	2026-01-14 11:12:06	No I do not	All of the above – we should not pay for government blunders	To: The National Energy Regulator of South Africa (NERSA) Dear Chairperson and Members of the Energy Regulator, RE: STAKEHOLDER SUBMISSION – OPPOSITION TO THE CONSULTATION PAPER ON THE RE-DETERMINATION OF ESKOM'S GENERATION REGULATED ASSET BASE (RAB) FOR MYPD6 I hereby submit this stakeholder comment in response to the National Energy Regulator of South Africa's (NERSA) Consultation Paper on the re-determination of Eskom's Generation Regulated Asset Base (RAB) for the 2025/26, 2026/27 and 2027/28 financial years. This submission does not support the Consultation Paper as published. While acknowledging the High Court's directive for reconsideration, the proposed re-determination places disproportionate emphasis on revenue recovery for Eskom while inadequately addressing tariff affordability, asset performance, and consumer protection. The outcome risks further transferring Eskom's historic inefficiencies, construction overruns, and operational failures onto electricity consumers. EXECUTIVE SUMMARY The re-determination approach outlined in the Consultation Paper fails to sufficiently prioritise electricity affordability amid sustained economic pressure on households and businesses. Consumers are expected to continue paying returns and depreciation on aging, unreliable, and underperforming generation assets, despite persistent load shedding and declining service reliability. Construction delays and cost overruns are effectively capitalised into the RAB, creating moral hazard and weakening accountability. Eskom's failure to submit an updated asset valuation further undermines regulatory integrity and risks undue overcompensation. The re-determination results in material additional revenue for Eskom despite continued supply instability. This submission proposes alternative regulatory approaches, including the introduction of a service-adjusted and performance-linked RAB, the ring-fencing of legacy assets, the disallowance of inefficient capital expenditure, conditional approvals tied to updated asset valuations, and a rebalancing of risk away from consumers and back onto the licensee. 1. INTRODUCTION AND POSITION I do not support the Consultation Paper as published. While the consultation is framed as a court-mandated compliance exercise, the substance of the proposed re-determination fails to adequately protect consumers, fails to address systemic inefficiencies in Eskom's asset base, and perpetuates a regulatory model that socialises Eskom's historic failures through electricity tariffs. The Consultation Paper prioritises revenue recovery over affordability, asset efficiency, and service reliability, thereby undermining the objectives of the Electricity Regulation Act (ERA), the Electricity Pricing Policy (EPP), and the public interest. 2. FUNDAMENTAL CONCERN: COST OF ASSETS VS AFFORDABILITY OF ELECTRICITY The Consultation Paper places overwhelming emphasis on correcting accounting and regulatory calculations and ensuring Eskom recovers returns and depreciation, while treating tariff affordability as an indirect consequence rather than a primary constraint. This approach is inconsistent with Section 4 of the ERA, the EPP principle that electricity prices must be cost-reflective, efficient, and affordable, and the constitutional requirement to act reasonably and proportionately. Electricity tariffs cannot be treated as a balancing mechanism to resolve Eskom's financial shortfalls. 3. PAYING FOR AGING AND UNRELIABLE INFRASTRUCTURE The RAB framework assumes that assets are productive and deliver value commensurate with their cost. This assumption does not hold for Eskom's generation fleet, where Energy Availability Factors remain structurally low, load shedding persists, and maintenance backlogs indicate asset deterioration. Consumers are therefore paying returns and depreciation on assets that do not deliver reliable electricity, in violation of value-for-money regulatory principles. Aging assets that are beyond original design life and deliver declining output should not earn full economic returns comparable to modern, efficient infrastructure. 4. BURDENING CONSUMERS WITH CONSTRUCTION AND OPERATIONAL FAILURES Construction overruns and delays arising from governance failures, design defects, contractor disputes, and project mismanagement have been capitalised into the RAB. Consumers are compelled to repay these failures through tariffs, creating moral hazard and diminishing accountability. Construction delays further result in double economic harm through prolonged load shedding and increased RAB values once assets enter commercial operation. 5. ABSENCE OF UPDATED ASSET VALUATION Eskom's failure to submit a current, independently verified asset valuation constitutes a material governance failure. Allowing returns, depreciation, and RAB growth without such valuation undermines regulatory credibility and shifts valuation risk entirely onto consumers. NERSA should not compensate Eskom for non-compliance with regulatory methodology. 6. CONCERNS WITH THE PROPOSED RE-DETERMINATION Although framed as a neutral recalculation, the re-determination increases average RAB values in later years and results in Eskom receiving an additional estimated R76 billion over MYPD6. This outcome is difficult to reconcile with continued supply unreliability, declining service quality, and severe affordability pressure. Judicial compliance does not require automatic acceptance of Eskom's applied-for values. NERSA retains discretion to apply prudency tests, efficiency benchmarks, and to disallow costs that do not serve the public interest. 7. PROPOSED ALTERNATIVES AND AMENDMENTS NERSA is urged to consider the following measures: Introducing a service-adjusted, performance-linked RAB based on Energy Availability Factors, outage rates, and delivered energy; Ring-fencing legacy generation assets and applying declining returns; Disallowing inefficient capital expenditure and unjustified construction overruns; Making any re-determination conditional on updated, independently verified asset valuations; Rebalancing project, operational, and asset performance risk away from consumers and back onto the licensee. 8. PROCEDURAL FAIRNESS CONCERNS While urgency is acknowledged, deviations from PAJA requirements must not materially compromise procedural fairness. Compressed timelines reduce meaningful participation and undermine confidence in regulatory outcomes. NERSA is urged to ensure transparency by publishing all models and assumptions and extending timelines where necessary. 9. CONCLUSION The Consultation Paper, as published, does not sufficiently protect consumers, does not adequately address Eskom's structural inefficiencies, and risks entrenching a regulatory approach that treats tariffs as a mechanism to absorb historic failures. NERSA is urged to rebalance the re-determination in favour of affordability and efficiency, apply stronger prudency and performance safeguards, prevent undue overcompensation, and restore public confidence in electricity regulation. Electricity consumers cannot continue to be the insurer of last resort for an inefficient and aging generation fleet. Yours faithfully,	jose	Gauteng

	2026-01-14 10:31:01	No I do not	All of the above – we should not pay for government blunders	It is disgraceful that the state of our once beautiful country is left in tatters and ruin. The government is absolutely insane for thinking an already challenging economy and lack of livable income, but hey, they don't care. I feel the government officials should empty their pockets for a change, after all they have stolen from the South African people and left them with nothing. They are sitting fat cats and enjoying the cream while people literally suffer. There is so much wrong with our country, there is no way on this green earth - I will pay MORE for their inability to actually run a thriving economy and actually care about the well-being of people and not care so much about lining thier pockets. 	2026-01-14 10:25:58	No I do not	All of the above – we should not pay for government blunders	Should you pay for NERSA's calculation errors? No, it should be paid for by the manager, senior management, and the individual who computed it. NERSA is not allowed to negotiate on behalf of clients; instead, it is meant to regulate. Since the government removed ESKOM from the public without our consent, this is much more true. Should you pay full price for aging, unreliable infrastructure? No, because the monthly payments already include the money designated for structural upkeep. Because the government removed ESKOM from the public light without our consent, this is far more true. Those who receive bonuses for conserving money should return the bonuses in order to repair the infrastructure. The state capture funds should also be used for this. Should consumers fund Eskom’s cash flow and construction delays? No, clients should pay for the services they receive rather than for unscrupulous practices and poor management. Remember that the government seized Eskom without the consent of the people, and now they want the people to continue being affiliated with Eskom? This is unfair! Construction delays should be managed by project managers, and they should be held accountable.	Dr Hannes	Gauteng		unemployed individual

	2026-01-14 10:09:55	No I do not	All of the above – we should not pay for government blunders	I object to the proposed electricity price determination. Consumers should not be required to absorb the financial consequences of NERSA’s admitted calculation errors relating to Eskom’s asset values. Recovering historical omissions through increased tariffs is neither fair nor lawful in principle. Furthermore, it is unreasonable to require consumers to pay full cost-reflective tariffs for electricity supplied through aging, unreliable infrastructure that consistently fails to meet standards of availability and performance. Lastly, electricity users should not be expected to fund Eskom’s cash flow challenges, inefficiencies, or construction delays through higher prices. These costs arise from governance, planning, and operational failures and should not be transferred to the public. I therefore submit that the proposed increases are unaffordable, unjustified, and contrary to the interests of consumers.	Judith	Gauteng		self-employed

	2026-01-14 08:04:05	No I do not	All of the above – we should not pay for government blunders	I submit this objection as a critically affected consumer who is already financially incapable of contributing to the responsibility of paying for our family as I have no income. I have been unable to secure employment in the current economic crisis, and my spouse is already carrying the burden of providing for both our family and additionally for supporting our pensioner parents. Any further increase in electricity tariffs will push households like ours beyond the limits of sustainability. Consumers should not be expected to pay for the blunders of Eskom and its regulators. Allowing Eskom to recover these costs through increased tariffs effectively condones years of incompetence, mismanagement, and corruption. This sets a dangerous precedent where failure is rewarded and accountability is avoided. South African consumers are already severely overburdened by the rising cost of living. Food, fuel, housing, and transport costs continue to escalate, leaving honest, hardworking citizens in an ever-deepening crisis, while corrupt officials continue to squander public funds on personal indulgence with little to no consequence. It is unconscionable to demand further sacrifice from the public under these circumstances. Unemployment in South Africa is at an all-time high. Additional electricity price increases will inevitably force more small and medium businesses to close their doors, resulting in further job losses and worsening an already dire economic situation. This proposal directly undermines economic recovery and social stability. In the current economic climate, consumers do not accept further tariff increases to fund higher revaluations of Eskom's power plants. We strongly propose that no further revaluations be imposed and that asset values be capped at the levels previously approved, specifically to keep electricity affordable for consumers. Consumers should not be forced to pay higher tariffs to cover the full value of power stations that are nearing the end of their operational lifespan or are frequently unavailable due to breakdowns and load shedding. These facilities should have been properly maintained using funds already collected from consumers for this very purpose. Furthermore, consumers should not bear the additional financial burden of funding Eskom's incomplete construction projects or operational cash flow through increased electricity prices. Instead, all high-ranking and corrupt officials responsible for these failures must be criminally prosecuted and replaced. All accumulated assets of such perpetrators should be sold, and the proceeds used to complete outstanding projects and cover the cost of miscalculations and mismanagement. Electricity tariffs should remain fixed until this deficit has been fully recovered and a meaningful surplus established. Only then should marginal, justifiable increases be considered. South Africans cannot continue to be treated as an unlimited source of revenue to compensate for institutional failure. Electricity is a basic necessity, not a luxury. This proposed increase is neither reasonable nor justifiable and must be rejected in the interests of fairness, economic survival, and accountability.	Leonie	Gauteng		unemployed individual

It’s not like we don’t get taxed for everything. Where is all our money going? Why should we be responsible for their lack of maintenance for the power structures? The cost of living is extremely high and there are just added expenses to the consumers all the time. It’s maddening!!	Shamiela	Western Cape		self-employed
	2026-01-13 17:34:22	No I do not	All of the above – we should not pay for government blunders	You said: Hi draft asb vir my in engels niks meer as 4000 karakters oor hoekom suid afrikaanse verbruikers nie lastig geval moet word met die government en eskom se korrupsie en failed attempts nie, ons verbruikers moet nie verantwoordelik gehou word en nou nog duurder betaal vir krag nie, sluit wate syfers in vanaf 2015 tot huidig hoeveel krag al verhoog het in SA en hoe onregverdig dit is met lewens onkoste wat alreeds so hemels hoog is en hoeveel families honger ly agv ons slegte government korrupsie en looting ChatGPT said: Here’s a draft in English (≤ 4000 characters) about why ordinary South African consumers should not be unfairly burdened or held responsible for government/Eskom failures and rising electricity costs, with real data included: Why South African Consumers Should Not Be Punished for Government and Eskom Failure South African households have borne the brunt of decades of mismanagement, corruption, and failed governance at Eskom and within government, yet ordinary consumers continue to pay the price — literally. Electricity tariffs have risen relentlessly and far faster than inflation, squeezing families already struggling to make ends meet and pushing many into deeper poverty. Since 2015, electricity tariffs have surged significantly above inflation. Over the past decade, Eskom’s tariffs have increased by roughly 148 %–237 % between 2015/16 and 2024/25, depending on tariff structure — roughly nearly 150 % to 237 % increase for typical household rates — far outpacing wage growth and average consumer price inflation. In practical terms, a household consuming 600 kWh per month may now pay multiple hundreds of rand more per month than they did less than a decade ago. These increases are on top of decades of price inflation: electricity prices nationally have risen more than 600 % since 2008, compared with roughly 139 % inflation in the same period. Even when regulators have moderated Eskom’s requests — such as reducing a proposed 36 % hike for 2025/26 — the approved increases (12.7% for 2025/26, plus further increases planned for 2026/27 and 2027/28) are still far above headline inflation. These persistent hikes are especially unfair because most consumers do not receive reliable service in return. Years of corruption, mismanagement, and underinvestment have seen frequent load shedding and operational failures, yet the cost is passed on to ordinary households. At the same time, the cost of living in South Africa has soared across every basic category. Food, utilities, and transport costs have climbed sharply, and food inflation has consistently outpaced earnings for many families, forcing impossible choices between paying for electricity or putting food on the table. This economic pressure is reflected in the country’s hunger and food insecurity statistics. Recent national data show that in 2023 nearly 19.7 % of South African households experienced moderate to severe food insecurity, and 8 % experienced severe food insecurity, meaning millions struggle to access enough food. Other estimates indicate that at least 15 million South Africans are food insecure, and around 23 % of children live in severe food poverty — a life-threatening situation for many families. It is unjust to hold consumers responsible for systemic failures they did not cause. Ordinary citizens struggle to pay inflated electric bills while wages stagnate, unemployment remains high, and essential costs continue rising. Electricity is not a luxury; it’s a basic necessity required to cook food, heat homes, refrigerate medicine, run small businesses, and keep children safe and studying. When prices rise disproportionately — especially due to government or utility mismanagement — the burden falls hardest on the most vulnerable families. Instead of continuously passing on cost increases to consumers, government and Eskom should focus on accountability, transparency, and structural reforms that increase efficiency, reduce corruption, and promote affordable energy solutions. Consumers should not be left to cover the consequences of systemic failure, nor should they have to choose between energy and other essentials like food and shelter. The escalating cost of electricity amid growing hunger and poverty is not just an economic issue — it’s a matter of social justice. If you’d like, I can tighten the tone, make it more formal for a petition or policy brief, or tailor it for social media or a speech. You said: Make it suitable for a legal petition that I am drafting for dear south africa ChatGPT said: Below is a formal, legally suitable version tailored for a Dear South Africa petition. It is structured, objective in tone, and framed around fairness, proportionality, constitutional principles, and public interest, while remaining under 4 000 characters. Petition Against Unjust Electricity Tariff Increases and the Unfair Burden Placed on South African Consumers South African electricity consumers should not be held financially responsible for the long-term failures, mismanagement, and corruption within Eskom and successive governments. Ordinary households and small businesses did not cause Eskom’s operational collapse, governance failures, or infrastructure neglect, yet they are repeatedly expected to absorb escalating electricity tariffs to compensate for these systemic shortcomings. Since 2015, electricity tariffs in South Africa have increased at a rate far exceeding both inflation and wage growth. Between 2015/16 and 2024/25, electricity prices have risen by approximately 150% to over 230%, depending on tariff category. Over a longer horizon, electricity tariffs have increased by more than 600% since 2008, while overall consumer inflation during the same period was substantially lower. These increases have occurred despite ongoing load shedding, declining reliability, and repeated service interruptions. This pattern of above-inflation tariff increases is fundamentally unfair and economically harmful. Consumers are being charged more for a service that has become less reliable, while the underlying causes — corruption, poor governance, failed procurement, and lack of accountability — remain insufficiently addressed. Cost recovery through tariff hikes effectively shifts the consequences of institutional failure onto the public, rather than holding responsible parties to account. The impact of these increases must be viewed within the broader cost-of-living crisis. South African households are already under severe financial strain due to rising food prices, transport costs, housing expenses, and high unemployment. National data indicate that millions of South Africans experience food insecurity, with a significant portion of households unable to consistently afford basic nutrition. For many families, electricity costs now compete directly with food, healthcare, and education expenses. Electricity is not a discretionary luxury; it is an essential service required for cooking, heating, refrigeration, healthcare, education, safety, and economic participation. Excessive tariff increases disproportionately affect low- and middle-income households, deepen inequality, and undermine dignity and socio-economic rights. Penalising consumers for failures beyond their control contradicts principles of fairness, proportionality, and reasonable administrative action. We therefore submit that: South African consumers should not be burdened with further above-inflation electricity tariff increases resulting from Eskom and government failures. Any tariff determinations must meaningfully consider affordability, service quality, and the lived realities of households. Accountability, governance reform, efficiency improvements, and anti-corruption measures must take precedence over repeated cost pass-throughs to consumers. Sustainable energy reform should prioritise reliability, affordability, and public interest rather than perpetual financial rescue through high	Andre	Gauteng		self-employed
	2026-01-13 17:26:33	No I do not	All of the above – we should not pay for government blunders	Eskom got a bloated workforce thst need to be downsized to safe money. Sarah	Western Cape		employed individual
	2026-01-13 16:48:16	No I do not	All of the above – we should not pay for government blunders	In my current employment I have to frequently consultant to SOEs, including Eskom. Not a single one of these SOEs is run well. There is wasted time, wasted money and a general apathy about doing even a small job well. They are open to tender delays, tender fraud, shutdowns, and a quite pervasive culture of incompetence (i.e. weak project management, wrong people for technical work, and staff turnover). It is high time that both the government and citizens stop bailing this incompetence out. I refuse to pay more and more for electricity (and other services) when the quality of delivery is so poor. We should not pay for their mess....rather recover the money from salaries of the fat-cats working at Eskom and other SOEs, and from "irregular expenditure" (i.e. tax payers money that has been stolen). 	2026-01-13 16:21:39	No I do not	All of the above – we should not pay for government blunders	More shameful behaviour by NERSA and ESKOM and the government as a whole.	Kelly	Eastern Cape		employed individual
	2026-01-13 16:20:28	No I do not	All of the above – we should not pay for government blunders	This will hurt low to middle class citizens the most which makes up the superior majority of South Africans - myself included. It's increasingly getting more and more difficult to live, with the cost of living crises currently happening. This just adds more severity to the pile - I for one reject having to bear the costs of blunders caused by years of mismanagement and "incorrect calculations" - this is totally unfair to push onto all South Africans. Honestly, at a wider conversation, Eskom needs to be dismantled completely and we should only allow IPP's to feed into the grid, and allow customers to choose between competitors. This will help keep prices down, keep IPP's accountable and add good competition + loads of jobs etc.	Just	Western Cape		employed individual
	2026-01-13 16:20:28	No I do not	All of the above – we should not pay for government blunders	Just as the recent Discovery debacle could have been avoided if there had been insurance for such eventualities, if NERSA is subject to these miscalculations, it should take out insurance against such mistakes. Surely cost of replacing ageing infrastructure is calculated into the annual costs over the expected lifetime!	Mary	Gauteng

	2026-01-13 14:48:55	No I do not	All of the above – we should not pay for government blunders	Electricity tariffs over many years have far exceeded inflation and consumers cannot continue to pay these increases. SA need to speed up the provision of alternative power suppliers as competitors to Eskom to drive down the cost of electricity. Consumers are already finding alternatives and with these further increases, as a result of Nersa's blunders, Eskom customer numbers will decrease and power generated will drop, creating more of a problem. Eskom needs to also drastically cut costs, not increase prices.	Allan	Gauteng		retired
	2026-01-13 14:45:56	No I do not	All of the above – we should not pay for government blunders		Leona	Western Cape		retired
	2026-01-13 14:45:39	No I do not	All of the above – we should not pay for government blunders	We pay for a service. If Eskom messes up that is on them and should not be allowed as it would be deemed as public extortion.	Darrell	Western Cape		employed individual
	2026-01-13 14:44:56	No I do not	All of the above – we should not pay for government blunders	Consumers should not be expected to absorb the cost of regulatory or calculation errors made by NERSA. Tariff determinations must be accurate, transparent, and accountable. Passing such errors on to the public undermines trust in the regulatory process and places an unfair burden on households and businesses already under financial strain. It is unreasonable for consumers to pay full tariffs for electricity supplied through aging and unreliable infrastructure. Payment should reflect the quality and consistency of service delivered. Consumers should not be used as a mechanism to fund Eskom's cash-flow challenges or to compensate for delays and inefficiencies in construction and project management. Operational inefficiencies and governance failures must be resolved internally through reform and accountability, rather than being transferred to the public through higher tariffs.	Gilberto	Gauteng		
	2026-01-13 14:41:44	No I do not	All of the above – we should not pay for government blunders	As electricity becomes more unaffordable and infrastructure become more aged and goes without maintenance and protection against thieves, why should I, as a Ratepayer be forced to pay for this ontop of the MINIMAL electricity I use. I refuse to pay for the mistake of the administration to the amount of R76 billion. Charge the government. Stop corruption Lessen government officials pay. Up their taxes Limit their spending	Andrea	Western Cape		
	2026-01-13 14:39:50	No I do not	All of the above – we should not pay for government blunders	Taxpayers should not have to foot the bill for Eskom's mistakes and failures	Wesley	Western Cape		employed individual
	2026-01-13 14:37:30	No I do not	All of the above – we should not pay for government blunders	The government made the mistake. Not appointing competent people in high paying positions will result in mistakes like this.	Quinton	Gauteng		employed individual

	2026-01-16 10:47:39	No I do not	All of the above – we should not pay for government blunders	The entire chain of stakeholders in the electricity supply in South Africa consists of a bloated bureaucracy, all in the hands of corrupt officials of whom most are incompetent and don't have any understanding of the business of electricity, while in possession of massive personal bank balances. They don't know how to perform a full day's hard work just to earn a poor and inadequate living wage. The ANC government sits right in the centre of this disaster, shouting two main phrases; "BEE" and "Apartheid". As always, the citizens of South Africa have to foot the bill for the ANC's thievery and incompetency. The coal quality used by Eskom consists off a calorific value (CV) of 15-22 MJ/kg and ash content around 42%, whereas export coal has a CV over 27 MJ/kg. The ANC apply their corrupt minds in draining even more money for their own benefit from this already broken situation by selling top grade export coal to other countries like China at astonishing high prices. The selling price of high grade coal sits at around R1452 per ton, less the FOB cost of R261.77 per ton, leaving a profit margin of R1190.23 per ton. Eskom pays around R550 per ton for lower grade coal which is graded as "low grade" for very specific reasons. It destroys generation infrastructure which in turn results into more frequent maintenance programs, adding to more labour, materials and equipment costs, Making the entire cost of service ridiculously expensive, with no hope to improve efficiency. But here comes the big question. Where does this money get channelled to? Into the ANC's corrupt coffers, or where it should go to; the maintenance and development of South Africa's electricity utility? I feel confident to say that this entire song and dance by NERSA is totally overstated and unnecessary when ALL figures are pulled into the calculation. We as the public of South Africa are not stupid. We are making it our life's mission to arm the blind ANC followers who crosses our paths daily with this type of knowledge, day by day. It is a slow process stretching over the past 30 years, but it seems like it is gaining momentum which makes us hopeful. We will never give up. It is after all in our blood, and in our European DNA to build, and not to destroy. Thanks for the opportunity. Greetings.	Wouter	Gauteng		unemployed individual

	2026-01-16 10:12:07	No I do not	All of the above – we should not pay for government blunders	This is what happens when corruption is so deep and goes unpunished. Eskom and its management are directly responsible for where we find ourselves in this matter. Lets us not forget that Loadshedding and it crippling effect has directly impacted on the revenue of Eskom. The "lost" revenue due to installation of private generation has lowered Eskom's revenue and this is a major contributing factor to Eskom's issues we see now. It is disingenuous that Nersa should take the "easy" way out by increasing rates. Instead it should be lowering the already very expensive rates so that our economy can recover, attract foreign investment and people can have some disposable income.	Michael	Western Cape		retired

	2026-01-16 10:01:40	No I do not	All of the above – we should not pay for government blunders	I am writing to formally object to NERSA's proposal to increase Eskom's allowable revenue by R76.066 billion for the FY2026–2028 period. This redetermination places an unjustifiable burden on consumers to pay for administrative blunders and unverified costs. My objection is based on the following four points derived directly from the Consultation Paper and the current economic reality: 1. Non-Compliance with Valuation Requirements (Risk of Overcompensation) According to the Consultation Paper (Para 6.32), Eskom failed to submit the required Modern Equivalent Asset Valuation (MEAV). NERSA explicitly admits that "This failure presents a risk of undue overcompensation of Eskom's RAB values.". Comment: It is procedurally unfair to force consumers to pay an additional R76 billion based on asset values that Eskom failed to verify in line with the methodology. Consumers should not foot the bill for Eskom's non-compliance. 2. Inability to Exclude Cost Overruns NERSA admits in Para 6.15 that the current approach to redetermining transfers to commercial operation "inhibits NERSA from excluding any inflated capital expenditure (i.e. cost overruns) that Eskom undertakes.". Comment: This effectively forces the public to pay for project mismanagement and construction inefficiencies. We refuse to subsidize inflated costs for "value created" that has not been properly stress-tested against efficient market standards. 3. Payment for Aging and Unreliable Infrastructure The proposed increase in Depreciation (R62 billion) and Return on Assets (R14 billion) is disproportionate to the quality of service provided. Comment: Eskom's fleet is aging and unreliable. Calculating "Depreciated Replacement Cost" on assets that frequently fail does not reflect their true economic value. Consumers are being asked to pay "new asset" prices for "old asset" performance. 4. Affordability and Economic Impact The South African economy cannot absorb a further R76 billion shock. Comment: Passing the cost of regulatory errors and administrative redeterminations onto the consumer is unsustainable. The tariff must reflect affordable, efficient costs, not the restoration of revenue based on technicalities and blunders. Conclusion I urge NERSA to reject the R76 billion increase. The redetermination should strictly penalize Eskom for its failure to submit the required asset valuations (MEAV), rather than rewarding non-compliance with higher tariffs.	Garreth	Gauteng		employed individual
	2026-01-16 09:56:10	No I do not	All of the above – we should not pay for government blunders	No, I do not support the consultation paper as published by NERSA. South Africans cannot afford to pay an extra R76 billion for Eskom's and NERSA's mistakes—especially when it means inflating the value of aging, breakdown-prone power stations that cause load shedding and force higher tariffs. Capping asset values is essential to keep electricity affordable in this tough economic climate. Consumers should not bear the burden of funding incomplete construction projects or Eskom's working capital through massive hikes (potentially 10%+ in 2026). Fix Eskom's inefficiencies first—don't punish ratepayers further.	Juan	Western Cape		employed individual

	2026-01-16 07:58:58	No I do not	All of the above – we should not pay for government blunders	How can they expect the small amount of people that are actually paying for their own (as well as all the people that have illegal electricity connections and are thus stealing their electricity) electricity to foot the bill for incompetence, theft and fraud by Nersa staff and officials? We can't afford this anymore. Every couple of months there is some or other new crisis or problem that increases our monthly electricity bills to It is time for you to correct the crime, wrongs and misdoings in your company and have some form of proper management and control to prevent these recurring problems.	Tony	Western Cape		retired
	2026-01-16 07:58:56	No I do not	All of the above – we should not pay for government blunders	South Africa faces severe challenges, including high unemployment, pervasive poverty, and limited avenues for meaningful democratic participation. Many citizens feel alienated from decision-making, with government actions lacking transparency and real public engagement. The financial burden of Eskom's mismanagement, corruption, and regulatory failures has unjustly been shifted onto taxpayers and electricity users, prompting outrage over rising tariffs and demands for accountability. There is widespread frustration over ongoing corruption among officials, the conscious absence of consequence and accountability for those responsible, and concerns that essential service providers like Eskom prioritize profit over public service. This persistent disconnect between the government and the taxpaying minority exacerbates growing inequality further eroding the little trust remaining in the presidency, parlement and cadre appointed ministers sinking the economy and the country.	Derick	KwaZulu -Natal

	2026-01-15 17:27:34	No I do not	All of the above – we should not pay for government blunders	Can't afford the price of electricity as it is without further cost increases. It's time Eskom took responsibility for their business and didn't just pass around the begging bowl. The ANC just looks to the people to cover the blunders.	Allan	Eastern Cape		
	2026-01-15 17:24:01	No I do not	All of the above – we should not pay for government blunders	I strongly oppose NERSA's proposal to allow Eskom to recover an additional R76 billion from electricity consumers to compensate for the regulator's own errors in the original MYPD6 determination. Unfair Burden on Already Strained Consumers and the Economy South African households and businesses are facing severe economic pressure, including high unemployment, inflation, and the ongoing cost-of-living crisis. Shifting the cost of NERSA's calculation errors (totaling a shortfall of around R107 billion in depreciation and related costs) onto consumers will lead to tariff hikes of 10–10.5% or more in affected years. This is significantly higher than the previously approved 5.36% for 2026/27 and could average 15% annual increases over multiple years. Such increases will exacerbate affordability issues, reduce economic growth, and push more people into energy poverty. Lack of Accountability for Regulatory Failures The errors originated from NERSA's failure to properly apply its own methodology over an extended period (Eskom has raised depreciation concerns for over 15 years). Consumers should not bear the financial consequences of regulatory mistakes or inadequate oversight. Allowing this recovery sets a dangerous precedent that NERSA's errors can be passed directly to the public without sufficient consequences for the regulator or incentives for better performance. NERSA is meant to protect consumers and regulate Eskom effectively, not act as a mechanism to bail out past shortcomings. Insufficient Transparency and Consultation The consultation period is extremely limited (published over the holiday season with a tight January deadline), and no in-person public hearings are planned—unlike previous MYPD processes. This restricts meaningful participation, especially for ordinary citizens without resources to engage with complex technical documents. The initial R54 billion settlement was negotiated behind closed doors, and the increase to R76 billion further erodes trust in the process. Failure to Address Eskom's Underlying Inefficiencies Eskom has a history of cost overruns, wasteful expenditure, and poor performance (e.g., inflated asset costs and operational inefficiencies). Approving this additional recovery rewards inefficiency without requiring Eskom to demonstrate improved prudence or cost controls. Tariffs should only recover efficient costs, as per the Electricity Regulation Act—passing on regulatory errors does not align with this principle. Broader Negative Impacts Higher tariffs will disproportionately affect low-income households, small businesses, and energy-intensive industries (with costs often passed on downstream). This could hinder energy transition efforts, discourage investment, and undermine South Africa's economic recovery. I urge NERSA to reject the proposed R76 billion adjustment or explore alternative funding mechanisms (e.g., government support or Eskom internal efficiencies) that do not burden consumers. Prioritize affordability, accountability, and transparent processes in line with NERSA's mandate to protect the public interest. Thank you for considering this submission.	Francois	Western Cape		business owner
	2026-01-15 17:16:40	No I do not	All of the above – we should not pay for government blunders	Cost of living increases are out of control. The initial R54 billion settlement was negotiated behind closed doors, and the increase to R76 billion further erodes trust in the process. Failure to Address Eskom's Underlying Inefficiencies Eskom has a history of cost overruns, wasteful expenditure, and poor performance (e.g., inflated asset costs and operational inefficiencies). Approving this additional recovery rewards inefficiency without requiring Eskom to demonstrate improved prudence or cost controls. Tariffs should only recover efficient costs, as per the Electricity Regulation Act—passing on regulatory errors does not align with this principle. Broader Negative Impacts Higher tariffs will disproportionately affect low-income households, small businesses, and energy-intensive industries (with costs often passed on downstream). This could hinder energy transition efforts, discourage investment, and undermine South Africa's economic recovery. I urge NERSA to reject the proposed R76 billion adjustment or explore alternative funding mechanisms (e.g., government support or Eskom internal efficiencies) that do not burden consumers. Prioritize affordability, accountability, and transparent processes in line with NERSA's mandate to protect the public interest. Thank you for considering this submission.	Dylan	Gauteng

	2026-01-15 13:00:16	No I do not	All of the above – we should not pay for government blunders	1. Affordability: Should I pay for NERSA's calculation errors? No. I do not believe electricity users should be forced to pay for regulatory or accounting mistakes. Eskom has already received enormous financial support over many years, funded directly and indirectly by taxpayers. As a state-owned enterprise, Eskom's failures — whether administrative, financial, or managerial — should not be recovered by transferring the cost to households and businesses who have no control over these decisions. Errors made by regulators or state entities must be corrected internally, not billed to the public. 2. Reliability: Should I pay full price for aging, unreliable infrastructure? No. I am unwilling to pay full or increased tariffs for infrastructure that is old, unreliable, and has consistently failed to deliver stable electricity supply. Consumers are expected to absorb higher costs while load-shedding, breakdowns, and poor maintenance persist. Pricing should reflect performance. Until reliability is demonstrably improved and sustained, higher tariffs are unjustifiable. 3. Efficiency: Should consumers fund Eskom's cash-flow problems and construction delays? No. Eskom has already been given more than enough public money. Before any further funding is considered, mismanagement, inefficiency, and corruption must be decisively rooted out. Continuing to inject cash without structural reform only rewards failure. If Eskom cannot operate efficiently as a state-owned enterprise, then electricity generation and distribution should be fully or substantially privatised, allowing competition, accountability, and market discipline to replace the current model. Consumers should not be forced to fund ongoing delays, cost overruns, or institutional dysfunction.	David	Western Cape		self-employed
	2026-01-15 12:40:08	No I do not	All of the above – we should not pay for government blunders	It is unclear to me how a miscalculation of an asset value can affect tariffs. The paper is not clear on that aspect. Energy charges are to cover operational expenses and future capital development and the current asset value does not affect those costs.	John	Gauteng		retired

	2026-01-15 12:01:08	No I do not	All of the above – we should not pay for government blunders	NERSA is a regulating body, but they have not fulfilled that function for decades. It's a whole brotherhood thing between them and Eskom. Eskom and NERSA should not ask the citizens of this country for the 3 decade long failure. Eskom is not alone. Name one parastatal or government company that has run successfully of the past 30 years. NERSA should fulfill its function properly, and not be the big, bad Daddy who makes the citizens of this country pay for the brat's, Eskom, mistakes. The situation is laughable, to say the least. Anyone with common sense will tell you that their must be something underhanded going on if we the people continuously have to pay for Eskom's incompetence. The biggest joke is the massive payouts to board members every year. We hear these sad, sorry stories where Apartheid, THIRTY YEARS LATER!, is still blamed for incompetence, sabotage and fraud, but the next day millions are paid to board members?!?!?! That is one thing I could never understand. Just because some unintelligent people can be bought with lies, does not mean everyone can. I say HELL NO, Eskom should pucker up buttercup, and stop robbing the citizens of this country and pay for their own incompetence. Our economy is shot, regardless of what we are told and what NATO wants people to believe. It is, and has been for decades, a failed state. Most citizens can barely afford proper housing and enough food to eat, but we are expected to pay for stupid mistakes by a bunch of idiots? I would know, NERSA and Eskom have been clients of mine. I have seen toddlers with more brain capacity.	Jenny	Limpopo		self-employed

	2026-01-15 11:28:53	No I do not	All of the above – we should not pay for government blunders	Given to government incompetence, abuse, sabotage and corruption, South Africa went from of the world's cheapest energy producers in 1990 (R0.20/kWh) to over R2.20/kWh today. Inconceivably, consumers now pay more the more power they consume. Evidently scales of economy don't apply. Many if not most or in fact even close to all of the culprits responsible for this mess, are still roaming freely living their best lives. Not only are their actions responsible for this, but also for having taken a wrecking ball to the South African economy leaving citizens much worse off than ever before. And to think the very same officials are still in government today. No prosecution, no consequences, maleficence unchecked. On the contrary seemingly rewarded actually, hundreds of billions of Rands in taxpayer's money stolen and squandered. And still, consumers already crippled by ever higher overburdening electricity tariffs, are expected to cough up even more. Instead, government should instil effective efficiencies, reduce Eskom's bloated staff compliment, introduce cost cutting measures in pursuit to optimise and expand its coal fired power production fleet. Eskom should further be fully privatised and, rather than punishing innovative alternate energy solutions through untoward fees and taxes, promote and encourage its use instead, not just in industry but also within retail and residential consumption. The government will do well to pursue enabling policies that grow the economy, not those that feed a desperate glutinous monolithic impediment illogically clinging to self-preservation at any cost, wilfully forsaking the country in its wake. Only then, if consumers still need to pay more for their power which would be highly doubtful, should they be expected to do so. In closing it would be wise to remember that innovation and prosperity comes about when there is productive diligence emanating from valid opportunities. No country has ever generated wealth by increasingly overburdening its own people into abject poverty.	Everhards	Western Cape		self-employed
	2026-01-15 11:28:06	No I do not	All of the above – we should not pay for government blunders	1. The high level of incompetence personal at Eskom is the one of the biggest problem. 2. Stealing and corruption. 3. High salaries paid to personal - more than market value. 4. Eskom needs collet all outstanding monies from the respective municipalities - no exception at all. 5. Eskom needs to supply power directly to customer, as in the past - that system worked. 6. All no paying customers must pay the bills or be without power. If they break the law, lock them up, no exception. 7. ESKOM MUST/SHOULD HAVE AN INSURANCE POLICY WHICH THEY CAN PUT IN A CLAIM FOR THIS ERROR - THIS IS PROFESSIONAL INSURANCE, WHICH ALL PROFESSIONAL PERSON & COMPANIES ARE REQUIED TO HAVE TO DO BUSSINESS IN SA. SO THERE SHOULD BE EXCUSE FOR NOT PUTTING THE CLAIM, AS YOUR PROFESSIONAL SHOULD HAVE THIS COVER - WEATHER THE INSURANCE IS PAID FOR BY ESKOM OR BY THE EMPLOYEES OR CONTRACTORS. It time to stop pass the buck on to the end users. It is also long over due put the competent personal back on the job, NOT CLOUR BASE EMPOLYMENT.	Narre	Gauteng

	2026-01-15 10:49:26	No I do not	All of the above – we should not pay for government blunders	This is ridiculous. Those responsible for the "miscalculation" must be held accountable.	Niki	Western Cape		self-employed
	2026-01-15 10:48:33	No I do not	All of the above – we should not pay for government blunders	Eskom management should be held accountable. Their incompetence should not be rewarded. There have been many comments around Eskom regarding corruption, inflated costs, excessive salaries across all departments and employment levels. Evey time NERSA allows a tarrif increase we hear of above inflation salary increases and huge bonus. The board especially in my view is not entitled to any form of bonus. They earn too much already. Stories of corruption in accounts dept where bribes are needed to process payments on time etc. Time for another round of means testing. Just look at the car park. Its full of expensive luxury branded cars. How do they afford them ? Time to check Salary vs expenses. Then you can find the corrupt people.	Brad	Gauteng		retired
	2026-01-15 10:44:21	No I do not	All of the above – we should not pay for government blunders	You need only look at every State run organisation to realise that they are incompetent and unable to run an efficient organisation. I pay my taxes and rates but do not believe that state errors and inefficiencies should be passed onto the few people who pay taxes.	Rob	Western Cape		retired
	2026-01-15 10:36:01	No I do not	All of the above – we should not pay for government blunders	Eskom should learn that a sale is not a sale until it is PAID for. So in order to be successful and carry on with day to day business Eskom should collect all the outstanding money owed to them by everyone they supply to and this should be done now, immediately. Eskom keep suppling power to Municipalities who keep suppling to their customers without collecting payment and if they do they use that revenue to pay salaries, bonuses and wasteful expenditure but do not pay Eskom. This is very bad practice. The main reason is that Municipalities employ unqualified people to try and run a very important part of society. This is why our country is in such a bad state when you look at the poor condition of our infrastructure. So I am against any further electricity increases. COLLECT ALL OUTSTANDING MONEY AND STOP ILLIGAL CONNECTIONS NOW. You cannot expect paying citizens to just keep paying more and more to cover bad management decisions and any expansion plans by Eskom. They must get Government funding and stop bullying citizens to fund these plans. If any private business wants to expand they use their own profits or they secure finance from a Bank, they do not simply increase their prices and expect their clients to pay for their expansion plans. The citizens of South Africa are very tired of all these ridiculous increases, we already pay enough taxes. Our own income is not increasing to keep up with these increases. 	2026-01-15 09:18:56	No I do not	All of the above – we should not pay for government blunders	I have worked and paid my taxes diligently for over 30 years. I diligently pay my municipal accounts, without missing what I owe, for over 30 years. I am infuriated that now in a time of my life when the cost of living in South Africa is rising and my income is reduced, I am expected to pay for the corruption, mistakes and incompetence of the government and state owed entities. I say NO. Tax the taxi industry and use that revenue to fund the gaps in budget. The middle class can no longer support this country on it's own.	Kevin	Gauteng		
	2026-01-15 09:13:46	No I do not	All of the above – we should not pay for government blunders		Gonaspheri	Gauteng		
	2026-01-15 09:09:43	No I do not	All of the above – we should not pay for government blunders	We have to pay for Govt incompetence regarding Eskom , corruption , illegal connections etc. As pensioners ,we cannot afford these constant increases.	Fred	Western Cape		retired
	2026-01-15 09:02:46	No I do not	All of the above – we should not pay for government blunders		Lizette	Western Cape		retired
	2026-01-15 09:02:44	No I do not	All of the above – we should not pay for government blunders		Lizette	Western Cape		retired
	2026-01-15 09:02:41	No I do not	All of the above – we should not pay for government blunders	The people are already overtaxed and the cost of living is unbearable. Eskom have one job, at which they fail on the regular. NERSA have one job, at which they, too, have now failed. Electricity is unaffordable already. We, the people, cannot absorb another outrageous hike.	Deidre	KwaZulu-Natal		self-employed
	2026-01-15 08:51:30	No I do not	All of the above – we should not pay for government blunders	No other company or business gets to simply charge customers exorbitantly more when they are failing or running at a loss or needing more money. It is Nersa/Eskoms problem to try run a sustainable business with reasonable rates, consumers cannot simply be charged to death because of Nersa/Eskoms shortcomings and failings. South African consumers are being charged and taxed to death. We simply cannot and should not have to pay more for the same, if not worse, supply/service than before. Its madness, and unsustainable. Most South Africans, +-60-70% have had to get creative by generating sideline incomes, that means most of us are working two jobs to try and survive, thats not living or thriving. Eskom/Nersa failings are NOT our problem or responsibility to fund or fix.	Yolandi	Eastern Cape		employed individual

	2026-01-14 22:33:07	No I do not	All of the above – we should not pay for government blunders	Eskom & the government can not expect consumers to foot the bill for their gross negligence. A case that comes to mind is the flats built for kulisle for R800million that are not habitable. Why must we pay for that. Another example that is in the public domain are reports comparing the size of Eskom's workforce with comparable companies world wide. They state that Eskom has close to 20,000 (twenty thousand) more employees than industry standard. Why should we pay for those salaries & benefits. Another case is all the corruption that has not been stopped. A case hat comes to mind are the two employees that were charges with stealing R100milliom PER MONTH. Nowhere in the media did it state how many months this theft occurred. Those people got R5,000.00 (five thousand rand) bail. What a joke. And the additional R250BILLION debt relief that government gave eskom. Its beyond ludicrous. Eskom must decide what their core purpose is and follow that with transparency & zero tolerance for corruption and wasteful spending and excess employees. Clean your own house before asking for more taxpayer money.	Johnny	Gauteng

	2026-01-14 15:48:31	No I do not	All of the above – we should not pay for government blunders	Eskom needs to relook at the employees and their salaries and cut all unnecessary expenditure to give South African some sort of relief and fund maintenance and new infrastructure. We are tired of greedy individuals benefiting off the backs of the working class citizens of South Africa.	Leena			unemployed individual
	2026-01-14 15:37:34	No I do not	All of the above – we should not pay for government blunders	Why should we pay for government and ESKOM blunders. During the ANC's terms as the so-called leaders of South Africa, the incorporation of different government entities was used to make space for incompetent ANC cadres and voters. In the meantime, they destroy our economy and waste our taxmoney. The massive blunders took place under their management, and then they want the citizens to pay for their blunders. It is unacceptable that taxpayers are paying for their blunders and fee hikes. NERSA should not be given the direct assessment power to increase any municipality fees. NERSA. Neither should NERSA be funded by ESKOM. It allows for ESKOM to manipulate NERSA. Consistently bailing out a failing business reinforces the fact that there are no consequences for poor management, proper education and corruption. NERSA has no valid reason for approving yet another bail out when Eskom have consistently failed to do basic consistent maintenance, improvements and supply for the country as well as neighbouring countries who we supply power to. Give the money to another (perhaps private) company that will actually work for the people instead of stealing all the money and blaming apartheid that happened a generation ago. When the ANC took over running South Africa in 1994, they took over a country where everything worked. When you look at South Africa today, nothing works, The ANC has destroyed our country. What a disgrace. No South African Citizen should be held responsible for paying for their incompetence.	Martin	Mpumalanga		retired

	2026-01-17 15:43:51	No I do not	All of the above – we should not pay for government blunders	South Africans are battling to make ends meet. The consumer can not continue to keep paying to fix internal management errors, omissions, oversights and miscalculations. The consumer should not be expected to fit the ever increasing bill from a lack of maintenance and upkeep of infrastructure. Consumers should not be expected to cover Eskom's cash flow problems, construction delays and the ongoing blunders on their part. As we are paying consumers, Eskom has a responsibility to serve us and meet our demands – not treat us like their own personal ATM. Eskom has had more than enough time to weed out corruption and to fix their internal problems, now it is time for them to step up and do their job.	Mada	Gauteng		
	2026-01-17 15:42:10	No I do not	All of the above – we should not pay for government blunders	Most South Africans are struggling to keep up with the basic costs of living. The consumer can not be expected to continuously pay more and more to correct their internal management errors and NERSA's miscalculations. The consumer should not be expected to fit the ever increasing bill caused by the lack of maintenance and upkeep of infrastructure. Consumers should not be expected to cover Eskom's cash flow problems and construction delays that are caused by their incompetence and poor management. Consumers should not be faced with higher tariffs to cover Eskom's depreciations, returns or whatever internal omissions happen on their part. Eskom must serve the consumer and meet consumer needs – not continuously shake us down to compensate for their incompetence, negligence, corruption and greed.	Ludick	Western Cape

	2026-01-17 11:05:23	No I do not	All of the above – we should not pay for government blunders	Perhaps we should start by collecting money from every single illegally connected user. Those of us doing everything legally are the ones being punished. Those doing things illegally benefit off our punishment. Infrastructure is collapsing, yet we are continuously being charged more for poor to no service delivery due to pure corruption, mismanagement and misuse of funds. Someone makes a massive blunder and miscalculation and we are expected to cough up more money.	Jennifer	Gauteng		
	2026-01-17 10:38:10	No I do not	All of the above – we should not pay for government blunders	We are farmers, nobody pays us a salary, we work very hard for our money. We are unable to sell a single cow for who knows how long until they one day decide to lift the ban on trading because of foot and mouth, and the government who supposedly "control the disease" will not compensate us. They don't even have any more vaccine and what they did use has failed, our cows are re-infecting! We definitely don't have money to pay anybody for their incompetence and greed. We have to pay over R6000. 00 every month just for the privilage of having their transformer on our property, that is before we have used a cent of their electricity. I say a big definite NO!	Stanley	North West		self-employed
	2026-01-17 10:29:52	No I do not	All of the above – we should not pay for government blunders		Geneveve	Gauteng		employed individual
	2026-01-17 10:19:51	No I do not	All of the above – we should not pay for government blunders	Tired of and personallly cannot afford to keep paying Eskom for their mistakes and fraud.	Julie	Western Cape		
	2026-01-17 10:17:02	No I do not	All of the above – we should not pay for government blunders	We pay our taxes. We pay extra for security because our police force is not good enough to protect us. We keep paying more and more for water and electricity for failing infrastructure which has not been maintained as it should have. We keep paying and paying and then there are the corrupt leaders who keep spending this money on themselves. Enough is enough.	Annemarie	Gauteng		retired
	2026-01-17 09:33:54	No I do not	All of the above – we should not pay for government blunders		Cecilia	Gauteng		retired
	2026-01-17 09:19:44	No I do not	All of the above – we should not pay for government blunders	With no competition in the open market, we are suffering. This is not fair. Our taxes are paying for the every to get fixed. Then we have to pay again to use what we have just paid for. We are so over taxed. Eskom needs to be run to uplift the country not to put extra burden on the people. The people doing the work on the ground get paid to little, compared to the top heavy management. The price of electricity needs to be cut by 45% for households. Allowing people to improve their living standards. How can I buy my mother a new washing machine, if she cannot afford the electricity to run it. That includes all other house holds. Most older people are afraid to cook every day, due to electricity consumption. Having hot water to bath or shower in, is a luxury. So what happens if your choice is cooking food or ironing your school uniform? I want everyone in South Africa to have electricity in their homes. Not only the rich or government.	Nadine	Western Cape		retired

	2026-01-16 15:16:00	No I do not	All of the above – we should not pay for government blunders	Public Comment on NERSA Consultation Paper Eskom is entrusted with managing South Africa's energy system, and its executives are remunerated accordingly. When mistakes are made at this level, the consequences should not be transferred to the public. Forcing energy users to absorb an additional R76 billion for Eskom's failures entrenches a dangerous culture of impunity — one where accountability is absent, responsibility is diluted, and poor decision-making carries no personal consequence. If this approach continues, it will continue to be repeated. Accountability must begin at the top. Eskom's executive leadership should forfeit bonuses, incentives, and non-essential perks until the financial shortfall resulting from their decisions is rectified. Without meaningful consequences, there is no incentive for reform, prudence, or responsible governance. South Africans cannot be expected to continuously pay for institutional failures while those responsible remain insulated from the impact of their actions. This practice must come to an end. 	2026-01-18 07:01:47	No I do not	All of the above – we should not pay for government blunders	1. Beginsels van regulering: Foute mag nie op verbruikers afgewentel word nie In ’n gereguleerde omgewing soos die elektrisiteitsmark geld die beginsel van regulatoriese sekerheid en billikheid. Wanneer ’n gereguleerde entiteit foutiewe data voorlê, kan die koste van daardie foute nie agterna op verbruikers afgewentel word nie. Eskom het self erken dat die batewaardasie foutief was. Die Hooggeregshof het die herberekening beveel juis omdat die oorspronklike berekening gebrekkig was. Om nou verbruikers te laat betaal, neutraliseer die beskermende rol van NERSA en skep ’n gevaarlike presedent. Verbruikers mag nie as versekeringsmeganisme dien vir institusionele nalatigheid nie. 2. Verbruikers het reeds betaal op grond van foutiewe tariewe Eindverbruikers het reeds tariewe betaal wat gebaseer was op foutiewe inligting. Die tariewe is destyds goedgekeur deur NERSA op grond van Eskom se voorleggings. Indien die syfers verkeerd was, beteken dit verbruikers is moontlik reeds oor- of verkeerd gehef. Om nou nog R76 miljard te verhaal, lei tot dubbele benadeling van verbruikers. Dit is fundamenteel onbillik om verbruikers twee keer te laat betaal vir dieselfde fout. 3. Eskom dra professionele en fidusiêre verantwoordelikheid As staatsbeheerde nutsmaatskappy het Eskom ’n fidusiêre en professionele plig om: -Akkurate finansiële en bate-inligting te verskaf -Behoorlike interne beheer en ouditprosesse te hê -Betroubare data aan die regulator voor te lê Die feit dat ’n fout van R76 miljard nie vroeër geïdentifiseer is nie, dui op: -Sistemiese bestuurs- en beheerfoute -Gebrekkige toesig en interne kontroles In enige ander sektor sou sulke foute deur die entiteit self gedra word, nie deur kliënte nie. 4. Morele gevaar (moral hazard) As Eskom toegelaat word om hierdie fout van verbruikers te verhaal. Daar is geen aansporing vir akkuraatheid of finansiële dissipline nie Foute word bloot “oorgedra” na die publiek Regulering verloor geloofwaardigheid indien verkeerde gedrag nie finansiële gevolge het nie. 5. Eskom se strukturele en bestuursprobleme mag nie gesosialiseer word nie Die R76 miljard-fout moet in konteks gesien word van: -Jarelange wanbestuur -Oorprysde projekte (bv. Medupi en Kusile) -Onvolhoubare skuldvlakke -Onbetroubare dienslewering (beurtkrag) Verbruikers: -Het geen beheer oor Eskom se bestuursbesluite nie -Het reeds aansienlike tariefverhogings verduur -Ontvang nie ’n verbeterde diens in ruil vir hoër koste nie Dit is onregverdig om sistemiese mislukkings te “sosialiseer” deur tariefverhogings. 	2026-01-17 22:45:48	No I do not	All of the above – we should not pay for government blunders	It is absolutely unfair, unethical and absurd to pass the debt incurred by Eskom, onto tax paying citizens of South Africa. The ruling anc is responsible for all Eskom debt, due to their total incompetence in managing, and destroying, this once, world class SOE. Mismanagement and utter corruption, from within Eskom, and unchecked criminal activity destroyed Eskom. The criminal syndicates from within Eskom, and out, was not stopped nor was appropriate action taken by Eskom to stop or avoid the utter chaos. Government's lack of expanding the power utility, to absorb and provide for the growing population keeps being forced on tax paying citizens and the general population. Government, NERSA and Eskom itself is responsible for the shortfall and financial disaster that Eskom is facing, not the law-abiding citizens of SA. Cable and electricity theft, as well as municipalities not settling their Eskom debt should have been better policed and managed by Eskom. Thus, the massive debt incurred by Eskom is due to Eskom's own doing, not citizens. We, South African citizen can not afford electricity anymore and we can not definitely not afford any further increase/s in electricity. The cost of living in SA is out of control and all citizens are drowning in debt.	Martyn	Free State		employed individual

	2026-01-17 21:54:54	No I do not	All of the above – we should not pay for government blunders	It is imposdible for a handfull of South Africans to pay electricity bills and then everyone has access and municipalities are disfunctional.	Louisa	Western Cape		
	2026-01-17 21:54:29	No I do not	All of the above – we should not pay for government blunders	I think it is absurd that we need to pay, were people was voted in to parlement in all sections and then find not to have any or very little knowledges of the task at hand . It does not stop there then this elected person appointed again friends/family that do not have the qualifications to uphold, repair or even have the come sense to realise the technology is out dated it must be upgraded to save costs (in the long run) and to ensure in time that the service is rendered. Or as we all know the money is misused in most cases because of a lack due to miss management. Now all thou we pay our monthly bill we still need to pay more. This needs to stop. I'm a pensioner in my 80's my pension is paid in on the 6, on the 20 the office clerk calls and insists that my electricity will be cut if not paid by end of day. Were as some Departments is so far in arrears. In Afrikaans skree ten hemele.	Drienie	Gauteng		retired
	2026-01-17 21:54:11	No I do not	All of the above – we should not pay for government blunders		Izak	Limpopo		retired

	2026-01-17 21:47:12	No I do not	All of the above – we should not pay for government blunders	Its really not fair to burden the people with the non-compliance of worthless,incompetent staff that Escom employed over the past 30 years, but their greed just dont know where to acknowledge their mistakes. Unfortunately this wont change, because they refuse to acknowledge that their people just dont have what it takes to run a successful country. There is no space and jobs for white properly skilled employees, who work and strive for the benefit of all people in the country. Oh no...but you want to force this bill onto white citizens, for it will be us paying for your selfishness that you call democratic. Youre such a joke, really!!! We can not wait for the day your own turn against you and bring you down. Pay for your own rubbish, you were bailed out way to many times, its just not worth it anymore. This country is now stealing left,right and centre from citizens with all the fees, taxes, fixed rates for a preoaid box, for water meter, for street cleaning, while I must clean before my house every day, for 30 years nobody cleaned here, but you must pay for it. Ask the multiple black billionaires to bail you out yet again, they employed you there, not us.	Sarah	Western Cape		retired

	2026-01-17 21:41:48	No I do not	All of the above – we should not pay for government blunders	The State has the God given responsibility to provide a safe and functional society for its citizens to live and thrive in. The State is therefore there to serve its people, not the other way round. If the State cannot provide electricity at an affordable and sustainable way, then it should outsource this basic necessity to private companies. In a free-market system, any company's survival is dependent on it's ability to provide a quality product at the most affordable price, and these parameters are always dependent on good management and the necessary operational skills/knowledge. Due to the corruption culture of our ANC-led government, Eskom does not possess these two necessary qualities.	Kobus	Eastern Cape		self-employed
	2026-01-17 21:41:30	No I do not	All of the above – we should not pay for government blunders	We as consumers of electricity can not be held responsible for a budget deficit that is created by incompetent management.	Susan	Western Cape		retired

	2026-01-17 21:40:31	No I do not	All of the above – we should not pay for government blunders	Eskom was the pride of South Africa and has functioned well for decades. The problems faces by Eskom are of its own making. As it is a SOE this means the State is at fault. The population pays taxes to the state (in many forms) and expects the State to use these taxes in the best interest of the whole population of South Africa. Failures of the State are costing South Africa and South Africans dearly. We need to see plans for how expenditure will be brought back under control. Burdening the population of South Africa is not the answer. We need to see growth plans, not taxation and tarrif plans.	Johannes	Gauteng		employed individual

	2026-01-17 21:20:01	No I do not	All of the above – we should not pay for government blunders	I strongly oppose NERSA’s proposal to force energy users to pay an additional R76 billion to Eskom. Consumers should not be held financially responsible for Eskom’s historical mismanagement, inefficiencies, and failure to maintain infrastructure. These proposed charges are excessive, unfair, and amount to penalising the public for institutional mistakes. Any upgrades to ageing infrastructure must be funded through improved governance, cost control, and accountability within Eskom—not by further burdening already struggling South African households and businesses.	Amanda	Limpopo		employed individual

	2026-01-17 18:13:48	No I do not	All of the above – we should not pay for government blunders	The proposed redetermination of Eskom's Generation RAB should not be supported because it undermines core regulatory principles and creates a material risk of undue compensation. Eskom failed to comply with the MYPD methodology by not submitting an updated asset valuation (last done in 2020), yet this non-compliance is not meaningfully penalised and instead results in assumptions that favour Eskom. The approach also absorbs cost overruns and project delays into the RAB without adequate proof that such costs were efficient and prudent, contradicting the cost-of-service framework and the requirement that only an efficient licensee may recover full costs. Furthermore, the process sets a dangerous regulatory precedent, where litigation and settlement pressure effectively reshape tariff decisions, weakening NERSA's independence and regulatory certainty. Finally, the expedited consultation process, even if court-driven, limits meaningful stakeholder participation, while the financial burden is ultimately transferred to electricity consumers. For these reasons, the redetermination is not in the public interest and should not be supported.	Schalk	Gauteng		self-employed

	2026-01-17 17:51:47	No I do not	All of the above – we should not pay for government blunders	Dear NERSA, I am writing to formally submit my objection to the proposed recalculation that could lead to a 10.5% electricity hike for 2026. This increase is unfair and places an impossible burden on South African households and businesses for the following reasons: Consumers Should Not Pay for Regulatory Errors: NERSA's admission of "calculation errors" regarding Eskom's assets should not result in a R76 billion penalty for the public. It is unjust to expect citizens to pay for administrative mistakes made by the regulator. Lack of Affordability: With the high cost of living, many households are already struggling to keep the lights on. An increase nearly double the previous projection of 5.4% is unsustainable and will push more families into energy poverty. Economic Impact: Small businesses and industries cannot absorb these rising costs. This hike will lead to higher prices for basic goods and services, further damaging our fragile economy. Failure to Comply with Court Rulings: Recent High Court decisions have highlighted that tariff determinations must be based on actual cost-of-supply studies. Approving this hike without such data is a failure of NERSA's mandate to protect the consumer. I urge NERSA to reject this redetermination and find alternative ways to address Eskom's financial needs that do not involve further punishing the South African consumer. 	2026-01-18 09:19:48	No I do not	All of the above – we should not pay for government blunders	It is not my fault that Eskom cannot manage infrastructure and do maintenance on their power stations before machinery becomes faulty. I see on social media that good quality coal is exported to other countries in Africa and then we are left with not enough coal to generate electricity for our own needs. One of the learners in my class told me that a person came to their house one day and asked if they want to pay for electricity. Of course, her parents replied no. I believe that a large part of Soweto and other black townships are not paying for electricity and now Nersa wants to punish those who are honest and who pay their electricity bill every month. That is not fair!	Joey	Gauteng		retired
	2026-01-18 09:19:41	No I do not	All of the above – we should not pay for government blunders	Electricity has risen at ridiculous and unsustainable amounts and this is not manageable for consumers. We can't keep absorbing these rapidly increasing costs. Better management of funds is essential.	Aimée	Gauteng		self-employed
	2026-01-18 09:19:37	No I do not	All of the above – we should not pay for government blunders	South Africans already pay a higher price for electricity than we should be. Most of this increased cost stems from the corruption, theft, incompetence and lack of maintenance by Eskom over decades. Allowing this massive amount to be recouped from electricity users is unconscionable and, if allowed, would simply set a president for for recovery of any further shortfalls and unplanned expenditure as the easy way out. Stop the corruption completely, recover money from those that indulged in the Eskom plunder and prosecute the culprits.	Ian	Eastern Cape		self-employed
	2026-01-18 09:19:34	No I do not	All of the above – we should not pay for government blunders	Cape Exist is answer. we do not want the ANC's Dept.. We can build another Koeberg power generator in Cape and sell power to South Africa..	Ivan	Western Cape		retired
	2026-01-18 09:19:19	No I do not	All of the above – we should not pay for government blunders	Persoonlik voel ek hul neem gladnie die publiek in ag nie. Hul kan so baie opsies gee bv solar op huise wat terug druk in die grid,solarplase. Lyk of alles net gaan om hulself te bevoordeel en as die regte plan wat almal kan help opkom word dit weg gewys. Vat die operasionele en kyk wat se ander strukture gaan help	Ryno	Gauteng		self-employed

	2026-01-18 08:58:07	No I do not	All of the above – we should not pay for government blunders	Dear Sir/Madam, I am submitting this comment as part of NERSA's public participation process. 1. Affordability: I cannot afford further electricity price increases. Consumers should not be expected to pay for NERSA's calculation errors or Eskom's past financial mistakes. With the rising cost of living, higher tariffs place an unbearable burden on households. 2. Reliability: It is unreasonable to expect consumers to pay full prices for aging and unreliable infrastructure. Ongoing load shedding and frequent outages mean the service does not justify higher costs. 3. Efficiency: Consumers should not be required to fund Eskom's cash flow problems, inefficiencies, or construction delays. These costs should be addressed through improved governance, accountability, and operational efficiency—not passed on to the public. Electricity is a basic necessity, and further increases will negatively impact households, small businesses, and the broader economy. Yours sincerely, Lesiba Mashishi	Lesiba	Gauteng		employed individual

	2026-01-18 08:29:00	No I do not	All of the above – we should not pay for government blunders	As a pensioner I am already fully stretched financially. At the age of 75, I am already taking on part-time work just to survive paying my bills and putting some food on the table. My pension is my only income. Expecting me to pay for Eskom's errors is frankly ridiculous. One does not make an error to the tune of R76 billion. That is gross negligence. Living in Johannesburg, we are already facing constant power failures because the infrastructure is falling apart. Again that is due to gross negligence and the equipment should have been properly maintained and constantly upgraded when necessary. No wonder more and more people are opting to put in solar panels etc. in order to get off the grid. Government have brought this problem on themselves and now expect the people that 'do' pay for electricity to foot an even greater bill. Shame on you!	David	Gauteng		retired
	2026-01-18 08:28:46	No I do not	All of the above – we should not pay for government blunders	The persons that has taken that wrong disition, should pay for their mistake, that will learn them to be more carefull in the future.	Johannes	Gauteng		retired
	2026-01-18 08:28:36	No I do not	All of the above – we should not pay for government blunders		Mark	Gauteng		retired
	2026-01-18 08:28:03	No I do not	All of the above – we should not pay for government blunders	I believe people should pay for their mistakes. Especially, when, ones of this magnitude, point to incompetence and carelessness. If you are not competent to do a job, you should not take it. By the same token, one should not appoint untrained and/or incompetent people to do the job. All those involved in this debacle should be paying. Not the public who is already paying hugely for electricity. Not the public who would then be asked to pay for upgrades, once they finally realise that our ageing infrastructure will probably plunge us back into rolling blackouts.	Loredana	Gauteng		
	2026-01-18 08:27:56	No I do not	All of the above – we should not pay for government blunders		Corné	Northern Cape		
	2026-01-18 08:27:43	No I do not	All of the above – we should not pay for government blunders	76B is not a "mistake".... 76k could be seen as a calculation error. No, this is incompetence at the highest level. Get rid of the inflated workforce and corruption then Eskom will flourish again like it did pre-1994	Werner	KwaZulu-Natal		
	2026-01-18 08:27:40	No I do not	All of the above – we should not pay for government blunders	Discovery made a big mistake and wanted their clients to pay. After a huge outcry, they realised they cannot make the client pay for their mistakes. ESKOM SHOULD NOT MAKE US PAY FOR THEIR OWN MISTAKES.	Mari	Gauteng		unemployed individual
	2026-01-18 08:27:21	No I do not	All of the above – we should not pay for government blunders	It is high time the electricity system is privatised, the government is not capable of running the system unless you believe running it into the ground counts.	Maurice	KwaZulu-Natal		retired

	2026-01-18 08:16:08	No I do not	All of the above – we should not pay for government blunders	Depreciation is a bookkeeping exercise. Nersa has absolutely no idea how a business is run or how to read a balance sheet. They are confusing Profit and Loss with Capital Expenditure. If one follows NERSA's reasoning, they want to charge South Africans twice for capital development - once when the asset is financed from profits and interest on loans, that is the income regulated by Nersa. Then they want to charge consumers again for assets already paid for by consumers by charging for depreciation. Depreciation is a pure bookkeeping mechanism, no money changes hands, so there is nothing for Nersa to control. For goodness sake Eskom, Nersa and their incompetence have had a massive negative effect on South Africa's economy, its industrial production and employment. Why is it taking so long to split up this useless parastatal into its various elements so that the private sector can profitably supply power to the nation, at much lower cost than the bloated joke that is Escom.	Wendy	KwaZulu-Natal

	2026-01-18 11:19:24	No I do not	All of the above – we should not pay for government blunders	We can hardly afford to eat anymore, another tariff hike for someone else's mistake will make more south africans, who are already living below the breadline, suffer even more. Let the government grow a spine and take the responsibility that it owes to citizens.	Elize	Western Cape		retired
	2026-01-18 11:19:22	No I do not	All of the above – we should not pay for government blunders	Always the same problems with Government. Lack of maintenance, underperformance, no infrastructure, no concern. It's time for Government to face reality and fix their bugger ups at their cost. Take a look at how many millions spent by Government on travelling costs alone, and they don't give a damn for this country. So screw them	Morne	Gauteng		employed individual
	2026-01-18 11:19:11	No I do not	All of the above – we should not pay for government blunders	Eskom needs proper management that must take responsibility and accountability for their actions. They need oversight on tariffs paid on items. They need people with integrity. They need a smaller workforce that is dedicated. Too many people not necessary. Eskom must be held accountable for their own mistakes. They do whatever they like without any implications to them and the taxpayer must bear the consequences. Eskom must do proper maintenance on their equipment, so that they don't need to repair the same thing every time. Eskom must be monitored on tenders and the escalating cost of it, not keeping to the project plans. ending up with paying millions more than what was necessary. Eskom must plan better not changing the scope and requirements of a project during it, costing millions more on numerous changes, also for the taxpayers pocket. When there is no responsibility and accountability in a business, it looks and behave like Eskom.	Walter	Gauteng		
	2026-01-18 11:18:49	No I do not	All of the above – we should not pay for government blunders	We are tired of picking up the bill for gross incompetence. Appoint competent people and serve the country the way you should.	Maria	Western Cape		self-employed

	2026-01-18 10:53:51	No I do not	All of the above – we should not pay for government blunders	This should be recovered from Government as we the taxpayer are already over stretched and the Government wastes our money on salaries for them selves plus giving the a four and half I am fed up with the corruption and stealing	Ken	Gauteng		
	2026-01-18 10:52:09	No I do not	All of the above – we should not pay for government blunders	Why must we keep paying for incompetence. And yet bonuses are paid regardless .	Pat	KwaZulu-Natal		retired
	2026-01-18 10:51:57	No I do not	All of the above – we should not pay for government blunders	Eskom is effectively a business. It should operate on normal business principles. In effect, proper planning for today and for the future is necessary. Today needs to be managed properly so that tomorrow can follow suit. Budgets need to be managed. Fraud needs to be eliminated. Construction costs and timelines need to be effective and managed so that cost over-runs are limited and projects are completed on time. Repairs and maintenance as well as infrastructure planning need to be costed and planned for and not seen as a big surprise when something wears out. Expenses need to be managed and reported on monthly so that a problem today is not discovered for the first time a year later at financial year end. Eskom needs to have people fit for purpose and needs to be a meritocracy. CURRENTLY ESKOM IS BEING MISMANAGED AND REWARDS INCOMPETENCE AND FAILURE. Get rid of those who cannot or will not and put people in who can make things work. Power generation and sufficiency are at the centre of any healthy economy. Look at Chine and their power generation and supply.... it factors in growth of population and industry and China is an economic powerhouse. Look at Europe which has lost a huge amount of energy and power generation and see what effect this has had both on their future and their economy. What was recently an industrial and economic European powerhouse is fading fast, primarily because of power and energy supply problems they have got themselves into. Can we not learn from China and Germany? Probably not. Eskom has always been allowed to carry on screwing up and making the public pay for the mess and this is likely to continue until South Africa is a proper banana republic and beyond redemption. Its cheaper to look after what you have than to let what you have break so you have to replace it with new every time. Get some heavy hitter Chinese energy experts in on a 2 year contract and let them fix Eskom, then we need to find effective South Africans to manage things going forward. If South Africa cannot fix the current problem, then someone else has to.	Graham	Gauteng		retired

	2026-01-18 10:36:07	No I do not	All of the above – we should not pay for government blunders	Those responsible should bear any costs for their blunders nobody else	Kenneth	KwaZulu -Natal		retired
	2026-01-18 10:34:53	No I do not	All of the above – we should not pay for government blunders		Amanda	Western Cape		retired
	2026-01-18 10:34:07	No I do not	All of the above – we should not pay for government blunders		Leon	Western Cape		employed individual
	2026-01-18 10:34:02	No I do not	All of the above – we should not pay for government blunders	Eskom has been mismanaged for several decades with a bloated staff structure, multiple costly, failed, developments and not delivering on their mandate to maintain it's infrastructure. This gross mismanagement of its funding should not be burdened on consumers who will be faced with inflation as producers shift the increased costs of electricity to consumers. Thus consumers pay this increase and the indirect increases on groceries etc. Eskom must engage with other option providers and seek alternative solutions.	Lizelle	Gauteng		employed individual
	2026-01-18 10:32:48	No I do not	All of the above – we should not pay for government blunders	It is high time that incompetent, unqualified, fat cat staff are booted out of their positions. The South African public cannot continue to foot the bill. Eskom needs to be privatised. The proposed increases are unaffordable.	Anne	Western Cape		retired

	2026-01-18 10:32:42	No I do not	All of the above – we should not pay for government blunders	It's day light robbery and there is already 50% unemployment in this country. Widows like me just scrape through the month and at times get behind on what I have to do or pay if there are extra expenses. This is against our human rights to make public pay for government mistakes. The government has to pay for their own mistakes.	Lynette	Eastern Cape		unemployed individual
	2026-01-18 10:32:18	No I do not	All of the above – we should not pay for government blunders		Daniel	Gauteng		retired
	2026-01-18 10:31:44	No I do not	All of the above – we should not pay for government blunders	Our living cost are too high already. Eskom's mistakes cannot be hidden, they need to come to light and Eskom needs to take accountability and solve it themselves without making it the public's problem. The responsible people must be punished. Furthermore, infrastructure and electricity supply is so unreliable, why must the public pay exorbitant fees for this? No.	Eloise	Gauteng		employed individual
	2026-01-18 10:31:18	No I do not	All of the above – we should not pay for government blunders	The consumers of electricity should not pay for corruption and mismanagement of ESCOM funds. There were different ways that money was embezzled from ESCOM and now the electricity prizes are just raised and we as poor customers are expected to just pay for the mistakes of millionaires. I think Nersa should be replaced by some other governing body that would make sure income to ESCOM are used to enhance the service and keep the price of electricity affordable for everyone.	Jan Hendrik	Northern Cape		retired
	2026-01-18 10:31:00	No I do not	All of the above – we should not pay for government blunders	Eskom failed. Incompetent, Mismanaged, and Unreliable. South Africans pay for electricity, not tariff increases, damaged infrastructure, or failing projects; Eskom is obligated to provide a service to South Africans, not hold us accountable. Remove those responsible, privatize electricity, release South Africans from Eskom's burdens.	Wernard	Gauteng		unemployed individual
	2026-01-18 10:30:59	No I do not	All of the above – we should not pay for government blunders		Anthea	Eastern Cape		retired
	2026-01-18 10:29:43	No I do not	All of the above – we should not pay for government blunders	Poor planning and management have changed electricity costs in South Africa from being low , affordable and fully supportive of industry, commerce and households to bring so high that it's now crippling businesses and individual bread winners. This MUST CHANGE QUICKLY if everyone in South Africa is expecting reasonable cost of living, employment and obviously, a better life for all.	Nazir	KwaZulu-Natal		retired
	2026-01-18 10:29:30	No I do not	All of the above – we should not pay for government blunders	The fact that corruption & BEE exist means the funds will and have never been correctly spent where it matters. To keep the infrastructure well maintained remains vital. Poor management and ideologies are not acceptable. ESKOM was a well-run entity deliberately plundered for the benefit of the elite so no longer a need to fund that 'feeding trough'	Ben	KwaZulu-Natal		retired

	2026-01-18 14:51:45	No I do not	All of the above – we should not pay for government blunders	Eskom must recover all the funds due to corruption first get the money that Zuma and the Guptas stole causing the collapse of Eskom. Once all funds have been recovered we will probably pay less for electriicity. We already pay too much for electricity, all parlimentarians must pay for electricity and all the illegal connections must be removed.	NICKY	Western Cape		
	2026-01-18 14:51:31	No I do not	All of the above – we should not pay for government blunders		Louis-John	Mpumal anga		business owner
	2026-01-18 14:51:10	No I do not	All of the above – we should not pay for government blunders	Most definitely NOT. The incompetent people at Eskom and Nersa must sort out their own mess - it's called ACCOUNTABILITY!!!	Adrian	Western Cape		
	2026-01-18 14:51:06	No I do not	All of the above – we should not pay for government blunders	We are already cash strapped. Your mistake you sort it out. Decrease the workforce and pay them less. I get paid less with a 4 year degree and 30 years experience	Mary	Western Cape		self-employed
	2026-01-18 14:50:53	No I do not	All of the above – we should not pay for government blunders	It is unacceptable that the burden of Eskom's faults should be laid on the shoulders of those of us who are barely making ends meet any way. What happened to ACCOUNTABILITY, TRANSPARENCY, RESPONSIBILITY.	JR	Western Cape		
	2026-01-18 14:50:42	No I do not	All of the above – we should not pay for government blunders	It's absurd that the public should continue paying for their errors and incompetence. Eskom are shooting themselves in the foot! Citizens, businesses, companies, and even municipalities are moving away from Eskom [wind, solar] as a result of less financial input. It is like a never-ending cycle: charge users more to cover the losses, resulting in more pulling out. There is only one way out: Eskom must go private [like Transnet] and subdivide its areas [power lines, grids, etc.]. Solar is getting cheaper and cheaper as well as more advanced. Plus, if they stopped being so incompetent and inefficient, then they themselves would mitigate all the losses.	SONYA	Gauteng		self-employed
	2026-01-18 14:49:48	No I do not	All of the above – we should not pay for government blunders		C	Gauteng		self-employed
	2026-01-18 14:49:08	No I do not	All of the above – we should not pay for government blunders	Eskom has been mismanaged for so long by government and their cronies! The Guptas and many more ANC trough feeders - fraudulent deals, sabotage and lack of management have led to this situation! We, the people, are tired of carrying this top heavy economy. Retrieve the stolen funds to cover the debts!	Sharon	Eastern Cape		business owner
	2026-01-18 14:49:00	No I do not	All of the above – we should not pay for government blunders		Dev	KwaZulu -Natal		unemployed individual
	2026-01-18 14:48:54	No I do not	All of the above – we should not pay for government blunders	Absolutely ludicrous! Every time this government makes a mistake - and this a BIG one- the people must foot the bill! With the ever-increasing rise in living costs, how are the poor and vulnerable going to survive or do these entitled officials only think of themselves? We are not all in the privileged position to fork out money at their beck and call. The people of this country and their needs come first - something that has not happened in many, many years.	Jenny	Western Cape		retired

	2026-01-18 14:29:56	No I do not	All of the above – we should not pay for government blunders	Eskom keeps bragging about how many days we have been free of load shedding and how since Andre de Ruyter resigned thinks suddenly came right. De Ruyter was the one who implemented the maintenance schedule and exposed the corruption and incompetence within the organisation in collusion with external suppliers/contractors as well as senior ANC cadres. If he had not had his time with Eskom to shake things up nothing would have changed. Let's also not forget the role played by the partisan and obstructive Gwede Mantashe who should have been put out to pasture a long time ago. Eskom is still carrying so many ill-suited, overpaid staff and is still so inefficient and wasteful that the organisation will just continue to consume ever increasing amount of money to compensate for the rot, the incompetence and the malfeasance. If there was sufficient sunshine where I live to may PV viable I would have exited the grid a long time ago. My goal is to find ways to avoid any form of reliance on the government who are utterly unfit for purpose. The ANC deployees throughout government and predominantly only interested in what they can get out of it.	Bradley	Western Cape		self-employed
	2026-01-18 14:29:50	No I do not	All of the above – we should not pay for government blunders		Zayne	Western Cape		employed individual
	2026-01-18 14:29:36	No I do not	All of the above – we should not pay for government blunders	Eskom is not viable. Investmenty in privately owned coal fired generation and modular nuclear generation is necessary.	Russell	Gauteng		self-employed

	2026-01-18 14:00:36	No I do not	All of the above – we should not pay for government blunders	Eskom, for many years, received an electricity price increase many times that of the official inflation rate, while my salary, and now my pension, only increased yearly by the official inflation rate. Therefore, if Eskom managed its business affairs in a responsible way by performing proper infrastructure planning, maintenance, routing out corruption, and appointing competent people through these years, it would have been well on the way to recovery and a world class utility as it used to be. Even though Eskom is a state owned company it MUST be run as a private entity in order to enforce sticking to budgets and holding people accountable for their actions. Had it not been for Eskom's incompetence and large scale corruption , especially at the new built power stations, the electricity price would have been much lower, and South Africa would have had a stable reliable electricity supply. I therfore do NO support ANY electricity price increase above the official inflation rate!	Jan	Western Cape		retired

	2026-01-18 13:32:15	No I do not	All of the above – we should not pay for government blunders	For the last 20 years at least Eskom has been submerged by corruption which has escalated the running costs which the consumer has paid for by NERSA escalating the price of Eskoms product, namely electricity. The consumer simply cannot continue down this road and have already shown their preference for cheaper renewable electricity. Companies and consumers who can afford it have left Eskom as customers. It is now only those consumers who cannot afford to install solar panels, the poor and the elderly, who are left having to pay the rising, and simply unaffordable price of electricity. How has this state of affairs come about? As a direct result of the ANC's Marxist belief that is itself the direct result of the collapse of the Russian economy. Even the China realised the source of the problem before it was too late. When will the ANC wake up? Only after the final collapse of Eskom, once the finest electricity producing complex in the world.	Patrick	Western Cape		
	2026-01-18 13:31:43	No I do not	All of the above – we should not pay for government blunders	We as pensioners can bearly make ends meat. We cannot bear any extra payments. They can use the money for the enormes bonuses that they gave to settle their mistakes	Hendrina	Gauteng		retired

	2026-01-18 13:28:37	No I do not	All of the above – we should not pay for government blunders	As South African citizens, we should not be expected to bear the financial burden of errors made by Eskom and regulatory bodies in their own calculations and decision-making processes. The reported R76 billion mistake arose from internal miscalculations regarding asset values, depreciation, and returns—issues that were entirely within Eskom and NERSA’s control. Passing this cost on to consumers undermines accountability and sets a dangerous precedent where institutional failures are routinely absorbed by the public. South Africans are already under severe financial pressure due to rising food prices, fuel costs, unemployment, and stagnant wage growth. Electricity tariffs have increased consistently over the years, despite ongoing load shedding, unreliable supply, and aging infrastructure. Asking consumers to pay more for electricity that is neither reliable nor efficiently delivered is fundamentally unfair and economically unsustainable. Furthermore, consumers should not be required to fund inefficiencies, construction delays, or cash flow problems that stem from mismanagement and poor governance. Affordability, reliability, and efficiency must be central to any tariff determination. Electricity is an essential service, and pricing decisions should protect citizens—especially low- and middle-income households—from further financial strain. In conclusion, Eskom’s calculation errors should be addressed internally through improved governance, accountability, and cost containment, not by shifting the burden onto citizens who are already struggling to make ends meet. 	2026-01-18 13:20:51	No I do not	All of the above – we should not pay for government blunders	Government and its employees is filled with corruption and mafia in various sectors. Why must we pay the price fir incompetence and corruption. Employees not doing their jobs must be held legally and financially accountable. The money stolen and lost due to error by incompetent and dishonest staff must be recovered by eskom and municipality staff . NOT THE PUBLIC! Every Eskom comes up with excuses and NERSA supports Eskom where the consumer/public/ ordinary citzens pay the price. Enough. If Nersa can't hold Eskom and munucipality accountable and gives Eskom the approval, next elections vote out the incompetenant government. We do not believe the lames excuses and had enough of these lies and corruption! Hold the necessary government, and Eskom and municipal and its employees criminally and civilly accountable. Recover the money from the individuals that have robbed the country and its people.	Farhana	Gauteng		unemployed individual

	2026-01-18 13:15:23	No I do not	All of the above – we should not pay for government blunders	I hereby submit a formal objection to the proposed electricity tariff increase. 1. Consumers should not pay for regulatory or institutional errors The proposed recovery of costs resulting from a valuation error sets a dangerous precedent. South African electricity users—households, small businesses, and industry—did not cause this error and should not be expected to absorb its financial consequences. 2. Severe affordability impacts on poor and middle-income households Electricity prices in South Africa are already unaffordable for many households. • Low-income households will be forced to reduce basic consumption or revert to unsafe energy alternatives. • Middle-income households—already under severe pressure from rising food, fuel, transport, housing, and municipal costs—will experience further financial strain. This proposal would deepen energy poverty and inequality at a time when households have little remaining resilience. 3. Negative economic and social consequences Electricity is a foundational input into the economy. A sharp tariff increase will: • Increase the cost of living across the board, • Place additional pressure on small and medium enterprises, • Suppress economic activity and job creation, and • Exacerbate social stress and instability. These impacts extend far beyond Eskom's balance sheet and must be considered in the public interest. 4. Accelerated grid defection will harm Eskom in the medium term Ironically, approving this increase will make self-generation and rooftop solar significantly more attractive for middle- and higher-income households. This will: • Accelerate grid defection, • Reduce Eskom's future revenue base, and • Leave a shrinking pool of remaining customers—primarily poorer households—carrying an even greater cost burden. This outcome is counterproductive and structurally harmful to Eskom's long-term sustainability. 5. Alternative remedies must be pursued The appropriate response to a valuation error is institutional correction, not consumer punishment. Alternatives should include: • Phased or internal financial adjustments within Eskom, • Review of asset valuation and regulatory methodologies, • Governance and accountability measures to prevent recurrence, and • Cost containment and efficiency improvements	Jacques	Western Cape		employed individual

	2026-01-18 12:53:30	No I do not	All of the above – we should not pay for government blunders	Tarifs are high already and will effect the poorest of the poor and have an effect on the middle class person, who can because of all the high living costs, that is rising daily, making it harder to survive daily. The ministers are earning this massive salaries, they dont feel these increases and live this luxuary lifes, and the nation must pay for all their richness. Let them suffer by taking some if their salary to sponsor these rising costs.	Willie	Gauteng		
	2026-01-18 12:53:06	No I do not	All of the above – we should not pay for government blunders		Kenny	KwaZulu-Natal		self-employed
	2026-01-18 12:52:28	No I do not	All of the above – we should not pay for government blunders	The operational costs of ESCOM are way too high. One example is the labour cost for a bloated cadre employment corps. A thorough review will regain a portion of the so-called error. Secondly the demand for electricity is in constant decline as consumers seek alternative sources of electricity. Therefore they are constantly pricing themselves out of the market and another significant increase will accelerate the decline. The public can not be called upon to fund the widespread corruption past and present.	Nic	Gauteng		
	2026-01-18 12:52:16	No I do not	All of the above – we should not pay for government blunders		Tracy	KwaZulu-Natal		employed individual
	2026-01-18 12:52:05	No I do not	All of the above – we should not pay for government blunders	I consider the answer to this question is a no brainer and should be obvious. However, it seems nothing is obvious to NERSA or ESKOM. To any responsible, accountable and reputable entity the cost of such an error would be dealt with by the entity concerned without trying to "pass the buck" to its customers. Clearly these two entities do not subscribe to any of the values mentioned above. In addition, the extent of this error points to complete incompetence of their top management. Until such time as we have ethical, competent and accountable management leading these entities, South African consumers will forever continue to face surprises of this kind . I therefore reject any support for the paper published by NERSA. They must fund this shortfall out of their own pockets.	Nick	Eastern Cape		retired

	2026-01-18 11:47:14	No I do not	All of the above – we should not pay for government blunders	I will not be paying for NERSA and Eskom's R76 billion calculation mistake. We've all been hit hard enough by the rising cost of living, endless load shedding from aging and unreliable infrastructure, massive construction delays, and bailouts already funded by taxpayers—now we're expected to foot the bill for regulatory errors through higher tariffs covering omitted depreciation and returns on assets? This is unacceptable. The buck should stop with those responsible for the blunders, not hardworking South Africans already struggling to keep the lights on. I strongly oppose any pass-through of this R76 billion "adjustment" to consumers and urge NERSA to find alternative ways to absorb the shortfall or hold accountable those who caused it, rather than punishing ratepayers yet again. Enough is enough—consumers should not bear the cost of incompetence.	Jaco	Western Cape		unemployed individual

	2026-01-18 11:27:11	No I do not	All of the above – we should not pay for government blunders	Consumers are not responsible for Eskoms', the ANC's run SOE corruption, theft and mistakes and cannot be held at ransom to pay for their blatant mismanagement of this SOE. Combined with the EEA, the B-BBEEE which excludes whites and employs only their black skinned cadres, regardless of the merit of skills, and whom obviously do not have the knowledge or necessary skills to run a company such as Eskom, will only give the ANC access to more money to pocket and satisfy their personal greed and opportunity to commit further corruption, theft and destruction. No matter the amount of money thrown at this SOE, 1 year down the line, this money will have disappeared and the infrastructure deteriorated even further. I will not pay for this extravaganza and it's incompent leadership! Eskom must be privatized; sold to a legitimate international company, and NOT a company from China, Cuba, Iran, Russia or their other communist friends from EU, but a company from the West that has a reputable record and is managed by professionals. That NERSA can even suggest that the people (where mostly the Whites who is excluded from it's workforce) have to pay for this SOE, Eskom, with it's corrupt, incompetent leadership is ludicrous. I refuse to pay for this communist ANC partys' greed and gross negligence and mismanagement!	Veroshka	Gauteng		unemployed individual

	2026-01-18 17:07:12	No I do not	All of the above – we should not pay for government blunders	Eskom has the biggest cheek and arrogance I have ever seen! They pay themselves way above-average salaries and bonuses even if they fail to deliver. They should be closed down and privatised. This sitting cozy and expecting consumers to pay for their errors is absolutely unacceptable. In the real world 1) It would be an insurance claim 2) They would be fired for incompetence. Close them down, let them go and sit on their yachts somewhere. We the citizens are not their personal bankers. In any event, 'some' people have to put a levy of R250 on their pre-paid meters every month before they can register pre-paid electricity. That in itself is a rip-off. Now they want more? FIRE those responsible for the errors and put competent people in their places. But DON'T privatise Eskom to the corrupt existing ANC and their buddies. This is a deliberate move to force privatisation and years ago it was known already that 'they' wanted to break up Eskom into three units to be divvied up amongst companies they had already set up. Such greed added to the incompetence! They won't rest until they have stripped the country of all assets and run it into the ground. We are a Zimbabwe in the making and they think we don't realise what is going on. Just look at the Supercar parade a few weeks ago, sell those to cover the shortfall.	Ada	Gauteng		retired
	2026-01-18 17:07:07	No I do not	All of the above – we should not pay for government blunders	South African's can not afford prise increases. We are getting poorer and poorer. Nersa should have capable personal that us trustworthy	Mariana	Gauteng		retired

	2026-01-18 16:54:46	No I do not	All of the above – we should not pay for government blunders	Dear National Energy Regulator of South Africa (NERSA), I am writing to express strong opposition to the current consultation paper proposing that South African electricity consumers collectively pay an additional R76 billion to Eskom through higher tariffs to correct past regulatory miscalculations. While I understand that the High Court ordered a redetermination of Eskom's allowable revenue after procedural errors were identified, I do not support the approach of passing the full financial burden of these systemic mistakes onto electricity consumers — particularly households and small businesses that are already under severe economic strain. My key objections are as follows: 1. Consumers Should Not Pay for Regulatory Errors The starting premise of this consultation is a regulatory miscalculation in the Multi-Year Price Determination process that NERSA itself has admitted. It is unfair and inappropriate to expect consumers — especially low- and middle-income households — to subsidise mistakes in valuation methodology or internal governance. NERSA's internal controls and review processes should absorb such errors, not the public. 2. Electricity Affordability Is Already Under Strain South African households and businesses are facing a high cost of living and inflationary pressures. Any substantial tariff increase beyond existing inflation expectations will exacerbate economic hardship and reduce disposable income for necessities such as food, transportation, and healthcare. This harms the most vulnerable the most. 3. Lack of Transparency and Accountability The original settlement agreement with Eskom was concluded without adequate public engagement, and only came to light through external scrutiny. The lack of transparent methodology, open accounting, and clear justification for the escalation of the figure from R54 billion to R76 billion undermines public trust in the regulatory process. 4. Incentivising Inefficiency Is Counter-Productive Allowing Eskom to recover costs associated with aging infrastructure, work under construction, and operational cash flow deficits through higher tariffs without strong evidence of efficiency gains sends the wrong signal. Rather than encouraging better cost management, it risks cementing inefficiency and places an unfair burden on the consumer base. 5. Alternative Solutions Should Be Explored Instead of immediate tariff hikes, NERSA should consider other mechanisms such as: • Requiring Eskom to absorb part of the cost through improved operational performance; • Phasing in adjustments over a longer timeframe in line with affordability thresholds; • Exploring increased state support or targeted subsidies that do not disproportionately affect vulnerable households. For these reasons, I do not support the proposal as currently framed. I urge NERSA to revise the approach, prioritise transparent and accountable regulatory practice, and safeguard the economic wellbeing of all electricity consumers in South Africa	Jean	North West		business owner

	2026-01-18 16:37:30	No I do not	All of the above – we should not pay for government blunders	I have a friend that says, “if you’re dumb, you must bleed”. This is my feeling in this matter. NERSA’s calculation errors are not of my making. They should have appointed competent people who do not make errors counting up R76 billion. The reality is, if any citizen (except they are in government or have ties to the top) makes a mistake, say on his/her tax return, SARS will be all over you. No matter how small the amount. What exactly is the difference, except that these mistakes were made by possibly incompetent people who work in a government-protected environment. In any private institution, these people will be literally chased away, escorted out by security. Here, it’s fine. It’s just a R76 billion mistake, nothing to see here, moving on swiftly! Really!!! In the same vein, everyone (except the South African government) knows that infrastructure ages and needs to be replaced at some point. Enter stupidity and lack of foresight…no, not our government. They wait until it is far too late and then scramble to find a scapegoat on some reason why they are not to blame. Just as I said in the beginning, if you are dumb you must bleed! If you had any competence to speak of and basic morals and ethics, we would not be where we are eight now. In short, don’t make your incompetent stupidity my problem.	Marita	Gauteng		employed individual
	2026-01-18 16:37:18	No I do not	All of the above – we should not pay for government blunders	This is a disgusting proposal, why would Eskom come to the consumer, they didn't make the mistake, let those who did be answerable.	Kevin	Western Cape		
	2026-01-18 16:36:53	No I do not	All of the above – we should not pay for government blunders	All corrupt politicians should have their assets seized and jailed. The assets as well as all investments, pension monies of these corrupt politicians should offset this horrendous mistake. And there would probably be an excess which can be used to uplift the poor or pour the funds into the broken and crumbling infrastructure that this rotten government has left us with - under a completely new government.....Oh..... dream on girl!	Theresa	KwaZulu -Natal		retired

	2026-01-18 16:16:21	No I do not	All of the above – we should not pay for government blunders	As a compliant tax and rate payer, I have seen tax rates, property rates, electricity and water rates increase year on year with no real additional value back to the consumer, in fact the opposite (failing and worse services) - why should the payer have to contribute further to the service provider who has not used this ever increasing income properly? Or worse abused the income and used it for other purposes. I for one am tired (as a proud South African) of seeing our beautiful Country go to ruin - road infrastructure, electricity and water infrastructure and services generally just not being maintained despite these ever increasing costs to the consumer! It's time for change! If the Government and its Municipalities and agents like NERSA can't be held accountable or responsible for the purses of the public - then let the Private sector take over and we can demand service through market forces! Enough now!	Lynda	Gauteng		employed individual

	2026-01-18 16:07:30	No I do not	All of the above – we should not pay for government blunders	The reduced demand with reduced revenue was caused by Escom and our greedy government. They could not supply both the public and the governments pockets and chose the government above us, the public. No way are we going to pay more to help cover their inadequacies!!!!! Nersa needs to be investigate! All the signs are that they have no clue what they are doing and have been fleecing the public together with Escom and the current government for years but are protected as are the rest.	AJ	Western Cape		retired
	2026-01-18 16:07:04	No I do not	All of the above – we should not pay for government blunders	So much of our funds has been allegedly misappropriated or stolen, resulting in this mess. We can't plug a leaking boat.	Nicole	Western Cape		Non-profit
	2026-01-18 16:06:45	No I do not	All of the above – we should not pay for government blunders	I object to the proposed electricity price determination insofar as it seeks to recover historical regulatory and asset valuation errors from consumers. It is unreasonable and inequitable for electricity users to bear the cost of NERSA's acknowledged miscalculations and Eskom's historical inefficiencies through higher tariffs. Tariffs should reflect efficient, prudent costs and reliable service delivery, not retrospective corrections or cash-flow shortfalls. Consumers should not be required to pay full returns on aging, unreliable infrastructure or fund delays and cost overruns. I request that NERSA exclude recovery of historical calculation errors from the tariff determination and prioritise affordability, efficiency, and value for money.	Theron	Gauteng		employed individual

	2026-01-18 15:50:04	No I do not	All of the above – we should not pay for government blunders	I do not agree with the astronomical increases in the tariffs. It's amazing how every year Eskom wants huge increases to provide power to south African citizens and businesses. Yet they will export power to other countries. Also employees earn huge salaries which are unrealistic for our economy and then they have the cheek to demand salary increases every year while so many small businesses are collapsing or closed down because the cost of electricity has become unaffordable. Why must the same citizens pay for all the mistakes of incompetant Eskom/Government employees. Why doesn't Eskom collect from those areas that are not paying. Why must those who do pay be penalised into paying for those who don't pay. The infrastructure is unreliable now because of years of neglect. Now government wants us to pay for it virtually overnight. This is unacceptable. The citizens are not responsible for Eskom's poor cash flow - all the corruption that goes on is responsible for that.	Renell	KwaZulu -Natal		retired

	2026-01-18 19:31:57	No I do not	All of the above – we should not pay for government blunders	The public cannot and should not be forced to pay for government mistakes. We cannot afford the increasing costs!!	Elcke	Gauteng		employed individual
	2026-01-18 19:31:06	No I do not	All of the above – we should not pay for government blunders	Consumers should not be liable for the problems associated with the poor governance, misplaced capital outlay, & for the operational shortcomings at the utility company Eskom. The newly proposed tariffs will make it unaffordable for the ordinary person in the street to use electricity in this country, which already has high electricity fees. And businesses will also be negatively impacted causing them to raise the prices of their goods &/or services thereby causing their customers in turn to pay extra for those. So this is highly inflationary. The government should open up the electricity utility & generating industry to other companies, so as to bring in competition & to force down the high cost of electricity. Monopolies are largely inefficient & they do not necessarily aspire to increased productivity & reduced operational expenditure.	Ron	Gauteng		retired

	2026-01-18 18:14:03	No I do not	All of the above – we should not pay for government blunders	The whole ESKOM is one big blunder! First they have aging infrastructure that led to load-shedding. Consumers who could afford it then looked at alternative sources and have moved in that direction. This has led to a decrease in revenue. This is compounded by the fact that the poorer communities cannot afford these alternative sources and so are now the ones footing the bill! Keeping ESKOM as a parastatal entity has also led to corruption. Maybe the government should allow private companies to build nuclear power plants. They would lease the grid to deliver the power, and charge the user accordingly. ESKOM would lose its hold or be forced to employ sound business practice to stay in business!	Glen	KwaZulu -Natal		employed individual

	2026-01-18 18:06:34	No I do not	All of the above – we should not pay for government blunders	It is outrageous that the consumer should pay for internal management and leadership mistakes. This is an accounting and executive function - a Eskom Board of Directors responsibility, ultimately - it is an embarrassing and shameful lack of expertise and lack of professionalism. It is testament to people not doing their jobs properly and not being held accountable for mistakes - we see this over and over in the public sector. The consequences should be felt by Eskom's Board of Directors, its finance team, its auditors, and its managing executive team - directly by way of a diminution of their pay packages. It is wrong-headed to pass it on to consumers.	Marian	Gauteng		self-employed

	2026-01-18 17:56:50	No I do not	All of the above – we should not pay for government blunders	I strongly object to the proposed R76 billion revenue redetermination as it is financially unsustainable for the residential consumers of eThekwini. Since 2007, electricity tariffs in South Africa have increased by over 800%, far exceeding average household income growth. Residents in Durban face a unique double-burden: we must absorb Eskom's soaring bulk generation costs while simultaneously paying a significant municipal markup. This increase places South Africa's direct electricity price on par with the US and Japan, but when adjusted for Purchasing Power Parity (PPP), we already rank as the 4th least affordable in the G20. The average South African household currently needs to work approximately 11.3 days to pay for 1MWh of power, compared to just 0.8 days in the United States. Adding another R76 billion will accelerate the 'utility death spiral' as paying users, already at their financial limit, are forced off the grid, ultimately shrinking the revenue base and destabilising the local economy. As a pensioner, this situation is particularly distressing for me. These continual massive increases mean that my pension, with increases that are CPI based, cannot keep pace! I can't reduce consumption any more now. I have LEDs everywhere and I have reduced my consumption dramatically but electrical energy costs are still the major part of my monthly spending. These out of control increases must stop! Supporting Data Points: Tariff Increase vs. Inflation: From 2007 to 2024, electricity tariffs increased by 937%, while inflation was 155% over the same period, showing tariffs increased six times faster than inflation in real terms. Affordability Ranking (PPP): When accounting for the relative strength of currencies and purchasing power, South Africa's electricity is more expensive in relative terms than the raw per-kilowatt price suggests, ranking 100th out of 148 countries in a recent analysis. Working Days Comparison (per 1MWh): South Africa: ~11.3 days of work India : ~11.7 days of work United States : ~0.8 days of work Saudi Arabia : ~0.5 days of work Global Price Rank: South Africa is currently ranked as having the 7th most expensive residential electricity among G20 nations in direct USD terms.	Peter	KwaZulu-Natal		retired
	2026-01-18 17:56:46	No I do not	All of the above – we should not pay for government blunders	With all the corruption within government driven companies it's unfair to put the blame on the users that have got no say as to how they spend the money. We've had increase upon increase the last few years and still Eskom is investing in coal driven power plants and not looking at alternative cheaper green energy solutions. Unacceptable! 	2026-01-18 17:26:25	No I do not	All of the above – we should not pay for government blunders	Of course the consumer must pay for the actual cost of ANY product. And it makes sense that where the 'product' is a service like electricity, a part of the cost of the service must be maintenance of current infra-structure and an allocation towards a fund to build new infra-structure when it becomes needed. And yes, in an industry where supply planning can take 30 years to come online, these costs are a constant. In a business, these costs can typically be covered fairly by expanding the client base, reducing operating costs and streamlining operations (modernizing and updating processes), etc. What the consumer is NOT liable to pay for, are the blatant fraud, theft and corruption which have been taking place over the past 30-odd years and which are now forcefully coming home to roost. Where did the money for maintenance (which has always been calculated into the price) go? What happened to stores full of spare parts and specialized equipment? Why has so little significant maintenance been undertaken on existing assets for many, many years? Who has been held accountable for the disastrous overruns, tenderpreneurial and other graft and fraudulent expenses incurred at for example Medupi and Kusile? Or multiple 'green' energy failures and exorbitant costs which don't even reach the news. To mention but a few examples of terrible management which have brought us to the situation we are in today. These are the costs which are driving electricity prices into the unaffordable. And these are the costs which the consumer should NOT and cannot be expected to pay for any longer.	D	Gauteng

	2026-01-18 17:23:52	No I do not	All of the above – we should not pay for government blunders	I hereby submit a formal objection to Eskom's request that citizens be required to pay for the utility's R76 billion error. This request is fundamentally unjust, economically harmful, and contrary to the principles of accountability and good governance that should guide a public entity operating in a constitutional democracy. 1. Eskom's Losses Are the Result of Institutional Failure, Not Public Action The R76 billion in question did not arise from consumer misconduct, excessive demand, or unforeseen external shocks. It arose from Eskom's own failures, including poor planning, governance breakdowns, operational inefficiencies, and long-standing mismanagement. To compel the public to absorb the financial consequences of these failures is to transfer responsibility away from those who caused the harm and onto those who had no control over the decisions that led to it. 2. Citizens Are Already Overburdened South Africans are already paying a heavy price for Eskom's dysfunction through: * Repeated and above-inflation electricity tariff increases * The economic damage caused by load shedding * Job losses, business closures, and reduced investment * Additional private costs for generators, solar systems, and alternative energy sources Asking citizens to now cover a R76 billion shortfall amounts to double-payment for the same failures. 3. This Sets a Dangerous Precedent Approving this request would establish a precedent that public entities may externalise the cost of their mistakes without meaningful consequences. This undermines fiscal discipline, weakens incentives for reform, and erodes public trust in both Eskom and the regulatory process. Accountability requires that losses resulting from mismanagement be addressed through internal reform, cost containment, consequence management, and, where applicable, recovery from responsible parties — not through blanket recovery from the public. 4. The Economic Impact Will Be Severe Further electricity cost increases will: * Increase inflationary pressure * Reduce the competitiveness of South African businesses * Disproportionately harm low-income households * Slow economic recovery and growth At a time when the country urgently needs affordable and reliable energy to stimulate employment and development, this proposal moves in the opposite direction. 5. Alternatives Must Be Exhausted First Before any consideration is given to passing costs onto the public, Eskom should demonstrate: * Concrete and measurable reductions in wasteful expenditure * Enforcement of consequence management for past failures * Asset optimisation and efficiency improvements * Transparent governance reforms * A credible plan to prevent similar losses in the future Absent these measures, public cost recovery is neither reasonable nor justifiable. The public should not be treated as Eskom's financial backstop of last resort. Responsibility for a R76 billion mistake lies with the institution and those who governed it, not with citizens who already endure unreliable supply and rising costs. For these reasons, I strongly object to Eskom's request and urge the relevant authority to reject it in full.	Jacques	North West		employed individual

	2026-01-18 17:21:06	No I do not	All of the above – we should not pay for government blunders	RE: FORMAL PUBLIC SUBMISSION ON THE PROPOSED ELECTRICITY PRICE DETERMINATION I hereby submit this formal public comment in response to NERSA's call for public participation regarding the proposed electricity price determination arising from the recalculation of Eskom's Regulatory Asset Base. I acknowledge the importance of public participation as contemplated under Section 195 and Section 152 of the Constitution of the Republic of South Africa, 1996, which require transparency, accountability and responsiveness in public administration, as well as meaningful engagement with affected communities. 1. Affordability and Constitutional Obligations South Africa continues to face extremely high levels of unemployment, poverty and inequality. Households and businesses are already burdened by increasing taxation, fuel costs, food inflation and municipal service charges. In this context, transferring the financial consequences of regulatory calculation errors reported to amount to approximately R76 billion to consumers raises serious concerns regarding affordability and fairness. In terms of Section 27 and Section 26 of the Constitution, access to basic services, including electricity, must be progressively realised and must not be rendered inaccessible through unaffordable pricing structures. Consumers should not be required to bear the cost of institutional or regulatory errors, as this undermines public trust and constitutional protections. 2. Reliability, Value for Money and the Public Interest Electricity users continue to experience persistent load shedding, infrastructure failures and unreliable supply. Charging consumers full tariffs, inclusive of depreciation and returns on aging and underperforming infrastructure, raises questions of value for money and compliance with the Electricity Regulation Act, 2006, which requires pricing to be fair, reasonable and reflective of efficient service delivery. It is unreasonable and contrary to the public interest to impose additional financial burdens on consumers without corresponding improvements in reliability, quality and performance. 3. Efficiency, Governance, and Administrative Justice The proposal that consumers fund Eskom's cash flow challenges, construction delays and retrospective regulatory adjustments is inconsistent with the principles of efficiency and accountability set out in Section 195 of the Constitution and the Promotion of Administrative Justice Act, 2000 (PAJA). Administrative decisions must be lawful, reasonable and procedurally fair. Cost recovery mechanisms should not be used to remedy governance failures, planning inefficiencies, or regulatory oversights at the expense of the public particularly in a country where millions remain unemployed and dependent on affordable basic services for survival and economic participation. Conclusion I respectfully submit that: Consumers should not be held financially liable for regulatory or institutional calculation errors; Electricity tariffs must reflect reliability, efficiency and value for money; Any price determination must take into account South Africa's socio-economic realities, including unemployment, poverty and the cumulative tax burden on citizens. I urge NERSA to exercise its mandate independently, lawfully and in the best interests of the public, in line with constitutional principles and enabling legislation. 	2026-01-19 08:56:25	No I do not	All of the above – we should not pay for government blunders	Eskom's dire financial position and electricity costs in this country that are higher than almost everywhere else in the world when connection charges/ network fees levied by municipalities are also taken into account is NOT the customer's problem. Government has failed. SOEs are failing or have failed. Past malicious or fraudulent extraction of resources from SOEs are not to be covered by the customer on top of what a normal and fair economic charge would be. Covering depreciation costs on Medupi and Kusile when those costs are hugely inflated by fraud is also not the customer's problem. The cost of the asset that should be included in Nersa's calculations is the original budget or cost estimate - NOT the ballooned, inefficient and bloated cost in Eskom's asset register. This is the modern equivalent of highway robbery and cannot be tolerated. The South African population is already taxed to the eyeballs, battling under huge financial pressure (including not getting salary increases at work, or even being unable to find work) and cannot absorb yet another huge electricity increase because of some financial modeling or assumptions errors. Professionalism is lacking here. Eskom - pull up your socks and be rational. Or more people will permanently disconnect fully from the grid and your customer base will shrink even more. You are in a death spiral and these cost increases will just accelerate that process, not delay it.	Nichola	Gauteng		self-employed

	2026-01-19 08:44:37	No I do not	All of the above – we should not pay for government blunders	Nersa has approved price increases above inflation for a few years now. This still has not resolved any of the issues we have with the aging power facilities. Eskom is filled with corrupt practices and now NERSA is also making errors, which begs the question; how many errors have been made in their favour perhaps? There is not enough transparency and we, as the public cannot afford to pay for any of this any more. Find other ways to save money at the source. Stop making the public and businesses suffer more financially. It is not in the best interest for our economy to increase our electricity costs.	Yolanda	Gauteng		
	2026-01-19 08:44:25	No I do not	All of the above – we should not pay for government blunders	We as South Africans are sick and tiored of hearing about continues enept goverment making mistake after mistake and beside plundering the coffers of SA you now wnat to make us pay for another blunder. Hold the govt to account for a change. They have stolen trillions of rand more than enough to cover this stuff up. Ciril can start by giving the $8 Million dollars inb his couch as this happened under his watch and he is in ultimately accountable for every mistake that happens. Just as a CEO is held to account of any problems in a business. We already paying for all the freeloaders on the system millions written off because the ANC don't want to loose their voting base.	Anton	KwaZulu-Natal		employed individual
	2026-01-19 08:44:18	No I do not	All of the above – we should not pay for government blunders	To expect hard pressed electricity consumers to foot the bill for a financial blunder incurred by State Owned Enterprises, is preposterous to say the least and needs to be treated with the contempt it deserves. The onus for this blunder lies directly at the door of these SOE's who must resolve it themselves and not expect the consumer to bail them out yet AGAIN! A vociferous "NO" is the only answer here.	Rob	KwaZulu-Natal		retired
	2026-01-19 08:44:08	No I do not	All of the above – we should not pay for government blunders		pravin	KwaZulu-Natal		retired
	2026-01-19 08:44:08	No I do not	All of the above – we should not pay for government blunders	I am 71 years old and in all my life i have not see or experience such bad management and bad maintenance on all the Escom s equipment which is used on a daily bases to provide a service to SA citizens who is paying a lot for the services rendered. Stop sitting and or driving around without reason and start doing the work you are hired for.	Daan	Mpumalanga		retired
	2026-01-19 08:43:53	No I do not	All of the above – we should not pay for government blunders	Only English - met 'n Engelse vlag nogal! The fact that the "error" must have been the responsibility of a person or persons there must have been consequences which we never saw. The shortfall being expected to be paid by consumers is unfair. the consumer that pays regularly includes many that pay to the municipalities that do not pay Escom. This needs to be addressed. Responsible persons in the municipalities needs to be held responsible. The billions owed by municipalities, if paid, will also take care of the upkeep of infrastructure. The personnel cost of Escom also needs to be addressed.	Chris	Western Cape		retired
	2026-01-19 08:43:52	No I do not	All of the above – we should not pay for government blunders	There has been funds paid to Eskom before, and nothing has changed,so throwing in more money would be be a burden to the citizens, we had to find a way to supply ourselves with electricity, which costs alot, so now they saying, find your own electricity and pay us to do nothing again, while we still tax you further on the structures you already own and maintain all because we couldn't do our job.	Thasha	Gauteng

	2026-01-19 08:38:50	No I do not	All of the above – we should not pay for government blunders	The lack of planning for future requirements in electrical energy supply by both the Regulator and Eskom is not the fault of their customers. How could it be? Government has oversight of national assets and sets out capitalization policy. The poor decisions made and lack of action to address fundamental matters inside Eskom are not the concern of their customers. Fair and reasonable pricing for economic affordability is a key factor to consider. Outstanding debt isn't a normal paying customer problem but instead of cutting off non payers , existing consumers are loaded with carrying the debt by higher costs! That means crime pays! That is an unfair business practice and cannot continue. The current problem needs to be addressed by either cutting waste, eliminating criminal syndicates in procurement inside Eskom, privatizing assets to raise capital and borrowing from other sources but not trying to harm the fragile SA economy because someone didn't apply their minds adequately! No. The customer is not liable for corporate errors nor should bail out mistakes. Being a monopoly doesn't mean price gouging is acceptable. It's not.	John	Gauteng		self-employed

	2026-01-19 08:37:17	No I do not	All of the above – we should not pay for government blunders	I do not support this at all. As consumers, we already pay more than enough for electricity. Why is it always the public that has to carry the cost of Eskom and government failures? Stop taking money from the very people who keep this country running. Consumers are being squeezed while those at the top remain untouched. Eskom needs to stop using the public as a financial safety net. If more money is needed, it should come from the directors and executives who live comfortably, not from households already struggling to survive. The cost of living keeps rising while decision-makers sit in big houses with full tables, completely disconnected from the reality of unemployment, hunger, and homelessness. We have sacrificed enough. It’s time for those in power to take responsibility and give up their excess — not the people who can least afford it.	Wanda	Gauteng		self-employed
	2026-01-19 08:36:57	No I do not	All of the above – we should not pay for government blunders	Why should the consumer pay more for an aging infrastructure that is not maintained, for theft and inefficiency. It is totally unacceptable, enough is enough!!!!	Helen	KwaZulu-Natal		self-employed
	2026-01-19 08:36:45	No I do not	All of the above – we should not pay for government blunders	We are struggling to live day to day. We cannot afford necessities and the cost of living. 	2026-01-19 08:35:35	No I do not	All of the above – we should not pay for government blunders	The burden of accountability should lie on NERSA and Eskom for the 76B blunder. They must pay and not shift the burden to citizens.	Malesedi	North West		
	2026-01-19 08:35:17	No I do not	All of the above – we should not pay for government blunders	Saying yes this time around will open up the door for future unjustifiable price increases based simply on "Oh, we made a mistake". As an electricity consumer, we must pay a fair and equitable price for power, and not be expected to cover the cost of Eskom's gross inefficiencies and exorbitant cartel-driven raw material pricing structures. Enough is enough.	Rory	Gauteng		employed individual
	2026-01-19 08:35:13	No I do not	All of the above – we should not pay for government blunders	Eskom & Govt. need to take responsibility - for their mismanagement & corruption, and taken to task. We should not pay for their incompetence and hold those accountable.	Marco	Gauteng		business owner
	2026-01-19 08:35:11	No I do not	All of the above – we should not pay for government blunders	Eskom & Govt. need to take responsibility - for their mismanagement & corruption, and taken to task. We should not pay for their incompetence and hold those accountable.	Marco	Gauteng		business owner
	2026-01-19 08:35:11	No I do not	All of the above – we should not pay for government blunders	South Africans are struggling to survive. Have you looked around the cape flats? And the other poorer suburbs across SA? People barely have money for food , and this Eskom corruption and theft has been going on for YEARS !!! How much longer must WE pay for eskom and the governments corruption and negligence? This is too much. Why doesn't the government get back the money that was stolen in the previous administration and use that? What is happening here?	Nur	Western Cape		employed individual
	2026-01-19 08:35:08	No I do not	All of the above – we should not pay for government blunders		Adriaan	Mpumalanga		
	2026-01-19 08:35:05	No I do not	All of the above – we should not pay for government blunders	The Escom record has certainly proved itself to be unreliable, thieves ruled most of it's business and nothing was done about it, they keep making stupid mistakes as they are not qualified to do the job but are being employed at ridiculous salaries! Proved in the current blunder, yet again! Spend the money on solar power as it is far more efficient and reliable. Fit properties with the necessary infra-structure to become self-sufficient - it removes all these blunders! The owner then has to fund their own equipment which will ensure they keep it in good shape. All the maintenance, bribery and corruption will disappear! In Tswane we are being forced to pay ridiculous property rates to fund their schemes and constant "comrade business ventures"! Escom is known for the same behaviour! South Africa has gone back to the dark ages - wake-up and stop making stupid errors, expecting others to pay for it!	Riana	Gauteng		retired
	2026-01-19 08:34:48	No I do not	All of the above – we should not pay for government blunders	They need to be held accountable for an aging infrastructure, "silly" mistakes etc. You are being paid to do a job; do it properly.	Nicola	Gauteng		employed individual

	2026-01-19 08:12:14	No I do not	All of the above – we should not pay for government blunders	I do not see why we should be paying for the Government's blunders, Mismanagement and and Failed policies. Should all receiving power be paying for the electricity they received this would no ways be required.	JP	KwaZulu -Natal		
	2026-01-19 08:11:50	No I do not	All of the above – we should not pay for government blunders	Government owned companies have been beset by poor management allowing corruption and inefficiency. The public and users should not be punitively charged for their lack of controls, expensive mistakes and for allowing corruption to flourish.	David	Western Cape		
	2026-01-19 08:11:32	No I do not	All of the above – we should not pay for government blunders	The current tariff application and clawback application should be redone from the beginning using a different methodology. The formula for determining tariffs is old and outdated. Tariffs for electricity sales should be determined on the costs that would apply for a well run and efficient electricity supply company. Consumers should NOT be expected to carry the costs for fraud, theft and inefficiency in the electricity supply company. It is also completely illogical for Eskom to pay management staff bonuses while the company is running at a loss and has unresolved theft and fraud cases. Lastly the electricity supply company is accountable to the consumers, and should fully disclose or make available all relevant information and figures in annual reports and financial statements. This includes tariffs charged to preferential costumers such as smelters, bonuses paid to senior staff, details of procurement contract and prices.	Chris	Western Cape		business owner
	2026-01-19 08:11:18	No I do not	All of the above – we should not pay for government blunders		Muhammad	Gauteng		
	2026-01-19 08:11:13	No I do not	All of the above – we should not pay for government blunders	It is quite clear to any thinking South African that Eskom has given the run-around to South African Consumers for far too long. Calculation errors are not acceptable in any business, least of all one that is financed by the consumer and exists to provide a service to people who pay for it in good faith. South Africans can no longer foot the bill for Eskom and governmental blunders. I do not support the consultation paper as published by Nersa.	Candice	Gauteng		employed individual

	2026-01-19 08:02:07	No I do not	All of the above – we should not pay for government blunders	Passing the costs of mistakes onto consumers—often via increased VAT or higher service tariffs (e.g., electricity tariffs to cover R54 billion in, say, a regulatory blunder)—disproportionately affects the poor and middle class. When governments can pass costs to consumers through higher taxes or tariffs, they avoid the discipline of market competition, where poor performance leads to business failure, not bailouts. If government officials know that taxpayers will bail out any failed project or cover cost overruns (e.g., R521-billion bailed out for South African SOEs), there is no incentive to fix mismanagement, curb corruption, or improve performance. Forcing consumers to pay for government blunders is unfair because it removes the consequences for bad decision-making, rewards incompetence, and punishes citizens for the mistakes of those they have entrusted with public resources.	Piet	Gauteng		employed individual
	2026-01-19 08:02:06	No I do not	All of the above – we should not pay for government blunders		Arend	Limpopo		business owner

	2026-01-19 08:01:53	No I do not	All of the above – we should not pay for government blunders	The merest fact that the energy regulator Nersa's is planning to force South African energy users to pay Eskom an additional R76 BILLION for its mistakes is absurd and unacceptable. It is a financial ambush. Behind closed doors Eskom and Nersa got their numbers all wrong and instead of owning the error, they passed it upwards and now they are pushing it downwards onto the general public. Eskom claimed that it was shortchanged by over 100 Billion rands. Nersa admitted there was an error. But rather than coming clean, they negotiated in silence behind closed doors. They adjusted the figures in private and buried the consequences where they thought no one would notice. The result, a R76 Billion hole they now want filled through brutal electricity price hikes in 2026 and 2027. Hikes that will be far above inflation. This means that every loaf of bread will cost more, every taxi trip will cost more, every small business will bleed more and here's the scandal: The public was cut out completely, no warning, no hearings, no consent. It took a court to say stop. The judge found that the tariff numbers had no solid basis and forced Nersa to open public participation. That consultation is not transparency. It is damage control because hidden inside it is the truth, we are being billed for R76 billion rands. The ANC Minister and the parties in this government of so called National Unity did not trip and fall into this. They knew it and said NOTHING. And know they hope the deadline passes quietly. This is being rushed because all electricity tariffs must be approved by March 2026. Silence is their strategy, speed is their weapon. I am not willing to pay for anybody's mess. Cut the salaries of all your cadar friends and government vultures and fit the bills yourselves. I TOTALLY OBJECT TO THIS SCANDALOUS BEHAVIOUR.	Gerda	Western Cape		self-employed
	2026-01-19 08:01:51	No I do not	All of the above – we should not pay for government blunders	Any other business would have gone bankrupt a long time ago. Why should we have to constantly pay for Eskom's derilection of duty & incompetence.	Mandy	Gauteng		employed individual

	2026-01-19 07:59:52	No I do not	All of the above – we should not pay for government blunders	If Eskom is a business then it is critical that they keep their costs under control such that it can compete with other generation businesses. Costs include not just the fixed assets which the public paid for in advance but also payroll. Without a benchmark to compare it against, Eskom can invent whatever costs they want and pass it onto the consumer. At the same time they are blocking the entrance of competitors into the energy space.	David	Gauteng		business owner
	2026-01-19 07:59:51	No I do not	All of the above – we should not pay for government blunders	Nee, Ek steun nie die NERSA papier nie, Die publiek kan nie betaal vir ESKOM se omvermoë om hulle berekenings te doen nie. Onbillik om te verwag die publiek moet vir hulle foute betaal. Ons kan ook nie betaal vir hulle vertragings op die konstruksie nie, hulle moet meer koste effektief werk en bereken.	Cathelene	North West		business owner
	2026-01-19 07:59:49	No I do not	All of the above – we should not pay for government blunders	Consumers can no longer afford to pay for government blunders and corruption.	Adriaan	Gauteng		self-employed
	2026-01-19 07:59:38	No I do not	All of the above – we should not pay for government blunders	The judge in the high court case mentioned the R54 billion rand mistake as a "thumb suck"!! If Nersa and Eskom keep on thumb sucking how can the public pay for calculation errors that are not correctly done by them, we have been burdened by these errors for years, by enormous electricity price increases, black out cost of load shedding that lead to loss of bussiness revenue (and tax payment to the state). A price increase hits business in south africa directly, it hits home owners directly and then it hits all south africans a secondary time because business trickles their price increase down to consumers. Living costs in south afica are becoming unbearable and these kinds of blunders should be firstly correctly calculated and not called a thumb suck, then treasury should be consulted to find an allocation with in the already paid tax base from south african companies and individual tax payers to fix these issues. Further increase to the general population of south africa will result in higher poverty of the already high level of people living in dismal circumstances and cannot be continuously carried by business and consumers. Also, why should we pay for Eskom's aging infrustructure, rather complete the new stations and get energy provision in SA sorted then trying to beat old machinery like a dead horse to work, when it simply cant and South Africa just needs to pay for mismanagement! Enough is enough!	Anscha	Gauteng		
	2026-01-19 07:59:25	No I do not	All of the above – we should not pay for government blunders	We are living in very difficult times. Many households are living on one income, older people, single mothers. Often salaries don't increase due to companies bad performance but employees stay because at least they have work! SA goverment just keelp taking amd taking from its already cash strsppped citizens. It has to stop! Streamline parliment, cut their salaries!	Merchia	Western Cape		retired
	2026-01-19 07:59:16	No I do not	All of the above – we should not pay for government blunders	It's about time Accountability was introduced to all Government Personnel. 	2026-01-19 07:49:24	No I do not	All of the above – we should not pay for government blunders	If I, as business owner, calculate my expenses the wrong way and make a customer pay a price lower than I actually need to make a profit, I can't knock on his house's door and make him pay a higher amount. It was my mistake and I need to bear the results of my blunder. I believe the same is in order for Eskom towards us as customers. Unfortunately, because Eskom finds itself in the unfortunate position of sole provider of electricity to most South Africans, they can't just shift their costs of errors and lack of maintenance onto the consumer, as they have a monopoly and are to bear their on blunders. Should competition be introduced in terms of supply to 100% of South Africans, then they might try to shift the costs, but then everone will just move over to the other providers. That's why we need competition in the market. Sorry Eskom, you are responsible for your own errors. Don't shift the costs to the consumer who doesn't have a choice of provider.	Roelof	Gauteng

	2026-01-19 07:38:02	No I do not	All of the above – we should not pay for government blunders	Misuse of public funds, have resulted in the poor upkeep of the Eskom infrastructure. The public should not be the scape goat to pay for the mistakes of the poor management of eskom. Cut the salaries of irrelevant MP's. Outsource work to reliable vendors and have someone who is of high integrity and moral value oversee the operation to success.	Lingesphere n Dillon	KwaZulu-Natal		self-employed
	2026-01-19 07:37:50	No I do not	All of the above – we should not pay for government blunders	I object to the proposed electricity price determination insofar as it seeks to recover costs arising from NERSA's historical calculation errors from consumers. Affordability: Electricity users should not be required to pay for regulatory or accounting mistakes made by NERSA or Eskom. Recovering omitted depreciation and returns retrospectively amounts to shifting institutional failure onto households and businesses already under severe cost-of-living pressure. This undermines fairness and erodes public trust in the regulatory process. Reliability: Consumers are being asked to pay full economic tariffs while receiving an unreliable and inconsistent supply. Load shedding, unplanned outages, and aging infrastructure materially reduce the value of electricity delivered. It is unreasonable to expect consumers to fund retrospective asset corrections when service quality does not meet acceptable standards. Efficiency: Passing these costs onto consumers removes incentives for operational discipline, accurate asset management, and project delivery accountability. Consumers should not be required to fund cash flow shortfalls, construction delays, or regulatory errors. Cost recovery mechanisms must reward efficiency and penalise mismanagement, not socialise it. Conclusion: NERSA should absorb or otherwise neutralise the impact of its asset valuation errors rather than imposing them on electricity users. Any tariff determination must prioritise affordability, reflect actual service reliability, and reinforce efficiency and accountability within both Eskom and the regulatory framework. 	2026-01-19 07:21:18	No I do not	All of the above – we should not pay for government blunders		Elsa	Western Cape		
	2026-01-19 07:21:13	No I do not	All of the above – we should not pay for government blunders	I am not happy with the proposed electricity price determination. Electricity costs are already unacceptably high and continue to place severe pressure on households and businesses struggling with the rising cost of living. NERSA has acknowledged that it made significant calculation errors in determining Eskom's asset values. These mistakes, reportedly amounting to R76 billion, are the responsibility of the regulator and should not be transferred to consumers through higher tariffs. It is neither ethical nor reasonable to expect the public to pay for regulatory failures. Consumers are also being asked to pay full tariffs for electricity supplied through aging and unreliable infrastructure, characterised by breakdowns, load shedding and poor service reliability. This undermines any justification for increased costs. Government and its regulators must demonstrate accountability, competence and transparency. The burden of correcting errors made by NERSA should be addressed internally, not imposed on electricity users who have already paid enough.	Danie	Northern Cape		employed individual

	2026-01-19 07:19:52	No I do not	All of the above – we should not pay for government blunders	Eskom has not only cost the country a significant amount in direct and indirect costs but also have passed on those costs on to individual households that is already overburdened by tax. We as taxpayers are paying double for electricity in this country, through our tax and through the rates charged. It is time to stand up and say that enough is enough. We can no longer fit the bill for governments lack of proper governance, corruption, lack of maintenance to infrastructure and their inability to fulfilling their mandate. Cut costs, revisit overburdening organisational structures, reduce travelling ...there are plenty of other mechanisms to utilise. Just expecting the taxpayer to continue to pay for wastage is not acceptable. Open the market for competitive electricity provision and move out of the way.	Lizette	Gauteng		business owner

	2026-01-19 07:19:34	No I do not	All of the above – we should not pay for government blunders	If Eskom got the Municipalities to pay their bills and STOP the inside corruption of staff giving out cheap electricity this would save billions of rans and Eskom would be profitable. Eskom must stop the over ordering to enrich the few at its power stations, use the current stock in warehouses. Start a serious CIP (cost improvement plan) and reduce wastage to be more efficient instead of the public paying for wastage.	William	Gauteng		retired
	2026-01-19 07:19:27	No I do not	All of the above – we should not pay for government blunders	I, at the age of 78, cannot afford any further increase in the already exceedlig high electricity costs. These costs are due to the mismanagement of the infrastructure.	Peter	KwaZulu -Natal		retired

	2026-01-19 07:16:47	No I do not	All of the above – we should not pay for government blunders	Firstly, this is not a blunder - how this amount of "debt recovery" can be foisted on consumers who are already struggling in a failing economy is cruel and ludicrous. South Africans struggled and survived load shedding because of their incompetence. Our cost of living is soaring each month and basic essentials are already out of reach of much of the population. This is a step too far. If the electricity tariffs are raised further, it has a knock on effect on everything and will push more people into debt.	Karen	Western Cape		
	2026-01-19 07:16:31	No I do not	All of the above – we should not pay for government blunders	Government failed long ago to keep lights on, that's why individuals and companies are relying on solar power, again on the same note they threaten those that has, we shouldn't allow this Government to run us around whilst they mess up every little this country has	Msokoli			
	2026-01-19 07:16:21	No I do not	All of the above – we should not pay for government blunders	Tired of funding Governments incompetent blundering. 32 years of this is just crippling to the over burdened consumers, pensioners . They should look to the non taxed Taxi Mafia organizations for this money.. That will open a great Can of Worms for the politicians and there cronies.	Kevin	Western Cape		retired

	2026-01-19 07:06:57	No I do not	All of the above – we should not pay for government blunders	Eskom has a bloated workforce and it's enormous salary bill should be lower. Eskom used to generate the same amount of electricity with 25% of the workforce it has now. CUT THE FAT! Delays/budget overruns on building project is also Eskom's own fault, private sector companies do not allow such things to happen willy nilly. If it wasn't for the slowdown of manufacturing, closing of businesses, and solar power installed by people at their residences/offices we'd still be facing load shedding. Eskom's inflated prices are already causing smelters to shut down and more manufacturing jobs to be lost. It's time we get back to the Eskom of the pre-94 era. Generate all the electricity we need (and more for export) at THE LOWEST POSSIBLE PRICE POSSIBLE! Bring back the technocrats!	Hannes	Mpumalanga		business owner

	2026-01-19 06:47:35	No I do not	All of the above – we should not pay for government blunders	It is grossly unfair that we are expected to pay for incompetence and mistakes made by large institutions. Any institution that does not regularly maintain its infrastructure must be held accountable for that. I suggest that director's salaries should be cut and gradually increased as the infrastructure is repaired. I am also disgusted that there are rumours that people who have installed solar panels are going to have to pay additional taxes or levies to fund the failing Eskom grid. What sort of country penalises its citizens for innovation?	Odette	Eastern Cape		retired

	2026-01-19 06:32:14	No I do not	All of the above – we should not pay for government blunders	The Cost of Eskom's Assets vs. Tariff Affordability Given the current economic climate, I do not accept a further increase in electricity tariffs to fund a higher valuation of Eskom's power plants, and I believe the asset values should be capped to keep electricity affordable. Paying for Ageing and Unreliable Infrastructure Consumers should not be forced to pay higher tariffs to cover the full value of power stations that are near the end of their lifespan or frequently unavailable due to breakdowns (load shedding). Burdening Consumers with Construction and Operational Costs I do not agree that the consumer should carry the additional financial burden of funding Eskom's incomplete construction projects and operational cash flow through increased electricity prices.	Gerhard	Western Cape		retired

Zwelithini Daniel	North West		self-employed
	2026-01-19 06:24:15	No I do not	All of the above – we should not pay for government blunders	I am a long time Eskom klient. My electricity bill is very high mostly because of very high fixed cost for connection to the grid as well as usage fees. The issue I have is the reliability of electricity. It is very undipendaple. My business as a farmer is directly impacted by the low availability and dependability of the national electicity provider. The only thing that I can rely on from Eskom is a large bill at the end of every month. Even though most monthes we go days on end without electricity. For the over burdoned consumer to flip the bill for any calculation errors from Eskom side is not fair. Eskom is corrupt and is not to be trusted with any extra money. I myself am highly unsatisfied with the national electricity provider. There is no fairness, no accountability and no sence of what is best for the people of this country and most mentionably hardly any electricity.	Donovan	Eastern Cape		business owner

	2026-01-19 06:05:40	No I do not	All of the above – we should not pay for government blunders	Nersa needs to be held responsible fot their own gross incompetence and inefficiency	Des	Western Cape		
	2026-01-19 06:05:31	No I do not	All of the above – we should not pay for government blunders	In South Africa, we have to oppose the prevailing culture where poor service delivery and corruption is rewarded. We must put our resources towards systems that are run effectively and towards service providers that roll out services, embedded in a culture of excellence and integrity. Eskom has a long history of corruption and failed service delivery and therefore the public should put less money towards them, not more. One of Eskom's main financial challenges is that municipalities who share the same destructive culture of poor service delivery and corruption, do not pay them - so that is where the focus should be. Definitely not with the honest consumer who already pays too much for electricy. It is time we turn the tide in South Africa, by supporting service providers that advance the ethical culture of excellent service delivery and integrity. The practical application is that we want detailed feedback from Eskom on how it is going to root out internal corruption, and how they are going to keep municipalities accountable for payment. And then we want to see effective implementation of those plans. Before we see that in action, no customer should pay more. It is time for Eskom to shape up or ship out. 	2026-01-19 01:28:45	No I do not	All of the above – we should not pay for government blunders	When is this government going to learn that the best person should be put into each job. Not your friend, not family members, not criminals or corrupt persons.. Your job, as mandated by us, the people, is to find the person who is going to do the best job for the people in EVERY sphere of government. Why should ordinary South Africans, who struggle for shelter and food, because of perpertual government inefficientcies, due to extremely poor leadership, pay for the damages time and again? Let the leaders take responsibility for once, without burdening a already overburdened population. History says that there comes a point where the people just revolt, when they are overburdened and have nothing more to give. Is that what you are aiming for? Really? Get in touch with the reality on the ground and please reconsider how you do this.	Kim	Western Cape		retired

	2026-01-18 23:47:38	No I do not	All of the above – we should not pay for government blunders	Dear NERSA Energy Regulator,I am writing as an individual electricity consumer to strongly oppose the proposal to recover an additional R76 billion from consumers due to NERSA's admitted calculation errors in Eskom's Regulatory Asset Base (RAB), particularly the omitted depreciation and returns.This would result in unfairly higher electricity tariffs at a time when South Africans are already battling rising living costs, inflation, and economic hardship.Bekostigbaarheid (Affordability) – Moet jy betaal vir NERSA se berekeningsfoute? No, consumers should not be forced to pay for NERSA's mistakes. These errors were made by the regulator, not by users. Passing on the full R76 billion (including R62 billion in depreciation and R14 billion in returns) would place an unacceptable burden on households and businesses already struggling. Instead, this cost should be absorbed by NERSA/Eskom or addressed through other means (e.g., government support or efficiency improvements), not through tariff hikes that could reach 10%+ in 2026. Betroubaarheid (Reliability) – Moet jy die volle prys betaal vir verouderende, onbetroubare infrastruktuur? No. Many of Eskom's power stations are old, prone to breakdowns, and have contributed to years of load shedding and unreliability. Consumers have already paid dearly through high bills and economic losses from outages. It is unfair to charge full RAB-based tariffs (including higher depreciation) for infrastructure that is not delivering reliable service. Tariffs should be linked to actual performance and reliability improvements, not used to subsidize outdated assets. Doeltreffendheid (Efficiency) – Moet verbruikers Eskom se kontantvloei en konstruksievertragings finansier? No. Eskom should bear the financial consequences of its own delays, mismanagement, and inefficiencies (e.g., construction overruns on new builds and poor cash flow management). Forcing consumers to fund these through higher tariffs rewards inefficiency rather than encouraging better governance and cost control. Prioritize fixing internal issues before passing costs to the public. In summary, I urge NERSA to reject or significantly reduce the proposed R76 billion recovery from tariffs. Protect consumers from bearing the cost of regulatory and utility errors, and ensure future decisions prioritize affordability, transparency, and accountability.Thank you for considering my submission. 	2026-01-18 23:33:01	No I do not	All of the above – we should not pay for government blunders	I am writing to formally comment on the Eskom Revenue Application for the 2025/26 to 2027/28 periods, specifically regarding the proposed recovery of the R76 billion shortfall through tariff increases. I strongly object to this proposal for the following reasons: 1. Affordability & Fairness: I should not be forced to pay for NERSA's own calculation errors. The R76 billion mistake is a regulatory failure, and the cost must not be passed onto consumers who are already struggling with a severe cost-of-living crisis. NERSA must find alternative ways to absorb this cost. 2. Value for Money: I oppose paying increased tariffs for aging and unreliable infrastructure that results in constant load-shedding. The proposed tariffs do not reflect the poor quality and intermittent supply of the service we receive. The value of Eskom's unreliable power stations should be reduced in the tariff calculation. 3. Funding Efficiency: I object to my electricity bill being used to fund Eskom's cash flow problems and construction project overruns. Consumers should not bear the full burden for "Work Under Construction" and "Working Capital" costs, especially when these projects are delayed. In conclusion, I urge NERSA to reject any tariff increase aimed at recovering the R76 billion error. The focus must be on protecting consumers, ensuring affordability, and holding Eskom accountable for its efficiency and performance.	Sadiqqah	Western Cape		unemployed individual

	2026-01-18 23:12:56	No I do not	All of the above – we should not pay for government blunders	Volgens syfers wat Eskom vrygestel het, het hulle biljoene rande wins gemaak, EN aan al hulle werknemers onrealistiese salarisverhogings toegeken, verdien of onverdien. (My opinie: grootliks onverdiend.) Indien Eskom die biljoene rande wins gebruik, en iets doen aan die onrealistiese salaris verhogings, behoort daar MEER as genoeg geld te wees om NERSA se nalatig fout, wat deur onbevoegde werknemers veroorsaak is, te dek. Ons betaal REEDS ons ore van ons koppe af vir elektrisiteit, en sal nie NOG 'n verhoging kan hanteer nie. Ons inkomste kan NET SOVEEL DEK, EN NIKS MEER NIE. Die mense wat hierdie besluite neem, se salarisse is minstens 3 tot 6 maande meer as wat Jan Alleman s'n is per maand. Dit is byna identies aan die Discovery health med fonds se storie, waar hulle uiteindelik gedwing was om die "rekenaarsfout" self te delg. Maak hofsake, soveel as moontlik, om die deesdae politiese georienteerde NERSA en Eskom se foute met die biljoene wins wat Eskom gemaak het, te delg. Laat 'n hof sommer ook uitspraak gee TEEN die onrealistiese salarisverhogings wat Eskom aan sy werknemers betaal. Die biljoene wat Eskom wins gemaak het, gaan BESLIS NIE aangewend word om verouderde onfrastfuktuur, ens reg te stel nie. Daarvoor is die korrupsie in die Eskom geledere HEELTEM te groot en teveel. 	2026-01-18 21:04:45	No I do not	All of the above – we should not pay for government blunders	It is outrageous that we as taxpayers are expected to fund poor government spending and infrastructure programmes. I have paid tax for the past 40 years and u a still paying tax in my retirement. Have I not paid enough. I am fed up with weekly electricity outages and slow and lacklustre service. In order for me to ensure that I have access to electricity I have had to install a generator. It is unacceptable that I need to ensure an alternative power supply. And now I am being asked to pay for the poor governance and corruption of a state entity. NO! NO! NO! Get your house in order and start servicing the people and the community of South Africa	Shirley	Gauteng		retired

	2026-01-18 20:18:54	No I do not	All of the above – we should not pay for government blunders	The continuing cost of government corruption placed on the shoulders of South African's needs to end. We need transparency on how funds are used, where funds were stolen, or where corrupt contracts were granted. Show us how these people have been held accountable, or where companies have paid back for what they have failed to provide. Failure to maintain plants over the last 31 years rests on the government, and they cannot continue to punish the people for their corruption. The cost of living is skyrocketing, and ESKOM's greed will break the backs of most South Africans. This will in turn lead to more illegal connections and power theft, which will then become the responsibility of a few to carry,	Chrystal	KwaZulu -Natal		self-employed
	2026-01-18 20:17:51	No I do not	All of the above – we should not pay for government blunders	Eskom has had annual electricity tariffs annual, we as consumer cannot afford all these increases, which have a direct impact on on food items. Eskom is in this position in part due to corruption that has taken place under the watch of various boards and executives e who got handsome bonuses. It's criminal what eskom is asking for	Musawenkosi	Gauteng		employed individual
	2026-01-18 20:17:21	No I do not	All of the above – we should not pay for government blunders	Fed up that we the public are always the ones that pay for Eskoms failures be it old infrastructure, inefficiency of people in charge or corruption from the top to the bottom. And the government expects the users to accept costs escalating year after yesr after year.	Pippa	Western Cape		retired

	2026-01-18 19:55:57	No I do not	All of the above – we should not pay for government blunders	How are people meant to be held accountable for their mistakes if others are forced to pay for them instead. Someone should pay but not the consumers, the people responsible for making the mess ups should be forced to take on the burden. If you mess up you fix it. Eskom has become such a pathetic disgrace of a utility and it's just consistently dragging this country down. How can you have faith and respect for a business that is just continuously messing up in their service and never taking responsibility. How does this change if no one is ever held accountable.	Warrick	Western Cape

	2026-01-19 10:54:56	No I do not	All of the above – we should not pay for government blunders	We as Parkkruin, an PBO Organisation cannot keep up with the rising cost of electricity in South Africa, and now we should literally pay for the mistakes of Eskom and NERSA. I strongly oppose the proposal to force South African consumers to absorb an additional R76 billion to cover Eskom's failures. The government are crippling their citizens with fees and living costs...somewhere it has to change for the better of the citizens still keeping this country together.	Deonette	Gauteng		employed individual

	2026-01-19 10:54:44	No I do not	All of the above – we should not pay for government blunders	The cost of living in our country is escalating at a rapid rate. It is getting harder to just put food on tables. A huge tariff increase that covers a lazy, malfunctioning government will only increase the cost of everything and personally, I think that this is enough. That's quite a mistake - and as usual the people are being asked to pay for it ? I think it's outrageous - time for them to take responsibility - NERSA should not approve any further Eskom tariff hikes – the current calculations are based on “financial fraud caused by corruption” that penalises consumers for Eskom’s own engineered B-BBEE plan to benefit it cares, competency be damned - if "THEY" had stolen but delivered a working Eskom ... - Recent increase is excessive – a 12.7 % rise, more than three times the national inflation rate, was granted despite clear signs of mismanagement. - Operational performance is very poor. - High average payroll cost - highest-ranking in the country, wages make up a large share of operating expenses, yet there’s no matching productivity gain; reports show “wasteful” and “irregular” spending. - Mismanagement & lack of strategy– Auditor-General flags corruption, fruitless and wasteful expenditure - Failure to collect billions in municipal debt. - Racist employment policies– public discourse points to skewed hiring practices, excluding all races other than blacks undermining merit-based recruitment and public trust. - *Operational inefficiency* – low EAF and ongoing load-shedding mean consumers pay more for a service that remains unreliable. - Debt & revenue collection failures – inability to recover municipal arrears creates a “bad-debt” cycle; inability to cut-off non paying areas due to political interference by the ANC. - Entire board consists of ANC connected individuals - highly paid but short on ability. - Conclusion, not serving the national interests but rather political interests	Christo	Gauteng		employed individual

	2026-01-19 10:51:41	No I do not	All of the above – we should not pay for government blunders	Accountability: Passing costs to consumers removes responsibility from government and Eskom, rewarding inefficiency. Fairness: Citizens are being asked to pay for errors they did not cause, while many already endure load-shedding and high tariffs. Precedent risk: If approved, this sets a dangerous precedent where future mistakes can also be offloaded onto the public. Economic burden: Higher tariffs will hit households, small businesses, and industries, worsening unemployment and inflation. Government bailout: Treasury could absorb the cost, treating it as a fiscal error rather than a consumer liability. Debt restructuring: Eskom’s debt could be renegotiated instead of passing costs directly to tariffs. Independent audit: Civil society groups are calling for an audit to determine whether Eskom’s claims are valid before any recovery is approved.	Jane	Gauteng		employed individual

	2026-01-19 10:47:08	No I do not	All of the above – we should not pay for government blunders	I strongly oppose the proposal to force South African consumers to absorb an additional R76 billion to cover Eskom's failures. This is yet another blunder, despite the billions already lost through corruption and mismanagement under the ANC government. The inflated costs of Medupi and Kusile alone could have covered this shortfall five times over, yet citizens are once again treated as a piggy bank to fund incompetence. Instead of accountability, the public is handed load shedding, interruptions, and escalating tariffs. Forcing consumers to pay for Eskom's mistakes rewards mismanagement while punishing households and businesses already struggling under unreliable service. NERSA's duty is to protect the public interest, not rubber-stamp Eskom's failures. I urge the regulator to reject this proposal and demand a transparent, performance-based recovery plan that prioritizes efficiency, accountability, and value delivery — not endless bailouts at the expense of ordinary South Africans. 	2026-01-19 10:40:21	No I do not	All of the above – we should not pay for government blunders	I submit this comment in response to NERSA's call for public participation on the revised electricity price determination following the recent High Court ruling. 1. Affordability It is neither fair nor reasonable for electricity consumers to be held financially responsible for regulatory calculation errors. The recalculation of Eskom's asset base—following the High Court's finding that NERSA relied on incorrect figures—has reportedly revealed errors amounting to approximately R76 billion. Consumers acted in good faith under tariffs previously approved by the regulator. Asking the public to now absorb the financial consequences of these admitted errors through higher electricity prices undermines trust in the regulatory process and places an unjust burden on households already under severe cost-of-living pressure. Consumers should not pay for regulatory or administrative mistakes. 2. Reliability and Value for Money Electricity tariffs should reflect value delivered. South African consumers are being asked to pay increased prices for infrastructure that is aging, unreliable, and subject to frequent outages. It is unreasonable to charge full depreciation and return values on assets that: Do not consistently deliver reliable supply, and Require ongoing emergency interventions and maintenance due to deferred investment and operational challenges. Tariff increases must be aligned with measurable improvements in reliability and service quality, not used to retrospectively correct accounting errors. 3. Efficiency and Risk Allocation The current proposal appears to shift financial risk away from the utility and regulator and onto consumers. This includes: Covering cash flow shortfalls, Funding construction delays, and Compensating for historical inefficiencies. In any fair regulatory framework, operational and planning risks should be borne by the utility and managed through governance and accountability—not transferred wholesale to consumers who have no control over these decisions. Conclusion Public participation is meaningful only if consumer interests are genuinely considered. I respectfully submit that: Regulatory errors should not be recovered from electricity users, Tariffs must reflect affordability, reliability, and efficiency, and Accountability must rest with institutions, not the public. NERSA's mandate includes protecting consumers while ensuring a sustainable electricity supply. I urge the regulator to uphold that balance and reject any tariff determination that requires the public to pay for mistakes beyond their control.	Maria	Western Cape		employed individual

	2026-01-19 10:34:46	No I do not	All of the above – we should not pay for government blunders	What I can't understand is how can pensioners , let alone anyone in an average income afford to pay over R2000 a month. Corruption and embezzlement needs to stop. Like any business it should be run efficiently.	Gail	Western Cape		retired
	2026-01-19 10:34:33	No I do not	All of the above – we should not pay for government blunders	The system will never be fixed if the consumers are just forced to keep on paying for Management's mistakes. Appoint competent and honest people on merit and fix the problems. To continue in this manner will never deliver the result that South Africans need.	Lana	Western Cape		
	2026-01-19 10:33:57	No I do not	All of the above – we should not pay for government blunders	A miscalculation of billions of Rand by "experts" is totally not acceptable. Eskom has a reputation of tender fraud, poor decision making and general knowledge of service delivery. They are unable to fulfill their priority as service provider for electricity and force thousands of private citizens (home owners and businesses) to seek other ways of generating their own electricity. Now all of a sudden they discover this enormous calculation error and expect the electricity users to pay for their own incompetency! This is absurd and they must absorb these costs by themselves by better planning and better decision making on how to be the excellent service provider of 30/40 years ago.	Gideon	Western Cape		retired

	2026-01-19 10:31:15	No I do not	All of the above – we should not pay for government blunders	Last year we were told of the billions of rands of profit they made. Now we hear it was a mistake. But they still get pay raises and huge bonuses. Why can they not have pay cuts like we have to endure? Their mistakes are made of people who are in positions because of BEE and are incapable to do the work. What about the low income people? Why must they and pensioners suffer because of this? It is so easy to let the public pay for your own incompetence but 30% of the public is already burdened with keeping 70% of the country afloat with taxes etc. Why do they not cut the illegal connections as well? Oh, sorry, those people have rights too but those who pay for electricity has no rights,they must just fork out every time. Why is the persons who made the mistake still in office? That is the reason why so many go to solar as Escom cannot provide what is needed and is corrupt	Johan	Western Cape		retired
	2026-01-19 10:31:13	No I do not	All of the above – we should not pay for government blunders	Surely the persons who made the mistake have a fiduciary responsibility to take ownership for the mistake and be held liable for the cost of their mistake	Alan	Mpumalanga		retired

	2026-01-19 10:25:52	No I do not	All of the above – we should not pay for government blunders	Let's appoint engineers to manage the company, based on merit, regardless of race, to bring the company back to competent, cheap and reliable electricity, without corruption, greed and incompetence. No doubt, a dream . . . !	Christopher	Western Cape		self-employed
	2026-01-19 10:25:51	No I do not	All of the above – we should not pay for government blunders	NERSA should not grant Eskom any further tariff increases because its calculations are built on a foundation of financial terror that punishes consumers for the utility's own failures. The recent 12.7 % hike—more than three times the national inflation rate—was approved despite clear evidence of *rampant mismanagement, wasteful expenditure and an inability to meet operational targets* (the Energy Availability Factor sits at a dismal 54.46 % versus the 80 % target) . Instead of fixing these internal problems, Eskom seeks to shift the burden onto households and businesses, deepening already-high cost-of-living pressures. Key reasons to reject further increases: - *High average payroll cost* – Eskom's wage bill remains one of the largest components of its operating expenses, yet the company continues to report "wasteful spending" and "irregular expenditure" without showing corresponding productivity gains - *Mismanagement and lack of strategy* – The Auditor-General's report highlights *corruption, fruitless and wasteful spending, and a failure to collect billions in unpaid municipal debts*, indicating that higher tariffs will not translate into better service delivery . - *Racist employment policies* – While exact workforce composition numbers are not disclosed in the sources, public discourse has repeatedly pointed to *racially skewed hiring practices* at Eskom, with a reported *black-to-other-races employee ratio of roughly 9:1* (based on industry analyses and parliamentary questions). Such policies have been criticised as perpetuating inequality and undermining merit-based recruitment, further eroding public trust. - *Operational inefficiency* – The low Energy Availability Factor and repeated load-shedding demonstrate that Eskom's core operations are not improving, meaning consumers pay more for a service that remains unreliable - *Debt and revenue collection failures* – Eskom's inability to recover municipal arrears creates a "bad-debt" cycle that higher tariffs cannot fix; instead, they exacerbate illegal connections and infrastructure collapse [2]. Granting another increase would simply reward a broken system and force South Africans to subsidise Eskom's chronic failures. A moratorium on tariff hikes, coupled with enforceable reforms on cost control, transparent payroll structures, and equitable employment practices, is the only responsible path forward. 	2026-01-19 10:08:44	No I do not	All of the above – we should not pay for government blunders	Eskom is owned by the South African people. As such, it will be funded by the taxpayer. The current issue should not be passed to the rate-payers as an increase in rates for the use of electricity. It should be funded from the Government's bailouts already passed to the SOE. The maladministration, mismanagement and corruption should be weeded-out, guilty of any wrong doing should be brought to justice and funds should be recovered for the benefit of the taxpayer. All this should be done with utmost urgency. No increases in already high electricity rates should be approved. The rate-payers are not at fault.	Rafal	Gauteng		employed individual
	2026-01-19 10:08:32	No I do not	All of the above – we should not pay for government blunders	As said by a previous person "Eskom has been an unreliable supplier. Due to lack of previous investment in upgrades , etc, have aging equipment which, could not meet demand. Thi s led to loadshedding for almost 15 years. Now since businesses and home owners were permitted to install their own power generation, ie Solar & Battery back up systems, the demand on Eskom has diminished. It has reached the point where they have primarily poor paying clientelle left and their debt has risen considerably. Now we, the "paying clientelle " are being expected to cover the costs of ageing equipment maintenance and on top of that Nersa,s error in calculation. Between this and Eskom idiotic demand that Solar must be registered is simply an extension of their means to punish the consumer. Of serious concern is that any further energy increase will impact on the poorer South African far more. Those with solar have the ability to go off grid, which will reduce their income even further. Today Solar can be leased and loans are available to middle income consumers, again reducing Eskom,s income. Eskom is Govt owned, yet our Electricity Minister is not stepping in to protect the people he is elected to serve, particularly the lower income groups."	Fredrika	Western Cape		employed individual

	2026-01-19 10:03:19	No I do not	All of the above – we should not pay for government blunders	I am dead against subsidising the government's failed policies, ideologies, cadre deployments, bloated workforce and insanely high salaries for incredibly poor performances. The fact that vast amounts of fraud, corruption, pure theft, and absolutely incompetent work (if you can even call it work) was allowed to continue unchecked under this government makes it impossible for even the most patriotic of people to consider supporting the paper. Rather cut the workforce drastically - they hardly contribute as it is - streamline the executive, cut out the bonuses (one can hardly believe they actually get bonuses for the absolute crud they produce) and reduce salaries. By using the above and recouping all the 'losses', the billions that were paid out due to malfeasance, then that will most definitely make the 'problem' go away. In a nutshell - I, and millions of others I'm sure, do not want to pay for the sins of government and its dysfunctional SOE.	David	North West		retired

	2026-01-19 10:03:12	No I do not	All of the above – we should not pay for government blunders	Do not increase the tariffs. Rather take back the management of electricity from municipalities that are not paying their bills. They are receiving our money why is it not going to Eskom? You cannot make the few foot the bill for the majority who do not pay.	Niki	KwaZulu -Natal		self-employed

	2026-01-19 10:03:03	No I do not	All of the above – we should not pay for government blunders	Concerns and Objections: • Unfair Burden on Consumers: South African electricity consumers are effectively being held hostage by the consequences of Eskom's mismanagement and failures over the past three decades. The public is now expected to shoulder the financial burden for a range of issues, including: o Chronic neglect of aging infrastructure, resulting in frequent breakdowns and load shedding o Billions of rand unaccounted for or lost due to financial irregularities and corruption o Persistent mismanagement at various levels, including poor planning and oversight o Tender fraud and irregularities, especially in the construction of new power stations o The procurement and use of substandard coal, which has further compromised the reliability and efficiency of the power supply • Medupi and Kusile Power Station Projects: The Medupi and Kusile projects are emblematic of Eskom's mismanagement: o Massive Cost Overruns and Delays: Both projects were originally budgeted at around R79–R81 billion each and scheduled for completion by 2014–2015. Instead, costs have ballooned to over R300 billion combined, with Kusile's final unit only coming online in 2025 and Medupi suffering major setbacks, including a catastrophic explosion in 2021 that further delayed operations. o Design Defects and Poor Planning: Both stations suffered from serious design flaws, particularly with their boilers and mills, resulting in frequent breakdowns and underperformance. For example, Medupi's boilers were found to be 13 meters too short, causing premature failure of ash handling equipment. These technical issues required extensive and costly rework after construction. o Procurement Fraud and Corruption: Kusile has been the site of significant procurement fraud, including a case where a pump was purchased in 2018 for R857,977 despite an identical pump having been bought in 2015 for only R18,835. Investigations have uncovered over R450 million in unauthorized after-hours purchase orders, with several Eskom employees and contractors arrested for their involvement in fraudulent schemes. o Lack of Oversight and Accountability: The projects were plagued by weak oversight, insider collusion, and a fragmented contracting strategy—Eskom awarded dozens of separate contracts rather than a single turnkey contract, despite lacking the internal capacity to manage such complexity. This led to poor coordination, inflated costs, and missed deadlines. o Impact on South Africans: Had Medupi and Kusile been completed on time and within budget, South Africa could have avoided years of load-shedding and the associated economic damage. Instead, the failures at these plants have contributed directly to the ongoing power crisis and the financial instability of Eskom. • Accountability and Transparency: Before any additional charges are imposed, there must be full transparency regarding the causes of the financial shortfall and a clear demonstration of accountability by Eskom and relevant authorities. The public deserves to know how these mistakes occurred and what measures are being implemented to prevent recurrence. • Consultation Process: I urge Nersa to ensure that all public comments are genuinely considered and that the final decision reflects the interests of the broader public, not just institutional stakeholders and reconsider the proposed approach and prioritize solutions that are fair, transparent, and sustainable o Conduct an independent review of Eskom's financial management and operational practices, with a particular focus on the Medupi and Kusile projects. o Explore alternative solutions that do not disproportionately impact consumers, such as phased recovery, efficiency improvements, or government intervention. o Commit to ongoing public engagement and transparent reporting on the outcomes of this process. Kick the ruling party into touch. ANC , Mk. EFF all the same. Corrupt politicians. People on the ground are suffering because of this and no foreign investment due to unreasonable laws of business etc in this country. Apartheid in reverse whether you like it or not. Rob hershaw run for president then you'll see good changes etc by the way I'm totally solar had enough. God bless	Glyn	Eastern Cape		
	2026-01-19 09:51:15	No I do not	All of the above – we should not pay for government blunders	Objection to Proposed Eskom Electricity Cost Increase To: The National Energy Regulator of South Africa (NERSA) Subject: Formal Objection to Eskom's Proposed R76 Billion Electricity Cost Increase I write to register my strong objection to Eskom's application for an additional R76 billion to be recovered through further electricity tariff increases. This proposal is fundamentally unjust, economically damaging, and ethically indefensible. South Africans are being asked—yet again—to shoulder the financial burden created by years of mismanagement, operational failures, and governance breakdowns within Eskom. The pattern is now unmistakable: inefficiency and poor decision-making at the utility are routinely transferred to the public in the form of escalating tariffs, while service delivery continues to deteriorate. Households and businesses are already under immense pressure from persistent load-shedding, rising living costs, and a stagnant economy. Approving this increase would deepen financial hardship for millions, undermine economic recovery, and further erode public trust in both Eskom and the regulatory process. It is neither fair nor sustainable to expect consumers to fund the consequences of Eskom's own shortcomings. Before any additional revenue is considered, South Africans deserve clear evidence of: Meaningful accountability for past failures Demonstrable improvements in operational efficiency Transparent financial management A credible, measurable plan to reduce waste, corruption, and reliance on tariff hikes Without these assurances, granting Eskom an additional R76 billion amounts to rewarding incompetence at the direct expense of the public. I therefore urge NERSA to reject this application in its current form and to prioritise the protection of consumers, the restoration of accountability, and the long-term stability of South Africa's energy sector. Sincerely,	Eugene	Gauteng		employed individual

	2026-01-19 09:48:44	No I do not	All of the above – we should not pay for government blunders	I feel that the price of electricity today is the fault of government mismanagement and their mistakes have to be paid by the citizens. Unfortunately for me opening my electricity bill has become the most scariest thing to do every month even when I've stopped baking, using gas as much as possible, not turning on the hot tap and switching off lights but, it's never enough.	Sybil	Western Cape		retired
	2026-01-19 09:48:34	No I do not	All of the above – we should not pay for government blunders	The government has not done a good job of maintaining existing generation capacity. In fact, under the corrupt ANC government, these assets were looted and the corruption is now very much entrenched. I suggest that decision makers consider splitting up generation (power stations) and distribution (the overhead cables), and then set about privatising both under state regulation. This would accomplish two very important things: 1. The generation and distribution of electricity will actually get maintained and improved. 2. Tax revenue will increase as more electricity will be sold and therefore taxed. The indirect effect of the above is that more people will be earning an income, lifting more out of poverty, and bringing prosperity for all.	Dane	Eastern Cape		employed individual
	2026-01-19 09:48:30	No I do not	All of the above – we should not pay for government blunders	The sheer incompetency of Government to reign in it's own Govering CORRUPTION and inept / unqualified staff - is on their shoulders, with the burden of debt or recovery of funds exclusive to them, their families and their cohorts who consistently get granted tenders (pay-for-play). Incompetency is on the Governments back. The public and taxpayers, are not those to be burdened.	A	Western Cape		employed individual

	2026-01-19 09:47:22	No I do not	All of the above – we should not pay for government blunders	I wish to formally record my objection to the proposed electricity tariff increase and to the manner in which this increase is being justified and implemented. While South Africans are already under severe financial pressure due to the rising cost of living, consumers are now being asked to absorb the consequences of what has been acknowledged as a significant regulatory and accounting error. The High Court ruling requiring NERSA to recalculate Eskom's asset values has revealed mistakes amounting to approximately R76 billion. These errors were not caused by electricity users, yet the current proposal effectively transfers the full financial burden of this mistake onto consumers through higher tariffs. I strongly object to the principle that regulatory or institutional miscalculations—particularly of this magnitude—should be recovered retrospectively from the public. The inclusion of previously omitted depreciation and return components in the tariff now amounts to consumers being charged for costs that should have been correctly accounted for from the outset. This undermines trust in both the regulatory process and the fairness of tariff determinations. Furthermore, the manner of action raises serious concerns. Rather than exploring mechanisms to absorb, phase in, or mitigate the impact of these errors—whether through internal adjustments, efficiency measures, or alternative funding arrangements—the proposal appears to default to the simplest option: passing the cost directly to consumers. This approach disregards the socio-economic realities faced by households, schools, small businesses, and community institutions, many of which are already struggling to remain financially viable. Electricity is not a luxury good; it is an essential service. Any tariff determination must therefore be guided not only by technical compliance but also by equity, accountability, and public interest. Penalising consumers for acknowledged regulatory errors sets a dangerous precedent and risks further eroding confidence in public institutions. For these reasons, I oppose both the proposed increase and the approach taken to recover costs arising from the R76 billion miscalculation. I urge NERSA to reconsider this determination and to seek solutions that do not unfairly burden the public for failures beyond their control.	Theodor	Gauteng

	2026-01-19 09:41:04	No I do not	All of the above – we should not pay for government blunders	We need to have more private power generation in South Africa. Concentrating power generation into a single entity (Eskom) means there is no competition in the marketplace and they can thus get away with poor management because consumers have no other choice. Allowing Eskom to "re-price" the value of their assets which they have failed to properly maintain for *decades* now is the wrong approach. It will deter private investment into the energy sector - no one wants to compete with an entity that is getting an unfair leg-up over everyone else.	Scott	Western Cape		employed individual

	2026-01-19 09:37:48	No I do not	All of the above – we should not pay for government blunders	In the private sector, if you make an error you have to find a way to correct it or close down. The government & Eskom see the public as a cash cow to fund anything they wish for & to cover any expenses they deem necessary. They should rather be bringing the criminal elements to trial & seizing their assets to cover the ongoing damages to Eskom infrastructure. In addition salaries & ghost employees as well as unnecessary staff positions should be investigated by non-government 3rd parties to eliminate cadre manipulation. It is a sad fact that there are mega millions owed to Eskom by defaulting parties as well as the thousands of illegal connections which should be arrested & the corrupt parties brought to trial. The impunity with which these individuals are operating is unacceptable & the general public, of which a large portion live below the bread line, is expected to fund the lining of corruption pockets. Those revenues would go a long way to covering any shortfall in Eskom's budget.	Hugh	Gauteng		retired
	2026-01-19 09:37:24	No I do not	All of the above – we should not pay for government blunders	Recover monies from "golden handshake " idiots who got the country in this position. Recover monies from bloated "tenders ", overrun tomeframe of development. How come there were no clauses for late progress, and penalties imposed, in building facilities?	Margaret	Western Cape

	2026-01-19 09:31:46	No I do not	All of the above – we should not pay for government blunders	Eskom has been an unreliable supplier. Due to lack of previous investment in upgrades , etc, have aging equipment which, could not meet demand. Thi s led to loadshedding for almost 15 years. Now since businesses and home owners were permitted to install their own power generation, ie Solar & Battery back up systems, the demand on Eskom has diminished. It has reached the point where they have primarily poor paying clientelle left and their debt has risen considerably. Now we, the "paying clientelle " are being expected to cover the costs of ageing equipment maintenance and on top of that Nersa,s error in calculation. Between this and Eskom idiotic demand that Solar must be registered is simply an extension of their means to punish the consumer. Of serious concern is that any further energy increase will impact on the poorer South African far more. Those with solar have the ability to go off grid, which will reduce their income even further. Today Solar can be leased and loans are available to middle income consumers, again reducing Eskom,s income. Eskom is Govt owned, yet our Electricity Minister is not stepping in to protect the people he is elected to serve, particularly the lower income groups.	David	Western Cape		retired

	2026-01-19 09:30:00	No I do not	All of the above – we should not pay for government blunders	I submit this comment in response to NERSA's call for public participation on the proposed electricity price determination. The recent High Court ruling confirmed that NERSA made material calculation errors in the valuation of Eskom's assets, reportedly amounting to approximately R76 billion. These errors were acknowledged and have now necessitated a recalculation. It is deeply concerning that the current proposal seeks to recover the financial consequences of these mistakes directly from electricity consumers through higher tariffs. I strongly oppose the principle that the public should be held financially accountable for regulatory errors made by NERSA. Doing so undermines trust in the regulatory framework and places an unjust burden on households, businesses, and the broader economy. Affordability Consumers should not be required to pay for NERSA's calculation errors. Electricity users have no control over regulatory methodologies or asset valuation processes. Passing these costs onto the public effectively penalises citizens for failures within the regulatory system, at a time when affordability is already under severe pressure. Reliability It is unreasonable to charge full or increased tariffs to recover returns and depreciation on aging and unreliable infrastructure. Consumers continue to experience load shedding, plant breakdowns, and declining service reliability. Paying more for a service that is demonstrably unstable and underperforming is neither fair nor justifiable. Efficiency Electricity users should not be expected to fund Eskom's cash flow challenges, inefficiencies, or construction delays through retrospective tariff adjustments. Allowing such recovery removes incentives for operational discipline, cost control, and accountability within both Eskom and the regulator. In conclusion, regulatory errors must be addressed within the regulatory and institutional framework, not transferred to the public. NERSA should absorb the consequences of its mistakes through appropriate internal, fiscal, or policy mechanisms, rather than shifting the burden onto consumers who are already financially strained. I respectfully urge NERSA to reconsider this approach and to protect the public interest by ensuring that electricity tariffs are fair, affordable, and based on accurate, accountable regulatory decisions. 	2026-01-19 09:23:50	No I do not	All of the above – we should not pay for government blunders	Nersa was irresponsible and should foot the bill by themselves for themselves. Consumers are not the problem. Nersa is as accountable for their errors as each other institution or business or individual. Sort it out and stop transferring your burdens to us, the Citizens. We are already paying way too much for electricity because the Government has no idea to manage costs.	Tina	Gauteng		self-employed
	2026-01-19 09:23:49	No I do not	All of the above – we should not pay for government blunders	Affordability No, consumers should not be expected to pay for NERSA's calculation errors. A R76 billion mistake is a regulatory failure, not a consumer one. Households and businesses are already under severe financial pressure, paying more every year while earning less. Passing the cost of institutional errors directly to electricity users is unjust and erodes trust in the entire regulatory system. Reliability Consumers should not pay full price for aging and unreliable infrastructure. Eskom's supply is marked by breakdowns, load shedding, and deferred maintenance. In any other industry, unreliable service results in reduced pricing or penalties—not higher costs. Paying premium tariffs for deteriorating performance is neither fair nor economically sustainable. Efficiency Consumers should not be expected to fund Eskom's cash-flow problems, construction delays, or inefficiencies. These issues stem from poor planning, mismanagement, and governance failures. It is especially concerning that Eskom employees continue to receive annual bonuses and increases regardless of performance, unlike most industries where bonuses are strictly merit-based and tied to results. Rewarding failure while charging consumers more sends the wrong message and removes accountability. Conclusion Regulatory errors and operational inefficiencies should be absorbed by the institutions responsible, not transferred to consumers who are already struggling. Until accountability, performance, and value for money are restored, further tariff increases cannot be justified.	carina	Gauteng		self-employed

				Passing the R76 billion directly to consumers is economically lazy, morally questionable, and structurally dangerous. Yes, technically Eskom may be “entitled” to recover costs under the Regulatory Asset Base (RAB) model. But legality ≠ legitimacy, and accounting correctness ≠ economic justice. This situation exposes a deeper failure in South Africa’s energy governance: When regulators make errors, consumers are treated as an infinite balance sheet. That is not regulation — that is risk socialisation. Why this is fundamentally wrong (even if it’s “by the book”) 1. Consumers did not create the error I didn’t miscalculate asset depreciation. I didn’t design the RAB model. I didn’t negotiate behind closed doors. Yet I'm being told: “Sorry — but please pay anyway.” That breaks the social contract of regulation. 2. Eskom is not a normal utility — it’s already subsidised Eskom: Has received hundreds of billions in bailouts Has government-backed debt relief Operates as a monopoly Is partially shielded from market discipline You cannot apply private-sector recovery logic to a state-protected monopoly and still claim fairness. 3. Tariffs are already driving demand destruction Every above-inflation increase: Pushes households into energy poverty Forces SMEs to shut down or automate Accelerates grid defection (solar + batteries) Shrinks Eskom’s future revenue base Ironically: Higher tariffs today guarantee lower Eskom revenue tomorrow. This is a death spiral, not a recovery plan. The real issue no one wants to say out loud NERSA and Eskom are trying to correct a governance failure using a pricing instrument. That’s like fixing a broken compass by speeding up the car. What should happen instead (realistic alternatives) Below are viable, implementable options — not populist fantasy. 1. Split the R76bn into “recoverable” vs “non-recoverable” costs Not all of that R76bn is equal. Proposal: Recover only the portion tied to assets that are: Operational Producing electricity Not impaired Write off or defer costs linked to: Decommissioned plants Chronic underperformance Delayed or failed projects If an asset isn’t delivering value, consumers should not be forced to pay a return on it. This alone could shave tens of billions off the figure. 2. Time-stretch recovery over 10–15 years (not 3) Trying to claw this back in the MYPD6 window is reckless. Alternative: Spread recovery over 10–15 years Cap annual impact to below CPI Explicitly prohibit compounding returns on the deferred amount This converts a tariff shock into a manageable background adjustment. 3. Treasury absorbs the error — not households This is unpopular politically, but correct economically. NERSA is a state regulator. Eskom is a state-owned entity. This is a state-caused error. Mechanism: Treasury issues a targeted Eskom asset-adjustment bond Bond serviced through: Carbon tax revenues Fuel levies Broad tax base (not electricity users only) Why? Because electricity is a productive input, not a luxury. 4. Performance-linked recovery (this one matters) If Eskom wants additional recovery: Tie it to measurable delivery. For example: Each % reduction in unplanned outages unlocks X recovery Each GW of improved availability unlocks Y recovery Miss targets → recovery pauses automatically No performance = no extra money. This is standard in functional utilities globally. South Africa simply refuses to enforce it.

Hanna	Limpopo		self-employed
	2026-01-19 09:15:36	No I do not	All of the above – we should not pay for government blunders	WHY must we foot the bill for their incompetence. Eskom should be more in control of their revenue and NOT expect the little man on the street to bail them out continuously. We seem to be going backwards ALL OF THE TIME and Eskom keeps raping us	Gail	Gauteng		
	2026-01-19 09:15:10	No I do not	All of the above – we should not pay for government blunders		Paul	Gauteng		business owner
	2026-01-19 09:14:58	No I do not	All of the above – we should not pay for government blunders	Consumers should not be forced to absorb the financial consequences of Eskom and NERSA’s failures. Regulatory miscalculations, aging and unreliable infrastructure, and ongoing inefficiencies including cash flow mismanagement and construction delays are institutional shortcomings, not consumer choices. Charging the public full tariffs under these conditions is neither fair nor justifiable, as it shifts the cost of mismanagement onto households and businesses already receiving an inconsistent and degraded service. Accountability must rest with the entities responsible, not with the consumers who have no control over these decisions. An appropriate remedy would be to disallow the recovery of costs arising from regulatory errors, mismanagement, and project delays from consumers, and to require Eskom and the relevant authorities to absorb these losses internally. Any future tariff increases should be conditional upon measurable improvements in reliability and efficiency and subject to strict, independent oversight, ensuring that consumers are not charged for failures beyond their control. 	2026-01-19 09:12:06	No I do not	All of the above – we should not pay for government blunders	We hereby submit this formal comment in response to Nersa's recently published consultation paper, which follows the December 2025 court order rejecting the proposed settlement agreement between the regulator and the power utility. We wish to place on record our complete disagreement with both the implications of the court order and the basis upon which this consultation has been initiated. The court's rejection of the settlement agreement represents, in our view, an unduly restrictive interpretation of the regulatory framework and fails to adequately recognise the practical, financial, and systemic realities facing the electricity sector. Settlement agreements are a legitimate and necessary regulatory mechanism, particularly in circumstances where rigid adherence to prescriptive processes risks exacerbating instability within an already constrained system. Furthermore, the consultation paper appears to proceed from the assumption that the rejection of the settlement agreement was not only justified but determinative. We strongly disagree with this premise. The court order does not, and should not, preclude pragmatic regulatory solutions that balance legal compliance with sustainability, affordability, and security of supply. By effectively undermining negotiated regulatory outcomes, the approach reflected in the consultation paper risks setting an adverse precedent that may deter future good-faith engagements between the regulator and regulated entities. This, in turn, could result in prolonged disputes, increased litigation, and further uncertainty within the sector—outcomes that are clearly not in the public interest. We therefore submit that the consultation paper fails to adequately consider alternative interpretations, the broader economic implications, and the necessity for regulatory flexibility in extraordinary circumstances. We urge Nersa to reconsider its position, acknowledge the limitations of the court order, and adopt a more balanced and forward-looking regulatory approach. This comment is submitted in good faith and with the intention of promoting regulatory certainty, sector stability, and outcomes that genuinely serve the public interest.	Elias	Gauteng		self-employed

	2026-01-19 09:10:59	No I do not	All of the above – we should not pay for government blunders	Keep politics out of Eskom and employ competent people.	J.M.	Western Cape		employed individual
	2026-01-19 09:10:53	No I do not	All of the above – we should not pay for government blunders	I am retired, 83 years old and one person living on my own. On my Joburg Account for January 2026, just the City Power Electricity sum alone payable was R2,938.89! That is a ridiculous amount for one person to pay! Now, it is proposed that we the consumer carry that MASSIVE increase, and I mean MASSIVE, for ESKOM's gross overall incompetence. Quite frankly, it's an insane and confounded cheek to even suggest, let alone, propose it! Enough is enough where ESKOM incompetence is concerned, the South African Public have had enough. So, I say NO to NERSA's ridiculously crazy proposal. NO, NO, NO! Shame on you NERSA, SHAME, SHAME and SHAME!	Anita	Gauteng		retired

	2026-01-19 12:53:38	No I do not	All of the above – we should not pay for government blunders	It doesn't make sense for the consumer to fit the bill for Nersa's mistake. We already carry the burden of extra costs because of loadshedding or loadreduction having to pay for generators, fuel etc. as well as protection against powers urges. Nearly never receiving utility bills plus the extra costs of enormous mistakes made on these bills. If we keep paying for all there mistakes when are they going to be held accountable? If paying would mean that powerstations would be upgraded and extra stations built and all-over corruption would stop,,we could take a chance on paying but we all know that's not going to happen. Paying will only encourage further corruption.	Jolande	Free State		employed individual
	2026-01-19 12:53:02	No I do not	All of the above – we should not pay for government blunders	We have had many increases, and it is now becoming unaffordable. and i query whether i shud have to pay for again and unreliable infrastructure. and shud the tax payer be responsible for Eskom's cash flow and construction. And from being a World leader utility, the mismanagement is unbelievable , and it is ridiculous to expect the tax payer for pay for this.	terrence	Gauteng		retired
	2026-01-19 12:52:58	No I do not	All of the above – we should not pay for government blunders	Electricity cost is already far above what it should be due to poor administration, corruption and people not having the skills to fulfil these valuable roles resulting in this calculation blunder! I believe too much is spent on salaries as 2 resources are necessary to do a 1 man job resulting in not having money to upgrade and maintain infrastructure. Now we as consumers must pay the price AGAIN!! Due to the lack of skills Eskom is not ran efficiently and rather in crisis mode always and again we must suffer for poor cashflow and poor/none project management of construction projects resulting in overruns. Latter also that the unions have too much say at these projects and Eskom not handling it at all. Don't appoint people because of BEE but because they can really do the job! Budget for infrastructure and upkeep rather than giving it as bonusses! If you want to buy a bread you must pay for it before you can get it. If you buy a house or car, the same. Why are there still so many people and institutions, even government, that are so behind but they still have electricity? Or it is just written off and we, the law-obiding ones, must pay for the unlawful connections and written-off's losses.	Carmen	Western Cape		student
	2026-01-19 12:52:51	No I do not	All of the above – we should not pay for government blunders	This is a good idea to get the public involved however there is a problem. If a state run enterprise needs more money then at the end of the day the public pays for it. The Government has no money. It takes from the public or it borrows. If it borrows the public has to pay it back. The Government has no money - it is all our money. The best thing to do with the state owned enterprises is to sell them off and then regulate them.	Anthony	KwaZulu -Natal		retired

	2026-01-19 12:39:17	No I do not	All of the above – we should not pay for government blunders	Electricity cost is already far above what it should be due to poor administration, corruption and people not having the skills to fulfil these valuable roles resulting in this calculation blunder! I believe too much is spent on salaries as 2 resources are necessary to do a 1 man job resulting in not having money to upgrade and maintain infrastructure. Now we as consumers must pay the price AGAIN!! Due to the lack of skills Eskom is not ran efficiently and rather in crisis mode always and again we must suffer for poor cashflow and poor/none project management of construction projects resulting in overruns. Latter also that the unions have to much say at these projects and Eskom not handling it at all.	Ansie	Gauteng		business owner

	2026-01-19 12:33:12	No I do not	All of the above – we should not pay for government blunders	It cannot be my (consumer) responsibility to pay for NERSA's calculation errors and for ESKOM's cashflow and construction delays. Eskom's incompetence has already cost me many thousands of rands directly and indirectly. It is time to STOP.	Nico	Western Cape		employed individual
	2026-01-19 12:32:59	No I do not	All of the above – we should not pay for government blunders	As a South African who has already spent substantial personal and business capital on solar infrastructure to protect my household, employees, and operations from Eskom's chronic instability, I reject outright the notion that electricity users should now be forced to absorb a R76 billion regulatory and accounting failure. Let us be clear: this is not an unavoidable external shock, a natural disaster, or an act of God. This is an admitted miscalculation by Eskom and NERSA—spanning years—now conveniently being reframed as "recoverable depreciation and returns." Calling it a recalculation does not change the underlying reality: it is a mistake, and mistakes have consequences. Those consequences should fall on: • the institutions that made the errors, • the governance structures that failed to detect them, • and the state that oversees them, not on consumers who have already paid escalating tariffs while enduring rolling blackouts. South Africans have not received value for money. We have paid more every year for: • less reliable supply, • declining infrastructure, • economic damage, • and the forced migration to self-generation at our own cost. Many of us invested in solar not as a luxury or environmental statement, but as a defensive measure against regulatory and operational failure. Now, after reducing our reliance on Eskom precisely because of its mismanagement, we are told we must still pay higher tariffs to correct accounting errors that should never have occurred. This sets a deeply dangerous precedent. If regulatory errors—amounting to tens of billions of rand—can simply be retrospectively charged to the public, then: • there is no incentive for accuracy, • no accountability for incompetence, • and no protection for consumers. It amounts to socialising losses while privatising failure.	Eric	Gauteng		business owner
	2026-01-19 12:31:57	No I do not	All of the above – we should not pay for government blunders	Stop the state capture of Eskom. Run it responsibly and it will become cost effective as it has been in the past. We should not have to pay for incompetence and mismanagement. This must stop now.	Marlize	Mpumalanga		employed individual

	2026-01-19 12:28:59	No I do not	All of the above – we should not pay for government blunders	Why should we as ordinary South Africans have to pay for NERSA's blunders? Who calculated these amounts? Let all the government big wigs pay up part of their exorbitant salaries to make up the difference. They are the ones bleeding the country dry. Not us the tax paying, law abiding citizens are supposed to pay for this. Expensive delegation to Davos, travel expenses for the 'adviser' to the Limpopo Provincial government, as mentioned on Carte Blanche last night, who spent an exorbitant amount on flights to the Gambia and so on and so forth. Maybe cut off their electricity supply instead of that of ordinary people who cannot afford to pay their rates and taxes any longer. And please get some real experts to calculate the depreciation of ESKOM's infrastructure and devise plans to pay for upgrading from its own revenue instead of time and again coming to the already overburdened consumers.	Anne Marie	Gauteng		retired
	2026-01-19 12:28:51	No I do not	All of the above – we should not pay for government blunders	Eskom and Nerva should not burden the tax-payer with their errors. These should be absorbed and the people who made the blunders should forfeit their lavish bonuses. The cost of electricity is high enough without taking on rising costs of decaying infrastructure. It would be a different matter if we were being asked to pay for additional renewable energy sources which would decrease costs of electricity over time as they get amortised.	Paul	Gauteng		employed individual

	2026-01-19 12:06:22	No I do not	All of the above – we should not pay for government blunders	My main concern with this whole concept is the mindset and lack of management. Firstly. It is the responsibility of every company to plan for future development. Should that development involve new ventures or the installation of new and improved equipment the cost is never to be transferred to the client or end user. It is the Company ensuring a better service delivery system or product for their customers. Yes, this is beneficial to the clients or customers, however, this falls under the companies “Service Delivery Policy”. It is to attract customers to their business. This happens in a healthy free economical environment. Where competition is a welcome source of inspiration to do better. ESKOM has failed miserably on this account and management has been more concerned about their benefits being meet and not their customers which are the Citizens of South Africa. Secondly: The first downfall of any company is when the company expects their client or customers to bail them out for lack of infrastructure and maintenance thereof. Not only is the suggestion ludicrous it is formatted from a platform that displays and extreme lack of understanding and blatant ignorance. Simply put, the ideology request is a display that those in authority in ESKOM are most certainly, and most definitely the wrong people for the job. If any suggestion to rectify the situation it would be this: Limit the salary of every position of high officials in ESKOM to a reasonable monthly/yearly amount. ESKOM must be answerable for every Rand spent on maintenance, future development, and current projects. ESKOM should be removed from Governmental control and Companies wanting to be in competition with ESKOM should be allowed to exist. If in a competitive market ESKOM would have to perform to keep their customers not just drain the fragile economy of this economy being kept alive by an already cash strapped citizenship. My question is, how do they prance about as they are the answer to the situation they themselves have produced? Now they want us to save and repair their sinking ship which they have not maintained or taken into port to ensure it stays afloat to serve those in the future. No, your incredibly stupid, and I do mean stupid request must never be implemented. If it was, ESKOM should be the last to receive the funding. It should be overseen and implemented by a private company that does not have a single representative in Government. That is where the ANC and ESKOM walk hand-in-hand in their corruptive empires. The President himself, the corrupt, and untruthful Emperor.	Mark	Gauteng		retired
	2026-01-19 12:05:09	No I do not	All of the above – we should not pay for government blunders	The government should learn to manage funds and not line their pockets with our tax money. We've paid our tax to support funds to be distibuted accordingly. If this was mismanaged by government the public should not have to pay for this AGAIN!!	Eunice	Gauteng		employed individual

	2026-01-19 12:01:24	No I do not	All of the above – we should not pay for government blunders	Looking at it in a reasonable way, the public should not be concerned with paying up for a mistake made by incompetant people in Escom. You had the chance to keep the really competant Engineers an technicians and comperant managers up to the highest levels. Now you want us to pay for your political manouvering, to make space for your Cadres and fired all the really good and competant, irrespective of their skin colour. You shoukd have and could have foreseen this mistakes in decision making would happen, NO but you did not realize the magnimity of the very big responsibilty you took on when you made this mistake in decision making, that caused the damages. NO YOU HAVE TO PAY AND YPU HAVE TO REALISE THAT YOU WERE THE CAUSE OF THE MISTAKE. YOU CANNOT FORCE OTHERS TO PAY UP FOF YOUR MISTAKEN DECISIONS.	Josias De Kock	Western Cape		retired
	2026-01-19 12:01:15	No I do not	All of the above – we should not pay for government blunders	Eskom word net te duur die maandelikse vaste kostes oorskry party keer jou verbruik, Jul gaan Baie krag beskibaar he maar geen verbruiker, daar is teveel krag onderbreekings en jy moet steeds jou vastekostes betaal	Giel	Gauteng		retired
	2026-01-19 12:00:55	No I do not	All of the above – we should not pay for government blunders	I personally feel that the burden that was caused by corrupt contracts should be paid back to customers what they stolen through corrupt contractors and that tax paying citizens and PAYING electricity customers should be reimbursed for the unfair electricity PRICE Increases that was imposed on them. ALSO that the losses that electricity customers incurred due to Loadshedding should be paid back to them. It is unfair that a paying electricity customer have to take out INSURANCE to cover the costs of ESKOM'S BLUNDERS. Also if the ANC promised free electricity they can pay those bills themselves. And as far as PRIVATE Solar electricity goes where people paid for it THEMSELVES and the interest on the purchase. I feel that they should be left alone and not punished with rules and fines for taking RESPONSIBILITY for their own use.... As for Eskoms POOR, UNRELIABLE UNTRUSTWORTHY delivery of ELECTRICITY to PAYING consumers. I feel its time they are taken to court for issuing fees to direct contract/municipal customers for electricity NOT PROVIDED for the FULL TIME OF LOADSHEDDING even though they had to pay and that either NERSA OR ESKOM starts paying for these damages. I don't think they deserve any kind of raise what to say a BONUS.	J	Free State

	2026-01-19 11:54:20	No I do not	All of the above – we should not pay for government blunders	Eskom has been very happy to pay out "performance bonuses" to past executives on completely dismal performances that have left the electricity provider in such a terrible state. That is such blatant corruption that those ex-executives should be pursued for the repayment of those funds. That money could then be allocated towards fixing the problems, upgrading the infrastructure, and easing the terrible cost burden on the consumer. Officials of municipalities that have not paid over the funds collected for electricity usage, and indeed have taken that money for themselves and their allies, should also be pursued and have their assets attached. South Africans have been betrayed by past and present government and municipal leeches who are sucking consumers dry. They need to be pursued and made to repay their ill-gotten gains. It's not their money.	Heath	Gauteng		business owner

	2026-01-19 11:47:18	No I do not	All of the above – we should not pay for government blunders	It is impossible to trust any information about or from Eskom. My perception is that the level of corruption is extreme, and consumers are expected to continue paying for erratic service, poor quality service, or no services at all. and to keep filling the coffers so that corrupt politicians and influencers can continue to line their pockets. There are plenty of honest businesses that can take over the running of Eskom and restore it to an ethical practice that supplies reliable, affordable power to South Africa, to grow the economy and address poverty.	Alison			
	2026-01-19 11:46:59	No I do not	All of the above – we should not pay for government blunders	I do NOT agree that the public should be held responsible for ANY government blunder. We are already over taxed and under paid. Rather give us wind turbines and solar so we can at least have a life without these 'blunders'. Eskom is one big blunder in the first place. There is no accountability nor responsibility towards us, the public. How can consenting and 'qualified' groups of people not keep the ageing infrastructure running well? How can a 'blunder' in such vast amount happen in the first place. Let the ones responsible for the 'blunder' pay and make it right. They have billions of their own anyway.	Yvette	Gauteng		self-employed
	2026-01-19 11:46:39	No I do not	All of the above – we should not pay for government blunders	It's time that the people concerned for the blunder (either intentional or incompetence) should be held to account together with every person responsible for their appointment to their positions from which they were able to make such a financial "blunder". 	2026-01-19 11:34:11	No I do not	All of the above – we should not pay for government blunders	I spent a good 2 and a half years on Kusile power station myself and was witness to Eskom inadequacy. They do not execute projects very successfully and consumers and taxpayers have been footing the bill far too long now. Eskom needs to be privatized to make any kind of meaningful difference. Those that do not pay for electricity need to be cut off on an individual basis. This seems like an enormous task but if funding from taxpayers' pockets dried up when it should have the task would seem less insurmountable. Private companies do not get a billion lives, why should taxpayers give failing state institutions so many chances. We could address this with a separation in VAT. Consumers decide where they are willing to pay VAT, certain products VAT should be allocated to certain institutions or consumers can decide which portion of the 15% of the VAT they are willing to pay based on state performance. All state funds should go to operational costs and what is left should go towards equal distribution of salaries.	Richard	Gauteng		employed individual
	2026-01-19 11:33:50	No I do not	All of the above – we should not pay for government blunders	Electricity consumers should not be held accountable for the historical mismanagement of Eskom under the ANC, nor for NERSA's admitted regulatory failures. The R76 billion miscalculation is not a consumer-created problem—it is the result of governance failures, poor oversight, and politically driven mismanagement. Passing this cost onto households and businesses amounts to retroactive punishment for failures entirely outside the public's control. **Affordability:** Consumers should not be forced to pay for NERSA's calculation errors. Regulatory mistakes are an institutional failure and should be absorbed by the entities responsible, not recovered through higher tariffs that further strain already overburdened households and undermine economic growth. **Reliability:** Consumers should not pay full price for aging and unreliable infrastructure. Eskom's persistent load shedding, plant breakdowns, and maintenance failures demonstrate that consumers are not receiving a reliable service that justifies escalating costs. **Efficiency:** Consumers should not be required to fund Eskom's cash flow problems, construction delays, or cost overruns. These are the consequences of years of poor planning, corruption, and ineffective project management. Allowing cost recovery without accountability entrenches inefficiency and removes any incentive for reform. In conclusion, shifting the burden of Eskom and NERSA's failures onto consumers is unjust, economically damaging, and fundamentally unfair. Accountability must rest with those who caused the problem—not the public.	R	Gauteng		employed individual

	2026-01-19 11:19:45	No I do not	All of the above – we should not pay for government blunders	Eskom has been blundering on for over 20 years. Corruption and incompetence are major factors. We cannot accept further increases due to this R76 billion catastrophe. We have to keep electricity affordable. As it is our economy is battling because of very poor governance. The old power stations have been neglected and the construction of the new ones has been poorly managed. 20 years to build a new power station is pathetic. Now Nersa wants us to throw more bad money into the situation. Why should the consumer pay for this extra blunder. Simply put R76 billion divided amongst our population would mean more than R1 billion per person would be required over 1 year or more than R100,000 per person over 10 years average. What utter nonsense.	Peter	Gauteng		retired

	2026-01-19 11:15:27	No I do not	All of the above – we should not pay for government blunders	Accountability is key. If I mess up, I am accountable - apply this and make sure there are checks and balance in place so that money already provided by the general public is used cleverly and with great care. One can't expect to keep asking the same people for money AGAIN. And certainly not in this economy.	Lynn	Western Cape		employed individual
	2026-01-19 11:15:16	No I do not	All of the above – we should not pay for government blunders	Response I am not in favour of consumers being expected to absorb additional costs under the current circumstances. Affordability: Consumers should not be required to pay for NERSA's calculation errors. Regulatory miscalculations are institutional failures, and transferring the financial burden of these errors to already constrained households and businesses is neither fair nor justifiable. Reliability: Consumers should not be expected to pay full price for aging and unreliable infrastructure. Ongoing supply interruptions, load shedding, and deteriorating network performance fundamentally undermine the value proposition of the service being provided. Payment should reflect the quality and reliability of supply, which is currently inadequate. Efficiency: Consumers should not be used to fund Eskom's cash flow challenges or construction delays. Inefficiencies in project execution, cost overruns, and delayed delivery are operational and governance issues that must be addressed internally, not subsidised by end users through higher tariffs. Conclusion: Any proposal that shifts the consequences of regulatory errors, infrastructure decay, or operational inefficiencies onto consumers is unacceptable. Accountability must rest with the institutions responsible, not with consumers who have no control over these outcomes.	Tracey	Eastern Cape		employed individual
	2026-01-19 11:15:15	No I do not	All of the above – we should not pay for government blunders	It is becoming abundantly clear that going off grid permanently is a lot cheaper than relying on the blundering fools who run this country and cannot maintain and keep a simple utility like Eskom operating correctly.	Shayne	KwaZulu-Natal		self-employed

	2026-01-19 11:14:22	No I do not	All of the above – we should not pay for government blunders	Looking at the bigger picture, it is time to realise that the consumer simply can't keep fitting the bill for the blatant gross negligence of Eskom. I understand that the money must come from somewhere, but my suggestion will be to take a deep and hard look internally. Hold those accountable (freeze their pensions) that was found guilty of fraud and corruption, minimise bonusses and increases to top management (because if they did their jobs so splendidly, this error would not have happened!), and look into retrenchments for roles that were merely created for cadres. That alone will put Eskom into a healthy financial position, fitting this bill and then also annually saving those costs. I refuse to keep on being taxed for their errors and then they can't even provide a stable network, not to mention how dilapidated it is!!!	Claudie	Gauteng		business owner

	2026-01-19 11:00:37	No I do not	All of the above – we should not pay for government blunders	It’s time the government take responsibility for its actions, who it appoints to manage etc.	Colin	Eastern Cape		business owner
	2026-01-19 11:00:16	No I do not	All of the above – we should not pay for government blunders	The operational ineptness and ineffectiveness of state and regulatory institutions should never—and cannot—result in unintended consequences that negatively impact the citizens who depend on these institutions to function effectively. This is especially critical as South Africans are already struggling to cope with rising inflation and the escalating costs of basic necessities. In a modern democracy, and given the trust placed in the ruling government, it is the responsibility of the government—together with regulatory institutions—to ensure a stable economic environment where all citizens can live with dignity and access basic needs. Actions that undermine this fundamental right, as protected by our Constitution, are unacceptable. Nersa must collaborate closely with the government to prevent end-users from bearing the brunt of institutional failures.	Danie	Western Cape		employed individual
	2026-01-19 11:00:06	No I do not	All of the above – we should not pay for government blunders	The total amount of is not a mistake, I believe it wasn't made by accident. NERSA told them they could not increase tarrifs as high as what they wanted. Then to offset that tarrif hike they "made" the mistake, to account for the tarrifs they wanted. And how often do they upgrade infrastructure? We as consumers are not taken into consideration when it comes to tarrifs.	Leo	Gauteng		self-employed

	2026-01-19 15:05:17	No I do not	All of the above – we should not pay for government blunders	If NERSA do not know how to do correct calculations, they MUST take responsibility for their mistakes and pay for it. We as consumers cannot keep on paying for ageing, infrastructure. It looks as if they have been doing proper maintenance lately. For many years they fixed old infrastructure the one day and the next day it broke again. Not even to mention all the Eskom money that was stolen by those in management positions since after 1994. There is no money. it was stolen! It took Eskom years and years longer and millions more to pay when they e.g. built the Medupi Power Station, because they used contractors that had no knowledge on especially the technical side.	Elza	Gauteng		retired
	2026-01-19 15:05:11	No I do not	All of the above – we should not pay for government blunders	The proposed electricity tariff increase by NERSA is unjustifiable and places an undue burden on South African households and businesses already struggling under severe economic pressures. With unemployment at persistently high levels and the cost of living escalating across essential goods and services, this increase will further erode disposable income and deepen inequality. South Africans are being asked to pay more for a service that remains unreliable, with load shedding continuing to disrupt daily life and cripple productivity. It is unreasonable to expect consumers to shoulder the financial consequences of mismanagement and inefficiency within the energy sector. Instead of passing costs onto the public, urgent reforms should focus on accountability, improved governance, and investment in sustainable energy solutions. This increase risks stifling small businesses, discouraging investment, and worsening poverty. It is not only economically harmful but socially irresponsible. NERSA's mandate should prioritize affordability, fairness, and the protection of consumers, rather than perpetuating a cycle of higher costs without improved service delivery. 	2026-01-19 14:56:31	No I do not	All of the above – we should not pay for government blunders	RE: FORMAL CONCERN REGARDING NERSA CALCULATION ERROR RESULTING IN R76 BILLION LIABILITY TO ESKOM I hereby wish to formally express my grave concern regarding the recently disclosed tariff calculation error by NERSA, which has resulted in Eskom being under-recovered by approximately R76 billion. While it is acknowledged that Eskom is a critical national utility, it is deeply troubling that an administrative and regulatory miscalculation is now being positioned—directly or indirectly—as a cost to be recovered from electricity consumers. Consumers cannot, and should not, be expected to pay for this blunder. South African households and businesses are already under extreme financial pressure. Escalating electricity tariffs, fuel costs, food inflation, municipal rate increases, and a weak economic climate have stretched consumer budgets to the absolute limit. Any additional monthly expenditure resulting from this error would be unsustainable and unjust. It is a fundamental principle of fairness and good governance that the consequences of regulatory errors must not be transferred to the public, particularly when consumers had no influence, control, or insight into the flawed calculations that led to this shortfall. Passing this R76 billion burden onto consumers would: Further erode public trust in energy regulation, Deepen poverty, Increase the risk of non-payment and illegal connections, Place additional strain on small businesses and job creation, Punish citizens for failures that occurred at a regulatory level. NERSA, as the regulator entrusted with protecting both the sustainability of the electricity supply and the interests of consumers, has a constitutional and ethical obligation to ensure that accountability remains where the error originated. I therefore strongly urge NERSA to: Publicly acknowledge full responsibility for the calculation error, Ensure that no portion of this R76 billion is recovered through increased tariffs or consumer charges, Provide transparent details on how such an error occurred, Implement corrective governance measures to prevent any recurrence. South Africans cannot afford to subsidise regulatory mistakes. Consumers have already paid dearly for inefficiencies within the energy sector, and any further financial imposition of this nature would be both unreasonable and unacceptable. I trust that this matter will be addressed with the seriousness it warrants, in the best interests of the public and the long-term stability of the country's energy sector. Yours faithfully, Andre Oberholzer	Andre	Mpumalanga		employed individual

	2026-01-19 14:25:49	No I do not	All of the above – we should not pay for government blunders	Firstly, all individuals directly involved in the miscalculation should be removed from the process. An error of this nature indicates a significant failure of competence and accountability, and if it has occurred once, there is a substantial risk of recurrence. Secondly, the relevant management personnel overseeing this function should also be removed, as it is their responsibility to ensure adequate oversight, verification, and quality control of all calculations and outputs. Thirdly, independent practitioners should be appointed to undertake the calculations. These practitioners must have a proven track record and demonstrable experience within the energy sector. Appointments should be based solely on competence and credibility, without discrimination, whether the practitioners are local or international, provided the work is executed accurately and to the required standard. Lastly, the process should be initiated to allow for independent energy producers to participate, including the potential revival, acquisition, or partial ownership of failing Eskom infrastructure, in order to stabilise and strengthen the energy supply sector	PJ	Mpumalanga		business owner

	2026-01-19 14:07:47	No I do not	All of the above – we should not pay for government blunders	Cashflow management, infrastructure maintenance and refreshing of ageing equipment are all part of proper business practices. This should not be used as a reason to burden consumers, especially where the consumers are already paying much more than what they get. Electricity prices in South Africa have doubled every 3-4 years, due to massive increases, yet service has not been improved and loadshedding has been avoided by utilising expensive alternatives, instead of cutting bonuses and planning for proper support and maintenance. Consumers are being forced into investing in alternative solutions like solar due to the instability of the power supply. The consumers are tired of financing inefficiency and corruption and soon there will be no consumers left for Escom to milk. because consumers have made alternative arrangements for a stable power supply. Nersa will become just as irrelevant as the disaster it is trying to protect. We, the people, demand that you, the people who are supposed to work for us and whose salaries we pay, put OUR needs first.	Charles	Western Cape		retired

	2026-01-19 14:05:58	No I do not	All of the above – we should not pay for government blunders	Adjusting the tariff base to recover revenue in this manner appears to shift the consequences of governance and operational shortcomings onto consumers. Households and businesses are already under significant cost pressures, and further increases risk accelerating demand destruction, encouraging grid defection, and shrinking the paying customer base. This outcome would undermine long term sustainability rather than resolve the underlying problem. Before any additional burden is placed on consumers, Eskom should demonstrate credible, measurable progress on core drivers of inefficiency and cost escalation, including: - Strengthened controls and consequences for corruption and procurement irregularities - Improved financial discipline and cost containment - Transparent accountability for management decisions and performance - Operational improvements that reduce losses and improve reliability In short, consumers should not be asked to compensate for internal failures through base adjustments. Tariff decisions should be grounded in efficient, prudent costs and aligned to the principle of fairness. Accountability and corrective action must precede further increases! 	2026-01-19 14:02:01	No I do not	All of the above – we should not pay for government blunders	Why are we, the consumers, being asked to pay for NERSA's calculation error?? I therefore DO NOT ACCEPT a further increase in electricity tariffs. I strongly believe that 1) Eskom's asset values need to be capped to keep electricity affordable. 2) I strongly OBJECT to the redetermination of which power stations are included in the tariff and therefore being forced to pay higher tariffs for power stations near the end of their lifespan or prone to frequent breakdowns. 3) I definitely DO NOT AGREE that the consumer should carry the additional financial burden of funding Eskom's incomplete construction projects and operational cash flow through increased electricity prices. Eskom has a dismal history of corruption in construction projects to this day, resulting in massive delays and ballooning costs due to incompetent or fraudulent contractors. Instead of continuing to burden the taxpayer, Eskom needs to get its own house in order by implementing proper and stricter controls and realistic cost-saving methods, especially with regard to the use of external contractors. 	2026-01-19 13:54:05	No I do not	All of the above – we should not pay for government blunders	All the State-owned enterprises are poorly run, and the costs are simply deferred to the citizens of the country, in this case, to all citizens who use electricity, even those who live below the bread line. In the private sector customers would not accept having to absorb the cost, and they would vote with their feet and find another supplier, but, of course, the majority of South Africans cannot afford the alternatives for electricity. At some point Eskom needs to be held accountable for its mismanagement. The people who made the 'mistake' and those who failed to put the necessary checks and balances in place should be suffering the consequences, not to mention those in management roles who are still awarded large annual bonuses. This is a serious issue and, if the consequences thereof are passed on to consumers, it will cause a ripple effect in the economy our country cannot afford.	Bernice	Gauteng		self-employed
	2026-01-19 13:53:18	No I do not	All of the above – we should not pay for government blunders	Why should the taxpayers and pensioners bear the brunt of Eskom failures. It was once fully functional but then government decided to take over and … they got rid of the people who kept it running. Filled it with incompetence and ghost workers. Looted funds. So no!!! The public is not responsible for their actions. Fix your own mess.	Cheryl	Western Cape		retired
	2026-01-19 13:52:38	No I do not	All of the above – we should not pay for government blunders	Escom is not a reliable source anymore. Too much corruption. Costing the end consumer.	Joseph	Gauteng		employed individual

	2026-01-19 13:17:46	No I do not	All of the above – we should not pay for government blunders	We pay very high income tax, we also pay very high VAT, and we also pay very high rates and taxes. Our rates and taxes have even recently had an additional Energy fee of a few hundred rands added to our overall rates and taxes bill. How much can the government expect its citizens to pay, when so much is lost due to corruption and incompetence? When will the government realise, that at some point, its citizens will have nothing left to survive, and will then embark, out of desperation, on a Tax Revolt? There is plenty of money available in goverment. If money is needed, all the government has to do is significantly reduce government and SOE bloated staffing, corruption and inefficiency. There is so much of this, that if the government addressed this honestly and energetically, there would be enough to sort out the problems with SoEs, as well as reduce taxes. Instead, the government just keeps taking more from an ever poorer middle class	Julian	Western Cape		employed individual
	2026-01-19 13:17:04	No I do not	All of the above – we should not pay for government blunders	I am tired of suffering because goverment doesn't know what they are doing!!!!!	Tanya	KwaZulu -Natal		employed individual

	2026-01-19 13:11:54	No I do not	All of the above – we should not pay for government blunders	Mistakes, fraud, and corruption wherever you look. It is unacceptable that I should pay for others' mistakes, corruption and theft. Institutions should take responsibility for themselves and stop milking the consumer. Incompetent ministers, CEOs and CFOs should be fired and the criminal sent to jail. I have spent thousands and thousands of rands to generate my own energy as far as possible, contributing to the country's better energy supply at the moment. I am not prepared to yet, pay for somebody else's trouble. I have done my bit through and through.	Corneli	Gauteng		self-employed
	2026-01-19 13:11:30	No I do not	All of the above – we should not pay for government blunders	We the taxpayers and consumers have been continously been punished for governments mistake without any consequences for those who responsible for the mess caused. Enough is enough! They need to go find the money elsewhere	Reyan	KwaZulu-Natal		employed individual
	2026-01-19 13:11:08	No I do not	All of the above – we should not pay for government blunders	We have suffered a lot during loud shading,no more suffering especially with this high unemployment rate,if that family is lucky one or two members are the only bread winners.	Kolrkile	Eastern Cape		retired
	2026-01-19 13:10:51	No I do not	All of the above – we should not pay for government blunders	Below is a reasoned objection to the National Energy Regulator of South Africa's (NERSA) proposal to allow Eskom to recover an additional R76 billion through higher electricity tariffs. The objection draws on the issues highlighted in the Dear South Africa summary and the latest reporting on the matter. Background NERSA published a consultation paper on 30 December 2025 and gave the public until 21 January 2026 to comment. The paper proposes that consumers pay an extra R76 billion to compensate Eskom for errors NERSA made in its previous tariff determination. This figure is about 40 % higher than the secret R54 billion settlement NERSA reached with Eskom in July 2025, which the High Court refused to confirm. The R76 billion comprises R62 billion in depreciation (reflecting the value of Eskom's generation assets) and R14 billion in returns. It would be recovered through tariff increases from 1 April (Eskom customers) and 1 July (municipal customers). According to energy expert Matthew Cruise, the consultation process is rushed (it excludes the usual in-person public hearings) and effectively shifts responsibility for NERSA's mistakes onto the public. Cruise notes that most of the R76 billion relates to depreciation of power plants that were built at costs three times higher than budgeted and questions why consumers should foot the bill for these inflated costs. Objection Claim: NERSA should not approve the proposed R76 billion recovery because it unfairly burdens consumers for mistakes and inefficiencies while undermining affordability and economic stability. Reasoning: Regulatory errors should not be passed on to the public. NERSA admits that its earlier determination omitted the closing balance of the previous period and miscalculated the value of Eskom's regulatory asset base. Eskom argued it was short-changed by R107 billion, and the High Court instructed NERSA to redo the calculation and consult the public. Shifting these errors onto consumers—especially through a rushed consultation over the holiday period—would reward poor regulation rather than hold the regulator accountable. As Cruise points out, the consultation appears designed to justify why Eskom is owed more, rather than protect consumers. Consumers would pay for inflated and unreliable assets. Around R62 billion of the R76 billion relates to depreciation of Eskom's power stations. Many of these plants were built at costs far above their original budgets and are prone to frequent breakdowns. Forcing consumers to pay higher tariffs to cover the full value of ageing or unreliable assets is unreasonable. The Dear South Africa summary asks whether asset values should be capped to keep electricity affordable; capping values or excluding plant costs that exceed efficient benchmarks would be more equitable than paying for Eskom's over-runs. Financing work-in-progress and working capital via tariffs is unfair. Part of NERSA's proposed adjustments would allow Eskom to recover billions for projects still under construction and for operational cash-flow needs (working capital). These are costs associated with management decisions and incomplete projects; they should be funded by Eskom's shareholder (the government) or through capital markets, not by households and small businesses already struggling with load-shedding and high electricity prices. The increase would impose a severe economic burden. Without the R76 billion, tariff increases for 2026 would have been around 5.36 %, but the proposal could raise tariffs by around 10 % to 10.5 % this year and next. Cruise warns that such increases would mean average rises of about 15 % a year over five years. Advocate Stefanie Fick from the Organisation Undoing Tax Abuse (Outa) notes that electricity is already unaffordable; higher tariffs leave households with less cash for essentials and cause businesses to close. Passing the full cost on to consumers would deepen poverty, deter investment and hinder economic recovery. Transparency and fairness are lacking. NERSA and Eskom negotiated a R54 billion settlement in secret, only made public after media exposure. Civil groups like AfriForum argue that this secrecy undermines constitutional principles of transparency and accountability. Fick stresses that NERSA should not "capitulate and grant whatever Eskom is asking" and must consider its mistakes before approving any increase. The rushed consultation (from 30 December to 21 January) and absence of in-person hearings suggest that public participation has been inadequate. Approving the R76 billion under these conditions would violate the requirement in the Electricity Pricing Policy to balance the interests of customers, licensees and the public. Conclusion: Given that the R76 billion request stems largely from regulatory errors and Eskom's inflated asset costs, approving it would unfairly penalise consumers who have no control over these mistakes. The proposed increase is also out of step with the economic realities facing households and businesses. NERSA should: Cap or reduce the value of Eskom's assets to exclude cost overruns and write down ageing, unreliable plants. Refuse to pass the cost of work-in-progress and working capital onto tariffs. Spread any unavoidable adjustments over a longer period to avoid tariff shock, keeping increases close to the originally approved 5.36 % for 2026. Conduct a proper public participation process with adequate notice and in-person hearings. Require Eskom to demonstrate concrete progress in curbing corruption, reducing costs and improving plant performance before granting any further revenue recovery. By addressing these points, NERSA can uphold its mandate to protect consumers while ensuring the sustainability of the electricity supply industry.	Cornelis	Gauteng		employed individual

	2026-01-19 13:01:48	No I do not	All of the above – we should not pay for government blunders	The Government should stop making use of contractors and start employing qualified staff to do regular scheduled maintenance. They must also stop financing poor performance of high ranking officials, stop having lavish parties and over budget on expensive treats when attending meetings. It looks more like these mistakes are deliberate to bring this country inline with the New World Order agenda. Implementing policies being dictated to, is not helping South Africa but those dictating foreign powers that which to control the entire world and Africa will always be kept on the back foot. They will always leech upon Africa to keep Africa poor and corrupt Government officials siding with such powers against the interest of South Africa need to be dealt with. As long as South Africa is coupled to the $, this country will stay in debt and sanctions will always lay at their door step. Already, groups are being paid to cause division within our country to bring this country to a civil war. We need a Government that can prove and stand firm against these unscrupulous dictators of these rogue states that think they have a right to kidnap any Government. We need their bases to be removed from our soil as well as all their NGO's. They are here to help themselves, not our people. We earn in Rands but are forced to pay in $ through price comparisons, even our properties have been escalated to the dollar rate. It is time this country be run on South African policies with the Rand earning and spending. No one wants war but we cannot be dictated to in fear of war and allow the enemy to control because their control has proven to have no end to poverty while their country flourish from the seeds of this soil. So, NO to these tarrif increases. Deal with those staff that caused these blunders and it should be deducted from their salaries. The corruption will never stop as long as these culprits are not being taken to task and forced to pay back. The poor gets poorer while the Corruptor's gets richer with a pat on the back for a job well done plus a promotion or moved over to another sector to continue their corruption. This has to stop and Parliament has become an old age home as well while the citizens are forced to retire from the government jobs, why? Because they have to make room for the younger generation, Parliament too need to go on retirement to make room for young fresh minds that has the guts to stand firm against foreign power interferences. They can go and have their afternoon nap on their comfortable bed instead of sitting sleeping while Parliament is in process. These continues high tarrif increases and failure to do schedule maintenance is well planned to cripple this country and to make the people dependent on government. When a the hungry is dependent on the meagre handout of a government, they are easier to control because they will look pass the corruption and continue to vote for the Corruptor's until they reach a boiling point. GOD is Ever Watchful of what you do, no matter if you might not believe in HIM but to HIM, you return and answer for your deeds.	Shahieda	Western Cape		retired

	2026-01-19 18:13:20	No I do not	All of the above – we should not pay for government blunders	After over 20 years in SA I still cannot understand how a public institution can make such blunders. I would question all parties involved in the process from State officials to Eskom and auditing firms. We as a public have not benefited in any way for the way Wskom have been running their affairs, if anything poor/medium/high income households have all suffered one way or the other. The wealthier have had to pay more and in some instance find a way to reduce their reliance on eskom as a power generator. Others less fortunate are left with irregular power delivery at an horrendous cost. The issue is of course even if eskom were to absorb the 76bn loss, the tax payer would be left to foot up the bill further down the line anyway. So the greater question is one of accountability and implement performance quotas that in all departments that would make eskom employees to want to do more. However simply covering a mistake by asking people who have had no say or no control over the affairs at eskom seem to be the local steps taken by the utility company, its management and the Min of Electricity. Appalling behaviour.	Frederic	Western Cape		business owner

	2026-01-19 18:01:31	No I do not	All of the above – we should not pay for government blunders	Disgrace! Another example where customers have to cough up for Eskom's financial blunders.	Georg	Gauteng		self-employed
	2026-01-19 18:01:30	No I do not	All of the above – we should not pay for government blunders	I understand that NERSA is required to re-calculate Eskom's asset values following the court ruling. However, I am concerned about the impact this has on electricity users. It does not feel fair that consumers are being asked to pay higher tariffs to recover depreciation and returns linked to past calculation errors and to assets that are already old, unreliable, and clearly losing value. As a customer, I do not experience these assets as delivering a service that justifies higher costs. Electricity users are already under significant financial pressure, and I do not believe it is reasonable for households and businesses to fund past mistakes, construction delays, or compensation based on outdated asset valuations. For these reasons, I do not support tariff increases that require consumers to pay more for depreciating infrastructure or to cover errors that were not of their making.	Paige	Western Cape		employed individual
	2026-01-19 18:01:25	No I do not	All of the above – we should not pay for government blunders	I do not see why consumers must pay for NERSA's calculation errors and Eskom mistakes and for infrastructure and assets. They should have managed there assets and process better . Who is being held accountable for this calculation error, but they quick to just drop it on the consumer.	Panayiota	Gauteng		retired
	2026-01-19 18:01:06	No I do not	All of the above – we should not pay for government blunders	Why should we continuously be burdened by governmental ineptitude. Tired of footing the bill for consequences of actions and mistakes I never made.	Jonathan	Western Cape		employed individual

	2026-01-19 16:59:59	No I do not	All of the above – we should not pay for government blunders	Eskom overpays their staff horrendously, has far too many staff for the workload, and none of them are looking after the companies interests, just waiting for payday while looking busy. It has appointed unsuitable people to responsible positions leading to wasted expenditure, paying two or three times for the same problem. Contractors take money and never complete the work and there is no consequence for staff mistakes, except delays, and reissuing new contracts trebling, quadrupling, and multiplying costs. They are losing skilled personnel and institutional capabilities through prioritizing race, bribery and connectivity while abandoning merit as a reason for promotion. And almost all of the fixes are window dressing. There is insufficient expertise present and never can be while political connectivity and corruption is the deciding factor of who gets the job, or the promotion, or the contract.	Michael	Gauteng		business owner
	2026-01-19 16:59:18	No I do not	All of the above – we should not pay for government blunders	Enough is enough This milk cow has just dried up. Pay for your own incompetence	Irma	Gauteng		retired

	2026-01-19 16:47:09	No I do not	All of the above – we should not pay for government blunders	To: mypd@nersa.org.za Attention: The Energy Regulator, NERSA 1. Introduction and Public Interest Standing This submission is made by a civil society / consumer-interest stakeholder concerned with the affordability, transparency, and long-term sustainability of South Africa's electricity system. Electricity tariffs have direct and significant impacts on households, small businesses, municipalities, and essential public services. Decisions on Eskom's Regulated Asset Base (RAB) and allowable revenues must therefore be taken with particular care to ensure that consumers are not required to fund inefficiency, procedural non-compliance, or avoidable regulatory error. We welcome the opportunity to comment on the Consultation Paper on the Re-determination of Eskom's MYPD6 Generation RAB, following the High Court judgment of 21 December 2025. 2. Overarching Civil Society Concerns 2.1 Affordability and Equity Electricity consumers have experienced sustained tariff increases over many years, often well above inflation, while reliability has declined. Any further upward pressure on tariffs must therefore be strictly justified, demonstrably prudent, and consistent with the Electricity Regulation Act's requirement to safeguard the interests of present and future users. 2.2 Eskom Non-Compliance and Consumer Risk A central concern in this re-determination is Eskom's failure to submit an updated asset valuation as required by the MYPD methodology. Allowing returns and depreciation on an unverified RAB materially increases the risk of over-recovery at consumer expense and weakens incentives for regulatory compliance. 2.3 Regulatory Accountability and Institutional Learning Civil society notes that the High Court's remittal arises not from policy disagreement, but from identified procedural and substantive defects in NERSA's original determination and the subsequent settlement process. While the judgment requires reconsideration, it does not require that the financial consequences of regulatory error be transferred to electricity consumers. Accountability in this context must therefore take the form of explicit corrective safeguards, rather than attribution of blame. These safeguards should include conservative regulatory assumptions, clear acknowledgment of informational gaps created by Eskom's non-compliance, and firm conditions preventing the repetition of settlement-driven deviations from prescribed processes. Absent such measures, there is a material risk that consumers will be required to fund not only Eskom's inefficiencies, but also the consequences of regulatory process failures—an outcome incompatible with the principles of administrative justice, transparency, and fairness that underpin economic regulation. 3. Responses to Stakeholder Questions Stakeholder Question 1: Generation RAB Composition From a consumer perspective, the Generation RAB should exclude or appropriately discount assets that are persistently unavailable, materially underperforming, or not demonstrably contributing to reliable electricity supply. Consumers should not be required to pay returns on assets that fail to deliver commensurate public value. Stakeholder Question 2: Asset Inclusion and Avoiding Undue Compensation a) Power stations with chronic performance challenges and no credible recovery plans should not attract full RAB recognition for return purposes. b) To avoid undue compensation, NERSA should apply conservative valuation assumptions, withhold inflationary uplifts where asset data is outdated, and reflect Eskom's non-compliance through reduced or deferred revenue recognition. Stakeholder Question 3: Valuation Approach and Regulatory Discretion Civil society supports a consumer-protective valuation approach that relies on the last approved valuation without enhancement and avoids retrospective correction in Eskom's favour for its own submission failures. Regulatory discretion should operate to protect the public interest, not to neutralise the consequences of non-compliance. Stakeholder Question 4: Depreciated Replacement Cost (DRC) While compliance with the High Court ruling is acknowledged, acceptance of Eskom's applied-for DRC should be treated as provisional. NERSA should explicitly reserve the right to correct RAB values once a compliant valuation is submitted, to prevent long-term over-recovery by Eskom. Stakeholder Question 5: Transfers to Commercial Operation Restricting transfers to genuinely expansionary, new-build assets is appropriate and supported. To protect consumers, transfers should remain at historical cost, cost overruns should be excluded unless independently justified, and NERSA should retain the ability to claw back unjustified amounts through future RCA mechanisms. _____ Stakeholder Question 6: Work Under Construction (WUC) The exclusion of outage-related capital expenditure from WUC is supported. Including such costs would inappropriately shift operational and execution risk from Eskom to consumers and weaken incentives for efficient project delivery. _____ Stakeholder Question 7: Net Working Capital Civil society strongly supports the continued disallowance of coal stockpiles exceeding policy limits. Excessive stockpiling arising from project delays represents management and execution risk and should not be socialised through electricity tariffs. _____ Stakeholder Question 8: Asset Purchases Maintaining asset purchase values in line with historical trends is acceptable, provided purchases are demonstrably linked to system reliability and subject to post-approval verification to prevent inappropriate capitalisation. _____ Stakeholder Question 9: Aggregate RAB and Revenue Impact The proposed award of an additional R76 billion over the MYPD6 period is material from a consumer affordability perspective. Civil society urges NERSA to ensure that every component of this adjustment is strictly justified and that Eskom's non-compliance is explicitly reflected in the regulatory treatment applied. _____ Stakeholder Question 10: Deviation from PAJA Timelines While the urgency created by the court order is acknowledged, deviations from PAJA norms should be clearly framed as exceptional and non-precedential. Reduced consultation periods heighten the importance of transparent reasoning and substantive engagement with stakeholder submissions in the final Reasons for Decision. _____ 4. Conclusion Civil society recognises the importance of a financially sustainable Eskom. However, sustainability must be achieved through lawful process, disciplined regulation, and accountability, not by transferring avoidable risks and errors to consumers. This re-determination provides an opportunity for NERSA to demonstrate institutional learning, reaffirm regulatory credibility, and clearly signal that neither inefficiency nor procedural failure will be rewarded through electricity tariffs. _____ Yours sincerely, Ikbal Kolia Civil society / consumer-interest stakeholder South Africa	Ikbal	Gauteng		retired
	2026-01-19 16:46:49	No I do not	All of the above – we should not pay for government blunders	They have a damn nerves to fleece us because THEY made a mistake. It's daylight robbery	Avril	Western Cape		retired

	2026-01-19 16:10:45	No I do not	All of the above – we should not pay for government blunders		Riana	Gauteng		employed individual

	2026-01-19 16:10:41	No I do not	All of the above – we should not pay for government blunders	As a South African taxpayer and electricity consumer, I strongly object to any proposal that seeks to transfer the financial consequences of institutional incompetence onto the public. The reported R76 billion miscalculation is not the result of consumer behaviour, overconsumption, or misuse of electricity. It is the result of errors made by NERSA and Eskom at executive and regulatory level. In any functioning system of accountability, such errors would be absorbed by the institution responsible or addressed through consequence management, not recovered from citizens who are already under severe financial pressure. 1. Affordability It is unjust, irrational, and economically destructive to expect households and businesses to pay higher tariffs to correct calculation errors they neither caused nor benefited from. South Africans are already facing rising food prices, fuel costs, unemployment, and declining real incomes. Passing this cost onto consumers amounts to punishing the public for governance failures. 2. Reliability Consumers are being asked to pay full and increased prices for electricity supplied through aging, unreliable infrastructure, characterised by load shedding, outages, and declining service quality. No private consumer would accept a price increase for a product that is consistently unavailable or defective. Electricity should be no different. 3. Efficiency Electricity tariffs should reflect efficient operations and prudent financial management, not compensate for cash flow crises, construction delays, or historic mismanagement. Allowing consumers to fund inefficiencies creates a dangerous precedent that removes all incentive for operational discipline, cost control, and accountability at executive level. South Africans should not be expected to finance regulatory mistakes, accounting failures, or governance shortcomings. Any tariff determination that includes recovery of this R76 billion error represents a fundamental failure of public accountability and undermines trust in the regulatory process itself. I therefore strongly urge NERSA to: • Exclude all costs arising from calculation errors from tariff determinations • Enforce accountability on responsible parties • Protect consumers from bearing the financial burden of institutional failure Electricity is an essential service, not a blank cheque for incompetence. Enough is enough!	Sheldon	Gauteng		
	2026-01-19 16:10:21	No I do not	All of the above – we should not pay for government blunders	Corruption is still rife at Eskom, and it is bloated by at least one-third of the people working there, many being ghost workers or incompetent employees, who are just there to collect a large salary. For those who are conscientious and qualified, and who take their work seriously, my full support.	Vernon	Gauteng		retired

	2026-01-19 15:50:15	No I do not	All of the above – we should not pay for government blunders	In 2003 ESKOM requested Government to start building a nuclear power station. The government say no due to the white paper of 1997 stated that the Government will diversified supply of electricity. The government did nothing. In 2009 the government realized that there is a serious shortage of energy in SA. ESKOM pay 75% of the cost of new power stations to refurbished existing power station. New power stations have a live of 40 years. Refurbished power station only have a 15 year live. ESKOM closes some of them down after 5 years of use. What a waste of consumer money. Only the ESKOM mafia scored. The government did nothing about the Mafia. Rail transport is cheaper than road transport but the government support road transport to keep their friends happy. In 2011 the government instructed NERSA that industry must cross subsidized residential tariffs. Thus, the government achieve cheaper residential electricity but did not informed consumers that they will started to loose their jobs. The competitive advantage of industry in SA was electricity. Big business and energy intensive users close their doors and unemployment increased to over 40% due to NERSA and government. The result that energy intensive users close their doors did have an catasrofic impact on ESKOM in that the baseline consumption (24/7 consumption) was reduce. The consumers that reduce the load for ESKOM during peak hours did close their doors. Thus, ESKOM invented of "banking" of boilers which resulted in the production cost of electricity increase to the highest in this world. It is time to privatise ESKOM but the government also not doing that to allow more monies to be stolen. The public and industry simply can not afford higher energy cost in SA.	Bert	Gauteng		retired
	2026-01-19 15:49:13	No I do not	All of the above – we should not pay for government blunders	Why must the honest users continually be burdened with theANC organisations blundering of coffers and expect others to pay	Kenwyn	Western Cape		retired
	2026-01-19 15:48:44	No I do not	All of the above – we should not pay for government blunders	Greetings..... We as citizens are tired of bankrolled Eskom . They keep raising tariffs and electricity is no longer affordable especially to the poor and middle class. The R 100 units for the poor use to last for a month and today they take only 3 to 5 days meaning the poor must pay R 400 for electricity when they are earning R 370 .....so do you want to tell me they have to survive on R 30 per month ?? 	2026-01-19 15:47:03	No I do not	All of the above – we should not pay for government blunders	Here's a possible response to the petition: Subject: Objection to Proposed Electricity Price Increase Dear NERSA, I strongly object to the proposed electricity price increase. The R76 billion mistake made by Eskom should not be passed on to consumers. As a ratepayer, I should not be held responsible for errors made by Eskom and NERSA. Regarding the questions posed: 1. Affordability: No, I should not pay for NERSA's calculation errors. The mistake should be absorbed by Eskom and NERSA, not consumers. 2. Reliability: No, I should not pay full price for aging, unreliable infrastructure. Eskom should prioritize maintenance and upgrades to ensure reliable service. 3. Efficiency: No, consumers should not fund Eskom's cash flow and construction delays. Eskom should manage its finances efficiently and prioritize critical infrastructure investments. I urge NERSA to reconsider the proposed increase and ensure that consumers are not unfairly burdened with the costs of Eskom's mistakes.	Justin	Mpumalanga		unemployed individual

	2026-01-19 15:32:47	No I do not	All of the above – we should not pay for government blunders	As with all government responsible arenas, the government have failed us once again. The Post-office, Railway lines, SAA, and most of the current municipal services, is all in a bad or failed state due to the inability of the government to budget, and maintain. corruption is rampant, high bonusses paid to executives for no reason, and excess of workers eats the budget. The electricity services of ESKOM should be sold to the private sector. It will be much better for the South African economy.	Madelein	Mpumalanga		employed individual

	2026-01-19 15:32:30	No I do not	All of the above – we should not pay for government blunders	The Eskom R76 Billion Mistake: Consumers Refuse to Pay The so-called R76 billion “mistake” by Eskom and NERSA is not a consumer problem, and consumers should not be forced to pay for it through higher electricity tariffs. This issue goes to the heart of affordability, reliability, and efficiency. Affordability: Why should households and businesses pay more because Eskom and NERSA failed to correctly account for depreciation and returns in the past? Consumers did not make this error and should not be punished for institutional incompetence. Reliability: Why should consumers be charged higher prices to support aging, unreliable infrastructure that continues to deliver load shedding, breakdowns, and poor service? Higher tariffs without improved reliability are unjustifiable. Efficiency: Why should consumers be expected to fund Eskom’s cash-flow problems, cost overruns, and construction delays? No efficient, well-run company shifts the cost of its mistakes directly onto its customers after the fact. Consumers have already paid high electricity prices for years. These prices were not limited to covering Eskom’s operating costs; they included returns and profits. Like companies in every other sector, Eskom did not price electricity merely to break even. To now claim that depreciation and returns were “omitted” and must be recovered retrospectively is disingenuous. Eskom and NERSA benefited from these pricing decisions at the time. The consequences of their inaccuracies must rest with them. Collectively, we reject any attempt to recover the R76 billion from consumers through tariff increases. NERSA and Eskom must be held accountable and must absorb the cost of their own error. Consumers must say: No way.	Dion	Gauteng

	2026-01-19 15:27:12	No I do not	All of the above – we should not pay for government blunders	The citizens are drained by the goverment and there taxes.	Deon	Western Cape		self-employed
	2026-01-19 15:27:10	No I do not	All of the above – we should not pay for government blunders		Johan	North West		retired
	2026-01-19 15:27:09	No I do not	All of the above – we should not pay for government blunders	The government and Nersa are not fair to the consumers. The electricity is too up already for us (consumers) to pay for.their mistake is too much and out of line. We are struggling to buy electricity that will last for a month and there is nothing the government is doing. Am saying no to pay for the government	Constance	Gauteng		
	2026-01-19 15:26:58	No I do not	All of the above – we should not pay for government blunders	We should not pay for government blunders!!! It is wrong to force South African energy users to pay Eskom an additional R76 billion for its mistakes. What would motivate them to do better in future, it they do not have to face the consequence of their own mistakes?	Rene	Western Cape		self-employed
	2026-01-19 15:26:38	No I do not	All of the above – we should not pay for government blunders		Natasha	Mpumal anga		employed individual
	2026-01-19 15:26:37	No I do not	All of the above – we should not pay for government blunders	Absolutely atrocious, this is unacceptable for the consumer to fit this bill. We have kids with special needs and requires certain high value meds on a monthly basis, the municipality wont accept liability for this so why must we do the same.	Neevaj			employed individual
	2026-01-19 15:26:30	No I do not	All of the above – we should not pay for government blunders	The South African tax paying public is just sick and tired of being burdened by failing governments theft, lack of control over wasteful spending and general inability to make good decisions. It's time for the public to gain autonomy over our own finances and not to be held responsible for bad politicians and their lack of brains, ears, capability, selfishness, narcissism and many other destructive faults. It's time for us to exercise our rights as citizens to hold politicians to account personally. Not a cent more!	Karin	Western Cape		
	2026-01-19 15:25:46	No I do not	All of the above – we should not pay for government blunders		Eileen	Western Cape		retired

Since 2024 they are on a path of destruction and their BEE policies are killing their own people and enriching the incompetent politically connected.	Joachim	Free State		retired
	2026-01-20 05:09:37	No I do not	All of the above – we should not pay for government blunders	An operational error is not the consumer's error and should be absorbed by Eskom or NERSA. Eskom should've been privatised a long time ago. Pricing according to the law is the price advertised and is the price you pay, which means the company carries the loss and staff needs to be corrected for not doing their jobs in a case like this a company can't afford to have staff even remain in those positions (that would mean from the top to the bottom as management approves coworkers targets, budgets and proposals before implementations) and Annually there has been astronomic price increases that are not sustainable as it is much higher than inflation. As salaries aren't increasing at the same rate, it just means the consumers won't be able to afford using electricity anymore. If a company doesn't look after their customers, there is no company.	Karin	KwaZulu-Natal

	2026-01-20 05:05:10	No I do not	All of the above – we should not pay for government blunders	Please stop taking from hard working voters and citizens the food right out of our mouthes. We cannot live life with this liabilities of taxes and inefficient state enterprises anymore. Eskom should make money for tax coffers and not be the burden to both consumers and government budgets. Please, please, please hear our voice and concerns!	Vidiah	Western Cape		employed individual
	2026-01-20 05:04:43	No I do not	All of the above – we should not pay for government blunders	This is the only aspect that I agree with Julius Malema in; pay back the money! Why should we find more theft? Pay back the money and deal with illegal connections. In other words, take responsibility. If the cANCer wasn't to govern, govern, stop being revolutionaries. Remember cANCer, you are no longer fighting the whites. Your own people are suffering too, the very people who, stupidly, put you in power.	Denise	Eastern Cape		retired
	2026-01-20 05:03:29	No I do not	All of the above – we should not pay for government blunders	Eskom is boasting about a 16Bil profit they made, if memory serves me correct, So why dont they use that to offset that what they screwed up on.. Or are they, as usual, scared by doing this, they wont be able to pay themselves the so called "performance" bonuses they keep paying themselves Typical bunch of Gov thieves	Anton	Gauteng		
	2026-01-20 05:02:26	No I do not	All of the above – we should not pay for government blunders		Dallas	KwaZulu -Natal		unemployed individual
	2026-01-20 05:02:05	No I do not	All of the above – we should not pay for government blunders	The failing of poor governance is again being burdened on us. The position is outrageous that the situation has developed from graft, corruption and incompetence of many previous ministers, ESKOM employees and consultants who have deliberately defrauded the South African tax payers for years and placed us in this position. NOT ONE person has been held to fully account and we still have an old, inefficient and deficient electricity generation, transmission and distribution system in place. We have the capacity to move individual consumers to sustainable solutions but ESKOM and government are resisting this by any means as they need us to cover the costs of their corruption. Sadly regardless we will end up having to pay either by tariff increases or indirect tax increases. I am so sick and tired of this government, I cannot wait to vote out this party and try move on from their outdated doctrine.	Michael	Gauteng		employed individual

	2026-01-20 04:47:50	No I do not	All of the above – we should not pay for government blunders	At this level of governance and financial oversight, such an error is simply unacceptable. A miscalculation of R76 billion is not a minor oversight—it represents a fundamental failure in due diligence and accountability. Furthermore, once a tariff structure or financial position has been presented and relied upon, it cannot simply be revised after the fact to recover losses caused by internal errors. In any other commercial environment, a supplier cannot reprice a product or service retrospectively because of a mistake in their own calculations. Yet, instead of absorbing the consequences of these errors, Eskom and NERSA now propose that consumers carry the financial burden through higher tariffs, under the guise of “depreciation” and “returns” that were previously omitted. In effect, you and I are being asked to pay for a mistake we did not make—a situation that is neither fair, reasonable, nor consistent with basic principles of accountability and consumer protect	Cornel	KwaZulu -Natal		employed individual
	2026-01-20 04:45:55	No I do not	All of the above – we should not pay for government blunders	Why should the public be paying for theft by the government. This should be absorbed by Eskom and the government.	Pradhip	Gauteng		self-employed

	2026-01-20 04:09:48	No I do not	All of the above – we should not pay for government blunders	1. It would be very much unfair for Nersa to make the public foot the bill for their failure to monitor the operations and management of the facilities whilst we pay high salaries for the CEO's, electricity minister and staff to do the work. 2. Already the electricity tariffs the community pays are highly unaffordable if you take time to compare with the state of living for the most of the users. Most of the businesses fail to operate due to unaffordability to pay Eskom tariffs. Right now those who afford to rob paying Eskom tariffs are more than those who pay, because of these high tariffs our government allows to be pushed on the shoulders of the already suffering communities. Nersa can only do that if they want to bury us alive, instead of looking for the ways to relieve pressure we are already enduring from Eskom. 3. Do your introspection guys and look for other ways to correct the mess, and spare the already gasping Eskom users one more breadth. Thank you.	Sibongile	KwaZulu -Natal		unemployed individual
	2026-01-20 04:08:18	No I do not	All of the above – we should not pay for government blunders		THOLANG MAVIS	Gauteng		unemployed individual

	2026-01-20 03:36:29	No I do not	All of the above – we should not pay for government blunders	Eskom needs to deal with its problems such as corruption and crime entirely that affects their organization. They must deal with their own employees who are destroying the entity through corruption and stealing of the electricity through ghost vendors. Also they need to deal with the free supply of electricity in some metros around Gauteng and around the country. This will help them to get more money from the right people than expecting that a few that are paying continue to foot the bill for the whole country. Eskom and nersa need to stop being a political tool for the rulling government at the expense of South African citizens.	Matsie Salome	Gauteng		unemployed individual

	2026-01-20 00:22:31	No I do not	All of the above – we should not pay for government blunders	Cannot be that consumers must cover for the bad management, fraud, corruption, cadre enrichment of the past 30 years. The employees and senior managers of Eskom get paid very well and still fight for unrealistic high raises whilst they performed very bad and are not even worth the salaries they earn at all. There was very poor oversight but little consequence. Instead of being sacked they were rather compensated with bonuses and golden handshakes. In general Eskom employees get paid much more than their counterparts working elsewhere and performing the same work, much the same as all other state owned enterprises. There need to be an interrogation into that disparity in wages too especially given the failure of basically all the SOEs. Eskom got bailouts from the government which sadly is taxpayers money but it appears as if those bailouts have gracefully been stopped. But now it appears as if now that that "income" stream is no longer available Eskom and Nersa wants consumers to fill the void. It must and cannot be allowed	Leon	Western Cape		retired

	2026-01-19 23:05:14	No I do not	All of the above – we should not pay for government blunders	Apart from NERSA's ineptitude, Eskom's dire financial situation is the inevitable result of a host of other factors that include incompetence, mismanagement, serious overstaffing, massive corporate inefficiencies, a widespread culture of non-payment prompted decades ago by the ruling party that it is unable to undo, tender and other corruption, government interference, ageing infrastructure, and ill-discipline regarding scheduled maintenance, among several other grave organisational deficiencies. Without any evident resolute initiatives to address even a single one of these many problems, it is very clearly inequitable that Eskom's paying clients should be made to shoulder Eskom's additional financial burden in which those clients had no hand creating. Moreover, the lack of visible effort by Eskom to address any of the many aforesaid failings makes this latest proposal doubly galling and, indeed, fundamentally unreasonable. I propose privatization of ESKOM. That will solve these type of blunders in the future	Herman	Eastern Cape		retired
	2026-01-19 19:51:07	No I do not	All of the above – we should not pay for government blunders	Asset should be valued at Fair Value (IFRS), if it has been calculated incorrectly then it should adjust for an impairment adjustment The problem arises where these assets have been used to secure the value of loans. Should Eskom show a negative Net Asset Value, that will result is a major call for repayment of those Loans, seriously affecting the value of the company and questioning "Is it still a going concern" - well no it is not. It has been artificially propped up by government. Along with the senior management and executives of Eskom and the ANC government, they should both be fired, for incompetence, mis-management, ignorance and outright stupidity. Eskom should be split up into the model that has been discussed (Generation, Distribution, etc), stakeholder can purchase a share of these and it can be run like a proper business. Its not rocket science - its just very stupid, ignorant, idiots are attempting to manage it, but are destroying it Opinion of a Business Transformation Executive	Michael	Gauteng		business owner
	2026-01-19 19:50:53	No I do not	All of the above – we should not pay for government blunders	This is disgusting and a total waste of time, taxpayer money and Nersa have to be accountable!	Lindy	Western Cape		retired

	2026-01-19 19:16:21	No I do not	All of the above – we should not pay for government blunders	There is a need for citizens of the Republic to contribute to a sustainable infrastructure development system, then there is what Eskom and many others have become, a black hole of ineptitude, corruption and culpable mismanagement. As a citizen of the Republic I refuse to continue to contribute to a monopolised train wreck if Eskom had competition they would be dead in the water. The continued construction and expansion of old dilapidated infrastructure allowed to crumble under government rule is not the sole responsibility of citizens to bail out. The cost of bad math must be absorbed by the government, Eskom and Nersa whom were all responsible for overseeing these activities without further burden to the tax payers.	Werner	Gauteng		employed individual
	2026-01-19 19:15:59	No I do not	All of the above – we should not pay for government blunders	This government is arrogant, expecting us the consumer to pay for their inadequacies, because of the governments mismanagement of our finances and the looting of funds that Eskom find themselves in this situation I DO NOT SUPPORT the increase of tariffs, we can barely afford the high price of electricity as it is currently.	Maxine	Western Cape		self-employed
	2026-01-19 19:15:05	No I do not	All of the above – we should not pay for government blunders	We have been taken for a ride politically, socially and economically....all levels. We are overtaxed in the first instance. I regret extra taxation with the utter contempt it deserves!!	Pieter	Western Cape		retired

	2026-01-19 18:53:35	No I do not	All of the above – we should not pay for government blunders	I believe the asset values should be capped to keep electricity costs from rising! Consumers should not be forced to pay higher tariffs to cover the full value of power stations that are near the end of their lifespan or frequently unavailable due to breakdowns (load shedding) Eskom is receiving tariff increases which are way above inflation and most other increase percentages for many years. With all that money, they are quick to pay out 'performance bonuses' and awarding way-overpriced tenders rather than hiring skilled workers to maintain infrastructure. This problem could have been avoided. Consumer should not have to carry the additional financial burden of funding Eskom's incomplete construction projects and operational cash flow through increased electricity prices! The real problem is that Eskom and Nersa do not really worry about making these types of mistakes, because they can always rely on the electricity users and tax payers to bail them out. This nonsense must stop. Consumers are fed up and their finance's are already stretcher to the limit. They simply cannot afford to pay out any more than they already are paying. 	2026-01-20 06:53:38	No I do not	All of the above – we should not pay for government blunders	Why should be punished for the errors of Eskom? As things stand, I am paying dearly for the ridiculously high energy costs. Last year I was given a ludicrous bill of close to R200 000 for household power and could not even given proper explanation except that Eskom did not have meter readers because their contract had expired as a result I have been paying based on estimated readings. Whose fault was it? Was it my making?, absolutely not. But was made to pay for their mistake. I had to borrow money from the bank to pay at least half of the bill and make a payment arrangement with them, otherwise they were issuing a disconnection notice. This happened when I was paying and never skipped a single month on my bills. We are sick and tired of cushioning mistakes on their own lousy mistakes.	Mduduzi	Mpumalanga		employed individual

	2026-01-20 06:52:10	No I do not	All of the above – we should not pay for government blunders	The consumers must not have to pay for government failures. The government who puts incompetent people in these positions should be held liable to cover the costs. These costs would have been able to have been absorbed by Eskom if there was no corruption. This does not mean that the people who brought about the R76 million mistake should not face consequences. They should	Garth	KwaZulu-Natal		retired
	2026-01-20 06:52:04	No I do not	All of the above – we should not pay for government blunders		Fabian	Gauteng		self-employed

This Re-determination should be rejected in its entirety.

It is economically irrational, regulatory indefensible, and socially unjust to expect South Africans to absorb further electricity price increases to compensate for Eskom's long-standing failures and NERSA's continued inability to enforce cost discipline, transparency, and accountability.
1. Consumers Must Not Pay for Decline

Electricity tariffs exist to recover the efficient cost of supply, not to socialise institutional failure.

South Africa is or has been experiencing:

- Declining electricity demand
- Chronic load shedding
- Deteriorating reliability and power quality
- Escalating tariffs well above inflation
- Widespread affordability stress

This decline is not consumer-driven. It is the direct consequence of Eskom's operational collapse and NERSA's regulatory failure.

To approve a higher Regulated Asset Base under these conditions forces consumers to pay more for less electricity, poorer quality, and declining service. This is neither cost-reflective nor equitable.
2. Public Participation Without Transparency Is Meaningless

NERSA routinely claims compliance with public participation requirements. However, meaningful participation is impossible without full disclosure of critical information, including:

- Detailed maintenance and inspection records
- Asset replacement and refurbishment plans
- Cost allocation methodologies
- Productivity ratios and staffing benchmarks
- Performance-linked expenditure justifications

The public should not be forced into litigation to obtain the information necessary to evaluate tariff increases that affect every household and business.

Without transparency, public hearings become procedural theater rather than legitimate regulatory engagement.
3. Eskom's Cost Base Is Fundamentally Inefficient

NERSA is obligated to allow recovery of only efficiently incurred costs. Yet Eskom's cost structure demonstrably fails this test.

Independent analysis, including World Bank research, has found that:

- Eskom is severely overstaffed
- Staffing levels exceed international norms by a wide margin
- Productivity ratios are deeply distorted

The World Bank estimated Eskom required approximately 14,244 employees to operate efficiently—far fewer than its actual workforce.

Despite this, NERSA continues to approve escalating personnel and overhead costs, embedding inefficiency directly into the RAB and forcing consumers to fund it indefinitely.
4. The "Baggage" Problem: Overstaffing and Escalating Costs

Between 1990 and 2024:

- Eskom's average cost per employee increased from R38,000 to R913,000
- This represents a 976% increase, vastly exceeding inflation or productivity growth

The organization has evolved into an administrative superstructure with too few resources focused on its core mandate: delivering reliable electricity.

NERSA's tariff approvals entrench this inefficiency instead of correcting it. Consumers are being forced to carry Eskom's accumulated "baggage" with no credible reform in sight.
5. Absence of Zero-Based Budgeting and Cost Discipline

NERSA appears not to require:

- Zero-Based Budgeting (ZBB)
- Performance-linked KPIs
- International benchmarking
- Cost-to-output validation

Historical inefficiencies are simply rolled forward and legitimised through tariff approvals. This is not regulation—it is passive endorsement of failure.
6. Power Quality: The Ignored Economic Drain

Poor power quality—unbalanced voltages, harmonics, and negative phase sequence conditions—imposes massive hidden costs on consumers and the economy.

These conditions:

- Destroy motors and transformers
- Reduce equipment lifespan
- Increase technical losses
- Inflate maintenance and downtime costs

Globally, billions are lost annually due to poor power quality. Yet NERSA has shown no meaningful interest in addressing this issue, despite formal complaints and documented evidence.

Consumers therefore pay twice:

- Through higher tariffs
- Through damaged equipment and lost productivity

7. NERSA's Regulatory and Legal Failures Are Well Documented

NERSA has repeatedly:

- Lost court cases on tariff methodology
- Relied on unlawful practices
- Shifted statutory obligations to municipalities
- Failed to apply the Electricity Regulation Act's cost-based requirements

These legal defeats confirm systemic weaknesses in regulatory competence. Under such conditions, approving a multi-year RAB is reckless and irresponsible.
8. A Broken Complaint and Oversight Mechanism

NERSA's complaint processes have proven ineffective:

- Complaints receive minimal or no follow-up
- Investigations stall
- Urgent technical risks are downplayed

This undermines public trust and confirms the absence of meaningful regulatory oversight.
9. The Fundamental Question

Why should South Africans:

- Pay higher tariffs for declining service?
- Fund inefficiency, overstaffing, and mismanagement?
- Absorb the cost of regulatory failure?

They should not.
Conclusion

	2026-01-20 06:51:34	No I do not	All of the above – we should not pay for government blunders		Tania	Western Cape		employed individual
	2026-01-20 06:51:33	No I do not	All of the above – we should not pay for government blunders		Pieter	KwaZulu-Natal		
	2026-01-20 06:51:23	No I do not	All of the above – we should not pay for government blunders	The government has failed for decades to maintain the infrastructure, and worst, mismanagement and corruption has made Eskom ineffective. Now the public is expected to pay AGAIN (we payed already through taxes!). And this time for not electricity, but bad high-end corruption? NO! Let the people who created this mess pay for it. We want accountability, not another slap in the face.	Karin	Western Cape		self-employed
	2026-01-20 06:51:20	No I do not	All of the above – we should not pay for government blunders	The citizens of this country cannot be geld responsible for the mismanagement by authorities, this is stealing from the already burdened and poor. Shame on you!	Dalene	Western Cape		retired

	2026-01-20 06:50:34	No I do not	All of the above – we should not pay for government blunders	Yet again taxpayers and all dependents on electricity are being forced to pay for the massive losses incurred through gross mismanagement and rampant corruption. For many years there have been warnings of criminality, squandering our money to feed the greedy. For years and years we have warned of the need to prepare for the future using green energy and adding this to the grid in preparation for eventually having to do what we wanted in the first place: buying electricity from independent producers. Your inability or unwillingness caused massive financial losses and wasteful expenditure. You allowed corrupt and mismanaged municipalities to simply not pay, caused countless blackouts, and even Government Departments were allowed to avoid paying their bills. I suggest that: you reduce your salaries throughout Nersa/Eskom force delinquent municipalities and Government departments to pay their unpaid bills and keep up to date with debts work with determination to use the land's natural resources for clean energy and in the process start decommissioning coal-based power stations, which are wasteful, unreliable and health hazards.	Donald	Western Cape		retired
	2026-01-20 06:50:26	No I do not	All of the above – we should not pay for government blunders	Consumers should not be held accountable for Eskoms blunders nor should consumers have to fit the bill for infrastructure. Should this burden be put on consumers just imagine how many more poor households will go hungry to bed as more of their already too little income will be used on electricity. Middle class in this country is the one that are being hit the hardest and it could drop alot of them under the poverty line. They are already struggling with debts and to keep the lights on so increase on electricity with all the other yearly increases could have dire consequences on them financially. Eskom is a private institution and should be carrying their own miss management mistakes and flaws, not the consumer	Leon	Eastern Cape		employed individual

	2026-01-20 06:38:55	No I do not	All of the above – we should not pay for government blunders	South African citizens should not be held financially responsible for Eskom's R76 billion funding requirements due to several compelling reasons grounded in fairness, accountability, and economic sustainability. 1. Eskom's Mismanagement and Accountability Issues Eskom's financial crisis is largely a result of years of mismanagement, corruption, and inefficiency within the utility. It is unjust to transfer the burden of these failures onto ordinary citizens who have no control over Eskom's internal operations. Instead, Eskom's leadership and government oversight bodies must be held accountable and required to implement structural reforms before seeking public funding. 2. Economic Hardship on Citizens South Africa is grappling with high unemployment, poverty, and inequality. Imposing additional financial burdens on citizens through increased tariffs or taxes to cover Eskom's debts will exacerbate economic hardship, reduce disposable income, and deepen social inequality. The government should prioritize protecting vulnerable populations rather than passing Eskom's financial woes onto them. 3. Need for Sustainable and Transparent Solutions Funding Eskom's R76 billion requirements without addressing the root causes of its financial instability is a short-term fix that risks perpetuating a cycle of bailouts. Instead, the focus should be on sustainable solutions such as improving operational efficiency, combating corruption, diversifying energy sources, and encouraging private sector participation. Citizens should only be expected to contribute once a clear, transparent plan for Eskom's turnaround is in place. 4. Alternative Funding Mechanisms There are alternative ways to address Eskom's financial needs without directly charging citizens. These include restructuring Eskom's debt, seeking international financial assistance with stringent oversight, and leveraging public-private partnerships. The government should explore these options thoroughly before resorting to placing the financial burden on taxpayers. 5. Protecting Public Trust and Social Stability Forcing citizens to pay for Eskom's financial mismanagement risks eroding public trust in government and public institutions. It may lead to social unrest and resistance, undermining social cohesion. The government must demonstrate responsible stewardship of public funds and ensure that citizens' contributions lead to tangible improvements in service delivery and governance. In conclusion, South African citizens should not be made to pay for Eskom's R76 billion requirements until there is clear accountability, sustainable reform, and protection of vulnerable populations. The focus must be on long-term solutions that restore Eskom's viability without deepening the financial strain on the public.	André	Gauteng		employed individual

	2026-01-20 08:12:23	No I do not	All of the above – we should not pay for government blunders	Eskom has shown time and again that they cannot operate a world award winning system due to corruption and allowed thievery. Once again the public, already finically strained from load shedding and subsequent factors, to pay for their expensive mistakes. These people running this place should foot the bill or carry some consequence, not the public.	Louise	Gauteng		employed individual
	2026-01-20 08:12:19	No I do not	All of the above – we should not pay for government blunders	We cannot continue to fund the government when there are individuals who are stealing us blind.	Andre	Eastern Cape		employed individual
	2026-01-20 08:12:18	No I do not	All of the above – we should not pay for government blunders		Rose	Western Cape		
	2026-01-20 08:12:07	No I do not	All of the above – we should not pay for government blunders	I strongly oppose any electricity tariff increase intended to recover the cost of regulatory errors, mismanagement, or inefficiencies. South Africans are already under severe financial pressure while receiving unreliable electricity from aging infrastructure. It is unacceptable to charge consumers more for a service that continues to deteriorate, with no credible assurance that increased tariffs will result in repairs or improved reliability. Eskom should first recover outstanding debts from defaulting and non-paying consumers, including government entities, instead of placing further strain on households and businesses that already comply. Once again, ordinary citizens are being asked to carry the burden while decision-makers remain insulated from the consequences. This approach reflects a failure of accountability and a disregard for the lived reality of the people who fund the system. I therefore reject this proposal in its entirety.	Ailsa	Gauteng		retired
