I do	Solar	It can't be one but a combination of wind, gas, and solar	Ian	employed individual
2022-07-11 07:05:12	Western Cape		Yes I do	Solar		Neil	employed individual
2022-07-11 07:04:21	Western Cape		Yes I do	Solar	Private producers and renewable energy (probably a variety) are the only options really. Anything is better than what we've got, including Mantashe.	Vicki	employed individual
2022-07-11 07:02:18	KwaZulu- Natal		Yes I do	Solar		Troy	employed individual
2022-07-11 06:58:50	Gauteng		Yes I do	Solar	South Africa is a country with a lot of sunshine and capabilities for other renewable energy generation. Coal is no longer sustainable and South Africans have a right to reliable electricity. The Government should provide private companies the opportunity to help solve the energy crisis and also the environmental crisis we are currently creating with all the pollution being generated. Make renewable energy affordable and available and create a better tomorrow.	Anrike	employed individual
2022-07-11 06:56:34	Gauteng		Yes I do	Solar		Priscilla	employed individual
2022-07-11 06:55:03	KwaZulu- Natal		Yes I do	Solar	government needs to offer incentives or tax rebates to people independently installing their own solar/wind energy sources to their homes and business. individual households, businesses and schools, should be getting off the grid, except it is unaffordable. Make it tax exempt now.	shelly	employed individual
2022-07-11 06:52:30	Gauteng		Yes I do	Solar		Michelle	employed individual
2022-07-11 06:51:44	Western Cape		Yes I do	Solar	Solar, with a proper storage system, can take the load off the Eskom generation fleet but will need to consider wind and nuclear as well.	Vincent	employed individual
2022-07-11 06:51:38	Outside SA	Vietnam	Yes I do	Solar	I feel that there are multiple renewable sources of energy that we can harness. Look at Finland and Switzerland's most recent energy accomplishments. Hydro-battery (Switzerland) Sand battery (Finland) I feel it's essential to stop nationalizing things and allow individuals help each other out. Isn't Ubuntu part of our culture? How come its only government officials prospering - where's the Ubuntu here?	Damian	employed individual
2022-07-11 06:48:08	Gauteng		Yes I do	Solar	There are parts of the karoo that get sun 365 days a year. A substantial solar farm can get power into grid.	Francois	employed individual
2022-07-11 06:47:45	Western Cape		Yes I do	Solar	We have enough sun	Steven	employed individual
2022-07-11 06:47:26	Western Cape		Yes I do	Solar	I believe a combination of solar, wind and hydro would work, based on the local factors across the country.	Robyn	employed individual
2022-07-11 06:46:54	Western Cape		Yes I do	Solar	Solar power in the Western Cape provides a sustainable base of energy. There are areas that could easily provide the space for the level of output required while production would be areas of low employment. This addresses two issues of power generation and employment creation	Ian	employed individual
2022-07-11 06:45:38	Limpopo		Yes I do	Solar	Solar and wind is available. Make it fast and easy to connect to the grid. Get people without political connections back in Eskom and fix the existing Power Stations as far as possible. Explore hydrogen possibilities. Create opportunities for South Africans to be creative. Use old Engineers to assist and train the youth.	Carel	employed individual
2022-07-11 06:45:07	Western Cape		Yes I do	Solar		Vicki	employed individual
2022-07-11 06:40:37	Outside SA	Australia	Yes I do	Solar	Nuclear stations will take much longer to plan and build - circa 10 years min, and much more expensive, with expertise in the operations not readily available in South Africa. Solar and hydro are much quicker to implement, renewable and easily scalable. New coal, gas and diesel options should be dismissed due to cost and renewable factors.	PHILLIPA	employed individual
2022-07-11 06:39:41	Gauteng		Yes I do	Solar		Graham	employed individual
2022-07-11 06:39:24	Eastern Cape		Yes I do	Solar		Susan	employed individual

2022-07-11 06:39:22	Western Cape		Yes I do	Solar	<p>In my opinion we have multiple options and we should diversity.</p> <p>We also feel strong that independents should focus on industry and domestic power should be privately owned by residents.</p> <p>We have a high surface are coastline so hydro electricity can be generated.</p> <p>We have Karoo dessert for solar, and Every household should be subsidized to install solar.</p> <p>And we have various windy regions and space where wind farms can be set up</p> <p>Imagine a world where power is free! Imagine the socio economic advantages. They will far outweigh the detractors.</p> <p>Politics must get out of the way. if they can't support obvious progress, they are not doing their job. It is that simple.</p>	Helen	employed individual
2022-07-11 06:39:02	Gauteng		Yes I do	Solar	Given the cost of leaving the rising cost of food ,fuel,nd virtually everything up mi main concern is about majority of south African citizens not working nd the very economy which is not growing so it would be advisable to go fo sumthing cheaper reliable nd affordable.	SELLO	employed individual
2022-07-11 06:38:31	Gauteng		Yes I do	Solar	We could also look in to kinetic energy like other countries. Eg. Turbine generated energy.	Yolandi	employed individual
2022-07-11 06:38:21	Eastern Cape		Yes I do	Solar	<p>Unfortunately there is no such thing as an immediate solution. The quickest being to accelerate personal individual investment in infrastructure.</p> <p>I would support a tax deduction for all individuals who install a solar system for personal use or for others to use. Apart from alleviating an energy dependency on Eskom it would also create job opportunities.</p> <p>Surplus energy from this initiative could be used for people who cannot afford a solar installation and for businesses who do not have the funds.</p> <p>While at it I would include a similar tax incentive for rain water harvesting.</p> <p>These incentives could be at national level (100% tax rebate, say to a maximum of R200 000] and municipal level in the form of reduced minimum monthly charges from municipalities.</p>	Warren	employed individual
2022-07-11 06:38:20	Gauteng		Yes I do	Solar	<p>Solar makes the most sense scientifically, because southern Africa's interior is an ideal place to generate solar energy.</p> <p>The western interior, with its extremely low cloud cover, high altitude and low aerosol concentrations, offers some of the best conditions in the world for solar.</p>	Dylan Peter Siviwe	employed individual
2022-07-11 06:36:06	Gauteng		Yes I do	Solar	It's time that we realize that anything owned by government is corrupted. We need private entities to save us from the poor service delivery of the government.	Connie	employed individual
2022-07-11 06:36:04	KwaZulu- Natal		Yes I do	Solar	We need a sustainable solution and environmentally friendly resolution that is socially and economically viable for all generations. The State alone has no capacity to generate power hence democratic engagement must be exercised to form partnerships with the IPPs. However, a high level of transparency must be coerced to prevent any element of corruption.	Ntuthuko	employed individual
2022-07-11 06:34:09	Limpopo		Yes I do	Solar		Petro	employed individual
2022-07-11 06:30:46	Gauteng		Yes I do	Solar	It's time that we realize that anything owned by government is corrupted. We need private entities to save us from the poor service delivery of the government.	Stephanus	employed individual
2022-07-11 06:28:30	Gauteng		Yes I do	Solar	We are in desperate need of alternative power sources or suppliers. We provide electricity to other countries yet can't keep the lights on in our own. Corruption and mismanagement has lead to our current situation which is totally unacceptable.	Cindy	employed individual
2022-07-11 06:25:17	Gauteng		Yes I do	Solar	I believe that a combination of methods is required to effectively provide power to SA	Daryl	employed individual
2022-07-11 06:23:58	Western Cape		Yes I do	Solar	Incentivise people to come off. The grid to warrant the solar investment. Allow for private companies to provide energy.	Karen	employed individual
2022-07-11 06:23:09	Gauteng		Yes I do	Solar		Carolyn	employed individual
2022-07-11 06:22:01	Gauteng		Yes I do	Solar	Eskom is a failing entity, the only option is to allow independent suppliers and add competition to the market.	Hilton	employed individual
2022-07-11 06:20:02	Gauteng		Yes I do	Solar	South African households are already making use of our predictive weather conditions to use solar energy. On a larger, industrial scale, we could easily supply sufficient energy back into the grid to support and complement Eskom.	Yashin	employed individual
2022-07-11 06:19:34	Western Cape		Yes I do	Solar	Wind, solar and hydro would all suit actually. Solutions that involve harnessing the natural elements makes long term sustainable sense	Aimee	employed individual
2022-07-11 06:18:25	Western Cape		Yes I do	Solar		Russel	employed individual
2022-07-11 06:18:11	Free State		Yes I do	Solar	Solar is free and clean!	Jurie	employed individual

2022-07-11 06:16:25	Gauteng		Yes I do	Solar		Indhir	employed individual
2022-07-11 06:16:18	Western Cape		Yes I do	Solar	We have abundant sunshine in South Africa.	Rory	employed individual
2022-07-11 06:15:14	Eastern Cape		Yes I do	Solar		Mike	employed individual
2022-07-11 06:14:57	Western Cape		Yes I do	Solar		Paul	employed individual
2022-07-11 06:14:46	KwaZulu-Natal		Yes I do	Solar	Any means of producing power which is quick to come online would be good. Solar is relatively quick to get up and running and provides both a solution to the power problem and employment and business opportunities for South Africans.	Davyd	employed individual
2022-07-11 06:13:22	Gauteng		Yes I do	Solar	Renewables are the way to go. Eskom by its very definition is a supplier that is failing to supply and should be privatized, expansion on other sources should become a priority	Andre	employed individual
2022-07-11 06:11:11	Western Cape		Yes I do	Solar		Gerbrecht Elizabeth	employed individual
2022-07-11 06:11:10	KwaZulu-Natal		Yes I do	Solar		D	employed individual
2022-07-11 06:09:29	Gauteng		Yes I do	Solar	We need an urgent solution to the power crisis. Solar seems to be the way of the future	Sarah	employed individual
2022-07-11 06:04:41	Limpopo		Yes I do	Solar	We should be allowed to choose where we get electricity from. Wind or solar. Eskom should not have monopoly power.	Carey	employed individual
2022-07-11 06:00:24	Gauteng		Yes I do	Solar		willem	employed individual
2022-07-11 05:59:47	Gauteng		Yes I do	Solar	There are so much open sunny spaces in the Karoo, put up panels there or wind turbines...	Maria	employed individual
2022-07-11 05:59:34	Eastern Cape		Yes I do	Solar		Nicole	employed individual
2022-07-11 05:57:12	Western Cape		Yes I do	Solar		Shelley	employed individual
2022-07-11 05:56:21	Free State		Yes I do	Solar	It is renewable, clean and safe. I also support using wind to generate electricity	Dorothy	employed individual
2022-07-11 05:55:48	Gauteng		Yes I do	Solar	Solar with battery would probably be able to significantly reduce current base load dependence on aging fleet with quick turnaround time. Empower households to generate solar by: 1. Remove the penalty system for people installing solar power at their homes. 2. Allow the sale of power to the grid.	Carel	employed individual
2022-07-11 05:46:22	Gauteng		Yes I do	Solar	Solar with battery would probably be able to significantly reduce current base load dependence on aging fleet with quick turnaround time.	Wesley	employed individual
2022-07-11 05:45:54	Gauteng		Yes I do	Solar	Abundance off space in the country not suitable for farming but with all year exposure to sunlight. Easy startup installations which can be connected to the grid in a short development period	Pieter	employed individual
2022-07-11 05:36:12	Western Cape		Yes I do	Solar		Wessel	employed individual
2022-07-11 05:34:08	Western Cape		Yes I do	Solar	South Africa's location has many ideal spots for solar power. To add many households have wasted power that could be put into the grid if it was worth it for the owners.	Chase	employed individual
2022-07-11 05:31:52	KwaZulu-Natal		Yes I do	Solar	The government should allow households to install solar panels & this allows them to produce their own energy & send access power back to the grid.	Sunil	employed individual
2022-07-11 05:27:53	Gauteng		Yes I do	Solar		Nikki	employed individual
2022-07-11 05:26:45	Gauteng		Yes I do	Solar	We need constant and renewable energy from reliable sources and companies not controlled by government	Stefano	employed individual
2022-07-11 05:24:05	Gauteng		Yes I do	Solar		Callysta	employed individual
2022-07-11 05:22:06	Gauteng		Yes I do	Solar	We cannot go on like this, independent power suppliers are the only way forward.	Caron	employed individual
2022-07-11 05:21:10	Gauteng		Yes I do	Solar		Dauphine	employed individual
2022-07-11 05:20:06	KwaZulu-Natal		Yes I do	Solar	SA has endured intense pressure which is devastating our country. We need a solution beneficial to all classes which needs implementation immediately and solar or hydro will alleviate the increase in load shedding	Charmaine	employed individual
2022-07-11 05:08:17	KwaZulu-Natal		Yes I do	Solar		Ashok	employed individual
2022-07-11 04:59:05	Gauteng		Yes I do	Solar	The energy sector should have built transmission infrastructure to the grid in the Northern Cape decades ago. Short-sightedness and lack of political will (endless environmentally crippling fossil fuel subsidies) are certainly directly a huge part of our problem we now face. Frankly, a mix between nuclear, wind and solar are the way forward.	Miles	employed individual
2022-07-11 04:56:53	Gauteng		Yes I do	Solar	Remove tender deployment from system of employment in government and its institutions and employ professionals. This tender deployment is illegal and stupid. It took us way back and will ultimately take us to the ice age.	Phadime	employed individual
2022-07-11 04:56:06	Western Cape		Yes I do	Solar		Kate	employed individual
2022-07-11 04:55:58	KwaZulu-Natal		Yes I do	Solar	Solar farms can go up quicker than gas and Nuclear	Shea	employed individual

2022-07-11 04:55:39	Western Cape		Yes I do	Solar	The South African government has proved it is not capable of running a country and has been completely incompetent with providing the people of South Africa with electricity for many years. It's about time the people be giving alternate options without exorbitant rates piled onto them just because the government wants a piece of the pie.	Brigitta	employed individual
2022-07-11 04:46:18	Gauteng		Yes I do	Solar	Action I sneezed immediately. Dithering and red tape is not only killing our economy but our people. Do something Now please	Andre	employed individual
2022-07-11 04:43:28	Gauteng		Yes I do	Solar	We are a country abundant in sunshine, compared with other resources. It is renewable and relatively cheap to harvest. All who have homes have roofs.	Lindy-Ann	employed individual
2022-07-11 04:38:13	Gauteng		Yes I do	Solar		Johan	employed individual
2022-07-11 04:33:32	Gauteng		Yes I do	Solar	I am of the view that the resources that we currently have in our disposal should be used first and foremost appropriately and effectively before adding others. If the move is justified by lack of managing what we have effectively then the move is incorrect and I don't support it, and I don't think is wise. We need to get to point of managing what we have effectively, we have tolerated poor performance from our SOE and changed based on that, which is not appropriate approach. Can coal still sustain us as a country, if yes, then it should still be used cause we have many coal fired power station, which some where recently built, with a hope of attending to power shortages. But poor performance have let to one problem to another. That is the source of our problem as a country and that's what needs to be dealt with first. We first need to employ efforts that will require no funds or less fund before worrying about capital extensive projects which will plunge our country in to deep debt.	Dumisani	employed individual
2022-07-11 04:30:25	Western Cape		Yes I do	Solar		Pieter	employed individual
2022-07-11 03:59:54	Gauteng		Yes I do	Solar		Alpheus	employed individual
2022-07-11 03:48:58	Outside SA	United States	Yes I do	Solar	I believe a combination of solar, wind, and nuclear off the people of South Africa the best of power generation with the prospect of a livable future world.	Christoph er	employed individual
2022-07-11 03:41:13	Gauteng		Yes I do	Solar		Brett	employed individual
2022-07-11 03:10:40	Outside SA	Cayman Islands	Yes I do	Solar	I think that they should look at a hybrid of renewable energy solutions but the companies involved need to be monitored to ensure that they are controlled in way that does not exploit the citizens. The consumer needs to be put first and taken care of. I also think that a hybrid would be better preparation for future changes due to global warming as not taking this into account would just land us back in the "mud".	Amy	employed individual
2022-07-11 02:54:35	Western Cape		Yes I do	Solar	There should be a combination of power sources. Wind and Solar and Hydro would be ideal!	Lynne	employed individual
2022-07-11 02:39:29	Free State		Yes I do	Solar		Anza	employed individual
2022-07-11 02:33:48	Western Cape		Yes I do	Solar		Anne	employed individual
2022-07-11 02:31:58	Western Cape		Yes I do	Solar	We actually need a hybrid.where solar ,wind and hydro is used to produce energy depending on the environment /site /location's geographical conditions. For the most partSOLAR as we have so MANY sunshine days in terms whole of South Africa !!	Fatgieya	employed individual
2022-07-11 02:00:08	Outside SA	Canada	Yes I do	Solar	Have private homes contribute to the power grid with solar power.	Christi- Mari	employed individual
2022-07-11 02:00:05	Outside SA	Canada	Yes I do	Solar	Have private homes contribute to the power grid with solar power.	Christi- Mari	employed individual
2022-07-11 01:48:01	Western Cape		Yes I do	Solar	Eskom has failed South Africa, it is time to let others share the burden and fix their mistake. However, we cannot sit by the sidelines as the world sinks further into the climate crisis, we must build the infrastructure for and subsidise renewable energy sources from Independent Power Producers.	Carl	employed individual
2022-07-11 01:47:30	Western Cape		Yes I do	Solar		Aubrey Johannes	employed individual
2022-07-11 01:24:38	Gauteng		Yes I do	Solar	We have vast amounts of Sunny days and using solar can help take the strain of Eskom and the grid therefore less to no loadshedding and eventually a reduction in SA's carbon foot print. With the ageing Eskom infrastructure and constant break downs we needs to pursue other alternatives as this current process is definitely failing. The fuel price is so high that we are burning billions when the open turbines are running. We need to also Perdue wind and water options fir generating electricity. IPPs can possible create more jobs in SA and reduce unemployment as well as create options for us to have a choice in our preferred electricity preference. Currently our lives are being dictated by Eskom. We can't keep throwing money into Eskom as they become a black hole and don't think they will ever recover from this situation.	Melesh	employed individual
2022-07-11 01:21:31	Western Cape		Yes I do	Solar		Nila	employed individual
2022-07-11 01:02:51	Gauteng		Yes I do	Solar	Making full use of CSR technology provides clean cheap green electricity with little to no externalities.	Joseph	employed individual
2022-07-11 00:58:31	Gauteng		Yes I do	Solar		Matthias	employed individual
2022-07-11 00:58:18	Gauteng		Yes I do	Solar		Ansie	employed individual
2022-07-11 00:58:16	Gauteng		Yes I do	Solar		Ansie	employed individual

2022-07-11 00:55:22	Gauteng		Yes I do	Solar		Carol	employed individual
2022-07-11 00:55:18	Gauteng		Yes I do	Solar		Carol	employed individual
2022-07-11 00:40:33	Western Cape		Yes I do	Solar		Evan	employed individual
2022-07-11 00:39:50	Western Cape		Yes I do	Solar		Joshua	employed individual
2022-07-11 00:37:38	Gauteng		Yes I do	Solar		Molete	employed individual
2022-07-11 00:29:23	KwaZulu-Natal		Yes I do	Solar	Any other product other than coal and diesel.	Magalingam	employed individual
2022-07-11 00:24:31	Eastern Cape		Yes I do	Solar		Andre	employed individual
2022-07-11 00:03:13	Western Cape		Yes I do	Solar		David	employed individual
2022-07-11 00:02:41	Gauteng		Yes I do	Solar	Dit is die beste oplossing Daar is altyd son beskikbaar elke dag Aanvanklike koste mag dalk hoop wees, maar in die lang termyn winsgewind Elke munisipaliteit kan selfs na die oplossing kyk	Jenni	employed individual
2022-07-10 23:59:59	Gauteng		Yes I do	Solar	South Africa's aging coal power stations will continue to fail and solar energy is the quickest form of energy to get running.	Simon	employed individual
2022-07-10 23:59:36	Western Cape		Yes I do	Solar		Roeshdie	employed individual
2022-07-10 23:57:44	Western Cape		Yes I do	Solar	The three main sources of clean energy are wind energy, solar energy, and hydroelectric energy. I would select whichever 1 of these 3 are the quickest to get up & running, helping South Africans. If possible, all can be implemented over time. If we want to stop climate change we have a great opportunity in front of us, renewables. This transition will not only protect future generations, but it will also come with huge health benefits for the current one. Advantages • Disadvantages • Renewable energy won't run out • Renewable energy has high upfront costs • Renewable energy has lower maintenance requirements • Renewable energy is intermittent • Renewables save money • Renewables have limited storage capabilities Due to the disadvantages listed, it would be wise to offer multiple sources of energy.	Tracy	employed individual
2022-07-10 23:51:15	Western Cape		Yes I do	Solar	South Africa has enough sun and solar radiation to be supplying more than enough electricity not only to South Africa, but also to be exporting it to other countries. It is well past time that government was removed from their negative and detrimental role in electricity supply, and that electricity generation and supply was handed over to free enterprise. This is our only hope of overcoming the current disastrous situation which is pushing SA closer to the edge of a cliff with every passing day.	Helen	employed individual
2022-07-10 23:48:16	Western Cape		Yes I do	Solar	Solar is the easiest way to provide power by companies and households but only workable if they sell it for the same rates we pay for it.	Carel	employed individual
2022-07-10 23:41:58	Eastern Cape		Yes I do	Solar	Eskom has and is really struggling to sustain itself under the current demand of electricity. Municipality should address the stealing of electricity through izinyoka nyoka. We as South Africans deserve better and Eskom must Up their game. I support the initiative to remove the red tape.	Asanda	employed individual
2022-07-10 23:36:11	Western Cape		Yes I do	Solar		Mark	employed individual
2022-07-10 23:30:05	Western Cape		Yes I do	Solar		Fiona	employed individual
2022-07-10 23:28:57	Gauteng		Yes I do	Solar	Government and Eskom structures have failed society despite numerous chances and price hikes to the detriment of the economy and the well being of South African's in general, reputable and efficient Independent Power Suppliers will be a welcome move to reduce tariffs and serve the country with highly punitive measures in place if service delivery fails. We cannot continue to throw good money after bad to the likes of Eskom bails outs and corrupt government officials and ill reputed contracted business entities. They should still be held to account, as any alternative service providers may absolve them by default. Any form of capture as with the state should be deemed an act of treason and receive the full might of the law and locked up and the keys thrown away too. Just my 2 cents worth.	Sajid	employed individual
2022-07-10 23:10:41	Western Cape		Yes I do	Solar	Should others be allowed to produced, Eskom should also be given the same rights. They should be able to procure without government oversight, as well as be able to make decisions about generation capacity and be able to set their own prices. Taking Eskom down in the process of giving others more freedom, will be devastating for South Africa.	Martin	employed individual
2022-07-10 23:00:58	Western Cape		Yes I do	Solar	The current government does not care about the country, please let this be allowed for independent producers as there is a lot of potential in the right hands.	Bertus	employed individual
2022-07-10 22:58:25	Western Cape		Yes I do	Solar		Naomi	employed individual
2022-07-10 22:53:27	Gauteng		Yes I do	Solar		Carola	employed individual
2022-07-10 22:52:05	Western Cape		Yes I do	Solar	Why not subsidise solar panels and bi-directional inverters for home and small business? Over production can then be feed back into the grid. This may seem small but it is a start.	Ian	employed individual

2022-07-10 22:50:56	Gauteng		Yes I do	Solar	South Africa has more than enough sunlight to produce its own solar energy. More than enough wind to generate wind powered solutions.	Patrick	employed individual
2022-07-10 22:48:29	Free State		Yes I do	Solar		Azille	employed individual
2022-07-10 22:45:29	Gauteng		Yes I do	Solar	This should have happened years ago. Let people who know what they are doing get involved	Tori	employed individual
2022-07-10 22:43:07	Western Cape		Yes I do	Solar		Elmalize	employed individual
2022-07-10 22:42:36	Western Cape		Yes I do	Solar	We have so much free space to put up solar panels and the perfect weather to generate sufficient energy from them.	Ewald	employed individual
2022-07-10 22:42:33	Gauteng		Yes I do	Solar		Johan	employed individual
2022-07-10 22:33:02	Gauteng		Yes I do	Solar		Yolandi	employed individual
2022-07-10 22:31:07	Gauteng		Yes I do	Solar		Tammy	employed individual
2022-07-10 22:30:26	Gauteng		Yes I do	Solar	We have the ideal weather conditions for wind and solar producing energy.. I want to suggest wind power as well. The government has been slow to change over so independent action is required. Is it other interests that makes Mantasha stick with coal ?0724557560	Sheila	employed individual
2022-07-10 22:27:24	Limpopo		Yes I do	Solar		Khomotso	employed individual
2022-07-10 22:27:22	Western Cape		Yes I do	Solar		Paul	employed individual
2022-07-10 22:27:16	Mpumalanga		Yes I do	Solar	Privatize Eskom please	Treston	employed individual
2022-07-10 22:25:01	Western Cape		Yes I do	Solar		Andrea	employed individual
2022-07-10 22:19:57	Free State		Yes I do	Solar			employed individual
2022-07-10 22:19:30	Gauteng		Yes I do	Solar			employed individual
2022-07-10 22:17:41	Gauteng		Yes I do	Solar	Cut the red tape! Pull your finger out your nose! Hire people who can do the job and stop pillaging from the state coffers!	Jenny-lea	employed individual
2022-07-10 22:17:05	Western Cape		Yes I do	Solar		Magda	employed individual
2022-07-10 22:16:57	Mpumalanga		Yes I do	Solar			employed individual
2022-07-10 22:14:43	Gauteng		Yes I do	Solar		Wilma	employed individual
2022-07-10 22:12:21	Western Cape		Yes I do	Solar	Solar is lowest cost, and quickest to bring to fruition. Combined with batteries it's a complete solution.	Lisa	employed individual
2022-07-10 22:12:10	Gauteng		Yes I do	Solar	Solar power is the most sustainable source of power generation in SA, but we should not install solar "farms", since the land used for the production of fresh produce, ie farming is essential. We need to look at how to use roof space, high rise buildings etc to place the solar panels and feed the energy into the grid.	Frances	employed individual
2022-07-10 22:09:02	Western Cape		Yes I do	Solar	We need to start supplementing the traditional power plants with sustainable energy sources and work towards a more stable solution than we currently have.	Alula	employed individual
2022-07-10 22:08:51	Gauteng		Yes I do	Solar		Nazley	employed individual
2022-07-10 22:07:48	Gauteng		Yes I do	Solar		Andre	employed individual
2022-07-10 22:07:45	Western Cape		Yes I do	Solar	BEE ruined this country. The ANC and their corrupt partners have made us pay for a service that they can't provide. A more reliable energy source that can create more jobs and benefit parties that are not fraudulent.	Kyla	employed individual
2022-07-10 22:06:33	Western Cape		Yes I do	Solar	The ANC government needs to minimize their damage on power supply by minimizing their involvement	Joshua	employed individual
2022-07-10 22:06:13	Gauteng		Yes I do	Solar		Carlos	employed individual
2022-07-10 22:05:22	Free State		Yes I do	Solar		Seipei	employed individual
2022-07-10 22:04:09	Western Cape		Yes I do	Solar	Actually a variety of sources is needed - solar, wind, hydro etc. Scrap the red tape and save the country. Help small businesses by knitting them out with solar panels and batteries, with a small wind turbine thrown in for good measure	Rejane	employed individual

2022-07-10 22:02:14	Gauteng	Yes I do	Solar	<p>Solar - as well as any and every other means possible. Hydro will only work in areas where there is sufficient water.</p> <p>Suggestion - why not use old mines for geothermal energy and research elements that ignite at lower temperatures, making drilling deeper than 2 km unnecessary?</p> <p>Why not use the coastlines - the waves are huge dynamos which can generate an endless supply of electricity.</p> <p>Why not allow the private sector to manufacture devices which contain copper and zinc which customers can then fill with wet soil to make earth batteries which can allow for lights and cellphones to be charged at 5 Watts each? This can relieve the strain on the grid if every person has such an earth light. (There are videos on Youtube explaining how this is done.)</p>	Sonja	employed individual
2022-07-10 22:01:32	KwaZulu-Natal	Yes I do	Solar	<p>We have the necessary means to have both solar, hydro and other forms of electrical production. Long term these changes will greatly impact the economy and the environment and allow for sustainability. It will also reduce the financial strain for South African citizens.</p>	Marrissa	employed individual
2022-07-10 22:00:25	Western Cape	Yes I do	Solar	<p>Solar AND wind. The experience and knowledge is out there, ready to be harnessed for the good of South Africa.</p> <p>South Africa is blessed with a long coastline and lots of sunshine, meaning both wind and solar power are excellent options.</p> <p>The sooner IPP's are allowed to pump electricity into the grid, the sooner the deterioration of the economy can stop - in the process, existing jobs can be saved and new jobs can be created and knowledge can be transferred.</p> <p>The solution is out there, please allow it!</p>	Phillip	employed individual
2022-07-10 21:59:23	Western Cape	Yes I do	Solar		Marguerite	employed individual
2022-07-10 21:59:14	Gauteng	Yes I do	Solar	<p>It's time for action and over the years government owned entities have let the SA public down by misappropriating funds. Competition is needed so let's get competition in and renewable energy sources.</p>	Cathy	employed individual
2022-07-10 21:58:55	Western Cape	Yes I do	Solar		Giovanni	employed individual
2022-07-10 21:57:50	Western Cape	Yes I do	Solar		Jackie	employed individual
2022-07-10 21:57:34	Gauteng	Yes I do	Solar	<p>Stop breaking the economy just to accommodate 1 organisation. More jobs will be created.</p>	Chani	employed individual
2022-07-10 21:56:49	Eastern Cape	Yes I do	Solar		Tony	employed individual
2022-07-10 21:55:43	Gauteng	Yes I do	Solar	<p>I think being furthest South, South Africa can take full advantage of various renewable energy resources, like Wind and Solar Energy. The East Coast and West Coast are suitable placed for SA to take advantage of Wind energy. The Solar also plentiful considering that this is Africa. Gas can be added to the two previously mentioned energy sources.</p>	Thebe	employed individual
2022-07-10 21:55:28	Gauteng	Yes I do	Solar		Cara	employed individual
2022-07-10 21:53:24	Western Cape	Yes I do	Solar	<p>We should open up the opportunity to make use of the creativity and desire amongst South Africans to solve our energy crisis, by a variety of technologies. We have the technology, we have the skills, we have the investors, but we lack the political will, due to corruption.</p> <p>Any politician who blocks our nation's desire to become energy resilient, is hiding their real agenda, and should be voted out of office.</p> <p>Solar, wind farms, hydro and nuclear should all be encouraged.</p>	Jonathan	employed individual
2022-07-10 21:52:45	KwaZulu-Natal	Yes I do	Solar	<p>Renewables are the way to go and scrap the red tape. Any additional electricity should be allowed to be added to the grid.</p>	Penny	employed individual
2022-07-10 21:52:00	Western Cape	Yes I do	Solar		Jenine	employed individual

2022-07-10 21:50:19	Western Cape	Yes I do	Solar		Greg	employed individual
2022-07-10 21:49:28	Mpumalanga	Yes I do	Solar	<p>Coal is still the cheapest, but all the corruption has made it very expensive, Runner up will be solar, with individuals and companies installing Solar Panels on their property and connecting to the grid - and being paid for the excess electricity</p>	Benjamin	employed individual
2022-07-10 21:48:15	Gauteng	Yes I do	Solar	<p>Solar power will take us off Eskom grid.... Eskom runs the monopoly.... Cut the red tape now</p>	Rashieda	employed individual
2022-07-10 21:48:08	Western Cape	Yes I do	Solar	<p>Solar and Wind power are the cheapest, fastest, most safe and good for the environment energy source.</p>	Preben	employed individual
2022-07-10 21:46:42	Gauteng	Yes I do	Solar	<p>Plenty of sun, plenty of land</p>	James	employed individual
2022-07-10 21:46:32	KwaZulu-Natal	Yes I do	Solar	<p>We need this implemented as soon as possible as we are being billed at high estimated rates. Change needs to be made asap</p>	Subashni	employed individual
2022-07-10 21:46:18	Western Cape	Yes I do	Solar		Sam	employed individual

2022-07-10 21:45:42	Gauteng		Yes I do	Solar		Sheldon	employed individual
2022-07-10 21:45:05	Gauteng		Yes I do	Solar	Each method has its advantages. But, as we all know, the problem is deeply political, not technical. Consider: Gwen Ngwenya, DA head of policy, wrote: Eskom and BEE: A Total Eclipse of the Brain. : "Why is Eskom in trouble? Because it has high operating costs and cannot meet its debt obligations. Why? Projects to build two big power stations had huge cost overruns and technical faults. Why? A small bidding pool, meaning it was likely not cost-competitive from the start. Why? There was political meddling. Why? Contractors needed to have a black partner to secure contracts. Why? BEE."	Richard	employed individual
2022-07-10 21:44:47	Gauteng		Yes I do	Solar	We need to save our environment and our economy	Sally	employed individual
2022-07-10 21:42:59	Gauteng		Yes I do	Solar	Something needs to be done and the government should stand behind other methods of energy being produced	Kirsten	employed individual
2022-07-10 21:42:40	Free State		Yes I do	Solar		Lungile	employed individual
2022-07-10 21:41:13	Mpumalanga		Yes I do	Solar	Renewable energy is the way forward. Solar, hydro plants would be so beneficial to us and to the planet that sustains us. Eskom alone cannot provide us with what we need to progress as a country.	Cecilia	employed individual
2022-07-10 21:41:13	Mpumalanga		Yes I do	Solar	Renewable energy is the way forward. Solar, hydro plants would be so beneficial to us and to the planet that sustains us. Eskom alone cannot provide us with what we need to progress as a country.	Cecilia	employed individual
2022-07-10 21:40:09	Gauteng		Yes I do	Solar	Independent producers should come on board fast, by fair and transparent selection. tax on independently produced energy should never happen. Property rates already tax enough for infrastructure. All must immediately be done to ensure that the blackouts cease, it is breaking what is left of this country.	Dries	employed individual
2022-07-10 21:40:08	Western Cape		Yes I do	Solar	It's time we have better decision makers to solve this crisis. This should have happened many years ago.	Miles	employed individual
2022-07-10 21:36:05	Gauteng		Yes I do	Solar	We need to look at a solution immediately, it's already too little too late. A combination of different solutions need to be looked at. We are damaging the economy beyond repair.	Farhana	employed individual
2022-07-10 21:35:24	Eastern Cape		Yes I do	Solar	I think the red tape should be scrapped but also certain measures should be put in place as to also protect Eskom as a primary supplier. IPP's add to what is there while Eskom gets their affairs in order, hopefully by some form of legal obligation to do so.	Donum	employed individual
2022-07-10 21:34:58	KwaZulu-Natal		Yes I do	Solar	We have an abundance of solar radiation in this country. Eskom should put up solar farms on non-arable land with Tesla battery packs. Give private homes and business, including government, the ability to feed excess power back into the grid and get the full credit for it. It would be a distributed power producer system. Less risk of sabotage due to diversification.	Alan	employed individual
2022-07-10 21:34:57	Gauteng		Yes I do	Solar		Marsell	employed individual
2022-07-10 21:34:33	Eastern Cape		Yes I do	Solar	Any method of power production would work, we have so much natural resources in SA.	Anna	employed individual
2022-07-10 21:33:08	North West		Yes I do	Solar		Nadia	employed individual
2022-07-10 21:32:39	Mpumalanga	South Africa	Yes I do	Solar		Kelebogile	employed individual
2022-07-10 21:30:27	KwaZulu-Natal		Yes I do	Solar	Solar energy is always available. There must be legislation to oversee that independent providers have something like an Ombudsman so that they do not hike prices as they are big business too.	Thiru	employed individual
2022-07-10 21:28:47	Western Cape		Yes I do	Solar	In addition to solar power, we should also take advantage of the strong winds in certain parts of the country to produce power (e.g. Gqeberha; Cape Town in the summer months, etc).	Jamie	employed individual
2022-07-10 21:27:42	Gauteng		Yes I do	Solar	Solar system is the best option, I guess! There won't be a problem of cables being stolen	Kgao	employed individual
2022-07-10 21:23:29	Gauteng		Yes I do	Solar		Themba	employed individual
2022-07-10 21:20:59	Gauteng		Yes I do	Solar	Use our money wisely and help us have a secure solution	Cleone	employed individual
2022-07-10 21:20:16	Gauteng		Yes I do	Solar	In SA we have abundant Solar and Wind sources of energy available and this should be utilized immediately to allow SA to have enough electricity to get the economy growing again. Industries and businesses are suffering due to the constant loadshedding and without this burden more companies would be able to expand thus creating jobs. Municipalities should be allowed to generate their own electricity or appoint IPPs directly without the insane amount of red tape.	Morne	employed individual
2022-07-10 21:19:07	Western Cape		Yes I do	Solar		Brian	employed individual
2022-07-10 21:19:00	Western Cape		Yes I do	Solar	Of all the renewable energies, sun power is abundantly available in South Africa and it's the one thing we'll always have more of thanks to global warming. Dependency on carbon-based fuel is too dependent on politics, inflation and stock prices. Whereas I'm not sure of the impact on the environment, initial costs and how quickly solar power can be implemented, in the long term it will provide a sure source of clean power for everyone in SA.	Sharne	employed individual
2022-07-10 21:17:51	Western Cape		Yes I do	Solar		M	employed individual

2022-07-10 21:17:50	Western Cape		Yes I do	Solar	South Africa should be moving to expand accessibility to renewable energy sources. Independent producers entering the market would give consumers choice and pricing would become more competitive and accessible to all	Natalia	employed individual
2022-07-10 21:16:30	Gauteng		Yes I do	Solar	Solar is the quickest route to electrical power. This will give breathing space for nuclear power stations to be built. Nuclear is safe and clean.	Gerrie	employed individual
2022-07-10 21:15:55	Gauteng		Yes I do	Solar	Any method that will alleviate the drudgery of load-shedding. All alternative suppliers should be welcomed, all private enterprise and all entrepreneurs. Without the expected corruption and nepotism. Do something different. Surprise us!	D	employed individual
2022-07-10 21:15:43	Gauteng		Yes I do	Solar		Marion	employed individual
2022-07-10 21:14:12	North West		Yes I do	Solar	Solar may be be exoensive ,but thr lasting solution to the problem,in my opinion	Kurian	employed individual
2022-07-10 21:13:46	Gauteng		Yes I do	Solar		Mandi	employed individual
2022-07-10 21:12:39	Gauteng		Yes I do	Solar	Solar power is the best Form as its clean and will also help with the pollution problem in our country	Asogran	employed individual
2022-07-10 21:12:29	Gauteng		Yes I do	Solar	The survey options above are very simplistic, and do not do justice to the complexity of the energy transition. However, there is an urgent need to expedite the transition dramatically. The need stems from our climate commitments, and our energy crisis. There is simply no justification remaining to sustain the status quo of the coal energy industry. Renewables need to be expedited by every means possible, and the energy transition needs to become a national program, driven at every level. The solutions will not be simple; they will be complex and messy. But we need to grapple with them NOW.	Dawid	employed individual
2022-07-10 21:12:08	Mpumal anga		Yes I do	Solar		Esther	employed individual
2022-07-10 21:10:20	Western Cape		Yes I do	Solar	I believe Solar and yes we need to look at local talent and resources here in South Africa outside of Government.	Antoinette	employed individual
2022-07-10 21:08:20	Outside SA	United Kingdom	Yes I do	Solar	Clean source and affordable	Antoinette	employed individual
2022-07-10 21:08:13	Gauteng		Yes I do	Solar		Andries	employed individual
2022-07-10 21:08:01	Western Cape		Yes I do	Solar		Annemari e	employed individual
2022-07-10 21:05:34	North West		Yes I do	Solar	In our country sunshine is something we have in abundance and we should be making full use of this as a source of energy and the cost should not be as expensive as it is at the moment. We probably need more than 1 alternative and this should be looked into	Heather	employed individual
2022-07-10 21:05:23	Western Cape		Yes I do	Solar	SA needs to provision our energy needs for the future. The world energy crisis has shifted things significantly. We are short of power and this is holding us back as a country. No more delays. We have to move away from the Eskom coal monopoly and diversify our energy sources.	Louise	employed individual
2022-07-10 21:05:20	Gauteng		Yes I do	Solar	The optimal solution will probably be a combination of coal, solar and wind power, provided by government and private sector.	Reneé	employed individual
2022-07-10 21:03:59	Free State		Yes I do	Solar		Andre	employed individual
2022-07-10 20:58:06	Gauteng		Yes I do	Solar	The government cannot supply the citizens with power. Eskom gets huge increases annually and the service gets worse ending up with loadshedding of 6 hours a day. Do they give discounts for their bad service. No. We just have to keep paying for bad service while their workers get some of the highest salaries un SA as Eskom is the 4 th highest paying institution in SA Let other companies supply solar, wind and sny other power they can at better prices than Eskom. Thst way SA citizens can choose a company that will give good service at good prices	Sheryl	employed individual
2022-07-10 20:58:05	Gauteng		Yes I do	Solar	The government cannot supply the citizens with power. Eskom gets huge increases annually and the service gets worse ending up with loadshedding of 6 hours a day. Do they give discounts for their bad service. No. We just have to keep paying for bad service while their workers get some of the highest salaries un SA as Eskom is the 4 th highest paying institution in SA Let other companies supply solar, wind and sny other power they can at better prices than Eskom. Thst way SA citizens can choose a company that will give good service at good prices	Sheryl	employed individual
2022-07-10 20:55:44	Western Cape		Yes I do	Solar	South Africans at every level are bearing the punishment of too many years of a struggling Eskom. There are no alternative options for average citizens, it is only the very rich who can afford to install their own personal power supply, and there are no independent options, no competition in the market, just an ill-performing monopoly. With independent power producers allowed, this might also finally give Eskom the chance to bounce back, with a lightened load. South Africa is lagging behind the rest of the world with our power generation options... As one writer noted, and I agree "Government need to set South Africa up to leverage the large benefits that will come from being an emerging market leader in the climate agenda, rather than making it bear the costs of lagging behind." I plead with you, please don't let our country suffer under this any longer, it's already been going on for too long.	Lizeth	employed individual
2022-07-10 20:55:09	Western Cape		Yes I do	Solar		Emma	employed individual

2022-07-10 20:51:21	KwaZulu- Natal		Yes I do	Solar	We need to operate like Australia- we pay our solar panels and get subsidies for electricity we generate but do not use that can be put back into the main grid.	Shannon	employed individual
2022-07-10 20:50:11	Gauteng		Yes I do	Solar	Any and all companies that have viable ; sustainable and affordable solutions to South Africa's energy crisis, should be given the opportunity to come forward with their proposals, It should be looked into and the best ones suitable for individual areas should be put into action. E.g Wind and solar for P.E. and Cape Town. Solar for Gauteng; North West and Mpumalanga. No nuclear or underhanded deals. No kickbacks for gravy train passengers. Just honest to goodness energy deals that will propel South Africa forward into a better economy.	Rajni	employed individual
2022-07-10 20:49:48	North West		Yes I do	Solar		Ronnie	employed individual
2022-07-10 20:48:12	Limpopo		Yes I do	Solar	Gov.failed completely and competition will keep price affordable	Brian	employed individual
2022-07-10 20:45:14	Western Cape		Yes I do	Solar		Andrea	employed individual
2022-07-10 20:41:26	Outside SA	Switzerla nd	Yes I do	Solar	Lots of sun in sunny SA??	Karin	employed individual
2022-07-10 20:41:22	Gauteng		Yes I do	Solar	I believe that the energy crisis has reached a point where immediate action needs to take place. I believe all forms of renewable energy need to be seriously considered and the best suited to the country and climate must be selected before the country becomes a failed state.	Shaazia	employed individual
2022-07-10 20:40:33	Western Cape		Yes I do	Solar		Tessa	employed individual
2022-07-10 20:39:49	Western Cape		Yes I do	Solar		Jacoba	employed individual
2022-07-10 20:38:53	KwaZulu- Natal		Yes I do	Solar	-Allow residential solar to be fed into the grid with immediate effect. This has helped greatly in the UK. -Start the privatization of Eskom and allow Eskom to be run like a business without constant government interference -Get Minister of Energy to do he's job and come up with a proper energy plan -Change labour laws to allow the rot at Eskom to be sorted out	Mauritz	employed individual
2022-07-10 20:38:06	North West		Yes I do	Solar		Victor	employed individual
2022-07-10 20:36:58	Western Cape		Yes I do	Solar	Power bills will no longer be part of our budget as it is weather dependent.	Nandiswa	employed individual
2022-07-10 20:35:11	KwaZulu- Natal		Yes I do	Solar	To the powers that be get off your arses and let's get the grid charged up. Stop the looting. Do not use this situation to fill your or your connections pocket. We are GATFOL with BBE, Affirmation Actio. I support the best people for the job irrespective of color.	Suresh	employed individual
2022-07-10 20:34:25	KwaZulu- Natal		Yes I do	Solar	anything that will assist to prevent loadshedding. this is killing businesses and all our appliances	rene	employed individual
2022-07-10 20:34:05	Gauteng		Yes I do	Solar			employed individual
2022-07-10 20:30:53	Western Cape		Yes I do	Solar	I think this has been obvious to everyone for a really really long time. The only reason it hasn't been done, is because the powers that be want it this way. Solar would be great, albeit costly. But we have a lot to gain from it, and so little to lose.	Rein	employed individual
2022-07-10 20:30:35	Gauteng		Yes I do	Solar	I agree to introduce the other independent contractor this Monopoly of Telkom is been going on for do long. We need competition so that they can compete to give the best service. That is why Telkom has this poor service is bcos is not competing with no one else to give the best. It's high time we choose whom we want as public. Phantsi nge Monopoly phantsi!!!!	Nomsa	employed individual
2022-07-10 20:30:06	Gauteng		Yes I do	Solar		Amanda	employed individual
2022-07-10 20:28:06	Gauteng		Yes I do	Solar		Charlene	employed individual
2022-07-10 20:25:43	Western Cape		Yes I do	Solar		Sean	employed individual
2022-07-10 20:25:33	Western Cape		Yes I do	Solar	It is time that we stop being punished for bad management and corruption. It is mind boggling that people can be paid so much when a job is not done properly. We need to bring in renewable energy and we need to ensure we get rid of the monopoly on power supply. It happened with Telekom and now it needs to happen with Eskom! It pushes for better service and less corruption. The time is now!	Teagan	employed individual
2022-07-10 20:23:49	Western Cape		Yes I do	Solar		Diane	employed individual
2022-07-10 20:22:08	Eastern Cape		Yes I do	Solar	It's free, constant and no emissions... We are a sunny country	Basildon	employed individual
2022-07-10 20:20:32	Mpumal anga		Yes I do	Solar		Inge	employed individual

2022-07-10 20:12:03	Gauteng		Yes I do	Solar		Lucky	employed individual
2022-07-10 20:11:20	Western Cape		Yes I do	Solar	Yes I do support scrapping the red tape for Independent Power Producers. In my opinion, Solar would suit SA's immediate energy needs. I absolutely support immediately giving independent power providers the green light to contribute towards the South African national power production! I specifically support wind and solar energy, but also all other forms of renewables! I only support imports of gas and fuel for our own energy needs and completely disagree with contracting other countries, like China, for energy production! I do not support nuclear energy or gas exploration.	Ian	employed individual
2022-07-10 20:10:00	Mpumalanga		Yes I do	Solar		Tsekiso	employed individual
2022-07-10 20:07:32	Western Cape		Yes I do	Solar	Solar power is free, compliments of the sun. Storing this power in battery banks for nightly use, is also a safe and a highly controlled environment. There is also minimal mechanical/moving parts that could cause downtime, compared to wind, hydro, gas, diesel, nuclear, etc. Maintenance on solar systems is also lower in costs in the long run.	Christo	employed individual
2022-07-10 20:07:04	Western Cape		Yes I do	Solar		Arthur	employed individual
2022-07-10 20:06:49	Western Cape		Yes I do	Solar		Gareth	employed individual
2022-07-10 20:06:37	Gauteng		Yes I do	Solar	Private residences should be able to generate and supply surplus electricity to the municipality and grid and incentivised for the investment.	Clive	employed individual
2022-07-10 20:05:51	Gauteng		Yes I do	Solar	I think South Africa's main natural disaster is drought, so let us turn that into a positive, it will be good for farmers to have a stable supply of electricity to power their boreholes.	Benson	employed individual
2022-07-10 20:04:55	Limpopo		Yes I do	Solar	Solar is environmental friendly and we urgently need additional recourses to prevent thousands of job losses Its clear that the government does not have the expertise or will to change the current power situation	Hennie	employed individual
2022-07-10 20:04:53	Limpopo		Yes I do	Solar	Solar is environmental friendly and we urgently need additional recourses to prevent thousands of job losses Its clear that the government does not have the expertise or will to change the current power situation	Hennie	employed individual
2022-07-10 20:04:53	Limpopo		Yes I do	Solar	Solar is environmental friendly and we urgently need additional recourses to prevent thousands of job losses Its clear that the government does not have the expertise or will to change the current power situation	Hennie	employed individual
2022-07-10 20:02:11	Western Cape		Yes I do	Solar		Eileen	employed individual
2022-07-10 20:00:45	Gauteng		Yes I do	Solar	Solar is quick and easy to deploy, will reduce pressure on Eskom but a mix of technology is required in the long term	Kobus	employed individual
2022-07-10 19:58:26	Gauteng		Yes I do	Solar	We've one of the Sunniest climates in the world but, yet the Government have lots of red tape on independent power suppliers cause they haven't figured out how to get their hands in that cookie jar legally to steal from it too!!!	Schön	employed individual
2022-07-10 19:57:47	Eastern Cape		Yes I do	Solar	Renewable energy will not impact negatively on climate change. Government must immediately consider selling 51% of Eskom to private and hold 49%	Sazi	employed individual
2022-07-10 19:57:39	Gauteng		Yes I do	Solar	Northern Cape is great for solar power Cape Town great for ocean and wind power these forms could generate enough energy for sa as well as moz that we supply it also offers new farming solutions as the solar panels provide shade for plants such as strawberries meaning more job creation.. and we can sell the coal mine to other countries.	Cornelia	employed individual
2022-07-10 19:56:41	Western Cape		Yes I do	Solar		André	employed individual
2022-07-10 19:56:39	Gauteng		Yes I do	Solar	Having just one entity supply power is not enough - clearly Eskom is way out of its depth. Allowing other suppliers to produce electricity would be such a boost for our country in so many ways. SA needs this!	Dana	employed individual
2022-07-10 19:54:44	Western Cape		Yes I do	Solar	I feel that a combination of electricity production method would apply for different areas. Hydro for coastal regions, solar for areas like the karoo and wind for more inland areas. We can not give one supplier the monopoly in electricity supplying. This is why a hand full of employees has SA on their knees	Amanda	employed individual
2022-07-10 19:53:41	Western Cape		Yes I do	Solar		Karen	employed individual
2022-07-10 19:53:33	Gauteng		Yes I do	Solar	We have so much opportunity to gain electricity through solar, as there is not consistently overcast days.	Willemien	employed individual
2022-07-10 19:53:32	KwaZulu-Natal		Yes I do	Solar	Whatever the solution be it solar, wind etc, the solution needs to come now and not in three years time. whatever constraints there are preventing IPP candidates from setting up supply in the immediate future must be removed. The government needs to stop trying to regulate everything as they end up stealing from tax payers and living luxurious lives while the tax payers are thrown deeper and deeper into poverty.	Raymond	employed individual

2022-07-10 19:52:20	Gauteng	Yes I do	Solar	Eskom is sliding down a slippery slope towards total blackout. Their management have mismanaged the entity so badly it is going to take years to repair. Any quick fix will have to be from outside sources and as Eskom already has too many coal burning power stations and it will take too long to build nuclear power stations and train personnel that leaves renewable energy. This is a water scarce country so wind and solar are the best candidates. while wind farms are being built, take a look at Cape Town's approach to solar power. If legislation could pushed through allowing municipalities to buy excess electricity from customers with solar power, this would provide the fastest way to relieve the energy crisis. If you don't believe me, just drive around and look at how many businesses and residences have gone solar.	Robert	employed individual
2022-07-10 19:51:14	Gauteng	Yes I do	Solar		Riekert	employed individual
2022-07-10 19:50:25	Gauteng	Yes I do	Solar		Nick	employed individual
2022-07-10 19:49:08	Gauteng	Yes I do	Solar	Solar can help to reduce electricity bills	Gysbert	employed individual
2022-07-10 19:47:53	Western Cape	Yes I do	Solar	Wind is also appropriate but stick to renewable clean energy	Jean	employed individual
2022-07-10 19:47:46	Gauteng	Yes I do	Solar	Solar power would not place such a heavy burden on the country's resources. We need multiple power suppliers.	Jenel	employed individual
2022-07-10 19:41:45	Western Cape	Yes I do	Solar	Eskom cannot supply South Africa electricity on their own anymore. We need Hydro, Solar, Gas and Wind power producers. We need more independent power producers and for the red tape to be cut - also, stop trying to make money out of people wanting to help South Africa. The sooner government is removed from the process and where they can have less control, the better. They screw everything up with their inability to manage anything and with their corruption.	Morne	employed individual
2022-07-10 19:35:44	Western Cape	Yes I do	Solar	In order for government to prevent a total black out, prevent losing businesses and jobs and provide South Africans with sufficient electricity, the best solution would be solar and wind energy.	Nataly	employed individual
2022-07-10 19:28:44	Gauteng	Yes I do	Solar	The government is not coping with supply demands. Why not subcontract services to those who can supply to help eliminate load shedding. It's in the country's best interest. It makes economic sense.	Belinda	employed individual
2022-07-10 19:26:47	Gauteng	Yes I do	Solar		Legoale	employed individual
2022-07-10 19:24:54	Western Cape	Yes I do	Solar		Nadia	employed individual
2022-07-10 19:24:07	Gauteng	Yes I do	Solar		marion	employed individual
2022-07-10 19:22:54	Western Cape	Yes I do	Solar	Eskom has failed to provide energy we are having to pay very high fees and half the day sit without electricity. Lets use solar and wind to our advantage.	Ingrid	employed individual
2022-07-10 19:21:21	Mpumalanga	Yes I do	Solar		Estelle	employed individual
2022-07-10 19:20:21	Gauteng	Yes I do	Solar		Ruaan	employed individual
2022-07-10 19:19:56	KwaZulu-Natal	Yes I do	Solar		Albert	employed individual
2022-07-10 19:18:04	KwaZulu-Natal	Yes I do	Solar	You are treating citizens like your pawns . This "load shedding" is untenable and will destroy this country. Hand over to people who can supplement the current dire situation. ANC, you WILL go the way of the National Party, and for the sake of our country, the sooner the better.	Andrea	employed individual
2022-07-10 19:08:27	Gauteng	Yes I do	Solar		Lisa	employed individual
2022-07-10 19:04:19	Gauteng	Yes I do	Solar	South Africa would benefit greatly from both solar and wind powered power solutions. Seeing as the Government will not look into this, the privitisation of this sector is the only solution that will help us with our electricity problem in South Africa.	Keegan	employed individual
2022-07-10 18:56:05	KwaZulu-Natal	Yes I do	Solar	Solar with battery storage will by far be the best and one of the quickest ways to provide immediate power to the grid. It might come at significant Capex, but solar is proven to pay for itself within 7-10 years. It is clean, virtually maintenance free, and efficient. If i can power my house with Solar and batteries - then I fail to understand why this concept cannot be scaled up. Heck, Government could even look at ways of incentivizing household and small business solar systems with low cost loans/ tax rebates etc similar to what Eskom did for the Shisa Solar geyser programme... It is not THE solution, but certainly must form part of the immediate solution. Nuclear is probably the next best thing to add to the grid, but that will take time.	Hugo	employed individual
2022-07-10 18:45:49	Gauteng	Yes I do	Solar		Dan	employed individual
2022-07-10 18:39:59	Eastern Cape	Yes I do	Solar		Cynthia	employed individual

2022-07-10 16:30:50	KwaZulu-Natal	Yes I do	Solar		Colin	employed individual
2022-07-10 16:26:44	Western Cape	Yes I do	Solar		Rifaad	employed individual
2022-07-10 16:25:59	Western Cape	Yes I do	Solar	solar PV photovoltaic is minimal maintenance compared to other forms of generation. It does however require battery banks or other mechanism of storing energy e.g. potential energy storage systems. a mix of energy including coal, nuclear and PV is imo the way to go, and please decentralize! Please break away from Simmerpan controlling everything!	Adrian	employed individual
2022-07-10 16:18:27	Gauteng	Yes I do	Solar	Allow those with solar generated energy to feed back into the grid. Take note of Germany's solution when they previously had energy issues.	Megan	employed individual
2022-07-10 16:14:22	Western Cape	Yes I do	Solar	Solar and wind will help.	Shaun	employed individual
2022-07-10 16:11:38	Western Cape	Yes I do	Solar	Solar is a no brainer in our country and it is climate friendly, so I support it with or without other energy sources like wind and gas (as in gas top stoves - ours has been a god send during the outages). Anything other than Eskom! We cannot allow this government owned enterprise to hold this country hostage anymore with it's corruption . It's rotten to the core, right down to paying suppliers for coal who get the weight up with stones in the trucks that do damage to the infrastructure. Fat salaries paid for no service while business suffer!	Sharon	employed individual
2022-07-10 16:06:53	Gauteng	Yes I do	Solar		Anton	employed individual
2022-07-10 16:06:03	Gauteng	Yes I do	Solar	With solar, you do not burn anything to generate power. Sunlight is free. If allowed, any person could power their own homes without worrying about no power when Eskom employees strike or structures are not kept in good working order.	Marionette	employed individual
2022-07-10 16:03:36	Western Cape	Yes I do	Solar		Michael	employed individual
2022-07-10 16:01:31	Western Cape	Yes I do	Solar	To echo another comment that sums up my thoughts: Solar household power should be subsidised and rolled out en-masse. Surely if large enough manufacturing orders are placed, cost can be reduced making it affordable for most households. The remaining power requirements for industry should be whatever they can sustainably manage, supplied by private enterprise. Green power is great, but should it prove insufficient, a well-run, private nuclear power station seems to be the next logical choice.	Ben	employed individual

2022-07-10 16:01:23	Gauteng		Yes I do	Solar	Get rid of BEE, then the country will thrive again	Laps	employed individual
2022-07-10 16:00:16	Gauteng		Yes I do	Solar		Pierre	employed individual
2022-07-10 15:58:08	Gauteng		Yes I do	Solar	Unfortunately we cannot trust our government to take care of the energy needs of our people, so at this stage I believe there is no other way. Privatize the industry, give our people their basic needs. The government will need to keep their electricity plants (because private companies will likely not want to give their energy to neighboring countries) but in the long run it will take the pressure off of government.	Samantha	employed individual
2022-07-10 15:44:36	Western Cape		Yes I do	Solar	Due to corruption, sabotage and striking, Eskom is unable to provide electricity to the country. Factors such as individuals or groups illegally receiving electricity, but do not pay for it, is also causing serious damage. A few years ago, thousands were loaned from another country to us, for the purpose of building a new plant to provide for the increasing demand for electricity. This wasn't done, yet electricity tariffs were pushed through the roof to pay back the money. The plant wasn't built, the money disappeared and we are paying more and more for electricity by the day. Eskom's facility and machines were not maintained and serviced, and so one after the other is failing. Yet, Eskom is being used like a minority's private piggy bank. Funds just vanish and there is nothing to show for it. Why must the entire country suffer for the selfishness of a few? People can't cook food, keep warm or do their work because the power is constantly off. People are losing their jobs. Unemployment increases, crime increases. It is costing government thousands if not billions to turn off the power for a few hours, and for what? The demand won't disappear. And if no one will take action because criminals have more rights than the law abiding citizens, and those responsible will not be fired, persecuted or sentenced, then alternative independent power producers must be allowed to help. And the government should not bring about legislation to prevent this, because someone somewhere can no longer steal money. Enough is enough.	Vicci	employed individual
2022-07-10 15:43:04	Gauteng		Yes I do	Solar		Leigh-Ann	employed individual
2022-07-10 15:42:10	KwaZulu-Natal		Yes I do	Solar	We need to get electricity sorted as Companies cannot operate efficiently with no power.	Jean	employed individual

2022-07-10 15:06:06	Western Cape		Yes I do	Solar	We have plenty of sun and wind. Lets harness these for now	Louise	employed individual
2022-07-10 14:58:28	Gauteng		Yes I do	Solar	Government should not own and/or control power production. I do however think that a central power grid should be maintained with tax payer money, but managed by a non profit managed and operated by civilians. Independent suppliers need to supply to the grid and not just their own "personal" network - otherwise we are locked into a new monopoly and held for ransom.	Jaco	employed individual
2022-07-10 14:55:39	Western Cape		Yes I do	Solar		Nicolette	employed individual
2022-07-10 14:49:33	Mpumalanga		Yes I do	Solar		Josua	employed individual
2022-07-10 14:45:13	Western Cape		Yes I do	Solar	We have ample sun and wind. Please think about global warming and start thinking of using God supplied elements	Johan	employed individual
2022-07-10 14:43:26	KwaZulu-Natal		Yes I do	Solar		Gordon	employed individual
2022-07-10 14:40:20	Gauteng		Yes I do	Solar	Gas solar hydro and wind power but to be honest any means, but it needs to be privatized to get the job done properly.	Nicole	employed individual
2022-07-10 14:36:09	Western Cape		Yes I do	Solar		Frank	employed individual
2022-07-10 14:35:42	Western Cape		Yes I do	Solar	Fossil fuels are dirty, SOEs are failing and despite billions spend, still fail. Renewables is the answer. Government should get over their egos, remove red tape and open up the market for PPPs, including reversible electricity meters for private households.	Lourens	employed individual
2022-07-10 14:31:56	Gauteng		Yes I do	Solar	Incorporating power that is being generated by solar, by individuals, corporations and others, into the grid and reimbursing them would help initially. Europe does this as a matter of course	Kirsten	employed individual

2022-07-10 14:31:17	Eastern Cape		Yes I do	Solar	The Government has had plenty of time to sort out Eskom and yet we still have load shedding, tariff hikes and poor service delivery. Government is also mismanaging any money that should go towards electricity. They had more than enough time since 1994 to upgrade the systems, however they did nothing. With its inability to provide power the government should now fast track alternative solutions and do everything in its power to facilitate the swiftest resolution.	KAREN	employed individual
2022-07-10 14:30:49	Western Cape		Yes I do	Solar	Give of to the city of cape town cause eskom is failing us	Duwayne	employed individual
2022-07-10 14:24:29	Gauteng		Yes I do	Solar	The Government has had plenty of time to sort out Eskom and yet we still have load shedding, tariff hikes and poor service delivery. With its inability to provide power the government should now fast track alternative solutions and do everything in its power to facilitate the swiftest resolution.	Melonie	employed individual
2022-07-10 14:24:21	Eastern Cape		Yes I do	Solar	We have the perfect climate for a solar array that can supplement our power needs.	Jo-Anne	employed individual
2022-07-10 14:16:20	Western Cape		Yes I do	Solar	Unless we solve the power crisis...unemployment will get worse...not better. Producing solar panels in SA should not be the focus. Getting sditiinal power...enables the creation of job opportunities. Solar panels produced in USA, Canada & China are subsidised by their taxpayers...SA. simply cannot compete. Dump the red tape around local content ASAP. Bring in solar & wind PPE's NOW and develop batteries using minerals mined in SA....to supply to the world. ASAP	Mark	employed individual
2022-07-10 14:16:05	Gauteng		Yes I do	Solar	Renewable resources are the only way forward for our future.	Noëlle	employed individual
2022-07-10 14:08:00	Gauteng		Yes I do	Solar		Mari	employed individual
2022-07-10 13:58:49	Gauteng		Yes I do	Solar	It's time to move away from a dying Eskom and introduce a FAIR process allowing independent suppliers to provide electricity. No Government BEE corrupt tender process involved	Y	employed individual
2022-07-10 13:52:12	Western Cape		Yes I do	Solar		Pieter	employed individual
2022-07-10 13:49:41	Western Cape		Yes I do	Solar	Sunlight costs nothing and we have plenty of it in South Africa	Pino	employed individual
2022-07-10 13:34:48	Western Cape		Yes I do	Solar	Solar, hydro and wind all of them please. We should get weaned off coal and nuclear. We have to consider future generations and the problem of disposing off nuclear waste.	RUTH	employed individual
2022-07-10 13:31:24	Gauteng		Yes I do	Solar		Wilmari	employed individual
2022-07-10 13:31:19	Gauteng		Yes I do	Solar	Making solr cheaper an more available to the public Government can subsidies portion of the installation and we can all contribute to the grid and help with supplying power to the grid. We can need to be able to get tax reduction for this as well	Peter	employed individual
2022-07-10 13:27:45	Mpumal anga		Yes I do	Solar		Joy	employed individual
2022-07-10 13:23:35	Gauteng		Yes I do	Solar		Reto	employed individual
2022-07-10 13:23:32	Gauteng		Yes I do	Solar		Reto	employed individual
2022-07-10 13:23:21	Free State		Yes I do	Solar		Carin	employed individual
2022-07-10 13:21:59	Outside SA	Malta	Yes I do	Solar	Government has proven that the cannot be counted on to provide the country with sufficient, stable electricity. Any attempt to further deny independent suppliers to enter the market should be seen as an attempt to hinder the growth of the country. Short term, the fasted solution would probably be to start producing electricity through solar means, but ultimately nuclear would probably be the best source if the country could manage to attract the best possible knowledgeable people to run and operate such plants.	Theuns	employed individual
2022-07-10 13:17:40	Western Cape		Yes I do	Solar		Jorren	employed individual
2022-07-10 13:13:56	Gauteng		Yes I do	Solar	SA is in a state of disaster and we can't waste any more time. Eskom has failed, admit it and stop flogging that dead horse. These plans should have been in place years ago but while you are still trying to get your act together, make solar systems affordable to citizens to take the pressure of the grid.	Paula	employed individual
2022-07-10 13:09:40	Gauteng		Yes I do	Solar		Anton	employed individual
2022-07-10 13:04:34	Eastern Cape		Yes I do	Solar		Anke	employed individual
2022-07-10 13:00:16	Limpopo		Yes I do	Solar		Monica	employed individual
2022-07-10 12:58:31	Western Cape		Yes I do	Solar	We have sufficient renewable energy to take care of all of SA' s electricity requirements. The minister must stop forcing coal and Eskom.	Mike	employed individual

2022-07-10 12:56:16	Outside SA	UK	Yes I do	Solar	12 years of experience in the renewable energy sector as an electrical engineer, knowledge of the UK and European capacity markets, and I grew up in Botswana. Southern Africa has some of the highest solar irradiance figures in the world. Allowing IPPs would reinforce the grid supply, diversify away from fossil fuels, force modernising of the grid and create thousands of jobs. Additional safeguarding, policy creation and regulation would need to be put in place to protect against misuse, bad practices and corruption.	Graham	employed individual
2022-07-10 12:52:35	Gauteng		Yes I do	Solar		Francois	employed individual
2022-07-10 12:48:01	Gauteng		Yes I do	Solar	Much of our inland area has cloud free days, particularly in winter, and our winter sun is still very strong. I also recommend that homes and hotels are subsidised to get solar hot water as this is the most efficient use of solar energy. I live in Pretoria and I almost never use any electricity to heat the water for my home. Along the coastal area I think that wind energy is possibly better as the breeze is fairly constant and reliable in some areas.	Philip	employed individual
2022-07-10 12:47:38	Gauteng		Yes I do	Solar		Sergio	employed individual
2022-07-10 12:42:48	Gauteng		Yes I do	Solar	Households should be allowed and encouraged to install solar power systems and load electricity to the grid. Businesses should be limited to 80% PV systems (no batteries for storage) to enable businesses to operate but still make use of Eskom. Eskom should focus to sell electricity to neighbouring countries and build renewable energy plants and do away with coal power.	Willem	employed individual
2022-07-10 12:37:25	Eastern Cape		Yes I do	Solar	Need to move away from ESKOM, so captured - ANC not capable of fixing - only way is to privatize and create sustainable jobs	Nicky	employed individual
2022-07-10 12:36:56	Western Cape		Yes I do	Solar	We have an abundance of sun as well as wind to aid in electric generation. Why are we doing on archaic techniques to power a nation?	Dean	employed individual
2022-07-10 12:33:28	Mpumalanga		Yes I do	Solar	I actually support all different types of energy. They all have pros and cons. We need a change now. Eskom is not working and businesses are suffering. We will not get overseas investments while there is incompetence. I do believe the government is trying to crash the economy.	Alison	employed individual
2022-07-10 12:31:52	Western Cape		Yes I do	Solar	Combination of renewables (solar and wind) with gas as interim measure. Install additional battery storage and allow small generators/ households to push excess energy into the grid for immediate use as well as storage.	Pierre	employed individual
2022-07-10 12:27:24	Western Cape		Yes I do	Solar	Solar is tried and tested, affordable and available - if the gov were really interested in ending the Eskom crisis they would reintroduce rebates and encourage people to reduce the demand of the grid.	Amy	employed individual
2022-07-10 12:25:56	Western Cape		Yes I do	Solar		Nadia	employed individual
2022-07-10 12:25:46	Northern Cape		Yes I do	Solar	The red tape is keeping us behind and forever being troubled by Eskom. Get rid of it, allow IPPs to operate, we will learn and improve as time goes, also we'll be fighting against climate change with renewable energy solutions.	Katlego	employed individual
2022-07-10 12:13:41	Gauteng		Yes I do	Solar		Stephan	employed individual
2022-07-10 12:11:55	KwaZulu- Natal		Yes I do	Solar	The present system is not working and is reliant on coal and diesel which is in conflict with carbon emissions and rising fuel prices. Let's change to an alternative of solar and wind, and even go as far as subsidising solar installation into private households to reduce the energy load on the grid. This will result in macro dynamic effect of productive economy for SA which will be much more healthier on all ends of the scale.	Peter Francis	employed individual
2022-07-10 12:06:37	Western Cape		Yes I do	Solar		Monique	employed individual
2022-07-10 12:03:41	Western Cape		Yes I do	Solar	The truth is that right now it is not so much the method of electricity production that matters but rather just the actual production of electricity. If this means that nuclear power or gas is best suited to supply our immediate and short-term electricity production needs then that is what should be used. Long term though I totally support the production of electricity from using solar- and wind-power or any other sustainable means that there may be. I also support independent power producers being brought online to encourage price control so long as no monopolies result.	Enid	employed individual
2022-07-10 12:02:05	Western Cape		Yes I do	Solar		Marc	employed individual
2022-07-10 12:01:07	KwaZulu- Natal		Yes I do	Solar	Independent power producers will allow us to have electricity at an affordable rate not a price that is over inflated. There is no competition and we have no freedom of choice, it is run as a dictatorship at the moment.	Sue	employed individual
2022-07-10 11:59:33	Western Cape		Yes I do	Solar		Reg	employed individual
2022-07-10 11:57:00	Gauteng		Yes I do	Solar	Any renewable type of energy should be used.	Elsie	employed individual
2022-07-10 11:48:14	Outside SA	Germany	Yes I do	Solar	Nuclear is the most compact, unfortunately very few can be trusted with the potential risk. SA have good sunny days, push solar, and wind where practical. Solar and wind provide decentralized generation, dramatically reducing the dependency on HT distribution lines.	Chris	employed individual
2022-07-10 11:47:48	Western Cape		Yes I do	Solar	Subsidize solar panels on each individual home - the extra power generated can be fed back into the grid and pay off the subsidy	C	employed individual
2022-07-10 11:47:27	North West		Yes I do	Solar	..	Mariaan	employed individual
2022-07-10 11:37:54	KwaZulu- Natal		Yes I do	Solar		NAREN	employed individual

2022-07-10 11:36:29	Western Cape		Yes I do	Solar	Renewable solar and wind to be generated by the private sector	BM	employed individual
2022-07-10 11:34:31	Gauteng		Yes I do	Solar		Peter	employed individual
2022-07-10 11:26:55	Gauteng		Yes I do	Solar	I chose solar here. However any solution is urgently needed now to prevent loadshedding. Government must allow all forms of generating electricity to be utilized.	Rendani	employed individual
2022-07-10 11:25:25	Western Cape		Yes I do	Solar		Matt	employed individual
2022-07-10 11:23:33	Gauteng		Yes I do	Solar	Connect the Independent Power Production!!	Derek	employed individual
2022-07-10 11:23:26	Outside SA	United Kingdom	Yes I do	Solar		Johannes	employed individual
2022-07-10 11:22:32	KwaZulu- Natal		Yes I do	Solar	Solar would most likely be an energy system that could be the most rapidly implemented across the country at small to medium scale, and provide a buffer whilst the country invests in systems that offer more power such as wind and hydro. Is best to only invest in renewable energy going forward. Coal and Gas would be a step backwards for the planet.	Dominic	employed individual
2022-07-10 11:21:15	Eastern Cape		Yes I do	Solar	Use God's natural resources: sun, wind. Eradicate corruption, it is effecting the future of SA.	Bernie	employed individual
2022-07-10 11:18:10	Gauteng		Yes I do	Solar		Chris	employed individual
2022-07-10 11:17:51	Western Cape		Yes I do	Solar	Firstly, one needs to sort out the mismanagement of Eskom, and especially the corruption. There is a comprehensive power supply and network grid, though if this is not maintained properly, output will be compromised. How much extra capacity has been installed in last 20 years to meet the daily increasing demand? how many of the existing power stations are running at 100% capacity? Where is Eskom in reaching the 2020 sustainability goals? We are now in 2022! It is time to allow private companies to lead the execution on incremental supply, where we have an abundance of options. How can countries in EU, for example Sweden who have limited sun shine, have more solar capacity than South Africa, where sun and space is of abundance.	Roger	employed individual
2022-07-10 11:14:43	Western Cape		Yes I do	Solar	I would say coal but understand that the time frame for building power stations makes it unsuitable as does the fact that we cannot obtain external funding for building 'undesirable' generating sources. Gas and nuclear would also be good options but also takes time to build.	Cobus	employed individual
2022-07-10 11:12:54	Gauteng		Yes I do	Solar	I think Africa should look to renewable energy and create power out of things we already have - the sun is always with us and a clear and obvious choice. I also think wind power is an excellent choice. We can save the planet and our resources and stop digging into our earth and be reliant on the scarcity of fossil fuels controlled by the market!	Odetta	employed individual
2022-07-10 11:11:22	Gauteng		Yes I do	Solar		Maryke	employed individual
2022-07-10 11:08:43	North West		Yes I do	Solar		schalk	employed individual
2022-07-10 11:04:00	Gauteng		Yes I do	Solar	The anc can't provide the country with electricity to run business nor homes. Its time to bring in natural power. The private sector can genitat power all excess power can be sold to the government.	Mark	employed individual
2022-07-10 10:59:07	Western Cape		Yes I do	Solar	We have the sun, wind and the sea to generate electricity. We can also make gas from composting waste either from humans and or animals!	Nicole	employed individual
2022-07-10 10:54:37	Gauteng		Yes I do	Solar		Paul	employed individual
2022-07-10 10:52:33	Eastern Cape		Yes I do	Solar	Citizens who install solar in their houses or businesses should receive a tax rebate to assist in making it affordable as it will lessens the burden on Eskom	Keith	employed individual
2022-07-10 10:50:54	Gauteng		Yes I do	Solar		CJP	employed individual
2022-07-10 10:47:40	Western Cape		Yes I do	Solar		Rosannah	employed individual
2022-07-10 10:42:42	Gauteng		Yes I do	Solar	I feel solar might be a solution though I'm not experienced in this field . There has to be many suppliers not just one as that would result in monopolising it and sky rocket prices for electricity	Nichola	employed individual
2022-07-10 10:40:09	Gauteng		Yes I do	Solar	We have ample sunshine to power solar power monitors. This would be the ideal, cleanest and eventually most economical method of supplying power to the country. Hydro electric power is another possibility, not given the possibility of drought occurring again in the future this may not be an answer.	Lynette	employed individual
2022-07-10 10:40:09	Gauteng		Yes I do	Solar	Solar is clean energy, we need to move away from damaging the environment.	Suraj	employed individual
2022-07-10 10:35:46	Western Cape		Yes I do	Solar	Both solar and wind to safe our planet. And get rid of Eskom as they are unreliable and causing more damage than good.	C	employed individual
2022-07-10 10:35:12	Eastern Cape		Yes I do	Solar	I would have chosen more alternative methods if I could: solar, wind, geothermal, wave action. Anything is better than coal for the environment, and also allowing there to be competition in the market will ensure better service delivery.	Shelley	employed individual
2022-07-10 10:35:06	Gauteng		Yes I do	Solar	We would need a combination of New Solar and wind Unis existing coal ,hydro and nuclear	Andre	employed individual
2022-07-10 10:34:44	Western Cape		Yes I do	Solar		Anel	employed individual

2022-07-10 10:33:49	Gauteng	Yes I do	Solar	ALL measures should be put in place to end ESKOM's monopoly regime. We should also establish an infrastructure independent from Eskom's grip. Power stations POLLUTE our beautiful country. A filthy way of generating electricity. SA NEEDS CLEAN ENERGY - NOW!	Ilsette	employed individual
2022-07-10 10:28:25	KwaZulu-Natal	Yes I do	Solar	We have a lot of sun and with appropriate battery storage we can help reduce the load on the coal generators while we move to nuclear.	Darien	employed individual
2022-07-10 10:26:20	Western Cape	Yes I do	Solar	Eskom has too much power. Privately owned wind and solar providers should be given the immediate go ahead to do so .. led by Andre de Ruyter. Scrap Eskom	Wendy	employed individual
2022-07-10 10:26:07	Western Cape	Yes I do	Solar	Come on people. Its an easy solution and dirt cheap	Renaud	employed individual
2022-07-10 10:26:06	KwaZulu-Natal	Yes I do	Solar	I feel house's or businesses should be encouraged to get solar. Any additional electricity they produce can be sold back to south africa, thereby assisting more households with income, reducing the drain of electricity and suppling the country with electricity.	Jacqui	employed individual
2022-07-10 10:22:14	Gauteng	Yes I do	Solar	If the government can't provide the basic infrastructure the country requires then they have no choice but to allow the private sector to supply the necessary utilities. The government should not be allowed tax any element of electricity production and supply if it becomes privatised and should be a tax exempt supply.	Nicholas	employed individual
2022-07-10 10:22:04	Gauteng	Yes I do	Solar	All methods would be appropriate to get South Africans out of the trouble we face regarding loadshedding. Our survival depends on fixing the errors that have been made.	Claudia	employed individual
2022-07-10 10:22:02	Western Cape	Yes I do	Solar	Both solar and wind have been noted as eminently suitable to generate electricity in South Africa, given the abundance of both, and that it is cheaper to produce than fossil-fuel-based electricity.	athalie	employed individual
2022-07-10 10:21:58	Gauteng	Yes I do	Solar	Solar with battery back-up for households. A price cap is required from dealers to ensure affordability to more. Wind power over short to medium term. We stay green and is more evenly spread through the day. Short term gains through current OCGT with minimal modification should also be considered. No long term power ships	George	employed individual
2022-07-10 10:21:08	Gauteng	Yes I do	Solar	Solar probably the quickest for now.	Sunet	employed individual
2022-07-10 10:20:46	Western Cape	Yes I do	Solar	I cannot think of anything more urgent for the recovery of our economy than solving the energy crisis we are currently facing. Load shedding is having a disastrous effect on businesses and is severely hampering our ability to attract foreign investment	Brian	employed individual
2022-07-10 10:18:10	Western Cape	Yes I do	Solar	Eskom is NOT going to be fixed. This country needs to allow for independent power suppliers immediately. Personally not against nuclear - I just don't trust our government with it. Thus Solar. SA is headed towards absolute ruin and action needs to be taken right now.	Jeanine	employed individual
2022-07-10 10:16:26	Western Cape	Yes I do	Solar	With the increase of solar power options being used by businesses and private homes to generate and save power buy means of battery backups when needed, these systems reduce the amount of power drawn from the grid to reduce the 'stress" on the grid. Besides these options, there are large solar farms the generate power which can comfortably assist the Grid. With the development of the solar power option, and reducing the cost of installation in private homes, this will become a popular and viable option to the archaic coal power stations. I also believe that the use of hydro- electric power - as shown in the Steenbras Dam Hydro Electric system- is also a viable option, although this may need a lit more planning and cost to plan in iother parts of the country.	Daryl	employed individual
2022-07-10 10:15:59	Limpopo	Yes I do	Solar	There is less harm to our lives and the resource can never be overused.	Mark kay	employed individual
2022-07-10 10:14:37	Gauteng	Yes I do	Solar		Anton	employed individual
2022-07-10 10:13:46	Western Cape	Yes I do	Solar	Solar and/or gas - necessary to save South Africa's economy asap	Carol	employed individual
2022-07-10 10:11:16	Western Cape	Yes I do	Solar	Although I agree that 'policy red tape' needs to certainly be revised and amended to streamline procurement of additional energy from IPPs (or Eskom itself for that matter!) to meet our current and future energy demands and to bring an end to load shedding, the wholesale 'scraping' of energy procurement policy is only worthwhile if 'better' policy replaces that which is being scraped. The existing ministerial policies should be replaced with policies which encompass a 'just transition' - that is a big picture energy procurement policy that ticks all the boxes of being socially, environmentally and economically sustainable and in the best interests of the people of South Africa. We need to be wary that in our rush to procure additional energy we do not enter into financing or supply contracts that produce a negative outcome socially, environmentally or economically.	Patrick	employed individual
2022-07-10 10:10:23	Western Cape	Yes I do	Solar	We have one of the sunniest countries on the planet. I'll say no more.	Henri	employed individual
2022-07-10 10:07:33	KwaZulu-Natal	Yes I do	Solar		Devadas	employed individual
2022-07-10 10:07:33	KwaZulu-Natal	Yes I do	Solar		Devadas	employed individual
2022-07-10 10:07:29	KwaZulu-Natal	Yes I do	Solar		Devadas	employed individual
2022-07-10 10:02:12	Western Cape	Yes I do	Solar	My municipality does not allow me to be a nett generator.	Evert	employed individual

2022-07-10 10:02:08	Western Cape		Yes I do	Solar		Nazmiah	employed individual
2022-07-10 10:01:59	Western Cape		Yes I do	Solar	We all have the power to produce power for not only ourselves but we can add by putting power back into the grid. We should not be penalized by being charged an additional amount for having solar. In fact we should be incentivised	Jacqui	employed individual
2022-07-10 10:01:28	Western Cape		Yes I do	Solar	Solar is clean. I say we must make it STANDERD BUILDING REGULATIONS AND LAW. for new houses/office buildings/ apartments blocks to have a MINIMUM of 40% solar power. That goes for the whole south africa. The government must all so make it cheap enough for everbody to can afford it. That wil make a huge difference on the main power gridd.	Wilber	employed individual
2022-07-10 10:01:08	Gauteng		Yes I do	Solar	South Africa ?? is a democracy. IPP should be deregulated. There should be NO limitations to independent power production and distribution. As Eskom, is FAILING to provide services, with stage 3 _6 daily 9 hour load shedding, the public should determine who they procure from, when ANC Government is INCOMPETNT! The only reason, ANC is stalling on IPP, is so they can continue STEALING and plundering Treasury resources, by giving cadres tenders! Stop ANC CORRUPTION #ANCStateCapture	Sharmila	employed individual
2022-07-10 09:59:53	Western Cape		Yes I do	Solar	I already live off the grid with subsistence solar. Using any other form of power generation except for wind would deplete our resources even further as this is not a bottomless pool of energy. AT THE SAME TIME ENCOURAGE SOUTH AFRICANS TO USE LESS!!!! Less water, less electricity, less fuel, less gas in whatever and however small a way it may be. Loadshedding doesn't help people just use a whole lot more when the power comes on again...	Anne	employed individual
2022-07-10 09:54:40	Gauteng		Yes I do	Solar	It's common sense to privatise power supply if the state-owned entity cannot supply and is crippling thousands of businesses and inconveniencing 60 million people and has done for 14 years now. I could rant but that doesnt help the scene. Alternatives must be sought with a rapidity at government level, that is heretofore unseen.	Lesley	employed individual
2022-07-10 09:54:36	Gauteng		Yes I do	Solar	A total overhaul is necessary - from some of the laws and regulations through to the people that are entrusted to govern the people of SA and resources thereof.	Zintle	employed individual
2022-07-10 09:52:36	Gauteng		Yes I do	Solar	Solar energy is available.These greedy politicians that want to line their pockets should go.The citizens should get tax breaks to help with the expenses to install and maintain (something that gets neglected in SA)their system.	Johan	employed individual
2022-07-10 09:49:54	KwaZulu- Natal		Yes I do	Solar	1. Billing must not be done via local municipalities, bills must be settled with suppliers directly due to corruption.	Daniel	employed individual
2022-07-10 09:44:43	Gauteng		Yes I do	Solar		Esinako	employed individual
2022-07-10 09:44:32	Western Cape		Yes I do	Solar	It is obvious that Eskom is a failed SOE (as the majority are) . The minister must stop being arrogant and show that he is competent in his job of providing well run, efficient state owned enterprises. His only choice now is to drop ALL red tape and make it easy for the private sector to get involved in providing cheap and sufficient energy to all South Africans. Municipalities must be able to procure energy from sources other than Eskom.	Ryan	employed individual
2022-07-10 09:41:13	Western Cape		Yes I do	Solar		Jacqui	employed individual
2022-07-10 09:39:14	Gauteng		Yes I do	Solar		Caryl	employed individual
2022-07-10 09:36:58	Western Cape		Yes I do	Solar	Solar and wind are cheap and faster to implement . These options provide the best short term and long term solutions	Pierre	employed individual
2022-07-10 09:35:20	Western Cape		Yes I do	Solar	We live in a semi desert country where their is ampule available land and sun to drive solar farm. We are also surrounded by ocean From the East to the West, there are multiple areas on our coastlines that Wind Power Turbines can be erected in the ocean where there is always wind.	Jannie	employed individual
2022-07-10 09:35:01	Gauteng		Yes I do	Solar	Eskom and the government must admit that they failed and allow independent power suppliers to assist the country out of this crisis.	Danette	employed individual

2022-07-10 09:29:26	Gauteng		Yes I do	Solar	I chose solar, because it is clean and abundant and the prices keep coming down. But the sun does not shine at night when we need our household electricity, so it needs to be paired with some energy storage solution. I'm in favour of nuclear power generation as the best long-term solution to our energy and environmental problems, but the timelines for construction and the costs involved means that it won't solve our immediate problems. Wind might also be a viable solution, but I don't know enough about the topic to form an opinion. Perhaps a comprehensive solution that combines all of these are in order...	Werner	employed individual
2022-07-10 09:29:01	Gauteng		Yes I do	Solar	We are in a crisis and I am glad that government is finally waking up. Our throats are being cut by Eskom having the monopoly on power supply and consumers being forced to make use of their service, which has been severely lacking for many years now. We need alternative options and I do not agree with the high risks that nuclear energy has. The safest options for me, is solar and wind turbines. There is no risk for major loss of human life, should a problem develop.	Leana	employed individual
2022-07-10 09:23:41	Gauteng		Yes I do	Solar		Evan	employed individual
2022-07-10 09:23:02	Western Cape		Yes I do	Solar		Genevieve	employed individual
2022-07-10 09:22:16	Free State		Yes I do	Solar		Riaan	employed individual
2022-07-10 09:21:17	Gauteng		Yes I do	Solar	incentive plan needed for solar systems to push surplus electricity back into the grid starting from households up to large manufacturing premises	Fatima	employed individual
2022-07-10 09:19:47	Free State		Yes I do	Solar		Gerda	employed individual
2022-07-10 09:18:47	KwaZulu-Natal		Yes I do	Solar	After almost 30 years in charge, the ANC government is unable to provide even the most BASIC needs of our people. We are not asking for a NASA space program, we are only asking for water and electricity. Yet they have utterly failed. It is no longer acceptable to keep us at ransom for their failures. Power supply is urgent and not negotiable. Those who have failed Eskom must face the music themselves. Private suppliers must immediately be allowed to provide for our needs. The costs of load shedding that have been dumped on the population over the last 14 years has been exorbitant. A crime against humanity, in fact.	George	employed individual
2022-07-10 09:18:16	Western Cape		Yes I do	Solar	Amend legislation, preventing Independent Power Producers from immediately supplying South Africa with electricity ASAP, to save our country. Invite input by IPP with rewarding incentives. Privatise Eskom. Get rid of all corrupt employers and employees. in all sectors. Get competition going on the energy market. Invest in skilled jobs needed to fix energy crises. Listen to the experts who put their heart and soul into creating emergency plans for our country. Adopt these plans! Any plan will be better than what we have! Why waiting (in the dark)?	Henrike	employed individual
2022-07-10 09:17:54	KwaZulu-Natal		Yes I do	Solar	Power supply issues are holding this country back on so many levels. Lets go private plain and simple. We don't need eskom.	Drew	employed individual
2022-07-10 09:17:03	Western Cape		Yes I do	Solar	This is the sunniest country in the world! Use this God given resource and protect the environment as well. The panels are installed and waiting all over the country. Thank you for this opportunity.		employed individual
2022-07-10 09:14:08	Gauteng		Yes I do	Solar		Deon	employed individual
2022-07-10 09:12:44	Gauteng		Yes I do	Solar	Solar, wind an hydro power should be used.	Catherine	employed individual
2022-07-10 09:12:43	Gauteng		Yes I do	Solar	Solar, wind an hydro power should be used.	Catherine	employed individual
2022-07-10 09:11:40	Gauteng		Yes I do	Solar	Eskom has had enough time to get its act together - no one company should have that much power (pun intended) it is time that our economy diversify and stop handing single companies monopoly over a market - a free market with fair competition giving people a choice - that is how people strive to do better instead of walking the same mediocre path to the same old problems	Anna-Marie	employed individual
2022-07-10 09:11:31	Western Cape		Yes I do	Solar	We have an abundance of free sunshine and wind that can be harnessed to produce cleaner and greener electricity. Private companies & individuals should be allowed to generate and sell excess electricity. The money pushed into Eskom should rather be used to subsidise all home owners in becoming at least partially independent. The red tape required makes change for the better impossible. Gas ships etc support other countries but do not solve our own problems.	Wilma	employed individual
2022-07-10 09:10:24	Western Cape		Yes I do	Solar		Mar-li	employed individual
2022-07-10 09:10:09	KwaZulu-Natal		Yes I do	Solar	Renewable energy is the future. climate change dictates that we have to adapt to renewable energy. We can't afford dirty coal fired energy, due to climate change. stop wasting time and enable the switch to renewable energy now.	Tony	employed individual
2022-07-10 09:09:33	Western Cape		Yes I do	Solar		Karen	employed individual

2022-07-10 09:07:40	Western Cape		Yes I do	Solar	We have several new technologies being introduced on the South African market that should be made available to all citizens. I also believe South Africans should be supported in having affordable access to solar energy for each home. Independent energy companies should be allowed to generate electricity using wind, solar and other green options to support the electricity grid for the whole of South Africa. Citizens should be allowed to choose their electricity company as the source for their household	Carole	employed individual
2022-07-10 09:07:02	Gauteng		Yes I do	Solar	Everyone that can get off grid should. Government should encourage this as well, and offer subsidies for people who are keen to do so i.e. cover 30 to 50% of the cost as an incentive to get off grid. This will increase solar uptake and gradually alleviate the pressure on our failing power supplier (eskom) and afford them more time to clean up the mess i.e. get rid of corrupt leadership and appoint leaders with integrity on eskoms board and senior management. Further more, our leaders in government must act more decisively and get rid of the cancerous useless and non performing officers and officials immediately! We need step change! Its either a revolution in our officials or a revolution from the people! We are that desperate as people are talking about revolting! "We pay for nothing and government is useless! " Thats the message i am getting, as a middle class citizen listening other citizen's from all class backgrounds! We are on dangerous ground, and on the edge of a knife! I pray for our country that God may give us wisdom to bloom anew and have a different view of how to do things!	Ryan	employed individual
2022-07-10 09:06:27	Mpumal anga		Yes I do	Solar		Kyle	employed individual
2022-07-10 09:03:49	Western Cape		Yes I do	Solar	I support the private supply of electricity through solar generation. There should be no restrictions for any individual to set up their own system to look after their own needs. The falling apart government supply of electricity is unable to supply decent priced energy to its people on a stable basis. Get rid of the red tape and allow us to look after ourselves.	CJ	employed individual
2022-07-10 09:02:46	Gauteng		Yes I do	Solar		Barry	employed individual
2022-07-10 09:01:46	Mpumal anga		Yes I do	Solar	Just get it done, the country is suffering.	Jean	employed individual
2022-07-10 09:01:19	Gauteng		Yes I do	Solar	I can't believe this is even a debate. We need huge investment from the private sector in a combination of solar and wind power to both save our planet in time and our economy right now. Scrap the red tape.	Charles	employed individual
2022-07-10 09:01:09	Western Cape		Yes I do	Solar	Solar for individuals. Nuclear run by privately owned companies nationally.	Angie	employed individual
2022-07-10 08:58:17	Western Cape		Yes I do	Solar	It's time electricity was supplied properly and not part of corruption	Monica	employed individual
2022-07-10 08:57:22	Gauteng		Yes I do	Solar		Leon	employed individual
2022-07-10 08:55:25	Western Cape		Yes I do	Solar	Eskom has needed repair for years. They have had 28 years to rectify the issues. We live in a country with plenty of sunlight and wind. These forms of generation are sustainable. We have the means to supply extra power and yet we don't. This is madness. Stop lining your pockets and actually fix something for once	Steven	employed individual
2022-07-10 08:55:05	Western Cape		Yes I do	Solar	Any green energy solution would be better than coal or nuclear	Gert	employed individual
2022-07-10 08:53:49	Gauteng		Yes I do	Solar	An alternative solution and supplier is needed. Private company. Let there be healthy competition. A number of power providers for the consumer to choose from. Government has failed.	Alison	employed individual
2022-07-10 08:53:09	Gauteng		Yes I do	Solar		Rudolf	employed individual
2022-07-10 08:51:16	Western Cape		Yes I do	Solar		Craig	employed individual
2022-07-10 08:46:35	Gauteng		Yes I do	Solar	Remove red tape and start construction of mass solar plants immediately. Although it is a big capital expenditure, it is the best solution at the moment. We can easily add 10 GW of power to the grid in the karoo area. Countries like China are adding 50GW of solar power to their grid in one year, we can certainly learn from them since they are the experts in the field.	Nico	employed individual
2022-07-10 08:46:02	Western Cape		Yes I do	Solar	Ensure that legislation is simple and gets the incentive to the consumer, in that own generation via solar installations at home receives a tax rebate. This is the only way that we will be able to share with those that cannot afford to be on the grid.	Jean	employed individual
2022-07-10 08:43:29	Mpumal anga		Yes I do	Solar	Solar is the best option for SA combined with wind generation in area's where there is sufficient wind	Marius	employed individual
2022-07-10 08:42:00	Western Cape		Yes I do	Solar		Jade	employed individual
2022-07-10 08:41:35	Gauteng		Yes I do	Solar	All households can go solar to ease the demand	carel	employed individual
2022-07-10 08:41:33	Eastern Cape		Yes I do	Solar		Paul	employed individual
2022-07-10 08:39:46	Gauteng		Yes I do	Solar	Independent power solutions seem to be the only way we can finally catch up with power demands. I believe nuclear is the best option for supply but would take far longer than an alternative such as wind or solar. I'm heavily opposed to non renewable forms of production such as coal or diesel	Javier	employed individual
2022-07-10 08:37:25	Gauteng		Yes I do	Solar	Solar and wind can be placed on the grid within less than 2 years.	Arnold	employed individual

2022-07-10 08:37:06	Gauteng		Yes I do	Solar		Philip	employed individual
2022-07-10 08:36:54	Western Cape		Yes I do	Solar	We could have solved the power crisis decades ago by allowing independent , privately owned, environmentally friendly solar and wind generation free of government corruption and union meddling. Now the country is on its knees because the government insists on their stranglehold as the sole supplier of power, a task they are clearly incompetent to perform.	Donna	employed individual
2022-07-10 08:35:51	KwaZulu-Natal		Yes I do	Solar	In South Africa we have coal as one of our strong products but being used by wrong people who only want money for themselves. I think solar can solve most of our problems because it is more connected to nature than men/human beings The blame game will not stop since 1994 all played the role not today.	Daphney Thandekile	employed individual
2022-07-10 08:35:39	Gauteng		Yes I do	Solar	We need sustainable energy (power) that is affordable, reasonable and without disruption. Eskom is messing with our lives and also causing damage to our electrical appliances due to continuous power outages that is caused by greed, incompetence and corruption by our Governmt.	Simon	employed individual
2022-07-10 08:33:01	Gauteng		Yes I do	Solar		Deon	employed individual
2022-07-10 08:32:23	Western Cape		Yes I do	Solar	South Africa has an abundance of sun light which both rich and poor can benefit from. It's the most efficient and most natural source of renewable energy God gave to man. Solar power is cheaper than most other power sources.	Mark	employed individual
2022-07-10 08:32:19	Gauteng		Yes I do	Solar	South Africa has enough sun and wind to be able to generate power through private power producers. I would love to say nuclear, but don't trust government to do the procurement.	Chris	employed individual
2022-07-10 08:31:20	KwaZulu-Natal		Yes I do	Solar	Solar power is friendly to the environment and is already being successfully used on a small scale in the country.	Samke	employed individual
2022-07-10 08:30:06	Eastern Cape		Yes I do	Solar		Geraldine	employed individual
2022-07-10 08:27:56	Gauteng		Yes I do	Solar	We have wide open areas capable of housing thousands of solar panels. We should use this space and create a stable energy grid.	Heinrich	employed individual
2022-07-10 08:27:32	Gauteng		Yes I do	Solar	Let's all join together to use our country's resources in a non destructive measure, solar and also wind are resources we have plenty of in South Africa.	Lucinda	employed individual
2022-07-10 08:26:17	Gauteng		Yes I do	Solar		Shon	employed individual
2022-07-10 08:25:43	Gauteng		Yes I do	Solar		Carla	employed individual
2022-07-10 08:25:43	Western Cape		Yes I do	Solar	We have the geographical advantage to pursue alternative energy sources. We must do so. Immediately.	Nicola	employed individual
2022-07-10 08:25:24	Gauteng		Yes I do	Solar		Candice	employed individual
2022-07-10 08:23:42	Northern Cape		Yes I do	Solar	As long as the ANC government have no control,or say,in the running or finances of these independent companies.	Andries	employed individual
2022-07-10 08:23:42	KwaZulu-Natal		Yes I do	Solar		Angela	employed individual
2022-07-10 08:22:52	Gauteng		Yes I do	Solar	Make it possible for independent energy providers to provide sustainable solutions such as solar and wind driven power to the public.At the moment we are forced to pay additional tax on any form of initiative that we want to take to relieve the electronical grid when wanting to install solar powered solutions of any kind.That is backwards thinking.We have plenty of sunshine in South Africa,it is one of our biggest natural resources,why must it be made so incredibly expensive and difficult to get a hold of such technology that would benefit everyone.Perhaps it is because there are still members of government lining their pockets and getting kick-backs from withholding this process,or even sabotaging the process in order to undermine the good that is trying to be done.	André	employed individual
2022-07-10 08:22:38	Western Cape		Yes I do	Solar	Method of electricity production is not so important now. Any method should actually be allowed. Immediate action to allow independent electricity producers to come on board is the most important issue now, regardless of the methods used. Please don't waste time on methods. Just end these long power cuts by immediate action to provide SA with extra electricity. Allow private producers immediate participation.	Madelaine	employed individual
2022-07-10 08:20:17	Western Cape		Yes I do	Solar	We live in a country with copious amounts of sunshine and lots of open space. We should use solar and lithium battery storage. Its the most sensible and quickest was to generate more electricity.	Anthony	employed individual
2022-07-10 08:20:11	Gauteng		Yes I do	Solar		Abraham	employed individual
2022-07-10 08:18:14	KwaZulu-Natal		Yes I do	Solar	It needs to be properly regulated by an independent body.	Kate	employed individual
2022-07-10 08:18:10	Outside SA	United Kingdom	Yes I do	Solar	People depend on a reliable supply of power, if government cannot provide this they need to allow private companies to provide the services. Private companies competing against each other will also lead to lower costs for the consumers.	Laura	employed individual
2022-07-10 08:16:47	Western Cape		Yes I do	Solar	Renewable energy is the best way to go for a long term solution.	Wendy	employed individual
2022-07-10 08:16:39	Free State		Yes I do	Solar	Many options, we need to be non-reliant on eskom	Tamaryn	employed individual
2022-07-10 08:15:45	KwaZulu-Natal		Yes I do	Solar	We have abundance sunshine in South Africa. It's does not harm the environment. In windy areas we can use wind.	Rajan	employed individual

2022-07-10 08:15:45	Eastern Cape		Yes I do	Solar	It is not acceptable that citizens have to "deal with" a problem of loadshedding when a relatively free energy source is available (solar), but red tape stops us from utilizing it! Govt appears to be incapable of solving the crisis on their own yet we are "not allowed" to be a part of the solution.	Russell	employed individual
2022-07-10 08:13:54	Gauteng		Yes I do	Solar		Jaco	employed individual
2022-07-10 08:13:41	Mpumal anga		Yes I do	Solar		CJ	employed individual
2022-07-10 08:13:15	Gauteng		Yes I do	Solar		Kirsti	employed individual
2022-07-10 08:12:26	Gauteng		Yes I do	Solar	*economy is suffering due to poor planning and governance at Eskom. *knock-on implications for job creation and poverty in RSA *power grid clearly needs support, and decentralized power opportunities to introduce competitive market forces to improve efficiencies *renewable energies should be prioritized due to the current climate crises	Stacey	employed individual
2022-07-10 08:11:12	Gauteng		Yes I do	Solar		Nadia	employed individual
2022-07-10 08:11:00	KwaZulu- Natal		Yes I do	Solar	I support any green energy generation; solar, wind or hydro. They do not harm or planet in the way that coal and has do and are not as dangerous as nuclear.	Gordon	employed individual
2022-07-10 08:10:55	KwaZulu- Natal		Yes I do	Solar	I support any green energy generation; solar, wind or hydro. They do not harm or planet in the way that coal and has do and are not as dangerous as nuclear.	Gordon	employed individual
2022-07-10 08:10:41	Gauteng		Yes I do	Solar	Green power independently produced and sold back to Eskom/ City Power could assist in solving the current problems	Lucinda	employed individual
2022-07-10 08:08:40	Western Cape		Yes I do	Solar	Allow people to push electricity back into the grid and incentivise each household to install solar. It is clean energy!	Thea	employed individual
2022-07-10 08:07:47	Gauteng		Yes I do	Solar	Always available and cheaper to access	Lizz	employed individual
2022-07-10 08:05:48	Gauteng		Yes I do	Solar	Clearly Eskom is not able to keep up with what is required to power the country. It's corrupt and incompetent! Private producers also do away with the monopoly on energy production and can ensure that competition brings in fair pricing.	Randal	employed individual
2022-07-10 08:05:17	KwaZulu- Natal		Yes I do	Solar	Solar, because it's free clean energy. Solar farms can be erected quickly. We as consumers can install and then supply any unused power back into the electricity grid. High rise buildings can install "Solar film" to their windows as well to generate electricity. There are so many new ways for solar power generation.	George	employed individual
2022-07-10 08:03:13	Western Cape		Yes I do	Solar		Grant	employed individual
2022-07-10 08:02:56	Gauteng		Yes I do	Solar			employed individual
2022-07-10 08:01:59	Gauteng		Yes I do	Solar	Allowing independent organizations to supply power will not only resolve the power crisis in South Africa but will promote job creation as well.	Gerrit	employed individual
2022-07-10 08:00:12	Gauteng		Yes I do	Solar		Carmen	employed individual
2022-07-10 07:59:49	Gauteng		Yes I do	Solar	Solar provides an accessible, cost effective, easy to install solution for most South Africans. Pricing support for all elements of solar is required to drive down the overall installation and usage cost. The ability to be self-sufficient in energy supply while producing excess power to place back on the grid, should be explored in certain areas	Nora	employed individual
2022-07-10 07:54:22	Gauteng		Yes I do	Solar	Solar farming could be a potential solution and also will help the RSA government to reach its environmental goals, as well as allow us in a good standing with borrowing the money from countries that want us to switch to a more environmental friendly government. Privatizing the energy supply will also minimize corruption.	Marinus	employed individual
2022-07-10 07:53:54	Gauteng		Yes I do	Solar			employed individual
2022-07-10 07:50:50	Gauteng		Yes I do	Solar	Getting as many users off grid or contributing to the grid by using easily installable solar systems will help relieve power deficits from Eskom supply.	Niresh	employed individual
2022-07-10 07:49:45	Limpopo		Yes I do	Solar	Although I selected solar, I would also select wind and hydro. S.A is having all the elements in abundance to make use of to produce electricity. Make use of other providers in S.A to give electricity, but PLEASE MAKE SURE that it's granted on a FARE and EQUAL ratio. Also help households financially to put up solar, and here again I mean for EVERYONE in S.A not only for some nation groups and the others must suffer!	Mariana	employed individual
2022-07-10 07:49:40	Western Cape		Yes I do	Solar	South Africa has abundant sun and wind. We should be harnessing these natural gifts to the fullest. Solar and wind turbines can bring our country back into the light. Spending taxpayers' money on Eskom's ancient infrastructure is pouring money down an ever-deepening hole.	Jane	employed individual
2022-07-10 07:47:05	Western Cape		Yes I do	Solar	Allowing private citizens to feed excess solar power generated back into the grid with less red tape and no additional cost to themselves would bring immediate relief.	Heinrich	employed individual
2022-07-10 07:47:02	Western Cape		Yes I do	Solar		Bianca	employed individual
2022-07-10 07:46:28	Gauteng		Yes I do	Solar	We cannot put all eggs in one basket we need to get away from Eskom being the only source of electricity	Ronell	employed individual

2022-07-10 07:44:25	Gauteng	Yes I do	Solar	<p>Renewal energy is the best way forward for SA. The cost of installing and maintaining such energy has been reduced significantly over the last number of years (and continuing to steadily reduce year-on-year). With all the air pollution in our cities and the numerous sunny days we have, in my opinion, solar is the most fitting source of energy for the bulk of our country.</p> <p>New developments and existing complexes should be encouraged to go off grid by installing solar panels on roofs of carports and buildings, with store rooms under stair cases for example, as the best place to store the batteries for the solar systems.</p> <p>Such complexes, businesses, etc. should then also be given the opportunity to plug into the grid and sell power back to Eskom in order to compensate for lack of generation by Eskom and cover poorer communities who can't afford solar systems.</p> <p>Government should incentivise development/installation of renewable electricity systems through grants or some form of rebates for contributing to the grid.</p> <p>We have the means to help. Instead of keeping hold of an ailing system that clearly isn't working anymore for the sake of an almost bankrupt entity, who clearly can't do this alone - give the people a chance to contribute.</p> <p>Use the plentiful natural resources we have and the power of the South African people as a collective to solve an issue that should have been dealt with years ago.</p>	Candice	employed individual
2022-07-10 07:44:22	Gauteng	Yes I do	Solar	<p>Wind and solar would make the most sense for SA IMO. If we going for the clean route. However, if independent producers use coal and it stops constant the load-shedding, that works for me too.</p>	Michael	employed individual
2022-07-10 07:43:31	Gauteng	Yes I do	Solar	<p>South Africa has sun most of the year. The erection of "sun farms" will go a long way to produce additional energy.</p> <p>"Wind farms" would be another source of energy in our setting. There are several windy areas in our country where this form of energy will be a viable option.</p>	Pieter	employed individual
2022-07-10 07:42:39	KwaZulu-Natal	Yes I do	Solar		Marc James	employed individual
2022-07-10 07:41:30	Western Cape	Yes I do	Solar		David	employed individual
2022-07-10 07:41:26	Western Cape	Yes I do	Solar	<p>We need a new government. Our country is on it's knees and being destroyed under the leadership of the ANC.</p>	Henriette	employed individual
2022-07-10 07:40:09	Gauteng	Yes I do	Solar	<p>We have more than enough UV Ray's to keep the essential items running. It's also green.</p>	Brigit	employed individual
2022-07-10 07:39:08	Gauteng	Yes I do	Solar		Cobus	employed individual
2022-07-10 07:38:29	Western Cape	Yes I do	Solar	<p>We are sick and tired of Eskom . We want power that we can manage and control ourselves. Solar and wind is the way to go. No delivery of coal that is manipulated by a corrupt government.</p>	David	employed individual
2022-07-10 07:38:27	Gauteng	Yes I do	Solar	<p>We have so much sunlight and wind we van use to generate electricity</p>	Glenda	employed individual
2022-07-10 07:38:21	KwaZulu-Natal	Yes I do	Solar	<p>If domestic solar users were not penalized for providing their own power, it would be realised that there is excess power being generated by our homes which could be utilized by the National grid.</p> <p>This domestic supply to the grid could be bought from home owners at a fair price that would not require the government, or Eskom, to have to provide the capital expenses or manpower (that goes on strike) to generate this power.</p>	Wayne	employed individual
2022-07-10 07:37:40	Gauteng	Yes I do	Solar		Leon	employed individual
2022-07-10 07:37:17	KwaZulu-Natal	Yes I do	Solar	<p>South Africa has sun most of the year. The erection of "sun farms" will go a long way to produce additional energy.</p> <p>"Wind farms" would be another source of energy in our setting. There are several windy areas in our country where this form of energy will be a viable option.</p>	Ines	employed individual
2022-07-10 07:35:58	Gauteng	Yes I do	Solar	<p>The energy from the sun is available at no cost to anyone. It's sustainable and limitless.</p>	Angus Sunde	employed individual
2022-07-10 07:35:52	Gauteng	Yes I do	Solar	<p>The energy from the sun is available at no cost to anyone. It's sustainable and limitless.</p>	Angus Sunde	employed individual
2022-07-10 07:32:59	Eastern Cape	Yes I do	Solar	<p>There are thousands upon thousands of independent power producers in this country that are able to supply electricity to the grid. By working with them it's a win-win as they receive payment and the country receives electricity which in turn will solve the absurd loadshedding issue.</p>	Johan	employed individual
2022-07-10 07:27:20	Western Cape	Yes I do	Solar		Lauren	employed individual
2022-07-10 07:23:47	Gauteng	Yes I do	Solar	<p>South Africa is a sunny country...why not use our God given resource, pollution free, natural source of energy</p>	Dee	employed individual
2022-07-10 07:23:38	Free State	Yes I do	Solar		Mariëtte	employed individual

2022-07-10 07:21:53	Gauteng		Yes I do	Solar		Lufuno	employed individual
2022-07-10 07:20:14	Northern Cape		Yes I do	Solar		Mario	employed individual
2022-07-10 07:16:33	Gauteng		Yes I do	Solar	Sun and wind is renewable and environmentally friendly. It is already available.	Rika	employed individual
2022-07-10 07:16:07	Gauteng		Yes I do	Solar		Philip	employed individual
2022-07-10 07:13:46	Western Cape		Yes I do	Solar	We are living in sunny South Africa. The supply of the energy source is free.	André	employed individual
2022-07-10 07:13:40	Gauteng		Yes I do	Solar		Brent	employed individual
2022-07-10 07:12:01	Gauteng		Yes I do	Solar	I have many alternatives but solar is best suited for the immediate future. The suns energy is free and abundant in SA. This will help stop wide scale strikes as South Africans are a sick and Tired of a political party that steals your money for there own well being.	Ritesh	employed individual
2022-07-10 07:11:25	Northern Cape		Yes I do	Solar	In South Africa we have sufficient sun and space to have Solar farms to produce electricity! It is sustainable and not harmful to the environment	Esmari	employed individual
2022-07-10 07:10:32	Gauteng		Yes I do	Solar		Daleen	employed individual
2022-07-10 07:09:41	Gauteng		Yes I do	Solar	With solar energy we won't be spending all those billions spent on buying coal, we can use those billions to develop our country and improve standard of living in our communities and creating employment opportunities for our youth and future generations to come. They are the king of this country, they cary the hopes and dreams of our country on their shoulders.	Thilikeni	employed individual
2022-07-10 07:09:27	Gauteng		Yes I do	Solar	It's environmental friendliness and it'll stop these corruption of coal supply chain that occurs in Eskom	Shakes Moferefer e Samuel	employed individual
2022-07-10 07:07:55	KwaZulu- Natal		Yes I do	Solar	Any other supply of constant electricity is urgently needed . If we can have gas it would be the first prize. If solar is workable then this would be excellent .	Dawn	employed individual
2022-07-10 07:07:51	Northern Cape		Yes I do	Solar	We live in the Northern Cape with lots of sunshine . I think solar is the way forward. If eskom can provide tab in points. There are lots of private comwho can supply the eskom grid with power.	Riaan	employed individual
2022-07-10 07:06:33	Gauteng		Yes I do	Solar	Independent producers and solar power needs to be immediately implemented.	Beverly	employed individual
2022-07-10 07:03:40	Western Cape		Yes I do	Solar	I am not an expert but clearly our ongoing crisis cannot continue without causing innumerable other crises, personal and societal. Something has to be done without delay. Red tape must be eliminated. This is not time for bureaucracy!	Jenny	employed individual
2022-07-10 07:02:58	Gauteng		Yes I do	Solar	We need to Harness free energy for as many South Africans as possible and allow people to put energy back into the Grid so that all South Africans can have free power. There is still a grid and infrastructure to maintain, but at least the cost of Sun Energy does not mess with natural resources.	David	employed individual
2022-07-10 07:02:42	Gauteng		Yes I do	Solar		Lesley	employed individual
2022-07-10 06:57:33	Gauteng		Yes I do	Solar		C	employed individual
2022-07-10 06:50:47	Limpopo		Yes I do	Solar		Mariette	employed individual
2022-07-10 06:42:57	Gauteng		Yes I do	Solar	We have thevsdpace and climate to successfully implement this renewable source of power.	Brenda	employed individual
2022-07-10 06:42:16	Gauteng		Yes I do	Solar	I support a combination of solutions for the energy solution in SA. We should not have any one producer again providing the only solution for SAs energy problem.	Naomi	employed individual
2022-07-10 06:41:55	Gauteng		Yes I do	Solar		Michael	employed individual
2022-07-10 06:41:38	KwaZulu- Natal		Yes I do	Solar	While solar is one of the cheapest and easiest ways to produce power, it does have its negatives too - thus we should invest in multiple sources of electricity including wind and altered hydro.	kirsty	employed individual
2022-07-10 06:39:29	Gauteng		Yes I do	Solar		Evette	employed individual
2022-07-10 06:39:26	Gauteng		Yes I do	Solar		Keith	employed individual
2022-07-10 06:39:20	Eastern Cape		Yes I do	Solar	South Africa has abundant sunlight and space which make solar power a natural fit to meet our energy needs. It is also long lasting and requires very little maintenance, with obvious cost benefits. The technology exists and has been proven across the world, therefore I feel it is a key to solving the energy crisis in South Africa.	Ken	employed individual
2022-07-10 06:35:07	Limpopo		Yes I do	Solar		Sam	employed individual
2022-07-10 06:34:47	Mpumal anga		Yes I do	Solar		Brian	employed individual
2022-07-10 06:32:10	Gauteng		Yes I do	Solar		Annatjie	employed individual
2022-07-10 06:32:03	Western Cape		Yes I do	Solar	Our favourable climate with plenty sunshine	John	employed individual
2022-07-10 06:28:13	Gauteng		Yes I do	Solar	Solar is readily available in SA across all provinces. It would also significantly contribute to the reduction in pollution in the country which impacts on climate change.	James	employed individual

2022-07-10 06:26:51	Limpopo	Yes I do	Solar	Make it possible for Private home and farm owners who have Solar systems and other methods to feed back into the grid by giving them discount on their electricity bill. The solution is already available. Lift the red tape the Private sector business owners also have systems at idle they produce electricity units and cant use it all.	Hanro	employed individual
2022-07-10 06:26:16	Western Cape	Yes I do	Solar	Currently 2 rounds of the REIPPP being held up by government incompetence - which is what the ANC excels at. Bring in private electricity suppliers that operate in a competitive market and get rid of Eskom	Mandy	employed individual
2022-07-10 06:23:13	KwaZulu-Natal	Yes I do	Solar	Our country is on the brink of collapse due to the outdated grasp and holding onto power, and believing it is the only way to solve the electricity issue in the country. The powers to be needs to let go if this ideology. It is no longer about the past but the future. Trying to force an collapsing Eskom to generate this lifeline is futile, and if government does not take hands with willing and able partners, without the red tape of unions, and wanting to control everything, there is no hope or future for a better life for ALL the citizens in our beloved country.	Johann	employed individual
2022-07-10 06:21:28	Gauteng	Yes I do	Solar		Desiree	employed individual
2022-07-10 06:19:44	Western Cape	Yes I do	Solar		Rosheen	employed individual
2022-07-10 06:18:56	Gauteng	Yes I do	Solar	We are tired of eskom.Anything that can take us out of this ridiculous service of theirs will do.Its been years struggling with this, clearly they can't do what needs to be done,so let them give other people that have better solutions a chance,cause they have failed.	Thulane	employed individual
2022-07-10 06:18:37	Gauteng	Yes I do	Solar	Considering the climate in SA, Solar makes the most sense due to the amount of sunshine in this region. Cost effective options need to be provided in order for this option to make sense.	Kate	employed individual
2022-07-10 06:14:12	Western Cape	Yes I do	Solar	Use any or all forms of alternative energy, but at least start with Solar Energy. Harness our sun in sunny South Africa.	Helen	employed individual
2022-07-10 06:13:06	Eastern Cape	Yes I do	Solar		Cedrick	employed individual
2022-07-10 06:12:50	KwaZulu-Natal	Yes I do	Solar	Stop gubment giving coal tenders to mates	Barry	employed individual
2022-07-10 06:12:47	Western Cape	Yes I do	Solar		niki	employed individual
2022-07-10 06:09:00	KwaZulu-Natal	Yes I do	Solar	This country is doomed if they are going to carry on being so selfish. Let independent power companies in to share the load and then we won't have this problem. Loadshedding is costing people their income	Kelly	employed individual
2022-07-10 06:07:28	Western Cape	Yes I do	Solar	Right now you have to pay to let solar power back in to the grid. Scrap that and rather fund it.	Wernich	employed individual
2022-07-10 06:03:09	North West	Yes I do	Solar	I think we get a lot of sun light but are currently not maximazing the power we can generate from the sun. I believe we should also invest in research that can help bring down the costs of solar energy.	Nkhangweni	employed individual
2022-07-10 06:00:17	Gauteng	Yes I do	Solar	We have the perfect climate for generating sustainable energy. It's cheaper, can be implemented quickly and will also assist with job creation. South Africa can again become an iconic country to look up to by using our most natural resource, the Sun, to inspire change.	Anni	employed individual
2022-07-10 05:57:54	Eastern Cape	Yes I do	Solar	Combination of solar and wind.	Lydia	employed individual
2022-07-10 05:57:34	Gauteng	Yes I do	Solar	It is obvious that we need to generate more electricity, as Eskom cannot meet the current demand. Every alternative supplier should be welcomed, with safety criteria, of course.	Janine	employed individual
2022-07-10 05:53:01	Western Cape	Yes I do	Solar	Given the natural resources available we need a combination of solar and wind with hydroelectric	Chris	employed individual
2022-07-10 05:51:03	Gauteng	Yes I do	Solar	Does it really matter what source of power producers use. Loadshedding is a pain and to have only one power producer creates a monopoly which in turn loadshedding because if they cannot supply there is no alternative. The sabotage and inability to supply is going to get worse. They getting more expensive and unable to provide by the day.	Dolf	employed individual
2022-07-10 05:41:53	Eastern Cape	Yes I do	Solar		T	employed individual
2022-07-10 05:41:52	KwaZulu-Natal	Yes I do	Solar		Nadia	employed individual
2022-07-10 05:36:26	Western Cape	Yes I do	Solar	Please enable private producers to start building renewable generation plants immediately without registration and using components / materials sourced from anywhere in the world. Mandate all municipalities to allow residential feed in at a minimum of 50% of the tariff charged.	Geoff	employed individual
2022-07-10 05:31:08	Gauteng	Yes I do	Solar		Theresa	employed individual
2022-07-10 05:27:38	KwaZulu-Natal	Yes I do	Solar		Raymond	employed individual
2022-07-10 05:13:11	KwaZulu-Natal	Yes I do	Solar	Plenty of sunshine. Solar is the best option. There's also Hydro as I'm on the coast.	Reena	employed individual
2022-07-10 05:05:34	Western Cape	Yes I do	Solar		Dawn	employed individual
2022-07-10 05:05:00	Gauteng	Yes I do	Solar		Sasa	employed individual

2022-07-10 04:59:55	Northern Cape	Yes I do	Solar	For our area,solar power will go a long way towards assisting electricity generation during the day. We are an irrigation area with lots of sunshine and irrigation and use a lot of energy during the day. The area consists of thousands of small "plots". I already make use of solar on my 2 properties and generate thousands of kilowatt for Eskom that I do not use at all. If all these properties can be assisted to supply electricity and maintenance,at the farmers management and cost we can go a long way towards providing power to the Northern Cape and food to the country at a much cheaper price. There is vast possibility in the Vaalharts irrigation Scheme and infrastructure is already at an advanced stage of development. My 2 X 20 KW. systems was installed within a week and I supplied megawatts to Eskom over the past eighteen months. During loadshedding, during the day, I and Eskom lose a lot of potential power at this stage on the Flexirate system.	Dirk	employed individual
2022-07-10 04:42:24	Gauteng	Yes I do	Solar	Enough of the CORRUPT ANC dictatorship telling the citizens of a once near perfect country what and how to live and see to one's own needs, ENOUGH !	Desmand	employed individual
2022-07-10 04:36:11	Gauteng	Yes I do	Solar		HERMAN	employed individual
2022-07-10 04:33:01	Western Cape	Yes I do	Solar	Our country definitely need to step up on electricity generation. Current setting of Government control is not successful. We need good, ethical private enterprise to pursue projects.	Jean	employed individual
2022-07-10 04:20:58	Western Cape	Yes I do	Solar	Communities should be allowed to buy their electrical infrastructure in poorly performing municipalities. All entities with the means to do it should be encouraged to install solar with batteries for the purpose of self-consumption and the government should provide a subsidy for these systems, similarly to the subsidy they provided for solar hot water installations 15 years ago.	Cobusbu	employed individual
2022-07-10 04:13:11	KwaZulu- Natal	Yes I do	Solar		Candice	employed individual
2022-07-10 03:58:14	Free State	Yes I do	Solar	Solar is perhaps quicker to supply than wind. Individual households can supply(if more affordable and supply back to the grid	beulah	employed individual
2022-07-10 03:49:43	Gauteng	Yes I do	Solar		Dirk	employed individual
2022-07-10 03:35:12	Gauteng	Yes I do	Solar	Solar or wind have been successfully used across Europe, in SA with our theft/ vandalism problem perhaps wind harvesting would be easier to combat, but solar seems the obvious choice in such a sun-rich country	Melanie	employed individual
2022-07-10 03:33:37	Eastern Cape	Yes I do	Solar	We have an over abundance of sun and wind available to us surely we need to be harnessing the energy that is being produced by them to initially supplement and then eventually supply the national power grid.	Emmanuel	employed individual
2022-07-10 03:31:03	Gauteng	Yes I do	Solar		Anri	employed individual
2022-07-10 03:15:27	Gauteng	Yes I do	Solar	SA needs to get onboard with renewable energy. Solar would probably be the quickest to implement in smaller quantities. Having said that, if there wasn't so much corruption and sabotaging of existing infrastructure, we would not be in this situation.	Juergen	employed individual
2022-07-10 02:54:11	Mpumal anga	Yes I do	Solar	I personally and firmly stand against the involvement of private power suppliers in minimising the load shedding crisis for the following reasons: 1. Our GDP will decrease as the money is not owned by the state 2. Private power supply companies are not powerful enough like the government to want to supply the whole country with electricity. So I recommend that we transform to renewable energy by depending on solar for power rather than depend on private power supply companies that we are not sure of how much power they have and how reliable they are to handle the whole phenomena,unlike the government. With government, there are no limitations, all solutions and resources are there.	Karyn	employed individual
2022-07-10 02:43:10	Western Cape	Yes I do	Solar	Solar power is a great option for South Africa, many businesses and households are already using it. Wind is also a good option with many wind farms in development in the Western Cape already.	Ryan	employed individual
2022-07-10 02:30:11	Western Cape	Yes I do	Solar	This nonsense has gone on for long enough. We're a bit too incompetent to build and manage our own nuclear plant and we've got the space and climate for solar. Regardless of the method, govt must allow indie producers to provide power. Screw Eskom, privatize!!! I no longer have faith in our government for anything besides knowing they're a bunch of skelme pooste	Rowan	employed individual
2022-07-10 01:30:06	Gauteng	Yes I do	Solar	We require more power production. We require competition to Eskom. Competition breeds lower prices for the everyday consumers, forces suppliers to be better and provide better services. All in all this provides the everyday consumer not only better services but creates more jobs and bolsters the economy	Esmari	employed individual

2022-07-10 01:12:48	Gauteng		Yes I do	Solar	SA is blessed with sufficient natural resources e.g sunshine and wind and available land to build massive solar power plants to feed into the grid. Eskom and the government have failed dismally with supplying sufficient power, creating further strain on businesses and affecting international investment in SA. It is time to scrap the red tape to save SA from complete rack and ruin.	Sharon	employed individual
2022-07-10 00:42:05	Gauteng		Yes I do	Solar		Jacques	employed individual
2022-07-10 00:04:05	Western Cape		Yes I do	Solar	This world needs to start taking going green seriously, less of a carbon footprint and less contaminated by-products. The sooner the better.		employed individual

2022-07-09 20:31:14	Gauteng		Yes I do	Solar	As it gives me one option I have selected solar but I believe we need a multiplicity of solutions which includes solar wind and Cole even though because of climate change we would need to downscale cold-based sources but we need short-term medium-term and long-term plans that are effective I believe the government is totally and completely incapable of providing this legislation needs to be scrapped immediately that prevents private companies from providing electricity it's unthinkable that	Ellsworth	employed individual
2022-07-09 20:25:49	Free State		Yes I do	Solar		Jaco	employed individual
2022-07-09 20:21:27	Western Cape		Yes I do	Solar	The simplest short term solution is probably to offer tax breaks to all those who want to set up solar panels at home. Force the banks to work with suppliers of solar panels so that people can buy them with loans guaranteed by the government. More creative financing models have been successfully used elsewhere in the world. That will reduce the base load on the existing fleet, and buy us time for a more orderly transition. It will also provide tens of thousands of jobs, and create new manufacturing and service industries. It is not a simple choice. A mix of modalities is required. SA needs reliable short term capacity to fill the gap left by failing infrastructure. Gas power stations are most likely the quickest to bring online, while we build renewable power generation capacity. The gas power stations have the added advantage of being able to fill the overnight/low wind/low solar dips experienced by renewables, as well as acting as peak power producers. the old coal power station fleet can be retired as renewables come on line.	Nicholas	employed individual
2022-07-09 20:21:03	Gauteng		Yes I do	Solar	We need to harness an energy that is environmentally and economically viable. We live in a sunny country, sunshine is free!	Etti	employed individual
2022-07-09 20:11:21	KwaZulu-Natal		Yes I do	Solar	The electricity prices are ridiculous. Sky high. But yet, loadshedding. If there were other companies supplying affordable electricity, so many more people would benefit. Furthermore, Eskom would have to rethink their ways of doing things and it might benefit the country. We are so tired of loadshedding. We have the sun, might as well use solar. In any case, it seems to be better.	Annette	employed individual
2022-07-09 20:10:54	Gauteng		Yes I do	Solar		Jeanne	employed individual
2022-07-09 20:10:10	Mpumalanga		Yes I do	Solar	Solar and Wind. South Africa is blessed with a lit of sunshine and there is enough wind at most of the areas. We need to utelize these natural sources that is not damaging to our environment. It would be great if the private sector is able to supply us without exploiting us.	Louise	employed individual
2022-07-09 20:10:07	Mpumalanga		Yes I do	Solar	Solar and Wind. South Africa is blessed with a lit of sunshine and there is enough wind at most of the areas. We need to utelize these natural sources that is not damaging to our environment. It would be great if the private sector is able to supply us without exploiting us.	Louise	employed individual
2022-07-09 20:06:53	KwaZulu-Natal		Yes I do	Solar	The South African climate is best suited for renewable energy production such as solar and wind. We need to take advantage of what our country has to offer and I am sure independent producers are lining up with capacity to support the grid.	Mohamed Faiz	employed individual

2022-07-09 18:07:02	Gauteng		Yes I do	Solar		Riana	employed individual

					<p>NUCLEAR IS NOT AN OPTION AND NEITHER IS MORE COAL.</p> <p>The ONLY alternatives are renewable energy. Renewable means Hydro/Wind and solar...</p> <p>For the few other people that is left in government, cares about your children's future that wants to make a difference: Please and with all respect consider the following solution:</p> <p>Lift all import and tax duties on anything solar for the next 10 years. That means Solar panels, batteries, cabling, switches and inverters as well as a tax break on the installation and sundry items required. Collaborate with banks and incentivize them to prove home owners and businesses a loan with a much lower interest rate for the purpose of installing solar. ALLOW CERTIFIED PRIVATE BUSINESSES TO INSTALL SOLAR AND ENSURE THAT SOLAR PARTS IMPORTED AND INSTALLED MEETS HIGH STANDARDS BY THE SABS (WHY THE HELL DO THEY EXSIST OTHERWISE?!) DON'T GET INVOLVED IN THE INSTALLATIONS EXCEPT FORM A STANDARD AND LEGAL STANDPOINT.</p> <p>Make sure we have premium quality working products installed so we have lasting systems!!!! Whatever surplus power anyone creates after charging batteries must be pushed back into the grid to serve industry! Solar will generate during the day and most factories and businesses run during that time. Most systems generate more solar that is needed for daily use and to charge batteries.</p> <p>This will also provide ample time to resolve or dissolve Eskom. Eskom is NOT sustainable you are bankrupting what is left of this beautiful South Africa!!! YOUR CHILDREN AND GRANDCHILDREN WILL SUFFER IF YOU DON'T ACT NOW!!!!</p> <p>The costs lost on TAX revenue will be made up by the amount of new business and new employment that will be generated by the influx of new installations and future maintenance. We will suffer a short term loss of income but we will benefit in the long run from not interrupting industry, delivering more sustainable power and creating a better future for all South Africans especially the disenfranchised.</p> <p>You are welcome to also allow other private power companies to compete but make sure they only provide renewable green energy and not nuclear that might cause a catastrophe or another source that creates excessive greenhouse gasses. The coal then not being burned can be exported to other countries so for the bunch of you that has interest in coalmines. Sell your overpriced coal to other countries and your absurd prices.</p>

2022-07-09 17:49:02	Gauteng		Yes I do	Solar	We all know that Eskom cannot be saved. Only maybe if it is privatized, Solar power with battery storage is the way out.	Theo	employed individual
2022-07-09 17:39:04	Gauteng		Yes I do	Solar	Good Day The use of solar is the best possible solution for South Africa. Allow household and businesses to push power back in to the grid.	Marcel	employed individual
2022-07-09 17:37:48	North West		Yes I do	Solar	In South Africa, solar energy is probably the most widely available energy source.	Carel	employed individual
2022-07-09 17:36:44	Western Cape		Yes I do	Solar	Government or government family members should not benefit from any dealing with power, power should be affordable. They ANC needs to pay back the money to fix the problem which they created. Independent producers of renewables should be allowed to operate immediately. independent households should be compensated for their batteries/ solar/ wind power by government. megan de beyer	megan	employed individual

2022-07-09 17:35:14	KwaZulu-Natal	Yes I do	Solar	Sun is free, safe and everlasting. Installation should be made more affordable as the initial cost is high even for middle income households. The government has once again failed to provide the nation the basic needs and the economy including small businesses are suffering due to incompetence and corruption.	Sharon	employed individual
2022-07-09 17:29:37	KwaZulu-Natal	Yes I do	Solar		Valerie	employed individual
2022-07-09 17:27:35	Western Cape	Yes I do	Solar		Keri	employed individual
2022-07-09 17:26:08	Northern Cape	Yes I do	Solar		Bert	employed individual
2022-07-09 17:25:18	Western Cape	Yes I do	Solar	Independent contractors to supply renewable energy such as wind and solar. Users should not have to pay any form of revenue to government but should in fact be reimbursed for power reverted back into the grid.	Darrell	employed individual
2022-07-09 17:24:36	Western Cape	Yes I do	Solar		Charline	employed individual
2022-07-09 17:22:03	Gauteng	Yes I do	Solar	We need power from green renewable sources not from fossil fuel or nuclear. Enough time has been wasted by this government and the economy is going to ruin. We need this NOW. FAT CATS IN GOVERNMENT STILL GET PAID VIA OUR TAXES, WE SHOULD HAVE A SAY IN WHAT, WHEN AND HOW.	Andrew	employed individual
2022-07-09 17:21:55	KwaZulu-Natal	Yes I do	Solar	Solar is the way to go. Sun, wind and energy is free I am a citizen of South Africa and it's my constitutional right to have electricity.	Rosa	employed individual
2022-07-09 17:19:45	Gauteng	Yes I do	Solar	Allow an open market system competition would create Jobs and insure quality services are delivered. And at the best price.	Calvin	employed individual
2022-07-09 17:18:31	Gauteng	Yes I do	Solar	South Africa needs this.	Thanyani	employed individual
2022-07-09 17:14:18	Gauteng	Yes I do	Solar	The corruption of the ANC has crippled Eskom. Its not only Eskom to blame. We have the sun so lets use it. There are many options but the fastest way to solve the power crisis is solar or wind power.	Ryno	employed individual
2022-07-09 17:12:14	Gauteng	Yes I do	Solar		Jeremy	employed individual
2022-07-09 17:11:30	Gauteng	Yes I do	Solar	Solar will be the quickest and cheapest and most environmentally best for the country	Patrick	employed individual
2022-07-09 17:10:27	Gauteng	Yes I do	Solar	We have sun virtually all year. Households can generate their own power and potentially feed back to the grid, businesses can generate part of their needs and use eskom as a backup.	Samantha	employed individual
2022-07-09 17:08:37	Western Cape	Yes I do	Solar	Fire all current eskom employees thats over paid for doing nothing employ people that can do the job	Jacques	employed individual
2022-07-09 17:08:29	Western Cape	Yes I do	Solar	Eskom is not capable of supplying SA Electricity requirements. Independent energy producers will also be a catalyst for creating jobs	Keith	employed individual
2022-07-09 16:52:58	Gauteng	Yes I do	Solar	Business , industry and households can fund their solar solutions by feeding excess back into the grid at remuneration. This can not only solve an energy crisis but also motivate green energy production and supply the grid. Grants can be offered for individuals who opt for solar production	Ryno	employed individual
2022-07-09 16:52:22	Western Cape	Yes I do	Solar	Of course independent power producers should be allowed to contribute to the grid! This was never in question but is now clear for all to see. Nuclear is ultimately the most effective way to meet the large scale need. That project needs to start right away. but will only be productive at least a decade down the line (please show some foresight in this regard!). The most immediate impact will be made with coal generation, but the environmental sacrifice seems unconscionable. Given the amount of sunny weather we enjoy, I support investment in solar power. If the economics of going this route don't add up (which will finally be tested once independent provision is unshackled), we'll have no choice but to fall back on coal.	Isak	employed individual
2022-07-09 16:45:10	KwaZulu-Natal	Yes I do	Solar	Let Eskom share the load, with another Independant power supply company to avoid loadshedding.	Monica	employed individual
2022-07-09 16:42:18	Gauteng	Yes I do	Solar	There is absolutely no reason for us not to allow electricity to become privatized (beyond the ANC government's need to control and plunder every public enterprise). There are already a whole bunch of private solar power companies that have the capabilities to supply most of SA with Solar power from their plants. It's better for the environment and for everyone in the country. The ANC needs to step up and put the people first! Enough is enough.	Kira	employed individual
2022-07-09 16:38:28	Gauteng	Yes I do	Solar	So far I think solar is the safer method which will help us get rid of these power outages as they badly affect the economy. People are suffering and enough is enough	Nthabiseng	employed individual
2022-07-09 16:31:42	Gauteng	Yes I do	Solar	This can supply direct power. It is sustainable and eco friendly. Unlimited supply without having to destroy the environment.	Gary	employed individual
2022-07-09 16:28:31	Gauteng	Yes I do	Solar	Solar and wind are the quickest deployable solutions to get South Africa out of the electricity mess we are in. Financial assistance for household to install solar will also help South Africans a lot	Gerhard	employed individual
2022-07-09 16:27:34	Gauteng	Yes I do	Solar	SA has great natural sunlight. We can use it almost the whole year bar a couple of days. Even our low sun days wi still generate heat. The Government needs to allow the private sector to step in and give tge country reliable power. This us the only way we can develop and sustain our growth in our economy	Gary	employed individual

2022-07-09 16:21:59	Western Cape		Yes I do	Solar			employed individual
2022-07-09 16:21:16	Gauteng		Yes I do	Solar	Households and businesses who wish to change over to solar power should be subsidized by government. Independent Power Producers to be allowed to generate energy and to place electricity on the grid at a fixed price. No red tape to get approval to privately generate electricity. No further coal stations to be built.	Marius	employed individual
2022-07-09 16:20:49	Gauteng		Yes I do	Solar	I Believe there is alot we can learn from Morocco specifically who export to Russia and Europe. Especially if we partnered with Namibia Botswana. We could create jobs for decades. We do need a combination of Molten Salt and photovoltaic energy and fly wheel energy storage to keep the Molten Salt from solidifying. But only if we can afford it Nuclear and Coal is cheaper and generally cleaner.has come a long way and it is possible to get clean energy but only if the processes are highly regulated and corruption is kept to an absolute minimum preferably zero especially in the tender process. All red tape on independent producers should be lifted as energy is power is education and uplifts everyone.	Sean	employed individual
2022-07-09 16:15:42	Western Cape		Yes I do	Solar	We are a country that experiences a huge amount of sunlight and would benefit greatly from using this source. Houses and businesses should also be incentivised to use solar because it can fit onto their roofs and significantly reduce demand on the grid. Solar technology is out there and is an easier solution to implement. Coal can supplement solar during the night and cloudy periods of time.	Ricardo	employed individual
2022-07-09 16:15:04	Western Cape		Yes I do	Solar	Solar and wind are sources of power that can be implemented in a relatively short period of time. Hydro is not an option as we are a water scarce country, nuclear is massively expensive and takes years to implement, gas is an option.	Ian	employed individual
2022-07-09 16:04:59	Gauteng		Yes I do	Solar	Solar and wind - our countries climate is perfect for solar and wind energy, with excess production put back into the grid. Wind turbines at coastal locations and solar across the inland regions.	Susan	employed individual
2022-07-09 16:04:34	KwaZulu- Natal		Yes I do	Solar		Timothy	employed individual
2022-07-09 16:03:41	Gauteng		Yes I do	Solar		Richard	employed individual
2022-07-09 15:53:41	Gauteng		Yes I do	Solar	I believe that a model of power generation that will still allows the state to collect revenue while still allowing for citizens to self generate is possible. Solar energy is the most abundant form of available energy. The constraining factor is the storage of the power generated for non-daylight hours. In this gap lies the potential for the state to provide this reserve energy at a fee. Citizens can still generate their own power and feed this back into the grid for a credit when needing to draw energy from the national storage.	Karl	employed individual
2022-07-09 15:40:15	Western Cape		Yes I do	Solar		Karin	employed individual
2022-07-09 15:38:10	Western Cape		Yes I do	Solar		Janelle	employed individual
2022-07-09 15:33:11	Mpumal anga		Yes I do	Solar		Diana	employed individual
2022-07-09 15:29:48	North West		Yes I do	Solar	How is it possible that a country with so many sunny days has not captilised on this source of energy. Instead of wasting money on power ships from Turkey, provide a source or subsidy for solar technology. Even if we stick with our current sources of energy, they will run out. The sun is not going anywhere for the next 5 billion years.	D	employed individual
2022-07-09 15:26:32	Western Cape		Yes I do	Solar		Julie	employed individual
2022-07-09 15:21:09	Gauteng		Yes I do	Solar	More independent power producers including Solar, gas and even Coal power plants should be allowed to add to the grid. This is to make up for the government inability to produce sufficient amount of electricity	Michael	employed individual
2022-07-09 15:02:49	Gauteng		Yes I do	Solar	I find it particularly galling that the very people tasked with keeping the power stations running and keeping to the maintenance schedule to achieve this are unable to do so, and then still have the impertinence to hold us ransom in demand of a 10% or more pay increase. This smacks of opportunism amongst workers with responsibilities for keeping the "lights on" in the country. None of us see a 10% increase, yet we are the main subsidizers of their salary demands for 10% increases? Where do they imagine in this picture I am painting that we are going to go "Ag, shame... let's give this murderous bunch of tyre-burning, property damaging, miscreants a 10% raise for the work they do not manage to handle effectively, anyway!!!" My patience with the ruling party and their sterling efforts to mismanage the power resources in this country to a standstill grows very thin. Since the "workers" at Eskom like to hold us ransom, let's reward them with a move to less COAL power reliance, I say... maybe they will think twice about pulling this stunt again.	Donovan	employed individual
2022-07-09 15:00:47	Mpumal anga		Yes I do	Solar		Gerda	employed individual

2022-07-09 14:58:16	Mpumalanga	Yes I do	Solar	Transitioning into more environmental friendly power sources should be a priority for global warming as well as economic growth. This will not be achieved by state owned enterprises alone. Eskom and the government is failing the country in the basic needs, therefore alternative options from the private sector is needed asap. Remove the corruption and mismanagement of the middle man. Give each citizen the choice where they can purchase electricity from with no political party (municipality) involved	Carla	employed individual

2022-07-09 10:04:49	Gauteng		Yes I do	Solar		T	employed individual
2022-07-09 10:02:33	Gauteng		Yes I do	Solar	Dissolve Eskom, allow new companies to supply power,allow consumers to pick their power supplier based on cost and service delivery. Allow people who have over supply of solar/ wind power to sell it back to the grid. Investigate the harnessing of methane fuel. Look at how Mauritius, Germany and other countries use combination of power supply	Lisa	employed individual
2022-07-09 09:58:12	North West		Yes I do	Solar	Government should allow solar plants to supply the grid. Tax rebate on solar for home use.	Hein	employed individual
2022-07-09 09:48:26	Mpumal anga		Yes I do	Solar	Solar and wind. End the government run institutions as they and money pits. Stay away from nuclear and other polluting sources. Stop taxing people for making provision for their own needs.	Thomas	employed individual
2022-07-09 09:48:02	Western Cape		Yes I do	Solar		Felix	employed individual
2022-07-09 09:41:33	KwaZulu- Natal		Yes I do	Solar	Government should subsidise panels for households and businesses planning to go solar. I feel it is much cheaper and feasible in the long term.	Lutchman a Sannasi	employed individual
2022-07-09 09:41:30	KwaZulu- Natal		Yes I do	Solar	Government should subsidise panels for households and businesses planning to go solar. I feel it is much cheaper and feasible in the long term.	Lutchman a Sannasi	employed individual
2022-07-09 09:24:11	Western Cape		Yes I do	Solar	In the face of SOE's being pillaged and driven into the ground by greedy corrupt Officials SA needs to open the energy market to commercial producers who can compete and provide competitive prices to the people. Eskom is a joke, 3rd highest paying Company in SA and still no service delivery. All avenues should be open and exploited to provide consistent service delivery at competitive prices.	Lance	employed individual
2022-07-09 09:20:21	Gauteng		Yes I do	Solar	Solar is cleaner and cheaper to generate than coal or nuclear. Anything is better than eskom.	Anette	employed individual

2022-07-09 09:15:57	Limpopo		Yes I do	Solar	The type of electricity production is not that important to me, as long as we can get electricity. I strongly support the privatisation of Eskom. If the government cannot assure that we have electricity 24 hours per day, then they need to allow people who can assure that to run the electricity generation in South-Africa. Loadshedding is destroying business in our country.	Maretha	employed individual
2022-07-09 09:14:35	North West		Yes I do	Solar	The sun is shining every day and I think that if we use it , we can have more electricity. It might be more expensive, but at the end of the day, electricity will be constant.	Neels	employed individual
2022-07-09 09:11:46	Western Cape		Yes I do	Solar	Except any form of power power that can be generated from the private sector.	David	employed individual
2022-07-09 09:11:32	Gauteng		Yes I do	Solar		Ernst	employed individual
2022-07-09 09:11:27	Mpumalanga		Yes I do	Solar	South Africa is a country that has sunny days almost year round. We have a very hot climate and therefore we would be a perfect candidate for solar power. It's a renewable energy source that won't run out of electricity as easily as Eskom does.	Cornette	employed individual
2022-07-09 09:10:40	Western Cape		Yes I do	Solar	The government should get their act together	Kulsum	employed individual
2022-07-09 09:08:14	Gauteng		Yes I do	Solar	South Africa is in need of people who are able of supplying power and is not creed driven, like Eskom	Francois	employed individual
2022-07-09 09:05:02	Gauteng		Yes I do	Solar	South Africa needs a combination of all types of Electricity production. And the supply needs to be supplied by Independent Power Producers. There must also be tax deductions for individuals who use renewable energy sources in their homes and places of work.	Angela	employed individual
2022-07-09 09:00:15	Gauteng		Yes I do	Solar		Danie	employed individual
2022-07-09 09:00:01	Gauteng		Yes I do	Solar	IPP will lead to more electricity and even lower prices, as competition will lead to better efficiency. That is if government does not meddle and it is open for all. Even homes can supply electricity. If I put solar panels on my roof I can generate electricity and supply the grid when industry needs it. I will then pull from the grid at night and only pay for the difference. It takes away the need for expensive batteries and every household in SA can become an electricity supplier.	Carel	employed individual
2022-07-09 08:56:28	Western Cape		Yes I do	Solar	It is plain stupid to rely only on Eskom which has a huge mountain to overcome to get back on track. Not only impact of corruption and mismanagement of past but also wasteful costs which IPPs don't have	Kg	employed individual
2022-07-09 08:54:32	Western Cape		Yes I do	Solar	Incentivize people to install solar and wind power with tax reductions	Angela	employed individual
2022-07-09 08:52:54	Gauteng		Yes I do	Solar		Arina	employed individual
2022-07-09 08:50:13	Western Cape		Yes I do	Solar		Hugert	employed individual
2022-07-09 08:49:19	Gauteng		Yes I do	Solar		Danie	employed individual
2022-07-09 08:48:56	Gauteng		Yes I do	Solar	Allow the private sector to contribute to the grid with whatever form of energy they can produce and pay them a fair fee per kWh. Solar, wind turbine, hydro, whatever. Then on the side, still try to fix Eskom. Incentivize big companies, which could implement major solar plants within one year by means of tax benefits, or similar. Do not forget about the normal households. Pay them a decent fee for feeding into the grid - all those small entities together is a big chunk of energy and it is available. Many people who are off grid, has surplus which could be fed into the grid, but currently their "admin portions" are so big, there is no incentive to feed into the grid. Further, LOOK INTO the Chinese concept of compressors feeding compressed air into large underground storage tanks during daytime and using the air at night time to spin turbines to generate energy, instead of batteries.	Daniel	employed individual
2022-07-09 08:45:59	Gauteng		Yes I do	Solar	Solar is freely available	Michael	employed individual
2022-07-09 08:41:13	KwaZulu-Natal		Yes I do	Solar	All Forms of Renewable energy will be suitable. They all have a role to play. Allowing private enterprises to supply electricity to SA, will increase competition and lower prices. Eskom has failed and its the ANC's fault. An option that must be considered and Implemented RIGHT NOW is removing dependence of individual citizens from the grid altogether. Allow each individual home that has its own generation capacity to add to the grid when it has surplus and receive from the grid when needed, They pay when they use and Get paid when they contribute. (This is being done in other countries already) Which means LOWER Bills to pay and more power to share with those that don't have generation capacity. Which all in all will lower prices for everyone.	Duncan	employed individual
2022-07-09 08:27:19	Western Cape		Yes I do	Solar	I feel that allowing Independent Power Producers would allow South Africans to more quickly get back on their feet. Competition is never a bad thing as it keeps the big guys from having a monopoly and allows for growth and innovation to keep happening. South Africans have been struggling between covid and unemployment. Keeping systems in place that no longer serve people adequately seems to be heaping more onto us for no reason.	nadene	employed individual
2022-07-09 08:18:47	Western Cape		Yes I do	Solar	Not just solar. A combination of solar, wind, gas, nuclear. When it starts to be about the people and the country and not power and money all will be better.	Ina	employed individual
2022-07-09 08:17:01	Mpumalanga		Yes I do	Solar		Ansie	employed individual

2022-07-09 08:15:25	Gauteng	Yes I do	Solar	1. Eskom must be privatised (cadre deployment and eventual corruption caused the fall of Eskom) 2. Anybody should be allowed to deliver electricity to the grid, we are in the dark, in a crisis! And ANC should stop delivering electricity to other countries. 3. Pravin Gordon should be investigated for his stubborn non-performance and incompetence to even try and find alternative solutions for better electricity generation. 4. Wind and solar generation should be effective and immediate renewable options for South Africa, while better solutions may be investigated for longterm future electricity generation.	Hester	employed individual
2022-07-09 08:09:30	Gauteng	Yes I do	Solar	I would like to see solar rolled out across all cities with subsidies or low interest loans available to private land owners to install solar panels and batteries	Carolyn	employed individual
2022-07-09 08:05:00	Western Cape	Yes I do	Solar	God has blessed us with sunshine and wind USE it wisely	christiaan	employed individual
2022-07-09 08:00:07	Gauteng	Yes I do	Solar	We have an abundance of sunlight in SA solar farms, and lower the cost of solar for homeowners is a start. Back up power source can be wind farms in windy places like Cape Town an PE.		employed individual
2022-07-09 07:57:08	Gauteng	Yes I do	Solar	South African weather is suitable for the Solar system. This is a safer option compared to gas. It's expensive but with government subsidy it can be affordable. Paying customers should be prioritised.	Erica	employed individual
2022-07-09 07:54:52	Mpumalanga	Yes I do	Solar	The government cannot produce enough electricity for the whole of South Africa. The government is not capable of doing that because of corruption, incompetency and people who are not dedicated to work!!! We need to get alternative ways to get electricity. Our country is going down! Job losses because of LOADSHEDDING. More people being under the bread line.....	Louise	employed individual
2022-07-09 07:54:26	Eastern Cape	Yes I do	Solar	We are a country with warm to hot summers and mild and sometime cold winters, overall the solar will better and eco friendly . Cost involve in the production of coal is to high, because it is link to many economical factors	Ansa	employed individual
2022-07-09 07:49:04	Gauteng	Yes I do	Solar		Harold	employed individual
2022-07-09 07:45:12	Limpopo	Yes I do	Solar	Solar is safer and natural. Gas etc are dangerous and environmentally damaging. We will get used to it. Yes it tend to be weaker during cloudy days but it is better than coal. Law must be really made tight for criminals, we are going nowhere because of them. We experience loadshedding due to electricity theft and corruption. Enough is enough. ANC must go.	Hellen	employed individual

2022-07-08 23:01:32	Gauteng		Yes I do	Solar	<p>Eskom must be broken up as quickly as possible.</p> <p>Generation of electricity by Eskom is failing.</p> <p>The transmission network is still in good shape and needs to be controlled to prevent a national blackout.</p> <p>The distribution of electricity must be able to procure electricity competitively.</p> <p>Distribution is local and should be able to purchase from Transmission or from local producers within the local distribution network. The distribution of electricity should be deregulated completely. The deregulation of the distribution of electricity is possible only when power generation is deregulated enabling the distribution to purchase wherever the electricity is available.</p> <p>The transmission company will have the greatest challenge in keeping the transmission network stable but can achieve this when it too can purchase electricity from deregulated power generators and offer it at competitive prices thereby outpricing smaller local suppliers. The choice of supply will bring down the cost of electricity to consumers.</p> <p>Power-hungry industries may find that they cannot buy subsidised electricity in a deregulated environment. This is where NERSA plays a role in ensuring that the economy is not negatively affected by the deregulation which may require a small prescribed tax on certain electricity consumers to subsidise the industries that are major employers and can justify a loss of profitability under a deregulated power regime.</p>	Johannes	employed individual
2022-07-08 23:00:29	Western Cape		Yes I do	Solar		Aisha	employed individual

2022-07-08 21:59:51	KwaZulu-Natal		Yes I do	Solar	Solar, wind & hydro - we should be looking to solve our current problems (actually very old problems by now) in sustainable and eco-friendly ways. Regulations should be amended immediately to allow IPPs to produce power from renewable sources, and to sell directly to the consumers.	Samantha	employed individual
2022-07-08 21:50:48	Gauteng		Yes I do	Solar		Cassim	employed individual
2022-07-08 21:40:38	Gauteng		Yes I do	Solar	Solar with vanadium redox flow batteries will be the best option for us. We already mine vanadium so construction flow batteries will be cheap for South Africa.	Ivan	employed individual
2022-07-08 21:31:40	Western Cape		Yes I do	Solar	It's a no brainer, eskom will never get it together. It is run by a dysfunctional anc who cannot even collect monies owed from municipalities they have allowed to steal power for votes, never mind build new power stations. We need to cut ties with eskom and be free to develop our own sources of power that plug into the grid, be it the domestic solar roof top or larger wind or solar farms.. We are being held hostage by a bunch of useless idiots who have no clue how to plan, what to do and how to do it. This will not change. Firing and rehiring CEO's will also do little to change anything as long as Gwede is in charge. He like his pals is a fool, consumed by his own importance and misguided 70's autocratic communist thinking . It's outdated and irrelevant to where we are at. Leave us be to sort ourselves out - at least do that for us! Please for god's sake	Andrew	employed individual
2022-07-08 21:17:13	Gauteng		Yes I do	Solar	Solar is the cleanest renewable and is definitely the way to go, so long as people don't try to turn productive farmland and nature reserves into solar farms - we need to use all available roof space and encourage businesses and homes to put up solar panels to make use of existing space. what about using wasteland such as mine dumps? there is also some room for other renewables such as wind in certain areas. hydro usually messes up the eco system. wind can also kill birds. small scale solar is best. Eskom should allow homeowners and businesses to push excess back into the grid for storage. there should be checks and balances to ensure that this does not become another opportunity for theft, so no selection by government of who can produce and who can't as we all know what happens then.	Beverley	employed individual
2022-07-08 21:14:29	Gauteng		Yes I do	Solar	I suppose solar would be best currently due to the increase in products and availability after all the load shedding we've been having. However, the state should not have control over it as they are currently not showing the skill to use what we have responsibly and clearly taxes are also not used wisely. Therefore, it should not even be taxed as they are the reason we are in this mess. Other methods of electricity production might also work. You should get the top engineers in the country BASED ON THEIR SKILLS AND EXPERIENCE not their skin colour to fix this problem. Perhaps pay the engineers to do this instead of wasting the tax money on flags, street names and other things that are not helping our economy.		employed individual
2022-07-08 21:10:59	Western Cape		Yes I do	Solar	I would think that electricity from both solar and wind from independent producers would help solve our electricity shortage. I think it is long overdue for the Government to declare a state of emergency to explore and implement additional and adequate power supplies. We have had Loading shedding for over 15 years and it is negatively affecting investment and job creation both of which are critical for the improvement in the standard of living for so many South Africans.	JULIA	employed individual
2022-07-08 21:03:45	Gauteng		Yes I do	Solar	Our current power crisis has a very negative impact on our economy. We need solutions that will also empower business owners.	Marissa	employed individual
2022-07-08 21:00:24	Gauteng		Yes I do	Solar	Immediately open up the electricity generation and generation infrastructure!!! There must be an easy and free process to get permits and licences. However, ZERO red tape for home, SMME's and small island generation please. Economical guaranteed rewards for feed-in tariffs if any power generation system is connected to the grid. Temporary scrap VAT and import duties on wind, solar, battery and other renewable energy systems and components for 3 years.	Eugene	employed individual
2022-07-08 21:00:11	Gauteng		Yes I do	Solar	We have an abundance of sun in South Africa! We also have plenty of areas known for wind. These resources are renewable and cost nothing once the plants are installed. What is even better is it is green...go for it! Enough of Eskoms nonsense!		employed individual
2022-07-08 20:56:15	Gauteng		Yes I do	Solar	I think that, still regulated by the Department, independent powered suppliers should be allowed to be contracted by municipalities or individuals to supply electricity.	Kirsty	employed individual
2022-07-08 20:56:12	Gauteng		Yes I do	Solar	I think that, still regulated by the Department, independent powered suppliers should be allowed to be contracted by municipalities or individuals to supply electricity.	Kirsty	employed individual
2022-07-08 20:55:58	Gauteng		Yes I do	Solar		Ockert	employed individual
2022-07-08 20:54:42	KwaZulu-Natal		Yes I do	Solar	Government should subsidize solar installation to all citizens. In the long run, the government does not have to worry about the eskom employees demanding for ridiculous increases while the country is deteriorating.	Rachael	employed individual
2022-07-08 20:54:34	Western Cape		Yes I do	Solar	Independent Power Producers should be allowed to immediately supply South Africa with electricity. Gas, wind, water, and solar may be used to generate electricity.	Martin	employed individual
2022-07-08 20:52:17	Eastern Cape		Yes I do	Solar	Solar is easy, quick and scalable. Nuclear is a good long term stable option and we need another 2 nuclear stations for stability.	Stuart	employed individual
2022-07-08 20:52:10	Gauteng		Yes I do	Solar		Brigitte	employed individual

2022-07-08 20:50:58	Western Cape		Yes I do	Solar	multiple options depending on area benefits. And allow multiple players / investors to allow feasibility and fair competition.	Lana	employed individual
2022-07-08 20:50:53	Western Cape		Yes I do	Solar	Allows municipalities and independent people to generate own power. It will assist in creating jobs, minimizing load shedding. Most important it will reduce corruption!	Erika	employed individual
2022-07-08 20:49:20	Western Cape		Yes I do	Solar		Dawood	employed individual
2022-07-08 20:49:17	Gauteng		Yes I do	Solar		C	employed individual
2022-07-08 20:49:15	Western Cape		Yes I do	Solar		Dawood	employed individual
2022-07-08 20:48:14	Western Cape		Yes I do	Solar		Esti	employed individual
2022-07-08 20:45:44	Gauteng		Yes I do	Solar	Utilise multiple options depending on area and benefits. Example, windy areas will benefit from wind power while sunny areas solar, etc. but all the different generations can supply into central storage / distribution. And allow multiple players / investors to allow feasibility and fair competition.	Mitesh	employed individual
2022-07-08 20:44:50	KwaZulu- Natal		Yes I do	Solar	Escom is corrupt and on the brink of collapse. Nothing can save it now!! Time for a new plan for SA!!	George	employed individual
2022-07-08 20:44:45	Gauteng		Yes I do	Solar		Anja	employed individual
2022-07-08 20:43:01	Western Cape		Yes I do	Solar		Francois	employed individual
2022-07-08 20:42:50	Gauteng		Yes I do	Solar	Government has lost control of the monopoly to supply electricity. It is now time for independent power providers and communities to relieve Government of its stronghold	Julius	employed individual
2022-07-08 20:42:37	Gauteng		Yes I do	Solar	Solar and wind renewable can be deployed fast, but something like nuclear or coal power plant will take much longer. In short term focus on renewable. In the long term we can look at new types of nuclear like thorium.	Nick	employed individual
2022-07-08 20:35:47	Gauteng		Yes I do	Solar	This will not further depleat natural resources. Everyone will be responsible for managing their own usage. One will never be inconvenienced for another's mismanagement.	Melinda	employed individual
2022-07-08 20:35:27	Western Cape		Yes I do	Solar	Solar Wind and other renewables.	Tony	employed individual
2022-07-08 20:34:48	Western Cape		Yes I do	Solar	I feel there is a dire need to amend legislation regarding independent power producers. The public needs an alternative and without competition a sole provider will never be able to offer fair service. BUT I also feel that in the event independent power producers are allowed to offer services to the public, that they should be regulated and installations should be done keeping our country's image in mind. I've been to countries like Thailand where cabling, while highly functional, is a huge eye sore and doesn't inspire any confidence in safety at all. Solar is very convenient but pricing does not allow the majority of SA access so there will have to be a massive decline in prices.	Labare	employed individual
2022-07-08 20:31:10	Western Cape		Yes I do	Solar	The implementation of solar power is perhaps more feasible for ordinary households to generate a part of their own electricity needs. Any surplus that they generate can then be supplied back into the Eskom grid.	Charles	employed individual
2022-07-08 20:28:00	Gauteng		Yes I do	Solar		Rina	employed individual
2022-07-08 20:27:32	Gauteng		Yes I do	Solar		Asanda	employed individual
2022-07-08 20:26:42	Gauteng		Yes I do	Solar	There are many solar farms in the Northern Cape, ready to be put online.	Jacques	employed individual
2022-07-08 20:26:11	Outside SA	Ireland	Yes I do	Solar	We could benefit from solar, wind and gas generated by waste (they have this in Ireland).	Carol	employed individual
2022-07-08 20:17:52	North West		Yes I do	Solar		Leonie	employed individual
2022-07-08 20:14:48	Western Cape		Yes I do	Solar	I am not an expert scientist but South Africa gets a lot of sun, we might as well put it to good use. I think a combination of clean energy option will work best. Wind, Solar, Hydro where possible. If every house can generate only half of the electricity it uses, it will already help a lot. And private suppliers can fill the gap. As long as it is clean energy, we don't want to go backwards any more than we are currently.	Dane	employed individual
2022-07-08 20:14:06	Outside SA	Netherla nds	Yes I do	Solar	It is only logical to remove the red tape. It is not ok for a country with so much sunshine to left behind by red tape. Eskom is a no show and it ia clear that they cannot handle it. Get rid of the red tape and corruption and elevate the country to what it can and should be!	Wayne	employed individual
2022-07-08 20:11:32	Western Cape		Yes I do	Solar	Help people who can't afford electricity with solar to avoid them having to steel electricity. The law around steeling from the national energy grid, public transport or public destruction should be amended. Those criminals should be arrested for crimes against the public as we all are paying for these services.	Mathilda	employed individual
2022-07-08 20:11:11	Gauteng		Yes I do	Solar	We need different suppliers rather than just having Eskom, we can't rely on just one supplier.	Brenda	employed individual
2022-07-08 20:05:08	Western Cape		Yes I do	Solar		Stef	employed individual

2022-07-08 20:04:35	Western Cape		Yes I do	Solar	The electricity crisis is costing millions in income generating capacity , foreign investment and growth. This is not a political issue but a humanitarian and financial issue. Government should be the one trying to find a solution . Instead we have to petition Government to solve the problem. As long it is environmentally safe and sustainable other companies should and must be allowed to generate electricity. Government will still benefit from VAT and Income Tax on those entities.	Margaret	employed individual
2022-07-08 20:04:17	Western Cape		Yes I do	Solar		Lizel	employed individual
2022-07-08 19:57:22	Western Cape		Yes I do	Solar	Eskom has failed. It is time to give private companies a chance to supply the country with the electricity it needs.	Peter	employed individual
2022-07-08 19:54:26	Gauteng		Yes I do	Solar	South Africa is not called sunny South Africa for no reason. I firmly believe that going solar would solve a lot of problems in the electrical sphere and economical sphere. Electrical: There are various ways in which this aspect can be approached. Many households can generate their own electricity using solar panels. This will also help people living in informal settlements as seen in the uMngeni Local Municipality where solar panels were provided for people living in shacks. Economical: Solar panels can be a make shift roof for parking lots, which not only ensures that the place has electricity, but that cars stay cooler so less aircon would be used and subsequently less petrol/diesel. Solar panels can be placed on any terrain, whether that be on water, farms or buildings, which makes it less of an irritation and more of a convenience. Going solar also creates more opportonuiyy for solar businesses to be created hence more people being employed.	Nikita	employed individual
2022-07-08 19:52:32	Western Cape		Yes I do	Solar		Fatima	employed individual
2022-07-08 19:47:54	Gauteng		Yes I do	Solar	We need to move away from Eskom in this country as quickly as possible. The country is on shaky ground. People are getting angrier. Fuel & food prices put another layer of hardship onto the breadwinners! Heaven help those living on or completely below the poverty line. The country needs positive change that everyone can benefit from and change the gloomy picture we all live under. This load-shedding is holding the country captive.	Susan	employed individual
2022-07-08 19:47:35	Gauteng		Yes I do	Solar	We have wonderful Sun in South Africa.	Sheetal	employed individual
2022-07-08 19:41:43	Western Cape		Yes I do	Solar	Solutions other than what we currently have should be implemented. Solar or Wind are sustainable options. Regulation of the sector should be enforced relating to costs, supply and risks mitigated from the OUTSET to prevent corruption. Privatization of the sector should be done cautiously and with sound practices/ protocols and procedures in place. This is NOT the time nor should be the way to allow and make people rich and chase profits!	Nina	employed individual
2022-07-08 19:40:56	Gauteng		Yes I do	Solar		Kervin	employed individual
2022-07-08 19:39:16	Free State		Yes I do	Solar		Nthabisen g	employed individual
2022-07-08 19:38:48	Western Cape		Yes I do	Solar	Support and subsidize small scale wind and solar immediately	Paula	employed individual
2022-07-08 19:37:31	Gauteng		Yes I do	Solar	Solar, hydro and wind provide the most immediate solution to our current energy crises as there are already players in the market who can start rolling out in the short term. Current legislative restrictions need to be lifted as this should be considered a state of emergency, far more critical than COVID ever was. Eskom must be privatized so that audits don't just verify adherence to budgets but scrutinize the income and expenditure of the company(ies) which will lead to less corruption (which is the only thing that the ANC excels at). On a longer term more nuclear power stations should be added to the grid as these are less dependent on battery storage and the technology has advanced dramatically. They are also safer for the surrounding communities than coal and gas. Ramaphosa needs to take immediate action to dismiss cadre employment and appoint people in executive positions who know what they are doing and are going to do the job properly instead of siphoning our taxes into their personal bank accounts. The Zondo commission report has provided an excellent starting point and he should use his executive power to take immediate action instead of sitting on the fence between the multiple factions within the ANC, most of whom want to remain in power to continue sucking at the teat of South African, rapidly decreasing, wealth.	Glen	employed individual
2022-07-08 19:36:12	Gauteng		Yes I do	Solar	We have a natural power sources The Sun, Wind and Water source (Hydro) , The other sources are opportunities for collusion and just makes room for more corruption to transpire ...stick to a natural source unless they are also owned by the 1%.	Moir	employed individual
2022-07-08 19:34:54	Western Cape		Yes I do	Solar	Solar power is the way to go!	Melissa	employed individual
2022-07-08 19:33:51	Gauteng		Yes I do	Solar	Our country needs to make use of hydro and solar energy to create power. We live in Africa and have the best natural resources that are also clean energy to produce power. Allow private enterprises to help with solutions, especially experts in the field. We can't allow caders with failing coal mines to control our access to electricity. It is killing our economy and causing great unhappiness, extreme difficulty and frustration for the citizens.	Maché	employed individual
2022-07-08 19:31:56	Western Cape		Yes I do	Solar		Ferdi	employed individual

2022-07-08 19:31:23	Gauteng		Yes I do	Solar		Eugene	employed individual
2022-07-08 19:30:56	Western Cape		Yes I do	Solar		Terence	employed individual
2022-07-08 19:29:45	Gauteng		Yes I do	Solar		Mon	employed individual
2022-07-08 19:27:43	Western Cape		Yes I do	Solar	South Africa is blessed with abundant sunshine, virtually all year-round, and substantial investment in solar should be encouraged and promoted. Businesses and individuals should be financially rewarded for solar installations to reduce the demand on Eskom for electricity.	Marc	employed individual
2022-07-08 19:24:33	Western Cape		Yes I do	Solar	I've had this idea for so long that there need to be alternate power suppliers to go up against Eskom as then maybe they'd get their act together!	Debbie	employed individual
2022-07-08 19:24:13	Gauteng		Yes I do	Solar	We are a country with abundant sunshine so this would appear to be the best solution. We need additional power now not in 2 to 3 years time	Basil	employed individual
2022-07-08 19:22:54	Gauteng		Yes I do	Solar	Have great sunshine in sa all year round	Abdool	employed individual
2022-07-08 19:20:40	Gauteng		Yes I do	Solar		Uros	employed individual
2022-07-08 19:18:42	Western Cape		Yes I do	Solar	It should be law that no new house or development can be erected without a solar geyser. Electrical geysers should be scrapped going forward. Anyone who generates his own electricity and creates surplus, should be able to feed it back into the grid and get paid for it. A single national power provider has proven to be a failure under ANC rule. More players will mean a more fair market economy where prices can become competitive again. We are currently getting ripped blind by eskom that exists for no other reason other than to enrich a few,	Jeanine	employed individual
2022-07-08 19:17:21	Gauteng		Yes I do	Solar	Sunlight is literally free. Sunlight available everyday somewhere in South Africa. Government stop wasting tax payers money and subsidize every house hold with solar to generate their own. Industry can use solar and other means.	Lindy	employed individual
2022-07-08 19:17:15	Western Cape		Yes I do	Solar		Nicola	employed individual
2022-07-08 19:15:56	KwaZulu-Natal		Yes I do	Solar		Dianne	employed individual
2022-07-08 19:14:09	Eastern Cape		Yes I do	Solar	There are numerous wind turbines going up all over and they should be used to put power back onto the board	Vivian	employed individual
2022-07-08 19:13:49	Western Cape		Yes I do	Solar	I live off-grid. Have lived like this in 3 different municipalities and each has no idea how to deal with additional power that can be fed into the grid without making it feel like they will rip me off. The last call was with Eskom and that is well documented for Rurafles, but stupid expensive in the long run. Look at the Auz models and consider a rebate like was done for solar water heating.	Karel	employed individual
2022-07-08 19:12:45	Gauteng		Yes I do	Solar	Any alternative power source (especially solar, wind or hydro) should be used to alleviate the loadshedding crisis, and provide South Africa with electricity.	Gren	employed individual
2022-07-08 19:11:38	Western Cape		Yes I do	Solar	Wind power is also a good idea, but we need to develop power supply systems that use renewable energy sources, both for the earth's ecosystems and to ease the pressure on ESKOM.	Melanie	employed individual
2022-07-08 19:09:32	Gauteng		Yes I do	Solar	Eskom needs to be privatized and multiple private power providers needs to supply power, thus ensuring fair prices for the consumer. Power supplied should be generated with the best economically way possible.	Jaco	employed individual
2022-07-08 19:04:11	Gauteng		Yes I do	Solar		Charles	employed individual
2022-07-08 19:04:06	Western Cape		Yes I do	Solar	Eskom hasn't resolved loadshedding in over 15 years so at this point I believe any and all other potential suppliers need to be given the chance to avoid further damage to the economy. Renewables with battery banks (something like Tesla MegaPacks) should be the way forward.	Scott	employed individual
2022-07-08 19:03:19	Western Cape		Yes I do	Solar	Solar, hydro and wind are my top three choices. These three are the greenest options, there is suitable technology available to harness them as well as enough of these resources in South Africa to generate power.	Lalena	employed individual
2022-07-08 19:02:19	Western Cape		Yes I do	Solar		Elise	employed individual
2022-07-08 18:57:11	Gauteng		Yes I do	Solar	Taking house holds and businesses off grid through solar will alleviate pressure on the network and is environmentally friendly	Andrew	employed individual
2022-07-08 18:56:55	Gauteng		Yes I do	Solar	WE shouldn't should not be forced to pay the pockets of a corrupt system and then be blocked by red tape red to provide for ourselves trough independent sources. Give us back our choice and freedom !	Stephne	employed individual
2022-07-08 18:55:46	Gauteng		Yes I do	Solar	The problem is that very few options exist which can immediately address the obvious shortfall in production. While Nuclear may be a long term solution, short term needs to almost crowd-source this problem. Solar is easier for lots of smaller parties to fund and maintain and collectively produce large quantities of electricity for the grid. Imagine if we could make so much spare electricity that we can easily sell surplus to our neighbouring countries again. This could not only solve an immediate power shortage but also provide a major source of funding for the government.	Greg	employed individual
2022-07-08 18:55:35	Gauteng		Yes I do	Solar	Solar and wind power plants can be quickly brought online in phases and is the only way we can transition our world to a carbon free economy	Stefan	employed individual
2022-07-08 18:47:20	Gauteng		Yes I do	Solar	Sunshine is free and eskom is unable to deliver stable power	Erika	employed individual
2022-07-08 18:46:01	Gauteng		Yes I do	Solar	The economy is going to tank and implode if this is continued!!	Ellison	employed individual
2022-07-08 18:42:56	Gauteng		Yes I do	Solar	We have very good sun by allowing immediate supply of solar to SA we can add to the power grid quickly and effectively	Fuzail	employed individual
2022-07-08 18:42:08	Gauteng		Yes I do	Solar	Yes, the current government has failed in all departments. We need to get a new source to supply power to the country and defonately not Eskom	Ismail	employed individual

2022-07-08 18:42:04	Gauteng	Yes I do	Solar	We live in one of the sunniest countries in the world, why the government hasn't allowed the private sector to step up to provide is way beyond me - too much greed and corruption is evident. Places like Australia and parts of Europe generate enough electricity to the point that they are able to feed back into the system, allowing government to not have to worry about power shortages or have to spend exorbitant amounts of tax payers money fixing amenities that should work and already cost tax payers a large portion of their dwindling salaries to attain (ie. electrical supply). The power needs to be taken away from the ANC controlling our lives and the public given the chance to make there own minds up on who and how they want electricity supply - we are supposed to be a nation of freedom, not corrupt dictatorship that is ruining people's lives. With the market opening up it will allow for more sustainable/renewable energy options to become more affordable, as well as protecting the limited precious resource of coal, as well as protecting our beautiful lands from excessive polution. It will also take a lot of pressure off maintenance of facilities, as less facilities will be needed and Eskom can focus on maintaining establishments that are in better conditions and keeping their staff, instead of outsourcing and creating even further job losses. Time for change, before it is too late and South Africa becomes Zimbabwe 2.0.	Stephanie	employed individual
2022-07-08 18:32:46	Western Cape	Yes I do	Solar		Jacobus	employed individual
2022-07-08 18:31:13	Gauteng	Yes I do	Solar	Any form of energy generation will help to ease the current shortage of electricity. Government should also do their part and stop wasting taxpayer's money. Recope unlawfull expenditure. Prevent unlawfull expenditure. Proper oversight of taxpayer's money should be installed to make illegal expenditure impossible. Reveal plans to get unavailable generating capacity of Eskom back to the grid. Reveal plans to curb illegal connections to the grid. Government should pay there monies due to Eskom and munisipalities.	Johan	employed individual
2022-07-08 18:30:50	Gauteng	Yes I do	Solar		Edward	employed individual
2022-07-08 18:29:54	Western Cape	Yes I do	Solar	Solar & wind would suit. The infrastructure is already in place.	Jennifer	employed individual
2022-07-08 18:29:44	KwaZulu-Natal	Yes I do	Solar		Vanessa	employed individual
2022-07-08 18:27:58	Gauteng	Yes I do	Solar		Kyle	employed individual
2022-07-08 18:27:38	Western Cape	Yes I do	Solar		Bianca	employed individual
2022-07-08 18:25:01	Gauteng	Yes I do	Solar	Solar is the best and cleanest solution, but for an immediate intervention electric/coal may be more viable. Either way, competition to encourage higher standards overall is a good thing. Solar tax breaks for clean energy and being able to push power back into the grid and get money back as a result would be ideal and take the pressure off the failing system.	Pippa	employed individual
2022-07-08 18:24:07	Western Cape	Yes I do	Solar	Both Solar and wind production would suit., there is already infrastructure for both.	Francis Dudley	employed individual
2022-07-08 18:23:06	Western Cape	Yes I do	Solar	No motivation needed to justify a solution to a serious matter.	Louis	employed individual
2022-07-08 18:18:47	Western Cape	Yes I do	Solar		Gillian	employed individual
2022-07-08 18:15:42	Gauteng	Yes I do	Solar	I suggest we go solar and wind to generate electricity. Definitely no to nuclear as government will want kickbacks again. Get the money back that was stolen, eg from selling our fuel reserves. Get private security to guard our electrical infrastructure like the DA is doing in Cape Town.	T	employed individual
2022-07-08 18:13:01	Western Cape	Yes I do	Solar		Tina	employed individual
2022-07-08 18:12:24	KwaZulu-Natal	Yes I do	Solar	I dont think this is going to make any difference as I believe they just do their own thing anyway. Its time for change and challenge. These palookers don't know whether they are Arthur or Martha. Get rid of gwedi!	Stuart	employed individual
2022-07-08 18:11:49	Gauteng	Yes I do	Solar	Short term solar as it can be brought on stream relatively quickly. Long term proper built nuclear. Second remove all red tape and allow households to generate there own power with no restriction. This would free up a lot of capacity which would enable growth in the economy. If eskom cannot supply power then individual households should be allowed to do it themselves with no penalties to compensate eskom for loss of earnings	Brendan	employed individual
2022-07-08 18:10:28	Gauteng	Yes I do	Solar		Collin	employed individual
2022-07-08 18:10:21	Gauteng	Yes I do	Solar	We have lots of solar and wind. Continued coal will only expand coal mining into areas where no concern for environmental impacts will be addressed and getting exploration and mining licenses from corrupt government is easy. So, yes, cut the red tape, change legislation, but steer away from coal. Lots of options available from independent suppliers	Leon	employed individual
2022-07-08 18:05:43	Gauteng	Yes I do	Solar		Derick	employed individual
2022-07-08 18:02:55	Gauteng	Yes I do	Solar		Liza	employed individual

2022-07-08 18:02:23	Gauteng		Yes I do	Solar		Bev	employed individual
2022-07-08 18:00:16	Gauteng		Yes I do	Solar	It is long overdue that South Africa get more than one energy supplier. No industry with a monopoly competition is healthy. South Africa needs to move away from coal power to renewable energy. We have alot of Sun and need tu utilize this for cleaner more sustainable energy.	Conrad	employed individual
2022-07-08 17:58:56	Western Cape		Yes I do	Solar		Mario	employed individual
2022-07-08 17:57:14	Western Cape		Yes I do	Solar	Using solar power is beneficial and easy accessible even for the poor if the government could subsidize the poor in a proper way instead of wasting funds on old power stations.	Zeenith	employed individual
2022-07-08 17:54:22	Western Cape		Yes I do	Solar	This should have happened 10 years ago!!!	Riana	employed individual
2022-07-08 17:54:15	Western Cape		Yes I do	Solar		Angeline	employed individual
2022-07-08 17:47:47	Gauteng		Yes I do	Solar	If independent producers are not restricted, solar and wind are sustainable ways to produce electricity. Remove the red tape and let's get our economy moving. We should not rely on coal as the producers there still appear to be corrupt. Shut them down as soon as possible.	Jacqueline	employed individual
2022-07-08 17:47:46	KwaZulu-Natal		Yes I do	Solar	The sun is free	Joshua	employed individual
2022-07-08 17:47:40	KwaZulu-Natal		Yes I do	Solar	The sun is free	Joshua	employed individual
2022-07-08 17:45:22	Western Cape		Yes I do	Solar		Shelton	employed individual
2022-07-08 17:41:25	Western Cape		Yes I do	Solar		Bruce	employed individual
2022-07-08 17:35:54	Western Cape		Yes I do	Solar		Debi	employed individual
2022-07-08 17:35:23	Western Cape		Yes I do	Solar	Right now the government is useless in stead of helping this country grow and help unemployment, they are feeding themselves fat raping the country of resources! Where is all the money! We need to stand together for change or it will get worse! Change is eminent we have to rise up!	Levona	employed individual
2022-07-08 17:34:59	KwaZulu-Natal		Yes I do	Solar	Solar is the most environmentally friendly. Wind turbines are detrimental to birds.	Lesley	employed individual
2022-07-08 17:34:41	Western Cape		Yes I do	Solar		Mandy	employed individual
2022-07-08 17:33:07	Gauteng		Yes I do	Solar	We have enough sunlight in South Africa to use it. Important would be to have good batteries to hold charge during the day and use in the night.	Deborah	employed individual
2022-07-08 17:29:48	Western Cape		Yes I do	Solar	I would say South Africa needs any method of energy generation that does NOT rely on the government! Government has been found to be unreliable in this regard and ordinary people on the street are having to fork out for decades of mismanagement!!!!	Jacqueline	employed individual
2022-07-08 17:29:45	Western Cape		Yes I do	Solar	Sunshine and wind are Gods gift to mankind - we need to utilise both more efficiently.	Helen	employed individual
2022-07-08 17:28:55	Western Cape		Yes I do	Solar	Solar obviously requires some form of energy storage, batteries, salt, etc. Let IPPs decide	Andre	employed individual
2022-07-08 17:25:55	Gauteng		Yes I do	Solar	We need affordable alternatives	Anneke	employed individual
2022-07-08 17:25:52	Limpopo		Yes I do	Solar	The fault lies with the corrupt ANC government. Anything they touch turns into disaster The only way out of this is independent power producers whether it be solar, wind, hydro or even coal for now.	Andre	employed individual
2022-07-08 17:25:32	Gauteng		Yes I do	Solar	A combination of hydro, solar or wind energy as best suited to the region.	Heidi	employed individual
2022-07-08 17:19:33	Western Cape		Yes I do	Solar	South Africa has very good environmental conditions for generating solar electricity.	Anna	employed individual
2022-07-08 17:09:13	Free State		Yes I do	Solar		kyle	employed individual
2022-07-08 17:06:09	Eastern Cape		Yes I do	Solar	Privatize every public service if you want to turn SA's demise around.	Stephan	employed individual
2022-07-08 17:03:42	Gauteng		Yes I do	Solar		Esther	employed individual
2022-07-08 17:03:21	Western Cape		Yes I do	Solar	Sunshine in abundance. Used effectively in European countries eg Germany and The Netherlands	Margaretha	employed individual
2022-07-08 17:02:20	Gauteng		Yes I do	Solar		Therese	employed individual
2022-07-08 17:00:34	Gauteng		Yes I do	Solar	South Africa is a sunny country so solar works really well Most houses with solar produce more electricity than they need	Zatiette	employed individual
2022-07-08 16:59:35	KwaZulu-Natal		Yes I do	Solar		Anousha	employed individual
2022-07-08 16:58:48	Gauteng		Yes I do	Solar		Jacques	employed individual
2022-07-08 16:58:46	KwaZulu-Natal		Yes I do	Solar		Caryl-Ann	employed individual
2022-07-08 16:58:01	Western Cape		Yes I do	Solar		SHIRLEY	employed individual
2022-07-08 16:55:34	Gauteng		Yes I do	Solar		Yasmin	employed individual

2022-07-08 16:53:12	Gauteng		Yes I do	Solar		B	employed individual
2022-07-08 16:49:28	Gauteng		Yes I do	Solar		Flat	employed individual
2022-07-08 16:49:16	Western Cape		Yes I do	Solar	Solar, wind and hydro, should be considered. This is the opportunity to step up and bury Eskom once and for all, the state owned monopoly needs to end right now.	Warren	employed individual
2022-07-08 16:48:25	Eastern Cape		Yes I do	Solar	Eskom is a government controlled corrupt flop. They want monopoly on our energy supply so that they can charge whatever they want. There needs to be other electricity suppliers that are not linked to government.	Alec	employed individual
2022-07-08 16:42:17	Gauteng		Yes I do	Solar	Most cost effective	Mariëtte	employed individual
2022-07-08 16:41:49	Gauteng		Yes I do	Solar	Most cost effective	Mariëtte	employed individual
2022-07-08 16:41:33	Gauteng		Yes I do	Solar		Veronica	employed individual
2022-07-08 16:41:21	Gauteng		Yes I do	Solar	A combination of solar and wind - we have the largest coastline in Africa, why not utilise sea breezes (as done in parts of Europe)?	Karin	employed individual
2022-07-08 16:41:02	Free State		Yes I do	Solar		Gwen	employed individual
2022-07-08 16:40:57	Northern Cape		Yes I do	Solar	Hier buite Upington is 'n reuse sonplaas, maar die opgewerkte krag word nie aan ons voorsien nie. SA het oorgenoeg son, en oorgenoeg spasie om die son te benut, maak gebruik daarvan.	Gerda	employed individual
2022-07-08 16:40:00	Western Cape		Yes I do	Solar	This is possibly the quickest solution to bring the needed capacity online. Looking into gas and nuclear for medium and long term options.	Jaco	employed individual
2022-07-08 16:39:02	Western Cape		Yes I do	Solar	All electricity generation capacity methods should be explored, with wind and solar probably being the most readily available. I'm ok with nuclear if it's price competitive and not susceptible to government interference, corruption or mismanagement.	Cronje	employed individual
2022-07-08 16:38:28	Gauteng		Yes I do	Solar		Gary	employed individual
2022-07-08 16:38:18	Gauteng		Yes I do	Solar		Robert	employed individual
2022-07-08 16:32:32	Western Cape		Yes I do	Solar	We have plenty of sun in the Western Cape. The times the sun don't shine we can make a fire.	Jacques	employed individual
2022-07-08 16:28:37	Western Cape		Yes I do	Solar		Jamie	employed individual
2022-07-08 16:27:42	Gauteng		Yes I do	Solar	SA is blessed with sunshine almost 365 days a year. Incentivise household with a R76,000 to install their own solar and the option to feed excess power back into the grid for a fair fee. This will allow small business access to the little power that Eskom has to enable economic growth.	Anish	employed individual
2022-07-08 16:25:52	Gauteng		Yes I do	Solar	We have plenty of solar and wind which are both classified as 'green energy'. Windy areas should be utilized for wind energy and everywhere else we can use solar. Private electricity suppliers can help us in the meantime until these plants are built. Eskom is dying and Government is behaving like ostriches with their heads in the sand. How can any loadshedding be acceptable. It is a disgrace!! Eskom is in a total state of disrepair and the people of SA deserve a stable and sufficient energy supplier and this is not Eskom. Our economy is dying and people are losing hope. We cannot go on like this.	Irma	employed individual
2022-07-08 16:24:47	Gauteng		Yes I do	Solar	Why can we only use one form of electricity production? Wind and solar would both work in SA.	Genevieve	employed individual
2022-07-08 16:21:24	Gauteng		Yes I do	Solar		Marieta	employed individual
2022-07-08 16:20:25	Gauteng		Yes I do	Solar	Sun is readily available and better for the environment	Teresa	employed individual
2022-07-08 16:19:28	Western Cape		Yes I do	Solar		KIRSTEN	employed individual
2022-07-08 16:15:27	Western Cape		Yes I do	Solar		Andries	employed individual
2022-07-08 16:13:33	KwaZulu-Natal		Yes I do	Solar	At this point in time (darkness) we shouldn't debate issues that concern the welfare of SA and its citizens. It's time to act, and to do so immediately. We are in a crisis and we need to make decisions and act with haste. Government needs to allow independent electricity producers (in whatever form - solar, wind, etc) to help in supply and stop load shedding. Once things have stabilized we can look at a long term solution that is environment & economically friendly. Government needs to stop trying to control everything and let those that want to and are able to, help SA.	Ian	employed individual
2022-07-08 16:10:41	Gauteng		Yes I do	Solar		Annalize	employed individual
2022-07-08 16:08:54	Western Cape		Yes I do	Solar		Adrian	employed individual
2022-07-08 16:06:47	Gauteng		Yes I do	Solar	I can only select one option above and would prefer a mixed energy solution but Solar would be my main source of energy. This coupled with smart battery solutions would provide a fairly stable source of energy for our grid.	Jeffrey	employed individual

2022-07-08 16:04:16	Western Cape		Yes I do	Solar	<p>We have sunshine and lots of roofs. I am sure the are businesses out there that would install solar systems to peoples houses, factory roofs, Shopping center parking lots where during the day the electricity is sent back into the grid to power the country, and storing it in mega battery packs like they have done in South Australia to power at night.</p> <p>This can be installed at little or no cost to the homeowner and the suppliers can get a return on investment selling that electricity back to the user. Once the supplier has recouped the cost of the installation it can revert back to the home owner to maintain and then get a rebate on electricity going back onto the grid.</p> <p>Investors are applying this model to many different business around the world. This would bring in huge investments and eventually decrease the price of electricity. See again the battery pack installation in South Australia. Lets learn from other succesful projects around the world.</p>	Stefan	employed individual
2022-07-08 16:03:44	Western Cape		Yes I do	Solar	South Africa needs a just transition away from coal into renewables as soon as possible. Opening up access for IPPs is not a complete solution, but would represent a significant step in the correct direction or at least make future steps easier.	Darien	employed individual
2022-07-08 16:02:51	KwaZulu- Natal		Yes I do	Solar	We have braaivleis, rugby, sunny skies...	Naresh	employed individual
2022-07-08 16:01:51	Western Cape		Yes I do	Solar		Michael	employed individual
2022-07-08 16:00:25	Western Cape		Yes I do	Solar		Charmaine	employed individual
2022-07-08 16:00:13	Eastern Cape		Yes I do	Solar	<p>There are numerous ways of generating electricity, but we are not allowed to, or are penalized for generating our own electricity, yet, our government can't produce nor provide electricity for its people!</p> <p>Allow us to generate our own, allow small companies to provide electricity, giving work to more people, generating alternative sources of electricity and ensuring a sufficient supply of electricity to our country!</p>	Chanté	employed individual
2022-07-08 15:59:59	Gauteng		Yes I do	Solar	<p>Government is doing nothing to correct the dire situation with our power supply.</p> <p>SCRAP THE POLICY RED TAPE FOR INDEPENDENT POWER PRODUCERS!!!!!!!!!!</p> <p>We cannot rely on this government for anything, they are incompetent!</p>	Chrissy	employed individual
2022-07-08 15:56:02	KwaZulu- Natal		Yes I do	Solar	It's clear that Eksom is unable to provide a sustainable source of electricity to the country. It's time that the private sector gets involved. It will create competition (which means lower prices for the consumer) and grow the energy industry (which means more jobs). Like everything the ANC touches, Eskom has become an expensive failure.	Ashley	employed individual
2022-07-08 15:52:09	Gauteng		Yes I do	Solar		L	employed individual
2022-07-08 15:48:39	Gauteng		Yes I do	Solar	The power/electricity crisis should be addressed without delay as it is damaging to not only peoples lives but also businesses in the country as well as the economy	Trudy	employed individual
2022-07-08 15:46:02	Gauteng		Yes I do	Solar	Please remove all the cancer in govt, starting with the leader (sic)...	Afzal	employed individual
2022-07-08 15:41:04	Western Cape		Yes I do	Solar		Amanda	employed individual
2022-07-08 15:40:10	Gauteng		Yes I do	Solar		Sheridan	employed individual
2022-07-08 15:39:15	Western Cape		Yes I do	Solar	Solar power is clean and constant.	Marilize	employed individual
2022-07-08 15:38:42	North West		Yes I do	Solar	It is my opinion that the country is fed up with Eskom's continuing failure to maintain the power grid. Eskom should be considered defunct, and steps should quickly be taken to either privatize Eskom, or allow independent power producers to take up the slack.	Frans	employed individual
2022-07-08 15:34:18	Gauteng		Yes I do	Solar	Solar power is a good immediate solution to the problem. There are many reliable private companies who are able to provide it in homes,	Jennifer	employed individual
2022-07-08 15:33:38	Western Cape		Yes I do	Solar	We are in a dire situation and government should be scrapping red tape. End of story,	Craig	employed individual
2022-07-08 15:31:19	Mpumal anga		Yes I do	Solar	Wind and solar should be expanded faster and private enterprises should be able to feed additional power into the grid and for a comparable price.	Jeff	employed individual
2022-07-08 15:31:09	Gauteng		Yes I do	Solar	Get rid of the ANC red tape and wake up to reality	Gerhard	employed individual
2022-07-08 15:30:34	Western Cape		Yes I do	Solar	Solar PV is the way to go...just need space close to the electrical infrastructure to avoid cost of cables and connections	E	employed individual
2022-07-08 15:30:21	KwaZulu- Natal		Yes I do	Solar	We have large pieces of open land where we could build solar fields, including the use of wind at night.	Renier	employed individual
2022-07-08 15:30:17	Western Cape		Yes I do	Solar	Electricity production should be fully distributed with every roof collecting solar energy and providing it to the grid managed by Eskom. Eskom's responsibility should shift towards acquisition, distribution, storage and resale of electricity, bot electricity generation. In that way we should be able to make major progress towards improving energy availability, reducing greenhouse gasses and providing a healthy environment for our people.	Friedeman (Fritz)	employed individual

2022-07-08 15:27:19	Gauteng	Yes I do	Solar	So its a pity we can not a select a combination, at present 1 stage costs SA R300mn per hour estimated so the application of a combination of solutions needs be explored to provide the most efficient and immediate response, while medium and long term considerations can then be applied based on ESG concerns . The move to private partnerships is also as neither the current government nor its ministers are capable of running a brothel let alone their own party, even less a conglomerate lihlke eskom	Craig	employed individual
2022-07-08 15:26:00	Western Cape	Yes I do	Solar	Certain areas, like Drakenstein, Stellenbosch, Swartland, Witzenburg, etc, are prime for solar energy. Combine that with wind and hydro on the West Coast, and we'll have a great source of renewable energy.	Lian	employed individual
2022-07-08 15:23:51	Gauteng	Yes I do	Solar	Any renewable energy source provided it is not marred in corruption and price must be clarified before allowing this.	vijaynand	employed individual
2022-07-08 15:23:19	Gauteng	Yes I do	Solar	A combination of energy sources is required. Let REAL experts make recommendations not politicians	Heidi	employed individual
2022-07-08 15:21:51	Western Cape	Yes I do	Solar	A combination of solar, wind and gas would be obvious for South Africa considering the abundance of space we have for such facilities and the weather for it. The government must get out of the way now though or it'll never happen.	Kevin	employed individual
2022-07-08 15:21:21	Gauteng	Yes I do	Solar		Phillip	employed individual
2022-07-08 15:18:10	Western Cape	Yes I do	Solar		Julian	employed individual
2022-07-08 15:17:36	KwaZulu-Natal	Yes I do	Solar	Any sustainable, functioning electricity supply will be acceptable as long as it works. The current situation is untenable.	Cheryl	employed individual
2022-07-08 15:16:41	North West	Yes I do	Solar	Privatiseer die verskaffing van krag - enige beskikbare vorm - dit voel asof SA gyselaar gehou word met huidige alleenreg op verskaffing van krag.	Heleen	employed individual
2022-07-08 15:16:36	Gauteng	Yes I do	Solar	Sunny South Africa. Utilize it! All new developments should have solar energy. Unfortunately still very expensive for general households to implement. Nuclear clean, safe and relatively low maintenance. The Monopoly should be pressurized by independent private companies.	Inge	employed individual
2022-07-08 15:15:46	Gauteng	Yes I do	Solar		Herman	employed individual
2022-07-08 15:14:40	North West	Yes I do	Solar	Solar, Wind and Hydro are fast deployable, renewable energy sources. Stop the inclusion of Nuclear in debates, our country cannot afford it, not financially, technically or consciously. Rather than penalizing the people that have a surplus on power by most municipalities, allow those to sell their power back to grid at reasonable rates. Remove the surplus personnel at Eskom, especially those involved in sabotage or corruption, and use their already above industry standard wages to fund solar-geysers and solar installations for the public, taking away pressure of the grid. Stop the hiring at Eskom because of AA, BEE, EE and political affiliations, and start hiring on merit and know-how only, our public enterprises have been too weakened to hire on reasons of bias any longer	Hc	employed individual
2022-07-08 15:11:54	Gauteng	Yes I do	Solar	We the taxpayers can not afford all the loadshedding and incompetant Eskom to bleed us dry any longer. We pay way to much and do not get any service.	Wilma	employed individual
2022-07-08 15:08:51	Western Cape	Yes I do	Solar		Joan-Mari	employed individual
2022-07-08 15:07:50	Gauteng	Yes I do	Solar	Amend ridiculous restricting laws immediately! We need as many safe methods of producing electricity as possible. The government is committing power suicide in our once beautiful country that used to work.	Pam	employed individual
2022-07-08 15:03:30	Western Cape	Yes I do	Solar		Sharief	employed individual
2022-07-08 15:02:48	Gauteng	Yes I do	Solar		Susan	employed individual
2022-07-08 15:02:12	Gauteng	Yes I do	Solar	Why are we even being asked to comment? The debate around IPPs has been around long enough. Electricity supply is on life support. Pull the plug on a lost cause and tap into natural resources.	Linda	employed individual
2022-07-08 15:00:32	Western Cape	Yes I do	Solar	South Africa has an ideal climate for solar power, which has been proven to be an effective way of generating power. Instead of clutching to the aging infrastructure at Eskom and throwing good money after bad, get rid of the red tape and allow IPP's to make a difference. How about a income break, for all South Africans who are willing to take our homes or businesses off the grid, thereby easing pressure. I for one would be very happy to make an investment of this nature if I was rewarded with a reduction in my tax (in the year of purchase).	Bradley	employed individual
2022-07-08 14:59:58	Western Cape	Yes I do	Solar	There should be an immediate call for businesses who have excess energy from solar to feed into the grid. Big companies who don't use their solar on the weekend for example can do this. Homes should be subsidised with solar panels to generate their own energy and feed excess to the grid if possible. This can free up Eskom to start running their fleet properly and not fixing broken plants. There should be a state of emergency to attend to corruption and destruction of infrastructure at eskom. This should be immediately made treason! All types of energy should be used, wind/solar/gas/coal/wave energy/ocean current energy. Stop the procrastination! Nothing ever progresses with this current government only goes backwards.	Kelly	employed individual
2022-07-08 14:59:50	Gauteng	Yes I do	Solar	Solar and wind clean energy we should have plenty opportunities to harness	Samantha	employed individual

2022-07-08 14:59:08	Gauteng	Yes I do	Solar	I not only think Solar should be used but also wind, hydro & gas. The Government needs to move forward fast on allowing private enterprise to get involved. Clearly government running of Eskom over the years has been a disaster, particularly under Zuma. The Government need to fast track now, as the economy is in failure state. Why would anyone want to invest in this country with the electricity supply being as it is.?	W	employed individual
2022-07-08 14:57:31	Western Cape	Yes I do	Solar	Solar has been proven to have high longevity, low environmental impact and is highly effective in delivering green energy. Considering the high amounts of sunlight in South Africa, solar can be a strong alternative to the current gas and nuclear options	Reuben	employed individual
2022-07-08 14:56:20	Free State	Yes I do	Solar		Marlene	employed individual
2022-07-08 14:55:47	Gauteng	Yes I do	Solar	We have to find sustainable earth friendly options	Sean	employed individual
2022-07-08 14:54:53	Gauteng	Yes I do	Solar		Lauren	employed individual
2022-07-08 14:53:50	North West	Yes I do	Solar		Katrina	employed individual
2022-07-08 14:53:16	Northern Cape	Yes I do	Solar		John	employed individual
2022-07-08 14:52:57	KwaZulu-Natal	Yes I do	Solar	Natural source energy	Lungile	employed individual
2022-07-08 14:51:28	Western Cape	Yes I do	Solar		Eloise	employed individual
2022-07-08 14:50:22	KwaZulu-Natal	Yes I do	Solar	We have known since 1998 that we will be running out of capacity to power the country properly, but nothing was done about it. In 2007 load shedding started. Badly maintained infrastructure, growing demand, and corruption all played their role, bringing us to this crisis point. The red tape specifically designed to stave off any independent power generation being added to the grid must be cut through and we should see a new energy future that includes renewable energy sources like Solar. In fact, we should be leading the world on this as we are ideally placed for solar, we have so much sun, and so much space, this should be our focus, not coal, not an energy provider that leaches off the country, cripples the economy and will slowly take us down with it as it self-destructs in front us, leaving a handful super-wealthy elites and the shattered country in its wake.	Zuleka	employed individual
2022-07-08 14:49:33	Western Cape	Yes I do	Solar		Tracey	employed individual
2022-07-08 14:45:51	Gauteng	Yes I do	Solar	We need more competitors in this field to stop the corruption thats in power!!	Jurie	employed individual
2022-07-08 14:45:07	Limpopo	Yes I do	Solar	SA is a diverse country. The method of production should be eco-friendly and not based on any further degradation of our environment. There should be taken into account different methods for different areas in terms of hydro, solar and wind or combination of all three.	ERIKA	employed individual
2022-07-08 14:44:31	Gauteng	Yes I do	Solar		Eran	employed individual
2022-07-08 14:44:02	Gauteng	Yes I do	Solar		Konrad	employed individual
2022-07-08 14:43:24	Western Cape	Yes I do	Solar	Govt. needs to deregulate and remove red tape as soon as possible. Govt. has not being able to provide uninterrupted power supply and thus private suppliers should be encouraged to come on stream ASAP. I also believe that private households should receive subsidies to install solar power to free up power to enable business to recover and grow.	Eric	employed individual
2022-07-08 14:42:51	KwaZulu-Natal	Yes I do	Solar	Besides possibly fixing the NATIONAL energy issues we are experiencing, this would cause wonderful competition for Eskom and other businesses providing power and this can only be good for all sectors of society. Removing the red tape would be a sign to South Africa that "the people's" needs come before those of party, person, or sector. Solar is not the only answer - wind would also be a great move as would natural gas. These would also remove some of the avenues of corruption as when the sun is out or the wind blows or the gas is flowing, there is power. No need to be buying coal from a possibly corrupt third party. This would also align us - world wide - as a nation intent on doing what all others are (ostensibly) aiming for: clean energy. This would lead to further investment by local and international big business and tourism due to the view that we are serious about this matter. This would be an all round wonderful move allowing more players to be involved in the economy of the country, creating jobs and sending a sign to everyone that the country comes first and profits, personal interest and party power is not the driving force behind what happens in the country.	Daine	employed individual
2022-07-08 14:42:36	Western Cape	Yes I do	Solar	Govt. needs to deregulate and remove red tape as soon as possible. Govt. has not being able to provide uninterrupted power supply and thus private suppliers should be encouraged to come on stream ASAP. I also believe that private households should receive subsidies to install solar power to free up power to enable business to recover and grow.	Eric	employed individual

2022-07-08 14:42:19	Gauteng		Yes I do	Solar	We need more competitors in this field to stop the corruption thats in power!!	Marilyn	employed individual
2022-07-08 14:42:11	Northern Cape		Yes I do	Solar	Government should be helping people with solars rather than them flushing money through Eskom that is doing nothing better	Juliet	employed individual
2022-07-08 14:40:07	Western Cape		Yes I do	Solar	Solar and Wind; the combination would allow many more private producers to provide electricity.	Michael	employed individual
2022-07-08 14:39:21	Gauteng		Yes I do	Solar	Solar and wind will be the fastest to get online. Nuclear is also a good option as it is clean power.	Jacques	employed individual
2022-07-08 14:39:05	Mpumalanga		Yes I do	Solar	We need to move away from coal and we have an abundance of sun, so solar is the way to go IF THE GOVERNMENT STOPS THEIR SH@##T and gets things going!!!	Jan	employed individual
2022-07-08 14:38:46	Gauteng		Yes I do	Solar	It is possible for entities with private generating capacity to supply the grid. This would immediately alleviate the shortage of electricity if it would be allowed legally.	Lucia	employed individual
2022-07-08 14:36:15	KwaZulu-Natal		Yes I do	Solar	Any type at this stage would be better then what we have, but solar or some combination of that and coal may be the quickest solution bases on my limited knowledge of this	Zelda	employed individual
2022-07-08 14:32:19	Western Cape		Yes I do	Solar	The move to solar energy must be done together with incentive schemes to encourage homeowners and businesses to install batteries and inverters. Solar power on its own won't provide for the peak times at night so we need homeowners to install the inverters/batteries to allow for saving power produced through the sun during the day for use at night. Instead of the billions of Rand allocated to a useless exercise in trying to sort out decrepit old power stations, take those funds and use them to provide financial incentives to homeowners and owners of buildings that are used by businesses.	Bonny	employed individual
2022-07-08 14:31:34	Gauteng		Yes I do	Solar	Environmentally friendly and we have loads of sun.	Charmaine	employed individual
2022-07-08 14:29:20	Western Cape		Yes I do	Solar	We as the people need independent suppliers for electricity in order to remove the monopoly Eskom has over the past years. I do not see this government fixing Eskom any time soon. How long must the people still pay for their incompetence.	Sadie	employed individual
2022-07-08 14:27:13	Limpopo		Yes I do	Solar		Hannes	employed individual
2022-07-08 14:27:05	Gauteng		Yes I do	Solar	Solar is cheap and does not polite the atmosphere.	Tebogo	employed individual
2022-07-08 14:26:58	Free State		Yes I do	Solar	Others: We have an army. We have a Hulk. We have a jar of dirt. South Africa: We have the sun!!! We have water!!! We have the wind!!! We have people willing to harness their energy and turn it into magical electricity... Maar ons is te korrup om dit te gebruik tot voordeel van ons land...	Marica	employed individual
2022-07-08 14:26:01	Gauteng		Yes I do	Solar		Christine	employed individual
2022-07-08 14:25:22	Western Cape		Yes I do	Solar	We live in a country that has mostly sunny days, we also love in a country that has a lot of wind, why are we not using our natural resources more, to meet our electrical needs? These things should have been put in place years ago, but unfortunately the ANC is known for sticking to old methods, and messing them up. We need to take the monopoly away from a state owned supplier and privatize it so there is more incentive for companies to supply not only more reliable, but cheaper power to the people of SA. Eskom has had years to prove us wrong, and they have failed miserably, it's time for them to hand over to people who know what they are doing. Our economy has suffered enough these last few years, we need to start doing what we can to save our beautiful country.	Anne	employed individual
2022-07-08 14:25:07	Gauteng		Yes I do	Solar	We have all suffered enough with over 14 years of loadshedding under Eskom's monopoly, which has only dug us into a deeper and deeper pit. It's time to relinquish that monopoly which clearly is not working. Between wind and solar power, we have both the technologies and huge supply of these resources to generate our power supply on short notice. Hydro would take longer to implement, but would possibly be a good option for the coast - provided the companies responsible can be trusted to keep up with the necessary maintenance.	Erika	employed individual
2022-07-08 14:24:36	Free State		Yes I do	Solar	Our dependence on Eskom and it's monopoly on our country is what's allowed for this abuse of power to go on and it has a stronghold on our economy because the loadsheddings and power outages impact negatively on the economy whilst we're facing a serious unemployment crisis. We need to have an open market and competitive pricing.	Brian	employed individual
2022-07-08 14:19:41	North West		Yes I do	Solar	South Africa has an abundance in solar, wind and hydro electric generation capabilities. These three also require much less labour and time to set up as opposed to building fossil fuel and nuclear power plants. South Africa should move away from mega plants and focus on producing electricity locally in it's districts, but still be interconnected: this will also greatly reduce maintenance downtime -and maintenance cost.	Gerhard	employed individual

2022-07-08 14:16:42	Eastern Cape		Yes I do	Solar	I believe solar is the cleanest form of energy however whatever energy source that is readily and easily available I would support. Anything to assist and alleviate the major energy problem we have right now. I know that some sources of energy take a long time to bring into the national electricity grid but something that is cost-effective and efficient would be most suitable right now.	Jason	employed individual
2022-07-08 14:16:41	Eastern Cape		Yes I do	Solar	Solar and wind electricity production are most suited for South Africa	Liz	employed individual
2022-07-08 14:16:08	Gauteng		Yes I do	Solar	I feel we should be using solar and wind production techniques to add to the grid. Nuclear should be primary	Cheryl	employed individual
2022-07-08 14:15:39	Gauteng		Yes I do	Solar	We need as much help as we can get! Eskom is failing us! How can our economy grow or merely survive with more than 10 hours of loadshedding per day. And not to mention our safety, as areas with loadshedding become targets for crime. In South Africa and particularly in Gauteng we have sunshine almost every day. Solar power, despite its initial costs, has proven to be more cost effective and efficient than Eskom's power!	D	employed individual
2022-07-08 14:15:04	Western Cape		Yes I do	Solar		Janet	employed individual
2022-07-08 14:14:50	Gauteng		Yes I do	Solar	As South Africa has so many days of sun Solar would definitely assist our electricity productions.	Wendy	employed individual
2022-07-08 14:14:29	KwaZulu- Natal		Yes I do	Solar		JUNE	employed individual
2022-07-08 14:14:14	Western Cape		Yes I do	Solar	Most reliable free source of power.	Martin	employed individual
2022-07-08 14:12:59	Gauteng		Yes I do	Solar		Inbal	employed individual
2022-07-08 14:11:25	Gauteng		Yes I do	Solar	The electricity issue is a state of disaster. IPP need to be fast tracked and additional tax rebates should be given to households and businesses to assist them to put up solar. It's been 15 years and loadshedding and ridiculous price increases is getting worse every year. And as a normal citizen it doesn't feel like the government is taking it seriously. Scrap the VAT and duties on renewable energy component imports and fast track and simplify the process for IPP. Solar is cheap and quick to install.	Marthinus	employed individual
2022-07-08 14:11:07	Gauteng		Yes I do	Solar		Willie	employed individual
2022-07-08 14:09:58	Western Cape		Yes I do	Solar		Karen	employed individual
2022-07-08 14:08:06	Gauteng		Yes I do	Solar		Tayla	employed individual
2022-07-08 14:07:00	Western Cape		Yes I do	Solar	Erecting solar panels will be much quicker than building wind farms. It is clean energy and can contribute to the grid much quicker than wind turbines as the turbines are big and cumbersome to erect. The government needs to take IMMEDIATE action.	LINDA	employed individual
2022-07-08 14:06:36	Western Cape		Yes I do	Solar	We have sunshine in abundance. Use it.	Sandra	employed individual
2022-07-08 14:04:52	Western Cape		Yes I do	Solar	It is an acceptable policy abroad, like in Israel, for individuals with excess solar electricity to sell that unused power back to the electricity providers. why can't that happen in SA? There are many people with ample solar panels, who would be delighted to help. Unfortunately, the majority of South Africans can't stand together. Unified we will stand, divided we will fall. If the Boer Volk only stood together against the humanistic forces, promoting the decay of incompetence, driven by Marxist lies, we wouldn't have been in this mess.	Petrus G	employed individual
2022-07-08 14:03:47	Gauteng		Yes I do	Solar	At this stage our only hope of averting total collapse is to get rid of the hold the government has over this utility. We are on a road to nowhere, all the fundamentals of a strong economy have collapsed! It's time for change.	Rose	employed individual
2022-07-08 13:57:52	Gauteng		Yes I do	Solar	The only reason the ANC government is not allowing PP to get involved is that they haven't figured out a way of stealing from the process.	Ramesh	employed individual
2022-07-08 13:57:40	Western Cape		Yes I do	Solar		Jeunesse	employed individual
2022-07-08 13:57:39	Western Cape		Yes I do	Solar		Jeunesse	employed individual
2022-07-08 13:56:16	Western Cape		Yes I do	Solar	Combination of solar & wind, of which there is abundance, plus hydro. The solution is there for all the world to see - break ESCOM's monopoly, boot out the corrupt authorities and scrap the red tape	Sonnie	employed individual
2022-07-08 13:56:11	Gauteng		Yes I do	Solar	Eskom is failing the nation	Nombulelo	employed individual
2022-07-08 13:53:47	Gauteng		Yes I do	Solar	South Africa is fortunate to be in the solar belt and as such has the potential to be a primary solar electricity generator exporting energy to the world.	Robin	employed individual
2022-07-08 13:53:40	Western Cape		Yes I do	Solar	SA possesses many square kilometres of unproductive land in the Karoo, perfect for solar power. Solar panels once installed require little maintenance and they can be installed quickly compared to any other power source. There is no minimum size required, so we can build many small facilities .	Chris	employed individual
2022-07-08 13:53:36	Western Cape		Yes I do	Solar	SA possesses many square kilometres of unproductive land in the Karoo, perfect for solar power. Solar panels once installed require little maintenance and they can be installed quickly compared to any other power source. There is no minimum size required, so we can build many small facilities .	Chris	employed individual
2022-07-08 13:51:31	Gauteng		Yes I do	Solar	Solar is not full proof but at least an easier / quicker solution until other options can be explored	jackie	employed individual

2022-07-08 13:51:29	Western Cape		Yes I do	Solar	Please allow for Independent Power Producers to compete with Eskom with immediate effect. The lack of dependable electricity in RSA is crippling the economy and affecting citizens in a negative manner on every layer of society. After the Covid pandemic we were looking forward to rebuilding our country but the worsening effects of a failing power utility are flooring us.	Hanlie	employed individual
2022-07-08 13:50:01	Gauteng		Yes I do	Solar	Should be a combination of solar and wind	Grant	employed individual
2022-07-08 13:48:50	Eastern Cape		Yes I do	Solar	Wind and solar as a method for alternative energy source	richard	employed individual
2022-07-08 13:48:28	Western Cape		Yes I do	Solar	It's ludicrous that we are not already utilizing the solar we have available to us in this country. Opening the market up to independent energy companies will be good for competition and service delivery. Eskom and the South African Government are a disastrous failure!	Matt	employed individual
2022-07-08 13:47:01	Western Cape		Yes I do	Solar		Tanya	employed individual
2022-07-08 13:46:20	North West		Yes I do	Solar		Amanda	employed individual
2022-07-08 13:45:00	Gauteng		Yes I do	Solar		Julie-Ann	employed individual
2022-07-08 13:44:43	Western Cape		Yes I do	Solar		Disa	employed individual
2022-07-08 13:44:05	Mpumal anga		Yes I do	Solar	Provide adequate incentives for companies and citizens alike that generate their own electricity and allow them to contribute to the grid. Either pay them for their production or give them proper rebates or tax reductions. But the main thing is that independants should be encouraged to replace Eskom. Competition is ultimately great for the consumers.	Daniel	employed individual
2022-07-08 13:42:10	Western Cape		Yes I do	Solar	It is very clear that our power should be produced by independent producers. Out of the money grabbers and into the hands of business who will want to supply a reliable service and have no access to our tax money to bail them out and still fail dismally.	Gideon	employed individual
2022-07-08 13:38:16	Western Cape		Yes I do	Solar		Pierre	employed individual
2022-07-08 13:37:56	Gauteng		Yes I do	Solar	Solar is free energy with initial Capex Government can make more money with solar	Mukhtar	employed individual
2022-07-08 13:35:27	Gauteng		Yes I do	Solar	Load shedding is crippling our economy and driving people into financial ruin as well as affecting our moral. Eskom is not going to be fixed any time soon and to grow as a country we need electricity. We are blessed in this country with so much abundant sunshine which can be turned into sustainable, eco-friendly electricity. If the ANC government wants South Africa to grow and to stimulate the economy we need to drop the red tape and fast and allow IPPs to feed power into the grid as well as allowing private citizens and businesses to generate their own power without having any penalties imposed on them! Having no power for hours several times per day plays havoc with running a business and in homes and families.	Fern	employed individual
2022-07-08 13:32:15	Eastern Cape		Yes I do	Solar		Sonja	employed individual
2022-07-08 13:31:32	Outside SA	United Kingdom	Yes I do	Solar	Solar or wind would be the best short term solution. Nuclear. Long term.	Neil	employed individual
2022-07-08 13:30:49	Western Cape		Yes I do	Solar	We live in a beautiful country blessed with sunny days for most of the year. It's a no-brainer that we seriously need to harvest clean, environmentally friendly methods of generating power. Wind and Hydro are also options which could work exceptionally well in some parts of the country. No to coal, diesel, nuclear and gas! And Gwede Mantashe needs to go asap.	Sarel	employed individual
2022-07-08 13:29:46	Western Cape		Yes I do	Solar	The anc has proved that theft, corruption and incompetency is the only way they know therefore they should privitise or outsource Escom. The anc has ruined a good country in every possible way. Time for the government to stand back and let people who know what they are doing take over. Those people who went on strike must be fired. The unions are destroying the country alongside the anc and it is all for selfgain. they do not care about the country and its people. Our unemployment rate shows how government has failed our people. We need to do something really fast or we will be another totally failed state as the rest of Africa.	Margaret	employed individual
2022-07-08 13:29:32	Gauteng		Yes I do	Solar	The South African economy is suffering because of loadshedding.	Karin	employed individual
2022-07-08 13:29:12	Gauteng		Yes I do	Solar	You ask me to indicate one selection, but other from solar is WIND also efficient. Both is relatively clean and available at present. It just needed to be allowed into the grid. With the present sabotaging of coal and the Escom plants, by their own workers, i do think tha independant suppliers who understand the importance of a most essential commodity, will control their workers in a better manner.	Christo	employed individual
2022-07-08 13:28:36	Gauteng		Yes I do	Solar		Joey	employed individual

2022-07-08 13:26:19	Gauteng		Yes I do	Solar	We have an abundance of sunlight in SA, especially in places like the Karoo. It is time to use renewable and clean methods to supply SA with electricity	Dave	employed individual

2022-07-08 13:25:18	KwaZulu- Natal		Yes I do	Solar	We should probably be using a combination of wind, solar and hydro , dependent upon the region and conditions.	David	employed individual
					Ek ondersteun vryemark elektrisiteit voorsiening omdat al die krag onderbrekings die land se ekonomie lam lê en dit sirkel uit na minder werksgeleenthede wat armoede mee werk wat dan die misdaad voed. Dit is 'n bouse kringloop. Sal graag wil sien dat kragvoorsiening die uitwerking op die omgewing in ag neem en dat stelsels in plek gestel word om die natuur se natuurlike hulpbronne soos son en wind benut word - eerder as om meer gevaarlike besoedeling soos fracking en giftige uitlaat stowwe, te veroorsaak. Kan ons nie sonpaneele op die damme op dryftoestelle monteer nie - dit verskaf elektrisiteit en kan water verdamping bekamp - 2 probleme met eenslag oplos. Sterkte.

2022-07-08 13:24:51	Gauteng		Yes I do	Solar		Jacobus	employed individual
					Get rid of the 100 MW licence restriction for IPPs as well as mining/ manufacturing sector and allow them to generate their own power so that the economy can become industrialised again. Remove Gwede Mantashe from the Mineral Resources and Energy portfolio because he is an impediment to progress in returning South Africa to investment grade levels. Ditto for Pravin Gordhan, he does not have the qualifications or experience for the position he's in, and he was previously responsible for interfering in Eskom's salary "negotiations" that led to higher increase demands from unions in 2022. Reduce Eskom's workforce and peg any further salary increases to the official inflation rate. Dismantle Eskom's in-house "loan scheme" and get a 2nd Andre de Ruyter to manage the investigation and speedy prosecution of corrupt Eskom employees from top to bottom. Force all municipalities to buy power directly from Eskom at a universal unit price and introduce legislation preventing local municipalities from interfering and adding additional costs and margins to increase their revenue generation. Enforce a universal unit price for all prepaid electricity with the minimum margin for reimbursement for services provided with mandatory jail sentences for directors of companies involved in profiteering in prepaid metering. Reduce the costs of solar panels/thin film, inverters and batteries by removing any import levies. Divert all Covid-19 funding, Government salary bonuses and impose a 5% parliamentary salary levy to subsidise solar water heaters and LED lighting conversion for SARS-verified low to middle income home owners (ones that actually pay rates and taxes). Dismantle any local municipality regulations requiring registration of solar panels and inverters (with a view to imposing levies as a means of municipal income generation), but keep regulations that enforce safety guidelines and standards for installations, especially for hybrid inverters. Increase penalties for criminals stealing batteries from mobile network towers as well as solar panels from houses with mandatory jail time for any leadership members of criminal syndicates.

2022-07-08 13:15:23	Western Cape		Yes I do	Solar	Solar is safe, reliable and cheapest	Oreste	employed individual
2022-07-08 13:15:19	Gauteng		Yes I do	Solar		Michelle	employed individual
2022-07-08 13:12:59	Gauteng		Yes I do	Solar	Repeatedly centralized State owned businesses have let the country down either due to corruption or a mix of politics and bureaucracy slowing them down from taking action. Electricity is so fundamental to modern life and without cheap and stable supply we hamper the ability of the South African to innovate, grow and benefit from the global economy. We should promote as much competition and opportunity for generating electricity as soon as possible to improve the reliability and reduce the cost of electricity.	Jaco	employed individual
2022-07-08 13:12:04	KwaZulu- Natal		Yes I do	Solar	Loadshedding is an absolute nuisance, as much as we have schedules so do the thieves...so they know which area to hit when...I have solar where I can and have an inverter with battery....trying to get off the grid where the prices keep going up...solar coupled with gas works for me....	shakila	employed individual
2022-07-08 13:09:56	Gauteng		Yes I do	Solar	We need to get rid with corrupted Eskom & use someone with honesty to solve our electricity problems.	Antoinne	employed individual
2022-07-08 13:09:24	Western Cape		Yes I do	Solar	It is clear the government cannot provide the basic services to it's citizens. Time for private entities to do this. I'd rather pay them for a service delivered than have taxes stolen, with no service.	Lizelle	employed individual
2022-07-08 13:08:34	Western Cape		Yes I do	Solar		Patrick	employed individual
2022-07-08 13:07:43	Gauteng		Yes I do	Solar	We Need power, and there is power available. What is the hold up?	Philip	employed individual
2022-07-08 13:06:58	KwaZulu- Natal		Yes I do	Solar		Taskeen	employed individual
2022-07-08 13:05:41	Western Cape		Yes I do	Solar		Daniel	employed individual
2022-07-08 13:05:08	Gauteng		Yes I do	Solar	Allow residents with solar installations to feed back into the grid and give a reasonable credit for it.	Neil	employed individual
2022-07-08 13:04:55	Gauteng		Yes I do	Solar	Offer subsidised solar power installations. Incentives for people with solar to sell power back to the energy provider, whoever that may be. This works well in Australia.	Peta	employed individual
2022-07-08 13:04:39	Gauteng		Yes I do	Solar	I believe that there are a lot of solar resources that have been deployed that can be utilized to assist in alleviating the effects of the energy crisis we are stuck with in South Africa. There are strict standards that have been put in place for Eskom to comply with, use similar standards and let business contribute. I will be no easy feat to make this work but start moving towards renewable energy now and develop "the right way" to get business to contribute instead of flogging a dead horse	Adolph	employed individual
2022-07-08 13:03:38	Western Cape		Yes I do	Solar	We need to have diverse energy production, we can't just rely on coal and Eskom has proven to become more expensive, IPPs along with Eskom should drive down the price of electricity and make it affordable	Caleb	employed individual
2022-07-08 13:02:23	Gauteng		Yes I do	Solar		Angie	employed individual
2022-07-08 13:02:01	Western Cape		Yes I do	Solar	Any alternative power will do, but the solar infrastructure has taken off well given the technological advancements and local buy-in with our current load-shedding. I don't believe we have a coal issue, but we have a management issue in terms of our nation's power grid, supply and maintenance. The push to end the monopoly Eskom has on our nation's power supply will, beyond the obvious, give Eskom a reason to pull up their socks with the competition at hand thus eliminating their complacency to deliver their "promises" and duties that they have done so poorly which has ultimately put us in the position we are in now. It might even benefit the company as they are rumored to sell power outside our borders than they supply thus leaving the private providers to swoop in and not leave us in the dark, pun intended of course. We have phenomenal resources to harness renewable power at little cost to our environment, so nuclear and fracking options are not the only routes as it has been led to believe in the past. Ultimately we want power suppliers to play together and share toys, not total eradication of Eskom but to allow for others to make up and be rewarded for picking up the slack. This will be a double whammy as Eskom will not want to be left behind and might therefore manage their responsibility to the nation better now that there will be accountability in the form of competitors.	Shane	employed individual
2022-07-08 13:00:59	Western Cape		Yes I do	Solar	South Africa will need a mix of nuclear and renewable energies. Due to a negligent and corrupt government, we do not have any infrastructure in place for emergency provision but work should commence immediately to start private investment in long-term renewable energy plans.	Pia	employed individual
2022-07-08 12:58:25	Gauteng		Yes I do	Solar		Jacques	employed individual

2022-07-08 12:58:24	Gauteng		Yes I do	Solar		Jacques	employed individual
2022-07-08 12:58:19	Gauteng		Yes I do	Solar	Eskom obviously cannot cope. We need an immediate solution. Both solar and wind should be considered and maybe used in conjunction, if possible	Jacqui	employed individual
2022-07-08 12:58:05	Gauteng		Yes I do	Solar	Eskom's monopoly must end. We need sustainable energy solutions and we needed them over 10 years ago. Eskom was warned and advised long ago that they would run out of sustainable energy and they didn't listen. Now every South African suffers because of their negligence and greed. The people of South Africa deserve better.		employed individual
2022-07-08 12:56:13	Western Cape		Yes I do	Solar	Independent Power producers should be encouraged to relieve the stress on the power grid by means of Tax rebates, similar to other developing and developed countries. As a Solar user, the incentive to feed back into the grid also needs to be looked at. I can potentially support 4 Households in my neighborhood through the peak of summer, but only get back 75cents for feedback and the municipality charges R2.80 for consumption. In other words, I feedback 5KwHr back into the grid. Thats R3.50 refund. 4 Households at 1.1kwhr each.. Municipality gets R12.3.. Thats a Net profit of R8,82 which did not take the Power company any effort. Coupled to that, the grid did not require any resources to produce the power consumed by others which I produced....	Dade	employed individual
2022-07-08 12:55:54	Gauteng		Yes I do	Solar	solar is the save way to go	Hannes	employed individual
2022-07-08 12:54:03	Limpopo		Yes I do	Solar	Good day. Something must be done quickly to stop this loadshedding and rising cost of electricity. We cannot go on like this. We need sustainable energy and if people can contribute, let them !	Hanri	employed individual
2022-07-08 12:52:36	Gauteng		Yes I do	Solar	Power supply is in crisis. There is no more time to mess around with politics, new energy options are required asap to: A) Get the economy going as now power affects productivity today. No power affects learners today who will need the education to power an economy in the future, B) Take the pressure off Eskom so they can get their house in order, carry out the maintainance needed, add renewable sources to there assets and retire old cash burning coal assets. South Africa has an abundance sun so Solar is the way to go. Hydro - we just dont have a water source large enough to support hydo Nucellar - expensive to build and we don't have the expertise in SA to safely maintain and run new plants.	Gareth	employed individual
2022-07-08 12:48:55	Eastern Cape		Yes I do	Solar		David	employed individual

2022-07-08 12:39:56	Western Cape		Yes I do	Solar	South Africa is geographically best suited for Solar and Wind power generation. We as home owners would also like to make use of our properties to become self sufficient in power generation for our needs and can thus, amplify the intake to also feed back to the grid.	Stefan	employed individual
2022-07-08 12:39:41	Gauteng		Yes I do	Solar		Megan	employed individual
2022-07-08 12:37:52	Western Cape		Yes I do	Solar	We have some of the best solar resources in the world. There are many renewable energy companies that would love to help supply our national grid.	Jake	employed individual
2022-07-08 12:37:29	Western Cape		Yes I do	Solar		Heilie	employed individual
2022-07-08 12:37:04	Western Cape		Yes I do	Solar	People can generate their own power by installing solar panels on top of their roofs. This will decrease the load on the national grid. Also, by removing the monopoly Eskom has in the electricity market, the quality and price of electricity will become more affordable for South Africans.	Pierre	employed individual
2022-07-08 12:36:44	Gauteng		Yes I do	Solar	Renewable energy works the best. Pays itself off in about 7 years. I would also like to see the Electrical Connection levy on monthly accounts removed for home owners off grid.	craig	employed individual
2022-07-08 12:34:42	Gauteng		Yes I do	Solar	Utilizing renewable energy just makes sense, the government does not need to spend billions on new power stations, use IPPs as in solar and wind and feed the power into the grid. Much much quicker to implement than spending many years building new power stations running on coal or nuclear.	Ann	employed individual

2022-07-08 12:33:22	Limpopo		Yes I do	Solar	SA is a country full of sunshine except for windy Western Cape. If we can use our solar power to support the grid, we as a country will be saver. Firstly crime will be less- no dark times to plan any crime, no electricity theft, patients dependable on electricity, e.g. oxygen, ventilators will be less stressed which contribute all to a healthier and happier society	Helene	employed individual
2022-07-08 12:32:22	Western Cape		Yes I do	Solar		Robert	employed individual
2022-07-08 12:31:42	Eastern Cape		Yes I do	Solar		Melinda	employed individual
2022-07-08 12:31:13	North West		Yes I do	Solar	I believe that any new tipe of green energy would work for South Africa	Schalk	employed individual
2022-07-08 12:29:04	Gauteng		Yes I do	Solar	Time for government to show they are serious about solving the electricity crisis and not concerned about coal investments locked up by Chancellor House!	Arthur	employed individual
2022-07-08 12:28:57	Mpumalanga		Yes I do	Solar	We have vast spaces in the Kario and in the most northern parts of SA that would be perfect for solar panels en masse.	Janeen	employed individual
2022-07-08 12:27:53	Western Cape		Yes I do	Solar	I would also add wind being in Cape Town. We cannot go on like this anymore, it has become impossible & miserable. Eskom is trying it's best but needs time & funds to repair the damage that was done through lack of proper maintenance, corruption & inexperience. The time has come for the government to stand up and be counted & drop the red tape. What are they hanging about for? Afraid they will lose control of the people, too late you have already lost control in more ways than one.	Janet	employed individual
2022-07-08 12:26:20	Western Cape		Yes I do	Solar	We have so much in the way of renewable energy sources - Wind, Solar, Hydro - which should be utilised to aid our ailing electricity supply	Libby	employed individual
2022-07-08 12:25:50	Gauteng		Yes I do	Solar	Currently solar power is tested and has been used to great effect - we have an abundance of sunshine and solar fields could be a solution. As for independent electricity suppliers - the only caveat is that the pricing would need to be regulated to ensure the costs don't become exclusionary	kirsten	employed individual
2022-07-08 12:24:56	Gauteng		Yes I do	Solar		Francois	employed individual
2022-07-08 12:22:50	KwaZulu-Natal		Yes I do	Solar		Laura	employed individual
2022-07-08 12:22:18	Western Cape		Yes I do	Solar	Molten salt - low tech and 24hour power Build this in every province to stabilize the grid Or excess normal solar power can pump water between dams for hydro power	Henk	employed individual
2022-07-08 12:20:44	Free State		Yes I do	Solar		Tharina	employed individual
2022-07-08 12:20:17	Western Cape		Yes I do	Solar	Solar and Wind would be the fastest solution in the short term. Private households should be allowed to power the grid with their excess generated electricity as well, they can be compensated with units or credits. Long term would likely be nuclear or larger green electricity farms. RSA can not afford to continue without electricity! Our country has immense potential but the government must allow the private sector to supply electricity. Government is there to guide and monitor, not to control.	James	employed individual
2022-07-08 12:20:03	Gauteng		Yes I do	Solar	We need independent power providers on order to ensure a stable power network and competition as well. Eskom is failing and we need competition to take away the monopoly from Eskom. It will also ensure that there is competition and that prices will be affordable for everyone.	Izak	employed individual
2022-07-08 12:18:11	Gauteng		Yes I do	Solar		Wendy	employed individual
2022-07-08 12:17:54	Mpumalanga		Yes I do	Solar	What are they waiting for this is getting ridiculous now. Stage 6!!! Wherever in the world do you have to go without power for this amount of time!	Carol	employed individual
2022-07-08 12:17:13	Gauteng		Yes I do	Solar	I think it would be best to use renewable energy as this is where we are headed in the future when non renewable resources are scares	Lee	employed individual

2022-07-08 12:11:54	Gauteng		Yes I do	Solar		Carole	employed individual
2022-07-08 12:10:11	Gauteng		Yes I do	Solar	Our Govt is rotten to its core. Poor administration, corruption and riding the garavy train iw what has been going on since 1994. The people suffer due to greed. Let us take it upon ourselves to improve our livong standards. the whole world does not want to invest into this what was once a magnificent country. I say scrap municipalities too. We must privitise sanitation and refuse removal as well as parks and recreation	Charmaig ne	employed individual
2022-07-08 12:09:10	Western Cape		Yes I do	Solar	A quicker onboarding process will assist in alleviating the unacceptable and destructive current loadshedding	Rudi	employed individual
2022-07-08 12:07:30	KwaZulu-Natal		Yes I do	Solar		Eileen	employed individual

2022-07-08 12:05:54	Gauteng		Yes I do	Solar	This an no brainer , of course its got to be solar . We have the right climate and ample sunshine . With the least environmental impact and low carbon footprint , solar would be the route to go .	Ben	employed individual
2022-07-08 12:05:42	Free State		Yes I do	Solar		Ruan	employed individual
2022-07-08 12:04:54	KwaZulu-Natal		Yes I do	Solar	Important that producer red tape be scrapped....remove BBBEE from the requirement but should include major benefits for local production / initiation of local production and Job creation.	James	employed individual
2022-07-08 12:02:54	Gauteng		Yes I do	Solar	Whilst solar will be the quickest to install for immediate solutions, one must not negate the other natural options. Each municipal will have "best option" to select. Can you see the eyes light up for another cash cow on their doorstep? DO not loose sight of our President and his brother-in-laws to scupper the Eskom recovery for their own benefit to provide an energy solution for RSA! (Rainbow Energy - watch that space and associated distractions: Ramaphosa, Motsepe and Hadebe)	Rod	employed individual
2022-07-08 12:02:19	Eastern Cape		Yes I do	Solar	A combination of wind and solar will be most beneficial to get our country going again.	Caren	employed individual
2022-07-08 12:01:33	Gauteng		Yes I do	Solar	Just get on with it! We all know this has to be done.	Ingrid	employed individual
2022-07-08 12:00:49	Gauteng		Yes I do	Solar	After 2 weeks of phase 6 loadshedding, I don't understand how this even needs to be discussed. We need power, any way we can get it. If there are people able to supply us with power, why not help South Africa IMMEDIATELY!!!	Erika	employed individual
2022-07-08 12:00:46	Gauteng		Yes I do	Solar	Solar and wind farms an be erected quickly both by Government and Private Enterprise. Both elements are provided by mother nature and we are not using them.... Cannot understand why this Government has not done anything yet!!	LOUISE	employed individual
2022-07-08 12:00:33	Western Cape		Yes I do	Solar	Any and all forms of alternative energy should be employed immediately to solve the current crisis	Joop	employed individual
2022-07-08 11:59:38	Gauteng		Yes I do	Solar	We are facing a ecological disaster due to global warming. Its imperative that South Africa limit its dependency on coal with its devastating effects on the environment .	Dirk	employed individual
2022-07-08 11:59:08	Gauteng		Yes I do	Solar	Yes, solar is definitely the way to go. Sunlight is free and so is the wind, so wind turbines are also an excellent idea. Both of these need to be put in place in the shortest possible time, to get our country back on track and start turning it into the great nation it can be. Let's be proud to be South Africans again!	Elizabeth'	employed individual
2022-07-08 11:58:10	Western Cape		Yes I do	Solar	I chose solar, but would have liked to tick wind and hydro as well. Hydro works well in Cape Town due to the Steenbras dams. Turbines would also be effective in the Western Cape because the SE and NW winds blow on a very regular basis and often at high speeds, however, the sun is around every day no fail, even if cloudy. You still run the risk of sunburn on a cloudy day! I do feel that solar is currently only affordable to the higher income families and totally unaffordable to the middle to lower income families, this should change and would take so much pressure off the grid if more affordable.	Andrea	employed individual
2022-07-08 11:57:34	Western Cape		Yes I do	Solar	South Africa is dying a slow death due to the incapacity of ESKOM to proved sufficient electricity to our country. People are losing their jobs and this country is going to the dogs! ESKOM clearly has no cooking clue what they are doing! Their level of incompetence is mind boggling , with debt of R442bn! This has to stop! Independent power producers is clearly the way out! How can anybody not see the use of this?	Verna	employed individual
2022-07-08 11:56:50	Gauteng		Yes I do	Solar		Angelique	employed individual
2022-07-08 11:56:48	Western Cape		Yes I do	Solar		Jolene	employed individual
2022-07-08 11:56:37	Western Cape		Yes I do	Solar	This should have happened long ago, not waited until we are in a crisis.	Malcolm	employed individual
2022-07-08 11:56:24	KwaZulu-Natal		Yes I do	Solar		Andrea	employed individual
2022-07-08 11:56:01	Western Cape		Yes I do	Solar	Solar and wind energy would be perfect in SA to be independently produced. There should be financial incentives for households to install solar panels on roofs for own use and also to add to municipal grids	Monika	employed individual
2022-07-08 11:55:11	KwaZulu-Natal		Yes I do	Solar		Jemma	employed individual
2022-07-08 11:53:47	Western Cape		Yes I do	Solar	Do a combination solar , wind, whatever but lets get energy away from the ANC and Eskom as quickly as possible. We have seen the ANC destroy everything valuable and replace with nothing or plastic. Just get going with EPP and let them put a lot of different options together. NOT NUCLEAR please as that is toxic and not for the uneducated.	lyn	employed individual
2022-07-08 11:53:38	Gauteng		Yes I do	Solar	In South Africa we have sunshine in abundance and the sun is for free. We also have plenty of wind at our coastal cities and the wind is also free. We also have more than enough coal, all the first world countries build their economies on fossil fuel/ coal. We in South Africa have all we need not to be in this electricity crisis, we can use a combination of solar, wind and coal to supply the country with more than enough and cheap electricity, all we need is good leadership and qualified people with experience/expertise in the correct positions. Take away all the red tape let there be competition in the market, take away Eskom's monopoly in the market, think about what is best for the Country and not what is best for certain cadres.	Pieter	employed individual
2022-07-08 11:53:23	KwaZulu-Natal		Yes I do	Solar	provide a subsidies for private house holds to install Solar power, Either for Solar geysers or Solar power stations upto 6kv that can be expanded to 10kv.	Grant	employed individual

2022-07-08 11:52:56	Gauteng		Yes I do	Solar	Solar and Hydro (sea wave action) should be utilized as these are totally natural sustainable power sources.	Jady	employed individual
2022-07-08 11:52:24	Gauteng		Yes I do	Solar	We can't rely on Eskom and need assistance from private energy providers	Lloyd	employed individual
2022-07-08 11:51:55	Gauteng		Yes I do	Solar		Nathan	employed individual
2022-07-08 11:51:25	KwaZulu-Natal		Yes I do	Solar	Make it attractive for all people to help RSA with their power issues, buy back the electricity from home producers using solar at 85c a unit, this will make more people put up solar feed the grid during the day that will help Eskom to do the necessary, and much needed, maintenance to the powerplants. This will help with the strain on the grid and make all South Africans part of the solution.	Daniel	employed individual
2022-07-08 11:49:56	Eastern Cape		Yes I do	Solar	While I picked the option for Solar, I do believe that this is region dependant. In regions where there is a lot of wind, a combination of Wind and Solar should be used. The Eastern Cape is a good example. Regarding the scrapping of red tape, I am amazed that this is a question. The power situation in South Africa is already at crisis level. Do what it takes to resolve the issue and figure out the details later. The Red Tape is hindering the process which in turn hinders the livelihood of all of South Africa.	Evan	employed individual
2022-07-08 11:49:36	Gauteng		Yes I do	Solar	South Africa is blessed with lots of sun. But ultimately the best approach would be a hybrid approach where most available power sources (which may be specific to areas) are used to meet the demand.	Carmen	employed individual
2022-07-08 11:49:18	Gauteng		Yes I do	Solar	All forms of renewable energy is a good option to consider. Anyone should be able to feed into the grid. This would also provide an income stream for poor households and could be combined with RDP for example. Renewable energy sources must be preferred as they are cheaper and have a shorter time to market.	Hennie	employed individual
2022-07-08 11:49:16	Gauteng		Yes I do	Solar	We are sitting in a country where we have loads of sunshine that can be utilised for power generation. It should be harnessed as much as possible, and it is sustainable. Government should start looking at running the country like a business and not like socialists - therefore businesses or organisations who can generate more solar power than what they need for own use, they should be allowed to sell it to who needs it. It would take pressure off the government to supply power to the entire country.	Maggie	employed individual
2022-07-08 11:48:40	Western Cape		Yes I do	Solar	Energy is a human right ... we pay exorbitant prices for it and yet it is stolen from us ... we are left in the dark, companies are suffering and kids are left unfed with outages over dinner and bed time ... we as electricity payers supply many "underprivileged" and neighbouring countries with electricity ... on our personal account ... this is like RAPE ... Energy should be free for all ... Eskom is just another big bite out the South African corruption pie!!! Let Eskom go and let's support alternative options and give our Independent Power Producers the opportunity to build companies, supply jobs and energy for all.	Heidi	employed individual
2022-07-08 11:47:52	Western Cape		Yes I do	Solar		Mandy	employed individual
2022-07-08 11:47:30	Gauteng		Yes I do	Solar	This constant loadshedding is frustrating and crippling our businesses and economy, increasing opportunities for crime and damaging our equipment	Alicia	employed individual
2022-07-08 11:47:16	Western Cape		Yes I do	Solar	South Africa needs to move away from coal power as soon as possible. Climate change is the biggest threat facing our country and we need to move to renewable energy as soon as possible. We need a decentralised energy mix of renewable energy (wind and solar). Government should subsidise solar water heaters and solar PV for individual households and small businesses. Home owners should be able to feed back excess energy into the grid. Independent power producers should be able to provide renewable energy with immediate effect .	Olivia	employed individual
2022-07-08 11:46:27	Limpopo		Yes I do	Solar	We need the electricity that will provide for everyone and affordable.	Chuene	employed individual
2022-07-08 11:46:02	Gauteng		Yes I do	Solar		Johan	employed individual
2022-07-08 11:45:24	Western Cape		Yes I do	Solar		Ronell	employed individual
2022-07-08 11:45:01	Western Cape		Yes I do	Solar	The current situation with power production is a bit of a disgrace for our beautiful country. Let's remove the obstacles that stand in the way of a solution that benefits everyone. Given the urgency, we probably need to purchase what we need from outside of the country; longer term, we need to start making our own solar panels, wind turbines and grid-scale energy storage systems.	Johan	employed individual

2022-07-08 11:44:50	Western Cape		Yes I do	Solar	Renewables should be used in conjunction with fossil fuels, especially if independent power providers have freedom to implement their energy solutions. Solar is especially suited to South Africa, as we have so many sunlight hours a year. Batteries and energy storage is clearly a barrier, but that is why fossil fuels should still be used in conjunction with renewables and should not be phased out more quickly than is economically stable. In principle, I am in favour of nuclear energy, but I do not have trust in our government that it would be implemented and maintained safely. The recent issues surrounding Koeberg support my view.	Emma	employed individual
2022-07-08 11:44:25	KwaZulu- Natal		Yes I do	Solar		Carol	employed individual
2022-07-08 11:44:11	Gauteng		Yes I do	Solar	Anyone should be able to feed into the grid. This would also provide an income stream for poor households and could be combined with RDP for example. Renewable energy sources must be preferred as they are cheaper and have a shorter time to market.	Hendrik	employed individual
2022-07-08 11:43:50	Western Cape		Yes I do	Solar	Allowing private companies to supply power would not only create healthy competition, but will also provide employment opportunities.	Kim	employed individual
2022-07-08 11:43:11	Western Cape		Yes I do	Solar	Solar is probably the least difficult along with wind power, and individual homes can also load excess onto the grid. Nuclear as a long term solution by private Companies. The state will not be able to build one due to corruption.	Johannes	employed individual
2022-07-08 11:42:58	Gauteng		Yes I do	Solar		annalie	employed individual
2022-07-08 11:41:50	Mpumal anga		Yes I do	Solar		Zelda	employed individual
2022-07-08 11:41:29	Western Cape		Yes I do	Solar	With this I just hope that there will be some monitoring to ensure that these private energy producers do not ask to much for the power. Or one could maybe look at a corporate and residential approach to, in a way, keep eskom in the loop and allow them to still be a provider 4 either residential or corporate South Africa	Jonathan	employed individual
2022-07-08 11:41:19	Western Cape		Yes I do	Solar	While our country has potential for both geothermal and wavegenerators, those processes are, to some degree, destructive to the environment, whereas solar energy capture would have a negligible effect on the environment. My suggestion would be an array of Molten Salt Towers to populate the arid and sparsely populated Northern Cape. These towers take up roughly 3.5KM of space and act as a battery that lasts up to 10 hours without sunlight. Not only would this solution have a low environmental impact, but it would also create jobs in a province that consists of a handful of miners. This solution requires a lot of glass upfront, the raw material of which we mine locally in said province. In our country, we have a lot of sunshine. We just so happen to have a large area of mostly unused and dead land, with minimal wildlife. I believe with a short environmental impact study we should be able to start up these units within a few years. While this isn't a quick solution, it is a sustainable one that would put South Africa on the map towards green, sustainable energy.	Louw	employed individual
2022-07-08 11:40:51	Limpopo		Yes I do	Solar		Pieter	employed individual
2022-07-08 11:40:48	Western Cape		Yes I do	Solar	Yes please let's push on this. It is very disruptive. Parents working full time and then get home with kids only to have no electricity. For a single person like myself, I can work around things but my goodness, let's consider the elderly and the children.	Ilse	employed individual
2022-07-08 11:38:35	Western Cape		Yes I do	Solar	Unlimited supply of clean energy. Vast areas suitable in the Karoo and Northern Cape with sunny days almost throughout the year.	André	employed individual
2022-07-08 11:36:27	Gauteng		Yes I do	Solar	Sun and wind is what God gives us everyday. Solar power and wind power is my suggestion. Use what we are given and not kill people in the process with polluting the air and digging up the ground we are to live on. So many many more jobs can be created and here is where government and private sector can come together and work hand in hand for a better future. And everyone can enjoy their day in the sun and not just the few greedy ones get it all but making their "comrades" suffer daily, but claiming to do it all for their people. We have the opportunity to learn and work together, let's show ourselves and our kids how beautiful our rainbow nation is and can be together .	Chanel	employed individual
2022-07-08 11:36:00	Gauteng		Yes I do	Solar		Maria	employed individual
2022-07-08 11:35:59	KwaZulu- Natal		Yes I do	Solar	Independent power producers can provide a great stopgap solution while Eskom increases their generation capacity. I support solar power as it is the most abundantly available.	Michael	employed individual
2022-07-08 11:35:25	Gauteng		Yes I do	Solar	We have sun, lots of it! We have space in N. Cape and I'm fact, we already have a robust infrastructure of Solar Farms that can set the foundation for more to come. We have plenty capital wealth to set up more private entities. And we have a country that make a plan when the government can't.	Paul	employed individual

2022-07-08 11:35:15	Western Cape		Yes I do	Solar		Frederica	employed individual
2022-07-08 11:35:15	Eastern Cape		Yes I do	Solar	This Government drags its feet and refuse to allow the private sector to implement other sources of electricity like solar. Look at other countries where it has been implemented successfully on a big scale. This is possible but just like SAA, Telkom, etc. the Government prefers to continue expanding the huge debt and basically rides South Africa into the ground. Eskom should have been replaced years ago with private sector initiatives. Wake up man.	Kobus	employed individual
2022-07-08 11:34:10	Western Cape		Yes I do	Solar	Solar and wind would be the best method of producing power quickly and sustainably. Solar for households should be supported	Paddy	employed individual
2022-07-08 11:32:36	Gauteng		Yes I do	Solar	Apart from Solar, Wind and Nuclear would be best alternatives	Albert	employed individual
2022-07-08 11:31:12	Gauteng		Yes I do	Solar		Bronwen	employed individual
2022-07-08 11:30:16	Western Cape		Yes I do	Solar	Solar, wind, hydro... all good alternatives.	Deborah	employed individual
2022-07-08 11:26:31	KwaZulu- Natal		Yes I do	Solar	We Should be changing the law such that independent power producers to use any green methodology/technology that is available to produce and add electricity to the grid.	Robin	employed individual
2022-07-08 11:26:21	KwaZulu- Natal		Yes I do	Solar	This useless government has destroyed the country - there is no time to waste. Cut this red tape. Scrap the limits on independent power generation. Give incentives to everyone to generate private power. That includes giving subsidies to every household to go solar! The state of living in constant fear of trying to do everyday tasks without electricity has to stop!	Alan	employed individual
2022-07-08 11:25:34	Western Cape		Yes I do	Solar		L	employed individual
2022-07-08 11:25:00	North West		Yes I do	Solar		Christel	employed individual
2022-07-08 11:24:54	Western Cape		Yes I do	Solar		Conrad	employed individual
2022-07-08 11:23:49	Gauteng		Yes I do	Solar	Solar, Wind options methods of electricity production would suit SA's immediate needs. This is nonsens that Eskom have the whole country ransom and that they are the main suppliers. They are corrupt and cancerous. We should have independency from them for sure.	Yvette	employed individual
2022-07-08 11:23:15	Western Cape		Yes I do	Solar	Variety is best suited.	Roxanne	employed individual
2022-07-08 11:22:58	Western Cape		Yes I do	Solar		Tanya	employed individual
2022-07-08 11:22:25	Gauteng		Yes I do	Solar	With many South Africans switching to solar, there's a lot of excess energy that is being wasted. Government should allow solar producers to push excess energy back into the grid which will hugely relieve stress on the power stations. Independent producers can then get a rebate of sorts the energy pushed into the grid.	Sam	employed individual
2022-07-08 11:20:26	Gauteng		Yes I do	Solar	Deur ons almal te bemagtig om sonder burokratiese rompslomp krag terug te sit in die grid en ons daarvoor te vergoed. Dit werk oral in die wêreld. Net nie hier waar die hiênas lê en wag vir dit wat geaas kan word nie.	Gerda	employed individual
2022-07-08 11:20:25	Gauteng		Yes I do	Solar	Deur ons almal te bemagtig om sonder burokratiese rompslomp krag terug te sit in die grid en ons daarvoor te vergoed. Dit werk oral in die wêreld. Net nie hier waar die hiênas lê en wag vir dit wat geaas kan word nie.	Gerda	employed individual
2022-07-08 11:20:20	Gauteng		Yes I do	Solar	Deur ons almal te bemagtig om sonder burokratiese rompslomp krag terug te sit in die grid en ons daarvoor te vergoed. Dit werk oral in die wêreld. Net nie hier waar die hiênas lê en wag vir dit wat geaas kan word nie.	Gerda	employed individual
2022-07-08 11:20:17	Gauteng		Yes I do	Solar	Deur ons almal te bemagtig om sonder burokratiese rompslomp krag terug te sit in die grid en ons daarvoor te vergoed. Dit werk oral in die wêreld. Net nie hier waar die hiênas lê en wag vir dit wat geaas kan word nie.	Gerda	employed individual
2022-07-08 11:20:15	Gauteng		Yes I do	Solar	Deur ons almal te bemagtig om sonder burokratiese rompslomp krag terug te sit in die grid en ons daarvoor te vergoed. Dit werk oral in die wêreld. Net nie hier waar die hiênas lê en wag vir dit wat geaas kan word nie.	Gerda	employed individual
2022-07-08 11:19:50	Gauteng		Yes I do	Solar	Start by buying back electricity generated by private individuals at a reasonable rate, NOT the current ridiculously low rate!!!	Neels	employed individual
2022-07-08 11:19:26	Gauteng		Yes I do	Solar		Gregory	employed individual
2022-07-08 11:19:25	Gauteng		Yes I do	Solar	It is very difficult to believe that Eskom is being sabotaged by some of its workers and nothing can be done about it and the whole Economy and all the people of RSA are suffering. Minister Gordham should take more serious action against these bad apples. It just goes to show that since the ANC have taken over the running of this wonderful Country which had the best infrastructure in Africa, the best Education system, best trained doctors, pilots and so on, everything has just been destroyed through lack of leadership, Knowledge and putting the wright Educated people in the correct positions to run all the Government and Municipality structures. Its an absolute disgrace what is been done to a once well run country. Any form of help to get RSA out of this terrible electricity problem would be most welcome.	Stathy	employed individual
2022-07-08 11:19:00	Gauteng		Yes I do	Solar	Solar just makes more sense	Kerryn	employed individual
2022-07-08 11:16:58	Western Cape		Yes I do	Solar		Andrew	employed individual
2022-07-08 11:15:13	Eastern Cape		Yes I do	Solar		Ilda	employed individual
2022-07-08 11:14:39	Western Cape		Yes I do	Solar		H	employed individual

2022-07-08 11:14:25	Mpumalanga		Yes I do	Solar		Karen Hoffman	employed individual
2022-07-08 11:14:25	Gauteng		Yes I do	Solar		Barry	employed individual
2022-07-08 11:14:21	Free State		Yes I do	Solar	I am all for solar, wind and hydro energy. We should use what is freely available even if it costs us a fortune in the beginning to prepare the country. For the long run I believe it would be the best. I believe every citizen would do what is necessary to improve our current situation. The management of power by those in charge now is faulty. We need people with working solutions. It seems the private sector has answers!	Renshia	employed individual
2022-07-08 11:13:32	Western Cape		Yes I do	Solar	Solar and wind are the quickest to get on the grid, and the lowest cost of energy currently. There is also international financial assistance available to assist SA if it transitions to these forms of energy.	Adrian	employed individual
2022-07-08 11:12:47	Gauteng		Yes I do	Solar	The government needs to release its monopoly over electricity as they are incapable of running an efficient enterprise. As has been proven all over the world 99% of the time, private companies are far more efficient, reliable and dependable than government companies. Let there be competition so that efficiencies are recognized and gained and the best offer/price takes the business. For once look after South Africa's pockets. We need to move away from pollutants, like coal. Nuclear would be good, EXCEPT that South Africa doesn't have the expertise to run nuclear. With government involvement, there is sure to be a HUGE accident as the government will cut budgets, steal, and deploy Cadres that have no clue about running an operation, to the detriment of the nuclear plant making it VERY high risk. Not to mention it will go far over cost, it will go years over the expected completion date due to government meddling, greed, politics, and corruption. South Africa is not ready for a project of this magnitude. It needs to first clean up its Government, and get its policies aligned with the Best quote, person, and company for the job, instead of its current policies which attract and place inept, useless, inadequate, unskilled, expensive, and corrupt people and companies.	Nathan	employed individual
2022-07-08 11:11:44	Gauteng		Yes I do	Solar	I have selected 1 of the above but multiple sources including wind, coal, hydro etc are also perfect for our immediate needs. That the minister of energy has not pushed for all alternative independent sources is shocking, the country is being crippled by all the load shedding and there is a possible solution and they won't use it because its independent and they can't tender and steal from these companies so we sit in darkness and lose jobs as more and more private businesses leave the country because there is no power so the government would rather people starve and suffer because they won't be able to control and do what they want in these enterprises. The government does not care that we are suffering, they have generators and steal money so don't care about the cost of running the generator but as the country falls their children's lives will become harder if they don't move abroad.	Maree	employed individual
2022-07-08 11:11:21	Gauteng		Yes I do	Solar	The private sector should be allowed to produce as much electricity as they can and be able to push it back onto the grid without having to pay high licencing fees.	Jackie	employed individual
2022-07-08 11:10:05	Gauteng		Yes I do	Solar	South Africa cannot afford another year of load shedding, not even another hour. Renewable energy that is provided by independent power producers is the way to go. Eskom and Government has proven that they do not have the capability to run something of that importance or magnitude.	Andre	employed individual
2022-07-08 11:09:08	Gauteng		Yes I do	Solar	Privatize/semi privatize the whole energy sector, will be the only way to get out of the mess...Do away with coal.	Pierre	employed individual
2022-07-08 11:07:35	Eastern Cape		Yes I do	Solar	Any Green Energy will do, but we have lots of sunshine in the RSA.	KOBUS	employed individual
2022-07-08 11:04:53	Gauteng		Yes I do	Solar	Open up energy asap. Government is incapable of efficiency and managing corruption	Yani	employed individual
2022-07-08 11:04:27	Gauteng		Yes I do	Solar		Christos	employed individual
2022-07-08 11:04:18	Western Cape		Yes I do	Solar		Jens	employed individual
2022-07-08 11:04:10	Gauteng		Yes I do	Solar		Maurice	employed individual
2022-07-08 11:03:44	KwaZulu-Natal		Yes I do	Solar	Quickest way to alleviate the shortfall of power.	Stephanus	employed individual
2022-07-08 11:03:21	Western Cape		Yes I do	Solar	The ANC has broken Eskom (and basically all of the SOE's) and clearly proven that they have neither the ability nor desire to fix it. It's high time for them to let go of the monopoly and allow capable suppliers to enter the market. And it should be mentioned that the power grid does not belong to the ANC, or even Eskom, but to the tax payers who have paid for it. For the latest 15% increase, we get stage 6 loadshedding? In what world, can employees hold the company hostage and demand exorbitant increases whilst the entire country suffers. If this is even true.	Angus	employed individual

2022-07-08 11:03:09	Gauteng		Yes I do	Solar	The power supply is NOT the issue in SA, the issue is PAST mismanagement, corruption, and theft by the Governing party. There has been little to no forethought about maintaining the power supply since 1994, lack of skill development and retrenching of qualified personnel has led SA to the brink of collapse. In a land with incredible year-long sunshine, we can do away with the inept and rely on the sun	Lesley	employed individual
2022-07-08 11:02:42	Gauteng		Yes I do	Solar	This government is failing the people again. Allow individuals to use solar without penalties and private companies to put up power plants without government interference.	Eve	employed individual
2022-07-08 11:02:17	Western Cape		Yes I do	Solar		Pieter	employed individual
2022-07-08 11:02:02	Gauteng		Yes I do	Solar		Julian	employed individual
2022-07-08 11:01:36	Gauteng		Yes I do	Solar	Southern africa has sun, sun and more sun. It's an climate friendly solution to solving a crisis that is crippling the country.	desire	employed individual
2022-07-08 11:00:33	KwaZulu-Natal		Yes I do	Solar	We NEED more electricity.Eskom is hopeless	vaughan	employed individual
2022-07-08 11:00:31	Gauteng		Yes I do	Solar	The economy cannot continue with years of load shedding. Eskom's problems cannot get fixed in the short-term. We have hours of sunlight so it makes zero sense that we do not harness that energy and get the country back on its feet.	Linda	employed individual
2022-07-08 10:58:35	Gauteng		Yes I do	Solar	Escom will not be able to supply SA's current and future electricity needs, and SA is heading for a major disaster. Electricity supply should be deregulated as soon as possible and private enterprise allowed to save the country from the eminent disaster.	Frik	employed individual
2022-07-08 10:58:33	Gauteng		Yes I do	Solar		Teresa	employed individual
2022-07-08 10:58:18	Gauteng		Yes I do	Solar	Eskom has been stripped bare by greedy ANC cadres deployed to do just that and seems beyond recovery, despite the best efforts of the CEO and CFO, since the rot goes right through to the ground. It's time to let it go. It's also time to let the dinosaur Gwede Mantashe go. Let independent producers take over and develop healthy competition in the power market so I can choose who supplies my power and directly reward those who do a good job. I'm not in favour of municipalities taking over, they are also subject to corruption, depending which party happens to be in charge. Until the civil service is freed from party affiliation and is truly independent, we need power producers who are running a business and are interested in keeping that business healthy and not stealing all its assets. Let's bypass this bunch of useless incompetents whose only real talent is stealing from us.	Irmgard	employed individual
2022-07-08 10:58:00	Gauteng		Yes I do	Solar	The question is about 'immediate', though solar is not really a solution for long term stable energy it is quick to deploy and could alleviate some pain. Long term nuclear is clearly the answer.	albert	employed individual
2022-07-08 10:57:32	Gauteng		Yes I do	Solar		Chris	employed individual
2022-07-08 10:57:32	Mpumalanga		Yes I do	Solar	Government urgently needs to scrap the red tape policy in order for other independent power suppliers to urgently climb into the game and help reduce the strain on Eskom. When there are more power suppliers the cost can come down which in effect will also allow the consumer to contribute to the system by installing solar power at their residence which will also help with the energy crisis	Yolandi	employed individual
2022-07-08 10:56:23	Western Cape		Yes I do	Solar	I believe adding solar power will be the fastest and most effective way to reduce the impact of load shedding on the economy. It would also help move towards a more sustainable grid.	Leon	employed individual
2022-07-08 10:55:09	Gauteng		Yes I do	Solar	Private producers will be far more efficient and cost effective than what an SOE could ever be.	Christine	employed individual
2022-07-08 10:53:57	Gauteng		Yes I do	Solar	South Africa is blessed with an abundance of sunny days, make use of it!	Duane	employed individual
2022-07-08 10:53:16	Gauteng		Yes I do	Solar	South Africa has an abundance of sunlight and space for solar implementation, we need to remove our reliance on the corrupt ANC run Eskom. It would be even better if individual suburbs could contract directly with IPPs cutting out corrupt ANC municipalities and the useless CityPower. Sure solar won't solve all problems, but at least we could keep power running during the day and try to prevent further loss of productivity.	Frans	employed individual
2022-07-08 10:52:50	Gauteng		Yes I do	Solar	In south Africa one of our biggest attributes is our sunny climate, we have the sun, it's sustainable and clean.	Adri	employed individual
2022-07-08 10:51:52	Gauteng		Yes I do	Solar	SA has abundant sunlight and wind for solar and wind generation. Scrapping red tape is a long overdue necessity, not just for IPP's, but many other industries too. It will not only create more power for the country, but also create jobs too.	Nick	employed individual
2022-07-08 10:50:55	KwaZulu-Natal		Yes I do	Solar		Jacqueline	employed individual
2022-07-08 10:50:41	KwaZulu-Natal		Yes I do	Solar	The Country is in big trouble. We have to do what needs to be done, as soon as possible. This is a URGENT matter!	Breggie	employed individual
2022-07-08 10:50:33	Western Cape		Yes I do	Solar	South Africa is blessed with sunshine and we should be harnessing it to its full potential.	Andrew	employed individual

2022-07-08 10:50:27	Gauteng		Yes I do	Solar	<p>This option should have been considered and implemented a long time ago. We have the most uninterrupted sunshine, so give the subsidy and permission again for people to get solar power units. The eastern cape is filled with windturbines generating an insane amount of power, let them supply to the rest of the country.</p> <p>Eskom cannot support our country anymore, so open the doors to other power generating options.</p> <p>Electricity can be cheap once again like many years ago and we will have no interruptions of power supply ever again!!</p> <p>And stop saving this dying baby called ESKOM!!!! It's dead already and filled with corrupt employers and employees..... This is also the once institution which pays the HIGHEST salaries!!!! And then the employees strike because they want MORE!!! Really?!?!?!? My salary hasn't had an increase since the lockdown in 2020, STOP THIS MADNESS!!!!</p>	Heinrich	employed individual
2022-07-08 10:49:51	Gauteng		Yes I do	Solar	South Africa has an abundance of sunlight and space for solar implementation, we need to remove our reliance on the corrupt ANC run Eskom. It would be even better if individual suburbs could contract directly with IPPs cutting out corrupt ANC municipalities and the useless CityPower.	Vincent	employed individual
2022-07-08 10:48:53	North West		Yes I do	Solar		Lourens	employed individual
2022-07-08 10:48:38	Gauteng		Yes I do	Solar		Warrick	employed individual
2022-07-08 10:48:22	Gauteng		Yes I do	Solar		Johann	employed individual
2022-07-08 10:47:10	Western Cape		Yes I do	Solar	<p>We need competition to improve power production reliability, costs and efficiency.</p> <p>Our economy needs stable, reliable and sustainable power sources.</p>	Roberta	employed individual
2022-07-08 10:46:40	Gauteng		Yes I do	Solar	South Africa has ample sunshine for Solar and there is more than enough empty space. Government should give rebates to home owners that install their own solar systems.	James	employed individual
2022-07-08 10:46:21	Gauteng		Yes I do	Solar	Use independent suppliers.	Gavin	employed individual
2022-07-08 10:45:52	KwaZulu-Natal		Yes I do	Solar	It is clear that the damage done to Eskom by corruption and cronyism is well entrenched and is not going to be solved in the short term. Lets do away with them and put that money into IPPS.	Mahomed	employed individual
2022-07-08 10:45:32	Gauteng		Yes I do	Solar	Clean energy	Tex	employed individual
2022-07-08 10:45:15	Gauteng		Yes I do	Solar	I think a mixture of solar, wind and gas are crucial at this point. Nuclear is unfortunately expensive and takes too long to build. Absolutely vital that independent power producers come on board as quickly as possible. Eskom has proven that it is unable to resolve the current energy crisis and this undermines the entire country.	Katherine	employed individual
2022-07-08 10:43:13	Western Cape		Yes I do	Solar	There are so many alternative options other than nuclear and coal. If we stick with these, we will become slaves for the rest of our lives dependent on other communist countries. We have enough wind/sun in SA to make these options viable. This government is only interested in lining their own pockets. they are pis poor at running this country for the people. And as always, when things go wrong, let's take out the race card. OLD NEWS ANC, step aside.	DEBBIE	employed individual
2022-07-08 10:42:53	KwaZulu-Natal		Yes I do	Solar		Sindi	employed individual
2022-07-08 10:40:13	Gauteng		Yes I do	Solar	We need effective energy solutions fast. Solar energy along with wind and hydro power are all plentiful in South Africa and should be harnessed for the upliftment of the SA economy. We need to remove the dependency of the SA economy on fossil fuels to keep up with the trends seen in the rest of the world.	Tamsyn	employed individual
2022-07-08 10:39:37	KwaZulu-Natal		Yes I do	Solar	We need any emergency solution to our electricity problems as we desperately need to get our economy going after Covid to create jobs and alleviate our unemployment crisis. Everybody who can produce electricity (especially through solar panels) should feed any excess electricity into the grid. It would be great if homeowners could be paid for any surplus electricity they produce, as is done overseas. Coal, diesel, gas and nuclear need to be abandoned as sources of electricity - they are not clean and nuclear is very expensive.	Nicola	employed individual
2022-07-08 10:39:25	Gauteng		Yes I do	Solar	<p>Solar, wind and hydro power should be encouraged.</p> <p>In the Karoo areas; this could re-ignite small town and farming communities economically.</p> <p>Private individual/companies whos members have no affiliation to any Government office/official must be encouraged to produce and add to the grid. This should occur immediately as our economy is suffering and the population is becoming infuriated by the frustration of Government wanting to hold on to its power at the expense of the well being of its citizens.</p>	Penelope	employed individual
2022-07-08 10:37:10	Western Cape		Yes I do	Solar	We have the space and sun to make solar a cheap and effective source of electricity, which is relatively cheap and doesn't cause pollution and other long term issues.	Nicolette	employed individual
2022-07-08 10:37:09	Gauteng		Yes I do	Solar	Subsidised personal power generation. The less companies we have raping and pillaging the people of the nation the better.	Aleksandra	employed individual

2022-07-08 10:36:23	Western Cape		Yes I do	Solar	The government's corruption has tainted their ability to get close to resolving our energy crisis, so the people/taxpayers of the country need to step in and sort it out themselves, before our country is a complete failed state due to the poor governance. We can not rely on our government anymore, and it is the non-taxpaying community that keeps them in power, as our government has no interest in educating people they can treat like puppets.	kyle	employed individual
2022-07-08 10:36:02	Gauteng		Yes I do	Solar	Most of our industrial use is during the day so solar is logical. For night time wind turbines will have to be considered. With the amount of unused mines the very deep mine shafts would lend themselves to using excess energy from the grid to raise a mass to generate gravitational potential energy, which is then dropped to convert potential energy into electricity through an electric generator. The biggest cost of the gravitational battery is the cost of sinking a deep shaft - which RSA already has lots of.	George	employed individual
2022-07-08 10:34:58	Gauteng		Yes I do	Solar	Im all for Solar and Wind sustainable energies. I do not support Nuclear nor other fossil fuels. Independents who can add to the grid or supply privately at a reasonable cost should be allowed to provide since our Eskom grid is unreliable and costs are ridiculously high and ever increasing plus there is supply shortage, and our salaries do not allow us to keep up with the increasing costs and way of life is adversely affected by loadshedding.	Thomas	employed individual
2022-07-08 10:33:30	Eastern Cape		Yes I do	Solar	Any form of renewal energy - wind, solar, hydro with storage is imperative to solve our crisis !! Also give leeway on the minimum local content requirements proviso for these immediate projects to make them more affordable and get the projects done as a matter of urgency	Janice	employed individual
2022-07-08 10:33:29	KwaZulu- Natal		Yes I do	Solar		Kayleigh	employed individual
2022-07-08 10:33:22	KwaZulu- Natal		Yes I do	Solar		Kayleigh	employed individual
2022-07-08 10:32:34	Gauteng		Yes I do	Solar	Also allow people to install their own solar systems and not being penalized for it. It will also take stress off the provider	Yolanda	employed individual
2022-07-08 10:30:37	Eastern Cape		Yes I do	Solar		Genna	employed individual
2022-07-08 10:29:47	Gauteng		Yes I do	Solar	IPPs must be allowed as the Government has neither the money nor the will to provide any solutions to the present crisis. Corruption and inefficiencies in parastatals is rife.	Pam	employed individual
2022-07-08 10:29:32	Gauteng		Yes I do	Solar	There is a great argument that the Solar would not be a solution, I wonder if anyone had the thought that the coal plants could be used when Solar and Wind is not operatable, Long term Nuclear would be the best But I am not confident that we have the skills in South Africa to do this safely and correctly.	Regard	employed individual
2022-07-08 10:29:14	Gauteng		Yes I do	Solar	Our economy is almost non-existent and the country is suffering. Officials are incompetent and enjoy using red-tape as an excuse for their lack of empathy and will. Everything is in a mess - rolling blackouts, looting, potholes, high petrol and food prices and the complete disregard for law and order. Everything is falling apart but not a single corrupt official has been charged for their crimes or sentenced. I am sad and angry and tired, completely disheartened and overwhelmed by the governments failure to even provide basic services.	Mariam	employed individual
2022-07-08 10:29:10	Western Cape		Yes I do	Solar	IPPs can produce cleaner and cheaper energy than Eskom. They are also for profit businesses that have an incentive to keep plants maintained and producing at optimal levels. Wheeling of power needs to be simplified and easily available for IPPs.	Catherine	employed individual
2022-07-08 10:28:28	Western Cape		Yes I do	Solar	Eskom has had it's time moving from a award winning company to the most hated company in SA. Eskom had 14 years from the fist time they implemented load shedding to sort out their generation units and things just got worse. it is time to get private companies to supply us with power, companies that will meet the demand and more.	DW	employed individual
2022-07-08 10:28:19	Gauteng		Yes I do	Solar	We need to move away form fossil fuels as a matter of urgency, renewables are the only new sources of power that should be considered. Solar power is abundant and our climate affords us easy access to it, it should be strongly considered along with other renewables.	John	employed individual
2022-07-08 10:28:05	Northern Cape		Yes I do	Solar		Anne- Mari	employed individual
2022-07-08 10:27:36	Gauteng		Yes I do	Solar	We are blessed to live in a country where we have sun even in winter months, I think this might be a good alternative, I also think that with the amount of power behind the government not enough has been done to help the current eskom administration get rid of the criminal elements that have been following the eskom cash cow for decades, not enough is being done to assist them or protect them from the threats being made to them and their families. Not enough is being done to stop sabotage at stations, not enough is being done. SAA has been bailed out how many times, where is the man power behind something our country actually needs?	Meagan	employed individual
2022-07-08 10:27:35	Gauteng		Yes I do	Solar		Reidwaan	employed individual
2022-07-08 10:26:24	North West		Yes I do	Solar	Solar is the best way to generate extra electricity. Its cheap to generate and with new night solar panel technology available electricity can be generateted 24/7.	Gideon	employed individual
2022-07-08 10:25:48	Western Cape		Yes I do	Solar	As many sources of renewable energy must be made available asap-there are plenty of ideas out there that need to be included- by passing this government would be massively energy saving & money saving!!	Lesley	employed individual

2022-07-08 10:25:12	Western Cape		Yes I do	Solar	I think that to get us out of the hole we are in, we must make use of our nuclear facilities whilst getting solar, wind and hydro online. Also reduce the costs of installing solar or wind energy for personal use.	Susan	employed individual
2022-07-08 10:24:48	Gauteng		Yes I do	Solar	SA is a Sun rich country. The more power that can be generated the better. The Lesotho Highlands hydro programme has proven successful. Time to build more such systems in SA. Wind farms have also been proven a success. Instead of throwing money at coal and coal infrastructure, use it to work on the future.	Jacqui	employed individual
2022-07-08 10:22:29	Gauteng		Yes I do	Solar	Solar and gas are the way forward, we cannot rely on Eskom	Bruce	employed individual
2022-07-08 10:21:21	Gauteng		Yes I do	Solar	We live in a country that has more sunshine than most. Having solar plants for electricity generation is not only renewable and cheaper but better for our environment and more affordable in the long run. We cannot go on with the unreliability of Eskom any longer	Leshna	employed individual
2022-07-08 10:21:16	Western Cape		Yes I do	Solar	Power is a human right, everyone should have access to it, not just the privileged few. Businesses and people need to have access to stable power. How can we move forward as a nation if we can barely manage our power? We are fortunate to live in a country that has an abundance of renewable resources that could help us with the power crisis. Solar, nuclear and wind to just name a few. It is ridiculous that we are still using a finite resource like fossil fuel to power a country, not to mention its harmful to the environment	Carmen	employed individual
2022-07-08 10:20:08	Gauteng		Yes I do	Solar	Accessible to all	Jurgens	employed individual
2022-07-08 10:19:42	Gauteng		Yes I do	Solar		Mohammed	employed individual
2022-07-08 10:19:01	Gauteng		Yes I do	Solar	We are in desperate need of a solution. At least private power generation will be functional. The current system is broken	John	employed individual
2022-07-08 10:18:52	Gauteng		Yes I do	Solar		Mark	employed individual
2022-07-08 10:18:45	Western Cape		Yes I do	Solar	Imperative first is for government to allow IPPs to generate capacity by whatever means they deem economically feasible in the shortest possible time. Clear away the red tape. Expedite decision making on this.	colin	employed individual
2022-07-08 10:18:13	Western Cape		Yes I do	Solar	Yes we all agree that Eskom cannot cope with the task at hand. The infrastructure is way past its sell by date and it is costing the tax payer's more than what it is worth. We have all the sunlight that God give' us and more wind than we can handle. We need the private sector that have the mean's to start building power plant's that are power by /WART-WIND and SUNLIGHT. And encourage people to generate their own power.	lawrence	employed individual
2022-07-08 10:17:12	Western Cape		Yes I do	Solar	I would greatly welcome having independent power producers as this would take Eskom's monopoly on the market and create competition which leads to fairer energy prices. South Africa is perfect for renewable energy sources, not only solar but also wind and hydro.	Bernd	employed individual
2022-07-08 10:16:34	KwaZulu- Natal		Yes I do	Solar	This move is long overdue! The less that is in current Government's control, the better off all citizens, tax payers along with current and future investors.	Mahendra	employed individual
2022-07-08 10:15:41	Gauteng		Yes I do	Solar	SA needs to fix the problem first then slowly implement solutions that are environmentally friendly. The Government has left this problem to fester for too long.	Seeven	employed individual
2022-07-08 10:15:24	Gauteng		Yes I do	Solar	All form of renewable energy should be considered, wind, solar, hydro. More importantly citizens should be able to sell power back into the grid. Since load shedding has forced citizens to spend exorbitant amounts to get their own houses and offices on solar power, we should be allowed to sell that power back into the grid and ease the burden on the grid somewhat.	Bernard	employed individual
2022-07-08 10:14:35	Gauteng		Yes I do	Solar		Ken	employed individual
2022-07-08 10:13:16	Western Cape		Yes I do	Solar		Caroline	employed individual
2022-07-08 10:12:42	Western Cape		Yes I do	Solar		Chantelle	employed individual
2022-07-08 10:12:38	Western Cape		Yes I do	Solar	We have a bloody great climate for solar energy. Use it!!!	Rudi	employed individual
2022-07-08 10:12:09	Mpumal anga		Yes I do	Solar	Both nuclear and solar energy suppliers should immediately be allowed to supplement the current coal power plants. The coal power plants should further be incorporating private public partnerships to ensure the maintenance is kept up and down time is reduced at existing plants.	Johan	employed individual
2022-07-08 10:11:41	Gauteng		Yes I do	Solar	We need to include renewable energy sources for sustainable electricity supply to the regional grid.	Jac	employed individual

2022-07-08 10:11:10	Western Cape		Yes I do	Solar	It's astonishing that the government has allowed this energy crisis to continue for so long. Its been incredibly damaging to the economy. I believe a mix of different energy sources is needed to fix the current problem. Unfortunately, as bad as coal and diesel are for the environment, we will not be able to cut them out just yet. First, we need to build the infrastructure needed for environmentally friendly energy sources: solar and wind, and maybe investigate other types of alternative energy sources, e.g. waves. The biggest problem with nuclear energy is the type of waste it generates. The government needs to pull its thumb and open up the playing fields by reducing/removing red tape to allow private companies to supply alternative energy and feed that into the grid. If private homeowners want to install solar panels, inverters, batteries, etc, don't punish them. Help them by reducing the costs of these materials. This will help to reduce the load on the national grid. The government needs to think out of the box and be creative. This is a national crisis! For once, they need to put the needs of the citizens ahead of the needs of the political party.	Russell	employed individual
2022-07-08 10:09:46	Western Cape		Yes I do	Solar	Although solar/wind could be a quick fix now, ultimately we need to get more nuclear power into the energy mix.	Justin	employed individual
2022-07-08 10:08:38	Gauteng		Yes I do	Solar		Charles	employed individual
2022-07-08 10:08:01	Gauteng		Yes I do	Solar	We live in a very hot sunny country with loads of sunny days even in winter! Harness this free power!	Bernice	employed individual
2022-07-08 10:08:01	Western Cape		Yes I do	Solar	We need a combination of various sources of power.	Carl	employed individual
2022-07-08 10:05:00	KwaZulu- Natal		Yes I do	Solar	We should use green energy such as solar, wind and hydro instead of nuclear, coal and gas. Especially since the war in Ukraine has put most of Europe on high alert with the gas that came from Ukraine and Russia now in short supply. South Africa should also stop exporting its energy to other countries and look after its own people first. Exporting energy is costing our economy dearly with so many small businesses having to close their doors due to load shedding, which has also contributed to higher unemployment rates.	Yvonne	employed individual
2022-07-08 10:04:25	Western Cape		Yes I do	Solar	We need alternatives to allow for Eskom's lack of delivery	Lizette	employed individual
2022-07-08 10:04:25	Western Cape		Yes I do	Solar		Lizette	employed individual
2022-07-08 10:03:59	Western Cape		Yes I do	Solar		Lizette	employed individual
2022-07-08 10:03:59	Western Cape		Yes I do	Solar		Lizette	employed individual
2022-07-08 10:03:58	Western Cape		Yes I do	Solar		Lizette	employed individual
2022-07-08 10:03:56	Western Cape		Yes I do	Solar		Lizette	employed individual
2022-07-08 10:03:53	Western Cape		Yes I do	Solar		Lizette	employed individual
2022-07-08 10:03:37	Western Cape		Yes I do	Solar		Lizette	employed individual
2022-07-08 10:02:53	KwaZulu- Natal		Yes I do	Solar	We have the space and it is almost always sunny in South Africa. Must also remove all tariffs on solar panels	Arend	employed individual
2022-07-08 10:02:52	KwaZulu- Natal		Yes I do	Solar	We have the space and it is almost always sunny in South Africa. Must also remove all tariffs on solar panels	Arend	employed individual
2022-07-08 10:01:15	Gauteng		Yes I do	Solar		Kerri-lee	employed individual
2022-07-08 10:00:48	North West		Yes I do	Solar	With a solar array the size of Robben Island, we can power the entire country for free, forever. Remove the Cash Cow from the ANC's hands.	Jacques	employed individual
2022-07-08 09:59:49	Limpopo		Yes I do	Solar	Alternate suppliers must get onto grid as soon as possible, even residential and business that is already solar could feed back into the grid at discounted rate to Municipalities	Vincent	employed individual
2022-07-08 09:58:06	Gauteng		Yes I do	Solar	We need to look at empowering other players in the market who have the capacity and capability to provide the people of SA with renewable, sustainable and environmentally conscious means of energy producing and distribution. We can't have one relic of a company monopolizing this sector, they are bleeding and as result so is the rest of SA.	Dylan	employed individual
2022-07-08 09:57:29	Gauteng		Yes I do	Solar	SA gets a lot of sun; so solar power makes sense. After that, wind and nuclear power should be looked at.	Jannie	employed individual
2022-07-08 09:56:59	KwaZulu- Natal		Yes I do	Solar		Shireen	employed individual
2022-07-08 09:56:21	Gauteng		Yes I do	Solar	We have a lot of sun available	Theresa	employed individual
2022-07-08 09:56:15	Gauteng		Yes I do	Solar	In a country blessed with so much sunlight, it would be criminal not to use solar as a source of energy. We must look at all alternatives to coal.	Debbie	employed individual
2022-07-08 09:54:05	Gauteng		Yes I do	Solar	Actually we should be using a combined approach. We are blessed with Sun, wind and water that can be utilized to generate electricity. If money was spent wisely towards all 3, we could be generating sufficient energy to not rely on coal, nuclear or diesel to power our grid. But the key word is WISELY. Not stolen and used for personal gain.	Charmaine	employed individual
2022-07-08 09:52:54	North West		Yes I do	Solar		Zander	employed individual

2022-07-08 09:51:54	Western Cape		Yes I do	Solar	Every South African should have a choice as to which provider they want to use to suite their own specific needs and budget and definitely no one company should not be forced on us to monopolise the industry and overcharge the country for bad service. All natural sources of energy should be explored and offered to move towards leaving the planet a better place.	Nikki	employed individual
2022-07-08 09:51:03	KwaZulu- Natal		Yes I do	Solar	While I think that solar and other renewable energy sources have great potential in SA, I don't think that the means of producing power, in the short term at least , is the pressing issue. The pressing issue is for government to get out of the way of independent power producers. Government has proved itself completely and utterly unable to manage power production therefore it should remove all barriers (except for those which provide environmental protection in the power industry) and even encourage private enterprise to produce power. The ANC needs to stop putting ideology ahead of pragmatism!	Michelle	employed individual
2022-07-08 09:50:55	Gauteng		Yes I do	Solar		Cornelius	employed individual
2022-07-08 09:49:24	Eastern Cape		Yes I do	Solar		Amore	employed individual
2022-07-08 09:49:02	Eastern Cape		Yes I do	Solar		Amore	employed individual
2022-07-08 09:49:01	Eastern Cape		Yes I do	Solar		Amore	employed individual
2022-07-08 09:48:21	KwaZulu- Natal		Yes I do	Solar	Many privates and companies have installed solar as a way of avoiding loadshedding and stabilizing their productivity by not relying on the Eskom grid. If there is incentive for more people to do this and it would assist the country in slowing down the obvious downward spiral we find ourselves in, there is no reason the government should not want to assist the country in doing this. Unless of course, the government has ulterior motives for seeing the country unproductive and reliant on government for basic needs.	Rachelle	employed individual
2022-07-08 09:45:15	Gauteng		Yes I do	Solar	Given our weather patterns and the abundance of sun, wind and water, using these to generate electricity would make sense as they are sustainable and inexpensive in the long term. Of course, allowing the ANC to manage this transition is always going to fail as they would be more interested in stealing the money and lining their own pockets, so it would have to be a privatized initiative.	Brett	employed individual
2022-07-08 09:45:12	Free State		Yes I do	Solar		Blessing	employed individual
2022-07-08 09:44:39	Western Cape		Yes I do	Solar	Please no nuclear, the only way I can see it works, is if we can get solar or wind that is more affordable and to put the extra back in the grid.and getting payed for it so that when you need to pay for new batteries, there is money for it. Ask Christo Wiese or Elon Munsck, they can sort it out in a year	Francois	employed individual
2022-07-08 09:44:38	Western Cape		Yes I do	Solar	Please no nuclear, the only way I can see it works, is if we can get solar or wind that is more affordable and to put the extra back in the grid.and getting payed for it so that when you need to pay for new batteries, there is money for it. Ask Christo Wiese or Elon Munsck, they can sort it out in a year	Francois	employed individual
2022-07-08 09:41:51	Gauteng		Yes I do	Solar	Actually Wind and solar. Something needs to be done sooner rather than later as our country slips inevitably into a dark and powerless future where business have to close and families go hungry in the cold. They must stop with their power grab and look after SA's people	Hercules	employed individual
2022-07-08 09:40:55	Gauteng		Yes I do	Solar		Robert	employed individual
2022-07-08 09:39:17	Gauteng		Yes I do	Solar	I believe a business should not be stopped or limited in producing their own power should they have the ability to do so. As long as their production does not affect the local environment why not allow them to? As an end user, if I have the means through solar or any other form of electricity generation, should not be punished for not using municipal electricity as is currently the case. Adding additional power suppliers will reduce the pressure on Eskom and also produce a competitive environment to allow better pricing on electricity.	Warren	employed individual
2022-07-08 09:39:15	KwaZulu- Natal		Yes I do	Solar	Many privates and some companies have turned to solar as a means of avoiding loadshedding for their own personal use, if there is a way to alleviate the pressures loadshedding is putting on our economy, lowering the obstacles should not even be a discussion. The downward spiral our country faces is gaining momentum and the longer we wait to allow the private sector to step in and rescue us simply because government doesn't want to lose control, we are sentencing our country to certain destruction.	Rachelle	employed individual

2022-07-08 08:48:37	Limpopo	Yes I do	Solar	Allow individuals who already produce solar energy to supply excess to the grid.	Susan	employed individual
2022-07-08 08:48:01	Gauteng	Yes I do	Solar	Government could have put up solar for all the millions waisted on coal, diesel, etc to keep the lights on. Maybe they don't want to do that, because then there will be less money that can disappear. Solar and wind power is the way to go and don't tax individuals with solar at home, who provide electricity for themselves, because the government cannot.	Martie	employed individual

2022-07-08 08:47:41	Western Cape		Yes I do	Solar	The country is collapsing due to the ineptitude of <you know who> and the time for drastic measures has come. Stop fanning about. Cut the red tape. Stop the meetings, the purposeless committees, the tea parties, the lunches and open up the market for renewable energy producers to come and save the day. . Instead of continuing to pour BILLIONS of ZAR into Eskom, cut the deadwood from Esko, and use the savings to incentivise citizens to install their own renewable energy sources. Cut the red tape NOW. Or see the country collapse like Zimbabwe and anarchy takeover.	Richard	employed individual
2022-07-08 08:47:31	Gauteng		Yes I do	Solar		hayley	employed individual
2022-07-08 08:45:52	Northern Cape		Yes I do	Solar		Willem	employed individual
2022-07-08 08:45:34	Gauteng		Yes I do	Solar	This matter has been severely urgent for more than a decade. Get on with it come up with a workable solution already. Really, load shedding is going to continue to bring down the economy and chase away investors, as it has been doing for years and years, never mind the ridiculous affect it has on all citizens and especially additional costs borne by places like hospitals. DO SOMETHING NOW!	Margaret	employed individual
2022-07-08 08:45:24	Western Cape		Yes I do	Solar	We have do much sunshine (and wind) and it is renewable and clean. Use it. Since government can't supply us with energy, we should be enabled to do it ourselves.!	Heidi	employed individual
2022-07-08 08:45:10	Gauteng		Yes I do	Solar		Adelle	employed individual
2022-07-08 08:44:51	Western Cape		Yes I do	Solar	We have do much sunshine (and wind) and it is renewable and clean. Use it. Since government can't supply us with energy, we should be enabled to do it ourselves.!	Heidi	employed individual
2022-07-08 08:44:44	Gauteng		Yes I do	Solar	Eskom cannot use coal indefinitely and the current blackouts are indicative of South Africa requiring more power producers to supply electricity to the country's citizens.	Anthea	employed individual
2022-07-08 08:44:21	Western Cape		Yes I do	Solar		David	employed individual
2022-07-08 08:43:30	KwaZulu- Natal		Yes I do	Solar	Solar is a renewable energy.	Goodwill	employed individual
2022-07-08 08:42:29	Gauteng		Yes I do	Solar	Open the market for independent contractors. Electricity is necessary for economic development but it is not a basic human right like water and food. Contractors should be allowed to offer a service and be compensated in a free market. A combination of solar, wind and coal can be used. Solar and wind is independant of mining factions influenced by political upheavals, while coal can still be used to a limited extent, on the condition that it is not subjected to political misuse.	Renier	employed individual
2022-07-08 08:41:03	Western Cape		Yes I do	Solar	I would have loved to have 3 options. Solar, wind and hydro. With hydro I am thinking of the sea movement to generate electricity for our coastal areas. We have enough sun and wind for the inland areas.	Johan	employed individual
2022-07-08 08:40:14	Mpumal anga		Yes I do	Solar	I think we should focus on renewable sources of electricity like solar, hydro and wind rather than coal and gas. I think nuclear would be an option if government could be competent in managing such power stations, but I know they would take a long time to build and put into commission. I do think there should be no limits on people or corporations producing their own electricity. And if such people can supply into the power grid that could help alleviate the shortages.	Leoni	employed individual
2022-07-08 08:37:48	Gauteng		Yes I do	Solar	If the government will allow for a rebate/subsidy per Kw generated per household that is not a ridiculous small insulting amount. 10's of millions of households can contribute to the grid during the day to keep industry and businesses open and operating during business hours. Leaving Eskom able to supply during night-time. But currently I need to pay R500/m to be registered to put power into the grid @ 10c per unit. Sorry, this is bull I will rather let my excess power go to waste than help if these are the conditions and restrictions in place to do private generation.	Jacobus	employed individual
2022-07-08 08:37:39	Western Cape		Yes I do	Solar	Legislation must be amended immediately to provide for private generators of renewable energy.	Johan	employed individual
2022-07-08 08:37:11	Gauteng		Yes I do	Solar	At the moment Loadshedding is effecting everyone around us, and at the end of the day electricity has become part of everyone daily requirements. We need to get the service we are paying for. If Eskom doesn't know how to supply this then they are not suppose to keep one trying. If we stop paying for useless services we could afford to pay for renewable private environmentally friendly Power.	Jason	employed individual
2022-07-08 08:37:10	Gauteng		Yes I do	Solar		Luzan	employed individual

2022-07-08 08:08:20	Western Cape		Yes I do	Solar	It has been proven that the government cannot provide what we require, Nuclear is the best option in the long run, but this will take years, not to mention the corruption that will go along with it when done by the government. For now, our best options would be solar and wind, with solar being the quickest to implement. If these providers can feed the system, it will elevate immediate pressure. Another option would be to give private individuals a significant rebate on their solar installations.	Robert	employed individual
2022-07-08 08:07:25	North West		Yes I do	Solar		Heleen	employed individual
2022-07-08 08:04:20	Western Cape		Yes I do	Solar	Solar is the easiest and cheapest to install with no side affects and has no affects o n the bird life It is evident to everyone that ESKOM is not going to make it. Too many employees, too many people staak and toi toi. Making everything worse...too much stealing, too much corruption. The fact that ESKOM supplies other countries while we are in loadshedding is ridiculous... Our whole country will crash with no electricity. Wake up and get it sorted	diana	employed individual
2022-07-08 08:04:12	Western Cape		Yes I do	Solar	Solar grids can be manufactured locally and installed relatively quickly where as all of the other fuel based solutions will take years to build and bring online. Solar is also our best option for renewable, non polluting energy generation and we have ideal climatic conditions across our country for solar electricity generation. While I agree that portable diesel or gas fueled generators might be required in combination with solar to solve the immediate crisis, we should not consider any fossil or nuclear fueled electricity generation for our long term energy strategy.	David	employed individual
2022-07-08 08:03:50	Western Cape		Yes I do	Solar	South Africa is graced with abundant sunlight, let us use it wherever possible! Put it under the tar of our roads, on top of trains and busses, on our rooftops without having to apply for permission, we have it, so let's use it! I would also like to see the culprits who are sabotaging Eskom, be it through actual sabotage, theft, strike action or corruption being punished for treason. Let's stand up to this craziness!	Cheryl	employed individual
2022-07-08 08:01:27	Western Cape		Yes I do	Solar	We are in a state of emergency as far as Eskom is concerned, there is no way getting around that. Solar is probably the fastest way to get electricity and ease the pressure on Eskom. Instead of worrying about the grid, just get give 40% incentives to business and residential to install solar. That way we get them all of the grid at a fraction of the cost. Solar for most business and residential is just too expensive, but with an incentive it brings it in contention. Rather take the bite of 40% and get business and households up an running. In the long run this is going to save our country billions.	Jose	employed individual

2022-07-08 08:01:26	Gauteng		Yes I do	Solar	We need to use all alternative energy sources available, and less reliability on coal	M	employed individual
2022-07-08 08:01:11	Limpopo		Yes I do	Solar		FIDELIA	employed individual
2022-07-08 07:58:55	Gauteng		Yes I do	Solar	Solar, wind, hydro. We need more electricity suppliers but we need to do it in a sustainable way, taking climate change into consideration and not just the immediate need for power. Setting the price of electricity at a fixed rate across all suppliers is perhaps the better way to ensure fairness and that no one takes advantage of the situation for financial gain.	Roxanne	employed individual
2022-07-08 07:58:23	Gauteng		Yes I do	Solar	There are already a number of private Solar 'fields' available that can just be increased in size for immediate relief. The government should also allow private homes to supply extra power that are generated to be put back into the powergrid. This will at least levitate the current system for businesses where ALL monies are generated	Andre	employed individual
2022-07-08 07:57:58	Mpumalanga		Yes I do	Solar	Battery technology is getting better and better. That coupled with solar power would relieve the grid of stress. Long term would be best to do nuclear power. It is severely misunderstood and a lot safer than coal.	Johan	employed individual
2022-07-08 07:54:13	Western Cape		Yes I do	Solar		Wendy	employed individual

2022-07-08 07:05:01	Western Cape		Yes I do	Solar	My question is why has government taken so long to consider independent power solutions. Our energy crisis would have been solved so much sooner.	Lori	employed individual
2022-07-08 07:05:01	Gauteng		Yes I do	Solar		Chris	employed individual
					<p>Firstly they are not looking for emergency solutions. We know that this was all part of their plan to destroy Eskom. Lastly to put a white man in place when Eskom was on it's last legs. Now when Eskom completely falls apart they will jump in with "so called" solutions and blame the entire thing on the white man. But we know what their plan is and that Blacks will once again be in charge of this. Until the blacks realize that they need the white man to assist them with knowledge and solutions and that the blacks cannot do anything on their own successfully there will always be disasters. Until they realize that the white man is not the enemy but they themselves with all their occults and worshipping of demons and devils is the actual problem things will not get better.</p> <p>Stop following the devil in sheeps clothing into this entire One World Order rubbish and start praying to God and REPENT of your wrongdoing. That means turn away from the wrong and start doing the good. Stop with this ancestor rubbish and stop with witch craft rubbish. This is all from the devil and will eventually kill all.</p> <p>Allow the white man to also have a say and give his input into solutions about problems this country is facing.</p> <p>Until 1994 this country was ran by whites and everything was working successfully because they knew what they were doing. Yes they also made mistakes but at least the country was a first world country now it has JUNK RUBBISH status after the blacks TRIED to run it but they just ran it to the ground.</p> <p>ANC has been stealing all the citizens hard earned tax money and trying to hide it. Pretending to be enemies with parties like EFF but they are all the same working together. Give back to the people every single cent that was stolen but reducing all tax by cutting all tax by half. Stop driving fancy cars that We paid for. Stop spending and start delivering a service to the people of this country.</p> <p>In old days police even drove small VW Golf and Toyota bakkies now they drive cars worth millions.</p> <p>Allow companies to all provide electricity to SA no matter what race and colour as with America that has about 5 electricity providers. Stop forcing the tax payer to use government state own entities where ANC can sit and steal the whole time. We all know SAA belongs to blacks now and was also part of the plan. Now it is Eskom's turn.</p> <p>Black CEOs ran Eskom into the ground not the whites. Workers ran Eskom into the ground by sabotaging the network, not the whites.</p>

2022-07-08 06:52:27	Western Cape		Yes I do	Solar		Christof	employed individual

2022-07-08 06:52:23	Western Cape		Yes I do	Solar	Solar/ wind/ hydro anything that's "free" to harvest from nature to provide the country with a consistent energy supply. Dear government please stop barking up the rotten old tree that is Eskom and allow private/ public suppliers to provide electricity to itself and your grid. This is not a new problem, we've been struggling with loadshedding for years, you've had your opportunity to find alternative energy supply solutions, but instead you've been hell bent on making your "cash cow" stations work for you. Time to pass the reigns and try save what's left to save of our economy.	Suzaan	employed individual
2022-07-08 06:52:10	Gauteng		Yes I do	Solar	The immediate need is reliable and sufficient electricity. In the current situation the means to generate is of lower importance. The means to generate must in future be compliant to all the criteria.... eco friendly, sustainable, affordable, et-al.	Jeff	employed individual
2022-07-08 06:51:20	Gauteng		Yes I do	Solar	We are a sunny region and need electricity during the day to keep factories running	Hendrik	employed individual
2022-07-08 06:50:13	KwaZulu- Natal		Yes I do	Solar	Although I do believe nuclear is the long term solution instead of coal fired plants. The short term solution is to firstly encourage by means of tax rebate the installation of household and business solar systems. Also allow these localised installations to feed back the grid to off load excess solar power during the day to reduce peaks during daylight hours, this will reduce the risk of loadshedding during business hours which is eating our economy. These smaller installations are fast to install and has the benefit of creating business in the local economies instead of business to large companies on a handful of projects.	Konrad	employed individual
2022-07-08 06:49:58	Gauteng		Yes I do	Solar	I have a Tesla Powerwall. I am able to put electricity back onto the grid via battery or solar. Currently this feature is switched off due to City Power rules. Residents should be allowed to put solar/battery back onto the grid.	Roger	employed individual
2022-07-08 06:49:45	Gauteng		Yes I do	Solar		Marius	employed individual
2022-07-08 06:49:01	Western Cape		Yes I do	Solar	Not only will this help to end our energy crisis, but it will also create hundreds of jobs in the private sector, and speed up SA's move towards less carbon emissions. The real question is why haven't we done this sooner?!	Teagan	employed individual
2022-07-08 06:48:50	Western Cape		Yes I do	Solar	Solar and wind are there to be used and to buy us time to make an informed decision on what must support it.	Rynier	employed individual
2022-07-08 06:48:49	Gauteng		Yes I do	Solar		Maurize	employed individual
2022-07-08 06:48:07	KwaZulu- Natal		Yes I do	Solar	Solar and wind can be brought online very quickly and is an abundant resource in South Africa. Together with battery backup, these could stop load shedding in the shortest possible time frame.	Nicholas	employed individual
2022-07-08 06:47:07	Western Cape		Yes I do	Solar	We have seen in the past that the wind turbines is a huge structure and it cost a obscene amount of money to manufacture them and with todays economy SA will not be able to afford it. Coal will not work either, because SA ran out of that to. So solar is the only option in my opinion, for the sun is unlimited and God gave it to us to use. And its natural no harmful gasses nothing	CA	employed individual
2022-07-08 06:47:01	North West		Yes I do	Solar		Jakes	employed individual
2022-07-08 06:46:22	Gauteng		Yes I do	Solar	Solar is a technology that is capable of fast construction and implementation utilising multiple medium size projects. Importantly local content requirements should be discarded to allow for volume, low cost solar panel imports.	Leon	employed individual
2022-07-08 06:45:34	Limpopo		Yes I do	Solar		Carla	employed individual
2022-07-08 06:45:15	Gauteng		Yes I do	Solar	Clean energy from a reliable source	Claudia	employed individual
2022-07-08 06:45:08	Western Cape		Yes I do	Solar		Tania	employed individual
2022-07-08 06:42:42	KwaZulu- Natal		Yes I do	Solar		Arielle	employed individual
2022-07-08 06:42:21	North West		Yes I do	Solar	It is easy to install, operate and use	Herman	employed individual
2022-07-08 06:42:19	Western Cape		Yes I do	Solar		Ian	employed individual
2022-07-08 06:41:54	Gauteng		Yes I do	Solar		Robert	employed individual
2022-07-08 06:41:27	Gauteng		Yes I do	Solar	Actually combination of solar, wind and gas. Reality is that Eskom is struggling and regardless of what sources of energy we use, we need to ensure availability to allow the community and business to operate and to ensure investment so that our country can flourish. The red tape and lack of Political will stops investment and is putting our country at risk. I had personally been involved in renewable energy projects more than 10 years ago and stopped due to not being able to advance perfectly viable projects as a result of this. These 10 to 15 projects would not have saved our country, but they would certainly have made some contribution	Eugene	employed individual
2022-07-08 06:41:05	Gauteng		Yes I do	Solar	Any renewable energy sources are acceptable just not nuclear.	Dietmar	employed individual
2022-07-08 06:40:29	Gauteng		Yes I do	Solar	Solar power is clean & renewable. We also have massive amounts of plastic and other waste, suffocating our rivers, that can be used to generate fuel for electricity!	Sané	employed individual

2022-07-08 06:40:29	Western Cape		Yes I do	Solar	I suggest supplying very poor households in SA with a solar and battery kit as this will help this people immediately. The cost is high, but is cheaper and quicker at this moment in time than upgrading a power plant or building a new one. Motivate entrepreneurs/ business owners to start building and supplying cost effective solar kits and components for renewable energy solutions and cut the unnecessary nonsense business owners face now. Give all energy solutions businesses a huge tax break and take away vat on all components for producing and maintaining solar power systems. Immediately scrap BBBEE and treat everyone on a fair and efficient manner.	Johan	employed individual
2022-07-08 06:40:21	Gauteng		Yes I do	Solar		Rob	employed individual
2022-07-08 06:39:43	Gauteng		Yes I do	Solar	The current situation is wreaking havoc on the economy and social aspects of South Africans . It is unhealthy and costing us a lot of money. We need a sustainable solution, Eskom cannot supply the current demands which will continue to grow with a growing population. Eskom is expensive due to poor corrupt management and healthy competition is required.	Kim	employed individual
2022-07-08 06:39:34	Gauteng		Yes I do	Solar	In South Africa, Solar is the best option inland, unless they use major wind farms just off the coast where there's always wind. Maybe even a combination of Solar and Wind together. Scrap coal, diesel and nuclear, too much scope for criminal activity!	Kurt	employed individual
2022-07-08 06:38:46	KwaZulu- Natal		Yes I do	Solar		Elsie	employed individual
2022-07-08 06:37:52	Western Cape		Yes I do	Solar		Tanya	employed individual
2022-07-08 06:37:20	Eastern Cape		Yes I do	Solar	Eskom is just not able to supply the demand and we have a right to electricity.	Dawie	employed individual
2022-07-08 06:37:02	Gauteng		Yes I do	Solar	Subsidize homeowners and roll out small scale solar systems however do away with BEEE contracts as that will nullify the effort BEST MAN FOR THE JOB EQUAL OPPORTUNITY!!!	Wolfaard	employed individual
2022-07-08 06:36:49	Gauteng		Yes I do	Solar	Invest in your own powerwhat ever in your region , city, town are best suited. To put the monopoly of generating power again in one group of people will just be the samethey definitely won't worry about what the people can afford they will give the tenders , the business loans again to the families involve the friends involve as I have learned in SA this past 24+ years that we the ordinary tax payers get nothing we have to look out for ourselves so therefore let us rather be self sufficient in anyway we can solar, wind al the company's have free education on your products for us to generate our own electricity please	Susan	employed individual
2022-07-08 06:36:06	Gauteng		Yes I do	Solar	Invest in your own powerwhat ever in your region , city, town are best suited. To put the monopoly of generating power again in one group of people will just be the samethey definitely won't worry about what the people can afford they will give the tenders , the business loans again to the families involve the friends involve as I have learned in SA this past 24+ years that we the ordinary tax payers get nothing we have to look out for ourselves so therefore let us rather be self sufficient in anyway we can solar, wind al the company's have free education on your products for us to generate our own electricity please	Susan	employed individual
2022-07-08 06:34:25	Western Cape		Yes I do	Solar	In a country where the climate is so warm, we should have the ability to harness the power of the sun to produce our energy requirements. Saying that, I will support ANY method that can urgently provide energy in the short term. Getting rid of the ANC cadres who have destroyed Eskom & our ability to generate electricity is also a top priority.	Kerry	employed individual
2022-07-08 06:34:16	Gauteng		Yes I do	Solar		Jade	employed individual
2022-07-08 06:34:04	Western Cape		Yes I do	Solar	Scrap the red tape of licenses!!! Allow IPP to build wind and solar farms and tie them into the existing grid. Prices to be agreed upon, but a fair price would be what Eskom is charging.	Hendrik	employed individual
2022-07-08 06:34:03	Western Cape		Yes I do	Solar	A well considered energy mix is required. The mix needs to be new generation, low (or no) carbon/kWh and promptly implemented. I propose solar, wind, hydro and and nuclear all running in parallel. No more coal. Coal must stop - coal kills! We have to adapt and beat the climate crisis as well. Nuclear will of course take time, but solar is a quick installation. The procurement processes should be extremely simple, yet robust and not allow any room for corruption.	Anton	employed individual
2022-07-08 06:33:42	Mpumal anga		Yes I do	Solar	We need electricity, as we have human rights in South Africa!	Vicky	employed individual
2022-07-08 06:32:14	Gauteng		Yes I do	Solar	This country is doomed with the existing government in power. This country is farming backwards and is being run into the ground, all we as the public see are increases of traffic to pay salaries of incompetent human beings that just want and want and are greedy, yes I'm taking about the ANC and Eskom. ESKOMPLICATED.	Duke	employed individual
2022-07-08 06:32:10	Gauteng		Yes I do	Solar	Power needs to be returned to the people. The red tape that prevents people from gaining access to basic needs when there are obvious solutions available is very upsetting and unnecessary. Government is supposed to work for the people....this crisis is a very clear indication that they do not.	Verena	employed individual
2022-07-08 06:31:56	Gauteng		Yes I do	Solar	With solar power we reduce carbon emissions and we always have Sun. I am rooting for wind or Hydro as well as it has the same effects. It should be cheaper for us as well.	Bianca	employed individual

2022-07-08 06:31:43	Eastern Cape		Yes I do	Solar	We live in sunny South Africa but dont utilise our most constant resource. Eskom has fail us for to long and for far to long we just accepted it. If they cant supply the need for electricity then they must give up the monopoly and allow others to step in using any method really to meed the need.	Celicia	employed individual
2022-07-08 06:31:00	Gauteng		Yes I do	Solar		Omar	employed individual
2022-07-08 06:30:49	Western Cape		Yes I do	Solar		Fred	employed individual
2022-07-08 06:30:48	Western Cape		Yes I do	Solar		Fred	employed individual
2022-07-08 06:30:44	Western Cape		Yes I do	Solar	we need an emergency solution that a private company could give us. Eskom is part of the drain on this country. The cANcer feel they can milk us through loadshedding... Please God save this country!!! May the system fall may Eskom fall. May the cANcer fall!!	Kylie	employed individual
2022-07-08 06:30:41	Limpopo		Yes I do	Solar	Hydro is also a good solution but constant flow of water is needed	Dorea	employed individual
2022-07-08 06:30:39	Gauteng		Yes I do	Solar		Karen	employed individual
2022-07-08 06:28:30	Mpumal anga		Yes I do	Solar		sina	employed individual
2022-07-08 06:28:13	Gauteng		Yes I do	Solar	We already have many homes with solar who can feed into the grid. It is easier for households and businesses to put up on their property.	Lace	employed individual
2022-07-08 06:27:48	Gauteng		Yes I do	Solar	We have plenty of sun and it's free. There are battery technologies out there that give a life span of 45 years. This solution is more cost effective in the long run and should be more economical for SA Citizens.	Ronsley	employed individual
2022-07-08 06:27:46	Gauteng		Yes I do	Solar			employed individual
2022-07-08 06:27:12	Eastern Cape		Yes I do	Solar	Renewable first.... Like Solar, Wind, Hydro. Maximise innovation within South Africa without needing to rely on international support or supply.	Carryn	employed individual
2022-07-08 06:27:09	Mpumal anga		Yes I do	Solar		willem	employed individual
2022-07-08 06:26:47	Gauteng		Yes I do	Solar	I believe that eskom has failed to manage electricity, maybe they should start making sure that every province has its own electricity supply. Stop making them one.with the crisis we have now alternative supplies of electricity is needed urgently people are suffering, business is suffering.	Percy	employed individual
2022-07-08 06:26:35	Gauteng		Yes I do	Solar	Big costs to start but pays itself later. You can also feed back into the grid	Marisa	employed individual
2022-07-08 06:26:33	Western Cape		Yes I do	Solar		Kristina	employed individual
2022-07-08 06:26:32	Free State		Yes I do	Solar		Michelle	employed individual
2022-07-08 06:25:43	Gauteng		Yes I do	Solar	We should be looking for not just one renewable electricity source, but many. Use multiple methods to ensure that there is electricity for everyone. I do believe that if eskom is unable to provide the means to ensure there is enough electricity, then it should be privatised.	Nikita	employed individual
2022-07-08 06:25:36	Western Cape		Yes I do	Solar	Solar and coal can be used seeing that we export our coal to other countries to make the government rich. Why can't we use it ourselves? They (government) could supply rdp houses with solar panels..... for free, where our money was used to buy it in any case. Gov must start using their heads but that would mean that they have to stop stealing and actually start caring what happens to this country	Sue-Ann	employed individual
2022-07-08 06:25:26	Gauteng		Yes I do	Solar	We cannot rely on coal or eskom. We have enough sunlight to power the country	Vee	employed individual
2022-07-08 06:25:07	Western Cape		Yes I do	Solar		Alita	employed individual
2022-07-08 06:22:20	Western Cape		Yes I do	Solar		Troy	employed individual
2022-07-08 06:22:07	Gauteng		Yes I do	Solar	South Africa gets an incredible lot of sun days and I dont mean the day of the week. Lets utilise it to fill our homes with electricity. Eskim has failed us big times and arent going to do a thing.	Graham	employed individual
2022-07-08 06:22:01	Western Cape		Yes I do	Solar		Nick	employed individual
2022-07-08 06:20:14	Gauteng		Yes I do	Solar	The electricity crises is crippling our economy on every level. Independent power producers are essential while the best long term solution (or combination thereof) is being sought.	Anton	employed individual
2022-07-08 06:20:12	Gauteng		Yes I do	Solar	The electricity crises is crippling our economy on every level. Independent power producers are essential while the best long term solution (or combination thereof) is being sought.	Anton	employed individual
2022-07-08 06:20:12	Gauteng		Yes I do	Solar	The electricity crises is crippling our economy on every level. Independent power producers are essential while the best long term solution (or combination thereof) is being sought.	Anton	employed individual
2022-07-08 06:19:14	Western Cape		Yes I do	Solar	Good day...up to this point in time wind energy plants were established...which is wind dependant...compared to solar...the sun is almost everyday there and the sun heat beams are intensifying as the ozone layer degrade...therefor....Solar is a better choice for now and has proven it is working...if correctly installed.	Werner	employed individual

2022-07-08 06:18:58	Western Cape		Yes I do	Solar	Renewable energy sources cannot be stolen or subjected to the corruption (by the incompetent and corrupt ANC and its corrupt allies) which has become so well rooted in our country. It is also immediately and freely available, with many installations already existing. We cannot afford not to immediately take urgent steps to rescue our economy crippled by the incompetence, corruption and sabotage.	Willem	employed individual
2022-07-08 06:18:17	Gauteng		Yes I do	Solar	Wind, solar, waves... !	Rene	employed individual
2022-07-08 06:17:52	Gauteng		Yes I do	Solar	Solar is clean, renewable, and will support a multitude of smaller local businesses which who'll further help the economy. Furthermore installation and maintenance of solar power systems is cheaper and almost instant in comparison to the other options, helping our immediate load shedding problem.	Daniel	employed individual
2022-07-08 06:17:47	Gauteng		Yes I do	Solar	Just allow the private sector to get on with the process!	John	employed individual
2022-07-08 06:17:40	Gauteng		Yes I do	Solar	Nersa slow approval times are slowing down deployment of solar PV installations. Grid owners need to provide 30 days turnaround time on grid applications.	Guy	employed individual
2022-07-08 06:17:17	Gauteng		Yes I do	Solar		Robert	employed individual
2022-07-08 06:16:31	Western Cape		Yes I do	Solar		Kevin	employed individual
2022-07-08 06:16:11	Gauteng		Yes I do	Solar	Not only solar as selected, but any and all forms of renewable energy. Coal and diesel are energy sources of the 19th century and back. We need to look to the future and ensure there's something left for the youth of tomorrow.	A	employed individual
2022-07-08 06:16:05	Gauteng		Yes I do	Solar	Not only solar as selected, but any and all forms of renewable energy. Coal and diesel are energy sources of the 19th century and back. We need to look to the future and ensure there's something left for the youth of tomorrow.	A	employed individual
2022-07-08 06:15:54	KwaZulu- Natal		Yes I do	Solar	We have so many alternative resources, a combination of hydro, solar and wind, to supplement our power. Pay the farmers to utilize areas of farms that can't be used, to put in solar panels. Take the monopoly away from the government..	Judith	employed individual
2022-07-08 06:15:36	Gauteng		Yes I do	Solar	I believe the decision has to be made to do what is necessary to supply the country with electricity. To begin with it will be necessary to use a combination of coal, nuclear etc. Once the system is stable surely it would make sense to move to cleaner energy. The strikers held the country to ransom, however the ANC are doing exactly the same by not allowing the engineers and those with the correct expertise to take over and run the utility as it should be run. The ANC and it's 'comrades' must be held accountable for the destruction of South Africa.	Valerie	employed individual
2022-07-08 06:15:36	Western Cape		Yes I do	Solar		Jason	employed individual
2022-07-08 06:13:06	Free State		Yes I do	Solar		David	employed individual
2022-07-08 06:12:33	Gauteng		Yes I do	Solar	We have natural sun for solar farms and at coast for wind, that's what needs to be implemented in SA. Also traffic lights should have been on solar ages ago	Tanja	employed individual
2022-07-08 06:12:32	Western Cape		Yes I do	Solar	Eskom and government has failed South Africans and the economy. We are quickly heading for a failed state. For 20 years the government has not added capacity but has been creating more power projects to service communities that never had electricity. Electricity does not grow on trees and is based on supply vs demand. Eskom is unable to manage the construction of new power plants (the "new" ones recently built are in a similar state as the 40 year old plants. By allowing IPPs to immediately supply power by means of solar, wind and nuclear we will avert a disaster. We cannot rely on Eskom and the state any longer.	Tony	employed individual
2022-07-08 06:11:45	Western Cape		Yes I do	Solar		edrn	employed individual
2022-07-08 06:09:29	Western Cape		Yes I do	Solar		Raquel	employed individual
2022-07-08 06:05:30	Free State		Yes I do	Solar	All renewable energy sources should be utilized to produce power to the country. It is free (sub and wind) and readily available. I know to install one needs enough capital, but allow private owners and businesses to put back in the grid. Do not tax solar owners for "using the sun". The time has come to move away from this ideology of the ANC to control everything and move towards an inclusive South Africa where the BEST employees are appointed and state-owned enterprises become privately owned.	Corlene	employed individual
2022-07-08 06:04:59	Gauteng		Yes I do	Solar	There are already a lot of solar farms, use them to the country's advantage.	Theunis	employed individual
2022-07-08 06:03:22	Western Cape		Yes I do	Solar	South Africa need a boost to the electrical grid, and fast and clean way is renewable energy. Solar energy is clean and a faster solution.	Graham ^o	employed individual
2022-07-08 06:02:58	Gauteng		Yes I do	Solar	Eskom cannot provide. We need an alternative.	Leigh- Anne	employed individual
2022-07-08 06:02:09	Gauteng		Yes I do	Solar		Johannes	employed individual
2022-07-08 06:00:46	Gauteng		Yes I do	Solar		Aldora	employed individual
2022-07-08 05:58:43	Western Cape		Yes I do	Solar		Martin	employed individual

2022-07-08 05:56:15	KwaZulu-Natal		Yes I do	Solar		Ryan	employed individual
2022-07-08 05:55:58	Mpumalanga		Yes I do	Solar	I fully support any energy generation except coal. We need to move away from high carbon footprint. Rewrite legislation to fit these needs and allow other energy producers to supply to the national grid for healthy price competition. The high prices for electricity must fall considerably and be made a basic human right with no taxes and other hidden costs involved. Supply to other countries must be stopped until we actually have enough of our own. Eskom must start again from a small to medium size business with the correct people at the wheel of things to gradually become the energy powerhouse it once was prior to 2000.	Marc	employed individual
2022-07-08 05:55:40	Gauteng		Yes I do	Solar	We need independent power producers to step in IMMEDIATELY - this is long overdue. We have so much sun throughout the year so solar is the best option.	Mmamoloko	employed individual
2022-07-08 05:54:50	Gauteng		Yes I do	Solar	With the current situation we are facing the current service provider which is Eskom they cannot service this country with energy production. Strict measures need to be put in place regarding vandalism of the state's assets and severe punishment must be given to the perpetrators	Samantha	employed individual
2022-07-08 05:51:12	Gauteng		Yes I do	Solar	State have shown to fail power production, leave it to private enterprise	Johannes	employed individual
2022-07-08 05:50:10	Gauteng		Yes I do	Solar		Barbara	employed individual
2022-07-08 05:50:09	Gauteng		Yes I do	Solar	Solar is more economically viable for South Africa and far quicker than other sources. It has less maintenance and less impact on the natural resources.	Dirk	employed individual
2022-07-08 05:47:24	Western Cape		Yes I do	Solar	It's glaringly obvious to everyone EXCEPT Government! And as a country almost perfectly positioned to use Wind, Solar and Hydro we should be at the forefront of renewable energy _ yet, our Cader deployments are dead set with Nuclear and fossil fuel solutions... ?!?! Think with your brains, not your POCKETS !!	Ian	employed individual
2022-07-08 05:47:12	Western Cape		Yes I do	Solar		Rolene	employed individual
2022-07-08 05:46:40	Free State		Yes I do	Solar	Going solar = green footprint. We have more than enough sunshine in South Africa. It will soften the load on Eskom to produce electricity from coal/diesel.	Liezel	employed individual
2022-07-08 05:41:21	Gauteng		Yes I do	Solar	Subsidising household level solar installations as well as allowing large IPP installations to supllment the grid as well as grid level storage would be greatly beneficial.	Matthew	employed individual
2022-07-08 05:38:11	Free State		Yes I do	Solar	The ANC broke Eskom. South Africa needs electricity - allow private enterprises to take over the failing SOC's.	Adriaan	employed individual
2022-07-08 05:35:44	Gauteng		Yes I do	Solar		Melissa	employed individual
2022-07-08 05:33:25	Gauteng		Yes I do	Solar		Pieter	employed individual
2022-07-08 05:31:46	Gauteng		Yes I do	Solar	Anything is better than we have now. Solar, nuclear, wind are all better than we have now	Caryn	employed individual
2022-07-08 05:31:38	Gauteng		Yes I do	Solar	In my view we should have the flexibility to generate from natural ways possible with least impact on environment. It should also be affordable and no t levied when it is natural	Annalize	employed individual
2022-07-08 05:31:10	Western Cape		Yes I do	Solar		Johann	employed individual
2022-07-08 05:30:59	Western Cape		Yes I do	Solar	Why is this even something open for debate with stage 6 load shedding? This country is facing a crisis way bigger than COVID because this will last for many years if it's not immediately addressed.	Wayne	employed individual
2022-07-08 05:30:46	Eastern Cape		Yes I do	Solar		Siyanda	employed individual
2022-07-08 05:30:41	Gauteng		Yes I do	Solar		Kevin	employed individual
2022-07-08 05:30:13	Eastern Cape		Yes I do	Solar	Solar and wind MUST be pushed forward NOW. This should have happened decades ago. This government has no idea how to get things done and no idea how to run a government. Any method at this stage, besides Nuclear, must be put in place even if it is a "short term" solution so this country is not plunged into darkness, literally.	robert	employed individual
2022-07-08 05:28:19	Eastern Cape		Yes I do	Solar	For South Africa, the best would be solar, wind and maybe even hydro. These are all natural resources that we can use.	Michelle	employed individual
2022-07-08 05:26:41	Western Cape		Yes I do	Solar	Solar is quick to install and South Africa has a lot of sunshine	Tjaart	employed individual
2022-07-08 05:26:25	Mpumalanga		Yes I do	Solar	In Mpumalanga we have so much sun ! Many private entities are already utilising its strength. Surely it is better to allow the private sector to help if ESKOM cannot provide what is needed!	Charlotte	employed individual
2022-07-08 05:24:24	Western Cape		Yes I do	Solar	We should have alternatives that is cost effective and a contingency for Eakom We cannot just be reliant on Eskom, with these ongoing issues It shouldn't been escalating to other options years ago already	Tracy	employed individual
2022-07-08 05:23:16	Free State		Yes I do	Solar	SA het oorgenoeg son en wind om elektrisiteit te genereer en tot die netwerk toe te voeg. Dan kan die invloed van die korrupte regering verminder word en die prys van krag kan meer bekostigbaar vir almal gemaak word.	Magda	employed individual
2022-07-08 05:23:13	Gauteng		Yes I do	Solar		Dave	employed individual
2022-07-08 05:14:19	Western Cape		Yes I do	Solar	We can't only have one power producer to rely on, government needs to stop using Eskom as a cash cow and give the country what it needs.	Vaughan	employed individual

2022-07-08 05:12:06	KwaZulu-Natal		Yes I do	Solar	Escom has not invested in the development of alternative sources of electricity since 1994. Now we are reaping the fruits of their greed. If we let other companies also produce electricity, there will be competition, which means escom will not hold the monopoly	Bernadette	employed individual
2022-07-08 05:11:44	Gauteng		Yes I do	Solar		Lina	employed individual
2022-07-08 05:06:27	Western Cape		Yes I do	Solar		Leigh-Anne	employed individual
2022-07-08 05:05:07	Free State		Yes I do	Solar		Johan	employed individual
2022-07-08 05:02:23	Gauteng		Yes I do	Solar	Even though coal is what the country has we need to transition towards clean energy and solar can be an easier faster option which can allow more players to participate sooner and help ease the damaging effects of persistent load shedding.	Esther	employed individual
2022-07-08 04:56:18	KwaZulu-Natal		Yes I do	Solar		Colleen	employed individual
2022-07-08 04:50:59	Western Cape		Yes I do	Solar		Vandana	employed individual
2022-07-08 04:48:10	Gauteng		Yes I do	Solar	Please allow individual owners to sell electricity back to the grid . You are not able to supply the current demand	Desire	employed individual
2022-07-08 04:43:59	Gauteng		Yes I do	Solar		Jean	employed individual
2022-07-08 04:11:56	Gauteng		Yes I do	Solar		Trevor	employed individual
2022-07-08 04:11:55	Gauteng		Yes I do	Solar		Trevor	employed individual
2022-07-08 03:48:37	Gauteng		Yes I do	Solar	We have immediate access to the sun and solar . Independent companies are ready and willing. The access just needs to be granted. Serving people's needs is what South African citizens employ the government to do and this as a solution, is a no brainer! This isnt an impossible problem to solve - let us!	Abby	employed individual
2022-07-08 03:17:43	Gauteng		Yes I do	Solar		Marina	employed individual
2022-07-08 03:06:51	Western Cape		Yes I do	Solar		Dewan	employed individual
2022-07-08 02:00:28	Western Cape		Yes I do	Solar		Derik	employed individual
2022-07-08 00:56:22	Free State		Yes I do	Solar	We have enough sun in South Africa to build a sustainable source for electricity. Wind turbines is also a option.	Rina	employed individual
2022-07-08 00:55:13	Free State		Yes I do	Solar	Everyone know that this government is a total failure... There is no turning back and no repair... Unfortunately, the poor is becoming poorer, as well as the wealthy. Only the very rich may survive. The economy is busy collapsing, but the government couldn't care less... I guess it's everyone for themselves...	Bertus	employed individual
2022-07-08 00:35:40	Gauteng		Yes I do	Solar		DELIA	employed individual
2022-07-07 22:58:00	Mpumalanga		Yes I do	Solar		Nsuku	employed individual
2022-07-07 22:43:31	Gauteng		Yes I do	Solar	We have a lot of sunshine in SA. Use it to carry SA during the day so the time can be used for maintenance and building up reserves until such time that Eskom is no longer required or can build a cleaner, sustainable and profitable solution. Also allow individuals to sell back into the grid so those willing to invest beyond their own needs can help us. If this means Eskom must die in the long run or become a energy manager rather than supplier for SA to survive so be it. Government should no longer be willing to carry SOEs once they are not a critical service anymore.	Cornel	employed individual
2022-07-07 22:38:51	Western Cape		Yes I do	Solar	We have enough sunshine and businesses with big roof for solar panels. The easiest to implement as well.	George	employed individual
2022-07-07 22:33:05	Free State		Yes I do	Solar	Let the private sector and the people help together to help the public sector	Gerhard	employed individual
2022-07-07 22:25:06	Western Cape		Yes I do	Solar	Its time to move on from our reliance on this ANC Government who are only concerned with getting rich. They have no desire to look after this country. They have destroyed this country in 28 years....they have decimated all that was built. They are incompetent and private companies should take over and supply our power needs.	Jackie	employed individual
2022-07-07 22:18:20	Northern Cape		Yes I do	Solar		Doreen	employed individual
2022-07-07 22:15:46	Gauteng		Yes I do	Solar	If government could impose emergency powers during the covid crisis, then emergency legislation can be enacted to improved our electricity supply in this crisis. Any supplier should immediately be allowed to supply electricity at not the grid.	Graham	employed individual
2022-07-07 22:12:54	Free State		Yes I do	Solar		Roeleen	employed individual
2022-07-07 22:07:15	Gauteng		Yes I do	Solar		Rosemary	employed individual
2022-07-07 21:56:39	KwaZulu-Natal		Yes I do	Solar		Debbie	employed individual
2022-07-07 21:47:03	KwaZulu-Natal		Yes I do	Solar		Debbie	employed individual
2022-07-07 21:46:56	Mpumalanga		Yes I do	Solar	Do whatever is necessary to get the power on again, fulltime	Gert	employed individual
2022-07-07 21:30:12	KwaZulu-Natal		Yes I do	Solar		Debbie	employed individual

2022-07-07 21:29:04	Gauteng		Yes I do	Solar		Piya	employed individual
2022-07-07 21:28:42	KwaZulu-Natal		Yes I do	Solar		Ashok	employed individual
2022-07-07 21:26:20	KwaZulu-Natal		Yes I do	Solar		Jeandre	employed individual
2022-07-07 21:18:55	Western Cape		Yes I do	Solar		Erick	employed individual
2022-07-07 21:15:23	Gauteng		Yes I do	Solar		Roland	employed individual
2022-07-07 21:13:43	Limpopo		Yes I do	Solar	We have a lot of sunshine, wich will make it feasable for solar to work, and CNG will work as well as there is a supply at much cheaper than LP , petrol, diesel or coal.	Douw	employed individual
2022-07-07 21:10:52	Western Cape		Yes I do	Solar	Stop fucking around with pokitical shit, we need electricity here are solar and wind farms that can supply Power. Get rod of your buddies and the power ships.	Willem	employed individual
2022-07-07 21:10:49	Western Cape		Yes I do	Solar	Stop fucking around with pokitical shit, we need electricity here are solar and wind farms that can supply Power. Get rod of your buddies and the power ships.	Willem	employed individual
2022-07-07 20:56:46	Western Cape		Yes I do	Solar	Sufficient research by large consumers has been achieved in order to implement solutions within months.	Gavin	employed individual
2022-07-07 20:56:10	Gauteng		Yes I do	Solar		Raymond	employed individual
2022-07-07 20:53:02	Limpopo		Yes I do	Solar		Catharina	employed individual
2022-07-07 20:46:43	Gauteng		Yes I do	Solar	Nuclear for long term, combined with solar and perhaps hydro electric.	Craig	employed individual
2022-07-07 20:43:48	Gauteng		Yes I do	Solar	Many independent producers make an excess of solar power that could have taken the strain off Eskom from years ago and helped it recover. This could all be hooked up to the grid and compensation plans sorted out in a matter of weeks with a modicum of competency and will. The president and ANC talk a lot about the "green agenda" yet never seem to do anything about, rather entertaining plans for nuclear and gas exploration, all while threatening future laws to punish those that turn to solar for what essentially boils down to pure vindictiveness for taking money away from state owned Eskom, although covered in a myriad of weak excuses and irrational explanations. Why should the business sector be restricted by anti-monopoly laws when the government blocks and forbids independent suppliers, and manipulates legislation to protect its own state owned enterprises from competition?	John	employed individual
2022-07-07 20:42:45	Gauteng		Yes I do	Solar		Neels	employed individual
2022-07-07 20:38:59	Gauteng		Yes I do	Solar			employed individual
2022-07-07 20:37:17	Western Cape		Yes I do	Solar		Inah	employed individual
2022-07-07 20:29:07	Western Cape		Yes I do	Solar	Whilst nuclear power is probably the most effective, it will take years to build sufficient capacity. Solar is a quick win, and with CSP used to heat molten salt this can be used as base load.	David	employed individual
2022-07-07 20:28:57	Western Cape		Yes I do	Solar		Paul	employed individual
2022-07-07 20:26:20	Gauteng		Yes I do	Solar		Julie	employed individual
2022-07-07 20:25:31	Western Cape		Yes I do	Solar	It is patently clear that we have reached an energy crisis state of emergency in this country and if nothing is done soon we will have a repeat of last years riots but much worse. The ANC better wake up or there will be nothing left to save.	Peter	employed individual
2022-07-07 20:24:34	Gauteng		Yes I do	Solar		Lezinda	employed individual
2022-07-07 20:14:48	Western Cape		Yes I do	Solar	All red tape, for all sustainable, renewable forms of energy generation, should be removed. The government knows it needs to happen but doesn't want a defunct, super-indebted eskom on its hands. The only thing, though, that the government should do is justly regulate pricing to the consumer, which should be vastly lowered compared to the current national average price. We have lots of sunshine, wind, and enough coastline to render eskom obsolete.	Lucienne	employed individual
2022-07-07 20:12:44	Western Cape		Yes I do	Solar	Allow household to sell back to the grid at a cost effective and simple way from their surplus solar.	Julius	employed individual
2022-07-07 20:02:19	Western Cape		Yes I do	Solar		Tami	employed individual
2022-07-07 20:00:33	Western Cape		Yes I do	Solar	The current load shedding is not conducive to livelihood or the economy not to mention foreign investment. We are in dire straits as a country. Government must stop trying to control everything as their incompetence is seriously highlighted!	Sandra	employed individual
2022-07-07 19:54:09	Gauteng		Yes I do	Solar		Shireen	employed individual
2022-07-07 19:44:18	Gauteng		Yes I do	Solar	We need anything legal that the ANC cannot pevert.	Steven	employed individual
2022-07-07 19:40:19	Gauteng		Yes I do	Solar	Solar energy is clean and efficient	David	employed individual
2022-07-07 19:26:46	Gauteng		Yes I do	Solar	There are so many wind farms and solar farms already established in South Africa. Why are we not using them??	Alexandra	employed individual

2022-07-07 19:24:36	Western Cape		Yes I do	Solar		Marzanne	employed individual
2022-07-07 19:22:46	Gauteng		Yes I do	Solar		Marius	employed individual
2022-07-07 19:17:17	Gauteng		Yes I do	Solar		Sune	employed individual
2022-10-04 22:40:05	Gauteng		Yes I do	Solar		Michael	employed individual
2022-09-26 20:42:44	Gauteng		Yes I do	Solar	The process of becoming an independent power producer should be revised to allow the process to be sped up drastically. We are in a time of crisis and we need to allow IPPs to come alongside Eskom to restore our nation's energy grid. Our country has an abundance of solar which we can use, but all available options should be explored.	Gerrie	employed individual
2022-09-23 21:38:04	Western Cape		Yes I do	Solar	We are a country blessed with adequate sunshine to enable every household to have solar generated energy. Having solar units installed should be made tax deductible to encourage as many households and business in SA to install them with no levies attached.	Gillian	employed individual
2022-09-23 11:42:29	Western Cape		Yes I do	Solar	Solar is immediately available, free, sustainable, abundant, green. It must however be left to the private sector to develop and implement unhindered, no red tape, no excessive licensing, and no interference from corrupt government officials who just want to get their hands on huge tenders to benefit themselves and their friends and families.	Dietrich	employed individual
2022-09-22 14:11:41	North West		Yes I do	Solar	The technology for this already exists for example tes.pods produced by a swedish company that offer innovative storage of energy obtained from solar.	Anine	employed individual
2022-09-19 09:47:18	Free State		Yes I do	Solar	I am a Government official and since their is the constant threat of the pension fund be utilised for all kinds of lifebouy's for sinking ships in our country I propose that Government officials are allowed access to our pension fund lumbsums to procure solar energy. So only if you can provide proof that it will be utilised for such purpose will it then be made available to officials. This will stimulate the economy and ease the pressures on Eskom. Interest free loans for solar will also motivate other citizens.	Louis	employed individual
2022-09-17 17:30:39	Western Cape		Yes I do	Solar		Ane	employed individual
2022-09-15 17:19:13	Gauteng		Yes I do	Solar		Dawid	employed individual
2022-09-15 10:31:57	KwaZulu- Natal		Yes I do	Solar	I'm installing solar next week because it is an immediate to 10 year solution to Eskom's load-shedding and price increases. I would like to see other competitors in the market because competition is always good in any industry. Utilising other resources for energy and finding the most cost effective, environmentally friendly and long term resource is definitely a must going forward. We need to strive to research, improve , assess and repeat.	Renata	employed individual
2022-09-15 07:00:50	Gauteng		Yes I do	Solar	There should be an overlapping myriad of renewable energy generators, with a few traditional coal plants that are used purely as back up and hardly ever run. You cant block other producers to maintain an illegal monopoly, but also fail to provide electricity at the same time. It doesnt work like that. If you are going to be top dog you need to work for that spot, not leave us in darkness half the year.	Katherine	employed individual
2022-09-13 09:56:45	KwaZulu- Natal		Yes I do	Solar	A combination of solar and wind would be ideal	Sharnelle	employed individual
2022-09-10 16:43:06	Western Cape		Yes I do	Solar	The more utilities we remove for the ANC's control, the better for all of us.	Herbert	employed individual
2022-09-09 23:55:18	Western Cape		Yes I do	Solar	The immediate and short term need is to install solar, wind and hydro with wave technology as an option as well. Gas should be a last resort, as well as coal power producers. Nuclear power generation is the best long term solution as a base load facility, small nuclear reactors are still in its infancy stages. Unfortunately the financial investments for nuclear power generation has been and are still being swindled by the current government due to mismanagement of the public purse, rather gambling with South Africa's future. South Africa are on the brink of economic collapse which is eminent in the next two year's.	Findley	employed individual
2022-09-08 10:10:21	Western Cape		Yes I do	Solar	Let's make use of our natural resources and stop pouring so much money into a SOE.	Natalie	employed individual
2022-09-08 09:53:35	Gauteng		Yes I do	Solar	Any renewable energy infact all must be explored and making sure we are not damaging our planet. Eskom failed no more money for them they must work with what they have or executives must take massive pay cuts for under performance to get these monies they keep taking from us but zero results....you know checks and balances or step aside completely. Bring all the competitors and go with best and safe Power Providers notice the plural....	Yve	employed individual
2022-09-07 18:21:41	Gauteng		Yes I do	Solar		Paul	employed individual
2022-09-07 14:15:20	Eastern Cape		Yes I do	Solar		brent	employed individual
2022-09-07 08:36:55	Western Cape		Yes I do	Solar	Eskom has held the monopoly in supply for far too long and are unable to deliver on the demand. It's time to allow free enterprise as they are incompetent to supply a basic human right as set out in our democratic constitution	Riana	employed individual
2022-09-06 18:26:18	Western Cape		Yes I do	Solar		Irene	employed individual
2022-09-06 17:06:57	Western Cape		Yes I do	Solar		Shafiek	employed individual

2022-09-06 15:29:40	Gauteng		Yes I do	Solar	Solar and wind power could be plentiful in SA and should be put to use immediately.	Merle	employed individual
2022-09-05 13:10:44	Gauteng		Yes I do	Solar		Meagan	employed individual
2022-09-05 10:39:48	Western Cape		Yes I do	Solar	Both solar and wind power are plentiful in SA and should be put to use immediately.	Colleen	employed individual
2022-09-05 04:30:41	Mpumalanga		Yes I do	Solar	Solar, wind and hydro is the way of the future.	Jan	employed individual
2022-09-03 06:57:03	Gauteng		Yes I do	Solar	Allow citizens to instal solar without prejudice, (being charged more for using solar). Extra energy can be fed into Eskom's grid. The the free loaders can continue to get free electricity .	Claudia	employed individual
2022-08-30 20:43:46	Gauteng		Yes I do	Solar		Louis	employed individual
2022-08-30 11:15:24	Gauteng		Yes I do	Solar	We have an abundance of solar energy to harvest - something that most European countries would dream of having. Let's make use of this resource.	Sergio	employed individual
2022-08-29 07:34:19	Gauteng		Yes I do	Solar	Absolutely let the private sector step in to save the day. We have one power producer who are corrupt and unreliable. Our power grid is so unstable and NERSA just wants more and more money to NOT maintain infrastructure. I honestly don't care which method is used. Just give us more options - spread the burden of electricity supply. Do it ASAP	Nadine	employed individual
2022-08-26 17:12:40	Western Cape		Yes I do	Solar	Primarily, solar is a great energy capturing method and if we had private entities providing electricity, it would create better competition and reduce these costs dramatically (Eskom already wants another increase when they are falling apart and not providing this service). This goes to show what happens with state run services that are vital for the economy.	Greg	employed individual
2022-08-26 05:38:07	KwaZulu-Natal		Yes I do	Solar	We need extra sources of electricity. here in South Africa we have a lot of sun so solar is a good alternative and excess electricity can be sold to Eskom to use for other households.	Liesl	employed individual
2022-08-24 14:00:38	Gauteng		Yes I do	Solar		Sam	employed individual
2022-08-21 19:00:29	Gauteng		Yes I do	Solar	All types of renewable power should be pursued. Home owners should also be allowed to sell excess power generated by solar panels back to the grid, this will help reduce load shedding.	Neil	employed individual
2022-08-20 12:08:25	Western Cape		Yes I do	Solar		Irina	employed individual
2022-08-20 10:01:32	Gauteng		Yes I do	Solar	We need immediate intervention to solve our power issues.	Jurgens	employed individual
2022-08-19 19:13:31	Western Cape		Yes I do	Solar	Households businesses should be able to feed back into the grid. Solar wind gas hydro any natural sources should be encouraged.	Pamela	employed individual
2022-08-19 11:54:17	Western Cape		Yes I do	Solar	Solar alone won't solve the problem, if most households that can afford to buy solar can sell power back to the grid that could limit/prevent loadshedding in the short term. There should be no "fee" that you have to pay to eskom for doing this, eskom didn't pay for your solar setup. You can sell your power to eskom at a reasonable price, same as eskom asks you to pay a reasonable price. Fair is fair. Midterm, lower consumption through using more energy effiecient appliances, educate people on using less electricity. Government can subsidize solar installations, changing electrical geysers to Gas geysers etc etc Longterm, each province in SA might need to generate their own power and be sustainable with the ability to send power to other provinces, each province will need to see which method of generation is best suited for their needs.	Arno	employed individual
2022-08-19 07:53:04	Gauteng		Yes I do	Solar		Reynard Johan	employed individual
2022-08-18 08:29:10	KwaZulu-Natal		Yes I do	Solar	It's time for alternatives as Eskom is clearly failing to address the power problem in South Africa. It's a disgrace.	Terry	employed individual
2022-08-17 17:50:44	Western Cape		Yes I do	Solar	Solar has reach the point where it has become affordable enough for all those who are serious about power to invest into it for generation on a personal capacity. This is not only limited to individuals, but if you fly over the country, you will see most shopping centers and commercial buildings also have solar and are generating power. There does not need to be any big investment in additional power generation when the public is willing to do it themselves, now we just need to let the members of public that are more well off help those that still rely on the grid.	Tristan	employed individual
2022-08-16 19:03:48	Gauteng		Yes I do	Solar	Allow everyone to generate as much electricity as needed and use the eskom grid.	Chani	employed individual
2022-08-11 11:13:05	Gauteng		Yes I do	Solar	Sun power is under utilised and excessively expense in South Africa. The government should implement subsidies for private solar installations that reduce the need for coal power. These private solar installation can feed excess power back to the grid and be banked against future coal usage or returned in cash backs.	Jacques	employed individual

2022-08-10 09:32:57	Western Cape		Yes I do	Solar	I believe that the red tape should be reduced or scrapped provided there are reasonable policies and systems in place to reduce the drain on the current infrastructure. Government needs to accept that independent power producers have a future in SA and working with them as apposed to seeing them as competition will be beneficial to all. Consistently changing regulations to make compliance difficult confuses everyone, including the administrative authorities and further hampers progress.	Bernard	employed individual
2022-08-09 20:30:51	Gauteng		Yes I do	Solar		Zakhiya	employed individual
2022-08-09 08:40:17	North West		Yes I do	Solar	Any form of renewable energy will add an advantage.	Alfred	employed individual
2022-08-09 07:39:51	Western Cape		Yes I do	Solar	A study at Standford University, headed by Professor Mark Z. Jacobson, professor of civil and environmental engineering at Stanford University and director of its Atmosphere/Energy Program found that the world can switch to 100% Renewable Energy and earn back its investment in just 6 years. South Africa has an abundance of solar and wind which can be brought online in less than two years.	Olivia	employed individual
2022-08-08 17:00:49	Western Cape		Yes I do	Solar		Cathy	employed individual
2022-08-08 09:06:11	KwaZulu- Natal		Yes I do	Solar		Tristan	employed individual
2022-08-08 00:04:49	Mpumal anga		Yes I do	Solar	There are already a number of private wind and solar production farms around the country and the development of both of these should be funded and encouraged to take the pressure off the fossil fuel power production.	Jacqueline	employed individual
2022-08-07 20:54:35	Western Cape		Yes I do	Solar		Jeunesse	employed individual
2022-08-07 19:43:34	Gauteng		Yes I do	Solar		Karien	employed individual
2022-08-07 16:44:49	Limpopo		Yes I do	Solar		Vashti	employed individual

2022-08-04 06:33:15	Gauteng		Yes I do	Solar		Brian	employed individual
2022-08-04 06:23:15	Gauteng		Yes I do	Solar	There needs to be a hybrid system of government, private and individual power generation, all feeding to a grid built by eskom and maintained by many different vedors on a Uber - type business model. Some manufacturing plants are already generating excess electricity and havent been allowed to push it into the grid because "eskom needs top maintain its monopoly and independent power is racist". I know this because BMW in Pretoria had this issue 10 years ago.	Katherine	employed individual
2022-08-03 22:52:54	Eastern Cape		Yes I do	Solar	A hybrid system of wind and solar would solve our problems.	Susie	employed individual
2022-08-03 21:41:41	Mpumalanga		Yes I do	Solar	The sun is free. house holds can be used to generate electricity for them self's and feed back into the grit at a fee we been invoiced. green power.	coenraad	employed individual
2022-08-03 20:54:48	Western Cape		Yes I do	Solar		Maria	employed individual
2022-08-03 20:19:10	Gauteng		Yes I do	Solar	We should only invest in renewables. And as soon as possible. Have we learnt NOTHING from the current climate crisis? We cannot continue to invest and explore trends that harm the earth, for short- and even medium-term goals. Because of the country's geographic location, it receives large amounts of solar energy. According to data from the World Bank Group, South Africa receives 6-8 kWh/m ² , which is among some of the highest in the world, making this an ideal location to utilise the infinite power of the sun. The use of solar energy in South Africa is driving the use of other renewable energy sources including wind, hydroelectric, and biomass. These are the areas we need to explore, NOT other non-renewable options.	Estie	employed individual
2022-08-03 19:50:48	Gauteng		Yes I do	Solar	Solar power is the most environmentally friendly method to generating energy however it's expensive to setup. The generation cost of solar decreased through the years however independent power producers may be tempted to charge exorbitant rates thus making it unaffordable or impractical to resolve our shortage. The fact that independent power producers will mainly be white owned companies which will further the economic gap between the indigenous people	Sehloho	employed individual
2022-08-03 19:37:46	Gauteng		Yes I do	Solar		Tumi	employed individual
2022-08-03 19:12:57	Mpumalanga		Yes I do	Solar		Andrew	employed individual
2022-08-03 17:36:14	KwaZulu-Natal		Yes I do	Solar	We have a surplus of free sun. Rather spend money on implementing long term solutions than continue with regular payment for short term and unreliable resources	Abby	employed individual
2022-08-03 16:20:07	KwaZulu-Natal		Yes I do	Solar	Eskom has the monopoly and can be badly managed with little maintenance and hefty electricity tariff increases and the public is at their mercy.	Janine	employed individual
2022-08-03 15:37:45	Gauteng		Yes I do	Solar		werner	employed individual
2022-08-03 15:24:32	Gauteng		Yes I do	Solar		Jaun	employed individual
2022-08-03 15:11:02	Western Cape		Yes I do	Solar	We need to diversify our electricity production and move towards smaller and more local supply grids. Having a monopoly has not worked, it is time to open the playing field and get everyone on board.	Louisa	employed individual
2022-08-03 14:57:41	Gauteng		Yes I do	Solar	This should be opened to every citizen. The only requirement should be an electrical compliance certificate. If I'm prepared to lay out the capital and feed unused power to the grid at a predetermined rate why should the government be allowed to block it.	André	employed individual
2022-08-03 14:50:27	KwaZulu-Natal		Yes I do	Solar	Solar, wind Hydro	Tussie	employed individual
2022-08-03 14:42:23	Western Cape		Yes I do	Solar		Dave	employed individual
2022-08-03 14:06:41	Gauteng		Yes I do	Solar		Stephen	employed individual
2022-08-03 14:00:44	Western Cape		Yes I do	Solar	Sun is one thing we have plenty of. Initial cost of setup would be great but it is renewable unlike the limited supply of coal or gas. Much solar production already exists. Wind and hydro power would be good as stage 2 and 3 to back up solar power as we also have plenty of those (given the hydro refers to sea water). This industry should be privately owned to create more jobs and healthy competition. Government should stick to governing and not power supply or education or health services. Ideally these are the domain of the church / community/ enterprise.	Jayne	employed individual
2022-08-03 13:30:34	Gauteng		Yes I do	Solar	We have more than enough sun and open spaces in our country with private individuals and companies ready to step in and fill the need in an economic viable manner. Enough of the Govt and Eskom controlling our Economy.	Erika	employed individual
2022-08-03 12:35:38	Gauteng		Yes I do	Solar	Solar primarily, but also wind.	Shaun	employed individual
2022-08-03 12:32:16	Western Cape		Yes I do	Solar		Cindy	employed individual

2022-08-03 10:02:19	Gauteng	Yes I do	Solar	I believe we need to allow power producers other than Eskom, which has become a useless entity, to assist with electricity production. Immediate power could be supplied by solar, and we could build nuclear but by the best country NOT Russia or China because they are SA's "friends". They are great at offering to help Our government needs to learn they are not our friends and will do mediocre work leading to spills and too much waste. Wind turbines kill birds if they are built in flight paths or migration paths. Unfortunately the great company that Eskom was, is no more. To keep business alive and make South Africa open for business we need power on which we can rely.	Virginia	employed individual
2022-08-03 09:27:47	Gauteng	Yes I do	Solar	Have all and everyone become both producers and consumers. Regulation on power production should not be limited to a few monopolized legal entities	Philip	employed individual
2022-08-03 08:35:21	KwaZulu-Natal	Yes I do	Solar	All new buildings should be fitted with solar panels. Existing property owners should be offered rebates to encourage the installation of solar panels. All street lights should operate off solar panels. Is this too difficult to implement?	Marguerite	employed individual
2022-08-03 07:17:46	Gauteng	Yes I do	Solar	Eskom should subsidise solar systems for houses, or pay an incentive for houses already taking the strain off the grid by using their own solar produced electricity. 15 years ago Eskom subsidised solar geysers. Why did that stop?	Hein	employed individual
2022-08-03 07:15:08	Gauteng	Yes I do	Solar	In a country known for great sunny weather, it makes sense to explore more environmentally friendly solutions. Wind and hydro are options we should be keen on exploring as well.	Dewald	employed individual

2022-08-02 09:44:20	Western Cape	Yes I do	Solar	Renewable energy is the future. ESKOM is a complete failure. STOP controlling.	Piet	employed individual
2022-08-02 09:34:47	Free State	Yes I do	Solar	Solar energy will last as long as the sun is here with us as opposed to all the natural gas and other energy exploited from earth.	Peter	employed individual
2022-08-02 09:31:03	Gauteng	Yes I do	Solar	Solar would be the quickest way to proceed with regard to the implementation thereof at short notice.	Gillian	employed individual
2022-08-02 08:53:02	Eastern Cape	Yes I do	Solar	As long as we are not locked into any long-term debt and exorbitant costs with Karpowerships or nuclear deals, any solutions should be on the table. My question is why we have got to this crisis - this has been a huge problem for years !!!!!	Janice	employed individual
2022-08-02 08:06:21	Gauteng	Yes I do	Solar		Piya	employed individual
2022-08-02 07:36:50	North West	Yes I do	Solar	The African National Cadres must pass the bill to immediately offer alternative sources of electricity. The red tape should have been lifted long ago. The red tape only creates more avenues of corruption and bribery for the cadres to exploit. Gwede Mantshase should please stuff his idiotic proposal on Eskom 2.0. Eskom cannot be run effectively, how can a second cadre-captured organisation overcome the issues? Govt should incentivise its citizens to also make use of their own infrastructure.	D	employed individual
2022-08-02 07:04:34	Gauteng	Yes I do	Solar	We have sun 99% of every day, why not use what God has given us to survive??	Marilyn	employed individual
2022-08-02 07:01:20	Gauteng	Yes I do	Solar	IPP's are part of the solution, but I feel government should be encouraging the public to procure as much of their own renewable power as possible. Government should be providing massive rebates and discounts for the public to install their own solar systems. Interest free loans and tax rebates would be a good start. IPP's should be supporting business to encourage growth of the Economy.	James	employed individual
2022-08-02 06:45:48	Gauteng	Yes I do	Solar		Annemarie	employed individual
2022-08-01 22:45:46	Eastern Cape	Yes I do	Solar		Lawrence	employed individual

2022-08-01 22:36:04	Gauteng		Yes I do	Solar		Henry	employed individual
2022-08-01 22:17:58	Eastern Cape		Yes I do	Solar		Lauren	employed individual
2022-08-01 21:42:39	Gauteng		Yes I do	Solar	The current government has rendered itself ineffective to render basic services. Nobody is held accountable. The most deficient one is electricity. 28 years of nothingness and total decline.	Lynn	employed individual
2022-08-01 21:17:21	Gauteng		Yes I do	Solar		Stephen	employed individual
2022-08-01 21:13:56	Mpumalanga		Yes I do	Solar	This red tape policy needs to be scraped in order for more independent power producers to start supplying South Africa with alternative power. Bring the cost of electricity down which will enable the consumers to further assist by installing solar to help lighten the strain.	Yolandi	employed individual
2022-08-01 20:33:58	Western Cape		Yes I do	Solar		Calantha	employed individual
2022-08-01 18:50:01	Western Cape		Yes I do	Solar	No need for any motivation.	Louis	employed individual
2022-08-01 18:14:48	Gauteng		Yes I do	Solar		Johann	employed individual
2022-08-01 17:59:37	Eastern Cape		Yes I do	Solar	Solar will be good as we have sun most of the time. Maybe wind in areas that often have wind(coast)	Cindy	employed individual
2022-08-01 14:17:38	Limpopo		Yes I do	Solar	Put solar panels on as many roofs as possible. It doesn't take up additional space and can easily be tied to the grid with small changes to the electrical infrastructure at municipal level. Legislation will have to be adopted to facilitate feeding electricity back into the grid so that consumers are protected against unscrupulous municipalities and proper rates are set. The entire Nersa application process needs to be scrapped. It serves no purpose other than to create bureaucracy and bottle necks. Legislation may be required for governing industry standards/quality/safety etc. for those wishing to enter the generation sphere but the only application process should be to Eskom for a connection to the grid.	Johan	employed individual
2022-08-01 14:00:40	Western Cape		Yes I do	Solar		Jennifer	employed individual
2022-08-01 11:50:43	Western Cape		Yes I do	Solar	We need nuclear and solar.	Jean-Michel	employed individual
2022-08-01 10:33:53	Eastern Cape		Yes I do	Solar		Leona	employed individual
2022-08-01 10:32:07	Mpumalanga		Yes I do	Solar	Allowing private providers to feed the grid with electricity will be a good way BUT no politicians may be the providers. They will again use it for self-enrichment and if it is the current political party that get the go ahead to produce, they will have SA citizens at the short hair. Meaning, If you don't vote for "us" we will just cut, or not give your electricity or make it so expensive that they walk away with a big vat wallet. As is we, South Africans, can not afford Rates and Taxes for a sustainable life. MAINTENANCE is the KEY factor here. You cannot drive a motorcar for ever without servicing it. Nothing on this earth will last, it can last longer if maintenance is done. This is a very critical decision and deep and thorough analyses must be made. We want SA to prosper not sitting on a dump with no water, electricity or anything that can my heat. We don't want to go back into the dark ages	c	employed individual
2022-08-01 10:18:18	Limpopo		Yes I do	Solar		Susan	employed individual
2022-08-01 09:57:13	Western Cape		Yes I do	Solar		Adine	employed individual
2022-08-01 09:24:39	KwaZulu-Natal		Yes I do	Solar	We are currently paying for a service that is unreliable and inconsistent. The fact is that Eskom is producing/supplying less electricity and still charging the full amount on our bills. They then want to increase the price on a diminishing supply. Please stop making fools of us and remove the red tape regulations preventing clean solar power...	Donavon	employed individual
2022-08-01 09:06:13	Western Cape		Yes I do	Solar		Johan	employed individual
2022-08-01 08:32:30	North West		Yes I do	Solar		Simon	employed individual
2022-08-01 08:30:07	Gauteng		Yes I do	Solar	All forms of power generation, with exception to solar, is too complex and requires too much approval for fast construction and operationalisation. IPP's should be allowed to enter the market RIGHT NOW, because Eskom is no longer effective.	Alain	employed individual
2022-08-01 08:22:05	KwaZulu-Natal		Yes I do	Solar		sean	employed individual
2022-08-01 08:14:11	Western Cape		Yes I do	Solar	I think all feasible energy generation that doesn't harm the planet should be used.	Cheryl	employed individual

2022-07-26 16:29:39	Gauteng		Yes I do	Solar	At this stage solar is the best offer then escom must subsidise the panels for home use and not charge the home owner the R900 they propose	Gerrit	employed individual

2022-07-26 16:29:11	Gauteng	Yes I do	Solar	<p>Although I am all for more independent Power Producers I do not want more Nuclear power plants in South Africa as the one in Japan is still burning after nearly 20 years.</p> <p>It is time we realise that ESCOM is not capable and would propably never be capable again to supply the growing needs of South Africa and all the other countries we are currenty supplying engery to with electricity.</p> <p>Competition can only be good. It will keep prices and service delivery in check and give the consumer the opportunity to decide who is the best.</p> <p>Government should start to look after the people of South Africa as these people are paying taxes and keeping the economy standing.</p> <p>For nearly 20 years government has bailed out ESCOM with losses to the taxpayer and no better or constent electricity supply.</p> <p>ESCOM should face the inevitable that it is now where Telkom was so many years ago - if you don't change then somebody else will take your job.</p>	Tanja	employed individual
2022-07-26 13:48:39	Gauteng	Yes I do	Solar	No need to re-invent the wheel. Government just needs to get out of the way.	Sibu	employed individual
2022-07-26 09:19:13	Eastern Cape	Yes I do	Solar	<p>Solar can be installed on existing structures. Instead of robbing the public, employment opportunities can be created. Parliament members and the presidency must take a 3% cut in salary (not an increase) to fund a Solar scheme as this energy power disaster is due to a mismanagement on their side. People are funding their own power and water supply due to the incompetence of government, yet government want to continue bleeding the public into financial poverty. In this situation the government keeps the public on it's knees, just like hostages to their demands.</p>	Lorri	employed individual
2022-07-26 08:54:45	Gauteng	Yes I do	Solar	<p>With covid impacting our lives readily and prevent many of us from working at an office, many companies have changed their methods, making most of the staff work from home and down sizing their office spaces to save on costs.</p> <p>Loadshedding impacts working from home, things like generators and ups's are in their own right costly and expensive, not easily affordable to most people. Even more so now that the cost of living is going up everywhere. Food, medicine, clothing, petrol have all seen drastic price increases over the last 2 years, making already tight budgets even tighter.</p> <p>Allowing alternative power suppliers can lighten the load, allow eskom the time to fix the broken stations and allow us to be free from loadshedding.</p> <p>Renewable resources, are the best way to go, so that we don't end up tied into dealings with other countries, or have a disaster such as a nuclear power plant exploding. It is safe, and we get a lot of sun and wind in our lovely country. It may be costly to set up, but in the long run, it will be a better solution.</p> <p>Alternative power sources also allow for a higher ability to sell electricity to neighbouring countries.</p>	Cleo	employed individual

2022-07-25 15:12:28	Gauteng	Yes I do	Solar	<p>There are companies currently giving options where you can rent Solar Power Units for a fixed price (GoSolr)</p> <p>This is a good thing as most South-Africans like myself cannot afford a once off cost to Install Solar Power.</p> <p>Best of all - Its a fixed Fee - No surprise at month end.</p> <p>But that will only work if Escom does not hike the Fixed Charge rate for people opting for other means of electricity generation and if the monthly fee does not escalate out of control.</p> <p>I have to ask Why do Escom not give the same service ?? That way we are still tied to the gird and Escom does not loose the income. The more households that are offered a fixed rental system to generate and store electricity, the less reliant we will be on the old coal generation - BUT that would mean, less trucks to run up and down with coal, less water trucks to keep the coal damp, less tenders ... less jobs.</p> <p>But it would mean, less power cuts and frankly, if another supplier steps in, there wont be a monopoly power supplier with no competition in relation to service and price.</p>	Ria	employed individual
2022-07-25 14:49:36	Western Cape	Yes I do	Solar	Hydro, solar and wind is in abundance. This is the only long term sustainable solution. Renewable energy is the future.	Nigel	employed individual
2022-07-25 14:19:43	Western Cape	Yes I do	Solar	<p>Solar Power would be most suitable for now, as it is most cost effective and easier to install.</p> <p>Independent Power producers would be able to speed up processes as well, as long as capping and tabs are being kept on all involved, with regard to pricing, quality, etc.</p> <p>It is ludicrous that people who are already living under the bread line would have to pay R900 for no service rendered.</p>	Xander	employed individual
2022-07-25 12:37:02	Free State	Yes I do	Solar	I support the privatisation of power production, in favour of solar power (and other renewable sources) in combination with convetional coal for the interim.	Schabort	employed individual

2022-07-25 11:56:44	Gauteng		Yes I do	Solar	Solar Power would be the best for now, as it is more cost effective and easier to install. Independent Power producers would be able to speed up processes.	Leandra	employed individual
2022-07-25 11:11:30	Western Cape		Yes I do	Solar	We do need to look at renewable energy that is affordable to everyone , not government pockets to benifet them in anyway. To do away with the load shedding that harm every single person , stop cable theft stealing electricy as well. If you want you must pay for it.	Leigh	employed individual
2022-07-25 09:24:33	Western Cape		Yes I do	Solar		Lucgmaan	business owner

2022-07-21 20:02:52	Western Cape		Yes I do	Solar	Solar is ready to roll out far quicker as an already existing solution, just do not penalise us for taking our own destiny into our own hands. In the long term Nuclear is the most enviromentally safe option next to Solar.	Richard	business owner
2022-07-21 19:57:40	Free State		Yes I do	Solar	SA's sunshine provide excellent oppertunity for cheaper energy	Marian	business owner
2022-07-21 19:49:31	Gauteng		Yes I do	Solar	private persons and enterprises actions can be immediate and without redtape , more effective and self cost controlled. there should be a funding system for people that wants to use alternative power sources.	Francesco	business owner
2022-07-21 19:25:15	Limpopo		Yes I do	Solar	If your supplier does not perform in their duties or supply what you pay for then you find an alternative vendor All south africans deserve better. Polititians were chosen by citizens ,time to do their duties	Leon	business owner
2022-07-21 17:49:12	Outside SA	portugal	Yes I do	Solar	If Eskom cannot provide then the alternative suppliers should be able to fill the gap.	Owen	business owner
2022-07-21 17:28:22	Western Cape		Yes I do	Solar	At a time like this where our economy is facing huge peril due to our inability to keep the lights on, the government cannot, and should not, look to impede the development of our country and the growth of the economy by continuing to support outdated method of generation and business practices. The rest of the world is on a fast track to renewables and more environmentally friendly forms of generation and we should be doing the same. We are blessed with an abundance of both sun and wind and private enterprise has already shown a willingness to develop at their cost and put back into the grid - only to be thwarted by the illogical and outdated red tape and bureaucracy by people and departments who have shown themselves to be unable to resolve the issues that they face or even provide viable alternatives	Iain	business owner
2022-07-21 16:08:20	Gauteng		Yes I do	Solar		Nafissa	business owner
2022-07-21 13:34:00	KwaZulu-Natal		Yes I do	Solar		Colleen	business owner

2022-07-21 12:53:09	Gauteng	Yes I do	Solar	South Africa is blessed with a high number of sunny days, which solar energy the logical choice: 1. Setting up a solar plant is fairly fast and therefore it would be a quick remedy to the current shortage of power if the red tape is removed and thus allowing private investors to fill the gap. 2. After the initial capital cost of setting up a solar plant the operational costs are minimal as the energy source is for free for ever. 3. Unlike for example a coal fire power station, which ideally is located close to a coal mine, solar power plants can be located anywhere and therefore close to where the energy will be consumed. 4. Resolving the power crisis will allow the economy to grow and thus it will also have a positive impact on the unemployment crisis.	Heiko	business owner
2022-07-21 12:02:58	Eastern Cape	Yes I do	Solar	If for example one fifth of power currently used is substituted for renewable energy, then the probability of load shedding would reduce by one fifth. So any reduction of power used from the grid would be an enormous benefit to the generating shortfall capacity of Eskom in the short term.	William	business owner
2022-07-21 06:42:01	Gauteng	Yes I do	Solar		Amanda	business owner
2022-07-20 15:16:50	Western Cape	Yes I do	Solar	The sun, always there, always available. Will be great if fully functional municipalities like ours could generate their own electricity with the help of private homeowners putting their excess in the grid.	Rita	business owner
2022-07-20 14:07:01	Western Cape	Yes I do	Solar	Although solar and wind generation still require other fuel supplied electricity for the continious baseload, it is available at a low cost and reliable supply during sunlight hours when the load of industry and commerce is the highest. Emergency fuel such as diesel can thus be saved and systems as the Tugela can be more optimised. We need to broaden our suppliers.	Charl	business owner
2022-07-20 12:39:25	Gauteng	Yes I do	Solar	Solar is readily available and the technology is well understood. Many small producers can contribute.	Willem	business owner
2022-07-20 09:23:45	Western Cape	Yes I do	Solar	Solar and wind power should be a priority	Bee	business owner
2022-07-20 09:20:53	Western Cape	Yes I do	Solar	i understand that rooftop solar panels aren't the immediate solution, and since we're in an energy crisis it may be coal and gas. but short term thinking is the curse of the planet, especially africa. getting south africans to feed the grid from our rooftops could become a priority if we focus on it.	dave	business owner
2022-07-20 06:35:45	North West	Yes I do	Solar		Kobus	business owner
2022-07-19 11:55:54	Western Cape	Yes I do	Solar		Annelize	business owner
2022-07-19 10:51:28	Western Cape	Yes I do	Solar	Eskom used to be a Nonprofit power production for the country, each and every family is fighting its own battle. We are now in a situation where our incomes don't change however everything else does. Food has gone up, transport has gone up, loadshedding has gone up, theft of car parts and crime has gone up! Now we make alternate power plans to keep our families life support online so that our family members don't die and you want to punish us for doing so? I don't think so.	Julie	business owner
2022-07-19 10:45:12	Gauteng	Yes I do	Solar	SA's populace needs to distance itself from thinking that an ESKOM monopoly is a good thing, even if the management brought the power producer to 100% efficiency and stability. There is too much of a risk to the public consumer and businesses. We need competition from different power providers. So that we get competitive pricing, efficiency and service. Eskom is a couple of billion in the red. Surely they will need to recover this? So now we are sitting with a single power provider, that hasn't really got the money when it comes to maintenance and it still needs to implement the move to green energy, i.e. less coal burning power stations. Where is this money going to come from? Well, you and I, the consumers. With increased yearly tariffs. What do you think the repercussion to businesses and unemployment figures is going to be. Remember private (small/ large) companies provide +-95% employment to SA's citizens.	Victor	business owner
2022-07-19 08:22:06	Gauteng	Yes I do	Solar	Although Solar might not be the most efficient and environmentally friendly it is available in South Africa, most businesses and households are already using it. Eskom has failed and is probably beyond repair. Private companies are far more motivated and capable of producing and supplying us with electricity . In a long run May be nuclear and hydro power will be more practical.	Victoria	business owner
2022-07-18 20:51:25	Gauteng	Yes I do	Solar	Most days the sun shines so solar is the way to go. This will also assist with the global warming situation which is getting worse every year.	Lynn	business owner
2022-07-18 19:34:28	Mpumalanga	Yes I do	Solar		William	business owner
2022-07-18 17:44:33	Western Cape	Yes I do	Solar	The Vietnam precedent clearly illustrates how quickly we can get out of this mess if gov't takes the solar route ...	Angela	business owner
2022-07-18 17:27:38	Western Cape	Yes I do	Solar		Elizabeth	business owner
2022-07-18 16:15:26	Gauteng	Yes I do	Solar		Paul	business owner

2022-07-18 15:31:44	Gauteng	Yes I do	Solar	<p>Coal and Diesel are expensive and DIRTY, so not an option.</p> <p>Gas not an immediate/short term solution, would require pipelines, also not really a clean nor immediate/short term solution.</p> <p>Hydro might be environmentally a good choice, but in an arid country not sure where it can/should be implemented. Even if possible, likely not an immediate term solution.</p> <p>Nuclear, as a country we cannot afford the build cost, do not have the skills to implement or operate, and our government is too corrupt to handle a project of this scale. Also not a short/immediate term solution.</p> <p>Wind is a possibility but is geographically restricted based on prevailing wind patterns.</p>	André	business owner
2022-07-18 15:05:06	Western Cape	Yes I do	Solar		Alex	business owner
2022-07-18 13:49:33	Gauteng	Yes I do	Solar		Arrie	business owner
2022-07-18 13:23:23	Gauteng	Yes I do	Solar	<p>There have already been investments in Solar - that were waiting for approval to augment the requirements.</p> <p>Senseless delaying is costing this country what it cannot afford. It is crippling industry.</p>	Glynn	business owner
2022-07-18 13:23:21	Gauteng	Yes I do	Solar	<p>There have already been investments in Solar - that were waiting for approval to augment the requirements.</p> <p>Senseless delaying is costing this country what it cannot afford. It is crippling industry.</p>	Glynn	business owner
2022-07-18 12:50:47	Gauteng	Yes I do	Solar	<p>South Africa must take advantage of the sunlight. Solar has evolved and become extremely viable. Wind farms will also work in many regions.</p> <p>Individual households must be able to substitute the municipal supply of electricity with solar to run essential equipment for example security alarm and camera systems and keep the fiber and computers running. We should not be taxed, fined or restricted. Our security and lives are compromised every time the power goes off. Why must we not use our own solar panels to benefit our security and emergency needs, and why should the government even entertain the idea to tax or charge a penalty fee for such. They should rather be grateful that we take the pressure off the grid.</p>	Wendy	business owner
2022-07-18 11:42:51	Gauteng	Yes I do	Solar	<p>South Africa are blessed with sun, that shines nearly every day, and wind. It's there, it's free. We can't abuse it, they can't steal it. It is a free gift from God, why not making use of it.</p> <p>Stop trying to get money in large pockets and use what God provide for free. Think about our beautiful country that is going down the drain, Put Gwede Mantashe on pension and somebody with knowledge in his place. Stop this nonsense of ESKOM 2.0. Get rid of Mantashe and his cronies!!! There are enough power station build in SA. Service it!!! Listen to Andre de Ruyter,</p> <p>With sun and wind, and private Independent Power Producers there will be more than enough time to service what we have and there wouldn't be problems.</p> <p>Get rid of corruption!!! Get rid of Mantashe!!!</p> <p>One of these days everybody with money will be self energy suppliers. Only people and poor industries will use Eskom and Eskom will sit with very little income.</p> <p>Thank minister Gordhan for trying but he sounds like a lonely voice in the desert,</p>	Annette	business owner
2022-07-18 11:35:33	Western Cape	Yes I do	Solar	<p>South Africa is blessed with an abundance of sunlight and wind which should be utilised to generate solar and wind energy. Our coastline also stretches over thousands of kilometers so tidal turbines could be installed to generate unlimited tidal energy. Due to its incompetence and corruption, ESKOM has become obsolete and should not form part of South Africa's future energy solutions.</p>	Marilie	business owner
2022-07-18 11:33:41	Western Cape	Yes I do	Solar	<p>The infrastructure is already in place in the private sector. If all existing private solar installations electricity generation capacity is accepted back into the grid, it would reduce the immense pressure on Eskom's power generating capacity. No new expensive infrastructure needs to be set up again. Use what is available.</p>	Jako	business owner
2022-07-18 10:41:53	Gauteng	Yes I do	Solar	<p>whilst gas has a role to play, solar is immediate and available. wind is useful but it should be seen as long term.</p> <p>I would support a class action suit against Eskom if government persists in retaining this SOE's monopoly.</p>	Rory	business owner
2022-07-18 09:47:19	Gauteng	Yes I do	Solar	<p>Solar power comes from the sun a resource owned by no one but that benefits everyone. Once harnessed can supply power for free.</p>	Nicole	business owner
2022-07-18 09:16:04	Gauteng	Yes I do	Solar		Pieter	business owner

2022-07-18 07:57:29	Western Cape		Yes I do	Solar	Eskom can clearly not support the country's power needs. We need a healthy, competitive energy providing sector to provide both power and the best price to consumers.	Matthew	business owner
2022-07-18 06:52:25	Western Cape		Yes I do	Solar	It is ridiculous to think that the countries energy problems will be solved in the short to medium term. Wasteful expenditure, corruption and the lack of skills are the main reasons for this problem. Government cannot continue to prevent alternative sources from being used. The red tape is there specifically to prevent companies from providing alternative sources. We need electricity NOW, jobs and businesses rely on this. The countries growth and peoples wellbeing are more important than the government protecting SOE's.	Gary	business owner
2022-07-17 19:34:49	Western Cape		Yes I do	Solar	By building a future in renewable energy not only do we take corrupt and manipulative Eskom out of the equation but we also become independent from international bullying by the likes of Shell or even Russia. By far the biggest argument though is to project the environment before it is too late.	Bron	business owner
2022-07-17 14:27:00	KwaZulu- Natal		Yes I do	Solar	I believe anyone should have the right to generate their own electricity - and supply others should he./so wish. Within safety boundaries as stipulated by the SABS. The ANC are incapable of achieving any positive outcome in any field.	Philip	business owner
2022-07-17 13:02:39	Gauteng		Yes I do	Solar	It is ridiculous that you as a supposedly competent government have not already addressed this issue. OBVIOUSLY we need independent power suppliers as you are OBVIOUSLY incompetent at making anything work.	Deborah	business owner
2022-07-17 08:42:20	KwaZulu- Natal		Yes I do	Solar	Solar is the cheapest and quickest way for independent supply of electricity that can be supplied back into the grid. Many other countries are doing it.	Byron	business owner
2022-07-17 08:19:29	Western Cape		Yes I do	Solar	Sunshine and wind is always always in supply in SA so Solar and wind makes sense. We can only have independent power suppliers if the government has NOTHING to do with itnot them or their family and friends. Otherwise it will just be ANOTHER place to fraudulently let money disappear from or fraudulent 'contracts' handed out and paid for but nothing ever delivered... we know what happened with medical safety supplies during Covid. So many people have already spent THOUSANDS out of Pocket to get Off the Eskom grid.... Government should SUBSIDISE alternative energy to citizens... not punish them for finding a solution to Eskom's collapse	Marlize	business owner
2022-07-17 08:11:01	Gauteng		Yes I do	Solar	Our climate is definitely great for solar solutions, although other means can also work. Removing red tape and allowing the faster roll-out of electricity taking the necessary safety standards into consideration can turn around our current predicament a lot faster where government and private sector works together for the betterment of its citizens rather than just looking out for itself. There are plenty solutions out there that can benefit us all if the red tape is removed to make it easier.	Paul	business owner
2022-07-17 00:45:03	Western Cape		Yes I do	Solar		Fanie	business owner
2022-07-16 12:09:34	Gauteng		Yes I do	Solar	We already use solar power and if independent power suppliers are allowed to support the grid all of SA will be able to have power stability sooner.	Tina	business owner
2022-07-16 12:00:24	Eastern Cape		Yes I do	Solar	Solar, Wind and Hydro	Ingrid	business owner
2022-07-15 22:36:32	Gauteng		Yes I do	Solar		Ian	business owner
2022-07-15 22:19:15	Gauteng		Yes I do	Solar		Bev	business owner
2022-07-15 21:35:21	North West		Yes I do	Solar	South Africa has plenty daylight sunlight. It should be able to flourish due to our good weather. Many countries in Europe use solar, with much less sunshine.	Elmien	business owner
2022-07-15 17:50:36	Gauteng		Yes I do	Solar	We have loads of space and sun for solar .we could all have solar panels on our roofs , it is just very expensive to do this at the present prices.	Sharon	business owner
2022-07-15 17:50:33	Gauteng		Yes I do	Solar	We have loads of space and sun for solar .we could all have solar panels on our roofs , it is just very expensive to do this at the present prices.	Sharon	business owner
2022-07-15 17:23:00	Western Cape		Yes I do	Solar	South Africa is one of the richest countries in terms of natural resources yet our leaders fail to comprehend the true potential of this country. Other countries have started shifting to alternative energy sources long ago, yet they don't have a fraction of the sunshine and wind that we have here. It's yet more proof of the shortsightedness of our leaders, incapable of thinking beyond what they can get right now to make themselves rich today instead of thinking what they can do for this country and it's people for generations to come, enriching everybody in the process! Allow independent, competent producers of electricity to come in and fix what the ever incompetent ANC has messed up!	Rolf	business owner
2022-07-15 16:45:06	Western Cape		Yes I do	Solar		Jacques	business owner
2022-07-15 15:38:16	Eastern Cape		Yes I do	Solar		Nea	business owner
2022-07-15 14:53:13	Western Cape		Yes I do	Solar	We have plenty of sun in SA let's make use of it and go green	Jo	business owner

2022-07-15 14:08:39	Gauteng		Yes I do	Solar	Feeding any excess power generated by either a business or individual back into the grid would help relieve the pressure on the grid. This should result in less load shedding and give Eskom the ability to do some of the urgent maintenance. It is detrimental to our economy to continue with an unstable power supply. There are lots of alternative options available to generate more power. We have to find an efficient solution.	Tandy	business owner
2022-07-15 13:57:32	Gauteng		Yes I do	Solar	Solar energy is abundant and seems the most accessible to implement quickly.	David	business owner
2022-07-15 13:22:35	Gauteng		Yes I do	Solar	IF GOVERNMENT SUBSIDIZES SOLAR POWER UNITS FOR PRIVATE HOMES AS WELL AS CORPORATES AND BUSINESSES IN SA, PEOPLE CAN GENERATE THEIR OWN POWER AND ESKOM CAN BECOME THE MINORITY POWER SUPPLIER, OR SOMETHING OF THE PAST. THIS IN TURN WILL REDUCE ESKOM IN SIZE AND THUS THE OPPROTUNITY FOR CORRUPTION, WHICH IS THE REASON WHY ESKOM IS IN THE BAD STATE IT IS. IF ESKOM REMAINS, IT SHOULD BE PRIVATIZED TO RESPONSIBLE AND NON-CORRUPT LEADERSHIP.	THEUNIS	business owner
2022-07-15 11:59:04	Gauteng		Yes I do	Solar	The loadshedding is costing the country millions if not billions. Solar is a great alternative option for sunny South Africa! Independent energy production is the only option!	Reyno	business owner
2022-07-15 11:29:43	Gauteng		Yes I do	Solar	I support solar, wind and hydro - the cleaner and the less it impacts and destroys the environment the better. South Africa has the climate, space and natural conditions for getting off the grid. It's the most sustainable and makes the most sense in the long-term.	Sasha	business owner
2022-07-15 11:12:39	Western Cape		Yes I do	Solar	Son- en -windkrag sal die vraag na steenkool elektrisiteit verminder. Gas kan ook help en die golwe van die see kan ook gebruik word.	Rika	business owner
2022-07-15 10:05:16	KwaZulu-Natal		Yes I do	Solar	Solar power is the best way forward.	Michael	business owner
2022-07-15 09:50:40	Gauteng		Yes I do	Solar		Liz	business owner
2022-07-15 08:59:19	Gauteng		Yes I do	Solar		Natalie	business owner
2022-07-15 07:48:45	Gauteng		Yes I do	Solar		Lynne	business owner
2022-07-15 07:40:06	Gauteng		Yes I do	Solar	Solar energy is most probably the easy way for house holds to solve there energy crisis . wind farming can also be looked at.	Hein	business owner
2022-07-15 07:08:28	KwaZulu-Natal		Yes I do	Solar	Eskom is making problems and not giving answers. People are closing their businesses and that is causing unemployment we need a solution and fast	Chantelle	business owner
2022-07-15 06:28:18	Gauteng		Yes I do	Solar		Esme	business owner
2022-07-15 06:11:28	Eastern Cape		Yes I do	Solar	Please find solutions to the crisis created by our incompetant , self-enriching "leaders". Eskom has been given too many chances and bail-outs. Its time for companys in the private sector to take over so that our power grid is stable	Ryan	business owner
2022-07-14 18:00:29	Western Cape		Yes I do	Solar	Any options that are sustainable and renewable are beter than what we have not.	Vicki	business owner
2022-07-14 17:48:36	Western Cape		Yes I do	Solar	The needs are immediate. There are no time to waste on long and elaborate environmental impact studies and license applications. The installation of solar energy generation are the fastest and safest way to address the shortages.		business owner
2022-07-14 17:41:38	Gauteng		Yes I do	Solar		Marius	business owner
2022-07-14 17:41:35	Gauteng		Yes I do	Solar		Marius	business owner
2022-07-14 17:27:17	Gauteng		Yes I do	Solar	Pull ur heads out of ur behinds government and start thing about tomorrow and forward plan . Stop being idiots !!!!	Michele	business owner
2022-07-14 16:23:28	Limpopo		Yes I do	Solar	To save our economy and our land we need to allow the private sector to help	Sarah	business owner
2022-07-14 16:05:27	Western Cape		Yes I do	Solar	We have international investors waiting to invest in solar power solutions for South Africa - why the red tape, when the country is falling to pieces and who actually still wants to invest in South Africa with all the ongoing corruption. Please scrap the red tape immediately!! These investors won't be waiting for long and the country needs this now!	Maya	business owner
2022-07-14 15:47:19	Western Cape		Yes I do	Solar	If South Africa scrap all red tape and appoint qualified professional personal instead of useless Cadets we as a Country can fix and supply enough electricity with in a 12 month period.	Kobus	business owner
2022-07-14 13:32:40	Gauteng		Yes I do	Solar	Any form of renewable energy which avoids pollution and damage to the environment. Why has govt not considered declared a National Disaster to implement the urgent and necessary changes to legislation> it will be years before Parliament gets off its arse and does something. Furthermore, Eskom is so riddled with criminal factions that govt will never get rid of the rot and we will continue to be held hostage at the instance of the Unions. do something now.	Spencer	business owner

2022-07-14 12:59:14	Mpumalanga	Yes I do	Solar	As the only power source that can be implemented on a "per-house" level, solar energy has long been a solution to our national energy crisis. The state doesn't necessarily have to pay for it, but rebates will go a long way in helping companies and households get to a place where the state has less responsibility in terms of energy, and can subsequently focus on looting, plundering and destroying the more vital parts of our country. We need to consider the state's capacity in terms of destroying the country. They need a break from all of this. IPPs are the solution	Hannes	business owner
2022-07-14 12:58:35	Western Cape	Yes I do	Solar	Several methods of solar generation can be employed, as has already been done in SA' Karoo and Kalahari arid regions providing maximum year round generating capacity without costly maintenance.	Ingo	business owner
2022-07-14 12:44:38	Gauteng	Yes I do	Solar	It is expensive but in the long run we can put power back into the grid and help independent users to sell back electricity to government to supply country wide.	Venessa	business owner
2022-07-14 12:30:22	Western Cape	Yes I do	Solar	There is a real need for decentralised energy supplies which really serve people and communities, and don't line the pockets of corrupt politicians, incompetent parastatal workers and foreign energy companies. Making small-scale systems cheap to install at people's homes, without all these government fees like is done in other countries such as Zimbabwe, would help energy independence hugely. Also, small independent producers scattered across the country harnessing the natural, clean energies such as solar, wind, tidal, etc., according to what's the best fit(s). This monolithic centralised ESKOM system is a dinosaur that must make way for solutions that meet our times and our needs, not megalomaniacs' and control freaks' deluded fantasies.	Jean-Paul	business owner
2022-07-14 12:21:42	Gauteng	Yes I do	Solar	Solar energy initiatives are safe for the environment and are efficient and effective. Though the initial capital, looks bad financially, there are no further charges save for an affordable maintenance. I therefore recommend this solution	Elias	business owner
2022-07-14 12:17:17	Western Cape	Yes I do	Solar	Solar and Wind would be my choice if I could choose two. Although wind here in the Western Cape does work, it is not the same in other of SA provinces. Loadshedding has a very negative effect on all businesses and our countries economy - red tape should be removed and when there is more competitors pricing could if not manipulated be competitive and possibly cheaper than our current supplier.	Muriel	business owner
2022-07-14 11:48:47	Western Cape	Yes I do	Solar	If European countries use substantial contribution of power from Solar and wind, then surely the natural circumstances as they are in South Africa are even more suited.	Derek	business owner
2022-07-14 10:21:30	Free State	Yes I do	Solar	Solar energy is a more sustainable and efficient energy source cuz first of all South Africa is a sunny country and the energy from the sun is a very reliable power source. The advantage of solar energy is also that power can be stored in batteries even if the weather is not conducive. Solar is cleaner and renewable and not harmful to the environment.	Simphiwe	business owner
2022-07-14 09:27:54	Western Cape	Yes I do	Solar	They should not penalize home owners generating their own power and wish to put back the access power generated.	Owen	business owner
2022-07-14 07:28:44	Mpumalanga	Yes I do	Solar	First option is solar or wind but for the initial stage the fossil fuels can be used. There are just too much corruption within governmental organizations.....get privately-owned companies on board with immediate effect.	Gawie	business owner
2022-07-14 06:38:25	Western Cape	Yes I do	Solar	Hey there. Your guys can make way for solar and wind endrgy	Regh	business owner
2022-07-14 05:32:21	Gauteng	Yes I do	Solar	Why does government still foolishly insist on Eskom being the sole energy supplier, while they can clearly see Eskom is unable. They only achieve chaos and a failing economy. Our businesses, our livelihoods are suffering greatly! Mr. Ramaphosa, wake up!!!! Allow independents to supply SA with energy! And take back the millions stolen by corrupt government officials while we're at it.	Elize	business owner
2022-07-14 05:12:48	Eastern Cape	Yes I do	Solar	Home owners and small businesses and other small type users should be helped and encouraged to install and use renewable types of energy and inverters that are available. To be able to almost go off the grid. At the moment Eskom has too much control and power over the people and nation which is wrong. Allow independent producers that are well regulated to balance that unlawful control that Eskom is wielding. Eskom is crippling the nation where as the private sector could be producing energy to alleviate their plight and the people.	Marylou	business owner
2022-07-14 04:06:10	Gauteng	Yes I do	Solar		Kathryn	business owner
2022-07-14 01:22:28	Western Cape	Yes I do	Solar		Sabine	business owner
2022-07-13 23:47:43	Western Cape	Yes I do	Solar	Solar power and batteries with inverters is a much better power solution than electricity.	André	business owner
2022-07-13 20:58:41	Western Cape	Yes I do	Solar	Use the middle and upper middle class to get a rebate on the solar systems to quickly turn around and improve our capacity in the quickest possible way and feed it back into the grid.	Ian	business owner
2022-07-13 19:43:23	Gauteng	Yes I do	Solar	Mandate that private companies be allowed to supply power without interference from the government for a contracted period of at least 30 years.	Richard	business owner

2022-07-13 19:11:30	Western Cape		Yes I do	Solar	We are the land of sun. Its obvious to deregulate and allow private participation.	Eric	business owner
2022-07-13 17:35:18	Mpumal anga		Yes I do	Solar	Yes, we need private power producers to be allowed to generate and sell electricity immediately to slow down and curb the damage done to our economy by load shedding. The quickest plants to build for power generation is solar and wind. Correctly set up solar can provide power in the evening as well as there are many ways beside batteries to store the energy. I think Mr de Ruiters was a good decision and if given permission to get rid of dead wood in Eskom and use fewer contractors for work that use to be handled internally. Also, there should be proper accountability so as to ensure that contracts are not handed out for unrealistic and unjustified amounts of money that could have been used to do more.	Sean	business owner
2022-07-13 16:32:52	Western Cape		Yes I do	Solar	Please change the red tape to facilitate independent power suppliers...Its through the short sightless from our ANC government that we are in this predicament, ie destroying our economy, or what is left of it..	Elfred	business owner
2022-07-13 16:19:59	Gauteng		Yes I do	Solar	After years of hoping for the government to bring a concrete solution to its society about energy reticulation we as south African seen not less than the frauds and money laundering within state employees, ministers and presidencies for bad sake, it is time not to believe on the government to bring changes to our societies and trust that the private sector will do best in servicing our country with power generating.	Jacob	business owner
2022-07-13 15:29:26	Gauteng		Yes I do	Solar		louisa	business owner
2022-07-13 15:04:17	Free State		Yes I do	Solar	Yes I do support this but the ANC and family i.e. the motsepe family are already waiting for the change of legislation to start filling their pockets when thy start feeding into the grid with their solar farms. THIS MUST BE OPEN TO EVERYONE TO BE ABLE TO FEED INTO THE GRID AND GET PAID FOR IT NOT ONLY THOSE IN HIGH PLACES.	Burgert	business owner
2022-07-13 14:55:20	Eastern Cape		Yes I do	Solar	Scrap restrictions, open up the market for private enterprise to do what the government has failed to do.	Johan	business owner
2022-07-13 14:38:24	KwaZulu- Natal		Yes I do	Solar		Paul	business owner
2022-07-13 13:59:53	Western Cape		Yes I do	Solar		Afeefa	business owner
2022-07-13 13:58:30	Western Cape		Yes I do	Solar		Antoinette	business owner
2022-07-13 12:43:09	Western Cape		Yes I do	Solar	In my opinion, solar would be the cheapest and quickest method of electricity production that would suit South Africa's immediate needs. South Africa also has the land space and long hours of sunshine that suit solar energy production. Solar is also least likely to create objections. Other methods would be less affordable considering South Africa's challenging financial status. Overall, solar would be more affordable, less controversial and quicker to implement, resulting in it being more suited to contributing to the improvement of the amount of electricity immediately available to the grid.	Noel	business owner
2022-07-13 12:16:38	Mpumal anga		Yes I do	Solar	This sounds like the only plausible option, because it is the only resource that we have enough of and is the most economical.	Shirley	business owner
2022-07-13 11:46:47	Gauteng		Yes I do	Solar		D	business owner
2022-07-13 11:23:48	Northern Cape		Yes I do	Solar	Open the markets... Allow for choice of providers... allow for competitive prices. It's rubbish that the useless ANC Government retains the reins on an essential service.	Kitty	business owner
2022-07-13 11:15:54	Western Cape		Yes I do	Solar	For immediate relief in the shortest possible time, only wind and solar will be able to provide relief in the sort as well long term. Coal must still be used with the most efficiency available. Gas and diesel isnt sustainable and extremely expensive. Also subject to extreme corruption . A NO NO Nuclear is the most sustainable. We need at least two to three new nuclear reactors. The infrastructure is already in place at Koeberg and Thyspunt. Also, as a matter of GREAT URGENCY. Get Koeberg up to standard to run at full capacity again. What is going on there? It is a disgrace as Koeberg is being managed.	STefan	business owner

				<p>To fastest way out of this crisis is to allow ordinary home and business owners to contribute electricity to the national grid that they independently generate through their own solar, wind and hydro generation systems and store in their own battery systems.</p> <p>If the mechanisms are created for Eskom and Municipalities to purchase surplus capacity that is generated and stored by private home and business owners and fed back into the grid, the country can solve its energy crisis.</p> <p>By creating the mechanism for private home and business owners to feed back their excess and stored electricity and pay them per unit fed into the grid, it becomes feasible for banks to finance solar conversions with storage facilities. This means that private homes and businesses finance generation and storage themselves through small private units.</p> <p>In the end, all these smaller decentralised private energy units add up and create capacity that increases the country's overall energy availability and storage.</p> <p>This would be the fastest and most cost-effective way to solve this crises within a year while bringing the cost of electricity down for homeowners and businesses who can no longer afford the out-of-control electricity price hikes that users are currently been saddled up with.</p> <p>Fact is, it's already becoming cheaper to finance a private solar system with batteries and pay back the monthly instalments than it is to purchase electricity from municipalities or Eskom.</p> <p>Fact is, more and more people will start to migrate to their own systems and that will mean fewer users and less income for Eskom meaning they will demand higher increases every year to fund their debt.</p> <p>It's time to wake up and give the power back to the citizens of this country and let us fix this epic disaster caused by rampant corruption and incompetence.</p> <p>No doubt this model I am proposing will not appeal to municipalities or Eskom as it stops the gravy train dead in its tracks with them not being able to milk the public any further.</p> <p>Mark my words, we the people have had it and we will generate our own electricity and the government will lose the income that they have been extorting from us. The SA government can decide whether it uses the disruption that is already underway with private solar generation and storage facilities to support the national grid with electricity generated by private citizens and businesses, or whether it is just going to dig Eskom's hole deeper and punish the poor who can't afford their own solar systems with even higher electricity prices.</p>		
2022-07-13 11:12:05	Limpopo	Yes I do	Solar		Didi	business owner
2022-07-13 11:03:05	Western Cape	Yes I do	Solar	Solar is quickest & is cost effective. Needs to be developed in conjunction with storage development. House-holder solar installation should be subsidized.	Richard	business owner
2022-07-13 11:00:51	Gauteng	Yes I do	Solar	This process should have been implemented 20 years ago!! In a country where sun and wind are so frequently available, it just seems logical! Unfortunately government has not maintained infrastructure and have stolen all economic resources!	Garth	business owner
2022-07-13 10:29:10	Gauteng	Yes I do	Solar	Renewables are the preferred option but ANY alternative/s with short implementation dates should be considered, even if they are then removed from the grid at a later stage.	PIETER	business owner
2022-07-13 10:27:59	Northern Cape	Yes I do	Solar	Solar panels are being manufactured in South Africa for quite some time now. Therefore no need to be imported. Job creation is legio	Christoffel	business owner
2022-07-13 10:22:09	Gauteng	Yes I do	Solar		LIZ	business owner
2022-07-13 09:29:04	Western Cape	Yes I do	Solar		Pamela	business owner
2022-07-13 09:28:32	Gauteng	Yes I do	Solar		Geoff	business owner
2022-07-13 09:23:52	Gauteng	Yes I do	Solar	we have enough sunshine in most areas throughout the year, so solar is obvious to go. There are things to take into consideration, like cleaning of panel, but that is job creation wind can be used in areas where wind can be put to action	Christine	business owner
2022-07-13 09:23:36	Western Cape	Yes I do	Solar		Petra	business owner
2022-07-13 09:16:44	Gauteng	Yes I do	Solar		na	business owner
2022-07-13 08:58:48	Gauteng	Yes I do	Solar	Private energy production of ANY kind should be allowed and encouraged. The Minister must NOT penalise/impede such producers. Ideally private energy production should be financially encouraged. Grid-linking such private energy should also be financially viable and encouraged.	Michiel	business owner

2022-07-13 08:47:12	Gauteng	Yes I do	Solar	<p>Pity there is only one option to select in the field on which method of electricity production. We should explore both wind , solar and hydro.</p> <p>Definitely NOT nuclear and we see how well coal is working for us :-)</p> <p>Only way to sort out the mess in SA is to allow power generation by as many small independent companies as possible - it should be easy for them to participate and sell energy to the grid.</p>	Paul	business owner
2022-07-13 08:46:50	Gauteng	Yes I do	Solar	<p>Allow IPPs to generate own power requirements and to feed their surplus into the grid at fair rate, i.e. at least 50% of the local kWh tariff.</p> <p>Make registration of the IPP a seamless exercise with incentives rather than penalties and punitive costs.</p> <p>Simply - incentivise IPP's rather than penalise them, this will help save the economy.</p>	Martin	business owner
2022-07-13 08:33:30	Western Cape	Yes I do	Solar	Not only Solar but renewables with storage options.	Paul	business owner
2022-07-13 08:32:35	Western Cape	Yes I do	Solar	Cost affective and quick to install	Bertus	business owner
2022-07-13 08:30:08	Western Cape	Yes I do	Solar		Hayley	business owner
2022-07-13 08:26:37	KwaZulu-Natal	Yes I do	Solar	Scrap the ridiculous red tape and get a move on. Not sure what Mantashe's agenda is, but it's causing massive damage to the economy. We have the right conditions in SA for Wind and Solar farms, and need to get a move on.	Tim	business owner
2022-07-13 08:26:20	Gauteng	Yes I do	Solar	<p>About time our Government did SOMETHING about our power problems, I have a nagging feeling that we should be thanking Andre de Ruyter and his top team for ensuring that we have ANY power at all - left to the ANC we wouldn't.</p> <p>Give any and everyone the right to sell to the grid (as so many other countries do!). Do NOT curtail anyone's ability to produce power and sell back to the grid.</p> <p>NO NUCLEAR and NO gas power ships!!!! They are all the usual corrupt deals. Give de Ruyter free rein to run ESKOM and Government stop interfering - and FIRE Gwede Mantashe, he is menace - clean coal indeed! Cyril could not have chosen a worse Energy Minister - and he has made some really bad choices.</p> <p>Time for a midnight press conference and get rid of all those corrupt, incompetent and frankly corrupt ministers and pull in business people, regardless of affiliation. We want SA back.</p>	Ann	business owner
2022-07-13 08:23:49	Western Cape	Yes I do	Solar		Jacqueline	business owner
2022-07-13 08:19:43	Gauteng	Yes I do	Solar	Solar and Biogas are the way forward	Gill	business owner
2022-07-13 08:16:48	Western Cape	Yes I do	Solar		Viné	business owner
2022-07-13 08:11:40	KwaZulu-Natal	Yes I do	Solar	<p>I think it is time for South Africans to rise up and PROTEST - like in Sri Lanka - storm the parliament buildings.</p> <p>SA should be in a state of emergency over this lack of power.</p> <p>We have waited LONG ENOUGH for the politicians to rule our lives.</p> <p>Scrap the red tape! Privatise everything.</p> <p>The Government is incapable of managing anything!</p>	Julie	business owner
2022-07-13 07:38:14	Western Cape	Yes I do	Solar	Get Legistration amended immediately to enable the supply of available energy by private enterprises. Renewables are imperative: Solar & Wind power are natural resources & available throughout SA and all able power Suppliers should be assisted to supply our country with electricity with immediate effect.	Pamela	business owner
2022-07-13 07:37:50	Eastern Cape	Yes I do	Solar	<p>Lack of power and continuing load-shedding is causing damage to equipment, causing loss of employment and bankruptcy.</p> <p>Solar and wind power are two possibilities in our particular area, and by allowing all entrepreneurs to establish power generating plants would immediately ease the shortage of electricity. WE NEED IMMEDIATE ACTION!!!</p>	Malcolm	business owner
2022-07-13 07:34:25	Gauteng	Yes I do	Solar	Although I selected Solar, wind, coal, nuclear and hydro can all make sense. The fact is that South Africa has need for additional power generation that cannot be met by Eskom. Eskom or equivalent will always remain the primary producer of electricity, but to ensure our economy is not hampered by rolling blackouts, we immediately need other options going forward. Competition was never a bad thing to keep us on our toes. Please open the channels for others to help South Africa. Another untapped source has to be households producing electricity for their personal use. Why not allow these households to push excess electricity into the grid for others to use.	Glen	business owner
2022-07-13 07:18:00	Free State	Yes I do	Solar		.Ronald	business owner
2022-07-13 07:17:33	KwaZulu-Natal	Yes I do	Solar		Danie	business owner

2022-07-13 07:03:37	Western Cape	Yes I do	Solar	We have plenty of sunshine in South Africa. Solar power can be produced at the home as well as from national power stations around the country. The cost of producing solar power is steadily going down. It's clean energy, lithium used to produce lithium batteries which are very long lasting is one of the most abundant metals available. It makes sense for independant power producers to be able to feed electricity into the national grid, especially in a crisis situation like there is in South Africa, it is ridiculous not to. I am planning to be able to produce solar electricity for all my domestic needs in the near future without needing to rely on the national grid, as are some of my clients who I design houses for also.	John	business owner
2022-07-13 06:55:04	Gauteng	Yes I do	Solar	Dear Sir, please open up the generation of power to the private sector as soon as possible.	Theuns	business owner
2022-07-13 06:41:43	North West	Yes I do	Solar		NCABA	business owner
2022-07-13 05:13:15	Western Cape	Yes I do	Solar	Making solar available and affordable for everyone to be able to build clusters of solar power in communities will be a good starting point.	Genevieve	business owner
2022-07-13 00:24:02	Gauteng	Yes I do	Solar	Solar in the north and solar and wind in the south, and coastal windy areas. Quick to set up.	Jules	business owner
2022-07-12 23:41:41	Gauteng	Yes I do	Solar	The deliberate dragging on of a very foreseeable power generating capacity crisis 2 decades ago is absolutely mind blowing. For the cost of the 2 'new' power stations at such inflated costs and extended delays, we could have adequate or excess power, already subsidised and paid for as suggested below Get your act together and do what is right. Change the legislation immediately and include the following: Just like Finland (which has a mere fraction of our sunshine), encourage solar panel installations on all factory, commercial and residential buildings and carports to enable a degree of power generation for those buildings and install meters that measure both incoming and solar supplies as well as reverse metering to feed unused electricity back into and help boost the national supply to our grid. This will enable investment in our economy and enable energy autonomy for consumers.	Kevin	business owner
2022-07-12 22:50:50	Gauteng	Yes I do	Solar	Solar by independent providers will be the fastest, corruption limiting, way to secure supply. Anything built by the state will have serious labour and corruption issues. Also get all the mothballed power stations fully functional.	Steve	business owner
2022-07-12 22:31:00	KwaZulu- Natal	Yes I do	Solar		Warren	business owner
2022-07-12 21:39:33	Western Cape	Yes I do	Solar	It currently produces the cheapest electricity and can be built most quickly.	Michael	business owner
2022-07-12 21:24:03	Gauteng	Yes I do	Solar		ricky	business owner
2022-07-12 21:08:38	Northern Cape	Yes I do	Solar		Harry	business owner
2022-07-12 21:02:07	Western Cape	Yes I do	Solar		Marina	business owner
2022-07-12 21:01:14	Western Cape	Yes I do	Solar		john	business owner
2022-07-12 20:42:26	Western Cape	Yes I do	Solar	Son , wind en water kan beter benut word. Ons moet ook krag stoorkapasiteit vergroot	Abe	business owner
2022-07-12 20:25:17	Western Cape	Yes I do	Solar	I ticket solar but I want to include wind as well. Both wind and solar can be implemented in a relative short time frame (compared to the other option). The cheapest option by far would be to privatize some of ESKOM's older power stations similar to the strategy that Johannesburg CitiPower did with the Kelvin Power Station.	Frans	business owner
2022-07-12 20:24:54	KwaZulu- Natal	Yes I do	Solar	Solar, wind and even hydro are all good options for SA as we have the resources	Saffiya	business owner
2022-07-12 20:06:15	Gauteng	Yes I do	Solar	Solar is one of the options ,in a country with vast open land space and abundant sunshine it makes sense.. I would also suggest other natural energy resources like wind although it makes more sense in coastal areas with lots of wind.. Incentivise individuals and companies to create their own energy to take the pressure of Eskom and stop forcing people to offer their energy into the grid controlled by Eskom ,if people create enough electricity to sell to others ,allow them..it will lower the cost of energy considerably.	Dries	business owner
2022-07-12 19:55:49	Gauteng	Yes I do	Solar	As there is no cost in using solar as this is coming from the sun. Only cost is panels and we are not controlled by a third party like Eskom and the government Possible have a backup incase we do not have enough sun due to the weather.	Anthony	business owner
2022-07-12 19:54:52	Mpumal anga	Yes I do	Solar		Charl	business owner

2022-07-12 19:40:26	Gauteng	Yes I do	Solar	<p>If all the houses in SA get solar geysers, we have just solved 30% of South Africa's eergy problem. With just a few billion and in 1 year this can be done. Furthermore government should enrol with the geothermal drilling company called "Quaise".</p> <p>They can convert an existing coal powerplant to a geothermal steam generating plant within months, not years and have perpetual cheap energy for all perpetually. They drill a deep hole in the earth until the rock gets hot, fill it with steam, and the electricity is generated by the steam. A one stop answer. If we enrol first, we can be one of the first countries to join basically unending free energy.</p>	Jaco	business owner
2022-07-12 19:38:39	Free State	Yes I do	Solar		Albertus	business owner
2022-07-12 19:27:18	Gauteng	Yes I do	Solar		pierre	business owner
2022-07-12 19:19:05	Western Cape	Yes I do	Solar	<p>The only way to grow and build a country is through developing an economy that creates jobs - that comes through firstly ensuring that you have sufficient power to underpin that growth - it is critical to link up IPPs as rapidly as possible to both support Eskoms inability (both now and into the future) to deliver sufficient power, plus to ensure that our depth and stability of power encourages more sustained investment that leads to employment and growth. We possibly should be ensuring the right mix of power generation that includes renewables, coal and nuclear</p>	Mike	business owner
2022-07-12 19:10:45	Gauteng	Yes I do	Solar	<p>The South African Economy cannot carry on with the issues that are being experienced with Eskom having a monopoly. We need to have a Capitalist economy if there is any chance of growth. If countries in Baltic regions can successfully use Solar power - how much more could South Africa benefit from this form of power collection.</p>	Theresa	business owner
2022-07-12 19:06:16	Gauteng	Yes I do	Solar	<p>We need a hybrid solution I support whatever is cheapest and environmentally responsible</p>	Richard	business owner
2022-07-12 18:33:54	Western Cape	Yes I do	Solar		Amy	business owner
2022-07-12 18:30:56	Gauteng	Yes I do	Solar	All methods are needed but solar most likely best	Tony	business owner
2022-07-12 18:29:26	Gauteng	Yes I do	Solar	Solar is clean and available	Louis	business owner
2022-07-12 18:28:20	Gauteng	Yes I do	Solar		Paola	business owner
2022-07-12 18:25:03	Western Cape	Yes I do	Solar	<p>South Africa needs a low cost and sustainable source or energy . Government should be endorsing small businesses with solar backup to assist with the hi prices of electricity and the demand</p>	Greg	business owner
2022-07-12 18:19:03	Mpumalanga	Yes I do	Solar	<p>I have tried for 5 years to get Mkhondo Municipality (and then the whole of Mpumalanga Province) to make time to listen to a presentation on making this municipality a solar energy net EXPORTER to other regions of South Africa, while creating 1000s of sustainable jobs through an integrated energy and enterprise development strategy. I've spoken to factories, farmers and mines in the area who are EXTREMELY KEEN to buy solar energy from the private-public-non-profit partnership company that I have put together. All we need is a standard 'wheeling agreement' with Eskom per meter, meaning that Eskom can FOCUS on maintaining transmission infrastructure, instead of on only energy generation.</p>	Reinhild	business owner
2022-07-12 18:08:33	KwaZulu-Natal	Yes I do	Solar		Mike	business owner
2022-07-12 17:58:30	Gauteng	Yes I do	Solar		Jacques	business owner
2022-07-12 17:49:58	KwaZulu-Natal	Yes I do	Solar	Free harvesting of energy	Hans	business owner
2022-07-12 17:38:47	Gauteng	Yes I do	Solar		Paul	business owner
2022-07-12 17:34:30	Gauteng	Yes I do	Solar	<p>I think SA should use a combination of alternative power generation and not just one of the above. Coastal regions would have more access to hydro due to water sources, mores so than inland regions where wind or solar could be used.</p>	Maryna	business owner
2022-07-12 17:19:54	Western Cape	Yes I do	Solar	<p>I wanted to say that it depends entirely on the natural energy resources available in each region but there wasn't that choice above. I'd look to clean power suppliers like hydro and solar .</p>	Patricia	business owner
2022-07-12 17:05:42	Gauteng	Yes I do	Solar		Mervyn	business owner
2022-07-12 17:03:33	Gauteng	Yes I do	Solar	<p>It is absolute shame that a country so blessed with abundance of sunshine throughout most of the year compared to the rest of the globe, as well as a fair share of wind, that we should have leaders arguing about the mix of power generation to remedy our continuing load-shedding crisis for over 10 years.</p> <p>Supply of continuous and reliable electricity is the life-blood of any modern economy and we should not be held to ransom by vested economic interest of a relatively small sector of the economy - namely the coal sector.</p> <p>Tell our leaders (no political bias here) that our new built power stations are not the " crown jewels" of this country nor that of some of our leaders.</p>	Mervyn	business owner
2022-07-12 16:58:38	KwaZulu-Natal	Yes I do	Solar	<p>Any form of clean energy should be allowed to contribute power to the grid for stability to stop load shedding.</p>	Tinie	business owner

2022-07-12 16:57:18	Gauteng	Yes I do	Solar	Simply because solar is easy to install and lots of sunshine in the Karoo and Northern Cape. Wind follows but installation is slower and less energy is produced per square km. Green hydrogen is the long term solution. this is where the future lies.	Reg	business owner
2022-07-12 16:48:03	Western Cape	Yes I do	Solar	It is clear that we cannot function at optimum when our power supplier cannot. South Africa is a very large country, already struggling with inflation. Anyone at the top will agree to alternative sources of power being introduced. In SA we don't have only a Spar or only a Pick n' Pay, so why have 'only an Eskom'? Eskom should realize that competition is good, and it will certainly be a weight off their shoulders. Alternatively, even if Eskom wants to be the sole-producer of power, they should offer Solar or Wind as an option as well - much like cars can run on diesel or petrol. Our level of productivity is highly affected by their current stance, which is clearly being interpreted as 'greed'. Other than that, independent Solar Panel/Power providers should work on payment plans for the public that can be afforded by the public - monthly installments of as little as R800, which is what a small household would spend on electricity from Eskom monthly (in summer. +-R2500 in winter - heaters). This in itself would be of great help and can't be argued by Eskom.	Carly	business owner
2022-07-12 16:47:57	KwaZulu-Natal	Yes I do	Solar	Firstly it is clean energy. It will take coal trucks off the road, and we do not have to mine coal---no more atmosphere deterioration. Of course the negative is the loss of jobs.	HILTON	business owner
2022-07-12 16:47:15	Eastern Cape	Yes I do	Solar	Our climate puts us in a great position to make use of solar, if we back this by large scale battery storage it will massively assist to stabilise the grid.	Richard	business owner
2022-07-12 16:21:56	Gauteng	Yes I do	Solar	We need alternative supplies ASAP as we are in an emergency situation!!!	Gerhard	business owner
2022-07-12 16:18:48	Gauteng	Yes I do	Solar		Patrick	business owner
2022-07-12 16:12:20	Western Cape	Yes I do	Solar	Our government should subsidise households to obtain renewable energy. In countries with much less sunshine than South Africa you get a bond to install solar panels and you can load your surplus energy in the grid for which you get credits for months when you need more electricity than you generate. AND on top of this the government repays the capital invested back once a year over a 20 year period. Thus only the interest on the bond is for your account. A further problem is that apart from the greedy politicians, the local authorities [municipalities] which is the middle man claims FAR to much additional costs that they add to the escom power bill - and then you have to call them repeatedly about power outage even when we do not have loadshedding. If towns in Northern Ireland, known for little sunshine can have solar "farms" it is difficult to understand why in South Africa we have to suffer loadshedding or win the Lotto to become independent from Escom. There is no good reason why we cannot have a combination of renewable energy sources [wind, sun, hydro-electricity] But I suppose the trade unions rule the country????	Hanchen	business owner
2022-07-12 16:11:27	Gauteng	Yes I do	Solar	The private sector is the only solution to the electricity demands of this country. The public sector has proven they are not capable of providing solutions to this problem. It is time the private sector is given a chance, with competition driving innovative solutions.	Bradford	business owner
2022-07-12 16:01:55	Western Cape	Yes I do	Solar	It is easy and obvious to see that for South Africa to survive in any respect that Escom is not able to supply our country's electricity requirements. Escom's failure to do so results from a disease within the ANC and their rotten and corrupt cronies. The electricity supply must be privatised into many smaller components comprised of solar, wind turbine, hydro and other sources.	Garth	business owner
2022-07-12 16:00:25	Mpumalanga	Yes I do	Solar	We have installed solar and are fully off the grid for our large property with multiple homes and workspaces. It was quick to do and works smoothly. We are not impacted by load-shedding and have excess power which we are now wasting on running heaters etc full time as we cannot sell or give it to anyone. We should be able to put our excess power into the grid. We are able to continue running our production space with a full staff compliment and no downtime for loadshedding plus it is sustainable and helps mitigate our contribution to the climate crises.	Tamar	business owner
2022-07-12 15:41:24	Gauteng	Yes I do	Solar	South Africa is a sunny country and there are already many solar plants up and running. Solar is clean, safe and reliable. Solar energy, together with wind energy should be immediately added to the grid; and all political and private agendas blocking this should be sunburned and blown away.	Ivan	business owner
2022-07-12 15:36:25	Limpopo	Yes I do	Solar	Solar energy is cheaper and faster to get operational than other energy.	Carien	business owner
2022-07-12 15:16:30	Limpopo	Yes I do	Solar		James	business owner

2022-07-12 15:12:30	Western Cape		Yes I do	Solar	We need to immediately get rid of ALL legislative barriers inhibiting independent power producers from supplying electricity to us in significant amounts. Stop making it so difficult. Gwede Mantashe needs to stop his perpetual procrastination in the hope that the Powerships deal will be approved or that coal will somehow magically suddenly be an answer. He must get to his desk, pick up his pen, and start signing documents that allow IPP's to help us ALL out of this awful fixable mess. This is no longer about petty politics - it's about people's survival.	Bryn	business owner
2022-07-12 15:04:08	Western Cape		Yes I do	Solar	If the government can step aside, we would never have blackouts as the private sector would always be more effective and efficient than an organisation managed by politicians.	Frans	business owner
2022-07-12 15:03:00	Western Cape		Yes I do	Solar			business owner
2022-07-12 14:59:22	Gauteng		Yes I do	Solar	Solar is quick to put into production to boost the emidiate need. Optimise our coal power stations and stop the theft of recourses that is ment for maintenance. Long term solution is more nuclear power stations if the correct knolagable people can be employed and retained without pushing BEE and losing people e with real skills and experience. Leave DE Ruiter to do his job and get rid of the thieves and incompetent poeple in Eskom. Stop government from intevering with the general running of our power utility. Thiefs must go to jail.	Maartens	business owner
2022-07-12 14:51:08	Gauteng		Yes I do	Solar		Hardus	business owner
2022-07-12 14:40:25	Gauteng		Yes I do	Solar	Country with sun most of the year. Even on winter days, the solar generation is an option. Projects are quicker to come online and build and maintain. Creates downstream industry which will have knock on benefits to the economy including reducing unemployment. Enable greater electricity stability for particularly small businesses who are reliant on power to grow the economy.	Michelle	business owner
2022-07-12 14:37:05	Northern Cape		Yes I do	Solar	Cut out Government CONTROL and let private enterprise supply the needs! We would have minimal blackouts, no load shedding and cheaper electricity available. Also less union capture of state enterprises.	Ken	business owner
2022-07-12 14:37:02	Northern Cape		Yes I do	Solar	Cut out Government CONTROL and let private enterprise supply the needs! We would have minimal blackouts, no load shedding and cheaper electricity available. Also less union capture of state enterprises.	Ken	business owner
2022-07-12 14:31:43	KwaZulu- Natal		Yes I do	Solar		Romy	business owner
2022-07-12 14:29:20	Gauteng		Yes I do	Solar	We are the land of perpetual sunshine. Could there be any valid reason not to use this gift?	Gerald	business owner
2022-07-12 14:22:50	Western Cape		Yes I do	Solar		Andrew	business owner
2022-07-12 14:17:41	Gauteng		Yes I do	Solar	So Eskom has clearly shown to not only SA but the entire world that it is incapable of meeting the needs presented by the SA populace. Instead of trying to hang on to control in an archaic manner, open the supply of power, however it be generated, to a free market. This will not only increase supply of power but will drive down costs too. Benefiting the people of SA as well as those who are able to produce electricity.	Leon	business owner
2022-07-12 14:11:54	North West		Yes I do	Solar		Kristin	business owner
2022-07-12 14:11:52	North West		Yes I do	Solar		Kristin	business owner

2022-07-12 12:52:20	Gauteng		Yes I do	Solar	We don't have other options at this stage if the government doesn't get its act together.	Michelle	business owner
2022-07-12 12:52:20	Gauteng		Yes I do	Solar	We don't have other options at this stage if the government doesn't get its act together.	Michelle	business owner
2022-07-12 12:52:20	Gauteng		Yes I do	Solar	We don't have other options at this stage if the government doesn't get its act together.	Michelle	business owner
2022-07-12 12:52:19	Gauteng		Yes I do	Solar	We don't have other options at this stage if the government doesn't get its act together.	Michelle	business owner
2022-07-12 12:52:19	Gauteng		Yes I do	Solar	We don't have other options at this stage if the government doesn't get its act together.	Michelle	business owner
2022-07-12 12:52:18	Gauteng		Yes I do	Solar	Government is damaging the entire economy, the earnings and job opportunities for the unemployed irrevocably by clinging to their monopoly and pathetic management of Eskom.	Amelia	business owner
2022-07-12 12:52:17	Gauteng		Yes I do	Solar	We don't have other options at this stage if the government doesn't get its act together.	Michelle	business owner
2022-07-12 12:41:58	Gauteng		Yes I do	Solar		Shaune	business owner
2022-07-12 12:37:09	Northern Cape		Yes I do	Solar	Buy back power that we can produce on our roof top's Hydro, Solar and Wind energy!	Prinsseco	business owner
2022-07-12 12:33:12	Western Cape		Yes I do	Solar	We have plenty of all! Let's use nature in harmony!!	Danelle	business owner
2022-07-12 12:30:49	KwaZulu-Natal		Yes I do	Solar		Patricia	business owner
2022-07-12 12:28:37	Gauteng		Yes I do	Solar		Les	business owner
2022-07-12 12:14:42	Western Cape		Yes I do	Solar	Wind/solar/hydro or gas are all options that will help alleviate our need because some are already waiting to get going. After that, I think that we should all be moved off all coal or nuclear power. We should not have to rely on 1 single supplier so that there is healthy competition and service level standards are kept high. Stop holding South Africans hostage with beaurocracy, nepotism and inadequacy	Tammy	business owner
2022-07-12 12:03:18	Gauteng		Yes I do	Solar	Solar power is an 'add on'. It can supplement the power supply. Coal power is still needed to generate energy capacity for factories machines etc. Solar and wind will not generate sufficient power for mines, manufacturing and machinery. Coal and nuclear will need to be used. A small coal generating plant can be erected in a couple of years	Sally	business owner
2022-07-12 12:02:48	Western Cape		Yes I do	Solar	The regulatory hurdles, excessive worker protections, undue influence of unions and above all the continuing culture of non-accountability in government and SOEs should be done away with immediately. Millions of south Africans are in poverty and being held there by the status quo and the vested interests that keep Eskom as our only electricity behemoth. There are enough skills, financial resources, ingenuity and natural electricity generating resources in our country, which should be tapped immediately.	Fabian	business owner
2022-07-12 11:57:51	Gauteng		Yes I do	Solar	we have one of the sunniest countries surely we can maximise solar energy! even if we simply start by allowing individual feedback into the grid from homes with surplus solar production...this is a practice already in place in some European countries. Other renewable energy sources can be explored equally. stop this SOE and the greed of the politicians to suck us dry through the common pool resources which we all need to live better lives! STOP THE CORRUPTION!!!	Sandra	business owner
2022-07-12 11:57:07	Limpopo		Yes I do	Solar		Maureen	business owner
2022-07-12 11:47:45	Western Cape		Yes I do	Solar	No words needed... It's time for radical change else we'll face severe economical and crime consequences..	J	business owner
2022-07-12 11:47:42	Western Cape		Yes I do	Solar	No words needed... It's time for radical change else we'll face severe economical and crime consequences..	J	business owner
2022-07-12 11:43:14	Mpumalanga		Yes I do	Solar	South Africa is a sunny country, averaging 8–10 daily sunshine hours in most regions, and is ranked 5th as one of the sunniest countries in the world. We have lot's of roof-space available. All we need is the political will to address this problem, and government to subsidize households to start pumping electricity back into the grid.	Gideon	business owner
2022-07-12 11:41:59	Western Cape		Yes I do	Solar	Our country has a lot of sunshine, and it will also allow home owners to contribute unused electricity to the grid	Jaco	business owner
2022-07-12 11:41:16	Western Cape		Yes I do	Solar	solar, wind and a combination of other green energy generation must be planed.	Coetzee	business owner
2022-07-12 11:33:54	Gauteng		Yes I do	Solar	Solar power is clean and abundant, and everything on the planet is already powered by Sol. I support any initiative which will seek to provide safe, clean (as near as possible), and immediate (nuclear actually preferred, but this is a slow process of implementation). We have, by way of example, millions of homes/factories with roofs going to waste that could collect an inordinate amount of solar energy, mall shopping centres with open uncovered parking could install covered bays using solar panels (see Makro).	Pryce	business owner
2022-07-12 11:27:30	Gauteng		Yes I do	Solar	Govt to set up a new department away from Dept Minerals & Energy with specific focus on giving IPP's support and to approve new projects within 6 months. Wind and solar energy to be main focus.	H	business owner
2022-07-12 11:25:47	Gauteng		Yes I do	Solar	We must use Solar energy as an additional power source. Private sector must be allowed to build solar plants up to 900 mega watts	Gregory	business owner

2022-07-12 11:20:17	Western Cape		Yes I do	Solar	Solar energy is the least invasive method currently at hand for energy production. Its impact on the environment is minimal. Solar panels can be added to existing structures such as buildings, houses and car ports, minimizing the necessity to buy ground for the operation. Businesses and households that adopt this method at their own cost should be allowed to use the energy they generate and feed it back into the grid for others.	Lauren	business owner
2022-07-12 11:02:18	Western Cape		Yes I do	Solar		Liza	business owner
2022-07-12 10:54:07	Western Cape		Yes I do	Solar	Many people are already using solar but cannot feed back into the grid and receive rebate	Ross	business owner
2022-07-12 10:53:39	Gauteng		Yes I do	Solar	We need a permanent solution to stop this load shedding and they must privatize eskom because the ANC has failed the people of South African	Cedric	business owner
2022-07-12 10:49:31	Western Cape		Yes I do	Solar	We must use a combination of renewables	Charles	business owner
2022-07-12 10:47:23	Gauteng		Yes I do	Solar	The sun and the wind are abundant natural resources in South Africa - to not make use of them to the detriment of generations to come is criminal.	Barbara	business owner
2022-07-12 10:34:54	Gauteng		Yes I do	Solar		Ivan	business owner
2022-07-12 10:31:16	Mpumal anga		Yes I do	Solar	Provide support for solar rooftop for residential and business premises. We need to be able to feedback into the grid for credit.	Rhodes	business owner
2022-07-12 10:26:41	Gauteng		Yes I do	Solar	Why do you give only one option for electricity production. We need a combination of the many options available, definitely coal, solar and wind, but possibly all the options should be considered, except nuclear.	Pierre	business owner
2022-07-12 10:24:33	Western Cape		Yes I do	Solar		Daphne	business owner
2022-07-12 10:23:45	KwaZulu- Natal		Yes I do	Solar		Desiree	business owner
2022-07-12 10:23:02	KwaZulu- Natal		Yes I do	Solar	Solar is the easiest way to distribute power across South Africa and support target areas of need. Wind-generated power is also a good option for selected areas then can help the local and national grids.	Gavin	business owner
2022-07-12 10:06:00	Gauteng		Yes I do	Solar	We live in a sunshine country and solar is less invasive on nature than generation by wind.	Danie	business owner
2022-07-12 10:01:11	Gauteng		Yes I do	Solar	Solar is a solution due to SA's climate, Wind and Hydro are also good options. Environmentally friendly and renewable.	MELANIE	business owner
2022-07-12 09:53:13	Western Cape		Yes I do	Solar	We have an abundance of free sunshine, even in Winter. We could utilize this to generate more electricity. Consumers who are currently generating their own electricity via solar, should be given an incentive via a rebate. Also the possibility of feeding excess electricity back into the grid for the good of all.	Anneke	business owner
2022-07-12 09:48:09	Western Cape		Yes I do	Solar	Full support for speedy integration of renewables , Competent private sector engagement with full experience on the matter .	Hernan	business owner
2022-07-12 09:36:42	KwaZulu- Natal		Yes I do	Solar	Not only solar but we should be open to all.sources of electricity that is affordable and promote a healthier environment.	Marushka	business owner
2022-07-12 09:32:21	Gauteng		Yes I do	Solar		Kungeka	business owner
2022-07-12 09:19:54	Gauteng		Yes I do	Solar	I think that a combination of the options available might be implemented to resolve our energy crisis depending on the region in question. Some areas have great water resources in which case Hydro power would be a good alternative. In other areas a combination of wind and solar could be utilized to end the power shortages. In short our country needs to URGENTLY find alternatives to solve the problem and leaving it to the Government to resolve would be a fatal error. The needs of the population of South Africa are not receiving the required, urgent attention and politics, faction struggles and corruption is bringing our economy to it's knees. Something has got to be done and very quickly.	Louisa	business owner
2022-07-12 09:16:56	Western Cape		Yes I do	Solar	There are a plethora are private companies that have a host of power solutions that could assist in lessening the load shedding crisis, and give power to homes and businesses. Surely working together in collaboration, instead of opposing each other, could deliver a positive outcome for all South Africans? After all, we all want the same thing. To sustain our businesses, improve our economy, and sustain our homes.	Tracy	business owner
2022-07-12 09:12:24	Gauteng		Yes I do	Solar	YES!! to renewable power ,only- let the tendering process be an open book!! Let it not become another cash cow for the blatant looters inside Eskom and Government. We know why they don't want " green energy", THE SUN WIND AND WATER CAN'T VOTE FOR THEM ! However the eneregy minister's lack of vision and (self serving agenda) makes him not oblivious to the huge beneficial ripple effect that reliable power will have on the economy and JOB CREATION !!! SO YES INDEED TO GREEN ENERGY !!!	ANGELA	business owner
2022-07-12 08:58:44	KwaZulu- Natal		Yes I do	Solar	We need any source if energy available to add to the grid including wind, turbine and the private sector immediate input. Stop paying Eskom employees exorbitant salaries with no accountability for maintenance being done.	BELINDA	business owner

2022-07-12 08:53:05	Western Cape		Yes I do	Solar	It has become extremely clear that Eskom cannot be relied upon to provide consistent electricity supply, but they are also gatekeeping other producers of electricity from contributing to fixing the problem. It is essential that we allow IPPs to safely put power back into the grid wherever possible to balance the load and provide more reliable electricity. This would likely also benefit more remote communities where renewables are extremely viable.	Gillian	business owner
2022-07-12 08:40:40	Gauteng		Yes I do	Solar	There is not reason whatsoever to still be reliant on fossil fuel or nuclear energy production sold exclusively by Eskom. The plans for moving to sustainable energy sources has been long in place, and waiting for implementation. If this needs to happen via the private sector, then so be it.	Jacqueline	business owner
2022-07-12 08:25:03	Gauteng		Yes I do	Solar		Surita	business owner
2022-07-12 08:24:33	Western Cape		Yes I do	Solar	We need to have alternative electrical sources to save SA	Carol	business owner
2022-07-12 08:14:41	Gauteng		Yes I do	Solar		Ronald	business owner
2022-07-12 08:08:24	Eastern Cape		Yes I do	Solar		Mary	business owner
2022-07-12 08:07:49	Western Cape		Yes I do	Solar	We need to privatise our power suppliers. Many small solar related business' should be able to contribute to /feed in to the grid. Green energy not fossil fuel. Wind, solar and hydro power can all be used to contribute to the grid. This also opens up the areana for many small business to gain.	Michelle	business owner
2022-07-12 08:04:28	Western Cape		Yes I do	Solar		Lize	business owner
2022-07-12 07:58:00	Free State		Yes I do	Solar	Ons bky in n sonskyn Land dus kan die Son se krag so n verskil maak. Dit is net ongelooflik duur vir n Huishouding om op sonkrag te gaan. Tog sal dit die beste oplossing wees	Marlene	business owner
2022-07-12 07:40:21	Western Cape		Yes I do	Solar	Any supplementation would help us right now. We have so many resources that we can harness to get us out of this mess! Let's utilize them and put together all the great minds in this country! Together we can do it!	Carolize	business owner
2022-07-12 07:39:20	Gauteng		Yes I do	Solar	Eskom with its deployed cadres is incapable of sustaining a modern economy. The Minister of minerals and energy is out of touch with reality and the situation is played out with load shedding and little to no economic growth. We have the ability for independent power producers to supply electricity via coal, wind and solar.....however this supply will not be under ANC control for tender and cadre deployment purposes and thus the government's reluctance to solve the problem.	Gary	business owner
2022-07-12 07:33:51	Western Cape		Yes I do	Solar		David	business owner
2022-07-12 07:18:35	KwaZulu- Natal		Yes I do	Solar	We are in such a crisis now, that every viable option should be accelerated through the private sector to give the economy a chance to recover. Most power infrastructure takes a long time to build and requires significant capital investment however solar and wind is quicker and less expensive. Give individuals and businesses an incentive to invest in their own solar power to quickly ramp up supply and take some pressure off the grid, while national projects are underway. Allow private power suppliers to feed the grid where possible, for a small rebate. Every kwh helps. Incentive private household to switch to gas cookers and geysers as was done a few years ago when Eskom co-funded solar geysers. Go for quick wins with smaller power creation systems - give municipalities the legal right to source power from outside Eskom. Ensure the major projects are owned by private companies without government involvement so they can be run efficiently, and keep BEE out of it so there is a chance of companies getting the job done within budget without stealing the money. Let's learn from the past mistakes in government and at Eskom.	Cindy	business owner
2022-07-12 06:41:38	Western Cape		Yes I do	Solar		Eva	business owner
2022-07-12 06:36:50	Western Cape		Yes I do	Solar	We currently have a need for 20 gigawatt power in this country. The only solution and by far the cheapest and quickest implementable solution is wind and solar stations. The long term maintenance of such power stations are also a lot less than your coal stations. It's also very cheap to generate. As a business owner I am losing a lot of turnover and will are all ready looking to let go 15% of my workforce in Aug. Regards Francois van Eeden	Francois	business owner
2022-07-12 06:28:00	Gauteng		Yes I do	Solar	We know from extensive experience over the past 20 years that Government does not know better about how to produce electricity. Please allow the private sector to figure out how to achieve this!!!	Christiaan	business owner

2022-07-12 05:39:18	Western Cape		Yes I do	Solar	Solar wind and hydro.... we have plenty of sun and wind. Scrap the restrictions and potential penalties for home owners and give rebates and incentives to make solar power accessible to all. Let every roof in SA become a energy source.	Andrea	business owner
2022-07-12 02:25:32	Gauteng		Yes I do	Solar	Small scale contributors according to acceptable standards and safety applications can contribute substantially to the Electrical network supply stability.	Fanie	business owner
2022-07-12 01:01:05	Outside SA	Canada	Yes I do	Solar	Clearly renewables (nuclear, solar, wind) is the sustainable solution that can be augmented by other production forms. God luck Minister Gordhan.	Nic	business owner
2022-07-12 00:55:36	Gauteng		Yes I do	Solar	Wind, solar, gas would suit SA's immediate needs. In addition to DMRE & Nersa & Eskom red tape, BBBEE requirements should also be suspended for at least 5 years to enable competent IPPs to get electrons onto the grid without delay. If there is no energy / power shortage the economy can grow. If the economy grows jobs will be created and all South Africans will be better off. BBBEE has not led to job creation and South Africans are becoming poorer and poorer despite BBBEE.	Elzette	business owner
2022-07-12 00:50:25	Gauteng		Yes I do	Solar	ANC and Cyril, this should have been done years ago, now you want our opinion...seems fishy, I am all for new companies who can offer renewable energy BUT we should not give ANC power to choose their friends for this tender with absolute NO idea what they are doing. We need accountability on who gets chosen. I think it is time ANC should be forcefully removed as the ruling party for doing so much DAMAGE and all the CORRUPTION, they are bleeding us dry! We are tired of your BS!	Rensche	business owner
2022-07-11 22:57:45	Western Cape		Yes I do	Solar		Stefan	business owner
2022-07-11 22:18:28	Gauteng		Yes I do	Solar	We have a lot of sun and wind power, it must just be utilised. It will create new jobs and help South Africa to move forward. The economy is taking a severe pounding with Eskom not being able to supply enough electricity for the demand. The man on the street is AGAIN bearing the brunt of years of mismanagement, corruption and this is unfair and plain wrong!!	Charlene	business owner
2022-07-11 22:18:28	Gauteng		Yes I do	Solar	We have a lot of sun and wind power, it must just be utilised. It will create new jobs and help South Africa to move forward. The economy is taking a severe pounding with Eskom not being able to supply enough electricity for the demand. The man on the street is AGAIN bearing the brunt of years of mismanagement, corruption and this is unfair and plain wrong!!	Charlene	business owner
2022-07-11 22:15:49	Gauteng		Yes I do	Solar	I think solar or wind or even hydroelectric power. Less keen on coal for environmental reasons. But we have a lot of sun and wind. The position at the moment is ridiculous - not sure how people are supposed to work with power off regularly and often not coming on again when it is meant to. It costs the economy of the country now and will be more severe in the future because we are wasting time. The poor are worse off than ever and everyone has to suffer at increased prices, and for those who can ,having to spend extra money on other forms of power and then still pay for electricity we do not have is untenable. The sooner we allow PPE's the better - it creates competition as well as giving us much needed power and takes the monopoly away and hopefully minimizes the temptation to plunder what belongs to all of us!! Any way to minimize corruption is of benefit to all!	Mcgill	business owner
2022-07-11 22:10:15	Gauteng		Yes I do	Solar		Piroska	business owner
2022-07-11 21:41:06	Northern Cape		Yes I do	Solar		Catherine	business owner
2022-07-11 21:32:39	North West		Yes I do	Solar	We live in a country that has no shortage of sun during the year, even areas like the cape could harness wind power to help our country get rid of load-shedding and the burden of Eskom. We would be stupid not to pursue any and all means to get our country's power back up to 100% generation capacity. This is destroying the livelihoods of the poor and the middle class- and not to mention our businesses that many rely on for income and taxes. We NEED to scape the red tape surrounding Independent Power Production, we need to make importing and producing alternative power sources cheaper and we need to do it right now.	Kate	business owner
2022-07-11 21:31:08	Western Cape		Yes I do	Solar		Thomas	business owner
2022-07-11 20:57:41	KwaZulu- Natal		Yes I do	Solar	It is quick, we have the space, we have abundance of sun!	Blanché	business owner
2022-07-11 20:51:36	North West		Yes I do	Solar	Surely this is a no Brainer. What are these people doing from month to month earning whopping salaries and accomplishing nothing. The solution is right in front of them but they just can't help holding onto their perception of power. Wake up! It's obvious what you can do.	Cynthia	business owner
2022-07-11 20:48:26	Western Cape		Yes I do	Solar	Allow the public to push back into the grid by opening the electricity grid to the private sector. We have had enough of the incompetence of the government who has clearly proved incapable of solving the electricity problem in the country, to the detriment of the entire nation!!	Chris	business owner
2022-07-11 20:45:43	Free State		Yes I do	Solar		Pat	business owner
2022-07-11 20:43:39	Western Cape		Yes I do	Solar		Angela	business owner
2022-07-11 20:40:11	KwaZulu- Natal		Yes I do	Solar		Robin	business owner
2022-07-11 20:38:44	KwaZulu- Natal		Yes I do	Solar	It is time that South Africa allows for competition to state owned power providers, as the state owned entities clearly can't function and provide what the country needs.	Nicholas	business owner

2022-07-11 20:34:22	Gauteng		Yes I do	Solar	Allowing any citizen to use private solar systems & sell electricity back to the state	GD	business owner
2022-07-11 20:33:16	KwaZulu-Natal		Yes I do	Solar	I believe we have many opportunities in many cities to use many methods of producing power. Solar, wind and hydro would be a great solution as some areas have seen this function well.	Kirsten	business owner
2022-07-11 20:29:44	Gauteng		Yes I do	Solar	Invest in alternative power where it belongs. Windfarms are very effective where wind conditions prevail. Solar and CSP plants are very ennergy effective with the lowest generation costs. RSA has the perfect sunshine for this.	Gustav	business owner
2022-07-11 20:11:00	Western Cape		Yes I do	Solar	Solar for an immediate support of the grid, BUT its not viable to produce the magnitude of energy needed. Eg. 1MW solar demand many hectares of land, while eg. at Koeberg 1 generating unit = 960MW. I agree that for SA, nuclear is the only (greenest) answer for the next 30 years, also assuming that Pelindaba can be restored to enrich our own Uranium again. Thereafter renewables could be developed well enough to start producing MW of the magnitude required. The challenge remain how to integrate private producers into the national grid.	Jan	business owner
2022-07-11 20:03:48	Western Cape		Yes I do	Solar	Coal only for immediate needs and the next 2 years. We do need to get off the coal train and embrace Solar and Wind and Hydro. Stop thinking about how government can make money from power. Japan and Switzerland have recently launched water turbine projects that will cover so much of their power requirements. We need to think about what can empower people and create new opportunities. Freedom from bad power administration and maintenance. So many existing jobs can be moved into renewable energy fields.	Craig	business owner
2022-07-11 19:56:25	Gauteng		Yes I do	Solar		Jan-Harm	business owner
2022-07-11 19:49:16	Western Cape		Yes I do	Solar	8 Years awaiting the Minister of Energy to sign off on green energy, no reason to wait any longer.	Gert	business owner
2022-07-11 19:36:56	Gauteng		Yes I do	Solar	A combination would be best. It's a no Brainer.	Patricia	business owner
2022-07-11 19:35:18	Gauteng		Yes I do	Solar		Jan Brink	business owner
2022-07-11 19:34:15	Gauteng		Yes I do	Solar	SA should follow suit like other countries where government helps citizens put solar in their homes, homes can often produce more power then what's needed so it feeds back into the grid and comes off people's bills. Scrap the law that prohibits us from being off grid	Rudolph	business owner
2022-07-11 19:15:45	Northern Cape		Yes I do	Solar		Wessel	business owner
2022-07-11 19:12:54	Gauteng		Yes I do	Solar	So many experts have made valuable inputs but nobody is as death as the one who are not interested in hearing. The nation is on the verge of turning their backs on all sorts of government need for control. I fully support the notion that not only form of energy generation should be promoted at the cost of the other. Fossil fuel based (coal and gas) has served is time and we are a country of diverse forms of energy that can be harvested yet Government is on the Nuclear horse and all efforts and attempts are made to get us in a hole where it will be the only solution. The excuses and nothing other than grappling at straws when turning to the Pandemic, as an excuse. Please people, do not underestimate our intelligence, we all know what the problem is and the longer you postpone the less financial support will be coming from those who carried the economy and country for the past 25 years. They are also the once who will divest into systems ensuring they can operate completely off the grid. In whose interest is Mr. Mantashe acting in not allowing PPP's to be connected to the grid or to issue licenses - definitely not in the poor they so easily drag into every debate . In the mean time the economy is suffering, retracting and more and more jobs are lost everyday. Surely not a way to react when expecting to turn the country around. Stop being the specialist in everything and allow the real specialist to provide directive. Shame on you!!!	Dricus	business owner
2022-07-11 19:11:19	Gauteng		Yes I do	Solar	Becoming cheaper and readily available. Wind also viable	Michael	business owner
2022-07-11 19:11:16	Gauteng		Yes I do	Solar	Becoming cheaper and readily available. Wind also viable	Michael	business owner
2022-07-11 19:10:46	Western Cape		Yes I do	Solar	they are a service provider like any other business if i do not like there service then i go to the one that can supply me the items or service i require ,i dot care if they are a government organisation or not ,they are like all the other ones that failed in the last 25 jr	scully	business owner
2022-07-11 18:52:01	Gauteng		Yes I do	Solar		Deborah	business owner

2022-07-11 18:44:19	Gauteng	Yes I do	Solar	<p>Only a single solution is permitted. It may be a combination of a number of solutions depending on the terrain and interest of the IPP and the according preference of the relevant Funder.</p> <p>Solar / Wind / Hydro : whatever is the quicker to deliver; cost effective a and sustainable in the ongoing term - and training offered in terms of maintenance and ongoing support. This will also promote jobs in support of our ailing economy.</p> <p>Noone is asking why we continue to supply (and concomitantly support the economies of) some 7 neighbouring Counties with power whilst we suffer ongoing blackouts and our economy, Agency Ratings and currency values diminish?</p> <p>To which Country are these (no doubt USD) payments made and if it is SA - to what are they applied. ? Certainly not to maintenance .</p>	Cynthia	business owner
2022-07-11 18:40:14	KwaZulu-Natal	Yes I do	Solar		Trevor	business owner
2022-07-11 18:39:41	North West	Yes I do	Solar	This country has suffered enough through corruption, theft, mismanagement of funds, cadre employment, fruitless spending through the ANC and EFF, where all the above lead to state capture to the detriment of the people of SA where these over R1Trillion lost over the past 28 years could have been used to subsidises and implement better schools, better hospitals, better roads, better education, better food supply, better petrol prices, better employment etc, better electricity, now being deprived from the people of SA due to the above	D	business owner
2022-07-11 18:38:34	North West	Yes I do	Solar	This country has suffered enough through corruption, theft, mismanagement of funds, cadre employment, fruitless spending through the ANC and EFF, where all the above lead to state capture to the detriment of the people of SA where these over R1Trillion lost over the past 28 years could have been used to subsidises and implement better schools, better hospitals, better roads, better education, better food supply, better petrol prices, better employment etc, better electricity, now being deprived from the people of SA due to the above	T	business owner
2022-07-11 18:36:54	Gauteng	Yes I do	Solar	We have large arid areas with plenty of sun and very little commercial use	Allan	business owner
2022-07-11 18:34:23	Western Cape	Yes I do	Solar		Michael	business owner
2022-07-11 18:33:50	Western Cape	Yes I do	Solar		Lorna	business owner
2022-07-11 18:23:48	Western Cape	Yes I do	Solar	Solar and/or a combination of clean renewable resources. Possibly wind and nuclear.	Jenny	business owner
2022-07-11 18:14:21	Gauteng	Yes I do	Solar	<p>WE NEED TO GET A TAX BREAK ON SOLAR INSTALLATIONS AND OLD FOSSIL MINISTERS SHOULD BBE RETIRED AND SOUTH AFRICAN LEADERSHIP NEEDS TO EMBRACE A NEW INVIGORATING AND BUSINESS SAVY APPROACH. VOETSEK TO CADRE USELESS DEPLOYMENT. WE ARE SICK OF IT.</p> <p>SOUTH AFRICANS ARE SICK TO DEATH OF INEPT ANC FOSSIL MINISTERS AND MEMBERS, LYING, CHEATING, CORRUPT POLITICIANS AND CORRUPT ACTIVITIES AND INCOMPETENT WASTING MONEY AND MAKING BUM DECISIONS.</p>	PATRICIA ANN	business owner
2022-07-11 18:13:49	Western Cape	Yes I do	Solar	There is space and sunlight aplenty for solar farms. The Western Cape should also look at offshore wind turbines. Probably need to bring in gas in the short term.	Maryam	business owner
2022-07-11 18:13:25	Gauteng	Yes I do	Solar	We have an abundance of sunshine in our country for free! Just need Govt to buy in and rather assist in making this a cheaper option for everybody to afford	Wanda	business owner
2022-07-11 18:12:52	Gauteng	Yes I do	Solar	This country has suffered enough through corruption, theft, mismanagement of funds, cadre employment, fruitless spending through the ANC and EFF, where all the above lead to state capture to the detriment of the people of SA where these over R1Trillion lost over the past 28 years could have been used to subsidises and implement better schools, better hospitals, better roads, better education, better food supply, better petrol prices, better employment etc, better electricity, now being deprived from the people of SA due to the above	A	business owner
2022-07-11 18:03:58	Western Cape	Yes I do	Solar	It has been abundantly clear that by our current energy supplier that competition in any market is a good practice; it creates a fair market and promotes both employment as well as competitive pricing.	Christopher	business owner
2022-07-11 17:56:55	Gauteng	Yes I do	Solar	Sunny South Africa must construct large scale solar generation plants, with the latest technology these solar farms can even produce electricity on overcast days, which we have few of.	Theo	business owner
2022-07-11 17:56:25	Mpumalanga	Yes I do	Solar	In south africa we have plenty of sunshine each n every day which goes to waste because its not being harvested. If we can harvest it, it woud solve our current electricity shortage.	Siboniso	business owner
2022-07-11 17:48:34	Limpopo	Yes I do	Solar	If everyone who had solar could feed excess into the grid at a benefit to the producer. We would have a definite growth in the capacity of the grid	Desmond	business owner
2022-07-11 17:39:42	Gauteng	Yes I do	Solar	There is enough evidence that solar energy is more affordable and sustainable than the nuclear, wind or water generating power, it's available throughout the year and can be used alone or in support of the current grid to avoid load shedding and unnecessary power shortages. Need investment on batteries and solar panels but in the long run will need less maintenance.	Misael	business owner
2022-07-11 17:35:30	Limpopo	Yes I do	Solar		Johann	business owner

2022-07-11 17:34:06	Western Cape		Yes I do	Solar	I believe that we need to immediately start using renewable energy. Eskom is not a sustainable option as it uses fossil fuels which are not renewable. We are damaging our environment and contributing greatly to global warming. Apart from this the problems at Eskom not only currently, but over almost a decade, have been hurting our economy badly and are killing our country. It is almost impossible for small business owners to keep their heads above water with increasing electricity prices for less electricity, suffering under load shedding as well as increased fuel prices, which make the use of generators incredibly expensive (not to mention that this is also not a renewable energy source!). There are multitudes of organisations that have petitioned to start supplying sustainable energy from their surplus generated and I believe it is time to let them do so.	Sussana	business owner
2022-07-11 17:33:20	Gauteng		Yes I do	Solar	Zenergy South Africa has a affordable solution which can provide all South Africans with electricity and electric mobility. Systems: A PV/ DC (160W panel) supplying a Battery that has a integrated charge controller directly. The battery (350Wh) Lithium LifePo4 feeding or powering DC appliances and lights directly. The P-Series solar home system enables a 6-10 rooms off-grid home enjoy 6-8 hours lighting, watching 10 hours TV per day. It can also power the DC fan, 4000 Lumens big lighting system, DC amplifier, DC sewing machine, DC refrigerator, satellite decoder for TV, charge 4 cell phones and the radio. The same type of system will be supplied with the Z88 electric scooter, giving you 100km-140km Range per charge with swop over batteries for a delivery function doubling the range. The P-Series is endorsed by the World Bank and has a "pay as you go" function which can support the private sector or businesses investing in their employees wellbeing. The system also has a error code function which uses WiFi to report any problems that might occur in real time for efficient servicing and maintaining of the system. All DC products and appliances are supplied by us. Make use of the J12 tax benefits, in turn lowering all companies SDG's to meet their over all commitment and carbon footprint which will effect their future SDG score positively. The Z88's benefits include, lowering congestion, fuel prices, maintenance, green tech, lower TCO, easy parking, app's for information gathering beneficial for transport authorities, city planning. For more information please contact us for a free demo and more information. Zenergy South Africa (Ziggy Rudman-CEO) +27 76 4343 252 / zenergyziggy@gmail.com	Lubos	business owner
2022-07-11 17:22:22	Free State		Yes I do	Solar	This is a no-brainer. Pity the powers that be are powerless to maintain a world-class energy-producing company, Eskom. What we have is sun, investors, and a dire need for more electrical clean power. ANC, let go of your power-mongering and allow all who wish to produce electricity to do so. Reward them for their initiative and entrepreneurship.	Roy	business owner
2022-07-11 17:20:11	Gauteng		Yes I do	Solar	Although I have selected Solar, I believe a mix of energy between Solar, Wind and Gas would be best. The main thing is to scap all and any limitations to electricity production including localisation, BEE, Cadre corruption, Energy Production limits etc. AND ensure that citizens and companies can sell electricity back into the grid.	Shane	business owner
2022-07-11 17:14:19	KwaZulu- Natal		Yes I do	Solar		Jon	business owner
2022-07-11 17:10:39	Western Cape		Yes I do	Solar	It's a sunny country and solar power could be put to good use for many public services such as traffic lights etc. It should have been designed that way to begin with.	Heideli	business owner
2022-07-11 17:05:03	Western Cape		Yes I do	Solar	Any form of green energy that does not harm should be used. SA is in desperate need of different options. Eskom hasn't been able to provide the service that they are contracted to supply so why give them a million chances? If a supplier does not deliver, we should be allowed to go with someone else.	H	business owner
2022-07-11 17:04:39	Western Cape		Yes I do	Solar	Incentives to be given to all households who has already added solar and back-up systems, thus assisting Eskom to cope with the current load. Get the white engineers back at Eskom and get rid of the corrupt politicians and Eskom incompetent so called engineers and technicians. Once the old regime us back, you will see a change like never before. The problem is the ANC and the corruption and failure to maintain the system. Since apartheid the whole country is collapsing	Estelle	business owner
2022-07-11 16:48:24	Gauteng		Yes I do	Solar		Candice	business owner
2022-07-11 16:43:34	Gauteng		Yes I do	Solar	Solar and wind are no brainers in a country like South Africa.	Martin	business owner
2022-07-11 16:40:26	Gauteng		Yes I do	Solar	We have sufficient sun in our sunny country	Ellenette	business owner
2022-07-11 16:17:00	Western Cape		Yes I do	Solar	Anything is better than Eskom and we have more than enough sun in SA to generate power using these & the wind in the Western Cape.	Barbara	business owner
2022-07-11 16:08:38	Gauteng		Yes I do	Solar		Delia	business owner
2022-07-11 16:05:16	Gauteng		Yes I do	Solar	If this does not happen ASAP, many small businesses will need to shut down permanently, putting SA into an unfathomable crisis. Let private companies/ institutions generate and sell electricity for crying out loud!!!	Josh	business owner
2022-07-11 15:58:40	Gauteng		Yes I do	Solar	Solar / wind farms can greatly assist with generation of power generation and the country should reduce its dependance on coal. Solar and wind is also much more environmentally friendly.	Matthew	business owner

2022-07-11 15:57:26	Western Cape		Yes I do	Solar		Michelle	business owner
2022-07-11 15:57:18	Western Cape		Yes I do	Solar	We seem to have plenty of competent independent power producers. Let's get them working for SA ASAP!	Lisa	business owner
2022-07-11 15:55:43	KwaZulu- Natal		Yes I do	Solar	Solar power is available right now from many pre-existing installations and will be easy to scale up should private electrical generation be allowed. I.E. many private installations could be increased in size by adding additional panels and inverters. This could also be self-funded given sufficient incentive.	Jeremy	business owner
2022-07-11 15:54:06	Gauteng		Yes I do	Solar		Brett	business owner
2022-07-11 15:53:24	Gauteng		Yes I do	Solar	Solar is the best and quickest solution. Rooftops of businesses and homes could be used for this. I know of some people that have converted their homes to be 90% self sufficient just with solar energy. SA has the vast open spaces in sectors to be able to have solar farms built.	Ryan	business owner
2022-07-11 15:44:17	Western Cape		Yes I do	Solar	We're a sunny country with infrastructure to support solar. It is a clean and reliable energy source.	Roxanne	business owner
2022-07-11 15:39:08	Limpopo		Yes I do	Solar		Anton	business owner
2022-07-11 15:32:00	Gauteng		Yes I do	Solar	It is obvious that the private sector is the best equipped to assist with the shortage. We as the public should also be allowed to purchase our power from any resource not from Eskom as Eskom has failed miserably due to the Government using it as a way to create jobs and highly paid jobs at that. If we outsource energy more and more people will be able to purchase it against a more competitive price and this in return will also create true jobs. The Government should never have been allowed in our schools, medical facilities, aircraft industry, post office etc. These will be profitable and well functioning sectors if the Government stayed OUT. They only misuse it for high salaries. We as the voters must keep them out of our private sectors and take back our country.	Lynn	business owner
2022-07-11 15:24:30	Limpopo		Yes I do	Solar		Prinsloo	business owner
2022-07-11 15:20:30	Gauteng		Yes I do	Solar			business owner
2022-07-11 15:17:29	Gauteng		Yes I do	Solar	Govt must stop holding back wind and solar projects in the karoo and furthermore allow citizens to put electricity back into the grid if they have excess capacity.	jacques	business owner
2022-07-11 15:17:15	Gauteng		Yes I do	Solar	We need an immediate solution!!!	Mario	business owner
2022-07-11 15:12:09	Gauteng		Yes I do	Solar	We need an immediate solution! Small businesses cannot do this any more!	Sanet	business owner
2022-07-11 15:11:43	KwaZulu- Natal		Yes I do	Solar		PATRICK	business owner
2022-07-11 15:07:50	Western Cape		Yes I do	Solar	Every household that could afford erecting solar panels and sell to Eskom is the most cost effective immediate solving of the energy crises in SA	Dries	business owner
2022-07-11 15:06:24	Gauteng		Yes I do	Solar	This county ahs exceptionally high number of days of sun compared to elsewhere. the Northern Cape and Karoo regions are fantastic opportunities at providing cheap efficient solar energy. This will have a economic boost in creating jobs, lowering the fossil fuel dependency and clean for the environment. Also allow for small IPPs. I have recently installed a system in my home that produces more day time electricity that I am currently wasting. I produce enough electricity to power three homes. Having the ability to send this electricity back to the grid would be fantastic as I have already reduced my dependency by about 70%.	Anesh	business owner
2022-07-11 15:04:23	Western Cape		Yes I do	Solar	A mix of electricity would work the best-let's just get a move on & DO something!	Gail	business owner
2022-07-11 15:03:44	Gauteng		Yes I do	Solar	There is very dire need to bring on new energy generation to the grid. The quickest way in achieving this is through renewable energy. Our economy including myself are loosing business during load-shedding. We as a business have already had to let go of 2 x staff members as we can't afford to keep them any longer due the energy crisis we have.	Michael	business owner
2022-07-11 15:02:46	Western Cape		Yes I do	Solar		Astrid	business owner
2022-07-11 15:00:17	Gauteng		Yes I do	Solar	In the current situation, with many of our coal-fired, base-load power stations either out of action or performing poorly, the fastest method of adding new power generation to the grid is solar PV. South Africa no longer has the luxury of deciding which route to take to solve the current crisis: only solar PV can add power to the grid in a short (1-2 years) space of time. This decision needs to be made now. Once made, South Africa should revisit its decision to move away from fossil-fuel powered generation, and instead focus on restructuring (in the business sense - including optimising) Eskom and liberalising the power-generation market.	Chris	business owner
2022-07-11 14:47:04	Gauteng		Yes I do	Solar		Kate	business owner
2022-07-11 14:45:48	Gauteng		Yes I do	Solar	South Africa has a lot of sunshine and is therefore able to generate a large amount of solar power	Linda	business owner

2022-07-11 14:41:44	Gauteng	Yes I do	Solar	South Africa has almost the most sun-days of any country in the world! A number of years back several big companies offered the government alternative sources of power which were rejected by the "Einsteins" of the day as "it was all under control"(meaning the plundering of Eskom was still in progress! In most countries the user is paid for reversing unused electricity into the grid. If a poor country like Vietnam can get this right then surely we can do better, the one main difference being that thieves are shot for the crimes that are not brought to book in this country	john	business owner
2022-07-11 14:41:07	Mpumalanga	Yes I do	Solar		Paul	business owner
2022-07-11 14:37:49	Gauteng	Yes I do	Solar	Wind and solar can be made available at relatively short notice if only red tape is scrapped. But currently dealing with Nersa and municipalities is impossible. Load shedding is a national catastrophe - the Government doesn't seem to realise how it damages investment confidence and chases investment away. All that is needed is for Government to provide an enabling environment - NO RED TAPE - and get rid of local content rules for an emergency 2 year period. The private sector can supplement the grid, and given our abundant national resources, it is almost treasonous that the Government cares so little for the poor, who suffer the most, that they do not have the political will to end this catastrophe.	Keith	business owner
2022-07-11 14:31:53	Eastern Cape	Yes I do	Solar	I support wind, solar and hydro electricity generation methods. Red take should have been removed decades ago. Our only electricity supplier, Eskom, has been taking a downward turn for a long time. Competition will motivate consistent availability as well as reliability. Independent power producers will also place strict controls on illegal connections which is clearly not being managed and resulting in further losses.	Vicky	business owner
2022-07-11 14:30:29	Gauteng	Yes I do	Solar	Government should outsource power generation as they've proven their incompetence to do so. NO nuclear power should be allowed, which is aimed at self-enrichment and benefitting their 'friends'. The red tape should be cut to allow IPPs to generate solar, hydro and wind power which must be sold directly to consumers.	Rhona	business owner
2022-07-11 14:28:51	Gauteng	Yes I do	Solar	Make use of the sunshine in sunny SA	ROZANNE	business owner
2022-07-11 14:26:36	Western Cape	Yes I do	Solar	The previous question should have allowed multiple choices..! Solar wind, hydro and, coal.. Should all form part of the solution	Ian	business owner
2022-07-11 14:26:08	Western Cape	Yes I do	Solar	We have, as soon as possible, get rid of all only government supplied services to the citizens in SA. This will give more competition and lower prices.	Ria	business owner
2022-07-11 14:08:18	Gauteng	Yes I do	Solar	We have ample sun and not enough competition in the power production space. I think that independent producers should supply power in whatever way they can, within ecological and safety parameters etc and the citizens should be allowed to buy from whomever they want at whatever price they want. Free market trade means competitive quality and price supply.	Cynthia	business owner
2022-07-11 14:03:51	Northern Cape	Yes I do	Solar		Maryna	business owner
2022-07-11 14:02:12	Gauteng	Yes I do	Solar		Eugene	business owner
2022-07-11 14:02:10	Gauteng	Yes I do	Solar		Eugene	business owner
2022-07-11 13:54:34	Eastern Cape	Yes I do	Solar	We cannot afford to wait any longer for Eskom to come to light. Our economy is bleeding to death. The quickest way to restore stable power supply must be implemented immediately.	Jakkie	business owner
2022-07-11 13:53:57	Gauteng	Yes I do	Solar		Elsabe	business owner
2022-07-11 13:52:19	Western Cape	Yes I do	Solar		Ali	business owner
2022-07-11 13:52:12	Gauteng	Yes I do	Solar		Elrie	business owner
2022-07-11 13:43:38	Eastern Cape	Yes I do	Solar	Depending on the region - solar primarily, but there are many established wind farms in different parts of the country that could make an immediate significant contribution to power supply.	Tammy	business owner
2022-07-11 13:43:22	Gauteng	Yes I do	Solar	No need for eskom to have monopoly . They are incompetent and corrupt. We as south africans demand competent and reliable source of power	Lizette	business owner
2022-07-11 13:37:25	Western Cape	Yes I do	Solar		Paul	business owner
2022-07-11 13:34:30	Western Cape	Yes I do	Solar	South Africa has plenty of sunlight time and so I believe Solar energy is the best option for creating renewable, clean energy which solves our loadshedding challenges and ensures we start to build an energy supply which is good for the whole planet. I also believe that we have all the IP and skills as well as many Independent groups with the capability to act fast.	Robyn	business owner
2022-07-11 13:29:18	Gauteng	Yes I do	Solar	I believe a hybrid strategy is required where multiple sources / types of energy are used. Solar is my preference because it has worked for me personally and I have seen it work in large private and industrial environments but I also understand that a hybrid strategy is required. Our economy is already a mess and we desperately need an energy solution now just to survive in the future, never mind thrive. Whoever reads this, please take action for the sake of our citizens and all of our children	Donovan	business owner
2022-07-11 13:28:30	Gauteng	Yes I do	Solar		Hadey	business owner

2022-07-11 13:26:26	Western Cape		Yes I do	Solar	Living in sunny SA, if independent power producers could install more solar powered plants, the entire SA will have more than enough electricity. We have the resources. Let's use them. Since solar is not a constant base load it is also important to supplement this with other renewables such as tidal power - we have a very long coastline (about 2500km I think) so surely there must be plenty of suitable spots for such power stations. Whatever the supply, the main consideration should be to privatise right away without government interference and control. And finally, users should be taught that electricity is a utility to be paid for, not a human right.	Martin	business owner
2022-07-11 13:17:26	Gauteng		Yes I do	Solar	Not one solution but solar, wind and hydro add up to a huge and quick solution to supplementing Eskom	Bruce	business owner
2022-07-11 13:14:41	Western Cape		Yes I do	Solar	Why are the government still dilly-dallying around this issue when the country is experiencing a crisis because of load shedding. We need IPP's to deliver power to the grid urgently to counteract load shedding and reduce the impact it is having on the economy. All forms of renewable energy should be prioritized.	Max	business owner
2022-07-11 13:13:09	Eastern Cape		Yes I do	Solar	We need to prioritise renewables. Heat generated by solar power can now be STORED in a sand heat sink and utilised during the night. Wind-generated power runs a close second in my book. The time for dithering is long gone. We need decisive action NOW.	PAUL	business owner
2022-07-11 13:09:14	Gauteng		Yes I do	Solar	Solar, Nuclear, Wind, Hydro - All Sustainable - but must have good Battery resources. --- Nuclear is a Good option - ** but NOT from Russia or China (They have too much of a throat hold on us already)	Robert	business owner
2022-07-11 13:04:51	Gauteng		Yes I do	Solar			business owner
2022-07-11 13:04:51	Western Cape		Yes I do	Solar	All, and every form of RENEWABLE ENERGY should be immediately investigated and brought into action. Coal, fossil, and other destructive non-renewable energy should be scrapped immediately.	Marlei	business owner
2022-07-11 13:03:42	Western Cape		Yes I do	Solar	I am able to generate my own electricity, and thus contribute by reducing my reliance on the grid.	David	business owner
2022-07-11 13:02:52	Western Cape		Yes I do	Solar	I support clean energy so it could be wind or hydro or solar or any alternative	Karen	business owner
2022-07-11 12:59:19	Gauteng		Yes I do	Solar		Ditmar	business owner
2022-07-11 12:56:06	KwaZulu- Natal		Yes I do	Solar	We have sun and wind in abundance	Jami	business owner
2022-07-11 12:52:25	Western Cape		Yes I do	Solar	We have abundant sunshine. These farms could be established close to the grid to make them cost effective and easy to attach. I do worry about the oversight. It should be independent of government to minimise corruption, yet be aware that independents may overcharge. I saw many solar farms in the USA in the desert. Security may be a challenge in SA.	Veronica	business owner
2022-07-11 12:51:10	Western Cape		Yes I do	Solar	Solar, wind and/or hydro! Eskom is just shocking and embarrassing to be honest. It cannot continue this way!!!	Andreia	business owner
2022-07-11 12:47:56	Eastern Cape		Yes I do	Solar	Hybrid PV, wind.	Jeff	business owner
2022-07-11 12:43:39	KwaZulu- Natal		Yes I do	Solar	WE SHOULD FOLLOW THE EXAMPLE OF MORE PROGRESSIVE COUNTRIES AND INTRODUCE ENOUGH WIND AND SOLAR FARMS TO GENERATE MORE ELECTRICITY BUT WITHOUT THE CURRENT BOARD OR GORDON AND MANTASHE IN CHARGE OF ESKOM.	CASSIM	business owner
2022-07-11 12:39:59	Western Cape		Yes I do	Solar	It's not rocket science!	Chris	business owner
2022-07-11 12:33:47	Western Cape		Yes I do	Solar	I believe renewable energy is the way forward as we have damaged our universe enough as it is.	Priscilla	business owner
2022-07-11 12:33:18	Western Cape		Yes I do	Solar		Rensje	business owner
2022-07-11 12:31:57	Gauteng		Yes I do	Solar		elsabe	business owner
2022-07-11 12:26:05	Gauteng		Yes I do	Solar	There has been a monopoly for way too long and even now. Eskom had 12 years to improve services - yes loadshedded for 12 years now! And has failed to do so. Eskom buys power from other manufacturers at higher rates than they sell it for making it a very unwise business decision. I think like SAA it is time for South Africa to move on	Dalene	business owner
2022-07-11 12:23:48	Gauteng		Yes I do	Solar	Our climate suits solar energy.	Louise	business owner
2022-07-11 12:22:15	Gauteng		Yes I do	Solar	All renewable sources should be implemented immediately. Fix the problem in the cleanest method possible and allow private providers to immediately supply South Africa with electricity because the government and Eskom are failing to do so consistently. Right now because of Eskom alone, South Africa is considered to be one of the highest polluters in the world. For once could we be in the top category for something positive, like using the most renewables for example? So tired of living in a country that is going backwards in quality rather than getting better. We have the means, just make the circle bigger.	Tamarin	business owner
2022-07-11 12:19:23	Western Cape		Yes I do	Solar	Its TIME!!!!!! The country cannot afford to be dragged down by useless government management on coal power stations and nuclear options that are about to be decommissioned	AR	business owner
2022-07-11 12:15:48	Gauteng		Yes I do	Solar	South Africa has enough sun to support solar power	Kathleen	business owner
2022-07-11 12:13:40	Gauteng		Yes I do	Solar		Ben	business owner

2022-07-11 12:07:20	Western Cape		Yes I do	Solar	I want to be able to install solar panels or others forms that generates electricity to ensure I always have power. I do not want to be dependant on Eskom's more of than on power. South Africa is not a safe country and we need power for our security systems to work. It leaves me vulnarable as I cant protect myself and my family.	Hendrina	business owner
2022-07-11 12:01:59	Gauteng		Yes I do	Solar	Eskom has proven that they are unreliable, corrupt, inefficient, useless, expensive, have over-paid employee's that are entitled to more funds, while Joe Soap battles financially under loadshedding. USE solar, nuclear, wind, water independent suppliers will compete and supply at better prices	Michelle	business owner
2022-07-11 11:59:46	KwaZulu- Natal		Yes I do	Solar	Deregulate ! Allow private sector to provide alternative green power.	Craig	business owner
2022-07-11 11:57:48	Western Cape		Yes I do	Solar	The people of South Africa are getting pretty desperate and depressed. Eskom cannot insist on having the monopoly on supplying power but then not have the capacity to do so. If they can't make promises they can keep then they should allow others to do it on their behalf. Simple. We need power for our economy to grow, which will ultimately solve a whole lot of other problems.	Karen	business owner
2022-07-11 11:51:56	KwaZulu- Natal		Yes I do	Solar		Frances	business owner
2022-07-11 11:47:29	Northern Cape		Yes I do	Solar		Hans	business owner
2022-07-11 11:42:47	Gauteng		Yes I do	Solar	a combination of solar, wind, and gas would be good alternative to an already strained electrical grid	costa	business owner
2022-07-11 11:36:01	Gauteng		Yes I do	Solar	The economy as well as individuals cannot afford to carry on level 6 loadshedding. Petrol prices and food prices have sky rocketed. We need ugent assistance from independent suppliers as it is clear Eskom cureently is incapable of proiding power adequately	Jane	business owner
2022-07-11 11:34:19	Gauteng		Yes I do	Solar	More efficient compared to what we are experiencing now	Nomalang a	business owner
2022-07-11 11:34:09	KwaZulu- Natal		Yes I do	Solar		Nicole	business owner
2022-07-11 11:29:12	Gauteng		Yes I do	Solar	Whichever solution, preferably sustainable and environmentally friendly, can supply additional power to the grid to alleviate the current untenable situation should be fast-tracked.	Philip	business owner
2022-07-11 11:26:20	Western Cape		Yes I do	Solar	We have sufficient wind and sun to make use of these alternative methods for electricity provision	Christina	business owner
2022-07-11 11:20:49	Eastern Cape		Yes I do	Solar		Ingrid	business owner
2022-07-11 11:17:16	Gauteng		Yes I do	Solar	Any power source in effect that is available and economically viable should be put to use. Even if it is yust temporally !!	Wilhelm	business owner
2022-07-11 11:15:38	KwaZulu- Natal		Yes I do	Solar	I believe that there are vast spaces of land over South Africa, the Northern Cape province for instance, where there may be placed enough solar panels to power the entire country for centuries to come. This dry, hot land is unsuitable for living or for agriculture, but is very suitable for placing solar panels. It is important to use renewable clean energy because the atmosphere is finite and not able to sustain the pollution emitted over the past 200-300 years. It is now time to use the land wisely and to use power that is sustainable and not reliant on shady deals with mines and coal suppliers. The time for dirty fossil fuel power is over. This is my view.	Shaun	business owner
2022-07-11 11:13:10	Gauteng		Yes I do	Solar	Utilise the production of solar energy to assist with SA's power crisis. SA has abundant solar hours and it needs to be maximised to best advantage.	Wendy	business owner
2022-07-11 11:13:04	Gauteng		Yes I do	Solar	All of the above options that are environmentally beneficial as well as cost effective for all consumers, regardless. This isn't an option or a hypothesis. This is vital, critical and an obvious for all residents in South Africa! Everyone with a heart and heartbeat. Will save lives, the economy, business, relationships, everyone. The impact is devastating. Stress and anxiety is off the charts. A functioning country would encourage investors and tourists. If not, watch the demise of the country. Another African failed state. Floods of brain drain and emigration. It's just so evident already. Denying "power to the people" is criminal, and detractors should be charged with crimes against humanity! Greed and corruption must be overruled. Parliamentarians, politicians and people of affluence and influence are generally not affected by loadshedding and electrical outages. Their suburbs , residential blocks or streets are not switched off. FACT. They are paid so much they don't feel the increases or don't pay for electricity and generators and probably get this in their packages anyway or it's tax right off. Why would I feel this? Because, if not, they would vote to save our country and our people.	Ilana	business owner
2022-07-11 11:09:56	Western Cape		Yes I do	Solar	There are already IPP available to supply. Just take what they have.	Nicholas	business owner
2022-07-11 11:09:35	Gauteng		Yes I do	Solar	All forms of energy should be looked at and if there are alternatives available now they should be immediatly implemented. Every day the loadshedding continues SA is losing billions of Rands which increases crime, unemployment, poverty, corruption and makes outside investing dismal. We need our economy to grow - we cannot afford anymore set backs.	Kerry	business owner
2022-07-11 11:06:42	Gauteng		Yes I do	Solar		Marié	business owner

2022-07-11 11:06:02	Gauteng	Yes I do	Solar	Solar can provide a quick, relative to other renewables, boost to the grid at a good price. This would reduce the pressure on ESKOM to focus on stabilising the grid. Solar is a proven technology and prices per kWh are dropping all the time. It requires for example, shorter environmental impact studies than wind or nuclear. Solar installations can also be decentralised and deployed to areas prone to greatest power outages. In addition, for whatever energy source we however need a transparent bidding process. This would help to ensure we as the citizens are hopefully not exploited by those who tender.	Alan	business owner
2022-07-11 11:04:45	KwaZulu-Natal	Yes I do	Solar	Actually I dont really care what product suits SA so long as there is an immediate solution to the demand which SA citizens can afford, as currently we have no solution and we cant afford what we have.	beryl	business owner
2022-07-11 11:02:25	Eastern Cape	Yes I do	Solar		Ross	business owner
2022-07-11 10:59:35	Western Cape	Yes I do	Solar	Please act urgently. Do the common sense thing and allow technicians with skills and knowledge to get the power stations functional again. Admit that artisans need to be schooled to do the work. Stop wasting time - it is running out. All South Africans - especially the poorest of the poor - are tired of an incompetent government who plainly think dishing out R350 per month will make all their problems go away.	Denise	business owner
2022-07-11 10:57:48	Gauteng	Yes I do	Solar		Darryl	business owner
2022-07-11 10:57:48	KwaZulu-Natal	Yes I do	Solar	Solar is free energy from the sun and environmentally friendly	Jenny	business owner

2022-07-11 10:40:42	Western Cape	Yes I do	Solar	Solar, hydro, wind, gas - they should all be used. We have the suitable climate for all of them - what a blessing! I am NOT in favour of nuclear. Free enterprise should be allowed. Less dependency on Government. Government must remove the limits it has placed on the IPPs. Let the citizen decide WHO they want to do business with and WHICH form of energy they want to use (solar, wind, gas, hydro, or coal). It's their money and their life, so they decide. Get rid of incompetent employees at Eskom, especially those in leadership positions. Hold leaders accountable for their actions. Privilege and responsibility go together. Arrest those involved in corruption. People should be held accountable for their actions. They are not babies.	Delfina	business owner
2022-07-11 10:36:23	Western Cape	Yes I do	Solar	Solar would be quickest to have an impact. Wind can follow, and then any other alternatives.	Giles	business owner
2022-07-11 10:35:32	Gauteng	Yes I do	Solar		Vivi	business owner
2022-07-11 10:34:25	Western Cape	Yes I do	Solar	The current government is not capable of maintaining, building, servicing, planning, growing anything new. Them building new coal power plants was a disaster, them building a new nuclear plant will be an even bigger disaster (with nuclear power plants there is no room for mistakes or incompetence). Nuclear energy is NOT clean energy because the nuclear waste will last millions of years and no one knows where and how to discard it safely. South Africa has so much sun! Only fools don't see the opportunities. Get more private sectors on board and subsidies anyone who is willing to invest in solar energy. Employ competent specialists who can do their job efficiently regardless of their colour. Dismiss all incompetent, dishonest, corrupt and striking Eskom employees.	Barbara	business owner
2022-07-11 10:33:51	Western Cape	Yes I do	Solar	Pls scrap the red tape and allow Competition as stats show this is in fact a very good market practice for creating jobs and opportunities for the people of SA. Also pls only allow renewables and pls AbsolutelyNO nuclear. Allow people and businesses to create their own electricity. Eskom is being politically hijacked and good people are fighting to keep her afloat but SA should not be solely reliant on Esk too much problems	D	business owner

2022-07-11 10:31:57	Gauteng	Yes I do	Solar	<p>Sub-Saharan Africa has the best solar yield in the world. The northern hemisphere solar output is almost half, per square meter of a solar PV panel, than what gets generated in Africa.</p> <p>South Africa has no shortage of sunshine and is one of the easiest and fastest ways to provide reliable, clean and cheaper energy to the citizens of South Africa.</p> <p>This must be the only country in the world wher an SOE like Eskom has been pillaged by so much corruption and the citizens of the country are punished for it, literally everyday. Whether it is load shedding or continually increasing electricity costs, we are all being robbed in broad (excuse the pun) daylight!!!</p>	Craig	business owner
2022-07-11 10:30:55	Eastern Cape	Yes I do	Solar		Grant	business owner

2022-07-11 10:26:33	Gauteng	Yes I do	Solar	<p>How can this country wait until it is on its knees before indicating there is URGENCY??</p> <p>why have independant power producers not been able to generate additional power for the last 10 - 12 years??</p> <p>ANC have no idea of what they are doing to South Africa... as long as they are ok they could not care bout their people.</p> <p>remove ANC from government once and for all.....</p> <p>IMMEDIATELY AMEND LEGISLATION AND RED TAPE,.....</p>	Sue	business owner
2022-07-11 10:23:23	Western Cape	Yes I do	Solar	<p>It is actually both wind and solar. Optimise the use of the wind farms all over our country. Especially we do not live in the Cape of Storm for nothing. The south easter blows 70% of the time. Why not use it. We also have hot and sunny summers. Why not use the sun. With solar on every residential roof, we can provide for ourselves and give back to those who cannot afford it. The only thing preventing us is selfish politicians protecting their monopoly on resources that belongs rightfully to the citizens of this country. Only to their own gain.</p>	Susanna	business owner
2022-07-11 10:22:44	Gauteng	Yes I do	Solar	<p>We have endless sun here in SA it doesnt take einstine to realise we need to harness it. Its the one constant in our coubtry that isnt governed by anyone so why not harnes that the we have been given in abundance. If we could all start off as individuals with our own systems and then let goverment start building solar farms it will aliviate some of the burdeb off the grid and give goverment time to built the necessary infrastructure for solar farms. However like everything in this country it needs a lot of security to allow it to have a chance. Whatever can get stolen will so security and getting the rule of law back is paramount. Botswana is a great example our coubtry should take head and follow their example.</p>	Valerie	business owner
2022-07-11 10:21:50	Gauteng	Yes I do	Solar		Oscar	business owner
2022-07-11 10:21:30	Western Cape	Yes I do	Solar	<p>We have large enough regions that have access to sunlight (and wind for that matter). I'm suggesting private companies organise the banks of solar panels or wind turbines to produce power and then that the power is distributed to various municipalities.</p> <p>Government should do away with the red tape around energy production so that the people don't have to live in dark times.</p>	Andre	business owner
2022-07-11 10:19:07	Western Cape	Yes I do	Solar	<p>Wind and Solar energy are being reported as successful in many countries. We have the space available, and this not only would be a massive step forward to easing the problem at hand, but also being proactive in generating cleaner energy for the future.</p>	Matthew	business owner
2022-07-11 10:16:12	Western Cape	Yes I do	Solar	<p>Its obvious duh</p>	Rudi	business owner
2022-07-11 10:15:34	Western Cape	Yes I do	Solar	<p>There isn't only one solution. Many different types of power generation are required for sustainability. Privatize power generation so that it can be properly controlled and not looted, thieved and mismanaged by govt. Why have they waited until it's become a complete crisis and disaster? Why have they not acted before??</p>	Jenni	business owner

2022-07-11 10:10:29	Gauteng	Yes I do	Solar	<p>Build bulk generation capacity within Eskom generation department. Don't invest in novel technologies, focus on tried and trusted methodologies, coal works - and it can be kept clean enough for the foreseeable future. Any economy requires a backbone grid, and we don't have many options, wind and solar won't cut it (unless we're willing to pay for energy storage), nuclear is a pipe dream considering our timescale, gas is not really viable considering our resources, which leaves us with modern coal generation as our only option.</p> <p>Allow bulk generation by private companies, provide contracts for 50 years. Allow international players, don't enforce B-BBEE.</p> <p>Build (medium) bulk storage capacity within Eskom distribution department.</p> <p>Allow (medium) bulk storage by private companies, provide contracts for ~15 years. Allow international players, don't enforce B-BBEE.</p> <p>Allow end users to generate power and provide power to the grid not exceeding ~75% of max consumption (or whatever is allowed by distribution grid).</p> <p>Subsidise solar energy - including hot water solar, subsidise off-grid and semi-off-grid installations (reduce connection power output breaker/fuse at the end user - i.e. from 15 kW to 3 kW, reduce energy price for low volume consumers), allow grid-tie solar installations, take steps to minimize peak consumption. Make grid tie power production profitable after effective solar sunlight hours, i.e. storage during day and dump during night; effectively outsource peak consumption hours power storage capacity to the end user.</p> <p>Prioritize industry during daylight hours - keep the wheels of the economy turning.</p> <p>There is no shortage of demand for electricity, BUY the bulk generation and bulk storage capacity from private industry wherever possible. If importing energy is an option, do it. Allow privatization on a large scale, and force ESKOM into a competitive market.</p>	Hendrikus	business owner
2022-07-11 10:08:57	Gauteng	Yes I do	Solar	<p>The lack of stable electricity is an emergency and should be treated as one. As a small business owner, we need consistent electricity to keep our businesses running and I don't have the funds to invest in alternative power solutions at the moment.</p>	Aimée	business owner
2022-07-11 10:08:07	Western Cape	Yes I do	Solar	<p>Solar is the most consistent source of power in South Africa. The solar plants near Upington have shown that the technology is reliable. Private business and individuals should also be able to generate and sell excess power to Eskom. There should be no limit to private capacity. Eskom will never be able to be the sole supplier of power again. Elsewhere in the world, private power generation has become more popular. If every building in RSA had solar panels on the roof, it would cost less than a new power plant and be more reliable.</p>	Sean	business owner
2022-07-11 10:07:23	Gauteng	Yes I do	Solar		GEORGE	business owner
2022-07-11 10:05:24	Western Cape	Yes I do	Solar		Andrew	business owner
2022-07-11 10:04:09	Eastern Cape	Yes I do	Solar	<p>Any IPP that can feed back into the grid as an immediate aid, followed by the extremely urgent development of independent power sources - wind, solar, hydro to support the system.</p>	CAROLE	business owner

2022-07-11 09:57:26	Western Cape	Yes I do	Solar	<p>I think that we need more than one renewable option right now</p> <ul style="list-style-type: none"> - Flowing water is an option to generate current - Solar - Wind <p>all of these are natural resources - nothing that brings harm to the earth, and all beneficial for all people.</p> <p>Government needs to subsidize these options</p> <p>We need to enforce that NO government employee of any kind at any level should have ANYTHING to do with this need.</p> <p>There must be a rule that they may not be part of, on any board, or in any decision-making level within a company up to 10 years after completing their government services role.</p>	Darryn	business owner
2022-07-11 09:56:47	Western Cape	Yes I do	Solar		Ruth	business owner

2022-07-11 09:55:48	Western Cape		Yes I do	Solar	A combination of Solar and wind generation can be ramped up very quickly in comparison to the build time of traditional power stations, be they coal, hydro etc. A combination of large scale wind and solar plants, together with smaller scale plants designed to run individual homes, businesses or malls, can be implemented within months. Cutting the red tape will allow IPP's and Small scale embedded generation to create relief for the grid. The details of who pays who and the tariff rates, as well as the possible tax incentives for smaller scale embedded generation can be worked out and balanced over time. Just give the green light to START	John	business owner
2022-07-11 09:54:45	Gauteng		Yes I do	Solar	Suid Africa is die land van sonskyn, gebruik die onuitputbare bron vir die opweking van krag.	Nizza	business owner
2022-07-11 09:54:39	Western Cape		Yes I do	Solar	We should amend legislation so that all new construction projects that are approved in South Africa must have a solar energy plant built in to completely or partly supplement their electricity needs. Domestic homes should be 100% supplemented by Solar. We need to get rid of old thinking and in time Phase-out Eskom.	Johan	business owner
2022-07-11 09:54:21	Western Cape		Yes I do	Solar		Wendy	business owner
2022-07-11 09:53:22	Eastern Cape		Yes I do	Solar	Getting our existing power stations working properly is a matter of priority. Longer term solutions can then be implemented by the private sector, preferably with a focus on renewables. One important pitfall with renewables can not be ignored though. Storage. Energy storage is a major problem with current battery technology, and this will continue to be the case for the conceivable future. For this reason, renewables should not be seen as the silver bullet, but instead they should be seen for what they are, an ideal of sorts.	Justin	business owner
2022-07-11 09:51:46	Mpumal anga		Yes I do	Solar	As a matter of urgency allow independent producers to generate electricity to stabilise electricity demand to get South Africa's economy going.	Hilton	business owner
2022-07-11 09:51:17	Western Cape		Yes I do	Solar		Conny	business owner
2022-07-11 09:46:55	Western Cape		Yes I do	Solar		Louis	business owner
2022-07-11 09:45:44	Western Cape		Yes I do	Solar	I support IPP, locals sme should get preference to strengthen our economy and build our nation.	Elton	business owner
2022-07-11 09:38:36	Gauteng		Yes I do	Solar		Natalie	business owner
2022-07-11 09:36:00	Gauteng		Yes I do	Solar		Hans	business owner
2022-07-11 09:35:37	KwaZulu- Natal		Yes I do	Solar	There are many opportunities to invite local and overseas companies to tender for solar, wind and gas projects for almost immediate electricity generation. Eskom has lost institutional memory and is incapable of generating our future energy needs. Eskom is bankrupt in terms of skills as well as financially and effectively is in a death spiral of insurmountable debt. Our minister of mineral and energy affairs is utterly incompetent and should be replaced immediately as he is the biggest threat to the energy security of this country,.	David	business owner
2022-07-11 09:34:53	Western Cape		Yes I do	Solar		Deidre	business owner
2022-07-11 09:34:41	Gauteng		Yes I do	Solar		Cillier	business owner
2022-07-11 09:33:59	Gauteng		Yes I do	Solar	We cannot allow government to dictate how business should be done which in turn will save SA. Government has shown they have no idea on business strategy, let alone how to run a country or simply do not care about anyone but themselves to bring the required change. Bring in performance driven solutions and hold people accountable, a standard business practice. The world has changed and advanced. We must too!!	Richard	business owner
2022-07-11 09:32:16	Free State		Yes I do	Solar	There is many private Solar Stations already in RSA.	Ben	business owner
2022-07-11 09:30:33	Free State		Yes I do	Solar	hALLO ai MAN DIE KWOTASIES LE OOK BY MY GAAN OOK OORSKAKEL NA SOLAR N KLOMP GOED IS REEDS GEDOEN. WESBANK GEE DIE LENING EN DAN BETAAL EK DAAR AF IPV DIE MUNUNSIPALIEIET.	CAREL	business owner
2022-07-11 09:29:42	Western Cape		Yes I do	Solar	Allow Solar farms on farmers lands throughout South Africa. Government MUST guarantee their income.	Ian	business owner
2022-07-11 09:29:20	Western Cape		Yes I do	Solar		karon	business owner
2022-07-11 09:27:34	Gauteng		Yes I do	Solar	The ANC has sabotaged the economy for 15 years now and it is time that the cabinet wakes up to reality! Crime is a myth it is all about creating jobs and how will you create jobs and secure foreign investment if black outs are at the order of the day?	Bertus	business owner
2022-07-11 09:27:13	KwaZulu- Natal		Yes I do	Solar	It is foolish not to harness a clean environmentally friendly form of energy and use it to supplement the dirty electricity generated from coal especially when it is also cheaper	CAROLYN	business owner
2022-07-11 09:26:23	Gauteng		Yes I do	Solar		Ian	business owner
2022-07-11 09:25:02	Gauteng		Yes I do	Solar	Use of solar and hydro licences should be available immediately for large scale production to prevent a complete blackout	Robyn	business owner

2022-07-11 09:22:43	Gauteng		Yes I do	Solar	Our businesses can't survive without electricity.	Leo	business owner
2022-07-11 09:22:40	Western Cape		Yes I do	Solar	We have solutions but the people in power don't want the answers because it does not suit their agenda. Easy financial viable feedback into the grid is one option where the people of SA and business will finance solutions for their benefit. Remove restrictive legislation.	Kevin	business owner
2022-07-11 09:21:51	Eastern Cape		Yes I do	Solar	South Africa has enough sun that can be used to generate enough energy	babongile	business owner
2022-07-11 09:20:22	Gauteng		Yes I do	Solar		Leandra	business owner
2022-07-11 09:20:18	Mpumalanga		Yes I do	Solar	Not having just one solar panel manufacturer will also help. I believe we have the ability to produce enough power through solar panels as they do in Australia.	Hanlie	business owner
2022-07-11 09:18:53	Mpumalanga		Yes I do	Solar	Dit is baie duidelik dat Eskom agv verskeie redes nie voldoende krag kan opwek vir die RSA nie. Ons het in ons land oorgenoeg sonskyn om in n groot mate by te dra tot die kragnetwerk. Die regering moet die privaatsektor toelaat om grootliks betrokke te raak sonder om teen deelnemers te diskrimineer deur BEE beperkings. So n besluit sal in n groot mate bydra tot werkskepping en die ekenomie.	Johan	business owner
2022-07-11 09:18:17	Western Cape		Yes I do	Solar	The ANC and their subsidiaries are, as always, putting profit before people by denying us the ability to generate the power that they so obviously have failed to provide. We would have no need of them if we leaned into solar panels on domestic rooftops, and they know that. Either they scrap the red tape so we can fix their years of neglected infrastructure, or we that are capable will continue to emigrate until the skills pool is empty and they have nobody to financially terrorise anymore.	Ric	business owner
2022-07-11 09:17:10	Western Cape		Yes I do	Solar	I do not think any one method is sufficient. We should work towards a blend of sustainable energy sources. Definitely no more coal or nuclear.	Simon	business owner
2022-07-11 09:15:02	North West		Yes I do	Solar	Allow private companies and individual households to produce and supply electricity via Solar power to their homes and own needs as well as into the grid. Give households and private companies incentives to supply electricity. This could lead to mass job opportunity generation and private investment to flow into our economy. This will also make SA a more popular DFI destination. Remove the red tape and make it easier for people in the country.	Leon	business owner
2022-07-11 09:13:12	Western Cape		Yes I do	Solar	As long as it supports the locals and the environment.	Theresa	business owner
2022-07-11 09:12:15	Gauteng		Yes I do	Solar	Anything to get out of the current mess we're in. The only Power ANC understands is the abuse thereof for self enrichment.	Gary	business owner
2022-07-11 09:11:18	Gauteng		Yes I do	Solar	If the allowed independent power producers to sell electricity to Eskom it will help with the shortage and be a quick and easy solution to the problem. But we all know why it will not be done, because the powers that be will not be able to make money out of the IPP's and the will not get rid of their Eskom and coal cash cow.	Glen	business owner
2022-07-11 09:10:44	Western Cape		Yes I do	Solar	& Other forms of energy that are completely sourced from radio waves around us similar to Zimbabwean innovator Maxwell Sangulani.	Bonnie	business owner
2022-07-11 09:08:07	Gauteng		Yes I do	Solar	There are numerous businesses and households that can supply Solar power back into the grid, I have been registered from 2015 to do so and supply 20 000W back, but COJ refuses to assist me or to allow me to supply.	Rean	business owner
2022-07-11 09:07:54	Limpopo		Yes I do	Solar		Jennie	business owner
2022-07-11 09:02:29	Northern Cape		Yes I do	Solar	Solar and wind power are available, affordable and not polluting alternatives.	Daniël	business owner
2022-07-11 09:02:09	Gauteng		Yes I do	Solar	they should allow home users to push back power into the grid, dropping there power production	George	business owner
2022-07-11 08:59:52	KwaZulu-Natal		Yes I do	Solar	Solar - we have very good and lots of sun light hours in SA Wind along the Coast line should also be installed as these areas always have wind and both these solutions are free of pollution	Derek	business owner
2022-07-11 08:59:00	Free State		Yes I do	Solar	Solar is relatively cheap compared to other forms of generation and can be implemented in relative short time frames.	Gerhard	business owner
2022-07-11 08:58:47	Western Cape		Yes I do	Solar	1) fix current supply chain of electricity. 2) implement solar, & other methods compliant with Climate Change. 3) Allow Independent electricity supply.	Allan	business owner
2022-07-11 08:58:23	Gauteng		Yes I do	Solar		Judy	business owner
2022-07-11 08:58:10	Gauteng		Yes I do	Solar		Gavin	business owner
2022-07-11 08:58:07	Gauteng		Yes I do	Solar	This should be allowed as I feel the ANC have a different agenda in killing ESKOM	Glyn	business owner
2022-07-11 08:58:07	Western Cape		Yes I do	Solar		Elmarie	business owner
2022-07-11 08:57:11	Western Cape		Yes I do	Solar	Its what I know and have installed. It is clean energy. I think multiple solutions are applicable and dependent on location and application.	BERNIARD	business owner
2022-07-11 08:56:26	Western Cape		Yes I do	Solar	A combination of solar and wind-generated power - renewable, sustainable. Mantashe and his cronies are not going to let go of the sweetie jar - he benefits from fossil fuel-generated power. Plus, the diesel it costs to keep things going. It's so obvious. If they allow other sources of power to supplement the national grid, they will lose the lion's share of the kickbacks.	Jane	business owner
2022-07-11 08:51:53	Gauteng		Yes I do	Solar	A lot of solar suppliers are already connected to the grid supplying mines with power.	Eugene	business owner

2022-07-11 08:51:30	KwaZulu-Natal		Yes I do	Solar		selvin	business owner
2022-07-11 08:49:26	Gauteng		Yes I do	Solar		Timothy	business owner

2022-07-11 08:45:52	Gauteng		Yes I do	Solar	Solar provides a good short term solution until Eskom is flushed and an entirely new workforce is hired.	Wandile	business owner
2022-07-11 08:42:39	Western Cape		Yes I do	Solar	Solar is widely available and relatively quick easy to set up.	Rowan	business owner
2022-07-11 08:41:05	Northern Cape		Yes I do	Solar	Solar power is free, renewable and clean.	Asriël	business owner
2022-07-11 08:39:49	Western Cape		Yes I do	Solar		Marietjie	business owner
2022-07-11 08:39:46	Western Cape		Yes I do	Solar		Marietjie	business owner
2022-07-11 08:39:44	Western Cape		Yes I do	Solar		Marietjie	business owner
2022-07-11 08:39:34	Western Cape		Yes I do	Solar	Solar & wind energy offer clean and green energy. Coal energy damages the environment and is just for use to enrich government friends and to manipulate the market through loadshedding.	Karen	business owner
2022-07-11 08:39:10	Mpumalanga		Yes I do	Solar		Melanie	business owner
2022-07-11 08:38:52	Free State		Yes I do	Solar	I think it would be a positive step if solar farms could supply electricity to us. If the government could partly subsidise solar installations at businesses that would really help too.	Denice	business owner
2022-07-11 08:38:31	KwaZulu-Natal		Yes I do	Solar	Use a combination of wind, solar and biomass.	Dave	business owner
2022-07-11 08:38:25	KwaZulu-Natal		Yes I do	Solar	Use a combination of wind, solar and biomass.	Dave	business owner
2022-07-11 08:37:22	Gauteng		Yes I do	Solar		Esmeralda	business owner
2022-07-11 08:36:46	Western Cape		Yes I do	Solar	Enough time has been wasted trying to fix the current state of electricity supply. Allow independent producers to supply electricity so South Africa can function properly and create time to fix Eskom.	Joshua	business owner
2022-07-11 08:34:45	Limpopo		Yes I do	Solar		Petrus	business owner
2022-07-11 08:32:52	Gauteng		Yes I do	Solar		Leroy	business owner
2022-07-11 08:30:47	Gauteng		Yes I do	Solar	Solar is clean and we have abundant sunlight. it must be adopted on the basis that additional power generated beyond personal needs can be sold back to the grid.	Rod	business owner
2022-07-11 08:30:30	KwaZulu-Natal		Yes I do	Solar	People are happy to make their own plan for power, please let them.	Wayne	business owner
2022-07-11 08:30:29	Western Cape		Yes I do	Solar	It is a no-brainer to have SA powered by renewable energy which is in such abundance here. Solar PV is the lesst environmental ly costly. EVERY HOME built from now on should be obliged to have solar panels on the roof and a solar hot water geyser. Even homes in Papua New Guinea have this and I cannot understand why SA is so far behind the curve.	Rob	business owner
2022-07-11 08:28:27	Gauteng		Yes I do	Solar	I've already got a full solar installation in my house, for shopping malls and business parks to do this it would immediately relieve the load on the grid and it's affordable as well as sustainable.	James	business owner
2022-07-11 08:27:22	Gauteng		Yes I do	Solar	Any means of production of stable energy should be allowed. This will increase the supply of power and make the prices go down due to healthy competition. We need immediate action before ESKOM cripples the entire SA.	Karin	business owner
2022-07-11 08:26:42	Gauteng		Yes I do	Solar			business owner
2022-07-11 08:26:41	KwaZulu-Natal		Yes I do	Solar		Harry	business owner
2022-07-11 08:25:19	Gauteng		Yes I do	Solar	Not only these loadsheddings are just an economical sabotage but we are all supporting this crisis since our bills carry on increasing. We have to stop this massive fraud by opening the market to private producers, keeping a control on prices misconduct. Eskom takes advantage of a total impunity. This has to stop by, namely, allow the competition	Gaëlle	business owner
2022-07-11 08:24:55	Western Cape		Yes I do	Solar		Sue	business owner

2022-07-11 08:22:45	Western Cape		Yes I do	Solar	<p>We have corruption. Endless corruption.</p> <p>We have sun. Endless sun.</p> <p>We have a climate crisis. And there IS an end to being able to live on the only planet we have.</p> <p>Eskom is clearly not going to recover- and if by some miracle they would do, they would use coal- and we need to get rid of burning fossil fuels. A no-brainer thus.</p> <p>Nuclear is too dangerous in a country, which cannot even maintain basic infrastructure like streets, lights, hospitals.</p>	Karin	business owner
2022-07-11 08:22:45	Western Cape		Yes I do	Solar	<p>I would select turbine, hydro, & solare as I believe it is a combination of different natural elements that are at our advantage here in our country. Each can then assist the other depending on what can be delivered.</p> <p>Coal, gas & diesel is something of the past.</p>	Jody	business owner
2022-07-11 08:22:38	Western Cape		Yes I do	Solar	<p>Renewable energy can help bring additional capacity on quickly but the overall solution is likely a combination of different types of energy production. Coal-powered energy, however, needs to be reduced or eliminated and replaced by cleaner energy in the long term.</p>	Deevra	business owner
2022-07-11 08:22:36	Gauteng		Yes I do	Solar	<p>Eskom is letting South Africans down causing further trauma to citizens already under enormous pressure with other issues we having to cope with needing to be addressed in South Africa. The poor service delivery we are forced to endure by Eskom must fall.</p>	Sharnel	business owner
2022-07-11 08:09:58	Gauteng		Yes I do	Solar	<p>We have an abundance of sunshine in our province all year round - let's use it. Other provinces are windy provinces let them use the wind - let's give the energy if gives to the people who need it to keep South Africa going</p>	Rowan	business owner
2022-07-11 08:08:15	Gauteng		Yes I do	Solar	<p>Number one is to REDUCE the amount of useless employees at Eskom!!! by 60% SECOND cut there salaries by HALF !!! Fix the base power stations Add solar to the grid</p>	Darrell	business owner
2022-07-11 08:08:09	Gauteng		Yes I do	Solar	<p>Solar is quick to install with immediate results. Nuclear power station will take 10 years before it may come into production and by then it will be too late.</p>	Jaco	business owner
2022-07-11 08:06:49	Western Cape		Yes I do	Solar	<p>If we focus on solar then the battery price would come down - government should subsidize the roll out and use this as an opportunity to solve the problem straight away</p>	Rocco	business owner
2022-07-11 08:04:42	KwaZulu- Natal		Yes I do	Solar	<p>This should not even be a question that we need to ask. Of course we need to solve this ridiculous problem that our government got us into, by whatever means there are at our disposal.</p>	Franco	business owner
2022-07-11 08:02:59	KwaZulu- Natal		Yes I do	Solar	<p>We have an abundance of land available as well as an abundance of sunlight year round in South Africa. I truly believe solar would be the fastest solution to our power problems. As well as have the least environmental impact.</p> <p>We are clearly in a crisis. We need to scrap all red tape and act immediately before more damage is done to our economy.</p>	Duncan	business owner
2022-07-11 08:01:20	Western Cape		Yes I do	Solar	<p>Clean energy</p>	Jennie	business owner
2022-07-11 08:01:03	KwaZulu- Natal		Yes I do	Solar	<p>If the government would just spend the money in the right places and place the right people in those positions it would go a long way to fixing everything, Eskom, education, SAA, Transnet, Home Affairs, local municipalities - almost every sector that the government has final say on!!</p>	Megan	business owner
2022-07-11 08:01:03	KwaZulu- Natal		Yes I do	Solar		Charles	business owner
2022-07-11 07:59:35	Gauteng		Yes I do	Solar	<p>Government must get out of the way and let private industry run the economy</p>	Ian	business owner
2022-07-11 07:58:09	Mpumal anga		Yes I do	Solar	<p>Independent solar plants to put power back in the grid and compensation therefore, as well as hydro-plants in the Mpumalanga region, especially Mbombela. Utilize the Crocodile- and other rivers and waterfalls to put up hydro-plants installed and operated by private entities (same as Sululumanzi) for the water supply. Let each province and capital be responsible for their own power supply costing. This is nonsense that we as loyal citizens must subsidize astronomical salaries and power theft.</p>	Philip	business owner
2022-07-11 07:56:26	Gauteng		Yes I do	Solar	<p>Apart from 10 years to late - and too little! The dilate energy hitting South Africa, vast open spaces, availability of labour/need for jobs. How can SA NOT be a world leader in solar power?</p>	Stefan	business owner
2022-07-11 07:55:54	KwaZulu- Natal		Yes I do	Solar	<ol style="list-style-type: none"> bring back the retired skilled Eskom personnel irrespective of race, to assist with maintenance and training of the new employees. scrap cadre deployment. eskom must be exempted from the regulations of procurement for emergency repairs. 	Deena	business owner
2022-07-11 07:53:57	Western Cape		Yes I do	Solar	<p>Solar would be the fastest way forward now.</p>	Mark	business owner

					As every Government run entity has proven to fail they need to be removed from the equation of business and focus on the country. Supply of electricity is business and competition to provide the best, cheapest electricity needs to be free market for anyone. We have amazing minds in SA and there are plenty of solutions outside of a single selection as I have made.		
2022-07-11 07:53:51	Western Cape		Yes I do	Solar	Let people help solve the crisis and this in turn will make the Govt look good. (although they do not deserve this)	Timothy	business owner
2022-07-11 07:53:37	Western Cape		Yes I do	Solar		David	business owner
2022-07-11 07:52:49	Western Cape		Yes I do	Solar		Pierre	business owner
2022-07-11 07:52:26	North West		Yes I do	Solar		Attie	business owner
2022-07-11 07:47:03	KwaZulu- Natal		Yes I do	Solar	its time the ANC stopped running the country for its own benefit and started applying cost effective solutions not based on how much they can steal from the state purse	Peter	business owner
2022-07-11 07:45:12	Western Cape		Yes I do	Solar		Roslyn	business owner
2022-07-11 07:45:05	Gauteng		Yes I do	Solar		Crystal	business owner
2022-07-11 07:44:26	Mpumal anga		Yes I do	Solar	We would be mad to not cut the red tape for IPPs at this stage. I advocate for Solar and Wind which have the least detrimental effect to the environment. Even though there is a case for Nuclear, given the current state of Eskom and the lack of maintenance it would be criminal to explore the Nuclear option with the incompetence we have in South Africa. Until that is turned around, it is a disaster waiting to happen.	Jackie	business owner
2022-07-11 07:44:14	Gauteng		Yes I do	Solar		Nicky	business owner
2022-07-11 07:44:02	Mpumal anga		Yes I do	Solar	Any form of renewable energy is better in the long term,. Quicker to get on line and cheaper to set up. No brainer!!	Luigi	business owner
2022-07-11 07:41:48	Gauteng		Yes I do	Solar		Gilbert	business owner
2022-07-11 07:41:37	KwaZulu- Natal		Yes I do	Solar	Use any resources from Mother nature	Michaela	business owner
2022-07-11 07:40:19	Gauteng		Yes I do	Solar		Lisa	business owner
2022-07-11 07:37:22	KwaZulu- Natal		Yes I do	Solar		Brenda	business owner
2022-07-11 07:36:12	North West		Yes I do	Solar	Please use solar and wind also build gas generation		business owner
2022-07-11 07:35:59	Gauteng		Yes I do	Solar	Sunshine is free, clean and readily available.	Donald	business owner
2022-07-11 07:35:49	Western Cape		Yes I do	Solar		Leli	business owner
2022-07-11 07:35:18	Gauteng		Yes I do	Solar	We are fortunate to live in a country where there is an abundance of free energy: the sun. Let's use it. Better for us better for the planet.	clive	business owner
2022-07-11 07:35:04	Western Cape		Yes I do	Solar		Dale Leigh	business owner
2022-07-11 07:35:04	Western Cape		Yes I do	Solar		Elize	business owner
2022-07-11 07:34:44	Mpumal anga		Yes I do	Solar	Solar and wind then hydro electric to help with water supply followed by tidal action generation. We have so much natural power , lets put our engineers to work , developing new clean energy generating plants.	Denis	business owner
2022-07-11 07:32:38	Gauteng		Yes I do	Solar	Enable individual households to sell power back to the grid	Don	business owner
2022-07-11 07:32:08	Gauteng		Yes I do	Solar		Thomas	business owner
2022-07-11 07:27:23	Gauteng		Yes I do	Solar		Mathew	business owner
2022-07-11 07:25:41	KwaZulu- Natal		Yes I do	Solar	South Africa has an unlimited "free" resource in the sun and is not utilizing it. Have individual homes set up solar and feed back into the grid. Cities could set up solar farms and help feed the grid.	Cherie	business owner
2022-07-11 07:25:36	KwaZulu- Natal		Yes I do	Solar	I think that all renewables should be added to the grid to supplement supply. We have an abundance of sun in this country, let's utilise this clean form of energy	Joanne	business owner
2022-07-11 07:24:24	KwaZulu- Natal		Yes I do	Solar	This should have been amended years ago. We have the sunshine, the wind and the water to generate renewable energy. Besides the inability of the ANC to run anything with destroying it, it should be opened up to independent suppliers to provide alternative options for personal choice, drive competitive pricing, become more sustainable and eco-friendly and to ensure a constant, reliable energy supply to the whole country.	Vanessa	business owner
2022-07-11 07:21:19	Western Cape		Yes I do	Solar		Joanne	business owner
2022-07-11 07:19:08	North West		Yes I do	Solar		Therina	business owner
2022-07-11 07:18:02	Western Cape		Yes I do	Solar	Solar and wind farms would be the quickest way to boost production of electricity	Niki	business owner
2022-07-11 07:11:28	Limpopo		Yes I do	Solar	It is esential that we need renewable energy sources. We also need the energy supliers to be totally independant and not be BEE comunist style comanys.	Deon	business owner

2022-07-11 07:11:23	Western Cape		Yes I do	Solar	Although I've selected solar as a method of electricity production that would most suit RSA's needs at this time, I know that there are multiple methods that are immediately available and will help ease the crisis that Eskom is causing. As a small business owner having constant loadshedding in a level higher than stage 2 is absolutely killing my business. I am unfortunately not in a position to install alternative sources of electricity as I am bogged down repaying loans taken out to help during the pandemic! If the 'Red Tape' was removed from IPP and they were able to ease this issue millions of everyday people who, like me, cannot afford to 'go off the grid' but sp desperately need electricity as it is an essential in life in 2022	Aimee	business owner
2022-07-11 07:04:01	Western Cape		Yes I do	Solar	Son is gratis Daar is groot beleggers wat gereed sit met baie geld Probleem is dat ANC sy hande wil kry op n deel in die belegging-Gupta style!!	Hugo	business owner
2022-07-11 07:03:06	Gauteng		Yes I do	Solar	All solar and wind power should be allowed to sell their electricity to the central grid to alleviate the current power outages and allow repairs to be made. Punitive and urgent prosecution should be implemented on all implicated in Eskoms's sabotage incidences.	Jerry	business owner
2022-07-11 07:01:25	Gauteng		Yes I do	Solar		Cheri	business owner
2022-07-11 07:01:23	Gauteng		Yes I do	Solar	Enough	Werner	business owner
2022-07-11 07:01:00	Western Cape		Yes I do	Solar		Debby	business owner
2022-07-11 06:58:32	Gauteng		Yes I do	Solar		Annie	business owner
2022-07-11 06:58:01	Western Cape		Yes I do	Solar	Totally renewable with no negative on the environment. Used also with wind can make a big contribution	Tinus	business owner
2022-07-11 06:51:49	Western Cape		Yes I do	Solar		Michael	business owner
2022-07-11 06:51:30	Western Cape		Yes I do	Solar		Thana	business owner
2022-07-11 06:50:06	Gauteng		Yes I do	Solar		Johann	business owner
2022-07-11 06:47:23	Western Cape		Yes I do	Solar	Homeowners need to be encouraged to install rooftop solar systems and most of the red tape needs to be removed.	Handri	business owner
2022-07-11 06:46:59	Gauteng		Yes I do	Solar	We have an abundance of space and sunshine in areas like the Karoo and free state that lend themselves to massive solar installations. South African born Elon Musk's company, Tesla, has already proved the success of solar, let's urgently follow his lead. Similarly, urgent redrafting of policy is needed to allow for support of individuals and companies who are already producing or want to produce their own power. Allow individuals to opt out of obligatory monthly service fees. Those funds would finance my home's production of sufficient solar for my household's needs. It's not ok, in any event, to charge service fees for service that up to 40% of the time is specifically not delivered! We should not be paying to help Eskom shed their overload.	Athele	business owner
2022-07-11 06:43:30	Free State		Yes I do	Solar	I cannot believe that this government cannot see the electricity shortage is a far greater crises than covid ever was. they faf and meet and talk and talk, but nothing gets done. something must be done IMMEDIATELY. Independant producers should only have physical requirements met, i.e. how to safely generate power, and how to safely connect excess to the grid. even if independant power cannot be fed into the grid, if private industry can produce their own power without all the red tape, their own electrical needs can be met without disruption, which will very quickly cause a smaller draw on the grid., as well as making the economy better. it will also create jobs. the ANC Government must stop trying to regulate every facet of our lives, and let South Africans get on with what we do best - make a plan.	Andre	business owner
2022-07-11 06:41:33	Western Cape		Yes I do	Solar	The load shedding crisis is devastating an already crippled economy. It is time for the government to act for the people instead of for its own enrichment. South Africa is ideally suited to solar and wind energy production. Independent producers should be allowed (and even encouraged) to supply energy. Renewable sources are the way. No nuclear!!	Melanie	business owner
2022-07-11 06:40:47	Gauteng		Yes I do	Solar		Glenda	business owner
2022-07-11 06:40:02	Outside SA		Yes I do	Solar	Since Eskom is so expensive and unreliable the red tape for independent electricity producers should be removed immediately. Such a move will encourage development of the incredible resources and people in South Africa and reduce dependence on an entity which is in the process of severely disabling the nation.	Ingrid	business owner
2022-07-11 06:37:32	Gauteng		Yes I do	Solar	We need more energy as Escom can't provide, sunshine is our cleanest option and we have plenty	Tanya	business owner
2022-07-11 06:36:14	KwaZulu- Natal		Yes I do	Solar		Rox	business owner
2022-07-11 06:31:58	Gauteng		Yes I do	Solar	Independent power producers should be allowed to operate free from any interference from the government sector. The state owned power supplier is incapable of sustaining the power requirements, and are just a drain on the country	BRIAN	business owner

2022-07-11 06:30:34	Western Cape		Yes I do	Solar	We live in a country that has sun for the majority of the year. This combined with wind is the ideal solution for providing electricity to the country and in addition can be harnessed regionally and eliminate pollution.	Donna	business owner
2022-07-11 06:29:10	Western Cape		Yes I do	Solar		Garth	business owner
2022-07-11 06:29:10	Western Cape		Yes I do	Solar		Garth	business owner
2022-07-11 06:29:04	Free State		Yes I do	Solar		Giuseppe	business owner
2022-07-11 06:27:57	Limpopo		Yes I do	Solar	SOLAR AVAILABLE MOST OF THE YEAR. RENEWABLE AND CLEAN.	Francois	business owner
2022-07-11 06:22:05	Western Cape		Yes I do	Solar		Liret	business owner
2022-07-11 06:21:25	North West		Yes I do	Solar		Bertie	business owner
2022-07-11 06:20:36	Gauteng		Yes I do	Solar	Allow import of advanced solar systems; regulate the solar systems price to maintain it cheap and affordable. Then every household and small business will be able to afford them and will give time the independent electricity producers to safe the country's energy crisis.	Victoria	business owner
2022-07-11 06:18:36	Western Cape		Yes I do	Solar		Deon	business owner
2022-07-11 06:16:29	Gauteng		Yes I do	Solar		Warren	business owner
2022-07-11 06:13:38	Western Cape		Yes I do	Solar	The red tape surrounding IPP's should be scrapped with immediate effect. Any renewable should be allowed as a matter of urgency.	Brett	business owner
2022-07-11 06:10:13	Western Cape		Yes I do	Solar	SA is a very sunny country and solar can be a very effective solution in order to assist with additional power generation. Alternative power generation methods such as wind can also greatly help!	MC	business owner
2022-07-11 06:06:06	Gauteng		Yes I do	Solar		Charl	business owner
2022-07-11 06:05:26	Limpopo		Yes I do	Solar		Gordon	business owner
2022-07-11 06:03:51	Mpumal anga		Yes I do	Solar	Dismiss all the strikers. They dont care about the rest of South Africa. Get back the people with all the knowledge to get back electricity situation like in the past.	Joani	business owner
2022-07-11 05:52:11	Gauteng		Yes I do	Solar	PLEASE ALLOW US THE PEOPLE HELP SAVE OUR COUNTRY'S ECONOMY BY ALLOWING US THE GENERATE ELECTICITY	Jaco	business owner
2022-07-11 05:49:52	Gauteng		Yes I do	Solar	Solar or wind which this country has in abundance. Any clean energy is preferable to fossil fuels	Gary	business owner
2022-07-11 05:40:54	Gauteng		Yes I do	Solar		Viz	business owner
2022-07-11 05:29:58	Gauteng		Yes I do	Solar		Theo	business owner
2022-07-11 05:20:13	Gauteng		Yes I do	Solar	We have beautiful warm African sun which we can tap from. I would love to see a system where we could get solar and feed surplus back into the system for additional credits, like they are doing internationally.	Marilu	business owner
2022-07-11 05:00:31	KwaZulu- Natal		Yes I do	Solar		Gillian	business owner
2022-07-11 04:42:12	KwaZulu- Natal		Yes I do	Solar		Pierre	business owner
2022-07-11 04:34:20	Gauteng		Yes I do	Solar	Solar and wind is the most economical and fastest way to resolve the economic crisis we are facing. Using solar will alleviate the pressure on Eskom 's overworked power stations and save a lot of money not using the gas turbines during day time. Moreover, using solar in the day to fill the dams used in 'Pumped storage hydropower' will alleviate the rush hour/food preparation period during the early evening and morning periods. We have these dams, lets use them in this way.	Hannes	business owner
2022-07-11 04:25:11	Western Cape		Yes I do	Solar		Johan	business owner
2022-07-11 04:22:16	Western Cape		Yes I do	Solar	Solar and Wind are the obvious way forward in a world threatened by climate change. We have plenty of both in South Africa.	Jannet	business owner
2022-07-11 03:35:20	Gauteng		Yes I do	Solar	Solar gives you control over your electricity bill, low maintenance cost Clean and renewable energy	zodwa	business owner
2022-07-11 02:27:05	KwaZulu- Natal		Yes I do	Solar	A blend of Solar and Energy storage solutions will allow effective demand side management.	Roan	business owner
2022-07-11 02:21:31	Gauteng		Yes I do	Solar	We need to allow private enterprises to create power using renewable resources in order to support eskom that can no longer support the country's power needs	Colin	business owner
2022-07-11 01:36:47	Gauteng		Yes I do	Solar		Samantha	business owner
2022-07-11 01:36:47	Gauteng		Yes I do	Solar		Samantha	business owner

2022-07-11 00:55:04	Gauteng		Yes I do	Solar	Whatever form of power that will allow the country to function and people to be able to work, manufacturers, investors etc etc .. we need power desperately and soon. As long as there is no corruption and greed and power providers genuinely want to provide power for everyone's good There may be a short term, medium term and long term options so whichever form it comes in .. so ITB the amount of sunshine that the country has there really should be more solar available more readily for individuals but I understand that an effective infrastructure takes time to build and be a reliable supply	HEIDE	business owner
2022-07-11 00:31:37	Gauteng		Yes I do	Solar	Apropos immediate needs, I have to answer solar, as it is already available. However, I have a number of concerns. 1) There is an insufficient amount of renewable energy to meet the country's needs; 2) I am concerned about the costs involved both environmentally (e.g. wind power - environmentally very costly) and financially; 3) I am concerned about the amount of sabotage at so many levels that has been going on re Eskom for years, now, without anyone doing anything effective about it. Why not?; 4) I think the opportunities for more corruption to take place are evident (e.g. the familial relationship between Ramaphosa and Mosepe); 5) I do not agree with the unscientific, economically devastating hysteria of the "Greens"; and 5) I am a huge fan of "clean" nuclear going forward, especially given how trustworthy the newly developed reactors are. Laser could also be considered, given what has already been developed in this regard.	Peta	business owner
2022-07-11 00:01:17	North West		Yes I do	Solar	They cannot steal the sun that's why they will not even consider Solar, South African Government or rather the ruling g party has failed its citizens. It's been so many years with loadshedding and they have not thought of alternatives, really??	Lerato	business owner
2022-07-10 23:57:16	Gauteng		Yes I do	Solar		Paige	business owner
2022-07-10 23:56:09	Western Cape		Yes I do	Solar	Renewable energy sources sre abundant and reliable if the correct mix is used. The government needs to priivate energy generation and have it delivered and run by compitant businesses. The same can be said for all the state parastatels	Stephen	business owner
2022-07-10 23:51:24	Mpumalanga		Yes I do	Solar	South Africa's aging power stations will continue to fail and solar energy is the quickest form of energy to get running. In the long term Nuclear will be a good option but only if it is totally private and the ANC do not use it as a cash cow.	Rob	business owner
2022-07-10 23:48:55	Western Cape		Yes I do	Solar	We have unlimited sun!!! And it doesn't harm the environment...	Jeanne	business owner
2022-07-10 23:24:30	Gauteng		Yes I do	Solar	Solar, Wind and Hydro are all perfect ways for South Africa to generate green energy! We are a country that experiences an abundance of sun and wind that when allowed to effectively and efficiently instal and use these systems to harness there power it can make a HUGE impact in the day-to-day functioning of South Africa! We are also a country with an abundance of dams and rivers and hydro systems although expensive are worth it in the long run of making South Africa a greener country!	Sabrina	business owner
2022-07-10 22:56:50	Gauteng		Yes I do	Solar	Private sector would be the only business sector that can save this country. They have the entrepreneurial flair , access to capital and the overall will to help make a difference whilst driving profitable entities. Also in the alternative energy arena - solar, wind, hydro, etc.	Bertie	business owner
2022-07-10 22:54:06	Outside SA	USA	Yes I do	Solar	In the US, the state covers your set up of solar and then you can sell the power back to the grid. So individuals can sell power at peak periods and take the pressure f the system	James	business owner
2022-07-10 22:46:33	Gauteng		Yes I do	Solar	Solar together with electricity storage mechanisms - battery, hydro-electric. Small units could be set up for small/regional users	Ian	business owner
2022-07-10 22:40:50	Western Cape		Yes I do	Solar		Lyn	business owner
2022-07-10 22:40:28	Western Cape		Yes I do	Solar	We need to focus our attention on renewable sources of energy as they are the only long-term solution.	Rosalind	business owner
2022-07-10 22:35:24	Western Cape		Yes I do	Solar		Stuart	business owner
2022-07-10 22:19:03	Eastern Cape		Yes I do	Solar		Daniel	business owner
2022-07-10 22:18:41	Western Cape		Yes I do	Solar	South Africa is a very sunny country and if we allow solar power to help provide our citizens with electricity, private companies may increase their sustainable energy production. Renewable energy is the way forward, including solar, wind and hydroelectricity. With Eskom struggling to provide power for everyone it makes sense to allow for other sources of electricity in order to provide for all citizens.	Danny	business owner
2022-07-10 22:18:28	Western Cape		Yes I do	Solar	There has to be a mix of alternative energy. Water and solar and wind. We have all available it's a question of what will be quicker. Solar would seem like a quick solution	Leigh-Ann	business owner
2022-07-10 22:18:18	Western Cape		Yes I do	Solar		Adam	business owner
2022-07-10 22:16:50	KwaZulu-Natal		Yes I do	Solar	South Africa is one of the countries in the world with the most sunshine annually - and use of solar energy does not have any negative environmental impact - clearly an effective solution to our energy crisis.	Sigrid	business owner
2022-07-10 22:14:53	Eastern Cape		Yes I do	Solar	Common sense.	Miles	business owner
2022-07-10 22:08:16	Western Cape		Yes I do	Solar	A rapid rollout of small scale photo PV on rooftops of houses in communities that are properly financed will create the maximum number of jobs and transfer capital directly to households. They can use the electricity they need and sell the rest to the grid. With software options if the grid is constrained, higher feed in prices could be easily managed to optimise the use of electricity.	Willem	business owner

2022-07-10 22:06:02	Gauteng		Yes I do	Solar	Please can we get all tenders for solar and wind power that we can get to solve this mess made since 1994. They were told to build more powerstation but instead built more houses with consumers. *facepalm*	Sara	business owner
2022-07-10 22:01:38	Gauteng		Yes I do	Solar		Tracey	business owner
2022-07-10 21:59:22	KwaZulu-Natal		Yes I do	Solar	All renewable energy solutions should be prioritized	J	business owner
2022-07-10 21:57:58	Mpumalanga		Yes I do	Solar	Power to the people! Why would we stay stuck in the old ways if we are reaching for the future? How will we ever get there if we are stopped by the very people who are supposed to lead us? The sun can't run out of energy, not in a couple of billion years. So we can make the most of what is given to us. Sun, wind and more. At least i know if i pay for solar, i get what i pay for. Eskom we pay for, but get nothing in return... Their time is over.	Jakes	business owner
2022-07-10 21:55:57	Gauteng		Yes I do	Solar		Richard	business owner
2022-07-10 21:53:49	Western Cape		Yes I do	Solar		Tootsi	business owner
2022-07-10 21:53:47	Western Cape		Yes I do	Solar		Tootsi	business owner
2022-07-10 21:53:41	Western Cape		Yes I do	Solar		Ralf	business owner
2022-07-10 21:52:55	Gauteng		Yes I do	Solar	Sunny South Africa will benefit from Solar power given the climate.	Shainal	business owner
2022-07-10 21:52:03	KwaZulu-Natal		Yes I do	Solar	Independent power producers should absolutely be allowed to provide a permanent power solution to South Africans. Why are we expected to pay for a service we don't get, while government sees fit to sell an uninterrupted supply to neighbouring countries instead of prioritising its citizens? If they would rather sell the power they generate to other countries, by all means go ahead. But then allow the citizens of SA to sort their power out on their own terms.	Louise	business owner
2022-07-10 21:51:33	KwaZulu-Natal		Yes I do	Solar		Jack	business owner
2022-07-10 21:49:18	Western Cape		Yes I do	Solar		Dieter	business owner
2022-07-10 21:48:27	Gauteng		Yes I do	Solar	Allow each citizen to produce their own energy from solar without any kind of restriction or tax. Rather encourage solar power production at point of usage by some kind of tax incentive. Decentralized energy production.	Werner	business owner
2022-07-10 21:42:46	Gauteng		Yes I do	Solar		Bev	business owner
2022-07-10 21:41:36	Western Cape		Yes I do	Solar	Readily available technology.	Deon	business owner
2022-07-10 21:38:20	Gauteng		Yes I do	Solar	Just do it already.	Frank	business owner
2022-07-10 21:38:00	KwaZulu-Natal		Yes I do	Solar		Julian	business owner
2022-07-10 21:32:43	Western Cape		Yes I do	Solar	For our economy to survive we desperately need stable electricity, I chose solar but we need a combination wind and solar immediately and all options should be explored and red tape removed.	Allison	business owner
2022-07-10 21:26:21	Gauteng		Yes I do	Solar	Please allow independent producers immediately. I selected solar but any source like wind would also be fine. There should be a combination of natural renewable sources.	Gaynor	business owner
2022-07-10 21:20:27	Western Cape		Yes I do	Solar	multiple sources of energy production should be investigated, allowing smaller communities to be incentivised to produce local power, whether wind, solar. Sustainable sources need to be a priority.	Angela	business owner
2022-07-10 21:17:41	Western Cape		Yes I do	Solar	The sun shines MOST days It's a no brainer	Daleen	business owner
2022-07-10 21:13:13	Mpumalanga		Yes I do	Solar	I believe that the state has failed us in service deliveries . We need to take back governance and get our country functioning. If independent industry can fix this then we support this.	Alan	business owner
2022-07-10 21:12:08	Western Cape		Yes I do	Solar		Roule	business owner
2022-07-10 21:11:55	North West		Yes I do	Solar			business owner
2022-07-10 21:11:52	North West		Yes I do	Solar			business owner
2022-07-10 21:11:41	KwaZulu-Natal		Yes I do	Solar		Lizzy	business owner
2022-07-10 21:09:25	KwaZulu-Natal		Yes I do	Solar		Robyn	business owner
2022-07-10 21:09:16	Gauteng		Yes I do	Solar		Schalk	business owner

2022-07-10 21:06:38	Free State		Yes I do	Solar		Carlene	business owner
2022-07-10 21:01:43	KwaZulu-Natal		Yes I do	Solar		Kelvin	business owner
2022-07-10 20:57:57	Gauteng		Yes I do	Solar			business owner
2022-07-10 20:57:08	Gauteng		Yes I do	Solar	Put South Africa first and all will benefit and less dependant of the State	ARIE	business owner
2022-07-10 20:54:53	Gauteng		Yes I do	Solar	Solar and coal power are very important and readily available.	M	business owner
2022-07-10 20:50:34	Gauteng		Yes I do	Solar		Logan	business owner
2022-07-10 20:50:20	Gauteng		Yes I do	Solar		Desiree	business owner
2022-07-10 20:49:47	KwaZulu-Natal		Yes I do	Solar	Why , every single bloody time do we have to have a crisis , before any action hopefully is taken. Ramaphosa: world's biggest disappointment ever. Pravin Gordhan: MIA. GWEDE MANTASHE , is Zuma in a different form. Non of you can make a decision. Pravin , if you took all that money that you poured into that deep gat called SAA , how much more power supply would we have. For once please think of the countries sack and not your party!	Paul	business owner
2022-07-10 20:47:54	Gauteng		Yes I do	Solar		LORIENTTE	business owner
2022-07-10 20:47:42	Gauteng		Yes I do	Solar	We live in a country with sun, wind and rain and we a limited to one corrupt supplier it doesn't make and sense at all	Cherie	business owner
2022-07-10 20:46:05	Western Cape		Yes I do	Solar	Massive potential for solar power generation.	Stadler	business owner
2022-07-10 20:46:03	Eastern Cape		Yes I do	Solar			business owner
2022-07-10 20:45:57	Western Cape		Yes I do	Solar	Solar is more reliable and safe for the environnent. We should identify ways to make solar more part of our luvess and areas where we can put up solar farms and wind mills for wind power.	Jackie	business owner
2022-07-10 20:42:29	Gauteng		Yes I do	Solar	What is best suited – renewables, coal, nuclear, hydro, gas, imports or other forms of generation? For emergency purposes... what ever is best- kapowie stations... and and a good mix of hydro lots and lots of solar plants nuclear is a no brainier...for Gass and hydro definately. These solutions need to be developed according to the climatology of every region in our country to be cost effective- working with what is naturally available. If there's nothing naturally available we can't be stalled- Solar needs to be put in place or wind power like at the coastlines...If there's coal but it's unreliable then partner it with hydro if there water- or nuclear or Gass. Should Independent Power Producers be allowed to immediately supply South Africa with electricity? Absolutely- this should have been done ages ago - cause we wouldn't be here if it was!! So AS OF YESTERDAY ALREADY! Is there a need to immediately amend legislation? Yes- because localisation js preventing from having parts we need imported for the now... local employment and jobs created through mentoring from the onset can still be developed but not at the immediate expense of the the economy being able to support what little Power and Economy we have left! One can put in new tech and train and apprentice at the same time- this NEEDS TO BE DONE as a matter of urgency!!! Also heavy security and the highest egal penalties need to be applied to anyone doing even the smallest illegal thing - we cannot let small petty theft become rampant corruption again. The highest standards of procurement and ethical procedures need to be carried out in this process and people penalised massively if anything they do tampers with the working and procurement of these systems.	Gudrun	business owner
2022-07-10 20:41:32	Gauteng		Yes I do	Solar	We need power. Not Cyril's legacy of darkness.	Bob	business owner
2022-07-10 20:38:47	Gauteng		Yes I do	Solar	SA has lots of sun and can tremendously add to cleaner and more efficient energy than coal. Wind energy is also a good energy generator in areas of our country. Our governing party took a good working and functioning country with profitable parastatals and managed to liquidate our whole country in 28 years, the citizens now have to make our own decisions about what will work and make work of getting it done via channels such a Dear South Africa.	Marelize	business owner
2022-07-10 20:35:55	Gauteng		Yes I do	Solar		Michael	business owner
2022-07-10 20:35:42	Western Cape		Yes I do	Solar	It would be extremely useful if the Minister of Mineral affairs and Energy etc did not have a seemingly vested interest in maintaining coal fired power stations on the one hand and there not letting any Independents generate independently to feed into the grid. There is an abundance of both solar capability and wind which could be put to immediate use and yet we are stuck in the doldrums. Maybe you should petition to have him relieved of his responsibilities as soon as possible!	Margaret	business owner
2022-07-10 20:35:29	Gauteng		Yes I do	Solar		Jacques	business owner
2022-07-10 20:32:52	KwaZulu-Natal		Yes I do	Solar	South Africa needs to encourage independent competition and choice for the people. We cannot remain hostage to a corrupt greedy self seeking government. Most importantly our toxic footprint on the planet is horrific...we keep pumping out people and are running out of space thereby putting pressure on resources. Solar, wind or gas is environmentally healthier for our planet for future generations to enjoy.	Loren	business owner

2022-07-10 20:32:52	KwaZulu-Natal		Yes I do	Solar	South Africa needs to encourage independent competition and choice for the people. We cannot remain hostage to a corrupt greedy self seeking government. Most importantly our toxic footprint on the planet is horrific...we keep pumping out people and are running out of space thereby putting pressure on resources. Solar, wind or gas is environmentally healthier for our planet for future generations to enjoy.	Loren	business owner
2022-07-10 20:31:26	Western Cape		Yes I do	Solar		Glynnis	business owner
2022-07-10 20:27:10	Gauteng		Yes I do	Solar		Frans	business owner
2022-07-10 20:27:09	Gauteng		Yes I do	Solar		Frans	business owner
2022-07-10 20:27:04	Gauteng		Yes I do	Solar	I feel the government has FAILED the very people they are paid to serve. Not SUPPLYING power is a disgrace to our human rights. It's time the government let go of the control to provide the people of SA with power (WHICH THEY HAVE FAILED TO DO) and let Private power suppliers ONTO THE GRID to stop atrocity and give power back to SOUTH AFRICANS. (No pun intended ?)	Gillian	business owner
2022-07-10 20:24:42	Western Cape		Yes I do	Solar	Solar is the only generator of electricity that can be rapidly built that does not require any fuel such as coal, gas or nuclear. South Africa has an excellent climate, ideally suited to solar and there is plenty of space to construct large scale solar power stations.	Christopher	business owner
2022-07-10 20:22:45	Western Cape		Yes I do	Solar	SA is rich in abundant space and sunshine.....and it can be used countrywide to link into grids	Rene	business owner
2022-07-10 20:21:17	Gauteng		Yes I do	Solar			business owner
2022-07-10 20:20:56	Western Cape		Yes I do	Solar		Diane	business owner
2022-07-10 20:20:16	Gauteng		Yes I do	Solar	Renewables offer the best solution in the long term, both for cost and for climate.	Richard	business owner
2022-07-10 20:20:08	Gauteng		Yes I do	Solar		G	business owner
2022-07-10 20:20:04	Western Cape		Yes I do	Solar		Helen	business owner
2022-07-10 20:14:39	Gauteng		Yes I do	Solar		Michael	business owner
2022-07-10 20:13:49	Gauteng		Yes I do	Solar		Kerry	business owner
2022-07-10 20:04:13	Outside SA	United Kingdom	Yes I do	Solar	Whilst solar would be the preferred option, South Africa could also benefit from wind farms, both on and offshore. Hydro electricity harnessing wave power would also be an option. All three are renewable and energy efficient.	Frans	business owner
2022-07-10 20:03:52	KwaZulu-Natal		Yes I do	Solar	Coal mining does huge damage to environment and co2 emissions from coal are unacceptable, countries with high emissions will be taxed in future which will damage our economy. Solar and wind energy, although not constant can have their energy stored in molten salt or other forms of storage. Renewables produce much less co2 and many local jobs could be created by including local content in the renewable industry.	Mike	business owner
2022-07-10 20:02:47	Gauteng		Yes I do	Solar		Riaan	business owner
2022-07-10 20:01:42	Gauteng		Yes I do	Solar	The whole of the Northern Cape and central provinces are suited for solar and wind farms. Instead the corrupt anc prefer to line their pockets. Coal and Nuclear power belong to the last millenium and should be phased out .It is much cleaner and reusable. escom can not be saved and must be closed down with its incompetent employees.	Leon	business owner
2022-07-10 19:58:28	Gauteng		Yes I do	Solar	The time has come for Eskom's' tyranny to end! For far too long the citizens of South Africa have been held at ransom to this labour heavy organization and overpaid staff at this now "STATE OWNED ENTERPRISE" as if!! While our beautiful country and its' people bleed and suffer bouts of constant rolling blackouts and being forced ad manipulated to constantly increase public spending on units of electricity all at the sake of exorbitant profits for this "SOE". The country should stand up against this monopoly and step back as we usher in some healthy competition that can drive the deliverables and provide this nation with the public service of the most simple requirement...ELECTRICITY. Incentives and tax free solutions such as Solar / Wind and other renewable earth friendly solutions should be provided to the homes and businesses that want to spend their money on these solutions, aside from the greater solutions that can be maximized, such as hydro, solar and wind, which we have an abundance of on the platform of our country. We cannot let this wait a day, hour, minute or second longer. The action for the greater good needs to be prioritized for the purposes of growth, security and peace in our country. #EskomDaysAreNumbered	GEORGE	business owner
2022-07-10 19:58:23	Gauteng		Yes I do	Solar	All forms of power generation should be allowed,	terry	business owner
2022-07-10 19:52:08	Gauteng		Yes I do	Solar	Eskom can not do the job!	Linda	business owner
2022-07-10 19:50:32	KwaZulu-Natal		Yes I do	Solar	Any independent sustainable power source is welcome to save our economy and businesses!	Amy	business owner
2022-07-10 19:42:56	Gauteng		Yes I do	Solar		Chris	business owner

2022-07-10 19:33:23	Western Cape		Yes I do	Solar	Eskom is unable to supply enough power in the foreseeable future and red tape and government interference is limiting the expansion and participation of independent power suppliers. Cut the red tape and open up to independent suppliers with immediate effect	Deon	business owner
2022-07-10 19:32:41	Western Cape		Yes I do	Solar		Daniella	business owner
2022-07-10 19:28:44	Western Cape		Yes I do	Solar	Solar will be the fastest to implement. Instead of levied for installation of household solar give rebates as it makes more power available for industry. give rebates or tax relief for industries installing solar and other alternative solutions in order to keep industry going.	Henry	business owner
2022-07-10 19:26:34	Gauteng		Yes I do	Solar	We are in urgent need of power or there will be no business and no jobs. The quickest solutions are to allow solar & wind generation to be sold back to the grid.	Guy	business owner
2022-07-10 19:25:02	Western Cape		Yes I do	Solar	Our country has an abundance of sunshine which we must harness to provide the country with power.	Lydia	business owner
2022-07-10 19:21:44	Gauteng		Yes I do	Solar		Gerardus	business owner
2022-07-10 19:14:24	Gauteng		Yes I do	Solar	There is no time to waste. Our economy is impacted negatively daily. How much time is left before it crashes. It cannot hold out forever on this level. Businesses, education, the health sector, the economy are grinding to a standstill due to the intermittent power supplies. Independent companies able to provide power from renewable sources need to be encouraged and actively supported to step in and fill a woeful gap.	Wendy	business owner
2022-07-10 19:08:41	KwaZulu- Natal		Yes I do	Solar		Brett	business owner
2022-07-10 19:07:36	Gauteng		Yes I do	Solar		Richard	business owner
2022-07-10 19:06:03	KwaZulu- Natal		Yes I do	Solar	Loadshedding is affecting business, production and job creation. Average households can not cope with the damage to appliances	Trudy	business owner
2022-07-10 19:04:30	Gauteng		Yes I do	Solar	We have sun to produce enough energy to use solar inlands We have great winds to produce energy at most coast lines Hydro can work if our dams are taken care of	Adri	business owner
2022-07-10 19:01:04	KwaZulu- Natal		Yes I do	Solar	Time to take action and make a difference for a better future, now!	mich	business owner
2022-07-10 18:57:20	KwaZulu- Natal		Yes I do	Solar		Vernon	business owner
2022-07-10 18:47:43	Gauteng		Yes I do	Solar	We do have electricity it's just being sold to other countries. SA should be prioritizing it's own supply. Also everyone who can provide electricity should be given leave to do so.	Michele	business owner
2022-07-10 18:45:20	KwaZulu- Natal		Yes I do	Solar		Martin	business owner
2022-07-10 18:43:31	KwaZulu- Natal		Yes I do	Solar		Juan	business owner
2022-07-10 18:42:58	Western Cape		Yes I do	Solar	Solar, wind, renewables	Hagen	business owner
2022-07-10 18:38:41	KwaZulu- Natal		Yes I do	Solar	Africa has more sun than any other country in the world. It makes sense to go solar.	Avinal	business owner
2022-07-10 18:34:26	Western Cape		Yes I do	Solar	We have 80-90% of days with sunshine in South Africa and it would be easy to generate electricity	Lisa	business owner
2022-07-10 18:31:52	Western Cape		Yes I do	Solar	The need to have I dependant suppliers is LONG overdue as this government has done nothing in the past 15+years to rectify the Eskom problem. I say solar is the way to go but also hydro is a good alternative, but that is speaking as a layman; whatever is the best independant provider product, lts get it!	Patricia	business owner
2022-07-10 18:26:30	Western Cape		Yes I do	Solar	It's cheap and readily available. And any solution that can be implemented quickly needs to be considered urgently	Hilary	business owner
2022-07-10 18:25:01	KwaZulu- Natal		Yes I do	Solar	I'm no energy expert, but it appears to me that with our climate, solar as part of a solution, should be used. But there's probably a combo solution needed. But a solution is needed urgently - before the tax base leaves the country, all small businesses implode....and large businesses move elsewhere.	Anne	business owner
2022-07-10 18:20:31	Western Cape		Yes I do	Solar	Both solar and wind farms currently exist and these should immediately be utilised for the additional requirement. Further expansion for Independent Providers should be allowed as private providers are by far more efficient and stable than any government managed organisation at present.	Sean	business owner

2022-07-10 18:18:11	KwaZulu-Natal	Yes I do	Solar	South Africa has enormous amounts of sunshine to power solar generation We should not be help to ransom , it's absolutely inexcusable that we are still being load shedded We have business to run and our own security and welfare to consider!	Belinda	business owner
2022-07-10 18:08:53	Western Cape	Yes I do	Solar		Kallie	business owner
2022-07-10 17:58:02	Western Cape	Yes I do	Solar	All municipalities should be forced to take up power from end users on a 1 for 1 unit credit. This would encourage ordinary citizens to invest in solar panel installations to feed into the grid during the day without the need for any public cost in the infrastructure. This power would be sold by the municipalities to businesses at 100% profit. A call to the public to invest in this public private initiative would I believe generate a massive uptake and bring many megawatts of power into the grid at the shortest possible time.	Mark	business owner
2022-07-10 17:54:18	Limpopo	Yes I do	Solar		Mariette	business owner
2022-07-10 17:50:42	Gauteng	Yes I do	Solar		Stephanie	business owner
2022-07-10 17:49:43	Western Cape	Yes I do	Solar		Karen	business owner
2022-07-10 17:42:27	KwaZulu-Natal	Yes I do	Solar	Privatise Eskom asap	Guy	business owner
2022-07-10 17:36:53	Western Cape	Yes I do	Solar	Renewables are safe efficient kind to people and enviroment and job generating. For solar we have affordable efficient thin film technology created in SA years ago. Was it suppressed ?	Sally	business owner
2022-07-10 17:36:24	Western Cape	Yes I do	Solar		Petrakis	business owner
2022-07-10 17:35:47	Gauteng	Yes I do	Solar	We have an abundance of sunlight throughout the country for most of the year and it is not controlled by the Government . Solar Energy can be readily harnessed to supplement and/or replace power supply. Legislation should be amended immediately to enable Independent Power Producers to urgently increase power supply.	SUE	business owner
2022-07-10 17:24:32	Eastern Cape	Yes I do	Solar	Tired of loadshedding. Effecting business in a big way	Yiota	business owner
2022-07-10 17:21:44	Gauteng	Yes I do	Solar	Please privatise energy production, in whichever form. Wind, solar, hydro or coal. Bring experts back on board to provide much needed technical expertise.	Kathy	business owner
2022-07-10 17:18:00	KwaZulu-Natal	Yes I do	Solar	It'll only be through looking to business that we'll see any progress and solutions to our power supply crisis. Legislation must be altered to allow competition against Eskom and citizens given options of which provider they'd like to support, in whichever renewable energy category. Imagine if we the tax payers could funnel a portion of our individual taxes into areas/ministries we believe needed our funding. Ministries or government departments and municipalities would have to jack up their acts to attract our investment. Sadly we live in a kleptocracy with rampant fraud and with ZERO faith in any of our government institutions such a forward thinking solution is beyond those in power who're there for their own nefarious means.	Ant	business owner
2022-07-10 17:06:57	Western Cape	Yes I do	Solar		Miriam	business owner
2022-07-10 16:58:08	Western Cape	Yes I do	Solar	There are plenty of shovel ready renewable energy projects that could add much-needed MWs to Eskom's grid. There are also energy storage solutions available, if the red tape wasn't holding them back.	Silke	business owner
2022-07-10 16:57:21	Western Cape	Yes I do	Solar		Daryl	business owner
2022-07-10 16:55:10	Western Cape	Yes I do	Solar	PRIVATISE ENERGY IN SOUTH AFRICA - END ESKOM!!!!	melanie	business owner
2022-07-10 16:52:49	Gauteng	Yes I do	Solar		Dan	business owner
2022-07-10 16:29:08	Western Cape	Yes I do	Solar	Solar has minimal lead time and is cost effective.	John	business owner
2022-07-10 16:28:41	Western Cape	Yes I do	Solar	I feel there are many options, any form of independent energy suppliers!	Michaela	business owner
2022-07-10 16:26:03	Western Cape	Yes I do	Solar	South Africa is ideal for Wind, Solar and Hydro electricity production. There are plentiful of ways for us to produce electricity in a more environmentally friendly way, without needing to solely rely on Eskom. Eskom and the Government is causing our country to deteriorate, not progress. Allow the people to help during the loadshedding crisis! Allow Independent Power Producers to assist!	Lisette	business owner
2022-07-10 16:22:26	Western Cape	Yes I do	Solar	We definitely need to allow independent companies to support electricity to the grid (with urgency!), given that Eskom is unable to keep up with supply demands and these demands will only continue to increase as the population grows. I also feel strongly that new sources of electricity must be environmentally friendly and sustainable - there are so many options now, several of which are suitable for South Africas climate.	Senta	business owner

2022-07-10 16:19:58	Western Cape		Yes I do	Solar	Northern Cape is perfect for solar power. West Coast is good for Wind power. The destruction of the economy has to end. Stop with the endless debates and allow independent producers onto the network before there's nothing left.	Richard	business owner
2022-07-10 16:17:44	Gauteng		Yes I do	Solar		Sihle	business owner
2022-07-10 16:06:58	Free State		Yes I do	Solar	First get a real government. Then get free trade.	Ben	business owner
2022-07-10 16:05:04	Gauteng		Yes I do	Solar			business owner
2022-07-10 15:55:25	Gauteng		Yes I do	Solar	SA is 'n sonnige land met sonnige lanf somerdae en selfs in Winter is daar sonskyn.Wind is ook 'n alternatief in areas waar daar meer wind is.Voel bouregulasies moet ook verander dat solar warmwaterstelsels geinstaleer word en huise si gebou word om energie te spaar.	Wilma	business owner
2022-07-10 15:55:19	Western Cape		Yes I do	Solar	We live in an environmentally energy rich part of the world. Given the environmental availability as well as the environmental impact- How can we consider any other form of power generation other than renewable energy (wind or solar).	Theresa	business owner
2022-07-10 15:51:24	Free State		Yes I do	Solar	South Africa should introduce the largest capacity generation of electricity, with a good mix of sources combined. I support all types of methods, but would suggest that households erect solar themselves, and benefit by means of reduced energy tarrifs crediting the amounts of wattage that was supplied. I also support any nuclear energy generation.	MJ	business owner
2022-07-10 15:12:31	Gauteng		Yes I do	Solar	Anything other than the current situation would be better	Bianca	business owner
2022-07-10 15:12:15	KwaZulu- Natal		Yes I do	Solar	Individual s and small bussiness should be encouraged and subsidised to go off grid and even feed back into the grid .In short time +- 12 months we can put 5000 mega watt into the system.	Jan	business owner
2022-07-10 15:03:00	Gauteng		Yes I do	Solar		Samantha	business owner
2022-07-10 15:00:27	KwaZulu- Natal		Yes I do	Solar	STOP THE CRIMINAL ANC GOVERNMENTS MONOPOLY AND BEAUROCRACY ON ALL SERVICES INCLUDING POWER WITH IMMEDIATE EFFECT. STOP BEEE WITH IMMEDIATE EFFECT WHICH IS JUST A LICENCE TO STEAL FROM EVERY MAN WOMAN AND CHILD IN SOUTH AFRICA WITH TOTAL IMMUNITY. NOT ONE OF THE ANC GOVERNMENT DEPARTMENTS OR MUNICIPALITIES IS ABLE TO THEIR JOBS AT ALL. THEY ANC IS A CRIMINAL ORGANISATION WHICH IS ROTTEN FROM IT'S HAIR FOLLICLES TO IT'S TOE NAILS. IT STINKS IN EVERY WAY POSSIBLE.	Johnny	business owner
2022-07-10 14:53:09	Gauteng		Yes I do	Solar	Scrap red tape. Yes to allow independent participants and remove from government control. NO TO NUCLEAR which we cannot afford and if is falling away everywhere in the world. It is also DIRTY and can cause devastating pollution to the environment. We want clean energy like SOLAR and Wind or HYDROELECTRIC if feasible.	Jack	business owner
2022-07-10 14:51:58	KwaZulu- Natal		Yes I do	Solar		Neil	business owner
2022-07-10 14:51:36	Western Cape		Yes I do	Solar	South Africa has abundant sunshine and solar pv plants seem to me to be the easiest and quickest to construct in the emergency energy crisis, using arid areas that are not suitable for much else.	Leigh	business owner
2022-07-10 14:20:26	Gauteng		Yes I do	Solar	Solar is the technology that can be rolled out the fastest nd in the short term we need fast solutions. Solar combined with storage is a great solution and can, with storage, also provide power when the sun is down	Thys	business owner
2022-07-10 14:20:08	KwaZulu- Natal		Yes I do	Solar	As the government appears to be incapable of providing the necessary energy, I believe that the private sector should partake. I support any form of renewable energy, i.e. solar, wind etc	Julia	business owner
2022-07-10 14:18:42	Eastern Cape		Yes I do	Solar	I do feel with all our sunshine in SA we should go much more for solar farms. And government should help all citizens to put solar on ther houses, so we can all put back extra electricity back in the grid. I also feel that privately owned companies should be allowed to come in the field. The copitition would be good and privitise escom completely. The best thing to happen.	Maria	business owner
2022-07-10 14:17:27	Western Cape		Yes I do	Solar	our weather is perfect for solar and wind energy. This is so obvious - so what are we STILL waiting for.	Sabine	business owner
2022-07-10 14:11:49	Gauteng		Yes I do	Solar	With the sun being a natural resource, chances of running out of energy are slim. We can make solar panels readily available for those of zero and lower income brackets and use whatever money that should have been used on the Eskom plants to chart a way towards going 100% off the grid and subsequently eliminate our carbon footprint.	Phuti	business owner
2022-07-10 14:11:21	Gauteng		Yes I do	Solar		Raoul	business owner
2022-07-10 14:07:09	Gauteng		Yes I do	Solar		Yvonne	business owner
2022-07-10 13:47:32	Gauteng		Yes I do	Solar		Hugo	business owner
2022-07-10 13:40:53	Western Cape		Yes I do	Solar		Cheryl	business owner

2022-07-10 13:40:51	Western Cape		Yes I do	Solar		Cheryl	business owner
2022-07-10 13:39:22	KwaZulu- Natal		Yes I do	Solar	The seriousness of the emergency demands that any and all rational solutions be instituted IMMEDIATELY - NOW - FOR SHIT'S SAKE - EVEN THE TURKISH GAS GENERATOR SHIPS OFFSHORE -	Peter	business owner
2022-07-10 13:29:04	Western Cape		Yes I do	Solar	Eskom should be phased out and productive independent producers should take a share of the market to make it consistent and viable	Mark	business owner
2022-07-10 13:18:45	Gauteng		Yes I do	Solar	Solar is potentially efficient and clean and each household should be subsidised to put in solar. This will significantly reduce the hardships of load shedding and be more cost effective in the long run for those using generators which are not clean energy and becoming very expensive. The government should subsidise the poorer community to supply them solar This can reduce the load on Eskom. Bigger firms etc should use what ever they want to produce power for themselves and to put excess back into the grid , giving eskom relief and time to sort out their problems (maintenance etc). Finally the government needs a "Maggie Thatcher" to control unions that hold the whole country to ransom.	Paul	business owner
2022-07-10 13:13:52	Limpopo		Yes I do	Solar	Eco friendly.	Willem	business owner
2022-07-10 13:12:31	Gauteng		Yes I do	Solar	We need our country of of this crisis and South Africa should consult with Americans and European countries to get solutions for this crisis	Keith	business owner
2022-07-10 13:09:32	Gauteng		Yes I do	Solar	Sustainable alternative energy is needed. Not coal powered or diesels ships. Independent producers is essential to the ability of the country to flourish and attract future investment.	Almero	business owner
2022-07-10 13:06:44	Western Cape		Yes I do	Solar	SA reached a stage where we have run out of options. There is place in SA for Government subsidized energy and for Private Commercial Energy. The only option left is a combination. Let the private sector into the fray where demand and supply will determine the outcome. Government continue with coal, nuclear and hydro - areas where the private sector will be more hesitant due to high cost and sustainability. Demand and supply will then determine where the community source their energy, and business and commerce will source their energy in accordance with affordability. Large enterprises such as Cities, Mining, and Large Manufacturing can source their own electricity. Sasol is a good example. At Secunda Sasol has their own power plant in event of Escom failing.	deon	business owner
2022-07-10 12:50:04	Western Cape		Yes I do	Solar	The energy sector in SA should be de-regulated in order to encourage rapid private sector participation.	Johan	business owner
2022-07-10 12:50:04	Western Cape		Yes I do	Solar		Jane	business owner
2022-07-10 12:38:03	Eastern Cape		Yes I do	Solar	Solar can be introduced very rapidly. Allow big scale solar and home owners to generate and push back into the grid. Viva Green Power.	Louis	business owner
2022-07-10 12:32:32	Gauteng		Yes I do	Solar	Solar certainly makes the most sense - it's fast to deploy and reliable. The energy mix should include , Hydro, Solar, Gas and Wind though, as the energy solution is not just one ingredient,Nuclear is stable and brings huge capacity, but it takes forever to introduce and of course has all the risks associated with nuclear . Gwede Mantashe, should limit himself to licence facilitation, and not concern himself with understanding power Mix as he and his advisors are miserably l'll equipped to be " in charge" of this process. Kapowship was the best he could come up with, for obvious kickback benefits - 20 year agreement - WTF	Alex	business owner
2022-07-10 12:29:22	KwaZulu- Natal		Yes I do	Solar	I think we have all had more than enough of Eskom's excuses now and of course government has done nothing to even try to rectify the problem.....lots of solutions were put forward but of course government didn't bother to expend any energy on this.....why is it, though, that Eskom can table a huge profit but still be asking for handouts? And be blaming loadshedding on ageing infrastructure? Surely any profit made should have been plowed back into the business to modify outdated machinery? And do now here we sit, in the dark (literally), with businesses going down the drain, and yet Eskom and government carry on blaming each other or ignoring the problem, if not taking extensive holidays overseas where of course no such problem as loadshedding exists.....	Jill	business owner
2022-07-10 12:28:15	Western Cape		Yes I do	Solar	Government needs to subsidise installation of Solar panels . We have so much sunshine- surely this is the answer. Second choice would be wind	Marjorie	business owner
2022-07-10 12:25:33	Western Cape		Yes I do	Solar		Christa- Marié	business owner
2022-07-10 12:20:48	KwaZulu- Natal		Yes I do	Solar	Hi, In SA, we are blessed with large amounts of sunshine. Solar can be installed quickly and relieve all load shedding during daylight hours. At a later date various battery options can be added. I use the term battery loosely as it could be in the form of hydro storage, salt (molten salt energy) or various 'traditional' battery types. In addition solar can be evaluated easily for tender purposes and 'possibly' circumvent the need for corruption.	Simon	business owner
2022-07-10 12:10:49	Gauteng		Yes I do	Solar		Alicia	business owner
2022-07-10 12:05:50	Gauteng		Yes I do	Solar		Debra	business owner

2022-07-10 12:02:48	Western Cape		Yes I do	Solar	Solar and wind power is a given in sunny South Africa and windy coastal areas . Many independent companies would be keen to invest in and supply electricity at lower rates than what we paying currently with lots of outages etc	Karin	business owner
2022-07-10 11:59:12	Northern Cape		Yes I do	Solar	Ons het genoegsame son en wind om by n land soos Duitsland te leer en verby te gaan as dit by die benutting van son en windkrag kom	Danie	business owner
2022-07-10 11:58:33	Gauteng		Yes I do	Solar	Renewable energy needs to be prioritised. Not just solar but hydro and wind as well. I have concerns about scrapping controls on ensuring whatever options offered are safe and sustainable and eco-friendly. Our government is corrupt and may use this opportunity to allow fracking and damage to oceans that we have been fighting against. The rush to solve the energy crisis should be balanced with caution that we do not create a different negative outcome for South Africa.	Chandre	business owner
2022-07-10 11:57:11	KwaZulu- Natal		Yes I do	Solar	I may be wrong but feel it's the easiest and cheapest to get it all off the ground, then we can move along to other means	Laureen	business owner
2022-07-10 11:53:48	Western Cape		Yes I do	Solar	Immediate needs = Solar Long term needs = Nuclear	Heinrich	business owner
2022-07-10 11:50:00	Western Cape		Yes I do	Solar	To give us immediate energy and save the economy. Take action now.	Theo	business owner
2022-07-10 11:48:57	Western Cape		Yes I do	Solar		annely	business owner
2022-07-10 11:45:51	KwaZulu- Natal		Yes I do	Solar		JENNIFER	business owner
2022-07-10 11:43:32	Gauteng		Yes I do	Solar		Shelley	business owner
2022-07-10 11:42:38	Mpumal anga		Yes I do	Solar	Solar is a huge growing solution with massive potential to expand. Private owned providers can constructively contribute to the power supply so much needed now!	Rudilf	business owner
2022-07-10 11:41:36	Gauteng		Yes I do	Solar	Government should urgently be installing new solar and battery storage capacity to help address the electricity generation shortfall, this being the cheapest, fastest and most sustainable way to add capacity.	Quintus	business owner
2022-07-10 11:40:47	KwaZulu- Natal		Yes I do	Solar	There is no point in rushing into a decision that may not be cost-efficient - the debacle in Spain is a prime example. The govt cannot be allowed to have ANY part of a private energy initiative, as it will be prime corruption material. A regulatory body that will be involved in establishing the cost of the proposed electricity that will be produced is absolutely essential to ensure that the cost does not exceed the current rate - it is doubtful that the rate will be reduced due to any altruistic attitudes - energy producers worldwide make SA corruption pale into insignificance.	Kevin	business owner
2022-07-10 11:37:20	Western Cape		Yes I do	Solar	The field only allows one choice but a mixture of wind and solar would be optimum. Anything renewable would be wise. Please government, act now...	Craig	business owner
2022-07-10 11:36:43	Gauteng		Yes I do	Solar		Faith	business owner
2022-07-10 11:36:41	Gauteng		Yes I do	Solar		Faith	business owner
2022-07-10 11:36:18	Western Cape		Yes I do	Solar	We have Plentifull of sunshine	Conrad	business owner
2022-07-10 11:36:18	Western Cape		Yes I do	Solar	We have Plentifull of sunshine	Conrad	business owner
2022-07-10 11:32:34	Western Cape		Yes I do	Solar	Sustainable energy is the only way to move forward.	Niki	business owner
2022-07-10 11:32:12	Free State		Yes I do	Solar	Verander die eskom reels om sonkrag te mag installeer sodat goedkeuring binne 30 dae gegee moet tans wag ek al 8 maande vir n goedkeuring Hernubare is die vinnigste om te installeer en krag op te wek	Jacobus	business owner
2022-07-10 11:30:27	Gauteng		Yes I do	Solar	We have the capabilities to produce solar and gas generated electricity so why have a corrupt i situation stand in the way of growth and prosperity of our country	Cobus	business owner
2022-07-10 11:25:25	Western Cape		Yes I do	Solar	You have had a go at it a few times. Now let the people have a go at our electricity. We may surprise you with cheaper power supply	Justin	business owner
2022-07-10 11:24:04	Free State		Yes I do	Solar	Laat onafhanklike opwekking toe selfs vir risidensieele persone. Magtiging direk van regering!!	Willie	business owner
2022-07-10 11:21:43	Western Cape		Yes I do	Solar	Clearly solar and wind power generation, of which SA have plenty natural resources, should be promoted at all costs and coal usage should be phased out because of health and pollution reasons but, also because of the massive but uncalculated fraud and corruption which everyone knows about but nobody seems to want to do something about it. Obviously self-interest at certain levels prefer to leave things the way they are, sadly so!	hendrik	business owner
2022-07-10 11:19:10	Gauteng		Yes I do	Solar	It's available immediately at very little cost if corruption is set aside and not allowed to influence its introduction by private enterprise removed from government.	Jan	business owner
2022-07-10 11:18:25	Gauteng		Yes I do	Solar		Christa	business owner
2022-07-10 11:13:51	Gauteng		Yes I do	Solar	If talk continues it will be TOO LATE!!!!	Cliff	business owner
2022-07-10 11:13:31	North West		Yes I do	Solar	There are solar plants across the country. Make sure they're fully capacitated and get them to assist	Sammy	business owner

2022-07-10 11:07:42	Gauteng		Yes I do	Solar	We all know we cannot continue as we are but the reality is Eskom is going to take too long to be sorted out, if ever. Only when we have private suppliers, who think like business people, where wastage and corruption are not tolerated, will we get anywhere. Eskom and our government have proven time and again that the only thing they do well is steal and destroy. Nothing they run is successful (except perhaps SARS). Having said that we need to look at our country's resources. T what we do have in abundance is sun and space. We have thousands of hectares of unused ground all around the country that can be used for solar installations. And the sun, which we have more than enough of, is free. Yes. FREE. we just need to harness it. I cannot understand why this is something that even needs to be discussed. It's a "no-brainer" as the saying goes. Forget all other fossil fuels, gas etc. the only sustainable way forward is solar. With private contractors.	KARYN	business owner
2022-07-10 11:07:42	Gauteng		Yes I do	Solar	We all know we cannot continue as we are but the reality is Eskom is going to take too long to be sorted out, if ever. Only when we have private suppliers, who think like business people, where wastage and corruption are not tolerated, will we get anywhere. Eskom and our government have proven time and again that the only thing they do well is steal and destroy. Nothing they run is successful (except perhaps SARS). Forget all other fossil fuels, gas etc. the only sustainable way forward is solar. With private contractors.	KARYN	business owner
2022-07-10 11:06:03	Gauteng		Yes I do	Solar		Juri	business owner
2022-07-10 11:03:02	Eastern Cape		Yes I do	Solar	Please Solar is one of the effective green energy and helps to stop load scheduling.	Armin	business owner
2022-07-10 10:59:27	Mpumalanga		Yes I do	Solar	Anything that this government controls is a mess!	Emile	business owner
2022-07-10 10:58:55	Western Cape		Yes I do	Solar	A combination of renewable energy. Cut the red tape! Get government out of power production, they're just stealing and screwing it up for everyone, especially the vulnerable!	Luke	business owner
2022-07-10 10:47:21	Gauteng		Yes I do	Solar	Any of the green systems are good. Solar, hydroelectric, wind and wave tech all work without damaging our environment.	Ian	business owner
2022-07-10 10:45:42	Gauteng		Yes I do	Solar	initial cost is high, but with time technology gets better and cheaper. also costs are recoverable over time, where as electricity from coal is lost.	wakefield	business owner
2022-07-10 10:40:48	North West		Yes I do	Solar		Ruan	business owner
2022-07-10 10:39:00	Gauteng		Yes I do	Solar		Gabriel	business owner
2022-07-10 10:36:31	Gauteng		Yes I do	Solar	South Africa is a sunny country with vast open spaces where large solar fields could be erected	Ryan	business owner
2022-07-10 10:35:38	KwaZulu-Natal		Yes I do	Solar	All and every renewable power production must be allowed immediately, unconditionally and without restrictions: - biomass - solar (incl. pvt. rooftop) - wind - waves - hydro	Philipp	business owner
2022-07-10 10:30:15	KwaZulu-Natal		Yes I do	Solar	So many small independent power producers are getting blocked from Eskom ,to feed into the grid. We are currently in proses to register from land rate to ruraflex. Then need to register to supply to grid. It is a nightmare as no competent people are employed to do this. Remove the red tape!	Arnold	business owner
2022-07-10 10:26:47	Northern Cape		Yes I do	Solar	Cheaper	Philip	business owner
2022-07-10 10:25:24	Gauteng		Yes I do	Solar	we cannot rely on our government for anything, every thing needs to be privatised, from power to medical, to education to infrastructure, and the department of home affairs.	shaun	business owner
2022-07-10 10:25:17	Gauteng		Yes I do	Solar	I support whatever alternative form of electricity that is viable and practicable in the different regions of SA. Solar is suitable as we have a lot of sun but the batteries need replacing every few years, which is costly. Same thing with Wind, need to replace batteries regularly. Hydro power can work if there has been sufficient rainfall as SA is a dry country.	Megan	business owner

2022-07-10 10:23:04	Gauteng		Yes I do	Solar	Solar one of the cheaper options in 2022 and quick to install. Plenty sunshine and battery access.	Elizabeth	business owner
2022-07-10 10:22:07	Western Cape		Yes I do	Solar	Solar or wind to save our planet and get rid of Eskom unreliability.	Leon	business owner
2022-07-10 10:20:33	Western Cape		Yes I do	Solar		Natalie	business owner
2022-07-10 10:17:13	Western Cape		Yes I do	Solar		Hugh	business owner
2022-07-10 10:15:13	Gauteng		Yes I do	Solar		Caryn	business owner
2022-07-10 10:15:08	Gauteng		Yes I do	Solar	solar or wind to reduce earth warming and local pollution.	Johannes Lodewikus	business owner
2022-07-10 10:09:48	Gauteng		Yes I do	Solar	I am not an expert regarding energy but it is quite evident that we have an enormous crisis on our hands. I do not believe this to be a time for politics, arrogance, and the like but rather that we all as South African put our minds collectively together toward a solution. It's in all of our best interests. With regard to my selection of 'solar' I can only think it being a good solution as Africa - and SA - has plenty of sun and open space to accommodate the infrastructure. Secondly, it could also - hopefully - help to curb corruption by not having one party receiving and stealing. Not sure about the economics, but surely this could also promote competition and in turn have a market-related price and perhaps in the long run with the out roll of the technology perhaps even a reduction in pricing. It is clear government cannot do this on their own but this might be blessing for the country and a new era of growth. We are blessed with really good people and a beautiful country - a small group of people should not have the right to destroy if for everyone.	Leon	business owner
2022-07-10 10:03:16	Western Cape		Yes I do	Solar	Solar, Wind, Hydro, Hydrogen, Nuclear, Geothermal, Flow batteries (zinc bromine battery), Sodium Batteries, and Lithium Iron Phosphate etc. Invest in local companies that can R&D and implement the above. Start small and immediately remove red tape, expand and grow as companies prove themselves with their products. Diversify and see which works best and protect again issue like no wind, no sun, required maintenance by diversifying your power generators (IPPs).	Rory	business owner
2022-07-10 10:02:03	KwaZulu-Natal		Yes I do	Solar	Immediate help from Independent power supply companies is the only answer to our situation.	Michelle	business owner
2022-07-10 10:02:00	Western Cape		Yes I do	Solar			business owner
2022-07-10 10:00:44	Limpopo		Yes I do	Solar	Solar and wind (even hydro) combined. We are a country rich with natural resources and big rivers, seafront. More than enough natural resources to have a constant supply	Riaan	business owner
2022-07-10 09:59:52	Western Cape		Yes I do	Solar	I actually think think a combination of solar and wind would be the best immediate solution	Glyn	business owner
2022-07-10 09:59:49	Gauteng		Yes I do	Solar		Nick	business owner
2022-07-10 09:57:09	Western Cape		Yes I do	Solar	Tired of crap from Eskom This type of service should not be government controlled and owned	Warren	business owner
2022-07-10 09:53:36	Western Cape		Yes I do	Solar	It is free. Not harmful.	Thys	business owner
2022-07-10 09:53:22	Western Cape		Yes I do	Solar		Nadia	business owner
2022-07-10 09:52:14	Gauteng		Yes I do	Solar		Gordon	business owner
2022-07-10 09:49:00	Western Cape		Yes I do	Solar	It is a pity one can only select one type of power generation. Wind, hydro, etc. are all viable. The problem is that Government has lost the plot. We see massive wind and solar installations but they are not linked to the grid. Why not? Regulation seems to protect the corruption rather than assist the country's economy.	Jan	business owner
2022-07-10 09:45:32	Western Cape		Yes I do	Solar	Loadshedding is ruining the economy, the longer it goes on the worse it will get. Alternative solutions are urgently needed, no time to waste!	Tania	business owner
2022-07-10 09:43:04	Western Cape		Yes I do	Solar	We need competition in the supply of electricity in this country. It will be solar in some areas and wind in others and hydro in yet another's. As long as there is good competition and not just one supplier.	Michael	business owner
2022-07-10 09:42:21	Western Cape		Yes I do	Solar	We have enough sun to use as power. Its better for the environment.	Marlene	business owner
2022-07-10 09:40:49	Gauteng		Yes I do	Solar	Independent Power Producers should be allowed to immediately supply South Africa with electricity	Caryn	business owner
2022-07-10 09:36:41	Gauteng		Yes I do	Solar	There is plenty of sun power available in South Africa. Use it.	Philip	business owner
2022-07-10 09:36:38	Gauteng		Yes I do	Solar		Shelley	business owner
2022-07-10 09:36:04	Mpumalanga		Yes I do	Solar	Incentivise home- and business owners to add solar power to the grid and definitely do not penalise them for generating their own electricity.	Jan	business owner
2022-07-10 09:35:58	Western Cape		Yes I do	Solar	Anc are just clowns...past their sell by date...need to vote them out in 24...can't come quick enough if we are to save this beloved land I mean no disrespect to clowns	Anthony	business owner
2022-07-10 09:29:58	Gauteng		Yes I do	Solar	WE have ample sunshine summer and winter and plenty of space for photovoltaic cells. It's also quick and easy to build and offers additional power for industry during daylight hours	Michael	business owner

2022-07-10 09:29:55	Gauteng		Yes I do	Solar		Celia	business owner
2022-07-10 09:26:42	Gauteng		Yes I do	Solar	At this point we could do with wind, solar, coal etc. A combination of all of them. Anything to keep the lights on. This can't carry on. Life is becoming unbearable in South Africa.	Debbie	business owner
2022-07-10 09:23:24	Gauteng		Yes I do	Solar		Alexander	business owner
2022-07-10 09:22:45	North West		Yes I do	Solar		Luke	business owner
2022-07-10 09:18:41	Limpopo		Yes I do	Solar		Nicole	business owner
2022-07-10 09:16:57	Western Cape		Yes I do	Solar	If Solar is allowed the private sector can feed electricity into the grid to supply electricity to municipalities.	Denis	business owner
2022-07-10 09:10:36	Gauteng		Yes I do	Solar		Brenda	business owner
2022-07-10 09:10:36	Gauteng		Yes I do	Solar		Brenda	business owner
2022-07-10 09:10:33	Gauteng		Yes I do	Solar		Brenda	business owner
2022-07-10 09:08:58	Eastern Cape		Yes I do	Solar	We all know that the writing is on the wall for the economy to collapsing leaving people without jobs. The power shortage has become unbearable. We are living in a sunny country; let us use the power of the sun to create power for South Africa. (as in Australia and some other countries). In South Africa the level of understanding of how to safely maintain nuclear power could not be an option; our South African employees could barely manage the most mundane functions within a department. We find an attitude of not taking responsibility for anything and above all else the competency level is of the lowest of the low. Nuclear power will kill us all. Let us get independent suppliers with the necessary knowledge of how to run electricity competently. These suppliers must be up to standard with no links to the ANC at all !!!!!	Ansie	business owner
2022-07-10 09:08:54	Western Cape		Yes I do	Solar		Louise	business owner
2022-07-10 09:07:27	KwaZulu-Natal		Yes I do	Solar	We need independent power producers asap. cut the red tape!!! Solar installations for a quick fix with coal an nuclear installations for long term solutions.	Dwayne	business owner
2022-07-10 09:07:24	Gauteng		Yes I do	Solar	it is time to scrap the red tape. Its time to throw out the old. Employ newly qualified international professionals from a first world country- NOT CUBA- Get on with the job. STOP FLIP FLOPPING	Brenda	business owner
2022-07-10 09:06:50	Gauteng		Yes I do	Solar	Not just solar but a combination of wind hydro and solar we have to reduce dependency on dirty energy and allow the IPP to supply clean energy to our people. This has been said for years and now this crises is a perfect opportunity to make the necessary changes. Eskom is no longer functioning and coal is not the way forward.	Deborah	business owner
2022-07-10 09:06:29	Eastern Cape		Yes I do	Solar	We should privatize Eskom the way it's going now the day will be the day that it goes off and doesn't come on again	Shugg	business owner
2022-07-10 09:05:02	Western Cape		Yes I do	Solar		David	business owner
2022-07-10 09:01:00	Gauteng		Yes I do	Solar		Braam	business owner
2022-07-10 09:00:31	Western Cape		Yes I do	Solar	There are experts in this field who make compelling arguments for allowing other forms of generation to be fed into the national grid - I am not the expert but we need immediate action to provide alternatives to ESKOM, and no more red tape	Pippa	business owner
2022-07-10 09:00:20	Gauteng		Yes I do	Solar	I understand that it is not easy to store solar energy but at least factories and small businesses would all be able to operate for full office hours during the week.	Robert	business owner
2022-07-10 08:59:43	Eastern Cape		Yes I do	Solar		Sue	business owner
2022-07-10 08:59:16	Western Cape		Yes I do	Solar	This latest drastic bout of load shedding has been devastating for SA. We need swift and decisive action to improve matters, and this is one way to do that	Garth	business owner
2022-07-10 08:58:24	Gauteng		Yes I do	Solar		Thomas	business owner
2022-07-10 08:55:27	Western Cape		Yes I do	Solar	I think the exact means of production is slightly less important that taking the power monopoly away from a failed government. The fact that we have not privatized electricity production long ago is a sad reminder of the ANCs greed and total lack of genuine leadership.	Mark	business owner
2022-07-10 08:55:27	Gauteng		Yes I do	Solar		Cecil	business owner
2022-07-10 08:54:46	Limpopo		Yes I do	Solar		Barney	business owner
2022-07-10 08:54:21	Gauteng		Yes I do	Solar		Elize	business owner
2022-07-10 08:54:20	Gauteng		Yes I do	Solar	SA has ample sunshine most of the year. It is free and environmentally friendly!	Rachelle	business owner
2022-07-10 08:51:20	North West		Yes I do	Solar	Electricity must be available only for people who paid for it. Leave grants and give people a small solar system. Grants is a crime to multiply poor people. By multiply people you create a much bigger problem and electricity will fail. We are almost plunge into darkness.	Roelf	business owner
2022-07-10 08:51:12	Gauteng		Yes I do	Solar		Joanke	business owner

2022-07-10 08:48:46	Gauteng		Yes I do	Solar		Bernice	business owner
2022-07-10 08:45:35	Western Cape		Yes I do	Solar		Mark	business owner
2022-07-10 08:44:20	KwaZulu-Natal		Yes I do	Solar		Roy	business owner
2022-07-10 08:43:04	Western Cape		Yes I do	Solar	De politicize Eskom and do what is best for South Africans.	D	business owner
2022-07-10 08:42:23	North West		Yes I do	Solar	More sustainable with less carbon footprint	Cisca	business owner
2022-07-10 08:42:19	Northern Cape		Yes I do	Solar	We are in the dark for crying out loud! Everything the government touches turns to rubble!	Jaco	business owner
2022-07-10 08:40:59	KwaZulu-Natal		Yes I do	Solar	My response is aimed at the residential and SME and below the 1000V threshold already mandated by the NRS. Regulations though need to be enforced (CPT is a good example of having set the standard) and only approved and registered installers having been accredited by SAPVIA to be allowed to do so to avoid the inherent safety risks for a homeowner from those rouge installers and taking "electrical" and material shortcuts. We need to possibly have skills development program (watchdog) in this areas as i would suspect there are insufficient qualified and skilled operators to undertake this huge task across SA in this field of critical importance. No solar installation/ system should be switched on unless signed off by with a COC. Good luck.	Andrew	business owner
2022-07-10 08:40:25	Western Cape		Yes I do	Solar	On behalf of your country. Governments in Wester Cape most be generat the own electricity that we do not have to depend on the other country.	Izak	business owner
2022-07-10 08:37:34	Western Cape		Yes I do	Solar	Apart from our general economy suffering, we are also limiting the growth of youngsters entering the job market. Families are affected on the ground level which will have far greater social and economical effects. Solar has become more efficient as a technology and the costs have come down significantly	Jaco	business owner
2022-07-10 08:37:29	Western Cape		Yes I do	Solar			business owner
2022-07-10 08:35:45	North West		Yes I do	Solar	We have ample sun	Wiebke	business owner
2022-07-10 08:34:04	Western Cape		Yes I do	Solar	Renewable energy along with wind, of which we have sun and land in abundance	Jeanne	business owner
2022-07-10 08:33:40	Eastern Cape		Yes I do	Solar	A combination of Solar and Wind would be both environmentally friendly and provide a constant supply of electricity.	Markus	business owner
2022-07-10 08:29:39	Western Cape		Yes I do	Solar	Any natural alternative power like wind / hydro electric or solar power should be used	Deryn	business owner
2022-07-10 08:27:40	Limpopo		Yes I do	Solar		Arjan	business owner
2022-07-10 08:27:37	Western Cape		Yes I do	Solar	Allow private producers to supply into the grid with immediate effect. It does not matter by what means they produce electricity but INCENTIVISE the renewable energy producers.	Quinton	business owner
2022-07-10 08:26:49	Western Cape		Yes I do	Solar	The government van also remove import duties and implement a profit cap on solar systems, maybe also subsidised installations etc.	Morne	business owner
2022-07-10 08:24:44	Gauteng		Yes I do	Solar	Any new means of power generation that is not renewable is a short term solution that will land ZA in the same predicament again within a decade. ZA is a sunny country with enough open space for solar farms. Solar is a known and well established technology in ZA with a large skill set presence in ZA. Setting up a solar farm from 1MW feeding directly into the Eskom grid is easy. The gazetted Eskom wheely solution was proposed in 2011 already. It proposed that independent power producers be allowed in ZA to provide competition in the energy market and to augment the lacking Eskom power generation capability. Since 2011 only 2 independent power producers have been approved by NERSA. Why? The delay to date was government and legislation. Dropping the strict regulation policies and rather focussing on a commercial model that benefits independent power producers, consumers and power distributors should be the priority.	Dewald	business owner
2022-07-10 08:24:30	Northern Cape		Yes I do	Solar	Suid-Afrika het n oorvloed son!! Laat ons dit gebruik om elektrisiteit in die stelsel terug te sit. Sol Plaatje sal dit nie toelaat nie, want hulle maak meer as 100%wins op elektrisiteit (soos bevestig deur Eskom) en maak klein besighede as gevolg hiervan tot niet, wat meer werkloosheid veroorsaak.	Ronel	business owner
2022-07-10 08:24:26	Northern Cape		Yes I do	Solar	Suid-Afrika het n oorvloed son!! Laat ons dit gebruik om elektrisiteit in die stelsel terug te sit. Sol Plaatje sal dit nie toelaat nie, want hulle maak meer as 100%wins op elektrisiteit (soos bevestig deur Eskom) en maak klein besighede as gevolg hiervan tot niet, wat meer werkloosheid veroorsaak.	Ronel	business owner

2022-07-10 08:22:01	Gauteng	Yes I do	Solar	Solar and wind Protect our sacred planet. Let us feed energy back into the grid. What is the problem. Why are being held back like this. What is the agenda? It does not make sense.	Kim	business owner
2022-07-10 08:11:57	Gauteng	Yes I do	Solar	Solar with storage immediately and nuclear long-term.	Johannes	business owner
2022-07-10 08:10:53	KwaZulu-Natal	Yes I do	Solar	Change the form of electricity supply depending on the best solution in that area of the country. Hydro along some parts of the coast line, solar inland, gas in Others. Pathetic government owned Eskom only exists for government employment stats to look better and for further Plunder of our taxes. Useless	Bruce	business owner
2022-07-10 08:09:49	Western Cape	Yes I do	Solar	It's time to privatize SOE's. The government is incapable of governing and all responsibility should be removed from them to initiate the total removal of any sort of government in the future. It's time to get this ball rolling...	Ivan	business owner
2022-07-10 08:09:18	Free State	Yes I do	Solar		Hennie	business owner
2022-07-10 08:09:05	Gauteng	Yes I do	Solar		Chini	business owner
2022-07-10 08:08:51	Eastern Cape	Yes I do	Solar		Martin	business owner
2022-07-10 08:07:58	Gauteng	Yes I do	Solar	Please just allow industry to fix your incompetence. If you keep going down this road you will sit with a revolution.	Kobus	business owner
2022-07-10 08:05:35	Western Cape	Yes I do	Solar		Peter	business owner
2022-07-10 08:04:41	KwaZulu-Natal	Yes I do	Solar	Solar and wind energy have huge potential in our country. The private sector should be immediately given the opportunity to supply power to South Africa.	Robyn	business owner
2022-07-10 08:04:25	Limpopo	Yes I do	Solar		Ivan	business owner
2022-07-10 08:03:29	Gauteng	Yes I do	Solar	Sun power is available. We don't use it wisely	Mariaan	business owner
2022-07-10 08:00:28	Gauteng	Yes I do	Solar		Johan	business owner
2022-07-10 07:54:31	Gauteng	Yes I do	Solar	Because it's readily available	Sophie	business owner
2022-07-10 07:52:57	Gauteng	Yes I do	Solar		Kenny	business owner
2022-07-10 07:52:22	Gauteng	Yes I do	Solar		Chantell	business owner
2022-07-10 07:51:26	Western Cape	Yes I do	Solar	Harness solar in the vast areas of the Karoo where the sunshines almost every day of the year and there is initialised land	Justin	business owner
2022-07-10 07:50:15	Gauteng	Yes I do	Solar		Matthew	business owner
2022-07-10 07:47:53	Gauteng	Yes I do	Solar		Sonja	business owner
2022-07-10 07:46:06	Western Cape	Yes I do	Solar	Solar, Hydro and wind power would be ideal if done at scale due to sustainability	Peet	business owner
2022-07-10 07:45:38	Northern Cape	Yes I do	Solar		Paul	business owner
2022-07-10 07:44:13	Gauteng	Yes I do	Solar		Melissa	business owner
2022-07-10 07:43:59	Free State	Yes I do	Solar	Solar power can even be generated in small amounts by individuals from home and be contributed to the national grid. The United Kingdom subsidised the installation of solar systems for home owners to generate more electricity for their national grid. We have abundant sunshine in South Africa.	Jan	business owner
2022-07-10 07:41:46	Gauteng	Yes I do	Solar	South Africa is blessed with lots of sunshine suited to solar power generation. We need to move towards renewable energy asap. Eskom is a failure. Monopolies only work as long as they don't fail as there is no Plan B. We need to make this happen as our country is currently on its knees.	Richard	business owner
2022-07-10 07:38:24	Western Cape	Yes I do	Solar	Solar and whatever else is available that does not damage the earth	Lana	business owner
2022-07-10 07:38:01	Gauteng	Yes I do	Solar		Janine	business owner
2022-07-10 07:36:54	Free State	Yes I do	Solar		Sarel	business owner
2022-07-10 07:35:57	Western Cape	Yes I do	Solar	The energy crises is a political mismanagement problem. We have numerous solutions and resources to be self sufficient. A dedicated team focused on energy solutions and service not personal or political gain is the first step.	Paul	business owner
2022-07-10 07:32:08	Gauteng	Yes I do	Solar	We have sufficient sun and plenty space in almost desert like areas!	Ralph	business owner
2022-07-10 07:31:17	Mpumalanga	Yes I do	Solar	Government must allow all forms of electricity generation to go ahead asap as we are in a crisis in this country. Every feasible form of electricity generation must be allowed but most important is that the accounts for energy producers who generate this electricity must be paid on time all the time. This due to history of the South African Government who do not pay their accounts for long periods of time causing hardships for vendors!	Athol	business owner
2022-07-10 07:31:12	Gauteng	Yes I do	Solar	Solar and wind, we need to think of the planet and future.	Desiree	business owner

2022-07-10 07:29:26	Gauteng	Yes I do	Solar	Allow residential market to buy solar for home BUT, to push/sell their spare electricity into grid for a discount on montly bill(allow "reverse prepaid meters"). This will make their investment cheaper and affordable and take the pressure off commercial power requirements in the shortest possible time. Holland went off coal like this sucessfully in 10 years.	Charl	business owner
2022-07-10 07:26:27	KwaZulu-Natal	Yes I do	Solar	Renewable energy all the way	Kim	business owner
2022-07-10 07:25:42	Eastern Cape	Yes I do	Solar	It is readily available, clean and no pollution	Rob	business owner
2022-07-10 07:25:38	Gauteng	Yes I do	Solar		Elias	business owner
2022-07-10 07:24:57	Free State	Yes I do	Solar	Many private producers can supply excess solar power during the day to the grit which will allow Eskom to do much needed maintenance on the coal fired power station during the day. Over time the large Eskom coal fired power stations can run during the night while small private solar producers inject power to the grit in the day.	Dries	business owner
2022-07-10 07:24:55	KwaZulu-Natal	Yes I do	Solar		Heidi	business owner
2022-07-10 07:23:04	Gauteng	Yes I do	Solar	Solar, wind, nuclear and waste to energy are all viable options. businesses in our country have developed technology to produce power and fuel like diesel from waste plastic, used three and coal waste fines. We have a close minded government who want to control these SOE's but end up ruining our economy with bad business practice.	Joel	business owner
2022-07-10 07:21:55	KwaZulu-Natal	Yes I do	Solar	In the short term coal. Long term plans should be made for using the solar energy as South Africa has sunshine abundance.	Aliceon	business owner
2022-07-10 07:21:54	Gauteng	Yes I do	Solar		Andries	business owner
2022-07-10 07:21:46	Gauteng	Yes I do	Solar		Louise	business owner
2022-07-10 07:20:47	Gauteng	Yes I do	Solar	Many households in South Africa are already using solar or a hybrid solar solution successfully. This indicates that the solution can work. South Africa is blessed with sunlight and large empty expanses of land. Combine these and you have the two main ingredients for solar plants. Please consider this before our economic sector folds entirely.	Yolande	business owner
2022-07-10 07:18:11	KwaZulu-Natal	Yes I do	Solar		Shamla	business owner
2022-07-10 07:17:13	Gauteng	Yes I do	Solar		Ansuyah	business owner
2022-07-10 07:17:10	Eastern Cape	Yes I do	Solar		Ralph	business owner
2022-07-10 07:14:56	Gauteng	Yes I do	Solar		Denzyl	business owner
2022-07-10 07:14:30	Western Cape	Yes I do	Solar	Residential Rooftop Solar. Commercial Rooftop Solar. Combine this with wind Turbines. Africa provide these sources of energy for free and in abundance. Lets use this!	Nicolaas	business owner
2022-07-10 07:13:52	Western Cape	Yes I do	Solar		Elle	business owner
2022-07-10 07:10:48	Eastern Cape	Yes I do	Solar	We have so much sunshine in this country. Surely we should be utilizing it better.	Caren	business owner
2022-07-10 07:10:24	KwaZulu-Natal	Yes I do	Solar		Glen	business owner
2022-07-10 07:10:09	Eastern Cape	Yes I do	Solar	We have so much sunshine in this country. Surely we should be utilizing it better.	Caren	business owner
2022-07-10 07:10:01	Gauteng	Yes I do	Solar	We need to stop this crisis ASAP. Solar and wind can provide enough energy to solve immediate needs as well as long-term demands. They take much less time to bring online than coal-powered plants.	Chris	business owner
2022-07-10 07:09:49	Gauteng	Yes I do	Solar	We have an abundance of sun all year round! It's time that we make use of this natural resource.	Michelle	business owner
2022-07-10 07:08:14	Western Cape	Yes I do	Solar		Elzanne	business owner
2022-07-10 07:07:14	Gauteng	Yes I do	Solar	As a country we have space and sun. Let's use it. Also to allow residential to sell back generated power from solar to the grid.	Georgina	business owner
2022-07-10 07:06:59	Western Cape	Yes I do	Solar	Mix of residential and commercial building roof top Solar + Wind turbine combinations. Proper, standardised and mutually benficial incentive programs to promote residents and business to invest in these renewables and goverment to invest in large electricity storage facsilities to store generated electricity for periods of low demand. Assist and subsidise the people to go Solar and lets eridacte this problem quickly! Employ the right people in the right positions and cut the red tape! Stop the political agenda with everything and employ people based on skill, qualification and work ethic. We can overcome this! Lets go.	Johann	business owner

2022-07-10 07:04:11	Western Cape		Yes I do	Solar	It is time to reduce the bottle-necks on the Renewable Energy programme. Allow the many well-managed renewable energy companies (those who already have an excellent track records) to, provide us with the missing capacity.	Candice	business owner
2022-07-10 07:03:49	North West		Yes I do	Solar	The material and installation is totally at the user's expense and the generation is free for all. Power energy can be pushed back into the grid using the right equipment and when needed, use your own stored energy from the grid.	Dirk	business owner
2022-07-10 07:02:01	Mpumal anga		Yes I do	Solar	Eskom is corrupt and will never change as long as the ANC is in power! Solar is environmentally friendly!	Tanya	business owner
2022-07-10 07:01:54	Gauteng		Yes I do	Solar	A combination of renewables plus gas	Samantha	business owner
2022-07-10 07:01:16	North West		Yes I do	Solar		Norman	business owner
2022-07-10 06:59:56	Western Cape		Yes I do	Solar	All natural power solutions should be used ASAP. All homeowners should be given rebates on solar energy for their homes. All municipalities should be allowed to source and provide their own energy if required. We live in a country that has sun almost every day - we should be tapping in to that. Scrap all the restrictions immediately. No sourcing power from foreign countries such as Russia or China. Those stupid "Karsships" must not be used.	Debby	business owner
2022-07-10 06:59:54	Western Cape		Yes I do	Solar	Solar and wind ,would be useful	Justin	business owner
2022-07-10 06:57:34	Outside SA	Netherla nds	Yes I do	Solar		Gary	business owner
2022-07-10 06:55:40	Western Cape		Yes I do	Solar		Kalvin	business owner
2022-07-10 06:55:18	Gauteng		Yes I do	Solar	Renewable energy solar,wind,hydro	Seamus	business owner
2022-07-10 06:55:18	Limpopo		Yes I do	Solar		Andre	business owner
2022-07-10 06:54:32	Gauteng		Yes I do	Solar	We need more electricity urgently	Bernard	business owner
2022-07-10 06:53:35	KwaZulu- Natal		Yes I do	Solar	The country and the economy cannot take any more load shedding	Neill	business owner
2022-07-10 06:53:24	Western Cape		Yes I do	Solar		Fergus	business owner
2022-07-10 06:48:17	Western Cape		Yes I do	Solar		Yola	business owner
2022-07-10 06:44:20	Gauteng		Yes I do	Solar	Quick way to get forward	Tomes	business owner
2022-07-10 06:43:54	Western Cape		Yes I do	Solar	I've selected solar because we're such a sunny country & we only have the option to select one here. What I believe is that the energy production sector should be open to the free market & free from any red tape. Let entrepreneurs & the free market decide what source of power production we use. Allowing the free market to operate without bureaucracy is the most efficient method i.e let the people decide through our free markets.	Dale	business owner
2022-07-10 06:43:51	Western Cape		Yes I do	Solar		Cliff	business owner
2022-07-10 06:40:26	Eastern Cape		Yes I do	Solar	There are vast areas of arid land in the Northern Cape with plenty of sunshine to develop Solar farms.	Anthony	business owner
2022-07-10 06:39:50	KwaZulu- Natal		Yes I do	Solar		Bryant	business owner
2022-07-10 06:36:50	Gauteng		Yes I do	Solar	It's clean and free (after installation)	Beverley	business owner
2022-07-10 06:35:33	Western Cape		Yes I do	Solar		Natalie	business owner
2022-07-10 06:35:20	Gauteng		Yes I do	Solar		Imtiaz	business owner

2022-07-10 06:05:57	KwaZulu- Natal		Yes I do	Solar		N	business owner

2022-07-10 06:00:59	Eastern Cape		Yes I do	Solar	Solar and wind are the most efficient ways to produce energy electricity.	ARNOLD	business owner
2022-07-10 06:00:59	Eastern Cape		Yes I do	Solar	Solar and wind are the most efficient ways to produce energy electricity.	ARNOLD	business owner
2022-07-10 06:00:59	Eastern Cape		Yes I do	Solar	Solar and wind are the most efficient ways to produce energy electricity.	ARNOLD	business owner
2022-07-10 05:52:05	Eastern Cape		Yes I do	Solar	Increase the allowable units from 100 to 1000 or morre. It is the private sector that will be paying for this increased capacity . No red tape delay. Give "power to the people"	Peter	business owner
2022-07-10 05:50:15	Gauteng		Yes I do	Solar	We need the base-load type of generation from Eskom to be restored and upgraded. This will take time. To alleviate immediate need , a solution aligned with daylight productive period , rapid roll out, ability to store the energy and insulated from world energy pricing (fossil fuels) should be considered. To this effect open the market for immediate mega scale renewable projects combined with "viral energy" by subsidizing residential and industrial renewable wheeling and storage ie rooftop solar and storage on mega scale.	Jaap	business owner
2022-07-10 05:39:36	North West		Yes I do	Solar		Nicholas	business owner
2022-07-10 05:38:56	KwaZulu- Natal		Yes I do	Solar	Solar and wind would be the quickest way to provide electricity. Coal power stations would take to long to build	Murray	business owner
2022-07-10 05:35:42	Western Cape		Yes I do	Solar		Beverley	business owner
2022-07-10 05:33:56	Eastern Cape		Yes I do	Solar			business owner
2022-07-10 05:28:30	Outside SA	United Kingdom	Yes I do	Solar	There are producers of solar panels who have successfully introduced solutions into other countries with short installation times.	Svend	business owner
2022-07-10 05:27:21	Gauteng		Yes I do	Solar	Please look at Germany and other European countries who have actually reduced dependency on coal and have shut down all nuclear power stations, but who have substantially less sunshine and wind than South Africa has. A very high percentage of the population installed solar panels on their rooves or they installed solar panel farms for sharing power generation during the daytime. This is backed up by large wind generators that supply power during the day and at night, especially during overcast and windy conditions when solar generation is minimal. South Africa's long coastline offers excellent wind generation possibilities, which should be complemented by solar farms or steam generation units in sunshine-rich territories.	Gunther	business owner
2022-07-10 05:13:32	KwaZulu- Natal		Yes I do	Solar		Janet	business owner
2022-07-10 05:06:17	Gauteng		Yes I do	Solar	Allow citizens to put surplus solar energy into the grid. Further IPP, plants need to be monitored by independent oversight committee; to avoid the kind of theft we saw with covid, emergency procurement.	Freddie	business owner
2022-07-10 04:12:26	Free State		Yes I do	Solar	We can't carry on like this our power is off more than on	Rista	business owner
2022-07-10 04:09:58	Free State		Yes I do	Solar	Parys hardly ever has electricity. Time fir change	Steven	business owner
2022-07-10 04:09:04	Gauteng		Yes I do	Solar		John	business owner
2022-07-10 04:08:30	Western Cape		Yes I do	Solar		Willem	business owner
2022-07-10 04:02:20	Northern Cape		Yes I do	Solar		Thomas	business owner

2022-07-09 23:09:07	Gauteng		Yes I do	Solar	Eskom has failed and it's time for alternatives.	J	business owner

2022-07-09 23:05:48	Gauteng	Yes I do	Solar	<p>We need more than just one solution but there is no option to choose more than one. We need solar, nuclear, wind. But solar first as it would be the cheapest with the fastest return. South Africa has an abundance of sunshine and space for these power plants. Homeowners could also sell back solar power to the grid.</p> <p>But the solution needs to be a combination of methods.</p> <p>Corruption, ineptitude, greed and just plain stupidity are preventing things from moving forward.</p> <p>Gas would be an excellent way to earn revenue by selling it to the European market. But not at the cost of damaging the environment.</p>	Erica	business owner
2022-07-09 22:50:46	Gauteng	Yes I do	Solar	<p>although we can't afford to move away from coal for now, and SA is a large coal producer, solar is the next best option, as we have a lot of sun in SA. However households and businesses using solar must be able to feed excess energy produced back into the grid to ease the load on the grid.</p>	Sylvia	business owner
2022-07-09 22:42:21	Gauteng	Yes I do	Solar	<p>Six years ago, I installed a Solar Energy System in my home. At that time, I, like thousands of others, had an analogue electricity meter; and, when my system had excess power - which happened most of the day - it put energy back into the grid. Two years ago, we were forced to install digital meters, and so excess energy from thousands of solar systems could no longer go back into the grid. That's when ESKOM felt the loss, and so heavy load-shedding started. If thousands of people with solar systems can once again put their excess energy back into the grid, this would reduce the load on ESKOM.</p>	Mike	business owner
2022-07-09 22:40:44	Eastern Cape	Yes I do	Solar		Mandisa	business owner
2022-07-09 22:36:17	Gauteng	Yes I do	Solar		Santa	business owner
2022-07-09 22:23:32	Mpumalanga	Yes I do	Solar		Louise	business owner
2022-07-09 22:22:00	Northern Cape	Yes I do	Solar	<p>Solar and wind energy can be utilized - there is lots of sun and wind in the Northern Cape with vast areas to put solar panels and / or wind turbines. Use the newest technology to utilize the wind. It is clean and don't harm anyone or anything.</p>	Heinrich	business owner
2022-07-09 22:15:58	Western Cape	Yes I do	Solar		Cherene	business owner
2022-07-09 22:03:58	Gauteng	Yes I do	Solar		Graham	business owner

2022-07-09 21:39:45	Western Cape	Yes I do	Solar		SP	business owner
2022-07-09 21:13:28	Western Cape	Yes I do	Solar	<p>Besides scrapping the policy red tape I think we need a smart grid in the cities of South Africa, so that people with extra energy can put it back into the grid and receive compensation for it. Solar is easy to install on small scale and the government should give a rebate for installing solar.</p>	Daniel	business owner
2022-07-09 21:12:00	Western Cape	Yes I do	Solar	<p>We should use both wind and solar energy, both of which we have in abundance.</p>	Claudia	business owner
2022-07-09 20:58:25	Free State	Yes I do	Solar		Suleiman	business owner
2022-07-09 20:26:46	Gauteng	Yes I do	Solar		Joaquin	business owner
2022-07-09 20:25:17	Gauteng	Yes I do	Solar	<p>At the moment government can't control anything related to electricity. Give it to private they will get it done. Gov must have NO say in it.</p>	Bonita	business owner
2022-07-09 20:23:52	Western Cape	Yes I do	Solar	<p>Its a long term solution.</p>	Daniel	business owner
2022-07-09 20:15:16	KwaZulu-Natal	Yes I do	Solar		Rajen	business owner
2022-07-09 20:14:24	Gauteng	Yes I do	Solar		Andre	business owner
2022-07-09 20:10:03	Gauteng	Yes I do	Solar	<p>The impact of load shedding can no longer be sustained by business and industry sectors. It is crippling our economy and we have the right to demand other resources of power. The policy red tape for independent Power Producers should be scrapped with immediate effect.</p> <p>South Africans are tired of the criminal and incapable actions of our leaders in supplying the resources which are vital to sustain companies and businesses.</p>	Alta	business owner
2022-07-09 20:02:56	Western Cape	Yes I do	Solar		Graham	business owner
2022-07-09 20:01:50	KwaZulu-Natal	Yes I do	Solar	<p>Solar particularly and secondly wind are within reach of the majority of median to large power users.</p> <p>Because they are all business enterprises they have immediate avenues to Capital, they also are highly motivated due to the fact that load shedding is destroying their businesses.</p> <p>As a country with the current unemployment challenges we need to act IMMEDIATELY to save this country's future, we can no longer waste any time .</p> <p>Businesses are currently under enormous financial risk, we need to act NOW !!</p>	Nigel	business owner
2022-07-09 19:56:07	Eastern Cape	Yes I do	Solar	<p>Time for ANC to stop destroying this country and let those who have the ability - to take over and fix this country before there is nothing left for anyone. Lets start with power , water all (services) and flights from private suppliers</p>	Cindy	business owner

2022-07-09 19:41:33	Gauteng		Yes I do	Solar	Solar would be the quicker solution with current urgency	Johan	business owner
2022-07-09 19:27:29	Western Cape		Yes I do	Solar		Chris	business owner
2022-07-09 19:18:28	Gauteng		Yes I do	Solar	A no brainer!! Load shedding costs this economy billions of rands of losses....	Petrus	business owner
2022-07-09 19:15:42	Western Cape		Yes I do	Solar	The monopoly held by Eskom is the main problem. IPP's should be able to contribute without red tape as a matter of urgency.	Div	business owner
2022-07-09 19:11:27	KwaZulu-Natal		Yes I do	Solar	If individuals are encouraged to install solar and be credited reasonably for energy fed into grid, this would offer every South African an opportunity to contribute to the solution quickly. This would allow Eskom to reduce its bloated, useless, criminal workforce to the benefit of all!!	Anthony	business owner
2022-07-09 19:08:18	Western Cape		Yes I do	Solar	I advocate for a mix of nature resources (NOT coal) to include subs and solar and definitely include competitive business solutions. The government only spends tax money to hire 'business' solutions and doubles the costs. We need fast solutions before anarchy is the result!!! Otherwise it is possible that the people will come after the government for revenge ..	Laurel	business owner
2022-07-09 19:04:15	KwaZulu-Natal		Yes I do	Solar	Solar, hydro & wind are all good, clean & sustainable sources of power that we can access relatively easily across SA. Free up private resources & embrace competition so that we are no longer held to ransom by a corrupt & inefficient bunch of controlling, selfish fat cats who don't give a damn about our country's future or it's people!!! Wake up ANC!!!	Merewyn	business owner
2022-07-09 19:00:53	Eastern Cape		Yes I do	Solar		Corinne	business owner
2022-07-09 19:00:11	Gauteng		Yes I do	Solar		Mnagale	business owner
2022-07-09 18:35:43	Western Cape		Yes I do	Solar		Rucita	business owner
2022-07-09 18:30:54	Gauteng		Yes I do	Solar		Carla	business owner
2022-07-09 18:28:23	Gauteng		Yes I do	Solar	Power supply is the backbone of any country to create employment, wealth, sustainable growth and investment. Renewable power due to the unlimited solar supply in Gauteng and KZN and excellent wind conditions in the Cape is ultimately the most sustainable and cost effective in the long term. It is time to open the market to independent suppliers and create competition to enhance effective delivery and best pricing for the consumer.	Tessa	business owner
2022-07-09 18:28:21	KwaZulu-Natal		Yes I do	Solar	We are the land of sun, and wind. We should use solar energy and wind turbines. They work and are being promoted all over Europe and Asia, why not here?	Judy	business owner
2022-07-09 18:20:54	Gauteng		Yes I do	Solar	A combination of solar, hydro, wind and hydrogen and gas	Natascha	business owner
2022-07-09 18:10:08	Gauteng		Yes I do	Solar	With the excellent clear skies South Africa has in an abundance of areas throughout the country, we are in such an ideal position to produce electricity from solar. The continued reluctance and ridiculous delays to prioritise this source, can only be the result of individuals who can make it happen, benefitting from the delay.	Joe	business owner
2022-07-09 18:09:18	Gauteng		Yes I do	Solar	We have unlimited sunshine. Seems like an easy fix.	Sonice	business owner
2022-07-09 17:52:51	Gauteng		Yes I do	Solar		Pieter	business owner
2022-07-09 17:42:38	Gauteng		Yes I do	Solar	We have an entire desert called the Kalahari desert. We have a whole lot of coastal area (many nations do not have. We can produce electricity with wind, waves, solar power on floating, etc... We have almost NO interest in adding such technology. Is it because we are lazy, uninterested, corrupt too much to push wrong tech???? Why can we not take PRIDE and have an outlook for the future that will define Africa by our OWN standards???	Mihai	business owner
2022-07-09 17:38:20	Gauteng		Yes I do	Solar	When will we finally cast a NEW future for our children and this awesome continent???	Alan	business owner
2022-07-09 17:24:41	Western Cape		Yes I do	Solar	I believe solar, wind, water and nuclear should all be used.	Barry	business owner
2022-07-09 17:17:27	KwaZulu-Natal		Yes I do	Solar	Would have liked to say solar and wind and hydro. We have Sun during the day. Businesses need to operate during the day. It is a no brainer Solar panels are quick and easy to install compared to building power stations. Wind blows at night too ... use pumped storage as Cape Town does, but pumped with eco friendly sourced like solar or wind	Gus	business owner
2022-07-09 17:16:57	KwaZulu-Natal		Yes I do	Solar	We all have so much Solar installed at our houses and we cannot feed back into the grid. This will resolve loadshedding admiring the day by allowing us all to supply our excess solar for free to the grid. No money needed for our free power to save the country.	Bradley	business owner
2022-07-09 17:03:16	KwaZulu-Natal		Yes I do	Solar	Every house can be a provider of electricity, Every house with a bank of panels feeding extra into the grid	Neil	business owner
2022-07-09 17:01:41	Gauteng		Yes I do	Solar	Eskom is not capable of producing enough product to supply the people of SA. It seems the answer will once again lie in the private sector, to either supply Eskom or people privately	Alex	business owner

2022-07-09 16:59:46	Western Cape		Yes I do	Solar	The red tape must be removed completely , bring in wind power , solar power and wave power and allow wind generation on all building over a certain height and subsidies lithium iron batteries to store power. The ANC must not be allowed to be involved and no bee companies.	Paul	business owner
2022-07-09 16:50:33	Gauteng		Yes I do	Solar	Solar, wind and hydro are all clean energy sources. The proposed 500 days is far too long - nearly an additional 2 years of load shedding? Not acceptable.	Trina	business owner
2022-07-09 16:46:18	Gauteng		Yes I do	Solar		Ben	business owner
2022-07-09 16:42:03	KwaZulu- Natal		Yes I do	Solar	It is difficult enough running a business and paying staff and on top of it to wipe this so called "governments" arse by running a generator as they are incapable of even keeping the lights on... just get out the way you useless parasitic excuses for a "government" just pathetic you are	Nigel	business owner
2022-07-09 16:26:26	Gauteng		Yes I do	Solar		Sheldon	business owner
2022-07-09 16:13:48	Gauteng		Yes I do	Solar	Solar and Wind Every household can contribute to the grid	Daniel	business owner
2022-07-09 16:13:39	Mpumal anga		Yes I do	Solar	It is time to tap into private household's solar systems and credit them for power put back into the grid. Other countries are doing it so why can we not do it? It will be a win-win situation for both private households and eskom.	Don	business owner
2022-07-09 16:12:19	Mpumal anga		Yes I do	Solar	It is time to tap into private household's solar systems and credit them for power put back into the grid. Other countries are doing it so why can we not do it? It will be a win-win situation for both private households and eskom.	Andre	business owner
2022-07-09 15:51:30	KwaZulu- Natal		Yes I do	Solar	Yes, please let the corrupt government who wants to "govern" everything into the ground step aside and let people who actually know what they're doing (not just cadres being recycled from one department to the other - of which none have even the basic knowledge of how to run a bath, much less a country) step in and save our failing country.	Chantelle	business owner
2022-07-09 15:42:31	Western Cape		Yes I do	Solar	I believe there should be a mix of technologies for long term power production, but possibly the quickest and easiest would be solar. The government should allow independent power producers to supply Eskom.	Ziegfriedt	business owner
2022-07-09 15:36:59	Western Cape		Yes I do	Solar	In fact, nuclear, coal or solar power would do. South Africa has plenty of sunshine - solar is a no-brainer. However, people investing in alternative sources of power should not be fiscally 'punished' or heavily regulated. South Africa has gone from being an energy super-power on the African continent, to destroying its ability to provide enough power for its most basic needs. Now the government that allowed that to happen must get out of the way of those who have solutions and the will to fix this.	Heike	business owner
2022-07-09 15:33:58	Western Cape		Yes I do	Solar		Dr Kadambar i	business owner
2022-07-09 15:23:25	Western Cape		Yes I do	Solar	I believe that no matter the method, the supply of electrical power in SA should be privatised as this will take the pressure off of the government, it would empower the South African economy and would create jobs. It would also do well in levelling SA up from 3rd world status. I also believe it would increase international investment in our country.	John	business owner
2022-07-09 14:47:31	Gauteng		Yes I do	Solar	The government should only have a say over the power that it producers. Anyone should be allowed to produce any in any quantities A government that has failed in its task to supply the public with its needs, cannot then be allowed to be the referee when other entities step up to fill the gap where government has failed.	Lawrence	business owner
2022-07-09 14:33:27	Mpumal anga		Yes I do	Solar	We have to privatize all government functions, that is the only way SA can go forward. Running generators is killing small and medium businesses that are the only ones that can currently create jobs.	Ancois	business owner
2022-07-09 14:21:02	Western Cape		Yes I do	Solar	All red tape must be scrapped immediately and independent suppliers subsidised to encourage the generation of clean energy supply. Not only solar. Wind and Hydro as well. With enough private participation, load shedding can quickly be eliminated.	Tom	business owner
2022-07-09 14:15:03	Western Cape		Yes I do	Solar		Maritza	business owner
2022-07-09 14:09:57	Gauteng		Yes I do	Solar	I think any service provider who can give clean, constant, affordable power supply should be able to assist the suffering citizens of this country. It has been obvious that draconian practices like BEE have contributed to the destruction of this parastatal , along with the blatant looting and mismanagement for decades. its a no wonder that they are hanging on to their pot of gold , while not achieving much	Michelle	business owner
2022-07-09 14:00:17	Western Cape		Yes I do	Solar	South Africa is rich in natural resources two of which are relatively cheap. We have lots of wind around our coastal areas and lots of sun throughout South Africa, particularly the Karoo. Wind and solar electricity could provide effortless electricity at a fraction of the cost.	Lyll	business owner
2022-07-09 13:49:01	Gauteng		Yes I do	Solar	Escom is killing the economy allow private sector to produce any type of electricity	Mario	business owner
2022-07-09 13:41:04	Gauteng		Yes I do	Solar	Solar is quick to install and SA has vast areas that has high percentage of clear days. There are solar solutions available that can produce power at night. We can easily end the crisis if more suppliers are allowed to produce electricity. It is the dragging of regulatory feet that caused the problem in the first place.	Johan	business owner
2022-07-09 13:38:56	Gauteng		Yes I do	Solar	We have an abundance of sunlight, much more than Germany and they have been able to utilize solar power so effectively, surely we can do even better	Laura	business owner

2022-07-09 13:35:04	Gauteng	Yes I do	Solar	IPP can produce a good quantity of power on short-term using solar energy and with storage getting better it can be used to assist over peak periods. Moreover, the cost will be borne by the IPP, not putting a liability on government.	Hendrik	business owner
2022-07-09 13:34:35	Western Cape	Yes I do	Solar	SCRAP THE RED TAPE! Allow Independent Power Producers to immediately supply South Africa with electricity.	Justus	business owner
2022-07-09 13:30:15	Gauteng	Yes I do	Solar		Motsamai	business owner
2022-07-09 13:29:21	Western Cape	Yes I do	Solar		Johan	business owner
2022-07-09 13:29:19	Western Cape	Yes I do	Solar	I mark solar, because I can only choose one, but don't agree with one solution only. Life doesn't work that way. We should look into ALL options as a bridge, and work our way towards renewable, and even free energy. The fact that Eskom has such a monopoly, is not to the advantage of the people/humanity.	Mari-Luisa	business owner
2022-07-09 13:28:40	Western Cape	Yes I do	Solar	Solar and wind, which are the cheapest form of energy and are the quickest solution	Ben	business owner
2022-07-09 13:15:41	Western Cape	Yes I do	Solar		Morné	business owner
2022-07-09 13:13:04	Gauteng	Yes I do	Solar	Solar, wind and gas are good options. Do not choose a power supply method under governance of our government - cut out corruption.	Andriette	business owner
2022-07-09 12:55:18	Gauteng	Yes I do	Solar	Solar as well as wind must be used to be in line with world green technology. Coal is the last option since it is proven, open avenue for the ANC comrades and their cronies to steal even more money in the form of bribery and corruption	Johan	business owner
2022-07-09 12:47:09	Gauteng	Yes I do	Solar		Denise	business owner
2022-07-09 12:42:27	Gauteng	Yes I do	Solar	Solar, wind, gas are suitable supplements to coal and nuclear, and quick to deploy.	BD	business owner
2022-07-09 12:39:00	Limpopo	Yes I do	Solar		Anje	business owner
2022-07-09 12:36:55	Mpumalanga	Yes I do	Solar	Open the playing field for independent power suppliers, but open it up to all nationalities without discrimination	Quintin	business owner
2022-07-09 12:29:14	Western Cape	Yes I do	Solar		stuart	business owner
2022-07-09 12:04:25	KwaZulu-Natal	Yes I do	Solar	Solar is the quickest way to add electricity to the grid. The second option is wind but with a longer lead time and significantly higher investment cost. Government has again been asleep on the watch. Renewable energy should have been liberalized long ago. What is Mantasha's agenda to continue supporting coal fired generation? Is it to protect the unions? The current strike clearly indicate that they do not have the welfare of the country as a priority. But neither has Mantasha and the ANC. Time to move on.	Hennie	business owner
2022-07-09 11:57:42	Gauteng	Yes I do	Solar	In a country with 360 days of sunshine the establishing of solar power stations is just state of the art. And giving private sector enterprises to build and implementing then is a very smart antidote of the governmental corrupted ESKOM. Photo voltaic generated energy etc is also economical and sustainable source. And also easy to be implementing on small houses, complexes etc even neighborhood could share. And the sun ? is for free and shines generously for all ZA citizens !	Jutta	business owner
2022-07-09 11:49:13	Gauteng	Yes I do	Solar		Anri	business owner
2022-07-09 11:47:22	Limpopo	Yes I do	Solar	Dis vanselfsprekend! Maar Wind ook belangrik. & dit moet aantreklik wees vir verskaffers - geen kwotas/ bbbee	Koos	business owner
2022-07-09 11:45:55	Western Cape	Yes I do	Solar		Per	business owner
2022-07-09 11:34:32	KwaZulu-Natal	Yes I do	Solar	We need additional power urgently. New producers must not be governed by BEE regulations, this just puts projects back to government control. A balance of core power is required, coal, nuclear as well as solar and wind. NO power ships.	Stanley	business owner
2022-07-09 11:31:01	Western Cape	Yes I do	Solar	I would prefer Solar and wind as renewable energy options. Business and residential could also be fed into grid. An integrated solution is needed.	Paul	business owner
2022-07-09 11:04:50	KwaZulu-Natal	Yes I do	Solar	In my opinion, solar makes sense in a country with this much sunshine. However, there seems little incentive from government to assist or motivate society in moving in that direction. In some instances, they are actually making it more difficult. For example, in my countries with solar, residence can sell their excess back to the grid. I am told by reliable sources, that in most areas, we don't offer that, and in some areas government is putting measures in place to make residence with solar pay more. I am no expert in this field, but I believe that it makes sense to at least investigate this field.	Daniel	business owner

2022-07-09 11:04:04	Gauteng	Yes I do	Solar	<p>Solar and wind energy are sustainable sources of energy. We need to allow other parties to supply power, as we can't rely on Eskom only. It needs to be implemented asap, as we are in a desperate need for extra electricity. Eskom is killing the businesses and thus prevents job creation.</p> <p>We should learn from other countries and the way they implement buying electricity directly from IPP's and individuals.</p> <p>Eg: in the Netherlands consumers (private homes or businesses) often have solar panels on their roof. When they produce a surplus, they are allowed to deliver this back to the grid. This will get deducted from their electricity bill, so it helps both parties.</p>	Marian	business owner
2022-07-09 11:02:39	Gauteng	Yes I do	Solar		Roger	business owner
2022-07-09 11:01:06	Gauteng	Yes I do	Solar	We have so much sun in RSA - use it. ALSO stop the State Restrictions on Generating private Power. Release all restrictions, and Regulations so the Country can get back on its feet.	Bryan	business owner
2022-07-09 10:59:08	Free State	Yes I do	Solar	We should look at solar, wind, water and Eskom power.	Jayson	business owner
2022-07-09 10:48:24	Western Cape	Yes I do	Solar	<p>As a solar supplier I am 100% behind getting the red tape removed. At present I am able to feed back into the grid around 4 kws. Might not be much, but that will power 2 other houses. Now if ever Third house had the same as I have. Residential problem solved.</p> <p>The government only does things if it will mean that get rewarded. a perfect example was the power ships. 20 year contract ?????</p>	rob	business owner
2022-07-09 10:47:47	Western Cape	Yes I do	Solar	<p>Put together schemes for South Africans to install solar in their homes, which means they rely on the grid less. This will free up the grid for industrial use and only trickle feed to homes in times of need (weather related).</p> <p>These schemes can be highly subsidised by Government instead of putting money to very expensive infrastructures they can't afford to maintain.</p>	Sally	business owner
2022-07-09 10:46:29	KwaZulu-Natal	Yes I do	Solar	I selected Solar because that is the renewable Energy that I know. I have installed Solar on my house and built up the hardware to a point where I could easily go off the grid. I am in support of any Renewable energy supply, but not incurring a huge cost of Nuclear, because that would set our Economy back further. Rather leave it to Private enterprise to establish Solar Wind and Hydro Electricity. I understand that Solar is only operational during daylight hours, so there would have to be substantial storage capacity. Maybe this is the time to call on Elon Musk to come to the party and his Country of birth to come into the battery storage space. He could earn commission, from his provision of the storage capacity. The Eskom Management need the support on Govt.	Harvey	business owner
2022-07-09 10:43:04	Northern Cape	Yes I do	Solar		LJ	business owner
2022-07-09 10:35:39	Eastern Cape	Yes I do	Solar	Import tax needs to be reduced on all solar power hardware.	Sanrie	business owner
2022-07-09 10:33:26	Western Cape	Yes I do	Solar	Currently I use 284l of diesel for every 2 hrs of loadshedding this is R7100.00-- this is killing my business I need to convert to solar backup asap I am losing refrigeration compressors and electrical parts due to the unstable grid this is a big fiasco I do not know how long I will be able to afford this expense	edward	business owner
2022-07-09 10:27:55	KwaZulu-Natal	Yes I do	Solar		Sander	business owner
2022-07-09 10:25:05	Western Cape	Yes I do	Solar		Them bani	business owner
2022-07-09 10:24:54	Western Cape	Yes I do	Solar	and wind. It should happen as fast as possible. You can not grow an economy with no electricity, it is so bad for the country and future investment	Gemma	business owner
2022-07-09 10:15:55	Western Cape	Yes I do	Solar	I feel that both solar and wind may be the way to go -- BUT as an Ecologist, I also know that these have their own environmental impact. I would say that the costs and environmental effects of these need to be compared with nuclear power.	Kirsten	business owner
2022-07-09 10:04:43	Gauteng	Yes I do	Solar	A combination of solar, wind, hydro and nuclear provide good options. Immediate action needs to be taken by private institutions that cannot be interfered with by our unreliable, undependable, irresponsible, negligent, incompetent government. The ANC has proven that if it's left up to them, it will be driven into the ground, so take the responsibility out of their hands. They refuse to be held accountable to the 60 million citizens of this country that they are meant to serve, so keep it out of their hands permanently and let them be prosecuted for their crimes.	Gerrit	business owner
2022-07-09 10:01:08	Western Cape	Yes I do	Solar		Louise	business owner
2022-07-09 09:54:36	Mpumalanga	Yes I do	Solar		A	business owner

2022-07-09 09:27:29	KwaZulu-Natal	Yes I do	Solar	Eskom is failing and the private sector can save our country. This needs to be about citizen needs and not Government funding anymore. Allow us to save us!	Simone	business owner
2022-07-09 09:24:59	Eastern Cape	Yes I do	Solar	If the Western Cape as just one province can go off the grid, why is the government not taking note and allow regions to go it alone and provide their own power. I know, as long as this present government is in power that will never happen, as they swallow the money and have no answers to SA's needs.	Robin	business owner

2022-07-09 09:22:57	Gauteng		Yes I do	Solar	Be it a solar, Hydro or any other, it should be immediately allowed without red tape and without corruption and crap of BBBEE, this should of happened a long time ago.	COLIN	business owner
2022-07-09 09:20:07	Gauteng		Yes I do	Solar		Shannon	business owner
2022-07-09 09:19:12	KwaZulu-Natal		Yes I do	Solar	We cannot continue on this path till we blackout completely	Frederick	business owner
2022-07-09 09:13:19	Gauteng		Yes I do	Solar	Solar panels last long. they have become cheap. Sun is free. The disadvantage is that many are needed. Many! But the true failure lies with those who steal all the money for any good project.	Laurence	business owner
2022-07-09 08:51:34	Gauteng		Yes I do	Solar	Anything but corrupt government coal will work. We have plenty sun.	Robert	business owner
2022-07-09 08:50:18	Western Cape		Yes I do	Solar		William	business owner
2022-07-09 08:48:29	KwaZulu-Natal		Yes I do	Solar	Easy to install micro installations	Andy	business owner
2022-07-09 08:43:14	Gauteng		Yes I do	Solar	Coal is becoming obsolete and nuclear is too risky. We must move with the times and start using renewables, wind, solar and any or all other earth healthier options for power. And most of all we must get rid of 'power hungry' ministers who are hindering progress and destroying our beautiful country.	Beverley	business owner
2022-07-09 08:34:34	Eastern Cape		Yes I do	Solar		Michael	business owner
2022-07-09 08:30:40	Gauteng		Yes I do	Solar	No sane person can't see the loss, frustration and man made system to rely on one mode of electricity supply is doing to us as citizens and business. It's something that was to be dealt with during Nelson Mandela's era as it was raised as an emergency but because they stood to benefit, they did nothing . I personally wish that no politicians, their friends and families should be involved in the changes and supply of any alternative of electricity. Misuse of money in Eskom over the years hasn't been fully and properly addressed yet this government continues to fund it at the same time, they increase tariffs. Crooked and incompetent CEO 'S, boards and employees continue at Eskom irrespective of the gross violation of our rights to electricity. We need change now in South Africa if we're serious about dealing with corruption crippling our country	Mfanimpela	business owner
2022-07-09 08:25:53	Gauteng		Yes I do	Solar		Shaun	business owner
2022-07-09 08:22:26	Gauteng		Yes I do	Solar	I cannot believe that this is a discussion in the first place. What really worries me is that government and municipalities, regardless whether it be anc or da will find ways to tax a system that supplies my home with enough energy to stop using government and municipality services. Taxing the sun, I know, sounds totally ridiculous, but they will try anyway.	Anthonie	business owner
2022-07-09 08:20:31	Eastern Cape		Yes I do	Solar	I have extra solar power but I am not allowed to give it back because of all the redtape, I paid R42 000 for the connection but it will take eskom 6 months to come to literally push a button.	MC	business owner
2022-07-09 08:18:43	KwaZulu-Natal		Yes I do	Solar	Solar in places where it is most sunny. Wind in places where it is most windy.	Karen	business owner
2022-07-09 08:05:49	Gauteng		Yes I do	Solar	Obviously there needs to be prudent legislation and regulation to ensure safe energy production and safe transmission and storage. But the governmental policy resistance to independent power production needs to go. Cadre deployment, rampant corruption and state capture has hollowed out Eskom and municipal energy support structures, which is scandalous and which should be deeply embarrassing to the ANC and the State. The economy needs a stable power supply to allow existing businesses to be sustained and to thrive and to allow new businesses to enter or start up. It's a recipe for disaster to stay on the same track without making urgent immediate changes.	Marian	business owner
2022-07-09 07:40:38	Gauteng		Yes I do	Solar		Eileen	business owner
2022-07-09 07:20:24	Gauteng		Yes I do	Solar		Klaus-Dieter	business owner

2022-07-09 07:05:26	Eastern Cape		Yes I do	Solar	Currently the most efficient and sustainable energy source according to my knowledge. South Africa is also a country of sun. Give tax rebates for people with solar panels on roofs of houses. Immediately also start clamping down harder on any solar power theft, because as the supply of solar panels are going to raise, so will the theft demand for it as well.	Hendrik	business owner
2022-07-09 06:59:44	Gauteng		Yes I do	Solar		Delia	business owner
2022-07-09 06:56:40	Western Cape		Yes I do	Solar		Greg	business owner
2022-07-09 06:54:26	Eastern Cape		Yes I do	Solar	We live in a country where the sun shines the most, so it makes sense to use our natural resources. Look at what communities like Orania are accomplishing!! It can be done! Due to lack of maintenance on everything, our country is being messed up.... People are willing to help our economy, so let them!!	Maryann	business owner
2022-07-09 06:51:54	Gauteng		Yes I do	Solar		Heidi	business owner
2022-07-09 06:50:58	Western Cape		Yes I do	Solar		Marco	business owner

2022-07-09 06:21:08	Western Cape		Yes I do	Solar	This useless ANCgovernment must something immediately!! Anything!! To prevent a total collapse of the economy. They wouldn't notice because they still get their excessive remuneration no matter how useless they are. And of course, they are not reliant on the Eskom! PREVENT A TOTAL COLLAPSE OF THE GRID BY ANY MEANS WHATSOEVER!! DO THE RIGHT THING. JUST ONCE IN 28 YEARS, ANC GOV'T!!!	Angela	business owner
2022-07-09 05:10:08	Western Cape		Yes I do	Solar		Paul	business owner
2022-07-09 04:47:38	Gauteng		Yes I do	Solar	Although solar energy seems a very good option it may not be the best all-weather solution - that would be nuclear - but not at the hands of Eskom or any other autocratic / politically organisation. We live in a country where the number of solar household systems are everywhere - why not buy back from those people that have already invested so much money to install and maintain these systems? For the substantial rest, bring back the PBMR.	Karel	business owner
2022-07-09 04:45:52	Gauteng		Yes I do	Solar	It is cheap and sustainable.	Soon	business owner
2022-07-09 04:24:09	KwaZulu- Natal		Yes I do	Solar	Immediate privatisation will create jobs as private entrepreneurs set up businesses t sell electricity privately, which in turn will allow existing business affected by load shedding to continue trading effectively, which in turn should boost ntetnatiinal investment into SA. Privatise Eskom, but not with business people who have political connections, or political agendas but genuine, knowledgeable, business people who have South Africa's best interests at heart to rebuild for all peoples of SA.	Carol	business owner
2022-07-09 02:43:19	Western Cape		Yes I do	Solar	Open it to all forms of renewable energy. Insist that any new building to be built can be off the grid. Tax credits should be offered to large city building owners for the installation of, for example, sufficient solar panels. What about writing off or amortised the equipment over a 3 year period?	Fran	business owner
2022-07-09 02:00:01	Eastern Cape		Yes I do	Solar	Eastern Cape Plenty of Sun plenty of large commercial roof tops and open space plenty of people to train to employe fr maintenance the Solar fields Add wind power plenty of wind Private enterprise immediately set up	Penny	business owner
2022-07-08 23:55:33	KwaZulu- Natal		Yes I do	Solar	Solar and wind will better with less pollution caused and they are quicker to install. As for eskom I don't see any hope	Hoosen	business owner
2022-07-08 23:55:31	KwaZulu- Natal		Yes I do	Solar	Solar and wind will better with less pollution caused and they are quicker to install. As for eskom I don't see any hope	Hoosen	business owner
2022-07-08 23:52:50	Gauteng		Yes I do	Solar	Everybody knows SA is one of few countries that has plenty of sun shinny especially throughout year. Solar is one of excellent alternative source. Coal is far out of question. Since population is multiple faster e'each year' than the production of coal source can produce energy. Be realistic and sober governance, please. Any normal teenager can predict this seriousness consequence if we stay on coal as main source.	Joao Paulo	business owner
2022-07-08 23:34:26	KwaZulu- Natal		Yes I do	Solar		José	business owner
2022-07-08 23:32:40	Gauteng		Yes I do	Solar		Andries	business owner
2022-07-08 23:27:06	Gauteng		Yes I do	Solar		Lorna	business owner
2022-07-08 23:20:37	Western Cape		Yes I do	Solar	The red tape is a huge hinderance to progress for a country that WAS moving in the right direction. There has to be competition and different providers. You CANNOT successfully run a democracy with communist principles!	Natalie	business owner
2022-07-08 23:01:31	Gauteng		Yes I do	Solar		Mariana	business owner

2022-07-08 22:55:19	Gauteng	Yes I do	Solar	<p>The electricity solution is the FREE MARKET, 100s of companies that compete to produce electricity. Companies themselves that produce electricity for their needs, it can be ANYTHING. Coal, solar, nuclear, wind, offshore, gas, all dependent upon the MARKET, the NEEDS of businesses,. the CAPABILITIES, the COST, everything is determined by MATHEMATICS and LOCATION.</p> <p>We know South Africa is a world leader in terms of solar potential, we know China and other countries can manufacture solar that produces electricity cheaper than the other technologies. So logically if we can import Solar, we can produce electricity at 0.03 US cents per kWh.</p> <p>But it is not the technology that's the problem, it's the FREE MARKET, a system of COMPETITION that gives INVESTMENT, RESEARCH on NEW TECHNOLOGIES, NEW MARKETS, that drives economic growth. The government can't do it. Only the private sector can do it!</p> <p>Only Stock Market-listed companies can compete. So what's the solution? LIST ESKOM ON THE JSE AS SOON AS POSSIBLE and CREATE WHAT IS KNOWN AS A SUBSIDIARY COMPANY, A COMPANY THAT DEALS WITH THE POLITICAL GOALS THE ANC HAS, PROVIDING SERVICES TO THE POOR, THOSE THAT CAN'T PAY. IT'S KNOWN AS A CORPORATE SPIN-OFF OF SUBSIDIARY AND ITS SERVICES.</p> <p>So you list Eskom on the JSE, it gets priority finance, the company has A-listed quality of resources then you create another company that Eskom owns with C-listed,. D-listed, E-listed, F-listed assets. So that investors can discern between the profits of the A-listed company and its subsidiary that will make losses for a long time, but that can execute a type of political strategy to get services to the poor, to get the votes they want.</p> <p>But this loss making subsidiary needs to be REFINANCED every year with capital and Eskom and this other subsidiary needs to give 100% accounting of their losses, their performances, so that the government and investors can know how much the shares are worth and how to proceed to grow Eskom without its subsidiary destroying shareholder wealth.</p> <p>And someday, that subsidiary may become viable, a functioning unit OR the government and major shareholders may decide to break the non-performing subsidiary up and to sell it off to other smaller and better performing competitors in the electricity sector.</p> <p>So you need free market competition and you need to list assets on the JSE as soon as possible, but those assets need to be broken up and listed into an A-level quality company and a B-F level subsidiary.</p> <p>The A-F refers to credit ratings given by credit ratings companies.</p> <p>The A listed company will own the B-F listed subsidiary.</p> <p>Good luck there!</p>	Wynand	business owner
2022-07-08 22:47:09	Free State	Yes I do	Solar	<p>We need immediate action and to stop trying to breathe life into ESKOM. and municipalities that are run by people with no knowledge and integrity. Allow private companies to generate power and allow the people to pay the supplier directly. Municipalities are incapable of managing the massive amount of funds that come their way. The funds end up in their own pockets instead of maintaining the infrastructure, supplying clean water and stable electricity.</p>	Henriette	business owner
2022-07-08 22:39:44	Western Cape	Yes I do	Solar	<p>Solar is only one solution. But the private sector has to be involved. Government has proven that it cannot manage alone and needs help. Let government lead by enlisting the necessary help....</p>	Lawrence	business owner
2022-07-08 22:32:58	Gauteng	Yes I do	Solar		Stonehouse	business owner
2022-07-08 22:32:15	Western Cape	Yes I do	Solar		Jacquie	business owner
2022-07-08 22:29:25	Gauteng	Yes I do	Solar		C	business owner

2022-07-08 22:16:49	KwaZulu-Natal	Yes I do	Solar	<p>Domestic and industrial solar can at least plug the gaps during daytime!</p>	Peter	business owner

2022-07-08 22:12:50	Western Cape		Yes I do	Solar	I completely support the five steps identified by Meridian in Engineering News which include: 1) unlocking barriers to distributed-generation projects by lifting the current generation licence-exemption threshold for grid-connected projects and allowing these facilities to sell power to multiple customers; 2) raising the level of South Africa's ambition for power-sector decarbonisation by setting a more ambitious lower-bound emissions target in the country's updated Nationally Determined Contribution and revising the Integrated Resource Plan to align with that target; 3) developing a 'Just Transition Transaction' to access climate finance for Eskom, as well as workers and communities affected by the phase-down of coal power; 4) planning for the localisation of renewable-energy industries in light of large-scale demand that will be created for wind and solar photovoltaic technologies by finalising a South African Renewable Energy Masterplan that is focused on driving industrialisation through the renewable-energy sector and its value chain; 5) and future-proofing South Africa's carbon-intensive industries by sending key policy signals, primarily through the promulgation of the Climate Change Bill and the publication of green transport and green-hydrogen strategies, to industries to support their transitions.	Roderick	business owner
2022-07-08 22:01:14	Free State		Yes I do	Solar	Solar and also thorium reactors. One year construction time on thorium reactor. Very safe , cheap and not as harmful to the environment.	Gerrit	business owner
2022-07-08 22:00:44	KwaZulu- Natal		Yes I do	Solar	Many private individuals and businesses have already installed and are now currently installing solar power onto their houses and buildings. There is definitely extra energy that they are producing that is just being wasted - why not harness that additional energy and start supplying to those of us who don't have solar ourselves, and also pay those IPP's what they deserve instead of adding extra taxes and 100GW caps! There should be no cap, government and Eskom should be jumping at this opportunity, which will help in the short term.	Ashley	business owner
2022-07-08 21:56:48	KwaZulu- Natal		Yes I do	Solar	Allow all consumers (domestic, industrial, commercial etc) the opportunity to freely and cost effectively through open market trade of all goods generate their own solar power AND feed any excess back to the grid if they choose.	Jon	business owner
2022-07-08 21:30:05	KwaZulu- Natal		Yes I do	Solar	We live in a country with high amounts of sunshine, so solar is a great option to ease the burden of an incompetent energy supplier. It is simply unbelievable, that Eskom was once, not so long ago, voted best power utility in the world. Thanks to BBEEE, every SOE in South Africa has failed.	Jurgen	business owner
2022-07-08 21:24:22	KwaZulu- Natal		Yes I do	Solar	We live off grid with a combination of Solar and Gas (for geyser and cooking). Once your system is paid, electricity is FREE., Gas is affordable! Solar is environmentally sustainable, and we need to start looking after our environment. Yes, Solar efficiency does drop with cloudy weather, but that's why if you are having a cloudy day, then you can be substitutes with another form of electricity. People with excess electricity should be able to feed back into the grid. It is cost effective, and able to be implemented immediately. People and properties should be allowed to disconnect form the eskom network if they wish to do so.	Kirsten	business owner
2022-07-08 21:07:18	Western Cape		Yes I do	Solar	The question is a bit over simplified in terms of asking for a single answer -- but solar energy makes a lot of sense for South Africa's climate. It is also relatively easy to install, and it can be scaled right down to meeting the partial needs of a single household. Because of the simplicity and scalability, it has been possible for many private installers to spring up and start installing. If we could cover most of the roof space in South Africa in solar panels, we can take massive pressure off Eskom. However, storage must also be addressed, and there mechanical batteries e.g. in the mineshafts in Gauteng can have great potential.	Ashton	business owner
2022-07-08 20:58:53	Gauteng		Yes I do	Solar		Lydia	business owner
2022-07-08 20:51:29	KwaZulu- Natal		Yes I do	Solar	They can be placed on every roof of every house	codlin	business owner
2022-07-08 20:47:14	Northern Cape		Yes I do	Solar	Unfortunately I do not agree with only one option offered above. It must allow more eg wind and solar with storage - it cannot be only one and it cannot be without storage. The above is the only short term solutions but unfortunately it does not provide for peak power demands. Long term only solution to end both energy supply problems and carbon emissions is nuclear - more spesific SSMNR (small scale modular nuclear reactors)	Carel	business owner
2022-07-08 20:45:16	Western Cape		Yes I do	Solar		Harold	business owner

2022-07-08 20:42:05	Western Cape		Yes I do	Solar	Something has to change.... The economy is suffering, it's effecting our business's. I'm so tired of hearing the president saying that we must work on getting our economy growing and then taking our ability to do so away. Our leadership are driving our country into a "dark state" Come on.....we can do better than this.	Diane	business owner
2022-07-08 20:39:28	Western Cape		Yes I do	Solar	Independent power Producers using solar, concentrated solar and wind with battery storage or turbines in the case of concentrated solar and also some hydro-electric can solve the lack of electricity supply within 2 - 3 years if the Department of Energy opens up tenders immediately for the shortfall. The infrastructure and maintenance thereof would cost the country nothing as only the supply would need to be paid for, which would be at a far lower cost than the present coal powered electricity and the overheads of Eskom.	Bruce	business owner
2022-07-08 20:34:22	Gauteng		Yes I do	Solar	Eskom can also enter into agreement with landowners, particularly on farm land. Install solars, to be secured by farmers and use a portion of electricity in lieu of rental. In established townships, municipality supply electricity. Household that produces their electricity must be allowed to sell the excess to the municipality. Their accounts can be credited and when they can't produce more, debited accordingly.	Lydia	business owner
2022-07-08 20:22:43	Gauteng		Yes I do	Solar		Louis	business owner
2022-07-08 20:11:34	Western Cape		Yes I do	Solar	Groen krag en skeep werk. Ons is relatief woestuin land en son is meer en deels beskikbaar. Karoo le uitgestrek en kan aan netwerk gekoppel word. Daar is ook nin of geen korrupsie betrokke en krag sal deurlopend wees en kader ontvlooiing minimaal.	Johannes	business owner
2022-07-08 20:06:42	Gauteng		Yes I do	Solar		Dave	business owner
2022-07-08 20:05:16	Western Cape		Yes I do	Solar		Clairanne	business owner
2022-07-08 20:00:03	KwaZulu- Natal		Yes I do	Solar	South Africa has a lot of sun. We should utilize it. We have wide open spaces. We could use wind energy. We need this power crises closed. Please allow people to provide it - we dont have 5, or 10 years to wait. Please	Esmé	business owner
2022-07-08 19:54:02	Free State		Yes I do	Solar	Any source of affordable energy generation that is available short term. Thereafter when the system is stabilized more efficient long term solutions including renewables must be planned and implemented. The current Eskom situation should never be repeated.	Arno	business owner
2022-07-08 19:47:57	Western Cape		Yes I do	Solar		Johann	business owner
2022-07-08 19:47:50	Limpopo		Yes I do	Solar		David	business owner
2022-07-08 19:47:16	Western Cape		Yes I do	Solar		Kat	business owner
2022-07-08 19:39:28	Eastern Cape		Yes I do	Solar	Africa has sun & wind so it makes sense to harvest it & save the planet at the same time	Grant	business owner
2022-07-08 19:39:17	Western Cape		Yes I do	Solar	Solar and wind is significantly cheaper and quicker to install than both nuclear and coal. All research indicates this. This is not even touching on the environmental benefits. How is this topic still debated by government. Please serve the best interest of all South Africans for once.	Rick	business owner
2022-07-08 19:36:39	Limpopo		Yes I do	Solar	Sunlight is free. Every new household in South Africa will be able to have access to electricity. It will assist our country to deliver services to all citizens .	Matshwan e Jeremia	business owner
2022-07-08 19:36:18	Gauteng		Yes I do	Solar		SHERYL	business owner
2022-07-08 19:18:36	North West		Yes I do	Solar		Estelle	business owner
2022-07-08 19:12:32	Gauteng		Yes I do	Solar	South Africa needs a mix of renewables to carry its electricity load going into the future. Our coal stations are some of the worst polluter's in the world so we need to move away from them. Renewables are the best solution for the urgent requirement of an adequate stable electricity supply	Neil	business owner
2022-07-08 19:05:38	Gauteng		Yes I do	Solar	There is no growth in our economy due to continued loadshedding. This has gone on for far too long. Give us alternative ways to produce electricity. It's for the benefit of everyone in S Africa.	Alexander	business owner
2022-07-08 19:02:36	Western Cape		Yes I do	Solar		beate	business owner
2022-07-08 19:00:09	Western Cape		Yes I do	Solar	Natural sources like sunlight should be used as it is also good for the environment and after initial cost is cheap	Hanri	business owner
2022-07-08 18:59:49	Gauteng		Yes I do	Solar	As there is Solar available over 12 hours a day and is not run by a 3rd party that controls us South Africans and changes prices so they can steal from our people being South African.	Anthony	business owner
2022-07-08 18:58:16	KwaZulu- Natal		Yes I do	Solar		Lee	business owner
2022-07-08 18:56:53	Western Cape		Yes I do	Solar		Peter	business owner
2022-07-08 18:49:27	Western Cape		Yes I do	Solar		Michelle	business owner
2022-07-08 18:39:53	Mpumal anga		Yes I do	Solar		Marinda	business owner
2022-07-08 18:38:45	Western Cape		Yes I do	Solar		Alex	business owner
2022-07-08 18:38:24	Western Cape		Yes I do	Solar		Martelle	business owner

2022-07-08 18:26:32	Gauteng		Yes I do	Solar		Ian	business owner
2022-07-08 18:23:50	Gauteng		Yes I do	Solar	My electrify supply just came on after almost 12 hours. It is time for new producers enter the markets.	Henrico	business owner
2022-07-08 18:17:42	Mpumalanga		Yes I do	Solar			business owner
2022-07-08 18:16:23	Gauteng		Yes I do	Solar	Independent Power Producers need to be encouraged to produce as much power they can and feed it in to the grid immediately. ALL red tape for this should be stopped. Next step is change the labour laws and drop BBEEE, then fire all the 30'000 incompetents and thieves, saboteurs and ANC cadres and then hire competent people NO MATTER THEIR SKIN COLOUR so that the number of employees is back to the necessary level and not the bloated ANC cess pool it is now. Sell Eskom so that it can become a competent entity.	Catherine	business owner
2022-07-08 18:14:46	Mpumalanga		Yes I do	Solar	Stop stealing you fucking criminal fucks. Let the whole useless anc government pay back what they have stolen then resign	Klasie	business owner
2022-07-08 18:14:42	Gauteng		Yes I do	Solar		Douglas	business owner
2022-07-08 18:14:10	Western Cape		Yes I do	Solar	Solar and wind are clean renewable energy. Government had enough time to have implemented this. In order to save our country and economy this hs to be done now.	Bernie	business owner
2022-07-08 18:12:40	Gauteng		Yes I do	Solar	Eskom clearly cannot step up to the plate so the path is paved for new opportunities to arise and to supply a demand but it would be better if everybody who uses electricity pays for it.	Suyen	business owner
2022-07-08 18:09:43	Gauteng		Yes I do	Solar		Gerhard	business owner
2022-07-08 18:08:39	Free State		Yes I do	Solar		Philip	business owner
2022-07-08 18:04:21	Gauteng		Yes I do	Solar		Evelyn	business owner
2022-07-08 18:00:27	Western Cape		Yes I do	Solar		Johannes	business owner
2022-07-08 17:58:09	Gauteng		Yes I do	Solar	Solar and wind are here in abundance and the government should give us a set up grant to convert - cheaper than Eskom!	Sybille	business owner
2022-07-08 17:57:47	Western Cape		Yes I do	Solar		Johannes	business owner
2022-07-08 17:53:45	Gauteng		Yes I do	Solar	The economy is dying because of load shedding. Government has proven they cannot revive nor manage Eskom. Peoples livelihoods are diminished. Our most natural green energy resources are wind & sun. Use them. Let go of the egos and for once, prioritize the people.	Sally	business owner
2022-07-08 17:49:21	Gauteng		Yes I do	Solar	Eskom is essential as the grid has to be maintained in order to distribute any power generated. Mantashe our obdurate, ill informed and partisan energy minister should have been reshuffled from such a key position a long time ago.	Penny	business owner
2022-07-08 17:48:10	Limpopo		Yes I do	Solar	Yes, yes and yes!	Ingrid	business owner
2022-07-08 17:47:05	Western Cape		Yes I do	Solar		Lee-Ann	business owner
2022-07-08 17:46:35	Western Cape		Yes I do	Solar	There's so much natural energy called SUNSHINE ?	Henrihet a	business owner
2022-07-08 17:43:30	Gauteng		Yes I do	Solar	We must be able to have different choices not the monopoly by Eskom.	Thanduxolo	business owner
2022-07-08 17:39:50	Western Cape		Yes I do	Solar	Renewable energy to be prioritised, solar farms or concentrated solar farms would be ideal with our solar potential.	Grenville	business owner
2022-07-08 17:39:46	Gauteng		Yes I do	Solar	We have the sun, let's use it, you can't steal it... Not yet anyway.... Get rid of the stuff that is killing the future of our children, solar is the way forward and should have been years ago..	Amanda	business owner
2022-07-08 17:37:25	Western Cape		Yes I do	Solar	Give incentives to allow people to feed the grid with surplus power. Loads of space in the arid areas and on our own roof for Solar Panels - make them affordable - give ordinary citizen discounts on solar kits which in real terms is starting to pay for it self relative to the massive Eskom increases.	Anthony	business owner
2022-07-08 17:34:37	Gauteng		Yes I do	Solar	We have plenty of sun.	Wouter	business owner
2022-07-08 17:27:29	Western Cape		Yes I do	Solar		japie	business owner
2022-07-08 17:26:26	Western Cape		Yes I do	Solar	Solar energy is the cheapest energy available and I assume that it is the quickest to set up. We desperately need a solution to Eskom.	Karen	business owner
2022-07-08 17:25:05	Gauteng		Yes I do	Solar	Solar is becoming cheaper and cheaper to implement. South Africa is ideally suited to solar production. Independent producer opportunities would encourage investment into South African infrastructure. Over supply would create opportunities to export electricity. As a home owner, if regulation and economics made sense, i would consider implementing significantly more power than needed for my home in aim to become a net producer of power.	Grant	business owner
2022-07-08 17:24:13	Gauteng		Yes I do	Solar	We need additional power IMMEDIATELY ... SOLAR is the only viable solution.	Michiel	business owner
2022-07-08 17:23:14	Western Cape		Yes I do	Solar		Peter	business owner

2022-07-08 17:20:14	Gauteng		Yes I do	Solar	I am not familiar with the exact feasibility of renewable energy in the short term, but that can be the ONLY solution in the long term. Nuclear, coal or imported energy would be an absolute disaster for the future of the planet and the sustainability of this country. Renewable all the way! Make solar more accessible and allow people to feed excess energy back into the grid!	Bianca	business owner
2022-07-08 17:14:35	Gauteng		Yes I do	Solar	South Africa is rich in natural resources particularly wind and sun. The government should, rather than throw money at Eskom, give each person a solar panel and get them set up - it would be immediate and save billions	Sybille	business owner
2022-07-08 17:14:07	Western Cape		Yes I do	Solar		Zelma	business owner
2022-07-08 17:11:26	Western Cape		Yes I do	Solar	Its time to embrace all available renewable sources of energy and allow appropriate organisations to fulfill the ever increasing demands for power. It doesn't serve South Africa, in terms of reputation, business reputation, tourism, and our growing population to unnecessarily restrict additional private supplies of energy.	Charlotte	business owner
2022-07-08 17:10:00	Western Cape		Yes I do	Solar	All renewable sources of energy.	Alex	business owner
2022-07-08 17:05:25	Western Cape		Yes I do	Solar	Yes. Immediate steps should be taken to fast track alternative sources of power. I feel that coal alone will never be able to meet South Africa's present and future needs. The state of the power plants is too far gone and sabotage and greed is a huge problem. we will never catch up an the economic decline will continue. The whole national power structure needs overhauling, as well as the policing problem. We are hugely understaffed. We need a new president and a new government asap because the present leaders of our country don't give a damn except for lining their own pockets or leaving the country. A referendum or a new government of national unity based on merit and purely democratic lines is needed; otherwise Zimbabwe here we come!	Hugo	business owner
2022-07-08 17:04:30	Gauteng		Yes I do	Solar	Give all homeowners a loan with a low interest rate to install solar to cover their basic needs. I will rather pay R3000 pm to such a loan than to Eskom! If five million households get off the grid, our problems may be solved!	Mnr	business owner
2022-07-08 16:59:42	Western Cape		Yes I do	Solar	1.0. Solar and wind energy should be explored and added to current power stations to produce power when available - which is most of the time. This will take the pressure off the old current coal etc. powered generation. - Coal etc. powered generation could be used as the backup for when no generation from solar and wind . 2.0. Hydro Electrical power should also be considered where typography allows for it - built ilo. more coal and nuclear power stations. Also this system could be powered by the wind and solar system when available . 3.0. Every household and company in the country should be encouraged and subsidised to install solar panels on their homes and buildings and to feed excess power into the power grid system - This will take the pressure off Eskom and share the load of generation with the people. 3.1. Subsidised for installation. -This could be done via the Rates system - i.e Solar system added to your Rates Bill and paid off over a number of months or years to reduce the strain on households while providing power from installation. Take the load off Eskom! 3.2 Once the installed system is paid off - then households should be paid for the excess power they feed into the grid. 3.3 This will take households and businesses partially or entirely off the Grid and remove the strain and extortion currently applied by the Government and Eskom via selling electricity. Business will flourish and people will get jobs and costs will start reducing making the economy grow for the benefit of all. Electricity and power should not be preventing progress to the benefit of a few. 3.4 Excess power feeding into the Grid will reduce the pressure of bad, incompetent , costly maintenance. This will make house and business owners partial suppliers and encourage entrepreneurial spirit and savings for those that take part.	Denise	business owner
2022-07-08 16:30:24	Gauteng		Yes I do	Solar		Christopher	business owner
2022-07-08 16:26:43	Western Cape		Yes I do	Solar	Please. Please can we just do something. Our economy is going to collapse and everyone is going to bl**dy emigrate! We need to save our country and keep people here who have businesses and create jobs and are finding it exceedingly difficult to keep going under these circumstances.	Marian	business owner
2022-07-08 16:22:45	Gauteng		Yes I do	Solar	This is a no brainer.. Most cost effective power generation is solar and we have the land space in South Africa to become the largest solar power generator on the Continent. So I cannot understand why the Government is dragging its heels to get the red tape removed.. What is the political consequence of doing this except that the coal industry is being protected to ensure wealth continues to be generated for a few people.	Christopher	business owner

2022-07-08 16:20:42	Western Cape		Yes I do	Solar	Solar can be used as we have a lot of open space and lot of sunshine in SA. The power shedding is damaging the economy. Electrical appliances and equipment does not stand up to continuous power failure costing fortunes to replace. The escalating electrical cost has a negative effect on the economy. The Escom debt can never be paid back, resulting in public and users having to fit this bill of incompetent people being employed to run this business. Get the original component managers and people back in position. Those who were replaced by incompetent people must go. Employ those with the necessary skill to turn this machine around and bring it back to a profitable electricity supplier.	Carl	business owner
2022-07-08 16:16:14	Gauteng		Yes I do	Solar		Nika	business owner
2022-07-08 16:14:18	Western Cape		Yes I do	Solar	Solar is probably best, but let the free market decide. As long as an IPP can pass the environmental impact assessment, it should be allowed to produce energy any way it can (renewables will win out in the end anyway because of cost).	Jan	business owner
2022-07-08 16:07:51	Gauteng		Yes I do	Solar	We are fortunate to have a climate of sunshine throughout the year which would be very beneficial for solar.	Steve	business owner
2022-07-08 16:07:41	Gauteng		Yes I do	Solar	Loadshedding kills everything except the rich ANC members. We all need power without the ANC telling us how to live.	Alex	business owner
2022-07-08 16:02:48	Western Cape		Yes I do	Solar	It is LONG overdue to allow Independent Power Producers to be allowed to supply the grid with electricity!!	Janet	business owner
2022-07-08 15:58:48	Western Cape		Yes I do	Solar		John	business owner
2022-07-08 15:49:49	Gauteng		Yes I do	Solar		Athol	business owner
2022-07-08 15:49:22	Gauteng		Yes I do	Solar	Less chance of the incompetent government to screw up solar energy.	Dewald	business owner
2022-07-08 15:46:34	Mpumal anga		Yes I do	Solar	We have plenty of sun-will create sustainable jobs as well	Johan	business owner
2022-07-08 15:45:42	Gauteng		Yes I do	Solar		Gillian	business owner
2022-07-08 15:45:08	Gauteng		Yes I do	Solar	Get rid of the Eskom Monopoly. Offer decent tax rebates to households and businesses who go solar. Install solar farms in the parts of SA that get 360 days of sun a year. Fine all producers of dirty electricity for cutting corners and the pollution they cause. Reward more businesses for going green and installing solar to run during their normal business hours. Remove any import duties and taxes on panels, invertors and lithium batteries so that start up systems are more affordable and futureproofed for upgrades.	Christie	business owner
2022-07-08 15:36:07	Western Cape		Yes I do	Solar	Our country is in a crisis, both socially and economically, as a result of the mismanagement and underinvestment of electricity generation facilities. Companies and municipalities should be allowed to contract with Independent Power Producers with immediate effect, obviously still having to comply with the usual tender requirements, and the legislation needs to be amended urgently to accommodate this. The IPPs should be limited to providing power from renewable energy sources. Under no circumstances should our country consider wasting money on a Karpowership, nor do any deal for old technology nuclear energy plants.	Susan	business owner
2022-07-08 15:35:59	Gauteng		Yes I do	Solar	can and will only work if given to a reputable provider not to a "friend" or another "JUST BECAUSE HE IS BEE" supplier, of a government official either wise the problem will just continue	Wilhelm	business owner
2022-07-08 15:34:11	Gauteng		Yes I do	Solar	Getting the monopoly of energy generation out of the grubby paws of the government is what we need. Competition is good for stimulating the economy. Let people produce for themselves. Let them sell. Having no electricity kills us all!	Kobus	business owner
2022-07-08 15:31:32	Western Cape		Yes I do	Solar	Here in George even the airport has a huge solar farm.	Maureen	business owner
2022-07-08 15:24:34	Western Cape		Yes I do	Solar	We have the ability to be one of the world's largest solar energy producers and we should use it. Apart from needing the electricity so generated it will increase employment, especially in poorer rural areas,	Mark	business owner
2022-07-08 15:23:54	Northern Cape		Yes I do	Solar	We have enough sunny days to use solar power. Eskom is run by corrupt ANC cadres. Get rid of government in supply of electricity It is doing great harm to our economy	Magdalen a	business owner
2022-07-08 15:19:26	Gauteng		Yes I do	Solar	Please force the Government to make the right decision.	Ozzie	business owner
2022-07-08 15:18:16	Gauteng		Yes I do	Solar		LYNETTE	business owner
2022-07-08 15:14:38	KwaZulu- Natal		Yes I do	Solar	I would have chosen solar and wind but that option is not available. The reason for my choice is cost effective over the longer term, improving technology, and clean.	Paul	business owner

2022-07-08 15:09:15	Gauteng	Yes I do	Solar	We have an abundance of sunshine, more than 300 days a year in most parts of the country. Easily maintainable and other running costs are low. Vast stretches of the Karoo could be put to good use, and create jobs in that area of the country. No government intervention must be insisted upon and IPP should be allowed to trade and be cost effective.	TOM	business owner
2022-07-08 14:59:35	Gauteng	Yes I do	Solar	Independent Power Producers must be allowed immediately, with proper rules and guidelines applying. It is ridiculous that the country is in this position of not being able to meet the energy demands, while so many private citizens are producing their own power from solar and other renewable sources, and can very easily feed excess power back into the grid. Allowing IPP's would also open the gateway for companies to build renewable energy power plants, creating more jobs and boosting the economy.	Gary	business owner
2022-07-08 14:52:39	Gauteng	Yes I do	Solar	All over the world, solar and wind energy are being harnessed to produce electricity. We have plenty of sunshine and wind, it's time to use what we have and put it to good use. The use of independent power producers takes the burden off of Eskom, who clearly cannot manage the load. Let's do the right thing and light up South Africa!	Maria	business owner
2022-07-08 14:44:47	Western Cape	Yes I do	Solar	Fire Gwede and get things moving!	Wendy	business owner
2022-07-08 14:42:29	KwaZulu-Natal	Yes I do	Solar	We have great sun exposure and should capitalize on that.	Martin	business owner
2022-07-08 14:42:26	Gauteng	Yes I do	Solar	Dear South Africa I chose solar because although I'm not an authority on electricity production this seems to be the method favoured by those who really know this field and because South Africa has a lot of sunshine most of the year.	Ruth	business owner
2022-07-08 14:34:10	Western Cape	Yes I do	Solar	We have known since 1998 that we will be running out of capacity to power the country properly, but nothing was done about it. In 2007 loadshedding started. Badly maintained infrastructure, growing demand, and corruption all played their role, bringing us to this crisis point. The red tape specifically designed to stave off any independent power generation being added to the grid must be cut through and we should see a new energy future that includes renewable energy sources like Solar. In fact, we should be leading the world on this as we are ideally placed for solar, we have so much sun, and so much space, this should be our focus, not coal, not an energy provider that leaches off the country, cripples the economy and will slowly take us down with it as it self-destructs in front us, leaving a handful super-wealthy elites and the shattered country in its wake.	Willem	business owner
2022-07-08 14:33:13	Limpopo	Yes I do	Solar		Elize	business owner
2022-07-08 14:28:32	Western Cape	Yes I do	Solar	Solar immediately available for short term crisis solution.	ELIZE	business owner
2022-07-08 14:25:42	Western Cape	Yes I do	Solar	Solar, Wind, Hydro - in a manner in which the money is not stolen.	karen	business owner
2022-07-08 14:23:47	Gauteng	Yes I do	Solar	Allow house owners and businesses alike to instal solar panels and the excess of what they produce to sell back to the grid	Michael	business owner
2022-07-08 14:23:00	Free State	Yes I do	Solar		Arthur	business owner
2022-07-08 14:18:40	Gauteng	Yes I do	Solar	Eskom and the government has proven it cannot solve the problems. IPP's must now be allowed to generate electricity	Michelle	business owner
2022-07-08 14:10:38	Free State	Yes I do	Solar	We have sun, wind & water in abundance - allow and incentivise us to use solar, hydro & wind power as Eskom with its coal fired stations has clearly failed the nation.	Vanessa	business owner
2022-07-08 14:08:05	Gauteng	Yes I do	Solar		Darryl	business owner
2022-07-08 14:06:55	Western Cape	Yes I do	Solar	Solar and wind would be ideal. Nature's gifts we can harness.	Natascha	business owner
2022-07-08 14:03:28	Eastern Cape	Yes I do	Solar	IPP's need to be allowed to connect to the grid ASAP. Without the power that they can bring, SA will continue to sink. Power supply is the lifeblood of our beloved country. Greedy people must be taken out of the picture before they can get their hands on the funds that will be created doing this. Act now - its almost too late.	Rudy	business owner
2022-07-08 14:02:18	Western Cape	Yes I do	Solar	Combination of solar and wind, of which there is abundance in South Africa! Additional Hydro power is also suitable to solve the current electricity issue in the country. The solution is there for all the entire world to see! Get rid of ESKOM's monopoly, fire the corrupt authorities and scrap the red tape immediately. You have allowed ESKOM to hold South Africa hostage for far too long!	Roger	business owner

2022-07-08 13:57:28	Western Cape		Yes I do	Solar	We should be able to use any and all power we can find. We need an economy. This country has struggled to produce power with an ailing infrastructure and unskilled workers for over 15 years. Load shedding has been a part of our lives for 15 years. Instead of an improvement the situation seems to get worse. Most of the time the power generated is 30% of what is unavailable due to breakdowns and maintenance. The Government has proven with EVERY single entity it controls that it cannot manage due to shoddy workmanship and corruption. This country will continue to decline unless the people are allowed to take over power generation etc. Rather encourage people to install Solar panels to help ease the demand and give a rebate to home owners to install solar and generate more power.	Erica	business owner
2022-07-08 13:56:02	Western Cape		Yes I do	Solar		Barbara	business owner
2022-07-08 13:55:49	Gauteng		Yes I do	Solar	Solar and wind power, provided proper environmental impact assessments are done - so no wind farms in the way of bird migration, etc.	EJ	business owner
2022-07-08 13:51:59	Western Cape		Yes I do	Solar	a mix of all the power sources. IPP's should add as much power as possible as well as nuclear.	PAUL	business owner
2022-07-08 13:49:33	KwaZulu- Natal		Yes I do	Solar	FACT: Eskom is "broken beyond repair." FACT: Only a growing economy can pull SA out of the economic Doldrums in which it is languishing due to corruption, stupidity and incompetence. FACT: Economic growth requires a sustainable energy supply at affordable prices. FACT: As long as we depend on Eskom for sustainable energy we might as well treat ourselves to Pie in the Sky! FACT: We need to change legislation to allow IPP's to supply power & embrace renewables, and we need to do so WITHOUT DELAY - it is already 28 years too late!!!	Suren	business owner
2022-07-08 13:49:23	Gauteng		Yes I do	Solar	We need a quick solution to the current serious power situation. It is absolutely extortionist to be looking at increasing tariffs when we are not even receiving an adequate service. Solar is quick to install, and we have plenty of sunshine.	Ainsley	business owner
2022-07-08 13:49:22	Gauteng		Yes I do	Solar	We can actually do more than one method of producing electricity using Solar, Hydro and Wind so why are we restricted.	Lebohang	business owner
2022-07-08 13:47:48	Limpopo		Yes I do	Solar		Peter	business owner
2022-07-08 13:47:25	KwaZulu- Natal		Yes I do	Solar		Gilluan	business owner
2022-07-08 13:46:45	Free State		Yes I do	Solar	The use of renewable energy sources such as solar energy will benefit the entire economy as it is a sustainable energy source that should minimize the the risk of load shedding. South Africa has plenty of sun to go around.	Jacqueline	business owner
2022-07-08 13:41:58	Eastern Cape		Yes I do	Solar	We cannot allow Eskom, yet another basket case SOE, to have the sole monopoly on something as important as power.	Andre	business owner
2022-07-08 13:40:35	Gauteng		Yes I do	Solar	Let us all help to get the lights on and stay on without enriching just 2 or 3 powerful entities.	Piet	business owner
2022-07-08 13:39:36	Gauteng		Yes I do	Solar	This country has struggled to produce power with an ailing infrastructure and unskilled workers for over 15 years. Load shedding has been a part of our lives for 15 years. Instead of an improvement the situation seems to get worse. most of the time the power generated is 30% of what is unavailable due to breakdowns and maintenance. The Government has proven with EVERY single entity it controls that it cannot manage due to shoddy workmanship and corruption. This country will continue to decline unless the people are allowed to take over power generation etc.	Nicola	business owner
2022-07-08 13:35:25	Gauteng		Yes I do	Solar	Load shedding is now at crisis levels and severely impacting individuals and businesses. Intervention is needed immediately, without delay. Home and business owners should be incentivised to install alternative energy producing sources such as gas and solar. Rebates for such initiatives should be pro aided so that more people can afford to alleviate the grid. Larger business reliant on higher levels of energy must be able and allowed to produce their own energy without restrictions. The grid is at the precipice of collapse if immediate action is not taken.	Ingrid	business owner
2022-07-08 13:35:23	Western Cape		Yes I do	Solar		Christoph er	business owner
2022-07-08 13:33:33	Western Cape		Yes I do	Solar	A combination of hydro, solar, wind and gas could help if implemented quickly without politics, corruption and red tape interfering.	Michael	business owner
2022-07-08 13:30:58	Gauteng		Yes I do	Solar	it is pathetic that after so many years of being held hostage by Eskom and their inefficiency in producing a constant flow of electricity at affordable rates, that we should continue down this road of collapse. The government should have stepped in years ago, procured alternative private power suppliers, and taken power away from Eskom. With our beautiful weather, we could easily harness solar power and so much of this country could have power, literally from nature! The country in it's state of disaster, load shedding, unemployment because of businesses unable to run, due to power cuts, all this needs to have an immediate solution because everyone in charge have had way too much time and money to let this country fail.	Pamela	business owner
2022-07-08 13:29:57	Gauteng		Yes I do	Solar		Joof	business owner
2022-07-08 13:28:35	Western Cape		Yes I do	Solar		Carl	business owner
2022-07-08 13:26:51	Mpumal anga		Yes I do	Solar	We cant wait for government any longer. We need a solution now. Drop the red tape and lets get going !!!! As per usual the private sector will fix governments mess	Mark	business owner
2022-07-08 13:25:12	Western Cape		Yes I do	Solar		Marius	business owner

2022-07-08 13:24:57	Gauteng		Yes I do	Solar	We should immediately deregulate the residential and commercial access to supply excess self generated power into the grid! This is for all power producers whether inside the licence framework or outside. The 100 MW maximum capacity for self generation should be increased to at 200MW or 500MW. Tariffs should be competitive and not be determined by Eskom but by Nersa directly at competitive market rates. BBBEE requirements for these generation plants should be dropped!	Dave	business owner
2022-07-08 13:21:12	Western Cape		Yes I do	Solar	A combination of solution types is probably the answer long term, as long as it is green (no car ships), for now go for solutions that can be up and running as quickly as possible. Deregulate as much as possible (keeping safety standards)	Anita	business owner
2022-07-08 13:14:24	KwaZulu-Natal		Yes I do	Solar	We have clear skies for a significant part of the year which helps solar. Solar does not pose a risk to bird life like windmills. Some eco friendly properties exist already for residential use so the lessons learnt with solar there can be applied to commercial properties.	Shivaskar	business owner
2022-07-08 13:13:38	Eastern Cape		Yes I do	Solar	THIS CIRCUS CALLED ESKOM CANNOT BE ALLOWED TO KEEP HOLDING THE SA CONSUMER TO RANSOM. ILLEGAL STRIKING WORKERS NEED TO BE FIRED, IRRESPECTIVE OF THE CONSEQUENCES. THE GOVERNMENT NEEDS TO STOP PUSSYFOOTING AROUND & HAVE THE GUTS TO START RUNNING THE COUNTRY PROPERLY & STOP SUCKING UP TO THE DANGEROUS POWER THAT THE TRADE UNIONS WIELD OVER THIS COUNTRY. DO WHAT THE LATE MARGARET THATCHER DID IN BRITAIN WITH THE TRADE UNIONS....BRITAIN HAS NEVER LOOKED BACK !!!	BRIAN	business owner
2022-07-08 13:12:21	Gauteng		Yes I do	Solar		Lynne	business owner
2022-07-08 13:12:07	Western Cape		Yes I do	Solar	A combination of wind and solar and later hydro would improve our economy ENORMOUSLY by helping to smooth out loadshedding and decrease our dependence on fossil fuel. Do it NOW as a matter of urgency	Sarah	business owner
2022-07-08 13:10:15	Western Cape		Yes I do	Solar	Solar is safe and not an eyesore and allows people to feed back into the grid. Have factories, malls, individuals all use solar on the roof structures with feedback. NO NUCLEAR, and nothing that can be made fragile because it is centralised and dependant on critical factors having to be present - easily broken as we see now. We need to build in resilience to the system.	Theresa	business owner
2022-07-08 13:06:10	Gauteng		Yes I do	Solar	Solar to assist. Many have installed solar and produce extra. This could be fed back into the grid	Michelle	business owner
2022-07-08 13:05:52	Western Cape		Yes I do	Solar	Sonkrag sal goed wees vir die omgewing maar soos alles Nou opgefok is sal enigiets werk, solank dit net vinnig gebeur	Manfred	business owner
2022-07-08 13:04:07	Gauteng		Yes I do	Solar	I think we have a very diverse weather system in SA and we can utilize so much of it to take the "strain and pressure" off Eskom. Renewable energy is the way...so many other Countries around the world have gotten it right...why can't we. We need to give the independent companies a chance. Just as we have dozens of Fibre service providers, we need power supply companies. Create a competitive market and not have this constant worry of power disruption (corruption)!	Farren	business owner
2022-07-08 13:03:23	Gauteng		Yes I do	Solar	It is impossible to keep a business running with load shedding. Apart from the disruption to our services, we are losing geysers and other motors with the constant on and off of the power. I cannot keep my staff hanging around doing nothing for the hours the power is off. I have to let them go now. Not good for the economy. Some thing cost effective has to be done to keep business going. Something that the Government is not tied to, where they cannot put their hands in the money pot .	Niki	business owner
2022-07-08 13:01:20	Gauteng		Yes I do	Solar	It's a no-brainer, we have to generate more electricity as soon as possible!	Adrian	business owner
2022-07-08 12:59:34	Gauteng		Yes I do	Solar	Private industry and mechanisms of capitalism ensure the lowest price and the best product is provided to the consumer. Internal inefficiencies, corruption etc do not bode well for a private company thats forced to be competitive. This is the easiest way to fix the energy issue.	Dominic	business owner
2022-07-08 12:58:38	Western Cape		Yes I do	Solar	Eskom needs to be unbundled and sold off to private enterprise to have an effective and efficient grid. It is clear that this Government cannot run any SOE's efficiently. Then we will see an increase of renewable energy suppliers with competition in the sector. This must be done now to attract any foreign investment. The private sector needs to manage the economy in SA, not the politicians. The politicians don't have the experience nor the knowledge. Let's save our Country and make the right decisions right now.	Lynne	business owner
2022-07-08 12:57:28	Gauteng		Yes I do	Solar	The government is at least 10 years behind in their thinking and hasn't acted on any of the recommendations by experts for what seems a lifetime. Now 'suddenly' we have a crisis. Only renewable resources are an option. Lift restrictions on generation IMMEDIATELY and force renewable energy into the grid over a 2 year period. There is no more mucking about anymore.	Marie	business owner
2022-07-08 12:57:14	Gauteng		Yes I do	Solar	Solar and wind farms are ideal, the australia solution also from individual households to feed back in the grid, but there could maybe be an option to purchase small nuclear power stations for localised power distribution.	Vincent	business owner
2022-07-08 12:56:26	KwaZulu-Natal		Yes I do	Solar	More environmentally sustainable systems required, such as solar, wind, hydro etc	Gregory	business owner

2022-07-08 12:56:05	Eastern Cape		Yes I do	Solar	The country is in a crisis and there is no time to run around the bush any longer. Renewable energy technology around the world has proven to be implemented very successfully. It is not a new invention, but rather a lot of red tape to get a solar PV system (SSEG) connected to the Grid and in the meantime, lots of bussiness and production hours are lost due to no direction from decisionmakers. Government should also think about subsidizing Commercial Businesses and Households to assist the national grid. Surely there should be ways to do that.	HEIN	business owner
2022-07-08 12:55:12	Western Cape		Yes I do	Solar		John	business owner
2022-07-08 12:53:50	Gauteng		Yes I do	Solar	Open up energy generation to the private sector and you'll solve load shedding in a heart beat. This will help a lot to calm the fears of foreign investors, will create jobs, and will help the economy to grow.	Alet	business owner
2022-07-08 12:53:14	Western Cape		Yes I do	Solar	It is clear that our country needs to invest in renewable energy, such as solar, etc. We are kept stuck into 'What Is', with out-dated reasoning. We need new outlooks on energy supply - 1) that stays ON, 2) uplift the community, especially the informal sector that has limited funds, 3) allow the economy/ country to create jobs, etc.	Leon	business owner
2022-07-08 12:52:48	Gauteng		Yes I do	Solar	There are so many options : First get rid of all the staff at Eskom & make it a private institution. I the ANC were not so corrupt in filling their own pockets we would never have had ANY LOADSHEDDING ! 1 They would have given all suppliers a share in buying electricity from the private sector - Wind electricity, Solar electricity, imported generation of electricity, maybe even a Nuclear plant would have been running 15 years ago. 2 Anything else would have been a solution BUT the ANC	Andries	business owner
2022-07-08 12:50:04	Gauteng		Yes I do	Solar	It is a shae that Mr Mantashe, supposedly a communist, is stopping the people from getting "free" power - from the sun, the wind, and geothermal sources! Rather - he seeks deals with the shady "Karpowership" from Turkey and other nonsense! Kickbacks anywhere? Let's get on with people's power - and start doing what elsewhere is already state-of-the-art: renewables!	Eberhard	business owner
2022-07-08 12:47:33	Eastern Cape		Yes I do	Solar		Errol	business owner
2022-07-08 12:45:47	Gauteng		Yes I do	Solar	There is no immediate solution to the energy crisis except to fire all the corrupt ones and replace them with qualified people and not cadre deployments. The ANC has made a hot mess of the parastatals! There are good wind sites too all over the country. And what about wave power? What money has been put into our universities for development of alternative energy solutions? Why isn't SA the leading country in solar electricity generation? We have the most sun just about of any country in the world. We have smart people here too. We just need the will and less brown envelopes in government!	Garrick	business owner
2022-07-08 12:45:40	Eastern Cape		Yes I do	Solar	Because it is a gift from God.	GERALDE NE	business owner
2022-07-08 12:44:23	Western Cape		Yes I do	Solar	Ons was nog altyd die land van sonskyn en heuning, gebruik dit weermee ons ryklik geseënd is.	Johan	business owner
2022-07-08 12:41:16	Western Cape		Yes I do	Solar	Time to switch to renewables but Eskom could even just start offering house holds a battery invert pack and this will solve the loadshedding issues by smoothing out the usage curve!	Mark	business owner
2022-07-08 12:37:15	Western Cape		Yes I do	Solar	Allow those households that are able to purchase solar power generation equipment to do so without being punitive, so as to assist to lighten the load on the existing power grid system. Secondly clamp down on non paying members Thirdly - outsource the management of Eskom power company to an independent entity, after this many attempts it is clear to everybody that corruption and incompetence are the primary reasons for the grid collapse, let's stop hiding the facts and reality, let's stop blaming the past for the problems that exist today. Simple - private generation and management of power resources is the only way forward if you can be honest. Avoid monopolies and corruption please - we are sinking faster by the day.	Ralf	business owner
2022-07-08 12:36:07	Free State		Yes I do	Solar	Solar power alone won't do it (in winter we only has 10.5 hours sunshine of which only about 9.5 hours can generate electricity). Must have a combination of green and other methods. What about green hydrogen gas (generated by solar), when solar alone don't meet demands ?	Gert	business owner
2022-07-08 12:33:30	Gauteng		Yes I do	Solar	Let's make it possible for everyone to provide solar - businesses, private homes, schools. University of Johannesburg has put solar panels on all their roofs. Makro has solar panels in their parking lots. The more people opt for solar and wind, the more the price will go down and make it accessible for more. We have the technology and the will - let's get it done!	Zoe	business owner
2022-07-08 12:33:26	Gauteng		Yes I do	Solar		Theresa	business owner
2022-07-08 12:29:58	Gauteng		Yes I do	Solar		CE	business owner
2022-07-08 12:25:06	Gauteng		Yes I do	Solar	Sun and wind are 'free' . We live in a country which has 95% fair weather. Lets cut the red tape and help this useless ANC run government improve the lives of all South Africans.	Neville	business owner
2022-07-08 12:24:14	KwaZulu- Natal		Yes I do	Solar	Eskom is never going to become stable enough to fulfill the power needs of SA ever. It is high time to write them off and put the people of SA first. What is left of economy is also being destroyed. Private intervention with competition is urgently required.	Suren	business owner

2022-07-08 12:23:53	Western Cape		Yes I do	Solar	Solar and wind in conjunction with battery storage.	Werner	business owner
2022-07-08 12:23:44	Gauteng		Yes I do	Solar		Schalk	business owner
2022-07-08 12:21:50	Western Cape		Yes I do	Solar	We need to diversify our electricity supply. Our economy cannot grow if we have all these load shedding. This means thousands of people are without a job. This perpetuates poverty. Less people with jobs also means less taxes. Less money for the government to fix our health care and other systems. I believe that we should use all power generating methods other than coal and nuclear. I am not totally against coal. Opening up the power sector will also create jobs. Current load shedding leads to crime. The irony is that our power network gets vandalized during load shedding. Load shedding leads to problems for businesses with their burglar alarms. Systems cannot stay switched on due to the many load shedding hours. Equipment gets damaged due to the switching on and off for load shedding.	Herman	business owner
2022-07-08 12:18:57	Limpopo		Yes I do	Solar	Solar, wind, gas and some nuclear - there was no space provided for multiple answers	Martin	business owner
2022-07-08 12:17:47	Gauteng		Yes I do	Solar	We can't continue as we are !	Andrew	business owner
2022-07-08 12:17:31	Gauteng		Yes I do	Solar	I think wind and hydro along with solar could be used. The main thing is to get rid of Mantashe and his RED tape	David	business owner
2022-07-08 12:16:34	Gauteng		Yes I do	Solar	Establishing a diverse range of IPP's would immediately decrease pressure on Eskom to maintain generating capacity. Solar and wind should be the two areas we should focus on.	Kimmi	business owner
2022-07-08 12:09:08	Gauteng		Yes I do	Solar	Rather than spending billions trying to fix ageing and failing power plants (along with fighting theft within Eskom itself), why not subsidise solar installations for households and fit each home with a two-way electricity meter which allows people to generate a portion of their own power, but also to feed electricity back onto the grid when they are generating excess. We have such abundant sunshine in our country, why not use it to our best advantage! The success of systems such as this has already been demonstrated in other countries.	Claire	business owner
2022-07-08 12:07:57	Western Cape		Yes I do	Solar	I believe that solar and wind should be the two areas we should immediately concentrate on.	Kevin	business owner
2022-07-08 12:05:06	Gauteng		Yes I do	Solar	Independent Power suppliers using any method as long as we can produce the electricity the country needs. These independent contractors must be allowed to proceed without the hurdles of government interference, BEE restrictions, Labour Unions and general interference by various municipal, provincial, government departments, handouts and all the red tape BS we have with everything we do in this now backwoods collapsing disaster that South Africa has become over the past years. Less Government More Progress	David	business owner
2022-07-08 12:04:55	Gauteng		Yes I do	Solar	Eskom and the government have clearly shown that they can't maintain keeping our power in and can't find a solution to the crisis we are experiencing. This has such a huge impact on our economy. Let the experts sort everything out, it's their job.	Sean	business owner
2022-07-08 12:04:39	Gauteng		Yes I do	Solar	Solar and wind power is semi-renewable. We should allow the private markets to compete and it will bring down electricity prices actually! (and reduce pressure on eskom)	e	business owner
2022-07-08 12:04:36	Gauteng		Yes I do	Solar	Solar and wind power is semi-renewable. We should allow the private markets to compete and it will bring down electricity prices actually! (and reduce pressure on eskom)	e	business owner
2022-07-08 12:03:26	Free State		Yes I do	Solar	Get the monopoly of our government out of the way, get measures in place against corrupt people showing up for privately supplying energy and let us live as civilized, righteous, truthful people again in this country!!! We are absolutely TIRED of and fed-up for all these lying, manipulating, corrupt despots ruling our country!	Lizette	business owner
2022-07-08 12:02:45	Western Cape		Yes I do	Solar	We have the sun as a wonderful resource. Whilst there are some areas that generate enough wind, sun is available throughout the country same with hydro, we need to think of whether this method is sustainable in times of drought. I believe a combination of solar, hydro, wind is more eco friendly however nuclear has proven to be more sustainable than old school coal and diesel generated power. Yes, solar is expensive but just like everything, supply and demand could bring costs down.	Joelene	business owner
2022-07-08 12:00:17	Western Cape		Yes I do	Solar		Leslie	business owner
2022-07-08 11:57:13	North West		Yes I do	Solar		Cynthia	business owner
2022-07-08 11:53:41	Gauteng		Yes I do	Solar		Cristina	business owner
2022-07-08 11:52:47	Gauteng		Yes I do	Solar		Christa	business owner
2022-07-08 11:50:44	Gauteng		Yes I do	Solar		Hayley	business owner
2022-07-08 11:50:36	Free State		Yes I do	Solar	I surely support the idea of generating electricity privately, for sure, BUT...measures should definitely be in place to bar and combat corruption!! There are way too many people with absolute evil motives who cannot be trusted at all!	Jan	business owner

2022-07-08 11:50:29	Free State		Yes I do	Solar	I surely support the idea of generating electricity privately, for sure, BUT...measures should definitely be in place to bar and combat corruption!! There are way too many people with absolute evil motives who cannot be trusted at all!	Jan	business owner
2022-07-08 11:48:49	Gauteng		Yes I do	Solar		WILLEM	business owner
2022-07-08 11:48:45	Western Cape		Yes I do	Solar	I do believe that we should not be held ransom by the government for a service that is essential. We have a right to receive an unbroken supply of electricity for which we are forced to pay dearly. I have been forced by government to supply electricity to a squatter who is not even paying for the commodity at all. But this same government that is forcing me to supply him with electricity free of charge.... is now itself not providing myself or the squatter with electricity by causing loadshedding for up to 6 or more hours per day - and without a reduction in fees and rentals!! I believe that private energy production should be allowed without any interference from government. Stop this unwanted and unfair control of basic needs of the population. Stop the red tape and open up the economy and allow other providers of electricity.	Gerda	business owner
2022-07-08 11:47:23	Western Cape		Yes I do	Solar	Eskom and Government need to be kept out of this way forward or they will make deals and give tenders to themselves!!!! Don't trust them at all!!!!	Norma	business owner
2022-07-08 11:47:03	Gauteng		Yes I do	Solar	SOUTH AFRICA IS ALWAYS SUNNY - VERY FEW CLOUDY DAYS. WE CAN MAKE USE OF THIS	C	business owner
2022-07-08 11:43:36	Western Cape		Yes I do	Solar		Jennifer	business owner
2022-07-08 11:40:32	Gauteng		Yes I do	Solar		Gavin	business owner
2022-07-08 11:38:44	Gauteng		Yes I do	Solar		Ulrico	business owner
2022-07-08 11:37:30	Free State		Yes I do	Solar	Just starting to subsidize solar geyser installation as the government used to would be a great start!	Helen	business owner
2022-07-08 11:37:15	Gauteng		Yes I do	Solar	Any renewables will do - Solar, Wind, Hydro - as long as we get rid indeed of the red tape!!! The sooner the better	Jean-Louis	business owner
2022-07-08 11:35:11	Gauteng		Yes I do	Solar	Let there be competition so that efficiencies are recognised and gained and the best offer/price takes the business. For once look after South Africa's pockets.	Brett	business owner
2022-07-08 11:33:08	KwaZulu-Natal		Yes I do	Solar		Nadine	business owner
2022-07-08 11:30:56	Western Cape		Yes I do	Solar	Not an easy and straight forward answer, but solar makes a lot of sense with our natural environment and trade partnerships that seem to be well developed compared with other alternatives. There are many viable options best considered by panel of subject experts with responsibility for final decision.	Cornelius	business owner
2022-07-08 11:30:42	Gauteng		Yes I do	Solar	There are so many corrupt thieves in Eskom! They must be stopped and prison sentences be handed down! Private companies need to be implemented so that there is competition between themselves so that citizens have the choice of who their provider will be. Including the choice of having solar panels and being off grid! All corrupt leaders and companies who have stolen from South Africans citizens through corruption, you will stand before God and you will answer to Him! Turn from you wicked ways before it is too late.	Angela	business owner
2022-07-08 11:28:54	Gauteng		Yes I do	Solar	We are a country of sunshine. If any private company can generate electricity, allow them immediately to supply to the country or local municipality	Petrus	business owner
2022-07-08 11:26:35	Gauteng		Yes I do	Solar	Focus should be renewable and solar is a gift from God we should use!	Francois	business owner
2022-07-08 11:23:36	Free State		Yes I do	Solar		Paul	business owner
2022-07-08 11:19:56	Gauteng		Yes I do	Solar	South Africa is blessed with lots of sunshine and with lots of solar solutions already in place to assist the immediate need/demand. This can be followed by wind solutions.	N	business owner
2022-07-08 11:19:55	Gauteng		Yes I do	Solar	Individual households can contribute by channeling excess into the grid.	Martie	business owner
2022-07-08 11:19:11	Western Cape		Yes I do	Solar	We urgently need to allow independent producers to help support the grid. We need to make use of renewable energy to support the environment and work against climate change, e.g. solar and wind. The energy crisis is killing our businesses and people are already impoverished after covid and our economy being in tatters. The time to act is now!	Winnie	business owner
2022-07-08 11:18:30	Western Cape		Yes I do	Solar		Gerrit	business owner
2022-07-08 11:18:09	Gauteng		Yes I do	Solar	Enough is enough load shedding, a.k.a rolling blackouts, are killing our economy. Right off the back of a pandemic, we need politics to step aside so we can allow our country to heal. We need to allow independent power producers to supply the grid as soon as possible, our economy and our country are desperate.	James	business owner
2022-07-08 11:16:28	KwaZulu-Natal		Yes I do	Solar	Renewable energy is the only answer. Cut the red tape, cut the limits on independent power producers. Tell the government to get out of the way - let the people fix the mess the useless government created! This is no way to live- the power cuts are destroying business, schooling, health facilities and most all leading to depression - everyone who is not a fatcat Government VIP feels the pain and helplessness...	Di	business owner
2022-07-08 11:14:30	Gauteng		Yes I do	Solar	Best, quickest and most cost effective solution is to embrace all independent power producers of all sizes into the grid.	Richard	business owner

2022-07-08 11:13:42	Western Cape		Yes I do	Solar	All red tape should be done away with immediately. Solar & Wind is the future. All private producers should be given unrestrained access to markets. Private homeowners should not be charged anything if they install energy-saving or energy-producing systems. Government has to fully support Eskom top management irt corruption, sabotage and Unions.	Bill	business owner
2022-07-08 11:12:29	Gauteng		Yes I do	Solar		Alan	business owner
2022-07-08 11:08:37	Eastern Cape		Yes I do	Solar	This is a no-brainer. Why on God's green Earth are we even voting about this? This is so typical of South Africa. We wait for all hell to break loose, and then we all jump around trying to find a solution, but before we fix anything we have to vote to decide if we should fit anything. WTF?!? Just fix it! How hard can it be? Primary school children can see what needs to be done, but for some unknown reason the people who can actually make a change seem all confused about the issue.	Warrick	business owner
2022-07-08 10:59:58	North West		Yes I do	Solar	Eskom must allow each town do build their own solar farms to reduce emissions and also windy areas should apply wind turbines. this will help the current grid problems and reduce load shedding.	Adriaan	business owner
2022-07-08 10:59:30	Western Cape		Yes I do	Solar	Power is a huge problem for most even more so for people like myself that work online. Since I started working for myself, the power just got worse, if it keep up like this I might end up moving to another country.	John	business owner
2022-07-08 10:57:27	Western Cape		Yes I do	Solar	The issue is what IPPs can provide at shortest notice. We can debate the most appropriate mix AFTER this dismal winter of discontent. Right now we need IPPs who can fill in while the broken power stations are being fixed.	Heather	business owner
2022-07-08 10:52:05	Gauteng		Yes I do	Solar	do whatever we can to keep the economy afloat. after the ANC looting of the billions during covid, and the restrictions and the wanton destruction of our hospitality, tourism and other industries by the govt following global pandemic measures that made NO sense in a poor country like ours. So many people died - and not from covid - as a result of diabolical governance. stop controlling us for profit and let us live now.	Bronwyn	business owner
2022-07-08 10:51:57	North West		Yes I do	Solar	Solar and Wind are inexhaustible resources and do not significantly alter the environment. Private Producers should also be allowed to feed their surplus to the grid.	Nuno	business owner
2022-07-08 10:51:32	Western Cape		Yes I do	Solar	Independent Power Producers for SA is the only way forward.	Anli	business owner
2022-07-08 10:49:35	Western Cape		Yes I do	Solar	The government needs to stop talking and urgently and seriously act on supplementing the power supply to the country, to reverse the downward spiral effect of failed power supply to this beautiful coutry of ours, South Africa. The easiest way is to harness the power from Independent Power Suppliers; prioritising renewable energy sources like Photovoltaic and Wind.	Lawrence	business owner
2022-07-08 10:48:22	Western Cape		Yes I do	Solar		Roxanne	business owner
2022-07-08 10:46:42	Western Cape		Yes I do	Solar	The government has proven themselves to date, that decisions are normally based on how they can benefit themselves, which normally amounts to things happening at the expense of ordinary working South Africans. Hence, a solution will only be forthcoming once entrepreneurs are allowed to get involved.	ANTON	business owner
2022-07-08 10:44:37	Western Cape		Yes I do	Solar	Most Independent Power Producers are using solar. These producers, who have a surplus should be allowed to sell this surplus to Eskom to alleviate the problems caused through loadshedding. This government is incapable of ending loadshedding through Eskom because our Police and related departments are incapable of arresting and charging the criminals responsible for the current situation .	John	business owner
2022-07-08 10:42:09	Eastern Cape		Yes I do	Solar	This country is being raped, extorted, torutured, DESTROYED by the greed and incompetence of an overstaffed, overpaid, NON-DELIVERY cabinet.	Octavia	business owner
2022-07-08 10:41:36	Gauteng		Yes I do	Solar	We need to move away from fossil fuels as a matter of urgency. Renewables are the only new sources of power that should be considered. Solar power is abundant and our climate affords us easy access to it, so it should be strongly considered along with other renewables provided by independent power producers. Keep this out of the hands of the cadres please, and allow the IPPs to provide the power as quickly and cheaply as possible. Don't hamstring them by insisting that all components must be made in South Africa. That wasn't insisted upon when building the e-Toll system, nor when we were buying the wrong train carriages from abroad - so please don't insist upon it now!!!	Letitia	business owner
2022-07-08 10:39:47	Limpopo		Yes I do	Solar	As the prices of renewables have decreased and continue to decrease, its time that ordinary South Africans and private companies can actively and cheaply produce and supply power to the grid. The technologies exist and are readily available. We no longer need to be tied down to an outdated electricity generation model. Every rooftop should be able to install solar and wind to contribute to the grid. The current and previous governments have been so drunk on absolute power that they have held south Africans at ransom for their failures to provide safe , cheap and reliable power. Businesses are closing and people are losing their jobs because small businesses cannot afford to lose sales because there is no power to operate! Cut the red tape and let the real Power Revolution begin. We owe it to all South Africans and future generations and our one and only Planet!	Christo	business owner

2022-07-08 10:39:46	KwaZulu-Natal	Yes I do	Solar	We need to immediately start implementing alternative energy including wind and solar power from independent suppliers. I also don't think Eskom and our government can be trusted with Nuclear power, and coal and gas is effecting the environment negatively. It's time for South Africa to stop trying to run a monopoly and to start doing what's best for the country and our people!	Brendon	business owner
2022-07-08 10:39:31	Limpopo	Yes I do	Solar	As the prices of renewables have decreased and continue to decrease, its time that ordinary South Africans and private companies can actively and cheaply produce and supply power to the grid. The technologies exist and are readily available. We no longer need to be tied down to an outdated electricity generation model. Every rooftop should be able to install solar and wind to contribute to the grid. The current and previous governments have been so drunk on absolute power that they have held south Africans at ransom for their failures to provide safe , cheap and reliable power. Businesses are closing and people are losing their jobs because small businesses cannot afford to lose sales because there is no power to operate! Cut the red tape and let the real Power Revolution begin. We owe it to all South Africans and future generations and our one and only Planet!	Christo	business owner
2022-07-08 10:38:50	Gauteng	Yes I do	Solar	We have adequate daylight hours to make this a viable and sustainable option and to provide sustainable, consistent electricity in both cities and rural areas.	Allison	business owner
2022-07-08 10:38:45	Western Cape	Yes I do	Solar	I absolutely support the immediate removal of red tape to authorise or holding back of IPP and I want to stop any rentseeking attempts from municipalities who want to stay in control of power supplies and wants us to pay BS tariffs such as for "availability charge". Do away with it !!! All this sordid business needs to 100% privatised. I consider it my basic right to go off grid at this stage. Our government has failed us at every turn- I owe them nothing and i refuse to be forced to continue on a linear trajectory of fossil fuels for future energy supplies. Gwede Mantasha should pack up and resign !	Susanne	business owner
2022-07-08 10:38:34	Western Cape	Yes I do	Solar	I absolutely support the immediate removal of red tape to authorise or holding back of IPP and I want to stop any rentseeking attempts from municipalities who want to stay in control of power supplies and wants us to pay BS tariffs such as for "availability charge". Do away with it !!! All this sordid business needs to 100% privatised. I consider it my basic right to go off grid at this stage. Our government has failed us at every turn- I owe them nothing and i refuse to be forced to continue on a linear trajectory of fossil fuels for future energy supplies. Gwede Mantasha should pack up and resign !	Susanne	business owner
2022-07-08 10:38:02	Gauteng	Yes I do	Solar	Scrap the red tape but ensure protection from bribery and corruption	John	business owner
2022-07-08 10:37:08	KwaZulu-Natal	Yes I do	Solar	Wind & solar from IPPs immediately then nuclear added for long term security. If present, convert coal-fired plants to use cheap natural gas from Mozambique and just offshore for the medium term while new nuclear power stations are set up.	Steffen	business owner
2022-07-08 10:36:46	Gauteng	Yes I do	Solar	Solar is one the cleanest options for power production. Solar plants can be built to serve individuals, businesses and communities. These must be grid tied systems so that any excess power can be distributed. larger scale IPP can service new areas and areas where new infrastructure is required. Society needs to get on top of crime. Any solar developments are vulnerable to theft and vandalism. The issue of crime cannot be understated. Eskom's main issue is the 400 billion that was stolen and to date not a single arrest, prosecution or a day spent in prison by anyone. Society can no longer keep paying, the economy is current losing more jobs due to the stage 6 BLACKOUTS. Companies cannot afford the fuel bills and lost business. There must be no more talk only action.	David	business owner
2022-07-08 10:35:20	Gauteng	Yes I do	Solar	Solar power is clean and available in plentiful supply. CSIR should relook at the Salt Water battery system for bulk power storage in order to develop a viable, clean and safe battery storage for large scale use.	Gerson	business owner
2022-07-08 10:34:50	North West	Yes I do	Solar	We have enough hours of sun light. We should use it.	Linda	business owner
2022-07-08 10:34:25	Eastern Cape	Yes I do	Solar		Peter	business owner
2022-07-08 10:26:40	Gauteng	Yes I do	Solar	South Africa is ideal for solar.let us benefit from the sun.	gerbrandt	business owner
2022-07-08 10:26:35	KwaZulu-Natal	Yes I do	Solar	The solution requires that no government or politically connected people should be involved. Apart from solar, wind and hydro could also be considered.	Donald	business owner
2022-07-08 10:26:35	KwaZulu-Natal	Yes I do	Solar	The solution requires that no government or politically connected people should be involved. Apart from solar, wind and hydro could also be considered.	Donald	business owner
2022-07-08 10:26:34	KwaZulu-Natal	Yes I do	Solar	The solution requires that no government or politically connected people should be involved. Apart from solar, wind and hydro could also be considered.	Donald	business owner
2022-07-08 10:26:34	KwaZulu-Natal	Yes I do	Solar	The solution requires that no government or politically connected people should be involved. Apart from solar, wind and hydro could also be considered.	Donald	business owner
2022-07-08 10:26:26	KwaZulu-Natal	Yes I do	Solar	The solution requires that no government or politically connected people should be involved. Apart from solar, wind and hydro could also be considered.	Donald	business owner
2022-07-08 10:26:25	KwaZulu-Natal	Yes I do	Solar	The solution requires that no government or politically connected people should be involved. Apart from solar, wind and hydro could also be considered.	Donald	business owner

2022-07-08 10:26:24	Gauteng	Yes I do	Solar	Open the grid up and take away this ridiculous 100MW limit. The ANC is solely responsible for this fuckup we find ourselves in. And as such they should do everything in their power to fix this. Not gain political power or show political authority. Your country has lost every shred of respect for you as a party and as a government. Now's the time to start fixing you have been fucking for the last 28 years.	Jan-Herman	business owner
2022-07-08 10:26:22	KwaZulu-Natal	Yes I do	Solar	The solution requires that no government or politically connected people should be involved. Apart from solar, wind and hydro could also be considered.	Donald	business owner
2022-07-08 10:26:22	KwaZulu-Natal	Yes I do	Solar	The solution requires that no government or politically connected people should be involved. Apart from solar, wind and hydro could also be considered.	Donald	business owner
2022-07-08 10:26:21	KwaZulu-Natal	Yes I do	Solar	The solution requires that no government or politically connected people should be involved. Apart from solar, wind and hydro could also be considered.	Donald	business owner
2022-07-08 10:26:18	KwaZulu-Natal	Yes I do	Solar	The solution requires that no government or politically connected people should be involved. Apart from solar, wind and hydro could also be considered.	Donald	business owner
2022-07-08 10:26:01	Western Cape	Yes I do	Solar		Michael	business owner
2022-07-08 10:25:41	Gauteng	Yes I do	Solar	Solar and other renewables are the way forward - we have the sun, wind and water. Deregulate and cut the red tape and let's please move forward and try and save our beautiful country.....	Mark	business owner
2022-07-08 10:25:03	Gauteng	Yes I do	Solar	In fact any renewable source as dictated by the area and best suited for that area. Furthermore, could nuclear be an option? Is the infrastructure still usable - Koeberg and Pelindaba. This could be a solution for immediate relief. Alternative electricity generation is definitely required to be implemented and is long overdue.	Tjaart	business owner
2022-07-08 10:23:13	KwaZulu-Natal	Yes I do	Solar		James	business owner
2022-07-08 10:22:11	Western Cape	Yes I do	Solar	I feel solar is a good source for additional power along with wind & Hydro and any other form of renewable energy that could be implemented on a relatively fast basis.	Stephen	business owner
2022-07-08 10:21:22	KwaZulu-Natal	Yes I do	Solar	The more we can privatise in this country the better. The govt has proven itself to be utterly corrupt and unable to deliver any services effectively. The sooner we hand over service delivery to the private sector, the better. It really is our only hope.	Carol	business owner
2022-07-08 10:19:47	Limpopo	Yes I do	Solar	We urgently need to radically increase the electricity generated from renewable sources and solar and wind are the most pertinent for our country. It is essential that this be addressed NOW.	Jon	business owner
2022-07-08 10:17:59	KwaZulu-Natal	Yes I do	Solar	It makes sense, South Africa is a sunshine country, solar is the solution to the immediate problem	Christa	business owner
2022-07-08 10:17:32	Western Cape	Yes I do	Solar	The harsh reality is that ESKOM is crippled after decades of ANC corruption, looting, mismanagement and disastrous cadre deployment. I cannot see how it will ever be able to regain the efficiency and dependability of the pre-ANC years. It is now time to invest in large scale private renewable wind and solar projects countrywide to generate the bulk of SA's energy needs, solve the load shedding/power cut problems that have further devastated a weak and failing economy, reduce emissions and set SA on a sustainable energy trajectory for the future.	Stephen	business owner
2022-07-08 10:15:06	KwaZulu-Natal	Yes I do	Solar	South Africa has a lot of sun, so I think Solar electricity production would suit SA's immediate electricity needs	GISELLE	business owner
2022-07-08 10:15:00	KwaZulu-Natal	Yes I do	Solar	South Africa has a lot of sun, so I think Solar electricity production would suit SA's immediate electricity needs	GISELLE	business owner
2022-07-08 10:14:21	North West	Yes I do	Solar		SMIT	business owner
2022-07-08 10:14:20	Western Cape	Yes I do	Solar	PV solar panels can be erected at scale very quickly. Apparently the Chinese built 32 GW of Pv/Solar in less than 2 years. RSA could manage a paltry 6 GW in 6 months.	Warren	business owner
2022-07-08 10:12:38	Western Cape	Yes I do	Solar	I would suggest wind and solar. Clean and a lot of free wind and sun in South Africa.	Adolf	business owner
2022-07-08 10:11:40	KwaZulu-Natal	Yes I do	Solar	Solar and wind power is ready. We have plenty sun and wind and it will create loads of new jobs, boost the economy, invite foreign (NOT CHINESE) investment and solve our energy shortage.	Guy	business owner
2022-07-08 10:10:28	Gauteng	Yes I do	Solar		Lesley	business owner
2022-07-08 10:09:18	Western Cape	Yes I do	Solar	I think this is a no-brainer. We need power now. Our economy is failing and people are suffering. I am so sick and tired of incompetent officials who don't do their jobs and drown everything in red tape - this is not an unsubstantiated accusation. Just look at the mess everything is in - the rolling blackouts, the looting the complete disregard for law and order. Everything is falling to pieces, and still not a single corrupt official has been sentenced to jail, or even charged. I am sad and angry and tired, completely disheartened and overwhelmed by the government's failure to even provide basic services.	Winnie	business owner
2022-07-08 10:08:54	Western Cape	Yes I do	Solar	At this time ANY method of electricity production should be advised and supported. It is the only way.... looking ahead.	Paul	business owner
2022-07-08 10:08:20	Western Cape	Yes I do	Solar	We need Solar and Wind added to our mix as soon as possible and we need Independent Power Producers allowed to produce as much as they can and freely distribute to our power grid. The government desperately needs all the help it can get to supply enough power to our country.	DENISE	business owner

2022-07-08 09:59:43	Western Cape		Yes I do	Solar	I think this is a no-brainer. We need power now. Our economy is failing and people are suffering. I am so sick and tired of incompetent officials who don't do their jobs and drown everything in redtape- this is not an unsubstantiated accusation. Just look at the mess everything is in - the rolling blackouts, the looting the complete disregard for law and order. Everything is falling to pieces, and still not a single corrupt official has been sentenced to jail, or even charged. I am sad and angry and tired, completely disheartened and overwhelmed by the governments failure to even provide basic services.	Winnie	business owner
2022-07-08 09:53:02	Gauteng		Yes I do	Solar		Henry	business owner
2022-07-08 09:52:53	Gauteng		Yes I do	Solar	Any independent energy source should be utilized to recover from this situation and should be maintained in the future, as supporting one single supplier of energy is short sighted.	Gabriele	business owner
2022-07-08 09:52:32	Gauteng		Yes I do	Solar		Henry	business owner
2022-07-08 09:52:21	Gauteng		Yes I do	Solar	If the red tape were removed, EIA's fast tracked and wheeling arrangements made quick and transparent, solar capacity could be quickly increased by an order of magnitude.	Barry	business owner
2022-07-08 09:50:55	Western Cape		Yes I do	Solar	Government should allow IPP's to sell electricity. Besides solar, there's also wind energy which has been successfully implemented in other nations.	Andre	business owner
2022-07-08 09:49:00	Gauteng		Yes I do	Solar		Peter	business owner
2022-07-08 09:48:21	Western Cape		Yes I do	Solar		Pieter	business owner
2022-07-08 09:44:34	Gauteng		Yes I do	Solar	The need to ask this question is preposterous. Has the Government not proved beyond any doubt that they cant handle this situation. It must immediately go private. Private is the only process that still works in SA. Please just look at - Municipalities, Power, Water, Fire stations, SAA, Post office,,,,,,and the list goes on . How long will you still waste !?	JJ	business owner
2022-07-08 09:41:58	Gauteng		Yes I do	Solar	South Africa is very well suited for solar energy, blessed with both space and sunlight. Storage may be a concern but firstly storage is only necessary for a few hours (peak between 6pm and 9pm and 6am and 8am). People and companies can and will adapt to having less electricity available at night so the need for baseload capacity to match solar generation is overblown. Other countries around the world are moving more and more to solar, and South Africa is far behind despite our natural advantage. Our electricity sector urgently needs to be opened up to competition. The only arguable natural monopoly could be for transmission given the large distances in South Africa, but there is no benefit to South Africa as a whole to have generation captured by a monopoly, as is evidenced by the dire state of electricity generation. Opening up electricity generation to the private sector (and honestly all parts of it should be considered, even transmission may be viable) would solve a number of issues: 1) South Africa wouldn't be held hostage to unions 2) Private investment would undoubtedly come in 3) Although corruption will still happen, a competitive environment reduces the margins available for corruption (and corruption aims to reduce competitiveness so increasing competition is a good counter to corruption) 4) Having many smaller players allows those who can't perform to fail without endangering the country as a whole (so there's no too big to fail scenario) 5) Having many smaller players also encourages innovation 6) The possibilities of green hydrogen supply to Europe given the Russian war could be a huge boost to the South African economy	Martin	business owner
2022-07-08 09:39:08	Gauteng		Yes I do	Solar	Yes, Privatization is our only hope. Let the people choose whom to pay for their services and be guarenteed power that's all we want	Darren	business owner
2022-07-08 09:39:07	Gauteng		Yes I do	Solar	Yes, Privatization is our only hope. Let the people choose whom to pay for their services and be guarenteed power that's all we want	Darren	business owner
2022-07-08 09:38:58	Gauteng		Yes I do	Solar		Trevor	business owner
2022-07-08 09:38:52	Gauteng		Yes I do	Solar	Yes, Privatization is our only hope. Let the people choose whom to pay for their services and be guarenteed power that's all we want	Darren	business owner
2022-07-08 09:38:51	Gauteng		Yes I do	Solar	Yes, Privatization is our only hope. Let the people choose whom to pay for their services and be guarenteed power that's all we want	Darren	business owner
2022-07-08 09:38:50	Gauteng		Yes I do	Solar	Yes, Privatization is our only hope. Let the people choose whom to pay for their services and be guarenteed power that's all we want	Darren	business owner
2022-07-08 09:38:50	Gauteng		Yes I do	Solar	Yes, Privatization is our only hope. Let the people choose whom to pay for their services and be guarenteed power that's all we want	Darren	business owner
2022-07-08 09:37:51	Western Cape		Yes I do	Solar	The economy is failing as a result of a lot of things and getting independant powersuppliers as soon as possible will help reducing the downward spiral. BUT...what if the corruptionlevel is so firmly embedded in SA's economy that the independant powersuppliers helps to sabotage current supply so that they can be established as the only suppliers of power?	k	business owner
2022-07-08 09:37:40	Western Cape		Yes I do	Solar	The economy is failing as a result of a lot of things and getting independant powersuppliers as soon as possible will help reducing the downward spiral. BUT...what if the corruptionlevel is so firmly embedded in SA's economy that the independant powersuppliers helps to sabotage current supply so that they can be established as the only suppliers of power?	k	business owner

2022-07-08 09:35:19	Gauteng		Yes I do	Solar	Something needs to be done sooner rather than later as our country slips inevitably into a dark and powerless future where business have to close and families go hungry in the cold.	Shane	business owner
2022-07-08 09:34:20	Gauteng		Yes I do	Solar	Something needs to be done sooner rather than later as our country slips inevitably into a dark and powerless future where business have to close and families go hungry in the cold.	Shane	business owner
2022-07-08 09:33:20	Gauteng		Yes I do	Solar	We should not be dependent on Eskom for our electricity supply. Over the years they have proved to be incapable of producing a constant supply of electricity due to various factors ranging from corruption, theft, and incompetency. This has cost our economy billions of Rand and is effectively destroying our country. We can do better by allowing independent suppliers to supply the nation with sun and/or wind-generated energy.	Henk	business owner
2022-07-08 09:32:16	Western Cape		Yes I do	Solar		mark	business owner
2022-07-08 09:31:54	KwaZulu-Natal		Yes I do	Solar		Wayne	business owner
2022-07-08 09:31:53	Western Cape		Yes I do	Solar	I fully support Independent Power Producers to be allowed to immediately supply South Africa with electricity?	Renette	business owner
2022-07-08 09:29:13	Gauteng		Yes I do	Solar	End the greed and corruption, and stop polluting the planet!	Jani	business owner
2022-07-08 09:25:15	KwaZulu-Natal		Yes I do	Solar	Independent Power Producing is already successfully applied in many countries including the USA and prevents a monopoly and corruption. This will be the ultimate solution to South Africa's electricity problem	Marina	business owner
2022-07-08 09:24:32	KwaZulu-Natal		Yes I do	Solar		Craig	business owner
2022-07-08 09:22:06	Gauteng		Yes I do	Solar	The clear and declining trend in the energy availability factor to 56% currently means that we have to leapfrog into new energy provision. This should be primarily from renewables but also needs to include an increased nuclear baseload . All red tape and Nersa restrictions need to be temporarily suspended until we get our energy provision increased.	Vinay	business owner
2022-07-08 09:22:03	Western Cape		Yes I do	Solar	Solar, wind, - anything that can produce power in the shortest time.	Mark	business owner
2022-07-08 09:21:46	Gauteng		Yes I do	Solar	Why wait. The need for increased electricity production is understood and urgent. IPPs must be encouraged to participate with the proviso that the rules are adhered to	Rob	business owner
2022-07-08 09:21:37	Western Cape		Yes I do	Solar	We as South African citizens have the right to electricity and therefore we have the right to demand that independent power should be given immediate priority without the need for red tape! South Africa has an unending access to free resources of electrical supply from the sun , water and wind none of which cause any affect to nature! Eskom has failed us miserably and has clearly collapsed, we are again being held ransom by the government and not being given affordable continuous power supply to all. I know for a fact that the fat cats in government are not affected by the load shedding one iota, the employees of Eskom are milking the system yet again with inflated salaries and ridiculous perks, openly admitted! The continuous load shedding is further affecting an already depleted economy bringing it further to its knees, how much more does this moronic useless government want to strip from us. It is time for drastic change and we demand electricity, power!	Helen	business owner
2022-07-08 09:20:25	Eastern Cape		Yes I do	Solar		Shaun	business owner
2022-07-08 09:20:24	Gauteng		Yes I do	Solar	Solar & Wind generation is the way to go. Probably could get it up & running much sooner than any other. With regard to ESKOM , My view is that we have sufficient capacity for the country, but the CEO is hampered by local power station management. Probably a third force controlling these power stations that are deliberately sabotaging operational efficiency	Pungienat han	business owner
2022-07-08 09:19:09	Gauteng		Yes I do	Solar	Power outages is causing people to loose their jobs. ANC needs to let go and allow the brilliant minds of this country to help fix their failures.	Wally	business owner
2022-07-08 09:18:13	Western Cape		Yes I do	Solar	The government MUST forego it's own interests in Eskom and allow independent power providers to solve the crisis and prevent even further devastation of our economy!!! We can do it!!!	Linda	business owner
2022-07-08 09:18:08	Gauteng		Yes I do	Solar		Nicky	business owner
2022-07-08 09:17:35	Western Cape		Yes I do	Solar		Rachelle	business owner
2022-07-08 09:17:32	Gauteng		Yes I do	Solar	Please move with the times - we need solar and fast. People are dying.	Arnold	business owner
2022-07-08 09:17:18	Western Cape		Yes I do	Solar	So many years of potential Green Energy Production have been wasted already. It's time to let non-Government providers clear-up back-logs.	Gayo	business owner
2022-07-08 09:16:58	Western Cape		Yes I do	Solar	I fully support Independent Power Producers to be allowed to immediately supply South Africa with electricity?	Douglas	business owner
2022-07-08 09:14:55	Gauteng		Yes I do	Solar	At this stage of the issue , we should be moving away from coal due to climate change - so all the work that has been done is useless. Power stations are out dated let alone repairs .We in SA have the best climate for wind, water and solar . Coal will be depleted soon , causing inviromental issues .	anthony	business owner
2022-07-08 09:14:17	Western Cape		Yes I do	Solar		Deon	business owner

2022-07-08 09:13:55	Gauteng		Yes I do	Solar	Using natural resources will have an positive effect on our country. Help with pollution control. Keep our countries land and beauty intact. Is an clean continuous and does not require regeneration. Wind power can be used in combination with solar. This will provide clean power.	Allan	business owner
2022-07-08 09:13:31	Gauteng		Yes I do	Solar	We are off the grid and using solar. Not only is it reliable and in long term more cost-effective, it allows us to manage and be responsible for our own energy needs. I am looking at those around us that are dependent on ESCOM and see the impact that it has on the economy, security and quality of life. It is not on!	Petro	business owner
2022-07-08 09:11:55	Gauteng		Yes I do	Solar	We need to immediately break the strangle hold that an incapable Eskom has on the country and also being to ransom by their unions. They are driving this country into a failed economy	mike	business owner
2022-07-08 09:10:17	Western Cape		Yes I do	Solar	Wind as well and emergency diesel.	Francois	business owner
2022-07-08 09:08:13	Western Cape		Yes I do	Solar		Pierre	business owner
2022-07-08 09:07:34	Western Cape		Yes I do	Solar		RICHARD	business owner
2022-07-08 09:07:11	Western Cape		Yes I do	Solar		RICHARD	business owner
2022-07-08 09:02:04	Western Cape		Yes I do	Solar	South Africa is a pivotal country in the world economy to not only electrify RSA with solar & hydro but also to be able to export/sell clean fuels worldwide. We have the technology & skills to do it but the IPPs MUST be allowed to do it!! Anything else is sheer stupidity.	Clare	business owner
2022-07-08 08:59:14	Gauteng		Yes I do	Solar	Government need to take this seriously and help eskom to solve this problem! Fiddling where Rome is burning!!	Trevor	business owner
2022-07-08 08:49:19	Western Cape		Yes I do	Solar	Eskom is totally captured by the cadres. Lets try and live our best life without their interference and corruption!!!	Deirdre	business owner
2022-07-08 08:48:34	Gauteng		Yes I do	Solar	Solar/gas/wind, quick to build and get on the grid. Nuclear for long term energy security IF corrupt officials can be kept out of the whole process (impossible with the current ruling party)	Quintus	business owner
2022-07-08 08:46:52	Gauteng		Yes I do	Solar		Carien	business owner
2022-07-08 08:46:50	Western Cape		Yes I do	Solar	Everyone should be able to supply (solar) electricity into the grid! Not only big corporation, but every household!	Jantie	business owner
2022-07-08 08:45:08	Western Cape		Yes I do	Solar	I run a manufacturing company with 200 employees, the current business situation is not survivable as we need sufficient productivity ,the only way to protect these employees and their families livelihoods is with reliable power for business NOW.	Mark	business owner
2022-07-08 08:44:48	Western Cape		Yes I do	Solar	I run a manufacturing company with 200 employees, the current business situation is not survivable as we need sufficient productivity ,the only way to protect these employees and their families livelihoods is with reliable power for business NOW.	Mark	business owner
2022-07-08 08:40:07	Gauteng		Yes I do	Solar	South Africa's energy crisis has been developing over more than 20 years, and the current mess that we are in requires innovative and collaborative solutions. For many reasons, ESKOM is not able to turn itself around within the timeframes that the country needs, and therefore government cannot be allowed to continue to ignore other viable options by limiting policy options. A key options is to fast-track independent power producers either to alleviate demand by producing for their own requirements or, even better, to contribute to supply for the country's needs. Independent power producers should use methods of electricity production that are, as far as possible, environmentally friendly, including solar and wind. But other methods should be encouraged if these can be deployed more quickly than pure environmentally friendly.	Marc	business owner
2022-07-08 08:36:42	KwaZulu- Natal		Yes I do	Solar	We have lots of sunshine which is free. We need a solution to loadshedding it is killing the economy and investment in south africa	Anton	business owner
2022-07-08 08:36:24	Gauteng		Yes I do	Solar		Carl	business owner
2022-07-08 08:36:24	Gauteng		Yes I do	Solar		Carl	business owner
2022-07-08 08:36:24	Gauteng		Yes I do	Solar		Carl	business owner
2022-07-08 08:34:29	Gauteng		Yes I do	Solar		Carl	business owner
2022-07-08 08:28:12	KwaZulu- Natal		Yes I do	Solar	Open the market for independent contractors. Electricity is necessary for economic development but it is not a basic human right like water and food. Contractors should be allowed to offer a service and be compensated in a free market.	Christien	business owner
2022-07-08 08:28:01	KwaZulu- Natal		Yes I do	Solar	Open the market for independent contractors. Electricity is necessary for economic development but it is not a basic human right like water and food. Contractors should be allowed to offer a service and be compensated in a free market.	Christien	business owner
2022-07-08 08:26:55	Western Cape		Yes I do	Solar		Alexandra	business owner
2022-07-08 08:24:41	Western Cape		Yes I do	Solar	We have many experts and normal citizen's that can assist, why does the government want to keep it all to themselves. Let the people live !	Adolf	business owner
2022-07-08 08:16:11	North West		Yes I do	Solar		Martin	business owner
2022-07-08 08:15:12	North West		Yes I do	Solar		Martin	business owner

2022-07-08 08:13:35	Gauteng		Yes I do	Solar	Despite the ANC's party beliefs, we do live in a democracy with a democratic constitution. Only through competitive independent power suppliers will we a.) increase power capacity to offset Eskom's long-term shambles so that people can live, business can operate and the economy can flow, and b.) competition will ensure that this is done at affordable prices.	Jacqueline	business owner
2022-07-08 08:13:03	Gauteng		Yes I do	Solar	There are various ways to produce power. Every municipality can do it for its own residents. We are paying for other people's power and what we actually need to pay. Solar, Wind, and hydro are cheaper. If the municipality gets rid of the major and uses the committee they got enough monies to do the switch.	Willie	business owner
2022-07-08 08:11:31	Gauteng		Yes I do	Solar	The Electricity crisis is damaging to everyone. I have already lost some computer equipment and have had to close my consultancy business. I have a generator, but the cost of running that is crippling. It is said that this crisis is costing South Africa over R4 billion per day. This is ludicrous. Something has to be done. I believe that South Africa has plenty of sun, so solar should be one of our solutions. In addition, there are part of South Africa where wind farms would make a difference. These should be run by independent producers and NOT government, who has proved they cannot run anything correctly. Eskom will only start coming right if they have competition. Private energy producers must be allowed. In addition, those who provide or produce their own energy should be allowed to sell their excess energy back to the grid as is done in many other first world countries. The Eskom and Government monopoly MUST END NOW!	Deryn	business owner
2022-07-08 08:08:05	KwaZulu-Natal		Yes I do	Solar	Years ago the private sector was ready to assist with renewable energy and Eskom made it illegal to plough clean energy into the grid that was a lot more stable than its own energy production. This being both wind and solar generated electricity. This is long overdue.	Shaun	business owner
2022-07-08 08:04:09	Gauteng		Yes I do	Solar	Why not look at any way that electricity can be pushed back into the grid to stop any load shedding, even if it is from private homes or businesses that have additional power, and give them a credit for the power provided. It is not that difficult. Stop being so self-centred and only looking after what you can get out of it - the country is in a crisis. Get over yourself and actually do what the people voted you in to do - to serve them not yourself.	Tobie	business owner
2022-07-08 07:44:41	Western Cape		Yes I do	Solar	Any renewable that can quickly add capacity on existing (Eskom owned) land, so it can be easily connected to the existing infrastructure. Any options for buying electricity in the short term must be considered. Building for the future must commence ASAP- expand nuclear capacity. A lot of studies have already been completed on available sites - now is the te to act for the future.	Esther	business owner
2022-07-08 07:43:08	Western Cape		Yes I do	Solar	All forms of alternative energy production must be allowed and innovation encouraged, especially iro storage. This is decades overdue. I brought in environmentally sound waste-to-energy technology from Germany years ago and was driven to closure after 5 years by the red tape and the corruption (requests for "facilitation fees"). I lost almost everything as a consequence and had to start all over again at the age of 50. All because I thought this government would want to solve a problem for the country. But I learned how crooked the incumbents and their cronies are. So now their greed has driven them to desperate measures. And the desperate measures are what would have been pragmatic ones 15 years ago.	Jan	business owner
2022-07-08 07:42:40	Western Cape		Yes I do	Solar	All forms of alternative energy production must be allowed and innovation encouraged, especially iro storage. This is decades overdue. 2022-07-08 07:42:14	Western Cape		Yes I do	Solar	Our country is in an economic crises - the biggest threat now is the inconsistent power supply that causes business to lose working ours. The losses are many millions (if not more). Government has failed miserably in keeping ESCOM maintained. They do not deserve to have a monopoly in power supplies. The time for private companies to join the main electricity network is now. Scrap the red tape and allow SA to prosper!	Johan	business owner
2022-07-08 07:41:55	Western Cape		Yes I do	Solar		David	business owner
2022-07-08 07:33:56	Western Cape		Yes I do	Solar	The time has come to realise that fossil-fueled energy is not only something that should be phased out, but it is also a resource that is largely imported and is exposing SA to economic ruin on the international money market. Local solar and wind belongs to SA.	Jonathan	business owner
2022-07-08 07:33:13	KwaZulu- Natal		Yes I do	Solar		Nadine	business owner
2022-07-08 07:32:57	KwaZulu- Natal		Yes I do	Solar	Solar is already workign, and panels are becoming more efficient. Almost every house could use this, adn many businesses. Wind can be used too. Gas has been shown to be too expensive and bad for climate.	Brian	business owner
2022-07-08 07:19:12	Gauteng		Yes I do	Solar	South Africa is a country of sunlight and we would be able to produce a large amount of electricity.	Jennifer	business owner
2022-07-08 07:17:36	Western Cape		Yes I do	Solar	We need IPP's to get access to the grid immediately.	Amelia	business owner
2022-07-08 07:17:32	Western Cape		Yes I do	Solar	We need IPP's to get access to the grid immediately.	Amelia	business owner
2022-07-08 07:13:37	Gauteng		Yes I do	Solar		Hertzog	business owner
2022-07-08 07:12:09	Gauteng		Yes I do	Solar		Hertzog	business owner
2022-07-08 07:10:39	Gauteng		Yes I do	Solar		Hertzog	business owner
2022-07-08 07:08:11	Gauteng		Yes I do	Solar	We have enough solar and wind, these two have low skill requirement and are very green. If dry arid land such as what is the north western part of the country is used, I belief the environmental impact is also low.	Christo	business owner
2022-07-08 07:08:11	Gauteng		Yes I do	Solar	We have enough solar and wind, these two have low skill requirement and are very green. If dry arid land such as what is the north western part of the country is used, I belief the environmental impact is also low.	Christo	business owner
2022-07-08 07:07:41	Western Cape		Yes I do	Solar	Immediately incentivise and remove obstacles (legislative and financial) to homeowners to sell excess production back to the grid. Immediately allow independent power producers to install and sell solar, wind, tidal, hydro power to municipalities etc. deregulate the sector. The government still earns taxes, and the country gets power. Thousands of new jobs created. Win-win.	Colin	business owner
2022-07-08 07:01:27	Western Cape		Yes I do	Solar	I selected solar (and wind), but that would not present an "immediate" solution, i.e. 24 months plus. What needs to be done immediately, is a (ruthless, if necessary) clampdown on sabotage by coal suppliers and crooks inside the ESKOM establishment: immediately establish task forces to root these out. Kick out workers and instigators of strikes. Replace incompetent personnel. Those will result in short term improvements. Changes to other methods of electricity production represent medium to long term solutions. We need (very) short term improvements.	GN	business owner
2022-07-08 07:01:25	Gauteng		Yes I do	Solar	Rob I honestly do not know enough about the topic on such a large scale, however my thoughts would be wind and Solar. Our country has such a blessed position in the southern hemisphere that we can utilize 60% of buildings for solar. Rent space from independent home owners and install solar to push back into the grid etc. The dry areas like the kalahari is ideal for these farms aswell and the cape province with its windy climate. In my independent opinion this would be the safest option with our negligent government, that struggle with maintenance, corruption and policy. Nuclear is fantastic but I feel that the risk far outways the reward. Look at how they disposed of the pelindaba waste outside PTA and Hartebeespoort. Not sustainable at all.	Wesley	business owner

2022-07-08 07:01:03	Western Cape	Yes I do	Solar	<p>I selected solar (and wind), but that would not present an "immediate" solution, i.e. 24 months plus. 2022-07-08 06:55:51	Mpumalanga	Yes I do	Solar	All of the above if managed properly.	Terence	business owner
2022-07-08 06:55:36	Mpumalanga	Yes I do	Solar	All of the above if managed properly.	Terence	business owner
2022-07-08 06:55:02	Free State	Yes I do	Solar		Clifford	business owner
2022-07-08 06:52:11	Gauteng	Yes I do	Solar	Solar is nou die maklikste om te implementeer. Haal alle red tape uit die stelsel en laat ons krag in die stelsel terug druk so gou as moontlik teen 'n billike prys.	Rufan	business owner
2022-07-08 06:51:21	Gauteng	Yes I do	Solar	We can sort ourselves out, we don't need this government of ours.	Veronique	business owner
2022-07-08 06:50:15	Gauteng	Yes I do	Solar	We are being left behind! We are now certainly a 3rd world country!	Shayne	business owner
2022-07-08 06:49:34	Western Cape	Yes I do	Solar	Solar and wind farms are proven technology around the world and can be quickly setup. Just keep BEE and politicians out of it!	Mason	business owner
2022-07-08 06:48:24	Western Cape	Yes I do	Solar	Not sure what the best approach is but it should be renewable energy and it should be privatized.	tamsin	business owner
2022-07-08 06:48:16	Northern Cape	Yes I do	Solar	The majority of electricity to come from solar. The night-time electricity from hydro, batteries and nuclear.	Guilliam	business owner
2022-07-08 06:47:58	KwaZulu-Natal	Yes I do	Solar	We can have an independent power supplier who will manage the enterprise correctly and have no need for load shedding and make electricity affordable.	Shane	business owner
2022-07-08 06:47:50	Mpumalanga	Yes I do	Solar	Unscrupulous thieving has permeated throughout the society, from top down. A failed state is the consequence and unfortunately nothing other than force can stop the decline. Ones actions are very limited with the limited affordable means at your disposal. The end is now close.	Gene	business owner
2022-07-08 06:47:18	Gauteng	Yes I do	Solar		Dimitri	business owner
2022-07-08 06:47:10	Western Cape	Yes I do	Solar	Solar and wind will be environmentally friendly. The technology already exists and RSA has no lack of sunshine and wind. Large areas of the Northern Cape are empty and could be utilize for solar panels and windturbines. It is quite affordable land and the sun shines most of the year as it is semi-dessert.	Marna	business owner
2022-07-08 06:47:00	North West	Yes I do	Solar	We need a solution asap. Short term independent power producers and long term sustainable solutions like solar, hydro and Nuclear.	Jean	business owner
2022-07-08 06:45:23	Gauteng	Yes I do	Solar		Eugene	business owner
2022-07-08 06:45:10	Gauteng	Yes I do	Solar	<p>Solar energy is the most viable source of renewable energy available to South Africa right now, and the barrier to entry is not as high as it is with hydroelectricity and some other green energy sources.</p> <p>It can be implemented on a large scale across the country, at a comparatively low cost and provide enough power to support our current population and more.</p> <p>Wind energy may also be effective, but more difficult to implement and maintain especially with regards to vandalism and theft.</p>	Megan	business owner

2022-07-08 06:44:56	Western Cape	Yes I do	Solar	Solar and wind are the quickest to build and commission. Solar farms have little to no environmental impact so no need for long EIA processes. Low technical risk - Easy to finance. If Government regulations were minimized these facilities could be in operation very quickly.	David	business owner
2022-07-08 06:44:46	KwaZulu- Natal	Yes I do	Solar	It's a no brainer what has taken so long, typical government inertia.	Greg	business owner
2022-07-08 06:43:55	KwaZulu- Natal	Yes I do	Solar	Any were , as long as it's out of government (ANC incompetent and corrupt hands) Solar , hydro etc - anything natural BUT must not be privatized back into the hands of the ANC cadre	Nigel	business owner
2022-07-08 06:41:00	Gauteng	Yes I do	Solar	You work with the sun, but the other thing you need thing to work with. It is better to have your own power as working with Eskom power wat give power after load shared. I think the solar must be install in every house and business on the budget if Eskom, because we lose food en milk because of load sharing when I don't talk about the salary people must get to paid for the power but it is off every time. It time what Eskom start to give back to the people of south Africa only.	Herco	business owner
2022-07-08 06:40:59	Mpumal anga	Yes I do	Solar	Bottom line, Eskom is not able to adequately provide electricity to the country. There are many alternatives available, solar is a good option.	Annelien	business owner
2022-07-08 06:40:58	Gauteng	Yes I do	Solar	You work with the sun, but the other thing you need thing to work with. It is better to have your own power as working with Eskom power wat give power after load shared. I think the solar must be install in every house and business on the budget if Eskom, because we lose food en milk because of load sharing when I don't talk about the salary people must get to paid for the power but it is off every time. It time what Eskom start to give back to the people of south Africa only.	Herco	business owner
2022-07-08 06:40:55	Eastern Cape	Yes I do	Solar		WB	business owner
2022-07-08 06:39:38	Gauteng	Yes I do	Solar	The sun is free, the wind is free. Therefore there are no kickbacks on supply for officials but the benefit to SA as a whole would be infinite.	Heidi	business owner
2022-07-08 06:39:10	Western Cape	Yes I do	Solar	I wish one of the options was "all and or any" we need to grasp any straw available and address the power issue proactively	Lisa	business owner
2022-07-08 06:34:06	Gauteng	Yes I do	Solar	Allow private solar systems to feed back into the grid and buy 1kw at the same rate eskoms sells it to us.	Byron	business owner
2022-07-08 06:32:07	Western Cape	Yes I do	Solar	It is obvious that the country needs more power to keep the wheels turning. Solar is the solution and it can't be stolen by the anc. Eskom needs competition to challenge their monopoly and bring prices down. So many people could sell back power into the grid immediately. It's a no brainier- except maybe for the anc cronies.	Gary	business owner
2022-07-08 06:31:45	Northern Cape	Yes I do	Solar	Loadshedding is causing business not to make our income and employees, how to pay them then? Why is neighbour countries being supplied with electricity and how are they getting it cheaper? SA should help every one then in order to get cheaper solar power systems. Now crime is getting worse, when power is off and SA is cutting our means of making a living.	Marlise	business owner
2022-07-08 06:31:06	Gauteng	Yes I do	Solar	Solar Power is "Free", always available and reliable. Yes, the cost of implementation would be high, but the reliability is there. Batteries and their designs are improving every day, reliability is improving as technology improves. Solar panels in the same vein are improving in quality, reliability and technology.	Andrew	business owner
2022-07-08 06:26:06	Western Cape	Yes I do	Solar	With South Africa's sun hours, solar should contribute and can easily be combined with other types, like natural gas.	Ernst	business owner
2022-07-08 06:25:36	Gauteng	Yes I do	Solar		Ezanne	business owner
2022-07-08 06:24:44	Gauteng	Yes I do	Solar	Government is utterly useless to manage any SOE! How many must go belly up before we take action? Enough is enough!	Debbie	business owner
2022-07-08 06:24:19	Western Cape	Yes I do	Solar		Rassie	business owner
2022-07-08 06:24:17	Gauteng	Yes I do	Solar		Henry	business owner
2022-07-08 06:21:36	Western Cape	Yes I do	Solar	Eskom cannot save out economy. "One Roof One power station" the democratisation of energy is the only solution	Richard	business owner
2022-07-08 06:19:37	Western Cape	Yes I do	Solar	Solar and Wind - SA has plenty of both and they are free energy sources , it's a small scale established energy resource already , it is sustainable and environment friendly, get with the times and look at how affectively it is being used on large scale in countries like Turkey.	Anneline	business owner
2022-07-08 06:19:29	Gauteng	Yes I do	Solar		Justine	business owner
2022-07-08 06:19:28	Gauteng	Yes I do	Solar	In fact - for the short term - we can use any method for generating electricity!! Any!! Just get it done so we can get South Africans working. But first choice will be Solar & Wind.	Philip	business owner
2022-07-08 06:19:23	Western Cape	Yes I do	Solar		Willie	business owner
2022-07-08 06:17:37	North West	Yes I do	Solar		Rex	business owner
2022-07-08 06:16:34	Gauteng	Yes I do	Solar		Albert	business owner

2022-07-08 06:15:34	Gauteng		Yes I do	Solar	We live in a country blessed with sunny weather. Make use of natural resources.	Erika	business owner
2022-07-08 06:15:06	Eastern Cape		Yes I do	Solar	If RDP houses were built for the homeless and previously disadvantaged as was promised and fitted with solar panels you wouldn't have all this stealing of electricity which is why there is such an overload on the grid	Lesley	business owner
2022-07-08 06:13:04	Gauteng		Yes I do	Solar		André René	business owner
2022-07-08 06:10:34	Western Cape		Yes I do	Solar		Karin	business owner
2022-07-08 06:09:55	Gauteng		Yes I do	Solar	We forget that SA is a SUNSHINE land and we can use that to our advantage. Start with solar panels to every house in SA and only when needed in rainy days use ESKOM then they will have enough energy to supply on those days	Renate	business owner
2022-07-08 06:07:08	Gauteng		Yes I do	Solar		Madeleine	business owner
2022-07-08 06:06:07	Western Cape		Yes I do	Solar	A combination of energy types is necessary. We will continue to need coal, nuclear, hydro, gas turbine and an increasing proportion of solar and wind. What is more critical is that government get out of the way and allow private enterprise (or even competent people within the government or SOEs) to actually do the job. Eskom CEO is hamstrung by policies of BBBEE, soft relationships with unions, procurement policy, local courcing and various other stumbling blocks. It should also be considered to place power generation facilities now operated by government in private operation or ownership. Merit, competence and business decisions should rule the day, not politics, corruption and self interest. Competent cities should be allowed to produce and procure their own power too.	Graham	business owner
2022-07-08 06:04:55	Gauteng		Yes I do	Solar	South Africa has an abundance of sun, vast open stretches of property that would be ideal for a solar farm.	Manlio	business owner
2022-07-08 06:01:39	Gauteng		Yes I do	Solar	If you want a healthy economy and jobs get us out of this mess asap	Bash	business owner
2022-07-08 06:00:08	Gauteng		Yes I do	Solar	The suggestion by Chris Yelland seems viable. Subsidize homeusers to put up 10 000mw in solar roof top systems. Create new pump storage schemes (use excess solar to pump water to top reservoir during the day) to generate power for usage at night. Mothball big power users like South32	Jason	business owner
2022-07-08 05:58:40	Western Cape		Yes I do	Solar	SA has a lot of potential to generate massive amounts of solar energy due to its climactic conditions. Additionally solar energy can be quickly produced in the immediate future on a small scale by thousands of independent power producers, as opposed to more complex traditional energy generation methods such as coal or nuclear.	Deon	business owner
2022-07-08 05:54:59	Gauteng		Yes I do	Solar		Bianca	business owner
2022-07-08 05:52:28	Gauteng		Yes I do	Solar		Andile	business owner
2022-07-08 05:50:27	Gauteng		Yes I do	Solar	As a temporary solution to provide power during load shedding A?alternately a permanent gas solution with an option of coal and diesel as well A hybrid solution is required	Shaun	business owner
2022-07-08 05:50:20	Eastern Cape		Yes I do	Solar	It is a rhetorical question in a South Africa context. Eskom had their opportunity to escalate an existing infrastructure to more sustainable development and instead opted to become corrupt officials personal ATM. We need to move forward and away from the ANC's crime cartel.	Etienne	business owner
2022-07-08 05:36:46	Gauteng		Yes I do	Solar	Obviously Eskom isn't working, this is a free economy, let us choose who we want to use.	Michelle	business owner
2022-07-08 05:25:01	North West		Yes I do	Solar	It's time for our inept government to wake up and smell the rose's, there are a lot of professional people who have been sidelined due to age, cadre deployment etc... Who have the expertise to bring us out of the dark ages, they need to be consulted and allowed to help Eskom resolve this crisis.	Ron	business owner
2022-07-08 05:21:09	Western Cape		Yes I do	Solar	Solar, hydro and wind combo	Damian	business owner
2022-07-08 05:03:44	Gauteng		Yes I do	Solar	I think you should use a combination of solar, wind and nuclear.	Kyle	business owner
2022-07-08 04:51:38	KwaZulu-Natal		Yes I do	Solar		Martine	business owner
2022-07-08 04:33:23	Western Cape		Yes I do	Solar		Suzanne	business owner
2022-07-08 04:30:00	North West		Yes I do	Solar	It is unfair to make the whole nation dependant on one source and expect us to suffer loss of jobs and quality of life. Medical needs for example: apnea patients, etc. cannot even sleep without electricity..	Michele	business owner
2022-07-07 23:57:55	KwaZulu-Natal		Yes I do	Solar	Electricity is one of the most important commodities for a vibrant economy and unfortunately all has gone pear shaped due to unprecedented theft and corruption, which is ingrained in the ANC Government . They should deregulate the industry and let the people who are qualified, ie The public sector contribute to the generation of power without all the bribery and corruption. Any company that can produce comically viable electricity should be able to sell it to the grid..	Peter	business owner

2022-07-07 22:50:49	Gauteng	Yes I do	Solar	Eskom is no longer sustainable. It is another SOE which was once an exemplary institution however became another victim in State Capture. We should as citizens have a choice on the supplier we choose to use. There prices are high only because they are trying to recoup the money stolen by officials. Then also to cover staff members who blatantly steal and sabotage. Also to repair infrastructure and theft by citizens who do illegal connections, stealing cables etc. We need competition and a free market where we can choose the supplier who provide a service, a price that is reasonable and excellent service. Nersa should also be closed as I don't see any value being added by them.	Ursula	business owner
2022-07-07 22:12:50	Gauteng	Yes I do	Solar		Sanet	business owner
2022-07-07 21:45:15	Free State	Yes I do	Solar	It's not one solution, a wholistic approach using various sources of energy will be the only way.	Kelvin	business owner
2022-07-07 21:43:17	Gauteng	Yes I do	Solar		Pam	business owner
2022-07-07 21:43:14	Gauteng	Yes I do	Solar		Pam	business owner
2022-07-07 21:38:11	Western Cape	Yes I do	Solar		Ben	business owner
2022-07-07 21:21:26	Mpumalanga	Yes I do	Solar		Peter	business owner
2022-07-07 21:01:03	Gauteng	Yes I do	Solar	Scrap the regulations, in the interests of the economy. Now	Perry	business owner
2022-07-07 20:51:29	Eastern Cape	Yes I do	Solar		Clive	business owner
2022-07-07 20:38:37	Gauteng	Yes I do	Solar		Dave	business owner
2022-07-07 20:22:00	Eastern Cape	Yes I do	Solar	Solar is the easiest way for a citizen to help alleviate the daily shortfall. Just allow every current domestic imbedded solar producer to bush excess kw into the grid at a small rebated price. This power can then be sold on at a profit with zero cost to government. No cash payouts needed just deduct it from the home owners rates.	Clinton	business owner
2022-07-07 20:20:00	Northern Cape	Yes I do	Solar	This should be looked at by province/municipal area. For example the Northern Cape has AMPLE sun, and hence SOLAR is the most viable. KZN and WC are on the coast lines and perhaps HYDRO power is best suited. Port Elizabeth isnt called the Windy city without reason... so WIND generators.	Kitty	business owner
2022-07-07 20:03:52	Western Cape	Yes I do	Solar	I belive more than solar.	Jan	business owner
2022-07-07 19:53:40	Gauteng	Yes I do	Solar	Actually all kinds of energy to get SA back on it's feet.	Charmaine	business owner
2022-07-07 19:53:37	Gauteng	Yes I do	Solar	We need electricity! Allow us to provide for ourselves if you cannot. Amend the law now!	Hantie	business owner
2022-07-07 19:34:02	Western Cape	Yes I do	Solar	Solar is quick to install and if done through SA you will have a constant supply of electricity during the day. Thas can allow Eskom to do maintenance of it power stations and only use them at night and on pick demand times to suppliment the supply.	Bertus	business owner
2022-07-07 19:29:05	Gauteng	Yes I do	Solar		Lourens	business owner
2022-07-07 19:20:36	Gauteng	Yes I do	Solar			business owner
2022-09-22 16:04:38	Eastern Cape	Yes I do	Solar	The technology is available and cost effective	Bruce	business owner
2022-09-20 13:07:29	Western Cape	Yes I do	Solar		Daphney	business owner
2022-09-12 11:03:53	Mpumalanga	Yes I do	Solar		Ferdie	business owner
2022-09-08 09:44:39	Western Cape	Yes I do	Solar	A single supplier of power is not feasible for this country. Eskom has held the monopoly in supply for far too long and are unable to deliver on the demand. We need alternative power sources.	Helga	business owner
2022-09-06 21:16:54	Gauteng	Yes I do	Solar		Cornelius	business owner
2022-09-06 20:34:48	Gauteng	Yes I do	Solar	Many South Africans already have decent Solar setups - allow for import of excess power to the Grid !	Jan	business owner
2022-09-05 16:22:10	Western Cape	Yes I do	Solar		Carlene	business owner
2022-08-27 08:00:56	Gauteng	Yes I do	Solar		Bronwyn	business owner
2022-08-26 09:45:33	Gauteng	Yes I do	Solar	Solar is the easiest to implement for the man on the street, and thus my choice of method to cover SA's immediate needs. If 10% of people have solar and is allowed to pump overflow back into the grid, load shedding will be over, or at the very least, much less than now.	Kobus	business owner
2022-08-16 11:43:31	Gauteng	Yes I do	Solar	Eskom is obviously struggling. Why make the citizens suffer while they are getting their ducks in a row and getting up to date with maintenance. While Eskom is cleaning house allow others to help	Nika	business owner
2022-08-10 14:53:24	Gauteng	Yes I do	Solar	It costs the economy Millions of rands when we have Load-shedding, this can be prevented if we have access to Independent power producers.	Candice	business owner
2022-08-09 19:58:37	Gauteng	Yes I do	Solar		Martin	business owner
2022-08-08 11:43:19	Gauteng	Yes I do	Solar		Luigi	business owner
2022-08-08 10:20:57	Western Cape	Yes I do	Solar		Stefan	business owner

2022-08-06 06:14:43	Western Cape		Yes I do	Solar		Bronwyn	business owner
2022-08-05 12:40:42	Western Cape		Yes I do	Solar		Carlyle	business owner
2022-08-05 07:25:31	KwaZulu- Natal		Yes I do	Solar		PETER GEOFFREY	business owner
2022-08-04 11:30:15	Gauteng		Yes I do	Solar	We as the poor citizens of the country are sufferings and not the corrupt officials we looted the country dry and now the want to dictate the terms and conditions for people who want to help the country. Scap it immediately.	Jacques	business owner
2022-08-04 09:54:44	Gauteng		Yes I do	Solar		Maike	business owner
2022-08-04 09:36:51	Gauteng		Yes I do	Solar		KB	business owner
2022-08-03 20:01:36	Western Cape		Yes I do	Solar		GAYE	business owner
2022-08-03 13:22:30	Limpopo		Yes I do	Solar	We have more than enough sun and open spaces in our country with private individuals and companies ready to step in and fill the need in an economic viable manner.	Thomas	business owner
2022-08-03 11:59:29	KwaZulu- Natal		Yes I do	Solar		Theo	business owner
2022-08-03 11:22:21	Western Cape		Yes I do	Solar	Actually all of the above methods other than coal & more nuclear. SA needs independent sources to supply alternative energy because the government has proven itself corrupt & lacking skill in every sector... it cannot be trusted to maintain the country's energy needs. Independent power suppliers with the skills & business savvy are the way forward, but with some government control on pricing. Other concerns are our current lack of compliance with climate change targets... So time to sit down, get to the business of incorporating new, trusted & skilled independent suppliers of alternative energy.	S PG	business owner
2022-08-03 11:02:00	Western Cape		Yes I do	Solar		Jannet	business owner
2022-08-03 09:23:59	Western Cape		Yes I do	Solar	Independent power producers can immediately reduce our load shedding which is damaging our economy	Peter	business owner
2022-08-03 08:47:12	Gauteng		Yes I do	Solar	Eskom is in a mess - they need all the help they can get.	Heather	business owner
2022-08-02 19:55:04	Gauteng		Yes I do	Solar	SA has a lot of sunshine, so solar power should have been available years ago. Keep the government out of the solar power advancement, to keep the corruption out. Other options should also be investigated to ensure that load shedding becomes a thing of the past. If nothing happens really soon, South Africa will be a thing of the past!!	Anne	business owner
2022-08-02 19:25:18	Gauteng		Yes I do	Solar	Having one government entity to supply power is reckless, businesses fund the economy and this can hamper what does have the potential to be a booming economic. Alternatives are a must	George	business owner
2022-08-02 16:28:07	Western Cape		Yes I do	Solar	We need to move fast of this as Eskom cannot keep up with the demands. It is driving SA deeper into turmoil.	Liza	business owner
2022-08-02 16:05:19	Western Cape		Yes I do	Solar	Please drop all the red tape and other unnecessary limitations to allow South African citizens or residents to help with the electricity supply. Government has made a mess for decades and clearly needs help.	Sally	business owner
2022-08-02 12:40:25	Western Cape		Yes I do	Solar		john	business owner
2022-08-02 12:37:42	Gauteng		Yes I do	Solar	Solar and wind needed long overdue should be urgently implemented.	Pamela	business owner
2022-08-02 11:34:44	Gauteng		Yes I do	Solar	The government has been spinning their wheels in keeping up with the electricity demand in the country. More and more informal settlements and other developments are popping up all over the country creating a big demand on the electricity infrastructure. Attempts to cover the demand was hijacked by criminals in the system creating massive losses of revenue that could have been spend on other forms of electricity generation such as solar and wind generation. The red tape and obstructive procedures MUST be removed to enable other forms of generation to be put in place speedily	JOHANNE S	business owner
2022-08-02 08:33:56	Western Cape		Yes I do	Solar	Eskom needs "The Power taken out of its hands" literally and figuratively. We need to replace the state owned Eskom with a privately owned company or companies. It needs to be run properly without corruption and over hiring of employees. The most qualified people should be in the top positions, and should not be chosen based on race. This will benefit the whole country.	Simone	business owner
2022-08-02 07:31:24	Gauteng		Yes I do	Solar	We pay so many taxes, we the citizen's should receive electricity for free.	Yolandie	business owner
2022-08-02 06:29:28	KwaZulu- Natal		Yes I do	Solar		Tracy	business owner
2022-08-02 06:12:00	Gauteng		Yes I do	Solar	We already have sun in abundance and it would be easier to use and environmentally safe	Phindi	business owner
2022-08-01 22:55:20	Western Cape		Yes I do	Solar	Solar PV is probably the best short term solution since it can be brought online very quickly (if the red tape is removed). Other forms of energy should also be included since a mix of supply sources is good. I am concerned about the health of folks living close to coal stations. Coal should be phased out and discontinued.	Jayson	business owner
2022-08-01 21:29:34	Northern Cape		Yes I do	Solar		Herholdt	business owner
2022-08-01 13:17:17	Gauteng		Yes I do	Solar		Athol	business owner

2022-08-01 12:57:47	Gauteng		Yes I do	Solar		Mandy	business owner
2022-08-01 12:23:23	Western Cape		Yes I do	Solar	Act now before options are limited or too late.	Alex	business owner
2022-08-01 12:03:56	Western Cape		Yes I do	Solar	This needs to be done as fast as possible. To only open the market to the private sector but that we can comply with current climate change standards.	Jürgen Albert	business owner
2022-08-01 11:19:37	Gauteng		Yes I do	Solar		Lucinda	business owner
2022-08-01 09:50:10	Gauteng		Yes I do	Solar	The country i in an energy crisis, Eskom cannot generate enough power for our need Scap the red tape to register renewable energy plans and make this easier to get approval of energy plans I support solar, wind, refective energy in places in the country that best support such systems Nuclear is the cleanest but I dont believe we have the skills and discipline to manage nuclear properly	Michael	business owner
2022-08-01 09:13:26	Western Cape		Yes I do	Solar	Renewable energy must be allowed to be used to generate power asap. It is best for the climate and for the country's economy and growth. Why are we taking so long to get moving with this? We are totally behind the rest of the world and we have so much sun to harness. It's time we moved Eskom aside and moved the country forward.	Cheryl	business owner
2022-08-01 08:21:17	Western Cape		Yes I do	Solar	I am not an expert in this field, but I certainly know that we cannot go on like this. As a guest house owner and an online educator, power is crucial to run a business. ANY electricity production would help South Africa. Get rid of government controls which make it difficult.	Alisn	business owner
2022-08-01 08:10:20	Western Cape		Yes I do	Solar		FH	business owner
2022-08-01 07:10:07	North West		Yes I do	Solar		Grant	business owner
2022-08-01 06:28:51	KwaZulu-Natal		Yes I do	Solar		gregory	business owner
2022-08-01 06:13:42	Western Cape		Yes I do	Solar	South Africa has an abundance of sun so it should be used.As for electricity generation it should be put in private hands.Government cannot be trusted with taxpayers money.There track record has proven this.	Graham	business owner
2022-08-01 06:08:09	Gauteng		Yes I do	Solar	Coal is way too expensive , Solar is the future .	Werner	business owner
2022-08-01 05:49:05	Free State		Yes I do	Solar	Son is daar vir almal om te gebruik, kan nie gesteel word	Jannie	business owner
2022-08-01 05:48:15	Gauteng		Yes I do	Solar		André René	business owner
2022-08-01 04:53:06	Gauteng		Yes I do	Solar	Centralised supply of electricity is a remnant of the old South Africa where the government wished to exert maximum control over the population by making us dependent on their system(s). This is a communist principle. The only route to efficiency and reliable supply is the free market. Like the road system, central government may provide basic gross infrastructure but production and supply belongs to the people.	André	business owner
2022-07-31 22:53:14	KwaZulu-Natal		Yes I do	Solar	There are many homes and businesses that have been installing solar over the past few years. We should all be encouraged to supply excess energy to the Eskom grid, since they have completely failed South Africans, and the failure which is the ANC government are solely to blame for the disaster which they have allowed to happen! Scrap all the red tape, allow us all to produce as much excess energy as we can and allow us to financially earn back every month that which is rightfully ours without being forced (read punished) to pay ridiculous fees to remain tied to Eskom's grid.	Ashley	business owner
2022-07-31 22:43:49	Gauteng		Yes I do	Solar	if their greed and stupid pride could have been tempted this would and should have happened years ago	Ian	business owner
2022-07-31 21:51:50	Western Cape		Yes I do	Solar		Johannes	business owner
2022-07-31 18:56:11	Mpumalanga		Yes I do	Solar	Solar is probably more suitable for smaller producers.	Gene	business owner
2022-07-29 21:45:02	Gauteng		Yes I do	Solar	Solar panels should be made a statutory requirement for both domestic & industrial new buildings Existing buildings given 2 years to comply .	Robin	business owner
2022-07-28 18:36:49	Gauteng		Yes I do	Solar	Private household should be encouraged to install solar geysers and solar panels. The over production could very easily be sent back to the grid in support of struggling Eskom! Its been introduced in Europe for many years although they have never heard of load shedding !!!!!	Ivana	business owner
2022-07-27 17:56:32	Gauteng		Yes I do	Solar		Ian	business owner
2022-07-27 16:03:41	Western Cape		Yes I do	Solar	I cannot believe this process is taking soooo long. The one thing that can unlock GDP growth is taking forever to get through parliament.	Geoff	business owner
2022-07-26 20:42:24	Western Cape		Yes I do	Solar	We are seen as one of the worst polluters on the planet and certainly in Africa. We need to switch to renewable energy preferably solar asap. The removal of red tape and unnecessary government involvement in energy supply is imperative going forward.	Raymond	business owner

2022-07-26 14:28:01	Western Cape		Yes I do	Solar	I am appalled at any suggestion that private residences and business be charged a (R900?) tariff for providing their own solar electricity - especially as it is a very costly process. Government should be buying excess from these sources. Independent business sources of power, including hydro, should also be encouraged.	Janet	business owner
2022-07-25 21:58:14	Western Cape		Yes I do	Solar	Ek kan nie verstaan waarom alternatiewe vorme van kragvoorsiening nie al lankal die hoogste prioriteit kry nie! Seker omdat hierdie regering van ons altyd die verkeerde besluite neem en geld op die verkeerde dinge spandeer (of dit steel), so ons kan eintlik nie te veel van hulle verwag nie. Stede en provinsies behoort toegelaat te word om hulle eie krag op te wek om ten minste een doring uit SA se voet te verwyder.	Wouter	business owner
2022-07-25 18:58:14	Gauteng		Yes I do	Solar	I would like to answer the question about the method by giving various answers: In first place SOLAR, followed by WIND, both of which are relatively cheap and quick to get going. However a base load solution is required in the longer term. This should NOT be coal, diesel or gas. Hydro is a possibility but are there potential sites? Nuclear is very long term and gives the problem of dealing with the spent material. But how about nuclear FUSION? And what about the use of HYDROGEN?	Michael	business owner
2022-07-25 11:05:14	Gauteng		Yes I do	Solar	Wind would also be good.	Margaret	business owner
2022-07-25 09:25:47	Western Cape		Yes I do	Solar	Die regering moet nie enige belastings hef op hierdie krag nie aangesien hulle Eskom basies ten gronde laat gaan het,	Johannes	retired
2022-07-25 09:16:31	Gauteng		Yes I do	Solar	Solar is renewable, readily available in South Africa!	Liz	retired
2022-07-25 08:58:56	Western Cape		Yes I do	Solar	Renewables must be made economically available through pricing and incentive. Imports of renewable energy technologies should be allowed with minimum tax while local manufacturing capacity is incentivized. Eskom should focus on smart grid connections and two way transmission. The proposal by Eskom to "fine" anyone nearly R1000 a month for generating capacity is absurd. A reasonable and shared one-off cost for connection is acceptable.	Darryl	retired
2022-07-24 22:09:29	KwaZulu- Natal		Yes I do	Solar	South Africa must move towards renewable energy. People need to be able to sell electricity back into the grid. I feel Solar, wind and gas are our better options.	Karen	retired
2022-07-24 19:19:54	Eastern Cape		Yes I do	Solar	Solar energy , will be best suited for South Africa	PAT	retired
2022-07-24 18:42:40	Western Cape		Yes I do	Solar	Ideally one would use different sources to generate electricity ..	Marielouis e	retired
2022-07-24 18:03:21	Western Cape		Yes I do	Solar	We need short term solutions to the big problem with Eskom which i think solar is the best and then built more nuclear power stations	Joni	retired
2022-07-24 18:01:19	KwaZulu- Natal		Yes I do	Solar	I think it should be solar, but also wind for windy areas. We have solar and hardly noticed the load shedding. We should be allowed to feed back to the grid.	Jean	retired
2022-07-24 10:53:23	KwaZulu- Natal		Yes I do	Solar	We have so much wonderful sunshine we should make better use of it. We could also harness wind and wave power which should be cleaner for our planet.	Diane	retired
2022-07-24 09:42:40	Eastern Cape		Yes I do	Solar		Dalton	retired
2022-07-24 06:45:37	Western Cape		Yes I do	Solar		June	retired
2022-07-23 18:42:32	Gauteng		Yes I do	Solar	In fact, I believe whatever reliable,safe and economic energy sources, including coal and nuclear, that are available, should be used.	Helena	retired
2022-07-23 17:35:02	Gauteng		Yes I do	Solar	It is difficult to choose between solar, nuclear, hydro, etc. ???	Shirley	retired
2022-07-23 17:09:06	Gauteng		Yes I do	Solar	Supply from many independent sources of solar power will not only supply the household itself, but excess can be added to the grid, and can be rather substantial, to boost the lack of supply from Eskom. It is a clean source of power.	Sydney	retired
2022-07-23 16:06:20	Gauteng		Yes I do	Solar		JohannA	retired
2022-07-23 16:05:06	Western Cape		Yes I do	Solar	Eskom is not going to cope with the demands of RSA any time soon. Finances need to be directed towards alternate coal free electricity generation as soon as possible. The wheels of our government are so slow in making decisions and responding to this need. It should immediately empower the independent power producers as soon as possible to provide the required shortfall	Jo	retired
2022-07-23 10:37:44	KwaZulu- Natal		Yes I do	Solar	An abundance if solar energy clean and reliable	Robert	retired
2022-07-23 09:58:47	Western Cape		Yes I do	Solar	Solar and wind power	Judy	retired
2022-07-23 09:07:17	Gauteng		Yes I do	Solar	It is free there's plenty of it so go for it	Gert	retired
2022-07-23 08:17:49	Western Cape		Yes I do	Solar	Businesses suffer and the extra costs for alternative power sources are very expensive and not everybody can afford inverters, batteries or generators .	Maletha	retired
2022-07-23 06:56:31	Western Cape		Yes I do	Solar	It's obvious that the government is incapable of delivering sufficient power to the country. Free up private enterprise and move to renewables as far as possible.	Trevor	retired
2022-07-22 21:41:04	Western Cape		Yes I do	Solar	I believe our country has the best capability to take advantage of solar energy. We can also consider nuclear as a good option and should be used as a percentage of supply amount but not total reliance on any individual supply source	Luis	retired

2022-07-22 20:19:29	KwaZulu- Natal		Yes I do	Solar	SA can do this on their own without the likes of Biden and the others who support Ramaphosa in his plans as they have their very own motive for wanting to jump in now.	Alta	retired
2022-07-22 16:37:56	Gauteng		Yes I do	Solar		Mike	retired
2022-07-22 16:06:20	Gauteng		Yes I do	Solar	It is HIGH time that renewable energy is developed. Create jobs, protect the environment and remove the opportunity for government officials to steal our taxes.	Gisela	retired
2022-07-22 16:00:15	Western Cape		Yes I do	Solar	South Africa (in the northern Cape) have some of the best solar opportunities in the world, and it assists in lowering our carbon footprint.	Willem	retired
2022-07-22 15:48:50	Western Cape		Yes I do	Solar	Kry oorsese spesialiste in om Eskom van korrupsie te kom skoonmaak. Neem Eskom uit die staat se hande en Privatiseer dit. Stem saam, ons het mededinging in kragvoorsiening nodig sodat die mense hierdie kritieke hulpbron kan bekostig. Gee ons toegang tot die sonpanele wat ons vervaardig sonder om ons te dwing om eers ons eie vervaardigde items uit te voer en dan weer in te voer net ter wille van BBSEB. Laat die bevolking help met innovasie van oplossings om ons almal te help. Sny die rompslomp, burokrasie, kaderbetrokkenheid, korrupsie en bedrog betrokke by kragvoorsiening sodat hierdie land 'n hoop het op werkskepping en om van rommelbeleggingstatus af te kom. Ons kan meer van alle soorte kragopwekking doen, nie net sonkrag nie, maar laat ons eers die krisis verlig voordat ons na kern-, hidro- of windkrag kyk (omdat dit spesialiste en 'n volledige omgewingsimpakstudie vereis) Windkrag word wel reeds in Wes-Kaap gebruik, brei dit uit.	Jan	retired
2022-07-22 09:19:56	Gauteng		Yes I do	Solar	Stop wasting time and start implementing the changes to bring our country back to its peak performance. Get rid of dodgy tenders and dishonest, corrupt staff and clear the debris so we can once again perform as a country.	Shireen	retired
2022-07-22 07:36:56	Western Cape		Yes I do	Solar		Ciska	retired
2022-07-21 22:14:21	Gauteng		Yes I do	Solar	We should use solar or renewable energy. Things like kitchen scraps eg left over food scraps, old veggies, bread etc. Countries abroad have been using reusable energy for a couple of years. Instead of dumping the rubbish on the pavements / street corners rather collect it and make reusable energy	Ria	retired
2022-07-21 20:55:12	Gauteng		Yes I do	Solar		Gideon	retired
2022-07-21 20:02:39	North West		Yes I do	Solar	Solar power is always there, lets use it	Noek	retired
2022-07-21 19:52:27	North West		Yes I do	Solar	The government and Eskom cannot supply electricity, they have a proven track record of not delivering. Solar power is the answer	Ina	retired
2022-07-21 16:35:23	Gauteng		Yes I do	Solar	Solar, wind or both according to local conditions.	Dot	retired
2022-07-21 15:22:52	Mpumal anga		Yes I do	Solar		Johan	retired
2022-07-21 15:00:28	Western Cape		Yes I do	Solar	Make use of global warming. Sun is free.	Wehlma	retired
2022-07-21 14:20:45	Western Cape		Yes I do	Solar	The current legislation regarding the supply of electricity to all the peoples of South Africa needs to be amended significantly and immediately to allow Independent Power Producers to supply effective and efficient electricity. With its longstanding monopoly, Eskom needs to be adapted to compete with other role players in the field. Against the backdrop of corruption and state capture as exposed by the Zondo Commission, various civic bodies, NPOs and investigative journalists over a long period of time, there is a desperate need for a new transparent system which should be managed by an apolitical totally independent board of experts in the following fields: Electricity Generation Transmission and Distribution; Law; Accounting; Environment; Climate Change; Civil Society; Defend Our Democracy NPO; A Single Government Official as well as Any Other Relevant Role Players. These people are to be chosen for their skills and expertise, integrity, competence, ability to act without fear or favour and speak truth to power, as well as their commitment to top quality service delivery and being held 100% accountable. All IPP's are to be screened and closely monitored for progress of service delivery. Very regular communication via a website/ social media to the general public. Areas to focussed on include the following: Introduction of Competition; Exploration of Possible Subsidy or Tax Rebate to Private Residents who Install their Own Solar Systems and also the Sale of Excess Electricity back to the Electricity Grid; Re-evaluation of the Sale of Electricity to Other Countries when the supply to South Africa is clearly so deficient; Collection of Monies from all Rate Payers on a sliding scale; Focus on Green Power - Sustainable Clean Energy (Solar, Wind and Hydro(Fresh and Sea Water) - in the light of Climate Change Scenario; Avoidance of the Use of Fossil Fuels, Coal, Gas and Nuclear Energies; Great Attention to Environmental Impact Assessments e.g. Wind Turbines in the flight path of birds especially those that migrate. Thank you	Ann	retired
2022-07-21 11:31:01	Western Cape		Yes I do	Solar		Dulcie	retired

2022-07-21 10:25:56	Eastern Cape		Yes I do	Solar	The ANC have stuffed up our Eskom and they are not capable off correcting this Problem that they have Caused but have been making the South African people pay through their Nose. So Yes we need to remove this Corrupted Government and their control on this Industry .	Glen	retired
2022-07-21 04:21:02	Gauteng		Yes I do	Solar		Amari	retired
2022-07-21 03:42:54	KwaZulu- Natal		Yes I do	Solar		Carol	retired
2022-07-20 22:36:46	Western Cape		Yes I do	Solar	IPPs are a much better, more reliable and cleaner source of energy than the plan Mantashe has proposed for an Eskom 2 with all the likely corruption.	Peter	retired
2022-07-20 16:41:42	Western Cape		Yes I do	Solar		don	retired
2022-07-20 14:25:56	Eastern Cape		Yes I do	Solar		Elizabeth	retired
2022-07-20 12:46:52	Western Cape		Yes I do	Solar	It's clean, eco friendly, and consumers can be self-sufficient, instead of paying high tariffs for greedy government and Eskom officials who steal the taxpayer's hard-earned money	Estella	retired
2022-07-20 12:35:03	Gauteng		Yes I do	Solar	To stop load shei g quickly solar will be best for immediate future.. Allow private business to implement solar power and sell to eskom to be fed into the grid. Thereafter wind and coal can be used as well.	Petronella	retired
2022-07-20 12:12:05	Gauteng		Yes I do	Solar	Energy production of solar & wind for both private & industrial use will greatly benefit our environment in comparison to nuclear energy. There will be no need for borrowed capital that will push our country into more debts. Household that have the means can generate their own electricity thereby reducing pressure on the national grid. Instead of levying tax on them, the government should instead encourage such developments. To me quality coal is the ideal for immediate solution, this idea of global warming is mystical, if our environment is managed properly, pollution will not be an issue.	Ntaoleng	retired
2022-07-20 11:54:56	Western Cape		Yes I do	Solar		Lesley	retired
2022-07-20 11:52:54	Western Cape		Yes I do	Solar		Hendrik	retired
2022-07-20 11:37:10	Gauteng		Yes I do	Solar	What are we paying for Electricity for, when it's cut nearly everyday, we don't get any cash back for the hours it's cut. And now they want to increase the interest to high. We really need a change!!	Tina	retired
2022-07-20 11:24:53	Gauteng		Yes I do	Solar	Solar is the quickest to implement and can be done by large business entities or individual households.	Pieter	retired
2022-07-20 11:19:33	KwaZulu- Natal		Yes I do	Solar		Stuart	retired
2022-07-20 10:56:36	KwaZulu- Natal		Yes I do	Solar	Alternative Energy is what we require now, drop duties and taxes on alternative energy producing products so people can produce their own electricity and provide the electrical grid with excess electricity above the private persons requirements to be sold to power companies	Barend	retired
2022-07-20 10:48:33	Gauteng		Yes I do	Solar	The current situation is destroying or economy and we as private citizens, the use of solar must be allowed without any further charges from Eskom !! we need to privatize this sector.	Andrea	retired
2022-07-20 09:38:26	KwaZulu- Natal		Yes I do	Solar	Definite need for privatisation. Government has proven time and again they can't cope	Ann	retired
2022-07-20 09:38:20	Limpopo		Yes I do	Solar	Private households should get incentives to generate electricity via solar panels on their roofs to generate electricity and get rewarded for doing so.	Martha	retired
2022-07-20 09:29:00	Western Cape		Yes I do	Solar	Eskom is being sabotaged	Louise	retired
2022-07-20 09:07:40	Gauteng		Yes I do	Solar	Eskom's problems will never be solved due to factionalism and cadre deployment. the only solution is to engage independent suppliers of all green energy providers. the public should be incentivized to move to green by rebates and subsidies. so to use the swearword PRIVATISE.	rob	retired
2022-07-20 08:14:12	Northern Cape		Yes I do	Solar		Annatjie	retired
2022-07-20 07:51:42	KwaZulu- Natal		Yes I do	Solar		Michael	retired
2022-07-20 06:10:13	Mpumal anga		Yes I do	Solar	Greetings All I believe SOLAR would work in beautiful, sunny South Africa ?? God has given us the sun (& The Son) use the sunshine to our advantage. Pray that much wisdom would prevail in the decision making. We, together as ONE in SA can truly make this Country of ours a much sought after destination. Create jobs etc	Jeanne	retired
2022-07-19 21:31:49	Gauteng		Yes I do	Solar	We live in a sunny country, it is freely available to all, limited breakdowns, theft, free from corruption & government control & restrictions!	Melinda	retired

2022-07-19 19:45:16	Free State		Yes I do	Solar	Sonkrag is die beste aangesien ons land baie sonnig is en tegnologie verbonde aan sonkrag baie verbeter het. Dit is skoon en almal kan daarin deel indien die nodige komponente teen billike pryse beskikbaar gestel word.	Gina	retired
2022-07-19 18:26:28	Western Cape		Yes I do	Solar	Solar, wind and nuclear	Charmian	retired
2022-07-19 18:02:20	Western Cape		Yes I do	Solar		Anita	retired
2022-07-19 17:46:56	Western Cape		Yes I do	Solar	With about 400000 square kms of Karoo, it is madness not to utilise this area for producing solar power.	Dave	retired
2022-07-19 17:19:36	Northern Cape		Yes I do	Solar	Solar is free, clean and with SA sun for mist of the year - go for it	Frans	retired

2022-07-19 15:46:36	Western Cape		Yes I do	Solar	Allow private households to dump excess electricity generated via pv panels on the national network. This will be the quickest and cheapest solution to add capacity. Subsidize private households to invest in solar systems instead of penalizing them with higher tariffs.	Lourens	retired
2022-07-19 13:41:34	Western Cape		Yes I do	Solar		Marlene	retired
2022-07-19 13:35:07	Free State		Yes I do	Solar	Sun is free and should be used to generate electricity.	SUSSANN A	retired
2022-07-19 13:21:09	Northern Cape		Yes I do	Solar	We have a country wide Eskom distribution system into which our dry and sunny regions can link into , where vast areas of solar power farms can be constructed, offering local income to the mostly unemployed locals and offer a fast, effective power supply during the sunshine periods of the day, therefor allowing business to increase their capacity during normal working hours without the current interruptions of load shedding we are currently experiencing.	karin	retired
2022-07-19 12:53:32	Gauteng		Yes I do	Solar	Solar, wind	Suzette	retired
2022-07-19 11:43:39	KwaZulu- Natal		Yes I do	Solar	Solar, wind.	Irene	retired
2022-07-19 10:18:26	KwaZulu- Natal		Yes I do	Solar	While solar is the obvious 1st choice to have only one source is not a good idea, there are many areas where wind source can also be used.	Elaine	retired
2022-07-19 09:53:10	Eastern Cape		Yes I do	Solar	This bloody ANC need to stop the corruption and intimidation of the Eskom CEO, provide power for all residents, make all residents pay and use the money to maintain sub stations. In this country solar is a great option because we have sun all year round unlike colder countries. I understand there's no money in that for the government but they have fleeced us enough. They inherited a working country and have fucked it up in less than 30 years. I was all for the ending of apartheid, but now everyone's human rights are being trampled on while the ANC enrich themselves at our expense. Psychopaths.	Lynne	retired
2022-07-19 09:13:37	Western Cape		Yes I do	Solar	Solar and wind generation is the only way to go.	Jacobus	retired
2022-07-19 08:04:05	Western Cape		Yes I do	Solar	Solar, wind and water is South Africa's riches that can assist in the energy crisis. Stop the redtape and monopoly and government constant interference, without any sustainable solution. Theft and corruption that brought Eskom to this dire state of affairs, also need to be dealt with, without fear or favor. How can South Africa supply other countries with cheaper and sustainable electricity supply, but fails it's own dismally? Enough is enough!	Evelyn	retired
2022-07-19 06:20:03	Gauteng		Yes I do	Solar	We must stop the global warming. Solar Power is the only way to go.	Ann	retired
2022-07-18 22:06:17	KwaZulu- Natal		Yes I do	Solar	In the era 1886-1994 I was engaged in regional ANC structures and held the position of Regional Organiser for Housing, Culture and Land. I also worked with Local Government committees and chaired a number of resolution committees involved in housing disputes. I was one of the organisers for the Port Elizabeth One-City Committee and on behalf of the ANC was a signatory to the first Electrification Agreement. In this capacity I came to represent the Eastern Cape ANC on any number of local, regional and national electrification meetings. I am an architect by training, and hold a PhD in that area of expertise. During the course of any number of electrification policy meetings I became aware of the attendance, ex-ufficio, of staff members representing ESKOM, and although their presence was usually questioned, this became generally accepted by other members of our meetings for reasons that are obvious. However, over time, it became evident that these members of staff from ESKOM were playing to an agenda which differed substantially from our own. To put it plainly, ESKOM was attempting to bring about a take over of electricity-generating facilities over this land, and gather all such generating facilities currently in the hands of local municipalities, under the control of one central controlling body, ESKOM, operating at a national level. Once this was achieved, these local power stations were to be closed down permanently, and the generation of electricity come under to sole control of a national agency. This was achieved primarily under a programme which sought to identify local municipal officials, both present and potential future office holders, a "consultancy fee" (or a bribe) for as long as these officials voted on their respective municipal committees for the closing down of existing municipal power generating facilities and their linkage into a national grid. ESKOM was assisted in such efforts by offering municipalities attractive supply rates as well as the fact that many existing power generating facilities were reaching the end of their natural functioning lives and would require replacement at some stage. This has led to the establishment of a national infrastructure which has now fallen into the hands of unscrupulous business bodies able to control the supply of power through their control of natural resources vital to power generation. I believe that the only way that such monopolies can be controlled, is by instituting a policy that will allow the establishment of smaller localized power generating bodies, owned by municipal and private concerns able to feed into a national power grid. I realize that this is, by itself, a potentially dangerous move which, if uncontrolled, would pose serious threat to our natural environment, but this is not something that a national policy towards land use and electrification would not be able of coping with.	Franco	retired

2022-07-18 20:50:19	Western Cape		Yes I do	Solar	Wave energy, working very well in other countries! Why can one only select one thing above?!!!	Cheryl	retired
2022-07-18 20:16:17	KwaZulu- Natal		Yes I do	Solar	A mix of natural energy sources should be used - solar, wind, hydro, gas Move away from coal and oi, as much as reasonably possible, like Germany	Sue	retired

2022-07-17 20:20:07	Western Cape		Yes I do	Solar	All sustainable methods of electricity production should be utilized within South Africa for South Africa just like they did in Vietnam. The current monopoly and single government controlled utility has proved to not be economically sustainable for South Africa. Independent privately owned entities must be allowed to generate and supply electricity as needed. Proper oversight of this would be essential. This is a National Disaster and needs immediate attention. Cut The Red Tape!	John	retired

2022-07-17 18:40:30	Western Cape		Yes I do	Solar		John	retired
2022-07-17 18:40:26	Western Cape		Yes I do	Solar		John	retired
2022-07-17 17:59:09	Western Cape		Yes I do	Solar	Nie noodwendig net sonkrag nie. Ook ander soos wind selfs kernkrag - mits die kernkrag werklik bestuur en beplan en in stand gehou word deur mense met kennis, en ervaring van kernkrag. Ons land se ekonomie kan nie meer verder deur hierdie onstabiele kragnetwerk - wat die staat beheer - gekortwiek word nie. Geen beleggers sal in SA belangstel met die netwerk soos tans nie. Enorme verliese reeds aan besighede en industries. Ons het genoeg alternatiewe asook die kennis uit die privaat sektor om dadelik ons land te help red en die staatsnetwerk te ondersteun. Laat hulle toe om dit te doen. Verseker moet Min Gwede Mantashe se voorstel om 'n ander / tweede STAATSBEHEERDE krag netwerk op te rig, van die hand gewys word. Laat die staat eers toon of hulle Eskom in orde kan kry. Die privaat sektor moet dadelik kan intree sonder belemmerende rompslomp.	Cecilia	retired
2022-07-17 17:07:47	Gauteng		Yes I do	Solar	Solar beteken dat die son krag n moet is om by te dra tot skoon lug vrystelling. Son is vrylik beskikbaar vir gebruik om lewenskostes te verbeter. Steenkool is die oorsaak dat vuil lug die oorsoon laag benadeel vir almal en siektes toestand veroorsaak. Om ander toetelaat om in komptiesie met Eskom te gaan vir krag verskafing en opwekking bronne te gebruik. Om sonkrag te gebruik sal die moontlikheid van steel en vernietiging van duur elektriesetyd en onderhoud totaal verminder tot veitlik niks. Waar myne die aarde oop grou en vernietig sekere bronne van gebruik stop sit. Daardie grond kan gebruik word om te plant en kos te voorsien vir n alreeds oor bevolkte SA. Huise en woon gebiede in stede kan verminder word as beter grond vir behuising beskikbaar gestel word inplaas van myn bou.	Frans	retired

2022-07-16 11:35:06	Western Cape		Yes I do	Solar	What does 'immediate' mean and is this the right question? Clearly there will be no solar power as a primary provider tomorrow, but this should be channelled into the grid where it is available as of immediate effect with the intention of moving forward with other providers to be phased out.	Philip	retired

2022-07-16 10:14:06	Limpopo		Yes I do	Solar	I think a combination of wind and solar is best in the short run, takes less time to put in place. Coal for the middle run and nuclear for the future. The present day nuclear technology is safe and this is the best solution for the long term. Whatever we do, there will be some sort of risk, and destruction of nature. Solar demands a lot of land area, so does wind, wind in ocean has risks for fisheries and other life in ocean, effects here not really known to us yet. Of all the risks, I think the risks with modern nuclear technology is nuclear is less.	Bjorg Krane	retired
2022-07-16 09:51:58	Western Cape		Yes I do	Solar	This is a no-brainer! Of course there shouldn't be any red tape in this energy crisis preventing alternative viable solutions, of which there are many, from being immediately implemented. BUT, the individuals in "powerful" and ministerial positions in govt who force their own constricted, ineffective and swim-upstream-in-mud thinking, or lack thereof, are the ones who need to change their minds and agree and enable the many energy solutions already put forward to them WITHOUT DELAY. They appear (until 2024 probably) to be the only ones who can get this constipated energy provision and economy moving immediately primarily by removing red tape, and allowing, enabling and promoting readily-available solutions and competent resources to get energy properly flowing again. My suggestion / endorsement would be to immediately implement, amongst many others, BUSA's excellent proposed 10-point plan (https://www.news24.com/fin24/economy/10-things-govt-can-do-to-end-the-energy-crisis-according-to-business-20220714), including: <ul style="list-style-type: none"> Resolving embedded or own generation registration and licensing issues with the National Energy Regulator of SA (Nersa), and accelerating the time it takes to get applications approved; Unblocking red tape constraining private sector investment in generation capacity; Removing Nersa's 100MW cap on the licence exemption for self-generation projects; Suspending the requirement that renewable energy components have a specified amount of local content; Increasing the regularity and size of procurement rounds for renewable energy by the Independent Power Producers Office; Establishing an emergency feed-in tariff framework to enable Eskom to buy power from existing generators; Resolving bottlenecks in the transmission infrastructure (the national grid) to unlock additional generation capacity; Developing a unified and scalable wheeling framework, to allow private entities to use the grid to move electricity they generate; Developing a public-private transmission partnership framework to speed up the build times of new infrastructure for the national grid; and Urgently addressing sabotage at Eskom, and the theft of copper cables. Come on govt, you've wasted the last 15 years since the 1st load shedding in 2007. Let's all get moving NOW for the sake of the country and particularly for the poorest people in SA. Thank you and good night!	Brian	retired

2022-07-16 00:31:10	Outside SA	USA	Yes I do	Solar	The cost of solar power (mainly photovoltaics) has been decreasing steadily so that in many parts of the US it is now cheaper than coal or natural gas. SA is large enough that the sun is always shining somewhere in the nation (likewise for wind). What is needed is a fast response backup system for peak demand times including disasters, short term storage for nighttime demand, and an efficient electric power management system to include all the solar, backup and storage sources on one grid. The existing Escom system could well serve as the backup system. Various systems are being considered for short term storage: batteries are still way too expensive, likewise nuclear, but some thermal storage systems look attractive. The old system of pumping water uphill during the day and downhill through turbines to generate power during the night may turn out to be the most cost effective.	Paul	retired
2022-07-15 20:33:13	Western Cape		Yes I do	Solar	The world is changing. So, in order not to create dependencies again, we should totally focus on renewable energies. And that quickly, without wasting time. But that will be the biggest problem!	Peter	retired
2022-07-15 18:31:21	Gauteng		Yes I do	Solar	This country can be sustained by solar power efficiently. The ongoing delays with introducing IPP is crippling the economy of this country. Unfortunately government has had its own agenda to continue the control by one political party and this can no longer continue. Cut down the dead wood in government and allow forward thinking dynamic educated individuals to start making urgent decisions	Lynn	retired
2022-07-15 18:22:38	Gauteng		Yes I do	Solar	Solar makes sense as it is available most of the time. It should be backed up by the wind, hydro, and other renewables. Wherever possible methane should be collected from waste and used for cooking and light.	Alaster	retired
2022-07-15 15:28:22	Gauteng		Yes I do	Solar		Liz	retired

2022-07-15 15:05:59	KwaZulu-Natal		Yes I do	Solar	We had more than enough from inconsistencies from Eskom in everything such as too much fraud and corruption and NERSA still accepts the high tariff increases annually Load shedding is CRAP supporting the crime in the country Eg copper cable theft and break ins Independent Power Producers is the only obvious and logical solution. If they can Provide power in ANY FORM then they should get the opportunity to prove themselves . We are all sick and tired of the load shedding and gat vol for ESKOM as they cannot supply on demand.	Cedric	retired
2022-07-15 15:05:44	Northern Cape		Yes I do	Solar	My suggestion is that both solar and wind are considered for power generation. Cut the red tape to an absolute minimum and speed up the implementation process. Things need to happen much faster if you want to end the current crisis	Henricus	retired
2022-07-15 14:56:58	Western Cape		Yes I do	Solar	Solar has proved to be successful in many countries. It may be the quickest way to involve independent suppliers to the grid. Support house holds who are able to supply excess electricity to the grid. Simplify the system, and Eskom must not punish them with higher electricity costs should they need to revert to Eskom power. It must be a win-win for all parties. Legislation must immediately be reviewed.	David	retired
2022-07-15 14:22:37	Gauteng		Yes I do	Solar	Independent Power Producers is the obvious and logical solution. If they can Provide power in ANY FORM then give them the opportunity. We are sick and tired of the load shedding as well as cable theft that takes place during load shedding.	Leonie	retired
2022-07-15 14:19:30	Western Cape		Yes I do	Solar		Stephen	retired
2022-07-15 13:46:15	Gauteng		Yes I do	Solar	Ek stem geheel en al saam dat alternatiewe opwekking van krag nodig is. Dit is vir my moeilik om te besluit op die soort van alternatiewe krag. Privaat maatskappye moet betrek word. Die beste sal seker Solar of Wind moet wees nie. Nuclear sal seker ook 'n opsie wees maar dit gaan te lank neem om op te rig en in werking te stel.	Frans	retired
2022-07-15 13:05:34	Western Cape		Yes I do	Solar	The current electricity crisis is truly alarming and is causing untold damage to our economy, especially small businesses. It is a disgrace that the ANC has brought us to this point. We citizens should be protesting in the streets to demand an end to this crisis and to allow IPPs to start operating. If the ANC fails to act once again and to sort this mess out, there will be even more loss of faith in its abilities to run this country properly.	Tessa	retired
2022-07-15 12:39:45	Gauteng		Yes I do	Solar	Let the people govern. Eskom seems unable to overcome its numerous problems and people who should support Eskom like its employees (in order to retain their jobs) and suppliers (in order to retain their markets) don't seem to care. Assist financially other people to provide for/supply their own needs - a ready source of energy in our country is the sun. We need a solar panel on every roof - residential and commercial/industrial buildings. A clever financing strategy could be developed and managed by the banks. An "army" of installation recruits could be trained from the young unemployed to manufacture, install and maintain the panels.	Alethea	retired
2022-07-15 12:17:14	Mpumalanga		Yes I do	Solar	Eskom and overnment cannot run and maintain power stations. For them it is all about making money. Government should immediately subsidise solar and allow private people and companies to generate power without red tape and without taxes on income when power is sold o the grid.	Hugo	retired
2022-07-15 11:29:16	Gauteng		Yes I do	Solar	Sell some Eskom power stations to private sector to operate them as should be. We have new latest technology power plant that is not in operation yet and we have enough coal to power them till green energy can take over in the future. We spent a fortune building these plants which must just be fully completed and put into operation. We cant just stop coal producing with thousands more people losing their jobs. We have the opportunity to work clever! And government please get rid of the destructive BEE way of managing SA	hannes	retired
2022-07-15 11:23:11	Mpumalanga		Yes I do	Solar	A combination of solar, wind and hydro would be ideal. Solar and wind we have in abundance. A country bordered by the ocean! And it's green.	Shirley	retired
2022-07-15 11:13:22	KwaZulu-Natal		Yes I do	Solar	Solar power would probably be the fastest method to get up and running!		retired
2022-07-15 11:06:48	Gauteng		Yes I do	Solar	Our options is to narrow as to only solar or wind. Energy generation should depend on the availability of whatever "green" technoly or natural resource is prevalent. Alternative Energy generation is long overdue. All legislation at all 3 tiers of government should be amended to promote sustainable green technologies. At municipal level the building bylaws should be amended to 100% green technologies in new infrastructure and building developments. This will go a long way to alleviate our depency on redundant and old forms of energy. SARS should also give a once-off rebate for house owners who take the step to get solar solutions. Car manufacturers should be encouraged to switch to other energy sources for cars. The State should also go green by replacing its motor fleet with greener car models. SA have a abundance of alternatives to current energy sources. Let's get going and make a positive impact on our children's future!	Louis	retired
2022-07-15 11:03:32	Gauteng		Yes I do	Solar	It could be a combination of hydro, solar and wind. But we live in south Africa and the climate is ideal for solar especially	Rosemarie	retired
2022-07-15 10:43:27	Western Cape		Yes I do	Solar	Son- en -windkrag beste!	Anna	retired

2022-07-15 08:38:43	Western Cape		Yes I do	Solar	Hernubare bronne is die enigste alternatiewe vir Suid Afrika en dan ook in die hande van Onafhanklike Krag voorsieners. Die staat het nou oor en oor bewys hulle is totaal uit voeling met publieke mening, is totaal korrupt, soos bewys met die Steenkool toekennings en bestuur van Steenkoolmyne. Die vasklou aan kool voorsiening deur die ANC is bloot hul gierigheid om verder te steel en hul wolfskloutjies in die geldpote van Suid Afrikaanse belasting betalers te hou. Son, wind, water is globaal bewys as die alternatiewe vir krag voorsiening. GEBRUIK DIT!	Mike	retired
2022-07-15 08:31:36	KwaZulu- Natal		Yes I do	Solar	It is clear that the present power generation and reticulation arrangements are unsustainable. We have seen continuing dithering and procrastination by Government delaying the implementation of any solution, even if temporary. We had the dubious Zuma plan for a nuclear solution which because of timescales would not have prevented the current issues. We have seen the current administration fixated on coal, despite a need to embrace reductions in carbon emissions. I won't even mention the offshore power boats, a clear piece of pocket-lining nonsense. Over and above the generation issues, we have an ongoing problem with reticulation, and allowing Municipalities to generate and reticulate their own power is not feasible, when they cannot even manage their existing mandates. Issues with illegal connections and cable theft will need to be addressed and resolved, but their root causes are more likely social and environmental. The only short, and probably long-term solution is renewable power, South Africa is blessed with an abundance of sunshine, and has a long coastline. Solar and wave power are the answer. How about looking at the potential for combining desalination and power generation to solve two problems in one go.	Iain	retired
2022-07-15 07:31:04	Gauteng		Yes I do	Solar	We have dough sunshine use it it's free	Maureen	retired
2022-07-15 07:27:15	Gauteng		Yes I do	Solar		Heather	retired
2022-07-15 07:23:02	Gauteng		Yes I do	Solar	A mix of solar, wind and atomic energy generation should be adopted with heavy emphasis on solar and wind. Scrap import duty on solar panels and associated equipment to encourage private individuals to install and go "off grid". Independent power producers using solar generation should be given priority. We must reduce carbon emissions drastically - now, not sometime in the future. The air we breathe was wonderfully clean during lock-down, this must tell us something!?! We Humans must change our way of life or face destroying this planet forever.	James	retired
2022-07-15 07:02:06	KwaZulu- Natal		Yes I do	Solar	THE sun in SA is an eternal source of power, clean, reliable and free. The price of installing solar power must be affordable to all, and Municipalities should offer a Rates Rebate for users	Shirley Jean	retired
2022-07-14 23:38:06	Gauteng		Yes I do	Solar		Jackie	retired
2022-07-14 22:02:18	Western Cape		Yes I do	Solar	Many of my friends in the UK have solar panels that see to their needs and to sell to the national grid. South Africa has far more hours of sunlight than the UK, so why are we so far behind with this technology? Some investment needs to be made into the whole solar power technology sector, so that current systems can be improved and expanded. Then the cost of solar panel installation needs to be brought down so that people can afford it .	Sigi	retired
2022-07-14 21:49:13	Gauteng		Yes I do	Solar	Environmental issues need to be addressed and a reliable source of power is essential. Reliability and market related competition will be assured by multiple Private suppliers of power.	Willem	retired
2022-07-14 20:35:34	Western Cape		Yes I do	Solar	We have sun 95% of the year, solar power is the most eco friendly way to go.	Maria	retired
2022-07-14 19:51:53	Western Cape		Yes I do	Solar	The government has been clinging to power for so long now even though all can see it's only for their own reward and not helping our country at all. They are dragging our country into a black hole Please let us move forward !!!	Joyce	retired

2022-07-14 19:08:12	KwaZulu- Natal		Yes I do	Solar		Cathy	retired

2022-07-14 18:36:12	Western Cape		Yes I do	Solar	It is a fact that Southern Africa is one of the best regions worldwide for its solar irradiance. Solar power is thus one of the best resources we can tap into. One of the prime advantages is that a solar farm can be built to operate within a year, allowing this with several 100MW to 200MW farms each can deliver over a GW electricity to the national grid. Combining this with wind and storage allows a short cut to save SA economy from the devastating effects of load shedding.	Dirk	retired
2022-07-14 18:10:56	Eastern Cape		Yes I do	Solar	Yes I fully endorse the idea of independent power producers but only as long as the whole process is made transparent to the public of SA . There must also be strict measures put in place to avoid any monopolies or cartels forming who may try to exploit the whole process to the detriment of the public.	Roland	retired
2022-07-14 17:59:00	Eastern Cape		Yes I do	Solar	More power suppliers, especially more alternative energy producers required. No more Eskom monopoly. Too much neglect over too many years has left them in no state to cope with our needs	Zelda	retired
2022-07-14 17:01:44	Outside SA	Working in Greenlan d	Yes I do	Solar	I think solar energy is quickest, but very expensive at the moment to get as a private household. We have a lot of sun in SA and we should use that energy wisely.	Leonie	retired
2022-07-14 16:52:46	Western Cape		Yes I do	Solar	As I've already given my views on the methods available for more power production, it's obvious that the government are incapable of doing this on their own and URGENTLY need Independent Power Producers to step into the breach. This in the long run will actually benefit the government if it is properly managed!!	Jeremy	retired
2022-07-14 16:46:49	KwaZulu- Natal		Yes I do	Solar	Solar panels on the roof - houses, offices, warehouses - would generate enough power to be self-sufficient. (In Switzerland the public can generate solar power at home, and feed back excess power into the general public's grid, so that in all seasons, there is plenty of power for everyone.). We need to get organised FAST in RSA!!	Topsy	retired
2022-07-14 16:46:46	Western Cape		Yes I do	Solar	There is an abundance of sun in all regions of South Africa and the government should scrap all hindering legislation and allow the growth of solar power. We can also increase wind turbine towers in selected areas. Power generated from hydro schemes need to be expanded and more nuclear power stations can be looked into, although these would need highly trained, reliable personnel to look after nuclear power station. The cost of setting up and the disposal of nuclear waste would be a problem, in our present dire financial straits.	Jeremy	retired
2022-07-14 16:37:53	Western Cape		Yes I do	Solar		Desmond	retired
2022-07-14 16:26:11	Western Cape		Yes I do	Solar	Wind and/or solar from private producers and scrapping red tape immediately.	Isabel	retired
2022-07-14 16:13:38	Western Cape		Yes I do	Solar	I support Green Energy. South Africa has abundant sunshine which would give free clean energy.	Diane	retired
2022-07-14 16:07:49	Gauteng		Yes I do	Solar	Installed my own solar system and am happy that I have power all the time. Must adapt a bit to look at system usage in cloudy days but can add a few additional panels and another battery that will take me off the grid and no longer rely on incompetent persons (BEEE) that try and maintain equipment that should be done by persons with experience. Good for clever government to put a BEE face in a managers chair who know nothing. Government subsidize every person who does not deserve and should help persons who paid for own solar system. But no, they want to penalize us. No brainers	Danie	retired
2022-07-14 15:54:55	Western Cape		Yes I do	Solar	South Africa is positioned uniquely for a variety of ways to produce electricity. SA can produce electricity via solar, wind, hydro and coal, depending on location. The private sector can be of great help and the government should be more open to working together with the private sector. Without the private sector's help I see no light in this dark tunnel of load shedding...Please strengthen Andre de Ruyter's hands & allow the private sector to come on board!!! It will also help if the expertise of previous Eskom workers (who were dismissed with a golden hand shake) could be lured back to Eskom to help with rebuilding the power stations.	Elna	retired
2022-07-14 15:42:27	Western Cape		Yes I do	Solar	We are blessed with hours of sun and even wind in our country but can contribute to our power needs. Solar panels /foil has become so reasonable, a large number of private households can easily contribute to our grid	Willy	retired
2022-07-14 15:29:07	Western Cape		Yes I do	Solar	We need renewable sources of electricity like solar and wind power.	Maryna	retired
2022-07-14 15:21:32	Gauteng		Yes I do	Solar	Solar is cheapest and we have plenty of sun all year round	Gerhild	retired

2022-07-14 12:38:31	Gauteng		Yes I do	Solar	Coal is very, very environmentally unfriendly. The use of coal must be phased out as soon as possible. Scrap red tape and allow people and the private sector to generate power.	Neeltjie	retired
2022-07-14 12:38:10	Western Cape		Yes I do	Solar	I would like to have selected wind and hydro also, as South Africa has the potential to use every available natural resource, provided that the current government stops emptying state coffers to fill their personal pockets, and puts taxpayers hard earned tax money to work FOR the nation, instead of feeding government officials own greed.	Gina	retired
2022-07-14 12:37:45	Western Cape		Yes I do	Solar	It is much more effecient and cheaper than many of the other alternatives. Independent people can have their own systems.	Sheila	retired
2022-07-14 12:12:37	Western Cape		Yes I do	Solar	It is much more effecient and cheaper than many of the other alternatives. Independent people can have their own systems.	Sheila	retired
2022-07-14 12:10:59	North West		Yes I do	Solar	Solar is emmediately available with the private sector and could be connected to the grid at once.	Johnny	retired
2022-07-14 12:06:16	Gauteng		Yes I do	Solar	Why call for the public's opinion? Seems like more stalling tactics by government. Government previously stated that more licences would be issued to companies to provide electricity. So, what happened. Red tape got in the way? Shows us government is not serious in solving the problem. No contracts should be given to independent contractors, as it would involve more corruption. Nuclear is not an option, as we do not have experts in SA. Russians to stay out of South Africa. We have enough commiez here.	Sonja	retired
2022-07-14 11:55:22	Gauteng		Yes I do	Solar	Short term immediate action to generate more power: Solar & wind. Long term: Nuclear	Wilhelm	retired
2022-07-14 11:14:51	Western Cape		Yes I do	Solar		Gila	retired
2022-07-14 11:05:25	Western Cape		Yes I do	Solar		Henri	retired
2022-07-14 11:04:35	KwaZulu- Natal		Yes I do	Solar		lynne	retired
2022-07-14 11:04:34	KwaZulu- Natal		Yes I do	Solar		lynne	retired
2022-07-14 10:56:01	Western Cape		Yes I do	Solar	Abundance of solar energy. Quickest and easiest to install. If municipalities more receptive to grid feed in and would make it more attractive to households then residential areas could become significant contributors.	Sheila	retired
2022-07-14 10:55:33	Gauteng		Yes I do	Solar		Geoffrey	retired
2022-07-14 10:54:09	Western Cape		Yes I do	Solar			retired
2022-07-14 10:26:32	Gauteng		Yes I do	Solar	It is time that Eskom gave up it's monopoly. The government has run Eskom into the ground the time has come to get the private sector to provide the additional power. This will be quickest way to solve the problem. Solar , wind and gas.	Carl	retired
2022-07-14 10:26:32	Gauteng		Yes I do	Solar	It is time that Eskom gave up it's monopoly. The government has run Eskom into the ground the time has come to get the private sector to provide the additional power. This will be quickest way to solve the problem. Solar , wind and gas.	Carl	retired
2022-07-14 10:26:13	Eastern Cape		Yes I do	Solar	The economy of the country, businesses, are being affected people unempoyed, starving, homeless. please please care for the public, that is, our people! we pray for you all constantly to be wise, caring and honest	doreen	retired
2022-07-14 10:10:21	Western Cape		Yes I do	Solar	I trust that the people involved in finding a solution will get the Wisdom to choose the best option for our beloved SA....	Annette	retired
2022-07-14 09:49:36	Gauteng		Yes I do	Solar	I just think since South Africa has so much sun .. for free.. that we should hsrnass that and use it to it's maximum for the nation's use!	Marcelle	retired
2022-07-14 09:48:33	Western Cape		Yes I do	Solar	We have lots of sun. After the capital investment, power is free.	Andy	retired
2022-07-14 09:02:34	Gauteng		Yes I do	Solar		Alexander Roy	retired
2022-07-14 08:52:12	Western Cape		Yes I do	Solar	We need private investors to help supply electricity! If this does not happen our country will go downhill even further! Who wants to invest on an economy with no electricity!!!! Wind and solar is the way to go.	Dalene	retired
2022-07-14 08:46:40	Gauteng		Yes I do	Solar	As can be seen the government not capable of running anything the less say they have the better	Kevin	retired
2022-07-14 08:46:29	Gauteng		Yes I do	Solar	Solar is clean energy and with battery backup can supply energy at night.	Jurgen	retired
2022-07-14 08:34:52	Gauteng		Yes I do	Solar	Every house in South Africa should have Solar power and supply the excess power not used by the house back to the grid. The home owner should then be discounted / paid for the power that the home has contributed to the grid.	Ishara	retired

2022-07-14 08:33:55	Western Cape		Yes I do	Solar	We need to have a solution to the electricity crisis post haste and Eskom obviously cannot supply the entire country's needs at this moment. It is imperative that Independent Power Producers are brought in to avoid a total economic collapse. Numerous small businesses have collapsed due to loadshedding and if this is not addressed asap, the total economy will crash.	Cheryl	retired
2022-07-14 08:26:09	KwaZulu- Natal		Yes I do	Solar	Solar as a quick fix, bearing in mind that a more effective "clean energy" has yet to developed and the entire value chain needs be re-engineered to reduce consumption and waste!	Michelle	retired
2022-07-14 08:09:12	Western Cape		Yes I do	Solar	I believe we could have a mixture of coal, solar and wind. We have the climatic conditions to suit both solar and wind depending on the geographical area. We need to cut red tape - this Government has known since at least 2007 that we were in for power issues but have done very little to solve the problem and what they have done has been at great expense due to corruption. Medupe - way over budget. Bad Contracts etc If private enterprise were to be allowed to provide electricity and sell to the grid we could solve the problem in a relatively short period of time. The economy has been badly affected by this Government's tardy approach to solving the problem and protecting the interests of the ANC	Donald	retired
2022-07-14 07:44:33	North West		Yes I do	Solar		Maryna	retired
2022-07-14 06:40:26	Eastern Cape		Yes I do	Solar	We need free enterprise companies run by competent people that know what honesty is to supply electricity. We have wind and und these green supplies should be fully utilized.	Abrie	retired
2022-07-14 04:58:02	Western Cape		Yes I do	Solar		Ann	retired
2022-07-14 03:25:35	KwaZulu- Natal		Yes I do	Solar		Kim	retired
2022-07-13 23:16:07	KwaZulu- Natal		Yes I do	Solar	It's time our government acknowledged that they have made a total mess of running our country. We are all suffering because of the corruption and lack of skilled people being given the jobs. It's time for the people who have what is needed to be allowed to supply it.	Liz	retired
2022-07-13 21:22:49	Gauteng		Yes I do	Solar	Sun is free and freely available in South Africa. So is wind power!	Ingrid	retired
2022-07-13 21:12:12	North West		Yes I do	Solar	I would be willing to invest in more solar panels to supply the grid if I was paid monthly by Eskom On Due Date	Dale	retired
2022-07-13 20:37:52	KwaZulu- Natal		Yes I do	Solar	South Africa has every opportunity to avail themselves of many forms of green energy. What is wrong with our Government that they are so very short sighted. It's as if they cannot make any decent decisions unless they are realizing an advantage to themselves.	Mary	retired
2022-07-13 20:35:37	Gauteng		Yes I do	Solar	Solar and wind are natural resources that can be used to assist with the provision of extra electricity. Decisions must be taken NOW as we are already in a crisis situation; while excessive red tape must be removed, checks and balances must be in place to stop the ever-present greedy and corrupt.	Renelle	retired
2022-07-13 20:17:07	Western Cape		Yes I do	Solar	Solar and coal; SA is a sunny coal country	Guenther	retired
2022-07-13 19:34:52	Gauteng		Yes I do	Solar		Mike	retired
2022-07-13 19:14:51	Western Cape		Yes I do	Solar		Willie	retired
2022-07-13 18:50:48	Western Cape		Yes I do	Solar	More wind power would also be an important contribution. But massive use of solar power would allow the phasing out of coal mining and coal fired electricity generation. Do it NOW!!!	Anthony	retired
2022-07-13 18:46:29	Western Cape		Yes I do	Solar	We should use all the options available to produce electricity. What is required is to stop Eskom's monopoly and allow people to have the option to buy electricity from whoever they choose.	Virginia	retired
2022-07-13 17:56:19	Eastern Cape		Yes I do	Solar		Harriett	retired
2022-07-13 17:50:34	Western Cape		Yes I do	Solar	I think that is time that the government started putting the country ahead of its party and allowed this country to grow	Tony	retired
2022-07-13 17:18:58	Western Cape		Yes I do	Solar	Solar and/or wind as a short and long term solution	Lawrence	retired
2022-07-13 17:17:10	Western Cape		Yes I do	Solar		Pieter	retired
2022-07-13 16:57:11	Western Cape		Yes I do	Solar	Your question indicated "...suit SA's immediate needs" so I respond in this light. Solar is readily available since we have many days of sunshine. However, Wind and Gas are other options which could be included. Solar and Wind are systems which can be brought online quicker. Solar is a system which can be linked to support day time power even with limited battery support. It is also a system which can be used for residential and smaller commercial applications. Wind can be a 24hr system as used in the EU & US. Gas is also a worthwhile system to implement but is a medium term investment to be available. Nuclear is also possible but is long term and costly. Of course, all these systems need to be linked to the Eskom grid and therefore Eskom has to be supportive. Since Eskom is Government that is the potential hurdle.	David	retired
2022-07-13 16:24:46	Western Cape		Yes I do	Solar	Genoeg son in hierdie land	Lorita	retired

2022-07-13 16:23:31	Eastern Cape		Yes I do	Solar	My first choice would be Solar and then Wind. The reason is both are driven by nature and are pollution free. Initial outlay is costly, but on the long run this can be recovered. Without electricity a country can't function and will bankrupt itself.	Dieter	retired
2022-07-13 16:20:07	Gauteng		Yes I do	Solar	It is freely available	Fanie	retired
2022-07-13 16:18:57	Western Cape		Yes I do	Solar	There is an immediate and urgent need for independent power producers to provide electricity to the grid. Scrap the regulations and red tape NOW SA Government. It is shocking and immoral that the government has not done so a long time ago. This load shedding is not a new problem. They have sat on the problem and aided corruption with the tender procurement policies of Eskom for long enough.	Patricia	retired
2022-07-13 16:17:30	Gauteng		Yes I do	Solar		Linda	retired
2022-07-13 16:09:50	Free State		Yes I do	Solar	Solar is goedkoper. die Son is gratis. hoe gouer hoe beter! ons land gaan agteruit. Werksverlies. Besighede sluit. mense word nog armer en hongerder. tyd vir verandering!	linda	retired
2022-07-13 16:04:51	Gauteng		Yes I do	Solar	1. Independant Power Producers should start supplying immediately, before our country falls further down the drain. People who are dependant on machines to stay alive, are dying during loadshedding. 2. If they ammended the legislation last year, it would still not be quick enough. Everybody is suffering, loosing jobs, homes, possessions and livelihoods. 3. Use all the renewables to create power and kick out Eskom.	Petro C	retired
2022-07-13 15:40:07	Eastern Cape		Yes I do	Solar		Celeste	retired
2022-07-13 15:33:18	Eastern Cape		Yes I do	Solar		Lynette	retired
2022-07-13 15:30:15	KwaZulu- Natal		Yes I do	Solar	Why are we even discussing this? Surely Considering the possibility that its just a matter of time before we have rolling blackouts ALL methods both Government and private should be allowed to supply. I am currently in Florida US and Babcock a large housing community runs completely on Solar!	Rosemary	retired
2022-07-13 15:28:57	Limpopo		Yes I do	Solar	I selected solar because I had to pick only one, but any renewables eg wind will be good. We live in a country blessed with abundant sunshine which shines FOR FREE! Some areas also have abundant wind, also completely free! The situation is so desperate now that legislation should be streamlined so that anyone willing and able to make a contribution must be encouraged to do so. We won't make a dent in our unemployment figures unless our economy grows fast, and that can't happen without a reliable source of electricity.	Johanna	retired
2022-07-13 15:12:44	Western Cape		Yes I do	Solar	Wind power also Power outages are detrimental for life in general	Roz	retired
2022-07-13 15:02:43	Gauteng		Yes I do	Solar	All the delays wont solve the problems and although job security is at risk a more vibrant and FUNCTIONAL economy will automatically stimulate more jobs.	Wallace	retired
2022-07-13 15:00:52	Western Cape		Yes I do	Solar	Die huidige toestand kan nie so aangaan Drastiese stappe is onmiddelik nodig om die krisis aan te spreek. Die regering kan nie die probleem oplos nie-dis dringend nodig vir privaat sektor om dadelik betrokke te raak		retired
2022-07-13 14:51:59	Western Cape		Yes I do	Solar	Basically all renewable should be considered, specially solar and wind.	Alberto	retired
2022-07-13 14:21:13	Gauteng		Yes I do	Solar		Isabella	retired
2022-07-13 13:28:32	KwaZulu- Natal		Yes I do	Solar		Dries	retired
2022-07-13 13:24:45	North West		Yes I do	Solar		Hilda	retired
2022-07-13 12:26:20	Gauteng		Yes I do	Solar	It is time to stop the monopoly that Eskom enjoys. Remove all the red tape and allow independents to provide electricity to the grid. Many old power stations are at the end of their life and should be replaced with modern technology. Government protecting the businesses of the owners of the coal trucks as it was job creation for some, at the time.	Dawn	retired
2022-07-13 12:24:50	Gauteng		Yes I do	Solar	Solar panels have less visual impact in the country than massive wind turbines	Ivan	retired
2022-07-13 12:21:20	Gauteng		Yes I do	Solar	Ultimately to meet the environmental standards required, the IPPs need to come on board and as we have a crisis now, the sooner the better. In the future the country may have to invest in a new nuclear energy plant.	Patricia	retired
2022-07-13 12:10:59	Gauteng		Yes I do	Solar	Die korrupsie moet eers stop!	Kittie	retired
2022-07-13 11:52:18	Western Cape		Yes I do	Solar	I feel that the method of electricity for SA's immediate needs should be a combination of wind, solar (dependent on where these are best suited because of prevailing climatic conditions). Further down the line and even though controversial building small new generation nuclear reactor systems to break away from the use/dependence on fossil fuels.	Frank	retired
2022-07-13 11:45:35	Western Cape		Yes I do	Solar		Thomalen e	retired
2022-07-13 11:45:08	Western Cape		Yes I do	Solar	We need power immediately, the sooner the better and more suppliers. Allow industries to generate power for themselves.	Miichael	retired
2022-07-13 11:40:58	Western Cape		Yes I do	Solar	Every household should be allowed to generate their own energy thereby passing the disfunctional municipalities And nuclear should be a main consideration minus the transformation aspects and jobs should be given to people on MERIT properly qualified for the job in nuclear	Anna	retired

2022-07-13 11:36:27	Western Cape		Yes I do	Solar	We have sun in mass and its free. Use it	Hildegard	retired
2022-07-13 11:34:09	KwaZulu- Natal		Yes I do	Solar	South Africa is privileged to have so much sunshine and wind that I think it is a crime not to use what has been given to us . The sooner we change to alternative energy the better for the environment and all Our population	Viviane	retired
2022-07-13 11:30:19	Gauteng		Yes I do	Solar	Space and sun are in abundance in South Africa and in some areas wind turbines would also be effective. In the long term nuclear power is possibly the best solution provided we have the strictest control of the power plants.	Ian	retired
2022-07-13 11:22:22	Gauteng		Yes I do	Solar	South Africa is blessed by having very consistent and intense sun shine with one of the highest insulations worldwide. Wind is the second choice and should be combined with solar.	Max	retired
2022-07-13 11:16:27	Western Cape		Yes I do	Solar	We have plenty of sun and wind. Why should we not use this free source of energy. It makes complete sense. Jobs will be generated when businesses can operate to maximum capacity, when tourism can come back, when education can be of the highest quality, when hospitals run efficiently and doctors and nurses are able to be properly trained. This country has rich resources and people of every single race can thrive and not just the selfish few who are holding SA to ransom. We just have to get out of the clutches of the ANC government and be free to develop this magnificent country.	Merle	retired
2022-07-13 11:13:35	Gauteng		Yes I do	Solar	Any alternative power to coal from various sources/companies should be welcomed by our ever-failing government, who have all but ruined our beautiful country through ineptness, corruption and pure greed	Margaret	retired
2022-07-13 11:10:55	Gauteng		Yes I do	Solar	1.Solar Panels: Yes for Sure I vote Independent Electrical Supplies. Solar, Wind , Hydro and is easy to install and more economical than coal and gas. It is out of the way and cant be stolen or it cant be vandalized on the roofs. No copper cables involved. Go for Independent Elictrical suppliers.	Maria Wolmaran s	retired
2022-07-13 11:08:46	Western Cape		Yes I do	Solar		Peter	retired
2022-07-13 11:04:58	Western Cape		Yes I do	Solar		Leo	retired
2022-07-13 11:04:28	Gauteng		Yes I do	Solar	Our country is heading for a serious downfall. Nobody in their right mind would even consider investing here with all our power outages, municipal woes, corruption, nepotism and ongoing thievery by people in government. We sure as hell can't rely on tourism either when people are hijacked, robbed or killed here. We need serious change here for our people to have any kind of hope for the future.	Kim	retired
2022-07-13 10:58:46	Free State		Yes I do	Solar	All renewable energy type like Solor, Wind, Hydro etc.	Willie	retired
2022-07-13 10:57:37	Western Cape		Yes I do	Solar	With sunshine in abundance, solar energy is the first choice. Wind as a power generator would be a second choice. Do we have the ability to impliment this without goverment interference.	Jos	retired
2022-07-13 10:51:06	Gauteng		Yes I do	Solar		Leopold	retired
2022-07-13 10:49:45	Western Cape		Yes I do	Solar	I believe it is time to look at sustainable and scalable power. It is quite clear that Eskom.is riddled with problems and load shedding is further destroying our beleaguered economy. It makes sense to allow independent power suppliers	Luisa	retired
2022-07-13 10:49:32	Gauteng		Yes I do	Solar		Leon	retired
2022-07-13 10:49:30	Gauteng		Yes I do	Solar	Nuclear would be the cheapest in the long run, but for immediate relief, solar is the answer because it it could be installed on rooftops, where wind turbines can only be utilized in windfarms.	Dirk	retired
2022-07-13 10:42:06	Gauteng		Yes I do	Solar		Irene	retired
2022-07-13 10:34:10	KwaZulu- Natal		Yes I do	Solar		Penny	retired
2022-07-13 10:20:17	Western Cape		Yes I do	Solar	It is crucial that ESCOM's (a Government run institution) monopoly in supplying electricity is stopped and private enterprise is given the oppportunity to supply electricity to our country which is suffering severe financial losses due to the poor management of ESCOM.	Izak Bartholom eus	retired
2022-07-13 10:14:12	KwaZulu- Natal		Yes I do	Solar	Sunny South Africa says it all re Solar Power. As in Cape Town Government should install bi-directional electricity meters on private homes and credit power returned to the grid by those individuals who have gone to the trouble and expense of installing domestic Solar Power to avoid the ongoing failings of our current power provider.	Russell	retired
2022-07-13 10:07:27	Gauteng		Yes I do	Solar	Solar and/or wind. Independent power producers most definitely.	Philip	retired

2022-07-13 10:06:12	Western Cape	Yes I do	Solar	<p>Although I selected Hydro I believe we need to have various options and choices.</p> <p>Hydro is the way the world seems to go and if we create a resource the world is looking for we have potential for Export which we need for our economy.</p> <p>We should however also provide a system in which Solar panel owners, who produce more than they use, can sell and feed back energy into the pipeline.</p> <p>Natural Gas production - We have many citrus plants that thrive in SA and the skin can be used to generate energy. Waste is another thing that can be used instead of it landing in our streets and landfills.</p> <p>Windmills and Solar Plants should be erected as soon as possible. Businesses are suffering because of the lack of electricity and the expensive fuel for Generators which are also noisy.</p> <p>Municipalities should also be able to purchase electricity from private enterprises.</p>	Jacqueline	retired
2022-07-13 09:58:53	KwaZulu- Natal	Yes I do	Solar		Mervin	retired
2022-07-13 09:40:44	Western Cape	Yes I do	Solar	I move for a tax rebate to enable home owners to install solar power to their homes.	Andre	retired
2022-07-13 09:27:17	Mpumal anga	Yes I do	Solar	Ample sunlight. Seldom is the whole of S.A. covered in cloud. Households should receive subsidy to install individual solar. Every roof, every car port should be used and linked to national grid..	Buck	retired
2022-07-13 09:16:04	KwaZulu- Natal	Yes I do	Solar	<p>We have lots of space and have high sun availability.</p> <p>It will be a quick solution to implement too.</p> <p>We need to create jobs and attract foreign investors. We cannot do this with an unstable electricity supply.</p>	Allan	retired
2022-07-13 09:12:42	Mpumal anga	Yes I do	Solar	<p>The Public will immediately install solar/wind, making energy available to boost the energy needs of South Africa. The Government must not see the public as a threat to help the energy problem in the country.</p> <p>A the end of the day it will cost the government absolutely nothing.</p> <p>Let the government put their pride in their pocket and accept the Public's help.</p>	Bodo	retired
2022-07-13 09:10:38	Gauteng	Yes I do	Solar	Time for the powers that be to get off their butts and do something constructive to save this country!	Graham	retired
2022-07-13 09:07:02	Gauteng	Yes I do	Solar	We have enough sun in sa to use solar. Coal must be phased out.	Dalene	retired
2022-07-13 09:04:54	Gauteng	Yes I do	Solar	Any of Solar Wind and Nuclear are good options as alternatives however waste management needs to be very strictly managed in the case of nuclear. I believe Solar is the easiest at present to solve the current crises.	Felicity	retired
2022-07-13 08:58:43	Western Cape	Yes I do	Solar	<p>I think different options must be used, including Solar and wind and water. The Government does not seem to take the crisis seriously enough! The people of South Africa are suffering daily to survive with continuous load shedding, the children cant study properly without proper light and cannot make use of their computers etc.</p> <p>Something must be done now, and very fast.</p>	ALIDA	retired
2022-07-13 08:39:36	Gauteng	Yes I do	Solar	As die arme drommels wie aan bewind is (ANC) wakker word,sal hulle besef dat hulle RSA kortwiek met hul beperkings.Dit is tyd dat meer mense toetree tot die verskaffing van elektrisiteit sodat beurtkrag vermy en afgeweer kan word.Dit sal ook meebring dat ander lande meer vertrou het in ons land en bereid sal wees om geld in RSA te bele.Ongelukkig is die regering te kortsigtig om dit te besef - want al wat hule sien is hoe om RSA te benadeel deur te steel,plunder en hulself te verryk...!...SIES GA,HUL DIENSTE (ANC) STINK WANT DIT IS VROT...!!!!!!!	Hennie	retired
2022-07-13 08:36:33	Western Cape	Yes I do	Solar	Both wind and solar are in plentiful supply - use it.	Valerie	retired
2022-07-13 08:36:20	Gauteng	Yes I do	Solar		Nafisa	retired

2022-07-13 07:58:32	Western Cape	Yes I do	Solar	Government should be offering tax rebate ofor households who introduce solar power, and if too much is produced buy back for the grid.	Gloria	retired
2022-07-13 07:51:29	Gauteng	Yes I do	Solar		Alice	retired
2022-07-13 07:48:47	Gauteng	Yes I do	Solar	Sun , wind is free in South Africa. In this modern age it makes absolutely no sense to produce power with coal "dirty nogal" when the sun and the wind are free to use. Ministers, get your Act together. Use what is available - stop load shedding, pollution and roads collapsing under dirty and heavy coal trucks.	Juli	retired
2022-07-13 07:47:54	Western Cape	Yes I do	Solar		Clyde	retired
2022-07-13 07:37:10	Gauteng	Yes I do	Solar		Yvonne	retired
2022-07-13 07:37:09	Gauteng	Yes I do	Solar		Yvonne	retired

2022-07-13 07:18:43	Western Cape		Yes I do	Solar	I support the introduction of an energy emergency, but would like to see some checks implemented to avoid corruption. Not sure how that could happen.... Also we need to immediately free up all constraints and allow independent energy producers to be free to offer product, at reduced tax rates. Solar options should be provided at cost to everyone, especially those in townships, and educational institutions should offer priced reduced training to those who have no job, but are smart and willing. We need to be dynamic, and quick. Now!	cat	retired
2022-07-13 06:48:47	KwaZulu- Natal		Yes I do	Solar	The solution lies right before our eyes. The government should draft legislation that enables all private households and businesses that currently generate solar power, may supply the SURPLUS power back into the power grid. By doing this, one gets everyone who generates solar power to make a contribution to the supply of electricity in this country. Minister Pravin Gordhan, a large part of the solution lies in this, just use it. It will not cost Eskom, Municipalities or the Government a penny to solve this part of the problem. The owners of the solar systems have already paid for their systems.	Friedel	retired
2022-07-13 06:35:49	Western Cape		Yes I do	Solar	Solar and Wind are the obvious methods to increase electricity generation. Remove the red tape preventing this from happening . Electricity is crucially important to the economy of any country and there simply has to be a reliable source of generation.	Richard	retired
2022-07-13 06:04:45	Eastern Cape		Yes I do	Solar	I believe that a combination of Solar and wind would suit South Africa's needs. From what I have read and assuming that the journalists have done their research properly it would take 2 years for SA to be on track n terms of power supply.	Barbara	retired
2022-07-13 05:58:23	KwaZulu- Natal		Yes I do	Solar	Solar is free once installed	Johanna	retired
2022-07-13 05:47:25	Western Cape		Yes I do	Solar		Dinah	retired
2022-07-13 04:17:11	KwaZulu- Natal		Yes I do	Solar	Solar is a clean and sustainable solution to the electricity crisis in this country. Independent power producers have to be allowed into the market to help provide a constant energy supply so vital to the economy. The corruption within Eskom has tentacles everywhere and has failed South Africa.	Cathy	retired
2022-07-13 01:22:58	Western Cape		Yes I do	Solar		Jenny	retired
2022-07-12 22:13:08	Western Cape		Yes I do	Solar	Modern solar has become very efficient and together with large battery farms, they are very effective.	Peter	retired
2022-07-12 22:12:40	KwaZulu- Natal		Yes I do	Solar	Please let private institutions create power for us we cannot carry on with sabotage of eskom and no action from our government. If name was left as Evmom it might have been a better entity	Elza	retired
2022-07-12 21:42:12	KwaZulu- Natal		Yes I do	Solar		Sabine	retired
2022-07-12 21:08:19	Western Cape		Yes I do	Solar		Rory	retired
2022-07-12 21:08:08	Gauteng		Yes I do	Solar	We live in a land of free sunshine. Enough now of talk. We need ACTION.	Jane	retired
2022-07-12 20:53:16	KwaZulu- Natal		Yes I do	Solar	Our government need to focus on any means to bring about a solution to the energy crisis.	Lilian	retired
2022-07-12 20:52:04	Gauteng		Yes I do	Solar	Solar and wind are my choices for now. Eskom needs time to bring their fleet that can operate effectively in order and shut down old units. Everybody will be chasing gas and supplies may be erratic. Coal is not good for the environment. But most important the stupid restrictions on suppliers must stop. A free market will sort itself as long as safety standards are maintained (no chance with an ANC government!)	Miles	retired
2022-07-12 20:47:08	Gauteng		Yes I do	Solar		Leila	retired
2022-07-12 20:38:11	Gauteng		Yes I do	Solar	Solar has natural solutions to energy problem and sustainable with power outages.	Dorothy	retired
2022-07-12 20:30:11	Gauteng		Yes I do	Solar		Charlotte	retired
2022-07-12 20:21:03	Western Cape		Yes I do	Solar		Melvyn	retired
2022-07-12 19:49:03	Gauteng		Yes I do	Solar	We have plenty of sun hours in South Africa as well as windy areas and on the coast hydro power is possible. Allow and support independent power producers to feed into the grid and then government needs to show political will to stop the corrupt mafia type gangs within Eskom from sabotaging the system. Sadly the ANC seems to be intent on destroying the whole economy and our country.	Brigitte	retired

2022-07-12 19:38:30	KwaZulu-Natal		Yes I do	Solar	my son was an employee of Eskom for the last 4 years at the Komati Power Station and his contract was terminated at the end of March 2022. He was also a recipient of the Eskom bursary after he matriculated. You did not consider extending his contract and Eskom you are losing skill employees . He is a UKZN graduate and they are the best even better than those at Harvard. He was on a team of other professionals considering other methods of electricity production for SA. Sadly Mr Pravin Gordon he is now unemployed and is this what SA economy needs? He is Sameer Bissessur. MEch Engineer	ayesha	retired
2022-07-12 19:30:43	Gauteng		Yes I do	Solar		Braam	retired
2022-07-12 19:28:16	Western Cape		Yes I do	Solar		Rob	retired
2022-07-12 19:26:08	Western Cape		Yes I do	Solar		Elaine	retired
2022-07-12 19:24:49	Western Cape		Yes I do	Solar		Jan	retired
2022-07-12 19:19:03	KwaZulu-Natal		Yes I do	Solar	Independent producers should feed into the grid. Eskom should control the grid by storing surplus power and augmenting of shortfalls from the stored power.	Edward	retired
2022-07-12 19:07:48	Western Cape		Yes I do	Solar		Hetta	retired
2022-07-12 19:04:47	Gauteng		Yes I do	Solar	1) SOE cannot function without independent good management 2) SA cannot be held to ransom by all interested parties 3) look at what is greater good for SA now and in the future 4) initial cost will be high but going forward it will be cheaper and sustainable 5) environment will be protected 6) once privatized there is less financial burden on state	Dees	retired
2022-07-12 18:56:28	Gauteng		Yes I do	Solar		Frederik Johannes	retired
2022-07-12 18:50:52	Western Cape		Yes I do	Solar		Magriet	retired
2022-07-12 18:34:39	KwaZulu-Natal		Yes I do	Solar	A large portion of the country has very scant cloud cover and is eminently suitable for large scale solar power generation. However it will need to be balanced with the storage of power for the hours of darkness. Perhaps a challenge.	John	retired
2022-07-12 18:24:23	Gauteng		Yes I do	Solar	Long term I am in favour of renewable energy. But right now we are in crisis so need everything at our disposal to stabilise the grid. All except nuclear - this SA government can never be trusted with nuclear.	Lynette	retired
2022-07-12 18:23:07	Gauteng		Yes I do	Solar		Julia	retired
2022-07-12 18:20:41	Gauteng		Yes I do	Solar	Solar is clean energy (no carbon emissions) and sun is abundant in our lovely country. Independent solar producers can be incentivised to boost Eskom's output and it will assist the economy.	John	retired
2022-07-12 18:19:27	North West		Yes I do	Solar	Other solutions in combination with solar should be allowed.	Arthur	retired

2022-07-12 18:05:26	Western Cape		Yes I do	Solar	South Africa = sunshine = solar energy. Q.E.D.	John	retired
2022-07-12 17:59:54	Outside SA	United Kingdom	Yes I do	Solar		Frances	retired
2022-07-12 17:54:21	Gauteng		Yes I do	Solar	We have the sun,solar energy is the way to go Solar plants should solve our problem	Cynthia	retired
2022-07-12 17:34:53	Gauteng		Yes I do	Solar		N	retired
2022-07-12 17:23:02	Western Cape		Yes I do	Solar	It would benefit SA and it's people if we privatized electricity. Secondly, the government could supply solar panels and wind turbines. The fact that Eskom has the monopoly is ridiculous.	Cat	retired
2022-07-12 17:05:23	KwaZulu-Natal		Yes I do	Solar	It is clean, abundantly available and more consistent and reliable		retired
2022-07-12 16:52:55	Gauteng		Yes I do	Solar		Katy	retired

2022-07-12 16:47:37	Gauteng	Yes I do	Solar	<p>The IPP's has been blocked by Nersa for nearly a decade. IPP'S finance their own installations - hence the Government need not find money. Solar, wind and storage technology is already mature but new development continues - especially in storage.</p> <p>The Transmission Lines mostly exist already to support energy output. We have huge open sunny and windy areas. The technology is not environmentally unfriendly.</p> <p>Nuclear Stations take long to build and are very expensive to build and maintain. It is an option eventually but I am not sure that the fuel elements can still be made at Pelindaba. Disposal and transport of new and old elements is not a problem. Water availability is a challenge as well as visual impact. The plants are safe but have very nasty results if operations are not properly managed. So probability of an accident is low but the impact if an event occurs is dramatic. Coal is out! We export our high grade coal and use extremely low grade coal in our stations. Our roads are destroyed by transport of coal on the roads rather than trains or conveyor systems. Ash dumps pollutes the air. Emissions from the process is not controlled by the electrostatic precipitators. The dry cooling systems cannot handle the amount of ash. The heater tubes clog up due to the rubbish coal and forces long shutdowns to clean the boilers. Hence - sun NOW.</p>	Nick	retired
2022-07-12 16:45:16	Gauteng	Yes I do	Solar	This should have ben done years ago, as long as prices will not increase and is affordable	Theunis	retired
2022-07-12 16:44:25	Gauteng	Yes I do	Solar	Yes red tape should be scrapped and legislation amended immediately IPPs. Solar wind hydro and nuclear are the way to go in future.	Iain	retired
2022-07-12 16:42:36	KwaZulu-Natal	Yes I do	Solar		john	retired
2022-07-12 16:40:07	Gauteng	Yes I do	Solar		braam	retired
2022-07-12 16:29:42	KwaZulu-Natal	Yes I do	Solar		Jeanne	retired
2022-07-12 16:28:54	KwaZulu-Natal	Yes I do	Solar	<p>I have for almost two years not been affected by Eskoms painful load shedding because of my Victron Hybrid Solar Power system that I had installed.</p> <p>I fully agree with some comments that I am wasting many kilowatts of power daily after my storage batteries are fully charged and this power could be fed back to the grid.</p> <p>We have ideal land throughout South Africa where wind farms could be set up, and so many large buildings countrywide also with wasted roof space that could be utilised for solar or wind power generation.</p> <p>Why is it that these alternative power oportunities have been overlooked since our Eskom Load Shedding started in 2007?</p> <p>Some suggest Nuclear power, but the thought of where irresponsible people might dump the obvious Neuclear waste is too frightening to even consider.....take our current government for example, where and how are they dumping the Koeberg waste....the mind boggles, so please no Neuclear!</p> <p>Clearly then Wind and Solar Power can provide clean sustainable energy for ALL here!</p>	Patrick	retired
2022-07-12 16:14:39	Western Cape	Yes I do	Solar	Maybe not only solar - but whatever can be offered by ALL IPPs must be accepted.	Wayne	retired
2022-07-12 16:01:54	Gauteng	Yes I do	Solar	No brainer,	Ockert	retired
2022-07-12 15:56:48	Gauteng	Yes I do	Solar	There is more than 300 "full sun" days a year in S.A. - make use of it .	Don	retired
2022-07-12 15:48:21	Gauteng	Yes I do	Solar	I am sure it would be the quickest system to get set up and get running. Once it is established other forms of production can be built to increase generation ability. It doesn't matter what form it is lets start doing something and stop the talking!!	Malcolm	retired
2022-07-12 15:47:45	Free State	Yes I do	Solar	Given the current crisis an urgent solution is required to bring our lives to normal	Clark Michael	retired
2022-07-12 15:41:43	Gauteng	Yes I do	Solar	Yes solar, wind, hydrogen, Gas all are being used in many countries. and we have plenty of sunshine. Extend building gas pipes in Johannesburg for domestic use. Government should subsidise solar panels for domestic use, encourage sale of hybrid cars. Plant many trees to counteract the heat waves.	Gerhild	retired
2022-07-12 15:28:49	Limpopo	Yes I do	Solar		Henry	retired
2022-07-12 15:22:23	Free State	Yes I do	Solar	Off course private enterprise can solve this problem in short thrift. Allow anyone to shed their excess power into the national power grid / created in whichever renewable energy way / for a fair remuneration or credit on their own account.	Robert	retired
2022-07-12 15:02:39	Western Cape	Yes I do	Solar		Terence	retired
2022-07-12 15:02:30	Northern Cape	Yes I do	Solar		Alida Gertruida Magdalena	retired
2022-07-12 14:38:29	Eastern Cape	Yes I do	Solar	We should be using all forms of renewable energy .We have plenty of sun and wind and wave power that we should be harnessing.	Meryl	retired

2022-07-12 14:36:14	Gauteng		Yes I do	Solar	South Africa has abundant sunshine. This alternative power should have been used years ago . If we had followed that route long ago we wouldn't be in this mess.	Lynn	retired
2022-07-12 14:32:53	Western Cape		Yes I do	Solar	I have used it before and works wonders.	Hilton Henning	retired
2022-07-12 14:16:22	Gauteng		Yes I do	Solar	Issuing licences speedily for wind and solar power is a matter of life or death for S.A.	Germaine	retired
2022-07-12 14:07:40	KwaZulu- Natal		Yes I do	Solar	The sun is freely available in our country and needs to be utilized to generate electricity/power. The government and other's that control everything need to step aside and allow energy to be generated from natural resources and utilized to save this country from collapse. Other forms of energy such as wind and hydro also need to be expanded.	Alan	retired
2022-07-12 14:02:34	Western Cape		Yes I do	Solar	There could be a selection of different productions of electricity making it easier to implement as soon as possible to prevent a total collapse of our country which will take a miracle to save as it appears that there are other forces behind all this in our country. What happened to all the money China gave Eskom anyway. So it is better taken out of government hands.	Barbara	retired
2022-07-12 13:52:49	Gauteng		Yes I do	Solar	Independent power suppliers should be allowed to also provide electricity on condition that the National power grid is controlled by Eskom when the demand requires it, and without any interference of the Government. Solar installation costs need to be reduced, so that everyone can afford to make use of what our sunny country offers. Wind power is also a very good option. Every option should be available at an affordable price. Every form of corruption should be stopped by responsible independent leaders.	Ronel	retired
2022-07-12 13:51:46	Western Cape		Yes I do	Solar	Please help us to have electricity, I believe Solar panels are the best, bc it's sunny here	Corlia	retired
2022-07-12 13:50:53	KwaZulu- Natal		Yes I do	Solar	Solar is the most sensible option at the moment. We can harness all IPPS at a later stage,	Madelein e	retired
2022-07-12 13:50:08	Gauteng		Yes I do	Solar	1. There should be made a way in which electricity bills can be paid directly by the consumers to ESCOM, bypassing the corrupt municipalities who are not paying their ESCOM accounts on our behalf. As long as the corrupt municipalities have their hands on the finances it will still be a problem in the future. 2. Much more should be done to prevent illegal connections, cable theft, and inside sabotage.	Corry	retired
2022-07-12 13:27:42	Eastern Cape		Yes I do	Solar	We have ample wind and sunshine. Get the political will, and it can happen. Just watch out for the fingers in the till.	George	retired
2022-07-12 13:15:17	Gauteng		Yes I do	Solar	All I can say is that proposed changes are an absolute necessity.	Catherine	retired
2022-07-12 13:01:22	Western Cape		Yes I do	Solar	I'm sick & tired of all the loadshedding. It's highly dangerous for people who are needing nebulizers, oxygen tanks, heart monitors etc. You cannot keep running 3 to 4 times, within 24 hours, to the Hospitals Emergency Outpatients for this vitally necessary treatment. It's time to privatise this so that we have a functioning system to avoid the high costs of Medical Treatment, & possible deaths, caused from a failing Eskom. Whose sole purpose, it seems, is run by unqualified people & the many who use Eskom as their private Cookie Jar to dip into.	Jenny	retired
2022-07-12 13:00:40	North West		Yes I do	Solar		Winifrid	retired
2022-07-12 12:57:57	Gauteng		Yes I do	Solar	The sun is ever-present as a reliable source of energy.	Desmond	retired
2022-07-12 12:55:14	Gauteng		Yes I do	Solar	Solar is 100% "green". It is easy to set up and quick to commission. SA has deserts that are not available for farming but have all year round sunshine. Connection into the grid is uncomplicated. Just no government interference, no BBBEEE. Just best practice.	Bruce	retired
2022-07-12 12:54:35	Northern Cape		Yes I do	Solar	dfg	Willie	retired
2022-07-12 12:52:47	KwaZulu- Natal		Yes I do	Solar		David	retired
2022-07-12 12:48:30	Mpumal anga		Yes I do	Solar	We have been off the grid on a farm for over 30 years. If putting power back into the grid would be explained and marketed, we could make some of our solar energy available to the local municipality. There should be compensation and a system in place.	Gerda	retired

2022-07-12 12:43:04	Western Cape		Yes I do	Solar	I support all measures that produce electricity cheaper and faster . "Green" like wind and solar is the way to go. Some suggestions: let small towns generate power for them selves , it take them off the grid There is always either sun or wind in RSA , add storage capacity Lighten the burden to households by making inverters and batteries available. REMOVE compulsory local content Disclose all shareholders (those in the open and behind the curtains) is contractors receiving contracts and licenses. Please get some business common sense involved and remove politicians (even the so called shareholder's one voice) from operational issues.	Hendrik	retired
2022-07-12 12:39:36	Gauteng		Yes I do	Solar	Solar will be the most practical for immediate implementation, the with time install wind and ensure that the hydro becomes more efficient as a support back up.	Don	retired
2022-07-12 12:32:28	KwaZulu- Natal		Yes I do	Solar	Eskom used to be a reliable producer of electricity, but like everything else that we used to rely on the current governing party it is also headed towards doom. We need independent power producers to compete with our current supplier. We'll probably get a more efficient and competitively priced supplier/s. Solar power is the answer as we are blessed with lots of sunshine unlike many european countries.	AC	retired
2022-07-12 12:29:53	Western Cape		Yes I do	Solar		Jacobus	retired
2022-07-12 12:21:01	Gauteng		Yes I do	Solar		Louise	retired
2022-07-12 12:16:18	KwaZulu- Natal		Yes I do	Solar	Though you only allow a selection of only one of the above possibilities, I would say that we could use both wind and solar as both are "renewable sources" and are readily available in large sections of the country, which means that they may be placed in areas that make it reasonably easy to link into the grid.	Trevor	retired
2022-07-12 12:01:05	North West		Yes I do	Solar		Ansie	retired
2022-07-12 11:58:01	Gauteng		Yes I do	Solar	The Government have proved incapable of running ESKOM and need to allow more competent control of our electricity with immediate effect. We have so much sun and most big companies are already solar generating. Their excess can quickly be added to the grid.	Diana	retired
2022-07-12 11:56:50	Free State		Yes I do	Solar	Wind and Solar are the quickest and cleanest to implement.	Barrie	retired
2022-07-12 11:43:10	Gauteng		Yes I do	Solar	South Africa has the ideal climate where solar is concerned. This should have been investigated and implemented a long time ago. It is clean and effective. The biggest concern is how to keep the greed out and keep it affordable for EVERYBODY.	Herna	retired
2022-07-12 11:39:42	Western Cape		Yes I do	Solar	Please, as soon as possible we need to maximise use of all green energy - be it solar, wind or hydro.	Lynn	retired
2022-07-12 11:33:49	Western Cape		Yes I do	Solar	Eskom is bleeding the economy dry and adversely affecting the perception of potential overseas investors. Alternative energy suppliers should be brought on board as a matter of urgency, BUT the integrity of any potential supplier must be vetted - no involvement by current persons in high government positions, no former Eskom heads, no Russian or Chinese involvement, otherwise it will become another Zupta scenario.	Ian	retired
2022-07-12 11:31:40	Western Cape		Yes I do	Solar	Solar energy is best suited we have abundant days of sunshine ,wind is also a viaable option in this country and much less pollution	Garry	retired
2022-07-12 11:28:38	Gauteng		Yes I do	Solar	Solar power is freely available and unobtrusive. The government should provide incentives to people installing it instead of squandering money on corruption.	Derek	retired
2022-07-12 11:24:54	Gauteng		Yes I do	Solar		Liesel	retired
2022-07-12 11:24:23	Western Cape		Yes I do	Solar	Get rid of the incompetent Ministers & the government that is clueless. The people responsible for the late completion of Kusile & Madupi must be held accountable & pay penalties. Terminate all illegal striking workers & no increase until power is restored	Bob	retired
2022-07-12 11:10:27	Gauteng		Yes I do	Solar		Barry	retired
2022-07-12 11:09:33	Gauteng		Yes I do	Solar		Sheila	retired
2022-07-12 11:07:43	Western Cape		Yes I do	Solar	This ridiculous loadshedding situation has occurred due to mismanagement of assets and corruption by the only official power supplier. Time to allow other oranisations who know what they are doing to fill the gap and return the country to normality. There are so many options for renewable energy supply in this country, the government must concentrate on those long term, and accept any help they can get short term from independent power suppliers without delay.	Cathie	retired

2022-07-12 11:04:13	Western Cape		Yes I do	Solar	Solar uses the sun's energy to generate power the same as wind turbines, why do we have to be held hostage to coal and other products to produce electricity? The ANC is forcing the country into dire poverty by lining their own pockets and not caring about anyone but themselves. in the old regime, Eskom purchased power from independent producers and thus there was NO load shedding, people had electricity to generate income and therefore reduce poverty. I'm sick and tired of the ANC they are raping our beautiful country to feather their own nests!!!	Dianne	retired
2022-07-12 11:01:32	Western Cape		Yes I do	Solar	Anc, Stop being selfish and greedy trying to enrich yourselves at the cost of millions of fellow citizensTop behaving like vultures! It is time to to start making the right decisions of national interest and not in the just in the interest of a few "elite vultures" Come on do for a change the right thing in the interest of EVERY citizen!	Theuns	retired
2022-07-12 10:55:49	Western Cape		Yes I do	Solar	As the inefficiency to supply basic necessities for citizens in South Africa is even internationally recognized as detrimental to our economy and existence here, severe measures must be taken immediately. Solar power is an efficient way aa SA has a lot of sun.	Enda	retired
2022-07-12 10:47:39	Gauteng		Yes I do	Solar	A mixture of energy generation and energy saving technologies should be investigated, constructed and implemented that meets both economic, environmental and social sustainability. Solar, wind and nuclear energy generation will meet some these requirements. There may be other opportunities, including the use of chemical energy sources. Technologies aimed at storing heat energy for water and domestic or industrial heating, together with environmental sustainable building technology should be promoted and actively implemented, together with large scale information dissemination in accessible media, schools and advanced learning institutions.	David	retired
2022-07-12 10:37:08	Gauteng		Yes I do	Solar	Solar and wind can be added at short notice with little input from Eskom. Private enterprise are waiting to enter the scene. We need an equitable method of paying for private producers to supply electricity. With regards to nuclear, fusion seems a better option and is supplied by USA. This is a long-term option however.	Piet	retired
2022-07-12 10:32:38	Gauteng		Yes I do	Solar	There are many IPP's able and willing to add to the country's power supply right now, but are being prevented by the government. Allow all providers the opportunity and reduce the reliance on Eskom's power plants. This will allow Eskom some breathing space to fix the damage that the ANC's neglect has caused and reduce (and possibly prevent) the need for loadshedding.	Hercules	retired
2022-07-12 10:30:42	Eastern Cape		Yes I do	Solar	Sop the RED tape for private firms to produce Electric for the country.	Ferdinand	retired
2022-07-12 10:30:23	Gauteng		Yes I do	Solar	should have started this long ago. South Africa (Africa) is a sunny country. The supply of sun light etc is free of charge. Make use of it.	Harold	retired
2022-07-12 10:29:31	Gauteng		Yes I do	Solar	Because ESCOM is incapable to generate enough power because of bad governance by ANC government. It will take years to fix the problem	Ria	retired
2022-07-12 10:22:33	Western Cape		Yes I do	Solar	Solar, wind, hydro it's freely available, please just get going .	Albertus	retired
2022-07-12 10:20:50	Eastern Cape		Yes I do	Solar	Solar power is the best way to go as we have a lot Sunny days. Solar is been used all over the world	Ferdinand	retired
2022-07-12 10:17:11	Western Cape		Yes I do	Solar		Ron	retired
2022-07-12 10:08:28	Gauteng		Yes I do	Solar	Solar power is the most practical due to the abundance of sunshine most of the year in South Africa. This should be augmented by wind power due to the windy situations in various parts of the country. There must be an urgent move away from coal as the current high consumption of coal and diesel for power generation are extremely damaging to the environment. This also significantly adds to the climate crisis. Workers in the coal industry could be retrained in the new planned clean energy field.	Jacobus	retired
2022-07-12 10:07:26	Free State		Yes I do	Solar	Solar energy is clean and good for our environment. It must also be used with wind energy. Independent power producers must be allowed as a matter of urgency without delay.	Sefatsa	retired
2022-07-12 10:04:37	Gauteng		Yes I do	Solar	Solar and wind can be up and running faster than any other form of power generation and can be supported by batteries.	Jeffrey	retired
2022-07-12 09:55:13	Gauteng		Yes I do	Solar		Nicolaas	retired
2022-07-12 09:54:22	Western Cape		Yes I do	Solar		Paul	retired
2022-07-12 09:51:11	Western Cape		Yes I do	Solar	I dont have the knowledge to recommend what method will be the best. Would leave that to the experts as long as something drastically is done.	Hannes	retired
2022-07-12 09:42:19	Eastern Cape		Yes I do	Solar	We cannot go on as we have been it the economy will completely collapse. Eskom should be privatised in order for there to be competition which will then generate a need for customer satisfaction and the private user should be allowed to use Eskom lines to distribute the power to those areas where it is sorely needed. The plundering if the resources at Eskom will NEVER be recouped and we will pay for ZUMA and his cronies state captures for decades to come.	Phyllisann	retired
2022-07-12 09:41:18	Western Cape		Yes I do	Solar	ESKOM is besig om ten gronde te gaan weens baie swak beplanning in die verlede. Die huidige topbestuur kan nie met verouderde toerusting in die vraag na elektrisiteit voorsien nie en gevolglik ly die land se ekonomie enorme skade. Met die gebruik van alternatiewe bronne sal die gebruik van steenkool afneem en daarmee saam die lugbesoedeling.	Pieter	retired
2022-07-12 09:37:55	Western Cape		Yes I do	Solar	Energy from the sun is free, it is always available (especially in South Africa with the meany sunny days), relatively easy to install.	Johan	retired

2022-07-12 09:28:01	Gauteng	Yes I do	Solar	I have long wanted to see electricity controlled and managed by the private sector. All currently state-owned entities (SOEs) should be privatized, and particularly Eskom. No country can function without the basic necessity of electricity. I say privatize IMMEDIATELY and let's get efficient management operating to save our country from its current international embarrassment. We can use solar, wind and atomic power - if it is in the hands and management of private companies. Why is it taking so long to see the obvious? This is URGENT! Gaye Neille Highlands North, Johannesburg	Gaye	retired
2022-07-12 09:25:28	Eastern Cape	Yes I do	Solar		Ian	retired
2022-07-12 09:16:57	Limpopo	Yes I do	Solar		Richard	retired
2022-07-12 09:15:31	Western Cape	Yes I do	Solar	Every region has its own source to offer. Since S.A has been reduced to a s--thole by our present government, even sewerage offers a source of energy.	Karin	retired
2022-07-12 09:07:06	Gauteng	Yes I do	Solar		Lee	retired
2022-07-12 09:06:56	Gauteng	Yes I do	Solar	Due to ongoing loadshedding in SA many businesses and individual households switched to solar energy in order to keep the lights on. However there is no incentives from Government to assist these businesses an households, either to reduce rates and taxes or sell the surplus to local municipalities. If the Government is serious about "going green" it should subsidise and reward businesses and households going of the grid.	Gabriel Johannes	retired
2022-07-12 08:47:12	Gauteng	Yes I do	Solar	Die gerondslomp en gesukkel met alle moontlike maniere om nie genoeg krag op te wek nie is besig om die land op sy kniee te dwing. Die wrakke van ou kragstasies word gelap en gespoeg en plak om die laaste bietjie krag uit hulle te kry. Nuwe kragstasies is swak beplan en vakmanskap laat veer te wense oor. Plekke soos die Karoo en Kalahari lewer genoeg son om groot hoeveelhede krag te lewer. Ontwikkel en gebruik die natuur om die krag op te wek wat nodig is. Laat die privaat sektor toe om die nodige beleggings te kry en solar plase op te rig waar daar werk geskep kan word en die plaaslike bevolking so te bemagtig.	Folscher	retired
2022-07-12 08:42:20	Gauteng	Yes I do	Solar	Take politics and race out of the Power Supply. It is ONLY because of political interference at ESKOM, that SA is in the dire situation it currently is. Stop the red tape and bureaucracy to save our country from total economic collapse. (Actually, it doesn't make sence that the ANC is still part of the sollution if they are the problem, is'nt it?) Allow independent business' and pvt people (irrespective of race) to come to the party and generate own electricity of which any excess can be fed into the grid. For once, put the people of SOUTH AFRICA first and make ONLY a decision that would benefit the people and the economic growth of the country.	Esto	retired
2022-07-12 08:38:36	Gauteng	Yes I do	Solar	Sun is free and we have lots thereof	Michiel	retired
2022-07-12 08:38:11	North West	Yes I do	Solar	Wind and nuclear can be added to the list with solar.	John	retired
2022-07-12 08:32:00	Free State	Yes I do	Solar	My suggestion is for a combination of solar, wind, hydro. The fact that we are stuck by government apathy and antiquated ways of thinking is above me. Overseas and even in Africa modern technology is making inroads. Cape Town's approach should be used as the benchmark; ongoing Research and Development BY INDEPENDENT HONEST AND OBJECTIVE CONSULTANTS WITH ONLY THE COUNTRY'S INTERESTS AT HEART SHOULD BE USED IN AN HONEST R&D TEAM SET UP WITH HONEST PROFESSIONALS FROM THE INDUSTRY. NOT CORRUPT AGENTS AS WE HAVE SEEN IS THE USUAL APPROACH, WHERE WE NOW CONTINUE TO BEAR THE BRUNT OF THEIR PREVIOUS GREEDY CORRUPT ACTIONS	KEVIN	retired
2022-07-12 08:27:39	Gauteng	Yes I do	Solar	Solar power and independent companies should be implemented immediately to curb our electricity crisis. There is enough money in South Africa for each home to have electricity regularly.	Delia	retired
2022-07-12 08:18:24	Free State	Yes I do	Solar	Good morning. Time has come for South Africans to have an alternative electricity company that will service us with respect and dignity! Those who worked for Eskom messed it up when they looted and did all the mess! Our children are facing challenges when they are to prepare for the exams because in the middle of writing , electricity switches off! Our grand mothers who are dependent on electricity their lives are at risk! Enough is enough with Eskom and who ever manages it! The corruption of the past 10 years at Eskom is causing business billions ! We cannot have the power utility like this anymore even for the next 24hours!!!!	Sello	retired

2022-07-11 21:25:30	KwaZulu-Natal	Yes I do	Solar	Germany went solar and did away with nuclear. We have much more sun and wind.	Gavin	retired
2022-07-11 21:22:59	KwaZulu-Natal	Yes I do	Solar	Solar power is not limited to open spaces and can be applied to roofs anywhere as well as land that cannot be used for food production or housing. Solar power can also be erected reasonably quickly to be linked to the National Grid to reduce / end loadshedding. South Africa needs electricity immediately to get our economy going to get businesses able to grow and new ones to start to create employment opportunities which will add to the tax base and hopefully more taxes can get to the correct places to promote even more growth.	Helen	retired
2022-07-11 21:21:57	Western Cape	Yes I do	Solar	This should have been done years ago!	Lin	retired

2022-07-11 21:16:37	KwaZulu-Natal	Yes I do	Solar	Given the abundance of sunlight in South bAfrica, solar energy would be best suited to our needs. In addition to cutting red tape to facilitate IPPs, the Govt should do the ffg: 1. Suspend the requirement for 30 % local content in respect of IPPs. 2. SA is fast becoming a skills-deficit country because of our dysfunctional education system AND the ideologically-driven policies of the ANC with no consideration of that reality, practicality & rationality demand. These policies that are purely race-driven are driving skilled, highly qualified people to enforced economic emigration. It's time to take off the blinkers and start hiring the best people for the job - regardless of race. 3. Amend legislation to make it compulsory for ALL new builds to be solar powered. 4. Enforce all shopping malls % big retail outlets to convert to solar energy within 6 months. 5. Declare an State of Emergency relating to electricity to enable all the above to be implemented with speed.	Dellarose	retired

2022-07-11 19:38:10	Gauteng		Yes I do	Solar	This country has suffered enough through corruption, theft, mismanagement of funds, cadre employment, fruitless spending through the ANC and EFF, where all the above lead to state capture to the detriment of the people of SA where these over R1Trillion lost over the past 28 years could have been used to subsidises and implement better schools, better hospitals, better roads, better education, better food supply, better petrol prices, better employment etc, better electricity, now being deprived from the people of SA due to the above	I	retired
2022-07-11 19:32:06	Western Cape		Yes I do	Solar		Arnold	retired
2022-07-11 19:31:17	Mpumal anga		Yes I do	Solar	Ek glo dat Solar vir elke dorp in hierdie land die beste wees en dan is elke munisipaliteit vir sy eie dorp verantwoordelik en waarby kleiner gemeenskappe ook sal voordeel hê is ook m wind turbines op te sit	Petro	retired
2022-07-11 19:29:57	KwaZulu- Natal		Yes I do	Solar	Eskom is clearly unable to give us the electricity that we need if we are to kickstart our economy after Covid shut us down. We have a country with endless sun and also enough wind to harness for our power. We need wind-farms and solar electricity. We need people who can give us this form of energy without further endless red tape delays. Let's do it!	Erica	retired
2022-07-11 19:28:26	Gauteng		Yes I do	Solar	SA is in dire need of alternative energy providers of all types	thomas	retired
2022-07-11 19:27:25	Eastern Cape		Yes I do	Solar	Solar should be the first choice followed by wind - I am not aware of any study that compared the generation capacity of solar versus wind in South Africa. Nuclear should only be considered as the base load alternative should it not be possible to store sufficient renewable energy. The burning of fossil fuels must be curtailed as soon as possible as the planet cannot take much more before it is destroyed by mankind.	Chris	retired
2022-07-11 19:23:10	Western Cape		Yes I do	Solar	It is time for the independent electricity producers to be allowed entry into the grid, free of corruption and delaying tactics by the ANC Government. The longer this is delayed, the closer the country gets to a total blackout, with dire consequences for all. Forget about coal-we need to become more environmentally friendly. Solar and wind are the preferred way forward. Australia pioneered electricity generation, using wave power. We have an abundance of oceans off our coastline-this method should most definitely be investigated. A by-product of the process is desalinated water, which is produced when the sea water is pumped ashore.	Gary	retired
2022-07-11 19:22:55	Gauteng		Yes I do	Solar	This should have been done long ago!! Too many people lost their work due to load shedding. The economy cannot grow with continuous load shedding.	Heidi	retired
2022-07-11 19:10:45	Western Cape		Yes I do	Solar	All I can say is thankfully I live in the Cape and City of Cape Town has lessened the load shedding amazingly. Thank you COCT!	Marion	retired
2022-07-11 19:10:43	Gauteng		Yes I do	Solar	Citizens should be given their rights to choose from whom they should acquire electricity supply . Eskom cannot and does not have the means to compete with the global changes in electricity transformation. Eskoms tariffs are to expensive and people cannot rely anymore on Eskom.. and their ongoing daily load shedding Solar energy is natural God given energy, there will not be any dark days. Fed up with this useless Eskom	Michelle	retired
2022-07-11 19:10:42	KwaZulu- Natal		Yes I do	Solar		Louveelco	retired
2022-07-11 18:59:19	Gauteng		Yes I do	Solar	We have to get serious right now about climate change. This is not just about load shedding in Gauteng tonight - it is about the future of this planet. The coal miners want to work - of course they do - BUT THEY MUST ADAPT OR DIE . That is the choice they have. They need to insist their bosses provide training in green energy skills so they can remain employed in a safe sector. The coal mines have to close; the wind turbines must turn - solar panels must become the norm on every single building from shacks to superstores to parliament .	Joy	retired
2022-07-11 18:57:04	Gauteng		Yes I do	Solar	South Africa is a country full of wide uninhabited rural land which can be used for solar and wind energy plants.	Bonita	retired
2022-07-11 18:45:58	Gauteng		Yes I do	Solar	I would preferably like to see all forms of renewable energy used, not only solar	Milton	retired
2022-07-11 18:39:20	Mpumal anga		Yes I do	Solar		Mark	retired
2022-07-11 18:37:49	Gauteng		Yes I do	Solar		Laurie	retired
2022-07-11 18:37:43	Gauteng		Yes I do	Solar	Die oplossing vir die grootste probleme (uitdagings!) van ons land is om die privaat sektor geleentheid te gee om dit op te los. Ons regering is magsbehep en wil alles self beheer. Hy beskik egter geensins oor die vermoë om Suid-Afrika uit die donker put waarin ons land hom al geruime tyd bevind, te bevry nie.	Sarel	retired

2022-07-11 18:35:04	Western Cape		Yes I do	Solar		Gita	retired
2022-07-11 18:23:09	Western Cape		Yes I do	Solar	We have vast open spaces with abundance of sunshine. It is clean energy and it is cheap renewable	Karl	retired
2022-07-11 18:22:43	Gauteng		Yes I do	Solar		ELEANOR-MARY	retired
2022-07-11 18:22:06	Western Cape		Yes I do	Solar	Solar and wind	Kari	retired
2022-07-11 18:15:09	Gauteng		Yes I do	Solar	WE SHOULD MAKE USE OF OUR NATURAL RESOURCE THE SUN IN WINDY AREAS WE SHOULD MAKE USE OF THAT TOO.	Maria	retired
2022-07-11 18:09:49	Gauteng		Yes I do	Solar	Solar is by far the option for the future in (South-)Africa. We have the space and we have the sun. The technology is there now. WHAT are you waiting for? Why can we not have a serious agreement with Mozambique to import electricity from the massive dams they have available? Nuclear is definitely also an option, but needs a lot of infrastructure to be built first. So that is good for long term maybe. If we would have deregulated the power supplies 15 years ago, we would not be in this position and we probably could export electricity by now. Stop the politics and let the business people use the opportunities to create power, jobs and wealth. If the same money that is being poured into the coal mine developments, would be used for renewable energy, we would be far better off now. Rene	Rene	retired
2022-07-11 18:08:45	Gauteng		Yes I do	Solar	This country has suffered enough through corruption, theft, mismanagement of funds, cadre employment, fruitless spending through the ANC and EFF, where all the above lead to state capture to the detriment of the people of SA where these over R1Trillion lost over the past 28 years could have been used to subsidise and implement better schools, better hospitals, better roads, better education, better food supply, better petrol prices, better employment etc, now being deprived from the people of SA	I	retired
2022-07-11 18:06:46	KwaZulu- Natal		Yes I do	Solar		Mushtaq	retired
2022-07-11 18:02:23	Western Cape		Yes I do	Solar		Lorinda	retired
2022-07-11 17:53:11	Western Cape		Yes I do	Solar	Solar and wind are the only way to get us out of this mess. Without sustainable and dependable energy external businesses will not invest in South Africa	Karla	retired
2022-07-11 17:51:41	Eastern Cape		Yes I do	Solar	Although solar and wind will not fully resolve the problem it can be used to make Eskom less reliant on diesel to keep the lights on, improving the country's balance of payments with less oil to be imported resulting in a stronger rand that in a sense will mitigate the risk associated with the current high oil prices and local fuel prices. Allow the man in the street to feed surplus "solar" energy into the system (and pay him/her for the electricity), although this will not help to elevate the peak power consumption periods in the evening it will surely help with the supply during the day and as mentioned above less diesel will be used/burned to generate electricity. Subsidizing solar system should be considered - private sector should monitor to prevent corruption, so that the benefits is not lost to corruption.	Jer	retired
2022-07-11 17:49:50	Western Cape		Yes I do	Solar	The state has failed to provide sufficient electricity to the people of South Africa. It is now critical that the government works as quickly as possible to provide a framework for IPPs to operate.	Jan	retired
2022-07-11 17:49:39	Gauteng		Yes I do	Solar	Appoint capable honest reliable people to do the job. Do not discriminate against any race. We all belong to one race only and that is the human race. No politics and fraud and nepotism please !!!	Christo	retired
2022-07-11 17:49:36	Gauteng		Yes I do	Solar	Appoint capable honest reliable people to do the job. Do not discriminate against any race. We all belong to one race only and that is the human race. No politics and fraud and nepotism please !!!	Christo	retired
2022-07-11 17:49:02	Western Cape		Yes I do	Solar	Combine wind and solar...and get rid of all red tape and of all the criminals in coal powerstations who will ensure eventually the collapse of our economy.	ARNO	retired
2022-07-11 17:48:30	Gauteng		Yes I do	Solar	The source of power should depend on the area. Some are definitely more suitable for solar, some from wind. Possibly even some areas, wave power, (The Portugese are doing it,) as well as methane from rubbish dumps. It doesn't matter how it's produced. If someone can produce power it's a resource that can and should be used. Allow individuals to produce power, by whatever means, and boost the supply of power for everyone else. It's the country's piggy-bank that anyone can contribute to.	Helen	retired
2022-07-11 17:40:58	KwaZulu- Natal		Yes I do	Solar		Pieter	retired
2022-07-11 17:39:58	KwaZulu- Natal		Yes I do	Solar	Solar & wind	Leaslie	retired
2022-07-11 17:37:24	Gauteng		Yes I do	Solar	Of course we need to scrap red tape. Let Solar and Wind take over. As long as the entities contributing to the grid have stability for the long run, then let them contribute. ANYTHING at this stage would be better than the current situation.	Ronnie	retired

2022-07-11 17:35:49	Gauteng		Yes I do	Solar	With the current dragging of heels, inability or reluctance by Gwede Mantashe, Pravin Ghordan and the remainder of the top 6 to arrive at a constructive solution to SA's short term power problems, the immediate solution would be to allow IPP's to link into the grid whilst proceeding with utmost urgency of setting up and the commissioning of solar and wind farms. SA will remain dependent on coal and hydro however, given the unreliability of our water supply due to both drought and wastage. With Mozambique's Kohora Bassa generation limping along it cannot be relied on due to breakdowns. Zim, Zam and Moz are all presently experiencing an electricity shortage and to add insult to injury, SA is exporting electricity to our neighbour's. This must also cease with immediate effect. SA will always be reliant on fossil fuels so this cannot be totally discounted. Bottom line for the long term..... develop and accelerate solar and wind generation and privatize distribution.	Gavin	retired
2022-07-11 17:35:29	KwaZulu-Natal		Yes I do	Solar	Do Whatever it takes to get South Africa back into business. If there are people in government who are obstructive ship them out. Solar is quick and easy to install. All new free standing homes MUST have Solar panels fitted. Complexes that ban Solar panels must have that right taken away. Get SA back on track. Do not pollute air and water reserves with coal and oil fired generators. South Africans are "can do" lets get the brightest and best people on board to get us out of this problem. Only then will the riots stop and businesses will be able to employ more people. Our taxes are being squandered on useless projects that do not put food on ordinary peoples tables. Everyone wants to feel that they are able to feed clothe and educate their families. How can they do that if there are no jobs, no electricity in homes and riots because of hopelessness. Give South Africans back their hope and dignity.	Louise	retired
2022-07-11 17:31:29	Gauteng		Yes I do	Solar	I just want affordable electricity, In winter I want to be able to heat my house. I want to be able to choose the best company that provides customer service, affordable electricity!	Véronique	retired
2022-07-11 17:30:06	Limpopo		Yes I do	Solar	We have more sunny days in a year here in Msanzi, why can't we capitalize on this and produce our own electricity? If we all do that, Eskom will be able to have a more stable supply .	Ngaka	retired
2022-07-11 17:26:12	Western Cape		Yes I do	Solar	Actually Solar, Wind, Gas and Nuclear are the only options we have. The ANC should be left out of the equation and must be sidelined. The private sector should take the lead. As I understand they have already started and are ready to get on the grid. The only limitation is the ANC's rules.	Arnold J	retired
2022-07-11 17:23:26	KwaZulu-Natal		Yes I do	Solar	Take advantage of free wind and sun, provided by our Creator. This is LONG overdue!!!!!!	Ivo	retired
2022-07-11 17:21:23	Western Cape		Yes I do	Solar	We can no longer allow our economy to collapse due to load shedding, bring in independent power producers immediately.	Marietha	retired
2022-07-11 17:19:58	Western Cape		Yes I do	Solar		Mariaan	retired
2022-07-11 17:16:42	KwaZulu-Natal		Yes I do	Solar	Eskom will not be able to do the electricity production by itself. A fair amount of its aged coal fired stations are on there way to be shut down . The only way out is to allow private enterprises to get started on planning and supplying energy. We do not have time for red tape and exhausting procedures to be allowed to supply to the national grid . Load shedding costs the country Billions on manufacturing and production.	Wilhelm	retired
2022-07-11 17:10:51	Western Cape		Yes I do	Solar	South Africa has enough sunshine throughout the year and photovoltaic has become more affordable. Big fields of solar panels could provide at least a good share of relatively cheap electricy.	Stephan	retired
2022-07-11 17:05:44	Western Cape		Yes I do	Solar	We need a hybrid solution: wind. In coastal areas where there is wind; solar using our abundant sun shine; hydro where this is possible; coal with technology to reduce emissions; even nuclear if used safely.		retired
2022-07-11 17:02:56	Free State		Yes I do	Solar	Solar power is available many days of the year. Do not tax people for having solar power. Find solution as soon as possible,by keeping up with latest trends on the market. Also use available skilled people in the country to help.	Sonja	retired
2022-07-11 17:02:11	KwaZulu-Natal		Yes I do	Solar		Savitha	retired
2022-07-11 17:01:57	Free State		Yes I do	Solar	Given the track record of poor expertise please keep it simple. The private sector must take over the generation of electricity.	Dennis	retired
2022-07-11 17:00:53	Western Cape		Yes I do	Solar		Maria	retired
2022-07-11 16:59:44	Western Cape		Yes I do	Solar	Renewable/Green energy	Anna	retired
2022-07-11 16:55:49	KwaZulu-Natal		Yes I do	Solar	Access to boost the national grid should be made available to anybody or organisation who are in a position to lawfully assist. Our country is in desperate need of increased energy sources. Scrap the red tape and make it easier for our responsible public sector to participate PLEASE .	Shaneen	retired
2022-07-11 16:52:47	Limpopo		Yes I do	Solar	Why not take advantage of the sun's energy	Rex	retired
2022-07-11 16:51:22	Gauteng		Yes I do	Solar	Most of the days through the year, are sunny. Therefore the energy provided should be used to replace coal and other fossil fuels.	Lettie	retired
2022-07-11 16:45:06	Western Cape		Yes I do	Solar		Sue	retired
2022-07-11 16:35:21	Western Cape		Yes I do	Solar	Independent producers at competitive prices and utilize solar, wind and hydro energy.	Ed	retired
2022-07-11 16:34:49	Gauteng		Yes I do	Solar	Please allow renewable energy to support energy supply in South Africa. It is very important to act now!	John	retired

2022-07-11 16:34:17	Gauteng		Yes I do	Solar		Peter	retired
2022-07-11 16:33:16	Gauteng		Yes I do	Solar	Because of the availability of abundant sun and wind in S A. It is a clean power supply. Because of the emergency situation in S A immediate legislation that curbs this must be scrapped. This will create a vast potential of entrepreneurs that will be participating	Helena	retired
2022-07-11 16:32:29	Western Cape		Yes I do	Solar	Please find solutions immediately for the blackouts to be stopped. Poor people are freezing in the cold wet weather without electricity. we need a solution NOW!! Thank you. Commerce is also struggling. Please help all South Africans.	Leone	retired
2022-07-11 16:26:15	Western Cape		Yes I do	Solar	Get rid of State owned Eskom ASAP and Privatize Electricity Suppliers that we have competition and not a rotten dictatorship that's crippling not only the businesses, but South Africa's Economy....which it's already done. Solar and Wind is the answer.	Carla	retired
2022-07-11 16:26:10	Free State		Yes I do	Solar	Solar and wind! We have all the resources. Stop this govt from their ongoing corruption, theft and ineptitude.	Lyn	retired
2022-07-11 16:22:15	Western Cape		Yes I do	Solar	The energy crisis is urgent. But beware of giving this corrupt government a carte blanche with powers that we cannot control. Yes, a combination of renewables and sufficient numbers of IPP's are needed.	Jennifer	retired
2022-07-11 16:16:38	KwaZulu-Natal		Yes I do	Solar		Kathy	retired
2022-07-11 16:16:14	Gauteng		Yes I do	Solar	I do not think that there is only one solution to replace coal but we should use a mixture of solar wind and nuclear.	Andrew	retired
2022-07-11 16:15:29	Western Cape		Yes I do	Solar	solar and wind generation, all those involved in the downfall of Eskom and those only interested in profiteering should be immediately fired without any compensation Eskom should stop supplying / giving electricity to neighboring countries South Africa and South Africans should be very first in the queue to be supplied with electricity	doug	retired
2022-07-11 16:09:37	Western Cape		Yes I do	Solar	We have more than wind and sun in SA to generate power. Citizens should be incentivized to acquire their own electricity.	Hein	retired
2022-07-11 16:07:50	Gauteng		Yes I do	Solar		Carol	retired
2022-07-11 16:06:32	Gauteng		Yes I do	Solar	Solar is readily available and is Wind power. Use it. In the long term Get small Nuclear (environmentally Clean) Power Stations. Why wait for the power to crash if you have readily available resources, if it satisfy all criteria.	Dirk	retired
2022-07-11 16:06:07	Western Cape		Yes I do	Solar	We have more than wind and sun in SA to generate power. Citizens should be incentivized to acquire their own electricity.	Hein	retired
2022-07-11 16:05:14	Western Cape		Yes I do	Solar		Jossie	retired
2022-07-11 16:02:19	Gauteng		Yes I do	Solar		John	retired
2022-07-11 16:01:48	Gauteng		Yes I do	Solar	Most expeditious and affordable	Frederik	retired
2022-07-11 15:59:43	Eastern Cape		Yes I do	Solar	Solar is mature technology. Capital is covered by the private sector Eskom will fail us	Johan	retired
2022-07-11 15:58:43	Gauteng		Yes I do	Solar		Aitjies	retired
2022-07-11 15:57:14	Gauteng		Yes I do	Solar	South Africa undoubtedly needs power, and we need it urgently. Any form of independent power will make a huge difference in the daily lives of citizens and businesses	Izak	retired
2022-07-11 15:56:15	KwaZulu-Natal		Yes I do	Solar	South Africa has an abundance of sunlight and apart from an initial outlay on equipment future generation of electricity is inexpensive. The governing party is capable only of implementing rules which make it difficult for private enterprise to qualify, while making it easy for their associates and family to take large cuts from the awarding of tenders to incompetent comrades	Trevor	retired
2022-07-11 15:54:04	Gauteng		Yes I do	Solar	SA has an abundance of sun rays. Let's harness it as it is clean and does not damage the environment.	Morontshi	retired
2022-07-11 15:50:15	KwaZulu-Natal		Yes I do	Solar	I think we should use different methods. Solar, wind and Hydro. I saw a program on Sky (UK) where the French have a hydro generating plant attached to a bridge that goes over a river. Why cannot we think to do this?	Allan	retired
2022-07-11 15:48:08	Eastern Cape		Yes I do	Solar	Go independent and cut out the corrupt ANC controlled Eskom and safeguard the equally corrupt Municipalities from fleecing the end user with unrealistic electricity rates.	Arthur	retired
2022-07-11 15:46:32	Gauteng		Yes I do	Solar	We live in a sunny country all year round. So why not take advantage of that	Sandra	retired
2022-07-11 15:46:01	Eastern Cape		Yes I do	Solar		Doug	retired
2022-07-11 15:41:56	Gauteng		Yes I do	Solar	It is clean, silent and we have LOTS of Sun. Australia does it...why no SA?	barbara	retired
2022-07-11 15:40:59	Gauteng		Yes I do	Solar	We are in trouble, big trouble !!! We need special, extraordinary measures to get us through this crisis,. Only the government can open the door for the extraordinary measurement that is urgently required !!! URGENTLY	Dirk	retired

2022-07-11 15:40:07	KwaZulu-Natal		Yes I do	Solar	South Africa is blessed with an abundance of sunshine, and technology for harnessing and converting solar energy into electrical power is well developed and financially viable. Solar energy projects have relatively short time lines as well, from inception to commissioning. All in all, the solar energy route provides the solution to South Africa's current electricity crisis. Solar energy installations are easy and quick to expand, environmentally clean and have a constant, renewable primary source of fuel available.	William	retired
2022-07-11 15:37:50	KwaZulu-Natal		Yes I do	Solar		John	retired
2022-07-11 15:33:43	Western Cape		Yes I do	Solar	Solar is the quickest way to supplement the grid.	Glyn	retired
2022-07-11 15:33:12	Gauteng		Yes I do	Solar	Many of us are off the grid and are able to push power into the grid. This will help to alleviate the load shedding crises and also break the stranglehold of Eskom	Gordon	retired
2022-07-11 15:30:27	Eastern Cape		Yes I do	Solar		Rex	retired
2022-07-11 15:29:47	Gauteng		Yes I do	Solar	South Africa	Howard	retired
2022-07-11 15:26:19	Eastern Cape		Yes I do	Solar		Roy	retired
2022-07-11 15:23:45	KwaZulu-Natal		Yes I do	Solar		Glynis	retired
2022-07-11 15:23:38	Western Cape		Yes I do	Solar	The fact that many private electricity generators could add much to the national grid must be acknowledged and utilised. There are a large number of citizens and companies in SA who are ready and able to contribute if allowed! Scrap the Red Tape and get independent power producers to help immediately.	Brian	retired
2022-07-11 15:22:35	Gauteng		Yes I do	Solar		Dassie	retired
2022-07-11 15:20:13	North West		Yes I do	Solar		Maryna	retired
2022-07-11 15:16:14	Gauteng		Yes I do	Solar	The fact that many private electricity generators could add much to the national grid must be acknowledged and utilised. There is a large number of citizens and companies in SA who is ready and able to contribute if allowed! Forget and scrap the Red Tape and get independent power producers to help immediately. The installation of large numbers of solar panels to push more power into the national grid will be money and funds very well spent!!!!	Chris	retired
2022-07-11 15:16:07	Gauteng		Yes I do	Solar	Sunshine is readily available in South Africa. Eskom at one time gave grants towards installation of solar, this could be introduced again to enable people to afford it. Excess electricity could then be fed into the grid.	Dian	retired
2022-07-11 15:12:01	Western Cape		Yes I do	Solar		Celia	retired
2022-07-11 15:11:39	KwaZulu-Natal		Yes I do	Solar	The repeated electricity crisis has proven that the government has been unable to get the situation under control. In fact they have no idea how to go about getting the situation under control. IPPs should be allowed to generate solar, wind & hydro power unhindered. As a private enterprise, they will ensure production of power at the cheapest possible cost and be competitive in the market.	Prem	retired
2022-07-11 15:10:50	Mpumalanga		Yes I do	Solar		Jan	retired
2022-07-11 15:10:14	KwaZulu-Natal		Yes I do	Solar	I installed a solar geyser when I build my house 2013. Its one of the wisest decisions I have made. My concerns with the independant power producers is that they can exploit the consumers and look for huge profits. It will be good to have several other alternatives, like hydro, wind and gas along side solar	Rajan	retired
2022-07-11 15:06:14	Western Cape		Yes I do	Solar		Chris	retired
2022-07-11 15:05:46	Western Cape		Yes I do	Solar	It makes sense to use the free energy from the sun. Gov should spend the billions it would need to keep our outdated power plants in action on providing every household with free solar panels. Excess energy produced can then be fed back to the grid. A win win situation. Worldwide government powers and the elite who control us have known about and used free Tesla energy for decades but have kept this to themselves as making us pay for electricity enriches them while impoverishing us. Renewables are a necessary, urgent, stop gap solution. Free Tesla energy is the future.	Kate	retired
2022-07-11 15:05:44	Western Cape		Yes I do	Solar	Wind turbines and solar power is the way to go.	Daphne	retired
2022-07-11 15:02:29	KwaZulu-Natal		Yes I do	Solar		Diana	retired
2022-07-11 15:00:53	Western Cape		Yes I do	Solar	I feel that a combination of natural alternative methods of generating electricity would suit South Africa. We 're blessed to live in a beautiful sunny country, so solar energy would be my No 1 choice. No 2 would definitely be wind generated power - especially in the windy areas of the Cape, such power could be successfully harnessed. No 3. is hydropower - has been successfully utilized in many other countries....so why not South Africa.	Carol	retired

2022-07-11 14:59:35	Western Cape		Yes I do	Solar	Solare is almost free. You receive power as soon as its installed. There are a lot of people that dont have jobs. They can you trained to save the situation.	Fritz	retired
2022-07-11 14:50:27	KwaZulu- Natal		Yes I do	Solar	Move to renewable energy as soon as possible by using Solar and wind.	Carl	retired
2022-07-11 14:46:14	Gauteng		Yes I do	Solar		Wolfgang	retired
2022-07-11 14:45:38	Western Cape		Yes I do	Solar	The repeated electricity crisis has proven that the government has been unable to get the situation under control. IPPs should be allowed to generate solar, wind & hydro power unhindered.	Wolf	retired
2022-07-11 14:40:38	Gauteng		Yes I do	Solar		Gerhardt	retired
2022-07-11 14:38:58	Free State		Yes I do	Solar	SA het genoeg son om sonkrag 'n volhoubare opsie te maak. Daar moet egter met 'n arendsoog gekyk word na die toekenning van kontrakte vir sonkragopwekking om te verseker dat dit nie weer ontaard in 'n baantjies vir boeties situasie nie. Na my mening moet alle dienste wat tans deur die staat gelewer word uitgekonnekteer word - die staat het net eenvoudig nie die nodige bekwame mense in diens nie, korrupsie is aan die orde van die dag en die ouditverslae van die Ouditeur-Generaal word nie met erns beheer nie. So betaal landsburgers vir dienste wat nie behoorlik of glad nie gelewer word nie.	Johanna	retired
2022-07-11 14:38:06	Western Cape		Yes I do	Solar	1. Solar, wind and methane should be encouraged by Nat Govt. 2. All property owners should be encouraged by way of Zero VAT on all purchases of power components e.g. solar panels inverters controllers, windmills etc. 3. Special tax concessions must be given to manufacturers to produce power components cheaper to be much more affordable to the public.	Chris	retired
2022-07-11 14:35:47	Gauteng		Yes I do	Solar	Solar is surely the fastest to implement- we have 200 HAs set aside in Middelvlei, Randfontein (adjacent to the proposed Montrose Mega City) but need a "bankable" offtake agreement to commence. Rand West Municipality is not "bankable". At least 100Mw possible- must be plenty of land available.	Clyde	retired
2022-07-11 14:31:29	Gauteng		Yes I do	Solar	It's about time the government allowed Independent Power Producers to enter the market. The electricity crisis has been going on for some time and the government has not been able to address the problem.	Ann	retired
2022-07-11 14:25:58	North West		Yes I do	Solar	Hier is soveel son en wind dat dit so vinnig as moontlik gedoen kan word DEUR BEKWAME MENSE WAT NIE WIL STEEL NIE EN WAT NIE KORRUP IS NIE EN WAT WIL WERK	Christine	retired
2022-07-11 14:18:41	Western Cape		Yes I do	Solar		Louise	retired
2022-07-11 14:18:37	Gauteng		Yes I do	Solar	Solar power does not contaminate the environment.	Johan	retired
2022-07-11 14:14:00	KwaZulu- Natal		Yes I do	Solar		Jennifer	retired
2022-07-11 14:12:56	Gauteng		Yes I do	Solar	I cannot believe that Gordhan and Mantashe do not have any plans. This ANC government has had 14 years to come up with a plan and implementation and what have they done? NOTHING! As with most things, the ANC government is completely dysfunctional and everything they touch is a disaster!! Solar and Wind is a no brainer and should be implemented with immediate effect. It's not rocket science. Ramaphosa, wake up and smell the coffee for the sake of this country!!! STOP TALKING AND DO SOMETHING FOR ONCE.	Nadia	retired
2022-07-11 14:09:08	Eastern Cape		Yes I do	Solar	Kouga already has working wind turbines which can provide enough power to Kouga municipality.!!	Maria	retired
2022-07-11 14:02:22	Mpumal anga		Yes I do	Solar	It is obvious that the government isn't interested in the battles of the ordinary man on the street. Any and all options should be taken to ensure our economy does not collapse due to the lack of energy supplies.	ANDRISIN A	retired
2022-07-11 14:00:33	Gauteng		Yes I do	Solar	I'm sure there must be many thousands of private people with solar installations who would be more than happy to push some excess wattage back into the grid. A prepaid meter prevents them doing this so it would be very easy to change their meters (where necessary) and immediately get the benefit of many megawatts during the busy daylight hours where manufactures need the energy. Any standard household with about 5kwatts of panels would easily be able to push at least 10 Kw back to the grid per day. Multiply that by 20 000 houses (minimum) and you would at no cost to municipalities get immediately 10k x 20 000 (rough guess) = 200 Mw which is about two solar farms	Alan	retired
2022-07-11 13:56:22	Gauteng		Yes I do	Solar		Hazel	retired
2022-07-11 13:56:18	Western Cape		Yes I do	Solar	I leave the decision making for the experts. This A NC inefficiencies must come to an urgent holt. enough is enough!!	Pamela	retired
2022-07-11 13:55:40	Western Cape		Yes I do	Solar		Bazil	retired
2022-07-11 13:50:03	Western Cape		Yes I do	Solar	It should have been done long ago. We have ample sun and wind. The technology is available. Just do it. Now	Andries	retired
2022-07-11 13:47:49	Gauteng		Yes I do	Solar	Our country is well known for its sunshine. We have enough open spaces on high rise buildings and factory roofs for huge solar panel installations. The cost must be subsidized by the state or municipalities to enable low income families to also have a basic solar installation on their roofs	Christina	retired

2022-07-11 13:46:35	Western Cape	Yes I do	Solar	Solar is readily available to all parts of South Africa. Many homes already have solar installations which help with electricity supply and economic use. We really need to move away from this blind addiction to coal power which not only destroys the environment but is so accommodating to corrupt suppliers etc We also need immediate release and acceleration of renewable licences for our country to finally be free of blackouts and become a viable destination for foreign investment and job creation on a scale that our present Government is unable to provide.	helen	retired
2022-07-11 13:45:18	Gauteng	Yes I do	Solar		James	retired
2022-07-11 13:42:06	Western Cape	Yes I do	Solar	We need all the power we can get - we have sunshine - let's use it	Judy	retired
2022-07-11 13:37:46	Western Cape	Yes I do	Solar	Hernubare energie is die toekoms! Ons is geseënd met volop son en wind	Johan	retired
2022-07-11 13:33:21	North West	Yes I do	Solar		Harry	retired
2022-07-11 13:33:16	Gauteng	Yes I do	Solar	Solar, wind hydro and a small amount of nuclear would support SA right now. The most abundant resource we have in this country is Sun Power. We also have a fast growing industry with expertise to supply power based on the use of this FREE source of power. Wind is also an abundant and free source of energy generation. It is iniquitous to think that we would bypass these elements in favour of coal which is so costly and hugely polluting. The Time For Change Is NOW.	Keryn	retired
2022-07-11 13:32:20	Gauteng	Yes I do	Solar	South Africa has abundant sunshine. We need to increase Solar electricity production to counteract the devastating effects of loadshedding and the knock-on effect on our economy.	Colin	retired

2022-07-11 13:18:41	Gauteng	Yes I do	Solar	I feel it can be used by all household.	Alta	retired
2022-07-11 13:14:44	Western Cape	Yes I do	Solar	Privatize Eskom. Allow my Municipality (western Cape) to generate our own power supply. This ANC Government is incapable to run any of the parastatals. Every one of them have failed.	HM	retired
2022-07-11 13:09:54	Gauteng	Yes I do	Solar	1. Should Independent Power Producers be allowed to immediately supply South Africa with electricity? A big YES!! 2. Is there a need to immediately amend legislation? Yes, but only if it can be done within a short space of time, literary days, and only if it will speed up the process. If amending current legislation (that I am not familiar with) will further delay Independent Power Producers from immediately supplying South Africa with electricity (i.e. real action to supply electricity and minimize / eliminate loadshedding), then no. 3. What is best suited – renewables, coal, nuclear, hydro, gas, imports or other forms of generation? First renewables (solar and wind, of which we have plenty!!), then gas and hydro and lastly nuclear (being VERY expensive and the ever-present risk of radiation). Coal only as a last resort due to the emissions (we are supposed to get rid of / close down all our coal fired power stations anyway...) and imports maybe in the short-term while the renewables are being put in place.	Johan	retired
2022-07-11 13:08:14	Western Cape	Yes I do	Solar	Focus on solar and wind power opportunities.	Donald	retired
2022-07-11 13:07:50	Western Cape	Yes I do	Solar	I don't really care what the solution is Solar, Coal, Gas whatever but something needs to be done. Eskom are obviously not equipped or experienced enough to resolve the crisis. We never had this problem when we were under the "apartheid " rule and the current government agreed to get rid of all the qualified and knowledgeable people. What a hoax. ALL they care about is how much they can earn and milk out of the public. Why the heck don't they make it their business to get the millions of outstanding monies owed by people who are stealing electricity.	SHIRLEY	retired
2022-07-11 13:05:22	North West	Yes I do	Solar		Caren	retired

2022-07-11 12:40:38	Western Cape	Yes I do	Solar	Solar and wind as South Africa is blessed with both. Remove Mantashe and Gordhan from their positions and give Mr de Ruiters the true power to employ people with knowledge and experience, to fire all the corrupt, incompetent workers, to fire the workers that sabotage Eskom and to streamline the workforce in order to minimise the salary expenditure.	Karen	retired
2022-07-11 12:40:02	KwaZulu-Natal	Yes I do	Solar	Solar Energy is ideal for Sunny South Africa. Wind energy are already been used in the Northern Cape and it can be extended to more areas. South Africa need constant reliable electricity for it's economy to grow	Suzette	retired
2022-07-11 12:38:06	Gauteng	Yes I do	Solar	South Africa has an abundance of natural sun throughout the year and for me, solar energy would be the most reasonable and reliable source of electricity.	Madlangempisi	retired
2022-07-11 12:37:23	Gauteng	Yes I do	Solar	The first thing that the government must do is to allow Eskom to be able to purchase solar panels and cells from overseas. They are paying the local supplier far more than what they can get them for overseas. There are lots of malls, factories, banks and solar farms that could supply the grid with power. Allow them to do so	Paul	retired
2022-07-11 12:36:24	KwaZulu-Natal	Yes I do	Solar		Lorraine	retired
2022-07-11 12:35:25	Gauteng	Yes I do	Solar	A massive introduction of solar and wind energy to supplement coal is needed	Vincent Jerome	retired
2022-07-11 12:34:52	Gauteng	Yes I do	Solar	I support Hydro, Solar and Wind energy. We need to move to clean energy to save our planet.	Barbara	retired
2022-07-11 12:33:52	KwaZulu-Natal	Yes I do	Solar	We should immediately allow for private enterprises to supply us,as this gives us a choice of service provide to supply electricity like other countries have. This way we get to use the provider that best services its clients, and also we could make choices based on best service best price. We should go for a renewable source that is not easily susceptible to sabotage and crooked individuals at the helm. But companies that have the citizens at large in their best interest. Let's also ward off the president and his family and friends getting their greasy paws in this as suppliers.	Grace	retired
2022-07-11 12:32:55	Eastern Cape	Yes I do	Solar	IPP producers must be allowed to start immediately! There is no time left for this unbelievable mess created by incompetent ANC ministers. Mantashe and Gordhan should be removed from their posts. What is happening to this country is nothing less than deliberate sabotage!!!! In a country where solar and wind are no-brainers, it is an absolute disgrace that we are not already linked to other power sources. But no, while the populace suffer, the kings in their castles no doubt have full solar. It's disgusting!!!!	Denise Joy	retired
2022-07-11 12:31:52	Gauteng	Yes I do	Solar		Edward	retired

2022-07-11 12:31:36	Western Cape		Yes I do	Solar	Renewable, enviro-friendly electricity production must be put to the fore. Management of power production must be held accountable for lack of production and no management should receive annual bonuses if load-shedding occurs. Go to the solar and wind farms that are waiting to start up. There are farms ready to flow energy, but Government politics are stopping them. Methane gas, Cow manure energy all readily available resources just used right. Draw on research already done elsewhere,	Abby	retired

2022-07-11 10:42:05	Gauteng		Yes I do	Solar	400 days a year of sun in SA. Start building more solar farms like the one near de Aar	Martin	retired
2022-07-11 10:41:38	Northern Cape		Yes I do	Solar	Solar would be the most cost effective as most households could set up solar and sell the excess electricity to Eskom. This would mean that they use private money to invest in electricity generation. The private sector could then also generate huge quantities of green energy within a relative short space of time. With the additional advantage that it will be properly managed with just the necessary and competent people to run the plants and this will benefit the country economy as a whole.	Geert	retired
2022-07-11 10:39:21	Western Cape		Yes I do	Solar		Deborah	retired

2022-07-11 10:33:42	Gauteng		Yes I do	Solar	The key word in your question is immediate. Coal and nuclear power stations take a decade to implement. We don't have immediate access to gas or hydro and diesel is far too expensive. Renewables are the answer, and solar is the quickest and cheapest to implement. Overall, SA needs a mix of coal, nuclear and increasingly, renewables, both wind and solar. Government should immediately encourage residential and commercial and industrial property owners to become self sufficient in terms of electricity production by providing incentives to install solar powered systems commensurate with their consumption. These incentives to be in the form of rebates on the capital cost, and tax allowances. Everyone in SA should be encouraged, and perhaps required, to have some form of solar heating or solar based PV installation to reduce the load on Eskom.	Leon	retired
2022-07-11 10:33:38	KwaZulu- Natal		Yes I do	Solar	Solar and wind power are sustainable and never will run out	Angela	retired
2022-07-11 10:31:41	Western Cape		Yes I do	Solar	Please scrap all the red tape, privatize state enterprises That will solve all our problems	Luis	retired
2022-07-11 10:30:40	Gauteng		Yes I do	Solar	I support the use of Wind and Solar depending on the location. Since the coastal areas tend to windy wind power would be great. As there are many flat areas inland solar would be the best. Both methods would supplement the power grid	Clive	retired
2022-07-11 10:29:43	Western Cape		Yes I do	Solar	Wind, solar, coal anything to sort out this electrical supply problems in this country, the ANC can't make the right decisions they just destroy and misuse tax payers money	piet	retired
2022-07-11 10:27:58	Gauteng		Yes I do	Solar	We were promised that SA would use independent suppliers of renewable energy, but of course that never happened	Phyllis	retired
2022-07-11 10:27:12	Western Cape		Yes I do	Solar	We are destroying our country. The old method of power generation is no longer the way to power the country. We have the brains the will and the people power to change course and save our country for future generations.	Guenther	retired
2022-07-11 10:25:41	Gauteng		Yes I do	Solar	South Africa is going backwards and everyone is suffering - fix the electricity first and then business can start to recover, the economy will improve and jobs will become available again. We've been here for enough years now and it's getting worse rather than better.	Elize	retired
2022-07-11 10:23:01	Western Cape		Yes I do	Solar		Ashraf	retired
2022-07-11 10:18:02	Gauteng		Yes I do	Solar	Why not call back all the old Eskom engineers, who worked and knows exactly how to fix the problems we currently experiencing. Even if they are 60,70 or 80years old, they offered their help, but no one is listening, cause it's a race issue, or it's going to expose the INCOMPETANCE of the current government. Bring those people in let them advise, and assist :let's see if they can break this load shedding (pains) we experiencing day in and day out. Please, please, please, please	Adelaide	retired

2022-07-11 10:15:50	KwaZulu-Natal	Yes I do	Solar	We have absolutely every natural sources to warrant alternative energy to be provided to everyone The system we have in place is past a joke in this day and age	Naygie Nisha	retired

2022-07-11 10:12:27	Gauteng	Yes I do	Solar	We have so much land and knowledge available yet our hands are tied because the government does not allow competition.	Mark	retired
2022-07-11 10:12:27	Gauteng	Yes I do	Solar	Gas, Solar and Wind are our solution. !.) Due to the Mandela-Machel link, South Africa has put on hold the exploitation of it's huge gas resources in Mossel Bay. Why must SA pay Mozambique for a raw material that we already have? Answer: Political deal making not in the interest of SA but, the ANC. Gas fired power stations are a cheap and for now.the best interim solution 2.) Solar power is moving forward in leaps and bounds. The problem: It's free. This means it will be difficult for the ANC to control and make money out of. Strangling legislation will be the only solution for the ANC. Solar needs true freedom of expression with only a few minimum standards for safety sake. 3.) Wind power is also moving ahead fast. Once again, it's free. Not good for the ANC. Strangulation by legislation is the only solution for the ANC. Motsepe/Ramaphosa/Gadebe/Rainbow Energies. Come on everyone. Have we not smelt the roses yet. This is where it will start and it will end unfortunately.	Charles	retired

2022-07-11 09:40:28	Gauteng	Yes I do	Solar	I am trying to teach online and have continual disruptions due to loadshedding. In a country where the sun shines 360 days out of 365 days, it makes sense to harness solar power. As the government is unable to keep up with electricity demands, I believe that they should scrap the red tape and allow Independent Power Producers to offer consumers a service. This would also mean making solar systems more affordable and I am sure this would happen if there was more competition. Have access to a reliable power supply would also allow businesses to operate efficiently and this would in turn improve the countries economy.	Karen	retired
2022-07-11 09:40:16	Western Cape	Yes I do	Solar	Here we are - living in the land of sunshine. Blessed with an infrastructure but cursed by a power generation failure. To hook up with the Sun is the obvious solution. But the question is - why is our government so slow to respond? Are they stupid? No. So what's the hold-up?? If we fail to take action now - the future for our children and grandchildren will be darker than the grim days of Apartheid. It will be Outpower-heid. And it will be the end of Africa's shining star	Stan	retired
2022-07-11 09:37:57	Western Cape	Yes I do	Solar	I feel that there is enough sunshine in our country and that a few huge farms (cheaper than nuclear) can assist very quickly. My brother went off the grid in 2 weeks..	Pierre	retired
2022-07-11 09:37:55	North West	Yes I do	Solar	Mostly allways available.	Len	retired
2022-07-11 09:36:29	Gauteng	Yes I do	Solar	Any means of generating electricity should be explored and implimented ASAP. Also get the present power stations up and running. Get rid of incapable staff ASAP	Dawid	retired

2022-07-11 08:22:20	Western Cape	Yes I do	Solar	Solar fields on farms. Farmers and farm workers can maintain and earn. Farming solar would be the quickest input to achieve. Followed by storage options. And offshore wind farms.	Reg	retired
2022-07-11 08:22:00	Western Cape	Yes I do	Solar	Independent power producers should be allowed to supply electricity asap	jo	retired
2022-07-11 08:21:41	Limpopo	Yes I do	Solar		Anette	retired
2022-07-11 08:17:53	Gauteng	Yes I do	Solar	Instead of giving money to other countries our government can rather spend it on utilizing solar farms for more electricity production.	Elzet	retired
2022-07-11 08:17:29	Western Cape	Yes I do	Solar		Sylvia	retired

2022-07-11 08:16:56	Western Cape		Yes I do	Solar	Quite frankly, it is time the citizens of South Africa take the Country back by whatever means necessary. The government, municipalities and Eskom are here to serve the people and provide services for the people...not the other way around, which it has been since ANC have been in power. They have done nothing but milk the people for their own purposes and greed. Eskom should never have got to the state of disrepair it is in , but those in charge were too busy lining their own pockets to care. And why have those who illegally protested now not been arrested and charged. Instead they are getting paid extra for their actions. When is this pattern going to stop!!!! If we want to survive as a nation and individuals, this greedy corruption must come to an end. All these enterprises must be removed from government control and put in the hands of competent people who are willing to do whatever it takes for the greater good of the country. It is the people who must have the say and not the ANC and their cohorts anymore.	Shirley	retired
2022-07-11 08:16:38	Gauteng		Yes I do	Solar	We are in sunny Africa, harness the elements to produce power by setting up wind and solar farms, free energy that could provide jobs for many, many people and creating a competitive industrial environment	Kobus	retired

2022-07-11 07:45:22	Gauteng		Yes I do	Solar	Our country urgently needs to add capacity to the grid. This can be achieved rapidly by removing restrictions on the capacity IPP's and large users can produce. In addition to this, high volume users will alleviate strain on the network giving Eskom time to conduct repairs and maintenance of our aging fleet. We would then also be able to consider other mechanisms to deliver power adding to the fleet. The economy will also benefit by reducing load shedding as well as providing much needed jobs	Alan	retired
2022-07-11 07:45:19	Gauteng		Yes I do	Solar	Our country urgently needs to add capacity to the grid. This can be achieved rapidly by removing restrictions on the capacity IPP's and large users can produce. In addition to this, high volume users will alleviate strain on the network giving Eskom time to conduct repairs and maintenance of our aging fleet. 2022-07-10 22:41:01	Gauteng		Yes I do	Solar		M	retired
2022-07-10 22:38:49	Mpumal anga		Yes I do	Solar	You only allow one option. I chose Sun because you give only one option. Solar energy per day is only good for 6 hours. So a massive expansion is necessary with larger batteries for storage. We should actually use every non polluting commodity that Nature has to offer...like wind near the Coast.. or the natural wave thrust close to the Coast. We have very high mountains. Why do (cant we?)we not use light rollercoasters on rails/broad cables let it run on a rail on both sides down the mountain . The one goes down and pulls the other side spent one again up... see-saw motion where its friction can generate electricity. Use sun energy to charge batteries to do the 'up' ward pull	Elmer	retired
2022-07-10 22:35:18	Gauteng		Yes I do	Solar	It is immediately available, free and supply cannot be controlled by syndicates and unions cannot influence or affect supply.	Allan	retired
2022-07-10 22:30:09	Western Cape		Yes I do	Solar	Consider all options, free from political interests and interference	Hoffman	retired
2022-07-10 22:26:54	Gauteng		Yes I do	Solar	We are known as sunny South Africa but do nothing to harvest this free energy to the advantsge of ALL citizens.	Frederick	retired
2022-07-10 22:26:20	Gauteng		Yes I do	Solar	I could only select one- so picked Solar. Wind is also my choice - we have lots of wind and sun in SA, and it does not run out. We urgently need to utilise these resources! Especially with the future and our environment in mind.	Iris	retired
2022-07-10 22:26:08	Western Cape		Yes I do	Solar	We have a lot of sun and this would be one of the best sources as it is free and will keep us going. One could also back it up with wind.	monica	retired

2022-07-10 22:09:07	Western Cape		Yes I do	Solar	We are SUNNY South Africa, so use our sun.	Bruce	retired
2022-07-10 22:07:56	Northern Cape		Yes I do	Solar		Jacobus	retired
2022-07-10 22:06:41	Gauteng		Yes I do	Solar	South Africa has many hours of sunshine which should be utilised. With our high rate of unemployment many jobs could be created for the manufacturing of solar panels. South Africa invented the most cost effective solar panel but because of red tape the patent was sold to another country. Solar energy for individual houses is also a form of job creation and there is no danger to climate warming. It should be illegal not to use solar on any new building given the efficiency and cost of solar. People should be able to get tax relief for going over to solar.	hilda.web er@gmail. com	retired

2022-07-10 22:01:58	Western Cape		Yes I do	Solar	I understand that solar energy is the means of creating more power in the shortest time, but I am not sufficiently knowledgeable to say which type of energy is best in the long run. The important thing is for the private sector to be strongly involved, and for the government to recognise that it is crucial for the people of South Africa that the economic downturn be reversed.	Helen	retired
2022-07-10 21:57:30	Western Cape		Yes I do	Solar		Felicity	retired

2022-07-10 20:58:32	Western Cape	South Africa	Yes I do	Solar		Matthys	retired
2022-07-10 20:57:31	KwaZulu- Natal		Yes I do	Solar	Solar because it is the quickest to install. Subsidise businesses and domestic users to install solar by scrapping vat on installations. Excess power could be fed back to the grid.	Michael	retired
2022-07-10 20:56:42	Western Cape		Yes I do	Solar	The selection above only offers 1 option. It should be solar, hydro, wind, nuclear . This needs to be resolved as an emergency. No more delays as has been happening since 2008!	Carol	retired
2022-07-10 20:52:33	Gauteng		Yes I do	Solar	There are a lot of households in South Africa that are using Solar power to run their households. This works very well when the sun is shining and the sky is cloudless. A lot of the energy is stored in all types of batteries and most of the inverters can supply energy back to the grid when the grid is under pressure between 17h00 and 21h00. If the homeowners are allowed to supply the grid with stored power during the pressure time and then when the grid is no longer under pressure, then load the batteries from the grid. Make it worth for home owners to do this and you will see that people will start investing in more solar panels and more batteries to help support the grid. Homeowners can also supply excess solar power during the day to the grid.	Henk	retired
2022-07-10 20:52:29	Gauteng		Yes I do	Solar	Unfortunately I do not believe this government (ANC) has it in them to fix the Eskom saga or any other saga for that matter. They are a government of band-aid and speeches. Some of them are great orators . Most are incompetent and this is a proven fact. Personally I believe they the ANC and their bedfellows the EFF have an agenda to utterly destroy the entire countries infrastructure to rebuild an African Infrastructure for political reasons but this is going to cost lives and plunge many into poverty. I don't think they want Eskom fixed. It could take one decision my Cyril and make electricity a national disaster, which it is as it costing the country Billions, and order private companies to enter the network but to closely monitor cost. problem is perhaps twofold. Not enough cadres have investments in the private sector and wont make much money and secondly the criminal who are sabotaging Eskom have to be dealt with harshly. (Although I would not be surprised if this criminal element is supported by some politicians or parties).	William	retired

2022-07-10 20:52:24	Gauteng		Yes I do	Solar	Combination solar wind hydro. Do more dams on the orange river .dams in kzn . Pumping stations .	Rob	retired
2022-07-10 20:49:06	Free State		Yes I do	Solar	Sunshine is available almost year round and clean	Hendrik	retired
2022-07-10 20:47:23	Eastern Cape		Yes I do	Solar	As we are in dire need the red tape need to be scrapped so that power from Independent Power Producers can start flowing. If necessary the needed legislative amendments need to be made. While renewable energy resources remain the ultimate a quicker method to get the electricity flowing might be necessary in the short term due to the urgent need	Adriaan	retired
2022-07-10 20:46:05	Western Cape		Yes I do	Solar		Lynda	retired
2022-07-10 20:44:31	Gauteng		Yes I do	Solar	Solar electrical generation is not a magic solution - storage of electricity generated during daylight (= sunshine) hours is still an expensive alternative, but a combination of solar and wind generated electricity could go a long way towards filling the gaps left by Eskom's ailing network of aged or malfunctioning (sabotaged?) power generation facilities, beset as they are by illegal industrial action and serious design shortcomings.	Jan	retired
2022-07-10 20:42:42	Gauteng		Yes I do	Solar		Karel	retired
2022-07-10 20:38:34	Free State		Yes I do	Solar	geen bee of government inmenging nie.volgens regulasies vir veiligheid en doeltreffendheid.Enige iemand moet dit kan doen volgens vereistes	johan	retired
2022-07-10 20:38:14	Western Cape		Yes I do	Solar	Just give us electricity that is reliable from day to day. Stop stealing and sabotaging our security in this country	Hildi	retired

2022-07-10 20:33:08	Western Cape		Yes I do	Solar	Clean and quick energy supply for now. Wind power can also be looked into.	Julia	retired
2022-07-10 20:30:49	Outside SA	United Kingdom	Yes I do	Solar	Independent power producers are now essential since Eskom is collapsing !!!!!!!	Joel	retired
2022-07-10 20:29:38	Gauteng		Yes I do	Solar	It's free, a fast solution for now.	Lesley	retired
2022-07-10 20:29:15	KwaZulu-Natal		Yes I do	Solar	Although it depends on sunlight, much cheaper, more cost effective. We may also rely on wind power.	Mehmood	retired
2022-07-10 20:25:38	Western Cape		Yes I do	Solar	No to nuclear power. Yes to solar, wind and hydro power. Cut the red tape and let other suppliers get on board.	Elred	retired
2022-07-10 20:25:17	Gauteng		Yes I do	Solar	Independent power producers should be allowed to supply power to the South African power grid immediately to try and help alleviate the present shortage of electricity. It is the best and fastest way in which to do so, as other forms of power generation are difficult to achieve by independent power producers. We do not want IPP's to get involved with nuclear power, as that requires strict regulation. IPP's cannot build nuclear or coal fired power stations. Diesel is very polluting, and expensive to burn. Gas does not seem to be available in sufficient quantity to provide much relief. Hydro power would be wonderful, but that also depends on long building times. Cahora Bassa is not producing all that much these days and the hydro power project in the Congo never got out of the starting blocks. The one thing that the government should look into is a project in Vermont USA, which was published in TIME magazine recently, that told of linking all people who have solar energy in their houses, and storage batteries. The grid was set up in such a way that excess solar power would be drawn from the batteries of these private individuals when the power company needed extra power. It may not provide immediate relief, but was a super interesting way of doing things. The government could also offer subsidies for people to put solar geysers on their roof, so that their old geyser no longer is dependent on power provided by Eskom. In this way we can save a lot of power, which is then available for other purposes. We have had a solar geyser for 20 years already and it works well, has saved thousands of Rand in electricity bills. The government should allow for a lowering of import duties on solar geysers and more types of geysers to be approved for use. At the moment a Chinese made geyser is the one that gets recommended, but our Australian made geyser is not, which is a great pity, as it is excellent. There is lots we can do, and that can be done fairly quickly, but we need the regulatory framework that allows for this to happen and to be available at the best affordable prices.	Anne	retired
2022-07-10 20:23:59	KwaZulu-Natal		Yes I do	Solar	Solar power is more efficient and uses sunlight to recharge the system , it's no cost to consumers , free energy.	Soobramoney Armugam	retired
2022-07-10 20:23:50	Limpopo		Yes I do	Solar	We need electcticity right now. Why do we need to veg for it if the solution is there. People are willing to pay for their own facilities but then we get told that there will be tax on sun power. Stop being greedy and give S.A citizens the right to live in a country where you can choose the company who meets your requirement.	Kobie	retired
2022-07-10 20:22:38	Gauteng		Yes I do	Solar		Johannes	retired
2022-07-10 20:21:39	Limpopo		Yes I do	Solar	Indecision is a killer, even the anticated level of corruption is better than a total collapse of Eskom. They are proven to be ineffective. Private industry is better managed in all aspects of business to deliver viable power solutions. If necessary overseas expertise is available to help set this up, except China, they will rape us.	Alan	retired

2022-07-10 20:19:36	Western Cape		Yes I do	Solar	cut the red tape...we definitely need power ASAP...Govt failed us	Gloria	retired
2022-07-10 20:18:08	KwaZulu- Natal		Yes I do	Solar	Need to move to renewable energy sources ASAP	Leonard	retired
2022-07-10 20:17:39	KwaZulu- Natal		Yes I do	Solar		Noel	retired
2022-07-10 20:12:59	Western Cape		Yes I do	Solar	We need power. It can be made available. Why is the Govt reluctant to cut the red tape and get us out of trouble. Why is it taking so long when the answer is clear. Renewable energy needs to come on board immediately	Rose	retired
2022-07-10 20:12:10	KwaZulu- Natal		Yes I do	Solar	A combination of wind, solar & hydro depending on the area where it would be most effective. There are wind turbines on busy highways using the rush of traffic so not all wind turbines need be those massive towers, also upright solar panels so area of panels not excessive. So many new & innovative ways of generating power that total reliance on coal fired power is unnecessary.	Derryce	retired
2022-07-10 20:11:24	Western Cape		Yes I do	Solar	solar and wind can be installed in less time than all other methods. What about wave energy? We have a large coast line that can be used to harness wave power. It's being done successfully in a number of countries eg Ghana, England, Sweden, Portugal. A big no the Kapower ships when that money could be put to better use building something more permanent	Carol	retired
2022-07-10 20:09:51	Western Cape		Yes I do	Solar	Yes I do support scrapping the red tape for Independent Power Producers. In my opinion, Solar would suit SA's immediate energy needs. I absolutely support immediately giving independent power providers the green light to contribute towards the South African national power production! I specifically support wind and solar energy, but also all other forms of renewables! I only support imports of gas and fuel for our own energy needs and completely disagree with contracting other countries, like China, for energy production! I do not support nuclear energy or gas exploration.	Wilhelmina	retired
2022-07-10 20:09:48	KwaZulu- Natal		Yes I do	Solar	And nuclear. Clean & easy to dispose of waste. S.A. has an abundance of sun - especially west coast on relatively unproductive farming land. Storage via liquid hydrogen.	Jonathan	retired

2022-07-10 19:18:10	Mpumalanga	Yes I do	Solar	<p>1. Over and above Solar, all alternative sources of electricity production should be used to satisfy our immediate needs. Wind is in my opinion the next best alternative which can be used on a massive economical scale.</p> <p>2. But our one main problem is the actual payment for the use of electricity, which does not take place 100%, maybe only about 40% of users actually pay for their consumption. Government should allow ESKOM to become the supplier and the entity whom should have the right to cut off non-paying individuals. The municipalities do not have the competencies or the abilities to perform these function any longer.</p> <p>3. As, what was done when SA had both a water and electricity crisis some years ago there was a joint effort and also incentives for households to go to more economical globes, solar geysers and shower heads to reduce consumption levels. I believe that a system should be implemented to promote solar system installations in private households. INCENTIVES should be given to those whom incur such costs as they actually are relieving the pressure on both ESKOM and our USELESS MUNICIPALITIES. We do not only encounter load shedding from ESKOM, but frequently areas within the GOVAN MBEKI municipality are without power due to totally inadequate maintenance of the electrical infrastructure.</p> <p>SA is not only becoming a 3rd world country, it is competing with others such as Mozambique to be the worst in the world.</p>	Des	retired
2022-07-10 19:17:35	KwaZulu-Natal	Yes I do	Solar		Mary	retired
2022-07-10 19:16:52	Eastern Cape	Yes I do	Solar	<p>During Covid -19 we saw less people moving around in the World and therefore less pollution of the Atmosphere and we even saw hints of positive change.</p> <p>There should be no Doubt in anyone's mind the RENEWABLE is the only way to go which means either Wind or Solar. You only have to look around the World to see which things are moving.</p> <p>> Decisions have been made in Germany to close Nuclear Power Stations in favor of Wind</p> <p>> The City of Bremen is on the Coast has has sufficient Wind energy to almost power the Whole City which was a couple of years ago, it has surely increased since then. These are places that don't have or did not have Energy shortages.</p> <p>> We are not known as "Sunny South Africa"for nothing, let use it to our advantage.</p> <p>> I am not sure, however I believe Solar will have less Maintenance Requirements apposed which would have more Maintenance Requirements and therefore less cost Efficient in my opinion.</p>	Nigel Claude	retired
2022-07-10 19:14:19	Free State	Yes I do	Solar	We need Everybody to be able to generate their own power and feed surplus back into the grid.	Alan	retired
2022-07-10 19:10:23	Gauteng	Yes I do	Solar	Plenty of sun in RSA. Distributed production lessens load on main lines.	Eugene	retired
2022-07-10 19:05:19	Gauteng	Yes I do	Solar	Solar or wind, depending on the region, is freely available. Setup will be for the producer's account, perhaps subsidized by government depending on the scale of producer, so let's get on with it please.	Letitia	retired
2022-07-10 18:57:23	Gauteng	Yes I do	Solar		Valerie Anne	retired
2022-07-10 18:46:44	North West	Yes I do	Solar	Anything that works (other than coal) that can get us out of this energy crisis, loadshedding and dependance for electricity on a incompetent government. SOLAR, WIND, HYDRO, or NUCLEAR.	Johanna Maria	retired
2022-07-10 18:45:33	Western Cape	Yes I do	Solar	Eskom have rates that keep on being increased to a ridiculous point now yet dont provide the service. Our lives are disrupted every single day with loadshedding which has been caused by corruption and theft. This country was handed over in good working order in 1994 in all sectors. Nothing has been maintained or repaired instead the funds have disapeared into corrupt pockets.	PAMELA	retired
2022-07-10 18:43:40	Gauteng	Yes I do	Solar	RSA is a country filled with lots and lost of sunshine, totally free!! Competition is always an best option to force a serves provider to better client service and drop prices.	Gladys	retired
2022-07-10 18:43:30	KwaZulu-Natal	Yes I do	Solar	Most of the methods come with their own problems. If private companies took over supplying electricity they might choose whatever is practical and freely available in the part of the country they operate in. Nuclear would be the cleanest and cheapest but in the wrong hands ,dangerous. Even clean coal would be good. Hydro electric power is good . Solar has its limitations because electricity would be generated during the day only but might be feasible in areas where there is a lot of sunshine.Perhaps people who have excess solar could feed back into the grid and get paid for it? Wind turbines are a problem for animals and people that live close by with the "hum" they emanate and they are not biodegradable and have to be buried when they break down. I am no expert but there must be an answer to the disaster Eskom is.	Leigh	retired

2022-07-10 18:18:04	Mpumal anga		Yes I do	Solar	Eskom will not be able to provide the power needed by the country for the economy to recover and grow. It is still riddled with corrupted employees that are resisting and blocking necessary changes in the company. Solar energy is a quick fix that will provide immediate freedom to the entire industry. Surplus energy by consumers can be fed back into the grid	Alain	retired
2022-07-10 18:18:03	Mpumal anga		Yes I do	Solar	Eskom will not be able to provide the power needed by the country for the economy to recover and grow. It is still riddled with corrupted employees that are resisting and blocking necessary changes in the company. Solar energy is a quick fix that will provide immediate freedom to the entire industry. Surplus energy by consumers can be fed back into the grid	Alain	retired
2022-07-10 18:12:35	Western Cape		Yes I do	Solar	It is time for the government to accept that they cannot handle the energy crisis as it stand today. Too much damage was done by the failure of the minister of energy to act upon this when the problem first surfaced. Amend the legislation to allow private suppliers to participate in electricity generation. Scrap the red tape when it comes to awarding energy supply projects. The world is shouting clean energy, while the government keep going with coal, although they commit themselves in the global community to cut back on our carbon footprint. The time has come and the time is now for clean energy. Solar power is efficient, low cost to maintain, quickly to install. The lifespan of solar outweighs other forms of generation. It is clean and with the amount of sunshine we have in this country, it is a viable solution. If the government cut back on all the red tape and allow tenders to be awarded irrespective of BEE or BBBEE, which is an economy killer, to the best suitable contractors to do the job. Solar farms can be up and running in as little as 12 to 18 months. Eskom has 32 000 hectares available around their stations for independent suppliers which make it even better, because it will be easy to tie into the grid with infrastructure close by and available, saving even more time to cut back on the short supply of power. Eskom will generate some income from rental of the land used by suppliers. This will allow Eskom to maintain and refurbish their units without the problem we face currently, thereby expanding the lifespan of current plants. It is a win win situation for all involved. We just need the legislative bottleneck to be removed.	Willem	retired
2022-07-10 18:11:00	Western Cape		Yes I do	Solar	Solar/ Wind Turbines / Start up of Refineries and increase Sasols Loads, LNG for power will take to long ,no Gas structures in place.	Marius	retired

2022-07-10 17:06:27	Western Cape		Yes I do	Solar	Die Suid- Afrikaanse son is daar om krag te voorsien, en dit is verniet, behalwe om die toerusting opgestel te kry. Die Regering moet sy magsbeheptheid laat staan tot voordeel van die hele land en al sy mense.	Jacobus	retired
2022-07-10 17:03:46	Western Cape		Yes I do	Solar	Solar generation is now the cheapest method, and can be brought in most rapidly. We have areas with high numbers of sunny days. Wind is a second, the west coast is well known as a windy area.	Lincoln	retired
2022-07-10 17:03:24	Gauteng		Yes I do	Solar	Cut the red tape and get rid of the fossil powered generation plants	Barrett	retired
2022-07-10 17:02:40	Western Cape		Yes I do	Solar	Go solar, wind and hydro	Wim	retired
2022-07-10 17:01:29	Gauteng		Yes I do	Solar	I choose solar because South Africa has abundant solar radiation. Industries produces mainly during day hours where the maximum demand for electricity is required. At night, our existing power stations can produce electricity for the industries running 24/24. Slowly, the old power stations can be replaced by new nuclear power stations.	Eric	retired
2022-07-10 16:55:26	KwaZulu- Natal		Yes I do	Solar	Wind power will also be great	Erika	retired

2022-07-10 16:53:19	Gauteng	Yes I do	Solar	A solar farm can be built within one year. Wind farm can also be built in the same period of time. South Africa is bankrupted therefore it should allow independant and overseas producers to supply electricity. Regulations should mainly and fairly limit the charge per Mw/hours to avoid abuses. Long term independant investments should be allowed. Commitment by the IPP to supply electricity must be respected by them. It must be a commercial transaction between the IPP and Eskom. Politic must be kept out of the transaction. At a later stage, gaz, diesel or nuclear production can be considered only for peak hours or emergencies.	Eric	retired

2022-07-10 16:20:53	Mpumalanga	Yes I do	Solar			retired
2022-07-10 16:18:11	Western Cape	Yes I do	Solar	1. The Government's direct involvement in the electricity supply business should be reduced. 2. In the short to medium term RSA need a mixture of electricity generation and for the longer term we should consider a mix of nuclear, wind and solar and a minimum of fossil. 3. The nuclear option should be used primarily to augment power needs when solar or wind cannot supply enough eg. in the case of solar during night time or inclement weather and in the case of wind when there is not enough wind to turn the turbines. In Conclusion: There are certain areas of the country which gets in excess of 300 days of sunshine per annum and some areas of the Western Cape where the wind blows for more than 200 days per annum. The President and his cabinet must encourage investors from everywhere to invest in nuclear power generation.	G C	retired
2022-07-10 16:15:49	Gauteng	Yes I do	Solar	The red tape for solar and wind power should be scrapped immediately otherwise this country will collapse. Of course, if that happens Eskom will lose jobs and that means no votes for the ANC. Who cares if the SA population suffer, as long as the fat cats have power.	Evangelia	retired

2022-07-10 15:19:11	Western Cape	Yes I do	Solar	Of course it should be scrapped. All State capture should go and private enterprise encouraged. That way there will be investment and not corruption. The ANC must go.		retired

2022-07-10 15:19:00	Western Cape		Yes I do	Solar	I think that both solar and wind power are well suited to the Western Cape. In South Africa we have sufficient sun and space to have Solar farms to produce electricity! It is sustainable and not harmful to the environment. Solar energy, energy from wind and hydro are just a few of the promising alternatives for a cleaner and greener future. These means of power replace our dependence on more traditional power systems and Eskom!	Sandy	retired
2022-07-10 15:06:01	KwaZulu- Natal		Yes I do	Solar	free	Mannie	retired
2022-07-10 15:02:03	Eastern Cape		Yes I do	Solar	The outsourcing of Eskom will lead to further corruption in SA. The NPA and other law enforcement dept's are being forced to look the other way , instead of bringing corruption within Eskom to a stop. But , Alas , the 'Ship' is without a crew , all below deck , looting the treasury. Divine intervention is keeping it from smashing into the rocks of socialism. But , hear me out , soon that 'Hand' will retract, and total choas will ensue. Perhaps, Solar power could work , because I don't think they've found ways of stealing, bribing , corrupting and threatening the Sun yet...???	Edwin	retired
2022-07-10 15:01:05	Western Cape		Yes I do	Solar	Solar, wind, hydro anything to add extra capacity to the grid. Enough is enough. Or maybe the government is enjoying watching the economy and everything else fail around it. Tony Yes I do Other I think that both solar and wind power are well suited to the Western Cape . Independent Power Producers should be allowed to immediately start production Johan Yes I do Solar We have ample sun and wind. Please think about global warming and start thinking these elements There is a need for competition in this area, and hopefully will thus have an impact on reliable, affordable power for all. We need to deregulate the grid completely so that anyone with the capacity to supply electricity to the grid can do so. This means incentivizing by paying producers the same unit price that Eskom requires customers to pay them. Once private producers go online, which includes grid feeds from homeowners, prices will start to drop dramatically. We need a diversity of sources of energy and it is time South Africa started looking into the world of free energy, energy from hydrogen, ammonia, from the Ether, which Tesla pioneered and scientists have continued to develop independently ever since. This is the most viable energy generation system as it taps into the infinite source of energy that permeates the entire universe, known as the Ether, and has none of the limits that mechanistic systems of energy generation that require friction. It is time for the government to stop supporting vested interests and bow to the needs of humanity and the truths of cutting-edge science. Until then there will always be a scarcity of energy and problems related to its generation. Stop letting your fellow South Africans down. Particularly the very poor, who have to resort to using candles during load shedding and increase the risk of burning down their shacks. Do something immediately.	Katinka	retired
2022-07-10 15:00:55	Western Cape		Yes I do	Solar	Solar, wind, hydro are preferable above all else.	Malcolm	retired

2022-07-10 14:54:51	Western Cape		Yes I do	Solar		MARLENE	retired
2022-07-10 14:51:23	KwaZulu- Natal		Yes I do	Solar	All legal ratepayers to be allowed to link excess power to grid immediately Vietnam could turn their crisis around in 2y We got capacity f. e. Mines factories domestic to assist NOW Govt Eskom not serious My gridpower link cut bu eskom due squatter Loliwe camp links but they still lit up like Christmas tree 12m later no assistance but deafening snowballing in summer They can sink into blackhole as not serious	Matthew	retired
2022-07-10 14:42:32	Gauteng		Yes I do	Solar	I'm sick and tired of load shedding and it will not end in the near future! So yes, we need a substitute and the sooner the better because our once beautiful and proud country is not surviving this onslaught. Only God can save us from all this wrong decisions and morons who calls themselves The Government! All they can do well is stealing, lying and cheating.	Veronica	retired
2022-07-10 14:41:11	KwaZulu- Natal		Yes I do	Solar	I believe that there needs to be an immediate end to any "red tape" regarding the introduction of alternative supplies of power to the grid. If necessary, our existing legislation should be scrapped or at least, amended. South Africa CANNOT continue to experience this destructive limitation of electricity, when we have an abundance of sunshine and wind at our disposal. If Elon Musk can create solar-panel plants, capable of enough electricity generation to supply a country, we can obviously salvage this catastrophic situation.	Corinne	retired

2022-07-10 14:39:22	Western Cape		Yes I do	Solar	I think that both solar and wind power are well suited to the Western Cape . Independent Power Producers should be allowed to immediately initiate the use of whatsoever alternative power production they have available. The government keeps on saying that small businesses must come on line, but with the present load shedding, it is impossible for anyone to start a small business which may depend on the supply of electricity. They cannot afford generators and gas is also very expensive.	Karen	retired
2022-07-10 14:33:05	Gauteng		Yes I do	Solar	The legislation should be adapted as soon as possible to allow MORE renewable power suppliers to feed electricity into the national electricity grid. I.e. to save our economy.	Peet	retired
2022-07-10 14:31:34	Eastern Cape		Yes I do	Solar	We are sick and tired of the economy being held to ransom by the incompetent, thieving, lawless ANC The country is dying economically and people are starving but the looting continues unabated. We need to ultimately get rid of albatross Eskom and allow innovative alternative energy suppliers to flood the markets so the country can survive and thrive.	Carol	retired
2022-07-10 14:28:58	Gauteng		Yes I do	Solar	Government must switch off all power to the failed E-Toll grid. Turn off the power to Companies, Businesses and any advertising which are on at night. do not punish the households who are consuming less power at night than all of the Commercial Companies who are consuming more power at night for no reason.	Craig	retired

2022-07-10 13:17:06	Gauteng		Yes I do	Solar	Solar panels is the way to go in our country where sunshine is for free. The initial investment is pricey but, it pays off beautifully.	Annie	retired
2022-07-10 13:12:18	Western Cape		Yes I do	Solar	Enough has been said as regards the best mix of options - look no further than the most recent NEC statement(s) related to NERSA's need to approve ON APPLICATION, removal of any generation cap & more	Keith	retired
2022-07-10 13:10:39	KwaZulu- Natal		Yes I do	Solar	South Africa has huge Solar and wind potential. Very quick to construct and bring in stream solar plants.	Trevor	retired
2022-07-10 13:10:19	Gauteng		Yes I do	Solar	Countries like Israel have been using solar power for decades. For our country to become economically viable again we need good power	Alison	retired
2022-07-10 13:10:15	Gauteng		Yes I do	Solar	Countries like Israel have been using solar power for decades. For our country to become economically viable again we need good power	Alison	retired
2022-07-10 13:10:08	KwaZulu- Natal		Yes I do	Solar		Laetitia	retired
2022-07-10 13:09:16	Western Cape		Yes I do	Solar	South Africa has 300 + sunny days a year. Its just common sense to make use of that energy source. Add to that wind turbines and we could quickly turn this tragic situation into a workable solution. Lets get rid of arrogant incompetence now!!	Eric	retired
2022-07-10 13:04:45	Gauteng		Yes I do	Solar		Mary-May	retired
2022-07-10 12:58:01	Free State		Yes I do	Solar	Subsidised solar panels would be the answer.	Doratheia	retired
2022-07-10 12:54:45	Western Cape		Yes I do	Solar	Solar of wind deur privaas maatskappye wat doeltreffend bestuur en onderhou sal word en deurlopend goedkoper krag volhoubaar sal voorsien op grond van vryemark beginsels.	Jd	retired
2022-07-10 12:51:27	Gauteng		Yes I do	Solar	This government has been a disaster in every way. Xuma and EFF.would be worse by far. But those who should know better have let SA down. Now the power/ electricity shut downs have been the last straw for all the droves now leaving or planning to leave the country. Solar should have been promoted, private electricity should have been encouraged, since EskomSePush has been a dismal failure. SA must wake up, even at this late stage.	Joan	retired
2022-07-10 12:50:26	Western Cape		Yes I do	Solar	Renewable in all forms are good for me, here where we stay, surage are collected by truck, taken to Gansbaai sewerage works, why are there not a biogas plant build, at least it can run the sewerage works. We need to think outside the box.	Harry	retired
2022-07-10 12:43:43	KwaZulu- Natal		Yes I do	Solar		Penelope	retired
2022-07-10 12:43:18	Western Cape		Yes I do	Solar	We must change ASAP before this incompetent and corrupt Government fucks up everything	Stuart	retired
2022-07-10 12:36:31	Western Cape		Yes I do	Solar	It would be far better to have qualified people in positions , and not because of their colour	Deon	retired
2022-07-10 12:34:48	Western Cape		Yes I do	Solar	Independent Solar sourcing should be allowed for private users without taxation and they should be charged for back up Eskom support on a consumption rate (Not a fixed Rate) Competition from Hydro, Solar and Wind should be allowed immediately to assist Escom and all supply should be regulated by government	Bruce	retired
2022-07-10 12:31:40	Western Cape		Yes I do	Solar	GET ON WITH IT we have had enough of governments DITHERING.	Francis	retired
2022-07-10 12:26:30	Eastern Cape		Yes I do	Solar	All farmers could have a small part of their farms dedicated to solar panels ans could earn a monthly income from this during the drought times too. Even wind farms on fatmers land will help to generate power.	Dlane	retired
2022-07-10 12:24:30	Gauteng		Yes I do	Solar	Also stop providing electricity to other African nations while our people struggke and the economy struggles.	Johanna	retired
2022-07-10 12:24:27	Western Cape		Yes I do	Solar	I support government assisted factories in each province for the manufacture of mainly solar panels for business and private use. Likewise inverters and batteries Could also be manufactured locally. These products could then be supplied to all households through there local municipalities at reasonable cost. This will create jobs as well as lighten the load on the power demand.	Elliott	retired

2022-07-10 12:22:10	Western Cape		Yes I do	Solar	It has to be Solar, even in the Cape, with wind back up. Government needs to incentivise buying solar for private persons, like everywhere else in the modern world. North Vietnam managed to over come their pwer problems by making it worth while for private citizens to install pv panels. For the Cape, we have thee Karoo to engineer massive solat farms , with easy distance of Caape toown and surrounds . Everybody should be allowed, where possible to feed back into the Grid, as is alowed by most sensible Governments around the World	peter	retired
2022-07-10 12:20:01	Western Cape		Yes I do	Solar	We need to move away from fossil power. Clean renewable power is required - Solar, Wind & Hydro is the way to go. Independant power producers are required and would be quicker in getting renewable power up faster.	Patrick	retired
2022-07-10 12:19:45	Gauteng		Yes I do	Solar	All methods of electricity production should be expedited with solar as the main component. Politicians should leave it to the experts to come up with solutions and fully support their recommendations even if it contradicts their political shibboleths	Graham	retired
2022-07-10 12:19:14	Gauteng		Yes I do	Solar		Anthony	retired
2022-07-10 12:19:07	Western Cape		Yes I do	Solar	PV-Solar would be the quickest solution and therefor preferred to get immediate relevance. Thermal-Solar and wind-technology as a long-term solution. All of them, the sooner the better!!!	Hans Rudolf	retired
2022-07-10 12:18:55	Western Cape		Yes I do	Solar	Solar and wind are good options. NOT coal. Other parties should be brought in to help generate power	Renee	retired
2022-07-10 12:18:23	Western Cape		Yes I do	Solar	It is clear that the current reliance on Eskom is not working. If there are private enterprises that can produce power for South Africa efficiently we should allow them to.	Tina	retired
2022-07-10 12:15:01	Western Cape		Yes I do	Solar	Hydro electricity should be incorporated in all dams as standard where viable.	Gail	retired
2022-07-10 12:11:42	Western Cape		Yes I do	Solar	Why is it we have an answer to a terrible situation but we dont take it?? That's so easy they want control, they want the MONEY and they want the power. Ali Barber and the 40 thieves.	Alma	retired
2022-07-10 12:09:33	KwaZulu- Natal		Yes I do	Solar	Please understand one simple principle. At some stage the existing needs serious overall or to be scrapped. Think of it this way A truck or car with well over 300 000kms on the clock that is used as a workhorse will fail continuously and must be replace with a new model. In the computer world if a Corporate is using 30 year old computers they are guaranteed to fail loose share price and most likely close. I ask the question why does Rskom think they are different. Eskom performance will over the next years fail continuously. Eskom is playing against the Law of Averages and it will hurt and duly disappear. I would hate to work in a Company that is so backward think. Renewables were erected for the Expo in Dubai in a short timeframe producing electricity for the new Town. Shame on you Eskom treating your customers as you do. Thank you	Christoph er	retired
2022-07-10 12:09:10	Gauteng		Yes I do	Solar	In sunny South Africa the sun needs to be used optimal as it is readily available and solar panels are already quite common in most private houses and farms. Hydro using the oceans. Eveey application from entrepreneurs should be considered positively to sell electricity to others Windpower may also be considered in windy areas	Johanna	retired
2022-07-10 12:05:40	Gauteng		Yes I do	Solar	Must be combination, solar and wind where appropriate and nuclear(but with our gov maintenance issues this last one must be private/gov owned.)	Rina	retired
2022-07-10 12:04:55	Gauteng		Yes I do	Solar	I feel solar is a great solution to the problem south africa faces today there is a lot of space in the Northern cape where we can have solar farms to harvest the sun's power in renewable energy it is good for the environment and has the power to save south africa from load shedding it eliminates extra cost for example buying coal which means there is more money to be made and it doesn't take long that long to build compared to other methods like nuclear	Athlie	retired
2022-07-10 11:59:41	Gauteng		Yes I do	Solar		H.F	retired
2022-07-10 11:58:18	Western Cape		Yes I do	Solar		Stephan	retired
2022-07-10 11:57:33	Western Cape		Yes I do	Solar	We have an emergency !!!! Scrap the red tape & get whoever we can to supply our country with power !!!!! Its shocking that we have to live & work like this because of failures in our government & corruption in our vital energy source - plus all the others like Prasa & more !!! We are going down all the way. Our poor beloved once productive country country is in tatters & broken.... Heartbroken citizen.	Catherine	retired
2022-07-10 11:55:18	North West		Yes I do	Solar	Clean,	dave	retired
2022-07-10 11:55:04	Western Cape		Yes I do	Solar		Eleonore	retired
2022-07-10 11:54:27	Gauteng		Yes I do	Solar		Anthony	retired

2022-07-10 11:52:51	Western Cape		Yes I do	Solar	In a lot of countries you see an enormous increase of solar panels. Even in countries with less sunshine. The quality and electricity production of solar panels are on high levels. They also became much cheaper and it is clean power. South Africa has a lot of space to place them and sunshine plenty. Also possibilities to connect them on big batteries to store the electricity. Not only cleaner but also much cheaper than alternative means of production.	Chris	retired
2022-07-10 11:51:55	Western Cape		Yes I do	Solar		julian	retired
2022-07-10 11:49:41	Western Cape		Yes I do	Solar	Both solar and wind can be built and implemented rapidly by private sector participants, but getting rid of red tape is probably the most important together with getting government out of the business of power generation and leaving it to deal with what is its job, governing. Government and political parties need to realise that expertise in the private sector needs to be used.	Alan	retired
2022-07-10 11:44:44	Western Cape		Yes I do	Solar	Private operations are great But government and company's Like Rain must be excluded	david	retired
2022-07-10 11:44:38	Gauteng		Yes I do	Solar	The more people install solar at their own cost, reducing Eskom's income further. Government can provide tax relief due to installation of solar and allow us to sell our excess power back into the grid for addressing shortages.	Tjaart	retired
2022-07-10 11:43:51	Gauteng		Yes I do	Solar	SOLAR	Hennie	retired
2022-07-10 11:39:38	Gauteng		Yes I do	Solar	There is no light at the end of the tunnel relying on Eskom to supply an uninterrupted power supply for South Africa's needs it has taken the ANC to destroy Eskom through mismanagement corruption and sheer ignorance of the industry. Yes I would want to see the private sector supplying power and the privatisation of Eskom and revert from coal fired power stations to Solar and wind generated power the sooner this is done then the country can try and prosper but I am afraid as long as there is an ANC government in power this is not going to happen but lets start somewhere by overcoming the power generation problem ASAP	stewart	retired
2022-07-10 11:37:39	Western Cape		Yes I do	Solar	There are plenty private individuals with solar plants and wind turbines who can quickly step up production to supply Eskom with more power so much needed	Gideon	retired
2022-07-10 11:36:30	Eastern Cape		Yes I do	Solar		MT	retired
2022-07-10 11:31:24	Gauteng		Yes I do	Solar	We must maximise our power production, but without corruption.	Ettienne	retired
2022-07-10 11:31:23	Gauteng		Yes I do	Solar	In my opinion, Eskom is fast becoming a white elephant. However change will take time, so privatise Eskom and get experts at running these types of plants in position to manage the production of electricity, whilst protecting it properly from those who would do SA harm. Whilst that is happening open up the taps and allow all who can generate solar or wind or any other 'green' energy solutions free rein to use South African nous to actually complement the Eskom scenario, gradually replacing it with new technology that is not harmful to our continued existence	Keith	retired
2022-07-10 11:28:48	KwaZulu- Natal		Yes I do	Solar	Solar and wind are clean and plentiful in South Africa.	Daphne	retired
2022-07-10 11:27:48	Western Cape		Yes I do	Solar	Eskom have shown themselves to be incapable of providing regular source of power. Solar is clean, easy to install in multiple locations simultaneously, and allows alternative service providers to participate .	Patrick	retired
2022-07-10 11:27:24	Western Cape		Yes I do	Solar		Julian	retired
2022-07-10 11:23:15	KwaZulu- Natal		Yes I do	Solar		Diana	retired
2022-07-10 11:22:17	Gauteng		Yes I do	Solar	We have the ideal climate to support either Solar or wind energy. Coal adds to pollution and is expensive. Another option is nuclear but I don't trust it will be safe if it is left to be operated by poorly skilled personnel. We need a solution asap as our economy cannot sustain all the loadshedding and current cost of power. If we really want to help the millions of poor citizens, find a solution that is cost effective	Jeny	retired
2022-07-10 11:20:02	Eastern Cape		Yes I do	Solar	Why would you not use that which is available? This country's biggest problem is that it is controlled by a bunch of imbeciles. None of them has any practical experience in their field of control nor do they have any managerial experience. Viva Africa!!! Sons of Ham!!!	Hennie	retired

2022-07-10 11:14:21	Gauteng	Yes I do	Solar	South Africa has sunshine all year long, and it should be utilized. Households should be provided with solar panels for free by the government, and be able to sell extra power that is generated back to the provider, or be credited for electricity saved. South Africa has deteriorated in keeping up/finding workable solutions, because they want the monopoly- to the detriment of the nation. Bail-outs DON'T solve the problem (SAA is proof of that) So, STOP wasting tax payers money, and use it to do something constructive, not destructive!! You should have woken up ages ago and privatized electricity years ago. South Africans can then have a choice, instead of suffering with load shedding. Load shedding is detrimental to EVERYONE in SA. Stop your controlling! We are fed up with your archaic ways of trying to run a country. Catch a wake-up, for Pete's sake - DON'T you have any common sense??	Leonora	retired
2022-07-10 11:08:02	Western Cape	Yes I do	Solar	Suid-Afrika het BAIE SON!!!	Jeanette	retired
2022-07-10 11:05:01	KwaZulu-Natal	Yes I do	Solar	Renewables is the way to go. We need power quickly and we need to privatise.	Yvonne	retired
2022-07-10 11:02:59	KwaZulu-Natal	Yes I do	Solar	We are very fortunate in SA. We have natural sunlight in all seasons. We should also include wind power in some areas. The solar / wind combination will ensure continuous power supply. Experts in the above topic will be able to offer suitable options .	Kay	retired
2022-07-10 11:01:29	Western Cape	Yes I do	Solar		Roz	retired
2022-07-10 11:01:09	Gauteng	Yes I do	Solar	Government has lost the ability to manage any SOE and these must be privatized so that it can be managed properly and services provided to the citizens of South Africa	Margaret	retired
2022-07-10 10:59:46	Limpopo	Yes I do	Solar		Bennie	retired
2022-07-10 10:58:39	Gauteng	Yes I do	Solar	We do not have enough water for hydro or the knowledge inside BEE to produce electricity where it is necessary to have people that want to work involved. Solar will reduce the demand for labor to a large extent	Michiel	retired
2022-07-10 10:57:43	KwaZulu-Natal	Yes I do	Solar	Use independent suppliers of electricity source	Manilal	retired
2022-07-10 10:57:25	Gauteng	Yes I do	Solar	Solar and wind. We urgently need other methods if creating power because without then the economy is being strangled, with devastating consequences to the country and the people	Penny	retired
2022-07-10 10:56:43	Western Cape	Yes I do	Solar	Solar energy seems to be the cleanest energy solution. Panels could be recycled to a point.	Gavin	retired
2022-07-10 10:56:36	North West	Yes I do	Solar	A very broad base of energy production is critically needed for any country that eyes economic growth of a high order.	Hendrik	retired
2022-07-10 10:55:19	Western Cape	Yes I do	Solar	Let's not waste money and time propping up corrupt and inefficient ESKOM with intermediate Gass powered plans. We can cope with loadshedding short term. We've learned how to. Let's move straight ahead to deregulated participation in solar and wind generation of electricity. Particularly solar. It already works. Let's scale it up and build the transmission and storage capacity we need.	Paul	retired
2022-07-10 10:52:52	KwaZulu-Natal	Yes I do	Solar		Sydney	retired
2022-07-10 10:51:10	Western Cape	Yes I do	Solar	In fact a combination of solar and wind power would make a difference. Why are we being held to ransom by stubborn politicians at this critical juncture of our countries economic decline?	Diane	retired
2022-07-10 10:51:02	Western Cape	Yes I do	Solar	I feel that all types of independent power should be made available.	Marie	retired
2022-07-10 10:49:08	Western Cape	Yes I do	Solar	South Africa should be able to utilise ALL its natural resources that includes solar, wind and hydro to generate the bulk of its power usage. Also individuals should be allowed to generate there own electricity and if they have a surplus sell it back to the grid at a decent rate	Albert	retired
2022-07-10 10:46:50	Western Cape	Yes I do	Solar	Without the proper skilled people, Eskom will never be able to survive and /or be able to remedy the current situation.	Albert	retired
2022-07-10 10:42:52	KwaZulu-Natal	Yes I do	Solar	All alternative sources of electricity production should be allowed ASAP.	Sue	retired
2022-07-10 10:40:45	Western Cape	Yes I do	Solar		Sal	retired
2022-07-10 10:38:34	KwaZulu-Natal	Yes I do	Solar	South Africa is ideally located for Solar power because for at least ninety percent of the time in the year, we have abundance of sun light to give us all the electricity we so desperately need. The sun will never get involved in state capture, large scale sabotage, corruption, and labour unions and staff hold our country to ransom. There are other alternatives also available, such as wind and hydro electricity. Much more jobs will be created and controlled, that is there will very little scope for corruption. Eskom must seriously consider shutting down all power stations one by one immediately.	VISHNUD UTT	retired
2022-07-10 10:36:52	KwaZulu-Natal	Yes I do	Solar	Any source of power for the present would be acceptable as long as it is privatised and we don't have to rely on ESCOM. The environmental issues can be worked on once the source of power is reliable	Rob	retired
2022-07-10 10:36:45	KwaZulu-Natal	Yes I do	Solar	Solar and Wind power sources are reported to be the best to choose in the 'Energy Emergency' that the NAtional Planning Commission has affirmed can be acquired and implemented in 2year s to bring an end to load-shedding	Mike	retired

2022-07-10 10:34:25	Northern Cape		Yes I do	Solar	The sun are freely available in South Africa winter and summer. Solar farms(plants) is already set up to help with the provisioning of electricity. Improve on more plants been set up. Arrange for more affordable solar products to the citizens of SA. Solar companies are loading there prices that makes it very difficult for the normal and low income groups, old people on pension to invest of set up a solar system.	Caroline	retired
2022-07-10 10:34:08	KwaZulu- Natal		Yes I do	Solar	The switchover over from coal will take time but power immediately available from solar should be allowed onto the grid while the process takes place.	John	retired
2022-07-10 10:33:51	Western Cape		Yes I do	Solar		Alison Buck	retired
2022-07-10 10:31:17	Gauteng		Yes I do	Solar	There was not an option for a variety of methods. We need to utilise all the resources at our disposal. Solar, wind , water and gas as we move away from coal. But I think for now is all the private generators of ekecttricity could get it added to the grid it would help with the load shedding.	Kennia	retired
2022-07-10 10:30:47	Gauteng		Yes I do	Solar	Don't know pros and cons too much for solar, but what are they waiting for.We are known as sunny South Africa,WHY IS THE GOVERNMENT NOT USING SOLAR POWER!!	Patricia	retired
2022-07-10 10:29:53	Western Cape		Yes I do	Solar	We in South Africa are blessed with plenty of sunshine and a lot of wind. These 2 x recourses would be the quickest and over and over renewable source of energy	Franz	retired
2022-07-10 10:29:36	KwaZulu- Natal		Yes I do	Solar		Ewart	retired
2022-07-10 10:28:55	Limpopo		Yes I do	Solar		Marthinus	retired
2022-07-10 10:25:56	Western Cape		Yes I do	Solar	Power production and distribution should be removed as a State owned enterprise and placed in the hands of various private sector independent entities with no Govt Ties This will prevent monopolies and create competition and hopefully best prices for users	Piet	retired
2022-07-10 10:25:35	Western Cape		Yes I do	Solar		Jennifer	retired
2022-07-10 10:18:04	KwaZulu- Natal		Yes I do	Solar	I don't feel that any one single source of power need necessarily be used.in the Cape where there is wind use wind. In the Karoo and the Kalahari where there is sun use solar. In Mpumalanga which is near to Mozambique use Gas. In the Berg area use Hydro	Glenn	retired
2022-07-10 10:17:05	Western Cape		Yes I do	Solar	Powe shedding is killing SA	Johannes F	retired
2022-07-10 10:15:25	Gauteng		Yes I do	Solar	South Africa's power situation is dire with no prospect of any improvement from Eskom because of obsolete power stations, way past their lifespan and the low level of management because of cadre selection. Environmental friendly solar energy is in abundance in South Africa, why not tap it. Incompetentstaff at Eskom and the union bosses hold us to ransom in order to keep their jobs. Away with Eskom!	Chris	retired
2022-07-10 10:14:12	Western Cape		Yes I do	Solar	Solar does not go on strike or suffer maintenance problems. Wind does not go on strike or hold to ransom with wage demands. Eskom / coal has too many corruption opportunities and insufficiently skilled staff.	Michael	retired
2022-07-10 10:13:43	Western Cape		Yes I do	Solar		Hanjo	retired
2022-07-10 10:13:37	Gauteng		Yes I do	Solar		Linda	retired
2022-07-10 10:12:12	Western Cape		Yes I do	Solar	It goes without discussion that the government should scrap all red tape measures so that the independent energy suppliers (wind and solar)can be part of the solution to the energy supply problem in our country. The government will never be able to solve the problem they are full of lies and deception and have run the country and economy into the ground. We need change get ride of the ANC government please voters open your eyes and see what they are doing to our beautiful country.	DG	retired
2022-07-10 10:11:05	North West		Yes I do	Solar		Elsa	retired
2022-07-10 10:10:08	KwaZulu- Natal		Yes I do	Solar	Everything must be done that can be done to alleviate the disasterous state of Eskom.Everyone that can assist to generrate more electricity should be allowed to do so.Legislation to do this should be fasttracked as soon as possible and licences granted asap.	Nicolette	retired
2022-07-10 10:08:58	Western Cape		Yes I do	Solar	Over the past few years we have lost jobs , we are soaked by inflation. Let start doing it ourselves, there are many people out there with the know how, give them a chance! If its not solar, it could be wind power or battery power. No more procrastination let's do it. It should be made compulsory for all new houses and building to have solar panels and or battery backup.	Linda	retired
2022-07-10 10:06:19	Western Cape		Yes I do	Solar	But no price increases	Werner	retired
2022-07-10 10:03:31	Western Cape		Yes I do	Solar	All available expertise should be harnessed into finding a solution. This is not politics but a state of emergency which must be resolved. The Country needs an immediate solution or it is the beginning of the end	Brian	retired

2022-07-10 10:02:50	Western Cape		Yes I do	Solar	Independent power suppliers should be introduced plus added wind and solar where possible as a safeguard If money wasn't stolen so much more could be done It's a disgrace that SA has lost all it's natural potential to be a more updated country.	DESIREE	retired
2022-07-10 09:57:47	Gauteng		Yes I do	Solar		Neil	retired
2022-07-10 09:56:31	Western Cape		Yes I do	Solar	Allow independent individuals and corporate firms (with no government fat cats involved) to create clean, mainly solar and hydro-electric power. Wind power creates too many bird fatalities.	Merle	retired
2022-07-10 09:56:31	Gauteng		Yes I do	Solar	IPP s should be allowed and encouraged as soon as possible.	Eleanor	retired
2022-07-10 09:52:10	Eastern Cape		Yes I do	Solar	Stop the corruption	Trenley	retired
2022-07-10 09:50:32	Western Cape		Yes I do	Solar	Any clean method of generating electricity is welcome.	Taryn	retired
2022-07-10 09:49:56	KwaZulu- Natal	south africa	Yes I do	Solar	South Africa the sunshine country!! The sun is clean it's free and it's effective and it's energy in this country is going to waste. Wind is also a good choice for the same reasons.	Daphne	retired
2022-07-10 09:49:47	Eastern Cape		Yes I do	Solar	South Africa is in a crisis, any and all means should be used to get us out of it. NOW	Esmee	retired
2022-07-10 09:47:34	Western Cape		Yes I do	Solar	Become independent of government. Allow individuals and corporate firms to take over with the use of renewable energy. Beware wind power -- too many birds are killed. Allow the people of S.A. to create solutions, but make sure the government fat cats aren't involved.	M	retired
2022-07-10 09:47:23	Western Cape		Yes I do	Solar	Open the market for supply of solar panels!! SA have abundance of sunlight!!	Gustav	retired
2022-07-10 09:47:13	Northern Cape		Yes I do	Solar		Clarke	retired
2022-07-10 09:47:00	Gauteng		Yes I do	Solar	PV solar installation for business and domestic use can be easily installed ...within a day for a medium to large household... and possibly a week in the case of some businesses depending on size...the components are available....if we as South Africans buy in volume the prices can be reduced....even if not manufactured here in SA....we can also get some local manufactured items here ,creating job opportunities in the entire value chain...in the long term the excess can be put into the grid...thereafter we can look at other more efficient and climate friendly solutions.	Ramesh Khooshal	retired
2022-07-10 09:45:42	Western Cape		Yes I do	Solar		Hazel	retired
2022-07-10 09:45:09	Western Cape		Yes I do	Solar	South Africa has an abundance of sunny days and solar as well as wind power lants should be utilised to generate power.	Francois	retired
2022-07-10 09:44:15	Eastern Cape		Yes I do	Solar	South Africa has plenty sun to support the solar. Please allow the private companies to help us with power we so desperately need .	Fiona	retired
2022-07-10 09:41:56	Eastern Cape		Yes I do	Solar	Solar and wind are renewable resources. Private producers will be the answer. Get it out of the hands of looters	Andre	retired
2022-07-10 09:39:55	Western Cape		Yes I do	Solar		Abraham	retired
2022-07-10 09:39:15	Gauteng		Yes I do	Solar		Kobus	retired
2022-07-10 09:37:12	KwaZulu- Natal		Yes I do	Solar		Keith	retired
2022-07-10 09:36:35	North West		Yes I do	Solar		Charmaine	retired
2022-07-10 09:36:32	Gauteng		Yes I do	Solar	Although more needs to be done to recycle solar panels and batteries more effectively, right now, together with hydro and wind, it is the best option to get us out of this disaster .	Lindsay	retired
2022-07-10 09:36:04	Gauteng		Yes I do	Solar	Solar is a renewable source?	Louis	retired
2022-07-10 09:35:45	Western Cape		Yes I do	Solar	Private and give people incentive who go off the grid.	Christl	retired
2022-07-10 09:29:19	KwaZulu- Natal		Yes I do	Solar	We need both solar and wind power asap with no red tape. As things critical and badly effecting the economy maybe we need the power ships but not for 20 years but maybe 5 year contract. Eskom is totally ruining the economy. Although the environmentalists don't like the drilling for gas we need the gas badly and must overrule the green energy side.	Murray	retired
2022-07-10 09:29:07	Gauteng		Yes I do	Solar	Solar panels will assist in drawing energy for power stations.	Lynette	retired
2022-07-10 09:29:00	Gauteng		Yes I do	Solar	Solar panels will assist in drawing energy for power stations.	Lynette	retired
2022-07-10 09:26:37	Western Cape		Yes I do	Solar	Solar is the cleanest, quickest to activate and cheapest to install.	David	retired
2022-07-10 09:26:12	Mpumal anga		Yes I do	Solar	There is enough sunshine in this country to utilise it for power.	Trish	retired
2022-07-10 09:23:22	North West		Yes I do	Solar		Driekie	retired
2022-07-10 09:22:21	Gauteng		Yes I do	Solar		Paula	retired
2022-07-10 09:21:17	Western Cape		Yes I do	Solar		Yvonne	retired

2022-07-10 09:21:14	Western Cape		Yes I do	Solar		Yvonne	retired
2022-07-10 09:19:29	Limpopo		Yes I do	Solar		Lorraine	retired
2022-07-10 09:19:24	Western Cape		Yes I do	Solar	First choice SOLAR - especially solar farms in the Northwest Second Wind in the eastern/western cape Then we need many more pump storage schemes like Cape Towns Steenbras damn/pump/turbine system Hopefully forms of battery storage will be developed eg vanadium pentoxide Next hydrogen production using solar (see first choice) Liquid hydrogen as a natural gas substitute - similar storage/transport requirements All of the above need the private sector driving the development of these ideas; totally separate from government	Richard	retired
2022-07-10 09:15:48	Eastern Cape		Yes I do	Solar	It needs to be started NOW !!	Jennifee	retired
2022-07-10 09:13:46	Western Cape		Yes I do	Solar	Does less to sitting the earth as far as I have been told	Eddie	retired
2022-07-10 09:13:20	Gauteng		Yes I do	Solar	As long as government officials are receiving kickbacks for cooperating with others to acquire power SA will not make great strides. IPP's should all produce as much as they wish and this will take pressure off the grid.	Margie	retired
2022-07-10 09:11:01	Western Cape		Yes I do	Solar	It is abundantly clear that Eskom has no short term solution to the energy crisis. This is hurting the economy in general, as well as businesses and the whole of the SA population. It has got to a point where Eskom is unable to supply energy to consumers. All sustainable and green solutions must be allowed, particularly wind and solar. The coal fire stations must be decommission over time as much as is possible. We need to have ethics of looking after the planet and the people. We know the harm that coal does and we also know that the coal powered generators are in trouble with maintenance not being able to be completed, continually breaking down, and even the new generators are not producing. Nuclear in my opinion is NOT the best option - when something goes wrong, it goes really wrong! Please change the law to allow independent producers the ability to produce green energy asap, this means not only big corporations but also the man in the street. The govt has been unable to fix the problem for many years. Its time that you allowed us to come up with solutions that work and allow the law to be amended for that to happen	Derek	retired
2022-07-10 09:10:44	Western Cape		Yes I do	Solar	Guys, you have failed miserably. Not only do we have a messed up economy as a result of horrific linear governing, but we have had to put up with a couple months of load shedding in a six month period and yet we still have to pay for the days we are not getting electricity. Madiba would be horrified at how badly you govern. We need lateral thinkers and if this is truly a rainbow country, then all races should be employed and NOONE should have to pay the price of turning someone in for corrupt dealings. I completely support green energy and it has to be run by experienced people not nepotism. Also we need people to protect these plants who do not invite people in to vandalise the plants. Its enough already.	Lana	retired
2022-07-10 09:09:15	Western Cape		Yes I do	Solar	There is absolutely no logical and legitimate reason not to allow private supply of power.	Ruth	retired
2022-07-10 09:08:06	Gauteng		Yes I do	Solar	Our municipality doesn't care either way - I need a guarantee that in my old age I will be able to live safely.	Diane	retired
2022-07-10 09:08:06	Limpopo		Yes I do	Solar	Solar is in my opinion clean, does not harm the environment. The government should bill every user including our neighboring countries such as Mozambique, Swaziland, Botswana, Zimbabwe, Lesotho, etc. They should pay the same rates as South African households. All households should be on prepaid billing system to avoid that some organizations, households, business, municipalities, etc. do not pay their accounts. It will also streamline and reduce the accounts section of Eskom as there will be no accounts anymore.	Derk	retired
2022-07-10 09:08:00	Mpumalanga		Yes I do	Solar	Solar is available all over SA. Nuclear is too expensive, wind is available in only a few places, we don't have enough water for hydro.	Richard	retired
2022-07-10 09:03:57	Western Cape		Yes I do	Solar	Solar en wind kan aangewend word. Die huidige regering moet nie alleenreg besit vir die verskaffing van elektrisiteit. Korrupte amptenare is verantwoordelik vir ons krisis.	Leon	retired
2022-07-10 09:03:14	Gauteng		Yes I do	Solar	Eskom is a disaster	Gladys	retired
2022-07-10 09:03:10	Western Cape		Yes I do	Solar		Blanche	retired
2022-07-10 09:02:58	Western Cape		Yes I do	Solar	While private business should be allowed to set up solar and wind farms, with a caveat that manufacture of panels and propellers must be within SA, within 18 months of licence being granted, private individuals with their own solar power should be able to sell their excess power they have generated back to the grid. Eskom can make money from this exchange as well as increase the capacity of the grid by 5-10% within a very short space of time.	Tim	retired

2022-07-10 09:02:11	Western Cape		Yes I do	Solar	We are paying far too much for electricity ! Solar is cheaper. The economy will never grow unless we pay less for electricity and petrol !	Desmond	retired
2022-07-10 09:02:08	Free State		Yes I do	Solar	It is the cleanist form of energy together with wind and hydro electricity.	Philip	retired
2022-07-10 09:01:30	Gauteng		Yes I do	Solar	Why are the debates on green power still continuing at this late stage. The government (ANC) has used ESKOM to deflect that they are responsible for the power supply mess. No matter how we produce the power... wind.... solar... hydro.... we have to reduce our reliance on ESKOM and the government.	Arthur	retired
2022-07-10 09:01:21	Gauteng		Yes I do	Solar		Alice	retired
2022-07-10 09:00:28	Western Cape		Yes I do	Solar		Rosa	retired
2022-07-10 08:56:09	KwaZulu- Natal		Yes I do	Solar		Caz	retired
2022-07-10 08:54:13	Gauteng		Yes I do	Solar	Eskom needs to be independent of the ANC government. Scrap all red tape. We need power solutions now. Bringing former employees back to mentor current employees is a great idea	Anne	retired
2022-07-10 08:53:32	Western Cape		Yes I do	Solar	We have known since 2007 that we have a problem with electricity supply . For goodness sake cut the red tape, get experts in the various fields together and decide on the way forward to provide sufficient electricity but do it quickly. Currently our economy is being destroyed while politicians play their games for personal benefit rather than what is beneficial for the whole country. There are many people out there who know what has to be done but the government refuses to listen to them possibly because they do not share the same political agenda as the experts. Why is Gwede Mantashe so slow in making decisions!!!!	Donald	retired
2022-07-10 08:53:18	Western Cape		Yes I do	Solar		Cindy	retired
2022-07-10 08:50:44	Western Cape		Yes I do	Solar		Wulf	retired
2022-07-10 08:50:40	Western Cape		Yes I do	Solar		Wulf	retired
2022-07-10 08:49:55	Western Cape		Yes I do	Solar		Carrol	retired
2022-07-10 08:49:27	KwaZulu- Natal		Yes I do	Solar		Denise	retired
2022-07-10 08:48:55	Mpumal anga		Yes I do	Solar	Wind also. Gas and diesel as a last resort. No coal or Nuclear. Hydro is an option but we do not have the water resources or the time to build hydro plants. Solar on all the roofs of SA businesses and homes would make a dramatic difference. Subsidised installation using the wasted monies on maintaining decrepit outdated coal fired generation plants.. Remove those people with interests in these.	Charles	retired
2022-07-10 08:48:35	KwaZulu- Natal		Yes I do	Solar	We need change as soon as possible in order to get the solution going. As things stand now it is getting worse every year so a different approach is needed immediately and I think solar and wind power could be the solution.	Pat	retired
2022-07-10 08:47:55	Limpopo		Yes I do	Solar	Ek stem 1,000,000 keer saam dat die leuens/diefstal nou onmiddellik moet STOP!!! Kyk hoe lyk ons mense/ons land/ons ekonomie!! Ek's de duiwel in vir mense wat ons sooooo skade aandoen op menige vlak!!! Dis sommer plein weg nonsens!!!! Daar moet onmiddellik opgetree word en privaat persone toelaat om te help met kragkrisis. Dankie!	Hester	retired
2022-07-10 08:47:22	Western Cape		Yes I do	Solar		Debbie	retired
2022-07-10 08:46:13	Western Cape		Yes I do	Solar	Design, install and operate large Photo Voltaic plants (PV) on e.g. milk farms in some 1,5 m height to allow for farming and electricity generation at the same time. Once done, ave ESKOM check the PV system and connect it to the grid, if foundprofessionally done.	Rainer	retired
2022-07-10 08:43:46	Western Cape		Yes I do	Solar	I would like SA to start using more of our clean renewable energy. Moving forward with coal burning power plants is going to be throwing money away at a dying project. We have so many other options here in SA, hydro, nuclear, wind and solar. Let's do the right thing for our country and environment.	Juliet	retired
2022-07-10 08:43:43	Western Cape		Yes I do	Solar	I would like SA to start using more of our clean renewable energy. Moving forward with coal burning power plants is going to be throwing money away at a dying project. We have so many other options here in SA, hydro, nuclear, wind and solar. Let's do the right thing for our country and environment.	Juliet	retired
2022-07-10 08:42:14	Gauteng		Yes I do	Solar		darrell	retired
2022-07-10 08:41:28	Western Cape		Yes I do	Solar	Solar wind and hydro generation are the quickest and cleanest forms of power generation that can supplement our power requirements.	Patrick	retired
2022-07-10 08:40:15	KwaZulu- Natal		Yes I do	Solar		Bev	retired
2022-07-10 08:40:10	Western Cape		Yes I do	Solar		Frank	retired

2022-07-10 08:38:13	Western Cape		Yes I do	Solar		MJ	retired
2022-07-10 08:36:44	Western Cape		Yes I do	Solar	Get rid of the red tape. Simplify and speed up the process for the installation of solar and wind farms .	John	retired
2022-07-10 08:36:43	Western Cape		Yes I do	Solar	Get rid of the red tape. Simplify and speed up the process for the installation of solar and wind farms .	John	retired

2022-07-10 08:34:27	Gauteng		Yes I do	Solar	We need clean energy and must avoid any source of energy that could be subject to corruption by government officials ie imports, gas etc. This legislation is long overdue and should have been changed as far back as 2007/8 when loadshedding reared its head	Evadne	retired
2022-07-10 08:34:22	Gauteng		Yes I do	Solar	Quick solution is Solar. Medium /longer term, Wind. Let us use the natural sources God has provided!	Cheryl	retired
2022-07-10 08:34:04	Gauteng		Yes I do	Solar		Andrew	retired
2022-07-10 08:33:47	Western Cape		Yes I do	Solar	It's so obvious! The Sun shines virtually everyday.	Rob	retired
2022-07-10 08:32:55	Western Cape		Yes I do	Solar	Solar and wind. Two natural resources at disposal. Use them.	Annalize	retired
2022-07-10 08:32:26	Gauteng		Yes I do	Solar	Solar should be subsidized for all households. Australia is leading the way with huge solar fields and battery storage. We have more than enough sunshine! Time for the ANC to catch up and catch a wake up. And stop running this poor country into the ground, while gathering their own pockets!	Anton	retired
2022-07-10 08:31:27	Western Cape		Yes I do	Solar		Vladimir	retired
2022-07-10 08:29:39	Gauteng		Yes I do	Solar		Asrafali	retired
2022-07-10 08:28:41	Western Cape		Yes I do	Solar	The most practical is Solar in the short term, as its lead time to install is shortest than other options that are more complex, and some are not environmentally sustainable Encourage Individual Installation by those that can afford it This option lessens the burden from the state and is the best short term solution if the state declares a Energy Emergency NOW Jo	Jo	retired
2022-07-10 08:28:38	Western Cape		Yes I do	Solar	Basically all of the above except diesel and coal should be offered to independent suppliers	Frank	retired
2022-07-10 08:28:26	KwaZulu- Natal		Yes I do	Solar	While I support the idea, I'd like to know who will monitor and control who is allowed to supply? Will we be walking into another monopoly? This time, Cyril and his family? Is this another setup for them to take control?	Lynne	retired
2022-07-10 08:27:50	North West		Yes I do	Solar	Any form of power available in the short or long term would be acceptable from whatever source	david	retired
2022-07-10 08:26:10	Western Cape		Yes I do	Solar		Greg	retired
2022-07-10 08:24:15	Western Cape		Yes I do	Solar		Hilton	retired
2022-07-10 08:24:09	KwaZulu- Natal		Yes I do	Solar		Robynne	retired
2022-07-10 08:23:15	KwaZulu- Natal		Yes I do	Solar	Although I say solar, wind and other methods should be looked at, coal is very polluting.	Ken	retired
2022-07-10 08:22:28	Western Cape		Yes I do	Solar	With the abundance of the natural resources we have in RSA we should be moving very fast to renewable energy. We have huge amounts of solar in the Northern cape with huge amounts of empty space for solar farms. We have huge amounts of wind around the coast and should move to wind farms in Eastern and Western Cape. We need to stop reliance of fossil fuels and only use gas at times of peak demand when required until more efficient and longer lasting battery back up is available.	Martin	retired
2022-07-10 08:16:42	Free State		Yes I do	Solar		Hendrik	retired
2022-07-10 08:16:03	Eastern Cape		Yes I do	Solar	Private solar Installations could contribute significantly to the nationale power supply, if they would be allowed to feed into the grid. This works perfectly in many parts of the world, why not in South Africa?	Hans	retired
2022-07-10 08:12:31	Gauteng		Yes I do	Solar	It is time for South Africa to move away from the old archaic coal driven power stations. Eskom has also proven to the country that it's not reliable as an electrical power provider to the country. They've had the monopoly for too long now, and they like keeping the country hostage to their demands.	Piet	retired
2022-07-10 08:09:50	Western Cape		Yes I do	Solar		JACOBA JOHANNA	retired
2022-07-10 08:09:49	Limpopo		Yes I do	Solar		SUSAN	retired
2022-07-10 08:09:41	Western Cape		Yes I do	Solar	GET ON WITH IT - what is the government waiting for???	Sally	retired
2022-07-10 08:09:04	Western Cape		Yes I do	Solar	I think renewable energy is the answer. It doesn't allow one to choose more than one but wind as well as solar would be my choice. I also saw a documentary on what they are doing in Finland at the moment, heating sand to extremely high degrees to heat water and supply that to this small town. The heating of the sand in tall silos was done by renewables. Such a great idea. Look into this. Please. Learn from other countries.	Mandy	retired
2022-07-10 08:07:27	Free State		Yes I do	Solar	Geen land kan staande bly soos wat dit nou gaan nie. Geen besigheid kan so winsgewend wees nie. Laat die privaat sektor toe om sonkrag, windkrag in die grid in te voer. Kernkrag is n bekommernis want onderhoud (wat nrens toegepas word nie) kan n ramp veroorsaak.	Sandra	retired
2022-07-10 08:06:53	KwaZulu- Natal		Yes I do	Solar	Completely scrap all legislation that is stopping Corporations (private Entities) in setting up large wind and solar systems .	Logan Mark	retired
2022-07-10 08:06:14	Eastern Cape		Yes I do	Solar			retired

2022-07-10 08:02:31	Western Cape		Yes I do	Solar	Solar is the cleanest and most freely available. It does have challenges but is mostly available in our country. It should be combined with gas to carry us over cloudy and rainy days and nights.	Vincent	retired
2022-07-10 08:00:36	Western Cape		Yes I do	Solar	Renewable energy is the way to go. I choose solar as a source, because my perception is that there is more sun than wind in SA. Otherwise I would have said solar and wind.	Berlo	retired
2022-07-10 08:00:34	Gauteng		Yes I do	Solar	Although a mix of clean energy production would be the longterm solution, Solar energy with storage would be the best and quickest way to alleviate the energy problem of SA in the short term.	Bruno	retired
2022-07-10 07:59:17	Western Cape		Yes I do	Solar	Get rid of that dinasor Matasha!	Wendy	retired
2022-07-10 07:58:30	Gauteng		Yes I do	Solar	Green energy is the best for the environment and the choice of Solar is the most affective and soonest to eliviate the crisis we have and gives all South Africans the oppertunity to participate and in so doing create sustainability in groath	Jacobus	retired
2022-07-10 07:57:02	Western Cape		Yes I do	Solar	Have seen how most of Europe use solar for their energy very successfully. Green energy assists with climate change too which is a major concern globally.	Heather	retired
2022-07-10 07:56:55	Western Cape		Yes I do	Solar	Have seen how most of Europe use solar for their energy very successfully. Green energy assists with climate change too which is a major concern globally.	Heather	retired
2022-07-10 07:56:21	Gauteng		Yes I do	Solar	We will always be on the backfoot when we have corrupt incompetents in charge	James	retired
2022-07-10 07:56:17	Western Cape		Yes I do	Solar		Betty	retired
2022-07-10 07:55:31	Free State		Yes I do	Solar	Look at all possible ways of generating electricity and get the useless anc out of the loop. Get the independent providers onboard to work with Escom. Get the government out of Escom. I hope you have enough crayons and time to explain this to the anc.	Dennis	retired
2022-07-10 07:54:47	Gauteng		Yes I do	Solar		Tina	retired
2022-07-10 07:54:05	Western Cape		Yes I do	Solar	Nuclear, solar, wind. These are good options. Power is needed NOW. Government must not waste time and act immediately and allow IPP to supply electricity. Take the money used for all ANC campaigns and use that to pay for clean power. This is an emergency, cut the huge salaries and use our tax money wisely.	Mandy	retired
2022-07-10 07:53:13	Western Cape		Yes I do	Solar		KAREN	retired
2022-07-10 07:51:39	Western Cape		Yes I do	Solar	lot of sunshine in karoo to harvest wind and sun	Johannes	retired
2022-07-10 07:50:32	Eastern Cape		Yes I do	Solar	Use Combination of wind, solar and hydro.	Lynette	retired
2022-07-10 07:50:26	Western Cape		Yes I do	Solar	I have always had the utmost respect for Mr Gordhan. He is a man who will carefully consider all the options and and get expert opinions. I frankly trust him to make the right choices and act in the best interests of the country.	Dee	retired
2022-07-10 07:48:38	Western Cape		Yes I do	Solar	This unbearable capacity of government to provide its country has proven they are unable to do the job.. give private sectors an opportunity! Already have my solar panels..	Armelle	retired
2022-07-10 07:47:14	Western Cape		Yes I do	Solar	A number of options suited to the area should be considered. Diversification is the best solution for the environment and affordability.	Sylvia	retired
2022-07-10 07:46:51	Eastern Cape		Yes I do	Solar	Solar and wind.	Terry	retired
2022-07-10 07:44:10	Gauteng		Yes I do	Solar	Wind and hydro also possibilities for longer term solutions but solar best for immediate solution.	Adele	retired
2022-07-10 07:40:42	Free State		Yes I do	Solar	Solar , wind and hydro are the way to go.	Darryl	retired
2022-07-10 07:39:34	Eastern Cape		Yes I do	Solar		Brian	retired
2022-07-10 07:39:09	Western Cape		Yes I do	Solar	Surely in a country with so much sunshine, we should be able to utilise the sun for energy. The abundance of sunshine would also make in more affordable by the man in the street, who is cash strapped and in desperate need of some financial relief.	Michael	retired
2022-07-10 07:35:58	Western Cape		Yes I do	Solar		Brian	retired
2022-07-10 07:33:56	Western Cape		Yes I do	Solar		Pino	retired
2022-07-10 07:33:50	Gauteng		Yes I do	Solar	Solar because we have sun. Wind along our coastal mountain ranges. Tidal turbines because of its reliabilit, regularity and works in both directions (on ebb and flow).	Sibble	retired
2022-07-10 07:33:26	Gauteng		Yes I do	Solar	Eskom is no longer able to provide the best service for consumers therefore an alternative method is imperative	Elaine	retired

2022-07-10 07:28:38	Mpumal anga		Yes I do	Solar	Solar will be cheaper for the majority poor people	Sipho Isaac	retired
2022-07-10 07:28:12	KwaZulu- Natal		Yes I do	Solar		Peter	retired
2022-07-10 07:26:48	Eastern Cape		Yes I do	Solar	Long term for sustainability and to help the planet survive	Lavinia	retired
2022-07-10 07:25:26	Mpumal anga		Yes I do	Solar	Why not use the sun it's there for us.	Ingrid	retired

2022-07-10 07:21:03	Gauteng		Yes I do	Solar	I think that home users should be able to power their houses with solar and put bank into the grid any spare capacity	Llewellyn	retired
2022-07-10 07:20:51	Gauteng		Yes I do	Solar	As many alternatives as possible, Wind as well. Any clean and sustainable energy source should be considered	Hilde	retired
2022-07-10 07:19:23	Western Cape		Yes I do	Solar		Suzanne	retired
2022-07-10 07:18:25	Gauteng		Yes I do	Solar	We have plenty of sun and space. It just makes common sense. This should have been done years ago.	Bryan	retired
2022-07-10 07:17:22	KwaZulu- Natal		Yes I do	Solar		John	retired
2022-07-10 07:16:25	Western Cape		Yes I do	Solar	Is this even a question? We all know the answer . Many households already going solar time to allow them to put it back onto grid, also time to privatise eskom .	Renata	retired
2022-07-10 07:13:11	Western Cape		Yes I do	Solar	Other sustainable, affordable and non-polluting methods also fine.	Jannie	retired
2022-07-10 07:13:06	Western Cape		Yes I do	Solar	A combination of renewable energy (solar and wind) for residential and commercial will make a big difference.	Barry	retired
2022-07-10 07:10:26	Gauteng		Yes I do	Solar	Solar is the method available to all south africans right now. The problem is affordability. Firstly, all those producing any surplus electricity should be able to feed it back into the grid . Secondly some sort of subsidisation should be considered to encourage this. Lastly all groups capable of producing electrical energy in any form should be allowed to market it without interference.	Geoffrey	retired
2022-07-10 07:09:43	Western Cape		Yes I do	Solar		Margaret	retired
2022-07-10 07:08:36	Western Cape		Yes I do	Solar	Become self sufficient.	Steve	retired
2022-07-10 07:02:51	Mpumal anga		Yes I do	Solar		Thomas	retired
2022-07-10 06:59:21	KwaZulu- Natal		Yes I do	Solar		Venodh	retired
2022-07-10 06:56:55	Western Cape		Yes I do	Solar	We have sun and wind power. Get us off the unstable national grid it is feeble and crippling our economy and our pockets.	Lorraine	retired
2022-07-10 06:56:17	Gauteng		Yes I do	Solar		Trudi	retired
2022-07-10 06:52:32	Western Cape		Yes I do	Solar		Maureen	retired
2022-07-10 06:52:20	Gauteng		Yes I do	Solar	I support the idea as long as the bunch of thieves governing South Africa does not come up with the idea of taxing us for using the sun. It is all their stealing and corruption that got us into this banana republic status in any case. They will always find a way to enrich themselves at the cost of the poor. To rate this government on a scale of 1 to 10, I would give them a -9	Tinus	retired
2022-07-10 06:52:08	Limpopo		Yes I do	Solar		LEON	retired
2022-07-10 06:51:37	Gauteng		Yes I do	Solar	Solar is fast and relatively cheap as well as clean	Garry	retired
2022-07-10 06:49:34	Eastern Cape		Yes I do	Solar	Let's make use of the sun, it will be costly at first to get the solar panels, but will help a lot! Even people NOT willing to pay for electricity now, will be able to install it at their homes	Dalene	retired
2022-07-10 06:48:20	KwaZulu- Natal		Yes I do	Solar	We are blessed with sunshine let's use it, NOW	Sharmin	retired
2022-07-10 06:47:55	Free State		Yes I do	Solar		Rentia	retired
2022-07-10 06:43:54	Limpopo		Yes I do	Solar	My selection above is my top one. Wind and hydro are equally important. We have been off-grid for 3 years and are very happy with our solar supply. Banks should offer low interest rates on loans needed to pay for installation, possibly increase bond amount as the property value will increase.	Heather	retired
2022-07-10 06:43:37	Western Cape		Yes I do	Solar	Solar on its own cannot supply enough energy especially during the Western Cape winter. A combination of solar, wind, hydro and wave should be utilised.	Wouter	retired
2022-07-10 06:43:37	Western Cape		Yes I do	Solar	SA has abundant sunlight and space. Also allow private homes who have PV to feed into the grid... no red tape pls!	Alba	retired
2022-07-10 06:39:23	Western Cape		Yes I do	Solar	Solar, wind and hydro. Make use of SA's abundant resources. Cut out municipalities. Consumers subscribe directly from a supplier of choice (as one would do with the Internet). This should cut out corruption, cadres and cronyism and create competition, thereby keeping prices down.	Theresa	retired
2022-07-10 06:38:01	Western Cape		Yes I do	Solar		Lorraine	retired
2022-07-10 06:33:37	Western Cape		Yes I do	Solar	Firstly get the money back from the corruptors then lock them away in prison so that we as South Africans can start living better lives and then get the experts in to sort out the problem by removing the sabotaging staff and contractors even get rid of the unions because they are a big part of the problem with the ANC	Faizel	retired
2022-07-10 06:29:32	Gauteng		Yes I do	Solar	Solar is clean, power supply SA is one of the sunniest countries enjoy extended sunshine. Solar is one of the quickest easily accessible energy.	Geraldine	retired

2022-07-10 06:28:47	Western Cape		Yes I do	Solar	Solar and wind are the quickest by far to implement. Big commercial solar with storage eg solar concentrator types. There is excess capacity in existing solar which should be allowed to sell into the grid immediately. At the same time domestic solar should be rolled out on a massive scale to relieve poor households energy needs. This can ve a huge employment creator. Use some of the confessional finance to fet this up and running. Government can negotiate a huge solar panel and investor purchase out of China. Also tax rebates and concessions should be used to encourage middle class households to incest in solar. Domestic producers should be immediately ve allowed to sell to the grid at a fair price. Their pre paid meters can run vackwards (this system is used in many countries, notably Getmany).	Jack	retired
2022-07-10 06:26:42	Gauteng		Yes I do	Solar	The price of lithium batteries can also be reduced by going to scale	Margaretha	retired
2022-07-10 06:26:38	KwaZulu- Natal		Yes I do	Solar		Pam	retired
2022-07-10 06:26:00	Gauteng		Yes I do	Solar		Nelly	retired
2022-07-10 06:25:06	KwaZulu- Natal		Yes I do	Solar	A combination of solar, some coal initially, hydro and wind . It is essential that comprehensive enviromental investigations are done for each application by trusted organisations. The production of power must be removed from the control of the ANC.	Lesley	retired
2022-07-10 06:19:25	KwaZulu- Natal		Yes I do	Solar	There are several wind and solar projects already established, let independent producers supply to the grid, we need to get our country supplied without all the politics holding us back.	Cheryl	retired
2022-07-10 06:16:32	Gauteng		Yes I do	Solar		Anthony	retired
2022-07-10 06:15:53	Gauteng		Yes I do	Solar	I'm sick and tired of having to work my life around Eishkom. They are grossly overpaid and their service is beyond pathetic. It's run by a gang of MAFIA THUGS. They have crippled the economy. Put people out of work while they home FAT SALARIES at our expense. #ESKOM MUST FALL ENOUGH IS ENOUGH!!!!!!!	Ann	retired
2022-07-10 06:13:43	KwaZulu- Natal		Yes I do	Solar	We have huge amounts of sun. Solar energy could augment what we have.	Jenny	retired
2022-07-10 06:09:29	KwaZulu- Natal		Yes I do	Solar		Diane	retired
2022-07-10 06:07:10	Gauteng		Yes I do	Solar	For the short term use more coal as it is available while cleaner methods are developed for future	Hans	retired
2022-07-10 06:02:32	Eastern Cape		Yes I do	Solar	Solar heating supplied by private companies supplied directly to consumers. Municipalities do not pay their accounts to other govt enterprises. The money is looted, hence our current useless situation!	Isobel	retired
2022-07-10 06:02:19	KwaZulu- Natal		Yes I do	Solar	Independent Power Producers be allowed to immediately supply South Africa with electricity and legislation must be amended to also include all types of renewable energy	Morris	retired
2022-07-10 05:57:44	KwaZulu- Natal		Yes I do	Solar	I would have liked to select solar, nuclear, wind, hydro, gas and coal. I believe that people need to be able to utilise all possible resources to benefit all the citizens of our country.	Cedric	retired
2022-07-10 05:57:23	Gauteng		Yes I do	Solar		Antoinette	retired
2022-07-10 05:55:21	Western Cape		Yes I do	Solar	Government financial support to business and households to install grid-tied solar electricity generation. Allow to sell excess back to other users be it local authorities or private institutions. New housing and business park developments must be legislated to install solar electricity generation large enough for the whole area. Wind electricity generation equally important in rural areas, such as towns and farms.	Marianne	retired
2022-07-10 05:52:14	Eastern Cape		Yes I do	Solar	There are big enough area to build the solar farms and it is quick and employ a lot of people.	Willem	retired
2022-07-10 05:48:36	KwaZulu- Natal		Yes I do	Solar	Use solar, wind. Plan fir nuclear.	Daniel J	retired
2022-07-10 05:45:37	Western Cape		Yes I do	Solar		Alwyn Rhodes	retired
2022-07-10 05:42:58	KwaZulu- Natal		Yes I do	Solar		Bob	retired
2022-07-10 05:42:58	Free State		Yes I do	Solar	Solar seems to be the more realistic option as SA is a water scarce country and wind generation needs a lot of land. Gas, diesel and coal are expensive whilst nuclear plants takes time to erect and in my opinion are not safe.	Joachim	retired
2022-07-10 05:42:41	Gauteng		Yes I do	Solar	There is lots of sun in South Africa and it doesn't damage the environment. USE IT	Hilary	retired

2022-07-10 05:33:48	Western Cape		Yes I do	Solar	I was part of the team that built a 35 MW solar power plant at the Aquilla game farm near Touws Rivier. This R1.6 billion project did not cost the government or the taxpayers one cent. It created employment for many. Because of government rules certain individuals were basically given a percentage of the project for what really amounts to no real capital outlay or material input other than the fact that they were politically connected and thier part of the so called BEE component. At the time if the government allowed it, there would have been 10 times the amount of interested parties willing to build at thier own cost both wind and solar solutions. All that is required is an agreement from the government to purchase at a predetermined price and foe Eskom to become a transmission company more than a producer. If the red tape is dropped and the environmental assessment process expedited solar plants could start generating energy very quickly and scale up each month. It is only governments obsession with keeping control in order to milk the taxpayers that prevents this scenario from taking place. It is the fact that politicians and not business people are in control of these decisions. It is the fact that despite being voted in to build the country, they do everything in thier power to stay in control even if it means destroying everything especially the future of the youth in order to line thier own pockets. Independent PP will be run along proper business principles and will be answerable to their funders and shareholders. This hopefully will eliminate the opportunity for the blatant and rampant corruption taking place in every sphere of government currently. Finally any government person found to be taking advantage of or bribes related to this program should be charged with sabotage and sent to jail for a minimum of 25 years. Time to stop looking after the few and do what the people voted for you to do, which is to uplift all not just those belonging to your tripartite alliance etc.	Ross	retired
2022-07-10 05:30:38	Gauteng		Yes I do	Solar	Solar is easy and quick to install a bit expensive but on the longer run pays for itself. Save on replacement costs of fridges and freezers. Also cut frustration with regular power cuts.	David Schalk	retired
2022-07-10 05:21:24	Eastern Cape		Yes I do	Solar	Solar power should be subsidized for private homes by government, as was the case with solar geysers a decade ago.	Dr Christian	retired
2022-07-10 05:19:56	Western Cape		Yes I do	Solar	Solar is quickest and easiest to implement. But wind can also be implemented fairly quickly. In the longer term, I think it is the EU who says that gas and nuclear is also the best instead of coal, while more eco friendly options are being developed on a very large scale.	Brenda	retired
2022-07-10 05:18:29	Gauteng		Yes I do	Solar	green energy	James	retired
2022-07-10 05:17:57	Western Cape		Yes I do	Solar	The recent loadshedding demands all methods to immediately get rid of loadshedding	Elaine	retired
2022-07-10 05:17:17	Western Cape		Yes I do	Solar	Solar panels could be subsidised to everyone house hold in South Africa to generate electricity and could always be generated back to the electricity grid it is also environmentally friendly and has a low maintenance factor.	Johannes	retired
2022-07-10 05:03:09	Eastern Cape		Yes I do	Solar	Extraordinary high wages, unaffordable union demands and corruption by employees will ultimately be factors contributing to the economic downfall of South Africa.	Jean	retired

2022-07-09 18:07:24	Gauteng	Yes I do	Solar	Our climate perfect for solar but anything other that works will be great	Jackie	retired
2022-07-09 18:06:03	Western Cape	Yes I do	Solar	motivation is not required from any honest tax payer.	Andy	retired
2022-07-09 18:04:29	Gauteng	Yes I do	Solar	To save the environment	Miranda	retired
2022-07-09 18:01:34	KwaZulu-Natal	Yes I do	Solar	Solar installasie - nog afhankluk van Eskom agy hoe installasie kostes!	Hester	retired
2022-07-09 17:59:00	Gauteng	Yes I do	Solar	South African entrepreneurship needs to be urgently tapped during this national crisis. It is ready and waiting.	Eberhard	retired
2022-07-09 17:56:41	Western Cape	Yes I do	Solar	Our country has once again been brought to our knees. The White Paper was produced more than 28 years ago. Saying this was going to happen. Privatize.	Hilary	retired
2022-07-09 17:56:21	KwaZulu-Natal	Yes I do	Solar		Nikki	retired
2022-07-09 17:51:44	Western Cape	Yes I do	Solar	We have an enormous amount of sun in South Africa even in Cape Town in winter there are plenty of hours of sunlight and the power generated could be stored in batteries. Solar power is clean and does not rely on fossil fuels	Jeannine	retired
2022-07-09 17:51:35	Gauteng	Yes I do	Solar	Why don't they use this method to add to the grid? We have more than enough Sun and wind an very open spaces to achieve more energy that is required daily. But I think if they must buy it from private companies there would be less room for lining their own pockets and that of their buddies that is why Mantashe is so set against removing the red tape. The ANC is definitely not looking for solutions in improving the lives of the people of SA.	Teresa	retired
2022-07-09 17:44:14	Gauteng	Yes I do	Solar		Vivienne	retired
2022-07-09 17:42:45	North West	Yes I do	Solar		Maruis	retired
2022-07-09 17:34:56	Gauteng	Yes I do	Solar	Use excess power from individual s who can put it back onto the grid.	Michael	retired
2022-07-09 17:32:09	Gauteng	Yes I do	Solar	Allow an open market system competition would create Jobs and insure quality services are delivered. And at the best price. South Africa needs this.	Peter	retired
2022-07-09 17:28:02	Gauteng	Yes I do	Solar	Providing solar panels and infrastructure can be manufactured in SA without the risk of corruption or tender fraud as has been the norm over the past 20 years, solar would seem the best choice taking into consideration the number of sunny days and speed of construction. Also less impact on the environment.	David	retired
2022-07-09 17:20:14	Western Cape	Yes I do	Solar	Both solar and wind should be used right now. Renewables are quick to build, environmentally friendly, and much lower cost once established. We need this to happen NOW. Please REMOVE EVERY OBSTACLE that has been put in the way of independent power producers and let them solve our power problems. We are benefitting in Cape Town from the Steenbras Hydro power, but this would depend on the geography of the area whether feasible or not.	Fiona	retired
2022-07-09 17:19:07	KwaZulu-Natal	Yes I do	Solar	Solar is the way to go	Raganeer	retired
2022-07-09 17:14:53	Western Cape	Yes I do	Solar		Hassan	retired

2022-07-09 17:12:18	Gauteng		Yes I do	Solar	Solar & wind are the quickest solution. Reward suppliers to give back to the grid. Privatize energy generation, supply & distribution. Government has done enough damage in the past, get them out of the cookie jar.	Calmarie	retired

2022-07-09 16:09:31	Northern Cape		Yes I do	Solar	We have the sun, use it, its free	Frans	retired
2022-07-09 16:09:12	KwaZulu-Natal		Yes I do	Solar	The government is a failure. They have been stealing the wealth of South Africa and are not fit to run anything. They privatized the telephone service to make quick money for themselves and the rich who had money to buy the shares. Electricity should be supplied by private companies who supply electricity to the grid at a fixed price or directly to consumers. Sunlight is free so solar power ought to be cheap. Solar power is immediate and can be incrementally supplied as the solar banks are built. sunlight cannot be stolen like coal and diesel. Each solar panel should be etched with a unique identification so that criminal South Africans cannot steal the panels. This implies that all panels used should be randomly inspected continuously and each company supply the panel ids to a central body. Wind power could be used as backup at night to reduce the number of batteries that store solar power at night. Batteries could also be installed at consumer premises.	Abdul Khaliq	retired
2022-07-09 16:01:49	KwaZulu-Natal		Yes I do	Solar	Just do whatever is necessary to stop this load shedding. Try to salvage whatever is left is left off this country.	John	retired
2022-07-09 15:41:10	KwaZulu-Natal		Yes I do	Solar	Any opportunity to stop the rot and monopoly at/of Eskom is welcomed. Time to modernise supply and reduce being held to ransom by thugs.	Bernie	retired
2022-07-09 15:31:43	KwaZulu-Natal		Yes I do	Solar	Solar farms provide clean, safe energy, which does not affect the environment detrimentally. Most people & businesses operate primarily during daylight hours, when panels would be providing maximum Kw. Storage replenished by day provides power for overnight activities. We boast being a sunny country, this free energy is accessible. In some regions wind turbines could further provide energy when demands are high or poor weather limits solar panel output. Privatisation of energy supply guarantees profit for individuals & companies, provides employment & power for everyone.	Gillian	retired
2022-07-09 15:25:59	Gauteng		Yes I do	Solar	The President & his Ministers are too busy preparing for the ANC conference ahead of the elections in 2024. In Africa we are blessed with sunshine for most of the year. Solar is the obvious choice (& rule out Karpowerships!!!)	Robyn	retired
2022-07-09 15:23:15	Gauteng		Yes I do	Solar	Ask elon musk for same system that is in texas and australia	paul	retired

2022-07-09 15:22:08	Western Cape		Yes I do	Solar	Alternative power supplies need to be investigated for viability, efficiency and cost effectiveness, but something has to be done to improve the current situation	Colleen	retired
2022-07-09 15:20:22	North West		Yes I do	Solar	Solar is oplossing vir noodkrag bystand. Veral in ons dorp is die elektriese infrastruktuur swakker as Eskom se opwekking en distribusie. Ook die elektriese massakrag-tegnologie is meer as 40 jaar uitgedateur. Ons land benodig Nucleur opwekking. Eskom se skuld moet afgeskryf word. [likwider die kragvoorsiener]. Laat hom dan toe om nuwe kragopwekking in plek te stel. Skrap wetgewing oor krag beheer. Dit is net mags-speletjie om dividende as inkomste te bekom.	HENDRIK J	retired
2022-07-09 15:07:45	Gauteng		Yes I do	Solar	We are blessed with so much sunlight in South Africa. It's a shame that the Government is not encouraging and subsidising more Solar energy initiatives, especially as they do not have any answers to the crisis.	Liz	retired

2022-07-09 14:35:21	Gauteng		Yes I do	Solar	Allow people with solar power to feed back into the grid	Jean	retired
2022-07-09 14:27:41	Western Cape		Yes I do	Solar	If we look at the country holistically, then probably solar at this stage, because in high sun areas such as Free State, Northern Cape, Gauteng, North West, etc this would allow as much power as possible to flow into the grid initially. Western Cape has already taken the initiative to use wind power, as coastal regions do not have as many sunny and cloud free days. With our coastline, we could also harness the power of the waves to generate electricity. Also by going to solar route first, many independent households that have already installed solar system, could already feedback to the grid, with little or no problem.	Suzanne	retired
2022-07-09 14:26:42	Western Cape		Yes I do	Solar	South Africa should stop supplying our bordering countries as well! Solar can be put in deserts and in all low cost housing and help everyone to get solar, this needs to be burglar and vandalize proof. Independent source is also a good idea. Government needs to look at others ways now.	Cynthia	retired
2022-07-09 14:26:38	Western Cape		Yes I do	Solar		Dave	retired
2022-07-09 14:16:57	Gauteng		Yes I do	Solar	Can't seawater be used to generate electricity?	Rina	retired
2022-07-09 14:15:32	Western Cape		Yes I do	Solar	Solar would be the fastest to put in and could start generating power immediately	Nic	retired
2022-07-09 14:14:43	Gauteng		Yes I do	Solar	We have lots of wind around our coastal areas and lots of sun throughout South Africa, particularly the Karoo. Wind and solar electricity could provide effortless electricity at a fraction of the cost. What is essential is that politics (politicians) must be kept out from the start to the end of the total process. We have had enough of politicians with corrupt intentions especially self enrichment.	Philippus	retired
2022-07-09 14:10:39	Gauteng		Yes I do	Solar		Doreen	retired

2022-07-09 13:48:05	Gauteng		Yes I do	Solar		Stephan	retired
2022-07-09 13:47:24	Western Cape		Yes I do	Solar	The production of power should be opened up to the free market, with all red tape and regulation scrapped other than the technical requirements to feed into the grid.	David	retired
2022-07-09 13:44:52	Western Cape		Yes I do	Solar		C	retired
2022-07-09 13:42:22	Western Cape		Yes I do	Solar	The State is obviously not interested in supporting De Ruyter properly in getting Eskom up and running again. Upington is sending their generated solar energy to Namibia as SA does not have the infrastructure to integrate it into our system. We need independent companies to create infrastructure so that the available energy can be used in SA.	Louisa	retired
2022-07-09 13:34:22	Western Cape		Yes I do	Solar	Sun power is available most of the day when the sun is shining, batteries can be developed to see us through the night and with wind turbines and hydro electricity there must be a workable solution. Has anybody considered damming up the orange river in the Richtersveld and using the water for hydroelectricity as well as irrigating that vast track of undeveloped land in the area,	Ivor	retired
2022-07-09 13:33:19	KwaZulu- Natal		Yes I do	Solar		Victoria	retired
2022-07-09 13:33:03	Gauteng		Yes I do	Solar	Solar and Wind, should be used. We will not have a country left if something is not done urgently.	Sue-Ann	retired
2022-07-09 13:32:52	Western Cape		Yes I do	Solar		Siegfried	retired
2022-07-09 13:29:54	KwaZulu- Natal		Yes I do	Solar	All the red tape has been put in place so that the wealth associated with the provision of energy to our nation goes into the pockets of cadres. The ownership of existing suppliers of energy to Eskom, who are paid far, far more than the cost of production by Eskom itself, needs to be made public. Hidden behind Eskom's technical problems is the sabotage of our people by excessive payments to Public, Private Partnerships. This holding of the nation to ransom by cadres does not afflict Eskom alone, but is no doubt the reason that neither local nor foreign investors are developing our economy. Therefore, there must be no more Black Economic Empowerment or Affirmative Action. Let those who support the ANC feel the consequences if BEE and AA are continued to be enforced. Let people invest freely without being parasitized by politicians who bring nothing to the table in the way of skills, or contribute nothing of any material kind; or let nature take its course as it is doing for those who are not cadres.	Allan	retired
2022-07-09 13:26:04	Western Cape		Yes I do	Solar	Eskom needs to be phased out as sole supplier but remain as supplemental for as long as required while conversion to alternative sources mainly a mix of solar and wind and gas takes place	Derrick	retired
2022-07-09 13:24:36	Western Cape		Yes I do	Solar		Marianne	retired
2022-07-09 13:20:59	Western Cape		Yes I do	Solar	1. The energy solution needs to be a combination of what exists but supplemented urgently by a mass roll out of residential and commercial solar power. Every household should be subsidized to install solar panels on suitably oriented roofs using approved private contractors. The standards of operation and installation are well advanced now overseas so it should be easy to draw upon other countries' experience to ensure a safe and sustainable performance. 2. More viable back-feed tariffs should be introduced to encourage more large scale private investment in solar and wind production. 3. Ultimately, a combined solution involving Eskom, private enterprise and residential dwelling generation must be introduced.	Paul	retired
2022-07-09 13:12:47	Mpumal anga		Yes I do	Solar	Better clean option	Drikus	retired
2022-07-09 13:10:55	Gauteng		Yes I do	Solar	SA with the number of hours that we have sun should be investing in Solar heating. In the areas where it gets cold in winter, houses should be built to combat the loss of heat in a home, during winter. It is fatal to have all your eggs in one basket. There should be competition regarding electricity. We should be able to learn from other countries what works and what doesn't work.	Rosemary	retired

2022-07-09 12:43:16	Gauteng		Yes I do	Solar	We have more than enough sunny daylight hours to generate electricity . Let us utilize what we have been given freely by our Maker and continue to research other methods going forward. But let us start somewhere!	Lesley	retired
2022-07-09 12:41:16	KwaZulu- Natal		Yes I do	Solar		Roelina	retired
2022-07-09 12:40:40	Western Cape		Yes I do	Solar	Wind & Solar should be used.	Dorette	retired
2022-07-09 12:38:06	Western Cape		Yes I do	Solar	It is wrong to assume that there is only ONE method. Depending on region, a scientific study is required to determine which method is the most appropriate, i.e. the availability of wind, or sun or gas or coal,. Nuclear is objectively the best method , BUT I appose it for RSA, until such time as we have a government that is not corrupt , and thus use it for their illegal purposes. (as the did with the two latest new coal plants.) Nuclear is too expensive and takes to long for small investors. Thus we must involve every business, farm, and municipality to generate their own electricity, and even sell it into the Eskom grid.	Gerrit	retired
2022-07-09 12:37:19	Western Cape		Yes I do	Solar		Warren	retired
2022-07-09 12:36:03	KwaZulu- Natal		Yes I do	Solar	SA is desperate, we need quick and environmentally friendly solutions solar and wind is the top and only choice. scrap all unnecessary red tape.	Timothy John	retired
2022-07-09 12:34:26	KwaZulu- Natal		Yes I do	Solar	Independent power producers should be allowed to immediately supply South Africa with electricity without having a mass of red tape around their neck.	Roy	retired
2022-07-09 12:31:38	KwaZulu- Natal		Yes I do	Solar	What better way than the natural resources.	Neveshnie	retired
2022-07-09 12:27:49	Western Cape		Yes I do	Solar		sue	retired
2022-07-09 12:25:08	Western Cape		Yes I do	Solar	We are a country in crisis.Allow a transparent and fair system of free enterprise to flourish, and save us. Solar is the simplest, and we have abundant sunshine. We don't have much time before the next big crisis: the water security crisis, adds to this crippling problem.	Michele	retired
2022-07-09 12:25:03	Western Cape		Yes I do	Solar	I strongly believe that in order to alleviate the energy crisis we need renewables like solar and hydro power to be used as of immediate effect. Not only will it assist the load on Eskom but it will provide badly needed employment.	Helen	retired
2022-07-09 12:22:42	Gauteng		Yes I do	Solar		Marius	retired
2022-07-09 12:22:19	Western Cape		Yes I do	Solar	it has taken nearly 30 years for the ANC to almost run our benighted country into the ground - through theft, cadre deployment, State Capture and lack of understanding of the need for infrastructural maintenance. Let's not waste a moment more in trying to turn things around before we face more riots and pillage.	GEOFF	retired
2022-07-09 12:20:25	Gauteng		Yes I do	Solar		J	retired
2022-07-09 12:20:23	North West		Yes I do	Solar	SA must make use of energy resources that can be put in place asap that is sustainable, like solar energy plants. This must be given to the private sector to ensure guaranteed power supply at competitive prices. Power supply in the hands of one supplier is not a good thing and it should therefore be privatised.	Deon	retired
2022-07-09 12:18:00	Western Cape		Yes I do	Solar	Please act with urgency should have been implemented years ago!! Sun and Wind .. we have plenty of it!!	Shirley	retired
2022-07-09 12:16:29	Gauteng		Yes I do	Solar	Solar technology has been around for a while - just government restrictions has held it back. There are battery storage systems available for night time use and when there is unfavourable weather	Margaret	retired
2022-07-09 12:15:20	Western Cape		Yes I do	Solar	Using solar energy will lower electricity prices, keep the environment clean, and limit the electricity cuts that the country suffers from. I also believe that the production of electricity on ESKOM alone is what brought us to the current status we are experiencing; Because there is no competition in the market.	rowland	retired
2022-07-09 12:13:53	Gauteng		Yes I do	Solar	Electricity provision should be privatized with immediate effect and municipalities should be encouraged to generate power for local use. The method of production should not be prescriptive and legislation should provide as much possibilities / opportunities as possible. Different municipalities might require different solutions and the legislation should therefore allow flexibility in this regard. Solar is the short term solution with Nuclear being the long term	David	retired

2022-07-09 12:13:28	Western Cape		Yes I do	Solar	Using solar energy will lower electricity prices, keep the environment clean, and limit the electricity cuts that the country suffers from. I also believe that the production of electricity on ESKOM alone is what brought us to the current status we are experiencing; Because there is no competition in the market.	rowland	retired

2022-07-09 11:56:15	Western Cape		Yes I do	Solar	Privitasion a big must to safe South Africa.	Johann	retired
2022-07-09 11:55:45	KwaZulu- Natal		Yes I do	Solar	All new houses should be required to have a solar geyser as a minimum to reduce the national load	Hugh	retired
2022-07-09 11:55:43	Gauteng		Yes I do	Solar	Solar to start then Nuclear.	Silvana	retired
2022-07-09 11:53:27	Gauteng		Yes I do	Solar	I believe that we have vast expanses of land that could be utilised for solar-electricity-production. Much of this land is owned by government. The technology today makes it cheaper than coal &, as far as we yet know, there are not many side-effects from this form of energy-conversion. Since Eskom is totally incompetent to have the monopoly to provide power to South Africa, Independent suppliers who are ready, willing and able to supply power should be permitted to do so with immediate effect, using every safe available source of power. South Africa is now one of the most backward countries in the world with this disaster, while the ANC is not showing any ability or intention to correct it.	Barbara	retired
2022-07-09 11:52:27	Gauteng		Yes I do	Solar	Solar power is a must in a sun drenched country	Peter	retired
2022-07-09 11:51:36	Gauteng		Yes I do	Solar		jasper	retired
2022-07-09 11:51:30	Western Cape	UK	Yes I do	Solar		Ray	retired
2022-07-09 11:51:17	Western Cape		Yes I do	Solar		Bobby	retired
2022-07-09 11:49:47	Northern Cape		Yes I do	Solar		Gerhard	retired
2022-07-09 11:45:13	Western Cape		Yes I do	Solar		Hannes	retired
2022-07-09 11:44:15	Gauteng		Yes I do	Solar	Eskom is incompetent to solve our electricity crisis on its own. The government need independent power producers to help stabilize the grid.	Rudolph	retired
2022-07-09 11:44:06	Western Cape		Yes I do	Solar		Ken	retired
2022-07-09 11:44:04	Western Cape		Yes I do	Solar	We have an abundance of sunshine and wind so why not use it? If we have new producers of power they must not be governed or interfered by BEE regulations.	martin	retired
2022-07-09 11:41:05	Western Cape		Yes I do	Solar	Something must be done and urgently. Too many businesses are folding and more people are becoming unemployed because of loadshedding and not being able to work a full day. SA cannot afford to have most of its population unemployed and on grants while a measly few have the tax load to carry. We need the quickest and cheapest power produced, whether solar or wind or whatever. Apparently coal is the cheapest and we should use it and not sell first grade coal to China (our masters, it seems) whereas SA uses a lower grade at great expense due to the government's control and greed. I have heard that the government puts a 20% surcharge on coal to ESKOM which goes to the ANC and its cadres!	Gillian	retired
2022-07-09 11:35:24	Western Cape		Yes I do	Solar	Not easy to select just one single best energy source for South Africa	Sean	retired
2022-07-09 11:32:35	Gauteng		Yes I do	Solar	I believe that a mix of Solar Wind and Nuclear small reactors to be placed in the country and using pump Hydro nuclear and Gas not deasel to carry the load where the inclusion of battery storage can help controll peak demand and the total scrapping of regulations that prohibit users from purchasing power from there own service provider and not be held back by municipalities that are incapable of providing the service to there communities and that our network in the country be upgraded to handle the load for the new service providers	Arno	retired

2022-07-09 11:32:20	Western Cape		Yes I do	Solar	With the abundance of sunshine in S A solar is the way to go. Wind, and hydro should also run alongside solar. Coal should slowly be phased out with priority given to job creation in mining areas	John	retired
2022-07-09 11:32:12	Western Cape		Yes I do	Solar		Johannes	retired
2022-07-09 11:26:20	Western Cape		Yes I do	Solar	Coal is a given, we cannot do without it at present. But solar and wind are sustainable and products of plentiful natural supply, so IPP's are needed, local or foreign owned, but subject to our national legislation. The State owned enterprises have had torrid management problems and should not have control over critical national requirements. The Defence Budget needs to be shredded to a minor level and Eskom needs to contract to take on excess production into our national power grid., including from private homes and businesses. It is happening now in parts of the USA I know.	Andre	retired
2022-07-09 11:23:15	Western Cape		Yes I do	Solar		Keith	retired
2022-07-09 11:23:12	Western Cape		Yes I do	Solar		Keith	retired
2022-07-09 11:22:18	Gauteng		Yes I do	Solar	Solar energy is natural Let the government take responsibility to supply each household The government doesn't involve the community especially when it comes to coal mines that are wasted and when functioning it's all about themselves excluding it's people	Molatelo	retired
2022-07-09 11:20:58	Gauteng		Yes I do	Solar		Antonio	retired
2022-07-09 11:20:20	KwaZulu- Natal		Yes I do	Solar	All possible IPPs should be used to increase electricity production. These power outages are destroying the country. Any person caught stealing electric cables as well as the company owners buying these cables should be charged with treason and put in jail for a very long time. This might dissuade this happening in the future.	Joan	retired
2022-07-09 11:19:35	Western Cape		Yes I do	Solar	Every household, factory and any building that can take solar panels should be done ASAP. Government should remove all taxes and levies so that people can afford to do it.	Manuel	retired
2022-07-09 11:19:35	Western Cape		Yes I do	Solar	Solar, Wind, Coal, nuclear ... Whatever it takes to stop the load shedding and bring the price of electricity down quickly!! As a pensioner my monthly electricity bill, is more than we ever paid on our bond repayments on our home!	Gail	retired
2022-07-09 11:19:23	KwaZulu- Natal		Yes I do	Solar	Either solar or wind. We need to use what is available by nature first. The government also needs to allow more private companies to supply electricity. A small country like New Zealand with a population of +5m people are generated by 5 major companies with the government a major shareholder in 3 of these companies. Wake up SA government & smell the roses.	Joan	retired
2022-07-09 11:17:47	Western Cape		Yes I do	Solar	I believe a combination of solar and wind, all new builds should have solar panels for essentials	Gordon	retired
2022-07-09 11:12:32	Western Cape		Yes I do	Solar		Beryl	retired
2022-07-09 11:11:16	KwaZulu- Natal		Yes I do	Solar	Anything is better than what we have, but a combination of solar and wind is a good idea, or privation.	Carol	retired
2022-07-09 11:09:12	Western Cape		Yes I do	Solar	All renewable options should immediately be explored. And all red tape should be scrapped. Eskom cannot be relied on to produce electricity and we have a climate that would support all forms of renewable energy.	Heléne	retired
2022-07-09 11:04:01	Gauteng		Yes I do	Solar	Why not scrap the red tape.... South Africa is in trouble. WE need power and for 2 weeks the country has been struggling. I said solar but there is also wind power that is available.. We should go renewable. Why are we building wind and solar farms and not making use of the available power. a no brainer	Felicity	retired
2022-07-09 10:58:18	Gauteng		Yes I do	Solar	All renewable options should immediately be explored. And all red tape should be scrapped. Eskom cannot be relied on to produce electricity and we have a climate that would support all forms of renewable energy.	Laurie	retired
2022-07-09 10:55:18	Gauteng		Yes I do	Solar		Frik	retired
2022-07-09 10:54:10	Western Cape		Yes I do	Solar		Peter	retired
2022-07-09 10:46:51	Western Cape		Yes I do	Solar	Solar, method installation timeframe and more cost effective. Environment friendly and maintenance easier than current infra structures.	Cornelius	retired
2022-07-09 10:46:38	Eastern Cape		Yes I do	Solar	We need to act quickly to save our country from descending into oblivion. The time for political self interest is over. Solar technology is advanced and available ... as are our sunny skies. That said, in the longer term we should also consider hydro. We need to harness every available form of power generation which does not have a devastating environmental impact. (e.g. Karoo fracking)	Graham	retired

2022-07-09 10:46:26	Gauteng		Yes I do	Solar		Jangir	retired
2022-07-09 10:46:25	Gauteng		Yes I do	Solar		Jangir	retired
2022-07-09 10:46:24	Gauteng		Yes I do	Solar		Jangir	retired
2022-07-09 10:45:19	Western Cape		Yes I do	Solar	In sunny SA it makes sense to generate power using the sun. Since it is not always available, wind generation should back it up.	Tilla	retired
2022-07-09 10:44:39	Western Cape		Yes I do	Solar	Import tax needs to be reduced on all solar power hardware. Solar power is the way forward. Phase out coal and add solar and wind power.	WM	retired
2022-07-09 10:40:39	Western Cape		Yes I do	Solar		Denis	retired
2022-07-09 10:37:25	Western Cape		Yes I do	Solar		Gail	retired
2022-07-09 10:36:27	Gauteng		Yes I do	Solar	How can anyone not see the need to scrap the red tape?	Alida	retired
2022-07-09 10:36:25	Free State		Yes I do	Solar	Solar and wind will be the easiest at this stage because time is running out!!!	Theuns	retired
2022-07-09 10:35:27	North West		Yes I do	Solar	Solar energy is free from the sun and there are no moving parts to wear out and be maintained.	Dewald	retired
2022-07-09 10:30:48	Western Cape		Yes I do	Solar		Beverly	retired
2022-07-09 10:29:47	Gauteng		Yes I do	Solar		Rolf	retired
2022-07-09 10:29:12	Western Cape		Yes I do	Solar	For the environment and economic growth we need alternative and reliable power supply sources. I ticked solar but add wind as well.	Esther	retired
2022-07-09 10:27:00	Gauteng		Yes I do	Solar	At Last!!!! Finally some common sense from the powers that be! Solar power is a brilliant idea, however if anybody should come up with viable, sustainable alternative I would support that as well!! We have some extraordinary brilliant minds in this country - lets use their talents NOW!!	Milly	retired
2022-07-09 10:25:37	KwaZulu- Natal		Yes I do	Solar	This is emergency!, Essential to quickly use any competent help additional to existing government controlled system.	Gavin	retired
2022-07-09 10:23:36	Gauteng		Yes I do	Solar	We have many resources such as solar and wind power to generate clean energy and It is crazy to have one supplier that is not providing the energy requirements and holding our businesses and people to ransom! The need for other power sources is very urgent:	Maria	retired
2022-07-09 10:21:04	Gauteng		Yes I do	Solar		Wendy	retired
2022-07-09 10:19:32	Western Cape		Yes I do	Solar	South Africa has lots of wind & sun, use this to our advantage. Vote ANC out they have proven that they are incapable of governing this Country. They should also stop blame shifting, but they are stuck in the past. They are in charge for nearly 30 years & still looking back & should live in the present & plan for the future. We can't change the past but we can change the future!	Cecile	retired
2022-07-09 10:18:39	Mpumal anga		Yes I do	Solar	There is so much loss of production and income due to load shedding, not to mention the chaos it causes in heavy traffic!	Carla	retired
2022-07-09 10:18:33	Western Cape		Yes I do	Solar	More and more individual home owners are producing excess electricity due to having solar installed on their property .	Michael	retired
2022-07-09 10:18:27	Gauteng		Yes I do	Solar	No one can steal the cables or tamper with the power stations	Caron	retired
2022-07-09 10:16:42	Eastern Cape		Yes I do	Solar	Private participation should have happened ages ago. The ANC milks the ailing cow at every opportunity for their corrupt purposes. Private individuals should be allowed to share power on the grid, and also pay lower connection fees. This would obviously be renewable energy. Big private groups must also be allowed to have a share of the power market. Nationally,nuclear power would probably most suit our climatic and geographic restrictions in the future.	Dennis	retired
2022-07-09 10:15:32	Gauteng		Yes I do	Solar	Any alternative to coal fired power stations must be investigated, we as a country cannot rely on only one supplier of energy	Kevin	retired
2022-07-09 10:15:22	Western Cape		Yes I do	Solar	SA has plenty solar and wind power. It needs to be generated and stored for when needed. Hydro power can also be generated by our rivers.	Hester	retired
2022-07-09 10:14:35	Western Cape		Yes I do	Solar	I am over an 80 disabled widower who find it very difficult to adapt to the irregular power outages especially at night as I have special needs. I must therefor always have a standby light source available which is sometimes not possible.	GILBERT	retired
2022-07-09 10:14:31	Western Cape		Yes I do	Solar	eskom is a disaster and will continue to fail as long as saboteurs act unhindered or even with police connivance, We need to allow private electricity suppliers to come to the rescue immediately	Margaret	retired
2022-07-09 10:12:43	Western Cape		Yes I do	Solar	South Africa has abundant solar source but in the Western Cape we also have amazing wind, this should also be utilised.	Jayne	retired
2022-07-09 10:10:47	Gauteng		Yes I do	Solar		Beverley	retired
2022-07-09 10:10:30	Western Cape		Yes I do	Solar		Ean	retired
2022-07-09 10:08:09	Gauteng		Yes I do	Solar		Neil	retired

2022-07-09 10:06:57	Mpumalanga	Yes I do	Solar	First Prize!!! The ANC must be voted out. Next a mixture of options can be worked out to give the best power options available and possible, depending on the Province. If all the right Institutions apply their expertise; but preferably not nuclear, anything is possible!	Adrian	retired
2022-07-09 10:05:26	Free State	Yes I do	Solar	We all know that Ramaphosa and friends has their electricity things ready and that's why Eskom is being sabotaged. Get electricity on with private people who has nothing to do with the ANC, Ramaphosa, his comrades. We don't trust any of these people. Money will again appear under someone's bed! Since the government started to steal my money from investments that I have to live on now that I'm retired, I don't trust any of them. 45% tax for older people who paid their taxes for 40 years??? Let's move away from all these corrupt people.	Annemarie	retired
2022-07-09 10:04:32	Gauteng	Yes I do	Solar	The government doesn't seem to recognise the urgency of the power situation. We need to make alternative arrangements immediately.	Caroline	retired
2022-07-09 10:03:14	Western Cape	Yes I do	Solar	The ANC Government could not run a kinder garden. Keep them away from anything to do with energy and get the private sector involved.	Brian	retired
2022-07-09 10:03:07	Western Cape	Yes I do	Solar	There are 2 parts to my answer. 1) With the amount of sunshine and wind in South Africa both solutions should be pursued. 2) In the rest of the modern world, private individuals are allowed to export excess electricity which they produce on their personal solar installation. Why does South Africa not allow this when the rest of the world does?	Jack	retired
2022-07-09 10:02:59	Western Cape	Yes I do	Solar	Time to get qualified EXPERTS to deal with this, NOT the CORRUPT ANC government!! Eskom was looted to the bone!	Magda	retired
2022-07-09 09:55:48	Gauteng	Yes I do	Solar	Solar power is the obvious source ... SA has almost constant sunshine!!!	Sandie	retired
2022-07-09 09:55:32	KwaZulu-Natal	Yes I do	Solar	Solar or wind are the most environmentally friendly. In some countries households, churches, etcetera are allowed to feed into the National grid. The split between power generation and the electricity carrier grid is most essential to quickly be done.	Richard	retired
2022-07-09 09:52:28	Western Cape	Yes I do	Solar	We also need power storage at a level beyond batteries. Pumped hydro is the gold standard but there are less onerous alternatives such as Gravity Power.	Eric	retired
2022-07-09 09:52:18	Western Cape	Yes I do	Solar	Privatize with mix of solar, etc but keep this corrupt government OUT	Willie	retired
2022-07-09 09:51:30	Gauteng	Yes I do	Solar	Keep electricity supply away from Government! Enable independent suppliers to provide a professional and realistically priced electricity supply. They will not accommodate non-payment from users and will no doubt better protect their installations against cable thieves.	Dirk	retired
2022-07-09 09:51:26	Western Cape	Yes I do	Solar	Wind is also an option in certain regions.	Magda	retired
2022-07-09 09:50:20	Gauteng	Yes I do	Solar	Solar power is basically free in South Africa - we have so much sunshine most of the year. Solar power stations can be set up fast and the cost is far less than any other system. Batteries are a problem but even so new kinds of batteries not needing scarce metals are being developed. Wind power can help in the mixture. The sooner we change the better. Waiting any longer does not make sense at all.	Ottolie	retired
2022-07-09 09:46:58	Western Cape	Yes I do	Solar	Immediate needs means using the most cost effective and available source of energy, which solar can do!	Glen	retired
2022-07-09 09:46:17	KwaZulu-Natal	Yes I do	Solar	Red tape kills progress and drags out the process for private enterprise to operate SOE's because ANC will lose another cash cow to fill their greedy corrupt pockets to the detriment of the people.	Lincoln	retired
2022-07-09 09:45:56	Western Cape	Yes I do	Solar	Concentrated solar similar to the intallations in Israel allows for 24 hour supply of electricity.	Jacobus	retired
2022-07-09 09:45:47	Western Cape	Yes I do	Solar		David	retired
2022-07-09 09:45:12	Mpumalanga	Yes I do	Solar	All methods should be used - no monopoly then!! This should have been in place long ago	Inky	retired
2022-07-09 09:43:26	Western Cape	Yes I do	Solar	It's unfortunate that I could only select one answer, because my opinion is that both wind and sun can be used to supply consistent electricity. As long as it's affordable for every citizen.	Maria	retired
2022-07-09 09:41:14	Gauteng	Yes I do	Solar		Sylvia	retired
2022-07-09 09:35:47	Western Cape	Yes I do	Solar	We have enough sunny days in SA to provide enough enery. Combine that with wind turbines and problem will be solved.	Siebert	retired
2022-07-09 09:34:51	Western Cape	Yes I do	Solar	I fully support going "solar" for as many as can afford the panels - that said, the prices should go down if enough people "buy into the idea" and have a system, as in Germany, where the collective "sells back excess" to whichever Provider they choose, thereby covering their own needs but benefitting a wider populace. In addition, the market should be "thrown open" asap to Private Companies to introduce some much-needed competition in this area and get the country as a whole back on the right path - NO POWER = NO SUCCESS	Catherine	retired
2022-07-09 09:34:07	KwaZulu-Natal	Yes I do	Solar		Dawood	retired
2022-07-09 09:31:14	Western Cape	Yes I do	Solar	All renewables should be considered, including Nuclear and if necessary, gas, for bridging until more renewables/nuclear (consider fusion) can be brought on stream. Residents and businesses should be subsidised for installing solar and buyback should be at a favourable rate - not less than 90 % of billing rate.	Henk	retired

2022-07-09 09:29:52	Western Cape		Yes I do	Solar			retired
2022-07-09 09:21:56	Gauteng		Yes I do	Solar	Renewable energy is the only way we can solve our current electricity crisis	Antoinette	retired
2022-07-09 09:20:57	Western Cape		Yes I do	Solar	It can only be a positive gain for our economy and people for there to be a free market approach to renewable energy strategies! It also has the added benefit of offsetting some of the coal pollution associated with the existing Eskom power stations. Time for action on this subject not any further delays which only hold us back personally, business wise and the SA economy as a whole.	Colette	retired
2022-07-09 09:14:44	Gauteng		Yes I do	Solar	Apart from a drastic increase in independent providers of solar and wind power, private citizens should also be allowed to feed back excess power into the system from their solar installations.	Gordon	retired
2022-07-09 09:14:13	Limpopo		Yes I do	Solar	All forms of renewable power should immediately be prioritised.	Marilyn	retired
2022-07-09 09:11:40	Western Cape		Yes I do	Solar	It is imperative that we amend the legislation and to open south africa to private solar and wind providers. The State needs to do this with immediate effect.	Anita	retired
2022-07-09 09:08:41	Western Cape		Yes I do	Solar	Yes, yes, yes. There are so many renewable ways to generate electricity - solar, wind, wave action, hydro - I am sure lots more that I am unaware of. This should have happened years ago. Eskom cannot do its job and it is crippling the economy. Change the law yesterday, if not before.	Sarah	retired
2022-07-09 09:07:53	Western Cape		Yes I do	Solar		Shirley	retired
2022-07-09 09:07:51	Western Cape		Yes I do	Solar		Delaine	retired
2022-07-09 09:07:49	Western Cape		Yes I do	Solar	We are desperately short of power and need a short term fix. Solar comes in all price ranges and capacities and is the quickest to deploy. A drive for many small or medium units will buy us time to build the correct and futureproof power generation mix. No to coal	Mike	retired
2022-07-09 09:06:29	Gauteng		Yes I do	Solar	Climate change.	Lance	retired
2022-07-09 09:05:43	Western Cape		Yes I do	Solar	Eskom is clearly struggling to supply sufficient power to the country. The effect is to severely inhibit economic growth and job creation. It also makes the country unattractive as a destination for foreign investment. Indications are that the Eskom situation is very unlikely to improve in the near and medium term. Independent power producers will increase the availability of power in the short term, will provide competition for Eskom and keep the price of power down. Any independent power production schemes should be as environmentally friendly as possible.	Len	retired
2022-07-09 09:04:58	Gauteng		Yes I do	Solar	It must be made easy to supply solar power from big supplying to individual household generation. This will assist in supplying the need.	Eric	retired
2022-07-09 08:59:15	Western Cape		Yes I do	Solar		Edith	retired
2022-07-09 08:57:50	Western Cape		Yes I do	Solar	We need as many power generating solutions as possible with absolute minimum red tape. Sooner than later!!!	Ian	retired
2022-07-09 08:57:47	Western Cape		Yes I do	Solar	Solar and wind energy with battery storage is freely available and is urgently needed to assist Escom in preventing the devastating effect of load shedding. Government should stop endorsing outdated and environmentally harmful technologies.	Jessie	retired
2022-07-09 08:57:47	Western Cape		Yes I do	Solar	We need as many power generating solutions as possible with absolute minimum red tape. Sooner than later!!!	Ian	retired
2022-07-09 08:57:28	Western Cape		Yes I do	Solar	Holding on to power over citizens with all their might and to he'll with the country going down the drain. Protecting the looters, overpaid workforce? And during loadshedding even more crime is committed, cakes stolen. Take a wake-up call!!! But why listen to experts because ANC think they know better.	Lita	retired
2022-07-09 08:57:03	Gauteng		Yes I do	Solar	The City of Perth has a surplus of power, provided from the input of electricity into the grid generated by solar energy panels on the roofs of individual houses. A rebate is given for excess electricity supplied. It has taken years to reach this stage but every bit of help to lessen the burden on Eskom and reduce our dependence on fossil fuels providing cleaner air for Gauteng is required. Gauteng generally has an abundance of sunshine and assistance could be made available to individuals who cannot afford the panels. No rebate to be given until the cost of the panels is covered.	Jillian	retired
2022-07-09 08:56:46	Western Cape		Yes I do	Solar		Jaqi	retired
2022-07-09 08:55:26	Western Cape		Yes I do	Solar			retired
2022-07-09 08:54:02	Western Cape		Yes I do	Solar	We can use any reliable sources of energy such as waste, wind that is cheaper on the citizens pockets	Dolf	retired
2022-07-09 08:50:00	KwaZulu- Natal		Yes I do	Solar		Deon	retired

2022-07-09 08:48:00	Gauteng		Yes I do	Solar	If an alternative & independant (non-gov involvement) of supplying reliable electricity isn't found, encouraged & implemented immediatly, the effect on the economy will be far worse than the Covid epidemic was. We simply can't afford this, as too many families wil pay the ultimate price. And the anc simply don't care, but instead continue to mismanage the country while arrogantly lining their pockets. THIS HAS TO STOP!	Robert	retired
2022-07-09 08:47:43	Outside SA	Portugal	Yes I do	Solar	All barriers to renewable energy must be removed as soon as possible. The government must stop trying to control everything. It is killing the country.	Margit	retired
2022-07-09 08:47:34	Gauteng		Yes I do	Solar		Deon	retired
2022-07-09 08:46:41	Mpumalanga		Yes I do	Solar	We have an enormous amount of sunshine in SA, why aren't we utilizing it. Solar panel roofing should be a given on all new housing and older houses should convert. Solar should be made available at reasonable costs to all South Africans.	Carl	retired
2022-07-09 08:46:30	Western Cape		Yes I do	Solar	Dit is hoogtyd dat iemand met iets tussen sy twee oore wat ons breins noem gebruik om hoe gouer hoe better die onbevoegde personeel wat wag dat die land julle te maal in sy moer gaan iets doen. Want hoekom maak hulle nie van die betroubaare private sector wat krag opwek gebruik nie. Want of dit nou son paneele is of die wind turbines wat hier naby Villiersdorp Wes Kaap soos wit olifante staan gebruik om die klein plattelandse dorpe met krag te voorsien want ek dink hulle is meer betroubaare as die sukkelinde gemors van Eskom want daardie goed kan nie staak. En hoe gouer hoe better want ons eerlik Suid Afrika se burgers raak nou gatvol vir hierdie Eskom en die ANC wat will sien dat die land heeltemal in sy moer gaan. Maar wat gee hulle om want hulle het nog voorloopig 'n werk. Want hulle kan nie eers sien hoe die werkloosheid syfer gestyg het as gevolg van onbevoegde, onbekaame, ongekwalifiseerde personeel van Eskom en as hulle van hierdie wind turbines en sonpaneel gebruik maak dan kan hulle Eskom tot nuut maak.	Daniel	retired
2022-07-09 08:42:40	Western Cape		Yes I do	Solar		Johann	retired
2022-07-09 08:38:37	Gauteng		Yes I do	Solar	Combination of INDEPENDANT Renewable power is the way to go. The Government Policy Resistance to Independent Power Production NEEDS TO GO!!!	Francis	retired
2022-07-09 08:37:39	KwaZulu-Natal		Yes I do	Solar	Our people should be allowed to use power as and when required without been forced to pay compulsory basic charge when there is no guarantee that power is available. it should be pro rata based. should basic charge be applied, this should be as per building requirement i.e. smaller usage, lesser the basic and larger usage, more basic. Not every household uses power sparingly.	Anitha	retired
2022-07-09 08:37:06	Western Cape		Yes I do	Solar	Solar en wind, ons het die albei tot beskikking. Maar langvingers in SA is n probleem. Steel alles.	Ina	retired
2022-07-09 08:34:44	Gauteng		Yes I do	Solar	Solar and Wind generation would be the answer we have plenty on both	Ronald	retired
2022-07-09 08:34:44	Gauteng		Yes I do	Solar	Solar and Wind generation would be the answer we have plenty on both	Ronald	retired
2022-07-09 08:34:25	Western Cape		Yes I do	Solar	I think I'd choose nuclear but it's too expensive. All the others involve costing but solar seems to me the most efficient way of making electricity. We need immediate action. It is a disgrace South Africans that there's been so much sabotage within and outside Eskom power stations, with some ordinary workers becoming perpetrators.	Robert	retired
2022-07-09 08:33:31	Gauteng		Yes I do	Solar	Ons is een van die lande met die meeste sonskyn in groot gedeeltes van SA	Johan	retired
2022-07-09 08:30:55	Western Cape		Yes I do	Solar	Actually, no single source of energy is required. Rather a combination of e.g. solar and wind.	Louise	retired
2022-07-09 08:30:11	Western Cape		Yes I do	Solar		Louise	retired
2022-07-09 08:30:11	Western Cape		Yes I do	Solar	Any green energy will do. It has to do with what can be integrated now and can be sustained at lower cost given the price of energy today. All participants must have their proposals published in the public domain because this is now again time for corruption to lift its ugly head. We are sick and tired of that. Transparency is essential and preference must be given to local entrepreneurs with the ability to deliver and job creation for South Africans not illegal immigrants.	Jack	retired
2022-07-09 08:26:00	Western Cape		Yes I do	Solar		Beatrice	retired
2022-07-09 08:24:58	Gauteng		Yes I do	Solar	Definately not nuclear as we will never afford it. Why not make use of our sun and wind? Solar panels should be installed by private companies and subsidised by government. Coal only to be used if properly inspected and managed by independant companies.	Leila	retired

2022-07-09 08:24:15	Gauteng	Yes I do	Solar	Solar is our best option due to the fact that SA has abundance of high temperature sun light all year round. Wind should also be part of the supply mix as a support to solar. Allow private suppliers to feed as much electricity into the grid as they can. Combine the above with strategically placed battery storage facilities, and the problem is solved. For this to happen, scrap local manufactured content and BBBEE regulations immediately. Get Tesla(Elon Musk) to supply the battery storage facilities. Tesla is the world leader in the later. Australia is one of his big success stories with regards to battery storage facilities.	Joachim	retired
2022-07-09 08:19:31	Western Cape	Yes I do	Solar	Something needs to happen sooner rather than later. At the rate we're going businesses are going to crumble and the economy sink past the point of no return. The people need to take matters into their own hands but the majority don't know how it can be done legally and peacefully.	Maureen	retired
2022-07-09 08:17:47	Mpumalanga	Yes I do	Solar	South Africa has many ootions, Sun, Wind, Gas, even the waves of the see can be used. We supply electricity to Botswana, Lesotho, Mozambique, Namibia, eSwatini Zimbabwe, I just wonder if they also suffer with us with load shedding. I worked for Eskom projects for 34 years if they did not get rid of the expertise after 1994 this country would not have been in this mess, we planned new power stations 10 years in advance. This was stopped by the current government.	Jan	retired
2022-07-09 08:17:11	Western Cape	Yes I do	Solar	Solar and wind renewable energy would be the best . All red tape should be scrapped to allow private individuals to come off the grid.	Janet	retired
2022-07-09 08:15:27	Gauteng	Yes I do	Solar	We need a combination of wind, solar, wave energy and every other possible renewable source of energy. The quickest solutions would be wind and solar. We should have been installing solar for the last 20 years already. All red tape should be scrapped and Eskom privatized to a 1st class reputable multinational company with leading edge technology.	Mike	retired
2022-07-09 08:11:48	Gauteng	Yes I do	Solar	Use the existing wind farms to the grid and install new solar farms USE PRIVATE ELECTRICITY PRODUCERS !	Merle	retired

2022-07-09 07:21:51	North West		Yes I do	Solar	It is of the utmost importance to get coal to a minimum and make use of nature in what GOD gave us for nothing that we my use , but yes use correctly not mis -use sun and wind We have it , sun and wind in great quantity in South Africa , in the hole of Africa ... We can be world leaders but sorry no leadership or will to do the correct thing Thanks.....	Andre	retired
2022-07-09 07:21:34	KwaZulu- Natal		Yes I do	Solar	However, any will do as long as every person has fair availability & government can't have control. Eskom is a has been, ruined by the likes of unscrupulous people!	Tina	retired
2022-07-09 07:20:53	Western Cape		Yes I do	Solar	I am sick and tired of eskom and all their corruption ? ?!! The ANC government is one foul-smelling group, whose only aim is to make our country the laughing stock of the world!! I truly believe that we should have faced this problem a long time ago!! I really appreciate dearsouthafrica for taking this issue on. I would strongly recommend solar or wind power ?, and let it be done immediately!!	Marlene	retired
2022-07-09 07:16:06	Western Cape		Yes I do	Solar	Utilize natural most sustainable sources(wind,solar) as 1st step. Eskom is broken, fix it: privatize.	Rozanne	retired
2022-07-09 07:12:16	Gauteng		Yes I do	Solar		Maatje	retired
2022-07-09 07:12:08	KwaZulu- Natal		Yes I do	Solar	Privatize Eskom. Utilize our abundant sunlight for solar use	Cathy	retired
2022-07-09 07:12:05	KwaZulu- Natal		Yes I do	Solar	Privatize Eskom. Utilize our abundant sunlight for solar use	Cathy	retired
2022-07-09 07:08:41	Free State		Yes I do	Solar	Solar and wind can be used to help with SA's immediate needs. The government can encourage these systems for private and business use by helping financially.	Nelia	retired
2022-07-09 07:05:59	Western Cape		Yes I do	Solar	First get rid of Mantashe. Privatise Eskom. Fire the perpetrators. Deploy committed defence force personnel to look after the power stations.	Pieter	retired
2022-07-09 07:03:15	Gauteng		Yes I do	Solar	Along with solar, gas and wind should be used as there is an abundance of all them. The "red tape" is only there to protect the pockets of the political clique and not our economy. Amendment to legislation is long overdue. If it is not amended, "State Capture 2.0" will occur.	Willem	retired
2022-07-09 07:01:35	KwaZulu- Natal		Yes I do	Solar	Solar and Wind power urgently required. Reliance on any ANC run entities needs to end and run by privately run companies.	Gill	retired
2022-07-09 06:59:48	KwaZulu- Natal		Yes I do	Solar		Morganat han	retired
2022-07-09 06:59:46	Gauteng		Yes I do	Solar	Solar and gas. Both options are fantastic. Summer time plenty of sun	Shirley	retired
2022-07-09 06:59:27	KwaZulu- Natal		Yes I do	Solar		Jennifer	retired
2022-07-09 06:59:21	Eastern Cape		Yes I do	Solar	Its ridiculous that we have all the sunshine and wind and not using it. Stop coal etc asap.	Ina	retired
2022-07-09 06:57:14	Eastern Cape		Yes I do	Solar	It doesn't matter so much to me what type of alternative electricity production suits our needs best (which would probably be a combination of technologies). Its of paramount importance that the ANC is forced to abandon its rigid clinging to outdated, damaging ideologies, not just with energy production, but in totality. Getting rid of cadre deployment and central government (ANC) control would be a splendid start to solving problems in SA.	Charles	retired
2022-07-09 06:55:28	Western Cape		Yes I do	Solar	Provide interest free loans to home owners to have solar installed. Use the surplus they produce as repayment of loans.	Lulu	retired
2022-07-09 06:54:57	KwaZulu- Natal		Yes I do	Solar	Need reliable power	Ronald	retired
2022-07-09 06:54:44	Gauteng		Yes I do	Solar	Eskom can't supply all our needs. Corruption over the years has drained our country. If Eskom can store power so can solar and wind power be stored. In our country with much sunshine solar power is a good solution.	Irene	retired
2022-07-09 06:53:46	Western Cape		Yes I do	Solar	I am all for any solutions to do away with all this load shedding as it is crippling this beautiful South Africa . Why are so many people trying to destroy such a wonderful part of the world. Wish I was a genius to invent a huge solar panel to protect SA. God Bless SA.	Marilyn	retired
2022-07-09 06:53:37	Gauteng		Yes I do	Solar	It's a no brainer. We need private companies to supply electricity to doomed SA. Companies and professionals will leave South Africa to our detriment. We need to build South Africa UP.	Renee	retired

2022-07-09 06:48:13	Gauteng		Yes I do	Solar		Lorraine	retired
2022-07-09 06:44:04	Gauteng		Yes I do	Solar		Errol	retired
2022-07-09 06:44:01	Gauteng		Yes I do	Solar		Errol	retired
2022-07-09 06:41:50	Western Cape		Yes I do	Solar	Solution is Solar as it cannot be effected by price changes	David	retired
2022-07-09 06:39:47	KwaZulu- Natal		Yes I do	Solar	We are tired of load shedding!!!! Find that government selects areas to their liking ... some have load shedding others not Why is this!!! Many are being affected emotionally and mentally because of long and sudden power cuts . Need radical and immediate changes!!!	Angela	retired
2022-07-09 06:39:11	Mpumal anga		Yes I do	Solar	The absolutely first move is to sack the cANcer. We have all had enough of their total incompetence, corruption and dishonesty! Both solar and the wind are free. Use them to our advantage. We have loads of both, and they are a free source of energy.....and as South Africans we should benefit by this incredible bonus; not be taxed out of existence so that members of the cANcer can build more mansions, purchase another 50 cars, marry another 10 maidens each, etc. etc.	Ingrid	retired
2022-07-09 06:33:27	KwaZulu- Natal		Yes I do	Solar	Solar in the domestic arena should be promoted and subsidised. The existing coal fired power stations should be managed by re-employing knowledgeable staff at all levels, especially at senior and middle management level.	Werner	retired
2022-07-09 06:31:56	Western Cape		Yes I do	Solar		Mel	retired
2022-07-09 06:25:40	Gauteng		Yes I do	Solar	Gauteng has an abundance of blue sky and sunshine during winter that is great for solar. We also have large tracts of open land. Ongoing expenses, other than the security we would need to protect solar farms, would be low. Go solar, it is green, fast and effective. Definitely an opportunity for IPP's.	Gordon	retired
2022-07-09 06:25:17	KwaZulu- Natal		Yes I do	Solar	Solar and wind would be the best options, both are readily free all year round, wind and sun	Janine	retired
2022-07-09 06:20:58	Western Cape		Yes I do	Solar	Dit is tyd vir aksie; alle ander metodes (wind, son, water) moet benut word om die chaos wat die ANC en Eskom veroorsaak, te omseil.	Chris	retired
2022-07-09 06:14:05	KwaZulu- Natal		Yes I do	Solar	Yes, Solar and wind power any time. BEWARE Nuclear power....it is expensive, secretive, and many countries are against it. Radio-active wastes are buried deep into the earth, leakage can happen, we look at the accidents in Japan and Ukraine. We should say 'no' to nuclear power.	Paul	retired
2022-07-09 06:11:07	Western Cape		Yes I do	Solar	I support any means to add power to the grid, except coal	Toby	retired
2022-07-09 05:55:00	KwaZulu- Natal		Yes I do	Solar		Jean	retired
2022-07-09 05:31:37	Western Cape		Yes I do	Solar	Stop all the red tape. Stop talking, let's start acting!!	Johan	retired
2022-07-09 05:21:57	Gauteng		Yes I do	Solar	Immediate changes necessary to stop load shedding and recover our economy, Cut the red tap and implement urgently.	James	retired
2022-07-09 04:59:17	Gauteng		Yes I do	Solar	We have so much open land and sun in SA. Solar farms is the first option which will be our partial solution. Windmills also need to be installed together with solar.	Inakshi	retired
2022-07-09 04:58:21	Gauteng		Yes I do	Solar		Motsei	retired
2022-07-09 04:56:55	Gauteng		Yes I do	Solar		Pierre	retired
2022-07-09 04:56:53	Gauteng		Yes I do	Solar	If it is Solar or Wind or Water we need to stop polluting the world.	Susana	retired

2022-07-09 02:43:23	Western Cape		Yes I do	Solar	Follow Germany's approach	Brenda	retired
2022-07-09 02:05:28	Gauteng		Yes I do	Solar		Peter	retired
2022-07-09 01:30:06	Western Cape		Yes I do	Solar	We have to use everything at our disposal. Then we have to rid Eskom, of all the rotten wood. Get fresh and fully qualified staff from ministerial positions to the cleaners. Change we have to make or we revisit this in 27 years time again	William	retired

2022-07-09 01:17:20	Gauteng		Yes I do	Solar		ERIC	retired
2022-07-09 01:14:21	Gauteng		Yes I do	Solar		Dipak	retired
2022-07-09 01:00:55	Western Cape		Yes I do	Solar	The government is at least 10 years behind in their thinking and hasn't acted on any of the recommendations by experts for what seems a lifetime. Now 'suddenly' we have a crisis. Only renewable resources are an option. Lift restrictions on generation IMMEDIATELY and force renewable energy into the grid. There is no more time just do it IMMEDIATELY.	Allan	retired
2022-07-09 00:42:04	North West		Yes I do	Solar	Solar and wind - we have plenty of sunlight and wind for free. Immediate solution however: fire all the incompetent, unproductive and corrupt employees immediately, scrap BEE and AA and hire competent persons who want to work. As the problems were primarily created by the ANC's cadre employment policies, let its ministers, MP's and other cadres help finance projects to fix the wrongs of the past by taking 50 percent salary cuts.	JULES	retired
2022-07-09 00:25:34	Western Cape		Yes I do	Solar	Any form of green energy, whether hydro, wind or solar or combination of any. Government should cut /remove red tape and allow any private producers to immediately link to grid with alt electricity provision SUGGESTION: Government/Eskom should provide a subsidy to private residents to install solar system/s. Alternatively tax rebate . Any form of incentive to encourage green energy to business/ and private properties	Andre	retired
2022-07-09 00:25:32	Western Cape		Yes I do	Solar	Any form of green energy, whether hydro, wind or solar or combination of any. Government should cut /remove red tape and allow any private producers to immediately link to grid with alt electricity provision SUGGESTION: Government/Eskom should provide a subsidy to private residents to install solar system/s. Alternatively tax rebate . Any form of incentive to encourage green energy to business/ and private properties	Andre	retired
2022-07-09 00:07:05	KwaZulu- Natal		Yes I do	Solar	South Africa has plenty of sunshine, which is free. Solar energy will add asignificantly to the Grid. This is so especially because battery storage is likely to be improved a few years down the line.	mapogo	retired
2022-07-08 23:54:15	Gauteng		Yes I do	Solar	One company monopolizing electricity production is a recipe for disaster when the other ingredients are incompetency and corruption. Competition is healthy for all concerned. People are paying extortionate electricity accounts and yet have to suffer from lack of service. One scenario is parents of young babies being unable to heat babies formula/milk, I could create a list of stressful situations in this regard. If people weren't suffering so much the situation would be laughable, as it is, it's a subject for jokes.	Iris	retired
2022-07-08 23:48:11	Western Cape		Yes I do	Solar	Solar energy has become relatively cheaper and can be set up fairly quickly. We have a crisis NOW.	Arthur	retired
2022-07-08 23:38:10	KwaZulu- Natal		Yes I do	Solar	In fact, any means of producing proper efficient full time electricity would be welcome. This should be supplied by Moral Private Enterprises.	Martin	retired
2022-07-08 23:27:30	KwaZulu- Natal		Yes I do	Solar	We have so much sunshine in Kzn in fact the whole of South Africa, solar farms could produce so much of the electricity needed, plus each house could have its own panels for geyser etc. but get qualified people to install correctly 1st time.	Hazel	retired
2022-07-08 23:12:08	Western Cape		Yes I do	Solar	Solar and wind for the short and medium term but nuclear for the long term. I am confident the nuclear waste problem will be solved in the near future.	EDWARD	retired
2022-07-08 23:08:29	Western Cape		Yes I do	Solar	Why struggling with power while South Africa's got all the sources needed. This is the most important thing the economy needs right now.	Rykie	retired
2022-07-08 23:04:59	Western Cape		Yes I do	Solar	Get solar panels on as many rooftops as quickly as possible with systems that have battery backup for the basic needs of the home. This will eliminate a large portion of the morning and evening peak power demands. Also. get as much solar as possible on all commercial buildings. Most of the first world has been doing this for 20 years or more. Uncle Gwede needs to wake up and join the 21st century, or else give up his dreams of massive bribes and kickbacks from a huge, wasteful nuclear deal.	Ken	retired
2022-07-08 22:53:39	Western Cape		Yes I do	Solar	Everyone is so gatvol with this sham of a Government who are succeeding in holding the entire country to ransom. It is time that we take the power away from the ANC and source alternative power for the people of South Africa totally away from the Government. Let us be free and independant of Eskom	Hilary	retired
2022-07-08 22:53:21	KwaZulu- Natal		Yes I do	Solar	SA has the ability and the resources to generate power by using a mix of reusable energy sources (combined with the current coal) . It's critical that the rules are revised ASAP to enable the independant power producers (and experts in their various fields) to be allowed to move forward quickly without being hindered by outdated and ineffective government plans and the current coal interest groups within government. SA can't afford to allow Eskom and the government to destroy its future by allowing their stupidity, indecision and incompetence to continue unabated.	Chris	retired
2022-07-08 22:52:07	KwaZulu- Natal		Yes I do	Solar	South Africa has an abundance of sun and wind, it's crazy to have to rely on Eskom when those God given gifts could be harnessed to give the people electricity and free at that.	Kay	retired
2022-07-08 22:47:00	Gauteng		Yes I do	Solar	Eskom has been captured and the loadshedding is mainly due to internal sabotage. The whole country is sabotaged due to non-existent policing and ill discipline at all spheres of government.	Theo	retired

2022-07-08 22:39:59	Gauteng		Yes I do	Solar		Clifford	retired
2022-07-08 22:33:29	Western Cape		Yes I do	Solar	Solar is quick to install low cost and easy to maintain. Residents should be encouraged to install solar systems and feed into the grid. Hydro electric and other storage systems needed to provide night time requirements.	Jon	retired
2022-07-08 22:23:11	Western Cape		Yes I do	Solar		Rodney	retired
2022-07-08 22:20:32	Western Cape		Yes I do	Solar	Its a no brainer, Renewables Solar, Wind and the likes has to replace all the other methods as fast as possible...Make incentives for people who install their own electricity production...let them feed into the grid their surplus for free or pay them as much as you charge others for the consumption of dirty energy and dont charge basic fees at all! Build PV panel and batterie factories in SA and so on...	Kilian	retired
2022-07-08 22:19:32	KwaZulu- Natal		Yes I do	Solar		Anne	retired
2022-07-08 22:19:22	Western Cape		Yes I do	Solar		BC	retired
2022-07-08 22:15:37	Free State		Yes I do	Solar		Lucia	retired
2022-07-08 22:12:09	Gauteng		Yes I do	Solar	The LORD GOD has given us wonderful sunshine and wind to use to generate energy and we should use them.	Elsebe	retired
2022-07-08 22:08:44	Western Cape		Yes I do	Solar	South Africa has abundant strong sunlight almost the whole year. Harnes this free sustainable and renewable energy. The technology for doing this has been known and in practice for at least 15 years and has improved substantially since its invention. This is an almost immediate solution but at the same time, build many more wind turbines.....as everyone in the Cape will confirm, we have more than enough strong to galeforce winds - the energy generated from this province alone, should be almost enough to supply most of SA!! I truly believe that the reason why the corrupt ANC government have resisted this solution for many years is because they want to switch to nuclear power, which will be financed by the Russians and Chinese - and the reason for this is that there is a "what's in it for me" lucrative kickback to those who swing the deal their way. Remember the the infamous crooked arms deal? Well, hello, this is the next opportunity for the corrupt government politicians to enrich themselves again!!!	COLLEEN	retired
2022-07-08 22:07:14	Gauteng		Yes I do	Solar		Patricia	retired
2022-07-08 22:03:20	Western Cape		Yes I do	Solar	We should have opted for solar and wind long ago. Private electricity generation should be linked to the grid to provide extra support. Please do it now!	Corene	retired
2022-07-08 22:02:33	Free State		Yes I do	Solar		Margaretha	retired
2022-07-08 21:59:58	Gauteng		Yes I do	Solar		Adriaan	retired
2022-07-08 21:55:56	Gauteng		Yes I do	Solar	We have enough sun and wind in this country to use without destroying our country	Colleen	retired
2022-07-08 21:54:24	Western Cape		Yes I do	Solar	Supply of electricity should be easily available and therefore private suppliers should be able to provide electricity, munisipalities should be in control of the supply of electricity.	Hannes	retired
2022-07-08 21:53:10	Western Cape		Yes I do	Solar	Given South Africa's geographic characteristics, Solar is the obvious choice. However, a large amount of concentrated solar generation (CSP) is also required, in order to extend power production into the night. Wind power would be a secondary power source. Any gas turbine power production must be seen as a strictly temporary solution, not more than 5 years, if absolutely necessary, given the environmental concerns, uncertainty of availability and price of gas.	Malcolm	retired
2022-07-08 21:45:23	North West		Yes I do	Solar	Die regering sal nooit die vermoë he om die nodige krag Vir die land te voorsien nie. Die oplossing le in private toetreders.	Johannes	retired
2022-07-08 21:41:32	Limpopo		Yes I do	Solar	Please. Please bring this fiasco to an end. May competent people be given the running of our country's electricity. Please I ask for privatization of escom. The present government has no control over this chaos which is aimed at destroying South Africa.	Tersia	retired
2022-07-08 21:37:20	Gauteng		Yes I do	Solar	Solar would be the best and probably the least expensive! Electricity is great to have , however, what's best for South Africa .. All the people of this nation, INCL the poor!!!	denise	retired
2022-07-08 21:34:21	North West		Yes I do	Solar	Solar, Wind, Hydro to support Eskom and get rid of all the Looters, Strikers and Thieves.	Ria	retired
2022-07-08 21:26:53	Gauteng		Yes I do	Solar	We need some help as Eskom is not helping	Annalien	retired
2022-07-08 21:24:38	Gauteng		Yes I do	Solar	We see nothing getting done by Eskom better to use other forms of help	Annalien	retired
2022-07-08 21:22:54	Western Cape		Yes I do	Solar	Renewable forms of energy production are the way to go - not only solar but wind and hydro-electric power. It is also absolutely essential to enforce the labour laws governing strike action and severely punish those who destroy property, threaten others and sabotage power production.	Daniel	retired
2022-07-08 21:14:21	Western Cape		Yes I do	Solar		Tertia	retired
2022-07-08 21:13:17	Limpopo		Yes I do	Solar		Linda	retired

2022-07-08 21:08:40	Western Cape		Yes I do	Solar	We have a vast region, namely the Karoo which is ideal for solar power plants. We should be investing in large solar plants instead of wasting billions on inefficient and clapped out coal power plants. There are examples of solar plants used effectively by other countries. We should also be investing in wind power turbines. The cost of solar and wind plants have become much more affordable over time.	Mike	retired
2022-07-08 21:08:16	Mpumal anga		Yes I do	Solar	Solar and wind as well as independent suppliers on a free-market basis	Ken	retired
2022-07-08 21:06:09	Gauteng		Yes I do	Solar	Eskom is clearly failed, so we need to explore new ways	Djnna	retired
2022-07-08 21:05:02	Limpopo		Yes I do	Solar	In my opinion, solar is the best option, due to 1) Coal /steam turbines is too waste full, 2) Nuclear is too dangerous in a generally corrupt environment, 3) Gas or diesel to steam generators are too costly, 4) Windmill farms have a negative impact on the climatic conditions.	Roelof	retired
2022-07-08 21:02:37	Western Cape		Yes I do	Solar		liesbeth	retired

2022-07-08 20:06:53	Western Cape		Yes I do	Solar	South Africa has the ideal sources for solar and wind energy. What are we waiting for ??? Let's save our beautiful land and scrap coal, nuclear et al.	JEAN	retired
2022-07-08 20:06:03	Western Cape		Yes I do	Solar	Utilise the sun it's free.	Odette	retired
2022-07-08 20:04:10	Gauteng		Yes I do	Solar		Minah	retired
2022-07-08 20:03:47	Gauteng		Yes I do	Solar	Solar and wind for short term. Long term nuclear.	Emma	retired
2022-07-08 20:01:43	Western Cape		Yes I do	Solar		Sharon	retired
2022-07-08 20:01:06	Western Cape		Yes I do	Solar	Solar would be the best for SA (lots of sunshine across the country) Shortest lead time, lowest cost for companies to utilise their roof areas to supply they needs and other companies could invest in solar farms utilising land not suitable for farming. Any power generated should / could be fed into the grid to recover some of the cost. Also private house owners should be subsidised to install solar for their needs. This would take load off Eskom in the shortest possible time and be cost effective.	John	retired
2022-07-08 19:58:16	KwaZulu- Natal		Yes I do	Solar		Sandra	retired
2022-07-08 19:57:17	Western Cape		Yes I do	Solar	Sunny South Africa for solar power! scrap the "Eksdom" monopoly and let the people of SA have 24 hour power as it used to be and as it should be now. We have had enough of load shedding which messes with our economy and leaves the poor people even poorer. Let's move forward constructively and use the sun we have to benefit all South Africans.	Hilary	retired
2022-07-08 19:56:48	Western Cape		Yes I do	Solar	We need independent power producers as the government are not able operate them efficiently.	Mervyn	retired
2022-07-08 19:56:14	KwaZulu- Natal		Yes I do	Solar			retired
2022-07-08 19:54:51	Western Cape		Yes I do	Solar		Susan	retired
2022-07-08 19:52:32	Western Cape		Yes I do	Solar	Solar and wind energy are readily available, harness these alternatives. Clearly Eskom is not up to the task. Having blackouts for hours on end is destructive to the economy & increase crime sprees. Private energy suppliers could also be given a chance. Privatise Eskom - at present we are paying for their high wages and get next to nothing in return - privatise Eskom	Netta	retired
2022-07-08 19:52:15	Western Cape		Yes I do	Solar		Ray	retired
2022-07-08 19:49:51	Western Cape		Yes I do	Solar		Pieter	retired

2022-07-08 19:49:28	KwaZulu-Natal	Yes I do	Solar	If Solar Power is harnessed on a large scale(example India and similar Countries) with storage facilities for cloudy days it can be feasible to develop hybrid power sources as backup ! This can only be successful if financial resources are put into use for the citizens of the country and NOT JUST INDIVIDUALS , through greed and selfish actions but for the benefit of our people of our Country. Employment , as one example amongst many , would become more viable plus stable as well . Privatising would also encourage competetion, thereby a possibility of reduced pricing !	Jaikumar	retired
2022-07-08 19:48:50	Gauteng	Yes I do	Solar	We could not allow terrorist to hold this country at ransom boycotting a power utility I think solar is good for Gauteng may be Hydaulic in the cape	Helena	retired
2022-07-08 19:48:41	KwaZulu-Natal	Yes I do	Solar			retired
2022-07-08 19:48:20	KwaZulu-Natal	Yes I do	Solar	We have plenty of sunshine in south ZA. Why on earth should we not make use of it!	N	retired
2022-07-08 19:43:51	Eastern Cape	Yes I do	Solar	All and any method of power generation that does not require coal or gas should be encouraged and supported. Eskom is obviously so embroiled in sabotage and neglect of infrastructure that it will never able to recover.	Sally	retired
2022-07-08 19:43:09	Western Cape	Yes I do	Solar	Eskom is bringing South Africa's economy to its knees and should be privatized.	Carolind	retired
2022-07-08 19:41:41	Gauteng	Yes I do	Solar		Elza	retired
2022-07-08 19:39:07	Western Cape	Yes I do	Solar		Malcolm	retired
2022-07-08 19:37:03	Western Cape	Yes I do	Solar	Hydro, wind or solar is fine by me. Whatever of these 3 are the fastest to provide energy for South Africa immediately.	Trudie	retired
2022-07-08 19:34:54	Gauteng	Yes I do	Solar		Andrzej	retired
2022-07-08 19:33:51	Western Cape	Yes I do	Solar	Unfortunately when embeki was approached during his term as president for more power stations his answer was that they weren't needed. Going totally green will never work, a mix is needed but away from fossil fuels. Naturally our present government will find a way to enrich themselves whichever way we go. They have already broken this country so we shouldn't expect anything different.	Kelvin	retired
2022-07-08 19:33:34	Gauteng	Yes I do	Solar	As we have sun in abundance, please use this option urgently. Also wind turbines for the windy provinces.	Jan	retired
2022-07-08 19:33:18	Western Cape	Yes I do	Solar	We need to diversify our energy mix and not rely solely on old or malfunctioning coal power stations.	Sandy	retired
2022-07-08 19:33:15	Gauteng	Yes I do	Solar	Solar is the way to go - Eskom has been plundered by the Zuma and Guptas, and now the unions are not playing ball. Current management is doing their best against the odds. Bring in the IPP as soon as possible.	Louise	retired
2022-07-08 19:29:46	Western Cape	Yes I do	Solar		Gary	retired
2022-07-08 19:26:24	Western Cape	Yes I do	Solar	It is long overdue to allow private companies and individual households to generate as much electricity as they can, of course in a responsible environment friendly way. A combination of wind, solar and Hydrogen would be the best. Use solar and wind to produce hydrogen, which then can be used to generate electricity and run motor vehicles. This does not exclude Eskom, they should be leading the drive for alternative energy but not have the monopoly over energy production.	Wolfgang	retired
2022-07-08 19:25:42	Gauteng	Yes I do	Solar	The government has been doing absolutely nothing about this huge energy problem for many years and its time to realise they cannot keep on this economic path of destruction.	Melanie	retired
2022-07-08 19:25:19	Gauteng	Yes I do	Solar	"The fourth highest paid workers of Eskom is not working for it. the only way to wake them up is by competition. Get independent electricity suppliers on board. Create a price war that will push prices down, and will at the same time get rid of the dead wood Eskom workers. The legislation is overdue to be changed. These Eskom workers are paid under Government protection! REMOVE that." Get securityforce that will be able to stop sabbotage and stealing of cables etc etc.	Gisela	retired
2022-07-08 19:21:18	Western Cape	Yes I do	Solar	Mainly Solar, but supported by other renewables. We have already made enough of a mess with dire consequences globally.	Robby	retired
2022-07-08 19:20:03	Gauteng	Yes I do	Solar	Sun(solar) and Wind are readily available in South Africa and needs to be fully utilizer/taken advantage of.	Michael	retired
2022-07-08 19:16:37	KwaZulu-Natal	Yes I do	Solar		Anthony	retired
2022-07-08 19:15:57	Gauteng	Yes I do	Solar		Mary	retired
2022-07-08 19:15:25	Eastern Cape	Yes I do	Solar	We live in a very sunny country. By installing solar water geysers for every household, we could dramatically reduce the demand for electricity. Installing solar panels should be subsidised so that it is not so expensive and would be accessible for more people and businesses to come completely off the grid.	Caroline	retired

2022-07-08 19:13:58	Gauteng		Yes I do	Solar	ITS A NO BRAINER. AND COMPETITION IS GOOD BUT WE MUST RESPECT AND ADHERE TO THE ENVIROMENTAL REQUIREMENTS	Gerald	retired
2022-07-08 19:06:29	Western Cape		Yes I do	Solar	15 years later we are only now reflecting on the skills shortage of engineers et al that Eskom got rid of in exchange for cadre employment and we are only reflecting on that now, 15 years of load shedding later. Clearly the government has lost its way.	Harry	retired
2022-07-08 19:04:16	Western Cape		Yes I do	Solar		Irene	retired
2022-07-08 19:02:35	Western Cape		Yes I do	Solar		Chris	retired
2022-07-08 19:02:25	Gauteng		Yes I do	Solar	Scrap the redtape so that we can buy electricity from Inependant Private Producers who make use of Solar or Wind or other renewable energy sources	Engela	retired
2022-07-08 19:01:44	Western Cape		Yes I do	Solar	I think a combination of hydro, solar and wind could be implemented.	Heather	retired
2022-07-08 19:01:29	Gauteng		Yes I do	Solar		Pieter	retired
2022-07-08 19:00:51	KwaZulu- Natal		Yes I do	Solar		Jackie	retired
2022-07-08 18:59:09	Free State		Yes I do	Solar	I feel that we should use renewable energy not only wind but also hydro and solar electricity could also be used. Make use of our wind and sun.	Marita	retired
2022-07-08 18:58:09	Gauteng		Yes I do	Solar	We need to start getting away from fossil fuels, reduce global warming, to help stabilize weather patterns. Super sunshine here, use it, backed up with good wind turbine systems.	Roger	retired
2022-07-08 18:58:08	Gauteng		Yes I do	Solar	Solar and wind coupled with battery storage will stop load shedding within two years. This will foster economic growth and stop rising unemployment. We will also improve the quality of our atmosphere and increase well being of the population. It's a win-win situation.	Arvind	retired
2022-07-08 18:56:39	Gauteng		Yes I do	Solar	Sunny SA	Louise	retired
2022-07-08 18:56:36	Gauteng		Yes I do	Solar	Sunny SA	Louise	retired
2022-07-08 18:55:07	Western Cape		Yes I do	Solar	Solar because we have plenty of sunshine & second wind as we have a lot of wind especially in the western & Eastern cape.	Michael	retired
2022-07-08 18:54:40	Eastern Cape		Yes I do	Solar	solar and wind are free (praise be to God) we must look at private producers with integrity though otherwise we can be taken for a ride. Again.	Sonia	retired
2022-07-08 18:53:02	Gauteng		Yes I do	Solar		Petrie	retired
2022-07-08 18:52:52	KwaZulu- Natal		Yes I do	Solar	We live in sunny South Africa. Solar and other renewable energy is the way to go. But legislation should be put in place to prevent the current extremely high prices of solar, batteries, and all alternative power sources. We don't need the corrupted Eskom and its cronies and how they destroy everything in our country.	SHARON	retired
2022-07-08 18:52:40	Western Cape		Yes I do	Solar	Wind and solar are the easiest way to go immediately. If nothing else allow homeowners to put solar on their properties without all the limits.	Diane	retired
2022-07-08 18:52:25	Gauteng		Yes I do	Solar	Solar energy in my opinion will be more stable and dependable compared to what we have now.	Engela	retired
2022-07-08 18:52:03	Gauteng		Yes I do	Solar		Kim	retired
2022-07-08 18:51:53	Western Cape		Yes I do	Solar	Why are we still waiting?	Brenda	retired

2022-07-08 18:48:36	KwaZulu- Natal		Yes I do	Solar		Peter	retired
2022-07-08 18:43:27	KwaZulu- Natal		Yes I do	Solar	Solar is the best sun is free it could be great in SA.	Caroline	retired
2022-07-08 18:42:18	Western Cape		Yes I do	Solar	Sunny SA has the resource to compliment current base load with solar	Brian	retired
2022-07-08 18:41:02	Gauteng		Yes I do	Solar	State capture has not stopped. Actual state capture with Zuma, Cupta's, ANC, and EFF. Then came Covid. For almost 2 year's we were locked down. Then when the Zondo Commission came to an end. It was the dollorgate saga. Petrol price hike after the other. Just all ways having to bleed the tax payers dry. Hours of load shedding. Why must we pay for a God given Sun. Enough with bleeding us dry. ANC and there caders must go.	Magda	retired
2022-07-08 18:39:49	KwaZulu- Natal		Yes I do	Solar		Dennis	retired
2022-07-08 18:39:04	KwaZulu- Natal		Yes I do	Solar	Solar and battery systems plus thermosolar as used in Uington North West, are low cost producers. Once installed and on line there are very low maintenance costs. All others have significant maintenance and operational costs.	Ray	retired
2022-07-08 18:38:43	Mpumal anga		Yes I do	Solar	All options should be looked into. We really need to get those already producing power to provide the grid.	Sheryl	retired
2022-07-08 18:37:38	Western Cape		Yes I do	Solar	No. 1 = Solar No. 2 = Wind No. 3 = Hydro	Barbara	retired
2022-07-08 18:36:56	Western Cape		Yes I do	Solar	Wind and solar energy are the obvious solution for a country like ours. It comes for free, we must just use it	Caroline	retired

2022-07-08 18:36:38	Gauteng		Yes I do	Solar	Please immediately amend legislation so as to facilitate the rapid erection and utilization of many solar power-stations, with massive battery storage, and with excellent security measures against vandalism and theft.	Alan	retired
2022-07-08 18:34:43	KwaZulu-Natal		Yes I do	Solar	In fact any of the suggested solutions will do in the interim. Preference to green solutions but something should be done immediately.	Vivienne	retired
2022-07-08 18:33:29	Northern Cape		Yes I do	Solar	No. 1 = Solar No. 2 = Wind No. 3 = Hydro No.4 = Nuclear and others, like coal.	Guilliam	retired
2022-07-08 18:32:22	Western Cape		Yes I do	Solar	All option should implemented regional by private sector. No tenders.	Hans	retired
2022-07-08 18:31:10	Gauteng		Yes I do	Solar	Due to the present situation we find the country to be, the only alternative to augment energy availability is to engage with independent producer that will add to the national grid, to let the country be able to produce and compete globally on green energy	Bahenyi Rodney	retired
2022-07-08 18:29:20	Outside SA	Uk	Yes I do	Solar		Peter	retired
2022-07-08 18:27:20	Western Cape		Yes I do	Solar		Lynne	retired
2022-07-08 18:22:22	Gauteng		Yes I do	Solar		Corinne	retired
2022-07-08 18:22:21	Gauteng		Yes I do	Solar	Use a combination of solar, wind and Hydro power. Whichever is more cost effective	Regina	retired
2022-07-08 18:21:17	Free State		Yes I do	Solar	Just read the Solidarity report on electricity. It make so much sence. Remove the red tape to sell your electricity to Eskom.	Gawie	retired
2022-07-08 18:20:13	KwaZulu-Natal		Yes I do	Solar	We need power, the government has proved that they cannot cope. Simply, let the private sector take the necessary action to appoint educated professionals to establish a plan which could guarantee efficient and effective power supply, as a matter of urgency.	Elize	retired
2022-07-08 18:19:56	Western Cape		Yes I do	Solar	Sonkrag vir residensieel en steenklll vir industrie	Piet	retired
2022-07-08 18:17:32	Western Cape		Yes I do	Solar		Kris	retired
2022-07-08 18:17:19	Western Cape		Yes I do	Solar	Solar and wind power are the best way to produce electricity. Why has Eskom not made any efforts to go this root.	Una	retired
2022-07-08 18:17:11	Western Cape		Yes I do	Solar	Let people generate and sell back to Eskom surplus electricity, even private individuals.	Leon	retired
2022-07-08 18:16:23	Gauteng		Yes I do	Solar	Solar power is mostly available.	Hentie	retired
2022-07-08 18:16:03	KwaZulu-Natal		Yes I do	Solar	As a sort term solution, renewables such as solar or wind which will provide supplementary power to reduce load shedding. We still need base load and the only viable options for that are nuclear or coal both of which take a long time to implement. One solution we must NOT consider is Karpowerships. They are just Gwede Mantashe looking for kickbacks to supplement his pension. Coal is probably the best long term solution. Don't worry about saving the planet, it has been looking after itself quite adequately for 4.5 billion years.	Graham	retired
2022-07-08 18:14:23	Western Cape		Yes I do	Solar		Waldie	retired
2022-07-08 18:13:55	Gauteng		Yes I do	Solar	Open up to all producers of power and let's see the costs involved and how long it takes them to produce electricity for all of SA	Stephen	retired
2022-07-08 18:12:29	Gauteng		Yes I do	Solar		Dennis	retired
2022-07-08 18:11:44	Western Cape		Yes I do	Solar	This country is in an economic crisis due to Eskom not being able to supply the country with electricity. The sooner the private independent producers are linked to the grid the better for the economy and growth of the country. We no longer can let the unions hold us at ransom with illegal wildcat strikes.. Enough is enough.	David	retired
2022-07-08 18:08:35	Gauteng		Yes I do	Solar	Arrest the perpetrators who encouraged last July's Riot looting right now	Daphne	retired
2022-07-08 18:08:19	Western Cape		Yes I do	Solar		J	retired
2022-07-08 18:08:08	Western Cape		Yes I do	Solar	South Africa has more sunshine that many other countries and solar farms have fewer moving parts and need less manpower to operate, so are a logical choice. However, wind farms are also critical factors in an integrated plan since they will operate at night. Both forms of power generation will also require back-up facilities, so this is not an either-or situation. The main stumbling block is the unrealistically low tariffs that Eskom is prepared to pay IPPs, so provision must be made for IPPs to sell directly to users, with some (low) payment to Eskom for the use of the existing distribution network to cover maintenance - the infrastructure was paid for with tax revenue.	Garth	retired
2022-07-08 18:06:13	Western Cape		Yes I do	Solar		Marion	retired
2022-07-08 18:06:11	Western Cape		Yes I do	Solar		Marion	retired
2022-07-08 18:05:09	Western Cape		Yes I do	Solar	Solar,wind,nuclear and coal transported by rail	Roelien	retired
2022-07-08 18:04:51	Western Cape		Yes I do	Solar	solar, wind and hydro would be the best, thus clean energy as well	Richard	retired

2022-07-08 18:04:30	Western Cape		Yes I do	Solar	We need immediate and sustainable action to allow our economy to grow. Renewable energy is the only solution.	Claire	retired
2022-07-08 18:01:51	Western Cape		Yes I do	Solar	The sun is free as is wind so the government needs, as a matter of urgency, to build farms and solar plant AND to let private individuals and companies who generate excess power for their needs, to feed this excess power into the grid. Urgent action is needed before our country goes downhill even further. The government MUST take responsibility for our power crises.	Lynn	retired
2022-07-08 18:01:31	Limpopo		Yes I do	Solar	Lots of sun	Theo	retired
2022-07-08 18:01:01	Western Cape		Yes I do	Solar		rainer	retired
2022-07-08 18:00:16	Western Cape		Yes I do	Solar	Solar and wind energy will be more than sufficient if used wisely	Rocky	retired
2022-07-08 17:59:49	KwaZulu- Natal		Yes I do	Solar	Anything other than Eskom will do. The unions are killing our Beautiful Country from every Sphere of employment. We must get the Unemployed working first	Daleepna nd	retired
2022-07-08 17:59:11	KwaZulu- Natal		Yes I do	Solar	We have so much sunshine so why not use it	Colin	retired
2022-07-08 17:59:10	Gauteng		Yes I do	Solar		Ada	retired
2022-07-08 17:55:18	Gauteng		Yes I do	Solar	I had solar panels installed seven years ago. As it turns out, this was one of my better ideas. However, the Municipality makes it as difficult as possible, to feed excess electricity back into the grid. The red tape involved is just too much. I don't even want to earn money for it, just a credit for the power supplied. Obviously, they don't want to lose the revenue for supplied electricity...	FH	retired
2022-07-08 17:54:26	Western Cape		Yes I do	Solar	We have plenty of sun and must make use of it.	Jamie	retired
2022-07-08 17:54:06	Gauteng		Yes I do	Solar		Lee	retired
2022-07-08 17:52:59	Gauteng		Yes I do	Solar		Robert	retired
2022-07-08 17:52:32	KwaZulu- Natal		Yes I do	Solar		Kay	retired
2022-07-08 17:52:26	Western Cape		Yes I do	Solar	Government needs to wake up, we need to have choices, Eskom would not be my first choice	Barry	retired
2022-07-08 17:48:23	Western Cape		Yes I do	Solar	Technology in solar has advanced and South African has plenty of open space and sunshine. A monopoly has never been a good thing and we desperately need an opposition to ESCOM	Ronald	retired
2022-07-08 17:47:51	Gauteng		Yes I do	Solar	SA is in a crisis over the electricity situation Solar and wind would be a suitable immediate solution	Vanessa	retired
2022-07-08 17:47:08	Western Cape		Yes I do	Solar		Monica	retired
2022-07-08 17:47:01	Free State		Yes I do	Solar		Fanie	retired
2022-07-08 17:46:16	Northern Cape		Yes I do	Solar		Wilma	retired
2022-07-08 17:44:15	Western Cape		Yes I do	Solar	Independent power producers, a.s.a.p. this has been going on for too long. Ruining the economy, as bad as lockdown. No consideration for the sick and elderly. I have a mentally disabled family member who needs 24 hr OXYGEN. What about the rest???? Holiday makers remarks::: could never live like this, won't be back in a hurry!! The powers that be, have had enough time to rectify this mess. They know what needs to be done. What are they waiting for ??? This country is sucking the life out of its taxpayers citizens. To have the audacity to ask for increases, then put up the price of electricity and petrol etc, etc. Are they not surprised there's a brain drain?? I am a pensioner who feels sorry for the young ones. No Future. Pathetic.	Nola	retired
2022-07-08 17:44:07	Gauteng		Yes I do	Solar	Solar power is used worldwide. It is clean and plentiful in this country and can be quickly set up.	Norman	retired
2022-07-08 17:43:35	Western Cape		Yes I do	Solar		Felicity	retired
2022-07-08 17:43:34	Mpumal anga		Yes I do	Solar	South Africa needs electricity as quickly as possible and the solar panels can be placed and will be available in a short time. Solar is not so very expensive and it is available..	Izak	retired
2022-07-08 17:43:30	KwaZulu- Natal		Yes I do	Solar	Combination solar gas coal	Nadarajan	retired
2022-07-08 17:41:48	KwaZulu- Natal		Yes I do	Solar	Most definitely should have independent private companies.....prices would be more competitive and ultimately lower, so affordable. This needs to happen sooner than later. Economically, households etc need this to happen otherwise we could be in total darkness and literally nothing will workwon't even be able to draw money but food. Our entire lives depend on electricity	Debbie	retired
2022-07-08 17:40:35	Gauteng		Yes I do	Solar		Gert	retired
2022-07-08 17:39:49	Western Cape		Yes I do	Solar	I already live off grid fortunately so can vouch for this form of power. It's clean and we have masses of sunshine. Just need to get around the storage problem. It could be used together with wind and hydro as long as the latter is sustainable and has minimal environmental impact. Cape Town's Steenbras dam is a good model. Any private enterprise using the 3 sustainable forms should be encouraged asap.	Wendy	retired
2022-07-08 17:38:33	Gauteng		Yes I do	Solar		Gert	retired

2022-07-08 17:38:18	KwaZulu-Natal		Yes I do	Solar	We have sunlight most of the year so solar and or wind are obvious options so many people are already using solar in their homes to help reduce their power bills	Janet	retired
2022-07-08 17:36:13	KwaZulu-Natal		Yes I do	Solar	Anything that will end this crisis it is ruining the country businesses individuals it's depressing and people cannot live.	Gaby	retired
2022-07-08 17:35:59	Eastern Cape		Yes I do	Solar	Much cleaner and reliable. Eskom is totally unreliable and lack the necessary skills to do the necessary. Beyond repair.	Johan	retired
2022-07-08 17:32:18	Mpumalanga		Yes I do	Solar	Solar energy is the way forward in South Africa.	Hannes	retired
2022-07-08 17:31:10	Gauteng		Yes I do	Solar	We have sunshine in abundance. A sustainable method. But a combination of other methods also advisable	Sheryl	retired
2022-07-08 17:26:35	KwaZulu-Natal		Yes I do	Solar	Wind/ gas	Annerlye	retired
2022-07-08 17:26:00	Gauteng		Yes I do	Solar	Solar systems can be put up in weeks, and will be generating electricity within 4 months. To follow this, hydro tidal generators. And then wind energy. Tidal waves the best medium time solution but best for permanent electricity	George	retired
2022-07-08 17:24:26	North West		Yes I do	Solar	South Africa has a lot of sun so the right thing is to utilise the free energy from the sun	Mark	retired
2022-07-08 17:23:44	Western Cape		Yes I do	Solar		Ernst	retired
2022-07-08 17:22:23	North West		Yes I do	Solar	Sunshine and wind is something we get plenty of in South Africa . Solar energy has also proved to be cheaper , more environmentally friendly and quicker to set up . It seems a no brainer. Eskom is fraught with corrupt inefficient incompetent over paid entities . We need to supply the country with cheaper , reliable energy . So we can attempt to get the economy going to try to create the much needed employment for all .	Walter	retired
2022-07-08 17:20:43	Gauteng		Yes I do	Solar		Tom	retired
2022-07-08 17:19:46	Gauteng		Yes I do	Solar	We are blessed with abundant sunshine in South Africa why not utilise this free source of energy?	Riaan	retired
2022-07-08 17:19:23	Gauteng		Yes I do	Solar	Solar , wind or battery power generation would work in RSA. Definitely not gas !!	Louis	retired
2022-07-08 17:19:14	Western Cape		Yes I do	Solar		Prue	retired
2022-07-08 17:19:10	Western Cape		Yes I do	Solar		Prue	retired
2022-07-08 17:18:59	Western Cape		Yes I do	Solar	Privatise ALL Governmental controlled enterprises ! Name one that is not a failure. The ANC is way too incompetent and self-important to run anything . WE MUST GET RID OF THE GOVERNMENT TO SOLVE THESE PROBLEMS!!!	Pierre	retired
2022-07-08 17:15:53	Gauteng		Yes I do	Solar	Any other method would be preferable apart from coal which is being phased out world wide - anything that works better than the nonsense we have to put up with now	Jean	retired
2022-07-08 17:12:14	KwaZulu-Natal		Yes I do	Solar		Deborah	retired
2022-07-08 17:11:50	KwaZulu-Natal		Yes I do	Solar	Give all homeowners a loan with a low interest rate to install solar to cover their basic needs. I will rather pay do this to get a loan than to Eskom! If five million households get off the grid, our problems may be solved. Follow the international standards where most countries pay homeowners for their power . It is a easy fix	Michael	retired
2022-07-08 17:09:34	Western Cape		Yes I do	Solar	We have a great deal of sunshine and wind in South Africa. There are many alternative solutions to our problem of loadshedding. Cut the red tape and allow people who have viable solutions to implement them. Perhaps it suits the powers that be to hold the people to ransom? A lot of money was stolen from Eskom. No one had been held accountable or paid back the money yet? !!!	Jennifer	retired
2022-07-08 17:04:26	Western Cape		Yes I do	Solar	Solar can be provided by private sector financing and private sector management.	George	retired
2022-07-08 17:03:25	Gauteng		Yes I do	Solar	IPPs should have been allowed to supply South Africans with electricity decades ago. It's disgraceful that the government has again been so tardy with enacting legislation to allow it. Shame on you ANC!!	Lesley	retired

2022-07-08 17:03:18	KwaZulu-Natal		Yes I do	Solar	<p>With the Current Corruption and State of Capture, the Government Officials : " Liars , Thieves , & Cheaters. The ANC Government cannot be Trusted Anymore. The Judiciary is Also Captured.</p> <p>Only African Prisoners are let out on Parole long before serving even less than half their Sentence.</p> <p>Court Cases are ongoing for Many Years .</p> <p>The ANC Government Only giving Tenders to their Families and Friends and Comrades.</p> <p>ESKOM is also Captured. The African Staff are Lazy and don't do any work. They Sabotage the Infra Structure.</p> <p>Illegal Strikes , Holding the Country to Ransom.</p> <p>The Independent Power Producers will Deliver Quality Power at A Far Cheaper Rate.</p> <p>They will not go on Strike .</p> <p>They will Deliver A Reliable Source of Power.</p> <p>They will not Steal Tax Payers money .</p> <p>Their Executives will be limited To A Bare Minimum.</p> <p>Lazy Workers will be " FIRED "</p> <p>I Fully Support the Privatisation of Eskom.</p> <p>Sincerely</p> <p>Mr D. Nayager</p>	Dhanpal	retired
2022-07-08 16:59:14	Western Cape		Yes I do	Solar	Use wind, use solar, do something independent of kuk government regulations.	Josephine	retired
2022-07-08 16:59:00	KwaZulu-Natal		Yes I do	Solar	<p>We are a country with a great amount of sunshine. So solar would be my first choice. Second choice would be wind as certain areas get a lot of wind.</p> <p>After installation there would be minimal to no cost.</p>	Lincey	retired
2022-07-08 16:58:44	Gauteng		Yes I do	Solar	<p>The obvious inability of Eskom to provide reliable energy to SA should automatically incentivize the govt. to allow independent power producers to invest in renewable energy.</p> <p>Solar seems to be a logical alternative as SA is blessed with abundant sunshine which could assist in adding additional capacity to the national grid.</p>	John	retired
2022-07-08 16:50:59	Eastern Cape		Yes I do	Solar	<p>Solar and wind generated electricity MUST be immediately available for distribution to the citizens of our country, to avoid an impending catastrophe.</p> <p>Focus on this critical issue and put other non-essential matters aside until this is completed successfully. A no-brainer! Government needs to act now!</p>	Dayalan	retired
2022-07-08 16:49:16	Western Cape		Yes I do	Solar	<p>If we do not accept any longer to continue organizing our lives around the load-shedding schedule and to buy expensive equipment to mitigate the lack of power 2-3 times a day, we must become active !!!</p> <p>We must remind our government that since we are forced to paying high rates and taxes, we as citizens can expect that this money is being used to cover the basic needs of South Africans, of which electricity is a very basic one.</p>	Claudia	retired
2022-07-08 16:49:12	Western Cape		Yes I do	Solar	<p>If we do not accept any longer to continue organizing our lives around the load-shedding schedule and to buy expensive equipment to mitigate the lack of power 2-3 times a day, we must become active !!!</p> <p>We must remind our government that since we are forced to paying high rates and taxes, we as citizens can expect that this money is being used to cover the basic needs of South Africans, of which electricity is a very basic one.</p>	Claudia	retired
2022-07-08 16:48:41	Gauteng		Yes I do	Solar	In addition to solar, wind farms should be established to supplement/replace coal and diesel	Jasper	retired
2022-07-08 16:46:48	KwaZulu-Natal		Yes I do	Solar	A combination of solar and wind - we have the largest coastline in Africa, why not utilise sea breezes	Gert	retired
2022-07-08 16:46:44	Gauteng		Yes I do	Solar	<p>We are living in sunny SA and have 300 + days sun ... why cant we make use of the free sun that God give us . And why must there be only one Government owned Com be in SA that predict the price of electricity every day. We the Tax payer, must have a say who we want to get Power from.</p>	Fred	retired
2022-07-08 16:43:56	Western Cape		Yes I do	Solar	<p>Wind or solar. Plenty of wind and sunshine available. No Govt interference or options to loot. Current load shedding crisis untenable workers have illegally strikes, got increases. There should be repercussions for these actions which is crippling the economy even further. It's a disgrace</p>	Beryl	retired
2022-07-08 16:43:21	Gauteng		Yes I do	Solar	<p>Why does it take a crisis to get any kind of reaction from the Government???</p> <p>Renewable energy producers have been ready and able to supply our electricity needs for years.... but some greedy people in government and Eskom have seen fit to block them!!</p> <p>Let's get moving NOW.</p>	Cynthia	retired
2022-07-08 16:41:05	KwaZulu-Natal		Yes I do	Solar		Yvette	retired
2022-07-08 16:40:57	Mpumalanga		Yes I do	Solar	<p>Renewables solar wind to help Eskom to survive and South Africa to survive !!</p> <p>Bring everyone not outsiders- and keep Unions out and money takers(?)</p>	Hester	retired
2022-07-08 16:39:08	Outside SA	The Netherlands	Yes I do	Solar	<p>First of all the reigning government should step down. They have done more than enough damage in SA. Corruption is rife there. There pockets are being filled whilst the people of SA are suffering.</p>	Joan	retired
2022-07-08 16:38:52	Eastern Cape		Yes I do	Solar	We have heaps of sunshine and wind - let's go for renewables!	Sheila	retired

2022-07-08 16:38:43	Gauteng		Yes I do	Solar	SA is in dire need of urgent and immediate solutions to the energy crisis before the country is crippled. The effect of loadshedding on the economy and on the morale of the citizenry cannot be over emphasised. Many corporates and private individuals are generating their own power, often in excess of their needs and should be able to feed the excess into the grid. Eskom could purchase this power at a fraction of what it is costing them to produce and the seller would recover the cost of installation in the long term. In addition immediate action should be taken to develop renewable energy plants which, I understand, can be ready for production in a fraction of the time it takes to bring a coal power station on line. All legislative impediments to these two solutions should be reviewed and removed.	Sue	retired
2022-07-08 16:36:46	Eastern Cape		Yes I do	Solar	Solar is a no-brainer, given the abundance of sunshine we receive; but wind-power in coastal areas is equally viable. Tesla has the technology to store massive amounts of both wind and solar energy. Incredulous that Pravin & Co. are only now considering cutting some of the 'red tape' (politics) in favour of allowing the private sector to step in and rectify the ANC's incompetence and intransigence. Buffoons, all.	Bryan	retired
2022-07-08 16:35:46	Gauteng		Yes I do	Solar	We have an abundance of sunshine Wind is also a strong option Urgent action required and not traditionally like the A N C putting everything on hold	Roy	retired
2022-07-08 16:34:45	Gauteng		Yes I do	Solar	In my view renewables are the way to go. Solar and wind are on a par. then Hydro where possible and Hydrogen on the same level. These implementations will reduce out carbon development and will be quicker to be made available than coal and gas does not reduce out carbon footprint	Dennis	retired
2022-07-08 16:33:38	Outside SA	The Netherla nds	Yes I do	Solar	First of all I think the corrupt	reigning political party should get out. They have stolen enough from their people. Hopefully once they are gone things in SA will become normal just like it was in years gone by	retired
2022-07-08 16:33:38	Outside SA	The Netherla nds	Yes I do	Solar	First of all I think the corrupt	reigning political party should get out. They have stolen enough from their people. Hopefully once they are gone things in SA will become normal just like it was in years gone by	retired
2022-07-08 16:33:10	Gauteng		Yes I do	Solar	South Africa's power situation is dire with no prospect of any improvement because of obsolete power stations, way past their lifespan. Environmental friendly solar energy is in abundance in South Africa, why not tap it. Away with all the holy cows and break through to the modern age. Eskom holds us at ransom with their high power prices and obsolete power stations. Away with Eskom!	Roelf	retired
2022-07-08 16:32:34	Gauteng		Yes I do	Solar		Callie	retired
2022-07-08 16:32:30	Gauteng		Yes I do	Solar	Using independent channels will curb corruption and Solar method will contribute positively towards climate change.	Mary- Maud	retired
2022-07-08 16:31:59	Gauteng		Yes I do	Solar		Ferdi	retired

2022-07-08 16:31:06	Western Cape		Yes I do	Solar	All new builds should be built using solar. There should also be some kind of incentive to those wishing to change to solar by the government. We have an abundance of wind in the Western Cape as well so the provincial and national government should be looking at this as an alternative means to generate energy.	Sue	retired
2022-07-08 16:30:51	KwaZulu- Natal		Yes I do	Solar	We have an abundance of sunshine and it is harnessed very easily and inexpensively. It's a no brainer....	john	retired
2022-07-08 16:29:37	North West		Yes I do	Solar	Wind and renewable methods are also optional. The quickest method would be best.	Marie Louise	retired
2022-07-08 16:28:12	Western Cape		Yes I do	Solar		Neale	retired
2022-07-08 16:28:00	Western Cape		Yes I do	Solar	We need to use all means available, including hydro and wind power, in order to rescue our economy. We have been totally let down by government and are now in desperate straits.	Rona	retired
2022-07-08 16:27:14	Western Cape		Yes I do	Solar	Sun energy is faster and cheaper to utilize than any of the others.	David	retired
2022-07-08 16:27:09	Gauteng		Yes I do	Solar	Independent route is the best to go.	Mary- Maud	retired
2022-07-08 16:26:32	Gauteng		Yes I do	Solar	It is more affordable. Electricity is more expensive than living conditions.	Dave	retired
2022-07-08 16:26:30	Gauteng		Yes I do	Solar	I would have thought this one would be obvious. We are in South Africa - an abundance of sun.	Clare	retired
2022-07-08 16:26:16	KwaZulu- Natal		Yes I do	Solar	There really is no point to voting. The Government unilaterally decides and to hell with everyone else. They are lining their pockets and until you get rid of their gravy train, we have no hope.		retired
2022-07-08 16:25:00	Western Cape		Yes I do	Solar	We are a sunny and windy continent and the sun and wind cannot be used up and also causes no pollution. I would like to say solar and wind but could not select both	Linda	retired
2022-07-08 16:24:41	Western Cape		Yes I do	Solar	in a country the the wind factor and amount of Sunshine it makes no sense that we dont have solar systems in place. Aside from the disgusting corruption and greed of a government that are only interested in filling their own pockets as the expense of its people.	ilana	retired
2022-07-08 16:24:17	Western Cape		Yes I do	Solar	All new builds should include solar power generation by law— eg. no solar no build Independent power generation must be allowed to feed into the electricity transmission system immediately. Let's get rid of the clowns in the ANC as well.They have been responsible for the appalling system we currently have.	Antonius	retired
2022-07-08 16:24:15	Western Cape		Yes I do	Solar	All new builds should include solar power generation by law— eg. no solar no build Independent power generation must be allowed to feed into the electricity transmission system immediately. Let's get rid of the clowns in the ANC as well.They have been responsible for the appalling system we currently have.	Antonius	retired
2022-07-08 16:23:47	Western Cape		Yes I do	Solar	We need to get rid of the pollution in the world and South Africa. We need an independent electricity supplier and we need to get this country back on its feet chop chop. Throw out the entire ANC government, ministers and even members. Appoint people who are able to think and work properly to run this country. The talent is here, we need to find it.	Marion	retired
2022-07-08 16:19:23	KwaZulu- Natal		Yes I do	Solar	I would recommend wind and solar. Our country has an unlimited supply of both.	Susan	retired
2022-07-08 16:18:06	Western Cape		Yes I do	Solar	Eskom has not the ability ot solve its own problems, too connected to the government.	Petra	retired
2022-07-08 16:18:03	Gauteng		Yes I do	Solar	To keep our country going we need a drastic move/change RIGHT NOW!!	Jacoba	retired
2022-07-08 16:17:20	Western Cape		Yes I do	Solar	Solar is cost-effective to install, would decrease the cost of electricity and it is already used in many countries.	Glenys	retired
2022-07-08 16:16:44	KwaZulu- Natal		Yes I do	Solar	We have a Sunny Country with certain areas in the extreme.	Paul	retired
2022-07-08 16:16:40	Western Cape		Yes I do	Solar	As things stand at present , nothing seems to be working and the situation is going from bad to worse. Let the country move forward by scrapping the dependency on Eskom and moving to renewables with the help of other companies and individuals who are prepared to help us.	Judy	retired
2022-07-08 16:15:01	Mpumal anga		Yes I do	Solar	Use the sun it is absolutely free	Loffie	retired
2022-07-08 16:13:41	Gauteng		Yes I do	Solar	We are in a crisis. Every source of electricity should be utilized at this time. This is obvious but the ANC is too idiotic to do the practical thing . It might adversely affect their looting	Trevor	retired

2022-07-08 16:13:08	Western Cape		Yes I do	Solar	Due to the current chaotic situation regarding Eskom's electricity supply it is imperative that all possible avenues for independent power producers are urgently required. This could be wind, solar, wave , hydroelectric, geothermal or combination of all of the above. We need to cut Eskom reliance on coal and the red tape being used by any government department to delay the introduction of alternatives!! This is urgent!	Isobel	retired
2022-07-08 16:12:57	Gauteng		Yes I do	Solar	With all the sunshine this country has ,every new planned building should have a solar system built into the planning. Legislated. Scrap red tape ASAP and get on with legal independent power suppliers. Let's get the economy going. Created work by creating power.	Raymond	retired
2022-07-08 16:12:22	Gauteng		Yes I do	Solar		Arvinda	retired
2022-07-08 16:11:08	Gauteng		Yes I do	Solar	Make solar mandatory for every new house being build.	Braam	retired
2022-07-08 16:11:01	Mpumal anga		Yes I do	Solar	Our present government is tooo irresponsible to control nuclear. We must end our dependence on coal All that is left is solar & wind. Because of poor governance we are left with such limited choices! The ANC are also the cause of our present predicament! It is long past the time to get rid of the ANC government and fully control our own future - intelligently. I could still/would support Ramaphosa and Gordhan but not the rest - they would be a joke if it weren't so serious. The ANC had their fair try, which was/is a disaster. Get rid of all of them and allow private enterprise to control our energy supply. Eskom had/have a monopoly which they have plundered through corruption. I personally have been fighting Eskom for the last 35 years, (ask Brian Molefe and the rest- they know me well). As they say in Afrikaans: 'Ons boer agteruit!' Excuse the sick pun: will the last person to leave, please switch the lights off!	Brian	retired
2022-07-08 16:10:54	Western Cape		Yes I do	Solar	Wind and Sun are freely available in South Africa . Scrap red tape regulations and historic politics governing electricity generation in our country. Allow private companies , home owners and other investors to generate electricity and sell access generation into the national net. This will immediately reduce the demand and create available electricity to manufacturers , small businesses and also create thousands of jobs for locals who currently have no work or income.	Brian	retired
2022-07-08 16:10:09	Western Cape		Yes I do	Solar		heidi	retired
2022-07-08 16:09:55	Eastern Cape		Yes I do	Solar	We have lots of sun and solar solutions are quicker to build.	Liz	retired

2022-07-08 16:03:26	Gauteng		Yes I do	Solar	Windkrag is net so effektief en goedkoper	Tilda	retired
2022-07-08 16:03:15	Western Cape		Yes I do	Solar	Please cut the red tape and save our precious country. Studies have shown that load shedding can be stopped within 18 months. Follow the advice of the intellectuals and stop the greed and plundering!	Jenny	retired
2022-07-08 16:02:19	Western Cape		Yes I do	Solar		Annie	retired
2022-07-08 16:01:07	Gauteng		Yes I do	Solar		Brian	retired
2022-07-08 15:58:44	Western Cape		Yes I do	Solar		Mike	retired
2022-07-08 15:58:31	Gauteng		Yes I do	Solar	Solar, Wind and Hidro are natural resources and abundant in SA. There should also be consideration for each household to have its own generator of electricity through the use of Magnetics.	Maria	retired
2022-07-08 15:57:48	Gauteng		Yes I do	Solar	South Africa has a natural resource that is available to all namely Solar! The government should encourage people to install solar power and provide tax deductions for those who do. Not only will this alleviate the problem we are having with Eskom but it could be a job creation tool.	Gail	retired
2022-07-08 15:57:08	Gauteng		Yes I do	Solar	wind,son of enige hernubare bron is aangewese vir onmiddelike verbetering van elektrieseiteit.	eddie	retired
2022-07-08 15:57:02	Gauteng		Yes I do	Solar	wind,son of enige hernubare bron is aangewese vir onmiddelike verbetering van elektrieseiteit.	eddie	retired
2022-07-08 15:56:42	Gauteng		Yes I do	Solar	This Could save our country!!	Cynthia	retired

2022-07-08 15:56:29	Gauteng		Yes I do	Solar	I am in favour of solar power, as well as wind power. I think solar power could be more quickly set up, but wind power projects could start to be developed simultaneously. The reason that I am in favour of solar and wind power, is that they are both forms of renewable energy. South Africa should be moving towards renewable energy as a matter of urgency anyway. This is foremost because it doesn't produce carbon emissions, but also because it makes economic sense.	Helen	retired
2022-07-08 15:54:19	Western Cape		Yes I do	Solar		Eve	retired
2022-07-08 15:54:14	Western Cape		Yes I do	Solar		Doreen	retired
2022-07-08 15:54:06	Gauteng		Yes I do	Solar	Solar Power is renewable, we have the right climate for solar power, solar power doesn't make a noise, has no moving parts and doesn't need coal/gas/diesel to generate power.	Mark	retired
2022-07-08 15:52:04	Gauteng		Yes I do	Solar	Eskom is unable to meet South Africa's need for power today or in the near future, therefore independent power producers should be allowed to enter the market and provide power to meet the country's needs.	MICHAEL	retired
2022-07-08 15:51:44	KwaZulu-Natal		Yes I do	Solar	Dis lankal hoog tyd dat daar ingegryp moet word, hierdie kragonderbrekings kos die ekonomie miljoene	Mamma	retired
2022-07-08 15:50:44	Gauteng		Yes I do	Solar	We are fortunate to have sunny days for a greater part of the year in South Africa lets use it. The situation as it is at present is unacceptable and doing an enormous amount of damage to our already fragile economy. The Government must let go !!	Anne	retired
2022-07-08 15:49:13	Gauteng		Yes I do	Solar	Solar and wind would suit SA's immediate needs.	Gillian	retired
2022-07-08 15:48:16	Gauteng		Yes I do	Solar	I have answered solar but I think a combination of solar and nuclear would work best. Independent producers could be open to price fixing and competition if not properly regulated. There is plenty of electricity in the UK but few can afford it because of the high profit margins set by the producers. We do not need that. Wind power has limited use and in fact can be very damaging to the environment. birds are killed by the rotating vanes and the noise pollution can also be a problem. Furthermore they are often an eyesore especially in areas of natural beauty.	Patricia	retired
2022-07-08 15:47:53	Western Cape		Yes I do	Solar	Eskom is unable to meet South Africa's need for power today or in the near future, therefore independent power producers (especially renewables) should be allowed to enter the market and provide power to meet the country's needs.	Elizabeth	retired

2022-07-08 15:43:40	Gauteng		Yes I do	Solar	In a country known as sunny South Africa, solar is a no-brainer.	Prof. Hennie	retired
2022-07-08 15:42:14	KwaZulu-Natal		Yes I do	Solar		Peter	retired
2022-07-08 15:42:14	Western Cape		Yes I do	Solar	Wind and Solar would be the preferred options, although not being an energy expert, there could be other alternatives. Motivation - Andre de Ruyter and his team are doing everything possible to keep the lights on, but it is very clear that they can do no more, given the state of decay of the current power system as well as cadrè deployment, corruption, sabotage, and theft that is embedded in the SOE. The only alternative is to call on private producers to make up the shortfall before the entire Eskom system collapses. Interestingly, if that is achieved, SA could apply for overseas investment in going Green - this could be achieved before much of Europe achieves the goal as many countries are going back to coal as the Russian gas situation deteriorates.	Henry	retired

2022-07-08 15:41:03	KwaZulu-Natal		Yes I do	Solar	The vital need for sustainable energy is a GLOBAL CONCERN, it is not just a concern for SA. SA COULD BECOME THE GLOBAL MODEL the GLOBAL EXAMPLE of a country who has implemented sustainable energy. It could become one of the world leaders. We need to OPEN UP EVERY INSTALLATION OF SOLAR POWER, be it from private sources (people/companies who have installed solar power units) or governmental. FOR THE GOOD OF OUR NATION. I can only think that hesitation to do so is because a few people are protecting their own private interests.	Mary	retired
2022-07-08 15:40:53	Western Cape		Yes I do	Solar	The electricity grid is old and running at nearly full capacity. Two actions need to be taken. 1. All large users of power be encouraged and financially supported to install solar and wind producing power as near as possible to the point of consumption . 2. South Africa via Eskom ceases to supply electricity subsidised by South African consumers to neighbouring countries.	David	retired
2022-07-08 15:40:28	Western Cape		Yes I do	Solar	Solar is freely available If a system of conversion on an instalment basis, it would be affordable to many households	Norma	retired
2022-07-08 15:40:15	Eastern Cape		Yes I do	Solar	Solar and wind, too much red tape that only benefits the have all but want more at the top.	Caroline	retired
2022-07-08 15:39:27	Western Cape		Yes I do	Solar	I understand that there are increasing numbers of IPPs many of whom report that their excess generated power is wasted due to endless red tape and hold ups not to mention conflicting opinions and lack of decisiveness. This, like the lack of water harvesting is unbelievably frustrating in a country so potentially rich in natural resources and sunshine in particular. We can do it but frankly we need the PRIVATE SECTOR to take over and manage ALL our SOEs.....every single one!!	Carol	retired
2022-07-08 15:38:39	Gauteng		Yes I do	Solar	The question on choices for SA's IMMEDIATE needs somewhat limits the needed discussion. For our immediate needs, almost anything that lets people live and industry operate would be fine, as long as it is coupled with a medium / longer-term view of what would satisfy our needs, wherein we have to look at renewable sources for at least part of the solution. NONE of this, however, includes Mantashe's 20-year "emergency" solution via Karpowerships. What is painfully obviously needed, of course, is that Mantashe shapes up or is shipped out.	Barrie	retired
2022-07-08 15:38:12	Western Cape		Yes I do	Solar		Mara	retired
2022-07-08 15:38:07	Western Cape		Yes I do	Solar		Mike	retired
2022-07-08 15:38:03	Gauteng		Yes I do	Solar		Dianna	retired
2022-07-08 15:34:59	Gauteng		Yes I do	Solar		Virgil	retired

2022-07-08 15:32:59	Gauteng		Yes I do	Solar	I think it is time that all people have a chance to help South Africa. Without being hindered by the government . They have proven to not be able to run any institution properly. It is time for the people to help themselves without being restricted by government.	Joanne	retired
2022-07-08 15:32:54	Western Cape		Yes I do	Solar	Wind and solar	Lee	retired
2022-07-08 15:32:01	Free State		Yes I do	Solar	Please get a solution for this problem as soon as possible.	Grace	retired
2022-07-08 15:28:08	Free State		Yes I do	Solar	What a disaster but what can you expect from a government that don't care for there citizens. I hope that they will bring people back with expertise,thousands and thousands as lost there jobs as a result of this, and our beautiful country is already down the drain.	LENA	retired
2022-07-08 15:27:24	Western Cape		Yes I do	Solar	Immediate implementation please!! It's crazy that in a country with so much sunshine we don't all have solar! No new home should be built without it. Our families in Australia all have solar which supplies all their own needs & the surplus goes into the grid which they get credit for!	Jill	retired
2022-07-08 15:27:13	Gauteng		Yes I do	Solar	Solar and wind turbines is the way to safe clean way to go	Malcolm	retired
2022-07-08 15:26:44	Gauteng		Yes I do	Solar	Allow independent power plants to assist SA with their power shortages as a matter of urgency. It cannot go on like this! Citizens are furious!!!	Rene	retired
2022-07-08 15:26:22	Western Cape		Yes I do	Solar	Solar is merely one of the clean methods available, it should be combined with wind, gas, hydro and any other clean methodology available and it should all be in the hands of good business people and not Government. People with a proven track record, overseen by de Ryter. No interference should be tolerated under any circumstance.	Geoffrey	retired
2022-07-08 15:25:30	Gauteng		Yes I do	Solar	We really need to go private. The ANC has regretfully proved it is incapable of running anything, including the country. We need to bring on all the possible ways via the private sector to save SA. Without electricity we are doomed.	Richard	retired

2022-07-08 15:24:32	Western Cape		Yes I do	Solar	It is an EMERGENCY to scrap BEE cadres with no ability to continue to run the economy and indeed the whole nation into economic disaster. Let's do what is best for the people and businesses /economy. Solar power, wind power allowing people to sell power to the grid. JUST DO IT NOW!!!!!!! Millions of people of all races are suffering needlessly while the government drags it feet. WAKE UP BEFORE IT IS TOO LATE!!!	Donald Albert	retired
2022-07-08 15:23:23	Western Cape		Yes I do	Solar	Scrap all red tape and allow the private sector and individuals to install and utilize alternative electricity solutions like eg solar and wind generators. Rather enable all networks so that private installations can feed back into the grid and give incentive for that.	J	retired
2022-07-08 15:22:59	Free State		Yes I do	Solar	It is a unending source of energy	Magareth a	retired
2022-07-08 15:22:11	Western Cape		Yes I do	Solar	A mixture of solar and wind is the short & long term solution. Also consider Gas as a more immediate interim solution until sufficient solar/wind generated electricity becomes available, (even though gas does not provide clean (green) electricity). Long term consider adding Nuclear ... when/if SA can ever afford it. NERSA must also eliminate it's own IPP licencing red tape in order to speed up the IPP licencing process . Additionally, government should immediately remove BEE (BBEEE?) legislation which frequently prevents the employment of suitably and adequately qualified personnel. As the current minister of Mineral Resources & Energy (Min. Mantashe) has demonstrated time and again his reluctance to sign up new IPP's to help resolve the years old SA energy crisis, President Ramaphosa should replace him ASAP. His replacement must be an adequately qualified person who thoroughly understands Eskom's problems, the benefits of solar & wind generated electricity, the benefits of having a workforce of properly qualified personnel, and the political reasons why this electricity crisis has been allowed to develop. Government must also obtain a binding commitment from the Unions to fully support the Eskom Essential Service status rules and regulations in order to prevent any repetition of the recent illegal (wild-cat) strike. Government must also obtain complete agreement from the unions to the immediate firing (and subsequent prosecution) of any Eskom employee committing an act of sabotage, intimidation, or act of violence .	Ian	retired
2022-07-08 15:22:03	Eastern Cape		Yes I do	Solar	Short term: Solar and wind. Long Term: Small Modular Nuclear Reactors	David	retired
2022-07-08 15:21:38	Free State		Yes I do	Solar		Jan	retired
2022-07-08 15:21:38	Eastern Cape		Yes I do	Solar	I have selected solar but would like to include wind power. We understand that Eskom is in a crisis situation and being held hostage by a number of corrupt forces within their ranks and no matter how they try to stop the blind robbery of their resources, they just find another loop hole (I stress the word HOLE) into which their funds are dropped. The only solution is independant electricity suppliers so that Eskom do not have the monopoly and can meet the grid demands and stop load shedding.	Margo	retired
2022-07-08 15:21:01	Gauteng		Yes I do	Solar	We have an abundance of sun in SA - remove the red tape for individuals and business to feed back to the grid. Have a zero tolerance for non payment of services and cut off the offenders.	Sara	retired
2022-07-08 15:21:00	Gauteng		Yes I do	Solar	We have an abundance of sun in SA - remove the red tape for individuals and business to feed back to the grid. Have a zero tolerance for non payment of services and cut off the offenders.	Sara	retired
2022-07-08 15:19:23	Western Cape		Yes I do	Solar		Judith	retired
2022-07-08 15:19:00	Western Cape		Yes I do	Solar	A combination of energy sources is required. Let REAL experts make recommendations not politicians with no meaningful experience, no training nor adequate specialised education in a highly technical subject.	Geoffrey	retired

2022-07-08 15:16:26	Western Cape		Yes I do	Solar	Huge tracts of land in Northern Cape and Karoo which can house solr panels.	Ivan	retired
2022-07-08 15:15:53	KwaZulu- Natal		Yes I do	Solar	Solar energy would be a relatively quick way of generating energy. We have an abundance of sun and it is clean without much impact on the enviroment	Diane	retired
2022-07-08 15:15:05	Western Cape		Yes I do	Solar	Cut the red tape. Stop all BEE. Let well qualified private providers take over and allow them to produce what SA needs without any governement restrictions. The government should have no say at all and the provision of electricity should be totally privately run with the appropriately trained and qualified people. We have had years of BEE unqualified ANC cadres being employed and stealing, looting and sabotaging Eskom. It is disgusting.	Angela	retired

2022-07-08 15:14:59	Western Cape		Yes I do	Solar	Cut the red tape. Stop all BEE. Let well qualified private providers take over and allow them to produce what SA needs without any government restrictions. The government should have no say at all and the provision of electricity should be totally privately run with the appropriately trained and qualified people. We have had years of BEE unqualified ANC cadres being employed and stealing, looting and sabotaging Eskom. It is disgusting.	Angela	retired
2022-07-08 15:14:38	Gauteng		Yes I do	Solar	IT IS NOW TIME FOR THE GOVERNMENT NOW FIRST ALLOW MUNICIPALITIES TO GENERATE THEIR OWN POWER SECONDLY ALLOW ANYONE WHO GENERATE POWER TO DO SO AND ALSO ALLOW THEM TO PUT SOME BACK INTO THE CURRENT GRID	TINUS	retired
2022-07-08 15:13:29	Western Cape		Yes I do	Solar		Christina	retired
2022-07-08 15:12:15	Gauteng		Yes I do	Solar	The ANC must get off their lazy butts and get qualified people to run Eskom. We can't wait for another 2 or 3 years for IPPs to come onto the grid. We need a stable power supply now.	Doris	retired
2022-07-08 15:10:46	Western Cape		Yes I do	Solar	SA is blessed with an abundance of sunlight all year round . Scrap all the red tape and take on board all renewable energy into the Eskom grid . Privatise Eskom by selling it to any competent private consortium for one (1) Rand and remove the debt burden and hopelessly inefficient generation strategies. The government as single shareholder must now admit to their incompetence and step aside.	Marius	retired
2022-07-08 15:10:10	North West		Yes I do	Solar	Solar, Wind and Hydro are fast deployable, renewable energy sources, rather than penalizing the people that have a surplus on power by most municipalities, allow those to sell their power back to grid at reasonable rates. Remove the surplus personnel at Eskom, especially those involved in sabotage or corruption, and use their already above industry standard wages to fund solar-geysers and solar installations for the public, taking away pressure of the grid. Stop the hiring at Eskom because of AA, BEE, EE and political affiliations, and start hiring on merit and know-how only, our public enterprises have been too weakened to hire on reasons of bias any longer	Joy	retired
2022-07-08 15:09:39	Western Cape		Yes I do	Solar	Solar, wind, hydro and combination of all 3. Cut the red tape and allow us to generate power whatever way we can.	Carole	retired
2022-07-08 15:09:28	Gauteng		Yes I do	Solar	Alternative power sources could alleviate the need for constant crisis (mis) management	Molly	retired
2022-07-08 15:09:00	Eastern Cape		Yes I do	Solar	Any other renewable power source, like solar, wind, magnetic, wave action should be allowed to produce electricity for our country. We are being held to ransom by a totally corrupt system. It is not up to the government to decide where we get our electricity from, that is merely a ploy to control the population, drag money out of already very tiny pockets and allow criminal syndicates to operate. The South African government needs to get a wake-up call. They are here to ensure that the country runs smoothly and that the population can live a happy, healthy, prosperous life not to see how much money they can shuffle into their own pockets and finding new ways to tax and impoverish us. We do not need corrupt politicians!	Ursula	retired
2022-07-08 15:08:30	Western Cape		Yes I do	Solar	Eskom has been costing tax payers a fortune and the corruption and sabotage of equipment and stealing of spares shows there is no control. We need immediate action our economy is suffering	Diane	retired
2022-07-08 15:08:25	Free State		Yes I do	Solar	South Africa has more sunshine for the rest of the year.	Mike	retired
2022-07-08 15:08:00	Western Cape		Yes I do	Solar	Any source of renewable energy that harnesses the elements e.g. wind or solar are by far the best solution. Any source of energy that strips the earth of its resources e.g. coal or gas are to be avoided as far as possible. In this way we will preserve the earth for future generations.	Ann	retired
2022-07-08 15:07:21	Western Cape		Yes I do	Solar	I also believe we need a combination of solar , wind and hydro whilst using our existing nuclear and coal power to back it up until we can rely totally on natural elements	Janice	retired
2022-07-08 15:06:46	KwaZulu- Natal		Yes I do	Solar		LOGAN	retired
2022-07-08 15:06:19	Western Cape		Yes I do	Solar	Eskom Employees have shown they don't care about the huge negative impact their actions (illegal strikes, corruption and sabotage) have on the welfare and economy of South Africa. There needs to be completion to Eskom so that there is security of basic services such as electricity and water (water reservoir pumps rely on electricity)	jennifer	retired
2022-07-08 15:06:04	Western Cape		Yes I do	Solar		Phillip	retired
2022-07-08 15:05:53	Western Cape		Yes I do	Solar		Jeanette	retired
2022-07-08 15:05:51	Gauteng		Yes I do	Solar	We need to place the power of the sun to good use. Also use incentives to come off the grid by giving credits to reduce grid expense.	Dick	retired
2022-07-08 15:02:58	Western Cape		Yes I do	Solar		Amo	retired
2022-07-08 15:02:12	Gauteng		Yes I do	Solar	We have had this loadshedding for about 8yrs now! I/we are really sick and tired of this situation! We NEVER had this problem, with the previous Government! Eskom, MUST now wake up! Enough is enough!!!! We need to have other power suppliers involved! This and is needed to be done. This will give Eskom competition!	Kevin	retired

2022-07-08 15:01:38	Gauteng		Yes I do	Solar	Solar and wind can provide a great deal of power, while we phase out Eskom and provide a future with this constant loadshitting which ruins our economy and disrupts our lives. Hand it over to the private sector so no more will we have crooks and their crooked officials with their snouts in the trough.	Barry	retired
2022-07-08 15:00:45	Gauteng		Yes I do	Solar	Open the ability for IPP's to enter the grid without being blocked by Eskom! Change the legislation to allow this. Privatise Eskom and let qualified people run the utility.	Bernard	retired
2022-07-08 14:59:50	KwaZulu-Natal		Yes I do	Solar	We have enough sun and wind in our country to supply all the clean energy that we need. Stop dithering and get rid of coal burning energy. Pollution is killing us and our planet.	Elsie	retired
2022-07-08 14:59:05	Gauteng		Yes I do	Solar	Even distribution of candles would be more efficient than a state run supplier	Deen	retired
2022-07-08 14:58:48	Mpumalanga		Yes I do	Solar	Solar and wind. Get rid of coalmand Gwede Mantashe. He is not doing his job. We should have has enough renewable energy by now. Yes, we do blame the ANC and himnfor the current situation.	Rachel	retired
2022-07-08 14:58:10	Western Cape		Yes I do	Solar	We need many independent suppliers of solar, wind, nuclear and gas that are not run by government . They should all be able to feed into the grid.	Patricia	retired
2022-07-08 14:55:24	North West		Yes I do	Solar	I would include solar AND wind. This is a national emergency and we need action now. No more dithering . IPP's are ready and willing to act. Cut the red tape and local procurement requirements. Open the doors to a bright and prosperous future for all South Africans. Lastly, please remove Minister Mantashe who has failed miserably to bring IPP's on board. 150 MW is laughable - we need at least 6000 MW.	Caroline	retired
2022-07-08 14:55:21	Western Cape		Yes I do	Solar	Obviously a mix is essential in the interim and also in the longer-term, when it can become a mix of renewables.	Annemarie	retired
2022-07-08 14:54:49	Gauteng		Yes I do	Solar	Wind and Solar energy should immediately be allowed. The problem is that ESKOM's power network is struggling to meet demand and service the old and may I add the two newest coal powered plants, where Billions of Rand have already been stolen by our corrupt government (mafia). Solar and Wind energy projects will not cost the government (tax payer) a single cent. What is our corrupt government waiting for? The only reason why our corrupt government does not open the private sector to produce clean energy is that there is nothing in it for the corrupt officials to get there greasy paws on paybacks and other corrupt methods used by these cretins running our country into the ground.	Bossie	retired
2022-07-08 14:53:22	KwaZulu-Natal		Yes I do	Solar	Just Do It. At the same time privatise all SOEs, especially Eskom, and cancel anc racist AA/BEE ploicies.	June	retired
2022-07-08 14:53:20	KwaZulu-Natal		Yes I do	Solar	Just Do It. At the same time privatise all SOEs, especially Eskom, and cancel anc racist AA/BEE ploicies.	June	retired
2022-07-08 14:53:05	Western Cape		Yes I do	Solar	I not only think Solar should be used but also wind, hydro & gas. The Government needs to move forward fast on allowing private enterprise to get involved. Clearly government running of Escom over the years has been a disaster, particularly under Zuma. The Government need to fast track now, as the economy is in failure state. Why would anyone want to invest in this country with the electricity supply being as it is.?	Alexander	retired
2022-07-08 14:53:02	KwaZulu-Natal		Yes I do	Solar	Make Solar affordable to the man in the street. Wind is also an option. Use what we have naturally, lots of sun and wind, why should we have to pay the earth for man made power that doesn't work anyway	Beverleigh	retired
2022-07-08 14:51:32	KwaZulu-Natal		Yes I do	Solar	Just Do It. At the same time privatise all SOEs, especially Eskom, and cancel anc racist AA/BEE ploicies.	Sharon	retired
2022-07-08 14:51:28	North West		Yes I do	Solar		Thys	retired
2022-07-08 14:51:25	North West		Yes I do	Solar		Thys	retired
2022-07-08 14:51:06	Western Cape		Yes I do	Solar	Nuclear may well be better however, one can't trust the operation thereof in the hands of inexperienced staff. I understand from media reports that we are faced with a bill of 1 Billion Rand from the French principals following the aborted contracted work planned at Unit 2 due to gross incompetence of management at Koeberg. I'm now more concerned about a Nuclear blow-up at Koeberg than the country facing a total collapse of the grid. Yes, it's True!	John	retired
2022-07-08 14:49:57	Gauteng		Yes I do	Solar	Solar installations should be subsidised and feedback to the grid should be at a reasonable tariff.	Albert	retired
2022-07-08 14:49:40	KwaZulu-Natal		Yes I do	Solar	Just Do It. At the same time privatise all SOEs, especially Eskom, and cancel anc racist AA/BEE ploicies.	Geoff	retired
2022-07-08 14:48:20	Western Cape		Yes I do	Solar	Govt. needs to deregulate and remove red tape as soon as possible. Govt. has not being able to provide uninterrupted power supply and thus private suppliers should be encouraged to come on stream ASAP. I also believe that private households should receive subsidies to install solar power to free up power to enable business to recover and grow.	Hennie	retired
2022-07-08 14:46:54	Western Cape		Yes I do	Solar		Irabella	retired

2022-07-08 14:43:58	Gauteng		Yes I do	Solar	Any alternative power supply would be better than Eskom. Eskom are holding this country ransom! It's a form of treason ! If we don't dance to Eskom's tune, we get power cuts! Eskom employees are paid exorbitant salaries for striking and for damaging power stations. We the people are paying them and what do we get in return? Load shedding! Eskom is incompetent !!	Lois	retired
2022-07-08 14:42:29	Eastern Cape		Yes I do	Solar	I feel that nuclear power is forward thinking but can our country afford that	Mike	retired
2022-07-08 14:41:15	Gauteng		Yes I do	Solar		Lesley	retired
2022-07-08 14:39:47	Western Cape		Yes I do	Solar	Clean and available virtually 24/7. People who are off the grid should be paid for feeding power into the national grid.	Lynne	retired
2022-07-08 14:39:30	Western Cape		Yes I do	Solar	It's enough now. We have sun wind and the sea. Let's use what's in front of us	Sash	retired
2022-07-08 14:37:15	Western Cape		Yes I do	Solar	Get experienced private companies on board	dennis	retired
2022-07-08 14:36:45	Western Cape		Yes I do	Solar	Unfortunately the government of South Africa has proven itself completely incapable of addressing the problems with Eskom and consequently has failed to deliver electricity to the nation. Having a stable power supply is essential for the economy as it supports business and therefore also supports confidence of over seas investors. Without power, SA has and is slipping deeper into becoming a 3rd world country with little prospects for a bright future. Opening up the grid to be supplied by a competitive market of independent power producers should have a big impact on turning the picture around. The government and Eskom have shown they cannot deliver. Now is the time to allow the private sector to step in and do what they can to save the situation. I honestly see no other way forward for the country.	Valerie	retired
2022-07-08 14:36:21	Gauteng		Yes I do	Solar	I suggest that whatever is the best for our people and then obviously the economy be done. And get rid of the fat cats who are robbing the country	Daw	retired
2022-07-08 14:36:13	KwaZulu- Natal		Yes I do	Solar		Magrietha	retired
2022-07-08 14:35:15	Mpumal anga		Yes I do	Solar	I think the time of coal is over and it is not reliable as we have seen in recent times. Nuclear energy is facing severe opposition and is slow to build. I believe a combination of solar and wind power is the solution for a relative fast power supply and is still environmentally friendly	Gert	retired
2022-07-08 14:34:44	Gauteng		Yes I do	Solar	We have sunshine most of the year.	Sandra	retired
2022-07-08 14:33:50	Western Cape		Yes I do	Solar	Solar or even wind power are environmentally friendly and we have lots of both in sunny South Africa.	Terry	retired
2022-07-08 14:33:03	Free State		Yes I do	Solar		Estelle	retired
2022-07-08 14:32:02	Northern Cape		Yes I do	Solar		Marietjie	retired
2022-07-08 14:31:05	Mpumal anga		Yes I do	Solar		Joseph	retired
2022-07-08 14:29:26	Gauteng		Yes I do	Solar		Gerhard	retired
2022-07-08 14:28:52	Western Cape		Yes I do	Solar	Solar, wind or any sustainable methods	Solvej	retired
2022-07-08 14:27:34	Gauteng		Yes I do	Solar	The sooner the better. It should have been done years ago and not stalled. Back in under Thabo Mbeki and Alec Irwin SA was supposed to privatise or build more power stations. As per usual under the ANC nothing was done as obviously there was not cut in it for them	Donald	retired
2022-07-08 14:26:34	KwaZulu- Natal		Yes I do	Solar		Ian	retired
2022-07-08 14:25:07	Western Cape		Yes I do	Solar	SA has huge potential for sustainable, environmentally sensitive power production. It would be great to see the government putting a lot of effort into supporting these technologies	Clare	retired
2022-07-08 14:20:35	Western Cape		Yes I do	Solar	Without adequate power provision for now and the anticipated growth required for what should be a growing economy at 5% in real terms, all trained and easily transferable younger people will emigrate. They will leave this failed state for better pastures because they are able to do so and other countries will lap them up.	John	retired
2022-07-08 14:20:21	Western Cape		Yes I do	Solar	I would have liked to nominate more than one but solar and wind are the two most able to deliver quickly.	Alastair	retired
2022-07-08 14:19:00	Western Cape		Yes I do	Solar	Suid Afrika is n land met baie sonskyn. Gepaard gaande met sonkrag kan windkrag ook saamgevoeg word indien die son nie warm genoeg skyn nie. Huidiglik spandeer baie mense onnodige geld om op een of ander manier energie/krag vir hulle huise te voorsien.	Willem	retired
2022-07-08 14:18:40	KwaZulu- Natal		Yes I do	Solar	I believe that they should have expanded the nuclear power capability years ago as was planned. Now they have to make interim plans to cope.	Richard	retired
2022-07-08 14:18:36	Western Cape		Yes I do	Solar	Solar and wind should be the initial drive . Unfortunately Nuclear would be too expensive for this country but to mind would be the final objective.	Michael	retired
2022-07-08 14:18:00	Gauteng		Yes I do	Solar		Paul	retired

2022-07-08 14:17:35	KwaZulu-Natal		Yes I do	Solar	Renewable energy generation, in the form of solar farms and/or roof-mounted PV panels is quick and relatively easy to install and maintain when compared to coal, hydro-electric and gas turbines. a fairly extensive solar farm can be built and come online within 6 to 12 months compared to years in the case of other non-renewable power sources. Consideration should also be given to allowing private households and businesses to install rooftop solar panels and storage systems where excess generated power could be fed into the national grid and so augment the national power network. Furthermore, consideration should be given to subsidising the installation of private renewable energy rooftop installations so as to make them more affordable for private individuals.	Neville	retired
2022-07-08 14:17:27	Gauteng		Yes I do	Solar	We have the sun let's use it	Connie	retired
2022-07-08 14:16:17	KwaZulu-Natal		Yes I do	Solar		TREVOR	retired
2022-07-08 14:15:38	Gauteng		Yes I do	Solar		Liz	retired
2022-07-08 14:11:47	Western Cape		Yes I do	Solar	Solar and wind. safest. please not nuclear.	pam	retired
2022-07-08 14:11:10	Free State		Yes I do	Solar		Japie	retired
2022-07-08 14:09:57	KwaZulu-Natal		Yes I do	Solar	It would be best to allow free enterprise to set up independent power. The Types could be limited to 4 or 5 options : electrical, wind, solar, harnessing the waves for hydroelectric depending on the area. But whatever the user can afford is the major consideration. Preferably something that is cheaper than current electricity prices. We are struggling under the cost of living as it is. This Government must stop treating the public as nobodies	Wally	retired
2022-07-08 14:09:31	Western Cape		Yes I do	Solar		Beverley	retired
2022-07-08 14:09:27	Limpopo		Yes I do	Solar	Solar and wind !!!	Elna	retired
2022-07-08 14:09:18	Gauteng		Yes I do	Solar	Eskom ,and the ANC has failed South Africa, not only with electricity but with there affirmative action programs which has forced many qualified people to leave South Africa .	Jonathan	retired
2022-07-08 14:09:14	Western Cape		Yes I do	Solar	Should definitely use renewables and encourage self sufficiency among users for their electricity needs, and buy back from them.	Barbara	retired
2022-07-08 14:08:35	Western Cape		Yes I do	Solar	Ons het baie sonkrag so solar is n baie goeie enrgie verskaffer	Gert	retired
2022-07-08 14:06:46	Western Cape		Yes I do	Solar	Combination of solar and wind, of which there is abundance in South Africa! Additional Hydro power is also suitable to solve the current electricity issue in the country. The solution is there for all the entire world to see! Get rid of ESKOM's monopoly, fire the corrupt authorities and scrap the red tape immediately. You have allowed ESKOM to hold South Africa hostage for far too long!	Lionel	retired
2022-07-08 14:06:29	Western Cape		Yes I do	Solar	Our government is not capable of providing our electricity needs, so people who ARE capable should be given the opportunity to do so. Solar and wind electricity production are already available and easy to implement.	Marlien	retired
2022-07-08 14:05:57	Gauteng		Yes I do	Solar	Eskom cannot meet the needs of the country. Therefore, IPP's should be allowed to produce electricity (solar, wind, etc)	Devendra	retired
2022-07-08 14:05:47	KwaZulu-Natal		Yes I do	Solar		Johan	retired
2022-07-08 14:04:29	Western Cape		Yes I do	Solar	Escom had proved time and again that it is not able to provide the electricity required to let SAfrica run smoothly . Wr need an independent company to to help get things running smoothly again .	Margaret	retired
2022-07-08 14:03:48	KwaZulu-Natal		Yes I do	Solar	Hydro, Solar, Nuclear, Wind. We have to move to greener energy systems. Moving away from carbon energy will in itself sever SA from Eskom holding us hostage	Ivan	retired
2022-07-08 14:03:04	Gauteng		Yes I do	Solar	Red tape is Another way that shows the ANC GOVERNMENT DOES NOT HAVE THE POLITICAL WILL TO DO ANYTHING THAT MIGHT BRING WEALTH TO OUR COUNTRY. How do we fix this Privatize all governments hold on everything. They are not here to run business, just law and order. This should be done immediately let only professionals that know what they are doing run the business.	valerie	retired
2022-07-08 14:03:04	Gauteng		Yes I do	Solar	Red tape is Another way that shows the ANC GOVERNMENT DOES NOT HAVE THE POLITICAL WILL TO DO ANYTHING THAT MIGHT BRING WEALTH TO OUR COUNTRY. How do we fix this Privatize all governments hold on everything. They are not here to run business, just law and order. This should be done immediately let only professionals that know what they are doing run the business.	valerie	retired
2022-07-08 14:02:49	Limpopo		Yes I do	Solar	We have sunny skies	Linda	retired

2022-07-08 14:02:37	Free State		Yes I do	Solar	Although I have selected solar energy there are also opportunities to utilise wind and tidal power. It is unlikely that the government will be able to raise the capital required which is why it electrical generation should offered to the private sector.	Clive	retired
2022-07-08 14:00:38	KwaZulu-Natal		Yes I do	Solar	It is high time the Government realize the urgency in encouraging private enterprize to come on board. Without electricity supplied by a labour bloated organisation, being held to ransom, our economy will NEVER grow and in fact is being killed by inefficient politicians. Many of these self-same politicians have no business acumen and should not be making decisions for which they are ill-equipped.	Adrian	retired
2022-07-08 13:59:48	Gauteng		Yes I do	Solar	Eskom is not coping. The load shedding is costing South Africa dearly. We have an abundance of sunshine in this country. Lets be free to use it to help solve our problems.	Neil	retired
2022-07-08 13:57:51	KwaZulu-Natal		Yes I do	Solar	If every houseowner, mall, complex etc can supply its own ower with solar energy it will help relieve the inability of Eskom to supply. We have done it at our home. It would also be advisable to subsidize the installations	Hennie	retired
2022-07-08 13:57:08	Western Cape		Yes I do	Solar		Jenny	retired
2022-07-08 13:56:08	Gauteng		Yes I do	Solar	Solar and wind are free and should be used in conjunction with pumped storage as a battery. Everything including Eskom should be privatised. Government should only be involved in regulation and as little as possible.	John	retired
2022-07-08 13:55:57	Gauteng		Yes I do	Solar		Lesley	retired
2022-07-08 13:55:27	Gauteng		Yes I do	Solar	Get rid of all the red tape and preferred procurement rigmarole It is killing the country	Mike	retired
2022-07-08 13:53:25	Western Cape		Yes I do	Solar		vaughan	retired
2022-07-08 13:52:48	KwaZulu-Natal		Yes I do	Solar	I believe the time has arrived whereby, after years of failed supplies to the public, our Government must allow independent power suppliers to enter the market and supply the country with reliable and sustainable alternative power. By denying the citizens of RSA this right can mean only one thing. Despite its failures, Eskom is clearly a huge cashcow for the ANC Government, otherwise you would expect them to be overjoyed that our SA power supy could be restored thus taking the pressure off Eskom and the aging infrastructure, but NO..they are doing everything in their power to block/prevent (privately suppld) alternative energy. WHY???? It can only be because it will hurt them in their (private) pockets!!!9	Colin	retired
2022-07-08 13:51:36	Western Cape		Yes I do	Solar	is not the demise of the government to provide essential services for the nation - one of which is electricity - enough motivation? for sure! government has proven beyond all reasonable doubt that it has nor the will, nor the know-how nor the moral or ethical integrity to manage anything efficiently, let alone provide electricity. this, as all other services, has to be left in the hands of entrepreneurs who have the proven skills to make it work - bee or any other political pipedream must not even enter an equation like this - efficiency, cost and merit are the baseline. wind and solar are proven sources of energy which can be harnessed on short notice and are freely available and can be tapped on regional level - elephantine central 'control' of energy should be scrapped in order for regions to help themselves, the days of waiting for any good to come from monopolies are gone.	gabriel	retired
2022-07-08 13:50:47	Western Cape		Yes I do	Solar	Free up the Independent Power Producers and have then supply as much as possible, without restriction.	Len	retired
2022-07-08 13:50:03	Gauteng		Yes I do	Solar		Martie	retired
2022-07-08 13:49:33	KwaZulu-Natal		Yes I do	Solar	Wind farms. Solar.	Nicola	retired
2022-07-08 13:47:31	Gauteng		Yes I do	Solar	Solar is easy to instal into homes . Gov should make it tax free to install, precure and maintain any alternate power source to consumers.	Lorna	retired
2022-07-08 13:46:55	Gauteng		Yes I do	Solar	Any fastest method to immediately improve SA power problem is urgently required. Renewables are first choice. RED TAPE to be ELIMINATED asap. Govt. must let go control of its thieving hands immediately.	Irene	retired
2022-07-08 13:45:52	KwaZulu-Natal		Yes I do	Solar	solar, wind & even coal until we are out of the dark	kevin	retired
2022-07-08 13:44:44	Gauteng		Yes I do	Solar	I think a combination of solar, wind, hydro and nuclear should be used. Using a bunch of smaller nuclear stations and solar as base load. Then hydro and wind to top up on high demand. I Worked at a power station for 34 years.	Hans	retired
2022-07-08 13:43:45	KwaZulu-Natal		Yes I do	Solar	Solar and wind power are my choice Eskom should be privatised . Terminate the services of the surplus and inefficient and overpaid work force. The State would save more money to benefit all the people of our country.,that is, if is not stolen by the Arrogant Naive Comrades.	Krish	retired
2022-07-08 13:40:19	KwaZulu-Natal		Yes I do	Solar	We should use any and all power we can find. We need an economy. We need jobs.	Nina	retired

2022-07-08 13:39:21	Gauteng	Yes I do	Solar	We are a country with plentiful sunshine during winter months, where the load for heating is higher than during summer. Solar energy WITH battery storage or similar reusable energy storage is the quickest to implement and cheapest solution to maintain to assist the national grid. Air conditioning is available from 48v DC units that can be powered directly from solar panels with no battery requirement during hot weather.	Allan	retired
2022-07-08 13:39:11	Eastern Cape	Yes I do	Solar	Combination of sources Solar, hydro, & wind; limit coal useage	Helen	retired
2022-07-08 13:38:06	Gauteng	Yes I do	Solar	It's the best, clean, very suitable for ZA, in the long run cheap, good for the climate, it's green. Do you want more arguments? You can fill in as many you want!	Hans	retired
2022-07-08 13:38:03	Gauteng	Yes I do	Solar	It's the best, clean, very suitable for ZA, in the long run cheap, good for the climate, it's green. Do you want more arguments? You can fill in as many you want!	Hans	retired
2022-07-08 13:37:24	North West	Yes I do	Solar		Piet	retired
2022-07-08 13:35:28	Western Cape	Yes I do	Solar	We cannot continue in our old ways - the planet suffers. People need to learn to adjust and make new earth friendly plans. This is not about one person making a quick buck - this is about Ubuntu.	Marina	retired
2022-07-08 13:35:08	Western Cape	Yes I do	Solar	While we experience very high levels of load shedding, it is ridiculous that the government still makes it extremely difficult for IPPs to supply electricity.	Francis	retired
2022-07-08 13:34:04	Western Cape	Yes I do	Solar	Quickest way to achieve more grid power	Rose	retired
2022-07-08 13:33:25	KwaZulu- Natal	Yes I do	Solar	Please asap before everything comes to a standstill	Francisca	retired
2022-07-08 13:33:24	KwaZulu- Natal	Yes I do	Solar	Please asap before everything comes to a standstill	Francisca	retired
2022-07-08 13:31:42	Western Cape	Yes I do	Solar	IPPs of whatever capacity (including households) should be able to sell excess capacity to the grid.	Russell	retired
2022-07-08 13:31:33	Gauteng	Yes I do	Solar	With South Africa's climate, I feel solar power would be a good choice.	Alexandra	retired
2022-07-08 13:30:55	Eastern Cape	Yes I do	Solar		Eileen	retired
2022-07-08 13:30:39	Gauteng	Yes I do	Solar		Yona	retired
2022-07-08 13:30:19	Gauteng	Yes I do	Solar	The ANC needs to wake up, change legislation, red tape and allow independent electricity producers to be able to sell power to Eskom .	Mariette	retired
2022-07-08 13:27:24	Western Cape	Yes I do	Solar	It is difficult to select just one source but solar and wind especially in the western cape should be considered.	Rita	retired
2022-07-08 13:26:31	KwaZulu- Natal	Yes I do	Solar	This Government needs to wake up to reality. No country can survive without an efficient power supply. ESKOM has been allowed to wallow in corruption, cadre deployment, BEE, ineptitude, and just plain criminality, for far too many years. South Africa is teetering on the edge, unless an immediate solution is found, this country will collapse. Within reason, do what ever it takes to restore our ELECTRICITY SUPPLY.	Ione	retired
2022-07-08 13:26:16	Gauteng	Yes I do	Solar		Henri	retired
2022-07-08 13:25:32	Western Cape	Yes I do	Solar	Solar and wind are the preferred options but any other option will be useful in the short term. Long term, solar and wind are the most advanced and economical solutions , they are available abundantly but need investment. This could be financed and run privately, at least partly, plus the necessary infrastructure could be installed much faster than anything else.	Edelgard D	retired
2022-07-08 13:25:16	Western Cape	Yes I do	Solar	I am fully in favour of independent producers supplying electricity using renewable sources such as solar and wind.	Norman	retired
2022-07-08 13:24:19	Western Cape	Yes I do	Solar	Renewable energy is the future.	Peter	retired
2022-07-08 13:22:23	KwaZulu- Natal	Yes I do	Solar	Solar, wind and water power are all methods of generating power.	Christoph er	retired
2022-07-08 13:18:37	Western Cape	Yes I do	Solar	Solar and wind power is the quickest and cheapest to construct energy solution for the energy crisis. We have an abundance of sun and wind in SA. Stop the red tape on this type of power producers and get Gwede Mantashe out of the picture as he is holding up the process. Employ independent auditors to ensure the process is free and fair with no corruption. Stop lining the ANC's pockets.	Mercia	retired
2022-07-08 13:18:21	Gauteng	Yes I do	Solar	Solar en wind is geredlik beskikbaar en kan redelik vinnig geinstaleer word.	Alwyn	retired
2022-07-08 13:18:14	Gauteng	Yes I do	Solar	Solar en wind is geredlik beskikbaar en kan redelik vinnig geinstaleer word.	Alwyn	retired
2022-07-08 13:18:00	Western Cape	Yes I do	Solar	Solar and wind power is the quickest and cheapest to construct energy solution for the energy crisis. We have an abundance of sun and wind in SA. Stop the red tape on this type of power producers and get Gwede Mantashe out of the picture as he is holding up the process. Employ independent auditors to ensure the process is free and fair with no corruption. Stop lining the ANC's pockets.	Japie	retired
2022-07-08 13:17:51	Gauteng	Yes I do	Solar	We have so much free sunshine in SA and we hardly use it. In the Netherlands where they hardly see the sun, everyone uses solar	Glenda	retired
2022-07-08 13:17:49	Limpopo	Yes I do	Solar	There will be no pollution.	N. C. Fick	retired
2022-07-08 13:15:23	Eastern Cape	Yes I do	Solar	Eskom cannot supply the demand for electricity therefore it should be phased out while private enterprises take over by producing solar, gas, wind , nuclear or hydro electricity to those people or industries that can afford it..	Arthur	retired

2022-07-08 13:14:44	Western Cape		Yes I do	Solar	Wind or Solar is preferred on condition the contracts enters into is not for Conrad's, family and friends The costs is important and should be a lot cheaper per unit than Eskoms Corruption corruption corruption and more corruption is our biggest worry The Government cannot or will not stop it	Wessel	retired
2022-07-08 13:14:42	Western Cape		Yes I do	Solar	Wind or Solar is preferred on condition the contracts enters into is not for Conrad's, family and friends The costs is important and should be a lot cheaper per unit than Eskoms Corruption corruption corruption and more corruption is our biggest worry The Government cannot or will not stop it	Wessel	retired
2022-07-08 13:14:37	Western Cape		Yes I do	Solar	SINCE THE anc GOVERNMENT HAS SHOWN BEYOND ALL DOUBT THAT IS IS NOT MEASSURING UP TO IT'S.MANDATE, IT MUST ALLOW ELECTRCITY GENERATION BY PRIVATE INITIATIVE. FAILURE TO DO SO COULD, AND SHOULD, BE REGARDED AS A FORM OF TREASON.	Johann	retired
2022-07-08 13:13:21	Gauteng		Yes I do	Solar	We should use coal to supply base load power. During daylight solar and wind. Regardless right now we need power ASAP and need to do whatever it takes for a period of 2 or 3 years to allow distribution to upgrade the network accordingly. Secondly, as far as possible utilize appropriate tech as close as possible to users to mitigate the need for short term transmission network constraints. Thirdly, users should be allowed to install rooftop systems and sell excess capacity back to distribution. Fourthly, this is a crisis and we the public, business as well need to be pulled in to get this fixed.	George	retired
2022-07-08 13:12:37	Western Cape		Yes I do	Solar	eskom on their own are incapable of supplying all the electrcity needs of the country	geoff	retired
2022-07-08 13:11:03	North West		Yes I do	Solar		Anthony	retired
2022-07-08 13:06:26	Western Cape		Yes I do	Solar		JANET	retired
2022-07-08 13:05:16	Western Cape		Yes I do	Solar	Son- en wind-energie moet bykomend help om elektrisiteit terug te pomp in die stelsel. Dan moet Eskom deur die privaat sektor bestuur word. Die ANC regering is nie in staat om dit behoorlik te bestuur nie.	Elna	retired
2022-07-08 13:04:32	Gauteng		Yes I do	Solar		Leonora	retired
2022-07-08 13:00:59	Gauteng		Yes I do	Solar	SA has an immediate problem, and it needs to be solved immediately. The government is scared of an employee backlash if they allow independents, hence the law. There are currently enough solar and wind farms to make a large contribution to the power problem. Scrap the law, it serves no purpose.	Harry	retired
2022-07-08 13:00:23	Gauteng		Yes I do	Solar		Alta	retired
2022-07-08 12:59:13	North West		Yes I do	Solar		Hartwig	retired
2022-07-08 12:58:33	Western Cape		Yes I do	Solar	It is a crime that a state captured, failed entity is the sole provider of electricity countrywide! Eskom have held this country hostage and polluted the atmosphere for long enough! With our fantastic hours of sunlight we should be putting up huge arrays of solar panels. We should also be using wind turbines in regions like the Western and Eastern Cape where these would be most effective. If government and Eskom don't get with the program, this beautiful country will be well and truly screwed!	Jacqueline	retired
2022-07-08 12:57:53	Gauteng		Yes I do	Solar		David	retired
2022-07-08 12:57:44	Gauteng		Yes I do	Solar	I think the followong points are worth noting: 1. Solar and wind are first choices 2. The national distribtuion grid needs to be made independent of Eskom so that it can cater for multiple generating customers 3. Home owners should be encouraged to create their own power generation, including for low cost housing and informal settlements 4. Powerx South Africa is a good example of what should be taking place	DIGBY	retired
2022-07-08 12:56:25	Western Cape		Yes I do	Solar		Till	retired
2022-07-08 12:56:19	Western Cape		Yes I do	Solar		Till	retired
2022-07-08 12:55:40	Gauteng		Yes I do	Solar	As much as I believe Solar energy is the way to go in SA, our appalling police force won't be able to halt the theft of the solar panels, that is sure to result..	Sue	retired
2022-07-08 12:55:19	Western Cape		Yes I do	Solar		Neels	retired
2022-07-08 12:55:06	Western Cape		Yes I do	Solar	We have enough sun and wind .Why are they not consulting with Sweden who are running their cities on solar power. We have the ocean in which we can generate electricity there is so many options available . We are digging our own graves by allowing the government to hold us hostage with the coal and desiel . Their is house holds doing solar reward them if they can sell back to council instead of punishing them. We have wind which we can also use . The whole population is suffering because a few people are greedy while the rest of us must suffer.	Juanita	retired

2022-07-08 12:54:56	Eastern Cape		Yes I do	Solar	The citizens of South Africa has bern held hostage too long by the unions who demand more money for workers and workers who strike and sabotage power stations. The economy is suffering, people are suffering mentally as well, because they are stressed out by the influence of the lockdown on household budgets that is being strained further by having to spend money on buying gasstoves and fuel for whatever means they are trying to provide light and heat for preparation of food..	Louise	retired
2022-07-08 12:54:52	Western Cape		Yes I do	Solar	Solar and wind would add a lot of kw to our national grid. Afterall we live in a country with immense sunshine and wind power !!!!	Christa	retired
2022-07-08 12:53:59	KwaZulu- Natal		Yes I do	Solar	Solar and wind installations must be allowed immediately to the Private Sector, as currently only the Rouges Gallery. Ramaphosa, Motsepe are looking to take over the entire power of South Africa and charge what they like. This will be worse than State Capture. You don't have to be a Rocket Scientist to see the charges and increases that will occur. I personally have been providing residential accommodation, but have not increased my rentals in 3 years as my tenants are now paying 50% in respect of electricity in relation to their Rentals.	PETER	retired
2022-07-08 12:49:27	Western Cape		Yes I do	Solar	SA is sonnig, geen tekort, kombineer met windkrag vir goeie resultate.	Willem	retired
2022-07-08 12:49:08	Western Cape		Yes I do	Solar	Solar and wind would be easiest, but any or all of the above are available and sustainable	Ank	retired
2022-07-08 12:47:47	Western Cape		Yes I do	Solar		Nellian	retired
2022-07-08 12:46:26	Western Cape		Yes I do	Solar	Renewable energy and green gas energy is the best option for South Africa.Gas should be used in households for cooking.Move away from coal and fossil gas as there is too much of a monopoly on this.Use green gas. IPP's should be able to provide power immediately.The minister of energy may have backup power for his family but the majority of South Africa does not.	Peter	retired
2022-07-08 12:44:19	Gauteng		Yes I do	Solar	It's a no brainer with our climate and the wide open spaces that are undeveloped.	Greg	retired
2022-07-08 12:43:49	Western Cape		Yes I do	Solar	Our present government cannot make up its mind. Our mineral minister is hopeless as is our President. Solar power is the answer, get the tenders out stop wasting time,money and the whole country's economy. This load shedding is getting worse nothing has been done to alleviate the situation for 15 years. Get off your backsides and get going.....	Anthony	retired
2022-07-08 12:43:48	Western Cape		Yes I do	Solar	I support the method that will be able to be implemented as quickly as possible.	Gail	retired
2022-07-08 12:43:24	Limpopo		Yes I do	Solar		Hanlie	retired
2022-07-08 12:43:12	Mpumal anga		Yes I do	Solar	Wind is my second choice. Both solar & wind environmentally friendly	Zylie	retired
2022-07-08 12:42:12	Western Cape		Yes I do	Solar	We should definitely be looking at Solar and Wind power, and any alternative power sources.	Melody	retired
2022-07-08 12:41:15	Mpumal anga		Yes I do	Solar		Henk	retired
2022-07-08 12:40:16	Western Cape		Yes I do	Solar	I do not have enough technical know how but solar we have a lot of as well as wind. The problem with any solution is the vandalism and theft. I fully agree that SA should get any power that it can by any means and that ESKOM should not have the monopoly and be able to hold the country to ransom as is currently the situation. Lots of people are leaving the country now who were borderline before as they cannot continue without electricity. No folk are going to invest in a country that cannot guarantee a reliable energy source. The economy and all government departments grind to a halt during load shedding and that situation cannot be supported or considered to be satisfactory.	Sandy	retired
2022-07-08 12:39:30	Western Cape		Yes I do	Solar	Definitely Solar. All for Independant Power Producers. Households should also be allowed to become micro power producers. (SSEG). Municipalities should allow households to feed electricity back into the grid at fair rates and allow households to feed back more than their yearly usage. Also a tax rebate for any households and businesses who install solar would help a lot to motivate installation.	Richard	retired
2022-07-08 12:39:22	Western Cape		Yes I do	Solar	Die oplossing is so eenvoudig. Die minister moet net ophou kyk waar hy kan tender. Hy en die res van die kabinet voel vere vir die land en kyk net waar hulle kan geld steel.	collin	retired
2022-07-08 12:38:22	Gauteng		Yes I do	Solar		Gisela	retired
2022-07-08 12:37:44	KwaZulu- Natal		Yes I do	Solar	Solar and wind are both suitable for SA. Hydro is great if dams and water are available, which I doubt. But we need to move forward rapidly.	john	retired
2022-07-08 12:37:08	Gauteng		Yes I do	Solar		Miemie	retired
2022-07-08 12:36:48	Gauteng		Yes I do	Solar	I support solar and wind for producing electricity.	James	retired
2022-07-08 12:35:45	North West		Yes I do	Solar	and wind power	Joanne	retired

2022-07-08 12:34:35	KwaZulu-Natal		Yes I do	Solar		Sunjith	retired
2022-07-08 12:33:07	Gauteng		Yes I do	Solar	A combination of wind and solar,like somany countries have done ,just do it ,dont talk, the extra power will create many work opportunities and new industries that is what we need now now.	dieter	retired
2022-07-08 12:30:51	Gauteng		Yes I do	Solar	We live in sunny South Africa where the sun is free and solar will be the quickest , easiest and most economic way to supply electricity . Solar is also environment friendly !	Suzette	retired
2022-07-08 12:30:51	Gauteng		Yes I do	Solar	We live in sunny South Africa where the sun is free and solar will be the quickest , easiest and most economic way to supply electricity . Solar is also environment friendly !	Suzette	retired
2022-07-08 12:30:28	Eastern Cape		Yes I do	Solar	Can also use Wind and coal if it is run by independent providers Eskom is killing us!! Corruption is rife ! Who but the private sector can run it!!!	Hestelle	retired
2022-07-08 12:29:58	Western Cape		Yes I do	Solar	I would like to see a mixture of renewable energy resources	David	retired
2022-07-08 12:28:12	KwaZulu-Natal		Yes I do	Solar	A combination of wind and solar would seem to be able to go a long way towards solving the country's problems. We have the wide open spaces. The damage at Eskom is done so it is no use pointing fingers at the current CEO who is doing his best with no backup. Like Cape Town the rest of the country should just be able to move forward with private enterprise.	Marion	retired
2022-07-08 12:27:59	Western Cape		Yes I do	Solar		Quartus	retired
2022-07-08 12:26:57	Western Cape		Yes I do	Solar	Definitely NO time to waste!! Require immediate Legislation ammendment!! The people in charge MUST consider the survival of businesses, the needs of their people and their country!! Enough is enough!! South Africa needs POWER to survive! Solar energy / solar panels..	Hélène	retired
2022-07-08 12:25:49	Western Cape		Yes I do	Solar	Any IPP that can provide additional power to the country in a short time (within 3 years) must be encouraged to do so. Temporarily lifting all red tape will be the way to go to get these initiatives going. It's time the government stopped wasting time and got this whole debacle sorted. Local content needs to be done away with at this stage, and all necessary components (e.g. solar panels) must be imported. Waiting for local content to get into production is yet another delay.	John	retired
2022-07-08 12:24:48	Free State		Yes I do	Solar	We must have Independent Power Producers scrap the red tape we do not neat ANC GOVERNMENT AND LOCAL MATJHABENG MUNICIPALITY to supply power !	Loure	retired
2022-07-08 12:23:41	Gauteng		Yes I do	Solar	Definitely cut the red tape. Solar (or wind) would be the quickest to install and help rectify the current situation.	Anthony	retired
2022-07-08 12:22:43	KwaZulu-Natal		Yes I do	Solar	I am in favour of any kind of private electricity production feeding to the Eskom grid. Immediate legislation/regulation need to be put in place for this to happen. I would imagine that a regulatory authority needs to be established under which private generating facilities can be licensed, as well as the method of connection to the grid.	Michael George	retired
2022-07-08 12:18:13	Gauteng		Yes I do	Solar	The Initial installation of Solar will probably expensive but the running costs lower. Same apply to Wind turbines	Louis	retired
2022-07-08 12:16:37	KwaZulu-Natal		Yes I do	Solar	I selected solar but wind and hydro could also work. Whatever will keeps the lights on.	Cean	retired
2022-07-08 12:16:29	Gauteng		Yes I do	Solar		Marion	retired
2022-07-08 12:16:12	Gauteng		Yes I do	Solar		Len	retired
2022-07-08 12:15:15	Western Cape		Yes I do	Solar	South Africa is known as The Land of Sunshine..... let us use this huuuuge advantage, even if initially with cheaper imported solar panels, to get the economy back on it's feet. Can argue about local content IF the economy recovers, otherwise there will be NO COUNTRY to worry about, it will have gone up in flames.	Christine	retired

2022-07-08 12:14:57	KwaZulu-Natal	Yes I do	Solar	<p>With an immense amount of sunlight available in SA, solar is certainly the way to go. Solar energy production could be stepped up quickly by private enterprises in the short term. Financial incentives for domestic users to install solar panels to power their household consumption, should also be offered.</p> <p>I am against wind turbines as they not only kill huge numbers of birds and bats, but because they are also an eyesore on the landscape.</p> <p>In the long term, our only real solution is nuclear power.</p> <p>An immediate solution to reducing our demand for electricity is to EDUCATE THE GENERAL PUBLIC & BUSINESSES with regards to saving electricity.</p> <p>It pains me that everyone is moaning and groaning about loadshedding, but few people seem to be doing anything themselves to alleviate the problem. I still see scores of household outside lights blazing away all night long (and at times during the day!!!) and business premises lights full on at night. WE the consumers, need to change the way we use electricity. We need to be more conscious of turning off lights that are not really needed, only put enough water in your kettle for your one cup of tea, don't fill it to the brim. If one million households stop using just one 11 watt lightbulb, it will save 11 million watts of electricity per hour!!!! That's the type of effect we could have as individuals.</p>	Andrew	retired
2022-07-08 12:13:39	Gauteng	Yes I do	Solar		Johanna	retired
2022-07-08 12:13:01	Western Cape	Yes I do	Solar		Jan	retired
2022-07-08 12:12:56	Gauteng	Yes I do	Solar	We have this beautiful sunny country with the majority of days sunshine. Use it now!!!!!!	Elsa	retired
2022-07-08 12:12:03	Gauteng	Yes I do	Solar	<p>I support the implementation of Solar and Wind farms we have the best conditions go solar and in various parts of South Africa good conditions for wind farms. These operations should be done by South African Entrepreneurs and not given to any Government Officials or Imported from countries outside of SA except the wind turbines. Graham JUPP</p>	Graham	retired
2022-07-08 12:11:53	Limpopo	Yes I do	Solar		gordon	retired

2022-07-08 11:57:58	Gauteng		Yes I do	Solar	Solar can despite limited advantage during night, provide the required electricity to feed our demands	Willie	retired
2022-07-08 11:57:29	Western Cape		Yes I do	Solar	Solar to hydrogen to electricity - see French project in French Guiana.	Martinus	retired
2022-07-08 11:57:26	Western Cape		Yes I do	Solar		Hartmut	retired
2022-07-08 11:57:22	Gauteng		Yes I do	Solar	If people decide to go SOLAR at their own expense, they should be rewarded not penalized by any tax the gov decides. For the rest of the citizens who cannot afford to try and come off the grid, the gov should look at SOLAR, Hydro, (sea/waves) and WIND, all these energies are here in SA in abundance in every province. So why waste time and money trying to go any other way.	SUE	retired
2022-07-08 11:55:54	Western Cape		Yes I do	Solar	We are SO far behind the rest of the world, its unreal. No airline No Railway How deep into a third cworld country can we sink!!!!	Diane	retired
2022-07-08 11:55:20	Western Cape		Yes I do	Solar	It is clear Eskom can't manage to supply enough electricity and we have a lot of sunshine in this country	Sylvana	retired
2022-07-08 11:54:49	Eastern Cape		Yes I do	Solar		Hennie	retired
2022-07-08 11:54:47	Western Cape		Yes I do	Solar	Solar, wind and the current hydro stations (no need to build any more) are the future. Gwede Mantashe is a dinosaur with plans to further wreck our fragile eco systems ie the Karoo for fracking.	Elizabeth	retired
2022-07-08 11:53:36	KwaZulu- Natal		Yes I do	Solar	Existing solar and wind powered electricity could immediately be used and more developed in the near future to supply electricity whilst the ailing power staions limp on. Cities, large towns and big businesses should be instructed to do their own production as supplementary to the national grid.	Helen	retired
2022-07-08 11:53:28	Western Cape		Yes I do	Solar	Keep cost to consumers low and no ANC cadre involvement at all. Clean energy is most important for future generations. Let our generation make the future generations PROUD.	Lois	retired
2022-07-08 11:53:27	Western Cape		Yes I do	Solar	This constant load-shedding is frustrating and crippling businesses and economy. Need people who know what they are doing, get rid of corruption and BEE.	Coral	retired
2022-07-08 11:52:42	KwaZulu- Natal		Yes I do	Solar	Anything, solar, wind, nuclear to save our country from total devastation. The corrupt government should not be involved they have cost us enough in their incompetency	Maureen	retired
2022-07-08 11:52:17	KwaZulu- Natal		Yes I do	Solar		Jairaj	retired
2022-07-08 11:52:03	Gauteng		Yes I do	Solar	South Africa gets some much sun. Use it generate electricity required. This together with wind, hydro will go a long way in overcoming problem.Coal, diesel, gas need to be phased and no nuclear.	Pauline	retired
2022-07-08 11:52:00	Gauteng		Yes I do	Solar	South Africa gets some much sun. Use it generate electricity required. This together with wind, hydro will go a long way in overcoming problem.Coal, diesel, gas need to be phased and no nuclear.	Pauline	retired
2022-07-08 11:51:42	Mpumal anga		Yes I do	Solar	I think a combination of solar /hydro /wind can be good, depending on which area electricity is needed	Henning	retired
2022-07-08 11:51:31	Western Cape		Yes I do	Solar	Any sustainable and environmental friendly solution will be supported as long as it is provided by a professional and non-corrupt service provider	Dieter	retired
2022-07-08 11:51:26	KwaZulu- Natal		Yes I do	Solar	SA has lots of Sun and Wind ;power generation using these should be expedited immediately and all red tape must be removed immediately so that the private sector can move in .Large consumers should be given the green light to produce maximum and surplus to sold to Escom . Gas should also be considered	Slim	retired
2022-07-08 11:51:22	KwaZulu- Natal		Yes I do	Solar	A mix of "clean" options is the way to go promoting the source/s that will provide the quickest solution . OUR CONTRY IS COLLAPSING! With current electricity constraints, ALL the other urgent improvements required are severely hampered. There is no other option BUT to change the regulations and follow the guidance of the experts .	Jennifer	retired
2022-07-08 11:51:22	Eastern Cape		Yes I do	Solar	Gebruik die son, dit is verniet beskikbaar.	Adri	retired
2022-07-08 11:51:06	Gauteng		Yes I do	Solar	We are blessed with so much sun light and we are not taking advantage of this. Certain parts of our country can even supply solar energy to other colder regions.	Victor	retired
2022-07-08 11:50:53	Western Cape		Yes I do	Solar	This is an innovative country with a lot of expertise. Come on lets get going! We have the sun, wind and lots of other things to get out of this grip of darkness. There is no will to make it work from goverment side. We have people with the right skills and know how to lead us in the right direction. Remember ESKOM use to be a worled leader. Lets move forward!	Ben	retired
2022-07-08 11:50:51	Western Cape		Yes I do	Solar		Harry	retired
2022-07-08 11:50:45	Eastern Cape		Yes I do	Solar	There must be a rapid alternative to what is happening at present, which is NOT working.	Pat	retired

2022-07-08 11:50:41	Eastern Cape		Yes I do	Solar	There must be a rapid alternative to what is happening at present, which is NOT working.	Pat	retired
2022-07-08 11:50:39	KwaZulu- Natal		Yes I do	Solar		Malie	retired
2022-07-08 11:50:28	KwaZulu- Natal		Yes I do	Solar	I have always paid my taxes and have always paid for my electricity usage, sadly all the money has been stolen but I still believe resolving our power issues is a matter of will, or more accurately - a complete lack thereof	Tercia	retired
2022-07-08 11:50:11	Gauteng		Yes I do	Solar	A mix of energy sources, recommended by experts in the field, with a proven record. Do away with red tape (NERSA) even if it is temporary.	Michael	retired
2022-07-08 11:48:34	Gauteng		Yes I do	Solar	The red tape is so ridiculous, it's fundamentally to protect the cadre! It's time to turn the last century pages and incorporate both wind and solar together with traditional power sources. As a personal user of solar at home, I have not regretted the investment made three years ago. The same for our country, let the IPP help our ailing system. It's the only way forward in my opinion!	michelle	retired
2022-07-08 11:48:29	Gauteng		Yes I do	Solar	We are country with so much free sunshine use it. we could also have wind due to our windy coastal towns. A mix of energy solutions is the answer. Privatise electricity so you don't have a monopoly by any 1 company. for example the " motsepe" of this world	desire	retired
2022-07-08 11:47:27	Gauteng		Yes I do	Solar	First of all, solar/wind/hydro would not only help Eskom get out of the mess it is in, it will also create work by way of the manufactures of solar parts and installation, even the D.I.W. systems, the more manufactures there are making those parts, the more work is created, more will be sold, costs will come down, customers will be able to afford solar /wind, the parts will not be so expensive that even the poorest of the poor will be able to buy a small part, very much like the small solar items on sale now, to start with they were very expensive, they are now becoming cheaper, more is coming onto the market, made and distributed by more outlets. a win win for South African population, added benefit, pollution comes down, air is fresher. population health improves.	jeanne	retired
2022-07-08 11:45:31	Western Cape		Yes I do	Solar	Solar, Wind and if necessary Nuclear. Solar & Wind are relatively easy to install & quick to useful production. All future power generation MUST be handed over to private companies. No more S O E's. Governments the world over have been proven to be the worst, most inefficient & expensive vehicles for operating/managing these vital national businesses. Keep the Politicians out of business.	Andrew	retired
2022-07-08 11:45:30	Western Cape		Yes I do	Solar		Sandra	retired
2022-07-08 11:42:13	Western Cape		Yes I do	Solar	We have so much sun. Why waste it ?	Keith	retired
2022-07-08 11:40:16	Gauteng		Yes I do	Solar	Solar seems to me to be the best source for the immediate future. I have no idea how the industry might develop, but I recollect Los Angeles City state saying that since they resolved to go solar, they had solved unemployment problems, electricity supply problems and were touted as being the best economy of all the American States. In any case I feel we should go that route and administer it properly. Therein lies the problem, we don't have honest capable administrators, the system must therefore be made super simple so that householders or private suppliers could administer themselves.	Martin	retired
2022-07-08 11:39:56	KwaZulu- Natal		Yes I do	Solar		Carrol	retired
2022-07-08 11:39:55	Western Cape		Yes I do	Solar	The government should stop allowing individuals in government to fill their own pockets via coal, fuel, gas, transport etc sales and contracts and take advice from Solderiteit and the likes to rope in private organisations who are begging and pleading to help.	Alec	retired
2022-07-08 11:39:50	Western Cape		Yes I do	Solar	Solar or wind to start off with later hydro	Karin	retired
2022-07-08 11:38:37	North West		Yes I do	Solar	Corrupt businessmen and politicians are holding up progress	Malcolm	retired
2022-07-08 11:38:25	Western Cape		Yes I do	Solar		GEORGE PHILIP	retired
2022-07-08 11:36:59	Gauteng		Yes I do	Solar		Trevor	retired
2022-07-08 11:36:11	Western Cape		Yes I do	Solar	i do not propose any one method of production on its own, but a mix of several methods	fred	retired
2022-07-08 11:34:29	Western Cape		Yes I do	Solar	With South Africa's sunny weather and abundance of land in the more arid parts of our country, solar and wind energy generation should have been prioritized years ago. In stead of wasting more money and resources on outdated and environmentally unfriendly power plants, rather use the funds to install enough power lines and cables to hook up the existing and new solar and wind generation plants that have been sitting idle for years due to government's inability to prioritize and manage this situation. Private off grid installations should also be encouraged without people paying "penalties" for being independent and self sufficient. Sunlight and wind is free and nobody owns it.	Koos	retired
2022-07-08 11:33:57	Gauteng		Yes I do	Solar		Laetitia	retired
2022-07-08 11:33:01	Gauteng		Yes I do	Solar		Marguerite	retired
2022-07-08 11:32:57	Mpumal anga		Yes I do	Solar	Provide tax incentives for all business and private individuals to install solar systems and sell the excess back to the grid.	Mark	retired

2022-07-08 11:32:31	Gauteng		Yes I do	Solar		David	retired
2022-07-08 11:32:19	Western Cape		Yes I do	Solar	Renewables can assist for the immediate future, Nuclear power should be the long time goal.	Peter	retired

2022-07-08 11:30:52	KwaZulu- Natal		Yes I do	Solar	Have selected solar but other forms of renewable energy such as wind and water are also important. Renewables are the way to go. Coal is not sustainable in various obvious ways. Re-skilling of workers in the coal industry needs to happen in order to address job losses.	Kathleen	retired
2022-07-08 11:30:47	Eastern Cape		Yes I do	Solar	Give subsidies to every household to go solar! The state of living in constant fear of trying to do everyday tasks without electricity is absolutely ridiculous. This Government is useless in every way possible!	Ginny	retired
2022-07-08 11:30:44	Western Cape		Yes I do	Solar		Antoinette	retired
2022-07-08 11:30:41	Western Cape		Yes I do	Solar	Why can the powers that be not see what is happening to the country without electricity and it is THEIR OWN PEOPLE who are suffering and they dont care a damn	Cheryl	retired
2022-07-08 11:30:30	Mpumal anga		Yes I do	Solar	All house holds should have solar geysers when they are built. Factories and anybody that already have solar should be allowed to put their excess power back to the grid. New power suppliers should be allowed to supply electricity. The monopoly escom has is against free trade. They should have to compete for the market like all other business.	Veronica	retired
2022-07-08 11:30:19	Gauteng		Yes I do	Solar	South Africa has an abundance of areas with good sunlight which would allow the generation of solar energy. However, due to the absence of sunlight at night, some form of energy storage/ generation would be required to balance the night-time demand. Small gas powered, or small nuclear plants would be suitable for this.	Malcolm	retired
2022-07-08 11:30:04	Gauteng		Yes I do	Solar	The ipp should come on line years ago. There are way too many regulations that is holding things up, causing aggravation to every one	Bazil	retired
2022-07-08 11:29:54	Western Cape		Yes I do	Solar	Solar and wind is in abundance in SA and especially in the Western Cape and West Coast. All-out effort should be invested in this free resource	Evan	retired
2022-07-08 11:29:05	Western Cape		Yes I do	Solar	It's a no-brainer for legislation to changed immediately. Solar and wind power aand battery storage is the way to go and allow pivate enterprises to feed into the grid immediately. I don't understand why this regime is so slow in doing this and why we are stuck with a fossil fuel minister!	Sunay	retired
2022-07-08 11:28:57	Western Cape		Yes I do	Solar	When I burnt my hands on the "Cold Water" from my taps in my cottage, I decided to install a solar panel to give me hot water - for my "Hot Water" taps which ran cold because of lack of electricity ;-) Other means of alleviating the power crisis: - High electricity tariff for peak demand, low tariff for off-peak. Automatic switchable from the power supplier. (In action in Europe since before 1950) - ZA has two powerful ocean currents flowing around its coast: Benguela and Agulhas http://www.crses.sun.ac.za/files/services/conferences/annual-student-symposium-2015/DAY%200/SESSION%204/02_I%20Meyer.pdf	Klaus	retired
2022-07-08 11:28:55	Western Cape		Yes I do	Solar	Apart from Solar, Wind and Nuclear would be best alternatives	Danie	retired
2022-07-08 11:27:41	Gauteng		Yes I do	Solar	I only know something about splar. However wind, hydro and coal are all acceptable options. It would depend on cost and availability. It id important, however., to have options over Eskom.	Mary- Anne	retired
2022-07-08 11:27:36	Gauteng		Yes I do	Solar	I only know something about splar. However wind, hydro and coal are all acceptable options. It would depend on cost and availability. It id important, however., to have options over Eskom.	Mary- Anne	retired
2022-07-08 11:27:29	Gauteng		Yes I do	Solar	Eskom has been totally unreliable .	Patrick	retired
2022-07-08 11:25:14	Gauteng		Yes I do	Solar	Go green immediately. Businesses, farms and private homes should be assisted to get off the grid.	beryl	retired
2022-07-08 11:25:13	Western Cape		Yes I do	Solar	Only private enterprise works under the current & most governments. let them compete to everyone's happiness.	Bruce	retired
2022-07-08 11:24:32	Western Cape		Yes I do	Solar	SA is home to the sun and wind due to its geographical site. Independent Power Producers should set up more wind parks and solar energy besides the current coal power stations. Nuclear power is also another alternative and this is clean energy. The EU has recently given the nuclear energy and gas energy a "green" pass and this was initiated by President. Macron (France) and Chancellor Olaf Scholz (Germany). We know that nuclear energy is expensive for SA but its a long term investment. With nuclear energy, SA needs people with good knowledge to maintain it. However, the government still has to make sure that all independent energy producers do not put huge profits as their goal. Eskom's tariffs have increased more than 100 % since last ten years and this has to stop. Citizens are suffering from these energy hikes.	leong	retired
2022-07-08 11:24:29	Western Cape		Yes I do	Solar	There needs to be a speedy decision made as the ANC is running SA into the ground. We cannot allow them to destroy SA's economy like they're doing. If Ramaphosa and his brother in law have vested interests in renewable energy they need to be monitored as they can't be trusted. Their motives are selfish and not for the people.	Mau	retired
2022-07-08 11:24:16	Gauteng		Yes I do	Solar	For immediate production solar is the easiest installation to build. Wind could follow and nuclear still needs to be reconsidered.	norbert	retired
2022-07-08 11:23:54	Eastern Cape		Yes I do	Solar		S	retired

2022-07-08 11:23:52	Mpumalanga		Yes I do	Solar		Johan	retired
2022-07-08 11:23:43	Gauteng		Yes I do	Solar	Solar energy farms are already in the process if being built, so would be the quickest to get online. Then I would devise a system that helps private consumers produce and store their own solar power, which would take a lot of load off the grid and allow maintenance to happen properly. I would also look at wind farms, which have proven very effective in Europe although they may require more maintenance than solar arrays. And finally, I would get our engineers and inventors working on developing our own energy storage system - something that is cheaper, safer and lasts longer than lithium batteries. That could become a whole new industry to employ jobless Safricans.	Harriet	retired
2022-07-08 11:23:24	Western Cape		Yes I do	Solar	The need to immediately off-set Eskom's problems is to provide additional private input. And solar is the fastest way of doing it.	George	retired
2022-07-08 11:20:21	Western Cape		Yes I do	Solar	We need to harness expertise across the board to ensure a stable electricity supply. This is key to growing the economy, creating jobs and attracting investments.	Bette	retired
2022-07-08 11:20:13	Western Cape		Yes I do	Solar	Solar energy can be made available in a relatively short time to address the present crises . In the longer term , nuclear energy should be implemented .	Lourens	retired
2022-07-08 11:19:42	Western Cape		Yes I do	Solar		Clive	retired
2022-07-08 11:19:37	Western Cape		Yes I do	Solar		Clive	retired
2022-07-08 11:19:33	Western Cape		Yes I do	Solar	Solar power in a country like South Africa should be a no-brainer. In Israel no dwelling may be constructed without solar panels - what is the problem in South Africa?	Lesley	retired
2022-07-08 11:19:05	KwaZulu-Natal		Yes I do	Solar	Renewables have won the energy debate among energy experts. Solar, wind and storage (battery, pumped hydro) are the only sound long-term investments and already the cheapest. Coal must be kept for baseline generation only as long as necessary and phased out as soon as better solutions can be put in place (this is still in the longer term). Set up an emergency working committee of technical and management experts and give them the mandate and power to fix the capacity shortage by bringing in clean and renewable (solar and wind) projects from independent suppliers and to mandate upgrades to the grid as necessary. I understand that lead times and cost per kWh for *nuclear* are prohibitive, but that is a decision for the expert committee to make. If necessary ask the G7 or similar for help as they have an incentive to cut SA's major contribution to global pollution. Also provide incentives for consumers to install solar etc. The point is that the problem is technically not difficult for experts to solve, and the expertise is out there, but the solutions are being blocked by the politicians who treat Eskom as a "coal preservation society". Mantashe is about the worst possible person to have in charge and must be removed. The working committee must be completely ring-fenced from political interference from politicians other than the president himself.	Don	retired
2022-07-08 11:19:00	Free State		Yes I do	Solar		Albert	retired
2022-07-08 11:17:24	Free State		Yes I do	Solar	Although we can't predict the weather Climate Change will give us we have abundant sun. We also have abundant wind. I couldn't choose Solar and Wind which would have been my preference so I chose Solar. There should be NO RED TAPE. Instead people and municipalities should be encouraged to generate there own power. Perhaps not municipalities while the ANC rules. Perhaps some sensible financial grant would be given to HONEST people who wish to add solar or wind to there own power generation capabilities. Certainly not grid-tied as then we start looking at continuous corruption and/or incompetence	Chris	retired
2022-07-08 11:17:21	KwaZulu-Natal		Yes I do	Solar		Rob	retired
2022-07-08 11:17:12	KwaZulu-Natal		Yes I do	Solar	In many areas of South Africa sunlight is a reliable source of energy, and many of these areas are sparsely populated, enabling large solar projects without negative impacts on local populations. We are facing an emergency: Immediately scrap all government restrictions that discourage the construction of such projects.	Peter	retired
2022-07-08 11:17:04	Western Cape		Yes I do	Solar	Solar and wind power immediately available! Renewable energy the only answer	Colin	retired
2022-07-08 11:16:57	Eastern Cape		Yes I do	Solar	When ANC took over They assured the Shop stewards that the ANC would not own any companies as a government is there to govern and nothing more But typical ANC they lied, they got rid v of all the Qualified Artisans did away with Apprenticeship then employed there people who were unqualified, uneducated the the Leaders started to loot all the companies dry one of them the TELKOM now South Africa is bankrupt no service and just Load Shedding which cause old People and poor people to die of hunger and cold ESKOM is unable to work because the looting BEE so it is better to have Private companies with their qualified and educated workers take over with out the interference of the ANC	Venetia	retired
2022-07-08 11:16:21	Gauteng		Yes I do	Solar		Shorty	retired

2022-07-08 11:05:08	Western Cape		Yes I do	Solar		Diana	retired
2022-07-08 11:04:21	Western Cape		Yes I do	Solar	Solar is cheaper and need only a few people to manage	Nicolaas	retired
2022-07-08 11:03:57	Western Cape		Yes I do	Solar	We have enough virtually continuous sun in certain parts of the country to go this route. We cannot depend on a corrupt useless ANC to solve the problem they created.	Linda	retired
2022-07-08 11:03:50	Gauteng		Yes I do	Solar	The government enterprise is a captured part of the Gupta saga. To high salaries for top employees. Will never make a profit again. Coal should be stopped and solar or wind must replace it. Cheaper way of getting our economy back up and running.	Carl Frederik	retired
2022-07-08 11:01:51	Gauteng		Yes I do	Solar	In South Africa with our mostly sunny climate, Solar would be a major contributor, but in some area a combination of Solar and Wind might be better. What ever, the ANC need to dump their historic mentality and understand that we have a crisis and that all impediments to increasing electricity production just have to go. For once the Government should put the needs of the South African public first and not those of the ANC cadres!	Peter	retired
2022-07-08 11:01:34	Gauteng		Yes I do	Solar	Eskom is not able to supply electricity needs South Africa URGENTLY needs other options, Solar is a good choice because we have sun almost everyday. Independent Power Suppliers is needed NOW!!	Erna	retired

2022-07-08 11:01:04	Eastern Cape		Yes I do	Solar	Energy is needed by all. All forms of energy generation should be used in this crisis and fossil sources should be phased out as soon as possible. Energy storage solutions must be used to store green energy. Eskom has run at a loss for years and will NOT make a profit for decades. Solar and wind need to be used NOW.	Elisabeth	retired
2022-07-08 11:00:55	Western Cape		Yes I do	Solar	Sunny country.Bad government.	Rouxwy	retired
2022-07-08 11:00:48	Western Cape		Yes I do	Solar	There is no single source solution. It has to be a blend of sources of generation. Took nearly two years for all final paperwork for my small embedded power generation from home, and that is just way too long. What helped though was seeing the requirements up front as well as approved inverter types.	Danie	retired
2022-07-08 10:59:30	Gauteng		Yes I do	Solar	The introduction of independent private suppliers would put an end to, the condescending monopoly. A deregulated energy will introduce competition and benefit the customer, unlike the regulated utility which can do as they please.	Amir	retired
2022-07-08 10:59:27	Western Cape		Yes I do	Solar	Our country is in desperate need of a solution to the electricity crisis! We need action NOW!!	Biddy	retired
2022-07-08 10:59:04	Gauteng		Yes I do	Solar	This is absolute "crap" this government is doing to South African citizens! This has to end and take this monopoly away from ANC cadre entirely! They are Thugs and corrupt! Cyril Ramaphosa and his whole cabinet should resign and fuck off!!!	Theo	retired
2022-07-08 10:58:32	Western Cape		Yes I do	Solar	A combination of power production should be considered as a matter of extreme urgency.	Peter	retired
2022-07-08 10:57:13	KwaZulu- Natal		Yes I do	Solar	It's absolutely imperative! The Crooks are incompetent!	Catherine	retired
2022-07-08 10:56:56	Western Cape		Yes I do	Solar	Minister Mantashe has deliberately and maliciously hindered the process of massive investment in renewable energy, both solar and wind. This must immediately be put a stop to and there must be an immediate opening up of these investments with minimum of red tape. The only control must be to co-ordinate the establishment and supply to ensure equal distribution over time, space and capacity. There must be a total scrapping of "local content" until a local capacity has been built up to supply equipment at competitive cost, quality and quantity. There must be a total ban on pipe dream dirty fossil fuels, which are already killing our citizens.	Pat	retired
2022-07-08 10:56:15	Free State		Yes I do	Solar	I believe Solar heating and power generation will work well in this country	Sheila	retired
2022-07-08 10:54:47	Western Cape		Yes I do	Solar	A business with solar can sell power to Eskom.	Gustav	retired
2022-07-08 10:54:34	Western Cape		Yes I do	Solar	We have enough virtually continuous sun in certain parts of the country to go this route. We cannot depend on a corrupt useless ANC to solve the problem they created.	Johannes	retired
2022-07-08 10:53:48	Gauteng		Yes I do	Solar	Fastest way to get more power to the grid	Johan	retired
2022-07-08 10:53:26	Western Cape		Yes I do	Solar	We need electricity now. Wind and solar farms will help with additional power supply. Government must remove all red tape and allow Eskom to employ qualified competent people. Qualified boiler makers with years of experience should be employed as well to do the welding at Medupi and at other power stations.	Anette	retired
2022-07-08 10:53:12	Western Cape		Yes I do	Solar	Solar nuclear wind and hydro ie a combination of all 'free' resources	Retha	retired
2022-07-08 10:52:58	Limpopo		Yes I do	Solar	I can not believe that we are having this debate, this problem has been here years, millions of rands later and we have hitting rock bottom. The gravy train is running dry. We have wind and sun in this country yet the normal working man can not afford to have these energy supplies added to their homes, because the government will not help the man on the street move forward away from bad service [Eskom]. You will be fined if you think of moving off grid and the cost of off grid is not affordable to the working person. I can not figure out how these debates are happing with ever election all politician promises the better life yet they try and stop you at ever corner possible. If they are not making money, then it a bad idea. What a novel idea it would be if they could do something for the better of the people instead about how much money we will loss if people go off grid.	Sharon	retired
2022-07-08 10:52:49	KwaZulu- Natal		Yes I do	Solar		Kenneth	retired

2022-07-08 10:49:15	North West		Yes I do	Solar	First get rid of the decision maker's they are useless. The small business are suffering and corruption is our main problem but the biggest of all the ANC government	Francois	retired
2022-07-08 10:49:12	Western Cape		Yes I do	Solar	I do not fully understand the technical requirements but the sun is free and we certainly can make it work for us... It is only the incompetent ANC Government that wants to keep their grubby hands on a industry that they can exploit.	Vivienne	retired
2022-07-08 10:48:27	Western Cape		Yes I do	Solar	Solar is the cheapest and quickest to install form of energy there is. We have to remove all red tape to enable all businesses and private citizens to install solar power as soon as possible.	Neil	retired
2022-07-08 10:48:16	Western Cape		Yes I do	Solar	Solar is the cheapest and quickest to install form of energy there is. We have to remove all red tape to enable all businesses and private citizens to install solar power as soon as possible.	Neil	retired
2022-07-08 10:48:10	Western Cape		Yes I do	Solar	Solar is the cheapest and quickest to install form of energy there is. We have to remove all red tape to enable all businesses and private citizens to install solar power as soon as possible.	Neil	retired
2022-07-08 10:47:52	Western Cape		Yes I do	Solar	How does one afford electricity at the current rate of buying R100.00 worth of of electricity and I ly getting 32 units which only lasts 3 days maximum. It is disgusting that the electricity Billy has lore than tripled. The scrapping of low and high consumption should also he scrapped. And every household should get an equal amount of electricity units when buying.	Portia	retired
2022-07-08 10:47:40	Gauteng		Yes I do	Solar	If independant power can be put into the grid we will not have loadshedding	Helena	retired
2022-07-08 10:47:21	Gauteng		Yes I do	Solar	IT IS VERY IMPORTANT TO EMPHASISE THAT WE NEED A NUMBER OF SOLUTIONS. GOVERNMENTS MUST LEARN THAT GOOD SOLUTIONS TO COMPLEX PROBLEMS NEED FLEXIBILITY., NOT SINGLE-MINDED FOCUS ON ONE OPTION.	Roy	retired
2022-07-08 10:47:12	Western Cape		Yes I do	Solar	Solar in combination with wind.	Pieter	retired
2022-07-08 10:46:52	Western Cape		Yes I do	Solar	Renewables are the way to go! IPPs put up the capital and get them into production faster than Eskom can even sneeze. Eskom should be privatised immediately!	Peter	retired
2022-07-08 10:46:05	KwaZulu-Natal		Yes I do	Solar	We in a crises as a country. We need to do what is good for all.	Leslie	retired
2022-07-08 10:45:18	Gauteng		Yes I do	Solar	We need sufficient additional power to enable maximum preventative maintenance at current power plants since we cannot wait to start getting additional power preference should be given to producers that can come on line in the quickest time. All red tape including local content, BEE etc must be scrapped immediately. Protection of current facilities from sabotage, labour unrest , theft must be our first priority - this must include convictions (preferably for treason) and immediate dismissal of personal guilty of sabotage , intimidation or taking part in illegal strikes. I have yet to find anything that De Ruyter or Oberholzer should have done better so rotating management will only worsen the situation so stop blaming them and rather enable them.	Cliff	retired
2022-07-08 10:45:14	Western Cape		Yes I do	Solar	A combination of solar, wind, hydro would be best, depending on where you live. Common sense needs to determine that.	Linda	retired
2022-07-08 10:45:13	Western Cape		Yes I do	Solar		PETER	retired
2022-07-08 10:44:58	Eastern Cape		Yes I do	Solar	It's time. Cut the red tape and get it done. There is enough research that been done.	Rob	retired
2022-07-08 10:44:38	Gauteng		Yes I do	Solar	Subsidize home owners to install solar systems	Christiaan	retired
2022-07-08 10:44:24	Western Cape		Yes I do	Solar		Josephine	retired
2022-07-08 10:44:23	Western Cape		Yes I do	Solar		David	retired
2022-07-08 10:43:40	Limpopo		Yes I do	Solar		Martha	retired
2022-07-08 10:43:38	Gauteng		Yes I do	Solar	Solar will be ideal as no one can interfere with it as it is happening with coal where rocks are added to increase the weight .Enough is enough.	Mary-Maud	retired
2022-07-08 10:41:28	KwaZulu-Natal		Yes I do	Solar		Jennifer	retired
2022-07-08 10:41:24	Western Cape		Yes I do	Solar	Sunshine is freely available all over SA and is free. The technology already exists. However : A new nuclear power station for a steady base load is very important.	Ron	retired
2022-07-08 10:41:19	Western Cape		Yes I do	Solar	Solar and wind makes more sense to me. Both are free , clean elements and never go on strike and less likely to be abused through corruption , fraud and mismanagement . It is also far quicker to generate electricity than to wait 5 to 8 years before a power station of coal, gas and nuclear is built and can start generating electricity. Eskom now looks like a square peg in a round hole.	Gilles	retired

2022-07-08 10:40:59	KwaZulu-Natal		Yes I do	Solar	I'm going with what THOMAS suggested: "Im all for Solar and Wind sustainable energies. I do not support Nuclear nor other fossil fuels. Independents who can add to the grid or supply privately at a reasonable cost should be allowed to provide since our Eskom grid is unreliable and costs are ridiculously high and ever increasing plus there is supply shortage, and our salaries do not allow us to keep up with the increasing costs and way of life is adversely affected by loadshedding."	Annie	retired
2022-07-08 10:40:59	KwaZulu-Natal		Yes I do	Solar	The private sector is more likely to be able to sort out the problem more quickly than the dysfunctional Eskom. It should be mandatory for any new building to have solar power installed as the prime source of power. Where there is the possibility of hydro or wind power being implemented it should be done so too. Nuclear power needs long term planning and we do not have time to implement it.	Moonyean	retired
2022-07-08 10:39:50	Gauteng		Yes I do	Solar		Carol	retired
2022-07-08 10:39:18	Eastern Cape		Yes I do	Solar	Solar and wind would be ideal from a 'green' point of view. But privatise and the entrepreneurs will find the most enervative and cost effective solutions. But please, please keep politics out of it, there should be no need for tenders, the suppliers/producers no matter how big or small can merely feed into the grid and be paid accordingly.....the technology is available.....is the political will?	John	retired
2022-07-08 10:37:46	Western Cape		Yes I do	Solar			retired
2022-07-08 10:37:42	Western Cape		Yes I do	Solar	Though I have selected 'SOLAR', there are other methods that are equally effective and sustainable, like WIND and HYDRO. GAS is not ideal, but we can go a long way with utilising GAS as well. The government is unable and unwilling to properly maintain our electricity supply. The loadshedding has to stop!!	Eugene	retired
2022-07-08 10:37:18	Gauteng		Yes I do	Solar	To quickly get more power onto the grid, Government and all local authorities should encourage, or even incentivise, private homeowners to invest in installing a larger PV system than their home actually needs and to feed their excess electricity into the grid at parity prices - i.e. feed in at the same cost as the municipality charges for electricity drawn from the grid. This was done in Germany and they had sufficient take-up to allow them to remove 1 nuclear power station from the grid.	Terry	retired
2022-07-08 10:36:17	KwaZulu-Natal		Yes I do	Solar	I mention solar only because you don't have a choice of more than one method to choose. But if households are allowed to generate solar and not have to store the excess power, but feed it into the grid, than it would alleviate the big expense of battery storage. Eskom has pumped storage facilities (i.e. a big battery). As far as I'm aware there are at least 3 big pumped storage schemes operational. Until the point where too much power is generated by private producers, Eskom could use the additional capacity to keep the top dams of the pumped storage schemes full for use at night and peak times. Let the public be allowed to run their meters backwards. That would encourage solar installations.	Guy	retired
2022-07-08 10:35:45	Gauteng		Yes I do	Solar		Simon	retired
2022-07-08 10:34:59	KwaZulu-Natal		Yes I do	Solar		Anne	retired
2022-07-08 10:34:59	KwaZulu-Natal		Yes I do	Solar		Anne	retired
2022-07-08 10:34:46	KwaZulu-Natal		Yes I do	Solar	I use solar power for hot water and electricity, and do not use ESKOM. Many households in SA would be able to live comfortably using solar power. Sure, you must adapt your power use and be more responsible when it comes to using electricity, but that it is a good thing. We should all be able to contribute to SA's energy needs without ridiculous red tape and self-serving monopolies. If all citizens were allowed to make an energy contribution, there would be no energy crisis. The ESKOM type monopolies should just vanish as that particular model does not work anymore. Electricity should be the responsibility of every citizen, so we should be allowed to participate in its production and so contribute to the growth and stability of the country. Alternative energies can make a real difference and is within reach of many citizens, it also creates job and career opportunities, so let's make it easy for everyone to participate.	Ludwig	retired
2022-07-08 10:33:54	Gauteng		Yes I do	Solar	Though I have selected 'SOLAR', there are other methods that are equally effective and sustainable, like WIND and HYDRO. GAS is not ideal, but we can go a long way with utilising GAS as well. The government is unable and unwilling to properly maintain our electricity supply. The loadshedding has to stop!!	Ann	retired
2022-07-08 10:33:29	Eastern Cape		Yes I do	Solar	Quickest method to create new source of electricity	Walter	retired
2022-07-08 10:32:32	KwaZulu-Natal		Yes I do	Solar		Rina	retired
2022-07-08 10:31:35	Gauteng		Yes I do	Solar	We need urgently to move away from the "dirty" production of electricity. Solar has become significantly cheaper to implement and this will continue. Moreover, South Africa has significant availability of sunlight if these facilities are appropriately sited. Going for fossil fuels is the reaction of Luddites, whilst the Nuclear option is both too expensive and requires too much lead time to implement. Wind power has to be the second option.	Nigel	retired
2022-07-08 10:31:24	Western Cape		Yes I do	Solar	Renewable energy is the future	Kobus	retired
2022-07-08 10:31:17	Gauteng		Yes I do	Solar	Solar and wind can easily be accessed for creating power by the private sector. However, the private sector can also be involved in Nu-clear energy. At least there would not be any corruption then.	Bets and Nico	retired

2022-07-08 09:51:23	Gauteng	Yes I do	Solar	Let's move over to the private sector and get service, power and renewable energy. Eskom has proven the perastatal is not coping with supplying the country with electricity so let's get help from other companies willing to put in the money, time, expertise and methodology to supplement Eskom with regional companies giving the people electricity. Use wind where most wind is located in the country, give solar as the sun is prevalent and free all over the country, and thermal if it is feasible. No nuclear, gas or coal. Get rid of fossil fuels and help South Africa rise up out of the 19th and 20th centuries into environmentally friendly and pollution free power.	Cathy	retired
2022-07-08 09:48:41	Gauteng	Yes I do	Solar	Eskom have time and time again shown that the are not capable of delivering sustainable power to the is country. Electricity generation and supply needs to be opened up to the private sector.	Karl	retired
2022-07-08 09:47:59	Gauteng	Yes I do	Solar	Time to privatize to independent power producers	yvonne	retired
2022-07-08 09:47:49	Western Cape	Yes I do	Solar	We have space and the energy (Sun) for solar power to be the least intrusive generator of power. A combination of wind and solar would probably be the most effective since the two sources of energy could occupy the same physical footprint.	Neal	retired
2022-07-08 09:47:18	Northern Cape	Yes I do	Solar	In addition to solar, I would suggest wind and hydro. These commodities are free, renewable and do not affect climate. NO nuclear. Furthermore, the government is useless in the managing of ALL things and SOE should all be removed from them entirely and controlled/managed/owned by the private sector who have NO ties/affiliations to any current or previous government/ANC individual.	Douw	retired
2022-07-08 09:45:26	KwaZulu-Natal	Yes I do	Solar	Any renewal energy source should be encouraged, and our entire energy supply should be privatised.	Vivienne	retired
2022-07-08 09:45:25	Gauteng	Yes I do	Solar	With solar, also wind would fulfill "immediate", as they are quick to erect and can generate "tomorrow".	Horst	retired
2022-07-08 09:45:22	KwaZulu-Natal	Yes I do	Solar	Any renewal energy source should be encouraged, and our entire energy supply should be privatised.	Vivienne	retired

2022-07-08 09:20:27	Gauteng		Yes I do	Solar	For now solar is the only option. Ten years ago modular nuclear should have been built but ZUMA and co. but a stop to it because they did not had a hand in the cookie jar so coal we went. To start nuclear now is very expensive and years to built. Something this government will not get right looking at the new coal power stations. Leave BBEEE out of the equation in the private sector and we will be able to rebuilt SA. Keep BBEEE to the government sector where it has been proven to be unsuccessful. Unfortunately our government do not have the mentality to realize the problems that BBEEE created.	Johan	retired
2022-07-08 09:20:21	Gauteng		Yes I do	Solar		Leon	retired

2022-07-08 09:18:06	Gauteng	Yes I do	Solar	Our country should use a combination of methods, including Solar, Wind, Hydro, and well controlled Nuclear. However the solution must be well researched and tenders must be absolutely transparent and include accountability. An independant (political, family and friends, Gupta etc.) body to oversee the implimentation and rocess should be established. We no longe have any confidence in any of the state solutions, therefore the state needs to divest itself from the process and allow for a non political outcome.	Dave	retired
2022-07-08 09:15:29	Gauteng	Yes I do	Solar	Eskom is busy to destroy the economy of South Africa. We need to reduce the dependence from Eskom. For that, we must make loans available to households and businesses to go solar or wind power. We for the short term need to get ships which supply electricity to be link to over network. We need a team to investigate all the Eskom transaction, and put the criminals behind bars. We do not have time to waste. We need to start buy electricity from who ever can supply. Bring the private sector in to help supply electricity. Brake Eskom 's power over the country. Reemploy workers with skills and get rid of the others.	de la Rey	retired
2022-07-08 09:14:49	Gauteng	Yes I do	Solar	It takes 8 too 10 years to build a power station of any kind, where wind or solar should not take that long, and more than one firm or individual can contribute towards this..	Daniel	retired
2022-07-08 09:14:49	Gauteng	Yes I do	Solar	It takes 8 too 10 years to build a power station of any kind, where wind or solar should not take that long, and more than one firm or individual can contribute towards this..	Daniel	retired
2022-07-08 09:14:40	Mpumalanga	Yes I do	Solar	Eskom is currently unable to supply the needs of our economy. Corruption and incompetence has crippled the organisation. Allowing independent suppliers access to the market would give Eskom the opportunity to get their house in order and perhaps start regaining all that has been lost through inefficiencies and ludicrous employment practices. A free market system would also allow for a competitive market. Its time the government started being realistic and realising that a once great company is now defunct.	Tricia	retired

2022-07-08 08:20:38	Western Cape	Yes I do	Solar	I am surprised that it has taken this long for SA to start panicking. We know that our government is not able to make these decisions and the people now need to decide for them. Allow solar, wind solutions to be fed into the grid.	Helen	retired
2022-07-08 08:19:38	Limpopo	Yes I do	Solar	We have a problem with electricity at this moment in time. If people with solar already installed (and there are many) get the green light today , we can deliver electricity today. This will probably not solve our problem , but will give Eskom some breathing space	Koos	retired
2022-07-08 08:17:53	Limpopo	Yes I do	Solar	We have a problem with electricity at this moment in time. If people with solar already installed (and there are many) get the green light today , we can deliver electricity today. This will probably not solve our problem , but will give Eskom some breathing space	Koos	retired
2022-07-08 08:17:51	KwaZulu-Natal	Yes I do	Solar	I support solar AND wind. Let the people who have the knowledge and expertise take over the production of electricity. The ANC is the root cause of our problem which started with Mbeki refusing to upgrade ESKOM when it was abundantly clear that problems were accruing back in the 1990's. The problem is that the ANC wants to keep control so that it can continue with its useless policies and the corruption and theft that surrounds ESKOM through cadre employment.	michael	retired
2022-07-08 08:15:08	Western Cape	Yes I do	Solar	The answers to the problem have already been provided by the DA and many others. The first thing to do is get rid of Mantashe, then cut all the red tape and unnecessary legislation that is currently hobbling the private sector and IPPs. The presidency and Public Enterprises Minister Pravin Gordhan are looking for emergency solutions to end the load shedding crisis. This comes as several parties outside the government put forward emergency plans. An emergency plan could suspend the IRP and expand private energy production massively. Amend legislation preventing Independent Power Producers from immediately supplying South Africa with electricity to save our country.	Ken	retired
2022-07-08 08:13:50	Western Cape	Yes I do	Solar	I believe that the government is holding back on workable solutions to the power crisis such as solar and wind (renewables) for personal reasons. It would seem as if there are lobbies at play for coal and nuclear that are well supported by certain members of parliament. These types of solutions will take far too long to come on stream (look at Medupi and Kusile).	Peter	retired
2022-07-08 08:13:42	Western Cape	Yes I do	Solar	The answers to the problem have already been provided by the DA and many others. 2022-07-08 08:13:27	Western Cape		Yes I do	Solar	PLEASE NOTE ! Although parts of our country have sunshine 90% of the year during the day solar energy will not help during the night unless the excess of the day can be stored for night use. WHY are DOMESTIC SOLAR USERS being ignored in the sense that they have to carry the cost of proving that their systems are safe to connect to the grid and can supply of their excess to the grid ? ? ? The number of domestic users is increasing every day and can surely help decrease the burden on Eskom ! The long term solution should be a combination of Solar, Wind and Nuclear power.	Arno	retired

2022-07-08 08:04:01	KwaZulu- Natal		Yes I do	Solar	Fossil fuel fired generation damages the global environment. Wind and solar energy generation is a good way to provide the essential power without damaging the environment. Hydro generation will require building suitable water impoundments and is thus not a readily accessible resource. Existing hydro-driven plants should be extended to achieve maximum use of the energy available from the stored water.	Richard	retired
2022-07-08 08:03:30	KwaZulu- Natal		Yes I do	Solar	Fossil fuel fired generation damages the global environment. Wind and solar energy generation is a good way to provide the essential power without damaging the environment. Hydro generation will require building suitable water impoundments and is thus not a readily accessible resource. Existing hydro-driven plants should be extended to achieve maximum use of the energy available from the stored water.	Richard	retired
2022-07-08 08:02:52	Gauteng		Yes I do	Solar	There is no doubt Eskom is in serious trouble with electricity supply security. Alternative sources of energy are therefore necessary. Solar energy is the only viable alternative in SA given that it's driven by the sun, which we have plenty of. Though this alternative source still needs to develop storage capabilities, it still remains viable for a country like South Africa. However communities in the countryside where solar fields are likely to be located should be considered for shareholding in the envisaged projects. Solar is also clean, causing little or no harm to the environment. I agree, any red tape in the path of other sources of energy entering our energy grid should be removed immediately. The economy is hurting.	Malose	retired
2022-07-08 07:58:39	Western Cape		Yes I do	Solar	Eskom will never ever sort the mess they are in . 2022-07-08 07:29:19	Gauteng		Yes I do	Solar	My Fattther was an Electrical Engineer and did most of the overhauling of the South African and Zimbabwe power stations. In the 70's already he said we must go over to Solar and wind and Hydro and stay away from Coal and Nuclear. The overhauling of the powerstations was always done in the summer when the lowest impact would be felt and it had to be done every season so that there was time for any other problems in between and in the winter when usage was high. Solar will be the quickest due to the plentiful sun in our country and space and wind next as anything in the Cape would immediately also add to the grid. Competition is necessary for Eskom..... all they want is money and do no maintance and as a result everything in going to Subsidies for the installing of solar will also go far to relieve the grid as the solar industry at the moment is just making money off the normal person on the street	Wendy	retired

2022-07-08 07:22:45	Eastern Cape		Yes I do	Solar	There will only be a loss of power if there is no sun and then generators can be used .	Herbie	retired
2022-07-08 07:22:44	KwaZulu-Natal		Yes I do	Solar	Given the lived reality of Eskom's incompetence and self-centredness of the "workers" (who are being grossly overpaid) and the damage being done to the economy, the solution is obvious to anyone with even half a brain: get out of the way NOW and forever more. Open up electricity generation to anyone and everyone. Let the supply price be competitively determined. Do NOT charge people anything for contributing electricity: doing their patriotic duty. Coal, diesel and gas are not to be considered as they are not carbon-neutral. Nuclear, with the country's lack of internal expertise and the potential for disaster, is also not an option. Wind and hydro are long-term and require heavy capital investments and should be looked into later. We can do solar almost at once.	Alan	retired
2022-07-08 07:20:14	Gauteng		Yes I do	Solar	I believe we need a combination of offerings so that citizens can choose the method they can most afford. It would seem that solar is most advanced at present and is able to feed the grid immediately. This government needs to stop being selfish and self-serving and put the citizens first, after all that's who they are supposed to be serving and protecting.	Rosalind	retired
2022-07-08 07:19:32	Limpopo		Yes I do	Solar	It is only logical to do way with the red tape. By relieving the power shortage situation,the daily lives of everybody, and the economy can be normalised sooner.	Susan	retired

2022-07-08 07:16:52	Outside SA	Namibia	Yes I do	Solar	While we promote solar as the most viable power generating tool, other tools such as wind farms, hydro and nuclear should not be forgotten, if the technicians who run the plant are well trained and responsible. Solar is preferred, as you can fit the Size to the demand, possibility for extension is always is there, you can built it right where you need it, on roofs especially and the time frame to get it up and running is minimal. I am even going further in requesting all new buildings to put there own solar power plant on the roof, otherwise the permission to build would be rejected. Germany to my surprise missed this opportunity, RSA and Africa could avoid this mistake by changing existing law and asking private and investing sectors to participate in lifting the pressure on ESKOM.	Christine	retired

					<p>I fully support as rapid a roll-out of renewable energy generation as soon as possible. This could include solar, wind, geothermal (of which we have little) and hydro (where we are challenged for natural resources).</p> <p>For storage, there are several options available, including varies battery chemistries, pumped water storage, thermal, and more.</p> <p>Worldwide, thermal and solar are already the cheapest options, and also the fastest to install, and solar / wind / battery solutions are already outcompeting gas and fuel oil peaker generation in countries such as Australia and the USA.</p> <p>I would support solar and wind first, as hydro projects can be long term and costly to build, and require significant regulatory and infrastructure input.</p> <p>Coal: This is not viable, as it directly impacts health, climate and the environment. Plus, we have already seen how open the coal industry is to corruption and graft networks, and the coal transport industry has also allowed outside players to hold Eskom to ransom.</p> <p>It has already been proven that SA no longer has the skills or capacity to build new coal generation (Medupi, Kusile) and this generation is also allows workers and outside players to hold the economy to ransom.</p> <p>Coal seems to be being pushed by interests who have political and rent-seeking opportunities in mind. Political in that the coal lobby and labor sectors are major ANC supporters.</p> <p>Gas: the overall pollution and climate costs of gas including leaks during mining, transport and use, as well as ecological damage during mining, plus the falling cost of renewables compared to gas, could lead to investments here being left high and dry in the short to medium term as gas generation is priced out of the market.</p> <p>Gas also exposes SA to the huge swings in gas pricing and supply on the international market. Developing our own gas extraction would be done by private companies, and thus we would still need to compete with international prices, as these companies would sell to the highest bidder.</p> <p>Diesel: Negatives are the same as for gas, but much more expensive, higher polluting, and just as subject to international price swings and availability.</p> <p>Nuclear: South Africa has very little technical or scientific capability to support a nuclear capability. Looking around the world, nuclear projects typically overrun initial cost and implementation time estimates by a factor of 2 to 4. Nuclear is extremely expensive to build and operate, and the timescales to implement in the order of decades make this a very poor choice for a short or medium term solution.</p> <p>Again, cheaper new existing (plus others in development) technologies such as renewable energy and storage would strand any expensive nuclear investments in the short, medium and long term.</p> <p>No country has yet satisfactorily solved the long term (1000 plus years) of nuclear waste, and given the very poor demonstrated capability of government to regulate and build/maintain infrastructure,</p> <p>Again, nuclear seems to be supported by a sector in government who eye the huge costs and timescales involved in nuclear as a key source for rent seeking and political influence.</p> <p>Nuclear = corruption and reputation building, no more and no less.</p>

2022-07-08 06:39:27	KwaZulu-Natal		Yes I do	Solar	This country is crumbling very quickly and if we do not get immediate help with our electricity there will be no country to save. I would also like to see wind turbines especially along the coasts where wind is in abundance	Sharon	retired
2022-07-08 06:39:06	Gauteng		Yes I do	Solar	This country has plenty of sunshine and prevailing winds. Desert areas should be covered with solar panels	abraham	retired
2022-07-08 06:38:49	Mpumalanga		Yes I do	Solar	Investments must he used to ensure that every household must have a Solar system .	Lodewickus	retired
2022-07-08 06:38:29	Gauteng		Yes I do	Solar	Sonkrag is skoon en ons het baie daarvan. Na aanvanklike groot koste vir oprigting in bv die Karoo en Noord Kaap (hierdie koste en opwekking word deur privaatsektor bedryf) is enigste koste onderhoud (anders as steenkool en diesel). Eskom konsentreer op transmissie en aanvulling van opwekkingsvermoë dmv bestaande steenkool kragstasies.	Andries	retired
2022-07-08 06:38:24	Eastern Cape		Yes I do	Solar		Ian	retired
2022-07-08 06:38:05	Gauteng		Yes I do	Solar	SA moes al ten minste 20 jaar terug van Eskom se afhanklikheid ontslae geraak het, dan sou ons nie nou al die gemors gehad het nie.	Jacobus	retired

2022-07-08 06:36:55	Gauteng	Yes I do	Solar	Escoms competent managers need to bring back the old guard who know how to keep a power plant going,however, failing this the citizens of S.A. should agitate for Solar power as well as wlnnd turbines to be approved without restrictions The ANC bugged up this country way back when they came into power(replacing all competent staff with their cronies, closing all apprenticeship schools etc to enhance their communist ideology Private enterprise should be used to manage the countries power industry		retired
2022-07-08 06:36:24	Gauteng	Yes I do	Solar	I feel that Eskom is just costing the taxpayer money. With load shedding your electrical lights and appliances are damaged and need to be replaced. If we can generate enough power via solar farms the would be more efficient and no bail outs all the time.	Derek	retired
2022-07-08 06:35:55	Gauteng	Yes I do	Solar	We should make use of the natural resources God has given us,	Doreen	retired
2022-07-08 06:35:34	Gauteng	Yes I do	Solar		Elizabeth	retired
2022-07-08 06:34:57	Western Cape	Yes I do	Solar	In order to save our planet, and all who live here, it is imperative to use resources other than coal and oil to fuel energy supplies. The government needs to make urgent changes to legislation to allow independent producers to bring much needed electricity to South Africa., and remove ministers who stand in the way and have failed in their duty to the citizens.	Marcelle	retired
2022-07-08 06:34:46	KwaZulu-Natal	Yes I do	Solar	Any natural course of energy in order to protect the planet	ALTA MARGOT	retired
2022-07-08 06:33:54	Western Cape	Yes I do	Solar	A mix of all the green generation energy techniques can be used together. Just allow IPPs to provide energy immediately.	Lesley	retired
2022-07-08 06:33:53	Western Cape	Yes I do	Solar	A mix of all the green generation energy techniques can be used together. Just allow IPPs to provide energy immediately.	Lesley	retired
2022-07-08 06:33:33	Western Cape	Yes I do	Solar	Government should supplement private installation cost in return for a cut of the electricity produced.	Jens	retired
2022-07-08 06:33:27	Western Cape	Yes I do	Solar	Solar is quick to implement and independent of human supply controllers (OPEC, wars, etc) which will drive up the price (as experienced currently for gas, diesel, petrol) outside of our control. Hence a renewable option needs to be established and in parallel ideas such as a CO2 battery, gravity battery (others?) further investigated.	Harry	retired
2022-07-08 06:30:51	Gauteng	Yes I do	Solar	Cheaper to spend money on solar	Chris	retired
2022-07-08 06:26:59	Western Cape	Yes I do	Solar		Carol	retired
2022-07-08 06:26:16	Gauteng	Yes I do	Solar	Solar energy can be brought online quickly by both private and public sector providers and at a relatively low cost. It can be produced by many suppliers thus making start-up time less and ensuring both security of ongoing supply and the control of corruption.	Chris	retired
2022-07-08 06:26:16	KwaZulu-Natal	Yes I do	Solar		Paul	retired
2022-07-08 06:24:58	Western Cape	Yes I do	Solar	Government can subsidise solar in stead of spending on old powerstations. Relief to Eskom will be immediately.	Hendrik	retired

2022-07-08 05:51:18	Gauteng		Yes I do	Solar	We are blessed with sunshine which the Lord gives us freely. Let us use it.	Thea	retired
2022-07-08 05:50:56	Gauteng		Yes I do	Solar	Any form of clean power will be good for SA.	Tracy	retired
2022-07-08 05:49:22	Western Cape		Yes I do	Solar	SA is blessed with Sun,Wind and Water. This has to be utilized.	Andy	retired
2022-07-08 05:48:38	KwaZulu- Natal		Yes I do	Solar		John	retired
2022-07-08 05:47:55	Western Cape		Yes I do	Solar		gisela	retired
2022-07-08 05:37:41	Western Cape		Yes I do	Solar		Marius	retired
2022-07-08 05:36:53	KwaZulu- Natal		Yes I do	Solar	Apart from the initial cost of solar panels and the installation thereof South Africa has long periods of sunshine summer and winter!	Sharon	retired
2022-07-08 05:35:10	Western Cape		Yes I do	Solar		Hennie	retired
2022-07-08 05:32:08	Western Cape		Yes I do	Solar	This should have happened 20 years ago. It is a crime that it has not both environmentally and economically.	Helen	retired
2022-07-08 05:31:51	Western Cape		Yes I do	Solar		LLOYD	retired
2022-07-08 05:26:15	Western Cape		Yes I do	Solar	It is time that the government got rid of its fixation with coal. Renewable energy sources are available in abundance in South Africa. A combination of solar, wind and hydro could supply our power needs adequately. Cut the red tape and allow our economy to grow. Allow capable people to do the necessary work. Cut out the deployment of people merely because they support the ANC and get people who know what they are doing into jobs in Eskom.	Rosemary	retired
2022-07-08 05:25:04	Western Cape		Yes I do	Solar		Stefanus	retired
2022-07-08 05:21:35	Mpumal anga		Yes I do	Solar		Charles	retired
2022-07-08 05:17:04	KwaZulu- Natal		Yes I do	Solar	Northern West Coast and Northern Cape have vast areas which is not suitable for any form of farming where huge Solar plants could be erected . This would be to the benefit of locals as well as the rest of South Africa	Jacobus	retired
2022-07-08 05:14:54	Gauteng		Yes I do	Solar	We need immediate relief from the current loadshedding as well as exorbitant and ever increasing power cost. We also need a sustainable as well as clean power source. I therefore suggest solar and wind.	Ruperta	retired
2022-07-08 05:14:52	Gauteng		Yes I do	Solar	It is time that this government gets rid if all the red tape there are an abundance of highly QUALIFIED people waiting to help SA in all spheres let them decide which method is appropriate and government should step aside as.they are highly incapable	Ruby	retired
2022-07-08 05:13:19	Gauteng		Yes I do	Solar	All over the world countries are using alternative power sources. Solar is very quick to get up and running.... We just need to be more open	Gaynor	retired
2022-07-08 05:01:15	Free State		Yes I do	Solar		Peter	retired
2022-07-08 04:58:10	Mpumal anga		Yes I do	Solar		Gezina	retired
2022-07-08 04:41:56	Western Cape		Yes I do	Solar	I do not trust Ramaphosa and I d not trust Gordan, only reason I sign this is because of the crisis they created... Independent parties must be involved to oversee that another state capture is not happening, who would the independent parties be, are they family, friends of or in any way linked to anyone in this corrupt government?	Amanda	retired
2022-07-08 04:41:53	Western Cape		Yes I do	Solar	I do not trust Ramaphosa and I d not trust Gordan, only reason I sign this is because of the crisis they created... Independent parties must be involved to oversee that another state capture is not happening, who would the independent parties be, are they family, friends of or in any way linked to anyone in this corrupt government?	Amanda	retired
2022-07-08 04:39:40	Mpumal anga		Yes I do	Solar	It would open the options for using sustainable and renewable and healthier sources than coal. Stop the monopoly and corruption. Increase investments and increase energy markets and opportunities for everybody not just some. Improve the living standards of all South Africans	Dylis	retired
2022-07-08 03:55:01	Gauteng		Yes I do	Solar	Solar power is free, straight from the heavens, it must therefore not be taxed, it is safe in every way and SA has plenty of sun, what is not bring used, can be put back into the grid, and it is green energy. Stop the ANC Govt monopoly of power. Put SA and is citizens first.	Christine	retired

2022-07-08 03:33:08	Gauteng		Yes I do	Solar	Independent power suppliers will help South Africa as the demand for electricity will be met. The new power suppliers will have to bid against one another thus keeping the price of power lower. This will help all South African's.	Gea	retired
2022-07-08 03:10:54	Western Cape		Yes I do	Solar	This ANC government is a dictatorship but can't manage what it dictates ,they got rid of competent people and now want to rehire them to help the incompetent buffoons they put in charge. Let us the people decide what's best for us	Frank	retired
2022-07-08 02:19:30	Western Cape		Yes I do	Solar	Independent power producers will STOP the government and eskom manipulation and will reduce the prices but the power will always be on.	Jan	retired
2022-07-08 02:00:06	Gauteng		Yes I do	Solar	This government is a failure in every facet they try to govern. This is true of the power supply as well. Corruption and a desperate hanging on to ruling power render the government floundering and failing South Africa's citizens. We have enough sun to provide the country with affordabke unbroken power supply. Let the government keep their un-maintained and archaic power stations while capable citizens invent progressive and intelligent solutions, whether utilising sun, wind or gas.	Jacomina	retired
2022-07-08 01:00:42	Western Cape		Yes I do	Solar	Solar power. Karoo has vast open space. (Domestic animal can still feed around/under the solar panels.) Every house a solar-panels setup. Remove registration/restriction on installation of solar-panels >> "You need to register no matter what," says specialist energy law consultant << https://www.businessinsider.co.za/draft-rules-require-solar-pv-backup-generators-to-be-registered-2018-5	Hannes	retired
2022-07-08 00:21:05	Western Cape		Yes I do	Solar	After 30 yrs of abuse no quick fix. Get the stolen money back and we can move mountains. And that goes for every govt run organization!!	Lorraine	retired
2022-07-08 00:05:43	Gauteng		Yes I do	Solar	Stop faffing hand the electricity production to private enterprise remove all the present incumbents from their positions. Two decades of fiddling while the country has been made into a mess	Sikender	retired
2022-07-07 23:22:34	Gauteng		Yes I do	Solar	South Africa is not utilizing its greatest resource, the sun. Set up solar plants and encourage the private use of solar energy in private residences, businesses and other areas where users would not be reliant on government provision of power also without being penalized for having their private facilities which they would install at their own cost.	Lindy	retired
2022-07-07 23:20:55	KwaZulu-Natal		Yes I do	Solar	No more fossil fuels please as that will exacerbate the global warming crisis. Only admit solar or wind. That experience will help for the future due to the knowledge acquired by using it. Nuclear has not produced any problems for us so far, but you never know.	Philip	retired
2022-07-07 23:16:06	KwaZulu-Natal		Yes I do	Solar	None of these will actually help, unless the theft and sabotage can be stopped, Why has the theft and sabotage not been declared Acts Of Treason against the Country, Wind and Solar should be the quickest means to assist Eskom Fire Mantashe as well as he is delaying progress	Bruce	retired
2022-07-07 23:15:00	Western Cape		Yes I do	Solar	Independent power producers can be a tremendous help for Eskom to have sufficient power for the whole of SA Please cut the red tape and help businesses to have a sustainable income again	Tienkie	retired
2022-07-07 23:08:45	Northern Cape		Yes I do	Solar		Gerda	retired
2022-07-07 22:41:02	KwaZulu-Natal		Yes I do	Solar	Energy provision by independent companies places less economical stress on government resources. Solar, wind and water are the best solutions to providing electrical power. I believe it's also possible to provide energy from waste material. This method would eliminate tons of consumer waste and lead to a cleaner environment and unpolluted ocean.	Margo	retired
2022-07-07 22:21:37	Western Cape		Yes I do	Solar	First choice Nuclear but time and funds limitation forces second best option of Solar with molten salt as power collector	Tobie	retired
2022-07-07 22:12:22	Limpopo		Yes I do	Solar	Solar does not suit the whole country, in the Cape it would probably be wind, where there are established coal power stations use coal. Diversify but privatise. We need electricity to generate industry. Eskom has virtually destroyed the economy and mr. De Ruyter gets sabotaged at every opportunity if he tries to stop it.	Marika	retired
2022-07-07 22:09:41	Western Cape		Yes I do	Solar	Solar, wind, hydro, any available resource.	Linda	retired
2022-07-07 22:09:40	Western Cape		Yes I do	Solar	Solar, wind, hydro, any available resource.	Linda	retired
2022-07-07 22:09:33	Western Cape		Yes I do	Solar	Eskom coal power stations have come to an end . Eskom should be able to purchase electricity from the private sector to redistribute to Municipalities. Municipalities should also be able to purchase electricity from private enterprises. This would improve the manufacturing segment production. Job creation and attract foreign companies. Only concern the cost of electricity from private enterprises would have to be regulated to maintain costs as low as possible which must be passed onto the consumer. This would also create competituon in the industry and getting rid of monopoly. Yes legislation needs to be amended urgently and implemented like yesterday	Hamish	retired

2022-07-07 22:06:13	Western Cape		Yes I do	Solar	This should have been allowed years ago. We have plenty of open Spaces free of pollution . Solar while initially expensive is a free source of energy with low running cost compared to any other source.	Robin	retired
2022-07-07 22:03:37	Gauteng		Yes I do	Solar		Dawn	retired
2022-07-07 22:02:47	Limpopo		Yes I do	Solar		Charmaine	retired
2022-07-07 22:00:28	Western Cape		Yes I do	Solar		Brenda	retired
2022-07-07 21:58:27	Gauteng		Yes I do	Solar		Hana	retired
2022-07-07 21:55:57	Western Cape		Yes I do	Solar	I use Israel as an example. Most homes there have solar and back up electricity if needed. Not needed most of the time. Power cuts are badly damaging our country and putting off investors!!!!	Georgina	retired
2022-07-07 21:51:57	Western Cape		Yes I do	Solar		Susan	retired
2022-07-07 21:50:13	Western Cape		Yes I do	Solar		Délene	retired
2022-07-07 21:47:09	Western Cape		Yes I do	Solar	We're going down fast. SA desperately needs to scrap previous legislation and allow private enterprise regarding electricity production. Wind, solar, hydro, anything that could possibly alleviate the crisis should be allowed to contribute. ANC must stop thinking that only they are in control. It's time that the people of SA also have a day as WE are the ones that are truly suffering and not like most of the rich and well paid ministers who couldn't be bothered about the plight of the man in the street.	Anna-Maria	retired
2022-07-07 21:41:42	Western Cape		Yes I do	Solar	Solar, wind, any and all —but less coal dependent.	Rose	retired
2022-07-07 21:36:53	Western Cape		Yes I do	Solar		Ursula	retired
2022-07-07 21:36:37	Western Cape		Yes I do	Solar		Marita	retired
2022-07-07 21:32:24	Gauteng		Yes I do	Solar	There is no other way to repair the damage done through the years to, amongst many other things, our electricity in a quick and efficient way.	Johannes	retired
2022-07-07 21:30:51	Gauteng		Yes I do	Solar	The economy is moving towards obsolescence and will die if people can't earn a living.	Andi	retired
2022-07-07 21:29:25	Gauteng		Yes I do	Solar	Red tape preventing independent energy producers should be scrapped with immediate effect to allow the private sector to supply electricity that the government is incapable of doing. No one will invest in SA if there is no power and businesses will leave South Africa resulting in further unemployment.	Brian	retired
2022-07-07 21:26:53	Western Cape		Yes I do	Solar	Municipalities should subsidise homes to install solar electricity like Eskom did with solar geysers a few years ago. Conditions may be to put excess electricity back in the grid for free.	Heinie	retired
2022-07-07 21:25:45	Western Cape		Yes I do	Solar	Short term - Solar supported by large scale batteries and gas. Long term - a mix of solar and wind with batteries plus nuclear.	Colin	retired
2022-07-07 21:24:55	Gauteng		Yes I do	Solar	Scrap destructive fossil fuels, gas, nuclear. Use sustainable sources, wind, solar.	freddie	retired
2022-07-07 21:21:33	Gauteng		Yes I do	Solar		Anni	retired
2022-07-07 21:20:54	Gauteng		Yes I do	Solar	Solar is readily available in South Africa and is environmentally friendly	Frieda	retired
2022-07-07 21:18:11	KwaZulu- Natal		Yes I do	Solar	We need to privatise the energy producers in SA taking control away from the unions and the government they are corrupt and ill equipped to serve the country. They are ruining our economy and all Chances of investment	Barry	retired
2022-07-07 21:06:51	KwaZulu- Natal		Yes I do	Solar		Sonja	retired
2022-07-07 21:05:15	North West		Yes I do	Solar	We are working with a corrupt ANC government which don't worry about the South African citizens	Louis	retired
2022-07-07 21:04:32	Western Cape		Yes I do	Solar	We the consumers and society at large cannot be held to ransom by Eskom any longer enough is enough	Kate	retired
2022-07-07 20:54:21	Western Cape		Yes I do	Solar	Solar and wind is currently operational. However, they are forced to sell to Eskom. Let them sell to all municipal areas, this will immediately have an effect. We need independence from Eskom	Rudi	retired
2022-07-07 20:52:42	KwaZulu- Natal		Yes I do	Solar	Renewable is the way to go. Solar wind or hydro from rivers or sea is preferable but also nuclear as it is cleaner	Johan	retired
2022-07-07 20:49:37	Gauteng		Yes I do	Solar		Hilda	retired
2022-07-07 20:49:25	Eastern Cape		Yes I do	Solar		John	retired
2022-07-07 20:47:36	Gauteng		Yes I do	Solar	Have independent energy suppliers engage who have a desire to work to ethical and world class standards, take pride in what they do, provide on-going power-services through any manner they deem necessary to keep the lights on. Do away with unions - strikes - employ people who are willing to work to earn a normal wage to take home to feed their families. Rid this country of "Cadre employment" milking the financial resources for their own gain - bring back private enterprise to take over where the state has failed miserably.	Sharon	retired
2022-07-07 20:45:50	Gauteng		Yes I do	Solar	Sonkrag gaan baie help met die krag onderbrekings. Want dit veroorsaak dat werk verlore gaan en besighede deure moet sluit.	Petro	retired
2022-07-07 20:45:08	Gauteng		Yes I do	Solar	Renewable is the way to go - solar, wind, hydro (from waves as well as dans) is preferable to fossil fuels or nuclear as it is cleaner	Ingrid	retired

2022-07-07 20:35:09	Western Cape		Yes I do	Solar	Any means of electricity will help at this stage, along as there is electricity. Solar doesn't really helps in winter weather in the Cape!	Liezel	retired
2022-07-07 20:34:14	Eastern Cape		Yes I do	Solar	Household a can run adequately on solar power and the cost of installation has decreased. A tax rebate would be a good idea.. Industry probably would need some enhancement of wind power to achieve the temperatures sometimes needed. There is no long term upside to nuclear power. Love generation merely leaves bigger problems for the next. Storage is still a problem is this 3rd world country off ours, but if we can get back to 1 st world,, we might benefit from the experience of the rest of the world.	Denise	retired
2022-07-07 20:27:36	Gauteng		Yes I do	Solar	Independent power suppliers	Dan	retired
2022-07-07 20:23:55	Limpopo		Yes I do	Solar		Anettr	retired
2022-07-07 20:21:30	Limpopo		Yes I do	Solar	An immeasurable amount of energy is being WASTED by solar systems operated by individuals as well as companies and others simply because they are not permitted to feed into the grid.	Jan	retired
2022-07-07 19:57:12	Western Cape		Yes I do	Solar		Debbie	retired
2022-07-07 19:30:05	KwaZulu- Natal		Yes I do	Solar	SA is sunny most of the year round. Solar could work. There is a big movement towards solar.	Gordon	retired
2022-07-07 19:26:22	Western Cape		Yes I do	Solar		Rosy	retired
2022-09-16 06:57:23	Gauteng		Yes I do	Solar		Helene	retired
2022-09-14 13:10:07	Western Cape		Yes I do	Solar	A combination of Solar, Gas, Wind, some coal, possibly, to get the country out of this infernal mess and potential disaster. Open up IPP sensibly as top priority before the country is "FINISHED"! Get outside professionals and no criminals to run Eskom to solve all kinds of problems. Retrieve stolen funds.	Margaret	retired
2022-09-07 17:02:24	Western Cape		Yes I do	Solar		Marianna	retired
2022-09-05 07:27:17	KwaZulu- Natal		Yes I do	Solar	Ons het `n paar jaar gelede solarpanele laat aanbring. Die munisipaliteit het ons meter kom vervang met `n meter wat nie kan terugdraai nie. Voorheen kon ons meter terugdraai as ons meer krag opgewek het gedurende die dag as wat ons kon gebruik. Ons sit nog elke dag krag op die "grid" wat die munisipaliteit gebruik en ons word nie daarvoor vergoed nie.	Elsabe	retired
2022-09-04 20:49:59	Western Cape		Yes I do	Solar		Maryna	retired
2022-09-04 20:49:43	Western Cape		Yes I do	Solar		Maryna	retired
2022-09-04 19:55:46	Western Cape		Yes I do	Solar	In SA we have endless options of renewable energy - but we are still stuck in the coal age because of mismanagement and corruption. It is time to end the Eskom monopoly! Wind, Solar, Hydro are great options, there is enough of everything - in every region of South Africa we have either-or/and sun, wind, waves...	Eveline	retired

2022-09-02 11:23:00	Western Cape		Yes I do	Solar	ESKOM needs to get its coal stations properly operating. It is not going got be able to supply enough electricity for the foreseeable future. Hence there needs to be a massive effort to bring on other power suppliers as soon as possible and provide some relief or incentives for small users, such as homes and small businesses, to generate their own electricity and remove some of the pressure on the system. There just seems to be a lack of strategic thinking re this matter. I realise there are also political agendas in the way an these need urgent addressing.	Kevin	retired
2022-09-01 10:49:20	Gauteng		Yes I do	Solar		Gopal	retired
2022-08-30 19:35:16	Western Cape		Yes I do	Solar	Subsidies to homeowners to encourage of the grid usage	Vic	retired

2022-08-29 07:46:07	Western Cape		Yes I do	Solar	If you allow solar do not look at it as a mechanism to generate money through extra taxes.	Bernard	retired
2022-08-28 10:06:09	Gauteng		Yes I do	Solar	We have plenty of sunshine in this country. Wind is also a solution and the two together would most likely. Eskom should be privatized.	Julia	retired

2022-08-23 17:24:56	Western Cape		Yes I do	Solar	<p>Too much money has already been siphoned off irregular coal contracts. Coal is currently one of the really costly power sources, beaten by diesel for cost.</p> <p>Allow competing power sources without red tape.</p> <p>Nuclear power is no longer a good move. The real problem is that there is no source of bribes from installing solar power. Think of the tremendous bribes undoubtedly paid by Russia to Zuma et. al. to install a Rosatom nuclear plant.</p> <p>Think of the land allocated for the buffer around the nuclear reactor. If this was instead covered with solar cells and batteries, it would generate more power than the nuclear plant, cost FAR less and be safer.</p>	Dermot	retired
2022-08-22 21:13:23	Western Cape		Yes I do	Solar	All types of renewable energy should be harnessed.	FATIMA	retired
2022-08-22 17:49:51	Gauteng		Yes I do	Solar	All types of renewable power should be pursued. Home owners should also be allowed to sell excess power generated by solar panels back to the grid, this will help reduce load shedding.	Keith	retired
2022-08-20 22:25:33	KwaZulu- Natal		Yes I do	Solar		Willem	retired
2022-08-20 18:56:28	Limpopo		Yes I do	Solar	Escom has proven that they cannot manage the current energy demands of the Country. Solar alone won't solve the problem, if most households that can afford to buy solar can sell power back to the grid that could limit/prevent load shedding in the short term. There should be no "fee" that you have to pay to escom for doing this, escom didn't pay for your solar setup. Wind turbines can also help so solve the problem.	David Johannes	retired
2022-08-19 07:30:17	Western Cape		Yes I do	Solar	This should have been done many years ago. The government has been short-sighted and the politicians have put self-interest before the country's needs.	Lionel	retired
2022-08-18 18:06:28	Western Cape		Yes I do	Solar	I would probably choose nuclear as well as solar but solar is the means by which many private producers can make electricity. I would also choose hydro....	Joanna	retired
2022-08-18 13:13:46	Gauteng		Yes I do	Solar		Calmarie	retired
2022-08-18 11:37:15	Western Cape		Yes I do	Solar	Firstly you wanted us to use solar energy, now you want to penalize households with solar panels. Make up your minds as there is no money you handle. You cannot implement anything you propose. Eskom is sucking us dry now you want your families also to suck our bones even further drier so that pockets can be filled with the sweat of the poor. You are Disgusting	Farida	retired
2022-08-18 11:37:12	Western Cape		Yes I do	Solar	Firstly you wanted us to use solar energy, now you want to penalize households with solar panels. Make up your minds as there is no money you handle. 2022-08-17 13:10:45	Gauteng		Yes I do	Solar	ANC should STOP playing CAT and MOUSE GAME and seriously address the issue at hand without further ado. there is no more time left to be going to and fro. GET INTO ACTION IMMEDIATELY.	Rangit	retired
2022-08-17 12:11:03	Gauteng		Yes I do	Solar	Not only solar but wind power generation will be able to curtail the constant power outages and load shedding. The red tape must be cut to a minimum. Coal and all the criminality around supplies thereof must be stopped. The labour can be shifted to the alternate power generation systems.		retired
2022-08-16 09:42:02	Gauteng		Yes I do	Solar	Solar solutions are one of the quickest to implement and can produce electricity in a very short time. They should seriously consider subsidising the installation of solar solutions for domestic home use in the same way as the incentivised and subsidised the installation and use of solar geysers. In addition to this private and domestic energy producers and should be allowed to feed into the grid in an attempt to curtail to continual load shedding that is having a devastating effect on our economy.		
2022-08-16 09:42:02	Gauteng		Yes I do	Solar	Legislation will have to be developed and implemented to facilitate feeding electricity back into the grid. The entire Nersa application process needs to be scrapped. It only serves as a bureaucratic bottle neck. Legislation application process should be developed to compel Eskom to allow private producers connection to the grid under specific conditions with clearly defined guidelines.	Colin	retired
