	2025-07-09 03:40:00	Yes I do	No concern	BBBEE is a load of nonsense. Companies need to employ people who can do the job, because they are qualified and capable of doing it, and not because of whether they were previously disadvantaged. All that one lands up with is a worse situation. If you are qualified, capable and able to do the job, then no matter who you are, you should be able to apply and receive the opportunity to work. If you are not qualified and capable of doing a particular job, then no matter who you are or are not, you do not have the right to get the job.	Sieglinde

	2025-07-08 21:08:10	Yes I do	No concern	I support the removal of BBEEE regulations and all that comes with it. Biggest reason is the amount of finances required for BBEEE certifications, second reason where this would eliminate the middle man... companies are 100% Black owned and looks good on a certificate, but they then use the services of the people who actually does the job for way less than what the middle man has charged the end user. The company I work for does electrical equipment and transformers for the mining industry, who is never able to tender for work at Eskom etc. due to BBEEE regulations. The middle man comes to our company and we still do the work for way less than what is charged. These middle men makes a lot of money for doing nothing, overcharging the mines and end users, which has a crippling effect on the whole industry, draining the finances of these mines or end users, making is less possible to have al sections up and running with working equipment because the budget has been reached. Individuals and companies should have equal rights and possibilities to be able to be employed/tender for opportunities for which they have the required skills and knowledge for. 	2025-07-08 17:41:56	Yes I do	No concern	BBBEE is like a protectionist tariff. Which means that like tariffs that need to be updated and removed once they served the purpose or the situation changes, so too must BBBEE. There are a number of layers to BBBEE and the specific 30% ownership is hindering an important benefit, which is internet in rural areas. Thus the very purpose of Economic Empowerment is furthered with allowing Starlink. Instead of empowerment through ownership, empowement can be achieved through investing in infrastructure (satellite dishes) in rural areas. We achieve bringing the digital economy to the underpriveledged. As to the other aspects of BBBEE, if after 30 years protection is still required then BBBEE has failed. Just as we don't need quotas in sport, so we do not need quotas in business.	Derrick	Gauteng		business owner

	2025-07-08 14:34:14	Yes I do	No concern	This BEEEE extortion / tax on investment capital (input costs) has NO PLACE in the economy of South Africa as it creates an air of entitlement to FREE DIVIDENDS to the politically connected and who make NO INVESTMENT into a company. Even in the case of the Afrikaner after the Anglo Boer War they did not live on freebees; they uplifted themslves. Aparthid was only policy after 1948 . It's strange that after 30 years of democracy and Affirmative Action that the majority of the population still don't understand the principles of investment and even worse keep in blaming other people for their situation. They have now the opportunity to lift themselves up. With the investment of Mr Musk the rural areas will now be able to connect with the outside world and increase their levels of knowledge. 	2025-07-08 05:52:52	Yes I do	No concern	I fully agree that the telecommunications Act be aligned with the broader B-BBEE Act. The ability of multinational companies to earn Black Ownership credits on their BEE scorecard by earning an external ownership credit eg an equity equivalent, (and all of the other B-BBEE Code Black Ownership mechanisms inherent in the Code), is well established in our law and has been in place for almost 2 decades. The Act should have aligned to the B-BBEE Code a long time ago. This move makes B-BBEE stronger and ensures that transformation keeps its essential place in our economy. 	2025-07-08 05:27:43	Yes I do	No concern	While acknowledging the foundational intent of Black Economic Empowerment (BEE) to address historical economic imbalances in South Africa, it is critical to openly assess its practical impact on the current economic landscape. From my perspective, the implementation of BEE has, in certain instances, inadvertently created an environment perceived as unfair within the workplace. There is concern that it has led to skill gaps or misalignments in the workforce, potentially prioritising factors other than merit, and thus limiting opportunities for certain qualified individuals. Furthermore, the requirement for established businesses to transfer ownership stakes has, for some, necessitated significant sacrifices and raised questions about whether such allocations consistently lead to genuine empowerment or sustainable economic growth for involved. We have no issue with black ownership, but then it must be earned and not received free of charge. Lets make South Africa great again. We are a colourful nation with lots of talented and inteligent people, regardless of colour of skin. Lets acknowledge those with the capacity to make a difference to our economy and rather train those who are not at a level where they can make a difference. God bless South Africa. 	2025-07-07 10:46:06	Yes I do	No concern	BEE or BBBEE has not achieved ANY of its original objectives. The "benefits" have been restricted to a very select few members of the inner circles of ANC influence. The broader population has seen no benefits from the currently estimated R150B premium paid by government from our taxes. The system is unworkable and the ruling party has shown no inclination nor ability to make the system work as originally, and purely in theory, intended. Currently, as with the StarLink scenario, we clearly see the powers that be would rather have the broader population in rural areas, and especially the youth still at school, suffer from a lack of access to the internet than remove the restrictions to allow a hugely cost effective and efficient technology access to the SA market. 	2025-07-07 08:34:44	Yes I do	No concern	It is time for South Africa to shift towards a merit-based approach to employment and economic participation, emphasizing abilities, knowledge, and qualifications rather than race or gender. Removing measures like BBBEE altogether is essential, as they can hinder economic growth by introducing unnecessary restrictions and promoting discrimination. Critics argue that BBBEE is effectively a racially biased law that discourages investment, penalizes fair market practices, and suppresses talent across different cultures. Eliminating such policies would create a more open, competitive environment, encouraging investment and innovation, which is crucial for the overall growth and prosperity of all South Africans. Ultimately, reducing restrictions and fostering an inclusive, merit based system can help unlock the nation's true economic potential and help to stop the widespread corruption which has caused so much decay in our economy. 	2025-07-06 23:37:45	Yes I do	No concern	I think this is a fantastic idea. Anything that paves the way for the removal of BBBEE is perfect for boosting our economy and creating growth and proper competition. The only people who have really benefitted from BBBEE have been the politically connected elite who were rich to begin with, whereas the average man in the street has still remained poor and disenfranchised. Hopefully through this my white kids who were born in SA after 1994 will have a fair chance of getting employment and progressing up the levels of leadership. I do not disagree that we as a country need to be creating opportunities for as many people as possible to have gainful employment, but the current system is not working. It is choking out opportunities for job creation and allows for corruption to flourish. We need to have an environment that nurtures business and encourages skilled people to stay and build here, not overseas. I do believe in scrapping this BBBEE and BEE totally. Even in the work place jobs should be given on skills experience, not skin colour. It's the same over fed faces feeding at the same table till they become billionaires. Ordinary people who were previously disadvantaged have yet to benefit. Why doesn't the SA govt rather require companies who want to invest in South Africa to be responsible for social needs such as: : protection of the environment in specific areas, clearly defined and capable of measurement :delivery of potable water, and or electricity, and or sewer services and or refuse services to specific communities, clearly defined and capable of measurement. There are many communities throughout South Africa that have been abandoned by govt and urgently require these services :delivery of education, both basic and relevant to life and making a living. Again there are many communities throughout South Africa that have been abandoned by govt and urgently require basic education and life skills. The above is just a sample of what could be delivered by potential investors who I am sure would be only too happy to do so.	Norma	Gauteng		retired

This is a major restriction for multi-nationals investing in SA. The precedent has also already been created with Microsoft and Pfizer being allowed to make up for the 30% by investing in the upliftment of people in the community. 	2025-06-23 13:35:07	Yes I do	No concern	It is long overdue for the BBBEE to have been reviewed. No jobs were created with those funds, the 100 individuals' part of this structure just enriched themselves, so why is this still part of a country that wish to be seen as democratic but 70% of the population still has no jobs or a secured income? 	2025-06-23 13:29:26	Yes I do	No concern	I believe there needs to be a rethink as to how we move forward with BBBEE. The country is not seeing a benefit to this type of race based economic framework in the broader sense. There is astronomically high unemployment amongst South Africans and until there is a change in the education and ability of previously disadvantaged groups to fully access capital and funding to create businesses that can provide employment to the masses, its imperative the government takes a macro view to this issue. Allowing this change will also see other players from the international market shed a positive view on this and be more willing to do FDI and thereby create a new network of investment, diversification and employment for those who need it. It does not improve the living standards of the majority of poor people, it only benefits the rich and the corrupt. For many years all of South Africa's citizens had all the opportunity to move into the middle class, but what did they do, absolutely nothing for themselves, in fact they went from bad to worse by having more children than they could afford or attend to. Politicians also aggravated this situation by supporting large families, all for the sake of votes, and not educating the masses to get them out of poverty. 	2025-06-23 08:04:33	Yes I do	No concern	I am a white male South African and my entire life I have had difficulty being accepted for course I would have wanted to study, it was a life long dream to become a doctor, I was always in the top 10 academic achievers in my year for my school and the region but I was not accepted while students that were previously disadvantaged in my school with much lower marks are neurosurgeons now. I even tried applying to medical school in my mid 30 and again were rejected. In the 2010's I was retrenched with the whole company and had so much difficulty finding work I had to switch careers to something that is performance based and sought after globally to find work. I believe the way to uplift the previously disadvantaged members of our country is through a massive push on education, free and PROPER education for someone who cant afford it, if everybody is on a level playing field intellectually (which is only possible through education) then there will be no need for BBBEE. Now as part of the bill above to allow star link into the country that will help so much to improve education through reliable internet	Auke	Gauteng		employed individual

	2025-06-23 08:03:57	Yes I do	No concern	There should be a new policy empowering men - especially those who were disadvantaged in the last 30yrs - we need more men in certain fields of studies - all medical fields where especially white men were last to be accepted. Most classes are full of women and they are the ones at later stages deciding not too work to raise the family and also not willing to travel to rural areas and therefore we loose manpower in a lot of sectors in the marketplace. We need men to start taking the reigns again in the marketplace, business sectors, law and medical fields. Also in the police-force we need men and fit and able men people will respect and that will respect the uniform. I see a lot of overweight police people shaming the uniform and country. (All races) Make a new intake policy. I know this is not too relevant, but a lot of sectors struggled because of wrong inclusion policies.	Esti	Free State		self-employed

If it wasn't for some of these policies, I would not have been in the positions I held in various organisations. It is because of them, so many Black people and small enterprises have been woven a chance and allowed greater participation in the economy. All sectors in this country, must have BBBEEE policies and other policies that promote thr empowerment of the previously disadvantaged. Other countries have the same legislation and yet they do not receive the amount of condemnation thay South Africa does. Many people in this country who are opposed to these policies have no substantial alternatives to ensure the participation of the previously disadvantaged in our economy.	Morwesi			self-employed

I’m of the opinion that access to the internet is basically a human right at this point. My only concern with Starlink is the taxation of the company. If South Africa is unable to tax Starlink, doing something like making it free in schools and universities at the cost of the company would be a nice form of “taxation”.	Shaun	Western Cape

	2025-06-22 11:47:38	Yes I do	No concern	While i am not a fan of Elon Musk if bringing Starlink into SA will ammend the BBBEE requirements then i do think its a positive thing. The BBBEE Policies in South Africa are inhibiting for businesses to grow. I understand the need for inclusion and agree with that but to make it mandatory is counter intuitive for growth in a country that desperately needs BUSINESS growth given the massive amount of unemployment and the huge amount of people who are hungry as there is no work which leads to the demise of those people. Its not sustanable and nor it is fair to all the various communities living in South Africa. One could say its reverse racisim. i think in a country thats desperatley needs growth any opportunity that has the potential to uplift business and growith its critical. If starlink can reach wider communities for cheaper prices that already exist in SA then its worth it. BBBEE is not a way forward in Sotuh Africa we have seen many industries stunted becasue of this policy.	Janine	Western Cape		self-employed

	2025-06-22 11:46:06	Yes I do	No concern	BBBEE enables a handful of politically connected elites to enrich themselves and adds no benefit to the economy or the lives of the majority. 	2025-06-22 11:39:23	Yes I do	No concern	No objection. This will not end BBBEE as people have mongered. My suggestion is that musk registers a "starlink SA" that will manage local operations and lists this on the JSE. This will allow all (GEPF, PIC, ordinary folk) to invest in his success. If he wants he can launch a BEE share scheme to allow HDI's to invest at discounted basis or simply launch an employees share scheme to assist his local employees to invest. The advantage of investing on JSE is he will be subject to stringent compliance and monitoring which I dont think ICASA has at the same level as the JSE (of course their mandates are not the same). 	2025-06-22 11:24:53	Yes I do	No concern	I strongly believe that inequality has had more than enough time to get balanced out! The county's brain drain (from all affected races) are real, yet our country employ medical professionals from other countries - where is the logic in that? The individuals who are affected by BEE policies are forced to entrepeneurship in order to make a living. Entrepeneurs are the ones taking all the risks, on every level, financial, family, social, health and mental health and as soon as their business grows they are forced to employ individuals according the the BEE policies and most of the time the talent pool is limited, they dont share the same ethics or the slightest idea about the time, money, risk, mental and physcial health they pay with a very high price. Sleepless nights, uncontrollable stress levels, which lead to increased mental and physical health, and medical bills to pay out of their pocket due to the fact that they cannot afford medical aid (across the board for all parties affected by BEE). All their hard work and investments (time, energy, health, and family) are then forced into government policies that force the entrepreneur to employ according to a set of rules and regulations from the government that had no contributions or risk in the process of establishing new entrepreneurs successes and only in BEE entrepreneurs startups. Basically there is no logic or even common sense behind this fact. Thus there is no homeostatic and symbiotic balance, only a parasite effect, and looking to nature according to these principles, yes, that speaks for itself. That will allow people in rural areas much better access to the internet which will in turn give them access to education for them and their children, allow them to start businesses which will help them and the economy, and will lead to a better life for them and South Africa. 	2025-06-22 06:26:42	Yes I do	No concern	I have zero concern with starlink coming into the country. It will benefit everyone. The fact that we still have BEE as a requirement is ridiculous. It has no value to uplifting the real Black people of this country not just the politically connected individuals. Starlink will provide a stable connection for all . I live in the rural area where connection is unstable and the local vodacom towers have terrible network and support. What support as there is none. You cannot contact them. They the reason why starlink is being blocked in this country . As soon as starlink is here there will be no use for land based towers . Vodacom will lose millions of outdated infrastructure over night. Vodacom should have moved faster with the times. Starlink will help with crime control as the local police rely on cellphone network. At the moment there is no one trained in radio stations for the police in KZN. How do the police contact each other in serious situations? They simply don't causing an increase in crime. Let's change South Africa and allow starlink in. It will increase knowledge through internet learning . From my point of view I have learnt more important things for my businesses and hobbies from the internet than school. Internet is the best for self learning and it teaches you to use multiple sources instead of going with the first lead. This will help our narrow minded nation with doing more research before acting on the first sight of political propaganda.	Richard	KwaZulu -Natal		business owner

Just that options is what a democracy should be about, allowing people to choose whose service they would like to have.	Ralf

	2025-06-21 16:10:11	Yes I do	No concern	I feel that an amendment to the BBBEE is an excellent idea. When it was first introduced, there were doubts. After more than 20 years, in my opinion, it has been a total disaster. Why? It has allowed very unqualified people to be employed, and owners have had their hands tied by the law. Education was a top priority years ago. We have a situation where corruption has taken place. Good companies have left SA because of these restrictions, and today our country has not progressed in this time, quite the opposite.	Jeannette	KwaZulu -Natal		retired
	2025-06-21 16:09:21	Yes I do	No concern	It is a no brainer. Millions of South Africans will benefit from a service provider such as Starlink, while BEE only benefits a few individuals. I for one am based in rural Pretoria, and my online business has no access to fibre, Herotel is not a great service provider, my business will grow quite a bit with faster internet, and this means more tax for government to spend where it is needed most. It will be a gamechanger for rural folks, and if one can produce a great public school online cirriculam, it will have an unmeasurable positive impact for personal, and growth for our country. 	2025-06-21 13:06:17	Yes I do	No concern	It is totally ridiculous and that the issue of BEE still remains on the statute books some 30 years after the change to a so called Democratic Government. Surely after 30 years the playing field has been sufficiently levelled that business formation and administration should be based on unbiased and internationally accepted commercial lines, and not dictated by some now archaic remnant of the old and fortunately obsolete remnants of Apartheid. BEE and all its attendant restrictions should be regarded as having been necessary at the time it was implemented, but redundant and obstructive to business development in our current times. Furthermore, BEE in respect of Starlink is standing in the way of the potential enormous benefits to rural and disadvantaged communities of having low cost high speed internet connection available countrywide, with all the attendant benefits that internet connectivity will definitely bring. In the case of Starlink, the enforcement of the BEE laws are having the directly opposite effect to what was originally intended when BEE was conceived and implemented! It is time to wake up and become part of the modern developing world and permit Starlink to operate in an unrestricted manner so that all citizens of South Africa can benefit. 	2025-06-21 10:45:43	Yes I do	No concern	BEE must go. It has been one of the main reasons for supporting corruption and preventing foreign investment and the growth of the economy. It is a failed policy which has benefitted a tiny percentage of the corrupt black elite. As an experiment it ought to have had a life of ten years only to test if it might have worked. After nearly 36 years the facts show how detrimental it has been. The government has to dramatically and immediately repeal all race based legislation, provide tax incentives to locals persons and foreigners starting businesses in SA, and incentivise investment and job growth. SA cannot continue to lose all of our skilled your people. SA is a failed state and the government and population must accept this fact and change it immediately. 	2025-06-21 09:24:32	Yes I do	No concern	The entire BEEE program is a total handbrake for South Africa's economy. It's seriously hindering the growth of our economy and basically blocking large international companies setting up shop in RSA. 30 years ago BEEE maybe had a place, but it time to change gears and concentrate on what is going to drive the economy forward. Starlink as an example, will do wonders for all South Africans and benefit the poor in rural areas probably the most with access to information, but it's being held back by policies that are designed for a few people vs looking after all who risked in the country. Remove BEEE for good and rather replace it with a privately run education Tax that puts the poor through the full education system, primary school to university, educate our people so they can see the light and see the bullshit that is the ANC government. I was given three months to find a BEE partner who would own fifty one percent shares. All the intellectual property developed in my human resources consulting company that was focusing on affirmative action placements would be under this new partner's control. Not one of three well placed individuals were willing to pay a cent for the shares. Not one of them came forward with a new client in a month. That was the only qualification I set. I closed down the company and changed over to selling properties. From a strong company and income I ended with nothing. I am sure I was not the only person who lost out. Fact: During Apartheid and Sanctions from the world, SA Local Economy thrived and was the best it's ever been. Fact: More than 30 years Post Apartheid and under the ANC Regime with BBBEE requirements, their was a massive brain drain as white people found themselves without jobs and emigrated. SA is now importing food, including citrus; the Rand/Dollar exchange is so bad that SA has now been listed as a Junk Country; all the major governmental run companies for electricity and water etc. have been compromised financially and are barely functioning, unemployment is at an all time high, while employment is at an all time low; and thousands of companies withdrew from SA and their investment in SA because they didn't want to be forced to be black owned and dictated to. Black people are no longer disadvantaged - that is now history. Companies that don't have to be black owned will start investing in SA again and the economy, as well as employment will rise. 	2025-06-20 13:57:01	Yes I do	No concern	As a South African citizen, I believe in the right to choose the service providers that best meet my needs—especially in critical sectors like internet connectivity, which directly impact my education, work, safety, and access to information. I strongly support the petition to allow Starlink to operate in South Africa without being hindered by restrictive legislation such as the Broad-Based Black Economic Empowerment (BBBEE) requirements. While I understand the historical context in which BBBEE was created, it is my view that such laws should not obstruct or limit access to globally transformative technologies—especially in a country still facing massive digital inequality, poor rural connectivity, and unreliable infrastructure. Denying Starlink's operation not only restricts consumer choice, but it also undermines our right to access efficient and modern telecommunications services. I do not believe it is just or constitutional for legislation based on race-based ownership criteria to prevent me, or millions of other South Africans, from accessing a service that can dramatically improve lives. My right to freedom of association and to engage with the service providers of my choosing must be protected, especially when that choice leads to better education, entrepreneurship, and social development opportunities. Starlink can bring immediate, affordable, and reliable connectivity to the most underserved areas of our country—something existing providers have failed to do adequately for decades. Blocking such a solution due to outdated regulatory frameworks harms ordinary citizens far more than it uplifts anyone. South Africa needs policies that empower people by enabling access, not by creating artificial barriers that protect monopolies or enforce compliance through exclusion. True empowerment lies in providing tools and opportunities, not in preventing progress. I therefore call on the government and regulatory bodies to amend or waive restrictive requirements i	Francois	Gauteng		employed individual

	2025-06-20 13:26:56	Yes I do	No concern	BBBEE has stifled the South African economy since the large scale adoption in 2006. Ironically it has be equally destructive to economic transformation. Transformation can't meaningfully happen unless the economy expands. The cost of comply with the various BBBEE requirements which includes considerably reporting requirements has hampered South African companies regardless of the BBBEE status. The BBBEE policies are fixated on how to cut the pie smaller (a piece for this race group and two piece for that one, ...) rather than expanding the pie. The policy clearly doesn't work if SA's unemployment rates continue to climb year-on-year. Get rid of it and stop strangling SMEs through endless, expensive bureaucracy. Make Musk's contribution to SA's reform be free Starlink to all rural schools forever. 	2025-06-20 13:08:58	Yes I do	No concern	While I wonder how Starlink will affect small South African internet service providers, the principle of scrapping BBBEE requirements to allow for investments to be made into South Africa that could benefit all South Africans is something that we really need to be doing. Our economy is stagnant, and many businesses wanting to come into South Africa are of such a nature that demanding that there be BBBEE requirements applied is ridiculous and will only dilute the effectiveness of the companies as they would be burdened by incompetence and appointments that do not contribute to thier operational effectiveness. 	2025-09-14 10:12:00	Yes I do	Policy Direction	The policies and direction that gov has taken in order to 'in their words' correct/amend wounds (they perceive) of the past by introducing more and more red tape and demands which usually requires a gov charge for such, as well as placing their friends and family in the rolls that was the hidden agenda of these plans to begin with. Unskilled, they anyway dont care because the BEE and the many BEEEEEEEEE rules and regulations that continue to be added have done nothing to correct anything except enrich those for whom this approach was put forward to begin with. Anyone speaking to the contrary of their 'idea(l)s was not considered or out rightly silenced. If the powers that be continue on their own mission of satisfying their own agendas overt and covert it will eventually collapse, but at what cost. We can see at the moment the signs through all the news reporting corruption on all levels and one no longer needs to look far to see where it started by whom, and who benefited regardless to the loss of an entire country and it's people. All that the current gov has put in place under the lie "transformation' should be challenged. However as we all know, the duck and dive will continue until they are systematically removed from the positions that allow them to act in this way. President R say for the next elections he wants to see skilled people be in positions to improve the destroyed mess of SA; How will they that are the covert overt beneficiaries of their corrupt choices move out of the way to allow this. Trump voiced as are others clearly the wrongs in SA - and it was named as 'fake' from the biggest fakes that exist managing their money at our expense. We, the public are held under a suffocating pressure from the top trying not to crumble and give up - while they continue to do as they please. Times are changing, pressure is turning to face them, and all that they claim to have 'achieved' ha ha ha will crumble along with them So we rebuild	Jennifer	Gauteng		self-employed

	2025-08-05 18:22:11	Yes I do	Policy Direction	The policy direction offers a balanced approach for the ICT sector. South Africans are excellent workers and consumers, and as a business owner in law, I believe many international companies will embrace the opportunity to meet transformation goals through equity equivalent investments. A little flexibility is often necessary to attract investment. At its best, BBBEE is about equity, not just equality and I hope this approach will strengthen skills development without weakening BBBEE's goals. Rigorous monitoring and enforcement are crucial to ensure genuine transformation because equality without equity only preserves the status quo. Managed properly, this policy can stimulate economic growth while supporting meaningful social equity.	Hadiyah	Western Cape		self-employed

	2025-07-17 16:26:11	Yes I do	Policy Direction	BBBEE has shown to adversely benefit mostly well connected and already empowered and already rich people of colour and hasn't done what was it's initial plan to bring about a greater change to the lives of the impoverished and previously disadvantaged. While in principle it is a great initiative in practice it prevents a lot of well needed outside business and investment into the country and in this case access to the internet for those who need it most. Access to information and knowledge for people in the most remote places while keeping that access cost as low as possible and even free if provided by the government with good business relationships with the likes of starlink and outside investment is exactly what will help the next generation lift themselves out of poverty and be the future of Black Economic empowerment where the youth of tomorrow can create businesses and be entrepreneurs off the back of self empowerment and knowledge gained from the open access to information that technology that starlink offers will bring, and which is so vital to this countries success. When you visit Europe and see places like Amsterdam offering free internet at Libraries for all, that is how a nation like ours moves forward into the new age of modern technology and how a country like South Africa can break free of the 3rd world status holding us back. BBBEE in it's current state is just a barrier to entry for business and foreign investment which can be used as a tool to help create much needed employment, this barrier is counterintuitive to the purpose of BBBEE in the first place. Let's move forward in the correct way with the correct policy that benefits the future generation of business leaders across South Africa.	Lloyd	Western Cape		employed individual

	2025-07-14 13:49:08	Yes I do	Policy Direction	I think BBBEE had a place in our economy for a time, but that time is now over. With ever increasing unemployment, I think the focus needs to be on job creation and cost cutting (which Starlink will offer to individuals/businesses and government). BBBEE must be encouraged, but forced BBBEE is creating barriers to entry into a lot of potential investments into this country from locals and foreigners that could create jobs. 	2025-07-14 00:22:36	Yes I do	Policy Direction	BBBEE should not exist in the first place. It is front door for all corruption going on. Whiles black owners gets rich and pays the white with skills, to do the job and also getting paid. It run's up cost for things and we end up paying more and more tax money is needed to keep this failed state of us running. ANC has agenda to take, but not to deliver services and better everyone life's. Give knowledge, promote opportunities and provide more tools and support, to enable people to work for them selves. Make it safe and easy (for EVERYONE) who wish to start bossiness, create jobs and live a descent life. Example would be by having water and power run and and offer safe streets and affordable houses and business locations @ special rate loans first timers. Business owners usually have to spend a lot to keep them self's protected and have basic needs to run a business. So more work and spending is involved to pay everything that is asked from us according to comply with goverment law that makes sht up that makes US work for them and apparently you skin color is also wrong and you have to pay half of what you earn to government for nothing. Non is better off in the end of the day.	bianca	Western Cape		employed individual

We as investors and entrepreneurs cannot get funding locally, or internally, to build factories and businesses that would otherwise uplift the nation through employment. 	2025-07-09 13:34:24	Yes I do	Policy Direction	BEE has outlived its usefulness in transforming the SA economy. The original debate about AA and BEE in the IPM gained much support from all groups as it stated that there would be a sunset clause to end it after 20 years. This agreement has not been honoured, and BEE, as currently practiced, is doing little other than enriching the empowered ANC political elite. 	2025-07-09 09:06:33	Yes I do	Policy Direction	South Africa is in dire need of foreign direct investment (FDI) in order to increase the productive capacity of this economy, to create more jobs and thereby reduce unemployment and stimulate economic activity. Current draconian policies by Gov are preventing the necessary growth in FDI, leaving us stuck at a level of around 15% of GDP (versus >40% of GDP in China, for example). We are not China and should probably never strive to get to FDI of 40% of GDP because we will potentially also end up with huge over-investment and over-capacity. BUT we need to up our FDI towards 20% and then towards 25% of GDP. This would GREATLY assist with necessary job growth that could/would/should propel this country forward towards 2% and 3% real economic growth per annum. We need business friendly policies in this country to attract FDI at a rate far higher than we currently do. Do whatever is needed to achieve THAT, pleeeeeeeeeeease! 	2025-07-09 08:43:09	Yes I do	Policy Direction	BBBEE policy should be amended - any Pyramid structures concentrate power in the hands of those who sit atop them. This power is always open to abuse. It enables the ideas and the priorities of a small number to be imposed on the lives of millions – ideas and priorities that have a strong tendency to include wide-ranging privileges for those doing the imposing (look what happened with policies like Nazi Germany - this is wrong in so many ways, look to right wrongs differently). One bad policy replacing another bad policy that is what BBBEE is. It is - Wooden-headedness is a characteristic feature of governments. Wooden-headedness assesses a situation in terms of preconceived fixed notions while ignoring or rejecting any contra indications. In short, it is the obstinate refusal to learn from experience. These fixed notions bring in the most cases the focus on the selective aims or interests of the executive political leader and his intimate group inside the nation, not on the aims or interests of all the groups inside the nation, cancelling thus the overarching mandate which goes with a good executive political leader and his regime. It serves as a short-cut for the political leader – and possibly his intimate group also – to ignore willingly and intently the interests and human rights of the total nation, as well the risks involved by his under-par and malfunctioning leader's behaviour for the total nation. 	2025-07-09 08:42:04	Yes I do	Policy Direction	In my view, Broad-Based Black Economic Empowerment (BBBEE) has done more harm than good for South Africa. I believe it puts too much emphasis on race instead of ability, which can push away investors and lead to inefficiency in workplaces. 	2025-07-08 21:57:19	Yes I do	Policy Direction	Strong Support for Amending BBBEE Requirements in the ICT Sector I am writing to express my unequivocal support for the proposed amendments to the Broad-Based Black Economic Empowerment (BBBEE) policy, particularly as it pertains to the telecommunications sector and the entry of global players like Starlink. The current 30% direct equity ownership requirement, while well-intentioned, has proven to be a significant barrier to attracting crucial foreign investment and accelerating much-needed technological advancements and broadband access, especially in underserved rural areas. The proposed introduction of Equity Equivalent Investment Programmes (EEIPs) offers a pragmatic and forward-thinking alternative. This approach allows international companies to meet empowerment objectives by investing directly in vital areas such as: * Skills development and job creation: Empowering South Africans with the expertise needed for the digital age. * Support for local small and medium enterprises (SMMEs): Fostering a robust local ecosystem. * Infrastructure development: Expanding access to high-speed internet across the country. This shift will not dilute the spirit of economic transformation but rather enhance it by facilitating greater investment, fostering competition, and ultimately delivering significant socio-economic benefits to all South Africans. We need policies that unlock growth and ensure our nation remains competitive in the global digital economy. I urge the authorities to swiftly implement these progressive changes to ensure South Africa benefits from advanced connectivity and increased economic opportunities.	Janike	Gauteng		self-employed

	2025-07-08 18:40:17	Yes I do	Policy Direction	Getting rid of BBBEE will without a doubt make the country far more attractive to investors. Besides, after 30 years, those who were previously disadvantaged — and who have the ability — should by now be well-equipped to start and run their own businesses. BBBEE (Broad-Based Black Economic Empowerment) has, in many cases, fostered a culture of dependence rather than self-reliance. Benefiting from someone else's work and innovation without contributing meaningful value is, quite frankly, freeloading — and many recipients continue to be carried and supported as though they are incapable of succeeding independently. Many — and I do mean many — have become extremely wealthy through free shares and preferential deals handed out under BEE policies. What's more, they are proud of this enrichment. Meanwhile, the gap between rich and poor continues to widen, and the most vulnerable remain trapped in deepening poverty. What we need are real businesses that create real jobs. That is the only sustainable way to uplift communities — not by enriching a politically connected elite. Unfortunately, some BBBEE practices have given rise to syndicates, entitlement, and even gangster-like mentalities. Regardless of race or background, those with the ability must step up, build enterprises, and contribute to an economy that benefits all and do not suscribe to "piggyback" on others. We must also reduce red tape and genuinely support business growth. The notion that "everything must be free" or that the government must always provide is fundamentally flawed. True empowerment lies in standing on your own feet — in embracing hard work, innovation, and taking pride in what you earn. That can only happen when you actually have a job! 	2025-07-08 15:06:43	Yes I do	Policy Direction	It is my opinion that BBBEE policy is, and always has been used by the ANC purely as a self-enrichment vehicle. It has done virtually nothing to improve the lives of the millions of black South Africans. Through BBBEE policies the ANC "chosen" have amassed billions of Rand as their personal fortune and will continue to do so as long as that policy exists. BBBEE has hindered investment from overseas companies, destroyed growth, done nothing for job creation and will continue to deter local and overseas investment as long as the policy is enforced . For the benefit of all of the peoples of South Africa I would urge the President and the NEC to cancel BBBEE policies forthwith.	Ian	Western Cape		retired

	2025-07-08 14:55:34	Yes I do	Policy Direction	I feel that amendments to some of South Africa's policies. While we are the first Country in the world to have true democracy. It's a very difficult situation to manage, no one has a handbook on how to take centuries of oppression and empower people in a 30 year time frame. However, government needs to start out weighing the cost of the loss of opportunities. Starlink would provide many positive possibilities for all South Africans, in all sectors. I read an article recently about how starlink could provide internet that could change the way Sea rescue is done. With the day and age we are in, the Internet and having opportunities to learn better and more than what you are being taught at school is here. Allowing children to have equal access to school resources such as Khan academy because they can have Internet anywhere and for cheaper, it could greatly benefit ever section of South Africa. 	2025-07-08 14:23:00	Yes I do	Policy Direction	The concept of BBBEE is racist. Furthermore it favors a small group of elite connected individuals who repeatedly apply for select tenders, contracts and board placements. This never filters down to the man in the street. It hampers business, it suppresses the economy and it translates into less jobs for the average person in South Africa. That means that your average citizen who is most likely black has less access to available jobs since investors from other countries are reluctant to invest via FDI (Foreign Direct Investment) in South Africa. They are more likely to setup plants and manufacturing centers in other countries that do not require them to give away large portions of equity in their businesses. This reduces risks and provides an incentive to invest in other countries. The result of all of this is that the government in South Africa is increasing unemployment and reducing the quality of life of the average citizen. By focusing on race, the Government has interfered with local markets and businesses which it has no right to do. Not from a moral perspective and not from a financial perspective. The morality of helping "the previously disadvantaged" is not supported by the facts. If the average citizen has increased unemployment then they are now currently more disadvantaged by a series of poorly thought through laws. Instead the entire BBBEE and all its variations should be scrapped to ensure that the maximum number of jobs are available in the South African markets. That will not only lead to a better quality of life for those people who are employed, but they will also have a sense of dignity (a basic human right) as a result of having a job and being respected for that. The added revenue from taxes will also lead to greater prosperity in the country. The current laws merely seek to disenfranchise EVERYBODY and to ensure that people are poor, unemployed, desperate and without their right to dignity.	Le Roux	Gauteng		retired

We need to remove these obstacles to economic growth so that all South Africans can have better opportunities, and not only the already-empowered elite subgroup of the previously disadvantaged who profit at the expense of all people currently excluded through poverty, lack of education/experience and/or race-based exclusion laws. 	2025-07-08 12:21:19	Yes I do	Policy Direction	Honorable Minister and Mr. President, while your transformation agenda remains constitutionally mandated and morally imperative, current implementation mechanisms are creating unintended economic headwinds that threaten our Country's broader developmental objectives. Our Country require an urgent recalibration — not abandonment — of the approach. Our economy faces critical challenges directly correlated with current policy implementation: - GDP growth remains anaemic at 0.6% (2023), well below the 5.4% NDP target - Unemployment has reached 32.9%, with youth unemployment at 62.4% - FDI declined 77% from $40.66bn to $9.24bn between 2021-2022 - Skills emigration accelerating, particularly in critical sectors Mr. President, even you acknowledged in 2021 the need to review BEE legislation citing "concerns over corruption and abuse of the system". The evidence now compels action: - Investment Flight: Business confidence eroding as policies "discourage companies from investing in South Africa" - Skills Drain: Half of top earners and graduates considering emigration, with skills flight reflecting "racial contours exacerbated by Black Economic Empowerment policies" - Implementation Failures: Current systems enabling corruption while failing to deliver meaningful economic inclusion Our Country stand at a critical juncture - the current approach is failing both economic growth and meaningful transformation. Honorable Minister and Mr. President, history will judge you not by the policies you implement, but by the prosperity you created and the opportunities provided for ALL South Africans . The time for bold, evidence-based reform is now - by transforming from ownership-focused to participation-focused models, demonstrating that you can pursue transformation through prosperity rather than transformation despite poverty. This requires political courage to acknowledge what isn't working and strategic vision to chart a new course.	Ockert

	2025-07-08 09:15:06	Yes I do	Policy Direction	South Africa needs to promote economic growth and the ANC's economic policy over the past 30 years has not worked. Unemployment is at an all time high and DFI is at its lowest level in the history of this country. Poverty and joblessness is killing the spirit of South Africans and forcing our youth into crime to make ends meet. The level of criminality, theft, vandalism and general lawlessness is a direct result of the ANC's misdirected policy decisions. Until this changes we are just waiting for the next outbreak of looting and general lawlessness in this country. The black politically connected elite are stuffing their pockets with cash while they can while the average South African is suffering. Those that are productive are taxed to death and have to consider working outside of RSA to escape the burden. It is time to focus on growth initiatives and get rid of the discriminatory EE and BBBEE laws which are costly and benefit only a few. Open the economy and make it easier to run a small business. 	2025-07-07 19:28:05	Yes I do	Policy Direction	Proposed Policy Amendments Adoption of an Equity Equivalent Investment Programme (EEIP) for Starlink Amendment: Revise the Electronic Communications Act (ECA) to formalize and streamline the EEIP as an alternative to the 30% ownership requirement by historically disadvantaged groups (HDGs) for foreign telecom operators like Starlink. The EEIP should allow companies to meet B-BBEE requirements through investments in infrastructure, education, or community development instead of equity transfer. Details: Starlink could commit to its proposed R500 million investment to provide free broadband to 5,000 rural schools, benefiting over two million children, as a key component of its EEIP. Expand the EEIP to include subsidized internet access for low-income households, targeting those earning below R10,000 per month. For example, Starlink could partner with local organizations to distribute subsidized Starlink Mini kits (priced at ~R6,000 one-off) with low-cost monthly plans (~R500 or less). Require Starlink to collaborate with South African SMMEs for installation, maintenance, and customer support, creating jobs and ensuring local economic benefits. Benefit for Low-Income Individuals: Subsidized plans and community-focused investments would make high-speed internet accessible in rural and underserved areas, where traditional providers are often absent. A low-cost plan could be structured to fit within the budget of someone earning R5,000 or less, potentially costing R200–R300 per month. 2.Introduction of a Tiered Licensing Framework Amendment: The Independent Communications Authority of South Africa (ICASA) should introduce a tiered licensing system that differentiates between large-scale telecom operators and satellite-based providers like Starlink, with relaxed equity requirements for the latter due to their unique operational model (direct-to-consumer, no local terrestrial infrastructure). Fast-track the licensing process for satellite providers	Stanley	Gauteng		unemployed individual

	2025-07-07 14:43:18	Yes I do	Policy Direction	I support amending the BBBEE requirements in South Africa because the current regulations are discouraging foreign investment, which in turn limits job creation and economic growth. The government's strict BBBEE policies are hindering the country's development. When companies want to invest in South Africa, it should be seen as a benefit to the people, as increased investment creates jobs and stimulates the economy. Furthermore, South Africa has some of the highest internet costs in the world, which is unacceptable for a developing country. High costs and restrictive policies impede access to affordable internet, stifling growth in disadvantaged communities. We need more competitive markets to drive down prices and promote inclusive growth.	Robert	Gauteng		retired

	2025-07-07 14:22:16	Yes I do	Policy Direction	The BBBEE framework and requirements might have been well intended and justifiable at the outset. However, the experience over recent years have conclusively demonstrated that the policy did not benefit the vast majority of the needy citizens in the country but has rather benefited a small elite group of individuals. 	2025-07-07 14:15:09	Yes I do	Policy Direction	Nelson Mandela's famous statement, often paraphrased, is that he fought against both white domination and black domination, and he envisioned a democratic and free society where all people live together in harmony and with equal opportunities. He expressed that he had dedicated his life to this ideal and was prepared to die for it, according to the Nelson Mandela Foundation. This sentiment was central to his vision for a post-apartheid South Africa, emphasizing equality and the absence of any group's dominance over another. Although the ANC has deviated vastly from that by introducing BBBEEE, after 30 Odd years it is time to change direction and GROW this Beautiful Country where jobs for everybody are plentiful and the Country Flourishes. To do this we have to make doing Business attractive and not continue putting Road Blocks in the way of attracting International Businesses to South Africa. We have to change this and instead of discouraging them with Laws that make no sense, we need to start encouraging them specially after testing the Laws for 30 years and we only got worse. It very clear to everybody that this ideology does NOT Work. Lets start a NEW WAVE of positivity with JOBS FOR ALL by encouraging Business to come to South Africa and we ALL will benefit together in a bright future.	Nigel	Eastern Cape		retired

Just look at the state of our goverment, local municipalities and SOE's, the use exteranl consultants, corruption and theft of capital and stalled projects, beacons of failure. Using the law to change behaviour has never worked - ask the NATS! No BEE/BBBEE legislation with possible tax breaks for actual transformation will be more beneficial and also put more people of all races into employement starting the cascading effect of down stream employment. 	2025-07-07 08:51:23	Yes I do	Policy Direction	Regardless that we actually have a rainbow of staff colours and languages in our business, nobody should force anybody to have some sort of quota based on colour. We cannot operate our business under BBBEEE regulations and in fact do not need regulations, as unless somebody is doing something immoral or illegal, what is the need? This happens naturally on merit and availability of jobs. In all countries, worldwide, 80% of land belongs to farmers., because they farm. Up to 70/80% of folks worldwide live in urban areas and unless somebody intends to grow crops/food, then splitting up working farms for small plots is a huge threat to our food security (there is plenty of land from GOVT/bought from Private that this can be done with . it isnt either/ or...there is more than enough to make everybody happy but only ANC keeps shoving it forward as an issue....many African countries are starving. South African farmers feed them AND 100% of the folks complaining. Over these last years, ANC Government has cost us all huge losses...we cannot use Railways to freight our loads, Post Office failed meaning we were unable to send orders/hired private companies. Our electric failed, so we spent hundreds of thousands on solar (which they want to now tax (THEY failed us!!!) SARS owes us money, Government depts don't work very fast and waste our time/frustrating. Because of stupid policies like BE, systems have failed and cost us dearly! I do not care what colour somebody is but I do care that they can do their jobs and all of those R Trillions could and should have been spent on education/educations/education/colleges/ plumbing colleges, agricultural colleges/ better schools and better and more qualified people to teach. It was never fair in apartheid days to have job reservation for whites. Everybody fought hard and long for equality and equal rights..thats E Q U A L. What Happened ? Now 90% of the population has regulations against other 10% that arent quite black enough!	Nicholas	KwaZulu-Natal		business owner

	2025-07-07 07:21:59	Yes I do	Policy Direction	I was a teenager when BEE was implemented in 2003. Today, I'm 39 years old, and I can say with deep conviction: BEE did not benefit me — not as a woman, not as a person of colour, and certainly not as a young South African trying to build a future. Despite being classified as a female of colour, I was repeatedly denied opportunities because of my light complexion. I was even told, more than once, that I was "too fair-skinned" to qualify for roles meant to support equity. The very system designed to uplift people like me became another barrier. I was overlooked for university placements and job opportunities, not because I lacked potential, ambition, or qualifications, but because BEE had become a tick-box exercise — one that failed to see the full person behind the application. BEE did not break the cycle of poverty; it reinforced it. It helped a select few and left the rest behind. Today, our youth across all provinces are still struggling. Unemployment is high, and talent is going to waste. If empowerment was truly the goal, we wouldn't still be fighting the same battles decades later. It's time we talk honestly about this policy. BEE, in its current form, has run its course. We need a new system — one that prioritizes true merit, equal opportunity, and real transformation, not just surface-level compliance. South Africans deserve better. We deserve systems that open doors, not ones that decide our futures based on appearance or outdated frameworks. Let's build something that works — for everyone. 	2025-06-27 09:14:25	Yes I do	Policy Direction	I am in full support of londg overdue, educated amendments to the abused BBBEE policy of the ANC led dispensation which severely lacked competent oversite to protect and safe guard our fiscus from suffering severe losses. The fiscus neccessatates prudent medium to long term financial foresite in order to sustain any programe or project with BBBEEE is no exception. In the past 3 decades, it has been proven, that policies have been enforced and furthered with no diligent analysis of the impact it would have on our economy. National policy is important, but, the needs of the population should never be disregarded by national goverment. Goverments are voted into power because constituencies feel that they will rule competentely. With much power comes great responsibilty, these are wise words which have been diliberately removed from foundationational learning in order to perpetuate ingorance and incompetence within our growing society. 	2025-06-26 14:29:51	Yes I do	Policy Direction	Removing BBBEE to allow Starlink to operate is beneficial for all. Not only does it provide a good service but will lead the way to raise actual equality for businesses in South Africa instead of having lowered the bar to the point that it is at currently. It is evident that over 30 years, BBE/ BBBEE doesn't work and focus should be on proper education and changing the mindset of the "previously disadvantaged". We can't move forward if people relentlessly hold onto the past.	Greg

	2025-06-26 12:22:28	Yes I do	Policy Direction	I think this is a very good idea , and I think the government should look at other parts of BBBEE and change them , for as far as I can see it is just a feeding trough for the corrupt in power to install their mates wither they can do the job or not. Elon Musk has stood his ground and I support him, reason being why should he give away 30% of his money to people who do not know anything about the systems he has designed and built. This should be looked at with other business's , as many who have BBBEE installed, are failing because the people do not have the expertise to run them and have to be bailed out by the TAX payer. 	2025-06-25 21:15:11	Yes I do	Policy Direction	South Africa economy is hostage to many threats (political, technology, social) after the democratic elected government in 1994. This government have only allowed companies that will enrich pockets of politicians and Africans to operate locally. Many of these satellite companies only broadcast the suffering of Africans not suffocation and murdering by Africans the white people and looting, corrupting, theft, vandalism, sabotage, assassination etc of Englishman assets in RSA. Currently there are many satellite companies in RSA but still data cost is very expensive. These companies slowly network and expand their infrastructure only to keep data cost expensive. Limited number of household have access to uncapped wireless networks. Only Banking industry have allowed data less Banking. Elon Musk Starlink is welcome by me British governor, Banks are hostage to Cybercrime, Digital Banking has crippled mining sector. Today there is hallucinations on Bit mining allowed by Kleptocrats. USB in future will be more worth than 1kg Gold. Starlink is connected to the world especially UK Nation. Elon musk is a business man and cannot enrich politics 30% while business, schools, households cannot subscribe for uncapped and free data usage. Railway has been hostage to theft of copper, having Starlink on board some assets can be functional using wireless technology minimize copper theft. Fraud is everywhere many companies have card machines than providing data coverage to households. They introduced smart TV but the worth being connected to the internet is very high. Covid-19 has shown that virtual reality can be successful in every industry connect the world instantly, but Africans still want to shake hands physically and book flights, spend every penny of white man my father. 	2025-06-23 20:51:43	Yes I do	Policy Direction	The Current BEE program has been a disaster! Employment decisions based on color, rather than skills or experience, has led to non-productive business, many of which have gone under, or international backing has pulled out. So, the drive to employ more black people has backfired resulting in fewer having employment, and an international distrust in our country. Foreign investors have no confidence in our current work ability. Employment needs to be based purely on skill and experience. The best qualified people who will run the company, attract foreign investment and growth. By doing this, more jobs will be created (for black people). If a form of BEE remains, it should be aimed at education and training, but that person must do the work and take the opportunity given them. But if that person doesn't perform, they cannot be given the job purely because of their color. For our business and economies to grow, the best person must get the job. Prosperous businesses with international investment and growth will help many more black people to uplift themselves and the current disastrous policy.	Neil	Gauteng		self-employed

	2025-06-23 18:54:34	Yes I do	Policy Direction	It is high time BBBEE be seen for what it has achieved - a backward economy that has benefited a handful of connected individuals instead of empowering the disadvantaged citizens. Should BBBEE remain, there is in all likeliness that the South African economy will enter a point of no return, becoming a failed state that allows our democracy to be taken over by a foreign nation. 	2025-06-23 15:46:19	Yes I do	Policy Direction	Proposed Policy Direction on B-BBEE Requirements in Telecoms Sector Dear Sir, Thank you for sharing the invitation and the important information regarding the draft policy direction that could potentially remove B-BBEE requirements in the telecommunications sector, particularly in relation to Elon Musk's Starlink gaining local operational access. I fully understand and support the foundational intention of the B-BBEE policy—to empower historically disadvantaged South Africans and ensure that local citizens are not sidelined in the face of international corporate interests. However, we must also acknowledge the reality: the implementation of this policy has, over time, deviated from its original purpose. Instead of broad-based empowerment, it has often been used to benefit a connected few, while millions of ordinary South Africans continue to face economic exclusion and limited access to global innovations and services. In this specific case, I am inclined to support the proposed policy direction to the Independent Communications Authority of South Africa. Enabling Starlink's entry into the local market would not only enhance connectivity—especially in rural and underserved communities—but could also contribute to economic growth and greater digital inclusion. That said, the removal or revision of B-BBEE requirements should be approached with caution and transparency. We must ensure that transformation is not abandoned but reimagined in a way that truly empowers the broader population rather than serving narrow interests. I will be submitting my comments on the participation platform as encouraged, and I will also share this opportunity for public input with others in my network. Thank you once again for engaging on this important issue. Warm regards, Elton Visagie, 0685414620 elton.visagie@gmail.com	Elton John	Gauteng		business owner
	2025-06-23 15:35:03	Yes I do	Policy Direction	I believe that we have had work protection and protected employment long enough. The country needs to move forward and we need the best people for the various jobs in those jobs right now, to save the country!! Enough of corruption and mafia like controls, we need jobs for South African people. We also need to relook at the dismal education system and get the basic education level up to a standard that allows people to be be meaningfully employed. 	2025-06-23 15:18:32	Yes I do	Policy Direction	This is an example of the short-sightedness of Ownership and BBBEE policies. If Starlink is brought into the country, especially with regard to rural areas, millions of people will be empowered with connectivity. This will stimulate entrepreneurship and drive and grow the economy for the benefit of all South Africans. Of course, the cronies who would have received ownership and those receiving kickbacks from cronies will not benefit. These is fundamentally the baseline battle for those who want to grow the economy for all, and those who simply want to enrich themselves.	David	Gauteng		business owner

There is no easy path through the labyrinth of trails that takes us to the place where we supply a useful service and receive an appropriate reward for our service. It's not what society can do for you; it's what you can do for society that counts. It's what was wrong with apartheid. Now it is happening in reverse; we need to catch a wake-up. 	2025-06-23 12:15:47	Yes I do	Policy Direction	I believe Starlink should be allowed to operate in South Africa without being subject to the BEE structure. I support Elon Musk's stance on this issue. Furthermore, I believe that the BEE legislation should be reconsidered and ultimately removed. The BEE structure has become a negative barrier to economic growth and job creation in South Africa. The BEE requirements discourage many South Africans from starting their own businesses, especially those who do not meet the racial criteria. This has led to lost opportunities for entrepreneurship, innovation, and employment in our country. Removing this race-based law would empower more individuals—regardless of background—to pursue business ownership, which would have a positive and direct impact on reducing unemployment. 	2025-06-23 11:39:35	Yes I do	Policy Direction	Ek is nie 'n voorstaander van die rigiede toepassing van BEE nie. Dit is absolute snert om van 'n buitelandse belegger te verwag om eienaarskap te deel of weg te gee aan plaaslike entiteite of mense sonder dat dat hulle teenprestasie lewer of gelewer het. Vir my gaan bemagtiging om mense te bemagtig met vaardighede en die ontwikkeling van entrepeneurskap. Eers daarna volg fisiese eienaarskap. Die tragiese feit is: hoe kry jy dit reg met jongmense wat uit 'n gebroke en disfunksionele skoolstelsel kom en met swak tot byna geen begrips- en rekenvaardighede nie? Begin by die begin. BEE vir buitelandse beleggers kan onder andere beteken dat hulle 'n skool of skole aanneem. So wit-uitsluiting is inherent teenstrydig met amptelike beleid. Prakties laat dit toe dat ras eerste prioriteit is vir aanstellings en kontrakte, wat veroorsaak dat nepotisme insluip. Somehow equity for previously disadvantaged should be considered on a merit basis. Prove your worth and that equity will be delivered. Currently BBBEE guarantees equity to the previously disadvantaged BUT in the majority, it’s not benefiting the unemployed and uneducated. It’s benefiting a VERY FEW individuals who have been benefiting for the last 30 years and I believe they should no longer be considered “previously disadvantaged” as the poor unemployed. Maybe different levels of disadvantaged could be considered and “weighted” accordingly? And why should the equity percentage be 30%? 	2025-06-22 11:40:29	Yes I do	Policy Direction	BEE is a propped up and false generation of an upper class of business management, among other failings, it creates managers without skills, companies without resources, it forces people who dont have the skills and experience to walk before they can crawl, and so it fails, becoming an enrichment tool for the elite and in so doing, aggravates the problem and widens the gaps	Donald	KwaZulu -Natal		retired
	2025-06-22 11:38:57	Yes I do	Policy Direction	I am against BBBEE. It has achieved the opposite of what it aimed for. Unemployment has increased. 	2025-06-22 11:38:15	Yes I do	Policy Direction	The persistent stagnation of South Africa's economy, coupled with escalating unemployment, signals the failure of current BBBEE frameworks to deliver substantive, broad-based empowerment. The existing licensing requirements are an obstacle to innovation, investment, and economic inclusion - ironically undermining the very transformation they claim to advance. Enabling Starlink to operate without this structural impediment is not a concession to foreign interests; it is a strategic move toward economic revitalization and technological access. 	2025-06-22 11:31:47	Yes I do	Policy Direction	The economy of South Africa has been stagnant for years, and unemployment figures keep rising. From this alone it's evident that the current BBBEE policies are not working and are more likely actually worsening the situation, all the while benefiting a small elite sector of the population..which is in no conceivable way 'broad based'. It's time to revisit these outdated ideas and come up with a better strategy for actual broad based inclusive growth. A necessary starting point is to first and foremost grow the economy. 	2025-06-22 11:14:51	Yes I do	Policy Direction	Access to reliable internet is a fundamental enabler for economic and social development. Starlink's satellite network has the potential to bridge the digital divide by empowering black-owned start-ups and small, medium, and micro enterprises (SMMEs) in remote areas. Supporting these SMMEs is fundamental to closing South Africa's unemployment gap, as they are key drivers of job creation and economic inclusion. A single Starlink satellite installation can provide public Wi-Fi coverage to entire rural communities, delivering critical access to education, employment opportunities, and digital resources where they are most needed. By adopting a more flexible regulatory approach—particularly regarding local ownership requirements—South Africa signals its commitment to embracing innovation and fostering global partnerships aimed at delivering essential services to underserved regions. 	2025-06-22 11:01:53	Yes I do	Policy Direction	BEE and its extension, if not corrupt from the outset, were a 'good intention' that has 'paved the road to Hell'. Hence, before we get there, in the sense of complete economic decline, we need to change direction fast in order to encourage the retention of qualified citizens and investment, both local and foreign. Unemployed at our levels is perilous, we have to reverse it. If Starlink comes in under the conditions demanded, and it is a success, it may set a precedent for a more practical approach to development emphasising merit where it is most needed. That has been evidenced in the GNU and it should be extended to all sectors.	Robin	Western Cape		retired

	2025-06-22 10:23:47	Yes I do	Policy Direction	This would be good for the country. If there are less hurdles and less businesses being forced to give 30% of their companies to someone who does not have the passion for the business, have the necessary skills to run the bisiness or have contributed little to nothing in the form of either money or time to grow the business. More people will be willing to start new business which will lead to more work, more employment and a better economy for all South Africans. As long as government keep their noses out of the day to day running of said businesses. But I think their should be some rules on who can be employed (South Africans first) and what would be fair and livable wages for unskilled and skilled workers. Our unions have been causing to much problems when it comes to this with protests and riots where unskilled workers feel the must have the same salary as a trained professional. Bring in more opportunities for upskilling and thus empowering the people of this country. Also so grants should be given to old, destituted, and poor, those that is not of retirement age should provide proof that they have tried to find work. If everybody gets grants nobody would want to work unless we cultibate a mindset of productivity and responsibility amongst our people.	Jakobus

	2025-06-21 10:22:08	Yes I do	Policy Direction	I support Starlink's commitment to providing high-speed internet in South Africa as a legally compliant company. While ICASA's 30% local ownership requirement conflicts with Starlink's global operational model , I acknowledge that South Africa's Electronic Communications Act and the B-BBEE ICT Sector Code offer Equity Equivalent Investment Programs (EEIPs) as an alternative. EEIPs are successfully implemented in various sectors, including pharmaceutical, manufacturing, banking, and technology, with companies like Microsoft, IBM, and Amazon utilizing them. I support the recent policy directive urging ICASA to align its licensing regulations with B-BBEE laws to recognize EEIPs. This alignment would enable Starlink to provide internet access, especially to rural areas. Starlink proposes to offer over 5000 rural schools fully funded Starlink kits and service, with local South African companies facilitating installation and maintenance. This initiative would significantly contribute to the SA Connect objectives and benefit millions of schoolchildren. I believe satellite internet is crucial for expanding access to hard-to-reach areas. Recognizing EEIPs aligns with the B-BBEE Codes of Good Practice for multinational corporations and will attract investment in ICT. We urge the progression of this policy directive to allow Starlink's operation through EEIP recognition, fostering education, opportunity, and a brighter future for South Africa. In the case of telecoms, we will ultimately create negative outcomes by having affirmative action requirements, as we will not be able to participate in the positive network effects of allowing companies like Starlink to operate here. Its also silly to have restrictions on using a foreign internet provider when we are happy to allow South Africans to buy foreign internet-based services of all kinds without restrictions. We got stuck in and are still working to guarantee at least a quiet retirement soon. We got no handouts. We were under privileged. The government is still reminding us that there are still so many under privileged people and sportsman after 31 yrs. How come? There are many who have stood up and made a life for themselves. Why should we, the minority, help people who are not interested in helping themselves. We cannot keep on stirring the pot, when, what is in the bottom, does not want to come up! London alone has over 700,000 qualified young black and white and if you think this is bad the total world wide is calculated at around three million plus . These are all adding great value to other economies with many starting their own successful businesses and employing people . BEE must go to stop the poor getting poorer and the jobs get less and less . We have just seen Mercedes close its doors because of this policy and how many others will go when in fact to get employment going you need more of these Companies to come and invest here . Unless government is prepared to acknowledge their money grabbing, racist policy and that it does not reach any person in need of work, irrespect of colour, nothing good will happen and that the lazy South Africans should start working for their money and not float around, do nothing and still get a huge salary with perks, but do not contribute to anything to the "job" they are holding in government, They are firstly communists, racist and liars and have a sence of entitlement. It is about them instead of being what is good for the country. I have many instances where black people told me that they were better off in the old South Africa. Unless they have a change of attitude, this GNU will also fail and the whites are the ones that are sold old everytime. The whites and the very poor. Unless the accept that the world moves on and it is outdated to pray to your ancestors etc, instead of doing what Jesus died for, we have no chance of achieving anything good on the long term. The idea is to get all resources as cheaply as possible benefitting the global elite cabal and its agents in government and corporations at the behest of an impoverished, unskilled, government dependent (socialistic), enslaved and divided peoples of South Africa. 	2025-07-10 10:00:09	Yes I do	Other	BBBEE is , by definition, a racist policy. You do not EMPOWER people, but first disempowering someone else. For 100 years, South Africa had the largest economy in Africa. With damaging policies like BBBEE, we slipped to #2 a few decades ago, and then, to #3, behind Nigeria and Egypt. With an economy R1 larger than Nigeria, we would have 1 million jobs..... BBBEE , the way it is structured and works, is a catastrophic failure. BBBEE , should be scrapped completely on all levels, and let the country grow and create jobs. We must CREATE new products and services that the world cares about. 	2025-07-10 08:39:50	Yes I do	Other	In 30 years the BBBEE policy has had no positive effect on the country. In fact, unemployment has worsened and it has stifled international investment in the country. Changes in business ownership have only benefited the already elite. The average citizen is worse off than before. Education is the key to upliftment of the country – and that education must be from early childhood. The government's focus on matric results is ridiculous. The focus should be from pre-school – it's too late when a child is in matric. By sorting out the education in the country, people will find employment and it will be possible for employers to employ workers on merit instead of trying to fill jobs to achieve BBBEE points. Get rid of this policy and watch the country grow.	John	Eastern Cape		business owner

	2025-07-10 08:20:44	Yes I do	Other	The concern I do have with the policy is that there is a stipulation relating to investment in EEI'ps. Instead of having to give a 30% shareholding to previously disadvantaged people, Starlink will be able to invest in so-called equity equivalent investment programmes (EEIPs). The big problem I have is that the current black school goers are no longer disadvantaged. They were also born way after 1994. This policy would mean that the state is creating another layer of disadvantaged people, being those white children who will not benefit equally by this directive. It is time to scrap BBBEE completely and there must no longer be indigenous privileges either, as we are all supposed to be equal. Is that not what we supposedly agreed to by saying yes in 1992? The other point is that the black "elite" and their corrupted Private Partners are the only ones that are the sole beneficiaries of policies like this.	Dianne	Gauteng		retired

	2025-07-10 07:21:57	Yes I do	Other	What's Currently Blocking FDI: South Africa's B-BBEE Act already allows Equity Equivalent Investment Programmes (EEIPs) for multinationals. But ICASA's outdated licensing regulations still require 30% local equity ownership, without recognizing EEIPs. This creates a regulatory contradiction, discouraging foreign companies from entering the ICT market — especially those with global operations that can't relinquish ownership stakes. What Happens If the Alignment Goes Through: Multinationals will gain regulatory certainty — knowing they can enter South Africa legally via EEIPs. FDI will increase, especially from: Global telecoms (e.g. Starlink, possibly OneWeb, etc.) Cloud service providers (AWS, Google Cloud) Digital infrastructure companies (like data centers, fiber optic networks) Local partnerships and job creation will increase, since EEIPs usually require working with: Local SMMEs Educational and skills development programs Rural deployment initiatives Broader Economic Impact: More internet access → More startups, e-learning, e-commerce, rural upliftment. Tech infrastructure expansion → Attracts investment across sectors (banking, logistics, education). Investor confidence grows due to clear and harmonized regulation. 	2025-07-09 17:35:29	Yes I do	Other	Considering the entrenched delays in South African policy processes, I'm deeply concerned that under the proposed EEIP route ICASA's amendments could take 12–18 months to finalize—and even longer to implement. While transformation targets remain vital, postponing Starlink's entry leaves our most vulnerable communities cut off from affordable, reliable broadband. Key Concerns Protracted timelines will widen the digital divide, as rural and low-income areas wait for basic connectivity. EEIP commitments without firm milestones risk becoming box-ticking exercises rather than real infrastructure rollouts. Lack of interim pilots or provisional licenses means no tangible benefits until full regulatory approval—often years away. Recommended Safeguards Expedited Rulemaking: ICASA should publish draft EEIP regulations within 60 days and finalize within 6 months, not the usual 12–18 months. Provisional Pilot Licenses Grant 12-month trial licenses tied to clear rollout benchmarks (e.g., percentage of rural districts covered monthly). Milestone-Based EEIPs Require binding EEIP schedules with quarterly progress reports, penalties for non-compliance, and public disclosure of spend versus targets. Community-Led Partnerships Mandate collaborations with local co-operatives and municipal broadband projects to leverage existing towers, backhaul links and community trust. Oversight and Accountability Establish a joint Ministry–ICASA task force to monitor EEIP delivery, publish biannual scorecards, and fast-track corrective action if timelines slip. Without these guardrails, we risk another round of policy inertia that leaves South Africa's poor further behind, even as global players like Starlink stand ready to bridge our connectivity gap. These people often do nothing other than appear as a face, raking in a fortune for doing nothing. The onus is on the rest of the company to support themselves as well as the hanger-on. Many White or people of other races are being discriminated against in certain industries, as they are now reserved for Blacks only. Our Municipalities is one example - and they are in a mess, as most of those employed are employed on the basis of colour and not on whether they are capable of doing the job, so they do nothing as a result. The worst example is the accounts departments at the municipalities. Problems go unsolved for up to 7 years or more, with no resolution. this situation is making investment from overseas companies an impossibility, as South Africa has too many pre-requisites, and legal requirements that are simply impossible to fulfil. 	2025-07-09 10:33:25	Yes I do	Other	BBBEE has had no positive impact on GDP Growth in South Africa in the last 30 years, infact I believe it has chased away foreign investment. Economic growth is much more important that excluding certain population groups from the work force. We are losing more and more highly qualified individuals of all ethnic groups to other countries and instead of creating an environment of growth, we are inhibiting growth. SA needs GDP growth of 4%, sustainable. There is not enough capital internally to achieve that. If the SA economy grows at 4% there will be enough opportunity for all its citizens. The JSE, 15 years ago had more than 650 listed companies, today less than 450. Unfortunitely if you exclude certain groups from the work force or have a quota system for shareholding amongst colour lines it constraints investmnet and is a discrimitatory system, something we are trying to get away from. Discrimation and unequal opportunity limits capital and international investment. Instead of building new large companies and industries, the SA government is limiting expantion through BBBEE legislation. There has been past injustices which needs to be addressed. I believe in equal opportunity for everyone. The past 30 years has proved the BBBEE in its current format is not working. A new solution needs to be found.	Jacques	Gauteng		self-employed

	2025-07-09 07:54:34	Yes I do	Other	In general the BBEEE is a destructive policy for economic growth and development. There is no drive to expand companies due to the fact that the moment your company hits 50 employees, you’ll have to give 51% of your shares to someone who is not your partner. Therefore people will try to keep their companies small. With regard to foreign investments, who in their right mind is going to give 30%-50% of their shares to a stranger just because the law says so. So large international companies will stay out of South Africa and not support economic growth. Third, it will sustain corruption. Company owners will seek ways to avoid the law and one way is to pay off officials to avoid checks and controls. It’s an overall dumb law which does not help anyone, except for crooked politicians who get shares in big companies, because the law says so.	Richard	Limpopo		retired

Transformation is essential, but it should be implemented in a way that encourages innovation and broad-based participation, not just through equity ownership but also through skills development, enterprise support, and socio-economic contributions. I support a model where transformation is non-negotiable, but also flexible enough to accommodate different business models and stages of growth. Equity-equivalent programs, mentorship, and partnerships can be powerful tools for inclusion—especially for startups and tech disruptors that may not yet have the capital for equity restructuring. Let’s work toward a regulatory environment that is both transformative and enabling—one that encourages all South Africans to contribute meaningfully to a more inclusive digital economy. The BEE policies don't assist productivity and don't have any benefits besides corruption, and nepotism. The best outcome would be to appoint the best person for the Job and not reverse discrimination to minimize the white, Indian and colored communities, respect is nonexistent because the wrong people are appointed in positions purely because they are appointed on skin colour. One option will be to put 26% of a business in an Employee Trust and all staff share in the profits of the business and not having a few black people in token appointments that don't know how to do the work and also start a mentorship program for middle and senior management with outcomes and specific information. However I am concerned about how the politicians who are already advantaged and have risen to "elite " status via corruption may use devious means to derive financial benefits from the exercise . The 30% ownership demand is a no go as the poorest will NOT benefit in any financial way . White people want black people to succeed. We know that an educated, happy workforce is good for everyone. However the government does not know that. They think creating laws that exclude whites from the economy will somehow make all blacks wealthy, educated and productive. 	2025-07-08 15:12:50	Yes I do	Other	We need to ensure growth and development in South Africa. Our economy has to grow without unnecessary limits and regulations that curb growth. We cannot attract investment as long as investors are dictated to, as to who they may have as equity partners, employees and the like. Restrictions which do not allow free and unfettered growth (such as BBEEE policies) are not a positive influence on the economy, and do not encourage South Africans to get educated and become contributing members of society. There are other more appropriate ways to do this. Remove these shackles and allow freedom to every SA individual to get up and make a life for themselves! 	2025-07-08 14:54:57	Yes I do	Other	BEE is the perfect tool for the rich. Similar systems have been implemented in other parts of the world, such as Malaysia, with the same outcome: failure. One would expect the gap between the rich and the poor to have noticeably shrunk, but the opposite have in fact happen. After three decades of ANC rule, the gap between the rich and the poor have in fact increased. And despite all their failed policies, as well as their shrinking support base, the ANC led Government of National Unity, continues down the same downward spiral. Enriching the well connected rich with more riches by means of the BEE system. This is why the economy is not growing. Services are not being delivered. And no redress is taking place. There are not even any skills being transferred by means of BEE. And the only solution that the government has, is more aggressive BEE policies. Our totally de-railed SOE's are a prime example of what happens when the wrong hires are made to positions without having the necessary skills for the job. What really needs to be focused on is improving education opportunities so that we have an even playing field of properly educated job-seekers, where employers can decisively hire based on skill, regardless of colour/ creed. BBBEE is standing in the way of investment. BBBEE is unduly discriminative and it diminishes Black citizens’ own contribution. The policy is proven not to work. Some of the brightest minds in SA are black people and they do not need to be legislated into work, they have earned the space for themselves. There will be no transformation is there physically is no work. If there there is no work there are no positions to fill. It is the same with every industry. Black and white people have been sharing the work space for 3 decades and the average citizens have moved on. These policies seek to tell black people that they are not worthy and that they can not do it themselves.	Marius	Gauteng		employed individual

	2025-07-08 08:00:23	Yes I do	Other	While the original intention of black empowerment policies is to rectify historical injustices and promote equitable opportunities, concerns may arise when these initiatives are not implemented thoughtfully or fairly. Critics argue that certain empowerment efforts—if overly rigid or broadly applied—may inadvertently foster division, reinforce racial categorization, or create resentment among other groups. For example, in the context of business or employment, policies that prioritize race over merit or skill can lead to perceptions of unfair advantage and reduced morale. Furthermore, there's the risk that empowerment programs may be captured by elite interests, benefiting only a small segment rather than truly uplifting the broader community. For long-term societal cohesion, it's vital that empowerment initiatives are transparent, inclusive, and tied to broader goals of shared prosperity and unity.	Christa	Gauteng		employed individual

By my account it hasn't and will not so rather start giving the job to the person that is best qualified,has the most experience and has passion for the job and therefore creating a good and healthy competition for the job then you know it will be done very well and therefore also make the company stand out and proud and so make a positive contribution to the economy instead of wasting time and money to try and develope a person in a position that the person didn't even want or got just because the person met the correct BBBEE criteria and takes the Job for granted and is then a burden instead. 	2025-07-07 17:44:01	Yes I do	Other	as much as we all have experienced , BEE/ BBEEE has in fact destroyed our once stable and growing economy. the right of entitlement by the south African government has left many companies closed or on the verge of closing. truth be told the south African government in their failure to acknowledge their own failures ,by blaming it on the apartheid era has basically killed this young democracy in its young adulthood. 30 years and a once operational country is now crying out for mercy. how many investor has been turned away? how much more does this government want to rape this country of? where would this country be in terms of economic growth if the people we had in control were not there now? like our foreign investment minister say:" if they don't want to invest according to our rule , they can take their investments and leave". is this the ignorant kind of leadership we need in this country? its only a matter of time before Elon Musk sees the true nature of the beast in the south African government. the only thing that remains to be seen is will this be beneficial enough to starlink and the people of this country . what will the powers that be demand for the continuation of starlink? how would it benefit them because historically they have to gain something personally. 	2025-07-07 13:16:06	Yes I do	Other	BBEEE Has ruined this country and its people. Filling leadership places with quasi unqualified people has seen the country economy as a whole, deteriorate horribly!!! Look at the curruption from unethical, unqualified, people. The solution is to ban and abolish all race and gender laws and allow for free economic growth. The secret is apprenticeships like training people in skills who earn a minimum wage. With the old government, I remember having to train many staff members for two years and then they were free to leave and choose their own way. More entrepreneurial facilities post matric is needed for on hand training aligned with skills training in ALL fields. This allows for freedom of choice in a country, building skill instead of government funding mass entitlement. God said that we should each WORK by the sweat of our brow for our bread! Teach the people this principle and watch the economy grow and the country thrive. No longer five people doing a job, one working and the other four watching him work! Work builds dignity and happiness and facilities for apprentice education will provide that. Use the older people with the skills and knowledge to train people. That is the way to go! This BBEEE RUBISH HAS DESTROYED ALL CITIZENS IN THIS LAND for both growth and happiness. Idle people looking for government handouts are NEVER happy people.	Carol

	2025-07-07 11:00:10	Yes I do	Other	In the short term, changing the policy is beneficial not only for Starlink but also for other companies. Ultimately, BEE, etc., is a hindrance in its present form, as social engineering can never function effectively in a free enterprise system. I certainly would not consider investing in South Africa under such rigid requirements and red tape, especially when other countries go out of their way to welcome investors. Until we remove these roadblocks, South Africa's industry will continue to decline, and there will be insufficient tax revenue to support the population and fund infrastructure renewal. Regarding Starlink, the reality is that this medium can provide connectivity to underserved geographical areas of South Africa quickly and efficiently. Furthermore, the world is changing, with growing threats such as undersea cable disruptions and possible long-term blackouts. Starlink offers the most cost-effective backup for the country. From a strategic standpoint, South Africa should not allow itself to be held hostage by the fallout from hostilities in and around Europe or any other region with which we are currently linked. The loudest voices of opposition come from other companies in the communications industry, as they resent market disruptors. They know their captive audiences and profit margins will be threatened—but that is the natural outcome of competition.	andrew	Western Cape		retired

	2025-07-07 10:26:44	Yes I do	Other	As a 34 year old South African i do not support the BBBEE policy. That policy was never brought in to help previously disadvantaged people, it was put in place to benifit a small group of ANC members. All the money that was intended to help the poor and disadvantaged comunities were just shared among 100 ANC linked people. How many low cost housing projects were abandoned due to corruption and fraud where the money was just stolen and culprits was not brought to justice, all because of BBBEE. Bringing Mrs Musks starlink to SA will help our economy immensely and provide internet access to the people in need. For that to happen they must throw the BBBEE policy we have at the moment in the trash and abolish it same time, we need policies that provide every South African with equal chance to provide for their families. When it comes to applying for a job, there should not be any discrimination against skin colour, cultures or religion. 	2025-07-07 08:26:51	Yes I do	Other	BBBEE should have been abolished ages ago. We have killed free enterprise in this country and kept ineffective, unqualified people at the hand of handouts to the tunes of millions of rands on the basis of the colour of our skin and look how beautifully that has helped corruption and greed in our country to an extent that I am not sure we can ever recover from. 	2025-07-06 19:02:51	Yes I do	Other	Racial transformation and equality in education and employment is vital to redress the legacy of apartheid and its injustices, including the removal of the possibility of generational wealth and social and economic advantage for black South Africans. However in this case, I Starlink will help the poorest South Africans and so an exception should be made to the B-BBEE system. Transformation should also be elevated in other areas as well as B-BBEE - it is clear it is not doing enough. Public education needs to be improved right from kindergarten level, so that Black South African children have a good foundation for their education. Government must ensure proper nutrition for poor South African children so they can grow healthy and strong and do well at school. Adult education programs are needed. Trade apprenticeships are needed to give people useful skills so they can build business and make a living and support their families. All of this is vital - B-BBEE alone cannot do this. Without all of this, B-BBEE only helps the few, not the many. We need to be looking at transformation strategically and addressing things on a case-by-case basis.	Sarah			employed individual

	2025-07-02 17:29:52	Yes I do	Other	ALL racist laws (all 142 of them), and especially BEE must be repealed and all South Africans must be treated equally and have the same, equal opportunities. We need to encourage business development to counter the ever rising unemployment rate. White people can also successfully establish and run businesses and employ people. Instead of making it more difficult with this tired old "redress" crap, government should be going out of their way to encourage businesses, including international ones. Whites (and I am one of them) will not establish a business if you're forced to give 30% of it to some random black dude under the guise of "redress". Redress has reached it's sell-by date. 	2025-06-30 11:49:16	Yes I do	Other	When we look at how certain BEE appointments have harmed not just our economy but the country as a whole, it’s clear — we need laws that are fair to everyone who wants to work! To those who work hard, honestly, and help grow the economy. The frustration is real — many deal daily with employees who had every opportunity to upskill but instead waste time, slack off, lie for extra leave, or expect special treatment. That’s not how a country prospers or how an economy grows. Jobs shouldn’t fall into your lap because you have connections to government or are someone's relative or partner. Growth comes from commitment, honest work, and real effort. It’s time to change the system — to create opportunities based on merit, not connections! The draft policy direction from Minister Solly Malatsi could finally open the door for Starlink in South Africa. Reliable, affordable internet — especially for rural and underserved areas — is badly needed. The 30% ownership rule has been a big hurdle, but hopefully, this policy strikes a balance: protecting local transformation goals while allowing innovation and global players like Starlink to invest and improve connectivity. It’s about time we prioritise both access and empowerment.	Ursula	Gauteng		business owner

	2025-06-26 17:07:32	Yes I do	Other	Starlink has serious operational challenges in the South Atlantic as a result of the South Atlantic Anomaly - low earth orbit satellites (leo's) cannot operate efficiently inside the van Allen belts, it will have to assign special orbits higher than the normal leo orbits. Can it sustain a sudden increase of subscribers in this area at a reasonable cost. BBBEE is just an excuse not to launch. Starlink's approach is economically rational but technically pragmatic rather than optimally engineered for SAA conditions. They're betting that: Market acceptance of occasional SAA-related interruptions is sufficient Constellation redundancy can mask most performance impacts Rapid satellite replacement is cheaper than custom hardening Regulatory market access justifies the investment despite technical limitations The reality is that South African users will likely experience measurably different performance during SAA passages, but Starlink appears willing to accept this trade-off to enter the market cost-effectively rather than engineer a premium solution for a relatively small subscriber base. It has fovoured rich elite black politicians and their connections to the detriment of the whole South Africa. It has caused the employment on the basis of race only , and not competence.This has resulted in State -owned companies , and now extended to private companies , of employing incompetent people , and caused the downfall of many of them .i.e Eskom, Post Office, SA Railways , etc. It also does not teach the right values to the so-called "previously disadvantaged "(although through te racial laws have actually been the "advantaged" to acquire skill and competence , but rather stimulated complacency, mediocrity, incompetence , and corruption. It is schocking that this unfair policy has prevented good Internet connection to so many South Africans through Starlink . We should be thankful and proud that a brilliant ex-South African had the ability and will to provide great Internet connection throughout South Africa across all borders and shouls accepte it on Elon Musk's terma immediately . 	2025-06-23 13:15:13	Yes I do	Other	My response here has absolutely nothing to do with Starlink - it has to do with the fact that for the last 30 years our elected government has been stealing from social development and education budgets while for example as per published works ; such as in just Zuma's second presidential term which led to corruption costing the economy an estimated R1.8 trillion (1 800 billions) (Macsut, 2022; Rakolobe, 2019; Sekhaulelo, 2022) - and today we now only have 1.4 - 1.6 million out of 34 million working aged adults (google it for multiple sources) that have a tertiary university level education... Do you not think that as this is the population (+-2.5% of the entire population- (1.5 mil/59 mil ppl x 100) that every man and woman regardless of colour with such education level should be empowered to either employ the uneducated and unskilled masses (32.5 million of 34 million adults) - or be employed and contributing regardless of colour? This policy has enriched a few and absolutely killed our economy - and FYI if it were properly implemented then, as 58% of these graduates are women, then all roles requiring qualified people would be fulfilled by women and cupcake thinks he has time to joke and continue the charade? His concern is for himself and those that benefit from its improper implementation to the benefit of the masses... and I reckon a fear driving the abolition, and alternatively we should demand that its actually properly implemented. 	2025-06-23 12:09:18	Yes I do	Other	Inclusion isn't just about ticking a BEE box—it's about justice, access, and purpose. We believe that the digital future of South Africa must reflect the principle that to whom much is given, much will be required.. Those who carry the capacity to widen access must also carry the responsibility to do so with integrity and inclusion. Starlink has the potential to reshape South Africa's connectivity landscape. But to truly serve our nation, this must be more than technological disruption—it must be economic restoration. It must uplift the underserved, reach the unreached, and empower the excluded. Small ISPs were born for such a time as this. We carry the heart, the hands, and the hyper-local insight to bridge the gaps that have long gone ignored. We believe that access is a justice issue and by design is never passive—it's participatory. We call for a model where local ISPs are not sidelined but strategically partnered with Starlink—to extend reach, deliver service with care, and ensure that the people on the margins are not left behind in the name of progress. Because true empowerment isn't just about who owns the signal—it's about who shares it - irrespective of race, decree, religion or history.	Roxanne	KwaZulu-Natal		business owner

	2025-06-23 11:48:40	Yes I do	Other	My concerns are all of the above mentioned. Every person needs a fair chance to do the job they were trained and schooled to do. White people does not get any job in south africa instead they give it to a black persons without any expertise , experience or skills. Which is unfair and that is one of the reason why most companies went bankrupt. We have seen that BBBEE has created a means for corruption and in no way sorted out the inequality problem. On the contrary, there is more unemployment, and the country is falling apart. It needs to disappear and those who can do that job, must be given the job. 	2025-06-23 11:37:44	Yes I do	Other	Forcing investment in areas of benefit or training/ development support as an alternative to giving up ownership is the right way to develop our country's future. Forcing an organisation to take on partners who may not add value to the business or dilutes its skill pool only serves to enrich a handful of connectewd persons, does nothing for the broader population and is a hinderence to the companies performance. Well managed schemes or development projects paid for by investors can achieve far more for the broader community and removes the race issue in ownership and rather promotes social responsibility. There is so much wrong with BBEEE rules... how can a white owned entity be forced to give up 30% ownership and told who to hire based on race but a 100% black owned business does not have to have white/ coloured or indian owners and can hire as they please ?? That is purely racist..... and in fact the red carpet gets laid out for that entity as well as it scores so well it gets all the business as well. It is so blatantly wrong it is worse than apartheid as those in charge should know better by learning from past mistakes instead of making laws to re-enact the past in reverse. That is stupidity and will lead to disaster instead of finding some happy medium they hope to achieve. Encourage broad co-operation and let people own and build their companies as they wish, employ whom they wish but everybody should be contributing to common social upliftment and development projects. 	2025-06-23 11:29:51	Yes I do	Other	Broad-Based Black Economic Empowerment (BBBEE) was introduced in South Africa as a legislative framework to address historical inequalities and ensure that the economic benefits of the country reach the previously disadvantaged majority. While the policy holds noble intentions and has had some success in bringing transformation, there are significant disadvantages that have hindered its widespread effectiveness. One of the most glaring criticisms of BBBEE is its limited reach. While the policy was designed to uplift the majority, it has disproportionately benefitted a small elite group, often referred to as "the politically connected few." These individuals have gained significant economic advantages, leaving most previously disadvantaged citizens still mired in poverty. This disparity has led to frustration and disillusionment among the general population who feel excluded from the benefits of transformation. Instead of fostering broad-based empowerment, BBBEE has often been perceived as fostering an environment where nepotism and favouritism thrive, perpetuating inequality rather than addressing it. BBBEE has not achieved the desired level of economic equality in South Africa. While it aimed to create an equitable distribution of wealth, statistics show that the gap between the rich and the poor remains among the highest in the world. The policy has struggled to address structural poverty and unemployment, leaving millions of South Africans trapped in underdeveloped living conditions. The emphasis on ownership and management control—key components of BBBEE—has often resulted in surface-level compliance, with companies focusing on meeting quotas without genuinely transforming the economic ecosystem. Another disadvantage of BBBEE is its unintended impact on the economy. In some cases, companies opt to fulfill BBBEE requirements by appointing unqualified individuals to managerial positions or granting ownership stakes simply to comply with regulations. This practice	Helena			self-employed
	2025-06-23 11:25:46	Yes I do	Other	Based on the timeframe of similar legislation in other countries, BBBEE should have been phased out by now. BBBEE can only enrich the elite in government and those connected to government and powerful business - it is a failed program that has been abused and continues to be abused at the expense of the greater country. This is a "no brainer" IEC, either you act for the good of the majority, or you continue to hide behind BBBEE fake equity arrangements. South Africa can get a real boost and real benefit by doing away with BBBEE in telecoms and thereafter many other industries. 	2025-06-23 11:08:23	Yes I do	Other	As someone responsible for managing B-BBEE compliance renewals for a company each year, I have direct experience with how these requirements impact business operations. While the original intention of B-BBEE — to address economic disparities and promote inclusion — is understandable, in practice, the framework has become overly rigid, burdensome, and often counterproductive. It creates unnecessary red tape, particularly for smaller companies or those in niche industries where finding qualifying shareholders or partners is not always feasible. B-BBEE has also led to tokenism, fronting, and in some cases, corruption — defeating its own goals. Compliance does not always reflect meaningful empowerment but rather compliance for the sake of scorecards. Removing these requirements from the telecom sector could pave the way for greater innovation, competition, and investment, such as enabling services like Starlink to enter the market without artificial barriers. South Africa should shift towards policies that support true skills development, merit-based advancement, and equal opportunity without enforcing restrictive ownership quotas. I therefore support the proposed policy direction to amend or remove B-BBEE requirements, starting with the telecom sector, and encourage a broader national review of the framework’s effectiveness and relevance. This means virtually every single day I do not have connectivity, my security does not work and I am out of communication. The only other option is to purchase expensive wireless equipment. Profits from Starlink will be taxed at close to 30% anyway, and then BBBEE expects Starlink to give another 30% away. How can you try run a business where for every R100 made, Starlink has to give away R60. This is impossible. The other thing to remember if people in rural areas (like what happened in Mozambique) have access to proper internet, they can become part of the digital era, can get online schooling, cheaper connectivity (a number of people can share one starlink in a village) and a host of other things. The population will be able to generate revenue by selling their goods using digital platforms (whatsapp, facebook and others), with this the government will gain additional tax revenue. Furthermore to use it as a basis for the placement of racial groups in an advantages is equivelent to apartheid and is thus a rasist action . The concept of BBEEE and gender or idealoical based appontments has caused the situation that South Africa is in. It was firstly the Nationalist Party policy of apartheid that led to many highly qualified English speaking people to leave as they were prevented from the higher postions in goverment and government owned enterprises. Then came the "new" SA where BBEEE is being used in exactly the same way. although in both cases it has been the ruling party that has introduced these policies the opposition party, the now DA ,in all its guises is also to blame as it could never create a strong viable party that could overthrow the incumbent. We ahve seen this with teir dush to be part of the GNU, a communistic invention to hoodwink the ill-educatedvoters that this is a demoratic idea, whereas it is just a ploy to keep a patry in power without declaring a one party state. 	2025-06-22 17:14:53	Yes I do	Other	All the typical concerns that have been mentioned in the media for the last few years are pertinent to this situation. The redress of past inequalities is a necessary function to have, and we hope that this baby is not tossed out with the proverbial bath water. However the current set up of BBBEE has been a colossal failure in addressing the past disenfranchisement of South African people in general as well as to contain any monopolies that have blossomed under its useless parameters in the entire time it has been in force. We need a complete overhaul of the concept of how to help the not haves to have more, and BBBEE is not it. 30% local ownership is a very vague requirement from government and it is not transparent about which locals are deemed competent or racially competent rather, to hold a third of the authority of any given concern. Its a ridiculous notion to start with, because it precludes international investment, essentially preventing foreign currency injections into our economy. One can only wonder at the kind of thinking behind this requirement. If the SA govt is worried about international influence, its easy to make laws and regulations to limit these politically and in other ways. Why is this so difficult for the ANC to have done in the past? The BBBEE framework is clearly biased in favour of an elite group of individuals, all linked to one political party instead of it being structured to support the people of South Africa. Something that further opened my eyes to this mess and confirmed my worst suspicions was the recent research by ..... 	2025-06-22 14:08:14	Yes I do	Other	1. Elitist, Not Broad-Based. Though meant to uplift the disadvantaged, B-BBEE has mainly enriched a small, politically connected elite. Most black South Africans see no benefit, while a few individuals gain repeated access to lucrative deals. 2. Harms Investment and Growth The policy imposes heavy compliance costs on businesses and discourages investment due to its complexity and political nature. This limits job creation and weakens economic growth. 3. Breeds Corruption B-BBEE has fueled fraud, fronting, and patronage. It often rewards political connections over merit, undermining both public trust and institutional integrity. 4. Undermines Non-Racialism By emphasizing race, it entrenches division and fuels resentment. Skilled professionals, especially white South Africans, increasingly leave or disengage, weakening the economy. 5. Ignores Root Issues B-BBEE does little to fix poor education, infrastructure, or services—the real drivers of inequality. Instead, it promotes short-term gains over long-term empowerment. Conclusion While well-intentioned, B-BBEE in its current form fails to deliver true empowerment. A shift toward inclusive policies focused on skills, education, entrepreneurship, and poverty reduction would better serve all disadvantaged South Africans.	Reggie	Western Cape		self-employed

Our millionaire government officials and politicians are only there to enrich themselves. Scrap BBBEE. Reduce taxes and VAT, so that people can start up small little businesses that will enable them to feed their families. 	2025-06-21 13:24:40	Yes I do	Other	The current system is not fit for purpose or you wouldn't have to deal with the crumbling infrastructure. I work for a huge multinational, I am quite senior in my company. Many many times I have pushed the idea of transferring some business interests to Africa - specific South Africa, where I was born, we have repeatedly done feasibility studies and our issue each time was how debilitating the employment and BEEE rules are. As a company based in Europe, and Asia and South America, we already have diversity targets, we are already encouraged to have better representation and indeed have numerous programs that engage in development, training and education of disadvantaged to gain a more engaged and upwards mobile employment base. Trying to cut through the corruption, the rules that are obstructive, the lack of correct training at those who have moved through BEE and actually have the 'correct level' of expertise is impossible. So each time we have decided its a no and looked elsewhere. Currently my experience is that those that have benefitted from these programs are figureheads, its been a very small percentage where those who are high up could truly match their international counterparts. This is not real growth. This is lip service. By having more open policies, a more rewarding scheme rather than a prohibitive scheme, potentially having a time frame of meeting employment targets as the company grows and encouraging hiring by merit rather than colour- perhaps more companies would choose to do business in South Africa. Nationalise your resources, stop giving those to foreign interests, and allow private companies the opportunity to grow holistically.	Katie	KwaZulu-Natal		employed individual

	2025-06-21 13:08:28	Yes I do	Other	The BBBEE concept is flawed in all its forms, ideologies and application. There are not enough qualified people to substantiate this idiotic idea. Begin with education - a total disaster. The majority party in the GNU is run by opportunistic, uneducated, avaricious politicians who has only one agenda: self-enrichment. Politicians are not fit to run a country. For the last 30 years it has been proved to the detriment of everything that was worldclass in South Africa. A heartbreaking example - Onderstepoort..... There are hundreds more! At the bottom of all the vicious greed, add illiteracy, ignorance and arrogance and there is just one outcome - complete chaos and no growth, crime from hell, staggering unemployment, and a very small handful of criminals that feed off BBBEE. India just got Starlink. There is not a hope in Hades that Musk will fall into the bribery trap - India is smart enough to see a good thing. These ridiculous BBBEE laws will NOT WORK to the benefit of SA. It is only the well-connected that will thrive. Get our people educated in trades and disciplines that our country needs - we do not need any more political science graduated - we need engineers, scientists , craftsmen, welders, builders, electricians well educated teachers, nurses, policemen and women, accountants that can oversee the controls on unbridled spending and lastly DOCTORS - the red headed stepchild of the Department of Health! It has enriched the polical elites. It failed to redress the imbalances of the past and has not improved all the lives of South Africans, instead it created poor whites and poor coloureds (and maybe indinas).The government had the opportunity to improve the lives of all South African and not destroy the livelihood of white and coloured people. This is apartheid in reverse. and legislated. I was upset when the government gave BBEEE status to Chinese people , preferring them over our own white people. I am against this. The Chines are here to take a spoil, but our white South Africans are nation builders. Their businesses employ and they give back to the communities they live in. They contribute to the economy and pay taxes. The Chines do not pay taxes. BBEEE must go.	RUBY

	2025-06-21 09:38:15	Yes I do	Other	The BBBEE policy has denied South African citizens to equality. This policy has further denied South Africa skilled workers the right to a job and have since, left the country. South Africa is suffering from severe brain drain. This is evident is every aspect of the country. From management levels to artisan workers. Even training institutions cannot train high academic achievers in jobs that suit their academic ability only due to AA policy thereby lowering standards and doing the professions and people a disservice. The BBBEE policy has funded and fueled the entitlement era, in industry and countrywide. This policy has further aided and abated management and employees to no longer work to earn their salaries, but sit in jobs doing bare minimum . As a result the people of the country are not getting the service they require nor is industry being management properly and the end product is of the poorest quality. Sub standards are a norm, with people not even aware of good quality anymore and those with knowledge, experience and expertise are being passed over to comply with BBBEE. We are over 30 years into democracy, where more than a generation has passed, so Affirmative Action and BBBEE is now an ancient practice. No one is previously disadvantaged except the old age citizens. Even they are not cared for properly. There no proof of previously disadvantaged people amongst today's youth or in the workforce. 	2025-06-21 09:17:53	Yes I do	Other	It has proven for me that the BBBEE has not benefited the black communities as was proposed. It has cut off the white, and other colors to struggle in their business and many closing due to lack of business. Yet BBBEE has really worked well for the government officials operating their businesses and benefiting from most of the contracts. It is a web that benefits a small community of people. It is most likely called corruption. Our president and his businesses are also benefiting greatly with these laws and so in the beginning when there was BEE the Indian communities benefited and raped that system. There are other ways to up lift South Africans than to teach them to take what is not there's, forcefully take what is not theirs. Instead of teaching and raising up entrepreneurship and taking a chance to start something on there own. But the culture that the black has is a jealousy spirit in it that works against a young poor entrepreneur to be successful. But this is less in the government as there is enough money to benefit their families. There are government officials in poor areas in South Africa that hide the finances, live in poor conditions (showing they are poor like the rest, but have other homes away from the community they invested in). False poverty. Getting rid of BBEEE gives back the opportunities of competitiveness in the market place so there will hopefully be less corruption from the government owned businesses getting all the contracts. 	2025-06-21 07:45:14	Yes I do	Other	I believe the best way to empower people is through education/training/mentorship/ apprenticeship. BEE, as it stands, has not worked to the detriment of the majority of South Africans, especially the very people it was meant to build up because because the above was not applied carefully and methodically from the start. This is still what needs to happen. This ' 'Starlink' bill could be the very opportunity to start this process powerfully. In my opinion, the best way to do things is to always put the best qualified experienced person into a job, the person who knows how to get a job done and then gets it done efficiently, and then have that person train one or even two promising individuals to take over when he or she retires or resigns or finishes their contract. It should be done thoroughly and will not happen overnight, but the end result should lead to prosperity for everyone prepared to put in effort and the time with compassion, kindness and respect. 	2025-06-21 06:12:01	Yes I do	Other	We have seen that BBBEE does not really work as it is a political ideology not a business ideology. Business says let's trade with people and make it easy to do business. BBBEE is restrictive and has a lot of "red tape." No matter what the colour of your skin is if you own a business and a government says to you, "you can only do business in this country if you give us 30% of your business profits. "What do you think the business owner will do...? If we want investment in this country especially international investment, we need to seriously think about some of our thinking we have. Let go of your past hurts otherwise you will stay stuck. Other countries are growing while we struggle. The free market system is the way to go. "Red tape kills business." 	2025-06-21 06:01:23	Yes I do	Other	South Africa has had 31 years to correct the imbalances of the past. The BEE bill makes some people complacent that they are guaranteed a job because they are previously disadvantaged, and no effort is made to actually qualify in order that good service delivery is achieved. I have personally witnessed people in BEE placements unable to perform the function for which they are employed, only to have others do the necessary so that systems continue to function. BEE perpetuates racism, and the youth of today, who have no idea what apartheid was actually about, behave in an entitled and aggressive way - they have had ample opportunity to be in a position where they should no longer rely on BEE, but their own efforts and abilities. Meanwhile, BEE has caused a talent drain in South Africa, so that the people best able to perform functions have left because there are no longer employment opportunities in South Africa. 	2025-06-21 03:02:10	Yes I do	Other	Forcing local development funds, by whatever name you call it, is a good idea. An investor might invest in infrastructure, but at the same time, if profits are not reinvested in the economy, you have a drain of money leaving our shores, that's bad for the economy. However, should the corporation (let's not focus the discussion on a singular company, this allows for much broader scope than just starlink), invest into our economy for profit, to balance this loss in revenue out the country, there had to be a close to equal input, but that input must not be limited to just investing in the programs and hands off, no, the ongoing success of those investments have to be ensured through high level mentorship from those investors own panel. The investors need to be incentivised to make sure those businesses grow, succeed and they themselves become investors, if they could get that balance between input investment not for gain vs investment for gain with the loss of spending power, then i believe it can be beneficial. Imagine having our young ambitious entrepreneurs of today, the young great minds of today, getting personal attention from high performance coaches, what could they become. I would prefer a system that rewards people based on merit alone rather than skin colour or disadvantages/historical background with a much more complex and regulated branch allowing for selective opportunities to be granted to those who haven't had the privilege of accessing such opportunities but have put in the effort to earn the chance of contributing their potential learned skillset and positive attitude to the position (for example). It's a very complex matter and I don't take it lightly, however I've seen it corrode away important areas of our society as undeserving people get positions they aren't qualified for based on factors that don't necessarily play a role in their actual ability to get the job done.	jessica	Gauteng		employed individual

It's actually led to more corruption and race based policies. Including other government policies. It's resulted in more investment moving away from SA. Affected job creation; which can make a huge difference in uplifting SA's from poverty. The victimhood mentality must go! South Africans must use their own initiative and creativity to create wealth, and stop feeling sorry for themselves and blaming the past. BEE is an iniquitous policy and as we can see it has not benefited ordinary black people - only the politically-connected elite. The Bible says, "If a man will not work, neither shall he eat." God has gifted every single person with something he or she can do to be able to make an honest living, but we need to be prepared to work hard and not expect to become rich instantaneously. Our people need to learn to work for themselves and stop trying to get something for nothing by stealing from others. 	2025-06-20 13:54:44	Yes I do	Other	I believe that BBBEE should be scrapped all together as it hindering business development in South Africa. In a country that has 44% unemployment the only thing that will turn the situation around is educating people and equipping them with skills that will make them employable and valuable to businesses AND eventually business owners. Once skills and experience are acquired, perhaps give these individuals favourable loans from banks to outright buy shares and businesses. The reason they need to pay is because then only will these people understand and be accountable for their finances. People only respect their money if they have had to work hard for it. Handing people businesses to run without proper education and experience is not a good practice. They will run the best businesses into the ground as they do not know any better thus making huge losses for themselves and causing further job losses to their fellow countryman The way the current situation is there are a handful of previously disadvantaged individuals that are benefiting from the scheme whilst the majority are suffering and have no work .Most of these men and woman would like an opportunity to earn a living and look after their families in a dignified manner. Collectively as a South African nation lets educate the youth ,give them the tools they need to build their own empires -they need education not forced hand outs Regardless of a persons background - if they get given things for free they will not look after Besides there is a certain amount of pride that a person aquires when they are self made- their attitude towards life is different and they rub off on those around them - they inspire them to better themselves	DIMITRI	Gauteng

Isn’t it ironic that (the ANC’s) “equality” in SA means… discriminating against a portion of the population with 142 race-based laws. BEE is just The ANC’s extreme racism and hatred of “whiteness” (or not being black enough) disguised as “transformation”. 	2025-06-20 12:40:51	Yes I do	Other	BBBEE only helps a small elite and the rest of the country stays where it is and loses out. It's easy for the Government to quote BBBEE pretending they're doing something for black economic empowerment and just ignoring that it's an ineffectual policy. Companies could be rewarded for black economic empowerment in some way, but should neither be forced nor penalised for lack thereof. The SA Government should be intensely focused on providing the absolute best education for ALL kids in our country. The education portfolio should have the largest budget with the most dynamic, honest, educated, passionate people. Then when these bright, accomplished, educated kids come into the workforce, companies WANT them because they're valuable to them. That's a win-win for everyone, no token employees and they can love their skills and themselves, because they KNOW they're marketable. That's the dream. A party that wants eternal power over everything and cares less about citizens than they do about their own personal prospects, prefers to keep the population uneducated and voting for them. Their fear and grasping then continues to keep their own and everyone else's prospects small. It's the buddhist concept of 'clinging' in action. Time to wake up and move forward! 	2025-07-14 13:05:36	Not fully	Broad-Based Black Economic Empowerment Framework	It is not only about Elon Musk and Starlink. It is about other investors who might consider investing here if the playing fields were more even, and they weren't being dictated to about who they employ and how their company is structured. They have to employ the best they can for the job required, skilled, qualified people with the right experience, which may not fit prescribed BEE types, and they should not have the company interfered with on political grounds. There are other ways that such companies can contribute to SA, it just takes innovation and thinking OUT of the box. It is quite well understood by now South Africa has deepening economic problems, exacerbating high unemployment, widespread poverty, and declining and already poor investor confidence. While the motivation for BBBEE was to tackle perceived historical injustices, its current implementation is contributing to economic stagnation, deterring investment from outside, and reinforcing inequality through nepotism, kleptocracy, political favoritism and gross inefficiency. The education system still has a lot to do to address some of the shortcomings that it still hasn't after 31 years in power! The consequence of this is South Africans—across the board—are left decreasing jobs, opportunities, or hope. The country's economic potential is being suffocated by policy uncertainty, mismanagement, and corruption. It has to stop for people here to have an South Africa needs meaningful international investment and real inclusive economic reform. This means creating a true merit-based, transparent, and very business-friendly arena, and one that empowers every South African - through education, proper skills development, real entrepreneurship, and equal opportunities. Change is utterly essential if we are to really empower the people, and that starts by radically changing or removing BBEEE altogether. Or there will be no future. As it is, how AI is implemented may lead to job losses.	Vanessa	Gauteng		retired

They must be scrapped , not amended . This is Black ENRICHMENT ,- not empowerment - for the cadres and government ie for a couple of hundred families .Does not provide any advancement , only deprivation to all other blacks and any other groups . It is theft by the ruling party . It’s time companies refused to comply . We need a free economy without thieving anc stealing what they haven’t earned . They have strangled any progress , support , financing and growth in the economy for 31 years . There’s no point pussy footing around . Theft is theft . No local component whether 30 or 10 % irrelevant . No one deserves to steal what they’ve not earned . This is one main conduit of unearned money for undeserving ANC (and potentially other socialist / communist type / nationalist groups that seek power). Each of these policies are rotten and serve only avaricious evil corrupt kleptocrats and ineptocrats . They’re a scourge on a broken nation. It is the Soviet playbook and its insidious “transformation” bs and sabotage of SOEs and public and private companies . Every law leads and has lead us to complete disintegration. It serves only the inner cabal.and the masses are too stupid to see and understand this . This is why ANC keeps them oppressed , poor and dependant on handouts and gives so called free education , BUT THERE ARE NO JOBS . there is zero gdp growth and never will be. This is the plan . All these policies serve to support the failure of the country and the economy and the poverty . But do benefit the few thugs , gangsters and criminals who through corruption, racism , evil policies and theft and purposeful oppression of the people and keeping them brainwashed and in ignorance through the aforegoing which result in deprivation . HOWEVER I'm opposed to selectively granting exceptions to specific companies or sectors because it opens up a whole new area for corruption through backdoor purchase of favours. 	2025-07-09 08:40:25	Not fully	Broad-Based Black Economic Empowerment Framework	The BEE policy to date has benefited mainly a small number of politically connected individuals. One of the main challenges for South Africa is to increase the number of people employed which will reduce the number of people claiming SASSA grants that are being paid subsidised for by a shrinking taxpayer base. The ownership of the company is a secondary consideration. The white owned companies employ thousands of workers and should be encouraged to employ more, not have their ownership diluted by selling shares to already the few wealthy black elite who are not directly contributing to these companies' success. Starlink will assist in broadening the access to the internet in the rural communities but the requirements should focus on improving aspects such as improving aspects such as better school facilities and training for the teachers, not another scheme to enrich the few black elite (again). Whilst the BBEEE framework in itself may not be holding back a great deal of economic growth, it is actually the signal that it is sending internationally that is significantly harming our direct foreign investment and growth potential. International capital is highly liquid and the BBEEE conditions placed on investing in SA make it very unattractive. This has particularly been brought into the spotlight by the Whitehouse recently. In addition, unfortunately BBEEE has failed to uplift the average South African and this is well documented. That in turn limits all employment opportunities. The administrative burdens imposed are essentially an additional tax that reduces operational efficiency. 	2025-07-07 08:26:44	Not fully	Broad-Based Black Economic Empowerment Framework	1. Corruption and Loopholes Undermine BBBEE • Fronting (where a company misrepresents its BEE status by appointing “token” Black directors or partners) is a real issue. • Rich individuals and companies can “buy” compliance or manipulate their scorecards without genuinely empowering previously disadvantaged people. • This creates a fake sense of transformation, allowing inequality to persist. 2. The Rich Stay Rich • Many large corporations find clever ways to meet BBBEE requirements without changing ownership structures or genuinely uplifting communities. • The same politically connected individuals often benefit repeatedly from tenders and deals, which keeps wealth concentrated. 3. The Poor Remain Disadvantaged • Those who BBBEE was meant to uplift especially in rural and underdeveloped areas often see no change. • Skills development, education, and access to real economic opportunity are what’s really needed, and corruption gets in the way of that. So What’s the Real Issue? BBBEE isn’t the problem on its own — it’s the implementation, corruption, and lack of accountability that ruins it. If it were run with integrity and community-based goals, it could genuinely bridge the gap between rich and poor. What Could Actually Help South Africa? • Rooting out corruption — across public and private sectors. • Improving education and skills training, especially in science, tech, and trades. • Supporting small and medium businesses, not just big corporations. • Transparent and fair economic policies that reward innovation, not connections. Just one of the vast numer of abominations the ANC has imposed on this country. It has, by all accounts, improved the lives of very, very few ordinary black South Africans and yet it has made those connected to the decision-making members of the ANC very, very wealthy. It has cost the country many billions of rand, hundreds of thousands of jobs and the dignity and future of countless South Africans.	Mathew			
	2025-07-07 07:50:21	Not fully	Broad-Based Black Economic Empowerment Framework	Two wrongs don’t make a right. South Africa has a terrible history of race based laws. The implementation of the current bbbee laws have shown that this only benefits a VERY small minority of connected individuals whilst the majority of the population suffers massive poverty and inequality as a result of a crumbling and destroyed infrastructure. All race based laws need to be abolished and allow businesses and industries to grow and generate jobs and wealth across all sectors of the population	G	Gauteng		unemployed individual

I do support bringing in Starlink into South Africa. It would be a viable internet option for remote workers such as myself. The government needs to educate it's people. The people need to work hard to attain their education and work hard once employed to advance up the corporate ladders. Starlink without BBBEE means Starlink within South Africa. 	2025-06-23 16:03:38	Not fully	Broad-Based Black Economic Empowerment Framework	While I acknowledge the importance of expanding broadband access and the potential benefits of allowing Starlink to operate in South Africa, I do not fully support the current draft policy direction gazetted by Minister Solly Malatsi. My concern lies not with the inclusion of new technologies, but with the manner in which transformation objectives are being reinterpreted. The proposed shift away from the 30% direct ownership requirement under B-BBEE in favour of Equity Equivalent Investment Programmes (EEIPs) may unintentionally sideline the very individuals these policies were designed to uplift. If we are to consider alternatives to traditional ownership models, they must be structured to ensure that disadvantaged South Africans—particularly those from underserved communities in the communications sector—are meaningfully included, not just politically connected individuals or large corporate intermediaries. Transformation should not be diluted in the name of innovation. Instead, we need a framework that balances technological advancement with genuine, inclusive empowerment—one that prioritizes skills development, local enterprise participation, and transparent community benefit structures. In short, I support progress, but not at the cost of equity. We must ensure that any policy shift strengthens, rather than weakens, the spirit of transformation. 	2025-07-07 06:54:08	Not fully	30% local ownership	South Africa must protect its digital sovereignty. Removing local ownership requirements for Starlink will not bridge the digital divide. It risks widening it. The high setup and monthly costs already exclude the poor. Without local ownership, there is no integration of local resources, no real accountability to government, and little financial benefit staying in the country. We can welcome innovation, but it must be on our terms. It should be inclusive, empowering, and aligned with our transformation goals. Other telecoms companies have built successful, sustainable businesses while fully complying with BEE and local ownership laws. Vodacom, MTN, Telkom, and many ISPs operate under the same rules Starlink is resisting. This shows that transformation is not a barrier it is a standard that encourages inclusion, local accountability, and long-term national benefit. If local and multinational players can succeed within the policy, why should Starlink be exempt? Fair competition means playing by the same rules not rewriting them for global tech giants. 	2025-06-23 18:56:00	Not fully	30% local ownership	Starlink can offer fast internet, especially to rural and remote areas. But for South Africa as a developing country it can be problematic for several reasons: Regulatory control: Governments often lose control over internet infrastructure when Starlink operates independently. It bypasses local providers and regulations, which can create security and sovereignty issues. Economic impact: Local internet service providers (ISPs) and telecoms — often major employers and tax contributors — can be undermined. Starlink doesn't build physical infrastructure like cables or data centers, so it doesn't create as many local jobs. Cost barriers: Even though it's satellite-based, Starlink is expensive — both for the hardware kit and the monthly fee. In poorer areas, most people and even small businesses can't afford it, making it a solution only for a wealthy minority. Infrastructure bypass: Developing countries often want to invest in their own communications infrastructure (like fiber optics) to grow their economies. Starlink offers a shortcut — but it discourages investment in national networks, leading to long-term dependency. Geopolitical risks: Starlink is a private American company. In times of political tension, service could be suspended or controlled externally, making countries vulnerable. In short: It can help rural connectivity, but it can also weaken national development, economies, and sovereignty if not carefully managed.	Alishia	KwaZulu-Natal		employed individual

	2025-06-22 12:05:04	Not fully	30% local ownership	The policy directive is not an abolishment of BBBEE, it merely instructs the regulator (ICASA) to consider getting in line with the general BBBEE legislature rather than abiding by it's own variation (30% HDG currently, 30% black ownership as per suspended regulation). It's unclear whether what applies to one shall apply to all. It must also be noted that allowing Starlink easy access may have positive effects, but it will also put lots of pressure on local ISP (and FNO) businesses which will likely result in job losses on that front again. That the 30% HDG/black ownership requirements currently being imposed on licensees is holding back the country as a whole is without question. But that applies to BBBEE as a whole. You don't uplift a country out of poverty by discouraging investment, you do it by encouraging investment. I suspect ownership equivalents may help to achieve that, as long as what applies to one (Starlink) applies to all (local investors) as well, and as long as these requirements are based on turnover/profit margins and not a blanket value that only really large multi-nationals can afford. Assuming that these directions are followed - what happens to existing ISPs and FNOs that have already structured BBBEE deals that were forced into those by legislation that really didn't want to be tied down into those? 	2025-06-21 09:38:02	Not fully	30% local ownership	BBBEE might not be working as well as it should, and Startlink is a technology that represents a massive leap forward in the democratisation access to data in rural areas or unprofitable areas for conventional cell providers, but if we allow big capital foreign entities to operate in the country without some type of mechanism to support those who are disatavantaged (who likely won't benefit from the technology any way due to cost) then we perpetuate the capatiist problem of the rich get richer while the poor die. If I could have it my way, I would set up a sovereign wealth fund that would own 30% of all foreign companies looking to operate in South Africa, and that money would go into 1)Finding young deserving candidates from disadvantaged households and supporting them with an education (in key strategic industries to grow agriculture, manufacturing, technology and material processing) that will help them lift themselves and their family out of poverty. Education is the answer. It is the only long-term form of welfare that I support as it gives those who what a better life the tools to get it. 2)The fund's secondary concern would be with investing in local small to medium-sized businesses that align with the same key strategic industries to reduce youth unemployment and our dependency on foreign industries for manufacturing. Further, for foreign companies to qualify to do business in South Africa, they would need to provide a set number of internships within their business for young graduates who qualify. This will facilitate skill sharing and the transfer of industry-specific technology in the hope that one day we can start some of these companies to compete in the international market. 	2025-06-20 15:28:42	Not fully	30% local ownership	I do feel that local ownership is important in a country with such high unemployment rates, and dependence on foreign products is already high. Where possible, I believe that it is of value for South Africans to procure local goods and services for mutual benefit. Regarding the BEE amendments, I do not feel that BEE requirements should have the same emphasis as they did two or three decades ago. In fact, I think that the more people can prove themselves on merit, the better for everyone. If people in the private sector are required to perform on merit, I think this will translate into South Africans holding public sector players accountable to higher performance standards. And in both public and private sectors, it will remove the option for maintaining 'sheltered employment' for people who do not perform and who occupy positions in a self-serving manner. I strongly support efforts to ensure that historically disadvantaged individuals are treated with dignity and respect, and are afforded equal opportunities, but I believe the approach that relies on preferential treatment may need to change. Indeed, I have worked and studied with many people who want to be recognised for their skill and talent, not their race. Perhaps this presents a good opportunity to re-examine our current models and design something better for all South Africans.	Claire	Gauteng		self-employed

	2025-07-09 14:02:43	Not fully	Policy Direction	The proposition to facilitate Starlink’s entry into the South African market warrants measured endorsement paired with rigorous scrutiny. On one hand the imperative to enhance internet accessibility in rural and underserviced regions is something that can have great effects and Starlink holds the potential to bridge the digital chasm afflicting these rural communities. Conversely the proposal to waive ECNS/ECS licensing mandates and to dilute BBBEE obligations risks establishing a perilous precedent for further erosion of the nation’s already tenuous commitment to equity and regulatory accountability & transparency. It is incumbent upon us to acknowledge the reality, that BBBEE once a crucial mechanism for redress has devolved into an ineffective and hollow instrument. Rather than catalyzing widespread socio-economic transformation it has become a vehicle for entrenching political patronage and elite capture, diverging sharply from its foundational intent. South Africa urgently requires a re-calibrated, progressive and outcome-driven framework for inclusion. One that incentivizes innovation and attracts investment without compromising the imperative of social justice, a balance successfully maintained in systems that genuinely uphold equality. Yet the figurehead of this venture, Elon Musk, is far from an impartial actor. His corporate empire’s history is marred by blatant regulatory transgressions, systematic suppression of labor rights, ethically questionable conduct and unpredictable public demeanor. Ceding control of critical national connectivity infrastructure to an individual with demonstrated contempt for democratic norms and regulatory governance presents profound risks to data sovereignty, security and national integrity. A prudent and calibrated strategy is essential here, one that champions technological advancement while steadfastly safeguarding the principles of transformation, privacy, human rights, equitable access and sovereign oversight. Our Minister needs to ask the question: who is really set to benefit amending the current BBBEE requirements? If it's only going to benefit an already wealthy minority - including Musk, whose family have a legacy of supporting apartheid and segregation policies - this move flies in the face of the reasons BBBEE policies were implemented post-apartheid in the first place. Having measures in place to open up social mobility opportunities to black and non-white South Africans remains essential to right the wrongs of the past. 	2025-07-07 11:01:28	Not fully	Policy Direction	I only support this amendment if it does away with BEE completely as it's costing far too much to support as a policy and if one company can qualify to not abide by it, it's lost it's purpose for existence anyway. 	2025-07-07 10:11:00	Not fully	Policy Direction	It is time for a referendum in South Africa on whether BEE is ethical or not, whether it should be reformed or scrapped or extended, fundamentally. Apartheid was a bad system, but it did not have any form of White economic empowerment, in the sense that comp[any owners were subject to a CAPITAL TAX , in favour of politically connected persons, the poor or any other group. So BEE was a NEW construct of the ANC liberation, it was not a correction of a previous racist system. The justification for this tax is open to debate - including an anti-capitalist ideology, the creation of a trough to enrich Chancellor House and cadres, and, yes, the upliftment of the poor (ie the acceptance that political freedom will fail without economic freedom) Driven by ideologic exposure in socialist countries like USSR(oligarchs under the behest of the communist party) or China (government owning most of the economy directly, permitting capitalism only as a catalyst for growth), yet rejecting the European/American versions of capitalism as being fundamentally racist, SA was forced to increasing government expenditure and need for capital transfers for the ANC to remain viable. Any truly open discussion on capitalism is suppressed by giving exposure (say on SABC TV) to economists that follow roughly the ACN policy directives, side-lining the (mainly white) other capitalists. SA needs an unbiased and open debate followed by a referendum where each citizen can express their views.	Gerhard	Gauteng		retired

However, this must not come at the cost of meaningful economic transformation. I believe BEE remains a necessary mechanism in South Africa, given our country's deep structural inequalities. That said, implementation has often been inconsistent, and reform is needed to ensure that it empowers a broader base of South Africans rather than benefiting a select few. Elon Musk, as a South African-born global leader in technology, has both the means and moral imperative to contribute more meaningfully to the country of his birth. While I welcome Starlink's potential, I urge regulators and stakeholders to ensure that partnerships or equity-equivalent models provide real value to South African citizens—not just as consumers, but as participants in the digital economy. A just, transparent, and forward-looking approach is needed—one that does not abandon transformation goals, but also does not block progress that could uplift millions. 	2025-06-22 01:14:37	Not fully	Policy Direction	The BBBEE Framework is flawed and needs to be revised to close any loophole for unscrupulous business to exploit. But the idea is good for South Africa. The policy does not need to be changed to suit the needs of a single corporation entering the market, it needs to be revised. From my knowledge, there are alternatives other than make the business 30% local owned, such as creating projects to benefit local economy/ area to the same value of the 30% ownership. That way the local communities receive the needed help while the company retains its complete ownership. Unfortunately Elon Musk has spread lots of false information to promote his own narrative. We need to exercise extreme caution when allowing an individual that has so much control on his own company, without a board or committee to keep him morally in check, that has a history of using his power to further his own means at the detriment of others. Starlink entering South Africa is a great opportunity, but we as a country must make sure that we do not bend rules to juts benefit a single company/ individual otherwise we have the risk of losing our own sovereignty. Plus, since Musk's family have a legacy of supporting apartheid and segregation policies (that and the government is only considering this after Trump ambushed our president at the White House), we should not be entertaining bringing Musks company into South Africa in the first place. It's not even as amazing as a technological advancement as most people think it is. Starlinks satellites require constant maintenance as they don't have long life spans. 	2025-06-21 15:10:34	Not fully	Policy Direction	The policy direction sacrifices substantive economic justice for expedient foreign investment, violating South Africa's constitutional and legislative framework while deepening historical inequities. Key Reasons Procedural Illegitimacy: The Communications Minister's unilateral amendment of BBBEE requirements exceeds statutory authority (ultra vires), bypassing the DTIC's mandated role under the BBBEE Act. This undermines democratic processes for sector code amendments. Dilution of Redress: Replacing mandatory 30% HDG ownership with voluntary Equity Equivalents (EEIPs) risks symbolic compliance over transformative ownership. Mining and finance sectors prove equity quotas drive real wealth transfer; EEIPs lack enforcement mechanisms to prevent elite capture or fronting. Asymmetric Burden: Exempting foreign giants (e.g., Starlink) while local Black SMMEs must comply with 30% HDG rules creates unfair market distortion. Rural ISPs lose competitive leverage, entrenching digital colonialism. Geopolitical Capitulation: Fast-tracking exemptions amid U.S. trade threats and Musk's dismissal of BBBEE as "racist" signals policy capture by foreign capital, betraying national sovereignty. Missed Alternatives: Rural connectivity can be achieved without sacrificing empowerment: Procurement Leverage: Reserve 50% of state broadband contracts for BBBEE Level 1–2 suppliers. Shared Infrastructure: Mandate EEIP investments in community-owned networks, not corporate CSR projects.	Simpiwe	Gauteng		business owner

I would prefer bringing other LOO companies along with starlink and negotiate a broader picture. My gut reaction is 1 large company does not have the right to bully another into being the only provider. We know children and all need and would like better digital access. With approx 20% improvement of the 30million people v costs and affordability the best outcome I don't think it is good strategy to put all SA eggs in 1 basket. So my concern is opening the door with a policy change weakens the IT platform in a much larger way. Bring other role players to the table from Europe and protect SA from USA as a sole provider. Let the different solutions have percentages of possibilities and share an open field that becomes more cost effective. Starlink letter was not written well and focus was on the emotional link re children = that's not a business policy that's a blackmail policy to gain ground and control air space over SA under the ploy of better connectivity. I agree everyone needs the opportunity to be connected but it has also been shown that this better connectivity has created a lot of poor mental health and biometrics growth to the mass community while a few develop to be the "Microsoft" brains and giants in the world. For over 30 years in S Africa, it has been used as a tool to reward ANC cadres, not to help the general Black population. What about Coloureds who also suffered?. Many Black Doctors can't even find a job if they don't have the right "contacts". We all know that Ramaphosa made his money from the trade union (NUM) he started and his Black (racist) Umbrella Group. So of course he and his cronies benefitted tremendously. The workforce of today has NEVER BEEN UNDER APARTHEID. So what is the excuse? Ramaphosa also has major interests in MTN (and they are in Iran!!! Thus he is not keen on Starlink.). Thus, he now wants another way to get funds if BEE is gone. Just how long is one supposed to pay for Apartheid when these managers never suffered under it? And as for paying a fat cash donation to be exempt...more government greed. Private companies sponsor sanitary pads, school books, school lunches, school shoes, while our dear President stuffs dollars in his couch. There are 80 white squatter camps around Pretoria alone. We have gone from black Africans being disadvantaged to a few extremely wealthy black people and the majority of black people still living without jobs in extreme poverty. We also have many white people who don't get the jobs they should because of their colour. and the quota system. What the country needs is for a growing economy with most Africans of all colours being employed and earning a salary that they deserve. We do not need so many foreigners taking jobs that local people deserve. What we also need is big companies like Starlink being allowed to start up in South Africa without any restrictions on black ownership. What we must remember is that big companies create many jobs not just within themselves but jobs for small companies . Many of these small companies will employ black Africans or even allow many black owned small companies to start. Our government must look at the big picture and allow international companies to start up in South Africa knowing that this will allow more small companies to start bushiness which will lead to more jobs. Segregation will naturally always exist. 2.USA Starlink should not be the trigger for South African laws to be altered. The tender should be opened to all local companies, without BBBEE guidelines. This will open up many job opportunities, to all, to locals and specialists in this field. Perhaps, specialist expats, will return. RSA Locals know the RSA climate and environment and nature better than any outside company. 3. A foreign-owned system controlling significant portions of national internet access raises important concerns. Globally, we've seen growing politicisation of communications infrastructure — particularly involving Elon Musk's platforms — and South Africa must safeguard against similar risks. While Starlink's EEIP proposal to support 5,000 schools is commendable, any Equity Equivalent approach must not dilute our transformation goals. When one shines the spotlight on the horrors and still existing consequences of White Economic Empowerment (WEE) which endured for centuries over many decades of the colonial spectrum. Therefore, to a measure and degree, not incorrectly so, it looks like Broad Based Black Economic Empowerment (B-BBEE), is past its sell by date as alluded to in many circles. Without CONTESTATION, one must agree that corruption has overwhelmed the process of B-BBEE. However, this doesn't justify the abolishment thereof but only the removal of the cancerous tumour of corruption and the politics preventing that surgery. It is disingenuous and cynical to over simplify a call for the abolishment of B-BBEE knowing that it is a vehicle to help bring about significant change in South Africa's economy based on a previously harsh Apartheid Era discriminatory law system that was vehemently opposed to any transfer of knowledge, business skills, political ability, and know-how to govern a nation based on internationally acceptable Western educational standards, that was deliberately withheld from the majority, now see its consequences on this great nation, is no sad outcome, but tragic. Politics brought about huge expectations, but once again, like apartheid, has left another legacy of sorrow and shame. Woe unto those that got this nation there again, due to their insatiable lust for power and wealth. And as such comes with many hidden things like what's currently being used. Take our eyes off space for a moment, and look at ground level. What are the most desperate needs of the Country as a Whole? Bread on the table, clothes to wear, shoes for the feet, roof over the head, etc. If Starlink can provide this for the Country, go for it. BBBEE has driven other races so far back, that the best of the best that could empower others, is lost in the driving out. Our Leadership is not strong and not everyone wants to go to space. People need to live, not shoot rockets into space. EARTH was created for humans. You must be something else if that's what thrills you. A waste of money to fulfill someone else's dreams, I'd say. 	2025-07-07 13:14:06	Not fully	Other	The current BBBEE policy already stipulates means and measures through which multi-national organizations that will not or cannot amend their ownership to include domestic parties to contribute to the economy and local parties through other means. The communications industry is no exception to the said stipulations and should not be made an exception of. However, the participation of Starlink in the local economy poses a significant risk to the security that comes with accessing our national data and the very real threat to our sovereignity through exposure to the United States hosting the servers of Starlink and unfetered access by undesired parties at the behest of the United States government. Starlink and its owners are directly positioned against the general spirit of diversity, equity and inclusivity in the United States and allowing our domestic legislation to be changed to accommodate such a role player in our communications environment does not augur well for the needs our country's socio-economic transformative needs and agenda. The compromise of our national data that may come later as a result of Starlink's presence in South Africa through this legislative amendment may have far reaching and devastating effects that may entangle South Africa in the military and intelligence operations that the United States is involved in, that are not part of South Africa's initiation or progress. I'm not sure this is a great idea. As much as I like the idea of cheap internet for all, I fear that giving all that power into the hands of a single entity, grants that entity far to much political power over the people of South Africa. Yes, Elon Musk was South African. Yes, Starlink holds a lot of promise for a country like South Africa. But it also puts an off-switch into the hands of people who likely do not hold the best interests of South Africa at heart. If we can find a way to remove the off-switch completely, then yes, let's get Starlink into the country. If we can't, I suggest we find a way to mitigate the risks of it being in the hands of people who would likely want to manipulate South Africa.	Dirk	Western Cape		unemployed individual

While there's an argument that relaxing BEE requirements could attract investment and potentially benefit the economy, we also need to proceed with care. Elon Musk's track record of disregarding environmental regulations raises valid concerns — particularly in a country where environmental damage can be long-lasting and difficult to reverse. A special exemption like this may not signal broad-based reform, but rather selective application — which could raise questions about fairness and the potential for preferential treatment. Given our context, there's also the risk that such decisions might open the door to potential corruption or misuse of discretion. It feels like a high-stakes move with uncertain outcomes. I would like nothing more that the abolishment of the BEE system since this is the reason (in my opinion) that standards of service delivery have become pathetic and because companies are not held accountable. Where once business owners would compete on good service delivery, they now compete on price and kick-backs for tenders - and the buyer of sub-class services is the one who suffers, since the government holds nobody to account . Is it guaranteed that South Africans will benefit from job creation long-term? Who is to say that allowing Starlink to operate in South africa is not just another sweet-heart deal that promises jobs and development, only to renege on this after some time? Can we be guaranteed that only South Africans will hold these jobs and not be replaced (eventually) by outsiders (i.e. anybody not born in South Africa)? In terms of investment into infrastructure and development in South Africa: a much needed service can be provided to people who do not currently have access to such services and yes, Starlink will invest much heavily in South Africa through potential increased revenue, job creation, educational opportunities etc but there is no such thing as a free tea party... Without his input Trump wouldn't even have known SA existed and we would have escaped the tariff and "refugee" fiascos. It is also alarming that one man has been allowed to install so many satellites in our orbit without International agreement and all for his own profit. It's time populations stood up to these bullies so no do not amend the BBBEE laws for his benefit - look for other less morally corrupt solutions.	B	Western Cape

And will this be damaging to our environment as I don't see the point in us going into space all the time. My answer is hell NO. These policies are enjoyed by few fat cats who are connected to the rolling party the ANC. Now they are further deviding our people through racial lines and class. 	2025-06-21 07:08:41	Not fully	Other	BBBEE must go. People must work and learn to improve themselves. If black people feel left behind, then install programs that will close the knowledge gap. But put the best person in the job. I know of someone who wanted to start a business. She asked for a loan. The bank insisted that 51% should go to a BEE partner. So she turned around. They even wanted to know her idea. The would have stolen her idea. So now she has no business and she can't employ black people. What has BBBEE done for black people now.	André	Western Cape		retired
	2025-06-20 21:46:45	Not fully	Other	BEE has failed and only befitted a small elite. It is holding the economy to ransom for the benefit of a small group of connected people. It is well-known that access to telecoms services is a direct boost to GDP growth, so there should be no BEE barriers to entry into the telecoms market. In fact there should be no BEE barriers to any market in South Africa. BEE requirements are an additional tax on business that benefits no one except a small elite. It is time to sunset all the BEE regulations and free up the economy to grow and create jobs.	Trevor	Gauteng		retired

	2025-06-20 17:20:55	Not fully	Other	My concern is that the change in BBBEE will only affect one industry, while the problem with the way BBBEE is administered is deeply flawed in all industries. The policy was intended to force investors to contribute meaningfully to equity, skills development and economic inclusion but in execution the policy has concentrated on economic inclusion alone, making the same elite and well connected people richer. Any attempts at equity and skills development have been left by the wayside. If Starlink can begin a move towards a BBBEE that concentrates only on equity and skills development, Elon Musk can begin to make up for all the damage he has caused the country. 				I've just been in Hong Kong, invited by HKU, a university that puts our universities to utter shame. At HKU there's a wonderful mix between mainland students and Hong Kong students, as well as international students, particularly from South East Asia. Hong Kong and the mainland have a symbiotic relationship that is extraordinary. What energy! It made me wish that the ANC had had Chinese, not Soviet political education. It also made me wish that there was no ownership of land, only leasehold, and that public servants who pocketed public funds were shot by firing squad, just as the apartheid regime and the corporate oligarchs should now be dead on a beach or languishing in jail. We got off to a very bad start with TRC nonsense. We cling to tired and redundant Cold War doctrine and ideology, and get nowhere. BEE is an obvious fact if we want to live in a viable country. The current situation is impossible with the unsustainable gap between the few haves and the vast majority of have nots, irrespective of skin colour. This does not a viable country make. But South Africa thinks short-term. It frames its 92% indigenous population in terms of Western minoritist "civil rights" thinking. It's a joke. We are a greedy and selfish country, historically. Nothing seems to have changed. We seem to accept that only a few rich deserve a secure life. But the dwindling fiscus can't even sustain a lower middle class. Ask the legal department of City of Johannesburg, running after arrears. Does BEE solve the problem? Of course not. It's like taking happy pills to disguise a deep psychological malady. There's no money, get it? Of course Starlink is going to win. We have no other ideas. Will money go into a few strategic pockets? Of course. That's the way we've done things since Cecil John Rhodes.

BBEE must be scrapped entirely . If Black South Africans want to start and run businesses they have access to the same options as other south Africans do , and they should avail themselves of these options. The only way south Africa will experience any growth and job creation is if BBEE is scrapped entirely. No one wants to do business with a government that has race based policies. SCRAP BBEEE. 	2025-06-20 13:51:00	Not fully	Other	as a country we should be welcoming any foreign investment with open arms. including enabling and disruptive technologies. there should be no conditions or restrictions imposed but rather an attitude of how to embrace progress that will unlock opportunities for all South Africans. Starlink is an example and may be an enabling technology for people living in rural areas. its the principle however, that is hindering other innovative companies from considering South Africa as a viable investment destination. we need to change that, if we want to see real progress and real transformation.
