NERSA consultation paper (redetermination of MYPD6)

30 December 2025 — 21 January 2026

Public participation

– report with all public comments

https://dearsouthafrica.co.za/nersa-r76bn/

DearSouthAfrica.co.za is an online platform designed to facilitate government and encourage the public to participate in unbiased decision-making processes or policy formation at SOE, municipal, provincial and national levels.

TO:	The National Energy Regulator of South Africa (NERSA) / The Electricity Subcommittee
FROM:	DearSouthAfrica.co.za
DATE:	22 January 2026
SUBJECT:	REPORT ON PUBLIC PARTICIPATION: REDETERMINATION OF ESKOM'S MYPD6 REGULATED ASSET BASE (RAB)

1. Executive Summary

This report details the outcome of a public participation campaign facilitated by DearSouthAfrica.co.za regarding *NERSA's Consultation Paper on the Redetermination of Eskom's MYPD6 Regulated Asset Base (RAB).* This consultation followed a court judgment requiring NERSA to re-evaluate the value of Eskom's assets and allowable revenue for the 2025/26 – 2027/28 period.

The campaign ran from 30 December 2025 to 21 January 2026. Despite the consultation period coinciding with the festive season holidays—a timing widely criticized by participants as procedurally unfair—the campaign generated **29,956 submissions.**

The public response is a **unanimous rejection** of any redetermination that increases the financial burden on the consumer. The overriding sentiment is that the consumer is being forced to pay for "dead assets," corruption, and inefficiency. The public fundamentally rejects the inclusion of cost overruns (specifically at Medupi and Kusile) into the Regulated Asset Base, arguing that "wasteful expenditure" cannot be counted as a "regulatory asset."

2. Participation Statistics & Methodology

2.1 Methodology Note: Simplifying the Consultation

The NERSA Consultation Paper originally posed 10 technical questions to stakeholders. To facilitate meaningful engagement from the broader public—who are directly affected by the outcome but may lack technical regulatory expertise—DearSouthAfrica.co.za synthesized these technical points into 3 core thematic questions. This approach ensured that citizens could provide substantive input on the key principles (Asset Valuation, Tariff Impact, and Operational Efficiency) without being excluded by jargon.

2.2 Volume of Participation

- Total Submissions Analyzed: 29,956
- Unique Comments: ~15,000+ (Quality inputs regarding economic impact).

2.3 Sentiment Breakdown

- Do Not Support (Higher RAB/Tariffs): >99%
- Support: <0.1% (Statistically negligible).

2.4 Top Concerns

Participants selected their primary objection from the simplified options provided:

- “We should not pay for government blunders”: ~91% (27,470) - This category represents the view that the RAB is inflated by corruption and mismanagement.
- “Burdening consumers with construction costs”: ~5% - Objection to paying for “Work in Progress” or broken units.
- “Operational Costs”: ~2% - Concerns regarding bloated payrolls and coal contracts.

2.5 Demographic Profile

- **Pensioners/Retired:** A highly vocal group (evident in the qualitative data) stating that electricity costs now exceed their state pensions.
- **SMMEs/Business Owners:** Expressing that further tariff hikes based on asset revaluation will lead to business closures.
- **Unemployed:** Citing electricity as an unaffordable luxury, forcing a return to dangerous alternatives (paraffin/wood).

3. Summary of Public Comments

The qualitative data reveals a breakdown in trust between the public, the utility, and the regulator.

3.1 Rejection of the "User-Pays" Model for Inefficiency

Participants argue that the "Regulated Asset Base" should only include assets that are efficiently producing electricity.

Comment: "The consumer cannot be held liable for the capital costs of power stations that were built over-budget and are constantly breaking down. If the asset is defective, its value in the RAB should be zero."

Comment: "We are paying for a Ferrari but getting a bicycle with flat tyres. Devalue the assets to match the service delivery."

3.2 The "Death Spiral" Warning

Many comments highlight the economic reality that higher RAB valuations lead to higher tariffs, which drive more consumers off-grid, shrinking the revenue base further.

Comment: "Go ahead, increase the RAB. You are simply accelerating the grid defection. Soon Eskom will own expensive assets with no customers to pay for them." – Graham (Gauteng, Self-Employed)

3.3 Procedural Objections (Timing)

A recurring theme was anger at the timing of the public participation.

Comment: "Publishing this on 30 December is an act of bad faith. It was designed to sneak a price hike past the public while they were on holiday."

3.4 Cost of Living Crisis

Comment: "As a South African I already can't afford electricity prices... Seems like the system punishes those who follow the law." – Mpho (Employed Individual)

Comment: "We will not pay for costs caused by Eskom. I am retired and literally sitting in the dark to save money." – Marius (Western Cape)

4. Proposed Solutions and Alternatives

The public offered specific directives to NERSA regarding the RAB redetermination:

1. **Asset Valuation based on Performance: T**he RAB should be calculated based on the availability factor (EAF) of the plants. If a station is only working 50% of the time, only 50% of its capital value should be included in the RAB.
2. **Exclude Corruption Costs:** NERSA must conduct a forensic separation of "efficient costs" vs. "corruption costs" (SIU findings). The public demands that the billions lost to corruption be written off as a loss, not capitalized into the RAB.
3. **Freeze Tariffs:** Regardless of the RAB calculation, the actual tariff must be capped at CPI (inflation). Any revenue shortfall must be funded by the shareholder (Government/Treasury) via bailouts, not by the tariff customer.
4. **Review the Multi-Year Price Determination (MYPD) Methodology:** The current methodology guarantees Eskom a return on assets regardless of efficiency. Participants call for a "performance-based" revenue model.

5. Media and Civil Society Alignment

5.1 Consistency of Sentiment

The public outcry aligns with positions held by energy experts and civil society organizations.

- **Civil Society (OUTA / Energy Experts):** Have long argued that Eskom's RAB is artificially inflated by including aging, inefficient, and corruptly-procured assets. The public comments echo the technical argument that "consumers should not pay for inefficiency."
- **Business Chambers:** The inputs from business owners in the participation dataset mirror the warnings from BUSA and the Energy Council: that the cost of electricity is now a primary driver of de-industrialization.

5.2 The "Court Order" Context

The public is aware that this process was triggered by a court judgment. However, the sentiment is that NERSA's mandate to "protect the consumer" (under the Electricity Regulation Act) should override Eskom's demand for higher revenue, even if a court orders a recalculation. The public expects NERSA to use the recalculation to lower the asset values based on depreciation and obsolescence, not increase them.

7. Conclusion

The public mandate is clear: **Do not increase the allowable revenue based on this redetermination.**

The 29,956 participants view the re-valuation of Eskom's assets as a theoretical exercise that ignores the practical reality of the South African economy. The consensus is that Eskom is technically insolvent and efficiently bankrupt; attempting to extract a "Return on Assets" from a broken fleet is viewed as economic extortion.

Recommendation: NERSA is urged to apply the strictest possible interpretation of "prudency" when redetermining the RAB, ensuring that not a single cent of wasteful expenditure is passed on to the consumer tariff.

ends.

	2026-01-08 15:19:47	No I do not	All of the above – we should not pay for government blunders	The government is breaking the back of a small number of taxpayers that subsidise the entire country. Taxes for which the taxpayers get nothing in return. The government has no idea what discipline and accountability mean and as a citizen of South Africa, I refuse to pay for their incompetence, corruption and mistakes. I believe the asset values should be capped to keep electricity affordable. The consumers SHOULD NOT be forced to pay higher tariffs to cover the full value of power stations that are near the end of their lifespan or frequently unavailable due to breakdowns (load shedding). I DO NOT agree that the consumer should carry the additional financial burden of funding Eskom's incomplete construction projects and operational cash flow through increased electricity prices. Cut government spending which is 16% of our GDP (amongst the highest in the world) and fund the other deficits.	M.Maaz	Gauteng		employed individual
	2026-01-08 15:19:43	No I do not	All of the above – we should not pay for government blunders	NERSA made an enormous miscalculation of R76 billion rand !! Normally that would mean it was NEVER NEEDED !! And they can't even CORRECT their miscalculations !! Now it seems they offer vague excuses to say it is still necessary (!) and that, NOT THOSE WHO MADE THESE GRAVE MISCALCULATIONS, but the already cash strapped CONSUMUMERS must pay for THEIR MISTAKES !! NO ACCOUNTABILITY !! With all the corruption going on in the country, many people don't find it difficult to guess where this R76 billion rand is going to end up !!	Tienkie	Western Cape		retired

	2026-01-08 15:12:09	No I do not	All of the above – we should not pay for government blunders	We already have some of the highest electricity tariffs internationally. Eskom's costs escalated significantly through government failures to manage "clean" procurement over many years for not just building new generation capacity, but also for tools and equipment that were purchased at massively inflated prices from connected tenderpreneurs or after a kickback to the person placing the order. At the end of the day the taxpayer will probably have to foot the bill through direct or indirect taxation (we also have some of the hiughest personal tax rates for the 17% who are supporting the other 83% who don't pay any tax because they're unemployed or dodging tax)	Glyn	Western Cape		retired
	2026-01-08 15:12:09	No I do not	All of the above – we should not pay for government blunders		George	Western Cape		self-employed
	2026-01-08 15:12:04	No I do not	All of the above – we should not pay for government blunders	Absolutely rediculous. Why should the consumer keep on paying for the mistakes/mismanagement of Eskom? 90% of the population cannot afford another increase. We are already struggling.	Marinell	Western Cape		employed individual
	2026-01-08 15:11:54	No I do not	All of the above – we should not pay for government blunders	Eskom proudly announced a first time (ever ?) profit and management competence is celebrated. Not sure if bonuses were paid (and probably stolen by some too). The entire supply chain from mining, infrastructure, transport, diesel supply,etc. is riddled with fraud and corruption. Proudly facilitated by Eskom management and politicians. Nersa is merely suggesting for tax payers to further fund and pay for the plundering of resources and/or Eskom's management incompetence.	John	Gauteng		business owner

	2026-01-08 15:08:19	No I do not	All of the above – we should not pay for government blunders	This is ludicrous.....we pay every month for our electricity usage, so why should we now be penalized for Nersa's mistake. it is unacceptable!!!!!!!!!!!!!!!!	colleen	Gauteng		retired
	2026-01-08 15:08:07	No I do not	All of the above – we should not pay for government blunders	To give an example of how bad this system has become, over the last few weeks we have had two very long power outages. the first in early December 2025, which lasted over 67 (sixty seven) hours, and the second outage that took over 36 (thirty six hours) to rectify. A great many owners and guests lost a lot of food stuff, (at a very high expense and inconvenience to us all), and most every time it rains, we experience power outages. So, instead of these people at eskom pleating about their basic arithmetic errors, and expecting us, the public, (who actually pay their huge salaries), to foot the bill for the mistakes, they should get off their fat backsides and make plans to replace all the old and faulty equipment that keeps on breaking down at the slightest hint of bad weather every time!!!! we are all already battling with the high cost of living these days, and now we must now just carry on paying for a corrupt and non-functioning example of south africa going to the dogs!!!! No wonder, everyone is now moving to solar alternative solutions, and my solar business is going from strength to strength!!!! good luck eskom and we will see who wins this fight!!!!	mike	Mpumalanga		retired
	2026-01-08 15:08:01	No I do not	All of the above – we should not pay for government blunders	Useless RAMAPHOSA and his ANC need to fit the bill in full and not US tax payers money. Time for SA people to stand up to evil corrupt government. RAMAPHOSA put the clowns in place, these thugs have been paid good salaries to do the job. Pay up you made the mistakes.	Gregory	Western Cape		retired
	2026-01-08 15:07:51	No I do not	All of the above – we should not pay for government blunders	I am not willing to pay for NERSA's calculation errors, supply Eskom with cash flow or pay full price for unreliable infrastructure. It is audacious that they would propose such a thing.	Liezel	Western Cape		self-employed
	2026-01-08 15:07:42	No I do not	All of the above – we should not pay for government blunders	I respectfully oppose this proposal. Passing these costs to the public—amid ongoing economic strain—places an unfair burden on households and businesses for operational failures that were not of their making. This approach also risks continuing the cycle of bailouts without addressing underlying inefficiencies. Key Concerns: 1. Lack of accountability for avoidable or inefficient expenditure. 2. Significant financial impact on vulnerable households and SMEs. Insufficient evidence that all claimed costs qualify as “efficient costs” under regulatory principles. Recommendations 1. Independent forensic audit of the R76 billion claim to verify necessity and efficiency. 2. Internal savings and governance improvements at Eskom before any consumer recovery is considered. 3. Performance-linked financial support that ensures transparency and measurable operational improvements. 4. Ring-fenced and strictly monitored funding, should any recovery be approved, to ensure funds are used solely for maintenance and grid stability. In conclusion, while financial stability in the energy sector is essential, any cost recovery must be justified, transparent, and fair. Consumers should not bear additional costs without clear accountability and demonstrated efficiency improvements.	Murial	Gauteng		
	2026-01-08 15:07:33	No I do not	All of the above – we should not pay for government blunders	All of the Above!!!We The Hapless Citizens are Being Bled Out To Death.....We must not Pay for Any Government Purpoeful 'Blunders'.....All Excuses for their GROSS INCOMPETENCE ON ALLLLL LEVELS.....ALONG WITH WHOLESALE STEALING,MISMANAGEMENT,MISAPPROPRIATION OF FUNDS,DEATHLY CORRUPTION,CRIMINALLY,ABSOLUTE INABILITY TO RUN A COUNTRY SUCCESSFULLY.....RUIN A COUNTRY YES UNDOUBTEDLY.....BUT RUN IT PROFICIENTLY....DEFINITELY NO!!! 	2026-01-08 15:01:09	No I do not	All of the above – we should not pay for government blunders	FORMAL OBJECTION: PROPOSED RECOVERY OF A R76 MILLION MISCALCULATION ERROR FROM CONSUMERS I hereby lodge a formal objection to any proposal, decision, or regulatory determination that seeks to recover or pass on a R76 million miscalculation error by NERSA and/or Eskom to electricity consumers. This objection is grounded not only in principles of fairness and public interest, but also in constitutional, administrative, and regulatory law. 1. Violation of Section 195 of the Constitution (Public Administration) Section 195(1) of the Constitution of the Republic of South Africa, 1996, requires that public administration be governed by principles of: Accountability Transparency Efficient, economic, and effective use of resources Passing the financial consequences of an institutional miscalculation onto consumers constitutes a failure of accountability and an inefficient use of public resources. It shifts responsibility away from the decision-maker and onto innocent third parties, in direct conflict with Section 195. 2. Unlawful and Unreasonable Administrative Action (PAJA) In terms of the Promotion of Administrative Justice Act 3 of 2000 (PAJA), all administrative action must be: Lawful Reasonable Procedurally fair A tariff determination or adjustment that incorporates recovery of a known regulatory or calculation error: Is unreasonable, as it penalises parties who played no role in the error Is irrational, as it lacks a rational connection between consumer conduct and the cost imposed May be procedurally unfair if consumers are expected to absorb the cost without proper justification or remedy Such action would therefore be reviewable under PAJA. 3. Failure of NERSA's Statutory Mandate NERSA is mandated, under the Electricity Regulation Act 4 of 2006, to regulate electricity prices in the public interest, balancing the sustainability of the industry with consumer protection. Permitting the recovery of a regulatory miscalculation from consumers: Undermines the protective purpose of regulation Converts tariff-setting into a mechanism for correcting institutional mistakes Exceeds the reasonable scope of cost recovery envisaged by the Act Consumers are obligated to pay for prudently incurred and lawful costs, not for regulatory or administrative errors. 4. Irrational Cost Socialisation and Dangerous Precedent Allowing this recovery establishes a precedent whereby: Regulatory and governance failures are externalised to the public There is no incentive for accuracy, diligence, or internal consequence management Consumers become insurers of last resort for institutional incompetence Such a precedent is contrary to sound regulatory practice and constitutional governance. 5. Socio-Economic Impact and Public Interest Electricity consumers are already burdened by: Escalating tariffs Load shedding–related economic losses High unemployment and rising living costs Imposing additional costs arising from a R76 million miscalculation exacerbates socio-economic hardship and conflicts with the constitutional obligation to act in the public interest. Formal Requests I therefore formally request that: The R76 million miscalculation not be recovered from consumers through tariffs or charges. NERSA provide full disclosure regarding the origin and nature of the error. The financial impact be addressed through internal corrective measures, not public cost transfer. Clear safeguards be implemented to prevent recurrence. Conclusion Consumers should not be compelled to finance regulatory or operational failures. To do so would be unconstitutional, administratively unjust, and contrary to the rule of law. This objection is submitted in good faith and in defence of constitutional governance, lawful administration, and consumer protection. Yours faithfully, Wouter Kriel Concerned Consumer	Wouter	Gauteng		self-employed

	2026-01-08 14:55:39	No I do not	All of the above – we should not pay for government blunders	No way should the public foot the bill for another scam to steal from eskom again. This is just another route for them to steal more, as funds are now drying up. Look at the big fat bonuses given in december (for what???) get these funds back. Look at the fat salaries given to staff???? drop these unrelated salaries. Get all the stolen funds back from those who have stolen in the past High time that the scamming and stealing stopped. Just another cash cow to milk	James	Gauteng		retired
	2026-01-08 14:55:39	No I do not	All of the above – we should not pay for government blunders	I do not agree with the proposed cost recovery being passed on to consumers. While I understand the need for Eskom and NERSA to correct past errors, it does not feel reasonable or fair for households and businesses to absorb the financial impact of calculation mistakes that were not of their making. At a time when affordability is already under severe pressure, asking consumers to pay higher tariffs for aging infrastructure, historical inefficiencies, and delayed projects only deepens the strain. Accountability for errors should sit with the institutions responsible, not be transferred to the public through increased electricity costs.	Warren	Gauteng		employed individual
	2026-01-08 14:55:31	No I do not	All of the above – we should not pay for government blunders	It is unacceptable that NERSA and the government continually relies on the taxpayers' money to fund their poor management.	Coetsee	Western Cape		employed individual

	2026-01-08 14:55:03	No I do not	All of the above – we should not pay for government blunders	The citizens of South Africa must never pay for these blunders. Blunders like these, are indicative of gross incompetence and ignorance and have already been funded by taxpayers' money to fail. So, we cannot refinance an already ill-managed government system. Doing so would simply send a message of "Government organizations can simply continue with their incompetent endeavors, and the Public will just cough up whenever they screw up, which they usually do." From a serious risk management point of view, this debacle is illustrative of the extreme risk the government entities pose to the country and its citizens' finances and economic stability, something the ANC and its partners clearly do not comprehend or do but simply aim to deliberately destabilize the country for its communist control agenda. So, no, do not give these people ANY ROPE, they will hang us out to dry.	Jack	Mpumalanga		unemployed individual

NO	Susan	Western Cape		employed individual
	2026-01-08 14:53:37	No I do not	All of the above – we should not pay for government blunders	Consumers should not be expected to pay for government or regulatory failures. Errors in NERSA calculations, Eskom cash flow problems, aging infrastructure, and construction delays are not the responsibility of the public. Households are already under extreme financial pressure and are paying ever increasing electricity tariffs for a service that is unreliable and inconsistent. It is unreasonable to ask consumers to absorb additional costs to correct administrative or planning mistakes. Electricity is a basic service and access to it is essential for daily living, economic activity, and dignity. South Africans already contribute heavily through income tax, VAT, fuel levies, municipal rates, and countless other charges. To continuously shift the burden onto consumers amounts to double payment for the same failures. Accountability must rest with those who made the decisions, approved the budgets, and mismanaged the system. Consumers should not be punished financially for inefficiency, poor governance, or regulatory errors. Any shortfall caused by miscalculation or mismanagement should be addressed internally through cost control and accountability, not by further increasing tariffs for the public.	Joanita	Western Cape		employed individual

	2026-01-08 14:53:19	No I do not	All of the above – we should not pay for government blunders	I first thought this was a joke, no sane government can be this harmful to its citizens, who are currently getting poorer by the day. To begin with, NERSA compares Eskom tariffs internationally by using the wrong exchange rate, the speculative moneymarket rate instead of purchase parity rate. But that is not the error we are trying to rectify, the error is about the estimate of asset values, which is like a lottery without accountability for management's performance and control. It is hogwash as it is now. Not only is this aggressive unrepentant oppression by government entities against citizens, it also comes at a time when (due to lack of focus by government) the economic meltdown is hitting citizens hardest. The proposals by NERSA are 100% unacceptable, and NERSA should either be disbanded for its "error" or reformed with private sector input. An exhaustive audit of all costs at NERSA and Eskom should be the first step before any further decisions are made with our money, given the confession made by erring officials.	Marthinus	Gauteng		business owner
	2026-01-08 14:53:18	No I do not	All of the above – we should not pay for government blunders	The cost of electricity is too high. Consumers should not be forced to pay for Eskom’s errors and corruption.	Archie	Western Cape		employed individual

	2026-01-08 14:38:19	No I do not	All of the above – we should not pay for government blunders	Although I strongly object to being part of the general public who will have to pick up the bill, the question is how to recoup the loss. In my opinion, it should be clearly stated who is responsible for the loss (apart from the error). For example the enormous overrun and delay on the construction of the 2 power stations (Medupi and Kusile). All those responsible should pay towards the billions now needed. And I am sure there are other scandalous events that have contributed to this horrific situation. Why should the public always be the suckered who have to cough up?	Michael	Gauteng		retired
	2026-01-08 14:38:19	No I do not	All of the above – we should not pay for government blunders	Who can afford it. Over more than 10 years, the price of electricity has become unaffordable and now they want to add on government theft and Nersa's lack of mathematical skills to the mix . Let the government stop stealing and pay the R76 billion to Eskom	Elizabeth	Gauteng		business owner
	2026-01-08 14:38:12	No I do not	All of the above – we should not pay for government blunders	I submit this comment as an ordinary electricity consumer and pensioner who is already under pressure from rising living costs. I strongly object to any proposal that requires consumers to pay Eskom an additional R76 billion as a result of NERSA's own calculation errors. Affordability: Consumers should not be held financially liable for regulatory mistakes. The omission of depreciation and returns in previous asset calculations was not caused by electricity users, nor was it within their control. Forcing the public to now fund these errors through higher tariffs violates basic principles of fairness and accountability. Reliability: South Africans are being asked to pay "full price" for infrastructure that is demonstrably unreliable. Load shedding, aging plant, poor maintenance, and repeated breakdowns have become the norm. It is unreasonable to demand higher tariffs for assets that have failed to deliver a stable and dependable electricity supply. Efficiency: Eskom's long-standing problems—construction delays, cost overruns, operational inefficiencies, and weak governance—are well documented. Using tariff increases to patch cash-flow shortfalls shifts the consequences of mismanagement onto consumers, rather than addressing the root causes within Eskom and its regulatory oversight. The High Court ruling required NERSA to correct its calculations. It did not require consumers to be punished for those corrections. Regulatory credibility depends on the regulator absorbing its own errors, not socialising them across a population already struggling to afford basic services. I urge NERSA to reject any tariff adjustment that seeks to recover historic regulatory mistakes from electricity users and to pursue solutions that prioritise accountability, efficiency, and affordability.	Rick	Western Cape		retired
	2026-01-08 14:38:05	No I do not	All of the above – we should not pay for government blunders	At the end of the day the taxpayer pays. The fat cat ANC cronies sit pretty. Maybe if the ANC can stop the looting and corruption, the damage can be recovered. But nothing happens to them. Life just feels like a constant uphill battle.	Isolde	Western Cape		employed individual

	2026-01-08 14:30:16	No I do not	All of the above – we should not pay for government blunders	All we do is pay for all the Governments Blunders !!!, the only way for them to steel more money !!!	Deb	Gauteng		
	2026-01-08 14:30:13	No I do not	All of the above – we should not pay for government blunders	When I make a mistake/blunder, then I am personally responsible for rectifying it. The same applies to them.	Jeannie	KwaZulu-Natal		self-employed
	2026-01-08 14:30:10	No I do not	All of the above – we should not pay for government blunders	Affordable and stable electricity pricing is critical for economic growth, job creation, and investor confidence. I urge NERSA and Eskom to reconsider further tariff increases and explore alternative solutions. South African tax-payers are routinely punished with higher taxes to finance the billions-of-rand blunders by SOEs, corruption within SOEs & luxury lifestyles of senior employees & board members if SOEs. I have no doubt that the voice if taxpayers will be ignored, as always, in favour of decisions that exacerbate the monstrous pressure on law-abiding tax-payers. I simply hope that when the pressure on the national fiscus causes its complete collapse, those responsible will be among those slaughtered by rebelling masses in the Msanzi meltdown Enough is Enough, the people need speak up . . . Absolutely no way that consumers are responsible for Eskom or the regulator's mistakes. 2026 time for change. Continued electricity tariff increases are severely undermining the competitiveness of South African businesses, particularly in the manufacturing sector. Rising energy costs are eroding profitability, forcing companies to scale down operations, retrench employees, or close entirely. At the same time, Eskom is producing surplus electricity as businesses and households increasingly move to alternative energy solutions such as solar and wind power in response to high tariffs and supply uncertainty. Rather than further increasing tariffs, Eskom should focus on selling surplus electricity to neighbouring countries to recover costs and generate foreign currency, without placing additional strain on an already fragile economy.	Ernst	Western Cape		retired
	2026-01-08 14:30:05	No I do not	All of the above – we should not pay for government blunders	Eskom should look at their remuneration structure..... So many employees now earning more than a million..... They should get rid of their 'dead wood'..... Their overtime worked (claimed) and paid for is gross..... Can't decide their restructure, more top jobs, more millionairs..... Money has not got the same value to the top earners/decision makers as to the man-in-the-street, i.e. their clients.....	Hanneke	Gauteng		retired
	2026-01-08 14:30:04	No I do not	All of the above – we should not pay for government blunders	This is becoming a joke if ESKOM renewed the infrastructure and didn't place all the money in their back pockets we would not be struggling with loadshedding still or any issues and the electricity would be 10 times cheaper. 	2026-01-08 14:27:13	No I do not	All of the above – we should not pay for government blunders	Government corruption and inefficiency is the root cause of the problem. We are sick of the incompetence etc... Nk more public money	Candy	Western Cape		self-employed
	2026-01-08 14:27:04	No I do not	All of the above – we should not pay for government blunders	Why should the public have to pay for the mistakes of highly paid individuals, who should know that assets decreases annually, and who should have schedules for continual maintenance, replacement plans or addition to the asset base!? Slash salaries of CEO, top management, and the management of finance, risk and auditors departments/ personnel. Improve the electricity collections!!!	Nadema	Western Cape		unemployed individual
	2026-01-08 14:26:45	No I do not	All of the above – we should not pay for government blunders	It’s simply a no! I am not sure why it should even be a consideration that the consumer pay for mistakes and mismanagement	Caroline	Free State		business owner
	2026-01-08 14:26:44	No I do not	All of the above – we should not pay for government blunders	Because the governing party is ultimately responsible for this mess they should find a way to foot the bill without involving the public.	Trevor	Gauteng		retired
	2026-01-08 14:26:37	No I do not	All of the above – we should not pay for government blunders	For too long we have been expected to look the other way and just pay more for government official 'mistakes' and downright theft of tax monies. Now we have to pay more for electricity when we already pay so much and every few months prices just keep going up. We're constantly expected to pay for services we don't receive/use at all (TV licence for example) or for poor service (electricity that's constantly off in various areas). Now we are expected to pay even more for government 'mistakes'. This is nonsense and I do not support it at all.	Lize	Gauteng		self-employed
	2026-01-08 14:26:35	No I do not	All of the above – we should not pay for government blunders		Yvette	Western Cape		employed individual
	2026-01-08 14:26:24	No I do not	All of the above – we should not pay for government blunders	All the government has to do, is take back every cent that has been stolen in various ways, then they will have so much money they won't know what to do with it!!!!	Lorraine	Western Cape		retired
	2026-01-08 14:26:18	No I do not	All of the above – we should not pay for government blunders	Imagine being able to run your business where you are a monopoly and you can charge your customers based on your required return on your assets!! The higher you value your assets, the higher your selling prices. What a wonderful way to run your business. And then you wonder why your customers buy less from you and continually look for ways to go off grid. As volumes decline, rates will continue to skyrocket so you can get the return you decided you need. A death spiral in anybody’s book	Stuart	Gauteng		retired
	2026-01-08 14:26:15	No I do not	All of the above – we should not pay for government blunders		Heather	Western Cape		retired
	2026-01-08 14:26:03	No I do not	All of the above – we should not pay for government blunders	The public should not be expected to bear the burden of an absurd miscalculation by NERSA of the cost of electricity. NERSA itself and NOT Eskom must surely be held accountable for its very large error and NOT the electricity using public. Anything else cannot surely be acceptable to the public!	David	Gauteng		
	2026-01-08 14:25:58	No I do not	All of the above – we should not pay for government blunders	Eskom, Nersa and ANC have made numerous mistakes after each other, and then without a blink of the eye or any remorse , they look to the citizens of the country to pay for their incompetence. Enough is enough, it is high time the powers that be, get off their pedestals and start taking responsibility for their idiotic mistakes. They need to cut their HUGH salaries, cut down on their 'top of the range' luxury cars, the mansions they live in and their lavish lifestyles, and put the citizens first..... that's what they're always saying...'for every citizen' THOSE are only words they use to WOO the citizens, for a vote.	Veronica	Western Cape		retired
	2026-01-08 14:25:37	No I do not	All of the above – we should not pay for government blunders	As citizens of this country, our government is treating us like idiots, taking advantage and not carrying how we make ends meet, as long as their pockets are lined	Vicky	Gauteng		employed individual

	2026-01-08 14:25:21	No I do not	All of the above – we should not pay for government blunders		Mike	KwaZulu -Natal		business owner
	2026-01-08 14:25:19	No I do not	All of the above – we should not pay for government blunders	Continued electricity tariff increases are severely undermining the competitiveness of South African businesses, particularly in the manufacturing sector. Rising energy costs are eroding profitability, forcing companies to scale down operations, retrench employees, or close entirely. At the same time, Eskom is producing surplus electricity as businesses and households increasingly move to alternative energy solutions such as solar and wind power in response to high tariffs and supply uncertainty. Rather than further increasing tariffs, Eskom should focus on selling surplus electricity to neighbouring countries to recover costs and generate foreign currency, without placing additional strain on an already fragile economy. Affordable and stable electricity pricing is critical for economic growth, job creation, and investor confidence. I urge NERSA and Eskom to reconsider further tariff increases and explore alternative solutions.	Theuns	Gauteng		employed individual
	2026-01-08 14:25:08	No I do not	All of the above – we should not pay for government blunders	Absolutely nonsense to expect taxpayers to pay for government blunders	Andre	Western Cape		
	2026-01-08 14:24:57	No I do not	All of the above – we should not pay for government blunders	Why must the citizens pay for the ineptitude of the all parties concerned. The citizens are already drowning in debt.	Kimayne	Gauteng		unemployed individual

	2026-01-08 14:15:11	No I do not	All of the above – we should not pay for government blunders	It is time that South Africans have a say and Government Blunders should only affect those responsible and not the Consumer.	Francois	Western Cape		retired
	2026-01-08 14:15:02	No I do not	All of the above – we should not pay for government blunders	I strongly disagree with this proposal. It is fundamentally unjust to transfer the financial consequences of prolonged mismanagement, governance failures, and poor decision-making onto the public—many of whom are already under severe economic strain. Ordinary South Africans should not be expected to subsidise mistakes for which they bear no responsibility. Electricity users have already endured years of escalating tariffs, unreliable supply, load shedding, and declining service quality. To now impose an additional financial burden—effectively penalising consumers for systemic failures within Eskom and government oversight structures—is neither reasonable nor sustainable. NERSA's mandate is to protect the interests of the public while ensuring a viable energy sector. Forcing consumers to absorb the cost of institutional failures contradicts this mandate. Accountability must rest with those responsible for the decisions, governance, and financial management that led to Eskom's current position—not with households, small businesses, and industries struggling to survive. I therefore urge NERSA to reject any mechanism that shifts Eskom's past mistakes onto electricity users and instead pursue solutions that prioritise accountability, efficiency, and meaningful reform within the energy sector.	Karl	Western Cape		employed individual
	2026-01-08 14:14:54	No I do not	All of the above – we should not pay for government blunders	Electricity is already expensive and they still want the to pay for their mistake. What a joke. Not our problem!!!	Dina	Western Cape		employed individual

	2026-01-08 14:14:36	No I do not	All of the above – we should not pay for government blunders	The financial conduct and management of Escom is totally unacceptable. Their staff is overpaid and the service is not acceptable. The projects prices are inflated and alwAys behind schedule because they make use of corrupt contractors and unqualified BEE workforce. Their complete financial structure should be re evaluated and upgraded in order to render a market related service to business and the public. The public should also not be held responsible to subsidise squatters and people who does not pay for electricity. Escom should also be held liable when business lose income caused by load shedding and power outages due to their incompetence. Why are we always held liable to be paying for the incocompetence of government, Nerds and Escom	David	Gauteng		business owner
	2026-01-08 14:14:34	No I do not	All of the above – we should not pay for government blunders	Why should citizens always have to cough up and pay for other's bad behaviour, mistakes and ignorance? Let Eskom fit the bill themselves. Electricity is already unaffordable in most homes. It's only the favoured that are still able to use this commodity in their homes.	Daphne	KwaZulu -Natal		retired
	2026-01-08 14:14:22	No I do not	All of the above – we should not pay for government blunders	Why should the people pay for someone else's mistake? The ANC should pay for their own incompetance! I think this is digusting! Furthermore, all this does is full more rights and capabilities from the people. The government is stealing from the people in broad daylight now, having their own rot revealed. Death to the post-Madiba ANC!	Timothy	Gauteng		employed individual
	2026-01-08 14:14:12	No I do not	All of the above – we should not pay for government blunders	Due to government incompetence and lack of forward planning, Eskom has deteriorated from the best Electricity Utility in the world to the present sad state of affairs. Lack of accountability for Eskom management is the cause of cost overruns, poor maintenance and rampant corruption. The public may not be held accountable for the combination of Government incompetence, poor Eskom management and NERSAs' inability to do proper analysis and assessment.	Arthur	Eastern Cape		retired
	2026-01-08 14:13:57	No I do not	All of the above – we should not pay for government blunders	Not again?!!!	Louise	Western Cape		retired
	2026-01-08 14:13:51	No I do not	All of the above – we should not pay for government blunders	Affordability: I should not be paying for NERSA's calculation errors. I am buying electricity from them and that is what they are contracted to supply. Anything else is unlawful add-on and should not be applied unilaterally. Reliability: I should not be paying for aging, unreliable infrastructure. For Eskom to meet its side of the deal and keep me as a consumer in electricity supply, their infrastructure and any improvements needed should be catered for long in advance and not fall to the man on the street to pick up the tab for their failure to do so. Efficiency: And no, consumers should definitely not fund Eskom's cash flow and construction delays. In what world do they live in that their clients pay penalties for their failures as well as ridiculous tarriffs for supply? They can't have it both ways!	Jenny	KwaZulu -Natal		business owner
	2026-01-08 14:13:51	No I do not	All of the above – we should not pay for government blunders	Affordability: I should not be paying for NERSA's calculation errors. 	2026-01-08 14:07:09	No I do not	All of the above – we should not pay for government blunders	Eskom's financial crisis is the result of long-term mismanagement, weak oversight, and failed governance. South Africans already pay for these failures through load-shedding, repeated bailouts (using our tax money), and rising electricity prices. Nersa now proposes that the public also absorb the cost of regulatory errors. This unfairly shifts responsibility away from decision-makers and onto ordinary citizens and businesses. South Africans did not design energy policy, appoint Eskom leadership, or make regulatory miscalculations, yet we are expected to fund all of the consequences. Regulatory and governance failures should be addressed within Eskom's restructuring and state support processes, not through higher electricity tariffs. Nersa must protect consumers from past mistakes, not entrench them. Accountability must sit with those who made the decisions, not with the public who must pay for them.	Dane	Western Cape		
	2026-01-08 14:06:48	No I do not	All of the above – we should not pay for government blunders	The consumer is already paying for the corruption, incompetence, bloat and cronyism at Eskom via the more than 600 percent increase in tariffs since 2008. This must now stop. Eskom needs to fix all of these issues and resolve their mistakes and errors on their own cost.	Bernhard	Gauteng		business owner
	2026-01-08 14:06:34	No I do not	All of the above – we should not pay for government blunders	Even considering burdening the user with this blunder is absurd. I refuse to pay for this blunder and will make other plans not to use electricity.	David	Eastern Cape		self-employed

	2026-01-08 14:01:25	No I do not	All of the above – we should not pay for government blunders	The incompetent responsible officials and those involved in looting should be held accountable and not the public.	Gerrit	KwaZulu -Natal		
	2026-01-08 14:01:19	No I do not	All of the above – we should not pay for government blunders	A miscalculation of maybe a couple of hundred thousand I guess could be "acceptable" NOT R76 BILLION!!!!! How is it even possible to make a mistake like this. It is also then deplorable that us as the citizens of south Africa have to now cover this "miscalculation". Eskom - yet another bottomless pit that is an SOE. Billions down the drain all the time. It is not the citizens fault that Eskom isn't run correctly, and by what is clearly a totally incompetent workforce, corruption and just looking after their cronies. And after this "miscalculation" on NERSA's part , equally if not more so INCOMPETENT. It is becoming more and more suspicious that Eskom and NERSA are in cahoots with each other, allowing countless increases for rapidly deteriorating infrastructure, because this corrupt government has zero concept of maintenance, just corruption and lining their own pockets. To think that "back in the day" Eskom was THE most profitable SOE and WE were suppling electricity to our neighbouring countries, Eskom was THRIVING. Roll in the ANC and all SOE's have all gone to the proverbial dogs. Shameful, embarrassing, disgraceful. And the fat cats in government just sit back and let this all happen, disgusting.	Nic	KwaZulu -Natal		business owner
	2026-01-08 14:01:15	No I do not	All of the above – we should not pay for government blunders	The public cannot continue to pay for poor financial management and planning. The cost of living in South Africa is already high and will become even more unaffordable for ordinary South Africans.	Travis	Western Cape		employed individual

	2026-01-08 13:57:45	No I do not	All of the above – we should not pay for government blunders	So tired of having the middle class, who are already stretched so thin, being forced to pay for government wastage!	Nazreen	Gauteng		employed individual
	2026-01-08 13:57:43	No I do not	All of the above – we should not pay for government blunders	Our pensions are not being increased so where do we find the extra money. They must pay for their mistakes.	Mari	Western Cape		
	2026-01-08 13:57:33	No I do not	All of the above – we should not pay for government blunders		Basil	Gauteng		
	2026-01-08 13:57:28	No I do not	All of the above – we should not pay for government blunders	Eskom and Nersa has shown over the past years that they are untrustworthy and incapable of running our power plants and infrastructure well. Looking at their inability for the past 25 years to build more capacity, and wasting time and money on development of new plants like Medupi for example. It was delayed massively, wasted millions, if not billions in building it, and it's still not working reliably. Now, after they've shown that they are capable of stealing millions through corruption, and can't deliver on promises, we, the public, have to pay again for their mess? No more. Stop corruption. You'll have millions available to you then. Allow for more private generation.	Le-Roux	Gauteng		employed individual
	2026-01-08 13:57:23	No I do not	All of the above – we should not pay for government blunders	Dues to the the vested interests of, and capture by the 'coal mafia' Eskom's aging and dilapidated CFPS fleet is being kept running way beyond its physically reasonable and financially beneficial lifetime. Min Mantashe must be fired asap, and this fleet closed asap (obviously in an appropriately staggered rate), with investments going into new, clean RE, the JET, and grid capacity, not keeping unaffordable, polluting dinosaurs afloat. In this massively important sector, we need transparent, accountable, responsible decisions in the long-term national interest, not short-term criminal corruption, and murky decisions made behind closed doors..	Nicholas	Limpopo		self-employed
	2026-01-08 13:57:05	No I do not	All of the above – we should not pay for government blunders	So not only are we fined (Let's call it what it is) for putting up solar as well as actually putting excess electricity back into the grid AND have to deal with a room temperature IQ kleptocratic monopoly on a vital cornerstone of the country's infrastructure but now ALSO have to bail them out to the tune of roughly 3.5 months worth of the entire country's combined social grants because they can't do their jobs. Given that the auditor general along with many other independent bodies estimate that roughly R50-200 billion is lost annually to corruption, inefficiency and wasteful expenditure AS WELL AS the fact that over the last decade SOEs have received an estimated R520.6 billion in bailouts WITHOUT producing positive results or returns its going to be an extremely firm and far more polite than is deserved NO from me. Either give up the monopoly/money grabbing pot or admit that the few remaining law abiding south african citizens are being held hostage. So to summarize: No, stop stealing and fix your own f%$k ups yourselves just like the rest of us, you criminal scum.	Gareth	Gauteng		
	2026-01-08 13:56:56	No I do not	All of the above – we should not pay for government blunders		Andre	Western Cape		retired
	2026-01-08 13:56:48	No I do not	All of the above – we should not pay for government blunders	Electricity tariffs has been increasing far above inflation increases for years. 	2026-01-08 13:51:24	No I do not	All of the above – we should not pay for government blunders	Nersa’s actions could be unconstitutional and unlawful. Nersa itself admits to the billions of rands worth of errors in its revenue calculations so why should the public pay? Increased tariffs lead to businesses closing down, which doesn’t help the employment rate. Big business will leave South Africa to go to countries where it is easier to do business. Electricity is already unaffordable for many ordinary South African residents and businesses. While the man in the street is paying ridiculous fees for electricity, the media indicated that the integrated report for the 2025 financial year has revealed that the combined remuneration of its non-executive directors increased by over R10 million in a single year. The point here is that Eskom does nothing to control the cost side. Nersa execs will probably still get their bonuses, as will the head honchos at Eskom, even as it bleeds billions. What’s new?	Karen	Gauteng		employed individual
	2026-01-08 13:51:15	No I do not	All of the above – we should not pay for government blunders	Due to load shedding & the high cost of electricity private citizens, including myself installed solar systems on our homes. This in effect supplied Escom with an entire power station. I think we’ve done enough now. Time to stand up & pay for your mistakes yourselves.	Keith	Western Cape		
	2026-01-08 13:51:10	No I do not	All of the above – we should not pay for government blunders	Let the powers that be who made the errors..pay!!! And what about those who do not pay at all..?	Pam	Western Cape		retired
	2026-01-08 13:51:09	No I do not	All of the above – we should not pay for government blunders	The situation is unacceptable. Over the past 30 years, the quality of life for many citizens has deteriorated significantly. Crime has escalated to alarming levels, and there is a widespread perception of poor governance and lack of accountability. There is a clear need for competent leadership, ethical governance, and decisive action to restore public trust, uphold the rule of law, and ensure the safety and prosperity of OUR country.	Derrick	Gauteng		employed individual
	2026-01-08 13:51:01	No I do not	All of the above – we should not pay for government blunders	This is what happens when you have unqualified persons throughout government and all SOE's. It has been highlighted many times, that when government blunders, the easiest way out, is to farm it off to the already burdened taxpayer.	Wilson	North West		employed individual
	2026-01-08 13:51:00	No I do not	All of the above – we should not pay for government blunders	It is enough. Eskom needs to self-fund; instead, they are forcing the consumers to pay for their corruption/incompetence/mismanagement, etc. I have removed my home from the grid and am working to remove my office from the grid as well. The more people leave the grid, the harder it will be for Eskom to restore a financial viable operating status. The sooner Eskom fails, the sooner the private sector can take over and resolve this issue. The longer it takes for the private sector to take over, the more clients Eskom will lose, and the less revenue it will generate. Once someone becomes independent of the grid, there is no way to bring them back.	Pedro	North West		self-employed
	2026-01-08 13:50:59	No I do not	All of the above – we should not pay for government blunders	Get rid of the extra baggage in all government departments and cut down all their salaries. That's one way of paying for the blunders.	Abdul	Eastern Cape		retired
	2026-01-08 13:50:55	No I do not	All of the above – we should not pay for government blunders		Jeanne	Gauteng		
	2026-01-08 13:50:46	No I do not	All of the above – we should not pay for government blunders	ESKOM is obliged to revise their business model in order to make electricity production more efficient. They have a bloated staff compliment who are notoriously overpaid and unproductive. In addition, the tendrepreneur deals in place due to BEE et al require revision and cancellation in some cases (in order to halt the ESKOM gravy train). Sub-contractors and suppliers to ESKOM must have their pricing models reviewed in order to reduce majorly inflated revenues. Additional electricity suppliers must be allowed on to the grid in order to provide competition to ESKOM. Politicians are far too involved in ESKOM business, and they do not have the expertise to run a business - they're in it for feathering their own nests. From my point of view, it is then, and only then, that ESKOM will potentially have the right to increase tariffs. Until then from my point of view I don't believe that an increase in tariffs is justified.	Pierre	Eastern Cape		retired

	2026-01-08 13:50:38	No I do not	All of the above – we should not pay for government blunders	It is already a struggle to keep my own business going, why should I pay for corruption and miscalculation of Government and especially NERSA and Eskom also? They don't support to keep the economy of SA growing.	Annatjie	Mpumalanga		self-employed

	2026-01-08 13:46:48	No I do not	All of the above – we should not pay for government blunders	Remember that Eskom and Nersa work together under the ANC direction. There is definitely an entanglement. How could large technical units such as Nersa and Eskom miss a simple concept like Depreciation. If you cannot raise the cost of electricity through Eskom, then raise it through Nersa. Remember how many of the technical Ministers entered the Cabinet poor and left very rich. Eskom has been feeding the ANC for 30 years. I think repayment is due. Further, the corrupt activities have not been eliminated.	Stephen	Gauteng		business owner
	2026-01-08 13:46:47	No I do not	All of the above – we should not pay for government blunders		Wayne	Gauteng		business owner

	2026-01-08 13:46:30	No I do not	All of the above – we should not pay for government blunders	Life in South Africa for all of us is becoming far too expensive. And now with this, NERSA wanting to recover money from the South Africans, and what is the South African Government going to do to stop this?	Erika	Gauteng		employed individual
	2026-01-08 13:46:23	No I do not	All of the above – we should not pay for government blunders	This is absurd. Fire NERSA as well as they serve no purpose other than costing more money. Just look at the rate increases to date approved. Just give us the option to not having to pay anything when not using ESKOM so it can self-destruct.	Marius	Western Cape		business owner
	2026-01-08 13:46:15	No I do not	All of the above – we should not pay for government blunders		Naomi	Gauteng		self-employed
	2026-01-08 13:46:12	No I do not	All of the above – we should not pay for government blunders	If consumers have to pay ridiculous electricity prices because of ANC incompetence and corruption, at the very least they should punish the people who caused this disaster. That should be the first thing - at present, it doesn't look like they are even interested.	Aharon	Gauteng		
	2026-01-08 13:46:10	No I do not	All of the above – we should not pay for government blunders	I cannot be personally held accountable for other organizations and or people's mistakes. The cost of living is already so high in this country and each year they put more and more strain on the middle class to bale out their blunders. They are not held accountable for my mistakes I make at work, I should be held liable for theirs.	Dale	Gauteng		employed individual
	2026-01-08 13:45:55	No I do not	All of the above – we should not pay for government blunders	Eskom's costs are out of control, and expecting the consumer to foot the bill is amoral and indefensible. Coal costs are not competitive, and a return to the model of tied collieries is essential. The wage and salary bill for government (Eskom) employees is exorbitant. Eskom's workforce is approximately double the world norms, and needs to be streamlined and made efficient. The unreliability of the installed plant is a direct reflection on the lack of maintenance of the equipment, and needs to be radically improved. I close with the old adage, cut your coat to suit your cloth, there is only a finite amount of money available, and competent technocrats are needed to run this utility, not political hacks. 	2026-01-08 13:40:20	No I do not	All of the above – we should not pay for government blunders	It is high time that this Government and all it's SOE's stop covering up their poor performance and lack on knowledge by increasing tariff's. Not to mention the exorbitant salary's that they pay to many people for mediocre work and outcomes. It is just not good enough.	Bryan	KwaZulu -Natal		self-employed
	2026-01-08 13:40:16	No I do not	All of the above – we should not pay for government blunders	We are tired of the ANC incompetence and corruption. We should not be held accountable for the failure of the administrators who are mostly incompetent cadres. Eskom has failed to build or maintain infrastructure, failed to collect from non paying municipalities and townships like Soweto where there is a non paying culture. Electricity is already far too expensive. Cut the bloated staff complement, overpaid fat salaries, all the perks that the tax payer has subsidising and all the corrupt and overpriced tenders. SHOCKING!!!	Pat	Western Cape		retired
	2026-01-08 13:40:13	No I do not	All of the above – we should not pay for government blunders	I strongly object to any tariff increases that require the public to absorb the consequences of Eskom and NERSA's R76 billion calculation error. South Africans are already burdened by an escalating cost of living, unreliable electricity supply, and years of mismanagement within the energy sector. It is neither fair nor reasonable to expect consumers to pay for mistakes that were not of their making. 1. Affordability: Should consumers pay for NERSA's calculation errors? No. A regulatory or accounting error of this magnitude must be resolved within government and Eskom's internal financial processes. It should be corrected through proper auditing, internal accountability, or fiscal intervention, not through tariff hikes imposed on households and businesses already under strain. 2. Reliability: Should consumers pay full price for aging, unreliable infrastructure? No. Consumers cannot be expected to pay premium rates for infrastructure that consistently fails to deliver reliable service. Load shedding, equipment failures, and operational inefficiencies demonstrate that the value received does not match the price being demanded. 3. Efficiency: Should consumers fund Eskom's cash-flow problems and construction delays? No. Chronic delays, cost overruns, and inefficiencies are the result of internal management issues. These must be addressed through operational reform, cost-cutting measures, and accountability within Eskom, not by shifting the financial burden onto the public. Conclusion The public should not be penalised for errors, inefficiencies, or mismanagement within Eskom or NERSA. Government must explore alternatives such as: absorbing the error through national financial processes, enforcing accountability within Eskom, reducing unnecessary expenditure, and implementing structural reforms to improve efficiency. Tariff increases cannot be the default solution to internal failures. South Africans deserve transparency, accountability, and fair treatment, not another financial burden.	ANGELIQUE	Gauteng		employed individual
	2026-01-08 13:40:12	No I do not	All of the above – we should not pay for government blunders	They can go fly in hell. I refuse to lay for their stuff up. What about all the so called billions profits they are talking about, pay this stuff up with that. Stop paying the huge bonuses for so called performance bonuses. Eskom staff already earn huge salaries.	Anton	Gauteng		
	2026-01-08 13:40:02	No I do not	All of the above – we should not pay for government blunders	What is being done with our tax money, other that being used for the over inflated government and parliament? 	2026-01-08 13:36:41	No I do not	All of the above – we should not pay for government blunders	The taxpayers should not be held liable for the errors and inefficiency of government. If we had a real and efficient government with the interests of the citizens at heart, there would be more job creation, better education and subsequently more taxpayers to spread the load more evenly. The failures of inept government are now the responsibility of a small group of citizens called tax payers. We should get rid of cadres who are in positions which they cannot handle and where they cannot justify being in that position. Ability to do the job must come first.	Paul	KwaZulu-Natal		retired
	2026-01-08 13:36:33	No I do not	All of the above – we should not pay for government blunders	Government is incompetent	Carol	Gauteng		employed individual
	2026-01-08 13:36:15	No I do not	All of the above – we should not pay for government blunders	I hereby submit my objection to NERSA's consultation paper proposing that South African energy users bear the cost of Eskom's additional R76 billion liability. This plan is fundamentally unjust, economically damaging, and constitutionally questionable. Violation of Administrative Justice (PAJA): Forcing consumers to pay for Eskom's mismanagement undermines the principle of lawful, reasonable, and procedurally fair administrative action. Contravention of Section 195 of the Constitution: Public administration must be accountable and transparent. Passing corporate blunders onto households and businesses erodes accountability. Court Precedent: The December 2025 court ruling rejecting the settlement between NERSA and Eskom demonstrates judicial recognition that such cost transfers are unlawful and unfair. Punishing Consumers for Mismanagement: Ordinary South Africans are already burdened by high tariffs, inflation, and unemployment. Adding R76 billion to tariffs will deepen poverty and inequality. Threat to Business Competitiveness: Increased electricity costs will cripple small and medium enterprises, discourage investment, and accelerate deindustrialization. Unfair Burden on Vulnerable Groups: Pensioners, low-income households, and rural communities will be disproportionately affected, violating the principle of equity in public policy. Eskom Must Bear Responsibility: The utility's leadership and board must be held accountable for financial mismanagement. Consumers cannot be treated as guarantors of incompetence. Government Oversight: Treasury and Parliament should explore recovery through internal audits, asset restructuring, and executive accountability rather than tariff hikes. Alternative Solutions: Debt restructuring with strict conditionality. Independent forensic audits to identify and recover misused funds. Accelerated investment in renewable energy to reduce reliance on Eskom's failing infrastructure. Conclusion NERSA's proposal to recover Eskom's R76 billion through consumer tariffs is unacceptable. It violates constitutional principles, undermines economic stability, and unfairly punishes citizens for failures they did not cause. I strongly urge NERSA to withdraw this plan and pursue accountability measures that target Eskom's management and governance structures instead of burdening the public. Not a chance. This government has already cost me my livelihood and my retirement. I could never endorse their "mistakes" They are the ones that must learn to live with the error of their fraudulent ways	Graeme	Western Cape		
	2026-01-08 13:34:23	No I do not	All of the above – we should not pay for government blunders	This government or more so the cANCer government must pay for their cronies errors. We are all stretched to beyond our limits.	Lindy	Gauteng		employed individual
	2026-01-08 13:34:22	No I do not	All of the above – we should not pay for government blunders		FC	Western Cape		retired
	2026-01-08 13:34:17	No I do not	All of the above – we should not pay for government blunders		Hildegarde	Western Cape		retired
	2026-01-08 13:34:13	No I do not	All of the above – we should not pay for government blunders	It is the responsibility of the government to fix the wrongs of state owned enterprises because they belong to the government. Governments always have a way of securing funds without the input of it's citizens as they did during the COVID plandemic. Government just needs to apply it's mind and think of scapegoats other than it's overburdened citizens.	Ismail	Gauteng		self-employed
	2026-01-08 13:34:10	No I do not	All of the above – we should not pay for government blunders	Eskom needs to relook procurement processes - they are still overpaying heavily as a result of BEE policies, they are overstaffed relative to other generation companies world-wide and the renumeration levels of those staff is also disproportionately high relative to other similar global companies. Eskom needs to seriously cut costs, implement efficiencies and not rely on consumers and business to fund their inefficiency and bad management.	Wendy	Western Cape		business owner
	2026-01-08 13:34:04	No I do not	All of the above – we should not pay for government blunders	Eskom must be left to face free market forces and its monopoly must be terminated now.	ian	Gauteng		self-employed
	2026-01-08 13:34:04	No I do not	All of the above – we should not pay for government blunders	So no maintenance, high salaries to top officials and no alternative sources of power such as solar offered to consumers has been a disaster. Now the users /public are being asked to pay even higher prices for this total mismanagement. If this was a listed company it would be forced to declare insolvency.	Veronica	Gauteng		self-employed
	2026-01-08 13:33:50	No I do not	All of the above – we should not pay for government blunders	No we cannot pay for goverment blunders	Nompie	Gauteng		retired

	2026-01-08 13:28:55	No I do not	All of the above – we should not pay for government blunders	Enough is enough. The public is not going to pay for NERSA's blunders, nor for Eskom's aging infrastructure, nor for Eskom's incompetence and corruption.	Jill	Western Cape		
	2026-01-08 13:28:49	No I do not	All of the above – we should not pay for government blunders		Gideon	Gauteng		retired
	2026-01-08 13:28:44	No I do not	All of the above – we should not pay for government blunders	The rate of electricity tariff increases far outweighs inflation and makes access to electricity a luxury as opposed to a necessity. These tariff increases are unsustainable as cost of living is already high. We cannot continue on this trajectory without negatively impacting households and industry leading to disinvestment as costs of manufacturing is high when compared to other countries where it is cheaper. Such disinvestment will lead to job losses. High electricity for households will imply bigger debt books at municipalities and illegal connections. Social unrest will follow so Nersa and Eskom must carefully consider these economic impacts and not unilaterally increase the tariffs.	Chetan	Gauteng		
	2026-01-08 13:28:34	No I do not	All of the above – we should not pay for government blunders	The time for bloated, inefficient, SOE's run by incomoetent cadres to either make it on their own (as is the case with private enterprises) or face the music. Why should ee, the overburdened SA taxpayers keep funding underperforming SOE's.	Ian	Gauteng		retired

	2026-01-08 13:19:00	No I do not	All of the above – we should not pay for government blunders	Their mistake, their incompetence, their responsibility. Taxes are already crippling, we continue paying for mistakes we didn't make. It's time for the government members and their chronies to accept responsibility and pay up. Enough is enough.	Sherize	Gauteng		employed individual
	2026-01-08 13:18:59	No I do not	All of the above – we should not pay for government blunders	I strongly oppose the proposed electricity tariff increases. Consumers should not be forced to pay for NERSA's R76 billion calculation error. This mistake was admitted by the regulator, and it is unjust to shift the burden onto households and businesses already struggling with the rising cost of living. South Africans are being asked to pay full price for aging, unreliable infrastructure while enduring constant load shedding. Tariffs must reflect the actual quality of service delivered, not theoretical returns on assets that fail to provide consistent electricity. Furthermore, Eskom's inefficiencies, cash flow problems, and construction delays are management failures, not consumer responsibilities. Increasing tariffs to cover these issues rewards poor governance and removes incentives for reform. My answer is clear: NO. Accountability must rest with NERSA and Eskom, not the public. Consumers deserve fair pricing, reliable service, and responsible regulation.	Pramaseelan	Gauteng		business owner
	2026-01-08 13:18:53	No I do not	All of the above – we should not pay for government blunders	Why must the already burdened public pay for their mistakes! We must fight this to all costs!	Fredrick	Western Cape		retired

	2026-01-08 13:17:24	No I do not	All of the above – we should not pay for government blunders	No insurance company would insure the ministers for Professional Indemnity - for cases like these. Deduct these costs from their huge salaries.	Marius	Western Cape		business owner
	2026-01-08 13:17:18	No I do not	All of the above – we should not pay for government blunders	The recent High Court ruling threw out the Eskom-Nersa settlement that would have let Eskom recover around R54 bn (part of the bigger ~R76bn issue) without public input — the court said Nersa must redo the process with proper transparency. Business Day Eskom's own audits still show weak controls, recurring financial misstatements and poor governance, which means consumers shouldn't be shouldering extra costs until management and reporting are truly fixed. The Mail & Guardian While Eskom has recently posted profits for the first time in years, that comeback has been heavily supported by government debt relief and higher tariffs, not by cutting waste or fixing deep-rooted problems. Eskom Simple ideas for Eskom to claw back bonuses and align exec pay with performance Link pay strictly to key outcomes like sustained drop in load-shedding and clean audit opinions — if they miss those targets, no bonuses. Transparent reporting: publish audited performance scorecards before any bonus is paid. Claw back policies — if targets are missed or accounts restated later, reclaim incentive pay from executives. Cap executive pay increases while core operational issues remain unresolved.	Ursula	Gauteng		business owner
	2026-01-08 13:16:44	No I do not	All of the above – we should not pay for government blunders	Take back all the increases received for a job not done and paid for their blunders. The ANC and the rest of their pals can pay for it. We, the public, are already struggling with all of the mismanagement already over the years since our country was handed over to them.	Lee	Western Cape		
	2026-01-08 13:16:17	No I do not	All of the above – we should not pay for government blunders	fault of the incompetent ANC	Rita	Western Cape

	2026-01-08 13:13:04	No I do not	All of the above – we should not pay for government blunders	We are tired to pay for fraud, theft and a highly incompetent and unreliable government. The ANC government must pay for their blunders and mismanagement out of their own pockets. Whilst doing that the government can also grant 80 % discount to the paying electricity users for all the years of exploitation, theft, lies and deceit.	Marius	Mpumalanga		retired
	2026-01-08 13:13:02	No I do not	All of the above – we should not pay for government blunders	Stop blaming us for your incompetence	Shaun	Gauteng		
	2026-01-08 13:12:34	No I do not	All of the above – we should not pay for government blunders	Corrupt SOE	George	Western Cape		employed individual
	2026-01-08 13:12:32	No I do not	All of the above – we should not pay for government blunders	If anyone should pay for it it is the ANC, but they are broken anyway, so then it should be a pay-back-the-money from present and former ANC government ministers. Additionally, a levy of say R2000 should be deducted per month from every civil servant receiving over R1million per year, which is a great deal of them. The levy on ministers should be R1m per every year in office and paid annually at R1m per annum until their "debt" is paid off. All levies should increase by 10% per annum until the "mistake" has been fully paid off.	Catherine	Gauteng		business owner
	2026-01-08 13:12:22	No I do not	All of the above – we should not pay for government blunders		Sean	KwaZulu-Natal		self-employed
	2026-01-08 13:12:19	No I do not	All of the above – we should not pay for government blunders	Eskom's continued mismanagement, overstaffing, and failure to maintain infrastructure have made reliable electricity impossible, while consumers are expected to pay more for less. As a direct result of Eskom's failure to deliver a basic service, I was forced to spend over R200,000 on a solar power system simply to ensure power continuity. This was not a choice — it was a cost imposed by Eskom's incompetence. Consumers should not be required to fund Eskom's failures through higher tariffs while also self-financing alternative energy solutions. Eskom's problems are not the responsibility of its customers. Eskom can go to Hell. TSEK!	Marc	Gauteng		
	2026-01-08 13:12:12	No I do not	All of the above – we should not pay for government blunders	We already pay rediculous L&W charges but still get hammered transmission costs etc. making life very difficult. Just look at the rediculous salaries Escom employees get but sit around all day doing nothing.	ROY	Gauteng		retired
	2026-01-08 13:12:11	No I do not	All of the above – we should not pay for government blunders	How can consumers be held responsible for NERSA's errors. How qualified and competent are the NERSA staff. Government should pay for this so-called error, especially the 38 newly made millionaires from our tax money in government. I also wonder how qualified and competent are the ESKOM management, that no aging provisions are made for ESMOM's infrastructure.	Fazel	Gauteng		retired
	2026-01-08 13:12:10	No I do not	All of the above – we should not pay for government blunders	No, they must sort out their own problems!	Henriette			
	2026-01-08 13:12:06	No I do not	All of the above – we should not pay for government blunders	With the cost of living increasing and the ridiculous increase in rates from NERSA each year, this should not be our concern. Process Optimization initiatives should be undertaken to cover this mistake and not consumers. We pay for what we use.	Lerato	Gauteng		employed individual

	2026-01-08 13:02:47	No I do not	All of the above – we should not pay for government blunders	The essence of the issue is simple: consumers should not be asked to absorb the consequences of NERSA's admitted R76 billion miscalculation. Passing this error onto households and businesses through higher tariffs is neither fair nor sustainable. My position is as follows: Affordability: Consumers cannot be expected to pay for regulatory mistakes. Accountability must rest with the regulator and Eskom, not the public. Reliability: Tariffs should reflect service quality. Asking us to pay full price for aging, unreliable infrastructure is unjustifiable. Efficiency: Eskom's cash flow problems and construction delays are operational inefficiencies. These must be addressed internally, not funded through ever-increasing tariffs. copy	Dirk Cornelius	Gauteng		retired

	2026-01-08 13:02:14	No I do not	All of the above – we should not pay for government blunders	The lack of transparency in the way this blunder was originally covered up by NERSA in private consultation with Eskom to come to a compromise, is a major concern. That said, the R76bn or whatever it finalises to, will have to be paid by somone, whether it's the taxpayer or the consumer or other. Beside looking after our consumers, it is also imperative that we need to ensure the sustained economic viability of our many mining, metals and industrial users as there is a very larger proportion of our worksforce directly, and of the population, depenedant on them. It's a huge challenge as we wind down our previously cheap, coal based electricity.	Neville	Gauteng		retired

	2026-01-08 12:54:48	No I do not	All of the above – we should not pay for government blunders	The essence of the issue is simple: consumers should not be asked to absorb the consequences of NERSA's admitted R76 billion miscalculation. Passing this error onto households and businesses through higher tariffs is neither fair nor sustainable. My position is as follows: Affordability: Consumers cannot be expected to pay for regulatory mistakes. Accountability must rest with the regulator and Eskom, not the public. Reliability: Tariffs should reflect service quality. Asking us to pay full price for aging, unreliable infrastructure is unjustifiable. Efficiency: Eskom's cash flow problems and construction delays are operational inefficiencies. These must be addressed internally, not funded through ever-increasing tariffs.	Hendrik	Gauteng		retired
	2026-01-08 12:54:45	No I do not	All of the above – we should not pay for government blunders	Why can't authorities be honest and deal with their own erroneous makings. Authorities have no conception of just how much the public, the very public that voted them into power, can afford. Like a scared child, they play the 'blame game' and expect others to bail them out. Time to stand-up 'authorities', admit to your mistakes, earn respect from your followers and lead by example.	Basil	Eastern Cape		retired

	2026-01-08 12:46:34	No I do not	All of the above – we should not pay for government blunders	Why NERSA's MYPD6 RAB Redetermination Must Be Rejected in Full South Africans are once again being asked to pay more for electricity—despite getting less of it. The National Energy Regulator of South Africa's (NERSA's) Redetermination of Eskom's sixth Multi-Year Price Determination (MYPD6) Regulated Asset Base (RAB) for the Generation Business (2025/26 to 2027/28) is not merely flawed. It is economically irrational, regulatorily indefensible, and socially unjust. This decision attempts to shift the burden of Eskom's long-standing failures—and NERSA's regulatory shortcomings—onto consumers. That burden should not be accepted. This is what I call the "Baggage Problem": forcing the public to carry the accumulated weight of inefficiency, poor governance, and regulatory incompetence. _____ Paying More While the System Declines Electricity tariffs are meant to recover the efficient cost of supplying electricity. They are not meant to compensate for institutional collapse. Yet South Africa now faces: • Declining electricity demand • Chronic load shedding • Worsening reliability and power quality • Tariff increases far above inflation • Severe affordability pressure on households and businesses This decline is not consumer-driven. It is the direct result of Eskom's operational failure and NERSA's inability—or unwillingness—to enforce discipline. Approving a higher RAB under these conditions forces consumers to pay more for: • Less electricity • Poorer quality supply • Increasing system instability That is neither cost-reflective nor fair. _____ Public Participation Without Transparency Is an Illusion NERSA regularly points to public hearings as evidence of public participation. But participation without information is meaningless. Key data remains unavailable or inaccessible, including: • Detailed maintenance and inspection records • Asset refurbishment and replacement plans • Cost allocation methodologies • Productivity ratios and staffing benchmarks • Performance-linked expenditure justifications In some cases, organisations have had to resort to court action simply to obtain decision records. Without transparency: • Public hearings become procedural theatre • Objections cannot be meaningfully evaluated • Decisions appear pre-determined This undermines trust in the entire regulatory process. _____ Eskom's Cost Base Fails the Efficiency Test NERSA is legally required to allow recovery of only efficiently incurred costs. Eskom's cost structure clearly does not meet this standard. Independent research—including World Bank analysis—has repeatedly shown that: • Eskom is severely overstaffed • Its staffing levels exceed international norms • Productivity ratios are fundamentally distorted The World Bank estimated Eskom required approximately 14,244 employees to operate efficiently—far fewer than its actual workforce. Instead of enforcing restructuring, NERSA continues to approve escalating personnel and overhead costs, embedding inefficiency directly into the RAB and forcing consumers to fund it indefinitely. _____ The "Baggage Problem": Too Many Chiefs, Too Few Engineers Between 1990 and 2024: • Eskom's average cost per employee increased from R38,000 to R913,000 • A staggering 976% increase, vastly exceeding inflation and productivity growth Eskom has evolved into an administrative-heavy organisation, while its core mission—delivering reliable electricity—continues to deteriorate. NERSA's tariff approvals do not correct this imbalance. They entrench it. Consumers are not just paying for electricity. They are paying for Eskom's accumulated baggage. _____ Where Is Zero-Based Budgeting and Cost Discipline? A competent regulator would demand: • Zero-Based Budgeting (ZBB) • Clear, performance-linked KPIs • International benchmarking • Cost-to-output validation NERSA does not appear to require any of this. Instead, historical inefficiencies are rolled forward year after year and legitimised through tariff approvals. This is not regulation—it is passive endorsement of failure. _____ Power Quality: The Hidden Economic Drain No One Wants to Fix While tariffs dominate the conversation, one of the most damaging issues remains largely ignored: poor power quality. Unbalanced voltages, harmonics, and negative phase sequence conditions: • Destroy motors and transformers • Reduce equipment lifespan • Increase technical losses • Inflate maintenance and downtime costs Globally, billions are lost every year due to poor power quality. Despite formal complaints and documented evidence, NERSA has shown little to no interest in addressing this issue. Consumers therefore pay twice: 1. Through higher tariffs 2. Through damaged equipment, lost productivity, and premature failures This silent economic drain is one of the most underreported failures of South Africa's electricity system. _____ Regulatory Failure Confirmed by the Courts NERSA's weaknesses are no longer a matter of opinion—they are a matter of public record. NERSA has: • Lost multiple court cases on tariff methodology • Been found to rely on unlawful practices • Shifted statutory obligations to municipalities • Failed to apply the Electricity Regulation Act's cost-based requirements Each legal defeat confirms systemic shortcomings in regulatory competence. Approving a multi-year RAB under these conditions is reckless. _____ A Complaint System That Doesn't Work NERSA maintains that it provides a mechanism for public complaints. In practice: • Complaints often receive minimal follow-up • Investigations stall or disappear • Urgent technical risks are downplayed This erodes public confidence and reinforces the perception that regulatory oversight exists largely on paper. _____ The Question That Cannot Be Avoided Why should South Africans: • Pay higher tariffs for declining service? • Fund inefficiency, overstaffing, and mismanagement? • Absorb the cost of regulatory failure? They should not. _____ Final Thoughts: Reject the MYPD6 RAB Redetermination NERSA's Redetermination of Eskom's MYPD6 Regulated Asset Base: • Rewards failure • Punishes consumers • Ignores declining demand • Violates efficiency principles • Entrenches systemic dysfunction The only responsible outcome is to reject this Redetermination in full. South Africa does not need higher electricity tariffs. It needs: • Structural reform • Cost discipline • Technical competence • Transparent regulation • Accountability Until those conditions exist, the public must not be forced to carry Eskom's baggage.	Bertie	Gauteng		
	2026-01-08 12:46:26	No I do not	All of the above – we should not pay for government blunders	This is not my mistake and the administration liable for the mistake must fork out the money	Lourens	Mpumalanga		employed individual

	2026-01-08 12:27:45	No I do not	All of the above – we should not pay for government blunders	1. Affordability: Why should we pay for NERSA's calculation errors? Government is driving this country to collapse; people can barely afford food and basic utilities. Many are unemployed. 2. Reliability: Why should we pay full price for aging, unreliable infrastructure? As in any business, maintenance/upkeep should be covered by Eskom with the exorbitant fees they already charge. 3. Efficiency: Why should consumers fund Eskom's cash flow and construction delays? Get a grip Eskom! Manage your finances like a responsible entity; collect debt owed, fix what's broken and then worry about additions...at your own cost, not that of the poverty stricken majority and the honest people who pay you already.	Michele	KwaZulu -Natal		unemployed individual
	2026-01-08 12:27:29	No I do not	All of the above – we should not pay for government blunders		Jen	KwaZulu -Natal		retired
	2026-01-08 12:27:27	No I do not	All of the above – we should not pay for government blunders	We should not be penalised for mistakes made by Government entities. The shortfall should be recovered from the entity that made the mistake in their personal capacities. In private business if you make such a mistake you are personally held responsible. That's the real world.	Billy	Gauteng		employed individual
	2026-01-08 12:27:10	No I do not	All of the above – we should not pay for government blunders		Samantha	Gauteng		employed individual
	2026-01-08 12:26:58	No I do not	All of the above – we should not pay for government blunders	Firstly the basis of the determination of a price increase is ridiculous. Had Eskom been managed properly this would not have been considered as an extra cost to be financed. Secondly Allowing it's infrastructure to go to pot, and turning a blind eye to rampant electricity theft is Eskom s problem. Don't expect compliant customers to pay for it.	Justin	KwaZulu -Natal		retired
	2026-01-08 12:26:58	No I do not	All of the above – we should not pay for government blunders	How can it be possible for a business to hold its customers/clients responsible for the mistakes it makes. Hold the business responsible for the mistakes it makes. ESKOM is in any event pricing itself out of the market and soon will only have non-payers as a client base.	Charles	Gauteng		self-employed
	2026-01-08 12:26:45	No I do not	All of the above – we should not pay for government blunders		Joy	Gauteng		retired
	2026-01-08 12:26:43	No I do not	All of the above – we should not pay for government blunders	I'm strongly opposed to government, regulators and state utilities externalizing the cost of poor governance and inefficiency onto consumers. South Africa's electricity tariffs consistently increase way above the level of inflation every year. In a country marked by chronically low economic growth and high unemployment figures, consumers can't - and shouldn't have to - carry the responsibility for these failures.	Lee	Eastern Cape		self-employed
	2026-01-08 12:26:42	No I do not	All of the above – we should not pay for government blunders		John	Eastern Cape		retired
	2026-01-08 12:26:40	No I do not	All of the above – we should not pay for government blunders	I cannot help wondering if this is another government endorsed scheme making ordinary citizens pay for their corruption and ineptitude? Surely if the system was operating with ethical and efficient manpower resources, they woukd have picked this up long ago?	Tracy	Western Cape		employed individual

	2026-01-08 12:18:32	No I do not	All of the above – we should not pay for government blunders		IP	KwaZulu -Natal		business owner
	2026-01-08 12:18:03	No I do not	All of the above – we should not pay for government blunders	This proposed R76 billion electricity hike isn’t just another line item on my bill—it’s a direct hit to my already strained household budget. As a regular person trying to manage day-to-day expenses, I’m already paying more for food, transport, rent, and basic services. Electricity is an essential service, not a luxury, and hiking prices because of Eskom’s and NERSA’s mismanagement adds unbearable pressure upstream meaning everything else gets more expensive too. When my electricity costs go up, so do the prices of bread, groceries, and even haircuts—because every small business uses power. This isn’t just about a higher bill; it’s about making everyday survival harder for millions of ordinary South Africans who didn’t cause this crisis. I refuse to pay for their mistakes. Stop shifting the burden to the public.	Ulrich	Gauteng		self-employed
	2026-01-08 12:17:50	No I do not	All of the above – we should not pay for government blunders		Engela	Gauteng		retired
	2026-01-08 12:17:22	No I do not	All of the above – we should not pay for government blunders	Stop making citizens pay for government's inefficiency. Eskom needs to work smarter and harder.	Bronwen	Gauteng		self-employed
	2026-01-08 12:17:02	No I do not	All of the above – we should not pay for government blunders	It is absolutely unacceptable that as a law-abiding, tax-paying citizen of South Africa, I am expected to shoulder the burden of NERSA’s R76 billion calculation blunder. This is not my mistake, nor should it become my financial responsibility. Such gross incompetence and lack of accountability erode public trust and punish citizens for failures within regulatory bodies. Instead of passing this cost onto taxpayers, those responsible must be held accountable, and systemic checks must be enforced to prevent such catastrophic errors. We already face rising costs and economic strain—forcing citizens to pay for bureaucratic negligence is unethical and unjust.	Pieter	Gauteng		employed individual
	2026-01-08 12:17:00	No I do not	All of the above – we should not pay for government blunders	I am against the proposal that the public must pay for the mistakes of a Nersa. It is time that people will held accountable for their mistakes, and the nessasiry steps taken to be prosecuted so others can see corruption and incompetence cannot be tolerated. This is a problem of all SOE and other government entities and unless there is sufficient appropriate consequences it will just continue happening and getting bigger and bigger.	Mildred	Gauteng		

	2026-01-08 12:16:54	No I do not	All of the above – we should not pay for government blunders		Barbara	KwaZulu-Natal		retired
	2026-01-08 12:16:51	No I do not	All of the above – we should not pay for government blunders	This is a deliberate mistake made by the Government to squeeze some extra money out of the already overburdened consumer. The fact that Eskom was and is still being looted by government and ANC cronies does not give the government the right or the mandate to expect the consumers to keep funding their lavish lifestyles.	Sidney	Gauteng		business owner
	2026-01-08 12:16:50	No I do not	All of the above – we should not pay for government blunders	When mistakes are made that affect the tax payer to the tune of R76B rand, then I expect to see the people who made that mistake either fired or tried for treason. as usual there will be no consequences to anyone except the tax payer. I REFUSE TO FUND STUPIDITY OR TREASON	Stuart	Eastern Cape		
	2026-01-08 12:16:38	No I do not	All of the above – we should not pay for government blunders	Cost-cutting at the executive and parliamentary levels to fund these mistakes, as the fat cats pocket big salaries and bonuses, despite the facility's failing status. No Increases or bonuses if the facility is not viable for the next 20 years.	Tobie	Gauteng		
	2026-01-08 12:16:13	No I do not	All of the above – we should not pay for government blunders	It's time for South African to stop paying price for corruption and incompetence.	Taryn Elise	Gauteng		self-employed
	2026-01-08 12:16:06	No I do not	All of the above – we should not pay for government blunders	What happened to being accountable for your own mistakes? Ever so convenient when somebody else can foot the bill for you. There's only so much you can squeeze out of citizens before they don't have anything left to pay with.	Chantelle	Gauteng		business owner
	2026-01-08 12:16:03	No I do not	All of the above – we should not pay for government blunders		Tufail	Gauteng		employed individual
	2026-01-08 12:16:00	No I do not	All of the above – we should not pay for government blunders	Why do we, as consumers have to pay for someone else's fraud and errors. 	2026-01-08 12:13:17	No I do not	All of the above – we should not pay for government blunders	Escom in the ideology of a first world action is to provide power to consumers. Escom in the ideology of a third world action is to drain finances by funding durg cartels, terriorist organisations and leadership greed. This is a no brainer, we are tapped to emptiness, while ideologists are funding their war games and dreams!!!	Lizette	Mpumalanga		employed individual
	2026-01-08 12:12:27	No I do not	All of the above – we should not pay for government blunders	This is a deliberate mistake made by the Government to squeeze some extra money out of the already overburdened consumer. The fact that Eskom was and is still being looted by government and ANC cronies does not give the government the right or the mandate to expect the consumers to keep funding their lavish lifestyles. In the end, this cost is only passed on to the paying customer; the majority of consumers still have illegal connections and are stealing millions from the power utility. The issue of illegal connections, overburdened power stations, and ageing infrastructure is not a priority for the ANC-led government and will NEVER be resolved for as long as the ANC remain in power.	Philip	Gauteng		
	2026-01-08 12:12:24	No I do not	All of the above – we should not pay for government blunders		Bets	Gauteng		retired
	2026-01-08 12:12:12	No I do not	All of the above – we should not pay for government blunders	Taxes are super high already. Easy solution: Curtailing stealing from government through tenders -will pay for that blunder easily. Or as government recovers taxpayer money through theft from government via tenders and dodgy deals etc… those recovered funds will pay for the mishap. Like the blue supercars recovered… what happened to them? Sell them and start paying off the blunder!	Denishree	Gauteng		
	2026-01-08 12:12:08	No I do not	All of the above – we should not pay for government blunders	Go fetch your money from all the rural area's and illegal connections instead of milking all the loyal law abiding citizens, also when you make a mistake in accounting that is yours to own. Manup and sort your house out before begging for money.	Werner	Gauteng		employed individual
	2026-01-08 12:12:07	No I do not	All of the above – we should not pay for government blunders	I do not feel NERSA should be allowed to get away with their proposal. As I understand it NERSA made the mistake and those responsible should be disciplined or fired. I do not think that will have happened. IT IS TIME GOVERNMENT AND THEIR ORGANISATIONS TOGETHER WITH THE INDIVIDUALS RESPONSIBLE ARE HELD ACCOUNTABLE FOR THEIR ACTIONS. Indirectly those of us who still pay our taxes will pay NERSA's mistake.	John	KwaZulu-Natal		
	2026-01-08 12:12:05	No I do not	All of the above – we should not pay for government blunders	There is little point to this exercise unless these is a forensic investigation and those responsible are not only fired but charged with negligence. Those responsible should also be dismissed from membership of any professional body of which they are members.	Dennis	Gauteng		retired
	2026-01-08 12:12:03	No I do not	All of the above – we should not pay for government blunders	Why should the public pay for this " mistake" the public did not perform the audit or calculation. The government created this problem through there policies let those who created the problem pay. I can not afford to pay for poor or no existent services and also be penalized for things I have no control or influence over.	Henk	Limpopo		business owner
	2026-01-08 12:11:55	No I do not	All of the above – we should not pay for government blunders		Charmaigne	Gauteng		employed individual

	2026-01-08 12:11:49	No I do not	All of the above – we should not pay for government blunders	If a private company made such a mistake, there is no way they would keep the business and would have to sell, liquidate or take out loans. Eskom has made poor life decisions for YEARS and it is time to stop bailing out government mistakes. It is time for them to take accountability and responsibility and pay the mistake themselves.	Melany	Northern Cape		employed individual
	2026-01-08 12:11:42	No I do not	All of the above – we should not pay for government blunders	Isolate the individuals behind this mass rogue operation, and extract it from their (all politicians and their wiles) unlimited lucre. Chuck them all in jail, and let the people govern.	Afzal	Gauteng		retired

	2026-01-08 12:01:22	No I do not	All of the above – we should not pay for government blunders	I appreciate that Eskom needs to be profitable and provide power to all of the people of S.A at affordable rates but all these increases make Eskom power unaffordable for most. Eskom undoubtedly has many diligent and competent people but here are also a lot of idle and incompetent people who have either been deployed there by the ANC or have found their way there, the company is overstaffed with the wrong people. Eskom is having to offer special prices to various industries to enable them to continue to operate and employ their staff, and due to the complete mismanagement of Eskom over the years they have encouraged the major mining companies and others to install solar or other alternative energy. These issues are also contributing to Eskom's money issues, if they continue pushing prices up they will find more and more people and companies moving off grid leaving only the people that will not or cannot pay for Eskom power. This Mistake appears to be to address historical accounting losses, I believe that they need to find alternative ways of avoiding these increases.	Brian	Gauteng		business owner
	2026-01-08 12:01:20	No I do not	All of the above – we should not pay for government blunders		Johan	Gauteng		employed individual
	2026-01-08 12:01:14	No I do not	All of the above – we should not pay for government blunders	This can and should be absorbed as a operational cost. Private companies do not have the luxury of doing this, why should any state owned company be able to do this. We are being taxed for every thing and more. This is ridiculous! Definitely a no from me!	Vincent	Gauteng		unemployed individual
	2026-01-08 12:01:03	No I do not	All of the above – we should not pay for government blunders		Kim	KwaZulu -Natal		retired
	2026-01-08 12:00:47	No I do not	All of the above – we should not pay for government blunders	I own a small bussiness and employ 23 people,it is becoming more and more difficult to keep the business running and making ends meet.If there is another price increase i will be forced to look at retenchments or alltimitdly complete shutdown.	Hannes	Gauteng		
	2026-01-08 12:00:33	No I do not	All of the above – we should not pay for government blunders	As Eskom board past and present made these mistakes they must have all assests and bank accounts frozen till they and friends and family benefitted from this mistake is paid back by the	Cheryl	Eastern Cape		retired

	2026-01-08 11:59:23	No I do not	All of the above – we should not pay for government blunders	The ANC and it's comrades are responsible for the downfall and corruption in all aspects of governance. I am tired of being billed for their responsibility and mistakes. I fully and unconditionally disagree with this cost.	Kai	Gauteng		self-employed
	2026-01-08 11:59:15	No I do not	All of the above – we should not pay for government blunders	Government continue to make mistakes with impunity. This has to stop. Ordinary citizens are held to account for their actions. Its high time government are held to account. Those employees/ officials/ ministers must be held to account and this amount must be collected from them and not from law abiding citizens. We didnot cause this and therefore we must not be held to account. Those who caused this either by error or not and those who should have been checking must eb held to account. How can such an enterprise not have accounting systems and checks and balances to pick up such? Citizens are already over burdened. I am overburdened and i simply cannot afford any additional payment that i am at not responsible for. .	Vishi	KwaZulu -Natal		retired
	2026-01-08 11:59:11	No I do not	All of the above – we should not pay for government blunders	As pensioners, we already find it difficult to pay the existing costs - so cannot afford increases	Stanley	Gauteng		self-employed
	2026-01-08 11:58:58	No I do not	All of the above – we should not pay for government blunders	.escom is a cartel run by thugs to enrich themselves, I'm not paying for that, they have stolen more than enough from all South Africans, escom has to re imburse us for our losses.	jan	Gauteng		employed individual
	2026-01-08 11:58:58	No I do not	All of the above – we should not pay for government blunders	.escom is a cartel run by thugs to enrich themselves, I'm not paying for that, they have stolen more than enough from all South Africans, escom has to re imburse us for our losses.	jan	Gauteng		employed individual
	2026-01-08 11:58:58	No I do not	All of the above – we should not pay for government blunders	The ANC and cadres should be held responsible. They have made the bad decisions and mismanaged the utility into the predicament. The public has paid enough for the ANC’s theft and mismanagement.	Peter	Gauteng		

	2026-01-08 11:58:47	No I do not	All of the above – we should not pay for government blunders	They think they can run a business! Well in business there are risks like employing the wrong people who make mistakes. That cost is for the company/organization to carry. Hopefully if they are not totally stupid and corrupt, they will learn to employ qualified people, fire the responsible ones and not pay everyone a bonus.	Arthur	Western Cape		business owner
	2026-01-08 11:58:26	No I do not	All of the above – we should not pay for government blunders	The government should cut some ministers salaries to recover the money. 99% of the ministers in office do nothing anyway, just stealing money.	Reghardt	Northern Cape		employed individual
	2026-01-08 11:58:12	No I do not	All of the above – we should not pay for government blunders		Lionel	Gauteng		retired
	2026-01-08 11:58:01	No I do not	All of the above – we should not pay for government blunders	We have all virtually been forced to invest in costly solar systems because of Eskom's incompetence and corruption, so the public should not be asked to pay more.	Caroline	Gauteng		retired
	2026-01-08 11:57:34	No I do not	All of the above – we should not pay for government blunders	Ordinarily when one makes a financial mistake, assuming its reasonable, its ok to go back to the creditor and say oopsie. 76 BILLION is a little on the nose. Eskom and nersa have a terrible track record with nersa approving increases way above inflation and Eskom taking it as an excuse to milk the public. The milking comes as a result of corruption, theft and pure ineptitude. "Its ok the people will just pay more" is their mindset and quite frankly, i/we are not willing to fork the bill anymore. Nersa screwed up and needs to won it. Depreciating assets need to be depreciated and written off. Its not on us to fork over for old machinery being services at, i can only imagine, hellishly expensive rates probably by a team not quite sure of what they're doing but we must just pay. No More. We're the only country in the world who's monopolised power provider will brag about Profits when the truth is their output is just as low as it was in 2009, business and households have converted over to solar thus alleviating the constraint all due to their inability to provide affordable and reliable infrastructure. Then they cry and ask why massive customers are jumping ship and they have to foot the bill. We're taxed out the nose as it is. We're not paying for this crap anymore and we, now, have the option to leave eskom behind. It will just take longer for most but the ROI of solar versus paying this 76 billion and the hundreds of billions more to come inevitably is not is incentive enough. Eskom and Nersa need to fix their own house and manage their funds like they're on a 370 rand grant not like there's a river of cash we'll be forced to provide.	Chad	Gauteng		unemployed individual
	2026-01-08 11:57:33	No I do not	All of the above – we should not pay for government blunders	To expect clients to pay for a business's failures is unthinkable!	Phillip	Western Cape		retired

	2026-01-08 11:52:55	No I do not	All of the above – we should not pay for government blunders	To expect clients to pay for a business's failures is unthinkable! Staff should be excellently screened before appointment, well trained throughout, efficiently performance evaluated and ineffective / lazy/ dishonest / underperforming staff should be disciplined or fired. To make clients pay for ESKOM's failures is totally unrighteous. This should be stopped and ESKOM should get it's act together.	Regina	Gauteng		
	2026-01-08 11:52:18	No I do not	All of the above – we should not pay for government blunders	With mistakes like this, who ever is responsible should be fired immediately. This ANC government of ours have only two interests. Staying in power and lining their pockets. I never voted for a racist government before 1994 and I have no intention of starting now. There are more race-based laws on the statute books now than before 1994. Don't take my word for it. Check it for yourself.	jeff	Gauteng		retired
	2026-01-08 11:52:15	No I do not	All of the above – we should not pay for government blunders	Unacceptable to even suggest that consumers must pay for their blunders. Have we not paid enough already. Many businesses, including mine, are under threat due to the fast escalating cost already. Not to mention how horrific the service delivery is already.	Yvonne	KwaZulu-Natal		business owner
	2026-01-08 11:51:57	No I do not	All of the above – we should not pay for government blunders	Just sick of these oxygen thieves making poor choices and expecting us to pay for their blunders	HEATHER	KwaZulu-Natal		
	2026-01-08 11:51:33	No I do not	All of the above – we should not pay for government blunders	Eskimo has been mismanaged by ANC cardrè deployments. It went from the world's sweetheart to the world's laughing stok. Let the ANC carry the cost of this mismanagement and not the public.	Chris	Western Cape		retired
	2026-01-08 11:51:32	No I do not	All of the above – we should not pay for government blunders	Eskimo has been mismanaged by ANC cardrè deployments. It went from the world's sweetheart to the world's laughing stok. Let the ANC carry the cost of this mismanagement and not the public.	Chris	Western Cape		retired
	2026-01-08 11:51:13	No I do not	All of the above – we should not pay for government blunders	Many citizens have installed their own solar power infrastructure and left Escom's grid or use it only when weather is not conducive to charge their solar infrastructure. Escom has become a useless gov ernment institution living off the people without servicing them. Escom should be privatised in total.	Kleinste	Mpumalanga		business owner
	2026-01-08 11:51:10	No I do not	All of the above – we should not pay for government blunders	This is another ANC cockup. Put them in jail...	Lynton	Gauteng		
	2026-01-08 11:51:09	No I do not	All of the above – we should not pay for government blunders	Recover all the corruption & fraud money from Eskom employees & you will have a surplus. Typical government wants us to pay for their incompetence. & theft. Enough is enough. We are already paying for probably the highest electricity tariffs in the world, while the goverment & Eskom continue to destroy the economy…	Ivor	Gauteng		
	2026-01-08 11:50:28	No I do not	All of the above – we should not pay for government blunders		Adriaan	Eastern Cape		
	2026-01-08 11:50:16	No I do not	All of the above – we should not pay for government blunders	Our electricity costs are already astronomical and we are now expected to pay more. This is pure day light robbery and I oppose 100%	Megan	KwaZulu-Natal		employed individual
	2026-01-08 11:50:05	No I do not	All of the above – we should not pay for government blunders	Government mismanagement has directly contributed to the current situation, and these actions remain within their control. Consumers should not bear the cost of supplier errors; only factors beyond government control should influence electricity pricing. It is unreasonable to expect the public to pay for continued incompetence and corruption. Since 2008, electricity prices have increased by 900%, reflecting worsening—not improving—performance.	Deirdre	Gauteng		employed individual

	2026-01-08 11:29:40	No I do not	All of the above – we should not pay for government blunders	Who can afford these prices it's absolutely ridiculous I am a pensioner and can't to pay these increases can barely survive now with the high cost of living	Mildred Olivia	Gauteng		retired
	2026-01-08 11:29:08	No I do not	All of the above – we should not pay for government blunders		Channe	Gauteng		employed individual
	2026-01-08 11:28:53	No I do not	All of the above – we should not pay for government blunders		Pride	North West		employed individual
	2026-01-08 11:28:50	No I do not	All of the above – we should not pay for government blunders	If you hadn't made the calculation errors no doubt the proposed tariffs would have been higher and then reduced for the comsumer since they would have been unreasonably high considering our economy and the extra burden the new tariff would place on us. But you did make the mistake, so you need to own it, and not push this onto us. For far too long Eskom has been using the consumer to pay for its mistakes of over running of projects at inflated pricing, corruption and bad maintenance of aging plants and infrastructure. What South Africa needs is more independent power producers as competition to this monopoly, not paying for a state owned enterprise that has no political desire to improve itself.	Simon	KwaZulu -Natal		employed individual
	2026-01-08 11:28:43	No I do not	All of the above – we should not pay for government blunders	We are already suffering financially and cannot afford to pay for any blunders or extra costs.	Chanel	Gauteng		employed individual
	2026-01-08 11:28:43	No I do not	All of the above – we should not pay for government blunders		Carol-Anne	Gauteng		retired

	2026-01-08 11:28:18	No I do not	All of the above – we should not pay for government blunders	Everything is a farce. Every single thing anyone associated with public services does is a patch to fix a fuckup that started in 1994.	Vivek	Gauteng		business owner
	2026-01-08 11:27:56	No I do not	All of the above – we should not pay for government blunders		Fanie	Mpumalanga		retired

	2026-01-08 11:27:42	No I do not	All of the above – we should not pay for government blunders	Let them recuperate from all the corrupt people at Eskom, why must we pay for what was stolen by them through corruption.	Albie	Gauteng		employed individual
	2026-01-08 11:27:26	No I do not	All of the above – we should not pay for government blunders		Tania	Gauteng		
	2026-01-08 11:26:35	No I do not	All of the above – we should not pay for government blunders	Open up the market and allow private enterprise to take over. Government can't run anything effectively. We keep paying for incompetence and corruption. We a burdened enough. Start doing your job for once. Recover the money from the corrupt ANC officials.	Lyle	Gauteng		employed individual
	2026-01-08 11:26:11	No I do not	All of the above – we should not pay for government blunders		Adelaide	Gauteng		retired
	2026-01-08 11:26:03	No I do not	All of the above – we should not pay for government blunders	South African electricity users should not be compelled to pay an additional R76 billion to cover the consequences of regulatory failures, governance failures, and operational mismanagement at Eskom and within the state. Allowing these costs to be transferred to consumers creates a dangerous precedent, effectively insulating decision-makers from accountability while placing further financial strain on households, small businesses, and an already fragile economy. Any recovery of historical losses should be contingent on demonstrable consequences for those responsible, transparent disclosure of how these losses arose, and legally sound processes that align with the court's findings. Without this, the proposal amounts to socialising losses while accountability remains absent. Nersa's mandate includes protecting the public interest. Approving this consultation paper in its current form would undermine that mandate by shifting the burden of institutional failure onto citizens who have already endured years of high tariffs, unreliable supply, and declining service levels. I therefore do not support the consultation paper as published and urge Nersa to pursue alternatives that prioritise accountability, structural reform, and sustainable solutions over further tariff-based bailouts.	Byron	Limpopo		employed individual
	2026-01-08 11:25:50	No I do not	All of the above – we should not pay for government blunders	Why must we pay for their corruption, past and present. Pensions don't get better, how can pensioners afford higher electricity prices. Then we also have to pay for the corruption of municipalities, where they are in arrears for not paying ESCOM.	Liezel	Western Cape		retired
	2026-01-08 11:25:20	No I do not	All of the above – we should not pay for government blunders		Jabus	North West		employed individual
	2026-01-08 11:25:17	No I do not	All of the above – we should not pay for government blunders	Corruption from the very top all the way to the bottom. Get rid of everyone an put honest people working for Eskom. Why should we have to pay for Nersa incompetence.	Cindy	Gauteng		unemployed individual
	2026-01-08 11:25:12	No I do not	All of the above – we should not pay for government blunders	The price for electricity is too high. Our people are suffering due to unemplyment etc.	Hanelie	Free State		retired
	2026-01-08 11:24:41	No I do not	All of the above – we should not pay for government blunders		Alain	KwaZulu-Natal		business owner
	2026-01-08 11:24:28	No I do not	All of the above – we should not pay for government blunders	I have said again and again. Get rid of the government all together, clean the house and start over. The criminal officials indicated and found guilty are all still sitting flush and whi is paying for all this? The poor man in the street. Enough is enough. REMOVE THE IDIOTS ON TOP!	Laurens	KwaZulu-Natal		self-employed
	2026-01-08 11:24:18	No I do not	All of the above – we should not pay for government blunders	We have payed enough for this government's incompetence - no more.	Annolene	Eastern Cape		retired

	2026-01-07 17:59:36	No I do not	All of the above – we should not pay for government blunders	I oppose the proposed R76 billion additional revenue application for Eskom. The proposed tariff increases are not linked to any enforceable performance targets for Eskom, such as measurable improvements in reliability, reductions in load-shedding, efficiency gains, or progress in addressing corruption and coal theft. Consumers would therefore be required to fund past errors and ongoing operational costs without corresponding commitments to improved service delivery. In the present economic environment, where many households already face difficulty affording basic electricity alongside essential needs like food, further substantial increases risk exacerbating poverty, contributing to job losses, and encouraging the closure or relocation of industries. Nersa is mandated to balance the interests of the utility with those of consumers and the broader economy, approving this application in its current form would not achieve that balance. I respectfully request that Nersa reject the proposal and instead focus on promoting genuine structural reforms, rigorous cost containment, and the introduction of performance-based incentives that safeguard the interests of South African citizens and support sustainable economic growth. 	2026-01-08 16:52:52	No I do not	All of the above – we should not pay for government blunders	*The R76 billion shortfall arises from institutional and regulatory error, not from the cost of supplying electricity. Recovering this amount through tariffs constitutes an impermissible transfer of risk from the regulated entity to captive consumers of an essential service. *There is no causal link between electricity consumption and the asset-valuation error. In the absence of causation, consumers cannot lawfully be held financially responsible. *Imposing liability on consumers for errors they neither caused nor benefited from is irrational and inconsistent with sound regulatory practice. It undermines accountability and weakens regulatory discipline. *The Electricity Regulation Act requires tariffs to be cost-reflective, fair, transparent, and non-discriminatory. A tariff designed to recover historical accounting or regulatory mistakes fails to meet these statutory requirements. *The proposal conflicts with stated reforms aimed at enhancing consumer protection, transparency, and the ability of consumers to challenge tariff increases. Absent full disclosure and meaningful participation, the process is procedurally unfair *Electricity is an essential service. Additional tariff burdens: Disproportionately affect low-income households; Increase energy poverty; Undermine economic activity and employment. *OPINION AND REQUEST: It is respectfully submitted that: The proposed recovery of the R76 billion from electricity consumers is unlawful, irrational, and inconsistent with the Electricity Regulation Act; Consumers should not be required to fund historical institutional or regulatory errors. NERSA should expressly exclude recovery of the asset-valuation error from any approved tariff determination. Eskom should be directed to address the shortfall through mechanisms that do not burden electricity users. *CONCLUSION: Approving the proposed recovery would undermine regulatory integrity, consumer protection, and public confidence in the tariff-setting process. NERSA is therefore respectfully urged to reject the proposed recovery of the R76 billion from electricity consumers.	Ervinn	Gauteng		retired
	2026-01-08 16:52:46	No I do not	All of the above – we should not pay for government blunders	The electricity tariffs are already far too high already. The unemployment rate keeps increasing. The Pensioners can't afford to switch stoves and geyser anymore. We bath with cold water while geysers are there. We are five minutes away from coal stoves and candles. What about our rights to affordable electricity,? It doesn't seem to count at the moment.	Paul F	Gauteng		retired

Eskom should be directed to address the shortfall through mechanisms that do not burden electricity users. *CONCLUSION: Approving the proposed recovery would undermine regulatory integrity, consumer protection, and public confidence in the tariff-setting process. NERSA is therefore respectfully urged to reject the proposed recovery of the R76 billion from electricity consumers.	Rina	Gauteng		retired

	2026-01-08 16:44:36	No I do not	All of the above – we should not pay for government blunders	ESKOM has crippled the nation on many occassions. How many people have died or been injured as a result when traffic lights, hospitals and crooks using load shedding as opportunity to do their deadly deeds under cover of darkness. What about all the additional costs to Eskom customers having to pay for private generators/Solar panels and the like just to stand a chance of some normalcy in their lives. What about all the damaged equipment as a result of constant blackouts and spikes on switch on . Eskom has ducked any liability. Eskom and the Government are the cause of this problem. Let them empty their pockets and those of the cadres too. We consumers are sick of this pathetic SOE and government blunders and we will not pay it anymore.	Chris	Western Cape		retired

	2026-01-08 16:44:15	No I do not	All of the above – we should not pay for government blunders	How about the high court demanding that those in those "responsible" positions begin by paying back their bonuses, etc, and also being subject to professional standards and ethics before having to pay back salaries, etc? Quite a whack of money to be retrieved there alone. The reference to "responsible positions" would include the Eskom structures in particular AND the NERSA for allowing the nation to continue to be hoodwinked. Eskom has had ample time to utilise Best Business Practises and a lack of vision in looking forward to other alternatives as a public professional corporation ought to have done instead of continuing the cadre style "stripping the country's resources bare". What exactly is NERSA anyway, is it supposed to "defend" the country's citizen's or is it an alternative "gravy train" too?	David	Gauteng		retired
	2026-01-08 16:44:12	No I do not	All of the above – we should not pay for government blunders	It is high time competent people were once again allowed to be part of the economy of South Africa. Mistakes like this would be fewer. People who are unqualified for the job should not be in a position to make this type of mistake, which costs the country millions and billions of rand, simply because of race-based employment laws. 	2026-01-08 16:28:46	No I do not	All of the above – we should not pay for government blunders	The average rate payer and middle class citizen can no longer afford these ridiculous costs caused by ill-managed and misappropriated resources. The ANC government has mismanaged this beautiful country's infrastructure and resources for far too long... 35 years of incompetence does not instill any future faith for correction even with increased costs to the piblic... Enough is enough!	Mandy	Western Cape		employed individual
	2026-01-08 16:28:39	No I do not	All of the above – we should not pay for government blunders	Electricity is unaffordable now, it's too expensive, where will people get money for this mistake,, Unemployment and poverty are destroying the country. This mistake must be funded by government not people.	Ntombizanele	Gauteng		retired
	2026-01-08 16:28:18	No I do not	All of the above – we should not pay for government blunders	Not only do Eskom now expect us to pay billions for their incompetence and corruption, but Jhb City power is changing the payment structure for prepaid customers with solar. We were forced to invest our own savings into solar because since 2008 Eskom couldn't keep the lights on, and now they are going to charge us again. Imagine how bad loadshedding would have been if everyone on solar was using the grid! We saved your bacon, now we're the bad guys! And this on top. No no no! As pensioners, how can we continue to be bled dry?	Heather	Gauteng		retired
	2026-01-08 16:28:15	No I do not	All of the above – we should not pay for government blunders	This is totally unacceptable. Eskom and Nersa should absorb their own plunders!!! It's not the South African taxpayers problem.I thank you	Ben	Free State		employed individual

	2026-01-08 16:27:20	No I do not	All of the above – we should not pay for government blunders	It is unfortunate that Eskom made the mistake. However, it remains Eskoms mistake and their problem, not the consumers. Therefore, Eskom must devise an internal solution and not pass on their mistake to the consumer. The consumer was not involved in the internal workings of Eskom, therefore, again, the consumer has no obligation to "fix" Eskoms mistake. It is that simple. Should Eskom not be able to run efficiently (for example loadshedding since 2007), then the generation and supply of electricity should be awarded to the private sector and other supporting companies. I say NO to any further price increases. Companies, local and international, have already closed down, due to unreliable electricity supply and high electricity costs, causing major job losses. The middle class is shrinking and struggling and the lower income class is not even making it through the month because of ever increasing costs, especially electricity. Electricity cost rises and that has a negative effect on every sector of the economy, raising costs on food and other consumer goods. The SA economy cannot even reach a growth of 1,0%!! End 2025 it stood on an average of 0.8%!! Any increase in electricity costs will not favour economic growth and will amount to more job losses, lower consumer confidence and more businesses, of all types and sizes, either closing down or reducing their footprint in SA. 	2026-01-08 16:23:06	No I do not	All of the above – we should not pay for government blunders	Until accountability and responsibility returns to the entire Government sector, including NERSA & Eskom, it remains impossible to agree to "passing the buck" or "consultation papers" as proposed. Considering: 1. The average cost-to-company (CTC) for an Eskom employee is now R1,026,000 per year (approx. R85,500 per month) versus: 2. As of early 2026, the average cost-to-company (CTC) for a South African government employee is approximately R600,000 to R615,000 per year (roughly R50,000 to R51,200 per month), versus: 3. As of early 2026, the average Cost-to-Company (CTC) for a South African employee in the formal sector is approximately R450,000 to R475,000 per year (roughly R37,500 to R39,500 per month), versus: 4. While the median (the amount earned by the person exactly in the middle of the population) is significantly lower. It is estimated that 50% of the South African workforce has a CTC of less than R10,000 – R12,000 per month, it becomes clear where and why greater accountability and responsibility is needed from parties now happily "passing the buck" down to the consumer - the average South African! 	2026-01-08 16:21:27	No I do not	All of the above – we should not pay for government blunders	Dit is verregaande dat Eskom wat vroeer die mees effektiewe en bekostigbare elektrisiteitverskaffer was nou verswak het tot 'n instansie wat die verbruiker ver bo inflasie wurg! Dit is die gevolg van korrupsie en swak beplanning en bestuur terwyl ontslae geraak is van hoogs gekwalifiseerde en bekwame ingenieurs en werkers. Met ingewikkelde boekhoukundige formules word nou gepoog om regverdiging te verkry vir verdere tariefverhogings vir die verbruiker. # Verouderende infrastruktuur moes lank gelede reeds aangespreek gewees het met deeglike beplanning en eksterne finansieringsmoontlikhede wat gekoppel is aan die leeftyd en winsgewendheid van die betrokke infrastruktuur. Plaasbewoners betaal steeds vir lyne wat jare gelede reeds afbetaal is! # NERSA het hulself bewys as onbekwaam en onbevoeg vir die oorsigwerk waarvoor hulle daar is. Die onlangse hofuitspraak bevestig dit weereens. # Weens ondoeltreffendheid en korrupsie en onbekostigbaarheid en beurtkrag het ESKOM verbruikers gedryf tot eie kragvoorsiening en daardeur die inkomstebron verswak. Nou moet die oorblywende kragverbruikers met dubbele slae geslaan word. # Die oplossing is voor die hand liggend: * Stel mense aan wat oor bewese BEKWAAMHEID beskik en WEET hoe om oplossings te vind en raak ontslae van mense wat op die rug ry van hul "kwalifikasies" en politieke verbintenisse terwyl hulle geen werkbare oplossings kan bied nie en slegs weet van bakhandstaan. * Vorder die miljarde terug wat inkorrupte hande beland het en sit die oortreders en meelopers in die tronk! * Tree daadwerklik en doeltreffend op teen kragdiefstal en plunderaars van infrastruktuur (kabeldiefstal) * Herbesoek instansies, owerhede en buitelandse regerings wat onnodig bevoordeel word deur lae kragtariewe * Implementeer politieke wil om plaaslike owerhede en regeringsdepartemente te dwing om agterstallige skuld te betaal en maandelikse verpligtinge binne die voorgeskrewe tyd na te kom. * Ken ESKOM die ware betekenis van produktiwiteit en uitkomsbestuur wat direk gekoppel is aan vergoeding en bonusse? * MOENIE DIE GETROUE BETALER STRAF OMDAT BOGENOEMDE NIE NAGEKOM WORD NIE! 	2026-01-08 16:09:55	No I do not	All of the above – we should not pay for government blunders	When I make a mistake, I have to pay for rectification of that mistake. It is unacceptable for NERSA to expect consumers to pay for its mistake, NERSA should face the consequances of their errors. Similarly, Eskom's asset values are overstated due to their inefficiencies and failure to ensure proper procurement, asset management as well as failure to prevent corruption. It is unacceptable for Eskom to expect consumers to pay for its mistakes, Eskom should face the consequances of their errors. Electricity consumers at large are consumers, not project financiers. Eskom should plan and budget for capital projects from their income. In deriving that income, Eskom is obliged to do so in a cost effective manner through proper controls, not through the current mechanisms of all exorbitant expenses being included in the price consideration. We have all read the reports of items procured at hugely overpriced rates, humongeous claims settled in favour of contractors for Eskom's failures to effect proper project controls, and last but not least, the exorbitant and unmarket related salaries paid to incompetent staff at all levels as well as the failure to allign staff numbers with world standards. Eskom is hugely overstaffed and it is unacceptable to expect consumers to pay for Eskom's failure to effect proper enterprize management.	Wim	Gauteng		retired

	2026-01-08 16:06:29	No I do not	All of the above – we should not pay for government blunders	Escom used to be the producer of the cheapest electricity in the world. The fat cats have destroyed and syphoned enough money off the people to the point where electricity is luxury that few can afford. The reports from escom, that increases will inflation linked. Ha thats a laugh. Escoms bloated over paid work force and directors that earn millions of our hard earned money will get more bonuses that we pay. Enough is enough. We can't do this anymore. Escom is killing businesses and industry. Look at the losses of the steel mills and mining. This result in more unemployment and more electricity theft. It is a never ending spiral. As Escom supposedly made a profit this past year, then that means we are paying too much and why could that profit not have offset the R76billion.	Paul	Western Cape		self-employed
	2026-01-08 16:06:22	No I do not	All of the above – we should not pay for government blunders	Why do we, the overburdened public, have to now bail out Eskom ? This is ridiculous! When I've made a financial mistake, I have to take the responsibility. Why does any organisation affiliated to the Government become the publics' problem???	Cynthia	Gauteng		
	2026-01-08 16:05:43	No I do not	All of the above – we should not pay for government blunders	Seriously? 8/10 people in South Africa are struggling to afford basic food and expenses... Eskom used to be a world leader ...but has become a clear symbol of ANC government failure, with NERSA is not far behind! The financial consequences of these stuff-ups should be borne by those responsible, not by taxpayers or customers. The public has already paid dearly through corruption, load shedding, damaged infrastructure, lost revenue/income, etc. This burden is unacceptable and must not be allowed to continue. 	2026-01-08 15:35:19	No I do not	All of the above – we should not pay for government blunders	We have heard this song before, endlessly. Why should the blunders (deliberate?) of a few cost the country any money, let alone R76Bn. The usual penalty for significant blunders is termination at least. Let's see some of those, preferably accompanied by orange overalls.	Dermot	Western Cape		retired
	2026-01-08 15:35:09	No I do not	All of the above – we should not pay for government blunders	I think the audacity to expect the public to foot the bill for their blunders is outrageous!!!!	Hester	Western Cape		retired
	2026-01-08 15:34:58	No I do not	All of the above – we should not pay for government blunders	The ANC has failed South Africa. Everything they touch turns to shit.	Derrick	Gauteng		employed individual
	2026-01-08 15:34:55	No I do not	All of the above – we should not pay for government blunders	So I have to pay higher rates because of Eskom's R76 billion stuff up. But were they really unknowing stuff ups? Eskom allowed family and friends to win tenders where a roll of toilet paper cost R80.00 on the plant, a litre of milk cost R50.00 and a broom cost R80.00 aswell. Subcontractors were the downfall of Eskom's budget. So in conclusion look to the friends and family's that were awarded rediculous contracts. Government employees scored just as much money during the building of Medupi and Kusile. Stop looking to the tax player's and electricity user's to fund your f&Rk ups and look somewhere else for your losses.	Stella	North West		unemployed individual
	2026-01-08 15:34:54	No I do not	All of the above – we should not pay for government blunders		Adele	Eastern Cape		employed individual
	2026-01-08 15:34:42	No I do not	All of the above – we should not pay for government blunders	The consumer has paid for all that has to be done to rectify the absolute farce that has been Eskom over the many years. We have suffered "load shedding" for over 14 years and we have borne higher than inflation price hikes year after year and now we need to once again pay for the inefficient leadership and management at Eskom. The fact that the funds never seem to stay within Eskom is not the fault of the consumer. The time has now come for the government to repay the consumer by firstly recovering the funds syphoned off by cadres and using the money that has been allocated in the budget for Eskom. The consumer is overtaxed as it is and now yet ANOTHER hike from Eskom. NO MORE, Nersa.	Cheryl	Eastern Cape		retired
	2026-01-08 15:34:39	No I do not	All of the above – we should not pay for government blunders		Vaughn	Western Cape		self-employed

Debra	Gauteng		retired
	2026-01-08 15:27:12	No I do not	All of the above – we should not pay for government blunders	Why must we as end consumers (only a handful) always pay for their mistakes	Fanie	Western Cape		
	2026-01-08 15:27:00	No I do not	All of the above – we should not pay for government blunders	Do you agree that the consumer should carry the additional financial burden of funding Eskom's incomplete construction projects and operational cash flow through increased electricity prices? I do not agree with the issue of re-valuing Eskom assets in the revised tariff increases. The valuation of Eskom assets should be capped when used in calculating the tariffs. Old, non-operational or unsteady units should be devalued and not included in any of these calculations. I also do not believe that consumers should carry the additional financial burden of funding Eskom's incomplete construction projects and operational cash flow through increased electricity prices. These costs have been massively inflated due to the corruption that runs rife in all spheres of governmental and parastatal entities such as Eskom and Transnet. There are alternative ways of making budget - rid Eskom of these corrupt officials, collect municipal debts, decrease the workforce, privatise the power generation units as was promised by Ramaphosa already during Covid.	Llewellyn	Mpumalanga		employed individual
	2026-01-08 15:26:54	No I do not	All of the above – we should not pay for government blunders	This error is not made by the public, so why should the public have to pay for it? What is the next error that some government department is going to make that they expect the public to pay for? Eskom made a R16 billion profit last year and wiped out a R55 billion loss the previous year, a large portion thereof through tariff hikes. The municipalities owe billions to Eskom, why should those who are paying be punished even more for others. We can barely keep our heads above water, this will pull us under!!! WHAT IS THE NEXT BLUNDER? I DEFINITELY DO NOT SUPPORT	Gordon	KwaZulu-Natal		unemployed individual

	2026-01-08 18:27:34	No I do not	All of the above – we should not pay for government blunders	The reality is heartbreaking: ordinary South Africans at the bottom are forced to choose between food and electricity because of joblessness and low income. And when survival is at stake, people will naturally choose food. If fewer and fewer households can afford electricity, what sense does it make for Eskom to keep raising prices? Who benefits from that? Why should citizens pay for Eskom's mistakes? Accountability must be demanded for years of poor management and failed planning. Those found guilty of corruption should face consequences — not bonuses. Billions have already been wasted, yet we are asked to trust them with more, when they have not proven faithful with what they were entrusted with before. That is not just unfair; it is madness. Eskom must recover the stolen money, recalculate its approach, and stop rewarding executives while the country suffers. South Africans are stretched thin and cannot keep bailing out reckless decisions. It's time for Eskom to grow up, take responsibility, and stop behaving like a teenager who makes careless choices and expects others to clean up the mess. This cannot continue. It is unacceptable, and the people of South Africa deserve better.	Millicent	Western Cape		employed individual
	2026-01-08 18:27:30	No I do not	All of the above – we should not pay for government blunders	Why must the cash strapped public keep financing the incompetence of the cANCer's stuff (read f@ck) ups? 	2026-01-08 18:14:28	No I do not	All of the above – we should not pay for government blunders	"The construction of the Kusile Power Station, completed in late 2025, had a final cost of approximately R233 billion, a significant overrun from its initial budget of around R81 billion (or R80 billion) due to delays, corruption, and technical issues, making it one of the world's most expensive coal-fired power plants. " All those that benefitted can contribute to recovering any money's NERSA feels need to be recovered. Furthermore, no FREE electricity to anyone. More than half the population is getting free units every month, no more. If you use electricity you pay. If illegal connections are found traces the source, bulldoze the house. All politicians, government departments, must settle their bills or be fired. Private providers can supply to Eskom for a standardised rate. Eskom doesn't carry the risk or cost all by itself. Renegotiate the rates with coal suppliers. Some are being paid far above a realistic average market price. Several of those are politically connected. The water hyacinth problem, sewage problem, garden refuse, animal waste, garbage, even dog feces etc can be converted into biogas or biofuel. This will create new businesses, more jobs and go a long way to transformation if investment is made by black citizens. Many of these have by-products which can support secondary industries and again create new businesses opportunities. The tax payer base has to be increased. Taxis and the informal sector must contribute. As those requiring SASSA decreases due to the new opportunities, more more for development becomes available. It's time to reduce ESKOMs bloated staff compliment and reduce the salaries. If 25% of these possibilities are implemented we would have cheap electricity and be able to export both the power and the secondary products. Regrettably our government does not have the vision, knowledge or political will to make South Africa a success.	Amanda	Free State		unemployed individual

	2026-01-08 18:14:09	No I do not	All of the above – we should not pay for government blunders	NERSA Our Vision: To be a recognised world-class leader in energy regulation. Our Mission: To regulate the energy industry in accordance with government laws and policies, standards and international best practices in support of sustainable and orderly development. Our Values: Passion , Spirit of Partnership, Excellence, Innovation, Integrity, Responsibility, Professionalism, Pride Regulatory Principles In regulating the three industries, NERSA must adhere to sound principles and approaches to be able to deliver on its mandate and achieve its objectives. The above are what NERSA stands for and is required and mandated to carry out. It would appear that they have met very few of their statutory body objectives. Accordingly NERSA and through their negligent practice should fund the shortfall themselves. This would be done through the fidelity cover which would most certainly have been taken. Failing which, the body which established and mandated NERSA as a Statutory Body and which has oversight on its employees, and employed those persons for their specific competencies in act 40 of 2004 should carry the burden, That body was the ANC government. Additionally, not all the plant is aging, only most of the newly constructed power stations were designed and constructed poorly and and at extreme time and cost excess to their budgeted and quoted costs, significantly rendering the ability to supply their design output incomplete to the massive disruption to the economy. Eskom too in their capacity should cover the cost shortfalls through their Fidelity and performance protection cover. None of these costs should by borne by the consumer who have moved from a constant balanced adequate supply of inexpensive electricity to an erratic an expensive commodity through incompetence in both management and operation. 	2026-01-08 18:00:31	No I do not	All of the above – we should not pay for government blunders	1. Affordability: It is unacceptable for consumers to bear the costs stemming from NERSA's calculation errors. Errors in regulatory calculations should be rectified by the regulatory body, not passed on to consumers who are already facing financial pressures. 2. Reliability: Requiring consumers to pay full price for aging and unreliable infrastructure is unjust. Customers should not have to shoulder the costs of a system that continually fails to meet the necessary standards of reliability. 3. Efficiency: The suggestion that consumers fund Eskom's cash flow issues and construction delays is problematic. It is not the responsibility of consumers to mitigate the inefficiencies within the organization, and such measures will only perpetuate a cycle of financial strain on households. 	2026-01-08 17:44:33	No I do not	All of the above – we should not pay for government blunders	When is the abuse going to end. Everything about govnm. in SA is all about scavenging for money to cover the losses created by corruption and theft of the money that they have received by hard working citizens. Those they support don't pay (a vote bribe tactic only and people are too excited at the 'free' this 'free' that aspect) Get-away-itis, is what i call it and they count themselves as entitled and clever; I get pre-termination notices all the time, prior to the 'due date' that 'they' the municipality determine, then shift it to justify late fees. It is sickening to live in SA and keep paying for incompetant theives and losers - and anyone who is vocal and gets attention for the truth is 'taken out' - The same govnt runs, installed NERSA as a body to keep an eye regulating costs - what a joke, they lie, cheat, manipulate and then agree with ESCOM when the defunct useless body applies for an increase that is rediculous. Our suburb has had more outages over December than there has been available electricity, yet with all of that they hike the costs. Personally i like to be aware of misuse of water, electricity etc but all my efforts in keeping costs down for myself's benefit as well as to respect the grid are futile, because they through corruption and the like keep hiking prices all the while doing nothing to find a solution to an obvious countrywide issue. Oh of course, their approach (how much brain ability does one need for this) is charge and charge and charge. Govn. people dont pay elect, water, rates and taxes so that explains why this reality we live is not in their reality - done on purpose. Crippling us all. Efforts are wasted, because look how we are living/surviving, cringing, powerless, hopeless, at their selfish self serving motives and actions. We just 'get the bill ' for all that they fail at, they must be fired and we get back to living in the 'real world' of achieving something.... for genuine effort put forth. - Thank you	Jennifer	Gauteng

	2026-01-08 17:30:34	No I do not	All of the above – we should not pay for government blunders	For at least the past 35 years the ANC has clearly demonstrated its absolute incompetence at every level of government. It is totally incapable of governing this country and what took 200+ years to build, they have incredibly destroyed in under 30 years, reducing this place where we were born and grew into a junk-status nation, mocked by the rest of the civilized world around us. The only ones who do not mock, are the terrorist nations, who recognize the stupidity of our leaders as something they can capitalize on and use for their own private agendas, knowing full well that our government does not stand a chance of seeing through their duplicity. We, the people, who are capable of analytical, logical thought, totally reject the proposal that we must pay for your corruption, incompetence and absolute foolhardy blundering down the corridors of power like some imbecile motivated only by your own personal avarice and stupidity.	Eugene	Mpumalanga		
	2026-01-08 17:30:34	No I do not	All of the above – we should not pay for government blunders		Dane	Gauteng		business owner
	2026-01-08 17:30:30	No I do not	All of the above – we should not pay for government blunders	In this lies a history of ineptitude and unqualified people being inserted into positions that they are not equipped to handle. The public CANNOT be held responsible and it is beyond time for Eskom / Government to take responsibility for their actions and remunerate/resolve accordingly. THE PUBLIC SHOULD NOT BE IMPLICATED IN THIS. Clean up your own house FOR A CHANGE. BE HONORABLE.	Iain	Gauteng		
	2026-01-08 17:30:16	No I do not	All of the above – we should not pay for government blunders	As civilians, our tax and rates as well as all other monies we pay this current government provide NOTHING in return. This has been going on for decades with lying, deceit, theft, corruption, etc with maladministration at every level from the President down. We CANNOT keep tolerating this idea of how this beautiful country should continue to be run. Einstein said: to do the same (bad) thing over and over again and expecting a different result is the first sign of madness: our current leadership!	Beverley	Gauteng		
	2026-01-08 17:30:15	No I do not	All of the above – we should not pay for government blunders		Janet	Gauteng		retired
	2026-01-08 17:30:07	No I do not	All of the above – we should not pay for government blunders	Electricity cost are beyond the reach of most South Africans. The ANC government has run Eskom into the ground and NERSA has seen to it that costs have escalated far beyond inflation rates. This is due to poor management, inefficiencies, tenders awarded to cadres plundering and theft. Consumers can no longer afford such wastage.	Carl	Gauteng		retired
	2026-01-08 17:30:05	No I do not	All of the above – we should not pay for government blunders		Inger	KwaZulu -Natal		
	2026-01-08 17:30:03	No I do not	All of the above – we should not pay for government blunders	Electricity is becoming unaffordable and the supply is unreliable. Infrastructure maintenance does not get correctly done and leads to increasing failures.	Shaun	Gauteng		retired
	2026-01-08 17:29:44	No I do not	All of the above – we should not pay for government blunders	Why must I the public always have to be financially drained due to this thieving government and all government departments. We pay far too much for electricity and the infrastructure has not bee repaired or upgraded in 30 years. We have so many power outages that last for weeks and we have bear the costs of our food going off and our appliances breaking. I DONT SUPPORT THIS PAPER AT ALL.	Mandy	Gauteng		retired
	2026-01-08 17:29:44	No I do not	All of the above – we should not pay for government blunders	It is time to remove and jail the incompetent caders that have been stealing from the public in many ways.	Riaan	Gauteng		self-employed
	2026-01-08 17:29:36	No I do not	All of the above – we should not pay for government blunders	We are already struggling with the costs as they are now. Making it higher is making us suffer even more for something we had no part in. It's not our mistake. Let Eskom pay for it's own mistake and not burden citizens any further	Lindiwe	Gauteng		
	2026-01-08 17:29:28	No I do not	All of the above – we should not pay for government blunders	They can Go get f@@ked !!!	Wayne	Western Cape		self-employed

	2026-01-08 17:28:55	No I do not	All of the above – we should not pay for government blunders	We should not be paying for the governments mistakes. It is their error and they must correct it.	Zelda	KwaZulu -Natal		retired
	2026-01-08 17:28:24	No I do not	All of the above – we should not pay for government blunders	Consumers must not pay for Eskom and Nersa's inability to run a just and reliable operation.	Gerhardt	Western Cape		retired
	2026-01-08 17:28:23	No I do not	All of the above – we should not pay for government blunders	Eskom has been mismanaged for many years, the corruption is deep seated and many highly connected politicians have been caught out by the media. A business that has cost the South African economy billions in corruption and blatant mismanagement has been rescued by the citizens of this country by allowing NERSA to continue giving this corrupt and criminal organisation the means to continue with the corruption at the expense of its customers. It's time for the people of South Africa to band together and reject any form of increase towards the running of ESKOM. Eskom must clean up its corruption and implement legal recourse against all of us complicit politicians and employees who have been involved with the corruption and recover the stolen money from these corrupt government employees and politicians. Billions have been stolen and if this money is recovered then there will be no need for any further increases for power for the people of South Africa. Get rid of the ANC and its corrupt cadres and 90% of the problems in Eskom will disappear.	Darryl	Gauteng		business owner
	2026-01-08 17:28:14	No I do not	All of the above – we should not pay for government blunders	Why should we pay for nersas issue, they are pro eskom everybody knows the fraud and scams happeng in Eskom are not our responsibility government is aware but do nothing. We are already burdened with the cost of corruption and fraud, the tax payers are not the ones at fault Most consumers cannot afford these continued price hikes. Municipalities need to pay their debit to Eskom This would give them more than sufficient funds.	Brian	Gauteng		retired
	2026-01-08 17:28:10	No I do not	All of the above – we should not pay for government blunders		Clive	KwaZulu -Natal		retired
	2026-01-08 17:28:07	No I do not	All of the above – we should not pay for government blunders	Eskom should consider the principle of being market related in a competitive environment. I am not in favor of cost plus a margin. I don't think Eskom is a reliable estimator of their costs. How hard are they fighting to reduce costs? What is the impact of technological advances on their capex and efficiencies ?	Johanna	Western Cape		
	2026-01-08 17:28:05	No I do not	All of the above – we should not pay for government blunders	Government must be held accountable for the blunder they have made. The consumers CANNOT be forced to pay for the R76 billion blunder. We as South African citizens should not allow this to happen.	Stanley	Gauteng		unemployed individual
	2026-01-08 17:27:58	No I do not	All of the above – we should not pay for government blunders	As I previously mentioned, there are a lot of corruption within Eskom and Government, which we pay for all the time. Numerous projects fail to be delivered on time and always at twice or more the original cost. Eskom's forward planning is also years behind and best options are not considered to accommodate ANC and Government officials who I assume get bribed deals.	Jacob	North West		retired
	2026-01-08 17:27:56	No I do not	All of the above – we should not pay for government blunders	We as the "few" tax paying public, honest and paying electricity user, can't afford to pay any more . The other reason is we seem to be expected to also now pay also for the massive amounts of debt that Eskom is unable to recover from munisipalities that owe Eskom. The debt owed would more than pay for the miscalculation that was made. I don't think it's fair for us too bow and for Eskom. Eskom must for a change just do things properly collect the money owed and give us law abiding citizens a break for a change.	Casper	KwaZulu -Natal		retired
	2026-01-08 17:27:49	No I do not	All of the above – we should not pay for government blunders		ERNESTINE	Free State		
	2026-01-08 17:27:25	No I do not	All of the above – we should not pay for government blunders	This is all a direct result of corruption and mismanagement.	Steven	Western Cape		unemployed individual
	2026-01-08 17:27:05	No I do not	All of the above – we should not pay for government blunders	Fix your own bungling blunders and leave financially pressured people alone. You have screwed us into the ground as it is. As a widowed pensioner, my concerns for the decent citizens of this country are great.	Lyn	Free State		retired
	2026-01-08 17:26:58	No I do not	All of the above – we should not pay for government blunders	We are pensioners and the cost of living is rising every month. We can't keep up! Why must we pay for an incompetent government?	Maria	Western Cape		retired

	2026-01-08 17:25:30	No I do not	All of the above – we should not pay for government blunders	We pay more than enough to the ANC government in taxes, rates, electricity and refuse charges… and live in a city that is falling apart!!!	Heather	Gauteng		retired
	2026-01-08 17:25:15	No I do not	All of the above – we should not pay for government blunders	The people who are actually paying for electricity are already funding the illegal users and the previously disadvantaged. The sliding scale system has already put a massive burden on paying customers. We are already compensating for bills that are written off because municipalities fail to collect, illegal connections etc. There is absolutely no proper administration so Eskom just increases the prices to mitigate these losses. Not to mention that Eskom management will still get their ridiculous bonuses regardless of whether electricity was supplied or not. Let a private entity step in and give Eskom a run for their money. Consumers deserve the right to choose a service provider who can actually deliver.	Leah	Free State		employed individual
	2026-01-08 17:25:08	No I do not	All of the above – we should not pay for government blunders	Consumers must not pay for Eskom and Nersa's inability to run a just and reliable operation.	Charles	Gauteng		retired
	2026-01-08 17:25:08	No I do not	All of the above – we should not pay for government blunders	Both NERSA and Eskom should be more directly held to account; the current process unjustly socialises the consequences of their mistakes onto already overburdened consumers. Neither the court order nor NERSA's process addresses personal or institutional accountability for the original miscalculations, secretive settlement, governance failures at Eskom. Neither do they adequately consider the socio-economic impact of loading a further R76 billion onto the public. The issue requires urgent executive intervention, and parliamentary oversight. 	2026-01-08 17:12:57	No I do not	All of the above – we should not pay for government blunders	I can barely afford to live at the moment going on Pension soon I am not able to pay one extra cent	vanessa	Western Cape		employed individual
	2026-01-08 17:12:51	No I do not	All of the above – we should not pay for government blunders	I live in Limpopo on a farm. The infra structure is so unreliable, winds and rain causes outages for days. Even for small problems that are fixable within minutes. Like candles that are out. We have this problem at the moment and have been without power since 30Dec. Reporting does nothing, they override the request as completed without showing up. I will not pay Eskom anything extra.	Istell	Limpopo		employed individual
	2026-01-08 17:12:41	No I do not	All of the above – we should not pay for government blunders	I strongly oppose NERSA's proposal to make ordinary South Africans pay for Eskom's R76 billion blunder. This decision is unjust, undemocratic, and economically destructive. Accountability: The mistakes that led to this massive shortfall were caused by mismanagement and poor governance. It is unacceptable to shift the burden of these failures onto consumers who already face high tariffs and unreliable service. Economic impact: Forcing households and businesses to absorb this cost will worsen inflation, reduce disposable income, and cripple small enterprises. South Africans are already struggling with rising food, fuel, and living costs—this additional burden is unconscionable. Fairness: Consumers did not cause this debt. Government and Eskom executives must be held accountable, not the public. Bailouts and tariff hikes reward failure and punish citizens. Alternatives: Instead of penalizing consumers, government should pursue transparent audits, recover funds lost to corruption, and restructure Eskom to ensure efficiency and sustainability. South Africans should not be forced to pay for government and Eskom's mistakes. I urge NERSA to reject this proposal and protect the public from further exploitation.	Andre	Gauteng		self-employed
	2026-01-08 17:12:38	No I do not	All of the above – we should not pay for government blunders		Theresa	Gauteng		retired
	2026-01-08 17:12:13	No I do not	All of the above – we should not pay for government blunders		Pamela	Gauteng		retired
	2026-01-08 17:12:12	No I do not	All of the above – we should not pay for government blunders	The government cannot impose liability on consumers for their R76 billion blunder. It is unlawful to place more burdens on its citizens for calculation errors, ageing and unreliable infrastructure and construction delays, etc. It is quite clear to everyone that our shameful government, NERSA and ESKOM blatantly steal from it's people to satisfy their greed whilst they lead our country into further decay and disrepair.	Linda	Gauteng		
	2026-01-08 17:12:08	No I do not	All of the above – we should not pay for government blunders		rosemary	Western Cape		retired
	2026-01-08 17:11:47	No I do not	All of the above – we should not pay for government blunders	I do NOT you accept a further increase in electricity tariffs to fund a higher valuation of Eskom's power plants, nor should we be forced to pay higher tariffs to cover the full value of power stations that are near the end of their lifespan or frequently unavailable due to breakdowns. Neither should the consumer carry the additional financial burden of funding Eskom's incomplete construction projects and operational cash flow through increased electricity prices.	Nolan	Gauteng		retired
	2026-01-08 17:11:42	No I do not	All of the above – we should not pay for government blunders	This is ridiculous and unacceptable. I actually have no words to express myself in full regarding this situation. This type of neglect does not suit a country like the Rep of SA. I am sorry!!	Willie	Western Cape		retired
	2026-01-08 17:11:33	No I do not	All of the above – we should not pay for government blunders	It is unacceptable that the ordinary taxpayer and electricity consumer should be expected to pay for this calculation error when they are already being bled bone dry for all the other multiple errors committed by government due to incompetence and ineptitude of the army of cadre employments.	Edward	Western Cape		retired

	2026-01-09 09:12:15	No I do not	All of the above – we should not pay for government blunders	For 30 plus years Eskom has not maintained the infrastructure. With every price hike we the public have just helped the incompetent Eskom management line 5heir own pockets. There is soo many illegal connections that we the law abiding citizens are forced to pay for. Enough is enough.	Isabelle	Gauteng		retired
	2026-01-09 09:12:06	No I do not	All of the above – we should not pay for government blunders	The current economic climate, we can't accept a further increase in electricity tariffs to fund a higher valuation of Eskom's power plants, we believe the asset values should be capped to keep electricity affordable. Paying for Aging and Unreliable Infrastructure Context: This redetermination decides which power stations are included in the price you pay. This includes aging plants and those prone to breakdowns. Why should consumers be forced to pay higher tariffs to cover the full value of power stations that are near the end of their lifespan or frequently unavailable due to breakdowns (load shedding)? Burdening Consumers with Construction and Operational Costs Context: The proposed adjustments allow Eskom to recover billions from the public for "Work Under Construction" and daily cash flow ("Working Capital"). We do not agree that the consumer should carry the additional financial burden of funding Eskom's incomplete construction projects and operational cash flow through increased electricity prices	Margaretha Wilhelmin	Gauteng		retired
	2026-01-09 09:12:05	No I do not	All of the above – we should not pay for government blunders	I do not feel we should take on more costs of our falling government. As we already pay so much towards all of it already.	Samantha	KwaZulu-Natal		unemployed individual
	2026-01-09 09:12:02	No I do not	All of the above – we should not pay for government blunders	The real problem is that there too many very incompetent people employed and who can scarcely be trusted about anything - with apologies to the few who are not so. We've already had an over 12% increase in tariff, the cost of which will find its way into just about everything. We cannot be subsidizing gross incompetence. The solution is obvious: dismiss the incompetent; but our government does not have the will to do so!	Vedprakash	KwaZulu-Natal		retired
	2026-01-09 09:11:41	No I do not	All of the above – we should not pay for government blunders	Given the current economic climate, asking the public to pay for Aging and Unreliable Infrastructure!!!!!!! They are only looking for more money to steal!!!!	Brian	KwaZulu-Natal		retired

	2026-01-09 09:05:51	No I do not	All of the above – we should not pay for government blunders	ESKOM is in a capital death spiral that can be traced back to 2008 when the first new build projects were undertaken. The state-led ideology of centralised planning led to the deployment of cadres incapable of building the infrastructure of Medupi and Kusile in particular. The facts surrounding this are the well publicised corruption events around Brian Molefe and several other before and after his tenure. The Zondo Commission highlighted several pertinent cases. Furthermore, the settlements reached between the South African Government and prominent businesses implicated in fraud and corruption was totally inadequate. The same organisations implicated in this malfeasance have quietly been granted access to other lucrative government contracts while ESKOM reels from the compound interest effects of these disastrous acts. ESKOM now faces a "Cost of Corruption" that is conservatively R76 billion, while not a single person within government or ESKOM has been found guilty and sentenced for these acts. ESKOM is now idling these monstrous power stations after driving individual and corporate consumers off the grid as a result of unreliable power supply (load shedding) and exponential increases in tariffs. In conclusion, ever increasing tariffs are not addressing the root causes of government failure, unsustainable overheads and debt repayments that are significantly impacted by the cost of corruption. ESKOM is not a sustainable business model as the demand for electricity from the national grid decreases with every increase in tariffs, which essentially points to an overpriced product (electricity) in a market where alternatives are cheaper. I recommend dramatic cuts in ESKOM personnel and salaries with strategic restructuring involving public-private-partnership participation at local government and rural levels for localised power supply, distribution and sale in the form of micro-grids.	Craig	Western Cape		business owner

	2026-01-09 09:04:47	No I do not	All of the above – we should not pay for government blunders	Whether or not we law abiding tax payers may "vote" against Gevernment blunders, ultimately we will always still be milked as they willnalways find ways to make us pay for their criminal blunders. As long as the responsible people are not held liable for their actions, nothing will change! They are running this Country into financial ruins as it becomes impossible for the minorities to cover the majority.	Max	Gauteng		
	2026-01-09 09:04:44	No I do not	All of the above – we should not pay for government blunders	The ordinary people of South Africa barely can food on the table and should not be responsible for the blunders of the government and cannot afford to pay more for services.	Elmari	Gauteng		retired
	2026-01-09 09:04:41	No I do not	All of the above – we should not pay for government blunders		Pam	KwaZulu-Natal		employed individual
	2026-01-09 09:04:40	No I do not	All of the above – we should not pay for government blunders	To put it simply, we all understand that Eskom's balance sheet still requires repair and that it needs to have a strong footing in order to be successful going forward and avoid potential loadshedding. However, the consumer should NOT have to pay for it. The reason Eskom is in this mess is because of fraud, corruption and mismanagement also due to ineptitude. Here are some suggested actions to solve this problem: As a matter of priority, those who have had a hand in this should be arrested and put on trial and those guilty must go to jail. This will restore investor confidence. Second, Eskom must demonstrate that it has done everything possible to cut overheads and running costs to minimum acceptable levels. Head office costs need to be examined with a fine tooth comb. Procurement costs are the next big item fuelled by corruption and mismanagement and out of date BEEE policies that are simply adding to costs unnecessarily. To summarise: Consumers should not carry the additional burden of funding Eskom's incomplete construction projects or operational cash flow through higher tariffs. Instead and in addition to the two points above: 1. Government support (subsidies or guarantees) should cover project overruns. 2. Private sector partnerships (IPPs, co-financing) should be leveraged to complete stalled projects. 3. Tariffs should only reflect assets that are "used and usable", ensuring consumers pay for electricity actually delivered. 4. Operational inefficiencies must be addressed internally at Eskom, not socialized through tariffs.	Nicolas	Gauteng		employed individual
	2026-01-09 09:04:28	No I do not	All of the above – we should not pay for government blunders	ONS land lyk al soos n "Shihole" en Escom is al jare lankal bankrot, die regering is destroyers van alles in die land hulle moet verwyder word van die samelewing!!!! 	2026-01-09 09:02:14	No I do not	All of the above – we should not pay for government blunders	The recent High Court ruling exposing NERSA's R76 billion calculation error in Eskom's asset valuation is not the fault of South African electricity users. This mistake stems from regulatory oversight and administrative failure—costs that should be borne by the responsible institutions, not consumers already burdened by rising living costs. Passing this financial blunder onto households and businesses through higher tariffs is unjust. It sets a dangerous precedent: rewarding inefficiency and shifting the consequences of institutional errors onto the public. Eskom and NERSA must absorb this cost, prioritize transparency, and implement reforms to prevent future mismanagement. South Africans deserve affordable, reliable electricity—not a bill for someone else's mistake.	Leon	Gauteng		
	2026-01-09 09:02:13	No I do not	All of the above – we should not pay for government blunders	The recent High Court ruling exposing NERSA's R76 billion calculation error in Eskom's asset valuation is not the fault of South African electricity users. Passing this financial blunder onto households and businesses through higher tariffs is unjust. It sets a dangerous precedent: rewarding inefficiency and shifting the consequences of institutional errors onto the public. Eskom and NERSA must absorb this cost, prioritize transparency, and implement reforms to prevent future mismanagement. South Africans deserve affordable, reliable electricity—not a bill for someone else's mistake.	Leon	Gauteng		
	2026-01-09 09:02:07	No I do not	All of the above – we should not pay for government blunders	Ideological application and mis-management of state institutions has lead to infrastructure destruction, why should we as tax payers be further burdened with this communist mess	Hudson	Gauteng		
	2026-01-09 09:01:38	No I do not	All of the above – we should not pay for government blunders	The ANC leader - current and former - should be held accountable and made to pay. Even it is means that for generations to come they have less than nothing. An example needs to be made that you cannot just make decisions when in power with no consequence. People need to fear going into politics.	Paul	Western Cape		employed individual

	2026-01-09 09:01:14	No I do not	All of the above – we should not pay for government blunders	To the National Energy Regulator of South Africa (NERSA), I am writing to express my strong objection to the proposed R76 billion electricity tariff increase, as outlined in the consultation paper published on 30 December. This proposal, which seeks to compensate Eskom for mistakes made by the regulator, places an unjust and unaffordable burden on South African consumers. As a South African citizen already grappling with the rising cost of living, exorbitant electricity tariffs, and ongoing load-shedding, I cannot afford further hikes. The proposal to make consumers pay for regulatory errors is fundamentally unfair and unacceptable. It is deeply concerning that ordinary households, many of whom are struggling to make ends meet, are expected to bear the cost of mistakes for which they are not responsible. Electricity is a basic necessity, and its affordability is critical to the well-being of South African families, the survival of small businesses, and the overall economic stability of our country. Imposing such a significant additional financial burden will only exacerbate poverty, inequality, and social unrest. I urge NERSA to reconsider this proposal and instead explore alternative solutions that do not penalise consumers. These could include: 1. Ensuring greater accountability within Eskom and NERSA to address inefficiencies and errors. 2. Prioritising cost-saving measures and operational improvements within Eskom. 3. Seeking financial support from government or other mechanisms that do not further burden already strained households. I also request an extension of the consultation period to allow more South Africans to voice their concerns, given the limited time provided to respond to such a significant proposal. South Africans deserve fair and affordable electricity, and we should not be made to suffer for mistakes beyond our control. I trust that NERSA will act in the best interests of the people and reject this unjust proposal.	Mpho	Eastern Cape		self-employed

	2026-01-09 08:58:19	No I do not	All of the above – we should not pay for government blunders	The people of South Africa have been carrying the cost of government mismanagement for long enough. We are fast approaching the point of no return when all the people will unite against a common threat to their very existance, that threat has long been identified as the ANC and the ruling 'political elites' who have been looting and destroying the national wealth and infrastructure of our country at the cost of the private sector. Driving up the cost of energy will not solve the mismanagement of Eskom, it will only become a force multiplier that will unite all the people of this country against the economic oppression we are all experiencing at the hands of the political elite. We are past the point of being distracted by 'race-based politics', race is fast becomming a non-issue as people wake up to the reality of the economic oppression this whole nation has been subjected to over the past 30 years. Make the right descision and do not oppress us the people economically any further.	J	Eastern Cape

	2026-01-09 08:49:32	No I do not	All of the above – we should not pay for government blunders	Eskom has been mismanaged for decades, and for decades the public has been forced to foot the bill for that incompetence. This is not sustainable. Eskom must be made to face the consequences of their own mismanagement or the situation will never improve. Simply muddling on like this and expecting the pubic to bail them out again and again is a road to disaster. The latest tariff hike is a good example: through loadshedding Eskom has forced the public to invest in home solar generation, gas appliances and other methods to reduce electricity consumption, and Eskom merely increases the fixed monthly connection fees by a factor of two or more to make up for the lost electricity sales, thus punishing the consumer for the consequences of Eskom's malperformance. The proposed upcoming tariff hike is essentially a repeat of that same principe.	Frank	Gauteng		unemployed individual
	2026-01-09 08:48:57	No I do not	All of the above – we should not pay for government blunders	Eskom can go to hell, We are sick and tired of the useless people that work there. Its time they were all kicked out and replaced with people that have the proper qualifications to take up those positions. How much more must the man in the street suffer at the hands of incompetant people. They eating steak every day and we eating grass because we have to keep paying for their mistakes. Enough is Enough- we the people cannot afford this, we also need to live and eat steak.	Carol	KwaZulu-Natal		retired

	2026-01-09 08:46:28	No I do not	All of the above – we should not pay for government blunders	Die vraag moet gevra word wat was oorsaak van berekenings fout, wat was optrede teen die verandwoordelike persone. Indien dit in die privaat sektor gebeur het was bestuur verantwoordelik afbetaal. Was dit regtig n fout of n manier om verbruikers maar net verder te misbruik. Die verbruiker is op die punt van weerstand teen betalings. Verbruikers het vertroue verloor in die regering want dit is n regeringsfunksie. Om blaam op NERSA of iemand anders te lê werk nie meer, dit is die regering wat onbevoeg is. Die verbruiker is op breekpunt en die gevolge gaan niemand help nie maar glo my die frustrasie gaan oorloop. Die probleem met Die regering is hulle eet die saad wat geplant moet word so die saad wat geplant moet word raak al minder en die oes ook al kleiner. Dit werk met alles in die lewe so. Laat jou maandelikse verpligtinge agter raak deur geld te mors op onnodige goed en kyk hoe lyk jou huis later omdat dit nie instand gehou is nie en nou blameer jy almal en die familie moet help want die dak lek ens. Nee , nee ons sal maniere vind om minder krag te gebruik , inkomste van ESKOM gaan daal en die probleem gaan net groter raak.	Herman	Western Cape		retired
	2026-01-09 08:46:18	No I do not	All of the above – we should not pay for government blunders	There is no accountability or responsibility;ity taken by those for their jobs - mistakes are fast becoming the normal, and we as a South African citizen and rapidly growing concerned populace are their "get out of jail free" cards, always expected to turn our heads in the opposite direction. It is time this type of behaviour and attitude HAS to stop. Unfortunately the one word that doesn't exist in the current government's vocabulary is the word MAINTENANCE. A travesty when the entire infrastructure of a country's economic well-being can only function properly and more cost effectively if maintenance was mandatory.	Amanda	Western Cape		retired
	2026-01-09 08:46:17	No I do not	All of the above – we should not pay for government blunders	If Eskom has a liquidity issue, let them claim against the third party auditors for false accounting and incompetency. Consumers must not be penalized.	Michael	Western Cape		
	2026-01-09 08:45:45	No I do not	All of the above – we should not pay for government blunders	It's an absolute disgrace that the Government cannot budget correctly. They continue to misappropriate funds, ignore the importance of maintenance and repair of all our infrastructure - electricity, water, roads, education, and health, then expect the taxpayer to pay for the foley of their ways. Enough! The embattled taxpayer cannot support this anymore.	Marcus	Gauteng		self-employed
	2026-01-09 08:45:29	No I do not	All of the above – we should not pay for government blunders	Electricity is becoming so unaffordable and the SA government does nothing to assist the people of.its country. Disgraceful conduct.	Samantha	Gauteng		employed individual

	2026-01-09 08:40:19	No I do not	All of the above – we should not pay for government blunders	I strongly object to consumers being required to pay higher electricity tariffs to recover costs arising from NERSA's own calculation errors. It is neither affordable nor fair for households and businesses, already under severe cost-of-living pressure, to fund a R76 billion mistake through increased tariffs. Consumers should not be charged full prices for aging and unreliable infrastructure that continues to experience breakdowns and load shedding. Furthermore, inefficiencies, cash flow shortfalls, and construction delays at Eskom should not be passed on to users. Any revised price determination must prioritise affordability, accountability, and value for money, rather than shifting institutional failures onto the public.	Matthew	Eastern Cape		employed individual

	2026-01-09 08:38:32	No I do not	All of the above – we should not pay for government blunders	No, no, no! The public and the few tax-payers cannot keep on footing the bill for incompetence . It is their responsibility to find innovative ways to get the money to fill the gap, stop milking the dry cow (i.e. the paying public, an easy target)! Eskom must be privatised and left in the hands of capable people. And again, not for us to foot the bill in the meantime. They can start charging the millions who don't pay for electricity, and have those responsible for illegal connections pay heavy penalties, in order to finance the gap. Also a huge and consistant effort to curb vandalism and damaging of existing old infrastructure.	Mariana	Gauteng		
	2026-01-09 08:38:08	No I do not	All of the above – we should not pay for government blunders	South Africa has come to the place of accountability. Real accountability, not just theoretical accountability that sits on screens and A4 papers. The ANC government has for too long put the wrong people in important places (like Eskom and many others) and all for wrong reasons. The time of reckoning has come. Do not think that you will get away with continuing to financially rape the tax paying citizens of this country. E-tolls in Gauteng was the warning shot. Too many people are praying that God will expose the corruption and incompetence, and now it is time to face the music. The anger is rising too. Consider very carefully before taking the easy road of passing on these costs to corporate and individual citizens. There will be unintended consequences. Oh, and what has happened to Molefe, Singh and Koko? We would like those matters finalized and funds recovered before we pay anything more. Has the ANC got any integrity left to say "Mea Culpa"? Let's see but I won't be holding my breath. I think we will see the demise before we see some humility and introspection.	Dean	Gauteng		business owner

	2026-01-09 08:32:21	No I do not	All of the above – we should not pay for government blunders	1. The Cost of Eskom's Assets vs. Tariff Affordability Response: No. Given the current economic climate, further increases in electricity tariffs to fund a higher valuation of Eskom's power plants are not acceptable. Asset values should be capped to protect affordability, economic activity, and vulnerable consumers. Electricity tariffs should prioritise affordability and economic sustainability rather than compensating for accounting revaluations that do not translate into improved service delivery. 2. Paying for Aging and Unreliable Infrastructure Response: No. Consumers should not be required to pay higher tariffs for power stations that are at or near the end of their operational life or that are frequently unavailable due to breakdowns and load shedding. It is unreasonable to expect the public to fund assets that are unreliable, inefficient, and no longer able to provide consistent electricity supply. 3. Burdening Consumers with Construction and Operational Costs Response: No. Consumers should not carry the additional financial burden of funding Eskom's incomplete construction projects or operational cash flow through increased electricity prices. These costs arise from internal financial, project management, and governance challenges and should not be transferred to electricity users who are already under significant financial pressure. 	2026-01-09 08:25:45	No I do not	All of the above – we should not pay for government blunders	To Whom It May Concern, I hereby submit this public comment regarding the proposed redetermination that affects which power stations are included in the tariff base charged to consumers, including aging plants and those that are frequently unavailable due to breakdowns and load shedding. I respectfully submit that consumers should not be required to pay tariffs reflecting the full value of power stations that are near the end of their operational lifespan or that consistently fail to deliver reliable electricity. Electricity tariffs should reflect the actual value of the service delivered, not merely the historical or accounting value of infrastructure. Where assets are unreliable, frequently offline, or approaching decommissioning, they no longer provide the level of service for which consumers are being charged. Requiring full-value recovery under these circumstances violates basic principles of fairness and value for money. Furthermore, the risks associated with asset aging, inadequate maintenance, and delayed replacement are largely within the control of the utility and policymakers—not consumers. Shifting these risks onto customers creates a moral hazard by insulating service providers from the consequences of poor planning or execution. This weakens incentives for prudent asset management and timely infrastructure renewal. The economic and social consequences of higher tariffs must also be considered. Increased electricity prices disproportionately harm low-income households, small businesses, and energy-dependent industries. In an environment already constrained by unreliable supply and load shedding, further cost increases threaten economic stability, employment, and social equity. A sound regulatory framework should encourage efficiency, reliability, and forward-looking investment. Allowing full cost recovery for underperforming or end-of-life assets undermines these objectives by removing performance accountability. I therefore urge the authority to consider alternative approaches, including: Performance-based tariff adjustments that reflect actual availability and reliability; Accelerated depreciation of aging assets to reflect their declining economic value; Disallowance of imprudent or avoidable costs from the tariff base; and Transparent ring-fenced funding for new, reliable generation capacity. Consumers should not be required to pay for theoretical capacity or past planning failures. They should pay for reliable electricity that is actually delivered. Thank you for the opportunity to provide comment on this important matter. Yours sincerely, Mrs Hannatjie Kriel I	Hannatjie	Western Cape		employed individual

	2026-01-09 08:21:56	No I do not	All of the above – we should not pay for government blunders	How is it fair at all to expect consumer to pay for the government's mistakes? The ANC has been running this country into the ground for the last 32 years, stealing and looting everything and now they want to force electricity users to pay for their mistake? There is no fucking way. Down with the ANC.	Bianca	Gauteng		employed individual
	2026-01-09 08:21:53	No I do not	All of the above – we should not pay for government blunders	Public Submission: Objection to the Recovery of R76 Billion from Electricity Consumers Electricity is an essential service fundamental to economic participation, public welfare, and human dignity. As such, its regulation must comply with principles of fairness, accountability, rationality, and proportionality. The proposed recovery of R76 billion from consumers to correct admitted regulatory and asset valuation errors fails to meet these standards. The financial shortfall in question arises from acknowledged calculation and oversight failures by the regulator and the utility. Consumers had no role in, nor control over, these decisions. Shifting the consequences of such errors onto electricity users amounts to retrospective cost recovery for institutional failures and undermines the principles of lawful and reasonable administrative action. Electricity consumers already shoulder a significant financial burden. Through taxation, they subsidise low-income household electricity access, contribute to state support and guarantees to the national utility, and pay escalating tariffs despite declining reliability. Requiring these same consumers to fund regulatory miscalculations creates a double financial burden that is inequitable and regressive. Furthermore, rising tariffs combined with unreliable supply are accelerating consumer investment in independent and embedded generation. This steadily reduces the paying customer base, placing increasing pressure on those who remain grid-dependent. Continued cost shifting onto consumers risks entrenching a self-reinforcing cycle of tariff increases, grid defection, and declining affordability. Regulated tariffs must reflect efficient costs and deliver value for money. Asking consumers to pay higher prices for aging infrastructure, ongoing supply interruptions, and historic accounting errors erodes confidence in the regulatory framework and weakens long-term system sustainability. Appropriate accountability mechanisms exist to address regulatory and operational failures. These costs should be managed through institutional reform, governance processes, and fiscally responsible remedies — not transferred to end-users who have met all their legal obligations. For these reasons, the proposed recovery of R76 billion from electricity consumers should be rejected. Explicit Constitutional & Legal References (for Formal Submission) You may formally ground your objection in the following constitutional, administrative, and regulatory principles: Constitution of the Republic of South Africa, 1996 Section 1(c) – Establishes the supremacy of the Constitution and the rule of law, requiring public power to be exercised lawfully and rationally. Section 195(1) – Governs public administration, requiring accountability, transparency, efficient use of resources, and fairness in decision-making. Section 33 – Guarantees the right to lawful, reasonable, and procedurally fair administrative action. Section 152(1)(b) – Requires public services to be provided in a sustainable manner, which includes affordability and long-term system viability. Promotion of Administrative Justice Act 3 of 2000 (PAJA) Section 6(2)(e)(iii) – Administrative action may be reviewed if it is based on an error of law or material mistake of fact. Section 6(2)(f)(ii) – Decisions must be rationally connected to the information before the administrator. Section 6(2)(h) – Decisions must not be so unreasonable that no reasonable decision-maker would have made them. Electricity Regulation Act 4 of 2006 Section 2(a), (b) and (f) – Mandates NERSA to ensure electricity supply is efficient, affordable, and sustainable, while protecting the interests of customers and end users. Relevant Constitutional Court Principles Affordable Medicines Trust v Minister of Health (2005): confirms that public power must be exercised rationally. AllPay Consolidated Investment Holdings v SASSA (2014): affirms accountability and consequences for administrative failure. These provisions collectively support the position that regulatory errors and mismanagement costs cannot lawfully or fairly be transferred to consumers, particularly in the context of an essential service. 	2026-01-09 08:11:22	No I do not	All of the above – we should not pay for government blunders	Us as consumers should not be paying for their mistakes. We cannot afford tariff increases.	Cathrine	Gauteng		employed individual
	2026-01-09 08:11:22	No I do not	All of the above – we should not pay for government blunders	Us as consumers should not be paying for their mistakes. We cannot afford tariff increases.	Cathrine	Gauteng		employed individual
	2026-01-09 08:11:13	No I do not	All of the above – we should not pay for government blunders	Seemingly there is no consequence management in government.	Sibusiso	Gauteng		
	2026-01-09 08:11:03	No I do not	All of the above – we should not pay for government blunders	Poor South Africa, do we even have a country, do we have happy citizens are we able to live a life where we are able to support ourselves and our children. To all this I say No!!!, why do we have to pay for our forefathers blunders, The ANC has stolen and is still stealing from the people of South Africa, when is this going to stop!. I have always believed that if you make mistakes you should fix it, not someone else, why should someone else pay for your mistakes. Eskom is run by incompetents' people, people who have no idea what they are doing, people who have no skills, are not practical. You cannot put uneducated incompetent persons in a position and then let them train on the job, everything will go wrong. So Eskom suck it up and pay for your own mistakes by removing huge bonuses for incompetent administration persons who will never get it right and use this money to fix your mistakes.	Norman	Western Cape		business owner
	2026-01-09 08:11:01	No I do not	All of the above – we should not pay for government blunders	The current situation with ESCOM is a disaster. Basic and effective service delivery falls short. Therefore safety nets funded by the public will constantly be required.	Frederick J	Northern Cape		business owner

	2026-01-09 08:10:34	No I do not	All of the above – we should not pay for government blunders	So far we did not see any ESKOM official or Government official being held accountable for all these blunders. A large part of these costs could have been avoided was it not for incompetent staff and decision makers.	Herbert	Western Cape		retired
	2026-01-09 08:10:29	No I do not	All of the above – we should not pay for government blunders	THE ANC needs to pAY	ERic	KwaZulu-Natal		self-employed
	2026-01-09 08:10:20	No I do not	All of the above – we should not pay for government blunders	We are being forced to pay for Government's ineptitude over and over again. We pay in our taxes, we pay in our municipal bills, we pay with our health, we pay with our safety. The South African public is being held to ransom by a highly corrupt and greedy government, whilst our infrastructure to falling to pieces - yet government still uses our money to fund their own lifestyles. Instead of paying for incompetent political 'officials' which have bled this country dry, instead of maintaining the infrastructure that they 'acquired'. It's about time that they were held fully accountable. They should use the money which they already have (by way of OUR taxes) to correct their own inefficiencies and actually hire QUALIFIED people to get this country working again. The public that can afford to, have already gone or will go off grid. The rest just can't afford to maintain a comfortable standard of living, with the current rates, let alone pay for a massive increase. The disparity between the have and have-nots will just expand and this country will go dark, in so many, many ways.	Mel	Gauteng		employed individual
	2026-01-09 08:10:19	No I do not	All of the above – we should not pay for government blunders	While it is true that everyone makes mistakes and we should have grace for others, the track record of corruption and criminality within the government in general and entities surrounding Eskom specifically, does not engender any empathy or compassion. Mistakes were made, corruption was allowed to continue unabated, adequate maintenance was not carried out, none of which the consumer had any say or control over. Now the consequences need to be borne by the appropriate parties and not consumers. May God give you wisdom to be able to fix this mess in a manner that is not of further detriment to the citizens of this country.	Helene	Western Cape		employed individual
	2026-01-09 08:10:18	No I do not	All of the above – we should not pay for government blunders	It is time we refuse to pay for incompetence! Unqualified people in roles that affect life giving functions and cost the taxpayer money!	Marion	Western Cape		employed individual

	2026-01-09 08:09:20	No I do not	All of the above – we should not pay for government blunders	Tired of paying incompetence. Maybe they should reduce all Eskom and NERSA directors' salaries by 50% and all relevant Government Ministers, including the president, for this. Do not come up with the lame duck excuse of stating that compared to the pound rate, we are cheap as we do not earn in pounds here. It is becoming totally unaffordable and next to a bond the 2nd biggest monthly expense. Even buying a car is cheaper than your electricity rates. Enough is Enough: Privatise Everything and Allow Competition. I lived in the UK for a number of years, and you could switch monthly from one supplier to the next based on their Monthly Special. It was seamless, no expenses involved. We need privatisation on most state enterprises and stop the rot. Maybe we should quote Trump, "Time to drain the Swamp of political corruption) Vote out ANC at municipal elections and get rid of this lame parasite.	John	Western Cape		employed individual
	2026-01-09 08:09:06	No I do not	All of the above – we should not pay for government blunders		Morongwa	Gauteng		
	2026-01-09 08:09:01	No I do not	All of the above – we should not pay for government blunders	Eskom has proven themselves to be completely incompetant. Ommissions of this kind from the financials is simply further proof. There is no preventative maintenance and power interruptions due to aging infrastructure are the order of the day. Government must pay for their own incompetence.	EKSTEEN	Western Cape		self-employed
	2026-01-09 08:08:56	No I do not	All of the above – we should not pay for government blunders	Time for a complete Government reset..Does'nt matter any reasons given-we are sitting with a Communistic/Islamic takeover agenda to be dealt with.The whole economy will fall in line after our thugs join the Potty-garten in Moscow.I've fought against the Rooi gevaar, now the Geel gevaar that make use of the INCOMPETENT gevaar-tools !	Christie	Gauteng		retired
	2026-01-09 08:08:56	No I do not	All of the above – we should not pay for government blunders	We have been paying for corruption and mistakes that are still not being fixed, every 5 minutes electricity prices go up while the benefits go down. It’s unfair. We can’t even afford to breathe.	Phumelela	Gauteng		employed individual
	2026-01-09 08:08:44	No I do not	All of the above – we should not pay for government blunders	Eskom, if you start doing the right thing, the rest will follow: start at the very beginning by listening to good advice, be honest with yourselves and feel with an honest spirit for others	Christa	Outside SA	Namibia	retired

	2026-01-09 07:40:29	No I do not	All of the above – we should not pay for government blunders	What has happened to the taxpayers' monies after 32 years of the ANC being in power? We are all aware of the mismanagement blunders and corruption that has taken place at Eskom since the ANC came into power. This is only one of the many issues of state-controlled enterprises that has been neglected and has caused the country as a whole to fail and fall deeper into an abysmal disarray, and nobody in the ANC wants to be held accountable. The economic state and safety of the country is disastrous, government services are non-existent, unemployment at its worst ever and the lawlessness continues to favour the criminals.	Patrick	KwaZulu -Natal		retired
	2026-01-09 07:40:21	No I do not	All of the above – we should not pay for government blunders	We should not pay for their error	Carina	Gauteng		unemployed individual
	2026-01-09 07:40:18	No I do not	All of the above – we should not pay for government blunders	Wanneer hou dit op dat ons vir eskom se foute en stelery moet betaal. 	2026-01-09 07:40:15	No I do not	All of the above – we should not pay for government blunders	Government finds it far too easy to tap us taxpayers for their blunders, mismanagement and corruption. The State is the sole shareholder of ESKOM (and other failing SOE's) - as with any company, the shareholders and management must carry the responsibility for the management and financing of the company, including taking action to recover debts due and misappropriated funds. Far better that ESKOM be privatized to be owned and operated efficiently by investors and people who are committed to providing competitive, reliable and fully operational services. City of Cape Town Electricity Undertaking is taking bold, proactive steps to become independent of ESKOM. As a City of Cape Town ratepayer and paying electricity consumer, I am not interested in paying for ESKOM's financial woes as well.	Dennis	Western Cape		employed individual

	2026-01-09 07:24:45	No I do not	All of the above – we should not pay for government blunders	Expecting the consumers to foot the bill for Eskom's calculation errors through higher electricity tariffs will further constrict an already fragile economy, as consumers will have less money to spend on goods and services. Therefore, companies will earn less, whilst also having to fork out more for input costs due to higher electricity tariffs. Many of Eskom's former customers that used to pay for electricity have invested in their own solar systems and gone off the Eskom grid, due to high electricity costs and supply interruptions. Raising tariffs even further, will make this route more affordable for other middle-class families, leaving only the low-income and poor households to pay for electricity. Since these households simply cannot afford it, they will rather go without geysers, ovens and other electrical appliances, impacting on people's quality of life. Please do not allow Eskom to get away with this.	Hantie	Gauteng		employed individual

	2026-01-09 07:04:50	No I do not	All of the above – we should not pay for government blunders	I strongly object to the proposed recovery of R76 billion from electricity users. It is fundamentally unjust that consumers are being asked to pay for NERSA's calculation errors and administrative blunders regarding the Regulatory Asset Base (RAB) valuation. Accountability: Regulatory errors should be absorbed by the state or the regulator, not passed onto the consumer. Retroactive billing for "mistakes" destroys trust in the pricing methodology. Affordability: South African households and businesses are already at a breaking point. Financing this "mistake" through higher tariffs will only drive more users off the grid, lowering Eskom's revenue further (the "Death Spiral") and hurting the economy. Efficiency: The Electricity Regulation Act requires an "efficient operator." Funding cash flow shortfalls caused by poor governance does not encourage efficiency; it rewards incompetence. I reject this proposal. The shortfall should be funded through government equity or internal cost-cutting, not by overburdened tariff-payers	Akona	Eastern Cape		self-employed
	2026-01-09 07:04:47	No I do not	All of the above – we should not pay for government blunders	The Fact is Eskom is a Business that generates large sums of Money and have a captive audience. The Fund to run this business model, need be managed with integrity, then I believe, we will not have to be responsible for bad financial mistakes.	Kurt	Gauteng		employed individual

	2026-01-09 07:03:50	No I do not	All of the above – we should not pay for government blunders	At this rate, I think Eskom is a money laundering machine. When you hear the inside stories of how contractors are hired to do nothing and excessive tendering, it's deeply concerning and aggravating. The infrastructure has not been well maintained, when it could have been. Eskom sells electricity to our neighboring countries as a much lower rate than what we pay and without interruption. The lack of electricity and forced load shedding has already cost many South Africans their livelihoods and compromised businesses significantly. To turn around and ask us to pay for your mistakes is a grotesque and arrogant slap in the face.	Deborah	Gauteng		
	2026-01-09 07:03:46	No I do not	All of the above – we should not pay for government blunders		Cheryl	Western Cape

	2026-01-09 06:51:05	No I do not	All of the above – we should not pay for government blunders	I do not support this consultation paper. Consumers should not be forced to pay higher tariffs to “fix” regulatory and calculation errors by recovering an additional R76.066bn (returns + depreciation) through electricity prices. South Africans are already under severe cost pressure, and we should not be made to fund Eskom’s cash-flow needs or incomplete builds through higher tariffs (including work under construction and working capital). Before any recovery is even considered, NERSA must protect consumers by requiring a current, independently assured asset valuation (the last valuation submission was in 2020) and by excluding inefficient spend and cost overruns from what customers are asked to fund.	Darren	Gauteng		employed individual

	2026-01-09 06:42:03	No I do not	All of the above – we should not pay for government blunders	Having regard to the changes that Eskom has made in respect of its remuneration, particularly to senior management and executives, the proposal of passing this mistake off to consumers, who are already struggling with a cost of living crisis is unacceptable and potentially catastrophic for our economy as a whole. Experts agree that "any price increase above inflation is bad for the economy… the prices of goods and services go up because businesses pass on these prices to the consumers, which means that the households are hit hard almost twice". Dan Marokane's 2025 remuneration package was R11.73 million, comprising a basic salary of R9 million, short-term incentives (STI) of R765,000, and other payments of R1.96 million. He was also awarded an additional R2.5 million STI for the 2025 financial year, pending shareholder approval, which would bring his total package over R14 million. Average Executive pay excluding the CEO and CFO, was R3 million for the year or R250 000-00 per month. Non-Executive Directors saw an increase from R12.185 million in 2024 to R22.396 million in 2025. If these amounts were held stagnant or even slightly decreased. ordinary South African's would not have to carry the cost of this mistake. However, more importantly, South African's should not be forced to cover "depreciation" (a book expense) on assets they have already paid for either through paying for their electricity or through their taxes.	Lauren	Gauteng		employed individual
	2026-01-09 06:42:01	No I do not	All of the above – we should not pay for government blunders	I do not want to be part of corruption, or pay those who are corrupt.	Thea	Gauteng		retired

	2026-01-09 06:37:44	No I do not	All of the above – we should not pay for government blunders	Because of corruption and mismanagement citizens are already burdened with paying high prices for electricity, and now Nersa wants to pile even more on that burden. People have to already make the tragic choice between buying food or buying electricity and then to see their money being stolen or misused or in this case being used to cover up a mistake that they had nothing to do with is immoral and arrogant.	Kamal	Gauteng		employed individual
	2026-01-09 06:37:35	No I do not	All of the above – we should not pay for government blunders		Luisa	Gauteng		retired
	2026-01-09 06:37:24	No I do not	All of the above – we should not pay for government blunders	Why should we pay for their "mistakes". In every day living we pay for everything from our own money. If you do not maintain your property and there's damages, for example rain or hail and your roof leak, some insurers won't pay because you didn't do maintenance. They squandered money at a horrific tempo, smile, don't feel a thing for "my dear fellow citizens" and yet we must still pay more. Their salaries are a million per month, we pay that and all the other perks and yet they want more. I've never in my wildest nightmares thought it will come to this. It's outrageous, the whole system is corrupt and we must pay. It's an easy solution: "oh boy, we're having problems, but not yo worry, the citizens will pay". It boggles my mind.	Amanda	Free State		employed individual

	2026-01-09 06:28:41	No I do not	All of the above – we should not pay for government blunders	When the ANC came to power, they put a freeze on capital expenditure including for state owned enterprises. This resulted in the electricity, transport, water and other essential infrastructures to be neglected. There were warnings issued to them at the time from experts that for every 5 year delay in infrastructure improvements, the cost of doing this later would be twentyfold. They ignored these warnings and we now have the situation of a country which no longer has a fully functioning infrastructure. Let the people in government who pillaged our funds pay for their errors in judgement and in this specific case, let those who made the error pay. I will not!	Mike

	2026-01-09 06:03:45	No I do not	All of the above – we should not pay for government blunders	Eskom declared a huge profit for the past year. Use that money to fix their problem, not ours. We paid enough for the government's mistakes.	Izak	North West		unemployed individual
	2026-01-09 06:03:19	No I do not	All of the above – we should not pay for government blunders	Affordability No, consumers should not pay for NERSA's calculation errors. Regulatory mistakes are institutional failures, not consumer decisions. Passing the cost of a R76 billion error onto households and businesses unfairly penalises electricity users for errors they neither caused nor benefited from. This undermines trust in the regulatory system and sets a dangerous precedent where accountability is shifted away from regulators and utilities. Reliability No, consumers should not pay full price for aging and unreliable infrastructure. Electricity tariffs should reflect the quality of service delivered. South Africans have endured years of load shedding, plant breakdowns, and supply instability. Asking consumers to pay higher tariffs for infrastructure that is past its design life and delivers inconsistent service violates the principle of value for money. Efficiency No, consumers should not be required to fund Eskom's cash-flow problems or construction delays. Cost overruns, delayed projects, and poor capital planning are management and governance failures. Funding these inefficiencies through higher tariffs removes incentives for operational discipline and reform, while shifting financial risk from Eskom onto consumers who are already under severe economic pressure. Why I Do Not Support This Price Increase I do not support this price increase because it transfers the cost of regulatory errors, operational inefficiencies, and unreliable service directly onto consumers. At a time when households and businesses are already struggling with rising living costs, unemployment, and energy insecurity, increasing tariffs to correct past mistakes is neither fair nor economically sustainable. Accountability must rest with institutions responsible for regulation, planning, and execution—not with the public.	Stefan	Gauteng		employed individual

	2026-01-08 23:13:10	No I do not	All of the above – we should not pay for government blunders	The fundamental problem is that Eskom has enjoyed immunity from accountability through monopoly. Governmental mismanagement through corruption and using SOE's as vehicles to employ unqualified personnel that don't add value has left Eskom in a sorry state. Any normal business, not funded by taxpayers against their will, would have been out of business a long time ago. Expecting South Africans to foot the bill for Eskom mismanagement is ridiculous - Eskom should look internally for corrective action. This includes construction projects that are delayed and run way over budget (because of corruption). We are paying for a service that we are not getting. If South Africans are expected to pay for Eskom Assets, they should be the best well-maintained assets possible that are reliable - not failing assets that are not maintained so that managers can get a nice bonus. If Eskom continues to get bailed-out, what incentive is there for change?	Ronaldo	Gauteng

	2026-01-08 22:55:03	No I do not	All of the above – we should not pay for government blunders	If Eskom were truly run like a business, executives and the board would have been prosecuted and the company dissolved. Decades of mismanagement and embezzlement have resulted in a world-class power utility being unable to properly fulfil its mandate. NERSA's faults notwithstanding, the blame lies with Eskom management alone. Costs must thus be recouped from Eskom and its directors present and past and all senior ofice holders, past and present. It is unfair to pass costs on to consumers that are not related to the service for which they are paying. It is further unreasonable to expect consumers and tax-payers to pay additional costs after the service has been delivered. It is therefore irrational to implement price increases to recover costs incurred through faults from the regulator or from the service provider. Such costs must be recouped internally and not passed on to the consumer or tax-payer.	Carl	Western Cape		employed individual
	2026-01-08 22:53:53	No I do not	All of the above – we should not pay for government blunders		Charlene	Western Cape		employed individual
	2026-01-08 22:53:53	No I do not	All of the above – we should not pay for government blunders	All previous so called consultations started with a ridiculous above inflation demand from Eishkom, then NERSA approves like 50% of that which was continiously about double inflation !!! This demonstrates collusion on a grand scale... Then NERSA "discovers" an error... and their solution is to charge the end users that have been paying above inflation rates with promises of improved infrastructure - where are these improvements???? Now we expected to pay what was effectively demanded by Eishkom in the first place / over all these years!!! I have reduced my unit consumption as much as possible then the metro increases the "fixed charge" and I am paying more yet again for less!!! Where will this end??? NERSA was placed to protect the people - like a public defender... They not doing their job. They should be disbanded and ALL the people in NERSA should be held accountable for not seeing this "error" and pay the bill!!! Going forward appropriate and accountable people that know just the basics of budget control employed that really can protect the interests of the people!! These issues enter the realm of politics... where voters are not protected by politicians that effectively invented NERSA in the first place!!! When will they be held accountable for protecting all the people that effectively messed up pretty much everything related to government, previously and currently - Transnet, Postnet, Iscor, Sasol, Education, eToll - yes some were private companies to a degree but only had two customers.... the government and the people of South Africa!!! Shame on all of them!!!	Gavin	Gauteng		employed individual

	2026-01-08 22:46:18	No I do not	All of the above – we should not pay for government blunders	As a pensioner on a fixed income I ask WHY should we foot the bill for the incompetence, lack of Maintenance, lack of foresight and errors of those running Eskom. Not to mention the fact that even without Load Shedding we are STILL without electricity for hours many days because of the same incompetence lack of maintenance of the Municipalities.	Yvonne	Gauteng		retired
	2026-01-08 22:46:13	No I do not	All of the above – we should not pay for government blunders	"Mistakes", in the etymological sense of the word, are part of the learning process and need to happen if improvement is to result. However, the wilful repetition of "mistakes" smacks of corruption, the costly results of which we are now being asked to 'cover', or pay for. Our Constitution would be withering in shame if it it could think...	Gareth	Western Cape		retired
	2026-01-08 22:46:05	No I do not	All of the above – we should not pay for government blunders	South Africa (Nersa) mistakes centers on principles of accountability, transparency, public policy, and the severe financial strain placed upon already struggling households and businesses. Lack of Accountability: Critics, including political parties like the Democratic Alliance (DA), argue that a regulator tasked with protecting the public interest has failed in its duty, and the public should not bear the cost of its incompetence. Secrecy and Lack of Public Participation: Nersa and Eskom initially attempted to settle a R54 billion error behind closed doors, without public consultation. The High Court rejected this secret settlement, agreeing with opponents such as AfriForum and the Minerals Council of South Africa that a decision affecting the entire nation requires public participation and is a matter of public policy. Financial Strain on Consumers: The errors lead to significant, above-inflation electricity price hikes, which place severe strain on consumers, businesses, and industries already grappling with a high cost of living and rising municipal bills. Erosion of Public Trust: The repeated nature of Nersa's errors and the subsequent attempts to recover the shortfalls from consumers have eroded public confidence in the regulator's competence and integrity. Improper Motives: A court found that Nersa's reasons for the settlement were at least partially self-serving, as the regulator sought to avoid open court scrutiny that might expose its mistakes further. Burdening the Efficient: Consumers argue that they should not have to pay for Eskom's years of mismanagement, corruption, and operational inefficiencies that get "baked" into the tariffs. Systemic Failure: The mistakes point to systemic failures within Nersa's internal processes and a lack of consequences for those responsible, leading to calls for a complete overhaul of the regulator. In essence, the argument is that a regulatory body should operate with professionalism and transparency, and its blunders should be addressed through internal accountability measures, not by imposing the financial burden on an already overstretched public. 	2026-01-08 22:42:56	No I do not	All of the above – we should not pay for government blunders	Eskom, once held in high regard around the world, is a shameful disgrace. It has been badly managed, and become a cesspool of corruption and fraud. No, we the consumers have paid more than enough. We've put up with load shedding, costing the country TRILLIONS of rand when adding up the loss of productivity, jobs, businesses closed and others never opened, investments in our country lost, and the personal costs to the consumer in paying higher and higher tariffs, some implementing their OWN power production (e.g. solar) -- and then Eskom wanting to tax them on that -- and so on and so on. No, we have paid enough for this. Eskom must sort out their own blunders, along with NERSA.	Louis	Eastern Cape		employed individual

	2026-01-08 22:40:41	No I do not	All of the above – we should not pay for government blunders	1. We are paying for the cost of corruption on all levels – when corruption has been exposed & there are countless times that it has, no one is ever held accountable – I refuse to compensate for any of this – this is Government's responsibility not us, the consumer, as the innocent public who are already paying through our necks for electricity. 2. Electricity increases over the past years have been exorbitant, rendering it unaffordable for the ordinary citizen. Any more increases will cripple us even further. The cost of electricity on top of the high inflation has become completely unaffordable as it is so a further increase would totally cripple us further! 3. The SA taxpayer is not and should not be responsible for NERSA & ESKOM's blunders, calculation errors and their mistakes! 4. We as the citizens / homeowners / taxpayers are already overpaying for the almost non-existent bad / non-service delivery 5. Reliability: I refuse to pay the price for aging, unreliable infrastructure! 6. Efficiency: Why should we as consumers fund Eskom's cash flow and construction delays 7. Due to all the above I refuse to pay even more for Government blunders and deficits as well as due to the enormous corruption	Bernice Wendy	Gauteng		business owner

	2026-01-08 22:20:42	No I do not	All of the above – we should not pay for government blunders	It is a matter of public knowledge via reports in the media that Eskom has a very bloated organogramme considering the fact that they are selling less and less electricity thanks to the impact of Private Power Suppliers with lower carbon emission systems. Furthermore, the media also reports that Eskom employees are paid substantially higher wages /salaries and perks than other government and SOE employees. The electricity consumer is coerced to pay high tariffs to cover these exhorbitant overhead input costs with no attempt by Eskom to streamline personnel overhead costs at a time when private sectors are foreclosing and liquidating and the resultant retrenchment. The consumer is bled by SARS, Municipal rates and Eskom beyond survival without going heavily into debt and having to sell their homes. This situation is untenable and at breaking point.	Andrew	Eastern Cape		retired

Stel mense aan wat die werk REG kan doen en raak ontslae van diegene wat net 'n salaris wil hê.	Marianna	Mpumalanga		retired
	2026-01-08 21:57:03	No I do not	All of the above – we should not pay for government blunders	The cost of electricity in South Africa has increased at an incredible rate since 2006. It now cost 20 times as much! In the last five years the overall cost has risen by about 16% a year, while according to CPI it should have started at about 5% p.a. and be down to 3% p.a. this year!	Ian	Gauteng		self-employed
	2026-01-08 21:56:49	No I do not	All of the above – we should not pay for government blunders	Eskom declared a profit of about R16 billion this year. This should be used to offset its incompetent accounting practices and aging infrastructure. Eskom is owned by the taxpayers, and its primary goal is to provide a human right i.e. energy to live a decent life. if necessary, it needs to borrow to fund infrastructure...or it should allow other players.	vish	KwaZulu -Natal		self-employed

	2026-01-08 21:56:11	No I do not	All of the above – we should not pay for government blunders	Since I can remember, Eskom got away by imposing tariff increases above the cpi rate. I am an ex-banker, and a financial analyst, and I can assure everybody that their increases were based on lining their own pockets, mis-management, and to cover their expenses due to lack of competence which caused huge expenses to fix the already fixed power turbines etc. This is not acceptable, but the big real question is, how do you get rid of corruption? When satan is around and temptation is great, many fall, but that is just the beginning of the end for all of them. Let them carry on. The end is near.	frank	Free State		retired

	2026-01-08 21:31:39	No I do not	All of the above – we should not pay for government blunders	Included in the term 'government blunders' is the inefficiency of ESKOM, which is controlled and used as a cash cow by the ANC 'government' to try to ensure that they have a strong voting base, by employing approximately 3 times the number of ESKOM staff that should be employed and by overpaying them for the same reason (a voter base for the ANC). The corruption in ESKOM is still not sorted out, as I've learnt from qualified electrical contractors, who no longer perform work for ESKOM, due to being paid very little compared to the BBBEE contractors. How cost efficient is that, especially when those contractors do a job of lower quality? This ANC 'government' is looking only at the very short term and not considering that an efficient ESKOM would decrease the cost of EVERYTHING in the country and also allow industry in the country to be competitive vis-a-vis other countries, which have more efficient and therefore lower cost electricity. Any increase in the cost of our electricity will, like fuel costs, cause an increase in the prices of all goods and services in a country which will make everyone poorer, because nothing will be created to balance the price increase. This price increase is just another manifestation of the ANC short-sightedness and greed.	Kenneth	KwaZulu-Natal		self-employed

	2026-01-08 21:01:42	No I do not	All of the above – we should not pay for government blunders	It aid time for the government to stop stealing and start providing basic essentials like electricity. It should not be the man in the streets responsible Ilya to pay for this, he already pays tax. What happens to that tax? Thus I do not support NERSA's proposal	Bruce	North West		self-employed
	2026-01-08 21:00:18	No I do not	All of the above – we should not pay for government blunders	So how was Rb76 calculated? Why must the taxpayer aline foot the bill? How many millions was written off by ESKOM in south africa, we the citizens and rate payers can no longer foot the incompetence and cadre blunders. We are the biggest taxed persons in the world, there was never such incompetence in south africa's history. Recover the billions looted, stolen from those who are still walking about "scott free" and no accountability or legal processe to recover the funds from looters & corrupt	Petrus	Western Cape		retired
	2026-01-08 21:00:13	No I do not	All of the above – we should not pay for government blunders		Werner	Western Cape		
	2026-01-08 20:59:57	No I do not	All of the above – we should not pay for government blunders	Quite frankly, please forgive the blunt expression in this statement, but I personally don't think that Eskom could organise a piss up in a brewery. Secondly, I think that they would sooner be concerned about my blunt statement than about their incompetence as a service provider. We are paying ASTRONOMICAL costs for electricity! The reason is this: The government employment policy resulted in the brain drain of experience (which was predominantly white). Then the corruption took over and the job wasn't done properly. Hence loadshedding. Thereafter, those who had had the money to keep funding the incompetent Eskom and not getting the service, rather spent the money on solar and generators as it paid off. Then Eskom stopped getting their money. Now, the few of us who still pay Eskom, are being asked to fit the bill for their bugger up. Let us rather sell the operation to an American company who can employ the right people, and get the job done properly.	Bruce	Gauteng		self-employed
	2026-01-08 20:59:03	No I do not	All of the above – we should not pay for government blunders	Directors can forfeit their bonuses we should not pay for incompatince	Ansie	Mpumalanga		retired

	2026-01-08 20:55:26	No I do not	All of the above – we should not pay for government blunders	I think NERSA is being dishonest. While the amount or R76b does perhaps reflect correctly - (or maybe its an over costing), I believe it was all intentional. How so? Well, NERSA should not be making such miscalculations, esp. not on such a scale. NERSA should be experienced enough to do the correct calculations of this magnitude. So in order to prevent being rejected every year for their annual increases, they had to come up with some new idea of "miscalculation by error" - to make it seem innocent. In doing so, it might seem more legit and therefore more plausible when they issue the shortfall figure for the tax payer to pay. So I say this is intentional and a facade. It is a lie. And no matter from which angle you look at it, the over-burdened tax payer cannot exonerate such failures & errors by settling a bill derived form such actions. It is not the first time we are forced in one way or another to pay for such mistakes within the government's sphere's failures. And we cannot continually be slapped with costs to pay for such failures. This*** sets a dangerous precedent and a permanent stop (via the legal court system) must be put in place to prevent such situations to flourish. *** the term "This" means billing the tax payer for government's various failures.	Glenn	Western Cape		
	2026-01-08 20:54:58	No I do not	All of the above – we should not pay for government blunders	As a Professional accountant i would suggest they correct their financial statements from date of errors and take accountability as per the National ACTs's requires for each responsible person for each and every recurring year and collect the shortfalls from them as a personal liability.	Willemien	Mpumalanga		employed individual
	2026-01-08 20:54:35	No I do not	All of the above – we should not pay for government blunders	Expect consumers to pay for Eskom's inefficiencies is preposterous. 	2026-01-08 20:42:41	No I do not	All of the above – we should not pay for government blunders	Look back at ESKOM 20 years ago or even longer, they produced more electricity for the grid with half of the staff compliment that they have now. ESKOM remains a feeding trough for the people with the right connections, and we are expected to support this. ESKOM needs to be treated like a proper business, cut your costs and improve your output. The South African public is stuck with them, and they have always known it. The disaster of the new build Power Stations etc etc. If they are allowed to keep pushing up prices to compensate for their incompetence, we will all continue to suffer. More and more of the paying users are supplementing their electricity with renewable energy, this has and will continue to reduce the power sold by ESKOM, does this mean they will just keep on increasing prices to compensate for the clients that they have lost - most likely yes, and the downward spiral will continue until the only people using ESKOM will be the ones that don't pay for it.	Jonathan	Gauteng		business owner

	2026-01-08 20:39:13	No I do not	All of the above – we should not pay for government blunders	We do not want to pay for errors made by Nersa and Eskom! Our infrastructure is also failing so what electricity are we actually paying for - then they want us to pay even more! For what? Their blunders… No way!	Carolyn	Eastern Cape		self-employed
	2026-01-08 20:38:56	No I do not	All of the above – we should not pay for government blunders	Why should the Taxpayer pay for anotrher government blunder?	John	Western Cape		
	2026-01-08 20:38:29	No I do not	All of the above – we should not pay for government blunders	South African consumers and tax payers can't keep on paying for all the mistakes government makes. While we have to pay for our own solutions also as government can't supply reliable services. It has been high time years ago, and now even more that government gets their systems, like Eskom to operate reliable and efficient. Efficiency is the key. The most efficient businesses keeps getting more profitable and delivering better products. The inefficient ones dies out. If they don't make Eskom efficient and at the right price, people will find better solutions. We can't keep paying the salaries of thousands too much employees and paying for corruption. It has to stop.	Jan			business owner
	2026-01-08 20:38:16	No I do not	All of the above – we should not pay for government blunders	Electricity is unaffordable already. Pensioners cannot get by. Eskom personel earn already salaries that are outrageous. Nersa that made a R76 B rand mistake already prove that they are unable to do the work. We cannot pay for a mistake and a broken system at the same time.	Martin	Western Cape		retired
	2026-01-08 20:37:49	No I do not	All of the above – we should not pay for government blunders		Richard	KwaZulu-Natal		retired
	2026-01-08 20:37:31	No I do not	All of the above – we should not pay for government blunders	I do not support this proposal because consumers should not be required to absorb the cost of regulatory and accounting errors made by NERSA or Eskom. With households already under severe cost-of-living pressure and electricity supply remaining unreliable, shifting a R76 billion mistake onto the public is neither affordable nor fair, nor is it justified by visible, long-term infrastructure improvements or improved service delivery.	Kelly	Gauteng		self-employed
	2026-01-08 20:37:23	No I do not	All of the above – we should not pay for government blunders	Nerse and Eskom mistakes and incompetence should not become the consumers problem. In a free market society o d would have a choice of which supplier to choose which we do not have tge luxury to deal with. Instead the NPA should start prosecuting those who hijacked Eskom and the state coffers and enriched themselves at our expense and recover the hundreds of billions which have been stolen out of the system..	Helge	Gauteng		
	2026-01-08 20:36:52	No I do not	All of the above – we should not pay for government blunders	The problem is that someone is going to have to pay and if it isn't through raising the price of electricity it will be paid by government out of our tax money. Neither is fair or agreeable!	Anthony	Western Cape		retired

	2026-01-08 20:22:19	No I do not	All of the above – we should not pay for government blunders	I feel it is grossly unfair that consumers should be expected to pay for NERSA'S errors. Employ competent people and these gross errors will not be happening. I am also very concerned by the fact that we have very poor service and supply from Eskom and I think the tariffs we pay are very unfair for the bad service we get. I also feel it is totally unacceptable that we should pay for the mismanagement of a pre-ANC utility provider, which was one of the best world wide until jobs were given to inexperienced and totally incompetent people.	Cornelia	Free State		retired
	2026-01-08 20:21:38	No I do not	All of the above – we should not pay for government blunders	Those responsible for the calculation errors must be held accountable. Eskom's financial position is simply due to mismanagement enforced by a lack of consequence management. The government should be held accountable for a lack of oversight and enforcing of policies which has led to this scenario.	Gary	Western Cape		

	2026-01-08 20:21:34	No I do not	All of the above – we should not pay for government blunders	The cost of electricity is becoming unaffordable. The price of everything else will also go up. Why do this to the citizens of our country. The poorest will suffer more and less will be spent by the middle class which keep the economy from growing. Money that could best be spent on individual's children's education especially tertiary rather than on funding mistakes. Please don't choke the economy further	Panagiota	Gauteng		employed individual

	2026-01-08 19:54:16	No I do not	All of the above – we should not pay for government blunders	Dear NERSA, I am submitting my comment as part of the public participation process on the proposed electricity price determination. 1. Affordability Consumers should not be required to cover calculation errors made by NERSA in previous determinations. The R76 billion accounting mistake is a regulatory oversight that must be corrected internally, not through higher tariffs for electricity users. South Africans are already burdened by escalating living costs, and further price hikes would unfairly penalize citizens for administrative failures and mismanagement beyond their control. 2. Reliability For years, Eskom has failed to provide a stable and reliable energy supply despite continuous tariff increases and multiple government bailouts. Load shedding, infrastructure neglect, and inefficiency have become the norm. It is unacceptable that consumers continue to pay more for a declining level of service. Tariffs should be linked to measurable improvements in reliability and system uptime — not blanket increases that reward underperformance. 3. Efficiency and Structural Reform Eskom's persistent financial and operational failures show that the current model is unsustainable. It is time to stop financing inefficiency through both electricity hikes (our money) and government bailouts (our tax money). Instead of further burdening citizens, NERSA and the government should open the market to greater private sector participation in large-scale electricity generation and supply. Allowing private companies to compete would drive innovation, improve service reliability, and relieve pressure on the state and taxpayers. In the long term, South Africa needs an energy model that supports fair competition and reduces monopoly control. Privatizing portions of Eskom or enabling independent producers at scale would benefit consumers, attract investment, and accelerate the national transition to a more resilient and sustainable energy sector. Conclusion I strongly oppose any tariff increase designed to recover past accounting errors or mismanagement. Future pricing determinations must prioritize affordability, reliability, and structural reform rather than perpetuating an unsustainable system at the expense of the public. Thank you for considering my submission.	Jean	Western Cape		employed individual

	2026-01-08 19:53:15	No I do not	All of the above – we should not pay for government blunders	Please could we have this rising costs of essentials governmentally controlled by trustworthy people. If it means changing the current people in power so be it.... Enough of chewing up the poor and grinding them further into poverty. Please could we work together in removing crooks and organized criminals from running and handling the issues of this country and put honest trustworthy people in power that would do what is right and that is to build a country that we would all love to live in and be a part of. The general public citizens are and have been footing the bill for greedy people in power for far too long and it's time for us to stop treating the situations symptomatically and get to the root cause and dig out the vermin from our midst. Let's have the right people in the right places and we will have order and peace from the top down. Now we having to deal with thieving from top to bottom as that's the norm in our beautiful country South Africa. As the dawn of a new year please let's do something right in the right direction for our future generations to come. Let's do something about truth, teaching the next generation how important it is to live a life grounded by truth. Before it's too late. We can still do something right put of this mess. Let's do it!!!.	Louis	KwaZulu -Natal		unemployed individual
	2026-01-08 19:52:58	No I do not	All of the above – we should not pay for government blunders	It is time that organisations stop passing on the costs of inefficiencies and errors to the customer and or the tax payer. ESKOM employees earn an average of R1million plus per annum, yet deliver far less that that. I suggest this deficit be reclaimed from the salaries paid to their staff, targeting specifically those directly implicated in mismanagement. Then such mismanagement will be sorted out internally! Incidentally and similarly, Discovery Health should pay for their management errors from their profits, and not simply passed on to the paying members.	Gerhard	Gauteng		retired

	2026-01-08 19:51:48	No I do not	All of the above – we should not pay for government blunders	The SA public have suffered enough under the AMC and Eskom's blunders and corruption. Eskom has no right to even contemplate raising electricity tarriffs when theres been so much mismanagement due to incompetency . The nation isnt in any state to manage an increase in tariffs. The cost of living is too high already especially for the poor and unemployed. Its a nations right to have access to water and power . What about the hospitals and creches and clinics that need power and cant afford increases while they are already struggling to provide basic services. The govt should consider seriously building more nuclear power generating plants. All another example of how the ANC have failed the people.	Ania

	2026-01-09 10:48:43	No I do not	All of the above – we should not pay for government blunders	The taxpayer always gets to pay for the political elites and cadres' theft at ESKOM. They (the cadres and political elite) must be held accountable. Take back every last penny that they have stolen from ESKOM and which they hid in children's trust funds or by putting everything in a family member's name. NERSA is part of the bloodsuckers. They should be closed down. Taxpayers are once again facing income tax increases! It is diabolical and evil that the overburdened citizens that pay their taxes every day, be punished by paying over and over for SOEs that have been used as feeding troughs for by the "freedom fighters" who promised a better life for all. SOEs should all be closed down. They serve no purpose to the poorest of the poor. Keeping (and increasing) people in poverty is enslaving people. The evil, diabolical, lucifarian cadres and political elite DO NOT CARE about poor people. There are very few politicians that are not heavily overweight, or abuse alcohol and drugs... because the have used stolen money to live a life of overindulgence.	Antonia	Outside SA		retired

	2026-01-09 10:41:12	No I do not	All of the above – we should not pay for government blunders	I strongly oppose the proposal to recover R76 billion from consumers to rectify NERSA's historical calculation errors. South African households and businesses are already struggling under the weight of record-high electricity tariffs, high inflation, and a stagnant economy. It is fundamentally unjust to expect the public to pay for the 'mistakes' of the regulator and the inefficiencies of Eskom. Electricity is a basic necessity, and further double-digit increases will push more citizens into energy poverty and force businesses to close. NERSA's primary mandate is to protect the consumer, not to act as a rubber stamp for Eskom's financial mismanagement. I urge NERSA to find alternative ways to address this shortfall—such as internal cost-cutting at Eskom or government intervention—rather than further burdening the tax-paying public.	Leo	Gauteng		unemployed individual
	2026-01-09 10:40:58	No I do not	All of the above – we should not pay for government blunders	Eskom has gone from the BEST in the world to another rundown, mismanaged, kader deployed, anc blunder. Enough is enough	Brendan	KwaZulu -Natal		employed individual
	2026-01-09 10:40:43	No I do not	All of the above – we should not pay for government blunders		Leon	Gauteng		retired
	2026-01-09 10:40:42	No I do not	All of the above – we should not pay for government blunders	Governmental ineptitude/incompetence is nothing new to South African citizens. Being forced to bear the cost of NERSA's mistake is unjust and unacceptable. Being forced to fund ESKOM (working capital and WUC) essentially grants ESKOM a blank cheque to abuse and rewrite when they please. Costs will inflate to crippling levels (see corruption/fraud/embezzlement) and nothing will change. The fundamental causes of ESKOM's woes are corruption, fraud, embezzlement, mismanagement, incompetence and a complete lack of accountability at governmental, municipal and institutional/organisational level. ESKOM is a disaster because there is no accountability while being run by incompetent political appointees. What they are essentially saying is that the consumer must bear the cost in perpetuity for their incompetence etc. Why should South African consumers be willing to shoulder this burden based on ESKOM's historical (post 1994) performance? Corrupt municipalities must be made to pay. Corrupt embezzling municipal/government employees must be fired and held accountable and the monies must be recovered instead of being written of as unaccountable expenditure.	Brian	Gauteng		self-employed

	2026-01-09 10:39:54	No I do not	All of the above – we should not pay for government blunders	The consumer is already taxed beyond his means. Let Eskom take responsibility for its own mistakes	Beatie	Free State		retired
	2026-01-09 10:39:25	No I do not	All of the above – we should not pay for government blunders	Consumers can simply not afford these energy tariff increases anymore. This is Eskom's mistake and they should bear it. The cost of replacing aging assets has already been covered in depreciation over many years. If Eskom is not kept responsible for their mistakes it will not be worried about making mistakes in future. Eskom and Nersa's attitude seem to be that people need electricity and they might complaint but they will pay.	Koos	Gauteng		
	2026-01-09 10:39:22	No I do not	All of the above – we should not pay for government blunders	There is no way the South African consumer can afford this on top of the ridiculous tariff increases we have already been subject to recently. This is a death spiral and if the tariffs are increased we have no option but to take out a mortgage and go off grid, this is an irrevocable change as we will have to use the off grid option 100% in order to recoup the cost of the mortgage. The biggest loser in this equation is the poorest of the poor who will continue to use what electricity they can till their debt results in cut off, they will then resort to electricity theft and whatever gains Eskom may have made in bringing the townships in line, will be wiped out in 3 months flat. The public has had enough of this abuse, it is self defeating and ends very badly for the consumer and Eskom	Donald	KwaZulu -Natal		retired

	2026-01-09 10:36:57	No I do not	All of the above – we should not pay for government blunders	If NERSA makes such a big 'mistake' it is not our problem as a consumer. We are already paying extremely high electricity charges, we certainly do not need to be paying a bill that is not ours!!	Jacky	KwaZulu-Natal		retired
	2026-01-09 10:36:42	No I do not	All of the above – we should not pay for government blunders	I do not support the consultation paper as published, and I do not support any recovery from electricity customers. South Africans should not be billed to correct prior errors, omissions, or shortfalls. A recovery simply shifts the consequence of governance failure onto the public, while the same incentives that produced the failure remain intact. That is unfair and it creates moral hazard. My objection is also about trust and accountability. Eskom has been widely associated with mismanagement, corruption, and weak consequence management over many years. Illegal connections and non-payment have also been allowed to grow, meaning paying customers are effectively asked to subsidise theft and breakdowns. In this context, asking compliant consumers to fund a recovery is not only unaffordable, it is unjust. Public disclosures and testimony in recent years, including in Andre de Ruyter's book Truth to Power, reinforce the seriousness of the governance and criminality risks surrounding Eskom. Customers cannot be treated as the automatic backstop while these risks remain unresolved. What I request from NERSA instead: No recovery from customers NERSA must reject any additional clawback or pass-through to paying customers for past errors or omissions. Consequence first, money last Before any further public burden is considered, NERSA should require proof of consequence management, measurable reductions in theft and losses, and strict prudency tests on all costs. Shareholder responsibility If there is a shortfall linked to past failures, it should be addressed by the shareholder (the State) through explicit fiscal decisions and reforms, not hidden inside tariffs charged to households and businesses. Value for money and performance linkage Any future revenue allowances should be explicitly linked to measurable improvements in reliability, losses, and operational efficiency. Consumers cannot pay premium prices for non-premium supply. NERSA's mandate includes affordability and the public interest. The public interest is not served by socialising the costs of failure onto those who already pay, while theft, waste, and corruption are not decisively crushed. Please acknowledge receipt of my submission and make all submissions publicly available.	Petrus	Gauteng		Non-profit

	2026-01-09 10:32:36	No I do not	All of the above – we should not pay for government blunders	Gatvol of having to pay for the mistakes of a bunch of ANC chronies who have the IQ of a rock and are stealing and wasting our taxes and while looting SA. NOT going to pay. Already busy getting of the grid totally,, its actually cheaper to run a generator when the sun is not shining than paying for your expensive electricity.	Dirk	Gauteng		self-employed

	2026-01-09 10:32:25	No I do not	All of the above – we should not pay for government blunders		Karen	Western Cape		self-employed
	2026-01-09 10:32:18	No I do not	All of the above – we should not pay for government blunders	Eskom is overstaffed with incompetents, and poorly managed. Eskom should be privatized, or at least generation leaving only distribution. The massive amount of staff vs. power generation is a misnomer. If Eskom were a private entity it would have been bankrupt long ago. Sell off generation to the private sector - this will solve the financial mess Eskom/NERSA have created. Either way the ANC have used Eskom as a cash-cow for too long - and South Africans are tied of witnessing the ongoing extraction happening at Eskom through over-staffing, overpaying workers, and inflated tenders. Dont expect the consumer to pay for this blunder - we'll migrate to renewables rather.	Ramon	Western Cape		Non-profit
	2026-01-09 10:32:12	No I do not	All of the above – we should not pay for government blunders		Tracey	KwaZulu-Natal

	2026-01-09 10:13:15	No I do not	All of the above – we should not pay for government blunders	I do not support the consultation paper because it proposes that electricity consumers bear the cost of regulatory calculation errors that NERSA itself has acknowledged. These errors were initially addressed through a settlement reached without public transparency and were only subjected to consultation following a High Court ruling. Allowing Eskom to recover the full R76 billion through higher tariffs shifts the consequences of regulatory failures onto households and businesses in a monopoly market where consumers have limited alternatives. Given existing affordability pressures, this approach undermines accountability and public trust. Any corrective action should prioritise transparent decision-making and regulatory accountability rather than transferring the financial impact of these errors to the public.	Gresh	Western Cape		employed individual
	2026-01-09 10:13:03	No I do not	All of the above – we should not pay for government blunders	We are over burdened already with high everyday cost of living. 	2026-01-09 09:56:39	No I do not	All of the above – we should not pay for government blunders	As logic must prevail, we must understand that if a person or body of persons make mistakes, the latter must take responsibility for the consequences. No competent court will ever rule otherwise. With that said the body of persons were the ANC government and the incompetent managers they appointed that caused this situation and must therefore take responsibility and foot the bill. Even if it takes many years, we will be patient. I for one will definitely not agree to pay, especially taking in consideration how many times during the past three decades they were warned of exactly such an outcome. Not withstanding this they continue to be aggressively ignorant in their evil endeavours.	Coenie	KwaZulu-Natal		retired
	2026-01-09 09:56:09	No I do not	All of the above – we should not pay for government blunders		Debra	Gauteng		retired
	2026-01-09 09:56:07	No I do not	All of the above – we should not pay for government blunders		Frits	Gauteng		business owner
	2026-01-09 09:56:06	No I do not	All of the above – we should not pay for government blunders	Asset costs are severely inflated due to the rampant corruption that has been occurring over the years. The public can also not be forced to pay for the severe mismanagement mainly due to political cadre placements, of the utility while maintenance was neglected, leaving old aging infrastructure that does not meet standards or requirements often costing more in repairs and replacement than they should. The public has been footing this bill for too long with exorbitant electricity price hikes for numerous years. Now even NERSA is incompetent and unable to carry out thier mandate effectively with blunders like this? Additionally NERSA seems to be completely aligned with Eskom requests and forgotten that they are also meant to be looking at the public interests. For too long has Eskom been mismanaged, incompetent and Corrupt. We can not just keep on paying more and more with absolutely no accountability being recived at all.	Nathan	Gauteng		unemployed individual
	2026-01-09 09:55:51	No I do not	All of the above – we should not pay for government blunders	The Public/Consumer should not be paying for the operators mistakes. The Public has been paying for non-delivery for so long and it is no longer sustainable for the Public.	Emma	Western Cape		business owner
	2026-01-09 09:55:49	No I do not	All of the above – we should not pay for government blunders	Eskom writes off bad debts left and right , even large government debts, and now they want us to pay for a "mistake" that went undiscoverd for years. I have serious doubts about the validity of this claim from an entity that has a track record of large scale corruption. I cannot afford to pay for this corrupt government's "mistakes and neither can SA.	Albert	Gauteng		
	2026-01-09 09:55:45	No I do not	All of the above – we should not pay for government blunders	If we are being asked to pay a thing it should be to enable more wind and solar power plants to be built and utilised.	Yvonne	Western Cape		self-employed
	2026-01-09 09:55:09	No I do not	All of the above – we should not pay for government blunders		Dominique	Free State		
	2026-01-09 09:55:04	No I do not	All of the above – we should not pay for government blunders	Why should we pay for their mismanagement and corruption. They seem to have an endless list of reasons to extract mere money from the consumers.	Michael	Western Cape		retired
	2026-01-09 09:54:53	No I do not	All of the above – we should not pay for government blunders	Currently the consumer are paying directly for their use of electricity. Then our tax money are used to fund Eskom through government loans and bailouts. In the mean time Eskom is reporting a profit. While regular load shedding seems to be a thing of the past, the country are still recovering from the effects of load shedding. And now we, the consumer, are to pay for a "mistake"! Not likely, in the real business world the company pays for such mistakes or go down. The customer cannot be held responsible for this bill.	Hercules	Free State		
	2026-01-09 09:54:46	No I do not	All of the above – we should not pay for government blunders	Enough is enough	Vernon	Western Cape		employed individual
	2026-01-09 09:54:22	No I do not	All of the above – we should not pay for government blunders	Why do the consumers always have to pay for others mistakes or incompetence. Heads should roll and examples should be made. We have lots of unemployment and underpaid consumers. The people who make these decisions are paid a lot to do that and it should stand to reason that they suffer loss as will each consumer once the ANC government force all consumers to pay.	Charl	KwaZulu-Natal		unemployed individual

	2026-01-09 09:44:20	No I do not	All of the above – we should not pay for government blunders	The right thing for ESKOM to do, would be to reduce their running costs by following proper good business models. One example of cost savings would be to bring the wildly inflated salaries in line with the standard level of salaries related to the various posts. Also, expenditures should be closely monitored by independent audits, not whatever is going on at the moment where it is clear that money is falling through the cracks all over the company. I vehemently protest against all these unnecessary price hikes, simply because the ESKOM management cannot run the business properly.	Eugene	Gauteng		self-employed
	2026-01-09 09:44:07	No I do not	All of the above – we should not pay for government blunders		Marelise	Gauteng		
	2026-01-09 09:44:07	No I do not	All of the above – we should not pay for government blunders	There is poor management of coal (first time in my life hearing excuses of rain). Stopping corruption on coal will bring money back to where it's needed most. There is absolutely very little drive to collaborate with industry players already utilising new energy sources. Innovation and research is lacking in Eskom which leads to consumers footing the bill of extremely poor management. Extortion is what it is.	Themba	Free State		employed individual

	2026-01-09 09:28:01	No I do not	All of the above – we should not pay for government blunders	We, the public, are not liable for the errors of NERSA! This is an appalling example of government incompetence that costs SA citizens, which is an ongoing saga when it comes to electricity supply. The absolute debacle that led to load-shedding already cost individuals and businesses tens of thousands of rands from lost productivity and the need to purchase expensive back-up equipment to keep our homes and businesses powered up. Will we ever be able to recoup those costs? No, we will not. The fact that power is now more reliable does not make up for those losses. NOW they expect us to pay for this error in their calculations? That is entirely UNACCEPTABLE. According to a recent Bloomberg report on the Moneyweb website, the cost of electricity has tripled in South Africa over the last 15 years, far exceeding inflation. So ON TOP of that, we must now pay for this R76 billion shortfall? In what world would that be considered reasonable and acceptable?	Mark	Gauteng		self-employed

	2026-01-09 09:27:01	No I do not	All of the above – we should not pay for government blunders	Massive Cost to Consumers: The error necessitates a R54 billion clawback, forcing sharp tariff hikes (nearly 9% for 2026/27 & 2027/28) on struggling households and businesses already facing high costs. Lack of Transparency & Accountability: NERSA kept the R54bn settlement secret, violating principles of open governance and accountability to the public who bear the cost, leading to accusations of illegality. Erosion of Public Trust: The blunder and subsequent secrecy are seen as gross negligence, showing NERSA isn't fit for purpose and doesn't protect consumers from state inefficiency. Governance & Capacity Failure: The error highlights systemic issues, including governance failures, skills shortages, and weak quality assurance within NERSA, with a senior staff member suspended. Exacerbates Cost of Living Crisis: The hikes worsen energy poverty and impact businesses, potentially leading to job losses and relocation,	Kurt	Gauteng		employed individual

	2026-01-09 09:20:27	No I do not	All of the above – we should not pay for government blunders	I do believe and that as the Minister of Energy and approved by the Cabinet are the person that must be accountable and as the President appointrd them thus the Goverment must be responsible for this error and not us as citzens of South Africa. Why must we be punished for their errors when Eskom have corruption and they recover the funds they don't give that back to us so why should we pay for Nersa errors	Tony	Western Cape		retired
	2026-01-09 09:20:27	No I do not	All of the above – we should not pay for government blunders	We are fed up to pay for incompetent people that can do there jobs wright. We can't afford to pay more. The electrical Grid are not reliable or efficient. We the public an employers Los billions for electricity that we pay in advance. No more price increase or tariffs.	Johan	Gauteng		self-employed
	2026-01-09 09:20:27	No I do not	All of the above – we should not pay for government blunders	As a pensioner, life is already tough and any additional expenses will force us to life beyond our income bracket. The blunders made by the state should not be recovered by the public. We already bear the brunt from the state capture.	Rudi	Gauteng		retired
	2026-01-09 09:20:15	No I do not	All of the above – we should not pay for government blunders	Apart from NERSA's ineptitude, Eskom's dire financial situation is the inevitable result of a host of other factors that include incompetence, mismanagement, serious overstaffing, massive corporate inefficiencies, a widespread culture of non-payment, tender and other corruption, government interference, ageing infrastructure, and ill-discipline regarding scheduled maintenance among several other grave organisational deficiencies. Without any evident resolute initiatives to address any of these problems, it is very clearly inequitable that Eskom's paying clients should be made to shoulder Eskom's additional financial burden that those clients had no hand in creating. Moreover, the lack of visible effort by Eskom to address any of the many aforesaid failings makes this latest proposal doubly galling and, indeed, fundamentally unreasonable. We also cannot be constantly feeding the greed of the corrupt, who are always looking for new ways for the public to pay once the funds are depleted	Anthea	Gauteng		
	2026-01-09 09:18:32	No I do not	All of the above – we should not pay for government blunders	Eskom is a failed public company, which is the fruit of incompetent and greedy individuals, empowered by corrupt government, profiting from the plundering of public funds that belong to unwilling taxpayers. Time and again these over-burdened taxpayers are called on to finance Eskom's ongoing failures. Eskom messes up, wastes or steals, and the taxpayer is called on to bail them out so that they can mess-up, waste and steal again. This cycle is untenable and needs to end. Eskom needs to be privatised so that it can operate independent of the corrupt government control and in collaboration with IPP's. It would provide opportunity to SME's, stimulate competition, which would undoubtably encourage private investment in a more reliable and properly maintained infrastructure.	Brandon	Eastern Cape		retired

	2026-01-09 09:17:18	No I do not	All of the above – we should not pay for government blunders	As a South African taxpayer, my obligation ends when my tax is paid. This is supposed to be used for all government funding, and we the people cannot be held liable for mistakes made when we are forced to pay for private sector services that the government is supposed to provide (education, healthcare, recreation facilities, security). What is the role government plays when citizens need to pay taxes and are then forced then procure (from the private sector) the services those same taxes are supposed to provide? I do not support this bill. Eskom and Nersa should be held liable for their own incompetence. These calculations should have been reviewed many, many times before being accepted - the individual companies need to take ownership for this oversight. The consumer/taxpayer cannot be indebted any further.	Shaur	Gauteng		employed individual
	2026-01-09 09:17:16	No I do not	All of the above – we should not pay for government blunders	I do not support NERSA's proposed recalculation and related increases. Consumers are already under severe financial pressure, and it is unreasonable to expect the public to absorb additional costs when the core issues lie with mismanagement and systemic failures. There has been a persistent lack of accountability in how funds are managed, ongoing neglect of electricity infrastructure, and a continued inability to provide a reliable power supply. Load shedding remains a daily reality, despite repeated tariff increases over the years. Asking consumers to pay more under these conditions is neither fair nor justifiable. If errors were made in previous calculations, it is the responsibility of the relevant authorities to resolve those internally. The financial consequences of administrative or regulatory mistakes should not be passed on to ordinary citizens who are already struggling with rising living costs, unemployment, and economic instability. Public trust cannot be rebuilt through increased charges without improved service delivery, transparency, and demonstrable accountability. Until there is clear evidence of responsible financial management, infrastructure investment, and consistent electricity supply, further financial burden on the public is unacceptable.	Sharne	Gauteng		employed individual
	2026-01-09 09:17:15	No I do not	All of the above – we should not pay for government blunders	It's the biggest cheek you can imagine for years and years. These guys that can't organise a piss up in a brewery, expect the public to pay for an absolute shambles it's not enough that we all had to go and create our own ESKOM at home. Now we still have to pay for the one that is useless -forget it	JJ	Gauteng		business owner
	2026-01-09 09:17:10	No I do not	All of the above – we should not pay for government blunders	Any price increase above inflation is bad for the economy... the prices of goods and services go up because businesses pass on these prices to the consumers, which means that the households are hit hard almost twice. The poorest of the poo always suffer. Whilst government and their side kicks are looting our state with no care for the citizens, this needs to stop now before it becomes a widespread common idea. Citizen to be loaded with paying for government incompetence.	Rehana	Gauteng		retired
	2026-01-09 09:17:02	No I do not	All of the above – we should not pay for government blunders	Instead of getting more money from the public, take away Escom employers, specific the big bosses huge bonuses.	Elsabe	Free State		retired

	2026-01-09 12:39:34	No I do not	All of the above – we should not pay for government blunders		Dirk	Western Cape		retired

	2026-01-09 12:39:28	No I do not	All of the above – we should not pay for government blunders	With municipalities owing billions, it is totally absurd that the consumer is expected to pay twice for electricity and then fit the bill for government incompetence as well. Dear Government, Eskom has now been milked dry and it is time for the private sector to take over. Then the model needs to change where the municipalities are removed as middlemen and we pay Eskom directly. The chain is too long with too many opportunities for money to be siphoned off to the detriment of the consumer.	Henk	Gauteng		business owner
	2026-01-09 12:39:28	No I do not	All of the above – we should not pay for government blunders	We are done having to pay for incompetence with the high price of living as well.	Albie	Gauteng		employed individual

	2026-01-09 12:11:52	No I do not	All of the above – we should not pay for government blunders	Why must South African citizens who contribute to the country's economy, who pay high taxes on their salaries & still have to fork out more money on other industries because our government is weak and futile still cover their blunders. As a white South African, the only way forward for constructive citizens is self-determination. The african will always favour the african governing parties. And that is exactly the problem. South African black politicians are incompetent. They have zero clue in what they are doing. All they do is suck the system dry and expect - to be quite frank - the white people the keep this country afloat. Black south african politicians have no idea how to maintain infrastructure. If i am not mistaken, the word maintenance does not exist in their culture or language. Neither does future. There is absolutely no way forward for South Africa under an incompetent ANC. Or any other Black "liberation" "socialist" party for that matter.	Schae	Gauteng		employed individual

	2026-01-09 11:59:34	No I do not	All of the above – we should not pay for government blunders	The incompetence and corruption at Eskom have been out of hand for many many years now. People have chosen to turn a blind eye or do things in a way that benefits them. This is not the fault of the citizens they serve (as a parastatal, they serve us; they are civil servants. There is no point trying to paint the zebra; it remains a Zebra). If Eskom's assets were run like any normal business, and yes, Eskom is a business, depreciation and infrastructure would be calculated. If those who work there are not competent or they are corrupt, they should knock at the doors of these incompetent and corrupt members and their associates. As with the above point, Eskom is a business, and the fact that incompetence and corrupt individuals have been allowed to operate as they wish is not the fault of the citizens. Therefore, again, it is the incompetent and corrupt individuals who should be held accountable.	Grant	Western Cape		
	2026-01-09 11:59:22	No I do not	All of the above – we should not pay for government blunders	It is amazing that Eskom can run the way it has been since the change over of 1994. If any other business in South Africa ran on the same ideology and principles it would have gone bankrupt and people would be in jails. The government has bailed out Eskom on numerous occasions while the public suffer the consequences of bad management with high prices etc. There is no excuse that can make this issue go away than to have a revamp of the board, the company and its employees. What a waste of resources and now it is time for change. The ANC has proven it is useless at managing Eskom and numerous other entities in South Africa. Money spent on themselves instead of maintaining the infrastructure's and upgrading others. But as the government wants to cripple South Africa to force out whites, create increasing poverty for more power and control to steal, to sell the land to China and other countries. Blame the past for their Communistic ideologies and plans. Not many households in South Africa are paying for their electricity so others get charged more to compensate for the lack. Reduce Eskom salaries and way more the quality of service before upping the rates etc.	Jonathan	Mpumalanga		employed individual

	2026-01-09 11:58:36	No I do not	All of the above – we should not pay for government blunders	I oppose the proposed R76 billion additional revenue allowance for Eskom's Generation business. The crisis was engineered by policy failure, not market forces! The 1998 Energy White Paper explicitly warned that Eskom's generation surplus would be exhausted by 2007. Despite Eskom's requests to build new capacity, government blocked these investments while contemplating privatisation. This political paralysis — not operational necessity — forced Eskom to defer maintenance, postpone refurbishments, and run ageing plants beyond design limits to create "virtual capacity." When government finally authorised new build in 2007, Medupi and Kusile became vehicles for corruption. Original budgets of approximately R163 billion have ballooned to over R440 billion, with documented tender manipulation, design defects, and contractor fraud. These power stations remain incomplete and underperforming nearly two decades later. Consumers should not fund unaccountable failure! The public is now asked to absorb: - The cost of assets devalued by deferred maintenance - Infrastructure built through corrupt procurement - NERSA's own admitted calculation errors No meaningful accountability has been established for the policy decisions, corruption, or mismanagement that created this situation. Passing these costs to consumers rewards institutional failure and sets precedent for future bailouts. Recommendation NERSA should reject the proposed RAB values until a credible independent review quantifies what portion of Eskom's asset base reflects legitimate investment versus corruption-inflated costs and avoidable deterioration. 	2026-01-09 11:37:11	No I do not	All of the above – we should not pay for government blunders	This is too heavy a burden for South African citizens to carry. It is outrageous.	Recia	KwaZulu-Natal		self-employed
	2026-01-09 11:37:03	No I do not	All of the above – we should not pay for government blunders	Key Concern A High Court ruling revealed calculation errors amounting to R76 billion in Eskom's asset base. The current proposal seeks to recover this mistake from consumers through higher tariffs. Why This Is Unfair Legal principle: Administrative errors should not be passed onto the public. Accountability: Eskom and NERSA must bear responsibility for their miscalculations. Impact: Ordinary households and small businesses already face rising costs of living. Adding this burden will deepen financial hardship. Request I urge NERSA to: Reject the recovery of the R76 billion error through consumer tariffs. Implement accountability measures within Eskom and NERSA. Conclusion South Africans should not be penalized for regulatory mistakes. Please uphold fairness and protect the public from unjust tariff increases.	Riyaad	Western Cape		
	2026-01-09 11:36:58	No I do not	All of the above – we should not pay for government blunders	The government encouraged consumers to get solar power due to the incompetency and corruption. Now people with solars will be targeted. Now consumers need to pay for the mistakes. Infrastructure is old and decaying. The citizens of this country deserve electricity at an affordable rate and should not have to pay for lack of financial understanding and corruption.	Jacqueline	Western Cape		employed individual
	2026-01-09 11:36:56	No I do not	All of the above – we should not pay for government blunders	I am tired of being forced to pay for misconduct, gross negligence and basic services that are not being managed correctly	Cassandra	Western Cape		employed individual

	2026-01-09 11:31:18	No I do not	All of the above – we should not pay for government blunders	It's really perthetic that we should still be kept randsom at our expense. No to this increases	Abdul Gaffaar	Western Cape		employed individual
	2026-01-09 11:31:13	No I do not	All of the above – we should not pay for government blunders	We currently pay a combined Network and Service of just under R1200 per month, this excludes VAT. Today, we once again have an electricity area outage (this happens approximately every 3 weeks). I am already paying for a service I am not receiving because of maladministration, corruption, and theft. When the last set of Eskom increases happened we were assured that aging infrastructure would be updated, this has definitely not happened. The facts being that apart from Eskom finally tackling the corruption and theft that was happening within their own business, nothing else has happened. They now want to increase fees with lots of promises and a historical track record of ineptitude. Their increases should be pegged to inflation, just like a normal household needs to make a plan with the income they receive, so Eskom and NERSA need to be limited to realistic increases.	Maria	Gauteng		self-employed

	2026-01-09 11:27:59	No I do not	All of the above – we should not pay for government blunders	South Africans should not be forced to pay for Eskom’s repeated failures and government mismanagement. We are already carrying an unbearable tax burden while basic services continue to deteriorate. Asking the public to fund an additional R76 billion is unacceptable and deeply unjust. Eskom’s financial crisis is not the result of ordinary citizens using electricity. It is the direct consequence of years of corruption, political interference, poor governance, failed oversight, and a complete lack of accountability. These problems were well known, yet allowed to continue unchecked. The public warned repeatedly, and those warnings were ignored. South Africans already pay through high taxes, escalating electricity tariffs, load shedding related economic losses, job losses, and declining investment. We pay again through corruption that drains public funds with little consequence for those responsible. To now demand that consumers absorb Eskom’s mistakes is to punish the very people who have suffered the most from its failures. NERSA’s mandate is to act in the public interest, not to protect inefficiency or legitimise mismanagement. Forcing energy users to cover Eskom’s shortfalls sends a dangerous message that there are no consequences for failure, corruption, or reckless decision making. It rewards incompetence and undermines public trust in our institutions. Enough is enough. Accountability must replace bailouts. Those responsible for Eskom’s collapse must be held to account, costs must be recovered from waste and corruption, and structural reform must be prioritised. The public should not be treated as an endless source of funding for state failures. We strongly oppose any plan that shifts Eskom’s financial burden onto South African consumers. This proposal must be rejected in full.	Steven	Western Cape		employed individual
	2026-01-09 11:27:37	No I do not	All of the above – we should not pay for government blunders	Eskom's blunders, incompetence and lack of transparent management have cost me personally extreme inconvenience and vast financial inputs already. 	2026-01-09 11:18:06	No I do not	All of the above – we should not pay for government blunders	I submit this comment in response to NERSA's call for public participation on the proposed electricity price determination following the recalculation of Eskom's Regulatory Asset Base. Affordability: Should consumers pay for NERSA's calculation errors? No. Consumers should not be required to bear the financial consequences of regulatory or administrative errors. The recalculation of Eskom's asset values, reportedly amounting to approximately R76 billion, arises from acknowledged inaccuracies in previous determinations. These are not costs incurred through new investment, improved service delivery, or consumer-driven demand, but rather through methodological and governance failures within the regulatory framework. Passing such costs on to electricity users undermines the principle of cost reflectivity, erodes public trust in regulatory institutions, and sets a dangerous precedent whereby errors are socialised while accountability is diluted. Reliability: Should consumers pay full price for ageing, unreliable infrastructure? No. Electricity tariffs should reflect both cost and value. South African consumers are currently subjected to frequent load shedding, infrastructure failures, and declining reliability of supply. It is neither equitable nor economically rational to charge full—or increased—tariffs for assets that are beyond their optimal lifespan and are demonstrably failing to deliver consistent service. Cost recovery mechanisms must be linked to performance outcomes. Asking consumers to fund depreciation and returns on ageing infrastructure without commensurate reliability improvements violates basic regulatory fairness and contradicts international best practice in utility regulation. Efficiency: Should consumers fund Eskom's cash flow constraints and construction delays? No. Consumers should not be positioned as financiers of inefficiency. Eskom's historical construction delays, cost overruns, and operational inefficiencies are well documented. Allowing tariff increases to compensate for cash flow shortfalls or delayed projects weakens incentives for fiscal discipline, project management reform, and operational efficiency. Sustainable utility reform requires internal accountability, improved governance, and structural efficiency—not the repeated transfer of risk and cost to end users, including households and small businesses already under severe economic pressure. Conclusion In conclusion, while the financial sustainability of the electricity sector is important, it cannot be achieved at the expense of fairness, accountability, and economic justice. Regulatory errors, unreliable asset performance, and institutional inefficiencies should not be corrected through higher tariffs imposed on consumers. I therefore urge NERSA to reject any price determination that seeks to recover historical calculation errors or inefficiencies from electricity users, and instead pursue solutions that reinforce regulatory credibility, performance-based pricing, and long-term sector reform. Yours sincerely, Melissa Rademan	Melissa	Western Cape		business owner

	2026-01-09 11:13:29	No I do not	All of the above – we should not pay for government blunders	Nersa's calculation error cannot and should not be carried by consumers, who are already over-burdened with increasing living expenses and stagnating income and wages due to a faltering economy. It is unreasonable to expect consumers to pay full price for ageing and crumbling infrastructure, that should and could have been provisioned out of past profits that were unlawfully siphoned by state capture cadres. Pursuant to this are the increased costs brought about by construction delays, which are just another element of state capture and these costs and losses should be carried by the directors and officers of Eskom as well as the contractors, who were responsible for the delays and cost escalations in the first place. This is not the fault of paying consumers.	Stephan	Gauteng		self-employed
	2026-01-09 11:13:13	No I do not	All of the above – we should not pay for government blunders		Barbara	Western Cape		retired
	2026-01-09 11:12:56	No I do not	All of the above – we should not pay for government blunders	Eskom has got rid of most or all of the experienced, best trained and competent people within their organisation and we, the consumer, are now paying for their replacements mistakes. Overpaid incompetent politicians are getting electricity at no charge to themselves but the cost has to be covered by the paying consumers. Illegal connections including meter bypassing is rife, nothing is being done to stop this and to prosecute the iffenders, once again, we the paying law abiding consumer is expected to carry the cost. Officials seem to be scared to cut off and prosecute non payers or not bothered by or even benefitting from electricity theft. Copper theft is rampant, little is done to sort this out; prosecute the scrap metal dealers and improve border checks and security to stop illegal exporting if copper. Maybe even stop the selling or buying of copper. Regulating only helps if the regulators do their job and if they are not able to be corrupted.	Kenneth	Gauteng		retired
	2026-01-09 11:12:52	No I do not	All of the above – we should not pay for government blunders	Electricity in South Africa is now more expensive than in many European countries. Despite our natural resources and lower labour costs, our electricity has now become too expensive for companies to be competitive and for households to survive. The far higher than inflation increases are already a huge problem, let alone this planned assault on the South African public. Just stop stealing, then we will not need such increases.	John and Adele	Eastern Cape		employed individual

	2026-01-09 11:10:33	No I do not	All of the above – we should not pay for government blunders	The issue in focus is yet another in the unending parade of inept, at best, syndicated corruption, at worst, of state and parastatal financial debacles. It would be difficult to find a better example of "throwing good money after bad." Obviously, NERSA was unable, or incapable, of performing its duties in the first place. Now another "audit" has arrived at a monstrous figure. How can any credibility be attached to this figure? It must be remembered that Eskom has been and is wracked by corruption and theft on a gargantuan level. Obviously this has contributed to the "losses". To call for the end user, the man in the street, to now make payment is extortion, Mafia style, but "legalized". In any event have the NERSA "audit" and associated "determinations" been verified by competent, third-party accountants of standing? What benefit will the South African public derive from "recovery" of this astronomical sum? It must also be taken into account that the paying base is drastically skewed, with many municipalities making no payments to Eskom for decades. There would be no fair and equitable distribution of payment, should this be implemented, should such misguided action be taken.	Ian	Western Cape		retired

	2026-01-09 10:53:11	No I do not	All of the above – we should not pay for government blunders	Seems like everytime the government makes a blunder the South African people have to pay the price . Its time that the South African people stand up and stop paying for electricity. All South African need to boycott the payment of electricity because it's become a pattern for us the people to carry the corrupt government. We are currently over taxed on everything , our CPI is a joke , it's said that our inflation sits at 3.1% and they government wants to drop it to 3. Yet we uncontrolled prices on consumables , fuel is over 150% taxed over what is a reasonable price as compared to our neighbouring countries ,vehicle licenses we pay for roads that we don't even go to , no regulation on medical costs , and still we must pay for government corruption and so called mistakes . The South African government uses us the people as a" cash cow" because they know that the money will always come from the people.	Desmond Christopher	KwaZulu-Natal		unemployed individual

	2026-01-09 14:26:58	No I do not	All of the above – we should not pay for government blunders	Enough is enough. Stop corruption and destruction of every parastatal / government department and municipality and start delivering the services you've been paid for. After all, every government employee is employed abd paid by the South African taxpayers. You work for us and not the other way around.	Ronell	Mpumalanga		retired
	2026-01-09 14:26:49	No I do not	All of the above – we should not pay for government blunders	thanks to the cANCer they have broken everything that worked , and now expect us to pay for their mess. Will keep using less and less electricity where we can , to avoid having to pay anything extra.	GARY	Western Cape		retired
	2026-01-09 14:26:16	No I do not	All of the above – we should not pay for government blunders	It is well known that Eskom is riddled with corruption, often giving tenders to the highest bidder leading to subpar service delivery and projects being easy over budget. The cost of corruption as well as these sort of mistakes being passed onto the consumer is creating a situation where a basic human right is quickly becoming unaffordable.	Ryan	Gauteng		employed individual
	2026-01-09 14:25:59	No I do not	All of the above – we should not pay for government blunders	Not paying for government/Eskom mistake!	Nell	Western Cape		retired
	2026-01-09 14:25:51	No I do not	All of the above – we should not pay for government blunders	After sitting for 5 days without electricity and pathetic excuses I don't believe Eskom deserves that huge amount of money. Take it from undeserved bonuses.	Rene	North West		retired
	2026-01-09 14:25:50	No I do not	All of the above – we should not pay for government blunders	Where does it state that government blunders must be paid for by the public purse? Government is meant to take responsibility for its own failures — that is what accountability means. If the state kills people, do citizens go to jail for it? No. Exactly. So when they appoint incompetent individuals, that responsibility lies squarely with them. Since when are citizens expected to pay for government negligence, corruption, or crimes? R76 billion is not accountability — it is punishment of the innocent.	Manuela	Eastern Cape		
	2026-01-09 14:24:32	No I do not	All of the above – we should not pay for government blunders	Did they even hire a qualified CA to do calculations or did they just thumb suck through every transaction on their ledgers and spreadsheets. I'm not paying for their stupidity and neither should my fellow South Africans. This people must stop taking us for a ride. Theres plenty Accounting softwares that are now AI generative to assist with accuracy and efficiency. Are they dom? Or stupid, Nxa!	Matuza	Gauteng		self-employed

	2026-01-09 14:19:47	No I do not	All of the above – we should not pay for government blunders	I find it incredible that this government and ESKOM find it difficult to understand the burden on consumers at the moment. Most people are now living hand to mouth and the continual rise in general prices have become ridiculous. As a pensioner, on a fixed income, I find I can no longer afford to pay for the basic day to day items that I use. Food prices are going up far faster than the government believe. Taxation in this country is very high. We pay tax on income, then we pay tax on the items we purchase. If we are lucky enough to have some savings, we pay tax on any interest earned. A further increase in electricity costs, above the present rate of inflation, would find many people no longer being able to afford their mortgages etc. It is time that the government and Eskom own up to their own mistakes and pay themselves to resolve the problem.	David	Gauteng		retired

	2026-01-09 14:08:12	No I do not	All of the above – we should not pay for government blunders	I'm strongly against this. Forcing South Africans to pay an additional R76 billion is not reform, it's cost-shifting. It is the public being asked to absorb the consequences of NERSA's calculation errors and Eskom's chronic mismanagement, while those responsible face no real accountability. On affordability, households and businesses are already under extreme pressure. Electricity tariffs have consistently outpaced inflation, while wages and economic growth have not. Asking people to pay more in the middle of a cost-of-living crisis is reckless and disconnected from reality. On reliability, consumers are being charged premium prices for a product that remains unstable. Load shedding, aging infrastructure, unplanned outages, and deferred maintenance are still the norm. You cannot justify full cost recovery when the service itself is unreliable and inconsistent. On efficiency, this proposal effectively turns consumers into Eskom's backstop for cash-flow shortfalls, construction delays, and years of poor planning and governance. That is not efficiency, it is socialising failure. If mistakes were made in tariff calculations or settlements, they must be corrected within the system, not passed directly to the public. If NERSA approves this, it sends a dangerous message: that regulators and state entities can make costly errors with no consequences, because the public will always be forced to pay. That undermines trust in regulation, governance, and the energy transition as a whole. South Africans deserve accountability before increases, reliability before higher tariffs, and competent regulation that protects consumers, not another bailout disguised as a public consultation.	Jean Jacques	Western Cape		employed individual

	2026-01-09 13:42:04	No I do not	All of the above – we should not pay for government blunders	It would be a travesty of justice if those responsible for these mistakes are given their full salaries and, on top of that, any bonus!!! The collection of tariffs for any electricity supplied and not being paid for, needs to be dealt with harshly by Municipalities, and even those Municipalities who are indebted to Eskom should be sanctioned. This could be in the form of those Managers to also be docked some of their salaries and bonusses!!! That our economy is not growing at a rate commensurate with the electricity needs is also of concern, meaning that a lower percentage of our population needs to fork out a higher percentage of disposable income to purchase their electricity needs. Finally, may I say that our country needs a fair amount of good, better, or even competent and ethical leadership in place, just all round! Then we need transparency in our corporate integrated reporting as this would lead to those mistakes being 'picked up' early in the reporting process or excised from it! The GOOD BOOK states that "where the righteous are in authority, the people rejoices, but where the wicked rules, the people groan" Proverbs 29 v 2. South Africans, barring our politicians, have been "groaning" for about two decades now!!!	Arnold	Western Cape		retired

	2026-01-09 13:37:51	No I do not	All of the above – we should not pay for government blunders	I disagree completely, I run a small business which is already struggling to survive. if i make a mistake with my calculations, its not for my client to carry that blunder. i will have to suffer the loss. if I had to offer services like ESKOM does, I would not have any clients. Our hand was forced to make alternative arrangements due to the previous, constant load shedding and lack of maintenance. We have carried the cost of alternate Energy ourselves. Now we still get punished for their errors. Absolutely disgusting	Robyn	Gauteng		self-employed

	2026-01-09 13:37:34	No I do not	All of the above – we should not pay for government blunders	I do NOT agree that consumers need to pay more and get less. I believe this apparent 'Calculation Error' is a cover up for corruption. Where did the R76 Billion said error go? Or the business/ individuals responsible for the error need to be removed from their job immediately as they are completely incompetent. Consumers should NOT pay for their incompetence! Another concern for consumers is that the collection of additional R76 Billion is another excuse for corruption to take place. Just another avenue to 'reallocate' funds to 'office supplies' or 'consultation fees'. Consumers are never made aware of the suggested plans other than improvements, and the timelines are never disclosed so years go by and we all sit with the same problem that never actually get fixed. I am also strongly against Eskom's new trick to charge individuals who have had solar installed. Eskom could not provide a service, consumers needed to make a plan for themselves and we must pay additional money for a service they could not provide to consumers. A solution is to recover money that has been 'stolen' through corruption (this is billions!) and look at alternative energy sources that will cost less over time. Wind, solar - alternatives that other countries have implemented that work well and do not charge consumers exorbitant costs. OR - allow consumers who have already installed solar systems to feed excess power production back into the grid. Motivate consumers to feedback into the grid by offering discounted rates on their electricity bills. The energy that can be accumulated through excess feedback into the grid will reduce Eskom's load and power many areas and homes without straining the existing decaying systems we have.	Elle	Gauteng		employed individual
	2026-01-09 13:37:20	No I do not	All of the above – we should not pay for government blunders	Consumers should not foot the bill for mismanagement and poor decisions made by state entities.	Jan	Free State		employed individual

	2026-01-09 13:37:01	No I do not	All of the above – we should not pay for government blunders	Eskom has already cost the public and the economy Trillions of Rands through their corruption, thieving and incompetence! We simply cannot afford any more. They must now embark on serious cost-cutting in order to create a viable business instead of expecting their customers to keep bailing them out . This is why they continue to blunder, because they never suffer any consequences. They have a bloated, overpaid workforce, leading to inefficiency and wastage. Historically Eskom produced more cheap, reliable electricity with far fewer staff so it can be done. Our economy cannot sustain this, leading to massive unemployment and poverty. To save SA, stop rewarding them for their blunders!	Ralph	Gauteng

	2026-01-09 13:21:15	No I do not	All of the above – we should not pay for government blunders	We have had such treamendous between Eskom, andNersa that the poorer of our people - yes our people that the Government have simply bi pas - and the people have had to suffer - choosing between food or electricticity. Why must we pay for the enormous debt that Eskom suffers because the infrastructure of this county has been done away with. In 35 years the ANC has brought our country to its knees when it ran from a first world country to a typical Black country with no infrastrs, ucuture, roads, education, blackouts, water blackouts every single dayi frastructure in many part of the counrtyr and the people who benefit from this disfunctionable country are the fat cats, the poloticians, part ofgovernment where none of these catrasties occur. Lest's face it - we don't have an infractrue. And the list can go on and on. Look unto yourselves our politions.	Dianne	Western Cape		retired
	2026-01-09 13:21:00	No I do not	All of the above – we should not pay for government blunders		Ineke	Gauteng		
	2026-01-09 13:20:56	No I do not	All of the above – we should not pay for government blunders	Skills shortage, own doing. They got rid of skills for BBBEE. Aging infrastructure, they did not do maintenance. Maintenance that was done, was sub standard done by cadres causing more breakdowns for financial gain. Preferential procurement is still happening, costing billions. As soon as they show a bit of profit, bonusses are paid, but if there is a shortfall, the public must foot the bill.	Brent	Western Cape		business owner
	2026-01-09 13:20:48	No I do not	All of the above – we should not pay for government blunders	It is ludicrous that Eskom can be so grossly incompetent and expect the consumer to pay and keep on paying for their ongoing blunders. Any private company would have gone out of business a long time ago. The provision of electricity should be privatised.	Jack	Western Cape		retired
	2026-01-09 13:20:33	No I do not	All of the above – we should not pay for government blunders	As is usual, South Africans have foot the bill for the national disease called incompetence!. When will it end?	Joachim	Limpopo		employed individual
	2026-01-09 13:20:15	No I do not	All of the above – we should not pay for government blunders	Put people in top level positions who can run a business. Seems that people sit in positions that don't understand what to do.	Christiaan	Western Cape		self-employed
	2026-01-09 13:20:10	No I do not	All of the above – we should not pay for government blunders		Mary	Western Cape		retired
	2026-01-09 13:19:44	No I do not	All of the above – we should not pay for government blunders	The government exists for the people not the other way around. You make a mistake you fix it on your own with your own money and resources. I'm not the one who didn't do their job right. Actions have consequences so whoever is responsible for this error can go and fix it without involving South African taxpayers to avoid responsibility.	Lydia	Eastern Cape		
	2026-01-09 13:19:43	No I do not	All of the above – we should not pay for government blunders	We have lived through 32 years of blunders, misappropriation of funds, theft and gross miss management!!! Why must we keep on paying for ineptitude!!! Quite simply, just put the right people in charge and there will be a major difference!!! Enough is enough!!! Having incompetent people in key positions of decision making is totally unacceptable!!! Please, let us rebuild our beloved country so that we may all prosper.	Antony Hector	Western Cape		business owner
	2026-01-09 13:19:40	No I do not	All of the above – we should not pay for government blunders		bianca	KwaZulu-Natal		employed individual
	2026-01-09 13:19:36	No I do not	All of the above – we should not pay for government blunders	Firstly get rid of half of Eskom's staff, their salaries are too high, much higher than the private sector who are paying their salaries. They insist on getting huge salary increases on top of their incompetence. Enough of their greed.	Jane	Eastern Cape		retired
	2026-01-09 13:19:29	No I do not	All of the above – we should not pay for government blunders		Jennifer	Western Cape		retired
	2026-01-09 13:19:28	No I do not	All of the above – we should not pay for government blunders	The corruption and cadre deployment in this country is out of control. I am not prepared to pay for others to enrich themselves. Useless people doing less than half a job and getting paid for it. No more. I am not your cash cow!	Bev	Gauteng		unemployed individual
	2026-01-09 13:19:23	No I do not	All of the above – we should not pay for government blunders	All Eskoms problems stem from corruption and mismanagement This should not be recouped by users, who are paying exorbitant amounts for services nit rendered The worst of this situation is that there is no political will to correct this situation and allow prosecution of perpetrators to proceed. This should not only entail prosecution and recouping of assists, but lead to actual imprisonment of especially the ring leaders	Fiona	Gauteng		employed individual
	2026-01-09 13:19:22	No I do not	All of the above – we should not pay for government blunders	All Eskoms problems stem from corruption and mismanagement This should not be recouped by users, who are paying exorbitant amounts for services nit rendered The worst of this situation is that there is no political will to correct this situation and allow prosecution of perpetrators to proceed. 	2026-01-09 13:10:49	No I do not	All of the above – we should not pay for government blunders	The overall overhead costs within Eskom , salaries, perks, assets, mismanagement of procurement funds, all add to why Eskom should go through a full restructuring program, streamline employees and relook at all old structured salary packages and perks before holding the public accountable for their mismanagement over all of these years	Bonita	KwaZulu -Natal		employed individual
	2026-01-09 13:10:31	No I do not	All of the above – we should not pay for government blunders	If Eskom was not found being so corrupt and unable to manage its financials', we wouldn't even be at this point, there have been billions siphoned out of Eskom through top management, through dirty contracts, though the buying department exaggerating costs to general commodities such as basic tea, coffee, milk, sugar and things like stationary, cleaning supplies, planed sabotage to equipment causing massive power shortages to fund dirty contractors and staff , the over paying of unqualified staff or not in line with set levels for industry, once the monies can be returned the shortfall will not exist . People that were on the take including the rotten ministers should all be brought to book and face the consequences and well as have their assists seized and sold to repay the theft of the monies gained through corruption. Furthermore, this increase will put the unemployed and elderly out of survival and cause much unneeded pain and suffering, having to choose between power or food, the other side will be a drastic increase of power theft which will definitely burden the power grid network.	Claude	Gauteng		employed individual
	2026-01-09 13:10:15	No I do not	All of the above – we should not pay for government blunders	The cost of electricity in this country is already through the roof as it is. It is unfair and irresponsible for the government to pass on accounting mistake made by Nersa onto an already strained consumer/citizen.	Seyiso	Gauteng		business owner
	2026-01-09 13:09:05	No I do not	All of the above – we should not pay for government blunders	I have already been forced to put in solar because of the unreliable service provided by Eskom. Don't see why I should be further burdened by their bad management and planning.	Gavin	Gauteng		

	2026-01-09 13:09:04	No I do not	All of the above – we should not pay for government blunders	USERS SHOULD NOT BE HELD ACCOUNTABLE FOR COST OVER RUNS WHERE BUDGET IS EXCEEDED. THIS EXCESS CAN , I BELIEVE , IN THE PRESENT ENVIRONMENT, BE MORE THAN MADE GOOD BY SAVINGS TO BE HAD BY ELIMINATING CORRUPTION IN PROCUREMENT. THE MAINTENANCE COSTS ARE NOW PROHIBITIVE BECAUSE MONIES PREVIOUSLY ALLOCATED FOR MAINTENANCE HAVE BEEN LOOTED AND NOT SPENT AS REQUIRED TO PROPERLY MAINTAIN THE SYSTEM. EFFECTIVELY , CONSUMERS ARE NOW BEING ASKED TO PAY TWICE! CONSUMERS SHOULD NOT HAVE TO PAY ANY INCREASES AT ALL UNLESS ESKOM CAN SHOW AUDITED PROOF THAT THERE IS NO CORRUPTION. WHY SHOULD CONSUMERS HAVE TO PAY TO PERPETUATE CORRUPTION? FINALLY THE PRESENT ESTIMATED LEVEL / COST OF CORRUPTION SHOULD BE DEDUCTED FROM THE AMOUNT REQUIRED FOR COST INCREASES. 	2026-01-09 13:08:47	No I do not	All of the above – we should not pay for government blunders	It is clear that Eskom has been shielded from the costs of its gross mismanagement, including rampant corruption, for many years, and that the consumer is simply expected to pay to cover this. Eskom needs to be treated as any commercial company would be treated, and suffer the consequences for its lack of appropriate governance and management of its resources. Directors need to be held responsible for their fiduciary duties and breaches thereof. A commercial company facing the issues that Eskom faces would have called in Business Rescue years ago to fix ths issues. This has not happened becauser NERSA, in effect, provides a shield by raising tarrifs to current unaffordable levels to cover Eskom's malfeasance. Ths can no longer be allowed to happen. The government, which is complicit in the corruption, mismanagement and lack of competent management/leadership in Eskom throughout the period, needs to cover these losses by providing additional bank guarantees, and Eskom needs to have a competent board, led by a competent minister (Pieter Groenewald comes to mind as a rare example of a competent minister), and a new leadership team, for as manay management layers are necessary to effect complete reform of the way the business runs. The public can no longer afford to continue paying for the chaos that is Eskom, nor the shield that is NERSA.	Guy	Western Cape		retired
	2026-01-09 13:08:35	No I do not	All of the above – we should not pay for government blunders	It is neither fair nor reasonable to expect already overburdened consumers to pay for NERSA's admitted calculation errors. Recovering costs arising from regulatory mistakes through higher electricity tariffs undermines affordability, especially when consumers already face unreliable supply from aging infrastructure. Asking the public to fund depreciation, returns, cash-flow gaps, and construction delays that were previously miscalculated shifts accountability away from NERSA and Eskom, where it belongs. These losses should be absorbed by the institutions responsible, not transferred to honest citizens who have no control over regulatory failures or project mismanagement.	Andrew	Gauteng		business owner

	2026-01-09 13:06:44	No I do not	All of the above – we should not pay for government blunders	This submission is made in good faith, with respect for the regulatory process, and with the intention of contributing constructively to a fair, sustainable, and lawful electricity pricing framework for South Africa. 1. Affordability and Accountability I do not support the principle that electricity consumers should be required to pay for calculation errors made by NERSA or Eskom in prior determinations. The reported R76 billion error relates to historical inaccuracies in asset valuation and regulatory calculations. These errors were not caused by consumers, nor were consumers afforded any opportunity to influence or correct them at the time. Transferring the financial consequences of these mistakes to end-users undermines the foundational regulatory principles of fairness, accountability, and administrative justice. A regulatory framework must ensure that errors made by institutions are addressed through internal corrective mechanisms, improved governance, or appropriate fiscal interventions—not by retroactively burdening consumers who relied on prior determinations in good faith. 2. Reliability, Value, and Service Delivery I further object to the expectation that consumers should pay full cost-reflective tariffs for electricity supplied through aging, unreliable, and frequently unavailable infrastructure. South Africa continues to experience persistent load shedding, unplanned outages, and declining system reliability. Under such conditions, consumers are not receiving a level of service that reasonably corresponds with the proposed tariff increases. In any regulated environment, price and value are inseparable. Where reliability is compromised, pricing mechanisms should reflect service quality, asset performance, and delivery outcomes. To do otherwise places consumers in a position where they are required to pay premium prices for substandard and uncertain supply, which is neither equitable nor sustainable. 3. Efficiency, Risk Allocation, and Delays I do not agree that consumers should be required to fund Eskom's cash flow challenges, operational inefficiencies, or construction delays through higher tariffs. Cost overruns, project delays, and inefficiencies—particularly those associated with large capital projects—represent operational and managerial risks. In principle, such risks should be borne by the entity responsible for managing them, not externalised to consumers who have no control over execution, timelines, or procurement decisions. Allowing inefficiencies to be recovered directly from consumers weakens incentives for improved governance, project discipline, and financial accountability. It also creates a moral hazard where the consequences of poor performance are systematically shifted away from decision-makers. 4. Broader Economic and Social Impact Electricity pricing has far-reaching consequences beyond Eskom's balance sheet. Rising tariffs directly affect households, small businesses, employment, and economic growth—particularly in a country already under significant economic strain. Any determination must therefore carefully balance Eskom's financial sustainability with affordability, economic resilience, and public trust in the regulatory system. Without this balance, the long-term consequences may include reduced compliance, increased self-generation, grid defection, and further erosion of confidence in national energy institutions. 5. Conclusion In summary, I respectfully submit that: - Consumers should not be required to pay for historical calculation errors made by regulators or utilities. - Full tariffs should not be charged for electricity supplied through aging and unreliable infrastructure without corresponding service guarantees. - Consumers should not be used as a mechanism to resolve cash flow constraints, inefficiencies, or project delays beyond their control. I urge NERSA to consider alternative mechanisms that prioritise accountability, efficiency, and fairness while restoring public confidence in the regulatory process. 	2026-01-09 17:16:31	No I do not	All of the above – we should not pay for government blunders	To whom it may concern, I hereby submit my formal objection to NERSA's consultation on the redetermination of Eskom's Regulated Asset Base (RAB) and the associated allowable revenue and tariff adjustments for the 2026/27 and 2027/28 financial years. Any decision that results in increased electricity tariffs will be severely detrimental to South African households. Many families are already struggling with the rising cost of living, unemployment, and economic instability. Higher electricity prices will place additional financial pressure on low- and middle-income households, deepen energy poverty, and force many to choose between basic necessities. Furthermore, ordinary consumers should not be expected to bear the financial consequences of long-standing governance failures, inefficiencies, and mismanagement within Eskom. Approving tariff increases under these circumstances would unfairly shift the burden onto the public. I therefore strongly reject this redetermination and urge NERSA to prioritise affordability, fairness, and the protection of households across South Africa. Yours sincerely,	Jordyn	Gauteng		business owner
	2026-01-09 17:16:07	No I do not	All of the above – we should not pay for government blunders	The ANC government is utterly corrupt, with no accountability for their disgraceful governance. This is just another opportunity for them to steal more of our hard-earned money.	Kim	KwaZulu -Natal		business owner

	2026-01-09 16:49:41	No I do not	All of the above – we should not pay for government blunders	Eskom has been a bottomless money pit. People accross all sectors has losts jobs, living standards etc. due to the rise of electricity since 1994. There also many allegations of tender fraud and corruption within Eskom, that isn't addressed. If government can't supply basic needs at affordable costs, then they should sell it to the private sector to properly manage it. Municipalities should also be held accountable for not paying their electricity to Eskom and cut users that do not pay. This will ease the load and Eskom will be able to generate income from the ligit electricity users. The economy can't afford another 900% hike in electricity.... Cut supply to non-payers including politicians that get everything for free and allow the economy to grow. No use pushing the few that still pay to pay more, as South Africa will force more people to immigrate and leave the country without jobs, water and electricty	Will	Free State		business owner
	2026-01-09 16:49:27	No I do not	All of the above – we should not pay for government blunders	Enough is enough. Let the ANC ministers pay for this blunder, who employed the people, who made this blunder!!!!!	Lynn	Western Cape		retired

	2026-01-09 16:38:32	No I do not	All of the above – we should not pay for government blunders	As a South African citizen who is currently unemployed, the escalation of the price of everything is totally unacceptable. When is the government going to realize that unemployment means less tax payers as well as the fact that less people can afford the escalating cost of living. Where is the government going to get it's funds from when there is no longer a sustainable amount of people paying for things like electricity simply because they can't afford it. Once funding is gone, how is anything going to be developed, maintained or even run. Can the ANC not learn from Zimbabwe? What is left of Zimbabwe? And yet the government want to take South Africa down the same road. They dont care. Should South Africa collapse, they will just fly off into the sunset with the millions they have gained from the public in their pockets and leave the people who are expected to pay for the decaying/dying country to live with the ruins. It is time the government employees responsible for the blunders, corruption and excessive salaries start taking the responsibility for their actions and fit the bill instead of the public having to suffer for it. 	2026-01-09 16:18:57	No I do not	All of the above – we should not pay for government blunders	The proposed increases are well above the range of inflation targets set, which will undermine various objectives of government policy and place a substantial burden on consumers. Furthermore, the rising cost of electricity is already reducing new job opportunities and causing smelters and foundries to close, resulting in additional job losses. Given that the increase is the result of mismanagement, miscalculation and the failure to provide electricity in a cost-effective way while sustaining and maintaining the related infrastructure, I do not think this increase incentivises better management, maintenance or the achievement of more cost-effective electricity. In addition, this increase will motivate those who can afford to do so, to migrate away from using Eskom as a source of power, thereby reducing their customer base and the number of the municipality's rate payers. There is no incentive in this increase to better manage construction delays or constrain project costs in building new capacity. Socially this will fuel growing anger and dissatisfaction of consumers, while increasing unemployment	Heather	Gauteng		employed individual

	2026-01-09 16:18:20	No I do not	All of the above – we should not pay for government blunders	Eskom has been plagued with mismangement, corruption, loss of income due to lack of payment enforced by defaulting municipalities. Electricity generation has been delayed due to incompetence and lack of managerial capacity to properly manage new energy generation and prevent breakdowns of NEW infrastructure. Prices have escalated so astronomically that future non payment is virtually guaranteed. BBEEE has prevented Eskom from hiring the best managers and workers to do the job properly and efficiently. Eskom managers pay themselves exorbitant bonuses and salaries for work that is shoddy at best. This has led to lack of investment and further lack of growth that would and should be happening to stabilize our economy. Selling off coal mines to the highest bidder has robbed South Africans of affordable electricity and you want the consumer to pay for THIS FIASCO???	Gillian	Western Cape		retired

	2026-01-09 15:57:10	No I do not	All of the above – we should not pay for government blunders	I hereby submit my formal objection to NERSA's consultation on the redetermination of Eskom's Regulated Asset Base (RAB) and the associated allowable revenue and tariff adjustments for the 2026/27 and 2027/28 financial years. Any decision that results in increased electricity tariffs will be severely detrimental to South African households. Many families are already struggling with the rising cost of living, unemployment, and economic instability. Higher electricity prices will place additional financial pressure on low- and middle-income households, deepen energy poverty, and force many to choose between necessities. Furthermore, ordinary consumers should not be expected to bear the financial consequences of long-standing governance failures, inefficiencies, and mismanagement within Eskom. Approving tariff increases under these circumstances would unfairly shift the burden onto the public. I therefore strongly reject this redetermination and urge NERSA to prioritise affordability, fairness, and the protection of households across South Africa.	Katekani	Gauteng

	2026-01-09 15:46:29	No I do not	All of the above – we should not pay for government blunders	Once again, the government is incompetent at best and corrupt at worst, and it is the citizens who suffer. South Africa is already struggling, the unemployment rate is ridiculous, and those who are lucky enough to have jobs make an absolute pittance, not nearly enough to have a decent standard of living. Those who can afford nonsense like this are the absolute minority inches country. Even the "middle class" of South Africa have to budget extremely carefully and take advantage of sales and discounts, we are all one step away from being destitute. The government is supposed to improve our lives, not make it worse. Stop the corruption. Do audits. Figure out where the incompetence is. Fire those people, make jobs for those who will actually do the job correctly and not only will some people find jobs, but then maybe those jobs will actually be done properly and we won't have this nonsense of "oopsie, we made a multi-billion rand mistake, but you guys have to pay for it tee hee" This is ridiculous.	Victoria	Gauteng		employed individual
	2026-01-09 15:45:57	No I do not	All of the above – we should not pay for government blunders	Eskom should get rid of half of their staff. The rest should be replaced with compedent and qualified people that is willing to work. Start doing their work and maintenance like in the old days. We cant go on paying for their shit management. Ons is gatvol vir die hele donerse lot Nersa inkluis!!	Manfred	Western Cape		retired
	2026-01-09 15:45:44	No I do not	All of the above – we should not pay for government blunders	This blunder was not the fault of the tax payor and I don't believe that the tax payor should be burdened with your inability to calculate tariffs correctly. Actually collect the money outstanding from the various municipalities and sort out your housekeeping.	Pat	Gauteng		retired
	2026-01-09 15:45:29	No I do not	All of the above – we should not pay for government blunders	The countless bail outs from government will never be repaid. Is it not time the Eskom absorbs cost of this blunder and moves forward	Peter	KwaZulu-Natal		retired

	2026-01-09 15:16:57	No I do not	All of the above – we should not pay for government blunders	The cost of government incompetence/corruption should never place any tax paying. law abiding citizen. As a small business owner renting, i am already suffering since having to pay so many compliance expenses to merely remain in-business not to mention the atrocious and heinous additional "service & wires charge" added to my monthly electricity bill. I pay an average of R400 - R500 for actual electricity usage, but have to pay an additional monthly average of +/-R4000. Not mention a rental double since coming under new ownership. Can only afford to occasional get a salary to pay my own bills, as every cent needs to go back into company, pay SARS, pay employees, pay insurance, pay suppliers, try an maintain meager company fleet vehicles, buy food etc. There is no way even remotely possible for me in my personal capacity or as a business owner, to afford paying for a government certified "accountants" catastrophic blunder or attempt to plunder and drain more money, from the already drained out and despondent citizens of this country. The Tax paying and law abiding citizens of this country have been paying for government incompetence and corruption of every state owned company/entity run by the government. I refuse to pay a single cent more. Should this still be passed, my only response would be to have to close my business, sell anything worth selling and attempt in vain to find employ elsewhere. Hope of any attempt to enjoy this life or have a life to enjoy is becoming a thing of the past. No all that remains is a hope of trying to survive financially in this country, which itself is becoming dimmer by the day.	Sheldon	Western Cape		business owner

	2026-01-09 15:14:31	No I do not	All of the above – we should not pay for government blunders	I have four main concerns: 1. The Provision of Free Basic Services: The provision of FBS should be funded through government fiscus and not directly from citizens. 2. Poor Revenue Recovery from Townships and informal settlements: Eskom needs to recover costs of electricity from people using this service. There is nothing for free in life and if you do not pay you need to be cut off from the grid. Likewise, politicians should not be allowed to campaign on the basis of free electricity. This campaign promise fails to take into account who is actually paying for the electricity being used. 3. Poor Revenue Recovery from Municipal, Provincial, National and State-Owned Entities: These entities are not paying their fair share of costs. 4. Special Preferential Rates for industries and foreign multinationals: Industries are attracted by reduced rates but then are exempt from loadshedding	Aubrey	KwaZulu -Natal		employed individual
	2026-01-09 15:14:15	No I do not	All of the above – we should not pay for government blunders	The public must not pay for the incompetence of Government , it should replace its so called expert Auditors and Accountants, most likely ANC Cadres, with people who know what they are doing. The people of SA will not pay for this.	Peter	Gauteng		retired
	2026-01-09 15:13:46	No I do not	All of the above – we should not pay for government blunders	Eskom's problems is not the problem of the people, but the government. The government should take responsibility for what happened, who knows, it may prevent it from happening again. Isn't that what we are paying tax for?	Talita	Western Cape		employed individual
	2026-01-09 15:13:42	No I do not	All of the above – we should not pay for government blunders		Derek	Western Cape		retired
	2026-01-09 15:13:30	No I do not	All of the above – we should not pay for government blunders	NO No No! We the public have had enough. Eskom and the government are dishonest.	David	Western Cape		retired

	2026-01-09 14:56:07	No I do not	All of the above – we should not pay for government blunders	I am so excited to have Eskom working properly; however, expecting the taxpayer to foot the bill for issues has already been the pattern to help this SOE. To now extend that to Nersa - who made the mistake themselves - and force the taxpayer to pay for an accounting error which should have been caught by the people in charge of these things at the organisation is anathema! The people involved should be sacked and more competent people put in their place, and the claw-back of fees should be negotiated between Eskom and Nersa with no effect on the taxpayer. There is not enough money in the shrinking pool of taxpayers to constantly look to them for assistance to badly run SOEs and public organisations. A better way has to be found and implemented. Further, other corrupt deals as well as bad debts (in the form of municipalities and other government institutions) should be recovered before the taxpayers' assistance is requested. This would show willingness in actually making everything better and display an actual desire to root out corruption and badly run municipalities.	Daine	KwaZulu -Natal		employed individual

	2026-01-09 19:26:51	No I do not	All of the above – we should not pay for government blunders	Between NERSA, Eskom and Government they are all equally incompetent to fix our failing Grid and we as consumers just don't have the money to afford such corrupt and inefficient service! Enough is enough	Gillian	Gauteng		business owner
	2026-01-09 19:26:48	No I do not	All of the above – we should not pay for government blunders	The public is not responsible for government blunders.	Kirk	KwaZulu -Natal		employed individual
	2026-01-09 19:24:49	No I do not	All of the above – we should not pay for government blunders	Electricity users have already absorbed substantial financial and economic losses due to Eskom's failures. Requiring the public to now fund an additional R76 billion would be parasitic, unjust, economically damaging, and contrary to sound regulatory practice. I oppose this proposal for the following reasons: 1. Unfair Burden on Consumers. Electricity users—already under severe financial pressure due to high tariffs, inflation, and unreliable supply—should not be compelled to fund historical inefficiencies and mismanagement over which they had no control. 2. Severe Economic Damage Already Incurred by Energy Users 3. Contravention of the "User Pays for Value Received" Principle Requiring payment for costs that did not result in improved service delivery or system performance undermines the core regulatory principle that tariffs must reflect value received. 4. Moral Hazard and Accountability Failure Allowing Eskom to recover past losses through tariffs creates a dangerous precedent. It weakens incentives for prudent financial management, cost control, and consequence management. Regulatory decisions should promote efficiency and accountability—not socialise losses arising from failure. 5. Further Economic and Social Erosion as Consequences of Further Tariff Increases This runs counter to South Africa's economic recovery and industrialisation objectives. 6. Court Ruling Should Not Be Used to Justify Consumer Punishment While the court rejected the prior settlement agreement, this does not mandate cost recovery from consumers. NERSA retains a constitutional and statutory duty to act in the public interest by balancing Eskom's sustainability with affordability, fairness, and economic impact. 7. Alternative Measures Must Be Prioritised NERSA should instead pursue, amongst other practical, logical measures- Enforced operational and financial reforms at Eskom Performance-based regulation and consequence management Full transparency and independent verification of the claimed R76 billion before any consideration of recovery Pensioners battling to make ends meet can not afford additional financial burdens. Those employees earning 3 or 4 or 5 million a year need to accept a reduced income to rectify their negligence and mistakes. The levels of poverty due to corruption in our country should not become the burden of any public members, who are battling to survive daily As in any business it is time for ESKOM to absorb and deal with its own inadequacies and mistakes. Defenceless law abiding citizens have been exploited for years. As a first step, those responsible should be identified, sued and discharged. This would be a clear message to those who practice parasitism on the public. In conclusion I urge NERSA to reject any proposal that transfers this burden to electricity users and to adopt an approach that prioritises accountability, affordability, and the long-term public interest.	Marcelle	Western Cape		
	2026-01-09 19:24:23	No I do not	All of the above – we should not pay for government blunders	Employ staff who are competent. Tired of incompetent staff and fraud. Reduce overpaid Eskom staffs salary and bonus especially those responsible for this gross error. It's totally unfair for the consumers to pay for this error. People cannot afford to put food on the table. Look also to reduce the ministers salary and perks. Too much of funds are spent irresponsibly.	Gaithree	KwaZulu -Natal		retired

	2026-01-09 19:20:23	No I do not	All of the above – we should not pay for government blunders	Eskom is operating inefficiently and ineffectively. It has too many employees and at too high remuneration. Instead of leaning on overtaxed users to make up for the deficit, it needs to cut costs and become lean and mean. Also Nersa cannot just pass the mistakes it may on the user stand in for it. It needs to accept responsibility for the mistakes and bring the tariffs in line with customers' affordability. and current inflation. Eskom will have to adjust and do some serious restructuring to cut its costs.	Theo	Western Cape		retired

	2026-01-09 19:14:59	No I do not	All of the above – we should not pay for government blunders	South African citizens should not be held liable for a 10.5% electricity price hike resulting from NERSA's administrative blunders. It is fundamentally unfair to expect households to fund a R76 billion shortfall caused by regulatory miscalculations regarding asset depreciation and cost overruns on Eskom's infrastructure projects. The process itself undermines democracy; releasing a complex consultation document during the December holidays with a rushed January deadline limits meaningful public engagement. Additionally, the current tariff structure disproportionately targets ordinary citizens and businesses to subsidize shortfalls, while major industrial players often secure special pricing or relief. After facing a nearly 180% price increase over the last decade, consumers are already at a breaking point. Instead of forcing the public to bail out bureaucratic errors, there must be strict accountability for the financial mismanagement between the regulator and the utility. Citizens cannot continue to pay the price for state inefficiencies.	Luke	KwaZulu-Natal		employed individual

	2026-01-09 18:49:00	No I do not	All of the above – we should not pay for government blunders	"The "R76 Billion Mistake": A High Court ruling has forced NERSA to recalculate the value of Eskom’s assets after admitting to errors in their original figures. Reports indicate that these calculation errors amount to a R76 billion mistake—a cost that the current proposal seeks to recover directly from electricity users." So, who said "HAPPY NEW YEAR"? The High Court should've also protected the Consumers from this "get-rich-quick" scheme by making it clear that the Consumer isn't responsible for any incompetence by NERSA. ERRORS to the amount of R76 BILLION is not a "mistake" - it seems to be a very CALCULATED act to cover up something "Something" THIS cannot be passed on to Consumers " willy-nilly " and expect payment. Wherever one looks infrastructure is collapsing due to lack of good maintenance and shoddy workmanship. Load shedding was a huge part of the breakfast, lunch and supper menu, and everything in-between. Small businesses had to close down as they couldn't get a grip on continued losses especially in the food industry - medium to large businesses were put to great expenses in obtaining large scale generators etc. THESE businesses were proactive in keeping Consumers supplied - what's NERSA's excuse? ESKOM has been a thorn in the flesh for years, and it's back again. Perhaps the Government can bail this out- again. Speak to Ramaphosa. He should concentrate on the goings on in THIS Country first, a Country that's falling apart.	Arlene	KwaZulu-Natal		retired

	2026-01-09 18:43:54	No I do not	All of the above – we should not pay for government blunders	I write in strong opposition to the consultation paper published by NERSA regarding the proposed redetermination of Eskom’s Regulatory Asset Base (RAB) and the associated additional recovery of approximately **R76 billion** over the MYPD6 period. While I appreciate the opportunity for public input following the Pretoria High Court's December 2025 ruling — which correctly rejected the prior closed-door R54 billion settlement for lacking transparency and proper participation — I fundamentally disagree with the direction of the paper and the underlying proposal to pass this burden onto already overburdened electricity consumers. The **R76 billion** figure, comprising roughly **R62 billion** in depreciation and **R14 billion** in returns on assets, arises primarily from NERSA's own admitted calculation errors in the original allowable revenue determination. These errors led to an undervaluation of Eskom's RAB and related components. However, the responsibility for these regulatory mistakes cannot and should not be shifted onto South African households, businesses, and industries that are already grappling with high living costs, economic stagnation, persistent load shedding, and cumulative tariff increases. Key reasons for my strong disagreement include: 1. **Unacceptable Affordability Impact in the Current Economic Climate** South Africa faces severe economic challenges, including high unemployment, inflation pressures, and constrained household budgets. Imposing further tariff hikes — potentially around **10.5%** or more in the coming year (far exceeding the previously approved **5.36%** for 2026/27) — to fund a higher asset valuation would exacerbate energy poverty and hinder economic recovery. The RAB should be subject to reasonable capping or adjustments to prioritize affordability over full recovery of past regulatory oversights. 2. **No Justification for Consumers Funding Aging and Unreliable Infrastructure** Many of Eskom's power stations are nearing the end of their operational life or suffer from frequent breakdowns, directly contributing to ongoing load shedding. Forcing consumers to pay higher tariffs to cover the full depreciated value of these inefficient and unreliable assets is inequitable. Eskom must first demonstrate meaningful improvements in plant performance, maintenance, and availability before expecting ratepayers to bear these costs. 3. **Unfair Burden of Construction and Operational Risks** Allowing recovery of costs for incomplete "Work Under Construction" projects (e.g., delayed new builds) and working capital shortfalls through tariffs effectively socializes Eskom's project management failures and operational inefficiencies. Consumers should not subsidize poor execution, overruns, or cash flow issues stemming from mismanagement. The court intervened to ensure transparency and public participation precisely because decisions affecting millions of South Africans must not be made in secret or without accountability. Yet approving this **R76 billion** adjustment would reward systemic failures rather than incentivize reform. Eskom and NERSA must explore alternatives, such as: - Government support or debt restructuring to absorb the impact of the errors. - Stricter performance-linked incentives and penalties. - Accelerated unbundling and competition to reduce reliance on Eskom's monopoly structure. I urge NERSA to reject the proposed adjustments in their current form and prioritize protecting consumers from further unjustified increases. South Africans deserve reliable, affordable electricity — not endless bailouts for institutional shortcomings. Thank you for considering this submission. 	2026-01-09 17:50:43	No I do not	All of the above – we should not pay for government blunders	Good day all, While I do not agree with the NERSA plans to further recover monies from the PAYING population, I do, to certain degree, understand that equipment and facilities age, breakdown and need to be repaired as well as maintained. The biggest problems I have with the proposal is that money miscalculated can not just be recovered. I can't do that in my business years later. Secondly, money recovered is going to be spent where, used for what. This is the same argument Eskom has had for the last 10 years. Yet we still have a failing SOE. Thirdly, with the amount of corruption on display from government local and national. Would it not be better to have an electrical account direct with Eskom? Fourthly, what is being done to prevent illegal connections from tacking place, subsidies being applied to previously disadvantaged communities- which don't pay or pay very little, this free ride needs to stop! Stop penalising the tax payers for government (ANC) mismanagement, blatant corruption. We are and have been for over 20 years now a captured state!	Dean	Gauteng		business owner

	2026-01-09 17:48:18	No I do not	All of the above – we should not pay for government blunders	The South African people continue to fund bad decision making, government blunders and misuse and management of funds. We have bailed out a number of government enterprises and we continue to do so, resulting in a very heavy burden on the SA public. In addition, any price increase above inflation is bad for the economy. When the price of goods and services go up, businesses pass on these costs to the consumers, which then means that the households are hit twice as hard. Enough Is Enough!!! 	2026-01-09 17:29:38	No I do not	All of the above – we should not pay for government blunders	Overseas countries offered to fix Escom, the government said NO. Russia gave a load of money to have Escom fixed, nothing was done, where did all that money go, the usual place, into the ANC pockets?!? South African experts offer to do the job, to them the answer was NO. Why, they were too white. The ANC appointed de Ruiters, a white ANC man, who knew nothing about Escom, and couldn't fix it. The corruption at Escom with the ANC doing nothing about it, was shocking. From me it's a definite NO. All the money the ANC stole, use that to fix Escom. They've put none of the illegal taxes (according to our Constitution taxes are illegal) back into South Africa's, economy. Every they touched turned to shit. ENOUGH is ENOUGH!!!!!!!!!!!!!!!	Amri	Gauteng

	2026-01-09 17:28:25	No I do not	All of the above – we should not pay for government blunders	I object to the proposed tariff increases. Consumers should not be forced to pay for NERSA's R76 billion calculation error. This was a regulatory failure, not a consumer responsibility. Passing this cost on through higher tariffs is unfair and unjustifiable. South Africans are already paying more for a service that is unreliable. Ongoing load shedding and aging infrastructure mean consumers are not receiving full value for the prices charged. Eskom's financial crisis is the result of years of state capture, corruption, mismanagement, and delayed projects such as Medupi and Kusile. These costs have already been paid through taxes and economic damage. Shifting them to electricity users amounts to double payment for institutional failure. NERSA should not approve any tariff determination that forces consumers to absorb regulatory errors or the legacy costs of corruption.	Lynette	Western Cape		retired

	2026-01-09 17:22:21	No I do not	All of the above – we should not pay for government blunders	As it is the cost of electricity in South Africa is already one of the highest in the entire world, ...and now they still want to push the price up even more because of their incompetence and then just expect us to fit the bill??? Maybe they should rather start by reducing all the huge overly inflated ESKOM salaries across the board first instead???	Darrell	Eastern Cape		self-employed
	2026-01-09 17:22:12	No I do not	All of the above – we should not pay for government blunders	Between Eskom and City of Cape Town the electricity costs is killing us. The City of Cape Town now charges R339.89 plus VAT= R390 .87 for Electricity HU and wire charges, then you have to still buy electricity, if your water is bill is not update they limit your electricity and deduct from your prepaid electricity. you just cannot survive. R70 to clean the city. the grass in the street is overgrown residents have to clean in front of their own properties so why as we paying cleaning charges. I may as well go squat so I can get free water, No one comes to read the water meters then eventually you are slapped with a bill you cannot afford, and then penalized for their incompetence. Seriously..... Its cheaper for me to buy food and eat take outs than buy electricity to switch the geyser on. If only some genius could invent how to keep the fridge going then I dont need electricity, I can burn a candle for light, go to the swimming pool for a hot shower. - Not sure why the City of Cape Town is getting away with charging above the rates.	Zanap	Western Cape		employed individual
