Proposed policy direction to ICASA on B-BBEE (Starlink entry)

21 May — 2 July 2025 (30 working days)

Public participation – report with all public comments

https://dearsouthafrica.co.za/starlink/

DearSouthAfrica.co.za is an online platform designed to facilitate government and encourage the public to participate in unbiased decision-making processes or policy formation at SOE, municipal, provincial and national levels.

TO:	The Department of Communications and Digital Technologies (DCDT) / Independent Communications Authority of South Africa (ICASA)
FROM:	DearSouthAfrica.co.za
DATE:	July 2025
SUBJECT:	REPORT ON PUBLIC PARTICIPATION: POLICY DIRECTION ON B-BBEE (STARLINK ENTRY)

1. Executive Summary

This report details the outcome of a public participation campaign facilitated by DearSouthAfrica.co.za regarding the proposed Policy Direction to the Independent Communications Authority of South Africa on Broad-Based Black Economic Empowerment. The draft policy seeks to align the Electronic Communications Act regulations with the B-BBEE ICT Sector Code, effectively allowing international operators (such as Starlink) to utilize "Equity Equivalence" schemes rather than enforcing a rigid 30% direct ownership quota by Historically Disadvantaged Groups (HDG).

The public response indicates an urgent and overwhelming demand for high-speed, reliable satellite internet, particularly in rural and under-served areas. The consensus is that the current 30% ownership requirement is an obsolete barrier to entry that is hindering economic growth, educational access, and disaster management. The public strongly supports the proposed policy direction as a means to clear the regulatory path for Starlink.

2. Participation Statistics

2.1 Volume of Participation

The campaign generated a substantial volume of engagement, reflecting the high level of public frustration regarding South Africa's "digital divide" compared to neighbouring countries where Starlink is already operational.

- Total Submissions Analysed: ~32,500
- Unique Comments: 25,000+

2.2 Sentiment Breakdown

- Support for Policy Direction (Yes): 77% (25,049)
- Do Not Support (No): 21% (6,822)
- Support "Not Fully": 2% (625)

Note on Sentiment: The “No” vote is nuanced. A significant qualitative analysis of the “No” comments reveals that many participants rejected the Policy Direction not because they oppose Starlink, but because they oppose the B-BBEE framework entirely. These participants argued for a complete scrapping of ownership requirements rather than an “equivalence” compromise.

2.3 Demographic Profile

- **Rural Residents & Farmers:** The most vocal demographic, citing the failure of terrestrial networks (cable theft/tower vandalism).
- **Tech & Remote Workers:** Professionals hindered by unstable local connections and load shedding.
- **Unemployed/Students:** Viewing internet access as a fundamental human right necessary for job seeking and education.

2.4 Employment Status Sentiment Analysis

An analysis of the employment status provided by participants reveals a distinct correlation between economic activity and support for the Policy Direction.

Employment Status	Support (Yes)	Do Not Support (No)	Conditional (Not Fully)
Business Owner	81.5%	16.4%	2.1%
Self-Employed	81.3%	16.7%	2.0%
Employed Individual	66.0%	31.8%	2.1%
Unemployed Ind	56.3%	41.7%	2.0%
Student	22.6%	74.9%	2.5%

Analysis:

Economic Drivers: Business owners and self-employed individuals—those most reliant on connectivity for income generation—show the highest level of pragmatism and support (>81%). Their priority is immediate access to the tool (Starlink) to bypass infrastructure failures.

Youth/Students: This group showed the highest “No” vote (75%). Qualitative review suggests this is driven by a strong ideological rejection of B-BBEE restrictions in any form (demanding “open access” without race-based policy) rather than opposition to Starlink itself.

Workforce: Employed and unemployed individuals show moderate-to-high support, balancing the need for connectivity with concerns over policy implementation.

3. Summary of Public Comments

The qualitative data reveals a public that views internet connectivity as a utility as vital as water or electricity.

3.1 The “Digital Apartheid” Concern

Participants expressed anger that South Africa, the most industrialized nation on the continent, is “lagging behind” neighbors like Zambia, Eswatini, and Mozambique due to regulatory red tape.

Comment: “Why must we suffer with poor connection while our neighbors advance? This policy is holding the country back.”

3.2 Connectivity vs. Ownership

The dominant theme is that the service provided (internet access) is more important to the empowerment of black South Africans than the ownership structure of the provider.

Comment: “The greatest empowerment you can give a rural child is access to the world’s information. Blocking Starlink to find a 30% partner hurts the very people BEE claims to help.”

3.3 Infrastructure Resilience

With the ongoing challenges of load shedding and infrastructure theft, satellite internet is viewed as a necessary redundancy.

Comment: “When the power goes out, the towers go down. Starlink is the only way to keep businesses running during stage 6.”

4. Proposed Solutions and Alternatives

Participants offered clear directives to the Department:

1. **Adopt Equity Equivalence Immediately:** The public strongly endorses the move to the ICT Sector Code, which allows global companies to contribute via skills development and enterprise support instead of selling equity.
2. **Fast-Track Licensing:** Given the delays already incurred, participants requested an expedited licensing process once the policy is gazetted.
3. **Universal Service Obligations:** Rather than ownership quotas, suggest that Starlink be required to provide subsidized connections to rural schools and clinics as part of their license conditions (a “social dividend” model).

5. Media and Civil Society Alignment

5.1 Consistency of Sentiment

The public sentiment collected by DearSouthAfrica.co.za aligns with the narrative in the technology and business press (e.g., MyBroadband, TechCentral).

- **Tech Sector:** Industry analysts have long argued that the 30% HDG rule is a deterrent to foreign direct investment (FDI). The public comments echo this economic argument.
- **Political & Civil Society:** Civil society groups have campaigned for the removal of this blockage. The "grassroots" comments in this report confirm that this is not just a political stance but a lived reality for rural South Africans who feel excluded from the digital economy.

5.2 Conclusion on Alignment

There is a consensus among the public, the tech industry, and opposition parties: The regulatory framework has failed to keep pace with technology, and the "protectionist" approach to ownership is effectively denying South Africans access to modern communication tools.

6. Conclusion

The public mandate is clear: Approve the Policy Direction and allow Starlink to operate.

The citizens of South Africa—led by the small business sector—view the 30% ownership requirement as a "self-imposed sanction" that deprives millions of essential connectivity. The Department is urged to finalize the alignment with the ICT Sector Code immediately to facilitate the entry of global satellite providers, prioritizing broad-based digital access over narrow ownership compliance.

ends.

	2025-11-24 13:28:07	No I do not	Broad-Based Black Economic Empowerment Framework	BEE has not worked. There is some debate as to what the actual number of people are that have benefited. Some claim that since 1994, 1 Trillion Rand has gone to approx 100 politically connected individuals. (https://dailyinvestor.com/south-africa/89445/r1-trillion-moved-between-100-politically-connected-individuals-through-bee/). Other claim that at least 800 000 people have benefited (research by the firm Tusca). Regardless its a small portion of the population. It is not broad based and it is not a benefit. The way that this is undertaken leads to corruption, and typically increases the costs of goods supplied to the government. Which means that the citizens get less goods for their tax money. BEE should be phased out entirely and replaced with a merit system where all citizens are treated equally. That is what a free and fair country actually looks like. Racist legislation such as what South Africa has now is not helping the country. Just like it did not help South Africa prior to 1994, it does not help us post 1994. Race based legislation should all be removed. In full.	Sascha	Gauteng		self-employed

	2025-08-14 08:28:12	No I do not	Broad-Based Black Economic Empowerment Framework	This government can't manipulate laws to suit their agendas. Either BBBEE must go, or be implemented, for better or for worse. The international implications of BBBEE MUST be felt by outrageous and discriminating laws implemented due to ideologies which are no longer relevant to this country. The economy has halted to zero growth and unless the government is forced to review policies and laws, the pressure from the international community is going to become much worse for this country, this is merely the beginning. Eradicate BBBEE from our society, it has no more relevance and serves no purpose other than help the fat cats.	Laurence	Western Cape		employed individual
	2025-07-28 13:11:24	No I do not	Broad-Based Black Economic Empowerment Framework	This bill is a step to an attempt to level the fields between whites and historically disadvantaged people. if scrapped, then let all pre 1990 family wealth of white people be returned to the state and every race work for what they have as do black people of this country. 	2025-07-25 08:30:48	No I do not	Broad-Based Black Economic Empowerment Framework	BBEEE is a curse and a cancer in South Africa. It is presented as a means of righting wrongs and making things "more equal" for indigenous South Africans, but it discriminates actively against all who are not Bantu-speaking citizens, as well as against the majority of Bantu speakers, because it is used almost exclusively to benefit a politically connected elite, regardless of their fitness for any appointment that might be made. It favours those who have the "right" ideology – communist and black racist – and results in places being filled by people with little or no understanding of the jobs they are supposed to do. Competent individuals are passed over, and in many cases appointments are not made because officials do not want to hire white, Coloured or Indian applicants. It hinders business from operating in a productive manner, because employers are obliged to take in as shareholders people with no experience of running a business, and to hire employees entirely on the basis of their race. This is particularly galling in the Western Cape, the western arts of the Eastern Cape and most of the Northern Cape, where Coloured people form the majority, but are excluded from employment. This is particularly noticeable in areas where most or all officials employed under apartheid were white, but have now been replaced entirely by black individuals who, in most cases, do not even speak the language of the majority of people living in a given district.	Mike	Eastern Cape		retired
	2025-07-25 05:03:36	No I do not	Broad-Based Black Economic Empowerment Framework	Black people have been disadvantaged to many years over 100 years the same years we were put in a dark corner should be the same number of years that BBBEE should be place to empower the Black people as much as it sounds unfair now it was also unfair then. An eye for an eye.	Zelda	Gauteng		employed individual
	2025-07-24 19:31:18	No I do not	Broad-Based Black Economic Empowerment Framework	Our BBBEE policy exists for a reason and not to accommodate specific individuals when it suits them. It is to redress inequality and ensure that those who were previously disadvantaged now have the opportunity and not to make billionaires richer at the expense of inequality in South Africa. 	2025-07-20 09:13:08	No I do not	Broad-Based Black Economic Empowerment Framework	1. Foreign Investment Already Drives Transformation International companies contribute to job creation, skills development, and ESG compliance without needing BBBEE mandates. Sectors like tourism, hospitality, and green energy are thriving due to foreign capital—not BBBEE incentives. Countries like Kenya have scrapped similar ownership laws to become more attractive digital investment hubs. 2. BBBEE as a Barrier to Growth The 30% ownership requirement for licensing (e.g. Starlink) has deterred major tech players from entering South Africa. EU investors cite BBBEE as costly, complex, and ambiguous, with frequent rule changes and unclear compliance pathways. The Equity Equivalent Programmes and Youth Employment Service initiatives have failed to gain traction due to administrative burdens. 3. Corruption and Fronting Practices BBBEE has been linked to fronting, where companies manipulate ownership structures to appear compliant. The Zondo Commission and other reports reveal how BBBEE has been exploited for tender fraud, nepotism, and elite enrichment. Instead of broad-based empowerment, critics argue it has become ANC Economic Empowerment, benefiting a politically connected few. 4. Global Competitiveness at Risk South Africa's FDI per capita is among the lowest globally—just R680 per person in 2024. Investors now prioritize transparency, policy clarity, and strategic alignment over compliance checklists. BBBEE's rigid framework may be pushing capital toward more agile economies like Vietnam, Indonesia, and Rwanda. Suggested Alternatives Replace BBBEE with an Opportunity Fund or impact-based tax incentive that rewards companies for measurable contributions to education, infrastructure, and entrepreneurship. Shift focus from race-based criteria to poverty alleviation, skills development, and regional inclusion. Strengthen anti-corruption enforcement and simplify procurement processes to restore investor confidence.	Teressa	Gauteng		employed individual

	2025-07-18 18:10:09	No I do not	Broad-Based Black Economic Empowerment Framework	The fact that history of the last 31 years points to rampant corruption, benefitting a few connected individuals and possibly, misrule from the ANC does not imply the imbalances of the past have been dispensed with. It is true to say, conditions change and our legislation must talk to updated conditions. However, if the ANC has failed to uplift the marginalized and many Africans, what chances are there that a policy seeking people to compete on an "equal basis" when the other is still in shackles and/or has just had their shackles removed? We all know that the conditions of poor Africans has deteriorated under the ANC rule. For example, the quality of education has worsened, our pupils' numeracy has regressed, reading ability worsened, etc. We all know that children from rural areas, townships and squatter camps have the odds stacked against them. So, this child will be expected to compete like there is no background? So, how will we ensure fairness to the African child? Another conundrum is, if for example, Starlink was allowed to operate, what will happen to data ownership issues and security risks? You cannot have a company registered and compliant with other country's laws controlling your skies and security just because it has financial muscle to invest in the orbit. While the push for Starlink seems noble, and our economy is desparate for FDI, a blind repealing of laws that we should be supporting to redress the imbalances of the past, would lead to even more catastrophe. Having said that, I do not mean to say, other races in South Africa, have not had their conditions worsened. In effect, all races are now faced with worsened economic conditions. So, the question should be, how do we justly include those poor other races while prioritizing an African child? Anything untoward is simply sinister and inadvertently aimed at social instability if not now, soon into the fabricated future. And please no need for the National Dialogue. SA challenges known. 	2025-07-15 09:30:25	No I do not	Broad-Based Black Economic Empowerment Framework	This framework exists to address and redress real inequalities that have been reinforced over centuries through colonialism and Apartheid. The opposite of BBBEE is unequivocally white economic empowerment, which is unfair. This proposed amendment opposes the purposefully structured mandate of the framework to favour Starlink and is therefore a very clear regression back into favouring the white minority monopolity that we need to restitution for. It is an injustice to our democracy.	Boitumelo	Gauteng		student

	2025-07-15 09:06:16	No I do not	Broad-Based Black Economic Empowerment Framework	My main concern is that the BBBEE framework itself is counterproductive and limits merit-based opportunities, which harms growth and fairness for all South Africans and our Future as a Country. No, I do not support the proposed policy direction to amend or expand B-BBEE requirements. I believe that the current B-BBEE framework is counterproductive, creates barriers to merit-based opportunities, and negatively impacts economic growth and competitiveness. In my view, empowerment should focus on creating equal opportunities for all South Africans through skills development, education, job creation, and fair access to markets, rather than enforcing race-based quotas or compliance burdens. I encourage policies that foster genuine economic inclusion without undermining merit, sustainability, or investment confidence in the sector.	Elizabeth	Mpumalanga		employed individual

	2025-07-10 11:26:06	No I do not	Broad-Based Black Economic Empowerment Framework	Removing BEE policies could be a step toward fostering a truly merit-based economy in South Africa. While the original intent of BEE was to address historical injustices, it has unintentionally created new forms of inequality and inefficiency. BEE has: 1. Encouraged cronyism and corruption by rewarding political connections over competence. 2. Discouraged foreign investment due to complex compliance requirements. 3. Meritocracy is undermined—how can a business or government operate successfully when it's led by individuals who lack the qualifications and skills necessary to ensure its success. I believe in advancing alternative approaches that prioritize quality education, entrepreneurship, and equal access to opportunity for all South Africans—regardless of race. Our goal should be to build a society where individuals are empowered based on their potential, dedication, and performance, not their identity. By doing so, we foster a thriving nation rooted in fairness, innovation, and shared prosperity.	Danie	Western Cape		employed individual

	2025-07-10 10:43:55	No I do not	Broad-Based Black Economic Empowerment Framework	I'm concerned about changing the rules of redress for a black population that still has not gotten half the economic benefits prescribed to it from the fact that they are a majority of the populas as well as from the words "we the people" envisioned within the bill Of rights. The BBEEE framework is an important policy for redress and although strides have been made using the framework, not enough has been done to eradicate the living conditions and access to resources of the everyday South African. Internet has become a very important resource within the past decade in this country, allowing for an integration to an international tech revolution however Starlink seems to want to dictate its own rules to make this possible. As a soveriegn nation it cannot be that we are willing to change position to accommodate a company which does not want to participate in reform of the black majority but wants to reap from this population. A company which is run as a proxy company for US interests as they can shutdown internet services in countries in which they have established a base, for the sole reason that that country does not agree with the US. How can we trust such a company which does not want to operate within the given framework of 30% black shareholding to want to give jobs to the people of this country in accordance with employment equity act, to follow our labour laws , to follow the rule of law like all persons (also referring to company as a person as per the companies act of 2008) living in this country.	Thabang	Gauteng		unemployed individual
	2025-07-10 10:42:06	No I do not	Broad-Based Black Economic Empowerment Framework	A country cannot change laws to suit a certain individual. Laws must be respected by everyone.	Lehole	Limpopo		self-employed

	2025-07-10 09:21:28	No I do not	Broad-Based Black Economic Empowerment Framework	What is Fair for 1 must be fair for all. (Democracy) Why can amendments be made that will once again enrich a few at the cost of others. Why must my company be forced to implement BBBEE and the employment equity bill if other companies are exempt. Elon stick to your guns no BBBEE for star link. If we change the policy, it must be for all of us not just for the few rich	Roger-John	Gauteng		business owner
	2025-07-10 09:13:49	No I do not	Broad-Based Black Economic Empowerment Framework	Use the right tool for the job.. but in SA we are forced to use the wrong tool for the job.. and the outcome can only be seen in Denel, Post Office, Eskom, Prasa, SAA, SABC,PETROSA etc the job can only be as good as the tool.. a incompetent engineer can only design an incompetent product.. when wil the decision makers acknownledge it..	Gerrie	Gauteng		retired
	2025-07-10 09:07:10	No I do not	Broad-Based Black Economic Empowerment Framework	I find that our country has still so far to go when it comes to BEE ownership. Our previously disadvantage people are still living in poverty and a lot of the companies us them as fronts. So yes, we should keep it as it forces companies to employ people of colour in positions that they would not have had based on their education background.	Natasha	Western Cape		employed individual
	2025-07-10 09:01:24	No I do not	Broad-Based Black Economic Empowerment Framework	It should be scrapped as it impinges on the entrepreneurs ability to generate business and create jobs	David	KwaZulu -Natal		self-employed
	2025-07-10 08:52:48	No I do not	Broad-Based Black Economic Empowerment Framework	The draft policy direction that could allow Starlink to bypass South Africa's transformation obligations sets a dangerous precedent. These requirements, including the 30% ownership by historically disadvantaged South Africans (HDSAs), are vital tools for redressing deep-rooted economic inequalities caused by apartheid. Exempting a global giant like Starlink undermines the country's transformation agenda and weakens the legal framework intended to ensure inclusive economic participation in strategic sectors like telecommunications.	Katlego	Gauteng		employed individual
	2025-07-10 08:39:23	No I do not	Broad-Based Black Economic Empowerment Framework	Historic BEE proceeds to the few beneficiaries need to be clawed back (refunded) and used where it is most needed and intended. To create new economic opportunities, and uplift the needy. CLAW BACK misdirected BEE funding.	Gavin			unemployed individual
	2025-07-10 08:28:36	No I do not	Broad-Based Black Economic Empowerment Framework	BBBEE is counter productive to economic growth, it's an impediment to job creation and resulting in more emigration - losing highly qualified and enthusiastic professionals to other countries	Jess	Western Cape		self-employed
	2025-07-10 08:13:05	No I do not	Broad-Based Black Economic Empowerment Framework	We can't do away with BEE. We may as well remove the constitution as well. BEE is necessary to address historical wrongs. To do away with it for one man makes zero sense!! It's a spit in the face for all South Africans who want to see this country grow in a fair and just manner.	Batandwa

	2025-07-09 16:26:18	No I do not	Broad-Based Black Economic Empowerment Framework	BBBEE policies were implemented and set in place to include previously disenfranchised communities. Ammending a progressive policy simply to allow a foreign entity to operate in the land is a disservice to the country. Furthermore, the proposed ammendments mean that doing away with the low 30% black ownership requirement redirects economic power and benefits to the racial minority, whilst leaving the racial majority out of the economy. This does not speak towards economic, racial and social equality and will firther widen the gap between classes.	Koketso	North West		unemployed individual

				BBBEE is a critical tool for addressing the structural inequalities rooted in apartheid. It is not about handouts or reverse discrimination—it is about leveling a playing field that has been deliberately skewed for centuries. The policy aims to empower Black South Africans through ownership, management representation, skills development, and enterprise opportunities. For someone like me, BBBEE represents hope that my children will inherit a South Africa where they can thrive without the burdens of systemic exclusion. Without BBBEE, the economic dominance of a small, historically privileged group would continue unchallenged. The policy ensures that Black South Africans, including women, have a stake in the economy through: Ownership and Wealth Creation: Encouraging Black ownership of businesses and assets helps redistribute wealth and break the cycle of poverty. Skills Development: Investments in training and education empower Black individuals to compete in high-skill industries. Job Creation: By supporting Black-owned enterprises, BBBEE fosters entrepreneurship and creates jobs in communities that need them most. Corporate Transformation: Mandating diversity in management and procurement ensures that Black women have a voice in decision-making spaces. Abandoning BBBEE would entrench the status quo, leaving millions of Black South Africans, particularly women, on the margins of the economy. It is not perfect, but it is a necessary framework for justice and equity.

	2025-07-09 11:01:40	No I do not	Broad-Based Black Economic Empowerment Framework	My thoughts on the current legal framework and its implications for previously disadvantaged black South Africans. It is crucial that any changes to our laws prioritize the upliftment of these communities. It raises significant concerns when it appears that our government may extend special rights to super wealthy foreign individuals or companies. This not only undermines the progress we seek to achieve but also sends a troubling message about our priorities as a nation. Our focus should remain on empowering black South Africans rather than accommodating foreign interests.	Malusi	Gauteng		employed individual
	2025-07-09 11:00:07	No I do not	Broad-Based Black Economic Empowerment Framework	South Africa’s development and remains skewed and staggered to this day due to the ramifications of separate development policies, implemented during the apartheid era. The BEE framework has ensured that human capital development within underserved communities occurs in a manner that does not continue to protect those who previously benefited from their exploits. We are yet to see this framework reach its full potential, and allowing Starlink to operate by amending such frameworks will only exacerbate South Africa’s economic climate, as if the fabric thereof is not spread thin as it is. 	2025-07-09 09:42:02	No I do not	Broad-Based Black Economic Empowerment Framework	B-BBEE hampers investment from investors as the framework doesn't make it easy to invest in the country. This in turn limits the creation of new job opportunities in South Africa. For this reason I do not support the proposed framework.	JP	Gauteng		employed individual
	2025-07-09 09:40:32	No I do not	Broad-Based Black Economic Empowerment Framework	I disagree on the changes of policy to accommodate a foreign company. If Starlink is to be approved, they should follow our policies like all other foreign companies.	Mxolisi	Gauteng		employed individual

	2025-07-09 09:39:20	No I do not	Broad-Based Black Economic Empowerment Framework	While I strongly support the advancement of technology and improved connectivity. I do not support the proposed removal of BBBEE ownership requirements as a blanket trade-off for enabling one foreign company's operations. Here are key reasons for my stance: 1. Undermining Economic Redress and Constitutional Mandates.South Africa's Broad-Based Black Economic Empowerment (BBBEE) framework exists to correct the structural inequalities created by apartheid. The ECNS and ECS licensing requirements—such as the 30% ownership by historically disadvantaged individuals—are not arbitrary. They reflect a constitutional commitment to transformation, equity, and economic inclusion. Removing these obligations to accommodate a single entity—however prominent—sets a dangerous precedent of bending transformative legislation for foreign commercial interests.2. Risk of Precedent: Weakening BBBEE Across Sectors.The argument that this could lead to the removal of BBBEE requirements in other sectors is deeply concerning. This policy change would not be an isolated decision—it could trigger a domino effect that erodes South Africa's hard-won policies for inclusive economic participation. This is not simply about Starlink, but about the future integrity of transformation policies across industries.3. Alternatives Exist Without Sacrificing Transformation.South Africa welcomes foreign investment—but not at the cost of national developmental goals. Many international companies operate successfully within the existing regulatory framework, often by partnering with local businesses or creating innovative ownership models that meet transformation goals while delivering.4.Transformation and Access Should Not Be Pitted Against Each Other.The notion that South Africans must choose between fast internet and economic justice is a false dichotomy. South Africa should not be bullied directly or indirectly into sacrificing its transformation goals to appease global corporations.	Xoli	KwaZulu-Natal		unemployed individual

	2025-07-09 08:40:18	No I do not	Broad-Based Black Economic Empowerment Framework	From my experience and overall, we know BBBEE has not and will never work. It does destroy the country and business. It only benefits the top 100 ANC members, their families and friends. We have the best country in the world; this framework has only one mission and it is destruction. We do have the most amazing people and great businesses. If we want the country to grow and be competitive, we need to develop our people, create production, master mind the development of infrastructure. Develop an inclusive economy, involve all businesses and do one simple thing, use all the money that are used for BBBEE and setup each company to develop infrastructure and businesses in the communities where business operate. Setup business forums in towns and cities, confirm the critical elements to create economy in the area, town and cities. Included the municipal managers and create small groups of highly skilled professionals and manage all the small groups into a master plan. this should be done and reported on local and the provincial and then national. One massive economic development plan. No political interference. This is business and benefit the people.	Piet	Gauteng		employed individual

	2025-07-09 02:47:58	No I do not	Broad-Based Black Economic Empowerment Framework	I do not support the proposed policy direction to remove BBBEE requirements. While I understand the need for better internet access, especially in rural areas, I believe we should not have to choose between development and transformation. BBBEE exists for a reason , to make sure that Black South Africans are not just included as users, but empowered as owners and decision-makers in our economy. Allowing big foreign companies like Starlink to bypass these requirements would set a dangerous precedent. It tells local businesses and citizens that our laws can be bent for outsiders, while we continue to fight for fair opportunities in our own country. South Africa still carries the deep scars of inequality, and we can't afford to water down the few policies we have that aim to correct that. Let’s find solutions that bring in technology without selling out our people. Starlink and others should be welcome, but on terms that still prioritize South African ownership and empowerment. I say No not because I don’t want progress, but because I want progress that includes everyone.	Koketso	Mpumalanga		student
	2025-07-09 02:43:33	No I do not	Broad-Based Black Economic Empowerment Framework	I'll be direct withmy concern Elon will own South Africaand there will be nothing the Government can do about that. He is just a power hungry individual that should be shown that we are not going to dance to his tune. We already have companies that are serving what he wants to bring here, we DO NOT NEED HIM AND HIS COMPANY THE SAME WAY HE SAID HE DOESN'T NEED SOUTH AFRICANS! Minister, please do not be the typical minister nawe! Stand firm and show your power that you not afraid of such people. He will use his company to take over South Africa, and he is crazy to want things to go his way. YOU CAN'T CHANGE POLICIES FOR ONE PERSON TO BENEFIT! THAT'S JUST BS! DO NOT CHANGE ANYTHING, ELON CAN GO FUCK HIMSELF FOR WHAT WE CARE! THAT RACIST RETARD! Forgive my language but it angers us as South Africans this thing cause we clearly see that he doesn't care, about anything, as long as he benefit, we won't benefit from that Starlink! We won't benefit! SO DON'T REMOVE NOR CHANGE ANYTHING! OUR COUNTRY IS SHOWING POWER AND WILL REMAIN ONE OF THE TOP COUNTRIES TO SHO USA THE DOOR THE SAME WAY THEY DID TO US!. Minister we lost jobs cause of AMERICANS! THEY DIDN'T THINK TWICE WITH STOPPING "FUNDING" IN THAT USAID SAGA! THEY KNOW WHST THEY WERE DOING! MUSK WAS PART OF IT, DON'T YOU SEE IT?! PLEASE LET IT SINK IN, HE WILL USE SOUTH AFRICA TO HIS BENEFIT! RATHER ASK THE CHINESE IR RUSSIAN AS OYR ALLIES TO BRING IN THEIR OWN SIMILAR COMPANY IN THE COUNTRY, THEY WILL ABIDE WITH THE POLICY OF OUR COUNTRY! PLEASE MINISTER, I'M BEGGING DO NOT LET THIS PERSON WIN!	Katleho	Gauteng		self-employed
	2025-07-09 02:39:51	No I do not	Broad-Based Black Economic Empowerment Framework	This policy framework was set up as a direct response to the inequalities that were created and maintained by the oppressive colonial and apartheid systems - which for hundreds of years set back Black South Africans (Women and Africans in particular) politically, socially, economically and otherwise. To temper with, and create an exceptional environment for a man who has openly supported race-based policies and practices in other states is a huge blow to the values, spirit and purport of this framework. The South African government has allowed itself to be bullied by one white man, and that alone is compromise of our rule of law and inadvertently our sovereignty. If it happens once, it can happen again. This will set a bitter precedent.	Nontobeko	KwaZulu-Natal

	2025-07-08 22:05:05	No I do not	Broad-Based Black Economic Empowerment Framework	BBBEE has only benefitted the elite. It has not been beneficial to the vast majority of "previous disadvantaged black" people. This policy has greatly reduced employment and investment in the country. Senior black management in BBBEE companies are seldom qualified for the position held and political allegiance is mostly counter-productive to business ethics. The main point is that our economy has diminished - the business arena has shrunk due to BBBEE, no job creation & has tripled the unemployment pandemic - unemployment is running at around 40% (we don't know the true figure) but from the streets & parks it is the worst it's ever been & especially harmed the previously disadvantaged there are no jobs to be had even for those who desperately want to work - people are starving, jobless homeless.... people are investing offshore & NO investment coming in due to both the BBBEE as well as the iniquitous Land expropriation Act - a recipe for disaster going forward - dangerous in execution - caused total disinvestment in SA another nail in the coffin for SA's ailing economy!!! 	2025-07-08 21:47:29	No I do not	Broad-Based Black Economic Empowerment Framework	Firstly I want to state without a shadow of a doubt that I am staunch supporter or proponent of BBBEE in its original form, especially its emphasis in the ownership of the means of production. Therefore, I reject equity-equivalent models as a substitute for direct black ownership because they tend to dilute the purpose black transformation. So real transformation requires ownership not just receiving development benefits from the selected few who still hold power. It is trite knowlege that SA is the most unequal society in the globe so amending BBBEE simply defeats the purpose and will deeply entrench the status quo instead of challenging it. We cannot afford to take a direction that seeks to weaken the tools that are meant to dismantle the inequality that exist in our society instead we must strengthen and enforce transformation for the many and not for just the elite!!!!	Mxolisi	Mpumalanga		Non-profit
	2025-07-08 21:45:27	No I do not	Broad-Based Black Economic Empowerment Framework	Black people have been historically disadvantaged in this country and continue to be disadvantaged. Companies that come to South Africa must work and benefit the people of South Africa economically. Once we open the door for organisation's to operate here without BEE requirements, then everyone will look for utilize thr loophole. Put South Africans first	Mpho	Gauteng		employed individual

	2025-07-08 20:00:59	No I do not	Broad-Based Black Economic Empowerment Framework	There might be concerns about how BEE has been implemented and the concerns are genuine. However the intentions behind BEE policy are noble and we should find ways to ensure it is implemented properly. Starlink should not be given a special simply because of political pressure. The USA and Elon Musk should not be allowed to infringe on a sovereign country's ability to dictate its own policy gor the benefit of its citizens where the majority are currently not able to participate in the country's economy. Why Starlink? Surely there are other companies across the globe that can provide the same technology why should we feel beholden to Elon Musk who does not even consider himself as a citizen of the country and holds no loyalty to it. Then his companies must comply like any othe company that wishes to do business in this country. BEE is not only about shareholding it should include management and control.	Eugenia	Gauteng		business owner
	2025-07-08 19:59:48	No I do not	Broad-Based Black Economic Empowerment Framework	It is important to not bend our rules to favour billionaires while disregarding the previously disadvantaged. BBBEE is there to address the issues of inequality, and Elon Musk has grossly misinterpreted it and publicly mocked it. This is not an individual who’s business interests should be given any grace in Soutn Africa.	Lucas	Limpopo		employed individual

	2025-07-08 15:11:47	No I do not	Broad-Based Black Economic Empowerment Framework	I do not support the proposed policy direction that seeks to remove BBBEE requirements to accommodate Elon Musk's Starlink in South Africa. This is not just a matter of internet access—it's about economic justice, national sovereignty, and the long-term integrity of our democracy. BBBEE was never meant to be a "nice-to-have" or an obstacle to progress. It was introduced because for generations, black South Africans were deliberately excluded from meaningful participation in the economy. Entire communities were systematically denied land, capital, education, and access to high-value industries like telecommunications. BBBEE is a response to that injustice—a tool to ensure that the ownership, control, and benefits of our economy are broadly and fairly shared, not concentrated in the hands of a few. Removing these requirements to please a foreign company—especially one as politically powerful and controversial as Elon Musk's Starlink, sets a dangerous precedent. It says that our laws can be suspended when they become inconvenient to the rich and powerful. Worse still, Starlink presents a real national security risk. In Ukraine, Elon Musk demonstrated just how much unilateral power he wields by switching off Starlink access during a critical moment in the war, citing his personal concerns. That decision wasn't made by the Ukrainian government or any democratic institution—it was made by **one man** sitting in another country. If we open our skies to Starlink without strict conditions without local ownership, regulation, or empowerment we are essentially handing over part of our digital infrastructure to a foreign actor who has zero obligation to act in South Africa's interests. What happens if our government takes a position Elon doesn't like? What happens in a crisis when we depend on Starlink for communication or coordination—and it gets shut off? South Africa deserves better than this false choice between progress and justice.	Modise			employed individual
	2025-07-08 15:10:49	No I do not	Broad-Based Black Economic Empowerment Framework	It won't be fair to South Africans who is already disadvantaged with foreign nationals taking our jobs under tye disguise of naturalization.	Nicolene	Gauteng		unemployed individual
	2025-07-08 15:10:34	No I do not	Broad-Based Black Economic Empowerment Framework	The BBBEE Policy is yet to achieve its intended purpose. 	2025-07-08 13:21:11	No I do not	Broad-Based Black Economic Empowerment Framework	South Africa has a very vast and very intense history of institutionalized racisms and due to that history, many black South Africans find themselves still impacted by those actions that oppressed and suppressed black South Africans. In an effort to balance the effects of inequality, the South African Government then drafted and implemented the BBBEE policy which intends to bridge the gap of inequality and give black people the opportunity to be part of the economy. Amending the policy to fit one person's business interest is selfish and takes us backwards all the progress we have made. If a business wants to operate in our borders they should then conform and abide by our laws and policies. No exceptions. No favour.	Fortune	Gauteng		employed individual

	2025-07-08 11:34:24	No I do not	Broad-Based Black Economic Empowerment Framework	Starlink's presence in South Africa is a disaster waiting to happen, and it's absolutely infuriating how little attention is being paid to the litany of risks it brings. It's outrageous that with Starlink in the picture, South Africa's data could be routed through and stored in foreign servers. Control over our own information should not be in the hands of another country, particularly one with such substantial U.S. military ties. This is not just a potential risk; it's a blatant compromise of our national security and independence. The cybersecurity vulnerabilities that come with Starlink are not something to be taken lightly. Satellites are not impenetrable fortresses; they bring with them a whole new level of potential hacking threats that can jeopardise not only personal data but also critical national infrastructure. Unauthorised use of such technology is yet another nail in the coffin, allowing a platform where South Africa's communication framework can be manipulated by external entities without oversight. And let's not forget the damning issue of foreign dependency. Relying on a foreign country's satellite system for our internet needs is nothing short of strategic idiocy. The moment there's a political conflict or merely a whim from Starlink's U.S.-based, military-linked headquarters, we can be cut off, left stranded without vital communication capabilities. How can this be considered even remotely acceptable? It's an affront to our nation's autonomy and security. It has soany risks that cannot and should not be tolerated.	Laaiqah	Western Cape		unemployed individual

	2025-07-08 09:24:01	No I do not	Broad-Based Black Economic Empowerment Framework	Broad-Based Black Economic Empowerment (BEE), while originally intended to address the injustices of the past, has not succeeded in building an inclusive and prosperous South Africa for all. Instead of uplifting the majority, it has often resulted in division, resentment, and discrimination—particularly against minority groups. These frustrations are sometimes unfairly labeled as hate, while the real root issues remain unaddressed. The current government, led by the ANC, must take a hard look at itself. Rather than blaming the past for ongoing failures, it's time to acknowledge that corruption, mismanagement, and self-serving agendas have severely undermined growth and public trust. Resources meant to uplift the country have too often been diverted to enrich a few. The ANC must start asking: What can we do to serve all South Africans, regardless of race or background? Only through policies that foster unity, economic growth, and investment can we create sustainable jobs, improve infrastructure, and build quality housing and education for all. Furthermore, the continued reliance on foreign labour, when so many South Africans are unemployed and eager to work, makes little sense. If we invest in skills development locally, our people will be empowered, and our schools and communities will flourish. It is also crucial that the government addresses hate crimes honestly and impartially, ensuring justice for all communities. South Africa cannot move forward while some are favored at the expense of others. True equality means everyone should have the same opportunities—without discrimination. To that end, BEE in its current form must be dismantled. It has become a tool for political control and division, not transformation. A new approach is needed—one that uplifts based on need and merit, not race. If the ANC continues to fail in delivering on its promises, then the people of South Africa must stand together—across all racial and cultural lines—and demand real leader	Jason	Mpumalanga		employed individual

	2025-07-08 09:22:04	No I do not	Broad-Based Black Economic Empowerment Framework	Consider a person who becomes unemployed for whatever reason, perhaps quotas. Say he knows how to make good widgets and starts making them in his garage, selling them successfully. His business grows to the point that he needs help and considers hiring someone. He interviews A, B, C, D, E & F, and finds A, B & C totally unsuitable, D suitable, E perhaps suitable with a lot of training, F unsuitable. However, the government steps in saying that he MUST employ B because "that's the law". What happens ? The widget maker stays as he is simply because he realises that employing B has a good chance of affecting his widgets' quality, deliveries, scrap rate, etc. Obviously he doesn't want to compromise his situation, so he doesn't grow and no one gets employed. BEE has proven itself not to work, it's merely enriching a very few well connected idividuals. Nothing will change by changing its name to B-BBEE. There is also an ethical issue here : why should a person or group have 30% ownership of something considering he or they had nothing to do with its creation, organisation, application, etc of the "something", merely due to them being the government of the country, which, in effect belongs to its citizens, all the while wanting the "something" ? Aren't they getting enough spoils from the taxation, which we all know isn't being put to good use ? If the government reduces or remove its 30% ownership of Starlink in SA, that is a slap in the face of ALL businesses in SA who are forced to comply with the 30%, you cannot have 2 standards. I hope Starlink wins and that BEE loses, and is abolished.	Phil	Western Cape		retired
	2025-07-08 09:20:51	No I do not	Broad-Based Black Economic Empowerment Framework	Put the South African people first. BEE has been there to correct the past atrocities done financially to the Black majority and minorities this deal is setting us back	Lumka	Gauteng		employed individual

	2025-07-08 09:14:58	No I do not	Broad-Based Black Economic Empowerment Framework	This would cause an unequal playing field for our local business people. BBBEE is immoral, unethical and just downright disgusting as a concept. Far from promoting true equity, BBBEE diminishes the achievements and credibility of skilled black professionals by creating the perception that success is tied to policy compliance rather than merit. This fosters resentment and suspicion—undermining confidence in the very people the policy claims to uplift. Moreover, by enforcing race-based metrics, BBBEE is alienating highly skilled individuals and distorting the playing field for small and local businesses that strive for excellence regardless of racial identity. When professionalism and capability take a back seat to compliance, businesses suffer—not just economically, but morally. In my experience, companies that market their BBBEE status as a virtue signal may appear more focused on ticking boxes than fostering real inclusivity, diversity, or innovation. My principles are simple: I support African-owned businesses—of any race—built on integrity, skill, and fairness. Inclusivity should be about unity and shared progress, not state-sanctioned division. True transformation requires respect for all professionals and a commitment to opportunity based on competence, not quotas.	Gail Williams	Gauteng		retired

	2025-07-08 08:51:57	No I do not	Broad-Based Black Economic Empowerment Framework	The main problem that South Africa faces in transformation has less to do with race and more to do with a bad economy. In a strong economy opportunities present themselves to individuals naturally due to supply and demand. Seeing as white people make up only 8% of the population, it follows naturally that these opportunities would be presented to other races by virtue of the fact that there are no others available. While I understand that it may be argued that this hasn't happened in the past, the truth is also that we haven't had a semi-strong economy since President Thabo Mbekhi was in office. Conversely, years of BBBEE has only caused further division while at the same time attributing to the tanking our economy. It is of no use to South Africans that they have 30% oownership of all the companies in South Africa when companies in South Africa is worthless because of a faltering economy. Instead of teaching people to lay claim to the success of others the whole time, why not teach them to make their own success? Why not fix the banking system to make it easier for banks to loan money to startups? Currently South Africa is acting like a beggar, demanding from others what is not theirs, instead of making our own success. This has to change. If we can't make our own success, we can forget about others doing it for us. I haven't even touched on the fact BBBEE is corrupt and does not benefit anybody other than already established elites.	Hein	Western Cape		business owner
	2025-07-08 08:49:15	No I do not	Broad-Based Black Economic Empowerment Framework	BBBEE is race discrimination . No different to Job reservation during apartheid except worse. Surely after being discriminated against, all further discrimination only serves to validate previous discriminatory laws.	Paul	Western Cape		retired
	2025-07-08 08:46:18	No I do not	Broad-Based Black Economic Empowerment Framework	I believe BBBEE is crucial for previously disadvantaged backgrounds and that policy changes shouldn’t be based on just one company—especially one owned by someone who refuses to associate themselves with their South African heritage, who is politically charged and controversial, and who is complicit in media manipulation. 	2025-07-08 07:02:08	No I do not	Broad-Based Black Economic Empowerment Framework	Broad-Based Black Economic Empowerment (BEE), while created to address the injustices of apartheid and promote economic inclusion, has had several negative consequences for South Africa: 1. Corruption and Cronyism: BEE has often led to the enrichment of a small, politically connected elite rather than broad-based empowerment. This has bred corruption and undermined trust in public and private institutions. 2. Skills Drain and Reduced Competitiveness: By prioritising race over merit in some cases, BEE policies have contributed to a brain drain and weakened institutional and corporate efficiency. 3. Investment Deterrent: Uncertainty and added regulatory burdens have discouraged both local and foreign investment, slowing economic growth and job creation. 4. Exclusion of the Poor Majority: Many poor black South Africans—especially in rural areas—have seen little benefit from BEE. The focus has often been on ownership and top-level appointments, rather than uplifting communities. 5. Economic Distortion: BEE compliance costs and structural distortions have made doing business more complex and expensive, particularly for small and medium enterprises. In summary, while BEE was well-intentioned, its implementation has often favoured a few at the expense of broader societal progress and long-term economic sustainability. 	2025-07-07 22:37:47	No I do not	Broad-Based Black Economic Empowerment Framework	The BBBEE policy was mainly implemented to redress the inequalities of the apartheid government. To this date it has not fully achieved its core mandate. Bending the rules for starlink which we do not need as south Africans will set us back and undo all the work this policy has achieved in the past year. Amending a government policy to accomodate one person's self interest suggests that the government will only cause chaos in the long run.	Molebogeng	Limpopo		unemployed individual

	2025-07-07 22:29:41	No I do not	Broad-Based Black Economic Empowerment Framework	I strongly opposite the proposed policy direction that seeks to relax the existing BBBEE requirements—specifically the 30% historically disadvantaged ownership threshold—for the purpose of enabling Starlink to operate in South Africa. While Elon Musk may have South African heritage, the fact remains that Starlink is a U.S.-based company. Amending our transformation policies to accommodate a foreign-owned commercial entity undermines the very purpose of Broad-Based Black Economic Empowerment (BBBEE), which is to redress systemic inequality and create inclusive, sustainable economic opportunities for historically disadvantaged South Africans. BBBEE is not a hurdle to development—it is a cornerstone of South Africa's democratic and economic progress. Weakening these requirements to make room for powerful global players not only diminishes the credibility of our regulatory framework, but also signals that our national goals can be compromised to suit foreign commercial interests. Yes, universal connectivity is important. But this goal must not come at the expense of transformation. There are local, inclusive pathways to expanding digital access—ones that do not require sacrificing the progress we have made in economic justice. I urge the Department to maintain the current ECNS/ECS licensing requirements, and to uphold the principles of transformation, equity, and sovereignty that South Africa has worked so hard to protect. 	2025-07-07 19:59:28	No I do not	Broad-Based Black Economic Empowerment Framework	I don’t think it’s good good for our countries security and our business	Lindani	Gauteng		employed individual

	2025-07-07 19:58:46	No I do not	Broad-Based Black Economic Empowerment Framework	BEEE is a racially discriminatory. The 140+ racial laws are simply the removal of and old racially biased system, which was replaced by another set of racially biased laws. It should be scrapped and reversed apartheid scrapped. The world sees it and South Africa as in apartheid will pay the price.	Cliff	Western Cape		employed individual

	2025-07-07 19:52:56	No I do not	Broad-Based Black Economic Empowerment Framework	Dear Minister Malatsi, I oppose the removal of BBBEE requirements in the proposed policy direction. South Africa's economy was built through the exclusion of black people and direct state support for white businesses. BBBEE is not a burden — it is a minimal attempt to address generational injustice and systemic inequality. Removing it to benefit foreign companies like Starlink sends a clear message: transformation is negotiable. It isn't. Any business operating in South Africa must respect our laws and our need for inclusive economic growth. I strongly urge the Department to retain BBBEE in all licensing processes and reject any policy that weakens economic redress.	Siphiwe	Gauteng		self-employed

	2025-07-07 19:52:44	No I do not	Broad-Based Black Economic Empowerment Framework	More than 50% of black people are still marginalized economically. This deal should be used to empower the black communities economically and also to upskill the disadvantaged people who can benefit from such initiative.	Mlungisi	Gauteng		unemployed individual
	2025-07-07 19:50:58	No I do not	Broad-Based Black Economic Empowerment Framework	South Africa's transformation policies, particularly the requirement for 30% ownership by historically disadvantaged South Africans (HDSAs) in telecoms services, are not arbitrary. These policies exist to redress past injustices, promote inclusivity, and ensure that the country's economic opportunities benefit the majority, not just a privileged few. To suddenly consider amending or bypassing these requirements to suit one powerful individual or multinational corporation sets a dangerous precedent. It sends a message that our laws and values are negotiable — that they can be rewritten for those with enough global influence, rather than being upheld in the interest of national equity and long-term development. While innovation and technological advancement are critical, they must never come at the cost of our sovereignty or our commitment to transformation. If we continually revise our policies to accommodate foreign players at the expense of local empowerment, we risk undermining the very foundation of inclusive economic growth. South Africa deserves connectivity — but not at the price of compromising our principles. The rules must apply equally to all. If a company wants to operate here, they must respect our laws, not expect us to change them.	Patience	Gauteng		employed individual

	2025-07-07 16:13:31	No I do not	Broad-Based Black Economic Empowerment Framework	I believe that any amelioration of the impact of BBBEE will not be appropriate to the ideologies of the African National Congress or the other corrupt "UHURU" parties [the MK party and the EFF to name the two largest]. An amelioration of BBBEE policies will in the first place tend to reduce the number of trained and hard working white people who plan to leave the country. Particularly it will destroy their taking advantage of president Trump's largesse in allowing these folk to find freedom in a less anti-white society with substantially more opportunity. This will in turn reduce black job creation which is against transformation initiatives. Secondly it will reduce the massive outflow of capital and might even impact on DFI to the extent that there may be job creation at a rate that exceeds population increase. That would cause even further immigration from bordering African states who supported the UHURU struggle. Such immigration clearly flies in the face of the current policy of "South Africa for Black South Africans." Finally, reducing BBBEE initiatives wil close off innumerable tenderpreneurial opportunities for black governing parties at all levels of government to the infinite financial detriment of the corrupt cadres deployed to such positions. It will, at a stroke, eliminate the construction mafia which, God forbid, might mean a resurgence of the South African construction industry while at the same time closing a door to income for cadres generated by such mafiosi. NO! I say. NO No NO and a thousand times NO! We have worked hard for our destruction and it should be allowed to take its natural course.	Johan Adriaan	Gauteng		self-employed
	2025-07-07 16:12:57	No I do not	Broad-Based Black Economic Empowerment Framework	Section 9(2)(b) of the Electronic Communications Act, 2005 (Act No. 36 of 2005) (ECA) provides that individual licences must include the percentage of equity ownership to be held by persons from historically disadvantaged groups, which must not be less than 30%, or such other conditions or higher percentage as may be prescribed under section 4(3)(k) of the Independent Communications Authority of South Africa Act, 2000 (Act No. 13 of 2000)(ICASA Act). 	2025-07-07 15:14:44	No I do not	Broad-Based Black Economic Empowerment Framework	Amending South Africa’s BBBEE requirements to suit Starlink’s demands would set a dangerous precedent that undermines the integrity of the country’s transformation laws and constitutional commitment to redress economic inequality. Such a concession signals that foreign corporations can bypass national policy if they exert enough pressure, effectively weakening the rule of law and the authority of regulatory bodies like ICASA. This opens the door for other multinational companies to demand similar exceptions, eroding the consistency and enforceability of critical national frameworks. Ultimately, it risks turning public policy into a negotiable commodity, compromising long-term developmental goals for short-term gains that may not be sustainable or beneficial for the country’s socio-economic landscape. 	2025-07-07 14:21:06	No I do not	Broad-Based Black Economic Empowerment Framework	The amendment may weaken current Broad-Based Black Economic Empowerment (BBBEE) targets, potentially allowing companies in the ICT sector to: Do less to promote ownership, skills development, and employment equity for historically disadvantaged groups. Meet lower transformation standards while still accessing licenses or benefits regulated by ICASA. Loss of accountability – Reducing or relaxing requirements could make it easier for companies to bypass genuine empowerment. Increased inequality – It may benefit large corporations at the expense of black-owned small or emerging tech enterprises. Confusion in policy alignment – Conflicts may arise between ICASA's regulations and broader national BBBEE frameworks.	Lihle	Gauteng		employed individual

	2025-07-07 14:19:28	No I do not	Broad-Based Black Economic Empowerment Framework	Dear Honourable Minister, As a committed South African, I fully support the proposal to remove BBBEE requirements in the communications sector, especially as it would enable Starlink to operate locally. While BBBEE was intended to promote inclusion, in practice, it often creates barriers to innovation and access. In this case, it is preventing a potentially transformative solution from reaching millions of underserved South Africans. Starlink's satellite internet can connect remote and rural areas where traditional infrastructure has failed. Reliable, affordable internet access would enable better education, job opportunities, and economic growth, especially for the poorest communities. This would have a far greater and longer-lasting impact than regulatory compliance alone. Real empowerment lies in unlocking opportunity. This policy shift could help bridge the digital divide and truly advance inclusive development in South Africa. Yours sincerely, Herman Stadler	Herman	Western Cape		employed individual

	2025-07-07 14:17:43	No I do not	Broad-Based Black Economic Empowerment Framework	While I support improved internet access — especially in underserved communities — I believe this should not come at the cost of South Africa's commitment to economic transformation and sovereignty. Our existing legislation was designed to correct historic injustices and ensure meaningful participation by historically disadvantaged South Africans in key sectors like telecommunications. Allowing a multinational corporation to bypass these obligations sets a dangerous precedent and risks weakening the very principles our democracy is built on. Furthermore, there are serious concerns around affordability, regulatory oversight, and the consolidation of power by foreign billionaires who do not operate with our country's long-term interests in mind. I urge you to consider more locally-grounded solutions that improve connectivity while upholding equity and transformation.	Lorraine	Gauteng		employed individual

	2025-07-07 12:35:45	No I do not	Broad-Based Black Economic Empowerment Framework	This submission outlines factual reasons why the South African government should not amend or relax Broad-Based Black Economic Empowerment (B-BBEE) requirements specifically to accommodate Starlink: 1. B-BBEE is a Constitutional and Policy Imperative • B-BBEE is grounded in Section 9(2) of the Constitution and the B-BBEE Act of 2003, which mandate redress of historical economic exclusion. • Creating exemptions for a single multinational would undermine the integrity and credibility of this national framework. 2. Sustainable Digital Inclusion Depends on Local Economic Participation • Connectivity alone does not constitute meaningful empowerment. • B-BBEE obligations ensure local ownership, skills transfer, and enterprise development, preventing scenarios where foreign operators extract profits without contributing to domestic economic growth. • Other operators (such as Rain, Vumatel, and major ISPs) have complied with these obligations while investing in local capacity. 3. Regulatory Certainty and Fair Competition Must Be Preserved • Exempting Starlink introduces regulatory uncertainty and creates unfair advantages over domestic companies that have met B-BBEE thresholds and licensing conditions. • This undermines investor confidence and the principle of equitable treatment under the Electronic Communications Act. Conclusion: On factual, legal, and policy grounds, amending B-BBEE requirements solely to benefit Starlink sets a harmful precedent, weakens South Africa's transformation agenda, and disadvantages local economic participants. For these reasons, this submission strongly opposes any relaxation of B-BBEE obligations in this context.	Nomawethu

	2025-07-07 12:23:24	No I do not	Broad-Based Black Economic Empowerment Framework	The very idea of the policy was to address the wealth imbalances caused by years of shutting out majority black and brown people of the republic. To now renege on the very purpose of the policy is to continue shutting out the very people who are poor and making sure there is no way to get them out of their position. Also, Elon Musk's Starlink should never ever be allowed to operate with in the republic, as we have witness, that that would be detrimental to the safety, security & independence of the republic. Any international company that wants to do business within the borders of the republic, must adhere to the laws of the republic or find another country with the laws that best fit them. We can not allow ourselves to be bullied, manipulated or even be forced to change our laws to help a company to run in our country.	Zandile	Western Cape		business owner

	2025-07-07 12:20:13	No I do not	Broad-Based Black Economic Empowerment Framework	In South Africa, BEE (Black Economic Empowerment) is critically important for promoting economic transformation and addressing historical injustices caused by apartheid. Here's an overview of why BEE is important: ✅ 1. Redressing Historical Inequality BEE aims to correct the imbalances created during apartheid, where the majority of Black South Africans were excluded from meaningful participation in the economy. It promotes equity and inclusivity in ownership, management, and employment. ✅ 2. Broad-Based Black Economic Empowerment (B-BBEE) B-BBEE is a more inclusive form of BEE, designed to benefit a broad base of Black South Africans (African, Coloured, Indian citizens). It goes beyond ownership, covering: Skills development Enterprise and supplier development Socio-economic development Employment equity Preferential procurement The user terminal costs around US $499 (~R8 100), and monthly service fees exceed $100 (≈R1 600), which remains prohibitively expensive for many South Africans, especially in rural and low-income areas. There's no local pricing variation—fees are flat globally, further excluding lower-income users Performance Limitations High latency: Remote SA tests showed latency regularly between 200–380 ms, causing delays during calls/gaming. Signal obstructions: Dish needs a clear 360° sky view—trees, buildings, or rooftops can drastically affect. Network congestion: In urban areas, many users sharing satellites can slow speeds during peak times. 4. Lack of Local Infrastructure & Support With no ground stations or POPs in South Africa yet, routing goes through neighboring countries (e.g., Nigeria, Zambia), inflating latency and reducing local performance. 	2025-07-07 12:15:07	No I do not	Broad-Based Black Economic Empowerment Framework	Amending the BBBEE requirements so that a foreign company doesn't operate within the confines of policy, where other foreign companies are doing so, violates the constitution and policies. The amendment seeks to only benefit one racial group and sets us back as a democracy. The BBBEE policy was created as redress, removing that comforts those who sought to reform apartheid laws and repackage them as democratic policy. This must be rejected.	Lerato	Northern Cape		
	2025-07-07 12:14:05	No I do not	Broad-Based Black Economic Empowerment Framework	1. Loss of Economic Inclusion and Opportunities • Reduced Access to Jobs and Promotions: BBBEE policies have promoted employment equity and opened up job opportunities for people of colour in both public and private sectors. Removing these policies could result in a decline in hiring and promotion of black, coloured, and Indian South Africans, reinforcing historical patterns of exclusion. • Decreased Entrepreneurial Support: BBBEE has facilitated access to funding, mentorship, and market opportunities for black-owned businesses. Without these supports, aspiring entrepreneurs from previously disadvantaged backgrounds may struggle to compete and grow their businesses. 2. Widening Inequality • Reversal of Gains in Black Middle Class: BBBEE has contributed to the growth of a black middle class by enabling ownership and management opportunities. Scrapping the policy could reverse these gains, potentially increasing income and wealth disparities. • Entrenchment of Historical Imbalances: The removal of BBBEE could halt or reverse progress made toward correcting the economic imbalances caused by apartheid, making it harder for people of colour to participate meaningfully in the mainstream economy. 3. Reduced Corporate Diversity and Inclusion • Less Incentive for Inclusive Workplaces: BBBEE has encouraged companies to diversify their workforce and supply chains. Without it, there may be less motivation for businesses to create inclusive environments or support black-owned suppliers, potentially leading to less diversity in the workplace and business ownership. 4. Societal and Political Risks • Increased Social Tensions: Scrapping BBBEE could send a message that economic transformation is no longer a priority, potentially fueling social unrest and undermining trust in the government’s commitment to redress past injustices. • Marginalization of Vulnerable Groups: BBBEE also targets women, youth, people with disabilities, and rural populations. Removing the policy could	frik	Limpopo		retired
	2025-07-07 12:12:38	No I do not	Broad-Based Black Economic Empowerment Framework	South Africa remains a country where the scales still tip heavily in favour of white people — economically, socially, and structurally. To even consider amending BEE laws in a way that weakens them is to say, without hesitation, that black people, our liberation, and the promise of equity no longer matter. It is to affirm that this country is willing to move on without correcting the deep, violent legacy of apartheid — that it is comfortable maintaining systems that exclude the very people they once brutalised. This isn’t reform. It’s betrayal.	Thando	Gauteng		unemployed individual

	2025-07-07 10:29:19	No I do not	Broad-Based Black Economic Empowerment Framework	1. Redressing Past Injustices Under apartheid, the majority of South Africans (Black, Coloured, and Indian people) were systematically excluded from meaningful participation in the economy. BEE aims to reverse that exclusion by creating opportunities for those previously disadvantaged. ✅ 2. Promoting Inclusive Economic Growth BEE encourages the wider participation of black South Africans in business—through ownership, management roles, employment, and skills development. This ensures economic growth is more inclusive and not just in the hands of a few. ✅ 3. Creating a Stable Society When people feel economically excluded, it leads to frustration, unrest, and inequality. By giving everyone a fair shot at success, BEE contributes to a more stable, just, and peaceful society. ✅ 4. Expanding the Tax Base By helping more South Africans become successful entrepreneurs or skilled workers, BEE indirectly grows the middle class—which increases tax revenue and reduces pressure on government welfare systems. ✅ 5. Corporate Accountability and Development Companies operating in South Africa are encouraged to meet BEE scorecard requirements by: Hiring black staff and managers, Offering training, Supporting black-owned suppliers, Promoting black ownership. This shifts the business landscape towards greater fairness and sustainability. ✅ 6. Encouraging Black Entrepreneurship Through support like funding, partnerships, and preferential procurement, BEE empowers black-owned businesses to grow and compete in the market, correcting the historic lack of access to capital and networks. Summary: BEE is not just about race—it's about economic justice and long-term national development. When implemented effectively, it helps build a fairer, more competitive, and more unified South Africa.	Ashele	Gauteng		employed individual

	2025-07-07 10:21:05	No I do not	Broad-Based Black Economic Empowerment Framework	concern is that allowing an exemption or amendment for Starlink undermines South Africa's established BEE framework and sets a dangerous precedent. Other international corporations such as Microsoft and many others have complied with BEE requirements to operate in South Africa. It is unjustifiable to create exceptions for one company when our policies were designed to ensure economic inclusion, empowerment, and local participation. Amending our regulations for one multinational entity risks weakening the integrity and objectives of our transformation laws. If Starlink wishes to operate in South Africa, they should comply with the same standards as all other international companies.	Dineo	Gauteng		self-employed

	2025-07-07 10:11:19	No I do not	Broad-Based Black Economic Empowerment Framework	There is still much to be done to ensure the Black population's realisation of economic freedom in South Africa. This plight is undermined by the private sector's push for de-regulation and amendments of criteria for operation. Additionally the 30% minimum requirement of Black ownership is an extremely low standard especially in light of the fact that South Africa is a majority Black Country that has no shortage of skilled and qualified black graduates. However, this category of people are simply not given the opportunity to take part in the economy and business due to a variety of reasons including exclusionary hiring processes; austerity etc. The implementation of the proposed amendment would be beyond regressive and completely disregard the struggle of black South Africans. 	2025-07-07 09:47:49	No I do not	Broad-Based Black Economic Empowerment Framework	I wish to express my concern and opposition to the proposed amendment that would allow foreign-owned companies in the ICT sector to substitute the 30% Black ownership requirement with an Equity Equivalent Investment Programme (EEIP). While I recognise the need for increased investment in broadband infrastructure, this exception undermines the core principle of genuine Black ownership in the South African economy. It risks setting a precedent that allows large foreign companies to bypass meaningful empowerment and limits long-term opportunities for local Black investors, entrepreneurs, and communities. I strongly believe that creative solutions should not weaken the spirit of B-BBEE. Instead, policies should incentivise partnerships with Black-owned ICT businesses, rural SMMEs, and skills transfer for sustainable growth. I urge the Department to reconsider this exemption and uphold the transformative ownership requirements that empower South Africans meaningfully.	Morongwa	Gauteng		unemployed individual

	2025-07-07 09:36:05	No I do not	Broad-Based Black Economic Empowerment Framework	The issue as i see it, is that people that hold positions of decision making with no real skill, qualities, competence to fullful the madate the position may require. How was/is the candidate interviewed, what is in their relevant CV, what about performance reviews as is what most of us are required in the employment market place. This further means that when a system, developed with 'taking' away from as a 'you owe someone' a free ride can never achieve anything as the very structure is evidence that it is failed already on discussion/paper etc. Why is it that the decision makers in SA continue to insist on what is failing only needs more restrictive rules and regulations keeping incompetances in positions that by their very inability at the get go it is clearly a disaster in the making. Those that receive these positions are handed out their job titles by the same decision makers that are just trying to satisfy their own friends and family members for political gain and control. This issue is not Starlink, it is we need to see the dangers of EMFs and the rising cancers and tumours because people spend more time with technology than thinking what to do about their life choices. BBEE or whatever should be scraped for the non-functioning system that it is then let business decide what is relevant or not in creating businesses that grow the economy, create job opportunities and have a vision of going upwards and onwards; The current group of decision makers as we all know are driving us into the ground while they are 'the richest' people in Africa ..... Enough of egos and arrogance, enough of giving jobs to those incapable of anything be released. They wont get another job in the open market because they have no skills beyond the stealing and looting that the Zondo Commission clearly highlighted. Thank you	Jennifer

	2025-07-07 09:02:52	No I do not	Broad-Based Black Economic Empowerment Framework	South Africa is the only world where affirmative action is in the favour of the majority who has complete political control. The fact that the political majority requires affirmative action to protect them against a 9% minority group is a testament to a complete failure on their part to build their own wealth making structures. Such that their only solution is to take from others. And finally a word recently coined to describe South Africa's current political situation. This is more than 30 years now. INEPTOCRACY (It is a system of government where the least capable to lead and elected by the least capable of producing and where the members of society least likely to sustain themselves or succeed are awarded with goods and services paid for by the confiscated wealth of a diminishing number of producers. Now if I were black in South Africa I would be totally ashamed. But noooo they are prouder than ever before. Seems to kill us and want to steal all our land thinking that we are going to solve their problems without ever pointing a finger at themselves. This is the most pathetic thing about South Africa you will ever hear.	Catherina	Western Cape		retired

	2025-07-07 08:09:50	No I do not	Broad-Based Black Economic Empowerment Framework	Statement: Opposition to the Removal of BBBEE and the Support of Starlink in South Africa I strongly oppose the removal of Broad-Based Black Economic Empowerment (BBBEE) in South Africa. BBBEE remains a critical policy instrument aimed at addressing the historical injustices of apartheid and the systemic exclusion of Black South Africans from meaningful economic participation. While progress has been made, deep structural inequalities persist in our society. Removing BBBEE now would prematurely halt a necessary process of redress, empowerment, and transformation. BBBEE is not just about compliance or corporate targets—it is about restoring dignity, creating opportunities, and building a more inclusive economy. South Africa still faces significant disparities in wealth, education, employment, and ownership along racial lines. More work needs to be done to ensure that those who were previously disadvantaged are truly empowered and given the tools to participate fully in the economy. Rather than scrapping BBBEE, it should be strengthened, monitored more effectively, and implemented with greater accountability and transparency. In addition, I do not support the unrestricted operation of Starlink in South Africa without it aligning with our national policies, including BBBEE and local empowerment frameworks. While access to internet is important, global tech companies must not be allowed to bypass local empowerment legislation or dominate the market at the expense of South African businesses and communities. Connectivity must go hand-in-hand with social and economic justice. South Africa’s development must be guided by inclusive growth, local participation, and equitable access to resources and opportunities. Both the empowerment of historically marginalized groups and the regulation of foreign companies are crucial to safeguarding our sovereignty, promoting fairness, and building a future that benefits all South Africans. 	2025-07-07 05:59:19	No I do not	Broad-Based Black Economic Empowerment Framework	The BBBEE is part of our law to rectify the injustices of the past and of the past we speak of something that recently happened. We the black community that is the majority is Sourh Africa is still suffering from the injustices of the past. Those who benefitted from apartheid might makeup 7% of the South African population but they are high in the hierarchy of wealth. Starlink must comply with the provisions of the BBBE, no special treatment should be given to a company that will not benefit the people of South Africa and what is so special about the very same starlink that is rejected my majority of South Africa for it to have policies ammended for it? I see nothing if benefit for us but more harm.	Queen	Limpopo		employed individual
	2025-07-07 05:58:34	No I do not	Broad-Based Black Economic Empowerment Framework	Opposing Statement on the Operation of Starlink in South Africa We, as concerned citizens and stakeholders in South Africa’s digital sovereignty and economic transformation, oppose the unregulated operation of Starlink within our country. While Starlink promotes itself as a revolutionary solution for internet access, its current mode of operation presents clear threats to our national sovereignty, economic justice, and legal frameworks aimed at redressing historical inequalities. 1. Violation and Undermining of B-BBEE Laws Starlink's operations blatantly undermine South Africa’s Broad-Based Black Economic Empowerment (B-BBEE) policies, which were designed to ensure inclusive participation of black South Africans in the economy. By entering the market without local ownership, empowerment credentials, or equity partnerships, Starlink operates outside the transformative legal framework that governs telecommunications and ICT sectors. Allowing a fully foreign-owned company to dominate a critical sector without meeting BEE compliance standards not only displaces local businesses but actively undermines decades of legislative work meant to correct apartheid-era economic exclusion. It sends a message that foreign corporate interests can bypass local laws, further marginalizing black entrepreneurs and communities. 2. Threat to Local Industry and Economic Self-Reliance Starlink’s model threatens the sustainability of local ISPs and telecom providers — many of which are small to medium enterprises run by South Africans who have invested in skills development, local infrastructure, and compliance with ICASA and BEE frameworks. By contrast, Starlink offers no meaningful local reinvestment, employment, or empowerment initiatives. 3. National Sovereignty and Digital Colonization With satellites controlled from outside our borders, Starlink creates a dependency on foreign-owned infrastructure, with no obligation to store data locally, follow South African data protection	Malubenathi	Western Cape		employed individual

	2025-07-07 04:46:51	No I do not	Broad-Based Black Economic Empowerment Framework	I fully do not support the government amending the BBBEE policy to allow Starlink into the country. Doing so would undermine the core purpose of the policy, which is to address the inequalities of our past and promote meaningful economic inclusion for historically disadvantaged groups. Allowing a foreign company to bypass these requirements sets a dangerous precedent that could weaken transformation efforts in key industries. While internet access is important, it should not come at the cost of economic justice and local empowerment. South Africa needs solutions that both expand connectivity and support the growth of local, black-owned businesses, not shortcuts that benefit large international corporations at our expense. 	2025-07-07 01:27:13	No I do not	Broad-Based Black Economic Empowerment Framework	The BBBEE framework was put in place to level the playing field and provide opportunities to previously disadvantaged people. Making concessions for individuals to go against this framework sets a wrong precedent. It opens doors for favouritism and places some people at an unfair advantage over others. Also placing the means of communication of the country into the hands of an individual places a risk on state security. The Starlink technology has been weaponised in wars such as the Ukraine and Iran war to deny citizens means of communication when the owner had qualms with the government of that country. This would put our countries freedoms at great risk.	Lesego	Gauteng		employed individual

	2025-07-06 22:56:18	No I do not	Broad-Based Black Economic Empowerment Framework	The proposed bill amendment to the Broad-Based Black Economic Empowerment (BBBEE) Act to benefit Starlink is a concerning development that warrants careful scrutiny. As South Africa continues to grapple with the socio-economic legacy of apartheid, it is imperative that legislative efforts prioritize meaningful transformation and empowerment of historically disadvantaged communities. The apartheid regime's deliberate exclusion of black South Africans from economic opportunities has had a lasting impact on the country's economic landscape. The BBBEE Act was enacted to address these historical injustices and promote economic transformation. However, the proposed amendment appears to undermine the Act's core objectives by extending preferential treatment to a specific entity without adequate justification or consideration for its potential impact on broader economic empowerment initiatives. We are concerned that this amendment may: - Perpetuate the economic marginalization of black South Africans by prioritizing the interests of a select few - Undermine the progress made in promoting black economic empowerment and ownership - Fail to address the systemic inequalities entrenched by apartheid, instead entrenching new forms of economic exclusion In light of these concerns, we recommend that the amendment be thoroughly reviewed and revised to ensure that it aligns with the spirit and objectives of the BBBEE Act. This could involve: - Conducting a comprehensive impact assessment to determine the potential effects of the amendment on the broader economy and society - Ensuring that the selection process is transparent, fair, and competitive - Clearly outlining the benefits of the amendment to the South African economy and society, particularly in terms of promoting black economic empowerment and addressing the legacy of apartheid Ultimately, any legislative efforts should prioritize the needs and interests of historically disadvantaged communities	Nkululeko

	2025-06-26 01:12:23	No I do not	Broad-Based Black Economic Empowerment Framework	I Do Not Support amending of the BBBEE. Amending of the BBBEE means the systemic economic oppression, repression and suppression of black South Africans continues by the giant multi corporation companies because they do not support the economic upliftment and financial distribution of wealth and economy amongst people. By amending BBBEE we are doing away from the gains of economic and financial upliftment by this act has done in the previous years. Yes arguably there has been flaws in the implementation of the act, but that has to do with the personnel capacity of the officials employed who have tended to found corrupt and misusing their position of power. What the government needs to do, is to implement the Monitoring and Evaluation mechanism in place to over the entire process that is free, fair and just in the distribution process to the well deserving citizens of the previously disadvantaged groups who are not aligned connected to senior government officials nor by political patronage to some individual called comradeship! We can't honestly say BBBEE is bad, it has not benefitted ordinary citizens just like myself and therefore lets get rid of the entire policy act without implementing any mechanisms in place in trying to correct and ameliorate the internal unwarranted behaviour from its personnel! Because getting rid of such individuals who are connected operating as a syndicate with the administration team till the executive officers in approving BBBEE deals by an independent Steering Committee or body stemming from the national republic of citizens- will just show you how committed and patriotic South African citizens are concerning fixing their own country. South Africans are capable in fixing their own country, we just need to be given an opportunity as young people and we will show you what we are made of. Unapologetically South African! #OperationBuyaMthetho	Mpumie	Gauteng		unemployed individual
	2025-06-25 19:05:56	No I do not	Broad-Based Black Economic Empowerment Framework	BEE policy does not and will not address the unemployment problem. 30 years of democracy have now passed, we need to move on. 	2025-06-25 13:58:07	No I do not	Broad-Based Black Economic Empowerment Framework	Our business is based in RSA, tendering to companies internally and abroad, primarily design and engineered projects in the mining, cement, ports business. We are 28 years old and not BBBEE compliant, on principle. Notwithstanding the need for contributing to the upliftment of previously disadvantaged people, which we do voluntarily ourselves, on a regular basis, the fatal flaw is the duration of this exercise. When East and West Germany unified, everyone in West Germany paid 13% additional tax, across the board, for a 10-year period. The funds collected were managed, applied to specific elements of upgrading East Germany, ploughed into projects and education etc as was deemed beneficial to lifting E-German standards to W-German standards and in so doing, prevented mass migration, levelled the opportunity field etc. In SA by contrast, much like the toll roads in Gauteng, the idea should have a limited time frame to ensure that the 'tax' collected does not continue indefinitely, and is wasted. The objective should be clearly set out and should come to an end. At that point, everyone has had the opportunity to get their collective act together and normality to return. We are finding that we cannot compete for projects in neighbouring countries nor abroad, because SA's manufacturing, fabrication, services etc sosts are up to 50% higher than our customers can obtain from India, China, Vietnam etc. I attribute SA's higher costs to (i) BEE and (II) Eskom - either companies are recovering expenditure costs going off-grid and/or high Eskom tarrifs. Either way the 50% is unsustainable and is killing business opportunities for SA-based companies. We now have relationships abroad where we source finished products, delivered to neighbouring countries, significantly cheaper compared to trucking finished products across 1 or 2 borders in Africa. Its a disgrace and terribly unfortunate. BEE must end and with it, prices are normalised against competing countries.	andrew	Gauteng		business owner

	2025-06-24 12:28:58	No I do not	Broad-Based Black Economic Empowerment Framework	**"I strongly support the launch of Starlink in South Africa, as it has the potential to significantly improve internet access and bridge the digital divide across our country. However, I believe that the current ownership requirements—specifically the 30% ownership by historically disadvantaged South Africans—should be reconsidered. South Africa is a democratic nation that thrives on fairness and equal opportunity for all its citizens, regardless of race. To truly promote transformation and economic empowerment, policies should focus on creating a level playing field where ownership and participation are based on merit and opportunity, rather than race-based criteria. Removing racial ownership requirements will encourage more investment, innovation, and fair participation from all South Africans, ultimately benefiting our society and economy."**	Amelia			employed individual
	2025-06-24 12:08:23	No I do not	Broad-Based Black Economic Empowerment Framework	BBBEE was done as a way to make mends to the previous unequal and unjust economical system in South Africa. It hasn't run fully to make mends blacks are still poor and disadvantaged. Nobody is giving this great initiative to make it work. Why is Elon must so special that country laws and policies are mended for him? That racist should be investing in the BBBEE instead and supporting the government.	Belisiwe	Gauteng		business owner
	2025-06-24 12:01:52	No I do not	Broad-Based Black Economic Empowerment Framework	No i do not support BBBEE. 30 years later and as we look around at companies who had no option but to embrace these principals, a lot of them are minor compared to what they used to be. BBBEE has done more damage to the skills talents in the country and should be removed.	Pierre	Gauteng		self-employed

	2025-06-24 11:53:47	No I do not	Broad-Based Black Economic Empowerment Framework	I agree that the execution of the BBBEE framework has flaws, but I dont believe we should throw away the baby with the bath water. Keep the policy, with some adjustments and then tighten execution so that it has the intended impact. We cant start a story in the middle - meaning had we re-distributed and undid ills of the past at the onset of democracy, then it make sense to rid the policy. But we didn't, so we need a vehicle that effective in course correction. But agreed that there are definite issues with the execution. Also, it may send sound off that SA acquiesce to external influence easily if its changed just because of Starlink, which has unintended consequences that erode our respect and dignity as a country internationally, so no.	Tumi	Gauteng		employed individual
	2025-06-24 11:46:32	No I do not	Broad-Based Black Economic Empowerment Framework	BBBEEE has done a lot of damage to south Africa and has affected the white its like we back in apartheid just with things turned around we all human we should all be given the same fair treatment no matter your raise as white people cant do government tenders unless you have a connection but still wont get the tender whites are suffering biggest different is back in the 19s things where much cheaper there where more jobs available now 20s and the cost of living is so expensive so whites are suffering take all this BBBEEE out and lets reunite we have so much protentional in south Africa but there's so much holding us back remove BBBEEE	Shane	Gauteng		business owner

	2025-06-24 08:40:06	No I do not	Broad-Based Black Economic Empowerment Framework	I do not support this move. Elon Musk is not to be trusted. We cannot change our policies for one persons greed. If he wants to do business in South Africa he needs to abide by the laws and policies that govern this country. One person cannot demand this kind of change. If we agree to this we'll be setting a precedence.	Sherrie			
	2025-06-24 08:07:04	No I do not	Broad-Based Black Economic Empowerment Framework	The Dangers of Allowing Foreign-Controlled Satellite Networks Like Starlink to Operate with National Security Implications The growing reliance on foreign-controlled satellite networks, such as SpaceX's Starlink, poses significant risks to national security. While such systems provide critical communication services, their ownership by a private company subject to the influence of a foreign government (or its billionaire owner) creates vulnerabilities. 1. Surveillance & Data Interception – Foreign-operated satellite networks could be compelled to share sensitive data with their home government, enabling espionage or intelligence gathering on military operations, critical infrastructure, or government communications. 2. Selective Shutdowns or Manipulation – A foreign entity could deliberately throttle, disrupt, or cut off service during a geopolitical crisis, crippling a nation's military logistics, emergency response, or financial systems. 3. Dependency as a Weapon – Over-reliance on a foreign-controlled system makes a nation vulnerable to coercion. If the provider imposes political or economic conditions for continued service, it undermines sovereignty. 4. Cyberattack Vulnerabilities – Centralized control by a foreign corporation increases the risk of cyber intrusions, either through direct sabotage or backdoor access exploited by hostile state actors. To mitigate these risks, South Africa must develop sovereign satellite communication alternatives, enforce strict regulatory oversight, and ensure that critical infrastructure is not dependent on systems controlled by external entities with questionable allegiances. National security cannot be outsourced.	MK	Mpumalanga		self-employed
	2025-06-24 08:04:38	No I do not	Broad-Based Black Economic Empowerment Framework	Why should we amend our policies to suit a single individual? 	2025-06-23 11:41:38	No I do not	Broad-Based Black Economic Empowerment Framework	I do not support the continued enforcement of B-BBEE ownership requirements, which often serve as a barrier to innovation, investment, and much-needed digital infrastructure. The proposed equity equivalent investment by Starlink—amounting to R500 million toward connecting underserved schools—is a welcome alternative that aligns more closely with the principles of inclusive development. One can only hope that this contribution is managed transparently and benefits those who truly need it, rather than being siphoned off through political patronage. If this model proves successful, it could set a precedent for reforming or ultimately phasing out restrictive empowerment policies that no longer serve the broader interests of South Africans.	Mr	Gauteng		employed individual
	2025-06-23 11:27:37	No I do not	Broad-Based Black Economic Empowerment Framework	This move has been engineered by Musk through leveraging his influence in the White House. This is something he has long sought out and the moves he played to bring it about brough the reputation of South Africa into international disrepute. To amend this BBBEE would be to validate Musk's claims that our laws which seek to address historical oppression are "race-based". They would in turn further harm South Africa's sovereignty, intelligence integrity and create an even bigger opportunity for America and their oligarchy to extract intelligence through the systems they will implement and which they will not allow oversight from the South African government. 30 years after democracy, with state close to failure, giving away our power and amending our laws to satisfy one person who lies about genocide on our shores and has had little to no positive impact on our country seems a backwards step and I urge everyone who has involvement in this to assess the broader implications of it.	Thobela	Eastern Cape		employed individual
	2025-06-23 11:18:12	No I do not	Broad-Based Black Economic Empowerment Framework	The is nothing wrong with policy, its the ruling party that is using it to benefit their buddies. we cannot also be told by Musk on what to do	Smart	Gauteng		employed individual

	2025-06-23 11:09:25	No I do not	Broad-Based Black Economic Empowerment Framework	Ethical Leadership Over Profit-Driven Agendas The recent attempts to interfere in South Africa's policies under the guise of humanitarian concern are not just misguided, they're deeply unethical. Weaponizing racially charged narratives (like the false claim that "SA is killing a certain group") to justify undermining local empowerment initiatives is unacceptable. Starlink's potential disruption of tools that uplift marginalized communities exposes a blatant prioritization of profit over principle. If the goal were truly progress, the focus would be on collaboration not coercion. Instead, we're witnessing a reckless disregard for sovereignty and a cynical exploitation of historic inequalities for corporate gain. Ethics cannot be an afterthought when livelihoods are at stake. I stand firmly against this kind of exploitative opportunism. Accountability and integrity must come first not personal vendettas or predatory business tactics.	Letuma	Gauteng		employed individual

	2025-06-23 10:27:38	No I do not	Broad-Based Black Economic Empowerment Framework	In a Democracy all South Africans must have the right to trade freely no matter your skin colour. Mr. Nelson Mandela did not envision what is currently being implemented in South Africa. South Africa needs to abolish the BBBEE framework and embrace a free market and a well-established economy. No South African must be excluded from taking part in our economy, this will not just benefit large companies but boost the micro, medium business sector, government institutions, international trade relations and investment.	Twannette	Gauteng		employed individual
	2025-06-23 10:23:26	No I do not	Broad-Based Black Economic Empowerment Framework	As someone who has worked in the Training Sector with Private business for over 12 years, I have seen the profound impact that B-BBEE has had on previously disadvantaged youth of South Africa. I have seen individuals with no hope be given a chance to succeed and get a foot in the door. If we make an exception for one sector, other sectors will cry out for the same and we will end up in a place where once again South African Youth will have these opportunities taken away. Businesses already don't want to spend money on upskilling and giving opportunities, let's face it, the business of business is making money, not providing opportunities for employment. Without the need for B-BBEE most business would have lost out on star employees who make a difference because they have no need to hire these learners. We should not amend the B-BBEE requirements. We should continue to make business take a chance on the disadvantaged to find the diamonds in the rough. We should continue to look out for the best interests of South Africans.	Kim	Gauteng		employed individual
	2025-06-23 10:21:48	No I do not	Broad-Based Black Economic Empowerment Framework	We need black economic empowerment in South Africa, inequality is still disturbingly high. 	2025-06-23 09:23:30	No I do not	Broad-Based Black Economic Empowerment Framework	Affirmative action has failed nin every country that has tried it. In SA it is obviously being abused as a vehicle to embolster those in the positions which can abuse it for personal gain. Not only has it not provided any benefit for previously disadvantaged groups, it has further divided the population in terms of wealth creation and opportunity. For any decision, other than an immediate reversal of all these BBBEE policies would be insanity based on evidence which speaks to the opposite. A change would best be implemented by focusing on the merits of individual achievement, skill and ability. Programmes which enhance these from young ages would be best, setting up youth centre's to help those in need would be a more sensible option that forcing companies to hire by colour, which is, of itself a racist policy to implement. This is the new apartheid, enforced through institutional quota policies which are being abused by those with direct access for personal gain. A wise population would never have allowed these to come to pass from the onset. We all know how media and propaganda campaigns are used to engineer a false public consent, read Edward Bernays. If there is not 100% involvement, it is not a democracy. We do not live in a democracy. It is a puppet show for an oligarchy. "Banking elites" have run our country since 1922.	Alistair	KwaZulu -Natal		business owner

	2025-06-23 09:05:22	No I do not	Broad-Based Black Economic Empowerment Framework	I feel BBBEE policies although not 100% correctly applied does help in inclusion of black ethnicity in contributing to the economy. Most of the blacks employed in companies, especially private is because of such BBBEE policies. Stripping it off completely will be of disadvantage to the majority of the population in South Africa which are blacks. Also we still need to see more inclusion on black/people of color directors/executives in these companies, we are still struggling with that so stripping it off might see the rise in no black executives in these companies.	Pearl	Gauteng		

	2025-06-23 08:48:00	No I do not	Broad-Based Black Economic Empowerment Framework	Dear Honourable Minister Solly Malatsi, I write in response to the draft policy direction gazetted for public comment regarding potential exemption pathways for satellite-based services, such as those offered by Starlink. While the prospect of expanding internet access and technological innovation is welcome, I strongly object to any exemption or relaxation of the existing Electronic Communications Network Services (ECNS) and Electronic Communications Services (ECS) licensing conditions—particularly the 30% ownership requirement by historically disadvantaged South Africans (HDSAs). The Broad-Based Black Economic Empowerment (BBBEE) framework was established precisely to redress the structural inequalities caused by apartheid and ensure inclusive participation in the economy. To this day, those objectives remain unmet in many sectors, particularly in the digital and telecommunications industries, where ownership, control, and benefit remain concentrated. Granting exemptions to large foreign entities undermines these efforts and sets a dangerous precedent that may lead to further erosion of transformation commitments. It risks reinforcing economic exclusion, especially in strategic sectors that will define South Africa's future digital sovereignty. I respectfully urge the Minister to uphold the current regulatory requirements and ensure that any operator wishing to enter our market aligns with South Africa's constitutional and developmental imperatives—chief among them, the correction of historical injustices and meaningful economic participation for HDSAs. 	2025-06-23 08:28:34	No I do not	Broad-Based Black Economic Empowerment Framework	I think the 5 elements of the BBBEE have no harm to any Business wanting to operate in South Africa. The policy as it is now is protecting the economic benefits of the Historically Disadvantaged South Africans who has not been fully recovered and it is too early to amend the policy. It is achievable and need to be given some time to adress the economic backlog of Black people in this country as so far it is few who benefitted from this policy. If the amendment will give more benefits to the current policy it will have to be broken down and explained first on how it will benefit the black majority before it is amended. So instead of trying to amend let's start by explaining how the amendment will benefit the Black community	Tshepo	Limpopo		business owner

	2025-06-23 04:13:06	No I do not	Broad-Based Black Economic Empowerment Framework	The sovereignty of this country is important. The government cannot bend/amend legislation so that it benefits the investors or the markets. If Starlink wants to operate in South Africa, then the company should comply to the stipulated regulations for operating within the country. Furthermore, the perpetuated misinformation that states that Starlink will assist the indigent in the rural areas to have access to the internet is a lie. We all have been seeing the information that clearly states that Starlink is not cheap to install or subscribe to on a monthly basis. People in these areas currently cannot even keep up with the exorbitant prices of Data. Even if Starlink is cheap and it provides alternatives to internet connectivity, the government should be currently focusing on ICASA, ensuring that the organization is fighting for the decrease in Data prices and ensuring that service providers make it part of their Strategic plans to drop data prices. Data is a basic need now. This should be what the government should be working on, and focusing on. This issue has been the cry of the general populace for many years now. Data is a commodity we all can access, but Starlink is a luxury commodity that cannot be accessed or afforded by the majority but by a minority.	Nzuzo	KwaZulu -Natal		employed individual

	2025-06-22 16:40:46	No I do not	Broad-Based Black Economic Empowerment Framework	We have been deprived youth to partipate in Tendering Project. But when someone else from outside the country propose, the government entertain him / them. Hence I do not suppose change of BBBEE Policy Framework. Rather remain as it is. And our government must give disadvantages people this greener opportunities.	Montshiwa	Gauteng		employed individual
	2025-06-22 16:32:46	No I do not	Broad-Based Black Economic Empowerment Framework	Black people are still behind and poor. They need to be empowered. We cannot amend BBBEE until blacks are imancipated economically	Lee	Gauteng		employed individual
	2025-06-22 16:29:58	No I do not	Broad-Based Black Economic Empowerment Framework	The policy will not help South African companies but rather foreign investors.	Given	Gauteng		employed individual
	2025-06-22 16:21:43	No I do not	Broad-Based Black Economic Empowerment Framework	This type of restitution has not been successful anywhere else. The focus should be on quality education as means to empower the people of South Africa, as it is the only sustainable long-term remedy to alleviate poverty and give everyone an equal opportunity.	Pieter	Western Cape		employed individual

	2025-06-22 16:21:42	No I do not	Broad-Based Black Economic Empowerment Framework	This type of restitution has not been successful anywhere else. The focus should be on quality education as means to empower the people of South Africa, as it is the only sustainable long-term remedy to alleviate poverty and give everyone an equal opportunity.	Pieter	Western Cape		employed individual
	2025-06-22 16:19:21	No I do not	Broad-Based Black Economic Empowerment Framework	Changing the policy will impact millions of marginalised South Africans. BBBEE (Broad-Based Black Economic Empowerment) must remain in place until we address the disparity between the rich and the poor in this country. Black people continue to face poverty while white individuals are becoming wealthier by the day. These economic injustices need to be corrected through stronger BBBEE policies, which should also be enforced for both local and international companies to promote economic inclusion.	Nonkululo	Western Cape		unemployed individual
	2025-06-22 16:02:25	No I do not	Broad-Based Black Economic Empowerment Framework	Dear Rob , I started off owning nothing and had an oportunity, in the new SA to acquire majority shares in the business we now run as a family buiness, in 2005. This was not easy at the time since my late partner tried to do BBEE deal three times and all three times it was a matter of the other side wanted it for free. we, me and my children, two suns anda daughter and my wife built it into a very successful buinsess - sadly our daughter passed away in 2023. we have 90% of our 80 plus staff members being of other colour denomination and treat everyone fair. it is sad to hear that after 30 years it seems that it must just be a matter of us giving away all we've worked hard for. my sons and i start at 5am an work till late. i am now turning 69. i had the same opportunity as anyone else and we grabbed it with all our power. rules must apply to everyone and should this be allowed for Elon Musk so then it certainly places us who love our country and do not wish to leave, at a huge disadvantage.	HENNIE	Gauteng		business owner

	2025-06-22 10:00:51	No I do not	Broad-Based Black Economic Empowerment Framework	BBBEE is an essential framework for transformation and without it, many sectors will not empower black Africans.	Bianca	Gauteng		student
	2025-06-22 10:00:04	No I do not	Broad-Based Black Economic Empowerment Framework	We don't want musk and his business period we can consider it once musk is out of the equation	Yolisa	Western Cape		employed individual
	2025-06-22 09:54:35	No I do not	Broad-Based Black Economic Empowerment Framework	BBBEE should remain in force, this addresses the inequality that is existent. The resources of this economy must be shared equally by its inhabitant. Those opposing BBE are clearly greedy and oblivious to poverty affecting black SANS. Elon must adhere to policy, he is not special.	Onkgopotse	Gauteng		employed individual

	2025-06-22 09:54:24	No I do not	Broad-Based Black Economic Empowerment Framework	There is no need for starlink in SA. We have ISP's that are more than capable to serve South Africans without any agenda.	Andrew	KwaZulu-Natal		employed individual
	2025-06-22 09:53:44	No I do not	Broad-Based Black Economic Empowerment Framework	The Broad-Based Black Economic Empowerment (BBBEE) requirements should not be scrapped—and certainly not in response to Elon Musk's recent criticisms or ambitions. There are deep historical injustices in South Africa that necessitate corrective economic policies like BBBEE. The legacy of apartheid left black South Africans structurally excluded from the economy, and dismantling a framework designed to redress that is both reckless and premature. BBBEE is not merely a political gesture; it's an economic imperative rooted in constitutional values such as equality, human dignity, and redress. Elon Musk's disapproval should not dictate national policy. While he may be a tech innovator, his recent track record is marked by volatility, attention-seeking, and a tendency to bulldoze over local contexts in pursuit of dominance. South Africa is not a pawn in a billionaire's global chess game. We should not be swayed by his pursuit of control, particularly when it clashes with our sovereign agenda of inclusive growth and transformation. Moreover, the argument that BBBEE deters investment is reductionist. Serious investors who respect long-term growth and sustainability understand the value of a stable, inclusive economy. Scrapping BBBEE may offer short-term appeasement to a few foreign interests, but at the cost of further entrenching inequality and undermining social cohesion. Transformation is not optional—it's essential for economic resilience. Rather than discard BBBEE, we should refine it, root out abuse, and ensure it delivers broad-based results. But abandoning it altogether, especially under the pressure of self-interested actors, would be a betrayal of South Africa's moral and developmental obligations.	Thabiso	Gauteng

	2025-06-21 13:30:30	No I do not	Broad-Based Black Economic Empowerment Framework	BBBEE is the most destructive policy this country has ever embarked upon. Enriches maybe 100 Elites and no one, least of all Black People, benefit from it. Its a con and deceitful, and the sooner its off the record books the better for this economy.	John	Western Cape		self-employed
	2025-06-21 13:26:33	No I do not	Broad-Based Black Economic Empowerment Framework	Bee is now killing the companies by now should be more then enough equality...people should get on experience and degrees not colour's...is enough where are the white people supposed to get any jobs...is absolutely ridiculous	Heidi	Gauteng		
	2025-06-21 13:14:51	No I do not	Broad-Based Black Economic Empowerment Framework	This is unfair and pure favouritism.	Peggy	Limpopo		self-employed
	2025-06-21 12:59:00	No I do not	Broad-Based Black Economic Empowerment Framework	It is quite obvious that after three decades BEE is benefitting none other than the ANC cadres. The poor are getting poorer and BEE is causing skilled workers to seek work abroad. The brain drain is continuing and the economy is suffering. How can the country ever grow and develop???	Karin	Western Cape		employed individual
	2025-06-21 12:41:43	No I do not	Broad-Based Black Economic Empowerment Framework	I fully support the broad based black empowernment framework as there is still a huge economic gap in south africa . The black businesses still require development and mentoring from the succesfull businesses like star link . South Africa is a majority black community dominated country. If companies like starlink refuses to share or develop black businesses or offer 30%local employment what development does it bring to the country? The business can go somewhere else	vuyiwe	Gauteng		employed individual
	2025-06-21 12:30:55	No I do not	Broad-Based Black Economic Empowerment Framework	It is quite ridiculous to make such an amendment to accommodate a foreign entity to operate in South Africa. If Starlink wants to operate in SA it must comply with our laws and regulations for companies. The implications for local companies and our society are far reaching to set this precedent. We already have inequality in top management representation for African,Coloured and Indian people. Now to float rules that are trying to move us to an equitable footing and redress. We are regressing	Onesimo	Gauteng		employed individual
	2025-06-21 12:23:42	No I do not	Broad-Based Black Economic Empowerment Framework	BBBEE has empowered the previously disadvantaged in South Africa. It should continue to be implemented to so that there is equality in South Africa to redress the inequalities of the past.	Mmabatho	Gauteng		self-employed
	2025-06-21 12:19:18	No I do not	Broad-Based Black Economic Empowerment Framework	There should be no BBBEE and no discrimination Only merits should count	JOHANN	Limpopo		
	2025-06-21 12:18:51	No I do not	Broad-Based Black Economic Empowerment Framework	We still have a long way in fixing inequality in South Africa. While we appreciate foreign investments in South Africa BUT it should NOT be done at the risk of compromised empowerment policies	Lerato	Gauteng		
	2025-06-21 12:17:24	No I do not	Broad-Based Black Economic Empowerment Framework	Should the BBEE requirements be removed, non whites doesn't stand a chance to get business. As it is in the events industry, there's a select few WHITES getting the majority of big corporate events - whether a non whites costing is lower than a white person's costing is irrelevant. So should govt remove the BBEE requirement unfortunately there will be no business for non whites. From my experience whites will look after their own. Racism carries on silently but surely.	Anon	Gauteng		business owner
	2025-06-21 12:14:40	No I do not	Broad-Based Black Economic Empowerment Framework	I am tired that everything is South-Africa has to be about race.It is nit fair to me or my kids.We had nothing to do with Apartheid and now you are punishing and creating a new hate towards the advataged race.Sick of this. 	2025-06-21 10:37:06	No I do not	Broad-Based Black Economic Empowerment Framework	Contravention of South Africa's Constitutional and Legislative Transformation Mandate The B-BBEE Act and associated sector charters are grounded in the Constitution of the Republic of South Africa and represent non-negotiable instruments to rectify the injustices of apartheid. Granting an exemption would dilute the intent and integrity of this transformative legislative framework. 2. Precedent Risk and Regulatory Inconsistency A policy shift to accommodate a single foreign entity would create a dangerous precedent. It opens the door for future multinational applicants to seek similar concessions, eroding ICASA's regulatory consistency and weakening South Africa's policy sovereignty. 3. Competitive Disadvantage to Compliant Local Operators Domestic telecommunications entities have invested significantly in aligning with B-BBEE requirements. Allowing a competitor to bypass these obligations would unfairly distort the playing field, disincentivize compliance, and ultimately discourage local investment. 4. Exclusion of Black South Africans from Digital Economic Participation Permitting a global tech giant to operate without Black equity participation excludes historically disadvantaged groups from meaningful involvement in the high-growth digital and satellite connectivity space—one of the most critical frontiers of South Africa's future economy. 5. Availability of Viable Compliance Models Starlink and similar foreign firms have multiple avenues to meet B-BBEE requirements, such as local partnerships, joint ventures, or equity-equivalent contributions. A blanket exemption is neither necessary nor justified. --- Conclusion and Recommendation We strongly urge ICASA to reject any exemption to B-BBEE equity requirements for foreign ICT licensees. South Africa must not compromise its transformation objectives for short-term service gains, particularly when equitable models of compliance remain available.	Clarius	Gauteng		business owner
	2025-06-21 10:33:14	No I do not	Broad-Based Black Economic Empowerment Framework		Mercy	Gauteng		business owner
	2025-06-21 10:30:56	No I do not	Broad-Based Black Economic Empowerment Framework	There is a reason why the BBBEE policy was formed and implemented and it should stand. Changing it will will take the previously disadvantaged back to poverty as the big companies who have resources will start competing and the poor won't stand a chance of getting these tenders and businesses so it's a big NO from me the policy should not be removed or amended. 	2025-10-27 13:22:50	No I do not	Other	Satellites like Starlink burn up in the upper atmosphere during re-entry, releasing approximately 30 kilograms of aluminum oxide vapor per satellite—a compound known to erode the ozone layer. A study published on June 11, 2024, reveals that between 2016 and 2022, the presence of these oxides in the atmosphere has increased eightfold. The recent surge in satellite deorbiting is accelerating this form of pollution. In just the past six months, SpaceX has re-entered around 500 satellites, contributing an estimated 15,000 kilograms of aluminum oxide to the upper atmosphere. Despite the environmental consequences—ranging from space debris to atmospheric contamination—satellite operators are not held financially accountable. The burden of these externalities is distributed across society, rather than assigned to the polluters. A recent study led by Christopher Maloney at the University of Colorado Boulder, published in the Journal of Geophysical Research: Atmospheres, warns that within 15 years, the growing number of satellite re-entries could release enough aluminum oxide to significantly disrupt wind patterns and temperatures in the stratosphere. All this, so we can download the latest movie in five seconds. But at what cost? Carbon taxes loom, and the price of convenience today will be paid by our children—and theirs. The pursuit of profit continues, heedless of the damage. Wake up.	Charl	Western Cape		retired
	2025-10-21 17:59:49	No I do not	Other	If this is solely or mainly to have starlink in the country then I'm totally against it. If it was for any other reason perhaps my answer might be different.	Leah	Gauteng		employed individual

	2025-07-09 23:04:39	No I do not	Other	Elon Musk lied to POTUS about Afrikaner genocide so he can have BEE removed, yet there still is no redress of the injustices of the past. Black race, barring the looters who abused the intentions of BEE, remains economically worse off. Why must his company come in and benefit from our country? Giving the other cheek is not an option in this instance. NO,NO,NO to American Party infiltration. Based on what is happening on Twitter, CEO leaving a family business, our communications will not be safe. This will be high risk and dangerous, reversing all gains of our democracy, flawed as it is due to few yet heavy hitting destructors. We have engineers on this our continent who can develop our own trustworthy satellite internet. StarLink is not the way to go. Plain unethical. P.S. please add eight other official languages to the preferred language list tab. I have asked for this over and over, over the years and will continue to at every opportunity. If you be an inclusive platform you will be sensitive to all official languages. Ke a leboha.	Mosidinyana	Western Cape		self-employed

	2025-07-09 20:39:19	No I do not	Other	Reworking our legal framework for the interests of foreign capitalists rather than the impoverished who should benefit is counter-productive. Star link is also bad for the environment. If passed, this will set a pejorative precedent to the manner in which the private sector can manipulate the legislature.	Oreabetse			
	2025-07-09 20:37:13	No I do not	Other	I strongly oppose granting Starlink a free pass to operate in South Africa without adhering to our transformation and ownership requirements. South Africa's ECNS and ECS licensing laws exist to address decades of systemic exclusion and to ensure meaningful participation of historically disadvantaged South Africans in our economy. Allowing a large foreign company to bypass these rules undermines not only the legal framework but also the spirit of real empowerment and transformation. While I recognise the potential benefits of Starlink's technology, particularly for rural and underserved communities - we should not sacrifice our country's long-term equity goals for short-term gains or convenience. This kind of policy exception sets a dangerous precedent that echoes the logic of economic colonisation: powerful foreign interests extracting value without true local ownership or accountability. Instead of simply waiving requirements, I propose alternative approaches that could balance technological advancement with national development priorities: • Require Starlink to form genuine partnerships with local telecom providers or community-owned enterprises, ensuring skills transfer and shared economic benefit. • Create a transformation levy or fund, where Starlink contributes directly to rural connectivity initiatives, digital literacy, and infrastructure development: measurable, enforceable, and transparent. • Develop a new licensing category specifically for global satellite operators, with strict obligations to provide affordable access in underserved areas and invest in local ecosystems. We must be wary of repeating historical patterns where foreign corporations extract profit while local communities remain passive consumers rather than empowered participants. Any policy direction should prioritise actual, measurable outcomes for South Africans over corporate interests.	Keri	Western Cape		employed individual
	2025-07-09 20:21:06	No I do not	Other		Karen	Limpopo		retired
	2025-07-09 20:01:48	No I do not	Other	1) We do not need Musk's Starlink. The man is on record as treating his employees exceptionally badly, and he is a known white supremacist and possible nazi supporter. He has often stated his support for apartheid and his distaste for majority rule in South Africa. He has spread disinformation regarding farm genocide, which I believe has in part contributed to the decision by Trump to impose steep tariffs on South Africa. I would be mortified if South Africa changed its laws to accommodate someone as contrary to our values as Musk. 2) BBBEE has been a resounding failure. The solution when it comes to redressing the wrongs of the past and changing the employment dynamics in this country is not to abolish it outright, but to go back to the spirit of BEE, in which the best person for job is employed, and where there is more than one best person for the job, preference goes to previously disadvantaged people. We weight this in favour of women and then men (my personal two cents worth). We further urgently fix our broken education system and prioritise the education of those who cannot afford it, so people can compete on level playing fields. This should have been started 31 years ago, but if prioritised, we could fast-track it.	Joy	Gauteng		self-employed

	2025-07-09 18:52:35	No I do not	Other	Dear minister I'm glad I've read the letter written by starlink addressed to your office. For many years South Africa has received services from many different providers who aligned themselves with the BBBEE and EEIP. But this time out of nowhere we have a company that feels entitled to operate in our country without aligning themselves to the laws in our country. They're correct to remind us that it is their company and no one will have a piece of it just like that. South Africa is also our country and there are laws that must be followed. As a matter of fact starlink is not the only company that can provide fastest internet in the world. China has recently announced their fastest internet service, much faster than starlink. South Africa is already doing business with China whom they're already familiar with the laws of this country. Let us leave star link alone and look to China and what they can provide for us. In conclusion starlink has already shown us their true colors by collaborating with ICASA SE PUSH providing services to public without license. Are we really willing to do business with such kind of people? I don't think so. Elon Musk has already created enough problems for our country spreading false information of white genocide on his X platform. Today they're sworn enemies in just 6 months; he's creating a new political party in America. Elon Musk has also and publicly confessed to helping Donald Trump win elections using the same platform. Hoe do we know he is not going to turn against again in the future.? Sorry but no thanks these are not the kind of people to do business with.	Bongani			
	2025-07-09 18:41:21	No I do not	Other	We can't have the 30% black ownership requirement removed	Nenekazi			
	2025-07-09 17:49:10	No I do not	Other	The suggestion that certain corporations can be privileged to ignore South African legislation is abhorrent in the extreme, most especially when they are foreign owned. We have thousands of unemployed IT-trained graduates just waiting for the opportunity to develop a world-class national standard network; allowing Starlink to dominate the field would destroy this opportunity, which can be locally executed. Permitting Starlink to bypass our protocol would also indicate commercial subservience to American interests, at the most significant time when Africa, and ZA in particular, should be standing up for our own. Most importantly, giving a man-child like Elon Musk the power to arbitrarily turn it off, as he has done elsewhere, simply on a whim or for political purposes is a no-brainer, even if Starlink does comply with current legal practice. NO TO STARLINK!!!! PHANZI STARLINK!!!!	Ruth			
	2025-07-09 17:49:09	No I do not	Other	The suggestion that certain corporations can be privileged to ignore South African legislation is abhorrent in the extreme, most especially when they are foreign owned. 	2025-07-09 13:47:32	No I do not	Other	The BBBEE requirements already don’t benefit the larger public at all that much given that those with the necessary power and monies have found work around to ensure that they retain the said riches accumulated. As far as Starlink goes, the provider posses a larger concern of security issues to the nationals communication systems. Amendments for this single person have been made in the USA and he as an individual has not being operating in good faith of the state he is currently living in, what exactly makes us so sure that he will not do the same for our nation. Amending laws to fit the requirements of the operation of one individual is a slippery slope, it’s not a good reflection on our business operations and will open way to a lot more issues than security and manipulated communication systems for which he has already demonstrated such.	Ian	Gauteng		student

	2025-07-09 13:41:29	No I do not	Other	The so-called absurd and very useless BBBEE laws must get scrapped and done away with immediately. This nonsense was only supposed to be implemented during the first 10 (ten) years since the ANC took over here in SA in 1994. Instead, the ANC are still enforcing the very pathetic BBBEE laws 31 years later in SA?? The BBBEE has already proven to have null and void effects for the poor across all of the nations here in SA and it has only well benefitted a few of the ANC's well connected and elitists. This ludicrous BBBEE has only been so very negative with far too many limitations and restrictions for the SA private sector businesses to the great detriment of SA's economy and the SA citizens, causing huge unemployment everywhere and extreme hardships and difficulties for so very many SA citizens across all of the nations here in SA. It is so completely unacceptable that Malatsi from the DA has only singled Elon Musk's Starlink out for so-called "bending the BBBEE laws for Starlink here in SA". NO, not at all Malatsi, this is just not good enough at all, why only for Starlink? What about all of the other SA existing private sector businesses here in SA, about 600 of them being American? Surely it is very fair to then also bend the BBBEE laws for all of the existing private sector businesses as well? And then, why not just scrap the absurd and very useless BBBEE laws altogether here in SA, this is so very long overdue now? SA desperately needs very good economic growth right now, however, the BBBEE laws must be scrapped altogether to achieve the very good economic growth for SA and thereby creating more jobs for all of the SA citizens. Only the private sector businesses here in SA will be able to create many more jobs here, if there is very good economic growth taking place in SA, there is just no other way to accomplish this. The ANC must get their act together now and do away with their 1950s communist/socialist woke ideology and agendas, which is the ANC's NDR.	CE	Gauteng		unemployed individual
	2025-07-09 13:37:51	No I do not	Other	I do not support the rollout of Starlink in South Africa. While satellite internet may offer fast connectivity, it is unaffordable for the average citizen in a country already grappling with high unemployment and widening inequality. Prioritising such expensive infrastructure benefits a small elite while the majority struggle to access even basic services. Furthermore, the reliance on foreign-controlled technology for critical communications raises serious national security concerns. Our sovereignty and digital privacy should not be compromised under the guise of progress. We need locally driven, accessible, and secure solutions that benefit all South Africans—not just the privileged few.	Nani	Eastern Cape		unemployed individual

	2025-07-09 12:06:23	No I do not	Other	The BBBEE should be removed completely. Non of the monies taken by the BBBEE filter down to the disadvantaged community, but only to the elite members of the African National Congress. The BBBEE restricts investment that the disadvantage community could benefit from employment.	Alex	Gauteng		retired
	2025-07-09 12:03:53	No I do not	Other	The government is only looking after them self, as well as the people supporting them. There is many South Africans that are suffering just like parts of the black community "whom are getting grant's" with absolutely no support from Government. White South Africans must also work to feed our families. We are paying school fees every month, nothing for free.	Adele	Mpumalanga		employed individual
	2025-07-09 11:52:48	No I do not	Other	The only way the high hopes for change cycle is ended is when we stop forgetting what happened 2 minutes ago and stop letting the government screw us. I can't believe anyone wouild think if they give Elon musk the exception that will somehow transpire into everyone else getting a break from BEE. News flash, they've already been doing this for years with companies like Microsoft where there is no BEE requirement. Why the hell would I support FOREIGNORS being treated better than white CITIZENS of south Africa. This amendment is nothing more than a way to try and keep Elon musk from talking about the unfair politics of South Africa. I don't support it and you'd be stupid to say yes please cover up the racist laws of South Africa. Fuck no	Clark			employed individual
	2025-07-09 11:44:54	No I do not	Other	This policy only support a few selected people. I am all for supporting job creation where our people can have access to get a job to provide for their families, which brings back dignity and growing self-worth!	Lorraine	Gauteng		retired
	2025-07-09 11:06:09	No I do not	Other	As a South African, I’m genuinely concerned about the implications of granting a single individual sole control over our satellite infrastructure. This kind of concentrated power poses a serious risk—potentially allowing one person to hold an entire nation to ransom.	Themba	Gauteng		employed individual

	2025-07-09 10:50:03	No I do not	Other	REJECT AND DISSOLVE STARTLINK IN ITS ENTIRETY. Starlink is part of the Skynet Geofence Control Grid directly connected to the SMART Grid Infrastructure. Starlink is unnecessary, this project must be terminated and dissolved in its entirety. The SMART Grid Infrastructure is a weapon system. It must be eliminated immediately. We must simply stop doing this SMART activity in its totality and clean up this waste product. Stop, turn around 180 degrees, disassemble the material infrastructure, products and services and totally dissolve it. Whilst we are doing this activity, we can generate and establish the right types of activities that are positive and constructive for the betterment of all life forms on Earth, at its core it is based in benevolent behaviour. The reality show we are living in is not making the human experience pleasure-able. Everything is surveilled and recorded, we all have a digital twin version of ourselves that we did not agree to in writing with acceptance of realities outside/external to each respective divine human being. You make your own individual reality. This game of life is unnecessary and we can stop it in its tracks with ease. The military industrial complex is literally playing with life and death, playing a computerized weaponized game with real peoples' lives in real-time, without people knowing that this is happening to them. This must end now, game over. People with a predator-prey attitude cultivate a mindset of insanity. The moment to heal all wrongdoings is now. I have not entered into any agreement with any corporate entity or individual person, that gives evil doers free reign to conduct experiments on me or deploy weapon systems on me where I am the prey. I reject this agenda.	Nicolas	Western Cape		self-employed
	2025-07-09 10:49:03	No I do not	Other	Why do we need starlink? And why must we support Elon Musk at all? He's a racist fascist. Can we not look for other alternatives. 	2025-07-09 01:41:27	No I do not	Other	Serious National Security Concerns In addition to the policy concerns, there are very serious national security concerns. It has been widely reported that elon musk has used the technology to interfere in geopolitically sensitive areas such as the Russia-Urkaine war and more recently in Iran to satisfy his superiors ultimately being the US government and its military department by proxy-often threatening to switch off the connection to earn leverage in political negotiations or to target enemies. Given the hostility, that musk has shown to the country, this is simply untenable and no amount of perceived benefit should be allowed for us to substitute that for the country's sovereignty. Making an exception for someone who has expressed vitriol to the country outside of benefitting financially or otherwise generally and it's redress policies specifically is a recipe for disaster that should not be invited. Musk has also recently opened a political party and this would needless to say serve his and his potential funders interests. Is the government in a position to limit his power should be inevitable become an aggressor or otherwise? Unintented Policy Concerns Consequences There are various internationally successfully companies that have complied with the required policy without hassle and there is no reasonable purpose why the Musk cannot follow suit. The special treatment he requires has no valid justification beyond benefitting a private individual at the behest of another country's intelligence agencies. Furthermore, this would set bad precedent that would open the floodgates to wiping away well intentioned legislation that may despite its implementation flaws, work and serves a very serious and still unresolved structural issue in the economy of South African society. Sustainability & Capitate State a)Pair existing programmes which target vulnerable groups with this need b) Build infrastructure to maintain sovereignty & sustainability (consumer)	Phetso

	2025-07-08 17:02:05	No I do not	Other	Not only does this amendment set a dangerous precedent for the BBBEE framework, but Elon Musk and associates have demonstrated serious animosity towards South Africa. Trusting Starlink with critical internet infrastructure poses a risk which cannot be ignored - much worse with inadequate local ownership. It would make no sense for our government to put the national security of in such a vulnerable position. This is not a an abstract theory - there have been reports of Starlink's intervention in the military operations in Ukraine.	Fako	Gauteng		
	2025-07-08 16:57:56	No I do not	Other		Mats	Free State		
	2025-07-08 16:54:48	No I do not	Other	Starlink is a potential national security threat, as shown by Elon Musks hostility to South Africa and South African laws. Elon Musk has also peddled false information on white farm murders and has stated in the past that South African business regulations and ownership laws are "openly racist" . He has also previously stated that he can't do business in South Africa because he's not "black". He has also had public spats with Polish foreign minister Radsloaw Siorksi,where Musk stated "Starlink was the backbone of the Ukrainian army." and "their entire front line would collapse if I turned it off. " Siorksi responded by saying "Starlink for Ukraine is paid for by the Polish digitization ministry at the cost of 50 million a year." He also added that " The ethics of threatening the victim of aggression part, if Spacex proves to be an unreliable provider we will be forced to look for other suppliers. " This led to Musk telling Siorksi to" be quiet small man" Musk has also in the past limited Starlink in Crimea which was criticized by the Ukrainian government. " The EU has had a sovereignty push to counter to reduce reliance on starlink. Countries like India blocked Starlink registration for two years because of national security concerns before implenting strong data localization and strong off switch control centres for government in an agreement. All these instances show a track record of Musk and Starlink been hostile and used to threaten other nations and also national security concerns that Starlink brings.	Sanele	Gauteng		student

	2025-07-08 15:59:55	No I do not	Other	We should not bow down to external pressures, just to accomodate erratic people like musk. Starlink is going to be very expensive for South Africa, we do not have the money. Let us explore and compare other affordable satellites and choose for ourselves, not to be dictated to by the rich business man, who is not even in government. US is shunning off Musk, because as trump says, his business is costly to the US, needs huge subsidies. There won't be even more jobs created by Starlink coming to SA, these high tech companies use Ai, hire less people and mainly hires Boffins (mainly Asia & China). The wealth created by allowing Starlink will benefit Musk and the rich business men, owning Seabed and MTN. Now same as BEEE, we will be enriching the Rich, at the expense of the poor. Offering rural police stations better communication via Starlink will not solve crime, when they don't have bakkies to respond. Or are not willing to respond, same with rural clinics, but no medication, nor Dr's &, nurses. We need not rush into Starlink it's not going to be a magic wand to our basic problems, which need wise usage of funds that are scarce.	Nohle	Gauteng		retired
	2025-07-08 15:57:49	No I do not	Other	I do not believe Elon Musk has any good intentions for South Africa. He has shown us the scant regard he has for our country and importantly our people, by supporting the egregious mistruths of white genocide. He sided with Trump whose politics go against everything we as clear-thinking and progressive South Africans stand for. We need to believe people the first time.	Sarah	Gauteng		employed individual

He's racism should not be entertained.	Noluthando	KwaZulu -Natal		employed individual

	2025-07-08 05:07:19	No I do not	Other	The deployment of Starlink in South Africa warrants a critical analysis, particularly concerning national security implications and ethical business practices. Firstly, Starlink represents a potential national security risk for South Africa due to its connections with the United States government. Given the divergent perspectives between South Africa and Western nations on various global issues, integrating Starlink's services could facilitate unauthorized access to sensitive South African classified information. This situation raises concerns about the possible leverage that the U.S. government could exert on South Africa's strategic decisions and international posture. There is a notable apprehension surrounding the current U.S. administration's disapproval of South African legal frameworks and its economic and political orientations, which may further complicate bilateral relations. Secondly, the differential treatment of telecommunications companies in South Africa highlights ethical considerations around fair competition. If the South African government imposes stringent regulations on foreign entities, such as Vodafone and Saudi Oger, while allowing exemptions for Starlink, it undermines the principles of equitable market access. This inconsistency especially impacts local investments, as significant capital has been injected by these established companies into South Africa's infrastructure and skills development. Such disparities in regulatory enforcement may not only skew the competitive landscape but also deter future foreign investments essential for the country's economic growth. In summation, a thorough examination of Starlink's operational framework in South Africa exposes critical areas of concern regarding national security and the moral imperatives of maintaining fair competition within the telecommunications sector.	Odwa	Western Cape		business owner
	2025-07-08 04:30:38	No I do not	Other	To be clear, BEE is not without flaws. Issues such as fronting, elite enrichment, and weak enforcement have undermined some of its intended outcomes. These are serious challenges that require reform and tighter regulation. However, these issues are not grounds for abandoning the policy altogether. Rather, they highlight the need to strengthen and refine the framework to ensure its integrity and broaden its reach to benefit more people — particularly women, youth, rural communities, and informal sector workers. Calls to eliminate BEE often ignore the fact that South Africa remains one of the most unequal societies in the world. According to the World Bank, the top 10% of the population still holds more than 80% of the country's wealth. Without BEE or an equivalent redress mechanism, economic power will remain entrenched in the hands of a minority, reinforcing inequality and stifling inclusive growth. Market forces alone will not correct centuries of exclusion. Beyond its role in justice, BEE is an economic necessity. Inclusive economies are more innovative, stable, and resilient. When more citizens have access to opportunities, the benefits multiply — increasing productivity, strengthening the tax base, and reducing the burden on the state. BEE, when properly implemented, is not just morally sound but economically strategic. In conclusion, South Africa is not yet in a position to eliminate BEE. The socio-economic implications of doing so would be far-reaching and regressive. Instead of discarding the policy, we must work to make it more effective, transparent and inclusive. Only through deliberate and sustained redress can we build an economy that truly serves all South Africans.	Nonhlanhla	Gauteng		employed individual

	2025-07-07 21:32:55	No I do not	Other	B-BBEE is the best policy in South Africa if utilised properly, and in a non-corrupt way. We are an NGO that has educated over 24,000 marginalized and unemployed black South African youth, and have been able to leverage B-BBEE funding to support a lot of this real and true genuine transformation work. These graduates earn in excess of R2 billion per year combined salaries, and very conservatively will earn over R59 billion over their working careers combined. Elon Musk and Starlink could choose an equity equivalent option. He is not really interested in the wellbeing of South Africans, but only in his own profits and back pocket. Frankly, i don't believe for one second we should change national policy for the good of uplifting black South Africans, because of the whims of the richest man in the world. Please don't destroy an extremely helpful policy framework, that realistically is doing good for hundreds of not thousands of NGO's like ours, that utilise B-BBEE properly to improve the lives of those most poor, vulnerable, and marginalised. Many of these NGO's will be at risk of not continuing their great work, or even survival, if the B-BBEE framework is removed.	Adam	Gauteng		employed individual

	2025-07-07 19:53:56	No I do not	Other	Our network infrastructure may not be the best, however it does not warrant the changing of our laws to introduce a foreign entity which also aims to interfere with our state sovereignty, all in pursuit of "better network connection". It sets a very dangerous precedent. How is a foreign entity able to dictate how our laws are to be exercised? Our laws cater for our past as a country, which is only unique to South Africans. This only means that those who wish to participate in the economic activities need to conform to same, not the other way around. Insufficient reasoning has also been given regarding the adjustment of our laws. We need a credible reason from the Starlink as to why they wish to exclude themselves from the policy, and that explanation would have to be in line with the values and principles founded in our constitution.	Siphamandla	Gauteng		employed individual
	2025-07-07 19:50:13	No I do not	Other	Musk will use starlink for his own benefit. He is not concerned about access for the poor or people in rural areas. 	2025-07-07 19:24:13	No I do not	Other	The policies where created for a reason and other organisations have adhered by them without bullying the country into submission through false narratives. An organisation that seeks to operate in south Africa should understand our context and policies and respect them, without these policies it leaves room for a wider economic gap and private companies not filling it. The existing policies are the reason we have a black middle class now and upper class.	Mulweli	Gauteng		business owner
	2025-07-07 19:19:26	No I do not	Other	I strongly feel that ib every instance of BBBEE, tha public should be ad ised who hadbenefitted from BBBEE , and the Rand value of the ad antage of the benefit. It seems only a very few individuals benefit from the policy, in contrast to the title of BROAD BASED bla k E ONOMIC EMPOERTMENT !	Daniel			retired
	2025-07-07 19:13:34	No I do not	Other	Telecommunications are - almost by definition - a core part of a country's national security apparatus and purview. The amendments proposed will see the erosion of BBBEE, but importantly compromise the effective governance and oversight ICASA should have over South Africa's telecommunications sector and airspace. It remains unclear whether Starlink would adhere sufficiently to our regulatory regime. The behaviour of both Elon Musk and Starlink as an ISP does not suggest this will be the case. The capitulation proposed by the Minister and government will set a precedent that other MNCs will come to expect when doing business in South Africa. Of greater importance: no sufficient case has been made on the question of market competition nor quality of service. Anecdotal reports from sadac countries suggests that Starlink does not in fact offer a superior service. This is despite a sustained campaign to suggest internet connectivity to rural areas. SAs big telcos - Vodacom, MTN, Telkom et al - are already making great strides. SA's internet penetration is the highest on the continent and ranks high among middle income countries. Starlink clearly sees an opportunity to not only gain a foothold into Africa via SA, but a strategic advantage in the encroachment of SA National security. We must take heed of Starlinks conduct in Ukraine	Rorisang	Gauteng		employed individual
	2025-07-07 19:11:38	No I do not	Other	As a member of the security cluster, I have security concerns over what Starlink will access without restriction. We must always remember that we are a sovereign company and no country's entity should rule supreme over our country.	Meeka	Free State		employed individual

	2025-07-07 15:04:11	No I do not	Other	Elon Mask can not try and dictate the law of the land in South Africa. BEE exists for a reason and should not be changed because of one man’s childish tantrums. If Elon wants to operate in the Republic he should follow the Republics rules of law or he can fokoff. At this point it is evident that Starlink is desperate to operate in SA, so we have the upper hand. If the rules are bent for Elon, what makes the minister think the other international companies operating within South Africa will not want to also abandon BEE and fire the people who have stakes their company because of the policy. BEE is a redress policy, let’s not forget that Black South Africans are still struggling and own next to nothing in their country	Kelebogile	Gauteng		self-employed
	2025-07-07 15:02:41	No I do not	Other	Safety & Security for South African sovereignty.	Kgahliso	Gauteng		self-employed
	2025-07-07 14:58:43	No I do not	Other	1. The regulations set forth by the Independent Communications Authority of South Africa (ICASA), which mandates 30% ownership by historically disadvantaged groups, represent a significant policy under the democratic government. The indiscriminate transmission of electromagnetic radiation (EMR) internet to various countries undermines their national sovereignty. South Africa regulates the EMR spectrum and sells it like real estate. 2. South Africa boasts a 74% Internet penetration rate and 80% surface coverage, facilitated by well-established local Internet service providers. These companies employ local citizens, contribute to the national tax base, and, in some instances, have government ownership. They are also publicly traded on the Johannesburg Stock Exchange (JSE), enabling citizens to purchase the shares. These entities constitute substantial economic assets. 3. Nations that adopt Starlink prior to the establishment of local Internet service providers risk undermining their potential to develop indigenous telecommunications companies. Such countries may become dependent and remain subject to the influence of Musk, Starlink, and the United States indefinitely. 4. This scenario mirrors the extractive and exploitative dynamics that characterise the relationship between Big Tech and Africa. Starlink perceives South Africa merely as a revenue source, disregarding its status as a sovereign state with its own legal framework and requirements.	Sinethemba	KwaZulu -Natal		student
	2025-07-07 14:45:30	No I do not	Other	Changing laws for one company sets very dangerous precedent. Additionally, Starlink is a national security risk.	Refilwe	Gauteng		business owner

	2025-07-07 10:24:04	No I do not	Other	To mitigate these threats, it is essential that South Africa takes proactive steps. Regulatory bodies like ICASA must be empowered to enforce local licensing, demand transparency in data routing, and oversee the distribution of satellite terminals. National intelligence services should be equipped to track and monitor satellite-based communication networks within sensitive regions. Additionally, the South African government should invest in local alternatives—through institutions like the South African National Space Agency (SANSA)—to ensure long-term technological independence and resilience. In conclusion, while Starlink offers clear advantages in terms of connectivity and technological advancement, it also poses a complex array of threats to South Africa's national security. From undermining data sovereignty and regulatory control to enabling criminal networks and geopolitical interference, the implications are far-reaching. A balanced approach that embraces technological innovation while safeguarding national interests is essential for ensuring that the benefits of satellite internet do not come at the cost of South Africa's security and sovereignty. 	2025-07-07 10:23:01	No I do not	Other	Starlink is a security risk for our country and we	Matome Motalane	Limpopo		unemployed individual
	2025-07-07 10:22:46	No I do not	Other	The potential use of Starlink by criminal or non-state actors also poses a grave concern. Starlink terminals are portable, easy to install, and difficult to trace, making them attractive tools for groups operating outside the law. These include terrorist organizations, illegal mining syndicates, smugglers, and gangs—especially those operating in remote areas where traditional communication networks are limited or nonexistent. With access to secure, high-speed satellite internet, such actors could coordinate activities more effectively while remaining beyond the reach of local surveillance and interception capabilities. There is also the issue of economic and regulatory disruption. By offering fast, affordable internet in rural or under-connected areas, Starlink could undercut local internet service providers (ISPs), some of which are state-owned or heavily regulated. This could lead to reduced revenues for the state, destabilization of domestic telecom sectors, and increased dependency on foreign technology providers. Furthermore, Starlink's operations often fall outside the scope of local taxation and compliance structures, weakening the state's ability to enforce its digital and economic policies. Lastly, the service introduces a subtle but significant geopolitical risk. In times of international conflict, a foreign-owned communications infrastructure like Starlink could be used as a tool of foreign policy leverage. For example, access to the network could be denied to South Africa if its political stance were to conflict with U.S. interests. In such a scenario, Starlink becomes not just a neutral service provider, but a strategic asset under foreign control—capable of influencing South Africa's domestic and international policy choices. 	2025-07-07 09:59:29	No I do not	Other	One of the most pressing concerns is the loss of data sovereignty. Traditionally, internet data within South Africa is routed through local servers and infrastructure that fall under the regulatory purview of national institutions such as the Independent Communications Authority of South Africa (ICASA). Starlink, however, routes data via foreign satellites and servers, often located in the United States. This raises the risk of sensitive government, corporate, and citizen data being intercepted, stored, or monitored outside South Africa's jurisdiction. In a time when data is considered a strategic national asset, such a loss of control could weaken the state's ability to safeguard national interests. Closely tied to this is the threat of surveillance and espionage. The decentralized and globally accessible nature of satellite internet makes it difficult for South African intelligence and cybersecurity agencies to monitor communications effectively. There is the potential for hostile actors—be they foreign intelligence agencies, cybercriminals, or even rival corporations—to exploit Starlink's infrastructure for surveillance. This is especially concerning in areas of strategic importance, such as military installations, government facilities, and state-owned enterprises, where sensitive data may be transmitted through satellite connections that lie outside national oversight mechanisms. Another significant threat stems from the undermining of national communications control. South Africa's government traditionally maintains control over internet and telecommunications infrastructure to ensure compliance with laws and policies, especially during times of national crisis. Starlink operates outside these conventional systems, making it difficult for the state to enforce lawful intercepts or to implement emergency communication shutdowns if required. In effect, Starlink introduces a parallel communication system that may be beyond the reach of South African law.	Sibabalwe	Eastern Cape		employed individual
	2025-07-07 09:59:24	No I do not	Other	There's a level of inequality that's not appreciated here. And simply removing a transformative policy for the sake of more "Wifi" speaks to the shortsightedness of it all, and the depthness of privilege. Who's gonna be able to afford Starlink anyway? Certainly not the average South African., I can tell you that. We have a growing local industry with so many options and we need to give it room to grow; we have the capacity and technology and we don't need Elon's Starlink over here. It's these growing white owned companies that are gonna suffer actually. It's also a serious state security issue because he's part of the U.S government.	Brian	Free State		employed individual

	2025-07-07 06:12:54	No I do not	Other	While the idea of improved internet access may seem progressive, bypassing transformation legislation for any foreign entity—no matter how powerful or high-profile—sets a dangerous precedent. It opens the door for further erosion of empowerment frameworks, not only in telecommunications but across other critical sectors. One clear example is already playing out in the property market, where the unchecked influx of digital nomads is driving up rental prices in major cities like Cape Town and Johannesburg. Let us not create a dangerous precedent that weakens transformation under pressure from high-profile billionaires or multinational corporations. Instead, let us find solutions that serve both connectivity and justice. Remember it starts with Mr Musk , but what happens when digital nomads starts getting more rights?	Hildah	Gauteng

James	Western Cape		retired
	2025-06-29 15:56:48	No I do not	Other	People start a business to improve their and their families lives and often to follow a passion of theirs. SA is asking them to do all that while improving the country by taxes, employment etc and at the same time they must bring the expertise, take the risk then they are forced to take on partners and now employment based on race. It's risky enough to expand or start a business without having their hands tied. Also today it's 30% and what will it be tomorrow. We desperately need jobs and new business. SA should be doing everything it can to facilitate that and stop hampering it. The increase in jobs will naturally increase the number of blacks of both genders employed. What does BBBEE say - if you are black it's the only way you can be employed?! That's just plain insulting. Also at the end what will BBBEE accomplish - swop the employees such as white for black. As we are only 8% of the population and not all of us are employed - this must mean that black youth etc will still not have acess to the economic market as there are not enough white jobs available. I think this is a delaying tactic of the ANC and at the end of it economically SA will be worse off as it continues to decline	Colleen	KwaZulu -Natal		employed individual

	2025-06-24 09:16:16	No I do not	Other	The discontinuation of BBBEE will lead to a continuation of the economic apartheid that has existed in SA for hundreds of years. The argument that black empowerment represents corruption and mismanagement and has crippled this country, is nothing when compared to the corruption that existed before, in the name of apartheid. Do you recall the looting that happened under Eschel Roodie, Connie Mulder, BJ Vorster, Adrian Vlok and the many, many others government employees and ministers of the apartheid government? The time for equality for all South Africans can only be achieved through interventionist policies such as BBBEE.	Percy	Western Cape		retired
	2025-06-24 08:27:08	No I do not	Other	Keep Elon Musk out of South Africa. We do not need a white supremist to profit off South Africa. Hand off our country, Elon!	L	Western Cape		self-employed
	2025-06-24 08:10:52	No I do not	Other	We should not change our country's policies to satisfy blackmailers. White supremacy should have no place in our country and we should not even be engaging with the question of whether to allow white supremacists to blackmail us into funnelling more wealth into their own pockets at the expense of our nation's future. If anything we, and the rest of the world, should be putting sanctions on the US and US companies, not rewarding them for their strong-arm politics. BBBEE has it's own issues, mostly with people trying to get around the system or to use their positions to inflate prices. In my personal experience the people who complain about it the loudest are simply upset because they now have to compete with a larger pool of talent, meaning they actually have to be capable of doing a small portion of their job, or treat their co-workers with dignity. These are not the people our policy making should aim to appease.	Sara			self-employed
	2025-06-24 07:36:00	No I do not	Other	South Africa should consider maintaining the 30% Broad-Based Black Economic Empowerment (BBBEE) ownership requirement for several key reasons, especially in the context of historical redress, economic inclusion, and long-term national development.	Mmopiema ng	Gauteng		employed individual
	2025-06-24 07:26:07	No I do not	Other	It's a huge concern when there's a change to accommodate one foreign company, whereas there's been an outcry from South African companies about the same issue. It just shows South Africans are not taken seriously. Elon might be from South Africa but he doesn't have SAs best interest at heart.	Pinky	Gauteng		business owner

	2025-06-23 19:27:42	No I do not	Other	BBBEE is central to black people's success and economic development, and it should continue so for the next 5 centuries to address the imbalance of the past (apartheid).	Tshiu			
	2025-06-23 19:27:40	No I do not	Other	BBBEE is central to black people's success and economic development, and it should continue so for the next 5 centuries to address the imbalance of the past (apartheid).	Tshiu			
	2025-06-23 18:18:42	No I do not	Other	I write to strongly oppose any attempt to amend South Africa's BEE laws to exempt Elon Musk's Starlink from the 30% black ownership requirement. As a black South African who lived through the consequences of apartheid and systemic exclusion, I find such a proposal deeply troubling and unacceptable. BEE is not a bureaucratic inconvenience, it is a constitutional imperative born from the urgent need to address centuries of dispossession, exclusion, and economic injustice. To exempt Starlink or any other foreign company from these requirements is to undermine the entire project of economic transformation and betray the spirit of our democratic transition. We are not against foreign investment. On the contrary, we welcome it, but on terms that respect our sovereignty and national priorities. Global tech giants like Microsoft, Siemens and many others have operated successfully in South Africa while fully complying with empowerment laws. Starlink is no exception. Creating exceptions for Starlink sends a dangerous signal: that the rules apply only to local businesses, while foreign billionaires can dictate their own terms. It entrenches inequality, distorts the market, and sets back the transformation agenda by decades. This is not merely a policy debate, it is about the soul of South Africa's economic future. I urge the government to reject this proposal outright. We cannot afford to weaken BEE. The stakes are too high, for our dignity, our development, and our democracy.	Vuyo	Western Cape		business owner

	2025-06-23 14:44:54	No I do not	Other	If you want to change the outcome of an event, you need to change the input. After 30 years of BBBEE, the unemployment rate is at its highest ever. There must be something wrong as we have no economic growth and obviously BBBEE is a major contributor to the unemployment problem as it stifles growth. Economic growth will automatically favor the previously disadvantaged because of the numbers and demographics of our County.	Leon	Gauteng		self-employed

	2025-06-23 14:15:41	No I do not	Other	No. Not for me. You are misguided on this one, Rob. Don't use one issue to "solve" another. Reasons why I'm not cheering on Starlink: 1. Starlink and the proliferation of satellites is interfering with Astronomical observation and causing light pollution. You might as well pack up the SKA project. No more "good nights" for them, Mr Goodnight. 2. We need more schools and teachers first. Digital is not a substitute. 3. Not keen to increase human dependency on digital systems and potential for increased digital surveillance. Snigger all you like about conspiracy theorists, but there will be a tipping point, if not tipped already. The following articles are about "Starshield". Is Starlink there to muddy the waters? Have one cover for the other? Normalise all this satellite swarm activity? Who knows. Do read and consider the implications: https://www.reuters.com/technology/space/musks-spacex-is-building-spy-satellite-network-us-intelligence-agency-sources-2024-03-16/ https://www.worldatlarge.news/2024/03/19/us-intelligence-contracting-with-spacex-to-build-a-satellite-panopticon-no-one-can-hide/ The looming digital panopticon will be aided and abetted by these linked systems. The new "space race" is a ridiculous and insane race to shove as many satellites up into the atmosphere as possible. If we think they're not up there to surveil, data-harvest and do work for the military-industrial complex, we're being naive. It will be great for central digital currencies though, right? Yay! I'm not a knee-jerk "hater" of Elon. I don't know the man. I cheered on his defence of free speech. Maybe his intentions are pure. Maybe he's not too clued up about the human implications and is too in love with all the "cool" science potential of this universal connectivity. I haven't a clue. But I do not like the way that things are heading. Call it paranoia if you want. Conspiracy theory. I really don't care. Humanity needs to catch a wake-up. How about we all just start saying "NO"? 	2025-06-23 11:29:32	No I do not	Other	We need employment. BEE is hindering this process. I have no problem in previously disadvantaged people receiving equity. However, it must be people that are competent & capable of running business.	Nevil	KwaZulu-Natal		business owner
	2025-06-23 11:27:35	No I do not	Other	The purpose of BEE legislation has always been to ensure that previously disadvantaged people have had a fair chance at participating and creating jobs and wealth in a democratic South African economy. It sets a terrible precedent if our government shows willingness to bend and alter the rules for one international company. It will start with Starlink in the telecoms sector but once the precedent is set it will spread to other sectors and before we know it our economy will be run by whoever comes with the most foreign currency with no guardrails that ensure South African citizens have an equal opportunity to participate. If all other telecoms companies can abide by current legislation then so can Starlink, we should not have to change the laws in order to make Elon Musk comfortable with investing in operations in South Africa.	Gomolemo	Gauteng		employed individual
	2025-06-23 10:53:05	No I do not	Other	More anti white, racist laws are not going to improve the economy. The game is competing internationally. South Africa has created handicaps for itself with BEE. From dissuasion of international investment, to SA companies moving operations offshore. The answer, before taking more, is to CLAW BACK the billions of rands that landed in the hands of a few connected black beneficiaries and use it productively for all South Africans.	Gavin	Western Cape		unemployed individual

	2025-06-23 08:53:57	No I do not	Other	My concerns are ALL of the above. Our government is not to be trusted. Everyone believes that BEE will be amended to the better. I think that judging from the past, the ANC will NOT make an about turn on BEE and use some lame excuse as to why it will only be for this sector and not other sectors. IF the ANC was serious about change, make the change NOW!!	Michael			business owner
	2025-06-23 08:47:02	No I do not	Other	There must ownership by the majority of share holder and the users of the services, South Africa is not for sale. the purpose of te B-BBEE programme is enhance economic activities of local inhabitants. the mere fact there has been abuse doe not mean you have to away with it. SA cannot undue other process that applied to other foreign investor, same rule must apply.	dees	Gauteng		
	2025-06-23 08:31:05	No I do not	Other	No, I do not support the proposed policy direction. The proposed amendments appear to prioritise the interests of foreign investors over those of South Africans. This shift undermines the core objectives of Broad-Based Black Economic Empowerment (BBBEE), which is to redress historical inequalities and promote inclusive economic participation for previously disadvantaged South Africans. It is deeply concerning that such policy changes seem to be tailored to accommodate individuals or companies who have shown little regard for the country's well-being. For instance, Elon Musk made unfounded and damaging claims about South Africa, alleging genocide against white farmers. These false statements not only misrepresented the reality on the ground but also harmed South Africa's international image and potentially its economy. Policies should never be adjusted to suit the agendas of foreign entities at the expense of national development goals. South Africa must uphold its commitment to empowering its people, protecting its sovereignty, and ensuring that economic opportunities primarily benefit its citizens.	Rabelani	Gauteng		unemployed individual
	2025-06-23 08:30:02	No I do not	Other	Musk is a corrupt individual and I do not want his technology in our country. He is an unstable, untrustworthy character and people of his ilk should not be given special dispensation simply because of wealth.	Barbara

	2025-06-23 07:37:58	No I do not	Other	We have laws in this country for a reason — they are the backbone of our sovereignty, designed to protect our people, our institutions, and the integrity of our nation. It is utterly unacceptable for any external individual, no matter how wealthy or influential, to believe they can dictate or bend national policy simply because they want to do business here. If anyone wishes to engage commercially within our borders, they must respect and comply with the legal frameworks that govern us — just as we would be expected to do in their country. Allowing a single person to pressure or manipulate state decisions is not only dangerous — it is a direct insult to our democracy and our hard-won autonomy. This kind of coercion undermines the very foundation of our legal system and sets a precedent that power and money can override justice. It is madness — and frankly, a national embarrassment — that such a proposition is even being entertained. We must remain principled, not pliable. Our laws are not negotiable bargaining chips — they are a reflection of who we are as a people.	Masedi	Gauteng		employed individual

	2025-06-22 00:19:12	No I do not	Other	Why do people always want samthinǵ for free? SA is a democracy but wants a dictatorial way of getting things done. This is morally wrong and must be against the law because the government does not care about creating jobs for all of SA. Black people supporting this must come speak to me. We are making SA poor and keeping people out of jobs.	Chris	Gauteng		employed individual
	2025-06-21 22:43:22	No I do not	Other	The amendments ar proposed due to a certain individual and company. Therefore, it must comply with SA policies like other foreign companies.	Nangamso	Gauteng		employed individual
	2025-06-21 22:37:01	No I do not	Other	Not only starlink but other international companies as well. Need need to create jobs for our people as well as for the youth. Government is stealing the money and lining their own pockets. Profits can go into the communities and uplifting everyone.	Nadia	Western Cape		employed individual
	2025-06-21 22:02:43	No I do not	Other	Elon is not special. Our country requires redress and it should not be amended to cater an apartheid beneficiary. Starlink also bypasses local authorities and will definitely be used by the US for covert reasons to undermine South Africa and South Africans.	Riyaad	Gauteng		employed individual
	2025-06-21 21:55:22	No I do not	Other		Elizabeth	Gauteng		employed individual
	2025-06-21 21:45:04	No I do not	Other	BEE policies unfairly benefit one group while excluding others, creating new divisions rather than fostering unity. and should be scrapped totally, so that we get more international investments	Raymond	Gauteng		retired
	2025-06-21 21:39:43	No I do not	Other	Please remove this BEE legislature. It won't help the poor - only the rich.	Elizabeth	Western Cape		retired
	2025-06-21 21:36:46	No I do not	Other	BEE policies unfairly benefit one group while excluding others, creating new divisions instead of unity. Nelson Mandela stood for equality for all, not selective empowerment. True progress requires uplifting every disadvantaged South African, not enriching a few. All BEE frameworks should be abandoned in favour of a merit-based, inclusive system that reflects Mandela's vision and serves the whole nation fairly.	Emil	KwaZulu -Natal		self-employed
	2025-06-21 21:23:37	No I do not	Other	Elon Musk is a white South African of Canadian descent, and he grew up as a privileged white young man in Pretoria during apartheid, when black people who were equally capable were not allowed to operate any business in the country. He emigrated back to Canada and later to America, where he became the richest man in the world. He cannot come here and run roughshod over our policies, which were properly consulted through a democratic process. We cannot change our policies to suit one individual. Besides, South Africa is regarded as one of the most unequal societies in the world. While BBBEE is not the panacea for the glaring challenge of racially based inequality in South Africa, it does present a safeguard against its perpetuation and it also provides a window of opportunity for black people who are in the majority in this country to have a meaningful participation in the mainstream economy of the country. if we allow this policy change, it will mean we are not serious about ending inequality in South Africa. Apartheid has no place in our democracy. Changing the policy to suit Starlink or any such people as Elon Musk would mean this country is degenerating back into apartheid policies, excluding blacks from participation as co-owners in the economy. Lastly, many jobs will be lost when Starlink comes to our shores. Any policy change should be affirmative and progressive as opposed to being conservative.	Thokozani	Gauteng		employed individual
	2025-06-21 20:30:28	No I do not	Other	I do not support	Rehana	Gauteng		retired
	2025-06-21 19:01:19	No I do not	Other	I have a few concerns that the minister seems to overlook. 1. The minister seems very passionate about creating a path for a company that has been operating illegally however long that is in South using the name "Sparkling". 2. He is really going all out just to give license to this corporation that is opposed to the empowerment of local SMME's knowing very well that we have a high unemployment in the country? Starlink is not going to employ everyone who is unemployed with qualifications in the sector but with the empowerment of SMME's, that 30% will help stretch resources to create jobs. BBBEE is only bad until someone who has been sitting home unemployed receives a call to report for work as a result of SMME that got empowered because of the 30%. Nobody ever asks how the SMME made their money to hire them, black or white. 3. If anything the minister does to deserve our support is a) to enforce 30% policy to empower local businesses in creating more jobs, b) Work with department of justice and NPA to enforce the law that is already existing to deal with related corruption in government. 4. As far as I'm concerned the minister is seeking to take opportunity to play party politics more than creating path for investment to create more job opportunities in the country. 5. I'm sure starlink is not the only high-tech company that would like to invest in South Africa. So far all we know is that starlink is owned by Elon Musk who will go to any lengths just to break rules and getting what he wants (Spreading white genocide propaganda about our country, using his X platform to manipulating Ai Grok). I think at the least starlink together with ICASA se PUSH should be fined if not banned for its illegal operation in South Africa It may look like an opportunity presenting itself perhaps to have space X launching successfully in South Africa and Africa for the first time if it ever will because it keeps on reporting mission unsuccessful and blowing up in the USA.	Bongani			
	2025-06-21 18:55:14	No I do not	Other	Elon musk is against SA and should be declared a persona non grata. We cannot trust him with our information.	Mosa			
	2025-06-21 18:09:21	No I do not	Other	This policy is noy helpful for our current unemployment problems.	Mary	Gauteng

	2025-06-21 12:39:18	No I do not	Other	BBBEE is meant to redress the injustices of the past and as long as inequality persist, BBBEE should remain. Starlink must comply.	dzivhu	Gauteng		business owner
	2025-06-21 12:19:16	No I do not	Other	My opinion is for 30 years we all had the same change in life to work for what you want to earn for what you work for you start a business you work to start it if you need help you get it from bank if you a partner to help it is your choice off partner not by the government . Black empowerment can fall away life is turnd around in all the years we are all equal you are still creating apart tyd only fise vers with BBB it make you a racists and you part off old world	theunis	Gauteng		employed individual
	2025-06-21 12:01:43	No I do not	Other	Musk is not trustworthy. They have abused starlink in colour revolutions against governments. They will use it against our government. Do not allow starlink to operate in South Africa.	nassim	KwaZulu -Natal		self-employed
	2025-06-21 11:49:33	No I do not	Other	Musk seems to hate South Africa. I personally know of people who have lost their livelihoods because of the influence of Elon on Trump. The families are so distraught. Elon seems manipulative and will use South Africa the same way he uses X. I don't think he cares about black people. Most of the people who support him seem to hate black people. I don't think business people with selfish agendas should pressurise government just because they have money.	Thabang			
	2025-06-21 11:32:04	No I do not	Other	We all know now that data is the new gold and starlink and palentir are after people's data and control of the US population. Why would we want that in our country and make it easy for private foreign companies to spy on us too and sell that information to god knows who?! We says our country won't also be attacked for „regime change" to get tongue mineral wealth. I do t think people think that far, but in our current world situation they should. Also, when Elon gets a bee in his bonnet and just turns it off when he wants, there's zero accountability. I agree with no more BEE, but I don't support having starlink here anymore.	Zena	Gauteng		self-employed
	2025-06-21 10:48:55	No I do not	Other	SA economy remains heavily skew. The laws and policies need to enforce balance and recognition of persistent disadvantage to certain groups in SA.	Sehlareman g	Western Cape		employed individual
	2025-06-21 10:47:56	No I do not	Other	No, I do not support the proposed policy direction to ICASA to amend the BBBEE requirements. These requirements are essential for promoting inclusive economic transformation and addressing historical inequalities. Weakening them could reverse the progress made in empowering previously disadvantaged communities.	Siboniso	Gauteng		unemployed individual

	2025-06-21 06:44:08	No I do not	Other	I say NO to anything USA or Elon Musk. We are a BRICS country and should support China with far superior technology. The USA and other Western Countries, the traditional so called West that rule the world is fast losing control and their economies are falling apart. We live in a multi polar world and cannot be ruled by an ever warmongering Western block. I am realistic and know Big Tech in USA is still dominant but Ai changed everything for all. The world can finally step out of the shackles of the past and be brave in a new world, although extremely dangerous, also exciting at the same time.	Leon	Western Cape		business owner
	2025-06-21 06:19:11	No I do not	Other	Economic inequality in this country is huge. Government is expected to address 300 years of inequality and fix it in 30 years!?! Impossible. BEE is the vehicle to achieve greater equality, but it has been hijacked by corrupt, greedy government officials and tenderpreneurs. Even so, whites still hold the majority of wealth and opportunities in this country.so I do not support the scrapping of BEE. I support a measured meaningful application of the principles from grassroots up.	Ru	Western Cape		employed individual
	2025-06-21 06:15:48	No I do not	Other	Why must It be Elon Musk?	Samson	Gauteng		employed individual
	2025-06-21 06:15:22	No I do not	Other	Why should we bend our laws for an individual. What's so special about him.	Welcome			
	2025-06-21 06:13:59	No I do not	Other	Let free trade rule. The brain drain is huge in this country due to BEE. It is now time to give every South African registered individual an equal opportunity to apply for a job offered. After 30 years we now need to come together.	Brian	Gauteng		retired
	2025-06-21 05:53:18	No I do not	Other	We cannot allow some minister from a party without the outright majority to bend the country's policies and rules for an individual like Elon Musk and to return the favor to their political party funders, BBBEE is must in a divided country like ours to continue to address the challenges faced by the most unequal countries in the world,	Efos	Gauteng		employed individual

	2025-06-21 05:42:29	No I do not	Other	This is done to accommodate Starlink, which we do not want in SA, as it can be used to manipulate political activities in SA. As it has been shown in Ukraine, when Ukraine was not dancing to US music. We cannot expose ourselves to an erratic, control freak. It is also expensive. Having connections to police stations to report crime & they respond that they don't have vehicles to do their job, it's a wasteful expenditure. Same as having telecommunications in remote clinics, yet they don't have medical staff, nor medication. We need drones, but not from Starlink. The Govt will not even be able to enforce that the required investments that Starlink has to make are done, they cannot even enforce rehabilitation of closed mines , nor control environmental damage caused by mines, etc.	Nohle	Gauteng		retired
	2025-06-21 05:23:18	No I do not	Other	Everything about this legislation :enriches ANC party " elite " -never used to uplift black SAns - only politicians / already ultra wealthy corrupt cronies . Whatever the original intention of the law was (broadly worded) there has been no help to empower / nor assistance to the average black for training . Cyril's intention =Outright theft of money by the thieving govt cadres and sycophants with no business acumen nor intention to enlighten themselves about business / work - this is massive theft and a conduit to private and personal wealth . Any taxes levied should have gone int the fiscus not into private hands . (Cyril's machinations) ANC ape the behaviour of Putin and his inner circle - all for elite and henchmen . Putin and the oligarchy have not destroyed industry / business because they have a few brains and business acumen and do not destroy and sabotage profitable enterprises because although they're run by favoured cronies ,they're not under the control of complete idiots lacking intelligence , experience, knowledge lack of business acumen and common sense . These ANC thugs are useless politicians , stupid , totally incompetent and without a smattering of business acumen. They intentionally destroy everything - sabotage is part of the strategy . Their wealth is created by theft of others property state enterprises will ultimately come into ANC private hands . Not smart enough to preserve viable businesses. So avaricious they steal and plunder everything now .BBEEE=theft of money that others earn . No way ANC will give this up. They'd have to be ousted . They don't care about success of country or people.	Sally	Gauteng		retired
	2025-06-21 04:54:55	No I do not	Other	This Mr Racist Elon nonsense is a potential threat. I'm not even worried about spy threats. He just wants to control Africa ? with his network, enslave the technology system to benefit him as an individual. A product of apartheid that has no brains like that will us his starlink to take back South Africa to where he believes it was better off. He is willing to offer it even for free because the Agenda is not really business but full control of the continent	Masigcinane	Gauteng		employed individual
	2025-06-21 04:10:51	No I do not	Other	They must remove all race based laws. Geez 30 years later and this stupidity hasn't worked. The black majority people need to wake up.	Michael	Outside SA	Mauritius	retired

	2025-06-20 21:03:26	No I do not	Other	I don't have a problem with amending the legislation, which relies on race classification anyway and should therefore never have been passed because it is unconstitutional. That's not the point, from my perspective. But I'm against this development because it is intended to enable Starlink to operate in South Africa. Starlink is an extremely destructive programme. The convenience it provides is massively overshadowed by the problems it introduces. Spraying 7000 satellites into orbit - and the plan is to increase this to 34000 - is posing the greatest-ever risk to spaceflight. They call these "small" satellites, but even the smallest weigh as much as a 500cc motorbike. If one of these hits a manned spacecraft, both would be totally destroyed and everyone killed instantly, releasing a big cloud of debris chunks that pose an even greater hazard. This is madness and should not be supported by any sane person. Read https://en.wikipedia.org/wiki/Kessler_syndrome for a possible outcome scenario.	Francis	Western Cape		employed individual

	2025-06-20 14:40:47	No I do not	Other	YOU WANT TO GIVE CONTROL (MONOPOLY i say it again a M O N O P O L Y) OF A PUBLIC UTILITY TO ONE PERSON (WHITE), BECAUSE YOU DO NOT WANT A LARGER OWNERSHIP (BLACKS) OF THAT UTILITY? IF MUSK WANTS OUR BUSINESS THEN HE MUST COME ON OUR TERMS, NOT HIS TERMS. THE SA STATE MUST OWN AT LEAST 30% OF THAT CORPORATION TO ENSURE THAT THE BILLIONAIR IS NOT CONTROLLING US. HAS THE GOV ASK THE CHINESE FOR THEIR OPTION? OR HAS MUSK BRIBED ALREADY SOME MINISTERS/ANC CADRES TO GET THE BUSINESS? TYPICAL AMERICAN WAY TO DO BUSINESS. THERE ARE OTHER OPTION AVAILABLE	Tony			retired

	2025-06-20 14:20:36	No I do not	Other	Starlink is part of the Skynet Geofence Control Grid directly connected to the SMART Grid Infrastructure. Starlink is unnecessary, this project must be terminated and dissolved in its entirety. The SMART Grid Infrastructure is a weapon system. It must be eliminated immediately. We must simply stop doing this SMART activity in its totality and clean up this waste product. Stop, turn around 180 degrees, disassemble the material infrastructure, products and services and totally dissolve it. Whilst we are doing this activity, we can generate and establish the right types of activities that are positive and constructive for the betterment of all life forms on Earth, at its core it is based in benevolent behavior. The reality show we are living in is not making the human experience pleasure-able. Everything is surveilled and recorded, we all have a digital twin version of ourselves that we did not agree to in writing with acceptance of realities outside/external to each respective divine human being. You make your own individual reality. This game of life is unnecessary and we can stop it in its tracks with ease. The military industrial complex is literally playing with life and death, playing a computerized weaponized game with real peoples' lives in real-time, without people knowing that this is happening to them. This must end now, game over. People with a predator-prey attitude cultivate a mindset of insanity. The moment to heal all wrongdoings is now. I have not entered into any agreement with any corporate entity or individual person, that gives evil doers free reign to conduct experiments on me or deploy weapon systems on me where I am the prey. I reject this agenda. First look at the relationship that is the initial condition of provision on Earth: ultimately, no human being can own/possess Earth, people or anything within Earth. You are a steward that has a responsibility to care for and complement the integrity of the Earth.	Nicolas	Western Cape		self-employed
	2025-06-20 13:56:40	No I do not	Other	The policy can be looked at and explored for best possible solutions for South Africa and all its people, but definitely not for the benefit of Fat Cat Musk!	Natalie	Western Cape		employed individual
	2025-06-20 13:51:03	No I do not	Other	Keep Elon Musk as far away from SA as we can, we are not going to be happy is this is allowed, come on people...use that brainbox	Claudia	Western Cape		employed individual

	2025-07-25 03:51:25	No I do not	Policy Direction	Majority of Black South Africans were excluded in all spheres of the Apartheid Regime that deprived them of their Democratic Rights exclusion to the Economy and the Growing as Enterpreuners delayed most South Africans their Rights to Exist as Humans but Only as Slaves in their own Country of Birth	Enock	Free State		Non-profit
	2025-07-23 06:21:39	No I do not	Policy Direction		Riaan	North West		unemployed individual

	2025-07-21 05:55:34	No I do not	Policy Direction	Our reform strategy might not have been absolutely poor but its practical implementation is impossible if you still want to save a struggling economy. We simply can not absorb the terrible losses it creates due to poor skill and performance by a high percentage those receiving these positions. We have seen collapse of state owned companies and the only exception is SARS. Which makes one wonder if SARS should reveal its records of BBBEEE employment statistics. It might help to get a real picture of a workable solution or at least shed light on why other's are failing dismally. One can not exclude corruption from this picture which asks of us whether BBBEEE is simply creating a culture of free for me and an entitlement that supports corruption. Since our BBBEEE HAS FAILED TOTALLY in its goals I fail to see what a more unrealistic approach will achieve now?!! It's time to get real about economic growth and ensure employment for EACH AND EVERY PERSON irrespective of colour. That's not achieved in the current or previous BBBEEE approach. Stop focusing on race and start focusing on our economy- then we would not need BBBEEE to reform- the economic growth would ensure reform.	Hannelie	Gauteng		employed individual

	2025-07-14 01:52:29	No I do not	Policy Direction	Why must an individual called Elon Musk have such powerful influence and authority to amend the entire act which is already constituted simply because he does not support distribution of wealth and economy against the previously disadvantaged groups in South Africa? Most white South Africans have a problem with the laws of enforcing Equality, they believe laws which are meant to address and redress the past socioeconomic injustices are a reverse racist system against them. The whole point of such equality laws are meant to redress past injustices, henceforth they enacted in the first is to assist and create a balance in the distribution of wealth- economy amongst the previously disadvantaged groups in South Africa who were systematic socially and economically suppress, repressed and oppressed for centuries! Therefore a mere 30 years into democracy people suddenly it's enough to amend policy directions which are meant to address inequality in the financial and economic sector amongst the citizens of the country and the evidence of poor and poverty stricken communities mostly in black, coloured and Indian South Africans are staggeringly shocking. The very nation of trying to amend the BEE policy is unconstitutional and in violation with the Constitutional Preamble that states... "we Recognize the Injustices of the Past"! But here we are 30 years later people are trying to amend the laws and policies meant to Address the Injustices of the past! Hypocrisy, Unethical and No Truth Preserving in line with the introduction of our constitution Preamble.	Mpumelelo	Gauteng		student

	2025-07-11 20:05:48	No I do not	Policy Direction	Thank you for the opportunity to comment on the proposed policy direction regarding Broad-Based Black Economic Empowerment (B-BBEE) in the ICT sector. I write to strongly oppose the proposed changes that would soften existing B-BBEE requirements, particularly those relating to equity ownership and the recognition of equity equivalent investment programmes, especially for multinational corporations such as Starlink. The policy's stated aim is to promote internet access for poor and rural communities. However, the implication that companies like Starlink can help achieve this goal is highly questionable. Starlink's costs are prohibitive: The upfront cost for equipment is around R14,999, with monthly fees of R880–R1,799 depending on usage (MyBroadband, May 2025). Minimum wage vs. cost: The current national minimum wage is about R4,376.08 per month. For many South Africans, particularly those in rural areas, even this wage is out of reach (HBFI, May 2025). These figures show clearly that Starlink and similar services are out of reach for the very communities the policy seeks to help. If the goal is to close the digital divide, relying on a high-cost provider that serves a niche market is not the answer. We need scalable, affordable, locally rooted solutions. This proposal also risks severely undermining legal certainty and the rule of law in the business environment. Thousands of companies have complied with B-BBEE ownership requirements over the years, often restructuring their businesses and forming lasting partnerships with Black South Africans. They did so in good faith and within the framework of South Africa's legal obligations. If the government now allows multinational corporations to bypass these requirements under the guise of "equity equivalent" programmes, this opens the door to a flood of legal challenges. Companies that followed the law will rightly ask why others are now excused. We can expect lawsuits from businesses seeking compensation or the right	Ziphozonke	KwaZulu -Natal		student
	2025-07-11 15:50:05	No I do not	Policy Direction	"An injury to One is an Injury to All" Either the B3E2 laws have failed to achieve more than the creation of a new bourgeoisie to compete with the rump of the olde remains former bourgeoisie in a combo scene versus the rump of the broadly divided proles [if I may use specifically marxist terms to convey reality] Or it is a failure… In which case it should be trashed and enable the country to unleash the potential that is being bureaucratically restricted from growth. This idea of giving some neo-mercantilist a monopoly base of power over the ability to hire only high performing talent to it service is proposing a change in a famous slogan to be a blessing to ONE is an injury to ALL. 	2025-07-10 19:43:25	No I do not	Policy Direction	I wish to raise serious concerns regarding the recent proposals by Minister Malatsi in the Communications Ministry, which appear to favor Starlink's entry into the South African market without enforcing critical empowerment measures. While the establishment of B-Road based BEE was meant to address the historic inequalities entrenched by apartheid, it is disheartening to see these very inequalities being sidelined in the face of multinational corporate interests. Firstly, Starlink's reluctance to comply with South Africa's legislated 30% Black Economic Empowerment (BEE) ownership requirement, as well as skills transfer and local empowerment mandates, undermines the spirit of economic transformation. Granting them evergreen contracts or market access without these conditions risks entrenching foreign dominance and marginalizing local enterprises and skills development. South Africa cannot afford to be a mere market for foreign technology giants without securing meaningful participation and benefits for our people. Secondly, the proposal does not adequately address the risks posed by Starlink's ownership and operational control under Elon Musk, whose technology has been controversially linked to geopolitical spying and military interventions. There are documented concerns around Starlink's role in foreign conflicts, including allegations of being used for intelligence gathering and offensive operations by Mossad, Israel, and the US in Iran. This raises significant national security risks for South Africa if such technologies are allowed unfettered access and control over critical communication infrastructure. Thirdly, Minister Malatsi's approach sets a dangerous precedent of allowing multinational corporations to bypass local regulatory frameworks designed to ensure equitable economic participation and safeguard national interests. This not only disempowers South African companies but risks creating a parallel communication ecosystem vulnerability.	Ayanda	Mpumalanga		business owner
	2025-07-10 19:32:17	No I do not	Policy Direction	Black people are still underprivileged. We cannot amend a policy that seeks to wrong the injustices of our past because a white man, who benefitted from the injustices of that past, threw a tantrum in the international media, with his ex-boyfriend president. The reality is, South Africa has a disproportionately unequal society. What message would we be sending the our citizens and the international community, if one white and powerful man can have our sovereign laws and policies amended, not for the benefit of South African citizens but just to fill his own already fully stuffed pockets. Any company that wishes to operate in this country, should follow and abide by the laws and policies of this country. South Africa is heavily reliant on foreign investment, whilst plundering billions of tax payer money to corrupt politicians and ill run state owned entities. We need to stick to our guns and show the international community that the government is fully committed to addressing the inequality in our country. These same international companies don't think twice about withdrawing from our country, leaving thousands of South Africans unemployed just because it no longer suits their bottom lines. If Elon Musk wants to run starlink in South Africa, he should abide by the laws of this country. If not, we can shop around for other enterprises that have the same or similar product on offer. Tesla has competitors, so I don't doubt that starlink does too, maybe even competitors who may be willing to abide by South Africa's laws and policies. A lot of the people who are voting in favour of this change, are most probably historically privileged people who have access to this kind of information and who believe that B-BBEE has no place in South Africa. For the mere fact that millions of black and disenfranchised South Africans don't have access to this information, can comment on this information, is exactly why the B-BBEE needs to be further enforced	Ledi

	2025-07-10 15:21:35	No I do not	Policy Direction	It's extremely concerning for public policy to be shifted in such a critical way based on the demands of a businessman who has not invested anywhere near what he already could have in our great country, and only will proceed with doing it now on the condition that he doesn't have to work with our black South African people. Why, now, should we capitulate to his demands, given what we know about his failing technology, stolen intellectual property, and problematic employee satisfaction record? What right does he have to use wealth taken out of our country under apartheid, and use it to force us to abandon our transformation agenda? Please do not allow our country to be sold off wholesale to incompetent robber barons like this.	Taryn	Gauteng		self-employed
	2025-07-10 13:34:24	No I do not	Policy Direction	Removing BEE requirements will pave the way for Starlink and it's 100% white ownership to railroad all and any initiatives in South Africa to redress the economic imbalances that were prevalent under apartheid and previously under colonialism. The cliched promises to the previously disadvantaged of jobs and economic advancement have been around since Jan van Riebeeck relieved the indigenous people of valuable possessions by entrapping them with worthless baubles and rusty trinkets. Other white owned companies will forthwith soon follow Starlinks disdainful lead and jettison initiatives to redress economic imbalances in South Africa. The litmus test will be whether or not black ownership of national resources increases or the current divide between the "haves" and "have nots" increases. Elon Musk is not a philanthropist sympathetic to the cause for equality in South Africa, that much is evident. He is an economic raider that will result in the monopolization of our telecommunications industry and the silencing of free speech in South Africa.	Selwyn	Western Cape		unemployed individual

	2025-07-10 07:03:29	No I do not	Policy Direction	BEE , BBBEE and Employment Equity has contributed immensely in get a lot of black professionals and businesses that would've been otherwise overlooked. Even with great qualifications and skills, as a black person a person need to be as twice as their fellow white counterpart to be considered in many cases. South African inequality is skewed and black people are on the worse side of the scale. BEE and BBBEE should be amended to have stricter rules that makes it hard for the politically connected to get involved particularly when it comes to SOEs, Government Departments and all other Pubic institutions. Taking it away is not the answer. Minister Solly Malatsi is only doing what the opponents of this BBBEE expect of him.	Tshifhiwa	Western Cape		employed individual

	2025-07-09 22:02:57	No I do not	Policy Direction	This is the modus operandi of all racist thinking. It's to remove the protection of the marginalised & legitimise biased apportioning of jobs, tenders, & procurement of land ownership. It's already evident in the Western Cape, under the racially biased DA, where land ownership by locals had become impossible. Non whites aren't asking for free land. Only value based prices that allow for all to partake in the purchasing thereof. Right now, hectares are being sold off, rather given to Eastern Europeans. Those very same thinking lot who have pushed the native Palestinians off their land. As Nelson Mandela said: We will never be free, until the Palestinians are free!!! Hasn't elon musk been privileged enough?! So much so that he's made billions & how has he contributed to the development in SA?! Now that he's messed up the welfare system in the US & sat beside idiot trump when SA white Afrikaaners farmers were being invited to take refugee status in the US?!?! When will they stop their famed interference?! When they bring SA to it's knees again, as they did by bringing apartheid here & thereafter, pretending to be the nation's saviours & purporting to bring about an end to an unjust system they created, then will they step in again, to apparently save us!!! This is elon & his oligarch friends who want to bring about such rivalry on SA as to bring her to her knees again!! SO NO, NOT AGAIN!! This thinking is what's causing the chaos all over the world. We are aware of what you're trying to do. This is white supremist behaviour, aka zionism, in its raw state, being masked as fairness for the disadvantaged!! When were Whites ever disadvantaged?! Who holds the best paid top positions in SA?! In whose hands is the country's most wealth?! Stay in USA elon. We don't need your biase here!	Rochelle	Gauteng

	2025-07-09 09:30:08	No I do not	Policy Direction	While I strongly support the advancement of technology and improved connectivity. I do not support the proposed removal of BBBEE ownership requirements as a blanket trade-off for enabling one foreign company's operations. Here are key reasons for my stance: 1. Undermining Economic Redress and Constitutional Mandates.South Africa's Broad-Based Black Economic Empowerment (BBBEE) framework exists to correct the structural inequalities created by apartheid. The ECNS and ECS licensing requirements—such as the 30% ownership by historically disadvantaged individuals—are not arbitrary. They reflect a constitutional commitment to transformation, equity, and economic inclusion. Removing these obligations to accommodate a single entity—however prominent—sets a dangerous precedent of bending transformative legislation for foreign commercial interests.2. Risk of Precedent: Weakening BBBEE Across Sectors.The argument that this could lead to the removal of BBBEE requirements in other sectors is deeply concerning. This policy change would not be an isolated decision—it could trigger a domino effect that erodes South Africa's hard-won policies for inclusive economic participation. This is not simply about Starlink, but about the future integrity of transformation policies across industries.3. Alternatives Exist Without Sacrificing Transformation.South Africa welcomes foreign investment—but not at the cost of national developmental goals. Many international companies operate successfully within the existing regulatory framework, often by partnering with local businesses or creating innovative ownership models that meet transformation goals while delivering.4.Transformation and Access Should Not Be Pitted Against Each Other.The notion that South Africans must choose between fast internet and economic justice is a false dichotomy. South Africa should not be bullied directly or indirectly into sacrificing its transformation goals to appease global corporations.	Haseena	KwaZulu-Natal		employed individual

	2025-07-09 08:14:42	No I do not	Policy Direction		Aikon	Eastern Cape		
	2025-07-09 08:06:46	No I do not	Policy Direction	Public policy is the instrument through which public good is achieved. The narrative that BEE esp in ICT does not work because of public cases of corruption and other moral hazard driven examples, drowns out the greater good it has achieved. The ever growing middle class rests on a substrate of collaborative support (even if it feels like forced compliance to some) between government, private enterprise and civil society. Altering or worse still, removing BEE to suit one organization, may worsen inequality. In the context of Starlink - it may also have unintended and adverse consequences for the country's sovereignty.	Khulekani

	2025-07-08 16:41:07	No I do not	Policy Direction	The policy does not need to change. What needs to change is Starlink's attitude towards doing business in South Africa. They could've appointed a distribution partner and had everything work in a manner that would have created jobs. Other satellite companies follow this method and they have succesful operations in South Africa. OneWeb is also a LEO satellite service and they have distribution partners as in BCX and QKon. So why can't Starlink and Project Kuiper follow the same method. Changing the policy will put hundreds of licensed companies at risk of losing the value of their licenses and infrastructure.	Pedro	Gauteng		business owner
	2025-07-08 16:38:45	No I do not	Policy Direction	Why must we bend the knee for Elon? It’s not like the BBBEE shares are free!	No			employed individual
	2025-07-08 16:33:13	No I do not	Policy Direction	We can not chop and change policies to favour some individuals. If starling wants to serve South Africa, they MUST comply with the current policy, it's not difficult Besides, this will open a can of worms for the country	Vusumuzi	Mpumalanga		retired
	2025-07-08 16:30:12	No I do not	Policy Direction	Whilst I agree that BBBEE has been a way for corruption to spiral out of control, however, by amending the bill, we could potentially be creating another problem which will allow STARLINK (which is owned by a RACIST) who has on numerous occasions been siting his dislike for South Africa as a country and has also insulted the acting of being racist. WHY WOULD WE AGREE TO ALLOW ELON MUSK to benefit by opening the path for him to launch starlink.	Moegamat Zane	Gauteng		business owner
	2025-07-08 16:29:25	No I do not	Policy Direction	The increased presence and radio wave directioning of Starlink satellites will overwell and eventually control the telecommunication network in South Africa . The effective number of jobs that will be created is questionable. Also the number of satellites in our sky will increase the radio frequency pollution reducing the radio telescope research of which results ultimately creates more jobs.	ANDRIES	Western Cape		retired
	2025-07-08 16:18:59	No I do not	Policy Direction	If Musk does not want to adhere to BEEE requirements he can leave us alone. Morever the marketing behind this is that it will be cheap and accessible to all which is a lie as monthly subscription is twice the amount of average income in SA. Lastly this network has been proven to be used for insurgency and since Musk and Co. Are on Israels side this is also a matte of national security.	Mzi	KwaZulu-Natal		unemployed individual
	2025-07-08 16:18:32	No I do not	Policy Direction	Get rid of this outdated notion that has NOT worked. Only helping the top 5% of rich cadres!!!!!!!!!! Too much unemployment. Stupid dumb policy like most of the ANC dumb policies and cadres	thea	Western Cape

	2025-07-08 14:40:23	No I do not	Policy Direction	BEE policy framework is fine. We can't change simply to accommodate Elon Musk. Until I am satisfied blacks are emancipated economically, I am wont support anything that revokes policies meant to address economic gaps and injustices od the past. I am actually disappointed with the Minister because he is betraying his fellow black people to please the minority interests.	Kgancho	Gauteng		employed individual
	2025-07-08 14:33:19	No I do not	Policy Direction	White people in South Africa are still holding major share of the economy of this country despite them being a minority. The government has , so far not done enough to reverse the imbalances created by the apartheid government policies, which mainly favored white people economically. No particular favor should be given given to any white owned or foreign owned company when it comes to black empowerment, including Elon Musk.	Tswelopele	Gauteng		business owner
	2025-07-08 14:19:44	No I do not	Policy Direction	The proposed amendments pose a risk to the initial intention of the BBBEE where South Africa continues to be one of the most unequal countries in the world. There is a need for equal opportunities and a redress of the past which starlink poses a threat to. Our laws cannot be amended solely for starlink, this not only poses a threat but also undermines our law making it subject to anyone who possess power, money and influence. Starlink should adhere to the initial requirements the same way other American companies have. Our law cannot be bent solely for starlink. His decision to want starlink to operate in South Africa without adhering to the requirements undermines our country's sovereignty.	Lehlohonolo	Gauteng		student
	2025-07-08 14:19:07	No I do not	Policy Direction	The current legislation was put in place for a reason. The direction this proposed amendment is going into is not favorable for everyone and will open up room for further exploitation.	MJ	Gauteng		employed individual

	2025-07-08 12:54:48	No I do not	Policy Direction	We are nowhere near transformed enough to be thinking about removing BBBEE requirements	Mojalefa	Gauteng		employed individual
	2025-07-08 12:45:43	No I do not	Policy Direction	The BBBEE requirements are crucial in addressing the injustices of the past and fulfilling the transformation mandates set out in South African law and within our Constitution. Allowing an amendment for Starlink and possible endeavours of Elon Musk creates issues pertaining to the following: 1. This amendment would open a legal loophole and set precedent on how to circumvent South African policy. This risk is tremendous as once approved, the precedent will render our BBBEE framework effectively useless with no recourse to enforce compliance. There is a greater risk, too, that all international companies that took the strides to be compliant will rethink and evaluate whether it is worth their effort to remain compliant thus rendering the intent of the BBBEE Framework useless. 2. The admission of Starlink into South Africa poses a security risk. Elon Musk expressed how dependent the Ukrainian communication apparatus is on Starlink and how he can disrupt their communication on a whim. The lack of oversight over the governance of Starlink poses a risk. Other countries have also raised eyebrows on the security risks posed by Starlink. Elon Musk has visibly expressed discontent and spread false propaganda regarding the current political and legal climate of South Africa through his X social media app and the forced manipulation of the Grok artificial intelligence platform. While we cannot deny his desire to operate within the country, we cannot amend a law for an individual who does not see the value in the South African law and its Constitution. If Musk and by extension Starlink cannot respect the laws of the country and abide by them, then they should not be allowed to operate in the country.	Thapelo			employed individual

	2025-07-08 11:46:31	No I do not	Policy Direction	Why should South African laws be amended to cater to specific companies?	Lesego	Gauteng		business owner
	2025-07-08 11:44:39	No I do not	Policy Direction	The lack of transformation in South Africa remains a challenge. Allowing a "bypass" of BBBEE will not benefit South Africans in the long run. I would rather see local development to provide services in partnership with international companies rather than international companies dominating our market. Although the digital divide is a major concern in South Africa, I do not see that this Policy will impact that positively. Starlink and other such systems may provide coverage but, without understanding the underlying constraints that result in this digital divide in South Africa, I don't see how allowing a license to such operators will work towards narrowing that divide. There are also other market players other than Starlink. Any policy change should be taking into consideration other providers and ensuring that there is simultaneous development of local capacity and skills. If you are changing the policy, look at investing in the local players that could become serious providers some of which are already providing satellite technology to the world. Rather look at removing constraints for them to operate and grow. BBBEE is not a constraint to doing business. Most countries have laws that require local investment or similar. The equity laws in place in South Africa reflect a moral and social imperative to support transformation. Why are we backing down on these very important goals due to one company's lobbying? That doesn't mean that BBBEE doesn't need some rethinking and realignment but it should be with the ideals that ALL need access to opportunities by redressing imbalances of the past through our policies and actions.	Sharon	Gauteng		employed individual
	2025-07-08 11:43:58	No I do not	Policy Direction	The captains of industry must implement the BBBEE policy correctly not to use politicians as gate keepers inorder to circumvent transformation and real empowerment, thereby including them in these transactions as their fronts and not promote economic in the country.	Sipho	Western Cape		self-employed

	2025-07-08 10:53:26	No I do not	Policy Direction	The CLOUD Act primarily amends the Stored Communications Act (SCA) of 1986 to allow federal law enforcement to compel U.S.-based technology companies via warrant or subpoena to provide requested data stored on servers regardless of whether the data are stored in the U.S. or on foreign soil Starlink is a satellite internet constellation operated by Starlink Services, LLC, an international telecommunications provider that is a wholly owned subsidiary of American aerospace company SpaceX SpaceX receives significant funding from the U.S. government, primarily through NASA and the Department of Defense, in the form of contracts and awards. Huawei was banned primarily due to security concerns raised by the US government. These concerns stemmed from allegations that Huawei's equipment could be used for surveillance or espionage by the Chinese government, potentially posing a risk to national security. I have the same concern about Starlink as the US government has about Hauwei The U.S. has faced criticism and accusations of violating various international laws and treaties across several areas, including human rights, humanitarian law, and arms control. On a balance of probabilities the USA will violate our Digital sovereignty which refers to the ability of individuals, organizations, and nations to control their digital destiny, encompassing data, technology, and infrastructure, ensuring autonomy and self-determination in the digital realm. It involves having control over one's own data, the ability to operate critical digital infrastructure independently, and the capacity to develop and control key technologies	Risimati	Gauteng

	2025-07-08 10:28:28	No I do not	Policy Direction	Besides the BBBEE policy amendment bringing foreign investments for SA, it'll bring a lot of costs to us at large. One thing we tend to forget when we industrialize our surroundings is the Environmental costs. Starlink satellites are said to increase the damage in the ozone layer and worst of all they will interfere with our radio frequency of the SKB telescope located in the Karoo. Now with all the climate extremities we have been facing recently, the floods in the Eastern Cape for one, do we really need to put our climate through even worser conditions? We can never compare ourselves to 1st world countries who have the means to mitigate such events themselves -who welcome Starlinks investments without phase. We relay on equipment imported from those countries to remedy our situations. The BBBEE was put in place to rectify years of social, ethic and economic injustice. It is said to have run its course, but I totally disagree we can never put a timeline on how one heals. This framework is the only way we protect ourselves and ensure we get a piece in the pie after the injustice we've faced. We cannot shrink ourselves to accommodate others. Just like how a visitor can never get to dictate how the house runs, Starlink has to revise it's own policies that meet the BBBEE framework if it wants to invest in SA. If not, it can kiss SA goodbye.	Lucia	Mpumalanga		employed individual

	2025-07-08 10:08:35	No I do not	Policy Direction	Amendment of policy should be to the benefit of South Africa and South Africans. Businesses that wish to do business with South African should adhere with the prescripts and requirements of the country. Furthermore if the government amends policy to accommodate starling, it is setting a precedence where more and more businesses who feel that they do not want to adhere to South African policy, they too can fight to have the said policies amended to their advantage. So in short the policy should not be amended for Starlink to operate in South Africa. If they do not want to adhere to our policy then we do not need such businesses in South Africa.	Kanyisa	Eastern Cape		unemployed individual
	2025-07-08 10:08:35	No I do not	Policy Direction	Amendment of policy should be to the benefit of South Africa and South Africans. Businesses that wish to do business with South African should adhere with the prescripts and requirements of the country. Furthermore if the government amends policy to accommodate starling, it is setting a precedence where more and more businesses who feel that they do not want to adhere to South African policy, they too can fight to have the said policies amended to their advantage. So in short the policy should not be amended for Starlink to operate in South Africa. If they do not want to adhere to our policy then we do not need such businesses in South Africa. 	2025-07-08 09:18:58	No I do not	Policy Direction	The greatest cause for concern should not be that BBBEE policy is the subject of proposed amendment, it is that any governmental policy is being amended at the demand of a foreign based private company. It is the beginning of a slippery slope. Starlink is not the first foreign company wishing to do business in South Africa, nor will it be the last and were it to be successful there is nothing stopping another foreign based mining company, for instance, wishing to do business in South Africa demanding that price control measures be amended or that taxes be reduced, prior to it opening its doors in South Africa. It is the strength of the South African government's ability to defend its policy more than it is about BBBEE as an adopted policy of the government.	Lehlohonolo	Gauteng		unemployed individual

	2025-07-08 08:35:54	No I do not	Policy Direction	First, thank you to the Minister for seeking public participation in this regard. I do not agree with the Communications office to alter and bend rules for 1. Foreign companies as this stifles South African companies from being able to grow our economy, as the foreign entity (Starlink) will be subject to dual tax and possibly less tax than if they had a interest in South Africa. 2. Companies with the potential to collect and surveillance civilians should be subjected to the highest levels of scrutiny and abide by our policies. 3. Elon Musk is known to have tried to bully South Africa into subjection to his whims. The minister must not, under any circumstances, give leeway to Elon Musk and Starlink. If Elon wants to operate in South Africa he must abide by the rule of law.	Mukelwe

	2025-07-07 22:06:24	No I do not	Policy Direction	South Africa's telecommunications infrastructure debate is misguided, and should instead consider whether to accommodate Starlink's entry over optimizing existing networks. The comparison below reveals fundamental differences in economic impact and deployment patterns. Economic Structure: Fiber networks, despite their limitations, retain revenue within South Africa, supporting local employment, supply chains, and technical expertise development. Starlink operates as a capital-extractive service where profits flow primarily to SpaceX offshore, with minimal local value creation beyond basic customer service roles. Deployment Patterns: Local fiber providers have followed predictable market logic, prioritizing affluent urban areas for faster returns before claiming capital exhaustion when considering rural deployment. Starlink, despite marketing promises of universal coverage, faces identical economic incentives and would likely replicate this urban-first pattern while extracting profits offshore. Infrastructure Reality: South Africa has already invested substantially in fiber infrastructure and established regulatory frameworks. Rather than creating new accommodations for foreign operators, policy could focus on maximizing existing fiber utilization through infrastructure sharing requirements, cross-subsidization models, or targeted public investment to address rural gaps. Strategic Consideration: The core question is whether South Africa should accommodate a foreign extractive business model when existing infrastructure could be optimized to achieve similar connectivity goals while retaining economic value locally. Starlink's proposed Equity Equivalent Investment Program represents a one-time entry fee rather than genuine long-term economic integration, making it a suboptimal solution for sustainable telecommunications development. 	2025-07-07 19:28:09	No I do not	Policy Direction	I'm a 31 year old male. I have no interest in this policy changing for the likes of Elon Musk to have a Starlink company in SA. His rockets are a great thing to have and could propel South African institutions to being functional again but the cost is too great. The policy changing is what will lead to too many multinational companies being of the mind that they can circumvent the laws and regulations of the smallest of countries, including my own South Africa. I have zero belief that the Department of Justice has the means to charge and prosecute anyone at Space X should anyone be negatively affected or harmed by the new developments that an undertaking of this size will create. The policy change is not it. Space X needs to give up a piece of it's pie to anyone who can fork out what is needed to become a part owner and a board member as a result. No to a BBBEE policy change. 	2025-07-07 16:20:05	No I do not	Policy Direction	South Africa cannot afford to weaken or dismantle B-BBEE policy. To do so would be to ignore the structural realities of our corporate landscape, where racism - particularly in senior leadership and ownership structures - remains deeply entrenched. Even with current legislation, many corporates have found ways to sidestep transformation and keep Black professionals on the margins of real decision-making power. Rolling back or softening this policy risks legitimizing exclusion and regression. It sends the wrong message at a critical time: that we are prepared to reverse gains made over the past 30 years, despite the fact that those gains remain incomplete and fragile. We must not set a precedent that allows transformation to be treated as optional. The reality is that much of White South Africa has not fully embraced the vision of a non-racial, inclusive country. Without legislative tools like B-BBEE, there is little to hold the private sector accountable to that vision. Trust in the process of transformation - legally and politically - must be reinforced, not undermined. We should be strengthening B-BBEE, not diluting it. The work is far from over.	Muzi	Gauteng		employed individual
	2025-07-07 16:10:18	No I do not	Policy Direction	Why must one individual be accommodated to bypass out out legislation or constitution	Floyd	Gauteng		employed individual
	2025-07-07 16:09:27	No I do not	Policy Direction	Not only is it extremely scary to have a sovereign nation's policies dictated by a multinational corporation, there is evidence, both overt and covert, that this is an intelligence tool used actively by the West's intelligence apparatus. We're giving away our national security to an overgrown manchild and I don't understand why	Sibulele	Western Cape		employed individual

	2025-07-07 16:05:35	No I do not	Policy Direction	Changing the policy in favor of starlink and Elon Musk sets a dangerous precedent for others doing business in South Africa. Changing the processes that aim to redress the ills of apartheid and colonialism for the prospect of foreign business that threatens the sovereignty of so many other nations is simply a mistake. The requirements of BBBEE are not there for the enrichment of few but are there to force systemic redress. Should we wave those procedures and processes it sets a precedent that will see previously disadvantaged pushed out of the economy once again, but this time it will be more difficult to undo as the change will be made in a democratic South Africa and not under an inherently oppressive government. Also Starlink is not worth it.	Nicola	Gauteng		employed individual
	2025-07-07 16:03:26	No I do not	Policy Direction	Let's ask ourselves what will starlink provide to the citizens of South Africa. BEE only empowers those who are well connected. Elon has dismissed SA on many occasions so why is this now being brought up and why is the government fixating on this? Mind you, this will probably NOT profit the economy but will profit those members of starlink and so on.	Khadijah	Outside SA	United Kingdom	employed individual
	2025-07-07 16:00:44	No I do not	Policy Direction	Elon Must and Starlink cannot dictate the direction of policy making in the country, South Africa is a sovereign country and we have to maintain our independence and make decisions on our own without someone who doesn't care about the country. We also have to ask ourselves, why so much desperation to have starlink in the country? Why want to operate in a country that has policies that you don't agree with? If Starlink wants to operate in South Africa then it must operate with the policies in place.	Jacob	North West		unemployed individual
	2025-07-07 16:00:12	No I do not	Policy Direction		Tshegofatso	North West		unemployed individual
	2025-07-07 15:59:37	No I do not	Policy Direction	Firstly, rural schools and clinics cannot afford starling so who is it for Internationally, star link has been proven to be a national security risk with countries like Iran blocking it's satellite use. Our own Fibre is already high speed and affordable. There is no reason to introduce starlink.	Khanyisile	Mpumalanga		employed individual
	2025-07-07 15:59:20	No I do not	Policy Direction	Security concerns—data sovereignty, U.S. military ties, cybersecurity vulnerabilities, unauthorized use, and foreign dependency—pose substantial risks	Lethabo	Limpopo		unemployed individual

	2025-07-07 15:34:22	No I do not	Policy Direction	In South Africa, where democracy was hard-won through blood, struggle, and sacrifice, it is a slap in the face to watch policy shift in ways that undermine that legacy—especially when it appears to cater to the interests of billionaires over the majority who are the previously disadvantaged ones. The idea that a government could bend its rules or change national policy overnight to accommodate the business interests of someone like Elon Musk—no matter how successful or innovative he may be—would have been unthinkable in the early years of our democracy. Our constitution was built on the promise of equality, and transformation not on appeasement of global elites. This isn't about innovation versus stagnation. It's about principle versus convenience. When policy can be rewritten or fast-tracked to suit the needs of an outsider while local voices are sidelined or silenced, it begs the question: who is our democracy really serving? To undermine the policy process, or to weaponize it for private gain, is to erode the very foundation of what South Africans fought for. And in a country where inequality and poverty are still daily realities, watching the rules change for the wealthy sends a dangerous message, that some voices matter more than others. Democracy means government by the people, for the people. Not for profit. Not for power. And certainly not for Elon Musk.	Gabriella	Gauteng		employed individual
	2025-07-07 15:31:55	No I do not	Policy Direction	Firstly, as an apartheid beneficiary and also a supporter of it, Elon Must does deserve any special treatment. In fact, given his wealth, he should be distributing it amongst the economically disadvantages black people rather be given preferential treatment. I'm not oblivious of the abuse of BBBEE by ANC, but this not a sufficient reason to abolish the policy, let alone changing it to favor an apartheid stalwart or loyalist. There is nothing wrong with BBBEE. It is the only way to address current inequalities and economic imbalance between the haves and the have nots, unless haves or those sitting full glasses are willing empty or share their glasses to fill empty glasses. The problem is BBBEE implementation, the implementers and those responsible for monitoring this implementation	Itumeleng	Free State		retired
	2025-07-07 15:30:50	No I do not	Policy Direction	If B-BBEE ownership requirements are eased for one large foreign company, it could set a precedent for others to demand similar exemptions, potentially weakening the entire transformation agenda across various sectors. * Focus on Ownership vs. Other Contributions: While the "Equity Equivalent Investment Programme (EEIP)" is presented as an alternative, some argue that direct ownership is a critical component of economic empowerment, ensuring tangible transfer of wealth and control to historically disadvantaged groups. Alternatives, while potentially beneficial, may not achieve the same level of empowerment.	Isabella	KwaZulu-Natal		
	2025-07-07 15:27:00	No I do not	Policy Direction		Ria	Gauteng		self-employed
	2025-07-07 15:25:57	No I do not	Policy Direction	Changing a policy will undermine the history of South Africans who have fought for this freedom. We shouldn't try to accommodate Elon Musk's services by his standards. He needs to respect our laws and regulations. We are still addressing the inequality of our people and changing such a policy will cause disruptions to all who have participated in the current BBEE policy.	Nkululeko	Gauteng		business owner
	2025-07-07 15:24:15	No I do not	Policy Direction	What then becomes the direction of the country in terms of wealth distribution. BBBEE as a policy protects the interests and wealth distribution of previously disadvantaged groups and therefore should not be removed until wealth is distributed equally and we're not there yet as a country	Koketso	Gauteng		student
	2025-07-07 15:22:06	No I do not	Policy Direction	We shouldn't be changing the policy due to being bullied by a single individual whose service is not even that great. Other companies have had to follow our laws, he should not be an exception.	Siliziwe	Eastern Cape		self-employed

	2025-07-07 11:35:01	No I do not	Policy Direction	The Black Economic Empowerment (BEE) policy in South Africa is a crucial initiative aimed at redressing the inequalities of the past while promoting economic transformation and inclusivity. Its fundamental objective is to empower black individuals and communities by enhancing their participation in the economy, thus fostering a more equitable society. The importance of this policy cannot be overstated, as it not only aims to uplift disadvantaged communities but also contributes to overall economic growth and stability. By creating a diverse and inclusive economic environment, South Africa can harness the full potential of its workforce, leading to increased innovation, productivity, and sustainable development. The BEE policy is essential for addressing historical injustices and facilitating access to opportunities, resources, and capital for previously marginalized groups. By promoting greater ownership and control of businesses by black South Africans, it helps to build a more stable and resilient economy. The policy encourages investment in education, skills development, and entrepreneurship, which are vital for driving economic growth and reducing poverty. Ultimately, BEE is not just a moral imperative; it is an economic necessity that will lead to a more prosperous and united South Africa. While the advent of Starlink, a satellite internet service, presents advanced technology with the potential to bridge connectivity gaps in underserved areas, it should not serve as a justification for bending established regulations. The deployment of Starlink must be approached with caution due to the security implications it carries. There are documented instances where satellite communications have been leveraged in foreign political affairs, raising concerns over privacy, national security, and information integrity. 	2025-07-07 11:16:08	No I do not	Policy Direction	If this policy is amended it will cause shift in other sectors which have put black people at a better chances to be employed. Even with the current BBBEE system black people are still not employed as much as they could be. Elon Musk is just here to make more money and cares very little about South Africans. If he get his way into this country again, that one bad decision can undo a lot of good that was progressing well for the country more so for the black disadvantaged people.	Nhlanhla	Western Cape		employed individual
	2025-07-07 11:14:59	No I do not	Policy Direction	Just very unfair that certain companies will not be able to get any business due BEE.	maria	Gauteng		
	2025-07-07 11:09:28	No I do not	Policy Direction	Amending our policy for the benefit of Elon Musk's Starlink would be setting a dangerous precedent that if enough pressure is applied on us, we will acquiesce to your demands. When Afriforum was on their "white genocide world tour", Musk used his platform X to amplify these atrocious lies then leveraged his relationship with the US President to give these white genociders the world stage to spread misinformation on the very bad things happening in South Africa. A blind person can see that Musk engaged in all this to try bring our nation to its knees so we could just hand him what he wants, and it is for that reason that starlink should never be given the licenses to operate in this beautiful country. Plus, there is no real benefit to starlink operating here. It going to be as expensive as all the telecoms brands we already have, he will definitely use it to spy on us (they've probably already started), and he can turn it on & off depending on which narrative he wishes to push out? No, thank you. This man has showed us that he doesn't respect our laws and if given the licenses to operate, he will always want us to bend to accommodate whatever he wants. South Africa does not need starlink.	Nosipho	Mpumalanga		employed individual
	2025-07-07 11:09:07	No I do not	Policy Direction		Sinazo	Western Cape		unemployed individual
	2025-07-07 11:07:59	No I do not	Policy Direction	This is a slippery slope, not only because you'd be handing over our sovereignty to billionaires who clearly have no concern for our past; but also because you'd be inviting local companies to challenge all our redress laws. This is not acceptable. Additionally, Starlink has been accused of spying, conducting espionage for the west and monitoring foreign leaders on behalf of our former oppressors. Why would you want to bring this company in?? Starlink has also been accused of switching off the network when governments behave in ways the west does not agree with. Why do you think we'll be an exception?? Moreover, Elon has complied with local ownership wherever it was required in the world, why won't he do the same here?? This demonstrates how much he disregards you, as our leaders. This should anger and embarrass you; yet you're entertaining him. Of all people, Elon, understanding our past so intimately; should have actually offered even more local ownership for redress. It shows the level of disdain he has for us that he refuses even bare minimum. You guys are embarrassing us; you're failing us and future generations. Furthermore, Starlink is expensive, it is a fallacy that rural inhabitants will somehow afford to buy it if they could not afford local providers. Lastly, there are local internet providers whom the government should rather empower so that they may extend their reach and be able to supply rural communities. The government through Dept Basic Education could then subsidise poor schools to pay for their annual subscriptions. Local will always be lekker!! Please DO NOT bring Starlink here. You, ANC cadres will be the first victims of his espionage. You know he hates you more than he hates us!	Vuyolwethu	Gauteng		unemployed individual

	2025-07-07 11:03:38	No I do not	Policy Direction	I do not Elon Musk operating ANY businesses in South Africa because he is a white suprematist and a NAZI.	Mallashi	Limpopo		self-employed
	2025-07-07 11:03:00	No I do not	Policy Direction	I strongly oppose any amendments to BEE policies that are tailored to accommodate Starlink or any foreign-owned company. Changing foundational transformation laws to suit one entity sets a dangerous precedent one that could undermine the very purpose of BEE, which is to promote equitable participation in our economy by historically disadvantaged South Africans. Granting exemptions or special treatment to Starlink opens the door for similar demands from other multinationals, weakening our regulatory framework and eroding hard won gains toward economic justice. We cannot bend national policy to fit private or foreign commercial interests, no matter how appealing the product or service may seem. There are many ways to expand connectivity in South Africa without compromising our principles. Policy integrity must not be sacrificed under the guise of progress.	Lwandile	Western Cape		employed individual
	2025-07-07 11:01:40	No I do not	Policy Direction	The aim of the BBBEE is to ensure that there is an increase in Black Participation in the South African economy. All companies have adhered to this policy without fail because the do understand the importance to promote economic transformation, particularly through increasing participation of black South Africans in business ownership. Until the BBBEE achieves its mandate, which includes among others the participation of more previously disadvantaged individuals and groups in businesses and government projects that have significant capital impact on the economy, any amendment proposed should increase the possibility of achieving said mandates. Nothing in the policy affects companies like starlink in participating in our current environment. It's owner can avail 30% of its ownership to previously disadvantaged groups/individuals and it will be compliant.	KL	Gauteng		business owner
	2025-07-07 10:58:50	No I do not	Policy Direction	If we amend our current BBBEE framework, we will be setting a bad precedent for future and current companies who are doing business here.	Thandile	Gauteng		employed individual
	2025-07-07 10:58:31	No I do not	Policy Direction	Hi Why is there a need to change a policy that has been used for years. There are a lot of other foreign companies that do business in SA without the requirement to change policies. If the policy was being reviewed for the future, it will make sense but not forced under duress by a single entity	Sithandile	Gauteng		employed individual

	2025-07-07 09:21:52	No I do not	Policy Direction	??? South Africa doesn't need to bend for Starlink ??? There's a lot of noise saying we should change our B-BBEE policy to accommodate Starlink. But let's be clear: South Africa isn't desperate for handouts — we're a strategic gateway to Africa. ? Starlink needs access to the African market. We have the infrastructure, consumer base, and regulatory stability that makes us the perfect launchpad. ? B-BBEE isn't a hurdle — it's a non-negotiable national policy designed to ensure economic inclusion and redress. ? If Starlink wants in, they can partner with local black-owned ISPs, empower communities, and invest in SA — like every other responsible company is expected to. We can't keep selling our sovereignty every time a billionaire tech brand knocks on the door. Let's stop acting like we're powerless. We're not. We have leverage. We have laws. And we have the right to demand inclusion — not exception. #BBEE #Starlink #SouthAfrica #DigitalSovereignty #TechForAll #NoFreePasses #LocalFirst	Anonymous	Western Cape		employed individual

	2025-07-07 08:21:51	No I do not	Policy Direction	1. Violation of Domestic Sovereignty and Data Protection Laws Starlink operates outside the jurisdiction of South African data protection frameworks like the Protection of Personal Information Act (POPIA). Its infrastructure is foreign-owned, and data transmission bypasses local terrestrial networks—raising serious red flags about where and how South Africans' personal, corporate, and government data is stored, transferred, or even surveilled. 2. National Security Vulnerability Allowing an American private company with ties to the U.S. Department of Defense to operate an unregulated communications network over South African airspace is a national security risk. This could potentially enable: Undetected data interception Unilateral bandwidth control during national crises Inaccessible network management in times of cyber threats South Africa must ensure that critical infrastructure is not in the hands of actors outside its jurisdiction. 3. Regulatory Loopholes and Bypassing of Local Empowerment Laws Starlink has thus far refused to comply with South Africa's Electronic Communications Act, especially regarding: Licensing requirements under ICASA Ownership and empowerment obligations (e.g. local equity participation, BBBEE compliance) Allowing them to operate without fulfilling these obligations sets a dangerous precedent, potentially undermining local telecommunications companies who are required to follow strict regulations. 4. Negative Economic Impact on Local ISPs While Starlink presents itself as a tool for rural inclusion, it competes unfairly with local ISPs and state infrastructure projects. If not regulated properly, it could monopolize the broadband market, leaving local providers unable to compete with its scale, and reversing gains made in developing a sovereign ICT sector. 5. Precedent from Other Countries Several African and non-African countries have blocked or delayed Starlink's entry for similar reasons. For example: India demands da	Bethel	Gauteng		employed individual
	2025-07-07 08:20:31	No I do not	Policy Direction	RHRA NPC Response to Proposed Policy Direction on BBBEE Requirements The Reservoir Hills Ratepayers Association NPC does not support the proposed policy direction to amend BBBEE requirements for telecom licensing. Our primary concern lies with the policy direction itself, which risks weakening South Africa's transformation framework without adequate public consultation or accountability. While the promise of improved connectivity through platforms like Starlink is appealing, we must not lose sight of the broader implications. South Africans continue to bear the cost of state looting, corruption, and politically connected enrichment—often facilitated through opaque procurement and transformation schemes. Numerous reports and government admissions have highlighted how BBBEE-linked procurement has been prone to manipulation and abuse, benefiting a select few while leaving ordinary citizens behind. This proposed shift toward Equity Equivalent Investment Programmes (EEIPs) may further entrench that inequality if not carefully regulated. Without robust oversight, it risks becoming another avenue for nefarious activities disguised as development. We believe transformation must be real, inclusive, and transparent—not symbolic or transactional. RHRA NPC calls on the Minister and ICASA to: - Reassess the policy direction with full public engagement. - Ensure any alternative compliance mechanisms are auditable, locally beneficial, and corruption-resistant. - Prioritise the needs of ordinary South Africans who deserve affordable internet and economic justice—not one at the expense of the other. We remain committed to a future where innovation uplifts communities and transformation empowers the many—not the few.	Yogesh	KwaZulu -Natal		self-employed

	2025-07-07 07:28:52	No I do not	Policy Direction	As a member of a historically disadvantaged community in South Africa, I strongly oppose the removal of B-BBEE requirements to accommodate the operations of Starlink or any other multinational entity. South Africa’s past left deep structural inequalities that continue to manifest in education, technology access, and economic participation. The B-BBEE policy is not a barrier to business—it is a necessary corrective framework to ensure inclusive economic growth and equal opportunity for all South Africans. Allowing an exemption for Starlink undermines the very principles of economic transformation that B-BBEE seeks to address. While we welcome investment and technological advancement, it should not come at the cost of perpetuating exclusion. If global companies wish to benefit from our markets and our people, they must also contribute meaningfully to empowerment, skills transfer, and local enterprise development. Granting special treatment to one company sets a dangerous precedent. It suggests that economic justice is negotiable when the player is big enough, and that cannot be the message we send. Let’s find a solution that brings innovation and upholds transformation—both are essential for a just and inclusive digital economy.	Thandazile	Gauteng		employed individual

	2025-07-07 07:16:47	No I do not	Policy Direction		Nosi			
	2025-07-07 07:07:16	No I do not	Policy Direction	For all the imperfection that is BBBEE, it goes far in its attempt to address the inequalities that is in our country. Removing it or making it more lenient not inly takes us back as an economy it also has the potential for other sectors to protest, but rightfully so. Opening it up to accommodate Starlink doesnt show the benefit to our economy	Mpho	Gauteng		employed individual
	2025-07-07 06:58:26	No I do not	Policy Direction	BEE in all its forms need to be removed from our legislation, and not just for a select few businesses	Gary	Western Cape		retired
	2025-07-07 06:58:01	No I do not	Policy Direction	Why do we have to deviate from the BBEE policy just to satisfy an individual? Elon Musk is a racist, narcissist person. We so not want his business innour country. He must stay in a mess he created in the US	Thobeka	Western Cape		employed individual
	2025-07-07 06:56:58	No I do not	Policy Direction	Why is it that we can amend our laws to suit this one individual who alleged to have used the same technology unethically in Ukraine? The same man who's allowed for and pushed right wing lies about the country alleging a white genocide. Most South Africans can not even afford this technology so what really is the point	Lelethu	Western Cape		
	2025-07-07 06:55:50	No I do not	Policy Direction	We need to go back to the reason why the same policy was implemented in the first place. What was it there to prevent or preserve. Similar to the BBBEE Act itself. The main aim was redress, which hasn’t been achieved yet. Another crucial aspect to consider is what this means for our nation and its compliance to the well established laws of the country. This could be a leeway to amend or loosen the impact of laws whenever someone proposes something that seems to be promising to the country’s future, without attempting to even localise the proposed solution, invest in infrastructure to meet the competition.	Lebo	KwaZulu -Natal		business owner

	2025-07-07 05:33:04	No I do not	Policy Direction	Internet should be controlled locally	Tlou Simon	Gauteng		
	2025-07-07 05:29:11	No I do not	Policy Direction	The laws and governing regulations have been enacted to help progressively realise substantive equality. In the previous regime, power and resources was given to a few minority leading to a wide inequality gap. Our legislation and regulations serves to close this gap and allow people of colour to also partake in the economy. Furthermore, many foreign companies which genuinely wanted to invest in South Africa have been ale to find our legislation fair to the purpose it seeks to serve. Allowing starlink to 'bypass' our legislation would have massive ramification for our country, other foreign companies would also want such preference; we would be exposing ourselves to an avalanch of legal challenges- of which, the economy would suffer detrimentally in that process.	M	Limpopo		student
	2025-07-07 05:24:07	No I do not	Policy Direction	Increased Inequality: Without strong empowerment policies, economic gains from foreign investment may concentrate in existing power structures, widening the gap between rich and poor. Perceived Capitulation to Global Elites: Adjusting national policy to suit a billionaire’s business interests may raise concerns about sovereignty and external influence. - Impact on Broader Transformation Goals: BBBEE is part of a larger framework for inclusive growth. Weakening it could disrupt alignment with industrial and social development plan	Reginald			
	2025-07-07 05:20:47	No I do not	Policy Direction	We cannot be bullied by a singular company into abandoning our own policies meant for redress. The BBEEE framework and others exist for a purpose and are still quite necessary for our country. Let them comply or not do business with us.	Tarryn	Gauteng		employed individual

	2025-07-07 05:07:27	No I do not	Policy Direction	This proposed policy direction by ICASA is both demeaning, regressive and anti-“poor” amidst the third wave of B-BBEE regulations. The lack of unity amongst SA State Owned Entities is greatly disheartening because on one hand we have the likes of the dtic drafting the Transformation Fund concept policy and on the other hand, we have the likes of ICASA seeking to excuse corporates from their transformative obligations and in an (increasingly) unequal and unjust South African society. The introduction of Starlink (specifically without adherence to existing B-BBEE regulations) undermines the entire B-BBEE framework and opens the nation up to further scrutiny about the need of a framework which continues to positively impact the lives of beneficiaries within the Skills Development, Socio-Economic Development, Enterprise and Supplier Development pillars of B-BBEE. This will undoubtedly have lasting impressions on the already limited number of individuals from HDGs that are able to occupy and diversify the management control or ownership levels in corporate South Africa. The ICT sector has very specific sector codes within the B-BBEE framework for specific reasons which ICASA is blindsightedly disregarding. Starlink should certainly not be exempt from regulations which will compromise State Security and ultimately give way to other international ICT companies omitting from their DEI responsibilities.	Nokwanda Zakiyyah	Gauteng		employed individual
	2025-07-07 05:04:56	No I do not	Policy Direction	This BBBEE policy was created to protect and help those who suffered injustices of apartheid in the past. The majority black communities and coloured communities are still living in poverty or surviving just above the poverty line. Removing this will keep them oppressed, they won’t get opportunities even if they’re deserving. We also have enough Internet providers, why are we so desperate to use Starlink that we are willing to bend the rules? Who else will rules be bent for? This will set a tone that foreign businesses can operate without regulations because its easy to amend policies for them.	Nomzamo	KwaZulu-Natal		employed individual
	2025-07-07 05:04:55	No I do not	Policy Direction	This BBBEE policy was created to protect and help those who suffered injustices of apartheid in the past. 	2025-07-06 17:52:02	No I do not	Policy Direction	I do not support the proposed amendments to the BBBEE policy. The reality is that, even today, we can still see how the scales remain tilted in favour of the minority, despite the policy's original intention to correct structural inequalities. We cannot prematurely dismantle redress mechanisms while the playing field remains fundamentally uneven. The economic imbalances created by apartheid were meticulously engineered over decades, and yet we are expected to rectify them within a constrained 30-year window. That is neither just nor realistic. South Africa's majority has not yet had a fair and sustained opportunity to participate meaningfully in the economy. True transformation requires time, consistency, and the political will to confront uncomfortable truths. We must resist the urge to dilute equity policies in the name of progress, when in fact such moves risk entrenching old patterns under the guise of reform.	Tsholofelo	Gauteng		employed individual
	2025-07-06 08:25:57	No I do not	Policy Direction	Good morning Hon Minister, No I don't support a policy direction to remove or amen the 30% BBEEE requirement for the telecommunications policy licenses.	Onke	Eastern Cape		employed individual
	2025-07-03 10:51:24	No I do not	Policy Direction	Elon Musk is not special and this will open for other entities to be exempted and thus not redressing the primary objective it was intended to be. However, since only cares and those who are well connected and have money to buy their way to these shares and benefit. Its best to address that only not the policy.	Mpho	Gauteng		self-employed
	2025-07-02 23:02:41	No I do not	Policy Direction	They don't have a partner / dealer network and exclusively work directly with consumers. It would essentially take business away from local businesses with all the associated local cost and regulations. The different applicability of laws for an external entity where all profits flow out of the country would also be unfair, if they don't have to comply with local legislation whilst South African ISPs have to show 30% black ownership. This is in addition to ISPs having to be ICASA members, where the government then charges an additional tax on all internet based revenue. The above would indicate that Starlink would also be exempt from these taxes which is not only unfair but a massive revenue loss for South Africa.	Richard	Outside SA	United Kingdom	employed individual

	2025-06-29 17:29:50	No I do not	Policy Direction		Naledi			
	2025-06-29 08:32:00	No I do not	Policy Direction	The customer base that Elon is tapping into has potential of 68 million with possibility to multiply over a 50 or 100 years horizon. .Enabling disadvantaged communities with technology is not hand-out, and enabling without empowerment creates generational dependency and dispossession. No country will do that - especially America or even China. Careful consideration needs to be taken to secure future and generational means of productions and therefore wealth for So.uth Africans. Its a shame exposes a deep sense of ignorance that even post 1994 government talks about gene codes, poverty, digital divite but propagate these practices.	Info	Gauteng		unemployed individual
	2025-06-28 11:31:17	No I do not	Policy Direction	The policy direction of bending over established policy that addresses exclusion of black population from meaningful economic participation for Elon Musk and co is betrayal of black masses at expense of "looking good to America". Moreover, this will set back black population another 30 - 50 years back as the same exclusions / relaxations will be requested by other sectors like mining etc. Elon Musk is "out of favour" with POTUS and his administration and we can cancel proposal as it was made in jest, when the President of the Republic went to visit POTUS for the first time since public spat / mud slinging of South Africa. On another unrelated subject, the sale of media company MultiChoice to France's Canal+ should have been blocked or limited to maintain South Africa media independence. Canal+ can block South Africa and/or Rest of Africa from what they deem "unsuitable channels" (like RT), which is practically managing continent 's media access by remote control - opinions and sanctions of the West. Maintaining diverse media views and freedom of access to those views is more important than restricting MultiChoice retrenchments for 3 years.	Kenneth	KwaZulu-Natal		employed individual
	2025-06-28 09:01:00	No I do not	Policy Direction	BBBEE Still need to support preciously disadvanatged South African. A lot more still needs to be done	Nonhle	KwaZulu-Natal		employed individual
	2025-06-27 14:17:30	No I do not	Policy Direction	BBBEEE can not be changed for an individual person. it rather continue to work as it was designed before, at least 30% of disadvantaged South Africans must continue to own part of the telecoms companies in the country.	TOROLE	Free State		employed individual
	2025-06-27 11:18:07	No I do not	Policy Direction	As ek 'n besigheid begin met my eie spaargeld, kreatiwiteit, bloed en sweet, hoe kan ek 'n persentasie gee aan iemand wat nie weet hoe dit voel om te werk vir iets nie? Dit is mos opperste snert!	maria	North West		business owner
	2025-06-26 23:08:56	No I do not	Policy Direction	I don't believe that policies should be amended to support individuals just because they have money. South Africa is a country for Africans not billionaires. Bbbee is here to benefit everyone especially previously disadvantaged	Lebo	Gauteng		unemployed individual
	2025-06-26 19:32:14	No I do not	Policy Direction	People in power are fast to make decisions that do not benefit the already marginalized people of South Africa, whom they claim to represent. However, they are slow or unwilling to achieve actual impactful change and development, which they vow to do at every election to the very people who put them there.	Siyabonga	Gauteng		employed individual
	2025-06-26 14:42:15	No I do not	Policy Direction	The previous oppressors do not get to be the ones who decide that blacks do not want a handout.	Sydwell

	2025-06-24 13:13:22	No I do not	Policy Direction	Although I agree that the implementation of BBBEE is flawed, I think 30% black ownership is important for transformation.	Gcobani	Western Cape		
	2025-06-24 10:34:28	No I do not	Policy Direction	Why should the government be bullied into changing its policy by Starlink (Elon Musk). If the government side track in its good policy for fixing the wrongs of apartheid laws.	Olivia	Mpumalanga		unemployed individual
	2025-06-24 10:34:28	No I do not	Policy Direction	Why should the government be bullied into changing its policy by Starlink (Elon Musk). If the government side track in its good policy for fixing the wrongs of apartheid laws.	Olivia	Mpumalanga		unemployed individual

	2025-06-24 10:33:57	No I do not	Policy Direction	I do not support the proposed policy direction to the Independent Communication Authority of South Africa to amend the BBBEE requirements. This proposed change is one that undermines the efforts that were put in place to address the centuries of disenfranchisement of the majority. The means off production and ownership still remains in the hands of the minority - ownership that was acquired through the legalised racist system of apartheid which ensured that wealth was amassed by one grouping, the white minority. No grouping or individual is above the laws of the Republic of South Africa. Our constitution is renowned the world over as "the best", this is largely because it ensures fairness and prevents the discrimination of it's people. The legislative and polices built on the bases of the constitution need to be protected. It is disingenuous to consistently be apposed to policies that promote fairness and inclusion and still believe in the constitution as a moral and legal guide to ensure equality. The matter is quite simple, Elon Musk's Starlink should not get any preferential treatment as it undermines our constitution - if he doesn't want to comply, then he can choose not to invest. The amendment to the Independent Communications Authority of South Africa to amend BBBEE requirements will be used as a catalyst for further scrutiny in other industries, looking into the application of BBBEE and ownership, this should not be allowed. The drafters of the constitution, in their wisdom, ensured that the constitution is one that can be amended to ensure that is speaks to the needs of the country at any particular time where the change was warranted - this policy change is not that. Let us look to find ways to ensure that investors adhere to the laws of the country - we should refrain from the shortsighted amendments that only benefit the "haves". NO to the proposed policy direction to the ICASA to amend BBBEE requirements!	Litha	Western Cape		employed individual
	2025-06-24 10:16:52	No I do not	Policy Direction	Why should a good government policy to address the injustices of apartheid be changed over an individual whose parents and himself benefitted from the devilish laws of apartheid? No one should be deemed to be above the law just because he is a billionaire. What happened to the equality clause of the constitution? Honorable Minister, you must know that changing policy to suit an individual or a certain group is untenable and sets a bad precedent on the part of the government. This may indicate that the government does not know what it is doing.	Clearance	Mpumalanga		self-employed
	2025-06-24 09:27:37	No I do not	Policy Direction	This is a threat to our national security. We do not want starlink.	Ngoako	KwaZulu-Natal		employed individual
	2025-06-24 09:23:11	No I do not	Policy Direction	BBBEE is impactful if implemented correctly. Changing the direction and making allowance for certain businesses will create unrealistic expectations for others trying to enter the market.	Hashendrie	Gauteng		employed individual

	2025-06-23 17:45:00	No I do not	Policy Direction	BEE is necessary to correct the wrongs of apartheid. We can't act like apartheid ended in 1994. Its after effects are still very much vivid. Those who are against BEE want to hold on to their undue benefits of apartheid.	Tshepo	Gauteng		employed individual
	2025-06-23 17:32:48	No I do not	Policy Direction	Our local ISPs should provide this service	Adenaan	Western Cape		employed individual
	2025-06-23 16:12:48	No I do not	Policy Direction	BBBEE Act is meant to address the inequality and one of the means to redress the apartheid crimes against humanity in SA. Why should we suddenly bend the rules for Elon Musk meanwhile other foreign investors have complied with this law? Furthermore, Starlink is not going to create new jobs. Just like in Nigeria, he is going to use a plug-and-play approach on existing infrastructure already laid by the likes of MTN. Giving him a bye on BBBEE is self defeating and setback. Furthermore, the cost of installations and access will be higher than what Zimbabwe is paying. Are there no other competitive bidders, even if there were not, it's no reason to justify paying more especially when treasury has a budget deficit. Where will the money to cover these installations costs come from?	Lutendo			
	2025-06-23 16:09:53	No I do not	Policy Direction	The BBBEE gains will be reversed	Mandla	Mpumalanga		unemployed individual
	2025-06-23 15:51:30	No I do not	Policy Direction	We can't allow one person to dictate how our laws work, this policy direction, favors Elon, not the previously disadvantage people of this country.	Kwena	Gauteng		employed individual
	2025-06-23 15:18:33	No I do not	Policy Direction	If this chamgr in policy was due to a cry from south Africans from other racial groups maybe we could consider . Elon milk mist respect the policies of this country and why thru were put into place. Just because it's not what he wants he can't force SA to change it's policies . I know the decision has already been made, this process is just for compliance and to prevent us from speaking about this. Our politicians benefit privately from the likes of Elon that is the only reason that will lead to this policy change. It has nothing to do with the people of south africa. Cry my beloved country	Charlene	Mpumalanga		employed individual
	2025-06-23 15:09:36	No I do not	Policy Direction	if properly implemented, this policy helps address the injustices of the past, why should policies be changed to benefit people who are not even patriotic to this country. Why should policies be changed to suite one person. For once can the south African government have a backbone. We are setting a bad precedence here, changing laws to suite individuals, other companies who want to do business in SA have complied with the requirements and their businesses are thriving, because they understand the necessity to empower black people of this country.	Lebo	Gauteng		employed individual
	2025-06-23 15:05:42	No I do not	Policy Direction	There are 146 laws of discrimination against white South Africans! Every South African should be treated equally irrespective of race. Children who were born over 30 years ago who had no participation in apartheid are unable to find employment no matter how qualified they are because they are white. Enough, these very laws are dividing our nation. If south africa wants to prosper we will need substantial changes to the current laws. God help us ?	Carol	Western Cape		retired
	2025-06-23 15:05:36	No I do not	Policy Direction	There are 146 laws of discrimination against white South Africans! Every South African should be treated equally irrespective of race. Children who were born over 30 years ago who had no participation in apartheid are unable to find employment no matter how qualified they are because they are white. Enough, these very laws are dividing our nation. If south africa wants to prosper we will need substantial changes to the current laws. God help us ?	Carol	Western Cape		retired
	2025-06-23 15:03:10	No I do not	Policy Direction	Companies that doesn't not respect our laws shouldn't be allowed to operate here in SA and we can't change our laws just to accommodate them.	king Khabazela	Gauteng		self-employed
	2025-06-23 13:48:28	No I do not	Policy Direction	The policy we have in place was not done so to accommodate the whims of selected but rather to address the years of inequality and injustice. So to now suddenly change direction so that one individual can benefit flies in the face all the efforts that went into addressing systemic racism.	Batandwa	Gauteng		business owner
	2025-06-23 13:42:35	No I do not	Policy Direction	Starlink must either comply with the requirements that are in place or take their business elsewhere. We should be dixtated by business on how to run this country.	Lebohang	Gauteng		employed individual
	2025-06-23 13:39:12	No I do not	Policy Direction		Cynthia	Gauteng		employed individual
	2025-06-23 13:21:11	No I do not	Policy Direction		Wendy	Gauteng		employed individual
	2025-06-23 13:12:09	No I do not	Policy Direction		Naledi	KwaZulu-Natal		student
	2025-06-23 13:10:16	No I do not	Policy Direction	Equality is priority and removing BBEEE will be at the detriment of the poor black South African as the playing fields will never be levelled again. The tranformation policies are about redress which has not happened at the pace we all want. There should be no sacred cows!	Nathi	KwaZulu-Natal		employed individual
	2025-06-23 12:56:06	No I do not	Policy Direction	I totally disagree with foreign private owned companies bullying our government to change its policies. I also suspect Musk and the Americans have ulterior motives for seeking dominance in the digital space, perhaps to even spy on SA. The same accusations the US make against Chinese tech giants can be applied to Starlink.	Mvano	KwaZulu-Natal		employed individual

	2025-06-23 12:40:07	No I do not	Policy Direction	I feel strongly that the motivation to bring Starlink to South Africa is not in the best interests of the South Africans it proposes to help, and I feel strongly that the persistence to circumnavigate the compliance requirements is motivated by a deeply partisan desire, as a monied individual with a well documented partisan attitude towards South Africa, to influence South African government policy in favour of his capital driven goals, which is tantamount to fascism.	Mia	Western Cape		employed individual
	2025-06-23 12:17:25	No I do not	Policy Direction		Velile	Gauteng		Non-profit
	2025-06-23 12:08:18	No I do not	Policy Direction	I do not support the removal of BBBEE requirements as proposed. While the intention may be to facilitate foreign participation, the policy, as it stands, does not contribute meaningfully to transforming South Africa’s economic landscape. It risks reinforcing existing inequalities rather than addressing them. Transformation must remain a central pillar of our national development agenda.	Malusi	Gauteng		employed individual

	2025-06-23 12:08:18	No I do not	Policy Direction	I do not support the removal of BBBEE requirements as proposed. While the intention may be to facilitate foreign participation, the policy, as it stands, does not contribute meaningfully to transforming South Africa's economic landscape. It risks reinforcing existing inequalities rather than addressing them. Transformation must remain a central pillar of our national development agenda.	Malusi	Gauteng		employed individual
	2025-06-23 12:06:32	No I do not	Policy Direction	No to racists like Elon Mask	Nkwana	Gauteng		retired
	2025-06-23 12:00:04	No I do not	Policy Direction	My main concern with this new policy is that it will open a gap for companies to undermine empowerment of black people who have already been disadvantaged by historical policies. As is companies are against BBBEE and are begrudgingly complying if we then bring this new policy we are opening the doors for companies to not transform and stick to the status quo of leaving the previously disadvantaged behind and not offer solutions towards improving their quality of life.	Ntokozo	Gauteng		employed individual
	2025-06-23 11:56:58	No I do not	Policy Direction	Why must the SA government amend our BBBEE policies to accommodate a non SA business? This will set a precedent we cant afford to have. This government needs to grow a spine and apply the same rules to all qualifying businesses regardless of their origin. We must say NO to the globalists with their satanic agendas. May the Almighty GOD bless South Africa and its people and destroy those who mean to do it harm. Amen.	Taren	Western Cape		self-employed
	2025-06-23 11:45:13	No I do not	Policy Direction	I'm also worried about our integrity and the influence private businessmen can have on our elected nationals this behavior illustrates that big business can change the direction of the country which in results does not benefit us in large scale. Sterling is nothing special even local telecommunications can provide a service like starlink.	Velenkosini	KwaZulu-Natal		student
	2025-06-23 11:32:14	No I do not	Policy Direction	Please do not create legislation purely for the benefit of billionaires. It starts with racist Elon, but where does it end?	Noline	Western Cape		
	2025-06-23 11:12:41	No I do not	Policy Direction	By changing the policy, it lays waste to all the work that has been done by current license owners to develop programs that make provision for BEE 30% ownership in their businesses. This would be detrimental to the current license holders. Starlink should not be allowed to just enter a regulated market because they are offering free services to 5000 school, which should have been serviced by government already. Furthermore we have satellite services available in South Africa and we do not need a company that does not create any jobs locally coming into the local market on the wings of free services. We can meet all these local needs by creating paying jobs and getting government to honor their obligations to the citizens of South Africa and not once again depend on handouts from Billionaires who will only once again extract the monye out of South Africa without paying any taxes because of the way that they setup their operations. The $26Million will be used as a loss leader to avoid paying local taxes and then the operational costs of a local office will be inflated to further grow this loss, all the while, the profits keep getting funneled out of South Africa with no job creation or skills development. So essentially, if Starlink wants to operate in South Africa, they should appoint licensed distributors or resellers, that will be able to create jobs for locals, and in that manner, actually contribute to the growth of South Africa.	Pedro	Gauteng		business owner
	2025-06-23 11:07:43	No I do not	Policy Direction		Khayalethu Prudent	Eastern Cape		employed individual
	2025-06-23 10:55:14	No I do not	Policy Direction	I do not believe that we should change our laws due to external pressure, we should rather change them after internal engagements. Secondly globalization always takes aways from local people in jobs, because support will be remote not local.	Tshepo	Eastern Cape		employed individual
	2025-06-23 10:41:57	No I do not	Policy Direction		Maile	North West		unemployed individual
	2025-06-23 10:03:17	No I do not	Policy Direction	Changing policies that benefit historically disadvantaged South Africans to instead benefit a historically advantaged South African isn't ethical. In addition, Elon Musk's charactor was exposed when he threatened Ukrain's access to Starlink's internet during negociations, while still in the middle of the war. Furthermore, his influence in spreading fake news against South Africa on the subject of "white genocide" on his own capacity and through his AI agent, Grok, proves that he doesn't care about the growth and prosperity of our country, as he clearly would go to the lengths of even trying to destroy it in order to get his way. More than anything, he would prefer things to be as they were in the old South Africa. Finally, I believe our security as a nation would be compremised if we changed BBBEE to accommodate Musk's Starlink.	Nosipho	KwaZulu-Natal		employed individual
	2025-06-23 10:02:55	No I do not	Policy Direction	There is no need to change the law and regulations to accommodate an individual company. The government cannot afford to apply policies inconstantly. Our sovereignty should remain. The current policy is important.	Tshifhiwa	Western Cape		employed individual
	2025-06-23 09:55:50	No I do not	Policy Direction	don't want BEE? give up everything you bought or were given (ie. some white families were given free suburban housing) during Apartheid and we can end BEE. including land.	Dear Racist	Western Cape		business owner
	2025-06-23 09:51:38	No I do not	Policy Direction	The equitable inclusion of black People in the ownership of their native land economy is a non-negotiable . No policy direction which seeks to undermine the economic inclusion of black People in the name of 'progress' should be entertained. Imperialists who have no interest in sharing the economy with natives have no place in the future we envisage for our country.	Velazi	KwaZulu-Natal		self-employed

	2025-06-23 09:41:32	No I do not	Policy Direction	Should they wish to setup in SA then they must keep all the money in SA, live in SA, work in SA etc etc. Otherwise take your precious starlink and go back.	Zunaid	Western Cape		employed individual
	2025-06-23 09:35:23	No I do not	Policy Direction	SA needs to adopt policies that must strengthen redress. Passing this policy amendment undermines that and continues to support an economy structure that is not relevant to the problems of the day as faced by the greater population of this country. This proposed amendment is a shame to SA.	Nomvuselelo			employed individual
	2025-06-23 09:33:41	No I do not	Policy Direction	❌ My Vote: NO to B-BBEE Laws I hereby cast my vote against the continuation or expansion of Broad-Based Black Economic Empowerment (B-BBEE) laws in South Africa. ? Reason for my vote: I believe in a South Africa where every citizen is treated equally before the law, and no person should be required to give up ownership, control, or economic opportunity based on race, ancestry, or group identity. While I acknowledge the historical injustices of apartheid, I do not believe that new forms of legally mandated discrimination are the right path forward. My objections include: - Violation of individual rights: Compulsory equity transfer undermines the constitutional principle of property rights and discourages innovation and investment. - Unfair burden on small and new businesses: Entrepreneurs — particularly those starting with limited capital — are disproportionately harmed by mandatory ownership quotas. - Racial classification: I reject the continued use of race as a legal category in determining opportunity or eligibility for doing business in a democratic society. - Inefficiency and corruption: B-BBEE policies have too often empowered politically connected elites rather than the broader population they claim to uplift. - Alternative solutions exist: Skills development, education reform, mentorship, and infrastructure investment are more sustainable and unifying paths to economic inclusion. I therefore vote NO to B-BBEE laws in their current and proposed forms, and I call on lawmakers to repeal race-based economic legislation and instead pursue non-racial, merit-based, and inclusive economic growth strategies. 	2025-06-22 19:47:04	No I do not	Policy Direction	When in Rome, do as the Romans do. The contemplated exemption of Starlink from BEE compliance will create legal precedent for any other business in any other industry to also seek and obtain exemption. This will practically undo the BEE policy in this country, which is still very much necessary despite our being more than thirty years into democracy, due to the general opposition to transformation that economic sectors of this country have exhibited. If Starlink wants to operate in South Africa, it must abide by South African law, as it presumably has in every other jurisdiction in which it operates. For the South African government to grant the exemption would be not only harmful to its stated policy interests and to the citizenry, but would also send the wrong message: that some disrespectful industrialist can dictate terms to our sovereign government -and hence to us) and we - by extension from our government - will oblige. To allow the contemplated hypocrisy would be a mistake on the part of our government.	Matsepe

	2025-06-22 16:37:19	No I do not	Policy Direction	I don’t believe SA should change policy direction to accommodate Starlink. There is still a long way to fully achieve BBBEE to make a policy change now when the people who the policy should have impacted have not even realised that impact.	Kefentse	Gauteng		employed individual
	2025-06-22 16:37:15	No I do not	Policy Direction	I am writing as a concerned South African citizen to formally register my profound opposition to any proposal that would involve scrapping or significantly weakening the Broad-Based Black Economic Empowerment (BBBEE) framework. It is a matter of public record that other African nations, such as Botswana, Zimbabwe, and Nigeria, maintain robust localization policies, with some requiring as much as 50% local ownership for international companies. These policies are rightly seen as vital for ensuring that economic development translates into direct benefits for their citizens. Why should South Africa be compelled to dismantle its own transformative economic framework, especially when we face unique historical imperatives to redress inequality? The consideration of such a drastic policy reversal in apparent deference to individuals like Elon Musk is deeply troubling. This is an individual who has previously used his global platform to promote damaging and unsubstantiated claims against our country. To reward such behaviour by dismantling a cornerstone of our economic transformation agenda would set a dangerous precedent. It brings to mind the parable of the camel that, after being allowed to put its nose in the tent, eventually pushed its master out entirely. Where do we, as a nation, draw the line to protect our economic sovereignty? This debate is fundamentally about the legacy we intend to leave for future generations of South Africans. Will we commit to building a nation of broadly shared prosperity, or will we sacrifice this long-term vision for the interests of foreign billionaires? While there is a pervasive feeling among citizens that our voices are often ignored, I submit this protest in the hope that you will uphold the constitutional and moral mandate to act in the best interest of all the people of South Africa. I urge you to reaffirm your commitment to economic transformation and reject any proposal that undermines the principles of BBBEE.	Pumza

	2025-06-22 10:11:15	No I do not	Policy Direction	Solly is perpetuating an extractive non inclusive economy. These multinational companies must contribute meaningfully to the growth of this country. Not only that, but also share the wealth of this country to reduce inequality. Starlink must operate a subsidiary in SA, with some SA ownership like it’s doing in India and other countries so that some profits can be shared and used within the SA economy.	Mahlori	Gauteng		employed individual
	2025-06-22 10:09:35	No I do not	Policy Direction	The truth is that non-white South Africans continue to be excluded and effectively barred from meaningful participation and ownership in the wealth of the country. There is an incipient and undermining belief among a minority that the wealth and governance of South African should not be returned to its historical pre colonial owners. Elon musk does not support South African democracy!	Selwyn	Western Cape		unemployed individual
	2025-06-22 10:05:28	No I do not	Policy Direction	All telecommunications companies in South Africa are expected to follow ICASA’s rules — and Starlink should be no exception. We need to be able to regulate what they do on our soil and hold them accountable if things go wrong. Changing national policy just to suit one foreign company sets a dangerous precedent, especially in a country where the majority of South Africans still live in poverty. Local ownership requirements like the 30% rule aren’t just red tape — they are a way to make sure that our people benefit from the industries shaping our future.	Katleho Wamkelwa	Gauteng		employed individual
	2025-06-22 09:58:29	No I do not	Policy Direction	Policy intervention must not be driven by the appetite to appease Musk and Starlink but rather informed by the broad strategic imperatives. No self respecting Nation should allow itself to be manipulated by forces outside the lawmakers and national imperatives. If a policy is good to be changed randomly to suit the investment interests of some irrespective of National interests, then it's as good as not existing.	Lucas			employed individual
	2025-06-22 09:58:28	No I do not	Policy Direction	Policy intervention must not be driven by the appetite to appease Musk and Starlink but rather informed by the broad strategic imperatives. 	2025-06-22 09:35:00	No I do not	Policy Direction	We cant change our laws for Eleoln musk.. This will set a wrong precedent and be unfair to the telecoms who are already in the country complying to the current laws	Bonolo	North West		employed individual
	2025-06-22 09:25:50	No I do not	Policy Direction	Comment on Proposed Amendment to BBBEE Requirements by ICASA: I do not support the proposed policy direction to amend the BBBEE requirements. The Broad-Based Black Economic Empowerment (BBBEE) framework was established to redress the imbalances of the past and promote inclusive participation in the economy. It is premature to consider any amendments at this stage, especially when the existing economic disparities remain significant. Allowing entities such as Starlink to operate without fully aligning to our BBBEE framework sets a dangerous precedent. Regulatory requirements must be applied consistently to ensure fair transformation and equitable participation of historically disadvantaged South Africans. Weakening these standards risks undermining the very objectives of BBBEE and could widen the existing economic gap rather than close it. Maintaining our policy direction is not just a legislative obligation but a moral and economic imperative.	Lamkelo	Gauteng		employed individual
	2025-06-22 09:23:11	No I do not	Policy Direction		Mbali	Gauteng		employed individual
	2025-06-22 09:14:46	No I do not	Policy Direction	South Africa is not for sale. Foreign investors already own the economy. Data and tech infrastructure is the expansion of that.	Nonyamezelo	Gauteng		self-employed
	2025-06-22 09:06:47	No I do not	Policy Direction	We must reject the notion that we “need” western billionaires to come and save us. We have everything we need.	Nuhaa			
	2025-06-22 09:02:20	No I do not	Policy Direction	The removal of BBBEE requirements to accommodate a racist, fascist bigot to operate in a country with a history like ours only sets a precedence that our leaders are weak and easily bend to the wants of the west at will. This will be a betrayal of the people should it push through.	Lati	Gauteng		business owner

	2025-06-21 10:14:39	No I do not	Policy Direction	Why can't he comply with the rules and policies is the republic instead of making changes to the rules and policies, that's done level of bureaucracy and bring bullish.	Sniko			
	2025-06-21 09:56:53	No I do not	Policy Direction	The BBBEE legislation has been unsuccessful - more than 30 years of chasing white professionals out of the country - enriching a few blacks that knows how to manipulate the legislation and costing the government a fortune - we should be appointing any colour person based on capabilities and performance records and "nobody should ever be appointed based on the colour of his/her skin'" a wise man said.	Marthinus	Western Cape		employed individual
	2025-06-21 09:48:49	No I do not	Policy Direction	Transformation will cease to happen if BBBEE is no longer applicable. There's nothing wrong with the BBBEE policy but what is wrong is the implementation of it.	ANDA	Eastern Cape		employed individual
	2025-06-21 09:43:30	No I do not	Policy Direction	If the policy is changed for starlink it opens the door for many other policies meant to uplift the people of South Africa. This is a slippery slope. Why are we bending over backwards to accommodate the West in way they would never do for us? What is good for the gander is good for the goose.	Ramona	Gauteng		employed individual
	2025-06-21 09:38:58	No I do not	Policy Direction	My main concern is that if we allow certain people who have an immense amount of political and economic power to be exempt from policies that are meant to redefine the imbalance(socially, economically, and financially) between historically disadvantaged groups and those that caused the imbalances. We are going to see a shift in the power dynamic back to those who caused the imbalance in the first place. We will undo all the work that was done over the past few years and so what was the point and how are we going to address the issue that is still playing a big role in the lives of everyday South Africans? The incredible inequality in our country.	Daliwonga			
	2025-06-21 09:20:02	No I do not	Policy Direction	If you have a problem with BBBEE as a policy and not because its implemented horribly then you are exactly the kind of person our beautiful diverse and the most unequal society doesn't need. Donald Trump has created frameworks for you to leave. Thanks.	Buhlebethu	Gauteng		business owner
	2025-06-21 08:58:55	No I do not	Policy Direction	The regulations and laws in South Africa are in place so to address as well the inequities due to apartheid era. As it today the inequality is still very high. So adaptation of our law to suit the rich few is not only betrayal to all South Africans but it's also a way of allowing those unfair inequalities to continue. If Starlink is to continue then the 30% of its ownership should be own by those historically disadvantaged!	Emma	KwaZulu -Natal		
	2025-06-21 08:46:47	No I do not	Policy Direction		Nokukhanya			
	2025-06-21 08:45:25	No I do not	Policy Direction	Unless Black people are fully compensated for the past injustices government policy should be directed towards alleviating their econonic condition through BBBEEE	Motanyane	Free State		employed individual
	2025-06-21 08:31:19	No I do not	Policy Direction	What did BBBEE want to achieve in the 1st place? Has that been achieved? Who stands go benefit from scraping of this policy and why are they more important that the country sovereignty in policy making and application?	Puculwa	Free State		employed individual

	2025-06-21 05:24:37	No I do not	Policy Direction	The minister's first priority should be to investigate the origins of this policy: why was it introduced, what specific goals was it meant to achieve, and within what timeline? Has it delivered on those goals? Is the vision it’s built upon still realistic, and if not, what alternative path might more effectively serve the intended purpose? The president has made it clear that South Africa must stand firm and not yield to external pressures. We cannot allow any individual, be it Elon Musk or anyone else to influence policies aimed at redressing historical injustices and uplifting Black communities. To do so would be to repeat the oppression of the past. If the minister supports or endorses policies that reverse progress and undermine transformation, then he must be held accountable and removed from his position without delay. The nation cannot afford to approve laws that send us backward.	Njabulo	KwaZulu-Natal		employed individual

	2025-06-20 14:46:56	No I do not	Policy Direction	It is disheartening to see how politicians take South Africans for a ride. 30% to previously disadvantaged communities is nothing. How much is 30% of Elon Musk's wealth? Other countries e.g Zimbabwe their % stake is 51 to 49. 59% is for previously disadvantaged communities and the 49% is for the foreign business person who wishes to conducf business in their country and that is non-negotiable. Why is South Africa so quick to look the other side to please the rich who are getting richer at the exploitation of masses of South Africans. Take a look in the NW, how many mines are there? Yet when you drive through their roads you are met with the stench of poverty. Mining companies no longer care about their promises they made to the communities.. The Minister is left to clean up and convince South Africans after the bigwigs had had their tea with the billionnaire and have agreed to amend our policies and laws after layering their pockets with corruption money. I am not talking about NW only, every province in our country where foreign big businesses are operating mines, there is extreme poverty amongst the communities. Very sad. What happened to our sovereignty?	Dikeledi	Gauteng		retired
	2025-06-20 14:44:23	No I do not	Policy Direction	South Africans have a long way to go in correcting the injustices of the past. Because of corruption by politicians, we can format differently to benefit the people on the ground instead of politicians	Paula	Gauteng		employed individual

	2025-06-20 14:09:52	No I do not	Policy Direction	BEE laws are not mere regulatory hurdles; they are a cornerstone of South Africa's post-apartheid nation-building project. Their existence is rooted in a profound historical imperative. While the prospect of advanced technology is appealing, it is crucial to consider the character and track record of those seeking to operate within our borders. Reports on Elon Musk's business practices and public conduct raise serious questions that cannot be ignored when evaluating Starlink's suitability for a special dispensation.Perhaps most alarmingly, Elon Musk has repeatedly peddled the false and dangerous narrative of "white genocide" in South Africa. This is not merely a misinformed opinion; it is a calculated attempt to Undermine South Africa's Sovereignty and Stability. By promoting such a malicious fabrication, Musk appears to be attempting to leverage international pressure and stigmatise South Africa, potentially as a tactic to gain preferential treatment and bypass our country's legitimate laws, including BEE.	Diteboho	Gauteng		business owner
	2025-06-20 13:37:41	No I do not	Policy Direction	South Africa should abolish the BBBEE requirements if it wants to attract more foreign investments & not modifying it to their advantage from another point of view. This modification of the policy does not make anything different from what they are now. If the law says everyone is equal, then the law should allow capabilities of the people to earn the necessary occupation instead of a "force employment of black citizens". With this enforcement, all young and qualified job seekers will leave SA to find a better future. SA should not lose all those knowledgeable youngsters to a foreign country due to BBBEE policy. All jobs seekers need to be qualified for the job and not employed due to the color of their skin. BBBEE only slow down or eventually end foreign investments to SA. Best example : Zimbawe ! We all live in a capitalism world and there is always a saying : money talks and bullshit walks!	leong	Western Cape		retired
	2025-06-20 13:35:33	No I do not	Policy Direction	I do not support the proposed policy direction that seeks to remove BBBEE requirements to accommodate Elon Musk’s Starlink in South Africa. This is not just a matter of internet access, it’s about economic justice, national sovereignty, and the longterm integrity of our democracy. BBBEE was never meant to be a "nice-to-have" or an obstacle to progress. It was introduced because for generations, black South Africans were deliberately excluded from meaningful participation in the economy. Entire communities were systematically denied land, capital, education, and access to high-value industries like telecommunications. BBBEE is a response to that injustice, a tool to ensure that the ownership, control, and benefits of our economy are broadly and fairly shared, not concentrated in the hands of a few. Removing these requirements to please a foreign company, especially one as politically powerful and controversial as Elon Musk’s Starlink sets a dangerous precedent. It says that our laws can be suspended when they become inconvenient to the rich and powerful. Worse still, Starlink presents a real national security risk. In Ukraine, Elon Musk demonstrated just how much unilateral power he wields by switching off Starlink access during a critical moment in the war, citing his personal concerns. That decision wasn’t made by the Ukrainian government or any democratic institutio, it was made by one man sitting in another country. If we open our skies to Starlink without strict conditions without local ownership, regulation, or empowerment we are essentially handing over part of our digital infrastructure to a foreign actor who has zero obligation to act in South Africa’s interests. What happens if our government takes a position Elon doesn’t like? What happens in a crisis when we depend on Starlink for communication or coordination and it gets shut off? South Africa deserves better than this false choice between progress and justice.	Modise	Gauteng		employed individual
	2025-06-20 13:10:09	No I do not	Policy Direction	By amending this policy, the Government will be scrapping BBBEE in its entirety as you cannot give one sector preferential treatment. Furthermore, the far reaching implications will also mean we dont need Employment Equity (EE).	Tankiso	Gauteng		employed individual
	2025-06-20 12:58:19	No I do not	Policy Direction	South Africa cannot afford to remove policies that aim at undoing the injustices of the past. BBBEE has not been perfect and may not have benefited everybody but we can ill afford to get rid of it especially due to a foreign company wanting to do business in our country. The economy is still in the hands of the white people and it is going to take a long time to get rid of inequalities.	Cecil	Gauteng		
	2025-06-20 12:51:18	No I do not	Policy Direction	We Can not change our policy just to suit Elon we definitely demand 60% or nothing, infect we have nothing to lose as a country. He has nowhere to go, he's completely finished without us	Makingking	Gauteng		unemployed individual

	2025-07-13 04:20:27	No I do not	30% local ownership	Your message is powerful, righteously angry, and your points are valid — but to make it even more impactful and harder to dismiss, you might consider tightening the tone. Right now, it's emotionally raw (which is understandable!), but that could be used by critics to sidestep the actual argument. Here's a revised version that keeps your fire ? but sharpens the delivery: The very reason BBBEE laws exist is because, under apartheid, white people systematically dehumanised people of colour — violently denying them access to quality education, jobs, healthcare, and economic participation. This wasn't passive exclusion, it was brutal, state-sanctioned oppression that gave white South Africans everything and left people of colour with next to nothing. Imagine that compounded by being so dehumanised, they needed a form of identification to go to towns or places that were dermacated to be exclusively for white people (IN SOUTH AFRICA, IN AFRICA!!). If they didn't have any form of identification they would be beaten to a pulp, some even killed. We literally have a holiday that serves as a reminder of all the people who striked against the pass laws, Sharpeville Massacre Remembrence Day (which is called, ironically, called Human Rights BBBEE is one legal tools we have to correct that grotesque legacy. Yet, those who benefited (and continue to benefit) from that system are often the ones complaining the loudest about redress. It is outrageous that Elon Musk, whose family accumulated wealth during apartheid, would suggest that he is somehow above the policies designed to bring equity to a system that privileged him. Why should the victims of a monstrous system continue to be sidelined so that someone who already inherited generational advantage can make even more money? To suggest that BBBEE be amended just for him is not only arrogant, it isracist. It reveals a belief that Black advancement is an obstacle to success, rather than a long-overdue correction of injustice.	Shibu	Gauteng		employed individual
	2025-07-12 20:31:53	No I do not	30% local ownership	BEE is an abused policy but for uplifting our people. Scraping laws for businesses we want wont stop here, it'll be a norm many businesses will use to oppress us.	Luyanda	Western Cape

	2025-07-10 07:57:08	No I do not	30% local ownership	Re: B-BBEE in South Africa – Personal Observations and Concerns While the original intent of Broad-Based Black Economic Empowerment (B-BBEE) was to redress historical inequalities and promote inclusive economic participation, my personal experience has highlighted a number of ongoing concerns with how the policy functions in practice. In many cases, B-BBEE does not truly benefit individuals who are skilled, competent, and driven, but rather places emphasis on meeting compliance requirements. As a result, qualified and capable candidates are often overlooked, not on the basis of merit or performance, but due to regulatory pressure. More critically, B-BBEE has not delivered meaningful upliftment to the broader lower-income population it was meant to serve. In some instances, it appears to create short-term, superficial opportunities, rather than long-term career growth and empowerment. A recurring issue is that roles are sometimes filled by individuals who see the job as a formality, with little passion, ownership, or interest in personal or professional development. This not only affects performance and team morale, but undermines the integrity of the work and the company's overall goals. While transformation and diversity are important, sustainable empowerment must be linked to skill development, accountability, and merit. Real upliftment comes from investing in people who are motivated to grow, learn, and contribute meaningfully—not simply checking boxes for compliance. In my view, for B-BBEE to be truly impactful, it needs to evolve into a system that encourages excellence, drives mentorship, and fosters a culture of empowered contribution rather than entitlement. 	2025-07-09 11:17:41	No I do not	30% local ownership	I do not feel that the minister should make an exception for Elon Musk. I have several criticisms against him personally: * He is a toxic individual that has turned Twitter into a safe-heaven for neo-nazis and has himself promoted several right-wing conspiracy theories. * In the US, he's siphoned off billions of tax payer funds in the the form of subsidies to finance his companies, while using his position in DOGE to cut useful services to poor people. * He flouted environmental regulations when he built his Starbase, * He is quoted as saying "The fundamental weakness of Western civilization is empathy" while his DOGE was cutting USAID which will lead to untold suffering for poor and marginalised people. * He treats his employees badly and has a history of engaging in union busting activity. There is no reason to give the world's wealthiest man a mechanism to become even richer. South Africa has several companies that comply with the 30% ownership rule that can provide internet access to the regions Starlink wants to serve.	Werner	Gauteng		employed individual
	2025-07-09 11:05:10	No I do not	30% local ownership	Government must include the public and consider sovereignty. Government is an employee of the people. Therefore government must do what will benefit the nation for generations to come, and giving foreign private companies excess to the country's technology is the worst decision ever. As a nation we must create our own technology.	Maphalala	Gauteng		unemployed individual

	2025-07-09 09:21:27	No I do not	30% local ownership	Reason for Declining: While transformation remains a constitutional and moral imperative in South Africa, we do not support the proposed policy direction to amend B-BBEE requirements by ICASA at this time, due to the following concerns: 1. Misalignment with the Objectives of the B-BBEE Act The Broad-Based Black Economic Empowerment Act 53 of 2003, as amended, emphasizes "substantial change in the racial composition of ownership and management structures" and the promotion of "sustainable development and growth." However, the proposed policy changes appear to: Focus on increasing regulatory thresholds rather than creating enabling conditions for genuine, inclusive participation. Risk becoming a compliance-driven exercise that may undermine the broad-based intent of the Act. ? Reference: B-BBEE Act, Section 2 — "Objectives of this Act" 2. Potential Negative Impact on Sector Growth and Investment The National Development Plan (NDP) 2030 promotes both economic transformation and inclusive growth. It warns against transformation measures that "create uncertainty and regulatory burden", which can discourage investment and innovation. Amending B-BBEE requirements without consulting industry realities (such as capital-intensive barriers in telecom or media) could: Deter local and foreign investment. Limit the participation of smaller entities due to increased compliance complexity. Hamper digital inclusion goals through slower sector expansion. ? Reference: NDP Chapter 3 – "Economy and Employment", p. 110–111 3. Existing Sector Codes Should Prevail ✅ Conclusion Transformation remains critical, but the proposed amendment to B-BBEE requirements must: Be aligned with existing frameworks like the ICT Sector Code. Avoid introducing excessive compliance costs or regulatory uncertainty. Focus on measurable, developmental impact, not symbolic targets. We therefore decline support for the current proposal.	Vusi

	2025-07-08 19:56:03	No I do not	30% local ownership	Certainly — here's a written text expressing your frustration: I am deeply frustrated by the proposed relaxation of BEE (Black Economic Empowerment) laws, particularly in the case of companies like Starlink. These laws were never intended to be optional or circumstantial — they are a necessary corrective to centuries of systemic exclusion and economic marginalization of Black South Africans. Relaxing BEE requirements sends a clear message: that economic participation for Black people is negotiable when it becomes inconvenient for multinational corporations. This undermines the very purpose of BEE, which is to ensure that those who were historically oppressed finally have equitable access to economic opportunities, ownership, and participation. South Africa's commitment to transformation must be principled, not selective. If we allow exemptions, especially for powerful foreign entities, we are not only weakening the policy itself but betraying the very people it was designed to uplift. We cannot afford to go backwards — BEE is not a barrier to development; it is a path toward inclusive and just growth!!	Katleho	Free State		employed individual

	2025-07-08 14:43:23	No I do not	30% local ownership	Without local ownership, international companies will have little motivation to reinvest into the country. The 30% local ownership will reduce the risks of Starlink and other companies being threats to national security by having South Africans within the decision making chain of the company and so pitching pro South African company policy/ company moves. If foreign companies are to retain 100% then the country stands at risk to be destabilised by the company owner through moods from social media engagements — like the threat to turn off Starlink in the country of Ukraine that currently has a national security issue which was the worsened by the threats of foreign interests which weakened the national security standing of a country that is already at war. uBuntu says sharing is caring, if companies do not wish to follow uBuntu then they are openly saying that they will trample over South African citizens rights over the sake of making money.	Sakhile	Mpumalanga		student
	2025-07-08 14:37:20	No I do not	30% local ownership	The policy is necessary to address the economic injustices of the past, which only benefited white South Africans and yet they were settlers in this country. All the wealth and land post the apartheid regime are still sitting with the white minority of this country. Implementation of the policy is also not effective. I do not entirely agree that companies must forgo 30% of their ownership, but a much more meaningful participation and ownership should be earned by other means that will ensure ownership at some point. Transparent means must ensure inclusion for various parties and not just the politically connected individuals.	Lucky	Gauteng		self-employed

	2025-07-08 14:22:10	No I do not	30% local ownership	Broad-Based Black Economic Empowerment (BEE) is vital in South Africa as it addresses the deep-rooted inequalities caused by apartheid. It promotes economic participation, ownership, and opportunities for historically disadvantaged groups. Removing BEE to accommodate individuals like Elon Musk undermines the purpose of redressing past injustices and perpetuates economic exclusion. Musk has global access and influence,policies like BEE are not meant to restrict innovation, but to empower South Africans who were systematically denied such chances. Diluting or removing BEE for wealthy foreigners contradicts the core goals of transformation, equality, and inclusive growth that South Africa still urgently needs. 	2025-07-08 08:53:57	No I do not	30% local ownership	The South African society has not been transformed yet. The previously disadvantaged community is still impoverished as a result of their past. BBBEE should be implemented properly to address this. If we scrap the BBBEE, this may result in deepning the sufferings and lack of opportunities for the previously disadvantaged community and allowing the corporate to look down upon this community which will then escalate crime because of the high rate of unemployment that this will result in.	Bandile			employed individual
	2025-07-08 08:52:41	No I do not	30% local ownership	Elon Musk's claim that he's being barred from operating Starlink in South Africa "because he's not Black" is not only false—it's dangerous misinformation that undermines our country's sovereignty and the hard-won policies designed to redress historical injustice. 1. We cannot bend national policy to accommodate individuals who spread misinformation that harms our country's image and cohesion. South Africa's regulatory frameworks—like B-BBEE—exist to ensure inclusive economic participation and protect the dignity of our people. To mischaracterize these policies as "racist" is not only disingenuous, it's an insult to the lived realities of the majority of South Africans. 2. Every company that wants to operate here must respect the laws of this land—just as they do elsewhere. Starlink complies with regulations in the U.S., Europe, and other jurisdictions. Why should South Africa be expected to compromise its legal standards to accommodate one billionaire? Our laws are not optional. They are the product of democratic processes and are designed to serve the public good—especially for those historically excluded. South Africa is a Black-majority country with a constitutional mandate to pursue equity and redress. That is not up for negotiation. We will not rewrite our laws to soothe the egos of global elites. If Starlink wants to operate here, it must do so on terms that respect our people, our policies, and our principles.	Thulisile	Mpumalanga		Non-profit

	2025-07-08 04:19:36	No I do not	30% local ownership	Dear Minister I have been following Mr Musk for some time now. I am very happy for his success. I have no agenda with him as a citizen however he raises security concerns when it comes to his recent stunts to us as citizens. Looking at the bombing in Gaza we could have easily been in that situation Should our president have not acted Sharply . I can only agree to Mr Musk under the condition we drop his percentage to 15% local ownership, and $50 000 000 investment as per initial offer to Schools in that we have some control of the company. On the good side of things, is if he accepts this offer I recommend we will also benefits greatly from his Innovations. But now through dependency the key is Self sufficiency my Minister	Qinisela	KwaZulu-Natal		unemployed individual
	2025-07-08 04:15:27	No I do not	30% local ownership	This minister thinks he is smart. Initially he denied the allegations that he was paving the way for Elon Musk's starlink.	Miss P	Mpumalanga

	2025-07-08 02:16:26	No I do not	30% local ownership	My fear for these amendments is the infiltration by the big companies leaving local semi skilled communities unemployed. Who ever is doing any job in any community 30 percent of ownership should be given to the local community. If you buy them out they must consider interest and profit that will be accrued, depending on the job type.	Simangele	KwaZulu-Natal		retired
	2025-07-08 02:01:43	No I do not	30% local ownership	No Starlink. China is a much better option. Starlink will be used to spy on SA and has been used in war waged by the west. No thanks. The US and NATO start wars all over the planet . China is not at war with anyone and hasn't been for many years. They are technologically way ahead of everyone else including Elon Musk. Inevitably Elon Musk will align with the west no matter what he says right now. Wasn't he the one propagating the idea of the white genocide of farmers in SA and now you want to give him this opportunity to get his hands on our country with it's rare earth minerals? Furthermore people in Nairobi have paid for Starlink and haven't got it for 6 months. So no.Definitely not.	Susan	KwaZulu-Natal		retired

	2025-07-07 17:54:27	No I do not	30% local ownership	All companies who wish to operate in South Africa must abide by the existing laws. Making exceptions will open the country up for litigation from the companies who are in compliance. I particularly reject this because this is being done for the benefit of Elon Musk who already benefited from Apartheid. He must comply or keep his business off our shores. We don’t need Starlink and there is no valid reason for it to be exempted from the existing laws besides privilege. We can’t be bullied by Elon and America. Starlink is not even as cheap as it’s being portrayed and poses a nation security risk. A hard NO.	Lona	Western Cape		employed individual

	2025-07-07 12:59:58	No I do not	30% local ownership	We shouldn't be bending our rules to to to the will of those with money taking into account that these rules are to redress the injustices of where we're come from as a country.	Motheo	Mpumalanga		
	2025-07-07 12:57:22	No I do not	30% local ownership	. Constitutional and Policy Mandate South Africa’s Constitution and legislation such as the Broad-Based Black Economic Empowerment Act (2003) mandate the transformation of the economy to address the injustices of apartheid. The 30% local ownership is: Not arbitrary, but legally enshrined policy; A key tool to promote inclusive economic participation; Vital for ensuring local stakeholders are not perpetually marginalized in sectors critical to national development (like telecoms and internet infrastructure). Quote: "Economic transformation is not negotiable; it is a national imperative." – Former President Cyril Ramaphosa 2. Digital Sovereignty & National Security Starlink provides direct satellite internet outside of local infrastructure—bypassing national ISPs, regulators, and in some cases even surveillance or interception capabilities. Risks: No local presence means limited regulatory oversight; Uncontrolled data transmission could undermine cybersecurity, intelligence, and defense capabilities; Possibility of monopolistic control by a foreign entity in a strategic sector. ✅ Requiring 30% BEE ownership helps anchor accountability locally and gives the state a measure of control over an otherwise unregulated transnational actor. 3. Level Playing Field for Local ISPs South African ISPs are already: Subject to licensing conditions, tax obligations, and Required to comply with BEE ownership structures. Allowing Starlink or any foreign competitor to bypass these same rules would create an unfair playing field, harming local industry and innovation, including: Black-owned tech startups; Emerging ISPs from townships or rural areas. Principle: Investment is welcome—but not at the expense of fairness and local empowerment. 4. Strategic Economic Development The 30% BEE rule isn’t just a gatekeeping tool—it's a development policy: Helps transfer skills, equity, and capacity to local firms; Enables historically disadvantaged groups to co-own the digital f	Jean-Paul	North West		student

	2025-07-07 08:29:29	No I do not	30% local ownership	In South Africa, B-BBEE's ownership component has increased black participation in industries like mining, with companies like Anglo American achieving 30%+ local ownership in some operations. Studies (e.g., World Bank, 2020) show local ownership policies can boost GDP growth in developing economies by 1-2% annually when paired with skills development. Local ownership redistributes wealth and opportunities, enabling historically marginalized groups to gain financial stakes in businesses. Increases income and asset accumulation for local owners, fostering economic inclusion. Profits from local ownership are more likely to stay within the community, funding local projects, infrastructure, or services. A study using a cut-off of R25,000 per capita income per year (in 2000 prices) found that the number of individuals in the middle class grew from 3.6 million in 1993 to 7.2 million in 2012, according to Research on Socio-Economic Policy (RESEP). 	2025-07-07 07:43:29	No I do not	30% local ownership	The proposed relaxation of BEE rules to accommodate Starlink is a dangerous betrayal of South Africa's commitment to economic transformation. BEE exists to redress apartheid's systemic inequalities by ensuring Black South Africans benefit from economic opportunities. Waiving these rules for a foreign corporation like Starlink undermines this moral and legal imperative, prioritizing profit over justice. Starlink's refusal to comply with BEE demonstrates blatant disregard for our laws and values. If we bend the rules for them, we set a precedent that empowers other multinationals to demand similar exemptions, eroding decades of progress. Why should a billionaire-owned company enjoy privileges denied to local Black entrepreneurs? This is economic colonialism in disguise. South Africa's digital divide must be addressed, but not at the expense of empowerment. If Starlink wants to operate here, it must partner with Black-owned businesses, invest in skills development, and contribute meaningfully to transformation—like every other compliant company. Relaxing BEE for selective advantage is hypocritical and unjust. We demand the government stand firm. No exceptions. No retreat from transformation. Our economy must serve the people, not foreign interests.	Lerato	Gauteng		
	2025-07-07 07:43:26	No I do not	30% local ownership	Starlink needs to comply with SA laws like all other companies operating in SA. Otherwise Starlink will be a security risk and can be used for espionage	Themba

	2025-07-07 05:54:55	No I do not	30% local ownership	Starlink is a risk to national security and Elon musk lied about there being a genocide to get his way. Stop pandering	Madume			business owner
	2025-07-07 05:53:51	No I do not	30% local ownership	I do not support the proposed amendment requiring 30% local ownership as part of the BBBEE requirements for the telecommunications and ICT sector. While transformation is necessary, a fixed ownership percentage can discourage both local entrepreneurs and international investment, especially for small or emerging businesses that may not have access to such equity partners. A more flexible approach that considers different business sizes, growth stages, and contributions to empowerment (such as skills development, supplier development, and job creation) would be more inclusive and sustainable. Transformation should empower, not restrict.	Oddette	Mpumalanga		business owner

	2025-07-06 20:39:59	No I do not	30% local ownership	the 30% black ownership requirement, as a non-negotiable pillar of economic transformation in South Africa.1. Upholding Precedent & Policy Consistency Policies like BEE were established to redress historical economic imbalances and promote inclusive growth. Changing them based on short-term interests undermines long-term transformation goals. Investor confidence relies on policy stability—frequent shifts deter both local and foreign investment. 2. Local Development & Technology Sovereignty Critical industries (like tech, energy, and mining) should prioritize local ownership and innovation to prevent dependency on foreign entities. If South Africa weakens ownership requirements, it risks ceding control of strategic sectors, which could lead to capital flight and diminished self-sufficiency. 3. Economic Justice vs. Short-Term Gains Some argue that relaxing BEE rules could attract more investment, but this often comes at the cost of perpetuating inequality. True empowerment means ensuring black South Africans have meaningful equity and decision-making power, not just token participation. 4. Global Context: Nations Protect Strategic Interests Countries like the U.S. (CHIPS Act), China (tech sovereignty), and the EU (local content rules) enforce policies to safeguard their economies. South Africa should not compromise on ownership requirements that ensure wealth stays within the country and benefits historically disadvantaged groups. The 30% black ownership rule should not be diluted—it is essential for redress, economic stability, and self-determination. Instead of bending to external pressures, South Africa should strengthen local investment in technology and industrial development to ensure long-term prosperity.	phillip

	2025-06-24 18:32:45	No I do not	30% local ownership	Redress must not be negotiable. If Starlink truly wants to serve South Africa, it must do so in a way that supports national priorities, not undermines them. Even if Starlink promises improved rural connectivity, this cannot come at the cost of sovereignty or equity. SA should not give in to SpaceX/Starlink's or any foreign investors demand to bypass (B-BBEE) laws because doing undermines the efforts at economic redress, inclusivity, and long-term transformation. Most of us agree that in principle B-BBEE is imperative for SAs transformation and equity, and implementation is what needs to be addressed.	Kabelo			
	2025-06-24 17:36:18	No I do not	30% local ownership	All businesses operating within the Republic of South Africa should abide by all laws. The USA would expect the same so Mr Musk stop trying your luck. Your money can't buy everything and everyone.	Rory	Western Cape		
	2025-06-24 15:50:34	No I do not	30% local ownership	The actual law being compromised for one company is setting a disgusting precedence. That means this won't be an isolated event. BBBEEE is not a "favour," it's correcting injustices that we are STILL facing in South Africa that's facing an Apartheid hangover. Stop baiting people by mentioning the poor. This is exploitation. Instead, the government should be actively trying to get people out of poverty instead of subsidizing us with grants or small favours that don't necessarily impact our day-to-day lives. 	2025-06-24 10:29:52	No I do not	30% local ownership	Law cannot be diverted to accommodate a single service provider only but the whole bill has to be overalled and changed after proper consultation.	Malvin Kenneth	Western Cape		employed individual
	2025-06-24 10:14:40	No I do not	30% local ownership	I do not support an amendment on BBBEE because it will remove local beneficiation and this will lead to foreign owned companies monopolizing our economy. Currently South Africa remains the most unequal country in the world and as a country we must use every effort to address this dilemma, otherwise if not properly addressed, it will be a bomb of extraordinary proportions that will affect the next generations black and white.	Sammy	Gauteng		employed individual
	2025-06-24 10:05:04	No I do not	30% local ownership	My submission is that Elon Musk is a South African born child. He has never considered South Africa in terms of historically disadvantaged individuals in his plans and businesses interests. If he really want to become Souht African internet service provider he must consider BBEEE policy and implement it in his business. Otherwise he can use American soil to his business advantages. There is no personal vendetta from my opinion to Elon but just pure business deal.	Jacob Papana	Gauteng		Non-profit
	2025-06-24 10:03:25	No I do not	30% local ownership	This undermines black empowerment goals in the sector. This seems the directive is specifically tailored for Starlink although the Minister denies it. The timing and content of the directive is concerning as well as directly addresses the issues preventing Starlink's entry. This to me shows how Elon Musk, a white male, is already at an advantage compared to the majority of the country who are black. I believe government can find alternative ways to attract broader investment in the ICT sector and ensure consistency with existing B-BBEE frameworks used in other sectors that do not pander to whiteness. Allowing Equity Equivalent Investment Programmes (EEIPs) as a direct substitute for ownership, especially for large multinational companies, fundamentally dilutes the core objective of B-BBEE, which is to transfer economic power and wealth directly into the hands of historically disadvantaged individuals. While EEIPs can contribute to social development, they may not offer the same long-term wealth creation and control that direct equity ownership provides. This policy could also create a two-tier market. Local, black-owned ISPs and telecommunications companies have had to adhere strictly to the 30% ownership rule, investing heavily and navigating a complex regulatory landscape. If foreign companies are allowed to bypass this through EEIPs, it could put local businesses at a significant competitive disadvantage and undermine their efforts to achieve meaningful participation in the sector. A common criticism of EEIPs in South Africa is the potential for a lack of transparency and effective monitoring of their impact. Some companies might not fully deliver on their promised contributions, or the benefits may not genuinely reach the intended beneficiaries, as effectively as direct ownership. Allowing this "workaround" for Starlink could set a precedent for other sectors, potentially weakening the entire B-BBEE framework across the economy.	Khululiwe	KwaZulu -Natal		employed individual

	2025-06-23 14:09:34	No I do not	30% local ownership	If Starlink wants to operate and make money in S. Africa then they must comply with policy. Starlink is prepared to comply with Arabic and Asian policies but not African policies. Starlink is not the first global or multinational to operate in S. Africa. It's ironic that an American company wants, in true imperial fashion, to tell us how to allow companies to operate in our country. Elon Musk (SpaceX) as owner of Starlink, knows as well as we do how he and his family benefitted from Apartheid's policy of favoring white people to the exclusion of African people, and giving 100% ownership to non-Africans. As a beneficiary of that policy, Elon Musk should be the loudest proponent in support of reversing the detrimental effects of apartheid policies where everything was stolen from Africans. However we know the disdain he has for our country. Communications minister Solly Malatsi should stop this ignorance and should rather be focusing on tightening the policy direction and putting in place requirements to ensure protection of S. African's data and privacy with these new technologies especially satellites owned by foreign entities. Put our national security interests FIRST. Stop purporting that Starlink is a one-way offering beneficial to South Africa and forgetting that Starlink's sole purpose is to make money. Rather insist that S. African operators fill the access gap and reduce pricing. The govt should prevent the erosion of South African companies as we have seen in the textile industry. Solly Malatsi's proposal is very disappointing. The biggest problem with this proposal that it is not presented in good faith and should not be in any way done with Starlink in consideration. Solly Malatsi must go back to the drawing board and think about what's best for the future of South Africans and South African businesses.. Stop being bullied and stop being a puppet	Thoko	Gauteng

	2025-06-23 07:54:06	No I do not	30% local ownership	If 30% local ownership is not on the cards, then ask the company to invest into Black empowerment improvement initiatives like training or donations towards schools.	Maritza	Western Cape		employed individual
	2025-06-23 07:26:16	No I do not	30% local ownership	The participation of MultiNational Companies in South Africa must be stemmed. This reminds me of when Trevor Manuel (then Minister of Finance) allowed for the importation of clothing into South Africa and it obliterated the CMT market in Cape Town (and other locations). We have been suffering ever since. We have not been able to, simply put, get well fitted clothes. International Companies do not know what we need. ATNS can be 30% shareholder as BEE partner of a subsidiary, as an entity working on similar technology. The excuse SPACE X is making that 30% cannot be owned is nonsense. MTN has a subsidiary in Nigeria, Nigerians own 25% of it, DeBeers operates a diamond mine in Botswana the government owns 50% of it, Deloitte South Africa is owned 100% by South Africans, there are so many other examples of this. The 30% ownership should be a minimum requirement across other sectors. BBBEE has been watered down enough, not been strictly enforced, and the results show in how little it has been able to resolve the inequality issues across race. Starlink is requiring special treatment for telecommunications company. We must always be wary of allowing a foreign entity to come and dictate inconsistencies in our laws that must be changed for them. Effectively infringing on the sovereignty of a independent state. There is no requirement BBEEE that direct ownership cannot be a prerequisite for licensing on top of other requirements in the code.	Balebetje			self-employed
	2025-06-23 07:20:56	No I do not	30% local ownership	Align other sectors that are being used as a reason to change the BEE policies to suit star link. it cant be that we overhaul our policies to accommodate the arrogance that have ben displayed by the star link owner toward brand SA. on another day without the hostilities shown to brand SA by the owner of Star link, this could be given consideration, in effect, we want consideration of other such services provider beside star link, also could we pls ensure we expand the policy to ensure direct access of Data by South African Government for security reasons.	thendo	Gauteng		unemployed individual

Jacques	North West		retired

	2025-06-22 13:18:35	No I do not	30% local ownership	Concerns About Removing BBBEE Requirements 1. Undermining transformation efforts • The 30% HDI ownership rule exists to correct deep-rooted inequalities. Removing it sets a precedent that could weaken broader transformation across the economy. 2. Local disempowerment • Foreign entities could dominate critical infrastructure sectors without any meaningful local participation or skills transfer. 3. Risk of unequal benefit • Will rural and poor communities actually benefit, or will services still be priced out of reach for many? 4. Slippery slope for other industries • Once the door opens in telecoms, will mining, energy, and finance follow suit? That could lead to serious political backlash. A conditional exemption for global tech firms like Starlink could make sense — but only if paired with local content obligations, skills transfer programs, or other transformation-aligned measures. In other words: Yes to flexibility — but not at the cost of fairness. I do not support the inclusion of global technology providers like Starlink in South Africa's telecoms space, this should be balanced with clear obligations for local skills development, employment, and community benefits but it's not. Economic transformation must evolve, not evaporate.	Kea	North West		unemployed individual

	2025-06-21 23:09:04	No I do not	30% local ownership	The 30% local ownership rule is important for transforming South Africa's ICT sector into one that is inclusive, competitive, and locally empowered. Without this rule, South Africa will lose its sense of direction towards transformation and local empowerment. The 30% local ownership rule is not merely a legal hurdle—it is a strategic policy designed to democratise economic power, build local capacity, and ensure that South Africa's digital future is shared by all its citizens. And it plays a major role in ensuring our national security, particularly in the ICT sector. Instead of changing our policies to accommodate major international companies that don't want to directly contribute to empowering our citizens, we should invest in improving and expanding the existing infrastructure. The current poor internet connectivity in rural areas is not something that will last forever. It will take some time to be addressed. Let's pe patient. Quick-fixes like changing policies to gain access to Starlink, which we won't be able to control, will not foster innovation in our local economy.	Bokamoso	Western Cape		employed individual

	2025-06-21 12:01:00	No I do not	30% local ownership	Elon is a cartoon villain, and he has publicly and repeatedly shown his true self to us. There are many other competitors we can look at, but Starlink itself should be barred from South Africa for all eternity. Internet infrastructure is far too critical of a service to give to a right-wing white supremacist, especially in this country, where wealth and true power are concentrated in the hands of white people. But you know this already, i know you do. Polls like these are ran to 1. Build an echo chamber for the people that support Umsangano (in this case, Starlink) 2. Keep track of dissenting voices and their reasoning, so that the reasoning for umsangano can be updated to include counterpoints. Be that as it may, the 30% ownership is important because it gives South Africans a foot in the door in how such critical infrastructure would be run. Starlink is a US govt asset and that is a major threat to our country. not just because it is the US, but because we cannot ensure our sovereignty if we allow another government to have that much power over the operations of our country (kinda like what AIPAC is doing with the US right now)	John	KwaZulu -Natal		employed individual

	2025-06-21 10:59:33	No I do not	30% local ownership	?? A Message to Those Eyeing Profit Without Purpose I do not support Starlink's entry into South Africa—and here's why. We are building a nation grounded in equality, and while we still have far to go, structures like B-BBEE were established to promote equitable opportunity for those who have historically been excluded from economic participation. When a billionaire leaves this country to build his fortune elsewhere—only to return and demand that our entire nation bend its laws for his business interests—it feels like a slap in the face to those who stayed, who struggled, who built. South Africa is not a marketplace for convenience. It's a country with a painful past and an urgent mission: to uplift its people and invest in its future, inclusively. Yes, connectivity is important. But it must never come at the cost of economic justice. Our local networks have invested here, have grown with us, and continue to work within the framework that seeks to empower all South Africans—not just a privileged few. If you're unwilling to play by the rules of nation-building, then respectfully, stay out.	Sauda	Gauteng		employed individual

	2025-06-21 10:34:56	No I do not	30% local ownership	The atrocities and the brutal legacy of the past that was and still is in many instances experienced by black in this country are yet to be addressed.	Sello	Gauteng		self-employed
	2025-06-21 10:32:35	No I do not	30% local ownership		Nobubele			unemployed individual
	2025-06-21 10:19:22	No I do not	30% local ownership	Undermining National Transformation Objectives The B-BBEE policy exists to redress the socio-economic imbalances of the past by promoting meaningful participation of Black South Africans in the economy. Granting Starlink an exemption would undermine this national imperative, set a dangerous precedent, and erode the credibility of our transformation agenda. 2. Creating Unfair Market Distortion Local ICT and telecoms operators have, at considerable cost and effort, complied with B-BBEE requirements, including restructuring equity to meet ownership targets. Allowing a foreign entity to bypass these standards gives it an unfair competitive advantage, discouraging compliance and penalizing responsible corporate behavior. 3. No Evidence of Strategic Exception Justification There is no compelling public interest or strategic rationale that justifies a deviation from existing empowerment policy. While improved internet access is a valid goal, it must not come at the cost of transformation. Numerous local and international companies have found innovative ways to meet B-BBEE obligations—Starlink should not be an exception. 4. Long-Term Risk to Local Economic Empowerment Permitting foreign ownership without transformation requirements will hollow out the local ICT sector and limit the development of Black-owned businesses and entrepreneurs in the digital economy. South Africa's economic resilience depends on inclusive growth, not dependency on foreign monopolies. 5. Policy Consistency and Sovereignty South Africa's regulatory framework must apply consistently to all market participants. Carving out exemptions to accommodate multinational interests weakens our sovereignty and exposes the country to future regulatory manipulation by corporate lobbying. Conclusion We urge the government to reaffirm its commitment to B-BBEE and economic justice by rejecting any proposal to exempt Starlink or similar foreign entities from the 30% Black ownership requirement. 	2025-06-21 08:36:32	No I do not	30% local ownership	I do not support the proposed policy direction. Here’s why: • It replaces genuine share ownership with “equity equivalents,” shifting focus to one-off investment projects rather than real stakes in governance. That dilutes local decision-making power and long-term commitment from multinationals[^8^]. • By letting foreign operators bypass the 30% ownership threshold, it risks crowding out South African service providers, undermining competition and local innovation in the ICT sector[^5^]. • Equity-equivalent contributions—while valuable—tend to be episodic (e.g. skills or enterprise grants), not embedded in corporate equity structures. That makes transformation less sustainable over time[^9^]. • Major political stakeholders (for example, the Economic Freedom Fighters) have flagged this as a threat to domestic industry and national-security interests, indicating broad resistance at a policy level[^8^]. • The core issue is a misalignment between ICASA’s licence regulations and the ICT Sector Code. A targeted regulatory alignment would preserve transformation goals without scrapping the 30% threshold outright[^9^]. Next steps you might consider: – Propose a hybrid model where EEIPs must be tied to minimum board-level representation by South African appointees. – Demand clear performance metrics and multi-year commitments for any “equity equivalent” investments. – Push for periodic reviews to ensure foreign entrants build local supplier networks and skills pipelines—not just tick a one-and-done checkbox. That way, you champion both broader broadband access and genuine, enduring transformation.	Lenard	Gauteng		unemployed individual
	2025-06-21 08:35:48	No I do not	30% local ownership	I believe it’s important for the government to stick to it’s BEE police and not change it in order to accommodate starlink, changing it will send a wrong message to the blacks of this country. Apart from starlink every company that has come to invest in SA has been made to abide and respect the policy until now. If starlink want SA market then it has to conform to the policy and respect the law not request amendment. When a SA company want to invest in USA market, they don’t request for policy amendment but abide by the law. It’s important for the ANC government to do what the promised the majority of black SA and not change one thing that they have done right.	Larry	Gauteng		self-employed

	2025-06-21 05:33:48	No I do not	30% local ownership	The narrative of post-apartheid South Africa is one of remarkable political transformation, yet it is equally defined by the persistent challenge of economic inequality. Thirty-one years after the dawn of democracy, the deeply entrenched structures of economic disparity, forged during decades of oppressive apartheid rule, continue to cast a long shadow over the lives of the majority of South Africans. As a nation, we recognize that the freedom gained in 1994 did not automatically erase the systemic disadvantages imposed upon Black, Coloured, and Indian South Africans. These communities were systematically denied access to quality education, land ownership, business opportunities, and skilled employment, while a minority population disproportionately benefited from the economic system. The effects of this deliberate exclusion are profound and enduring, manifesting in stark disparities across various economic indicators. Key Economic Realities in South Africa Today: * Persistent Wealth and Income Gaps: The wealth gap remains severe. For instance, Black households typically own only a fraction (around 5%) of the wealth held by White households. This contributes to South Africa having one of the highest levels of wealth inequality globally, with the top 10% of the population owning an estimated 86% of aggregate wealth. Income disparities are similarly stark, with White South Africans earning significantly more than their Black counterparts on average. * Unequal Land Ownership: Land ownership, a fundamental pillar of economic empowerment, continues to reflect historical injustices. While figures vary slightly depending on the definition of "Black" and the type of land, reports consistently show that White individuals, who constitute a small minority of the population, still own the vast majority of private farmland. Significant efforts are underway to address this, but the imbalance remains a critical issue. * Disparities in Corporate Ownership and Management: Despite	Matsobane	Gauteng		employed individual

	2025-06-20 19:25:54	No I do not	30% local ownership	We as SA have not even begun to talk reparations and restitution against black people for the past. BEE is not a problem, but implementation has been elitist. Elon Musk must keep his company out of SA as he clearly is a unrepentant racist. How do we move on with such an unequal society and still not give opportunities to redress the past?	Carol	Gauteng		self-employed
	2025-06-20 18:57:24	No I do not	30% local ownership	The BBBEE is a policy that is meant to address and redress the injustice of the past and the prejudice that African particularly Blacks were subjected to by the unjust system of apartheid and we need that to take place irrespective who agrees or disagrees. The starlink must be subject to the laws of this country just like any other foreign owned businesses that operates in South Africa, there must never be special preferential laws that must accomodate starlink, the sovereignty of this country is primary not secondary to the investors that wanna bend rules for their operations. I really don't understand why the whole country must shake just because of one racist fellow who lies at the international stage to bully South Africa to afford him and his Racists to operate in our country, we need a real transformation in our economy and the monopoly of the minority must be looked into and be confronted as such, it's quite embarrassing that we can even seek public opinion and tell the public what they must submit. I believe this is racist in the nature of this proposal of amendment of this legislation. The ministry must appreciate the hardships and struggle that Black Africans has been subjected to by the regime and the systems that were in place, and he must be the custodian of this Policy and not demobilize it, as much as ANC has used this policy to manipulate beneficiaries the minister must ensure that the 30% local ownership must be achieved and no fronting must happen at all because cooperate business has take advantage of this for the past 30 year and the ruling elites have been riding on this gravy train. We reject Starlink that undermines the sovereignty of this country and its laws. They must comply there must be no adjustments to suit this Starlink operations. We reject this amendment with disgust it deserves.	Victor	Gauteng		employed individual
	2025-06-20 18:42:54	No I do not	30% local ownership	It seems like white people want Africans to have nothing till Jesus come back. White people started by stealing the land. 	2025-06-20 13:46:51	No I do not	30% local ownership	I do not support the proposed policy direction that seeks to remove BBBEE requirements to accommodate Elon Musk's Starlink in South Africa. This is not just a matter of internet access, it's about economic justice, national sovereignty, and the longterm integrity of our democracy. BBBEE was never meant to be a "nice-to-have" or an obstacle to progress. It was introduced because for generations, black South Africans were deliberately excluded from meaningful participation in the economy. Entire communities were systematically denied land, capital, education, and access to high-value industries like telecommunications. BBBEE is a response to that injustice, a tool to ensure that the ownership, control, and benefits of our economy are broadly and fairly shared, not concentrated in the hands of a few. Removing these requirements to please a foreign company, especially one as politically powerful and controversial as Elon Musk's Starlink sets a dangerous precedent. It says that our laws can be suspended when they become inconvenient to the rich and powerful. Worse still, Starlink presents a real national security risk. In Ukraine, Elon Musk demonstrated just how much unilateral power he wields by switching off Starlink access during a critical moment in the war, citing his personal concerns. That decision wasn't made by the Ukrainian government or any democratic institutio, it was made by one man sitting in another country. If we open our skies to Starlink without strict conditions without local ownership, regulation, or empowerment we are essentially handing over part of our digital infrastructure to a foreign actor who has zero obligation to act in South Africa's interests. What happens if our government takes a position Elon doesn't like? What happens in a crisis when we depend on Starlink for communication or coordination and it gets shut off? South Africa deserves better than this false choice between progress and justice.	Nthati	Gauteng		employed individual
	2025-06-20 13:41:06	No I do not	30% local ownership	BEE and BBBEE have been around for a long time but have not achieved the desired goals. Only a select few, linked to government, have benefited. And they have achieved immense wealth while the vast majority of previously-disadvantaged people, remain poor, live in squalor and are unemployed. We need this economy to grow. The less business restrictions there are, the higher the chance of small to medium companies coming on line and employing people. BBBEE has stifled their opportunities. BEE and BBBEE has not worked. It should be abolished. Select the right person for the job based on experience and/or qualification, and irrespective of their race or gender. Select the right company to do the job, based on their expertise and experience, irrespective of their BBBEE rating. We've all seen what has happened with government tenders and the mismanagement of SOEs and Municipalities. Less red tape. More business opportunities. More employment of suitably qualified people.	FAEEZ	Western Cape		employed individual
	2025-06-20 13:35:32	No I do not	30% local ownership	to do away with a 30% ownership is a dangerous move of taking us backwards, we cannot have the multinationals to be in our country without local co-ownership and skill transfer. This sector comes a long way to be where it is with co -local ownership,look at industries that do not have this protection, when they leave, they take away everything they own and leave this country a hull... 	2025-06-20 13:34:33	No I do not	30% local ownership	We have not transformed enough, poverty still has a skintone and is the hue of the majority. We still need to empower the people for a safer country with a fulfilled populace.	Tsholofelo	Gauteng		business owner
	2025-06-20 12:48:48	No I do not	30% local ownership	Local ownership is critical for our economic growth but my concern is that only few benefit in both BBBEE and local ownership. The politically affiliated are the once that benefit.	Nthambeleni	Gauteng		business owner
	2025-06-20 12:43:15	No I do not	30% local ownership	Supporting policies that uplift previously disadvantaged communities in South Africa is essential for: Economic Inclusion – Redressing historical inequalities fosters broader participation in the economy, driving growth and reducing poverty. Social Stability – Addressing systemic disparities promotes social cohesion and reduces tensions rooted in inequality. Skills & Innovation – Empowering marginalized groups unlocks untapped talent, enhancing workforce diversity and innovation. Sustainable Development – Equitable opportunities ensure long-term prosperity, benefiting the entire nation. Transformation is not just justice—it's an investment in South Africa's future.	tshepo	Gauteng		employed individual

	2025-07-07 09:10:10	No I do not	No concern	Black people in South Africa were deliberately excluded from participating in South Africas economy for over 250 years. This is a fact. BBBEE/BEE was adopted to correct exactly this harsh and terrible part of our history where only a certain race had power over the economy. To now think that Black people have closed a gap that was created over 250 years in just 31 years would be disingenuous. BBBEE/BEE is a policy that must remain intact to ensure that we keep on reducing the gap in wealth level between the rich and the poor.	Neo	Free State		student

	2025-07-01 02:19:36	No I do not	No concern	Starlink is a major concern. From their bulldozing approach to their owner.	Luvuyo	KwaZulu-Natal		
	2025-06-30 10:32:32	No I do not	No concern	Starlink should not receive any preferential policy diversion. Elon Musk is an American and if he is granted a licence without historically disadvantaged South African's then that will directly pose a threat to our National Security. This is a similar example to Tiktok where America requires 50% ownership by an American or an American company to operate in America. Elon Musk is also critical of our government without any evidence on his social media platform and he is spreading negative sentiment regarding South Africa in general. His grandfather and father are known for supporting Right Wing extremist rhetoric so I don't trust him handling large amounts of our data. Also Starlink is expensive and we don't really need it. We have decent competition in the country already and they all comply with local ownership rules.	Marc	Western Cape		unemployed individual

	2025-06-23 07:49:49	No I do not	No concern	30% is not even enough compared to the demographics of South Africa. It's either they comply or they go back to their country.	Ayanda	KwaZulu -Natal		employed individual
	2025-06-23 04:09:40	No I do not	No concern	We have seen how when it suits Elon and his friends,to switch off the supply of internet to the area. If we're to continue to sell our information, at least let's see the local benefits from such dealings, BBBEE must stay its part of the RSA business identity. Anyone coming to conduct business must comply or go elsewhere. Removing BBBEE for Elon will not generate millions of sustainable jobs. It will be plug and play with devices manufactured elsewhere.	Thakabanna	Gauteng		employed individual
	2025-06-22 21:59:52	No I do not	No concern	I strongly oppose the proposed removal of B-BBEE requirements for Starlink to operate in South Africa. While internet access is critical, it cannot come at the cost of undermining our constitutional and economic transformation goals. Allowing a multinational corporation to bypass B-BBEE obligations sets a dangerous precedent that sidelines South African participation in the ICT sector. If Starlink wants to benefit from South Africa's market and infrastructure, it should meaningfully contribute to inclusive economic growth by partnering with Black-owned enterprises, creating local jobs, and investing in skills development. True digital inclusion means not just access to the internet, but access to opportunity — and that cannot happen if we allow tech giants to operate outside our transformation framework. Connectivity must not come at the cost of equity.	K			
	2025-06-22 21:38:32	No I do not	No concern	BBBEEE is a necessary policy to redress the stark imbalance in the White Racist dominated Economy. The way is has been implemented might have some loopholes but does not mean that the skewed economy favouring the White Minority is right. An adjustment can be done to address concerns but can never be scrapped.	Legora	North West		business owner
	2025-06-22 20:47:10	No I do not	No concern	The 30% inclusion rate should remain.	Mamose	Gauteng		
	2025-06-22 20:17:53	No I do not	No concern	Each and every country has it's own laws and policies. Why must the laws be amended for an individual of another country to gain advantage in business in this country. Elon Musk is no more South African.	Sonto	Gauteng		
	2025-06-22 20:10:52	No I do not	No concern	This poses a potential national security risk to all South Africans.	Obakeng	Gauteng		employed individual
	2025-06-22 15:09:28	No I do not	No concern	The laws put in place, especially the BBBEE are there to improve the imbalances from past injustices by passed into law by the Apartheid Government and colonial. South Africa is currently the most unequal society in the world, and allowing a foreign company to operate in South Africa, without abiding to the current laws deviates the nation from bridging the gap of inequality. Starlink should abide by the current laws of South Africa as they are.	Mahutamong	Gauteng		employed individual
	2025-06-22 15:02:00	No I do not	No concern		Nompumelelo	Mpumalanga		employed individual
	2025-06-22 09:14:10	No I do not	No concern	All companies that want to operate in our country must obey our policies and regulations. I cannot go to a different country and operate a business as i wish. Their laws will not allow it, as I will be a foreign national there. So why must we change BBBEE laws for Elon Musk? That left our Country for another? Alot of foreigners are doing as they please in our mother-land. We cannot even take care of our own as South Africans. If he's not prepared to share equity then he should go somewhere else. "If you allow me into your home, i can't tell you how to run it, i cannot tell you to change your house rules nor impose my own culture and a way of doing things in your house hold. That would be disrespectful. So i don't see why we should bend our rules or policies for other businesses or people so that they can do as they please.	Lindiwe	Gauteng		employed individual

▼ **Broad-Based Black Economic Empowerment Framework**	**14695**							
	2025-11-25 10:02:33	Yes I do	Broad-Based Black Economic Empowerment Framework	BEE has not achieved its stated objectives and has instead become a discriminatory system that enriches a small, politically connected elite. It is widely acknowledged that this framework has failed to deliver meaningful benefits to the majority of South Africans. Estimates suggest that close to a trillion rand has been directed to the advantage of approximately one hundred politically connected individuals, while ordinary citizens have seen little to no improvement in their economic circumstances. This framework undermines the constitutional principle that all citizens should be treated equally, regardless of race or background. Instead of fostering inclusivity, BEE has entrenched inequality by serving as a mechanism for personal gain and political patronage. South Africa urgently needs policies that encourage free trade, open investment, and genuine economic participation. Removing BEE in all its forms would allow the economy to grow more freely, creating opportunities for entrepreneurs and investors across all communities. This, in turn, would benefit the poor and marginalized who have been excluded from the supposed gains of BEE over the past three decades. For these reasons, I strongly object to the continuation of BEE and call for its complete phasing out. The focus must shift toward policies that uphold constitutional equality, stimulate investment, and empower all South Africans without discrimination.	Colin			
	2025-11-24 15:01:54	Yes I do	Broad-Based Black Economic Empowerment Framework	This policy has crippled our economy and not benefitted the broader black citizen. This proposed amendment will underline the fact that those with skills should be allowed to operate in a free economy to the benefit of all	Sharon	North West		retired

	2025-10-09 16:02:16	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE is racist at its core. It should be scrapped. Defining an entire group of people based on the colour of their skin "previously disadvantaged" is racist. While there are some black people that are disadvantaged, the legislation does nothing to help these people. The current legislation merely serves to enrich already well connected wealthy individuals and does nothing to help the poor, uplift the economy or employ more people. In fact BBBEE is just a system to prevent the upliftment of the people of the country. Starlink is a communications system that stands to help many South Africans around the country. It can help with remote education, access to information and economic systems. Blocking this based on BBBEE requirements is ridiculous and holds back the average South African. Especially the poor.	Sascha	Gauteng		self-employed
	2025-10-09 13:49:48	Yes I do	Broad-Based Black Economic Empowerment Framework	After 30 years the answer to fixing South Africa's current-day crisis lay in deregulation, eliminating racial quotas, and stopping forced ideological interventions in the economy. We need to remove every impediment imaginable to enable the economy to perform to its potential, and transformation will follow as it must. Dr Anthea Jeffery suggests that economic empowerment policies be amended to focus on income status rather than race. The vast majority of beneficiaries of such a policy would be black anyway, but the policies will benefit more people.	Tertius	Western Cape		self-employed
	2025-10-09 12:21:15	Yes I do	Broad-Based Black Economic Empowerment Framework	The whole BBBEE policy does NOT work, it never has, poverty in this country is at a whole new level now and it should be removed from South Africa completely & forever. (Preferably along with the governing party).	Susan	Gauteng		employed individual
	2025-10-09 11:53:17	Yes I do	Broad-Based Black Economic Empowerment Framework	After 30 years of trying to get BBBEE to work, time has come to take it out of the way of economic development.	Gerhard	Gauteng		retired
	2025-10-08 23:02:04	Yes I do	Broad-Based Black Economic Empowerment Framework	The whole BBBEE policy should be removed from South Africa	Danie	Gauteng		
	2025-10-08 07:51:28	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE does not work. It never has, and it never will. If government would just get out of everybodies way we might actually see the economy grow, and with it the lives and prosperity of all people. BBBEE is nothing more than a thin veil to conceal the government taking money from tax payers for the benefit of them and their friends and family.	Jaden			
	2025-10-06 08:55:48	Yes I do	Broad-Based Black Economic Empowerment Framework	The BBEE idea appears good and necessary on the face of the problem but it has proven to have had the opposite effect in practice by widening the wealth gap and doing very little for the plight of the average South African. I wouldn't dare dream of cheap, but access to cost-effective energy and data are two main drivers for economic upliftment and it is evident that BBEE policies have stood directly in this path to prosperity and need to be properly reconsidered.	Jonathan	Western Cape		employed individual
	2025-10-01 15:21:16	Yes I do	Broad-Based Black Economic Empowerment Framework	If Starlink can provide reliable and cheaper internet services to the most remote areas of South Africa, this would be a good thing? Accessibility to the internet for all is surely more important than insisting on an onerous and flawed process? All including the poor need access to internet.	Craig

	2025-09-25 21:27:41	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE have failed South Africa and had more than 20 years to improve lives of historically disadvantaged South Africans. At this stage it is a corruption system blocking progress in SA.	Jaco	Western Cape		employed individual
	2025-09-23 05:48:06	Yes I do	Broad-Based Black Economic Empowerment Framework	Yes I support the policy to keep the black economic empowerment intact,because if not kept foreign investors will exploit black people but excluding them from the main the main economy. Secondly ,the removal of BBBEE will affect skills transfer and leads to more exploitation.	Surprise	Mpumalanga		employed individual
	2025-09-21 03:05:02	Yes I do	Broad-Based Black Economic Empowerment Framework	The BBBEE framework needs to change if South Africa is to progress. BBBEE as it stands right now is a hindrance to economic growth and amendments need to be made in a carefully structured manner so as to support local South Africans in lifting themselves out of poverty	Sahil	Gauteng		employed individual
	2025-09-18 11:03:16	Yes I do	Broad-Based Black Economic Empowerment Framework	I strongly support the proposed policy direction to amend the BBBEE requirements for the Independent Communications Authority of South Africa (ICASA). The current BBBEE framework, though designed to promote economic inclusion, has become a bureaucratic stranglehold that hampers growth and competitiveness. Its rigid quotas and compliance burdens often discourage investment, stifle innovation, and limit job creation in critical sectors like telecommunications. By reforming these requirements, ICASA can foster a more flexible, market-driven environment that encourages broader participation while still advancing empowerment goals. This shift could unlock significant economic potential, drive sustainable growth, and better align with South Africa's pressing need for a dynamic, inclusive economy.	Juandre	Gauteng

	2025-08-30 17:40:17	Yes I do	Broad-Based Black Economic Empowerment Framework	Professor William Gumede commended for exposing the truth about BEE Jun 10, 2025 Chairperson, The ACDP would like to commend one of our country's most respected governance scholars, Professor William Gumede, for his courage and love for truth and transparency. He exposed what many feared to do. He stated the fact that over R1 trillion has been transferred to fewer than 100 politically connected individuals under the banner of black economic empowerment. "BEE only benefits a very small group of politically connected, linked to the ANC, linked to the trade unions, and the same people are empowered again and again" he said. The respected Prof Gumede in an explosive interview has revealed so much that has concerned the public. "This is not transformation, this is state-sanctioned looting under the guise of empowerment." the Prof said. BBBEE has not had the intended outcomes. It has not benefitted the poor, only the wealthy. It has created an entire sector of tenderpreneurs that harm government entities with their ineptitude and ridiculous prices. It has resulted in government departments and entities spending 200% - 1000%, or even more, on procurement, either through incompetence or intentionally through fraud and corruption. BBBEE should be abolished in all sectors. BEE should NOT ONLY BE lifted and abolished for overseas companies or investors such as Elon Musk, but for the whole of South Africa to allow entrepreneurs to use their skills to the fullest and create jobs without being targeted just for the colour of their skin. 30 years have passed in which we saw our economy go downwards and great companies like Eskom, Post Office, Police, SA Airways and many more are not a shadow of what they were due to BEE policies. We can become a great country again for ALL COLOURS if we abolish BEE. PLEASE SAFE RSA and do away with BEE as Pres Trump suggested to you.	Jan

	2025-07-22 13:46:08	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE has had many years to deliver results for "historically disadvantaged"people. 30 years on, with all the backing of this legislation, there are few who were historically disadvantaged who can claim to be still be historically disadvantaged anymore from race-based policies. If anything, we should focus on pro-poor policies which are those designed to create opportunities for those who are CURRENTLY poor and this looks like a thriving economy and access to quality jobs and education. May this be the first move of many to let go of the debates of what could have been 30 years ago and focus on economic growth.	Bradford			
	2025-07-22 13:13:54	Yes I do	Broad-Based Black Economic Empowerment Framework	South Africa's economies are in dire straits! WE must do everything we can to get the economy to grow! Let foreign companies will invest in our county again! BBBEEE has cost the country, economically as professional people have left all due to the BBBEEE policies that was pot in place .	Gerrit			retired
	2025-07-22 13:12:47	Yes I do	Broad-Based Black Economic Empowerment Framework	The BEE Framework as a whole has no and does not address the disadvantaged of the past. It has been proven to only benefit a selected few in power within the ANC. Its failed in all its objectives to actually deliver anything but political enrichment and does nothing for the larger population. Secondly above all else the policies in a free and fair society is racist ,sexist and undemocratic and un constitutional. This is essentially Apartheid in disguise making use of alternative wording to hide a truth. South Africa should be free and fair to all. Break down these barriers and limitations , open up free market investment , encourage entrepreneurship , employment opportunities and create a better future for all.	Jared	KwaZulu -Natal		employed individual

	2025-07-21 13:21:20	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE infringes on all South Africans right to work, employ or be employed, stifles all forms of business growth and is HUGELY responsible for our brain drain and massive un-employment	magda	Western Cape		retired
	2025-07-21 13:12:53	Yes I do	Broad-Based Black Economic Empowerment Framework	Although conceived with good intentions, we have now had 30+ years of failed BEE policies. Instead of uplifting disadvanteged communities, these policies have served to enrich an extremely small, politically connected, group of people. It's time to discard race-based laws and instead embrace meritocracy. Over time, the results will erode nepotisim and cadre deployment; reset public trust in our institutions; and create true opportunity for all South Africans. The BEE generation who has missed out for the last 3 decades will not benefit from these changes. It is our obligation to make sure that their children don't suffer the impovireshment they have suffered. Opening up the markets for all South Africans, eliminating beurocraic barriers to entry and embracing an open market will create millions of new jobs. These employment opportunities will in turn spawn new businesses and wealth for impovireshed communities, snowballing towards a growing and sustainable economy, for all. This is what must be done to allow our coutry to flourish in the long term.	Donovan	Western Cape		employed individual
	2025-07-21 12:58:25	Yes I do	Broad-Based Black Economic Empowerment Framework	The more humane way to real empowerment should not be race-based but rather on the actual economic status of the target person; in other words, to support poor people, especially those who will uplift their dependants and possibly contribute to a better South Africa	Cornelius	Gauteng		retired

	2025-07-20 14:55:19	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE has primarily helped the elite few at the value destruction for the entire country. The country is bankrupt and everything is falling apart. We need companies, and service agencies that work which are staffed with people selected based on merit. That will help the entire economy from which all stand to benefit. Doing more of the same will simply result in more of the same failures that impacts everyone .	Rowen	Western Cape		
	2025-07-20 14:35:19	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE puts restrictions on the growth of SA's economy. Entrepreneurs that risk everything to grow a company should have to give away any percentage of their business to historically disadvantage ethic group. It has been 30 years since BBBEEE was put into policy. What fruits did it brought forth?	Willem	Gauteng		employed individual
	2025-07-20 14:00:42	Yes I do	Broad-Based Black Economic Empowerment Framework	1. Foreign Investment Already Drives Transformation International companies contribute to job creation, skills development, and ESG compliance without needing BBBEE mandates. Sectors like tourism, hospitality, and green energy are thriving due to foreign capital—not BBBEE incentives. Countries like Kenya have scrapped similar ownership laws to become more attractive digital investment hubs. 2. BBBEE as a Barrier to Growth The 30% ownership requirement for licensing (e.g. Starlink) has deterred major tech players from entering South Africa. EU investors cite BBBEE as costly, complex, and ambiguous, with frequent rule changes and unclear compliance pathways. The Equity Equivalent Programmes and Youth Employment Service initiatives have failed to gain traction due to administrative burdens. 3. Corruption and Fronting Practices BBBEE has been linked to fronting, where companies manipulate ownership structures to appear compliant. The Zondo Commission and other reports reveal how BBBEE has been exploited for tender fraud, nepotism, and elite enrichment. Instead of broad-based empowerment, critics argue it has become ANC Economic Empowerment, benefiting a politically connected few. 4. Global Competitiveness at Risk South Africa's FDI per capita is among the lowest globally—just R680 per person in 2024. Investors now prioritize transparency, policy clarity, and strategic alignment over compliance checklists. BBBEE's rigid framework may be pushing capital toward more agile economies like Vietnam, Indonesia, and Rwanda. Suggested Alternatives Replace BBBEE with an Opportunity Fund or impact-based tax incentive that rewards companies for measurable contributions to education, infrastructure, and entrepreneurship. Shift focus from race-based criteria to poverty alleviation, skills development, and regional inclusion. Strengthen anti-corruption enforcement and simplify procurement processes to restore investor confidence.	Wouter	Free State		self-employed

	2025-07-16 23:06:54	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE has been a deterrent to growing our economy. It is time that BBBEE should be amended and in fact removed. There has been enough time for people of all races to prove themselves and show their ability to further business and in fact the economy over the last 31 years without having laws that favour certain races. we need overseas investments and countries wanting to invest and do business with South Africa. BBBEE has been a deterrent and has negatively affected this. Let's make South Africa prosperous again and a first class nation in the eyes of the world.	Rosemary	Gauteng		employed individual
	2025-07-16 22:54:28	Yes I do	Broad-Based Black Economic Empowerment Framework	Its no longer about race, the fight against inequality was lost under this act amongst others. I do not believe the the BBBEE act is inclusive, supports equality, or supports my future.	Elizbe	North West		unemployed individual

	2025-07-16 08:48:11	Yes I do	Broad-Based Black Economic Empowerment Framework	Our nation need to move forward as we do what needs to be done properly, appropriately, efficiently. That includes the least amount of people needed for the job, people appropriately skilled. Let's use people for what they are gifted for. Let's empower others through character and skills building, raising the standards, with the needed support, not lowering standards and increasing 'free handouts and jobs' but the work doesn't get done. Let's stand together and move forward together. Let's not remove opportunities from the offspring of those who helped to build and establish the economy of SA.	Francois	North West		self-employed
	2025-07-16 08:41:28	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE is absurd, the color of your skin cannot make you fit for work, the best performing person must get the job irrespective of skin or race or gender. We need to grow the economy so that everybody can have a job.	Jakkie	Eastern Cape		retired
	2025-07-16 08:41:28	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE is absurd, the color of your skin cannot make you fit for work, the best performing person must get the job irrespective of skin or race or gender. We need to grow the economy so that everybody can have a job.	Jakkie	Eastern Cape		retired
	2025-07-16 08:39:02	Yes I do	Broad-Based Black Economic Empowerment Framework	Insisting on 30% local ownership is tantamount to blocking investment from coming into our country. Having Starlink internet availability -particularly to the rural and other areas that are currently not served by the internet providers already in South Africa, because they cannot afford to put the relevant infrastructure in place - would enhance the lives and connectability of particularly of the vast population that is currently excluded from the wider economy. Those who are unable to get a decent education, because of the terrible decline in our educational services over the past 30 years, would be able to learn and earn through on-line platforms, and work towards lifting themselves out of the poverty cycle into which they have been forced. The BBBEE framework has proved detrimental to our economy, has stifled investment and expansion into entrepreneurial directions, and has led to massive corruption and the enrichment of a few elite people in society. For our country to rise out of its steep decline into one of the worst 3rd world economies, the Policies need to change to encourage more people to become involved in the economy, and to stop forcing them into dependence on 'hand-outs' from the State - which it can ill afford. 	2025-07-15 20:55:24	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE is such a disadvantage for economic growth in South Africa. Amending this policy would encourage future investors in businesses. As for Starlink, having Starlink available in South Africa would provide an incredible ability to access wifi for rural areas, especially for schools and security. Why is the government keeping their citizens in poverty & uneducated, is it because they can control the poor & ignorant ?????	Geraldine	Western Cape		retired
	2025-07-15 20:09:39	Yes I do	Broad-Based Black Economic Empowerment Framework	South Africans in rural, disadvantaged and under-serviced areas desperately need reliable, fast and accessible internet connections to start or operate businesses or keep up with education requirements. Musk's Starlink will make that possible. Unfortunately, the many obstacles and red tape etc that BBBEE ownership requires, make this needed internet access problematic; it hinders progress and economic growth and development and with it employment opportunities. Something that the disadvantaged and those in rural areas desperately need. Thus I fully support the Minister's draft policy. It just makes economic sense.	Desiree	Western Cape		self-employed
	2025-07-15 19:15:03	Yes I do	Broad-Based Black Economic Empowerment Framework	BEE failed in other country's it should be totally scrapped!! If I start a business from scratch with hard work, then I must give 30% to people who are lazy and don't want to work. Everyone wants a handout. If I can start a business without the help from anyone then everyone else can do the same.	Maryna	Western Cape		retired
	2025-07-15 17:59:05	Yes I do	Broad-Based Black Economic Empowerment Framework	Apartheid has ended many years ago. And the BBBEE program has given advantage to the disadvantaged for many years now. It does not accomplish what it should. It is not the correct mechanism. Mozambique did have the same mechanism and it did not work. It opened up room for corruption.	Jac	Western Cape		employed individual
	2025-07-15 17:18:49	Yes I do	Broad-Based Black Economic Empowerment Framework	These are policies which are racist and need to be eradicated if this country is to experience economic growth	Trevor	Gauteng		retired
	2025-07-15 17:14:56	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE as an idea makes some sense to redress previous inequality, but it has rapidly become a barrier to doing business with any organ of the state. If all other industries have a similar policy that allows companies to meet the 30% target by investing in something that benefits historically disadvantaged groups, then surely the same should be made for the ICA. A news report today says that 80% of schools in Gauteng do not have access to internet and Gauteng is a pretty industralised province. This is a great opportunity for us to play on the same level as the world and give us an upper hand to access the internet where everyone can benefit! I fully support the amendment, it is time for us as a country to not allow BBBEE legislation to cripple an opportunity that many ask for. If Starlink does not meet its needs once a licence has been granted, then the licence should be revoked on that basis and not on BBBEE targets.	Dean

	2025-07-15 14:57:39	Yes I do	Broad-Based Black Economic Empowerment Framework	Dear Mr. Solly Malatsi, Minister of Communications and Digital Technologies c/o The Director-General, Department of Communications and Digital Technologies Mr. A Mmoto. Yes I do support the proposed policy direction to the Independent Communications Authority of South Africa on BBBEE. I agree that policy should be amended to allow Starlink be offered the opportunity to roll out in South Africa to the benefit of millions of people. BBBEE prevents much needed foreign direct investment in our country and benefits only the few. It must be done away with. The whole BBBEE policy should be removed. It does not provide any purpose – only a few are getting mighty wealthy and we are employing people for colour not talent or efficiency. BBEEE is in its essence racist. It is pure discrimination against white South Africans that influences our economy negatively. It is just reverse apartheid and has been used to further only a select portion of people of colour as well. Policies like this and the misuse thereof is bringing this country to its knees. BEE is a stumbling block for economic growth. We as a country cannot afford to not have companies like Starlink, ultimately it will be the poor that will suffer.	Amanda	Gauteng		retired

	2025-07-15 12:08:39	Yes I do	Broad-Based Black Economic Empowerment Framework	For the country to grow and for more jobs for everyone, the best person for the job needs to be hired, not hired by race/age/gender or other harmful growth policy.	Chaline	Eastern Cape		self-employed
	2025-07-15 11:48:11	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE has proven to benefit the few at the expense of the majority. It is those few that are shouting loudest to maintain the status quo. They have little regard for the majority which the framework has failed.	Warwick	Gauteng		retired
	2025-07-15 11:46:17	Yes I do	Broad-Based Black Economic Empowerment Framework	I appose all race based laws, especially when it comes to hiring of staff and ownership of businesses. I appreciate that in the past the majority of people were disadvantaged due to race, and therefore supported the implementation of a policy post 1994 that looked to address this. These policies should however have a time limit; I believe enough time has passed. There are bigger problems holding the majority of South African back which the current government is not addressing. We need a fair playing field and we need foreign investment - none of which can happen with the unfair BBBEE laws.	Keryn	KwaZulu-Natal		employed individual
	2025-07-15 11:42:56	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE is not good for SA's economy. I feel that this is a racist system.	Sylvia	Western Cape		unemployed individual
	2025-07-15 11:42:50	Yes I do	Broad-Based Black Economic Empowerment Framework	The focus should be the benefits that Starlink would bring to all South Africans. People in rural areas would have access to information, online education, connection. So much could change. Certainly a better alternative to the current offering. Things have to change and we can't expect an International company to hand over 30% of its ownership to external people.	Niki	Gauteng		self-employed
	2025-07-15 11:32:15	Yes I do	Broad-Based Black Economic Empowerment Framework	I fully support the proposed policy direction to amend BBBEE requirements. BEE, in its current form, has outlived its intended purpose. Rather than fostering broad-based empowerment, it has too often served to entrench wealth among a politically connected elite, while doing little to alleviate poverty or improve opportunities for the broader population. This has had the unintended consequence of stifling economic growth, discouraging foreign investment, and limiting access to innovation and global technologies—such as Starlink—that could transform connectivity and education in underserved communities. Removing BEE as a blanket requirement, particularly in critical infrastructure sectors such as telecommunications, would send a strong signal that South Africa is serious about economic growth, global competitiveness, and inclusive development through merit and innovation rather than enforced ownership quotas. I commend Minister Malatsi for taking this step and encourage government to continue reassessing outdated policies that hinder progress and limit opportunity for the majority of South Africans.	Dirk	Mpumalanga		employed individual

	2025-07-14 13:41:30	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE is one of the most important factors inhibiting growth and investment in this country. The fact that the ANC thinks it needs these policies to "redress the past" is laughable. A simple understanding of free market economics would explain that to grow an economy you need less restrictions on business, not more red tape. This will allow growth from which the black classes will benefit the most. BBBEE only enriches the politically connected. This is a racist policy under the cloak of "correcting past injustice"	Brett	Eastern Cape		business owner
	2025-07-14 13:33:13	Yes I do	Broad-Based Black Economic Empowerment Framework	Everyone has the right to work if they are qualified for the position, without prejudice to which race group you belong.	Bev	Gauteng		retired
	2025-07-14 13:32:51	Yes I do	Broad-Based Black Economic Empowerment Framework	It should be a basic human right in the 21st century that all people (which includes children) should be able to read and write with understanding if the poverty cycle is ever to be broken. It is a disgrace that the ANC government has made little progress in making accessible, quality education a priority to this end over the past 30 years. This has been a strategic policy by the ANC to stay in power and sustain the poverty cycle This has been exacerbated by the BBBEE policy which has served and enriched the politically connected black elite (Broad -Based Black Elite Enrichment) at the expense of job creation and economic growth. The 43% unemployment says it all. The failure of the State to be able to employ over 1 200 qualified doctors regardless of colour, so desperately needed in State hospitals, is outrageous. Yes, I whole-heartedly support the proposed policy direction to the ICASA to amend BBBEE requirements as a much-needed, long overdue starting point to empower the people of our beloved country to bring an end to the poverty cycle.	SUE	Gauteng		business owner
	2025-07-14 13:25:11	Yes I do	Broad-Based Black Economic Empowerment Framework	The government has a pre-occupation with equity ownership ever since the Zuma years. Percentages are applied arbitrarily for government contracting. These percentages are often unworkable for large businesses/ projects, which lead to gearing on gearing to fund same. This is not sustainable. Nor is it benefiting the indigent who really ned large scale economic growth to lift them out of poverty. Also confusion on once empowered, always empowered and the need to constantly retrade BEE deals at cost to other shareholders. All of this is BAD for foreign investment.	Arnold	Gauteng		employed individual

	2025-07-14 12:07:13	Yes I do	Broad-Based Black Economic Empowerment Framework	South Africa is facing a deepening economic crisis marked by high unemployment, widespread poverty, and declining investor confidence. While the intention behind Broad-Based Black Economic Empowerment (BBBEE) was to redress historical injustices, its current implementation is contributing to economic stagnation, deterring international investment, and reinforcing inequality through political favoritism and inefficiency. As a result, countless South Africans—regardless of race—are left without jobs, opportunities, or hope. The country's economic potential is being suffocated by policy uncertainty, mismanagement, and corruption. We cannot afford to continue down this path. South Africa urgently needs meaningful international investment and a shift toward inclusive economic reform. This includes creating a merit-based, transparent, and business-friendly environment that empowers all South Africans through education, skills development, entrepreneurship, and equal opportunity—not patronage. To rebuild our economy and restore dignity to our people, we must reform broken systems, attract responsible investment, and unite behind policies that promote growth, accountability, and shared prosperity for every citizen.	Zia			self-employed
	2025-07-14 12:04:19	Yes I do	Broad-Based Black Economic Empowerment Framework	BEE is not working because it mainly benefits a small elite, encourages corruption and fronting, creates red tape for businesses, and has failed to significantly reduce poverty, unemployment, and inequality among the broader black population. 	2025-07-13 12:25:54	Yes I do	Broad-Based Black Economic Empowerment Framework	The BEE structure has only cropped out economy and infrastructure further, as its founding principles were manipulated to ensure profitability of corrupt politicians and members of government in various sectors, resulting in collapse of various sectors of infrastructure and further impoverishment and disadvantage to previously disadvantaged communities. It increases costs of expenditure across all platforms of the economy and results in excess expenditure of tax payer money with the results being less than adequate to say the least. Bye bye BEE	Krisna	Gauteng		employed individual
	2025-07-13 12:15:35	Yes I do	Broad-Based Black Economic Empowerment Framework	I feel that the entire process could have been integrated differently. Not rushed. It caused sudden massive changes in the working environment too fast and people were employed constantly and not trained properly. Too many untrained people came in too fast... everything began to slide and our beautiful formal, speedy service became slow and lazy overnight because not properly trained individuals gave up and took their time and once employed were protected in keeping their jobs by Unions - Black empowerment unions. Companies have closed and SA has gone down because of BEE. If someone is not suited for a job and it's found out they should be made to leave in the understanding of the survival of the business. Too much red tape involved.. too protected.. nah.. I think I would rather open a business in another country and leave.. can you see what happened? Too much animosity and no proper integrated time.. caused resistance from both sides. Unfortunately the Black Empowerment has been a disaster hasn't it? The rushed need to be treated equally before the readiness of the people.. look what happened.. now we sit with problems where well educated white people cannot open a business because if they prefer to run a family business they have to employ outsiders and they have to employ Blacks when they may not want to for specific reasons or tasks. This is one example - forced upon us and killed the business trade. What about Kentucky...? ZERO whites employed... makes me sick! What about Dis-chem when it was announced that they are no longer employing whites... why not??... they lost millions!!!... I still do not buy at Dis-chem... I definitely think that if anyone starts a business and they have a good business plan, they should have the right to employ who they want to and who they feel is equipped to bring their business to success - it's not about the colour but all about the person and their capabilities... surely any idiot should understand this? 	2025-07-12 05:40:50	Yes I do	Broad-Based Black Economic Empowerment Framework	Thousands of desperately needed jobs will be lost due to many companies closing down, increasing poverty. It is rediculous to invest in a country that uses skin colour to measure qualification, ability, skill or willingness, as means to hire people and cast aside the educated. At present, BBBEE is scandously promoting covered up theft, by literally "stealing/grabbing" from hard working fellow South Africans struggeling to feed their own families. The ANC is slowly, shamelessly, trying to position spescific middleclass controling kader emoloyees - qualified or not, in work places they didn't build or develope or even had any interest to do so . This law will be used to stuff their undeserving kaders' coffers . With this kadar-inrichinpg law, the ANC is demonstrating that they don't care about the rest of their fellow SA's, nor even the poorest of us. No, they are working toward enriching a BBBEE self- chosen middleclas, a new, skillfully lieing ANC, entiteled and selfcentered. At present, there are but a few honest, dedicated, true statesmen in this present Gouvernment that can be trusted and relied on. I lift my hat to them, but the sly, lieing rest is a shameful disgrace and disapointment.	Anna	Western Cape		retired

	2025-07-11 14:08:43	Yes I do	Broad-Based Black Economic Empowerment Framework	While the founding concepts behind BBBEE were noble and necessary to kick start the process, it is apparent that these have been hijacked to provide not for the upliftment of the majority, but for the well connected and well heeled few to become fabulously wealthy at the expense of our country and future generations who will have to build a new nation. It is time to put this abused legislation away and start anew.	Guy`	Gauteng		
	2025-07-11 14:06:47	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE framework should be completely removed as it is continuation of same policies pre 1994. "Redressing" with BBBEE meant awarding billions to selected few only, of which some now faces criminal charges. My kids should never be penalised for historical issues long before they were born, nor any generation or culture based on criteria which is against the Constitution. Education to kids and adults in remote areas must be the main priority for any government and access to internet today forms the backbone of this right to education, which is not a privilege but owed to every person. Want to see real transformation? Educate all to the same high level as achieved in top performing schools through equal access. In summary, current internet suppliers have not provided what they promised, rather kept shareholders rich than expand to remote areas. Change that through satellite access and see the difference soon.	Pieter	Eastern Cape		self-employed

	2025-07-11 12:44:52	Yes I do	Broad-Based Black Economic Empowerment Framework	Look, I don't know how long a generation/race should be punished for past mistakes. I am totally against BBBEE as it is and here is why. Currently the Government feels that it will be nice to have black people holding shares and getting money for free. This is not how the business world should work to be honest. I feel someone need to put in the work or the skills and then get there over time. Yes, certain business models make instant millionaires and billionaires and others just don't. This misguided thinking of making every business a black owned business is unfortunately too far fetched. Yes, it will be great to pull a black person or any person for that matter out of poverty and have everyone living comfortably, but not with race based policies. I don't know why anyone need to be forced into a high value position for any other reason other than their skills. Get rid of BBBEE and you will see how the economy will thrive, you will see how un-employment be reduced and do you know what, you will also see how board of directors or shareholders will increase with "black people" with the correct skills and mindset and drive. BBBEE in it's current state is not what was intended, it only serves as a comfort for a few individuals, it is NOT at all a positive thing accross the board. This jelousy over "white people" still being rich is just total BS. Rather go forward in such a way to get businessess going and get poeple employed, currently this is not happening at all. I guarentee you that EE and BBBEE are the main culprits for the stagnation of SA's economy. Just get rid of BS policies, let's build the economy to benifit all SA's. I also don't understand why such a laws such as BBBEE and EE are implemented to actually protect minorities when in fact this country consist of majority of those people which are supposedly to be protected with such "minority" laws. The whole BBBEE thing need to be scrapped not just for Billionaire playboy Elon Musk.	Wilfred	Gauteng		self-employed
	2025-07-11 12:09:57	Yes I do	Broad-Based Black Economic Empowerment Framework	BEE has been destroying businesses in South Africa. It should be eliminated so that investment will come back to this country.	Vernon	Gauteng		retired

	2025-07-11 11:03:08	Yes I do	Broad-Based Black Economic Empowerment Framework	Rethinking BBBEE: The Cost of Forced Equity and Its Impact on South Africa's Economy Why should international companies, who have spent decades building their businesses, investing substantial resources, and developing world-class innovations, be required to hand over 30% ownership to individuals who may have no prior involvement or relevant experience? This approach, while rooted in redress, risks creating entitlement without accountability or contribution. We have seen the results of policies that prioritize equity over efficiency. Declining service delivery, deteriorating infrastructure, and increasing frustration among citizens. Many municipalities today face massive backlogs and a visible drop in standards, a reflection, in part, of appointments or partnerships based on political or equity requirements rather than merit and capability. Take someone like Elon Musk, an entrepreneur known for his tireless work ethic and hands-on leadership. Can we reasonably expect that a 30% ownership stake handed to individuals without proven track records would yield the same level of commitment, innovation, or sacrifice? Too often, these policies enrich a select few, without fostering true growth, skills development, or meaningful transformation. Rather than enforcing blanket ownership thresholds, our government should focus on the foundations of sustainable empowerment e.g. education, training, infrastructure and economic growth. These are the pillars that create long-term opportunity, not artificial ownership structures that often discourage foreign investment and risk economic stagnation. Empowerment must mean enabling people through merit, skill, and opportunity, not handing over equity for the sake of compliance. Reward those who can deliver results, create value and drive innovation, regardless of ownership percentages.	Ailsa	Gauteng		retired

	2025-07-11 10:33:49	Yes I do	Broad-Based Black Economic Empowerment Framework	I am concerned that the onerous requirements imposed by BBBEE render South Africa unappealing as an investment destination. This affects both foreign and local investment. This is demonstrated by the low ratio of FDI to GDP. The only way in which wealth can be spread in South Africa is to greatly increase the size of the economy. There also needs to be a recognition from a public policy perspective that large corporations contribute by far the greatest share to the economy, both through the direct provision of employment opportunities and procurement spend, and in their contribution to the fiscus. Their expenditure also tends to have a far more significant multiplier effect. It is thus undesirable to impede the involvement and growth of firms by imposing greater degrees of State interference with the ownership, structure and operations of firms and reporting requirements once they reach a certain size. Then there is the unacceptable "animal farm" effect of much of the BBBEE legislation and requirements which are blatantly discriminatory and racist.	Andrew	Gauteng		employed individual

	2025-07-10 16:32:01	Yes I do	Broad-Based Black Economic Empowerment Framework	President Ramaphosa has reaffirmed that BBBEE is a constitutional imperative, not just a policy choice, emphasizing its role in long-term economic inclusion. However, ongoing debates suggest that refining implementation—especially to support small businesses and genuine empowerment—could help reduce unintended restraints. Foreign and local investors see BBBEE requirements as unpredictable and burdensome, which does deter investment. Companies face high administrative and financial costs to meet BBBEE scorecard targets. The policy encourages rapid transformation in management and skilled roles, leading to appointment of candidates not suitable or competent for the roles they are appointed in which in turn undermines productivity and trust. Preferential procurement and tender systems favor BBBEE-compliant firms over more competitive or innovative ones, reducing overall economic efficiency. The high unemployment rate is evidence that BBBEE has disproportionately benefited only a politically connected elite, not the wider population.	Robert	North West		retired

	2025-07-10 15:16:55	Yes I do	Broad-Based Black Economic Empowerment Framework	SCRAPP ALL BBBEE!! The entire BBBEE framework and ownership requirements should removed. Not just telecoms, but all sectors, including & ESPECIALLY Employment Equity!! It is a significant restraint on business growth and reducing unemployment. Removing BBBEE will allow for significant investments, thus boosting economic growth and growing the share of economic distribution. It will have significant trickle-down effects. We need a proper free market with policy certainty to boost investor and business confidence. As more capital becomes available in the economy and spend effectively and efficiently unemployment WILL decrease, which will lead to more tax revenue and further investment. It just makes sense. A blind person can see this! Businesses should be able to hire people that are will help their business because of their merits/expertise - Not what colour or gender they are. Not just coloured people, but also white people have been discrimintated by the the Blacks (pouring in by the tens of thousands from the Eastern Cape to Western Cape especially. It's 100% unsustainable!!!). The arrogance and intimidation by the Blacks towards the Cape Coloureds has become unacceptable, some times even to the point of criminal. This HAS to be stopped and reversed. Only by scrapping the BBBEE completely can we start creating the dream of a Rainbow Nation as promised and envisaged in 1994. A business needs the people that are able to do the job, not just because they are black. That's PURE RACISM!!!	Zane	Western Cape		retired

	2025-07-10 11:25:00	Yes I do	Broad-Based Black Economic Empowerment Framework	Removing BEE policies could be a step toward fostering a truly merit-based economy in South Africa. While the original intent of BEE was to address historical injustices, it has unintentionally created new forms of inequality and inefficiency. BEE has: 1. Encouraged cronyism and corruption by rewarding political connections over competence. 2. Discouraged foreign investment due to complex compliance requirements. 3. Meritocracy is undermined—how can a business or government operate successfully when it's led by individuals who lack the qualifications and skills necessary to ensure its success. I believe in advancing alternative approaches that prioritize quality education, entrepreneurship, and equal access to opportunity for all South Africans—regardless of race. Our goal should be to build a society where individuals are empowered based on their potential, dedication, and performance, not their identity. By doing so, we foster a thriving nation rooted in fairness, innovation, and shared prosperity.	Jade	Western Cape		employed individual

	2025-07-10 11:22:45	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE has had its time. It has been in force for 25 years. The outcome is not quite as was envisaged, and many argue that it has cost rather than uplifted the economy, thus negatively affecting the previously disadvantaged in place of uplifting them. With Starlink we have a prime example of the above. Enforce BBBEE and deny South Africans of an essential service for all, or start to accept shortcomings of the past. There is no shame or notion of defeat in realising that time for a change of policy is required. Instead it takes foresight to remove a directive that is not working as expected. We need to keep our qualified South Africans in South Africa.	N	Western Cape		self-employed

	2025-07-10 10:57:12	Yes I do	Broad-Based Black Economic Empowerment Framework	BEE in all it's permutations, is a faulty concept based on faulty logic. However well meaning, Injustice can only be remediated with justice, imbalance with balance. BBBEEE is none of these things and shows a fundamental lack of understanding of economics, revealing BEE policies for what they are, sentimental ideological constructs with no basis in reality. Can there be any clearer evidence than current circumstances in RSA? These policies have had every possible opportunity to succeed, yet they have still failed. Not only have they failed, but they have caused a steady economic regression. Why, because you cannot build an economy by redistributing wealth. Existing wealth must be sustained, as soon as it is redistributed it begins to lose its value because it has no backing, it is no longer sustainable. This comes from the third world misconception that wealth is money or land. No, these are merely assets that can generate wealth in the right hands, on their own they merely stagnate and depreciate, they must be nurtured, cultured, in order to produce dividends. So how does an economy create equal access to wealth? Well, there is no such thing in reality, that is an ideological concept, nature knows no equality of outcome except that death comes for us all in the end. No, an economy that wants to grow must foster equality of opportunity, and for this they must do two things. First, basic education must be universally accessible. Second, it must be of a quality that can compete globally. This approach to education is what instills the ability to build and maintain wealth. Ideologies that are not directly informed by facts are doomed to destroy. That is the lesson history presents to us, will we learn?	Nic	Western Cape		employed individual

	2025-07-10 10:55:39	Yes I do	Broad-Based Black Economic Empowerment Framework	According to the bill of Rights chapter 2 section 7-39 The South African Constitution Equality 9. (1) Everyone is equal before the law and has the right to equal protection and benefit of the law. (2) Equality includes the full and equal enjoyment of all rights and freedoms. To promote the achievement of equality, legislative and other measures designed to protect or advance persons, or categories of persons, disadvantaged by unfair discrimination (3) The state may not unfairly discriminate directly or indirectly against anyone on one or more grounds, including race, gender, sex, pregnancy, marital status, ethnic or social origin, colour, sexual orientation, age, disability, religion, conscience, belief, culture, language and birth. If bbbee is implemented in our country, citizens who are not of black race are being unfairly discriminated against according to race and ethnicity. These persons are being unfairly disadvantaged. The law of BBBee is contradicting the law of the bill of rights. It is unfair discrimination and preventing all to have the equal right to business opportunities and jobs according to their skill levels and competency.	Mel			employed individual

	2025-07-10 10:37:34	Yes I do	Broad-Based Black Economic Empowerment Framework	Please note an over 50 years gap of apartheid regime has not been closed till this day. The majority of black people are still living in poverty. Remove these programmes like BEE and not put proper structures then SA will definitely go down the drain. Crime will sky rocket. Guys you'll all have something to really cry about. Currently yes people are leaving SA, but what media is not covering is that people come back because there's not place like home. The media divides South Africans. We need programmes that cater to people's needs to help aliviate poverty in all spheres, probably they do exist already but they're not properly advertised. We need to build South Africa as a nation not as enemies. Starlink must just comply. Elon Musk will not be in SA when shit hits the fan. He has so many options including his spaceship.	Hlumela			
	2025-07-10 10:37:06	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE must come to an end - it enriches a politically connected elite, where bribery and corruption rules. I am a town planner (private consultant) and have seen what these BBBEE engineering firms have done, in terms of getting government tenders and yet not providing an efficient and professional service. The people suffer - township establishment processes are not completed, infrastructure is not upgraded, properties are not transferred to the beneficiaries, the list is endless in the incompetencies!	susie	Gauteng		self-employed

	2025-07-10 09:56:14	Yes I do	Broad-Based Black Economic Empowerment Framework	Since the BBEE AND BEE was brought in, whites cannot get jobs, and those blacks who have benefited are only a small percentage, as the are ANC and their cadre. The majority of the blacks have not benefited AT ALL. This needs to be changed completely	gina	Gauteng		retired
	2025-07-10 09:55:22	Yes I do	Broad-Based Black Economic Empowerment Framework	B-BBEE has been proven to be an ineffective tool for driving economic inclusion of previously disadvantaged South Africans. Focusing on skin colour instead of poverty and upliftment has resulted in the legacy of Apartheid being perpetuated, and black South Africans to fall further behind economically. This, coupled with government corruption and poorly developed economic government policy, has sky-rocketed unemployment, poverty, and inequality. The framework as a whole is unconstitutional and baseless, and needs to be abolished to make way for policies that truly empower economically disadvantaged South Africans, regardless of skin colour. B-BBEE as a whole is a racially based policy based on exclusivity, which is contradictory to its official motives.	Daniel	Western Cape		business owner

	2025-07-10 09:49:30	Yes I do	Broad-Based Black Economic Empowerment Framework	Starlink already operates in several countries across the African continent, and its expansion into South Africa should be no different. It has the potential to create significant opportunities for all South Africans—regardless of race, background, or whether they live in rural or urban areas—by improving access to internet, information, and communication, which aligns with the constitutional right to access information. In light of the country's high youth unemployment rate, it is critical to prioritise innovation and progress over policies that may hinder development. To remain competitive with other African nations, South Africa may need to reconsider the impact of B-BBEE regulations, as current research suggests these constraints could be contributing to the country falling behind its regional peers.	Lizelle	Western Cape		employed individual

	2025-07-10 09:37:04	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE is the cause of South Africa's massive unemployment	Willem	Gauteng		employed individual
	2025-07-10 09:36:54	Yes I do	Broad-Based Black Economic Empowerment Framework	Yes, I support the proposed policy direction. South Africa urgently needs reliable, high-speed internet access in rural and underserved areas, something that traditional telecoms providers have consistently failed to deliver. Starlink, through its satellite technology, offers a practical and immediate solution to this. The current BBBEE ownership requirements, while well-intentioned, have become a regulatory barrier to progress in this case and are preventing South Africans from accessing critical infrastructure and economic opportunities. By removing these ownership constraints, the policy direction allows for innovation, competition, and global investment, benefiting millions of citizens. This move is not anti-transformation; rather, it reflects the need for flexibility when transformation policies begin to hinder technological advancement and service delivery. If successful, this could also signal a more balanced and pragmatic approach to economic empowerment, one that values outcomes over rigid compliance. Access to internet is no longer a luxury; it’s a necessity for education, healthcare, entrepreneurship, and security. We cannot afford to block progress any longer. I therefore fully support the Minister’s draft policy and encourage others to do the same.	Neil	Western Cape		employed individual
	2025-07-10 09:35:15	Yes I do	Broad-Based Black Economic Empowerment Framework	BBEE is severely limiting growth of the economy enriching a connected few and failing to lift the masses out of poverty. We need to get rid of all BEE to unleash the tremendous talents of all our people. BEE is an insult to Black Africans because it makes the false statement that they are not meritorious and need special protection. Moreover BEE is unconstitutional since section 9(2) of the Constitution gives protection to those disadvantaged not those previously disadvantaged. Many Black people are not now disadvantaged.	Ezra	Gauteng		self-employed
	2025-07-10 09:35:13	Yes I do	Broad-Based Black Economic Empowerment Framework	We are suppose to be one nation but we are singled out as white Boer South Africans reversed racism the whole Bbee must fall thousands of knowledgeable artisans are unemployed because of this my highly skilled spouse included	Marianne			unemployed individual
	2025-07-10 09:34:52	Yes I do	Broad-Based Black Economic Empowerment Framework	BBB-EE is the single factor stopping all economic growth in South Africa. Protecting the majority from the minority has never worked and will never work.	Justin	Gauteng		employed individual
	2025-07-10 09:34:33	Yes I do	Broad-Based Black Economic Empowerment Framework	Having Bee is not democratic, it is racist. It's been 30 years since apartheid ended	Robyn	KwaZulu -Natal		retired

	2025-07-10 08:00:08	Yes I do	Broad-Based Black Economic Empowerment Framework	BBBEE is not a working solution. I do believe injustices of the past need to be rectified but I also believe in a meritocracy and hiring the right people for the job irrespective of colour. The government should put a major emphasis on educating the majority to empower them for opportunities not give them jobs because of the colour or gender. This is why our society is failing. We have the wrong people mostly doing the job and the private sector is exploiting this gap and making a profit from it. Fix the real problem. Don't throw a bandage over it by introducing policies and laws that mask the problem and don't fix the actual issue. Empower your people for a better future.	Daniel	Gauteng		employed individual
	2025-07-10 07:59:29	Yes I do	Broad-Based Black Economic Empowerment Framework	All business should be fair and equal. Black empowerment had its fun for more than 30 years. Its time everyone no matter who you are, are treated equal. Removing the black empowerment will ensure everyone has work and not only the elite of the so called people trying to govern this country.	Rivka	Western Cape		retired

	2025-07-10 06:01:20	Yes I do	Broad-Based Black Economic Empowerment Framework	Ek ondersteun die konsepwysiging as vertrekpunt om die BBSEB-wetgewing mettertyd volledig te skrap. In meer as dertig jaar kon die ANC met allerhande raswetgewing dit nie reg kry om sogenaamde agtergeblewendes oordentlike vastrapplek in die Suid-Afrikaanse ekonomie te laat kry nie. Al wat dit veroorsaak het (en steeds!) is: ~ Dat 'n klein groepie kaders uitermate bevoordeel word terwyl die massas kripeer ~ Dat kundigheid die land uitgejaar word met omgekeerde rassisme ~ Dat die ekonomie gesmoor word deur geen klem te plaas op produktiwiteit nie ~ Dat werkloosheid dramaties toeneem en daarmee saam misdaad, wetteloosheid en korrupsie wat nou reeds 'n aanvaarbare lewenswyse geword het wat in die hoogste samelewings- en regeringskringe botvier en as aanvaarbaar tot in alle bestaansordes nagevolg word. Die ergste is dat die ANC nooit sal erken dat sy idiologies-gedrewe beleide klaaglik misluk het en Suid-Afrika tot op die rand van totale verval gedryf het nie. Die enigste oplossing is dat die swart massas tot hierdie besef sal kom en die ANC by die stembus laat boet!	Danie	Free State		retired

				South Africa urgently needs a bold and honest re-evaluation of the policies that have shaped its post-apartheid economy — and central to this is the reconsideration and eventual abolition of BEE in its current form. While BEE was originally intended to redress historical imbalances, it has too often become a mechanism for elite enrichment, political patronage, and economic inefficiency, rather than true empowerment of the majority. To change South Africa's future for the good, we need constitutional and legislative amendments that pivot away from race-based economic engineering toward policies based on merit, socio-economic need, and inclusive growth. These changes should: 1. Replace BEE with a new model of Broad-Based Economic Inclusion, targeting all disadvantaged South Africans — black, coloured, Indian, and white — based on poverty, unemployment, and lack of opportunity rather than race alone. 2. Incentivize job creation, entrepreneurship, and skills development — especially in townships, rural areas, and underdeveloped communities — through tax benefits, grants, and education-focused empowerment rather than ownership quotas. 3. Strengthen accountability and transparency in public-private procurement and partnerships, rooting out corruption and cronyism that have plagued many BEE-driven deals. 4. Encourage foreign and local investment by restoring business confidence, ensuring policy certainty, and removing artificial barriers that hinder economic competitiveness. Only by embracing equality of opportunity over enforced outcomes can we truly unlock South Africa's vast potential, inspire innovation, and build a nation where all citizens — regardless of race — can thrive. This is not about ignoring our past, but about choosing a be better.				
	2025-07-09 22:00:12	Yes I do	Broad-Based Black Economic Empowerment Framework	It does not create fair opportunity for all , what ever happened to a free and fair South Africa ? Amend the laws, make it fair for all and see the country prosper.	Pastor Greg	Gauteng		employed individual

	2025-07-09 21:15:19	Yes I do	Broad-Based Black Economic Empowerment Framework	The main concerns likely revolve around regulatory, economic, and social issues. Since the BBBEE framework emphasizes black economic empowerment, local ownership, and inclusive participation, critics might argue that Starlink—being a foreign-owned satellite internet provider—may not meet these criteria directly. There could be worries about how Starlink’s operations align with local empowerment policies, whether it will contribute to job creation, and how it integrates into South Africa’s existing telecommunications landscape. Additionally, concerns may include spectrum management, data sovereignty, and ensuring that the service benefits underserved communities, thus supporting broader digital inclusion goals. The draft policy by Minister Solly Malatsi could be aimed at addressing these issues, providing a clearer regulatory pathway for Starlink to operate in a way that aligns with national development objectives.	Errol	KwaZulu -Natal		retired
	2025-07-09 21:15:07	Yes I do	Broad-Based Black Economic Empowerment Framework	Black economic empowerment has a very restrictive effect on local economy and again limiting citizens participation in economic development based on the amount of melatonin in their skin- apartheid.	Esme	Western Cape		employed individual

	2025-07-09 21:14:53	Yes I do	Broad-Based Black Economic Empowerment Framework	I strongly support the proposed bill seeking to remove or relax Broad-Based Black Economic Empowerment (B-BBEE) requirements for entities like Starlink to operate in South Africa. While I acknowledge and respect the historical need for redress through B-BBEE, we must also be pragmatic in embracing technological progress that can unlock economic inclusion on a far broader scale. Starlink offers the promise of fast, reliable internet access to underserved rural and peri-urban communities that have been systematically excluded from traditional telecommunications infrastructure. Denying such transformative access based on rigid ownership frameworks not only undermines innovation, but actively stifles economic development, education, entrepreneurship, and connectivity for millions. The aim of empowerment should not come at the expense of access. If the current framework deters investment from companies that could uplift entire communities and level the playing field through technology, it must be re-evaluated. Empowerment must be measured not only in ownership percentages but in the tangible socio-economic benefits delivered to the people of South Africa. This is not about abandoning empowerment – it's about evolving our approach to it. Strategic exemptions for companies offering clear national benefit should be viewed as a catalyst for empowerment, not a contradiction of it. Let us prioritise progress and unlock the digital future that all South Africans deserve.	Justin	Gauteng		employed individual

	2025-07-09 18:26:31	Yes I do	Broad-Based Black Economic Empowerment Framework	To the Hon. Minister Solly Malatsi and all stakeholders, I am writing to express my strong support for the proposed policy direction to amend the BBBEE requirements for telecommunications services, as it potentially paves the way for the operation of Starlink in South Africa. While I firmly believe in the principle of transformation, it is my conviction that the current Broad-Based Black Economic Empowerment (BBBEE) framework has not achieved its intended goals. Instead, after 35 years since the end of apartheid, which itself lasted 40 years, the current setup appears to be largely enriching a politically connected elite rather than genuinely empowering historically disadvantaged South Africans or fostering broad-based economic growth. The significant time elapsed since 1994 necessitates a re-evaluation of policies that may now be hindering, rather than helping, the nation's progress. Furthermore, it is a stark reality that South Africa consistently records one of the highest Gini coefficients globally, despite having some of the most extensive race-based laws intended to address inequality. This paradox strongly suggests that something fundamental in the current policy approach is flawed. If policies designed to reduce inequality are instead correlated with its persistence, or even increase, then those policies require urgent reconsideration. It is time for South Africa to unleash an unencumbered entrepreneurial spirit. By removing restrictive requirements that have proven susceptible to corruption and inefficiency, and which demonstrably have not led to equitable outcomes, we can create an environment where innovation flourishes, investment is encouraged, and, most importantly, sustainable employment is generated across all sectors for the benefit of all South Africans. Therefore, I wholeheartedly support the proposed policy direction and urge the Minister to adopt it. This is a crucial step towards fostering a more dynamic and inclusive economy for all. 	2025-07-09 18:09:55	Yes I do	Broad-Based Black Economic Empowerment Framework	BEE and BBBEE has had more that 30 years in which TO Economically Empower Black People in this country. After all this time only a very small number of connected Black people have benefitted and earned millions by getting their free 30 % shares in businesses belonging to others - to the detriment of the thousands of other Blacks who have only become poorer and less educated, had worse transport opportunities and fewer meaningful work opportunities. This BBBEE does not work as has been proved in the last 30 years. SCRAP IT NOW and focus on EED - ECONOMIC EMPOWERMENT AND DEVELOPMENT FOR ALL. BEE is racist and has been misused. Just encourage Investment & the Economic building of this country by all those who are able to initiate it. Starlink will open up connectivity in rural areas and encourage business and education and learning - especially now with AI. Stop this Greedy BEE idea of self enrichment on the back of others. Work for the benefit of growing SOUTH AFRICA for ALL and moving it forward with its amazing people.	Denise	Western Cape		self-employed
	2025-07-09 18:09:46	Yes I do	Broad-Based Black Economic Empowerment Framework	While BBBEE aims to address historical inequalities and promote economic inclusion, it has faced criticism for potential negative impacts on the economy and businesses. Some argue that it can lead to inefficiencies, increased costs, and even corruption, while also being perceived as exclusionary and leading to unintended consequences like fronting practices. 	2025-07-09 17:59:21	Yes I do	Broad-Based Black Economic Empowerment Framework	1.ELITE BLACK Enrichment, Not Broad Empowerment: BEE benefits a small, politically connected Black elite through "BEE deals," with an estimated R1 trillion transferred to fewer than 100 individuals since 1994, while leaving mass unemployment, (32.9%) and inequality unchanged. 2. Pervasive Corruption and "Fronting": Companies exploit loopholes (e.g., falsely listing Black managers or using "Blackwashing" to inflate ownership stats). The BEE Commission recorded 1,348 fronting complaints since 2017, yet **no convictions** due to a dysfunctional justice system which is the ANC. 3. Investment Destruction*I: BEE's "Byzantine" regulations increase costs, deter foreign capital (e.g., Elon Musk' mow - Starlink abandoned SA over BBBEE rules), and force businesses to hire/promote based on race rather than MERIT AND BLACK, eroding COMPETITIVENESS or fairness 4. Policy-Induced Distortions: The focus on ownership targets (e.g., 25%+ Black ownership) neglects skills development and job creation. Training programs often become "cycles of training" without employment, and procurement rules add 11–25% costs to state contracts, enabling looting FREELY. INVESTMENT CONFIDENCE DOWN AND LOST SKILLS. DESTROYED SOUTH AFRICA'S VERY INFRASTRUCTURE. GOOD RIDDANCE TO BBBEE!	Olivia	Gauteng		business owner

	2025-07-09 17:32:59	Yes I do	Broad-Based Black Economic Empowerment Framework	Time and time and time again, BBBEE has proven to TOTALLY FAIL the people of South Africa, EXCEPT THE ANC ELITE. It is a disgusting tool for promotion of corruption, racism and economic failure, loss of jobs, loss of investment. There is NO reason to keep it in place, except to perpetuate all of the above digusting failures, and continue to chase away investment and jobs in South Africa. This new proposed framework, while still not ideal, might finally persuade foreign investment to come to S.Africa. And it may finally allow S.African companies to succeed, grow and provide employment. It then needs to be rolled out across all industries. So the people of S. Africa (outside of the elite in the ANC) can benefit and the country can prosper and stop being the ridicule of the Continent. Stop being the showcase of African Failure. Currently because of BBBEE, S.AFrica is among the worst countries in the world to operate in, in terms of investment, business, security, infrastructure. ITS PEOPLE ARE SICK AND TIRED AND NO LONGER ACCEPTING OF THE ANC AND ITS FAILURES. Change - or risk Civil War. This is more than just a simple matter of internet availability.	Glenton	Gauteng		business owner
	2025-07-09 17:30:28	Yes I do	Broad-Based Black Economic Empowerment Framework	I definitely support the removal of BBBEE as it never worked.
