	2026-01-20 08:00:22	No I do not	All of the above – we should not pay for government blunders	We have already bailed out ESKOM to the tune of Billions of rand over past decades, yet they keep on wanting taxpayers to bail them out!! Yet, they pay out bonuses to top cats! They still have not stopped Fraud They have not stopped looting and theft They DO NOT maintain basic networks They DO NOT upgrade networks based on increased demand!! Time to hold ESKOM accountable!!!!	Kevin	KwaZulu -Natal		retired

	2026-01-20 08:00:06	No I do not	All of the above – we should not pay for government blunders	The billions that is lost to corruption and mismanagement in this country can build a new ESKOM from top to bottom. Clean up government from maladministration and inefficient spending and there will be more than enough for all critical infrastructure. NERSA is part of the country's governing authorities they must put pressure on those with the power to eradicate ineptitude. Don't always attack the easy targets, us the tax payers for official's wrongdoing and footing the bills for yet more failures. By appointing correct people for critical jobs, maintenance will be up to date. By prosecuting people who defraud and rob ESKOM it will send a message - crime will not be tolerated and save millions. Take out the trash before the taxpayer, yet again must must carry the financial burden.	Mareli	Gauteng		self-employed

	2026-01-20 07:54:05	No I do not	All of the above – we should not pay for government blunders	I do not support further electricity tariff increases to fund higher valuations of Eskom's assets. In the current economic climate, electricity must remain affordable to households and to an already-strained economy. Asset values should be capped, and inefficiencies should not be passed on to consumers through higher tariffs. Consumers should also not be required to pay the full value of ageing and unreliable power stations that are near the end of their operational life or frequently unavailable due to breakdowns. It is unreasonable to expect the public to fund infrastructure that does not deliver reliable service. Furthermore, I do not agree that consumers should finance Eskom's construction overruns or day-to-day cash flow through higher prices. These costs stem from project delays, cost overruns, and operational inefficiencies, which should be addressed through governance reforms and state support, not by transferring risk to electricity users. In summary, tariff increases should be linked to demonstrable improvements in reliability and efficiency, not to higher asset valuations or the recovery of historic inefficiencies.	Carl	Limpopo		employed individual
	2026-01-20 07:54:04	No I do not	All of the above – we should not pay for government blunders	Higher tariffs will not ensure that broken infrastructure is repaired or that new power stations are completed on time. 	2026-01-20 07:48:30	No I do not	All of the above – we should not pay for government blunders	I wish to state, in the clearest and strongest possible terms, my unequivocal rejection of this proposal. Whilst I recognise the importance of Eskom’s financial sustainability and the broader stability of South Africa’s electricity supply, it is neither reasonable nor justifiable to expect ordinary South Africans to absorb the financial consequences of systemic failures that are well-documented, longstanding, and internal to Eskom and the state’s governance framework. The proposed tariff adjustments appear to proceed from an assumption that the public must ultimately underwrite the costs of: 1. Persistent governance failures, 2. Managerial ineptitude, 3. Cadre deployment, 4. Chronic operational inefficiencies, and 5. Endemic corruption and criminal capture that has been widely acknowledged by Eskom itself, multiple commissions of inquiry, and the courts. This assumption is fundamentally flawed. South Africans already bear an extraordinary burden through some of the highest electricity price increases in real terms globally over the past decade, alongside declining service reliability, load shedding, economic contraction, job losses, and deteriorating public trust. To now require the public to compensate for a R76 billion error—regardless of how it is framed procedurally—constitutes a moral hazard of the highest order and undermines the very principle of accountable public administration. Public participation is not a procedural formality. It is a constitutional mechanism intended to ensure that policy and regulatory decisions are informed by fairness, proportionality, and the lived realities of citizens. In that context, this proposal fails on several critical grounds: *Accountability* There is no credible demonstration that those responsible for the failures leading to this shortfall have been held meaningfully accountable, nor that systemic reforms are sufficiently embedded to prevent recurrence. *Equity and Affordability* Further tariff increases disproportionately harm households, small businesses, and productive sectors that are already under extreme financial pressure, while delivering no commensurate improvement in reliability or governance. *Legitimacy* Asking the public to pay for institutional failure erodes trust in both Eskom and the regulatory framework and risks delegitimising future public participation processes. *Economic Impact* Higher electricity tariffs will further suppress economic growth, discourage investment, and accelerate energy flight—outcomes that directly undermine Eskom’s own long-term sustainability. In summary, the people of South Africa cannot and should not be treated as the financial backstop for failure, mismanagement, and corruption. The costs associated with the R76 billion shortfall must be addressed through internal reform, consequence management, efficiency gains, and appropriate fiscal or structural interventions—not by transferring the burden to an already overextended public. I therefore formally object to the proposed tariff increases in their entirety and urge the regulator to reject this application. “No” in this context is not obstructionist. It is a necessary assertion of accountability, fairness, and constitutional principle.	Andre	Gauteng		
	2026-01-20 07:48:14	No I do not	All of the above – we should not pay for government blunders	We are reaching a stage where electricity is become unaffordable.My bill increased by 41% from one month to the next after nersa/ eskom advised of a 13% increase. Privatise the whole escom because that is the only way to save it.	Antonie	Gauteng		
	2026-01-20 07:38:58	No I do not	All of the above – we should not pay for government blunders	The “R76 Billion Mistake” A recent High Court ruling has compelled NERSA to recalculate the value of Eskom’s regulatory asset base after admitting material errors in its original calculations. These errors reportedly amount to approximately R76 billion, which the current tariff proposal now seeks to recover directly from electricity consumers. It is unreasonable and unjust for consumers to be forced to absorb this cost through higher tariffs in order to compensate for depreciation and returns that were previously omitted due to regulatory error. Our objections are as follows: Affordability and fairness Electricity consumers should not be required to pay for NERSA’s calculation errors. These costs are neither affordable nor fair, particularly in an economy already under severe financial pressure. Deteriorating and unreliable infrastructure Eskom’s infrastructure is aging, poorly maintained, and increasingly unreliable due to prolonged mismanagement. Consumers should not be charged higher tariffs for assets that fail to deliver a consistent and dependable electricity supply. Mismanagement, inefficiency, and governance failures Consumers should not be expected to fund Eskom’s cash-flow shortfalls, cost overruns, and construction delays that stem from persistent mismanagement, inefficiency, and corruption. This is further exacerbated by the loss of experienced and competent personnel as a result of rigid policy choices that have weakened institutional capacity. There is a clear absence of accountability for these failures. Continuing to shield Eskom and its regulators from the consequences of poor decision-making by transferring the financial burden to consumers is unacceptable. Structural reform, including meaningful privatisation and removal from ineffective and corrupt state control, is necessary to protect consumers and restore efficiency, reliability, and accountability in the electricity sector. 	2026-01-20 07:35:48	No I do not	All of the above – we should not pay for government blunders	I strongly oppose the proposal by the National Energy Regulator of South Africa (NERSA) to force South African energy users to pay an additional R76 billion to Eskom. This proposal effectively shifts the financial burden of Eskom's long-standing operational, governance, and planning failures onto households, small businesses, municipalities, and the broader economy. Energy users should not be required to pay for costs arising from poor decision-making, weak oversight, and systemic inefficiencies that were neither caused nor controlled by them. The December 2025 court ruling, which rejected the settlement agreement between NERSA and Eskom, reaffirmed the importance of regulatory accountability, transparency, and lawful decision-making. Attempting to recover the same costs through a new consultation process appears to undermine both the spirit and substance of that judgment. Public participation should not be used to legitimise an outcome that the courts have already found to be procedurally or substantively flawed. South Africans are already under severe financial pressure due to high electricity tariffs, unreliable supply, and the broader cost-of-living crisis. Any further increases risk: * Deepening energy poverty for households * Undermining the viability of small and medium enterprises * Increasing municipal debt and non-payment * Slowing economic growth and job creation NERSA's mandate is to regulate in the public interest, balancing the sustainability of the electricity sector with affordability, fairness, and economic stability. 	2026-01-20 07:34:41	No I do not	All of the above – we should not pay for government blunders	If the eskom staff doing the maths are incompetent and cannot do simple calcs they should be fired. If the eskom staff doing the maths are corrupt they should be fired. At no point in civilised society do struggling consumers have to pick up the bill for mistakes by government and SOEs. The few taxpayers and utilities payers in this country are already massively overburdened paying for everything for everyone else who is unable or unwilling. Government can fund this shortfall by cutting salaries of everyone they employ. Government salaries are frequently DOUBLE that of equivalent roles in the private sector - so there is plenty of fat to trim and carry the can for their own mistakes. Maybe in future they will appoint competent and qualified and responsible staff. I simply cannot afford to pay for their mistakes and will go off grid or emigrate or both. And then they can have 100;% of NOTHING.	Fatima	Gauteng

	2026-01-20 07:33:12	No I do not	All of the above – we should not pay for government blunders	I strongly oppose the proposed electricity price increases. Consumers should not be required to pay for historical calculation errors, regulatory mistakes, or previously omitted figures. These costs did not arise from consumer behaviour and should not be recovered through higher tariffs. South African households and businesses are already under severe financial pressure due to rising food, fuel, and municipal costs. Increasing electricity prices further will worsen affordability, reduce economic activity, and place additional strain on vulnerable consumers. It is unreasonable to charge full tariffs for electricity supplied through aging and unreliable infrastructure. Eskom’s financial and construction inefficiencies should be addressed through internal reform, improved governance, and cost containment — not transferred to the public. I therefore urge NERSA to reject any tariff determination that shifts regulatory or operational failures onto electricity users.	Esbie	Mpumal anga		self-employed

	2026-01-20 07:28:12	No I do not	All of the above – we should not pay for government blunders	Consumers are already struggling with ongoing high increases in electricity. It is not sustainable to the consumer and the economy to just continuously hike prices well above inflation and more than double digits. The fact that the re-evaluation is so much higher than the original figure is of grave concern and it seems the people who are working out the figures are not competent or are just inflating figures. The consumer should not be charged for the full value of assets that are near end of life - besides the calculation seems to be incorrect, this is morally wrong. The ongoing funding of incomplete projects or Eskom's cash flow should be managed correctly and can be if competent people where employed. All incompetent and people Involved with dubious corrupt schemes should be fired and held accountable. This cannot continue and the assumption that consumers must pay is ethically and morally flawed. 	2026-01-20 09:24:03	No I do not	All of the above – we should not pay for government blunders	The ANC has run the country and ALL the ONCE THRIVING Industries into the ground and WE as the CITIZENS are no longer going to pay for the ANC MISMANAGEMENT of resources as well as the INFRASTRUCTURE or to give even MORE MONEY for them to STEAL. The ANC government has made a mess of ALL the SOE's by giving the jobs to unqualified and incapable cadres, so the ANC and it's cadres have to PAY THE MONEY	Hettie	Gauteng		unemployed individual
	2026-01-20 09:23:43	No I do not	All of the above – we should not pay for government blunders	I agree that recovering actual, prudent costs in principle is reasonable and aligns with regulatory principles (such as those applied by NERSA under the Electricity Regulation Act). However, the key issue lies in ensuring those costs are fairly and transparently determined. The current figures appear significantly inflated due to historical factors including excessive salaries, corruption, incompetence, and poor management - elements repeatedly highlighted in audits, media reports, and public discourse over recent years. A proper recalculation should therefore use competitive, real-world benchmarks - reflecting efficient operations free from these inefficiencies - rather than simply accepting Eskom's historical book costs as given. Only then would tariff adjustments be truly justifiable and equitable for consumers.	Andre	Gauteng		business owner

	2026-01-20 09:21:18	No I do not	All of the above – we should not pay for government blunders	If ESCOM made a calculation mistake, why should we pay for their mistake. Why does ESCOM still pay such big bonuses if they are financially not able to pay for their own faults and upgrading of infrastructure. It is uncalled for yo expect the community yo pay for their mismanagement.	Japie	Free State		
	2026-01-20 09:21:00	No I do not	All of the above – we should not pay for government blunders		Flip	Gauteng		
	2026-01-20 09:20:53	No I do not	All of the above – we should not pay for government blunders	No. I do not support the proposed electricity price determination. Consumers should not be required to pay for NERSA's calculation errors, including the reported R76 billion mistake. These costs arise from regulatory and accounting failures, not from electricity usage, and should not be recovered from the public through higher tariffs. I also object to paying full tariffs for aging and unreliable infrastructure that does not deliver consistent, affordable electricity. Higher prices cannot be justified while reliability continues to decline. Finally, consumers should not be expected to fund Eskom's cash flow challenges, inefficiencies, or construction delays. These are management and governance issues that must be addressed without shifting the financial burden onto households and businesses already under severe cost-of-living pressure. For these reasons, I formally oppose the proposed tariff increases. Sincerely, Jan Lorens	Jan	Western Cape		retired
	2026-01-20 09:20:31	No I do not	All of the above – we should not pay for government blunders	It is a downward spiral that will never get resolved until skilled people are employed regardless of race, and corruption is stopped.	Stella	KwaZulu-Natal		retired
	2026-01-20 09:20:22	No I do not	All of the above – we should not pay for government blunders	Affordability: As a pensioner, I can no longer afford to pay for NERSA's calculation errors. Reliability: Where did all the funds go for upgraded? It was stolen. It is about time the these criminals get put in jail and the funds etc recovered. Efficiency: Consumers are not lack of Eskom's cash problems	Shirly	Gauteng		retired

	2026-01-20 09:05:20	No I do not	All of the above – we should not pay for government blunders	Let the government and those that made the errors pay from their pockets with the huge bonuses and mis apprioation of monies/ stolen.	May	Western Cape		retired
	2026-01-20 09:05:18	No I do not	All of the above – we should not pay for government blunders	The useless ANC government have failed dismally at EVERY level EXCEPT enriching themselves. Making electricity users pay for this will drown a already underwater economy.	Tanya	Western Cape		self-employed
	2026-01-20 09:05:15	No I do not	All of the above – we should not pay for government blunders	I understand that to get out of their economic quagmire, Eskom need money. However, it is galling that we are paying ever more cash for their mess ups, both past and present. We live in a country full of opportunities for renewable energy (a solution that would have long ago solved today's problem if only we didn't have a president who thought we were his personal cash cow.) There is more creative opportunity to generate the required electricity without robbing the population blind. With so many already living below the poverty line, and a middle-income group at breaking point, how is it reasonable that we should be forking out even more? A working economy has people who are able to move money through it, i.e spend it. Crime is at an all-time high because people cannot afford basics anymore.	Amy	Western Cape		business owner

	2026-01-20 09:02:10	No I do not	All of the above – we should not pay for government blunders	I strongly oppose passing the R76 billion calculation error onto consumers through tariff increases. Regulatory mistakes must be absorbed by the regulator and Eskom, not households already burdened by rising living costs. Suggested Amendments and Solutions: - Affordability: Tariff adjustments should exclude recovery of past errors. Costs must be contained through internal efficiency measures and transparent financial accountability. - Reliability: Investment should prioritize modernizing infrastructure using ring-fenced funds, with performance-based oversight to ensure consumers pay for reliable service, not aging assets. - Efficiency: Eskom's cash flow and construction delays should be addressed through stricter project management, independent audits, and accountability mechanisms, rather than shifting inefficiencies onto consumers. Consumers should not bear the financial consequences of regulatory miscalculations. A fair determination must balance affordability with long-term sustainability, while holding Eskom and NERSA accountable for past errors.	Jordyn	Gauteng		employed individual
	2026-01-20 09:02:02	No I do not	All of the above – we should not pay for government blunders	The government should not make the consumers bear the cost of their blunders! We are already paying high tariffs for electricity and despite all the hours there is no power supply due to badly maintained transformers and sub-stations or damages caused by vandalism, Eskom does not compensate the consumers.	Michele	Free State		self-employed
	2026-01-20 09:01:57	No I do not	All of the above – we should not pay for government blunders	I strongly object to any further electricity tariff increases that seek to recover costs arising from NERSA's and Eskom's own calculation errors. South Africans are already facing extremely high and unaffordable electricity prices, particularly middle- and lower-income households who are under immense pressure from the rising cost of living. The reported R76 billion error in the valuation of Eskom's assets is not a cost that consumers should be expected to absorb. These were omissions and miscalculations acknowledged by the regulator and the utility themselves. Passing this financial burden onto electricity users is fundamentally unfair and undermines public trust in the regulatory process. NERSA has a responsibility to protect the public interest. Any cost recovery linked to internal errors or inefficiencies should be addressed within the utility and regulatory framework, not transferred to consumers who have already paid dearly for systemic failures. I urge NERSA to reject any price determination that requires electricity users to pay for these mistakes and to prioritise affordability, accountability, and fairness in its final decision. 	2026-01-20 08:42:28	No I do not	All of the above – we should not pay for government blunders	I hereby submit my formal objection to the proposed electricity tariff determination insofar as it seeks to recover approximately R76 billion from electricity consumers arising from prior calculation errors relating to Eskom's Regulatory Asset Base. 1. Affordability Electricity consumers should not be required to pay for errors admitted by NERSA and Eskom in previous asset calculations. These errors were not caused by consumers and should therefore not be recovered through higher tariffs. Passing such costs onto the public is unreasonable, unjust, and contrary to the principles of administrative fairness and cost causation. 2. Reliability and Value for Money Consumers are being asked to pay increased tariffs for infrastructure that is aging, unreliable, and has demonstrably failed to provide consistent electricity supply. Load shedding, unplanned outages, and declining system performance indicate that consumers are not receiving full value for the tariffs already paid. Recovering additional depreciation and returns under these circumstances cannot be justified. 3. Efficiency and Revenue Collection Eskom has a significant and well-documented level of outstanding debt owed by delinquent municipalities. These unpaid amounts materially impact Eskom's cash flow. Eskom must prioritise the recovery of debt from defaulting municipalities through existing legal and regulatory mechanisms. Effective revenue collection would materially reduce the need for tariff increases imposed on compliant, paying customers. It is neither efficient nor equitable to socialise financial shortfalls caused by governance failures, revenue collection inefficiencies, and historical calculation errors by shifting the burden to the public and productive businesses. Conclusion I strongly oppose the recovery of the R76 billion from electricity consumers. NERSA is urged to: Disallow the pass-through of historical calculation errors into future tariffs; and Require Eskom to recover outstanding municipal debt as a primary corrective measure before considering any further tariff increases. 	2026-01-20 08:40:58	No I do not	All of the above – we should not pay for government blunders	Ratepayers should not be forced to foot the bill for the R76b shortfall because it arose from NERSA's own regulatory errors, not from any action or benefit on the part of consumers. Passing this cost onto households and businesses is fundamentally unfair, particularly given that key decisions were initially taken without proper public consultation, undermining transparency and the public's right to participate in decisions that directly affect their finances. Allowing the regulator to recover the cost of its own mistakes through tariffs also weakens accountability and signalling that poor governance and miscalculations carry no real consequences for institutions—only for the public they are meant to serve. 	2026-01-20 08:36:46	No I do not	All of the above – we should not pay for government blunders	People currently cannot afford higher tariffs, yet we are burden by Nersa's blunder. More and more are going to stop paying as they hit the bread line.	Imraan	Gauteng		
	2026-01-20 08:36:43	No I do not	All of the above – we should not pay for government blunders	First you replace competency with incompetence based on a racial worldview under the disguise of righting wrongs from the Ipast. Then corruption sets in and ministers and management steals and milks the cow dry. Then you neglect maintenance, planning and development because the management and ministry are incompetent and corrupt. Now you make a R76 billion mistake and expect those who never approved of your ways of doing things in the first place to pay for it. What starts unjust (and by continuing in your unjust ways in stubbornness) ends up chaotic and in ruins. By making others pay for your evil ways and mistakes will not fix things, not to mention the obvious unjust, unfair and unrighteous nature of your intentions and actions. NO, STOP MAKING SOUTH AFRICANS PAY FOR, AND THE POOR AS WELL AS RICH SUFFER BECAUSE OF YOUR CORRUPT WAYS AND NATURE OF BEING!	Willem	Western Cape		self-employed
	2026-01-20 08:36:34	No I do not	All of the above – we should not pay for government blunders	As die tariewe nog opgaan sal ek dit nie kan bekostig nie. Ek sukkel reeds om nou deur te kom met my sassa	Helna	Western Cape		retired

	2026-01-20 08:27:18	No I do not	All of the above – we should not pay for government blunders	NO, No, NO!!!This is just another sample of the multiple blunders of Government and state institutions that we are being forced to pay for.	Johannes	Gauteng		retired

	2026-01-20 08:26:54	No I do not	All of the above – we should not pay for government blunders	Firstly a blunder made by the entity responsible for setting electricity prices for the public making a mistake, then coming to an agreement behind closed doors and trying to force that cost onto us, the still paying public, is not acceptable. Secondly eskim making a claim that adding 2 new power stations has increased their infrastructure value. Excuse me? Delays of how many years? Corruption of overpaying for mops and brooms, then having connections to smoke stacks collapse because of sub par construction because cadres had to have pockets lined first? How about valuing those 2 power stations at the original approved constitution amounts and see what your actual infrastructure value is then. And also, you were warned by a certain ex employee in the media that you will be left with minimal paying customers and increasing defaulting users if you increase your prices drastically. You rubbished this individual's comments, but I think you just don't want to admit that he was correct and your paying users are in decline. You are shooting yourself in the foot	Jeffrey	Gauteng		employed individual
	2026-01-20 08:26:43	No I do not	All of the above – we should not pay for government blunders	Government has taken the funds and needs to foot this bill now.... Collect all the enormous payouts made the past 25 yrs	Belinda	Western Cape		retired

	2026-01-20 08:20:59	No I do not	All of the above – we should not pay for government blunders	When I as an individual makes a mistake, I have to take responsibility myself, nobody else. NERSA should take the responsibility upon themselves. We should we pay for the government's blunders.	Cynthia	North West		self-employed
	2026-01-20 08:20:56	No I do not	All of the above – we should not pay for government blunders	If the government can get any way of getting money out of the citizens pockets its a win for them. We already paying high electricity. Instead of coming with solutions they just wanna milk us. We tired of the south Africa government we tired of ANC. We tired of your failures.	Olivia	Free State		unemployed individual
	2026-01-20 08:20:53	No I do not	All of the above – we should not pay for government blunders	As a South African tax payer who has faithfully paid my taxes every year since I started earning money 40 something years ago, I find it not only unfair but abhorrently criminal that I , or any one else, should be expected to expected to also pay for NERSA's calculation error. The citizens of this country have been forced to pay the price for corruption and incompetence that was not of our making. And now we are also expected to also pay for the upgrading of an aging and decrepit infrastructure or face having no electricity once again. Eskom's cash flow issues are of their own making and the citizens of this country who are literally on their knees or on their way out are not responsible. Please do not add to our woes by forcing us to pay for this blunder. Increased electricity tariffs do not only affect private individuals but they are also one of the many reasons overseas investors are stay away from South Africa in droves . It is time for NERSA and Eskom to take responsibility for their own mistakes and failures, and not punish the citizens of this country we all love.	Mary	Gauteng		employed individual
	2026-01-20 08:20:41	No I do not	All of the above – we should not pay for government blunders		Anna Maria	Gauteng		business owner
	2026-01-20 08:20:32	No I do not	All of the above – we should not pay for government blunders		Erika	Free State		retired
	2026-01-20 08:20:27	No I do not	All of the above – we should not pay for government blunders	Households are struggling to pay for basics, with an increase in Electricity it will strain an ALREADY STRAINED nation. I suggest we get ALL our politicians to pay an extra 15% on their Electricity a/c's. This will help recoup some of the money required.	Imtiaz	KwaZulu -Natal		employed individual
	2026-01-20 08:20:10	No I do not	All of the above – we should not pay for government blunders	When will government and parastatals be held accountable? When will bailouts end of wilful misappropriations? We don't for one minute believe in these 'mistakes' any longer. This ends now. We, the people have spoken.	Owain	Gauteng		
	2026-01-20 08:20:04	No I do not	All of the above – we should not pay for government blunders		Corrie Andre			
	2026-01-20 08:20:01	No I do not	All of the above – we should not pay for government blunders	1.Affordability: The public should not have to pay for NERSA's calculation errors 2.Reliability: The public should also not have to pay full price for aging infrastructure that has already proved to be unreliable 3.Efficiency: Should not have to fund Eskom’s cash flow and construction delays	KENNETH ARTHUR	KwaZulu -Natal		self-employed
	2026-01-20 08:20:01	No I do not	All of the above – we should not pay for government blunders	No this is pure nonsense. Seems the people in power cannot do the calculations and then pass their blunders onto the consumers. Eskom has been a rotten potato since it was taken over by the ruling government and NERSA has been no better. No NERSA pick up the bill for your blunders from the officials who are responsible for it. We, the consumers have had enough!!!	Shirley	KwaZulu -Natal		retired
	2026-01-20 08:19:55	No I do not	All of the above – we should not pay for government blunders	Absolutely not! It is time that people who makes all these "mistakes" must be accountable for their mistakes.	Therina	Northern Cape		employed individual
	2026-01-20 08:19:33	No I do not	All of the above – we should not pay for government blunders	There should be accountability for those who has the responsibility and the supposedly knowledge, especially if they don’t look after the interest of our country- because that is what the job requires- to look after the interests of our country.	Karlien	Western Cape		self-employed
	2026-01-20 08:19:29	No I do not	All of the above – we should not pay for government blunders	Pensioners are unable to continually absorb mistakes made by our inept self serving government.	Cheryl	Eastern Cape		retired
	2026-01-20 08:19:25	No I do not	All of the above – we should not pay for government blunders	They must pay for their own blunders. The public did not make the blunders. The public pay every cent monthly. How will the pensioner continue living if his entire pension is plought into the blunders of the government?	Dave	North West		retired
	2026-01-20 08:19:25	No I do not	All of the above – we should not pay for government blunders	Let the Discovery experience be the guideline. If you make the mistake, you pay for it.	Marilyn	KwaZulu -Natal		retired

	2026-01-20 08:18:48	No I do not	All of the above – we should not pay for government blunders	The state owned entities are the responsibility of the government. They are supposed to maintain the organisation, assets and system. They have failed to do so diligently it has negatively affected the infrastructure due to lack of maintainance, the corruption within the role players has also been the cost as well. The people have been paying for the negligence and damages caused by the role players or leaders in this entities who go unpunished financially or legally as well. There is a high rate of unemployment already in the country. The tax payers will suffer the most which is much of the middle class workers. The upper class or elites will use alternatives such as solar as they afford to do so. The low class will not even afford the electricity and that is a threat to the right to adequate housing, dignity and life as well. The government or Nersa has to take this money from their own employees, reduce salaries or the dignitaries, the luxuries and benefits use that money to pay up the debt which it owes. In that way they will be more responsible and accountable. It is not necessarily the debt of the nation but the debts of the state entity those who were neglegent ought to be held accountable or we won't have any progress. What are the chances that the people who failed to manage the entity flowing and flourishing will do so now with citizens money? Let them feel it as well and that way they will know how to be responsible for the nations resources.	Kutlwano	Gauteng		self-employed
	2026-01-20 08:18:41	No I do not	All of the above – we should not pay for government blunders	Die regering en regering instellings is besig om die publiek en belastigbetaler vir die honde te voer, terwyl die ministers en baie van die amptenary in die vet van die land rond rol. Hoe gouer die verkiesing kan kom hoe beter.	Carel	Gauteng		retired

	2026-01-20 11:22:24	No I do not	All of the above – we should not pay for government blunders	Why should we have to pay for all the money that disappeared and was not used for the upgrade of the systems. They just take more every year and there is never any improvement. They should stop paying such generous salaries to all their friends and rather do what they are supposed to do.	Annelie	Gauteng		employed individual
	2026-01-20 11:22:17	No I do not	All of the above – we should not pay for government blunders		Vivienne	Gauteng		
	2026-01-20 11:22:17	No I do not	All of the above – we should not pay for government blunders	For 31 years we have been paying for the ruling party's greed and corruption. The cupboard is now bare. Not even the middle class has anything to spare and it's a hand to mouth existence for the majority of citizens. Perhaps sort out illegal connections before you penalise the public for its compliance.	Barbora	Mpumalanga		self-employed
	2026-01-20 11:21:59	No I do not	All of the above – we should not pay for government blunders	We are living in a country that has one of the most incompetent and corrupt governments and all departments that are part of them. Our roads are in a shocking state, we are doging potholes that are supposed to be 'fixed' but fall apart after one rain, our infrastructure is now on the verge of collapse and we have to store water and have inverters at the ready at all times because we never know when outages are going to occur. We should, under no circumstance, be held responsible for their incompetence and failures.	Penny	Gauteng		retired
	2026-01-20 11:21:54	No I do not	All of the above – we should not pay for government blunders		Liakat	Gauteng		retired
	2026-01-20 11:21:54	No I do not	All of the above – we should not pay for government blunders	We've all spent enough time worrying about the rising cost of living. Now, NERSA has officially called for public comment & opinion on the new electricity price determination - to make this the consumer's responsibility & take it from the consumer's pocket is diabolical - we cannot afford another increase let alone one to pay for the errors and corruption of ESKOM & the electricity companies & organisations! The "R76 Billion Mistake": A High Court ruling has forced NERSA to recalculate the value of Eskom's assets after admitting to "errors" in their original figures. Reports indicate that these calculation errors amount to a R76 billion mistake—a cost that the current proposal seeks to recover directly from electricity users. this is extortion & certainly not the fault of the consumer. we'll just stop using electricity! This error must be absorbed by ESKOM etc. - NOT the consumer to foot the bill through higher tariffs to cover "depreciation" and "returns" that were previously omitted! In summary the legal paper in 3 simple questions 1. Affordability: WHY should we pay for NERSA's calculation errors? 2. Reliability: WHY should the consumer pay full price for aging, unreliable infrastructure? which the council & ESKOM failed to execute timeously and not if is falling apart! 3. Efficiency: WHY should consumers fund Eskom's cash flow and construction delays? this is all diabolical extortion & in my opinion unconstitutional and bordering on illegal!!!	Bernice Wendy	Gauteng		business owner

	2026-01-20 11:02:10	No I do not	All of the above – we should not pay for government blunders	The law requires that the interests and needs of the electricity consumer are safeguarded and met, with regard to governance, efficiency, etc. NERSA should be doing it job instead of handling secret, unlawful deals that pass their failings to the consumer. Firstly, there needs to be visible, transparent disciplinary and where necessary legal action against ALL PARTIES that have failed to adhere to the law. NERSA needs to enforce robust methodologies, AND ensure compliance with said methodologies. Those parties that manage to make mistakes that NERSA and ESKOM wish to pass on to the consumer, and those who failed in their oversight of the work of said parties, need to be removed from their positions. Enforce efficiency incentives - on a LONG TERM - on ALL factors - not just supply, but cost, and long-term sustainability of that supply. Don't keep lights on without doing maintenance. And penalize all parties that take the short term view in a long term system. Employ individuals who know what they are doing, and employ auditors who know what they are doing. And take out the bullies, the intimidators, and the abusers. Address information access - if consumers have no alternative supply, then consumers have a right to see ALL the information that goes into determining costs. Electricity infrastructure is considered a critical national asset in this country. Anyone who wilfully damages it - through cable theft, fraud, greed, accepting positions they are not qualified for and making decisions that cause damage to infrastructure and impact negatively on the consumer's interests - should be charged with treason. 	2026-01-20 10:48:06	No I do not	All of the above – we should not pay for government blunders	Hierdie diefstal van die publiek se geld is ontoelaatbaar. Die biljoene rande wat deur die ANC Cadre en hulle Comrades gesteel is, soos dit in die Zondo Kommiesie bewys is en ook nou deur Generaal Mkhwanazi blootgele is moet van hulle verhaal word. Vb: RAMAPHOZA - Phala-Phala kan verkoop word. Daar is biljoene rande in sy bankrekenings wat deur SARS gekonfiskeer kan word om hiervoor te betaal.	Gerhard	Gauteng		retired
	2026-01-20 10:48:03	No I do not	All of the above – we should not pay for government blunders	The objection to citizens if RSA to pay for the Nersa-Eskom blunder can be summarised as: 1 Affordability: Should you pay for NERSA's calculation errors? 2 Reliability: Should you pay full price for aging, unreliable infrastructure? 3 Efficiency: Should consumers fund Eskom's cash flow and construction delays? The bigger dilemma is the incapability of the RSA government to manage the intricate complexities of a First World country that was elected under ANC rule in 1994. Throwing money at the problem is irrational because the bottomless pit present in RSA that was evident from Day one after the 1994 elections. There is most likely in the mafia (illegal, criminal gangster controlled) economy of RSA that runs parallel to the official economy, more than enough money to fund a fundamental turn around to pre 1994 era in RSA. We need Christian leaders as well as clerks in RSA, throughout all layers in society, to acknowledge and act on this. The mafia state will not and can not see and act in the darkness it created and is rotting in. We don't have to solve anything but our moral fibre through obedience to and reliance on God our Father, through Jesus Christ. We need to die to be born afresh into a new life by the Holy Spirit. What follows from that will renew South Africa.	Casper	Mpumalanga		business owner

	2026-01-20 10:47:47	No I do not	All of the above – we should not pay for government blunders	I am writing to formally place on record my objection to the proposed electricity tariffs that seek to recover the "R76 billion mistake" from consumers. My objection is based on the following three grounds: Affordability: It is procedurally unfair and morally unjust to ask consumers to pay for calculation errors made by the regulator. The cost of living is already unsustainable; ordinary citizens cannot be the insurance policy for administrative mistakes regarding asset valuation. Reliability: I object to paying full valuation prices for infrastructure that is aging and unreliable. The tariff structure should reflect the quality of supply, which is currently poor. We should not be paying a premium for depreciating assets that fail to deliver consistent power. Efficiency: Consumers should not be funding Eskom's cash flow issues or construction delays. Inefficiencies in project management and capital expenditure should be absorbed by the utility, not subsidized by the end-user through tariff hikes. I urge NERSA to reject this proposal and find an internal mechanism to resolve the R76 billion error without burdening the public.	Luke	KwaZulu -Natal		
	2026-01-20 10:47:39	No I do not	All of the above – we should not pay for government blunders		Van Wyngaardt	Western Cape		
	2026-01-20 10:47:06	No I do not	All of the above – we should not pay for government blunders	For many years, as a middle-class worker, I supported government by diligently paying my taxes - and let's face it, we are an over-taxed society in SA. Now, as a pensioner, I feel that Nersa is punishing those who have paid and paid, for their blunders - and to add insult to injury, expecting the consumer to take it on the chin that they have to pay for aging infrastructure plus inefficiencies of the Eskom workforce and Nersa itself. How does Nersa expect ordinary citizens to survive under such a burden being added to an already weary and abused group of taxpayers?	Jacqueline	Western Cape		retired
	2026-01-20 10:47:04	No I do not	All of the above – we should not pay for government blunders	Sick and tired to foot the bill for Government and its cronies incapably, dishonesty, bad work ethics, pathetic performance.	Alida	Western Cape		retired

	2026-01-20 10:46:07	No I do not	All of the above – we should not pay for government blunders	Taxpayers and electricity users should not be punished for Eskom’s mistakes and ongoing incompetence. The financial burden created by mismanagement, poor planning, and serious calculation errors must not be transferred to households and businesses that are already under severe economic pressure. Accountability for these failures should rest with those responsible, not with consumers who continue to endure unreliable supply while being asked to pay more for less. We pay our taxs, we pay our electricity bills and yet you ask us to pay for your mistakes. As a business owner, not only do you have to deal with the microcosm of social ills in your business and the community, but you also suffer financial consequences from poor service delivery of electricity, incorrect billing, lack of assistance, etc. This is the sort of nonsense that makes businesses restrain their investment.	Rivan	Gauteng		business owner
	2026-01-20 10:46:00	No I do not	All of the above – we should not pay for government blunders	Eskom needs to employ competent people who know what they are doing and not hold us responsible for their mistakes.	Anna	Gauteng		retired
	2026-01-20 10:45:48	No I do not	All of the above – we should not pay for government blunders	Error occurred most probably because of incompetence due to an political driven BEE and AA program. Start recovering stolen money from corrupt officials - this will more than pay for the R76 Billion blunder.	Johan	Mpumalanga		business owner
	2026-01-20 10:45:44	No I do not	All of the above – we should not pay for government blunders	We SHOUL NOT have to pay for NERSA's gross misappropriation of funds and apparent hiding of the true state of their affairs, resulting in their terrible cash flow problems, which in turn affect construction delays, and unreliable and obsolete infrastructure. Not our fault, not our monkey, not our circus.	Yolanda	Gauteng		retired
	2026-01-20 10:45:23	No I do not	All of the above – we should not pay for government blunders		Nadine	Gauteng		
	2026-01-20 10:44:54	No I do not	All of the above – we should not pay for government blunders	For many years, as a middle-class worker, I supported government by diligently paying my taxes - and let’s face it, we are an over-taxed society in SA. Now, as a pensioner, I feel that Nersa is punishing those who have paid and paid, for their blunders - and to add insult to injury, expecting the consumer to take it on the chin that they have to pay for aging infrastructure plus inefficiencies of the Eskom workforce and Nersa itself. How does Nersa expect ordinary citizens to survive under such a burden being added to an already weary and abused group of taxpayers?	Anita	Western Cape		retired
	2026-01-20 10:44:53	No I do not	All of the above – we should not pay for government blunders	In previous times, ESKOM used their profits for maintenance and renewal of worn out machinery, instead of pocketing the money! Why should the public now pay for their greed and immaturity?	Andries	Western Cape		Non-profit
	2026-01-20 10:44:34	No I do not	All of the above – we should not pay for government blunders	This is not about blunders it is corruption full stop. SACK all the top brass at Eskom and privatise the entire industry get it OUT of the hands of government. Give the people the power to make the choice on provider in a fair free market. The time for ESKOM is long long long over.	Debra	Gauteng

	2026-01-20 10:28:51	No I do not	All of the above – we should not pay for government blunders	How are Eskoms assets calculated? By the actual.cost of an item, for e.g. a mop costs +/- R100 or the price Eskom paid, what was it R170 000? My additional home user charge added to my monthly municipal account is half of my electricity purchase, which means I am already paying an extra 50% on my electricity bill, why should I or any other SA citizen have to pay more. Eskom should really make an effort to collect the debtors bill and stop raising costs to collect unpaid debts. Employees on paid suspension for years on end should be charged a let go as this inflates their wages and salary expensive every month.	Selome	Western Cape		employed individual
	2026-01-20 10:28:18	No I do not	All of the above – we should not pay for government blunders	The problem with increasing over and over the price of electricity is that our entire economy becomes less and less capable of producing anything competitively. This restricts the possibility of jobs being created into the future never mind the fact that there is already not enough disposable income in circulation in the economy to keep many of the existing companies profitable and operational. So we purchase coal from the mines belonging to our president and ridiculously high prices to keep him and his wonderful friends happy - money set aside to fix our electricity problems is stolen and eaten by all the political pigs at the trough - and all this is then seen as acceptable allowing Nersa to approve further increases to an already broken tax payer base???? There is indeed a lack of normal logic or perhaps this can be seen as ANC logic in action. ALL IN ALL NOT GOING TO KEEP THE WHEELS ON OUR COUTRY - our government is stealing the future of our youth and condemning everyone to poverty . So though i know this will never be read we live in hope.	Richard	Gauteng		self-employed

	2026-01-20 10:10:58	No I do not	All of the above – we should not pay for government blunders	In any business, IF there is an accounting error it needs to be corrected and a portion of the costs will unfortunately be passed onto the consumer however the majority of the loss is carried by the shareholders. That is is the nature of a free market. The concern here in my opinion is: 1. Eskom has a monopoly on power generation and distribution which means that their costs are not necessarily market related or competitive which leads to inflated forecasts and estimations. In other words there is no competitors to keep them in check. Thus the need for NERSA 2. That these figures were audited during and prior the public consultation process. That is the duty of the regulator, (NERSA) to "audit" the expenses of Eskom to determine the validity of the tariff increase being requested. The mistake is not immaterial and should have been picked up by the audit team reviewing the calculations. 3. It is public knowledge that there has been considerable allegations of corruption, mismanagement of costs, aged assets that are near their end of life with ongoing breakdowns and increased maintenance costs and not to mention construction and investment overruns on new infrastructure and assets. That these costs are being included in the new revised figures to get to the desired result of recouping costs through tariffs from the consumer. 4. The obscure "Behind Closed Doors" settlement that was reached between NERSA & Eskom due to some legal loop hole in the Regulatory ACT, that would have allowed the additional costs to be recouped without public participation from the consumers. Had it not been for lobby groups that insisted that there be public commentary, this would have slipped by unnoticed. It is strange that the Notice was issued on the 30th of December 2025 when everyone is on Holliday and not particularly taking note of what is happening on the governmental front. It seems that whenever an obviously obscure and potentially disastrous notice or bill needs to be passed, it happens in that week between Christmas and New Year when there would be little to no resistance to it. This also begs the question whether in the future this same loop hole cannot be utilised to override the approved tariffs... 5. The 21 day consultation period is not enough to thoroughly go through the various sources and documentation to determine the reasonableness and accuracy of the data available and fact check it for correctness. It seems to be nothing more than a "tick box" exercise to imply due diligence in order to fast track the approval for the 30 January announcement deadline for NERSA. I don't think that the consumer should be footing the bill for the additional costs on an already exorbitantly high electricity costs. Not without a more thorough review of the mistake and enough time to check the validity of NERSA's correction to their calculations.	Eugene	Western Cape		employed individual

	2026-01-20 10:06:03	No I do not	All of the above – we should not pay for government blunders	There was a lot money pilfered and wasted in the past years within Eskom, the consumer is still paying for this mismanagement, we don't even know if this has stopped. No more paying by the consumer for the mistakes of poorly managed SOEs.	Andrew	Eastern Cape		
	2026-01-20 10:05:49	No I do not	All of the above – we should not pay for government blunders	Times are hard enough without having to make them even more difficult for ordinary South Africans, by paying for Government's mess up	Glynis	KwaZulu -Natal		self-employed
	2026-01-20 10:05:41	No I do not	All of the above – we should not pay for government blunders	It is time that the responsible persons are held accountable for their blunders, instead of the public who have no say in this mess have to pay the price.	Jo-Anne	Eastern Cape		employed individual
	2026-01-20 10:05:23	No I do not	All of the above – we should not pay for government blunders	We are already paying sufficient taxes, and if the government eliminates all corruption, there would be enough money to improve the countries infrastructures. Cannot begin to understand why they have an added Minister of Electricity; declare bonuses and profits and still want us, already struggling to survive, to foot the bills they create out of ignorance. Our 'government' can't touch anything without destroying, looting, cadre deployment...a bunch of incompetents. Communism has never worked...shades of 1984. Eskom must take back the moneys stolen by their officials and staff, which is way above the R76 Billion they are planning to steal and munch too. A cycle of corruption, incompetence, theft and so on. Let the thieves at Eskom, past, present and future be prosecuted and rot in jail. There are enough proof of this. START PROSECUTING AND SET THE EXAMPLE! As a pensioner who has lived an honest life, all my life - and paid Rates & Taxes on the properties I owned over the past fifty plus years, every month pays my electricity account on time, which keep increasing, but NOT MY PENSION, PLUS NEED TO PAY NOW ILLEGAL TAXES in Cape Town for “CLEANING” , we STRUGGLE to make ends meet, and barely can put food on the table anymore - I feel cheated that we, the honest tax payers, are expected, now FORCED into contributing to the follies of those now running (or trying to run) the country !!! Even wasting money with navy exercises worth billions with the worst enemy and terrorist country. It is time for an honest government to rise and refocus, to REALLY CARE for the poorest of poor and all people and NOT TO FILL their OWN pockets.	Jan	Western Cape		retired

	2026-01-20 10:00:38	No I do not	All of the above – we should not pay for government blunders	I hereby submit my public comment on the proposed redetermination of Eskom's allowable revenue following the High Court ruling that set aside the previous settlement and required proper public participation. I appreciate the opportunity to participate in this formal regulatory process and note the importance of transparency, procedural fairness, and affordability in electricity pricing decisions that directly affect households, businesses, and the broader economy. 1. Affordability I strongly object to electricity consumers being required to absorb the full cost of calculation errors made by the regulator in its original determination of Eskom's Regulated Asset Base. The reported adjustment of approximately R76 billion arises from acknowledged regulatory errors, not from new or unforeseen costs incurred by Eskom. Passing these costs directly to consumers undermines the principle of fairness and places an unreasonable burden on the public during a period of sustained cost-of-living pressure. Regulatory mistakes should not be corrected at the sole expense of electricity users. 2. Reliability and Value for Money Electricity tariffs should reflect not only costs but also the quality and reliability of supply. Eskom's infrastructure remains ageing and has delivered prolonged periods of load shedding, supply interruptions, and operational instability. Consumers should not be expected to pay full depreciation and return on assets where the service delivered has been unreliable and inconsistent. Any redetermination should explicitly consider performance outcomes and value received by consumers. 3. Efficiency and Accountability Allowing the full recovery of omitted depreciation and returns risks weakening incentives for efficiency, cost control, and accountability within both Eskom and the regulatory framework. Consumers should not be used as a backstop for cash-flow pressures, construction delays, or regulatory shortcomings. Any adjustment must be carefully phased, independently scrutinised, and accompanied by clear commitments to improved governance, efficiency, and oversight. Conclusion While I acknowledge the legal requirement to correct the regulatory determination, I urge NERSA to exercise its discretion in a manner that protects the public interest. I request that NERSA: • Reject the recovery of the full adjustment from consumers, • Consider partial recovery, alternative funding mechanisms, or extended phasing, • Explicitly account for affordability, reliability, and efficiency in its final decision. This matter has significant implications for public trust in electricity regulation and for the sustainability of South Africa's economy. I respectfully request that my submission be fully considered in the final determination.	Michael	Gauteng		employed individual

	2026-01-20 09:57:47	No I do not	All of the above – we should not pay for government blunders	All the reasons already mentioned. Nobody pays for my blunders but me. I will not pay for the blunders caused by incompetence and/or ignorance. Eskom pays its executives millions in bonusses every year, for what. I was compelled to incur capital expenses in paying for alternative electricity supply due to outages, I am not prepared to pay anymore. If need be, the municipality can cut their supply.	Martin	Gauteng		self-employed
	2026-01-20 09:57:30	No I do not	All of the above – we should not pay for government blunders	The government had their chance to follow some sage advice from smart people that they appointed to rectify their (government) mistakes, and root out corruption, but they (corrupt oversight) didn't like the answers provided—they did tow the "partly" line. So they were removed, all while still neglecting the elephant in the room—the archaic and failing system held together by bubblegum and sticky tape. All the while, many citizens installed solar systems, reducing pressure on the grid, and, again in their (government) arrogance, saw this as a slight and focused on those helping, instead of focusing in-house on rectifying the bigger problem. As far as I'm concerned, they can claw back a percentage of the exorbitant salaries they are paying public-sector workers (as too many are paid way above industry norms) and use those funds. Eskom and all parastatals need to be run like profitable businesses, so when the cash flow is strained, cutbacks are made.	Rich	Gauteng		unemployed individual

	2026-01-20 09:43:44	No I do not	All of the above – we should not pay for government blunders	kategropically reject any attempt to hold the public accountable for the failures of Eskom and NERSA. I will not accept responsibility for Eskom's chronic mismanagement, corruption, ill-planning, golden handshakes, or delinquent decision-making that has crippled the country's energy security. Likewise, the public must not be burdened with the consequences of NERSA's miscalculations and regulatory failures. South Africans are now being forced to invest their own money into alternative energy solutions, such as solar, purely to survive ongoing instability—yet are still threatened with penalties, punitive tariffs, and additional charges for reducing reliance on a failing grid. This is unacceptable. Penalising citizens for escaping dysfunction created by corruption, theft, inflated tenders, overbilling, fraud, and a complete lack of forward planning is both irrational and unjust. The responsibility for safeguarding the economy and ensuring energy stability lies with those entrusted to govern and regulate—not with the public. I therefore strongly oppose any increase in tariffs or any form of financial punishment imposed on individuals and businesses who have taken responsible, self-funded steps to go off-grid. The failures of state institutions must not be subsidised by the very people who have already paid the price.	Nico	Gauteng

	2026-01-20 09:38:10	No I do not	All of the above – we should not pay for government blunders	As a pensioner household living on a fixed income, we should be deeply concerned about the ongoing increases in electricity tariffs and the reasoning behind them. Affordability Ordinary people and pensioners in particular cannot afford to pay for calculation errors made by NERSA. Our income does not increase in line with rising tariffs, food costs, or medical expenses. Any regulatory mistakes should be corrected by the regulator, not transferred to households that are already financially vulnerable. Reliability We are expected to pay full price for electricity, yet we continue to experience ocasional load shedding, power interruptions, and unreliable supply caused by aging infrastructure. Pensioners rely on electricity for basic needs such as heating, cooking, medical equipment, and safety. Paying premium prices for an unreliable service is unfair and unjustified. Efficiency Ordinary people households should not be forced to fund Eskom's cash-flow problems, construction delays, or historical mismanagement. These issues are the result of systemic failures and governance problems, not consumer behaviour. Shifting these costs onto people places is an unbearable burden on those least able to absorb it. Conclusion Electricity is an essential service. Tariff decisions must protect vulnerable groups such as pensioners by prioritising affordability, service reliability, and operational efficiency. We urge NERSA and Eskom to act responsibly and ensure that the cost of inefficiency and errors is not borne by ordinary South Africans living on fixed incomes.	Gilberto	Gauteng		retired

	2026-01-20 13:11:42	No I do not	All of the above – we should not pay for government blunders	Eskom's electricity delivery and fees have been problematic for over a decade now, so passing the buck to the consumer now is just another avoidance tactic to postpone or escape dealing with the roots of their problems, which include of course, corruption.	Gerald	Gauteng		self-employed
	2026-01-20 13:10:14	No I do not	All of the above – we should not pay for government blunders	I already commented on these criminals Rob. They are the absolute pits and that is extremely generous. They are far worse than that.	Barry	KwaZulu -Natal		retired
	2026-01-20 13:10:13	No I do not	All of the above – we should not pay for government blunders	ESCOM inherited a fully functional and very lucrative organisation that was exporting electricity to many SADC countries. It was allowed to degenerate into an organisation that is being mismanaged and stolen blind, with cartells involved with supplying poor quality coal at exorbitant prices, maintenance not being carried out, too many people employed and paying unrealistic salaries and bonuses in a company that is bankrupt. The ANC made promises to various communities that if they were elected in 1994 the communities would not have to pay for electricity. They then went on a massive electrification programme, with an ever diminishing income structure. Municipalities (Cadres), owe ESCOM millions. These accounts were allowed to get so high to score political points and now they are asking consumers, who do pay their bills, to absorb this mess as well. Not only the above, but as a result of mismangement and an ever deminishing income no, or very little maintenance was / is done. This resulted in load-shedding. There is still no guarantee that load-shedding will be implemented again. Consumers started looking at alternative means of generating their own electricity, enter Solar Power. Now Escom is trying to muscle their way into this as well as they realise that their limited income is decreasing even further. Instead they should have read the writing on the wall. Consumers have had enough of their incompetant management. Down size the completely unnecessary and incompetant work force. Recover the Billions from the Cadre municipalities and start running ESCOM as a business. Provide a decent service at a realistic price and consumers will support you, but you have been unable to do thhis in 30 years, so there is very little hope that you could do it now.	Errol	Limpopo		self-employed
	2026-01-20 13:10:02	No I do not	All of the above – we should not pay for government blunders	Incompetence is costing the already over burdened, desperate citizens. As it is, electricity is too expensive for most people and adding the burden of mistakes by incompetent government employees is utterly unacceptable! No private company would be able to do what our government is trying to do. It is outrageous!	Shena	Eastern Cape		self-employed
	2026-01-20 13:09:46	No I do not	All of the above – we should not pay for government blunders	Pritize because you don't know how run a business. 	2026-01-20 13:03:51	No I do not	All of the above – we should not pay for government blunders	Eskom puts up a big argument that their tarrifs should be cost reflective but then makes zero effort to control their cost or ensure efficient operations. This agreement with NERSA was clearly a scam and rejected by court. Now they are trying their a 2nd time.	Benjamin	Gauteng		employed individual
	2026-01-20 13:03:30	No I do not	All of the above – we should not pay for government blunders	Government just cannot expect consumers to pay for it's own incompetence. Individuals and companies are already under severe pressure from rising costs and any large increase in electricity cost will filter through into all other product and service costs, thus causing a massive spike in country wide inflation. The effect on the overall economy will be devastating. South Africa desperately needs to keep it's cost infrastructures down if it is to be at all competitive in the international market place and if it wishes to remain an attractive destination for tourism. Government absolutely MUST take strong action to sort out the way in which Eskom is run, managerially, financially and operationally. It simply cannot remain as a State run entity. 	2026-01-20 13:01:44	No I do not	All of the above – we should not pay for government blunders	Frankly, and speaking as an impoverished pensioner for one, I am sick & tired of both Eskom & NERSA only, in conjunction withe ANC, looking out for their nice salaries & perks, continuing to employ staff who are useless & should be fired, who seem to be employed to create more problems than they resolve whilst the rest of us have to go without. The accounting process has become mind bogglingly complicated, so that few people can understand how to work it out. One can't help feeling this is done on purpose! Obfuscating! I live alone, do not have visitors, keep everything switced off at the plug & unplugged if not in use. My geyser is permanently off because I cannot afford the electricity, meaning I cannot bathe or shower. The only hot water in my house is what comes out of the kettle. I have no TV or radio, no swimming pool, my washing machine is no longer used, lights are turned off if I am not in the room. I use one bedside lamp in the evening, I have no cooker - just a microwave & one countertop plate & I tend to make one pan easy meals that are quick. The only items on all the time are my fridge & freezer. AND the electricity bill is being estimated! The last detailed paper acct I got from Eskom showed that out of the R700+- my electricity used was R80. The rest was a long list of incomprehensible network charges. Now I get smses telling my estimated bills are nigh on R900! I cannot afford this. It is almost half of the SASSA pension. Something definitely smells fishy in the State of Denmark! I bet your execs & employees are not having to struggle like the rest of us.	C	Western Cape		retired

	2026-01-20 12:53:40	No I do not	All of the above – we should not pay for government blunders	This “R76 billion mistake” is exactly why ordinary South Africans should not be footing the bill for administrative or regulatory errors. It’s outrageous to ask consumers to pay for mistakes that should have been absorbed by the system or corrected internally. ? Affordability: No, we shouldn’t pay for NERSA’s miscalculations. ? Reliability: Paying full price for aging infrastructure that constantly fails is unfair. ? Efficiency: Consumers should not be financing Eskom’s cash flow gaps or construction delays—these are management failures, not household responsibilities. We need transparency, accountability, and a system that protects citizens from being penalised for errors they didn’t make.	Michael	Gauteng		retired

	2026-01-20 12:40:02	No I do not	All of the above – we should not pay for government blunders	SAfricans are tired of being mistreated by Eskom together with the government. They don't care about us and how we feel. They only want money from us and pay themselves big salaries and bonuses. Let them halve their income and incentives of Maroga and seniors and workers. In SA, Eskom salaries get big increase more than all government entities together with Parliament. They look at us down like we are fools. R200 rand buys from 80 or 70 and less units. People, staying in town, resort to using gas wood and solar. During December, in rural areas, people did not have electricity for 5 days, they had to make biltong from meat to prevent spoiling, while others had their refrigerated food thrown in dustbins. Eskom has run out of ideas. Let it just go and rest in peace. Theft and abuse is their names. It's no longer relevant in today's world. We are tired of being undermined by it and nersa and government. Let Eskom fall for good.	RORO	Limpopo		retired

	2026-01-20 12:35:42	No I do not	All of the above – we should not pay for government blunders	Eskom is what is termed a state owned enterprise (SOE). It is a fully fledged and resisted company which has as one of its key partners the state. Therefore the directors on control of Eskom which are appointed by the state to oversee day to day operations as well as ensure its sustainability as a business enterprise. The fees paid for electricity by consumers (private, retail and state consumers) should cover the costs of electricity generation and maintenance, but cannot include future expansion of the grid as that should be solely the states responsibility. Historically pre-1994 Eskom was a world class power utility which generated some of the cheapest electricity to consumers. What has transpired since 1994 onwards is not only gross mismanagement, but blatant theft and enrichment of connected individuals that used the racially biased tender process as a means of accelerated wealth creation at the expense of consumers and the country as a whole. Massive overruns on costs associated with new coal fed power plants that to this day are not fully operational due to either poor planning, substandard workmanship as well as overpriced services that massively increase the cost base as well as breakages due to contractors that have not delivered on their contracts but continually return to the table for massive injections of capital that never seems to be put to good use. Furthermore, as the state is the major partner it views the price of electricity in a way that does not only serve covering the cost of electricity generation but as a social upliftment programme to sponsor those that it deems historically disadvantaged to receive a position of free electrical services. Amongst these consumers there is resistance towards paying for electrical services. Eskom at its best was always understood to be largely subsidised by the state, therefore keeping the cost to consumers as low as possible. The idea was that although the state subsidised electricity the impact was that industry benefitted as the cost base of the production was competitive internationally and therefore their goods and services output were in demand and the entire economy benefited by NOT inflating input cost into the economy. The exact opposite has occurred post 1994. The high cost of electricity as a base input cost to the economy has resulted in South Africa no longer being competitive against global players and the economy has suffered as a result due to very low growth and high baseline inflation. Asking consumers to carry so-called mistakes made by Eskom is like driving the last nails in South Africa's coffin – consumers are already under massive stress financially and this will make matters worse with the end result that there will be even less economic growth, less fixed investment and therefore less job opportunities. I'm sure that any well thinking economist will make the argument that the very high levels of youth unemployment could be directly correlated to high baseline inflation of which Eskom is one of the key inflation drivers. So absolutely no way should consumers be saddled with the cost deficits caused by bad management at Eskom. I suggest that the directors that caused the error be held responsible as would be the case at any private company if their directors mess up – I point to Steinhoff as an example and many others that either went bankrupt or their directors were sequestrated and their assets sold of to cover the financial black hole. Eskom should be run at a loss and not run as a profit chasing entity. It should be largely subsidised by the state and the coal assets and supply line should be state run at base cost – zero profiteering. That way the baseline inflation will be kept in check and long-term fixed investments will be attracted to South Africa.	Michael	Western Cape		unemployed individual

	2026-01-20 12:28:33	No I do not	All of the above – we should not pay for government blunders	The Cape Independence Party (CAPEXIT) hereby submits a formal objection to NERSA's proposed redetermination of Eskom's Generation Regulatory Asset Base (RAB) and associated allowable revenue for the 2025/26, 2026/27, and 2027/28 financial years. While we acknowledge the High Court judgment requiring NERSA to correct specific technical errors and re-engage in public consultation, CAPEXIT strongly opposes any outcome that results in higher electricity tariffs for consumers, particularly under current economic conditions. 1. Electricity Affordability and the Economic Reality South Africans—especially households and businesses in the Western Cape—are already under extreme financial pressure due to: Persistently high unemployment Rising food and fuel costs Declining economic growth The cumulative impact of repeated electricity tariff hikes In this context, CAPEXIT does not accept any further increase in electricity tariffs to fund a higher valuation of Eskom's power plants. Electricity is an essential service and a key input cost for economic activity. Allowing increased tariffs to compensate for Eskom's historical inefficiencies, cost overruns, and operational failures is both economically reckless and socially unjust. Asset values must be capped to protect consumers and the economy. Regulatory compliance must not be used as a mechanism to guarantee Eskom higher revenue at the expense of the public. 2. Inclusion of Aging and Unreliable Power Stations in the RAB The redetermination directly affects which power stations consumers are required to pay for through tariffs—including aging plants that are: Near or beyond their intended design life Frequently unavailable due to breakdowns Major contributors to load shedding CAPEXIT strongly objects to consumers being forced to pay higher tariffs to recover the "full value" of assets that: Deliver unreliable service Fail to meet performance standards Impose additional economic costs through load shedding It is fundamentally unreasonable for the public to be charged premium prices for assets that cannot reliably produce electricity. Including such plants in the RAB at inflated or unadjusted values violates the principle of cost-reflective pricing and rewards failure rather than performance. Assets that are near end-of-life or chronically unavailable should be written down, excluded, or severely discounted in the RAB calculation. 3. Work Under Construction (WUC) and Working Capital CAPEXIT further objects to the proposal allowing Eskom to recover billions of rand from consumers for: Incomplete or delayed construction projects ("Work Under Construction") Ongoing operational cash-flow requirements ("Working Capital") Consumers should not be used as a financing mechanism for Eskom's unfinished projects, many of which have suffered: Massive cost overruns Severe delays Questionable governance and accountability Nor should households and businesses be forced to fund Eskom's day-to-day cash flow through higher electricity prices. This effectively shifts business risk from Eskom and the state onto consumers—without consent and without corresponding improvements in service. Operational inefficiencies and liquidity shortfalls must be addressed through internal reform, fiscal discipline, and structural change, not tariff increases. 4. Principle-Based Objection CAPEXIT's position is clear: Consumers should not pay more because Eskom's asset values are administratively adjusted upward. Consumers should not subsidise failure, inefficiency, or incomplete projects. Electricity tariffs must prioritise affordability, reliability, and economic growth, not the protection of a failing monopoly. NERSA's constitutional duty is to act in the public interest, not merely to ensure Eskom's revenue recovery. 5. Conclusion CAPEXIT calls on NERSA to: Reject any redetermination that results in higher electricity tariffs Cap the Regulatory Asset Base at levels that reflect actual performance and useful life Exclude or substantially discount aging, unreliable, or incomplete assets Protect consumers from being forced to fund Eskom's structural and governance failures South Africans deserve affordable, reliable electricity—not endless tariff hikes to sustain a broken system. CAPEXIT formally objects to the proposed redetermination insofar as it increases the financial burden on consumers.	Jack	Western Cape		Non-profit

	2026-01-20 12:26:25	No I do not	All of the above – we should not pay for government blunders	I know it's easier said than done but it's way past time Eskom and the unions realized that in the longer term they are cutting their own throats ... Surely they must realize that higher costs to the consumer result in more illegal connections and Solar installations, which in turn lead to lower metered consumption, which in turn leads to less cash for Eskom. Eskom and the unions should face reality and start cost savings , initially by reducing the work force to their required level. Government/treasury must also come to the party, refuse all further Eskom bailouts and order Eskom to execute cost saving measures to avoid future excessive electricity cost increases being passed on to the consumers. Nersa requires a complete overhaul and probably a change of leadership.	Ian	Western Cape		retired

	2026-01-20 12:16:02	No I do not	All of the above – we should not pay for government blunders	Eskom's customers are not responsible for this mess. Unless stopped, Eskom will continue to expect consumers, and to look to public funds, for bail outs. Ordinary citizens who are already under financial stain and struggling for survival, are expected to carry the financial burden for Eskom and other state owned entities failures. This whilst the very same citizens are expected to put up with old and decapitated infrastructure. Eskom's operating costs skyrocketed due to mismanagement, corruption, incompetence, wasteful expenditure and an oversized and overpaid workforce. Eskom and other state owned entities must be forced to take responsibility by implementing changes within. First step needs to be to "clean house" by eliminating corruption, eradicating wasteful expenditure, renegotiating and decreasing exorbitant salaries.	A	Gauteng		
	2026-01-20 12:15:26	No I do not	All of the above – we should not pay for government blunders	Enough now!! Cathy	Limpopo		retired
	2026-01-20 12:14:03	No I do not	All of the above – we should not pay for government blunders	hereby submit my formal objection to NERSA's consultation on the redetermination of Eskom's Regulated Asset Base (RAB) and the associated allowable revenue and tariff adjustments for the 2026/27 and 2027/28 financial years. Any decision that results in increased electricity tariffs will be severely detrimental to South African households. Many families are already struggling with the rising cost of living, unemployment, and economic instability. Higher electricity prices will place additional financial pressure on low- and middle-income households, deepen energy poverty, and force many to choose between basic necessities. Furthermore, ordinary consumers should not be expected to bear the financial consequences of long-standing governance failures, inefficiencies, and mismanagement within Eskom. Approving tariff increases under these circumstances would unfairly shift the burden onto the public. I therefore strongly reject this redetermination and urge NERSA to prioritise affordability, fairness, and the protection of households across South Africa.	Matshidiso	Gauteng		student
	2026-01-20 12:13:59	No I do not	All of the above – we should not pay for government blunders	After Eskom recalculated the value of their assets it shows a error of R 76 billion mistake...and now they want the consumer to foot the bill through higher tariffs to cover the so-called "depreciation" and "returns" that were previously omitted. That is definitely a BIG NO!!!!! Us consumers are already paying more than we can afford & this will break the back of the camel!	Elna	Western Cape		retired

	2026-01-20 11:57:44	No I do not	All of the above – we should not pay for government blunders	Why should the users pay for the incompetence of Nersa's staff to do the necessary calculations..	Gerhardus	Western Cape		retired
	2026-01-20 11:57:12	No I do not	All of the above – we should not pay for government blunders	As per usual from an ANC-governed SOE: no results, no accountability - but yet another creative way to steal even more public funds. NO. You do not have my approval or consent.	Nicholas	Western Cape		employed individual
	2026-01-20 11:57:05	No I do not	All of the above – we should not pay for government blunders	It is always Eskom, and in favour of Eskom, while they underperform, lie to the public, and cover up all their inefficiency and corruption. I want to include NERSA colluding and playing along with Eskom. There is no openness and a clear understanding of what they do, all so secretive. Eskom could not supply households and industries with reliable electricity, and loadshedding and power outages were the order of the day. The result was that people and companies put in place their own plans to keep the lights on, and now Eskom, NERSA, and the government want to punish the citizens. In the end, we will still pay for all their blemishes through taxes, but no more additional price increases.	Jacob	North West		retired
	2026-01-20 11:55:50	No I do not	All of the above – we should not pay for government blunders	The easiest way to fix the mistake would be to cut eskom management salaries, no bonusses, and removal of redundant staff. Another way would be to remove the criminals in eskom's hierarchy. I am already forced to subsidise low income householed, why shuold I pay for the money mismanagement currently happening in eskom? NERSA and eskom executives should be ashamed of themselves - those who could have installed solar - for which they are now being punished. Those of us who could not, have bought generators, UPS's, battery operated lights, geyser blankets, gas appliances, and we still have to pay huge amounts of money over to eskom every month. Why should we be punished even more? Get your shop in order before you insist the consumer pay and pay and pay - because you're to greedy to make things work.	Jarina	Gauteng		unemployed individual
	2026-01-20 11:55:16	No I do not	All of the above – we should not pay for government blunders	It is unconscionable that government keeps making these blunders and expects everyone to pay for them.	Sigi	Western Cape		retired
	2026-01-20 11:54:50	No I do not	All of the above – we should not pay for government blunders	We already pay high taxes, high electricity and high living costs. 	2026-01-20 15:48:21	No I do not	All of the above – we should not pay for government blunders	Man on the street already forking out a lot for electricity. We should not have to pay for the Company's mistakes	Sandie	Western Cape		retired
	2026-01-20 15:48:07	No I do not	All of the above – we should not pay for government blunders	Key Points of Opposition 1. Unreasonable Tariff Increases - The proposed hikes of 36.15% in 2025, 11.81% in 2026, and 9.10% in 2027 amount to a cumulative 66% increase over three years. - These increases will disproportionately harm households, small businesses, and municipalities already struggling with high inflation and economic stagnation. - Electricity is a basic necessity, not a luxury, and such hikes will deepen inequality. 2. Failure to Engage Stakeholders - Numerous submissions from experts, municipalities, and civil society have highlighted that the proposed Electricity Price Determination Methodology is unworkable. - NERSA has failed to meaningfully incorporate this feedback, undermining the credibility of the consultation process. 3. Unfair Burden on Consumers - The consultation paper suggests that consumers should cover a R76 billion shortfall caused by Eskom's accounting errors and regulatory missteps. - It is unjust to force ordinary South Africans to pay for Eskom's mismanagement, corruption scandals, and operational inefficiencies. 4. Economic and Social Risks - Steep tariff hikes will fuel inflation, reduce competitiveness, and risk widespread social unrest. - Ignoring stakeholder input erodes public trust in NERSA's role as a fair and independent regulator. --- Conclusion For these reasons, I strongly oppose the consultation paper in its current form. I urge NERSA to: - Reject Eskom's proposed tariff increases. - Revisit the Electricity Price Determination Methodology with genuine stakeholder engagement. - Ensure that accountability for Eskom's financial mismanagement rests with the utility and government, not with consumers. South Africans deserve a transparent, fair, and sustainable energy pricing framework — not one that punishes them for past failures.	Janetta	Western Cape		retired
	2026-01-20 15:47:53	No I do not	All of the above – we should not pay for government blunders	I would like to see ESCOM fund the shortfall with all the looted money funded by consumers and tax payers. The public cannot continue to fund mistakes in calculations and thugs through incompetent employees receiving salaries every month.	Japie	Gauteng		self-employed
	2026-01-20 15:47:08	No I do not	All of the above – we should not pay for government blunders	I am a pensioner and cannot afford these ongoing electricity increases.	Dale	KwaZulu-Natal		retired
	2026-01-20 15:47:05	No I do not	All of the above – we should not pay for government blunders	Electricity is already almost unaffordable as it is, what about all the pensionars and low income. There is major fraud and corruption, with additional unacceptable "service charges" by municipalities! Any additional funds should be recovered from the corrupt government officials and others who accepted bribes and/or neglected their responsibility to the people of South Africa. Eskom was one of the top energy suppliers in the world before the ANC destroyed it. No more will this be tolerated. I do not consent.	Clive	Western Cape		unemployed individual

	2026-01-20 15:25:12	No I do not	All of the above – we should not pay for government blunders	We as consumers can not be held responsible to recover a R76 Billion miscalculation. We can not be held responsible for incompetency within Eskom. As of 2024-2025, South Africa's electricity prices have transitioned from being among the most affordable in the world to being in the more expensive half of the global spectrum, with residential prices increasingly becoming expensive by international standards. While businesses often enjoy competitive rates, households face high tariffs and significant year-on-year increases that are often double the rate of South African inflation, placing it in the top third of most expensive countries for electricity. Affordability: In terms of income, South African electricity is considered very expensive. Households need to work 11.3 days to pay for 1MWh of power, making it the second least affordable among surveyed, behind only India. Drastic Hikes: Eskom's tariffs increased by an average of 12.1% per year between 2019 and 2024, far exceeding the 5.1% average inflation rate. It becomes unaffordable and to pay for calculation mistakes makes it outrages, inexcusable and unfair.	Francois	Western Cape		employed individual
	2026-01-20 15:24:54	No I do not	All of the above – we should not pay for government blunders	The sheer audacity of it all ! Parastatals continue to f*&^% up in the safe knowledge that they will be financially rescued by bleeding to death taxpayers. Enough of it. Dismantle these unefficient , monopolistic, central structures and give people access, and opportunity to generate their own (renewable) energy in a much more decentralised and efficient manner. 	2026-01-20 14:56:56	No I do not	All of the above – we should not pay for government blunders	I propose that NERSA re-determines these values based on affordability and efficiency, rather than just Eskom's debt. Exclude Wasteful Expenditure: The 'allowable revenue' should not include money lost to corruption, mismanagement, or over-expenditure on failing power stations. The consumer should only pay for a service that is run efficiently. Economic Reality Check: The RAB (Regulatory Asset Base) and revenue should be capped by the Consumer Price Index (CPI). It is mathematically impossible for pensioners and low-income earners to pay for electricity increases that are triple or quadruple the rate of their pension increases. Social Protection: Before determining allowable revenue, NERSA must mandate a 'Survival Block' of electricity at a significantly reduced rate for the elderly and those on fixed incomes, ensuring that Eskom's revenue needs never come before a citizen's right to basic energy. I want to know how NERSA expects me to afford another hike when I am already paying R4.37 per unit. My household is already doing everything possible to save: we use a gas stove, we have switched off our gate motor, and we only turn our geyser on for 30 minutes a day—some days, like yesterday, we don't turn it on at all. We are living on a fixed income and I am a pensioner, and every cent is accounted for. If you raise the price again, you are not 'adjusting a tariff'—you are taking away our ability to keep my diabetic Pomeranian's insulin safe in the fridge and our ability to have a warm meal. It is a disgrace that citizens are expected to pay for government and Eskom failures when we have nothing left to give.	Sophia	KwaZulu -Natal		unemployed individual

	2026-01-20 14:56:01	No I do not	All of the above – we should not pay for government blunders	This is not the first time NERSA has made a mistake and is taken to court by Eskom which costs us the consumer millions extra because the have lost every case against Eskom to date. Moreover, this regulator meets clandestinely with Eskom and secretly comes to an agreement with them regarding the increase in the figures to be used when determining the tariff increase!! We need a regulator that is transparent and that is competent. This current one is neither!! We also need a different model that is used to determine what increase Eskom may impose on us their user base, because clearly the one they currently use is not functioning correctly even when they don't make R76Billion mistakes! Critical questions need to be asked of this model by industry experts (not cadré deployed BEE placements), as to whether it takes ALL factors into account, a few of which should be but not limited to: ?Work force ratios of how much Eskom spends on technical vs admin/managerial staff ?What amount of effort is Eskom placing on recovery of bad debt and how successful have they been in the review period? ?Similarly on rectification of internal and tender fraud and the recovery of such funds ?Because Eskom is the sole energy supplier in SA, what is being done themselves to drive down the cost of generating a unit of power/ electricity? These issues and many others need to be translated into a management model that can be applied to regulate Eskoms' ridiculous tariff increase requests and should also be open to public scrutiny and comment. NERSA NEEDS A WAKE-UP CALL AND A TOTAL REVAMP - NO MORE CADRÉS, ONLY COMPETANT, TRANSPARENT, ETHICAL EXPERTS. The current incompetent clandestine and compromised NERSA will NEVER achieve their goal to hold Eskom accountable for every fraction of a cent tariff increase requests they submit. Out with the old ANC-buddy system of staff appointments at NERSA and in with a new expertly-determined work force who will not allow themselves to be compromised by anyone in Eskom, Government or Parliament!! 	2026-01-20 14:48:43	No I do not	All of the above – we should not pay for government blunders	Affordability: As consumers of electricity, we should not have to pay for NERSA's calculation errors. Reliability: As consumers of electricity, we should not have to pay full price for aging, unreliable infrastructure? Efficiency: As consumers of electricity, we should not have to fund Eskom's cash flow and construction delays. Bottom Line is that Electricity generation, supply and distribution cannot be trusted to any Political Government in South Africa to be run as a S.O.E. They are incapable of doing so. They will never meet the objectives of reliability & efficiency within the constraints of reasonable affordability. Privatisation seems to be the only solution?	Ivan	KwaZulu-Natal		retired

If they blundered, that is their mistake to own, if they have any morals at all.	Tim	KwaZulu-Natal		retired
	2026-01-20 13:44:44	No I do not	All of the above – we should not pay for government blunders	To: The National Energy Regulator of South Africa (NERSA) Date: 20 January 2026 Subject: Formal Objection and Public Comment on Electricity Price Determination (Reference: NERSA Consultation Paper on Eskom Tariffs) 1. Introduction I hereby submit my formal objection and comment in response to NERSA's public consultation regarding the proposed electricity tariff adjustments. This submission is made in my capacity as an electricity consumer and a citizen, in terms of the public participation process mandated by the National Energy Regulator Act (Act No. 4 of 2006) and the Promotion of Administrative Justice Act (PAJA). I have noted the High Court's ruling which compelled NERSA to recalculate the value of Eskom's assets after admitting to calculation errors amounting to approximately R76 billion. The current proposal seeks to recover these costs through increased electricity tariffs, thereby transferring the financial burden of regulatory and institutional errors onto consumers. This is unjust, inequitable, and contrary to the principles of fair administrative action and consumer protection. 2. Objection Based on Affordability: Should consumers pay for NERSA's calculation errors? No. The R76 billion discrepancy stems from admitted errors in NERSA's regulatory calculations. It is fundamentally unreasonable to expect households and businesses—already grappling with a cost-of-living crisis, high unemployment, and economic strain—to absorb costs that result from regulatory oversight failures. NERSA's primary mandate includes protecting the interests of consumers and ensuring that licensed entities operate efficiently. Passing on these costs violates that mandate and sets a dangerous precedent that undermines accountability in public institutions. I object to any tariff increase intended to recover costs related to this error. 3. Objection Based on Reliability: Should consumers pay full price for aging and unreliable infrastructure? No. Eskom's infrastructure is characterized by aging plants, frequent breakdowns, and ongoing load-shedding, which severely disrupts livelihoods, businesses, and essential services. Consumers are already paying for electricity that is often unavailable. To demand further payment for infrastructure that fails to deliver reliable service contradicts the basic principle of quid pro quo (something for something). Tariff increases must be linked to measurable improvements in reliability, energy availability, and maintenance. Until such improvements are realized and sustained, consumers cannot be expected to finance infrastructure failures through higher tariffs. 4. Objection Based on Efficiency: Should consumers fund Eskom's cash flow problems and construction delays? No. Eskom's well-documented challenges in project management, construction delays (e.g., Medupi and Kusile), and operational inefficiencies should not be resolved at the expense of consumers. Poor planning, governance failures, and cost overruns must be addressed through internal restructuring, improved governance, and accountability mechanisms—not through blanket tariff hikes. Consumers are not shareholders in Eskom by choice; they are captive customers. Forcing them to subsidize inefficiencies penalizes the public for systemic failures and reduces the incentive for Eskom to reform. 5. Conclusion and Demand I therefore strongly object to any electricity tariff increase that seeks to recover the costs associated with NERSA's R76 billion calculation error, or that fails to correspond to tangible improvements in supply reliability and operational efficiency. I call on NERSA to: · Absorb the cost of its admitted error and not pass it to consumers. · Ensure any tariff determination is based on accurate, transparent, and fair calculations. · Tie any future tariff increases to demonstrable improvements in Eskom's performance, including reduced load-shedding, maintained infrastructure, and accountable governance. · Uphold its statutory duty to protect consumers and ensure affordable, reliable electricity for all South Africans. This submission must be recorded, acknowledged, and considered as part of NERSA's decision-making process. Failure to adequately address these concerns may necessitate further legal and public recourse. Yours faithfully, Gerhardus P de Beer	Gerhardus	KwaZulu-Natal		retired

	2026-01-20 13:32:17	No I do not	All of the above – we should not pay for government blunders	It is ridiculous to expect us as citizens to fund the blatant mismanagement and corruption that has and is still taking place. Little to nothing seems to come out of investigations that have been done. The establishment of committees and subcommittees are just a waste of money as nothing much comes out of them. How are we expected to afford the continuous rising costs? The value of our income depreciates yearly as a result of increases in the cost of living. One wonders whether people employed by the authorities are qualified to do their work as a result of their inefficiency and pure lack of interest in their work. There appears to be a lack of transparency in what information is passed to us lay people, one does not know what to believe. Where is the accountability that we deserve and are entitled to?	Gregory	Northern Cape		employed individual
	2026-01-20 13:32:14	No I do not	All of the above – we should not pay for government blunders	An increase in electricity tariffs will not have the positive impact on the amount that Eskom needs to claim. Too much corruption exists around where the money goes, and I have no doubt that the higher rates will simply fill wrong people's pocket's.	Joel	Western Cape		business owner

	2026-01-20 19:28:59	No I do not	All of the above – we should not pay for government blunders	It is obvious from a business perspective that the organisation always obtains its funding from the sales it makes. Per implication, the clients who buy the product or service. However, the case at hand is that the fearless leaders have allowed the Eskom infrastructure to deteriorate beyond a reasonable extent due to utter incompetence, malpractice, and utter short-sightedness. Coming now and wanting to both burden the clients as well as the taxpayer with their pathetic management of said assets is cause for alarm. The only thing that would really make sense is to disband Eskom and allow it to be privatised so that the cancers can be cut away and the market forces are allowed to come in and pick up the slack so that the country can get back its energy supply to be able to offer a base for economic growth, employment and sustained development of the whole country. Therefore, I cannot accept being held responsible for picking up the tab and continuing to fund these malicious people and to support them in their damaging ways. Especially on a financial front. 	2026-01-20 18:14:08	No I do not	All of the above – we should not pay for government blunders	The main problem seems to be the total incompetence of Eskom management at all levels. A responsible government should do a top-down assessment of the capabilities of Eskom management at all levels, root out incompetent people, appoint only competent ones, and find a way of checking up that they are doing their job throughout their period of employment. Will this happen? -- not likely. Too much cronyism, jobs for pals, and abject failure of just about all concerned to comprehend that they are supposed to be providing an absolutely essential service to all the people of this country, rather than to the lining of their own pockets.	Alex	Western Cape		retired
	2026-01-20 18:12:29	No I do not	All of the above – we should not pay for government blunders	Why are people surprised at this? They put non qualifying cadres in charge then corrupt and steal and MAKE (PAYING) public pay. And if you can afford solar they want to punish you again. But cable /electricity theft never stopped. To scared to take on scrap metal dealers that buy the cable	Danny	Gauteng		retired

	2026-01-20 18:10:59	No I do not	All of the above – we should not pay for government blunders		Riedwaan	Gauteng		employed individual
	2026-01-20 18:10:18	No I do not	All of the above – we should not pay for government blunders	How many people actually legally pay for electricity? Lets assume the number is a very generous 6 million people, excluding dependents or others sharing the household's electricity consumption. In effect this means 6 million bills get issued and paid each month. If R76 billion rand needs to be recovered, this adds roughly ~R12500 per bill. On top of already expensive prices, which increase more, and more often than any other financial indicators. This to me indicates that ESKOM drains money, rather than generating money. For a legally imposed monopoly, this financial performance is both staggering and pathetic. ESKOM should either focus on cutting costs, like salary and staff numbers, or they should not be allowed to operate as the sole electricity provider in South Africa. Their contribution to society and the economy is a handbrake on progress and their poor performance sees no accountability nor repercussions of any kind. They simply plough on under terrible management, an exorbitant salary bill and unfair employment practices. I do not believe footing this bill will make any difference or somehow put ESKOM on the right track, because the institution has no reason to improve; They will be in the very same position within 5 years and will just have a new list of excuses for why they are in financial hardship again. Instead I call for reformed policy to allow competitors to enter the market to provide both incentive for ESKOM to pull up their socks to retain market share and to drive electricity prices down. I don't care who steps in or from which country, but we need well managed investment into our infrastructure, which is not managed by the South African government - said government is yet to deliver sustained positive growth of literally anything under their care. The ports are falling apart, the national railway system is confined to the history books, the navy is a joke (as is the rest of our defence forces), we can't safely consume our tap water and the electrical grid is under constant pressure. Since the government has put FULL TRUST in ESKOM to provide a service and refuse to cede any control of this corner-stone service, they must take FULL RESPONSIBILITY for sorting it out. I am tired of being extorted by a bloated national leadership for 3rd world care	Nardu	Gauteng		self-employed
	2026-01-20 18:09:40	No I do not	All of the above – we should not pay for government blunders	Why must we pay for Escom mistakes, ageing equipment and cover all the running operational costs. 	2026-01-20 17:58:56	No I do not	All of the above – we should not pay for government blunders	It is entirely fair of the government to expect its citizens to pay for electricity, water, sewage and bin collections. However, this same government should then use these payments from their citizens to pay for the supply of the service (labour), for the commodity (the actual electricity, etc) as well as the upkeep and maintenance of same. If they squander the money on excessive salaries, bonuses and other perks of those at the top tier of this sector, the top tier must unfortunately make good on the promise of supply and demand for which they received the payments or be charged, found guilty of stealing and then incarcerated. The days of looking at the government as the downtrodden is long gone.	Tina	Western Cape		employed individual

	2026-01-20 16:42:39	No I do not	All of the above – we should not pay for government blunders	The Cost of Eskom's Assets vs. Tariff Affordability Context: The court ruling requires NERSA to increase the value of Eskom's assets (the Regulatory Asset Base), which directly increases the electricity tariff. Question: Given the current economic climate, do you accept a further increase in electricity tariffs to fund a higher valuation of Eskom's power plants, or do you believe the asset values should be capped to keep electricity affordable? Paying for Aging and Unreliable Infrastructure Context: This redetermination decides which power stations are included in the price you pay. This includes aging plants and those prone to breakdowns. Question: Should consumers be forced to pay higher tariffs to cover the full value of power stations that are near the end of their lifespan or frequently unavailable due to breakdowns (load shedding)? Burdening Consumers with Construction and Operational Costs Context: The proposed adjustments allow Eskom to recover billions from the public for "Work Under Construction" and daily cash flow ("Working Capital"). Question: Do you agree that the consumer should carry the additional financial burden of funding Eskom's incomplete construction projects and operational cash flow through increased electricity prices?	Johannes	Western Cape		employed individual

	2026-01-20 16:37:58	No I do not	All of the above – we should not pay for government blunders	Electricity consumers should not be required to pay for regulatory and calculation errors made by NERSA and Eskom. These costs did not arise from consumer behaviour and it is unfair to shift institutional failures onto the public. Retrospective cost recovery undermines trust in the tariff-setting process. Households and businesses budgeted based on approved tariffs at the time and should not be penalised after the fact. Electricity is a basic necessity. Further tariff increases will worsen affordability pressures on working families and essential service households, including healthcare workers, at a time when the cost of living is already unaffordable. Consumers continue to experience load shedding and unreliable supply. Higher tariffs without clear improvements in performance and reliability do not represent value for money. NERSA should reject consumer-funded recovery and instead pursue alternatives that ensure accountability, affordability, and public confidence in energy regulation.	Angelique	Western Cape		employed individual
	2026-01-20 16:37:02	No I do not	All of the above – we should not pay for government blunders	Electricity is becoming unaffordable. This has significant impact on the economy and as a result we are deindustrialising as manufacturing and benifaction become uncompeditive. In addition this places additional burden on home users who are already struggling. The net effect is more job losses and a shrinking economy	Kevin	Western Cape		self-employed

	2026-01-20 16:36:00	No I do not	All of the above – we should not pay for government blunders	Affordability: Why should the consumer pay for NERSA's calculation errors? Reliability: Why should the consuner pay full price for aging, unreliable infrastructure that ought to have been better maintained but was not? Efficiency: Why is the consumer expected to in essence fund Eskom's cash flow and construction delays? Eskom continues to underwhelm forcing many into alternate power sources which the entity seems to want to tax. This leaves the consuner with little goodwill toward what has become a moribund entity. Nersa and the persons or departmentsl who made the errors noted for the short fall need to be dismissed. Further, hiring at Nersa going forwarsd needs to be prioritised on the basis of competence only.	Delta	Gauteng		self-employed

	2026-01-20 16:06:00	No I do not	All of the above – we should not pay for government blunders	Eskom allowed cadres to steal and plunder, and destroy the once world-class electricity facility in Africa with the cheapest electricity. After 1994, Eskom was run into the ground, mismanagement due to incompetence and cadres, and ripping off the overburdened taxpayers of SA. Since 1994, South Africa's average electricity price has increased by approximately 1,722%, from 10.32 cents per kilowatt-hour (kWh) to 188.07 cents per kWh in 2024. This surge significantly outpaces the 451.9% inflation over the same period. The most substantial hikes occurred between 2008 and 2012, with annual increases ranging from 16.53% to 27.75%. And still, YOU WANT TO TAP WATER OUT OF A ROCK?! Go fly a kite!	Chris	Western Cape		retired
	2026-01-20 16:05:04	No I do not	All of the above – we should not pay for government blunders	South African public should not pay twice for the same thing because of corruption. 	2026-01-20 15:58:45	No I do not	All of the above – we should not pay for government blunders	I hereby submit my objection to NERSA's proposal to require South African energy users to shoulder an additional R76 billion to compensate for Eskom's historic failures. As citizens and electricity consumers, we should not be expected to pay for the consequences of long-standing mismanagement, poor governance, and systemic failures within Eskom, nor for the regulatory shortcomings that allowed these issues to persist for years without meaningful intervention. The principle that ordinary South Africans must repeatedly absorb the financial burden of institutional failure is both unfair and unsustainable. Electricity consumers have already endured excessive tariff increases, unreliable supply, persistent load shedding, and rising costs of living. Many households and businesses are under severe financial strain. Imposing yet another financial obligation effectively penalises the public for decisions and actions over which they had no control. Accountability must rest with those responsible for the failures. Any recovery plan should prioritise: - Consequence management for Eskom leadership and relevant oversight bodies - Internal cost containment and efficiency improvements - Structural reform within Eskom and the energy sector - Protection of consumers from further unjustified financial pressure NERSA's role as an independent regulator is to safeguard the public interest. Approving or facilitating the recovery of Eskom's losses from consumers undermines confidence in regulatory independence and perpetuates a cycle in which failure is rewarded and accountability is absent. I therefore strongly oppose this proposal and urge NERSA to reject any mechanism that forces electricity users to pay for Eskom's past mistakes. A sustainable energy future cannot be built on transferring institutional failures onto the very people already suffering their consequences.	Peter	Western Cape		employed individual

	2026-01-20 15:54:50	No I do not	All of the above – we should not pay for government blunders	I am 84 and have lived in the same house since 1978 and have kept monthly household expenses since 2004 and until 2016 water and lights represented on average 2.3% of my monthly household bill. This increased for the period 2016 - 2024 to 7.19% with 2024 representing 13% for that year alone. Not only did i go to prepaid meter at the bequest of the City Council to reduce costs but am penalised with a R230.00 monthly once of service payment . All governemnts in the world have their Achilees Heel but the SA Government for a supposedly first world country has several like not paying their bills, open corruption, over bloated in size and penalising those people who pay their due taxes to support them while letting gangsters and fraudsters get away with murder. 	2026-01-21 05:27:26	No I do not	All of the above – we should not pay for government blunders	The tax payer should never pay for government official blunders. Just as a criminal needs to serve his/her time when found guilty, the department needs to take ownership and take it upon themselves to resolve the matter at hand. The end user should not be charged for what the department lacks and fails to maintain. I agree that there can be a yearly increase due to inflation; but this, in my opinion, will cause a lot more crime to erupt as the people do not trust Eskom not the government entirely due to their previous failures and lack of drive to ACTUALLY preserve the future of this wonderful nation.	Dennon	Western Cape		employed individual
	2026-01-21 05:24:56	No I do not	All of the above – we should not pay for government blunders	My Public Comment on the Proposed Electricity Price Determination NERSA has invited public comment on the proposed electricity price determination following a High Court ruling that required the recalculation of Eskom's Regulatory Asset Base. It is now evident that errors in the original calculations—reported to amount to approximately R76 billion—are being recovered through higher tariffs charged to electricity consumers. I submit the following comments in response. 1. Affordability Electricity consumers should not be held financially responsible for regulatory or calculation errors made by Eskom or NERSA. These errors were not caused by consumers, nor were consumers consulted when the original miscalculations occurred. Passing these costs on through increased tariffs undermines affordability, places further strain on households and small businesses, and erodes trust in the regulatory process. The principle of fairness requires that the financial consequences of institutional errors be addressed within the system that caused them—not transferred to the public. 2. Reliability Consumers should not be required to pay full economic returns on aging, unreliable, and frequently unavailable infrastructure. South Africans continue to experience load shedding, supply interruptions, and declining service quality. Charging higher tariffs for infrastructure that does not reliably deliver electricity is inconsistent with basic consumer and regulatory fairness. Tariffs should reflect actual service delivery and performance, not theoretical asset values that fail to translate into reliable supply. 3. Efficiency Electricity consumers should not be used as a mechanism to fund Eskom's cash-flow challenges, construction delays, cost overruns, or inefficiencies. These issues are structural and managerial in nature and must be resolved through governance reform, operational efficiency, and accountability—not through repeated tariff increases. Continually transferring financial risk from Eskom to consumers discourages efficiency and perpetuates systemic failure. Closing Comment Eskom exists to serve the people of South Africa and to enable economic growth, energy security, and the development of households and small businesses. Its original mandate was to build the country—not to extract value from citizens to compensate for institutional failure. Approving tariff increases that recover regulatory errors, inefficiencies, and unreliable performance reverses this mandate and places an unsustainable burden on the public. NERSA is urged to prioritise affordability, accountability, and performance-based regulation in its final determination.	Pieter Carel	Gauteng		self-employed

	2026-01-21 00:08:47	No I do not	All of the above – we should not pay for government blunders	It is totally unacceptable that the public is asked to put up with this incompetence yet again. Where does this stop? After the public, and businesses have already lost so much? When are the responsible people going to be called to account for their mismanagement and corruption? It's because they always get away with it, that we have this situation. The buck stops at management. Perhaps recuperate at least some of the money from salaries and bonuses of management and top management, and while we're at it, perhaps make that the relevant Minister involved too. Because it is tax payers money that they've been squandering now for years. Why does the public, yet again have to pay for this?	Susan	Gauteng

	2026-01-20 23:43:36	No I do not	All of the above – we should not pay for government blunders	No I completely disagree with Nersa's plan to force South African energy users to pay Eskom an additional R76 billion for its mistakes. Ridiculous, as 90% of the time in the Vlees Bay & Kanon Valley areas near Mossel Bay we have power outages, cable theft ongoing ... It's the order of the day! Then we as client must pay, pay with increased tariffs every year for such poor service or no service! Cable theft ongoing all the time & I think many of these thefts are connected with employees inside Eskom as they get a cut (inside jobs). They work together therefore this corruption is never ending & a vicious cycle!! I can't believe a company can treat its customers in a way like this. Eskom delivers insufficient service & then expect their customers to pay for their mismanagement of the company & inside corruption. A huge shake-up is needed inside Eskom to rectify Eskom's huge problems & very poor customer service & customer delivery! It has become a national shame! It's time the customers rise up as one mighty voice with actions against this monstrous failure. Customers should just refuse to pay for such poor service. Demand it should be taken over by competent management & personnel & workforce. Incompetence, mismanagement & corruption on highest levels within Eskom drain its funds which means they actually 'steal' their customers hard earned money!! It is shocking & when will this end?? So absolutely NO to take anymore money from public customers!! Put Eskom in administration & let it be taken over by competent people who manage it correctly & get rid of the corruption! Any company that isn't managed & controlled by competent people will fail or fall. Corruption within will ultimately lead to failure within & will collapse. The bad worm within causes the rot & decay.	Margaretha	Western Cape		employed individual

	2026-01-20 22:35:05	No I do not	All of the above – we should not pay for government blunders	do not agree with the proposed electricity price increase. Consumers should not be required to pay for NERSA's calculation errors or Eskom's historical financial mismanagement. Passing the cost of a R76 billion asset valuation mistake onto the public is unfair and undermines trust in the regulatory process. Furthermore, consumers are being asked to pay full tariffs for electricity supplied by aging and unreliable infrastructure, while ongoing inefficiencies, construction delays, and cash-flow challenges persist. These costs should be addressed through improved governance, accountability, and efficiency within Eskom and NERSA—not transferred to already strained households and businesses. Electricity must remain affordable, reliable, and fairly priced. I therefore oppose the current proposal	Karl	Western Cape		employed individual
	2026-01-20 22:27:31	No I do not	All of the above – we should not pay for government blunders	It would be disgraceful to ask the public to accept the so called 'errors' of people, who I am sure, have received handsome salaries and privileges from the payments made by the public, to fund their salaries, to make another payment to them to put right their errors by not preventing this happening in the first place!! Has no one heard of the word accountability! They should be the ones made to suffer, not the public. This is almost a joke. What about the board - meetings that must have taken place to discuss the state of equipment and what needed to be renewed. We are not shareholders. Just the rate payers.	Veronica	KwaZulu-Natal		retired

	2026-01-20 21:31:18	No I do not	All of the above – we should not pay for government blunders	How embarrassing! In the private sector, this blunder would be totally intolerable! At the end of September 2025, Eskom's customers i.e. the municipalities were sitting on an arrear debt of R105 billion! I therefore suggest Eskom start collecting the money there and stop harassing the End Users who have already been lumbered with a 12,74% tariff increase and who also had to pay Eskom R11,9 billion from our hard-earned tax money as a fuel levy rebate! Moreover, Eskom has brazenly declared a R23.9 billion profit for FY25 and a R24.3 billion profit for the first half of FY26 yet they continue to harass the End Users for their total mismanagement	Michelle	Gauteng		
	2026-01-20 21:30:27	No I do not	All of the above – we should not pay for government blunders	This is not acceptable for the consumer to fit the bill as most low income households are in stress as the highest bill has become electricity. We should not support any price increases as eskom has bad management skills and is a ticking time bomb billions go missing every year it is public knowledge. Why must the public pay for the lack of control of their finances, those people are or need to be dealt with severely.	William	Mpumalanga		employed individual

	2026-01-20 20:49:37	No I do not	All of the above – we should not pay for government blunders	This is why we pay taxes, which also shouldn't go up just for you guys to "error" it in to think air again. The government has dedicated accountants, bookkeepers and money management for that to make sure each year Every department gets what is needs to operate as it should and even be better. The government must manage it and use it where it must go, not for their personal use. And the taxes shouldn't increase just because you can't do the job right. You tax the necessary amount only, which should be the minimum, which is more than enough and use it on improving the country. This is the whole purpose of the government in the first place and to bring business to SA so jobs can be created and develop a stable and booming economy by doing trade and business with what we have to offer. But we have to pay privately due to negligence and still get taxed for it as well. No way, do your job and sort it out yourself just like how you created it yourself. I did my part now you(the government) do yours.	Chevonne	Western Cape		employed individual

	2026-01-21 09:21:45	No I do not	All of the above – we should not pay for government blunders	There needs to be an unbiased independent audit. They have not built trust with consumers. They have not looked after infrastructure. They are more than likely top heavy. We are being penalized for their blunders and their personal living style. The infrastructure was build years ago - we should be paying less not more as maintenance (if done properly) should be less than the original outlay. Yet here we are. Paying too much before 1 iota of electricity is even being used	James	Western Cape		business owner
	2026-01-21 09:21:38	No I do not	All of the above – we should not pay for government blunders		Erika	Eastern Cape		unemployed individual
	2026-01-21 09:21:02	No I do not	All of the above – we should not pay for government blunders	Eskom needs to fix their inhouse corruption and inefficiencies before burdening households further.	Claire	Gauteng		
	2026-01-21 09:20:51	No I do not	All of the above – we should not pay for government blunders		Gail			
	2026-01-21 09:19:35	No I do not	All of the above – we should not pay for government blunders	Collect from non payers, disconnect illegal connections- this will diminish public municipal debts to Eskom and no need for Nersa to increase any rates whether miscalculated or not.	Iqubal	Gauteng		retired
	2026-01-21 09:19:26	No I do not	All of the above – we should not pay for government blunders		Alastair	Western Cape		retired
	2026-01-21 09:18:25	No I do not	All of the above – we should not pay for government blunders	I think Eskom should do their job, there are thousands of South Africans who are not paying for electricity. If they can start collecting money from all these household the price will go down and they will have surplus to pay for their mistakes as well. They also need a system that will monitor electricity consumption. Technology is at an advanced stage to be able to monitor consumption of each household. The fact that they can tell how much a household have use in a month it is a problem.	Boitumelo	Gauteng		retired
	2026-01-21 09:18:07	No I do not	All of the above – we should not pay for government blunders	Hell no. For years, electricity tariffs in South Africa have risen at punishing rates—often close to 20% annually, far outpacing inflation. Since 2007, Eskom's average tariff has increased by more than 1,000%, while inflation averaged only about 5% per year. In fact, between 2023 and 2024 alone, tariffs jumped 18.7% and 12.7%, compared to inflation of 5.9% and 4.9% respectively. Consumers have already been carrying the burden of mismanagement, corruption, and inefficiency for decades. Now, NERSA admits to a R76 billion error in its revenue calculations, yet instead of absorbing this mistake, they want us—the paying customers—to cover it through higher tariffs. This proposal effectively punishes households and businesses for the regulator's incompetence. The reality is simple: Affordability: Ordinary South Africans cannot and should not pay for NERSA's blunders. Electricity is already unaffordable for many. Reliability: Eskom's infrastructure is aging and unreliable, with load-shedding crippling productivity. Paying "full price" for a broken service is unjustifiable. Efficiency: Eskom's delays, cash flow problems, and construction mismanagement are not the responsibility of consumers. Instead of clinging to failed policies and poor governance, Eskom and NERSA should focus on employing competent, educated professionals who can manage the country's energy needs responsibly. Continuing to hide behind frameworks like BEE while delivering inefficiency only deepens the crisis. South Africans have been penalised enough. We are not responsible for their errors, and we refuse to pay for them again.	Tanja			
	2026-01-21 09:17:03	No I do not	All of the above – we should not pay for government blunders	Consumers should not pay for incompetent directors, etc. - bonuses were received for poor service delivered.	Lukas	Free State		self-employed

Government is responsible for this blunder and not the public. Government has made a mess of all the SOE's and now making us pay for their mess. It's high time for change.	Desiree	Gauteng		retired
	2026-01-21 08:54:19	No I do not	All of the above – we should not pay for government blunders	Government ministers are stealing BILLIONS of Rands. Stop them from stealing and there will be more than enough money to cover Eskom's mistakes.	Irfaan	Gauteng		employed individual
	2026-01-21 08:53:54	No I do not	All of the above – we should not pay for government blunders	I strongly oppose the proposed R76 billion electricity tariff increase approved by NERSA because it represents an unjust and economically destructive burden on ordinary South Africans, small businesses, and an already fragile economy. Firstly, this increase punishes consumers for failures they did not create. Years of mismanagement, corruption, poor maintenance planning, and governance collapse within the energy sector—particularly Eskom—are now being offloaded onto households and businesses who already pay some of the highest electricity tariffs in the developing world. Asking citizens to absorb R76 billion more, without clear accountability or reform, is not cost recovery; it is institutionalised injustice. Secondly, the timing is reckless. South Africans are battling high unemployment, rising food prices, fuel hikes, and stagnant wages. For many families, electricity is not a luxury—it is essential for cooking, heating, studying, working, and survival. This increase will force households to choose between power and food. That is not policy; that is cruelty. Thirdly, this decision chokes small and medium enterprises, which are the backbone of job creation. Higher electricity costs mean higher operating expenses, reduced profitability, job cuts, and business closures. At a time when the country desperately needs economic growth, this move actively works against it. Fourthly, the increase lacks credible assurance of improved service delivery. South Africans continue to endure load shedding, unreliable supply, and infrastructure failures. There is no convincing guarantee that this R76 billion will translate into stability, efficiency, or long-term energy security. Without transparency, performance benchmarks, and consequence management, this becomes a blank cheque funded by the poor. Finally, this tariff hike deepens energy inequality. Wealthier households and large corporations can absorb or bypass costs through solar and alternative energy, while low-income communities remain trapped in an expensive, unreliable grid. This widens the gap between the haves and the have-nots, undermining social cohesion and public trust. In conclusion, opposing the R76 billion NERSA increase is not populism—it is a stand for fairness, accountability, and economic sanity. South Africa does not need higher tariffs; it needs ethical leadership, efficient energy management, and bold reform. Until those are delivered, asking the public to pay more is nothing short of sanctioned plunder.	Penny Vuyelwa	Gauteng		employed individual
	2026-01-21 08:52:04	No I do not	All of the above – we should not pay for government blunders	All the parties involved should be held accountable and prosecuted, there's no mistake here they knew exactly what they were doing	Mzwandile	Gauteng		employed individual
	2026-01-21 08:52:02	No I do not	All of the above – we should not pay for government blunders	We are already overtaxed and Eskom is one provider that's gets a lot if of money from us with too much increases. I am surprised that after declaring high profits and I. Many years being given money by the government to support their corruption they still want money from us whilst we are struggling. The economy is already an indicator. The government must just sell Eskom or provide openings for other providers so they receive some competition,	Pgumbidzai	Gauteng		business owner

	2026-01-21 08:48:29	No I do not	All of the above – we should not pay for government blunders	The people of South Africa should not have to pay for government's ineptitude. 32 years ago the country had one of the best power grids in the world, supplying much of Africa with power they couldn't produce themselves. Now after 3 decades of mismanagement, corruption and blatant theft, they expect the people of SA to foot the bill. Absolutely not!	Brett	Gauteng		employed individual
	2026-01-21 08:48:22	No I do not	All of the above – we should not pay for government blunders	Errors made by Nersa should in no way be pushed onto the public. Nersa employed the individuals responsible for the calculation error, therefore they need to take accountability and ownership of their errors and pay for it. Deduct it from individuals responsible for the supposed calculation error.	Margaret	KwaZulu-Natal		employed individual
	2026-01-21 08:48:21	No I do not	All of the above – we should not pay for government blunders		Ismail	KwaZulu-Natal		self-employed
	2026-01-21 08:48:18	No I do not	All of the above – we should not pay for government blunders	South Africans are already under severe economic pressure. Any further upward adjustment that risks increasing electricity tariffs is not affordable and is contrary to the public interest. Tariffs should reflect efficient, prudent, and demonstrably useful investment—especially in a context of weak supply performance and declining reliability. My objections are as follows: Affordability and fairness: Consumers and businesses cannot be expected to absorb higher costs driven by technical re-calculations and historical shortcomings. The electricity price path must prioritise affordability, competitiveness, and economic stability. Paying for ageing and unreliable infrastructure: It is inappropriate to increase the value on which Eskom earns a return when much of the generation fleet is ageing, unreliable, and frequently unavailable. Customers should not pay higher charges for assets that do not deliver reliable service. Burdening consumers with construction and operational risk: Costs associated with work-under-construction, delays, overruns, and inefficient project execution should not be transferred to consumers by default. Risk should sit with the party best able to manage it—Eskom and the shareholder—unless Eskom can clearly prove prudence, efficiency, and value-for-money for each cost item. Incentives and accountability: Adjustments that increase revenue without strict performance and prudency conditions weaken incentives for reform, maintenance discipline, and cost control. Any re-determination must be paired with enforceable accountability measures and transparent disclosure so the public can verify what is being paid for. I request that NERSA reject or materially limit any upward re-determination that could result in additional tariff pressure.	Gerhardt	Gauteng

	2026-01-21 08:28:16	No I do not	All of the above – we should not pay for government blunders	To Whom It May Concern, I am writing to formally express my inability to continue paying escalating electricity costs under the current circumstances, and to request that my position as a consumer be considered with fairness and accountability. I am financially responsible for three households: my own primary residence, my father’s flat, and my mother’s flat. This places a significant and ongoing financial burden on me, despite my best efforts to remain compliant with all municipal and utility obligations. The continued increases in electricity tariffs have made this responsibility unsustainable. Affordability: Consumers should not be expected to pay for calculation errors or misjudgements made by regulatory bodies such as NERSA. Tariff increases based on flawed assumptions directly impact households that are already under financial strain. In my case, these increases are multiplied across three homes, making affordability a critical concern. Reliability: It is unreasonable to expect consumers to pay full and increasing prices for electricity supplied through aging and unreliable infrastructure. Frequent load shedding, outages, and inconsistent supply mean that the service delivered does not match the cost charged. Payment should reflect value and reliability, which are currently lacking. Efficiency: Consumers should not be required to fund Eskom’s cash flow challenges, operational inefficiencies, or prolonged construction delays. These are systemic and managerial issues that fall outside the control of ordinary citizens. Passing these costs on to consumers, particularly those supporting multiple households, is neither fair nor sustainable. I remain willing to pay for electricity that is affordable, reliable, and efficiently managed. However, under the current conditions, I respectfully state that I cannot continue to absorb costs that arise from regulatory errors, infrastructure failures, and institutional inefficiencies. I urge the relevant authorities to reconsider the financial burden placed on consumers and to implement solutions that prioritise accountability, transparency, and fairness. Yours faithfully,	Charmaine	Gauteng		self-employed
	2026-01-21 08:27:23	No I do not	All of the above – we should not pay for government blunders	We as consumers are not an unlimited well from which the government can draw to fix their costly mistakes. 	2026-01-21 08:21:41	No I do not	All of the above – we should not pay for government blunders	I do not agree that we the consumer must pay and absorb the service provider, namely Eskom for maintenance services that were not done when it was supposed to be done. It is not as though I did already pay for services. The service provider has added increase prices over the years. Now it is stated "Sorry we actually didn't do what we should have done". Top senior management with very high salaries, put in place and do not do their job for what they get paid for. Why should we as consumer absorb and pay for people who did not do what they were supposed to do. This all over the government in Sout Arica. People are in passions where they cannot do the work and the ANC do not care because of BEEE regulations. With my little income I have to survive and support a family but because of this I have to pay the increase and even more. My family must suffer because of the stupid mistakes of the government! No, I just do not agree with this bill, NERSA is discarding cases lodged to them against Eskom practice. I am not in favour of this. Please put the correct people in place that can and want to do the work not because they have the right skin colour but know what to do and implement it correctly.	Caroline	Northern Cape		employed individual
	2026-01-21 08:21:36	No I do not	All of the above – we should not pay for government blunders	I don’t think it’s fair for consumers to incur higher costs for an SOE error. 	2026-01-21 08:03:28	No I do not	All of the above – we should not pay for government blunders	Any private company in South Africa, when making a mistake, would not be able to place the financial burden on its customers for the mistake it has made, without repercussions. If one or more employees charged R10 instead of R20 for a product, resulting in a loss for the company, to recover the loss direclty linked to the mistake made, would that mean the product then inreases / becomes R30 to offset the R10 lost. This would make the customers walk away and chose another company who provides the same product. That is simple economics! With Eskom we don't have that choice. If they make a mistake, we can't switch over to another supplier. Yes we could get Solar, but that is again placing the financial burden on us and not on Eskom. How is it that we can expect to be financially burdened for mistakes, poor planning, poor maintenance, crime (including non prosecution of criminals / non investigation of criminals and syndicates due to corruption within ...) how can we expect to be burdened with this as paying customers of Eskom. Surely - they should fund their mistakes by getting teams to go out and collect the millions and billions owed to Eskom by various users of electricity who HAVE NOT paid their bills - instead of making paying customers pay more and more each year ? I would support a legal challenge to any future price hikes by Eskom to cover for their mistakes and poor planning and lack of judgement when it comes to maintenance in the past 30 years! 	2026-01-21 07:26:27	No I do not	All of the above – we should not pay for government blunders	1. Eskom is part of the failed state of Azania 2. Eskom employees are the highest paid of all workers in Azania 3. Eskom screwed up - let their Porsche driving management go & beg for more money from their contacts abroad 4. Eskom MUST fall - with it out of the way Service Delivery can be restored	Willem	Limpopo		
	2026-01-21 07:25:05	No I do not	All of the above – we should not pay for government blunders	We simply cannot afford to pay for governments mess up!!!!	Natalie	Gauteng		employed individual
	2026-01-21 07:23:53	No I do not	All of the above – we should not pay for government blunders	This, like many other "mistakes" are the result of incompetent people driving the ship. Their self-serving appetite to enrich themselves and cadres versus delivering services that should be government-sponsored to make it affordable for citizens (only! Not to increase the number of stolen funds, or bail the incompetent bunch out time after time). Eskom, and other Government institutions must be privatized and the incompetent, ill-advised, poorly educated and moral-less leaders must be replaced by people who understand business and what "service delivery" means. People who can be creative in raising funds and come up with ideas other than"let them suckers pay". STOP PROTECTING INCOMPETENCE! STOPE ENABLING CORRUPTION! STOP STRIPPING THE CITIZENS OF THE LITTLE BIT THEY HAVE. Teach people abut RESPONSIBILITY. About MORALS. About HONOUR. Cut the crap of entitlement! It teaches people that they deserve the good that actually only comes to those who EARN it. The state of this country shows clearly the disarray and chaos that follows when leaders don't think they have to actually do something (for someone else) in order to take that fat paycheck home. The results are clear and forensically demonstratable - we care going backwards...People are getting poorer, more desperate, more negative, being forced to live less dignified lives because the basics (water, electricity, transport, food, education) become more and more unattainable. Leader: you will not uplift the poor by stripping the middle class - you will only end up with a larger pool of poor people. It is NOT okay to make mistakes such as these! The leaders of Nersa and Eskom should contribute to the shortfall with their own salaries, bonuses (which they do not deserve) incentives, etc. Salary increases for them should stop immediately! Management salaries must be cut by at least double-digit figures. In fact, all the Ministers involved with this circus should also be held financially accountable. Law should change to stop protecting idiots who cannot perform their jobs. Government should step aside from trying to run or manage anything - their continued failure is destroying this country and its morale.	Liezle	Gauteng

	2026-01-21 07:20:50	No I do not	All of the above – we should not pay for government blunders	Years of neglect, cutting corners, corruption and self intrest by the various governments and greedy politicians since the abolishment of apartheid have caused the problems with the energy infrastructure as we know it now. Not caused by the population, but by a lacking government. And now, when the water is reaching their lips and they are about to drown, they want the people to bear the full consequences and have to pay for everything. I say NO. But I understand that covering R76 billion is not a small task. Specially for a governement that is strapped for cash. That the only way to fill these financial gaps is by either using tax money or raising enery revenue. The latter can easily be reached if all energy users contribute and pay for their use. No more free unlimited power for complete townships, no more stealing electricity. Everyone contributes. If every inhabitant of South-Africa would conribute R1.200, the deficit would be solved. That is R100 per month for 1 year. But that also includes little children and unemployed people, which is not a realistic process. Spread this out over 5 years and it would be R240 and things would be more real. So... no more free energy and everyone pays for whet they use and within a few years Eskom would be out of trouble. But this is probably a ferrytale.	Richard	Limpopo

	2026-01-21 06:30:04	No I do not	All of the above – we should not pay for government blunders	The middle class of South Africa is being tapped dry. The government insists on ridiculous employment policies, focusing on the colour of your skin rather than competency, so the government needs to be responsible for any errors that occur. The only way a R76 Billion error could occur is through incompetence. Where does accountability and responsibility begin and end? The average South African is barely surviving. Food costs keep rising, petrol keeps rising, electricity costs are through the roof, we are being taxed to death. And now we are expected to pay even more. What the morons do not realise is, if the middle class has no more money to give, there will be no more money for them to steal and that will be the end of everything. 	2026-01-21 11:10:52	No I do not	All of the above – we should not pay for government blunders	My biggest question: Why do we as the consumers have to pay for a calculation error. In any industry when you buy something and the supplier made a mistake in the pricing then you as the consumer pay the price given, why must this be any different. As South Africans we are struggling to put food on the table already as is. It is very easy for people sitting higher up to say the little guy needs to pay more. We do not have more to give. Currently the middle class is not making it through a month, how are the lower class that live on sassa suppose to pay for electricity. Electricity should be a basic need like clean water and schooling.	Anzel	Eastern Cape		employed individual
	2026-01-21 11:10:11	No I do not	All of the above – we should not pay for government blunders	As we are already burdened with high tax brackets...these taxes should be used for Eskom short falls and not on citizens. The cost of living is very high as it is.	Carol	Gauteng		self-employed

	2026-01-21 11:07:33	No I do not	All of the above – we should not pay for government blunders	I strongly oppose NERSA's proposal to recover an additional R76 billion from electricity consumers through higher tariffs. This stems from NERSA's own calculation errors in Eskom's Regulatory Asset Base (RAB), not from consumer actions or Eskom's legitimate needs. South Africans are already crushed by unaffordable electricity prices, persistent load-shedding risks, aging/depreciating assets, and incomplete projects. Forcing households and businesses to pay for regulatory mistakes – inflating tariffs by ~10-10.5% extra in 2026/27 instead of the promised ~5-6% – is unjust and economically destructive. The shortfall should be absorbed by NERSA/Eskom accountability measures or government support, not passed to struggling consumers. Reject this proposal entirely.	Jaime	Western Cape		self-employed
	2026-01-21 11:07:14	No I do not	All of the above – we should not pay for government blunders	Why should the consumer pay for the inadequacy of people running Eskom? Are the people involved properly trained for their jobs? Do they even care about excellence? What is being done to root out corruption? The employees are being paid to do their job, and now we, the masses, have to pay them again for not doing their job properly? How is that possible?	Bev	Gauteng		employed individual

	2026-01-21 10:47:51	No I do not	All of the above – we should not pay for government blunders	South African taxpayers have repeatedly been burdened with escalating electricity tariffs to compensate for failures that were not of their making. The mismanagement, operational failures, and instances of corruption at Eskom are well documented public facts, not matters of speculation. Yet it is the taxpayer who is consistently expected to absorb the financial consequences. Over the years, annual tariff increases have reached levels that are increasingly unaffordable for households and businesses alike. Eskom itself acknowledged during periods of severe load shedding that reduced electricity availability negatively affected its revenue, which in turn would necessitate further tariff increases. As a result, citizens are required to pay not only for the original failures, but also for both the direct and indirect consequences of those failures. This occurs in an already strained economic environment. Taxpayers are carrying a substantial social and fiscal burden, including funding social grants driven by persistently low employment rates, enduring weak economic growth, and rising costs of living. Excessive electricity tariff increases further erode disposable income, place pressure on small and medium-sized businesses, reduce economic competitiveness, and ultimately discourage investment and job creation. At some point, meaningful accountability is required. Government must take responsibility for systemic mismanagement and implement sustainable solutions that do not continue to penalise ordinary citizens. Policy decisions and recovery plans should protect households' remaining disposable income, support economic growth, and ensure that the cost of institutional failures is not indefinitely transferred to the very people the state is meant to serve.	Jan	Gauteng		
	2026-01-21 10:47:22	No I do not	All of the above – we should not pay for government blunders	I should not be paying for this thieving, rubbish, incompetent, idiotic, banana republic run country. This country was a better and more beautiful place under apartheid rule... Now, it's just a black apartheid ruled country.... reverse racism.... black racist behavior against whites, Indians and colored. Tell President Donald Trump to forget trying to take over Canada.... come and take over this banana republic and make SA great again.	Prashant	Gauteng		unemployed individual

	2026-01-21 10:43:28	No I do not	All of the above – we should not pay for government blunders	Dear Sir / Madam, I hereby submit my formal objection to the consultation paper on the redetermination of Eskom's Generation Regulatory Asset Base (RAB) and associated Allowable Revenue for the 2025/26 to 2027/28 financial years. While I acknowledge the High Court ruling requiring NERSA to correct technical errors in depreciation and asset valuation, I strongly object to the proposal to recover the financial consequences of these errors from electricity consumers. Firstly, affordability must remain a central consideration. South African households and businesses are already under severe financial strain due to the rising cost of living and repeated electricity tariff increases. It is neither fair nor reasonable to expect consumers to pay higher tariffs to correct calculation mistakes made by the regulator and Eskom. These errors should not be transferred to the public through higher prices. Secondly, I object to consumers being charged full asset values for aging and unreliable infrastructure. Many of Eskom's power stations are near the end of their operational life and frequently unavailable due to breakdowns and load shedding. Charging higher tariffs for assets that do not deliver reliable electricity undermines the principle of value for money and places an unjust burden on consumers. Thirdly, I oppose the inclusion of significant costs related to Work Under Construction and working capital in the tariff determination. Consumers should not be required to fund Eskom's construction delays, incomplete projects, or cash flow requirements through increased electricity prices. These risks should be managed within Eskom and through government support, not shifted onto already overburdened users. In conclusion, I do not support the proposed redetermination in its current form. I urge NERSA to prioritise affordability, fairness, and consumer protection by limiting tariff impacts, excluding unreliable and end-of-life assets from full recovery, and preventing the transfer of regulatory and operational errors onto the public. Yours faithfully, Carel Mostert	Carel	Western Cape		employed individual

	2026-01-21 10:02:27	No I do not	All of the above – we should not pay for government blunders	1. Affordability: Should you pay for NERSA's calculation errors? As the cost of electricity is a burden on most households, it is getting worse with massive hikes each year, and now it is proposed to worsen the situation further. This will be the cause of many South Africans having to give up either electricity or food. 2. Reliability: Should you pay full price for aging, unreliable infrastructure? The infrastructure is crumbling as seen by the frequent unplanned outages, and clearly, the systems in place to manage the infrastructure is also deeply flawed. I have no confidence that the funds taken from consumers would be used appropriately. 3. Efficiency: Should consumers fund Eskom's cash flow and construction delays? This is a business problem, not a consumer concern. Consumers are punished more than enough with the constant and lengthy outages despite paying for the service.	Meghan	Gauteng		employed individual

	2026-01-21 09:43:24	No I do not	All of the above – we should not pay for government blunders	I am writing as a South African electricity consumer to formally submit my objection to the proposal that electricity users should bear the cost of Eskom's R76 billion calculation error arising from the revaluation of assets. South African consumers are already under extreme financial pressure due to the rising cost of living. Electricity tariffs have increased steadily over the years, while household incomes—especially for unemployed and low-income citizens—have not kept pace. As an example, prepaid electricity users currently receive approximately 3.4 kWh for R10, which in many households does not even last a full day when basic necessities such as lighting, cooking, refrigeration, and communication are considered. To illustrate the impact more clearly: an unemployed youth relying on the R370 Social Relief of Distress (SRD) grant must already choose between buying food and purchasing electricity. A household with only a television, a cooking plate, and a refrigerator still consumes electricity simply to survive with dignity. Asking such consumers to absorb the cost of a R76 billion institutional error is neither affordable nor reasonable. From an affordability perspective, consumers should not be expected to pay for calculation errors made by Eskom and NERSA. These are governance and regulatory failures, not consumption-related costs. From a reliability perspective, it is unjustifiable to charge full and increased tariffs for aging and unreliable infrastructure, especially in a context of ongoing load shedding, equipment failures, and inconsistent supply. From an efficiency perspective, transferring the burden of Eskom's cash flow challenges, construction delays, and accounting mistakes to consumers undermines public trust and contradicts the principle of cost-reflective and fair pricing. In conclusion, I strongly object to any proposal that seeks to recover Eskom's R76 billion mistake from electricity users. The cost should be addressed through internal accountability mechanisms, improved governance, and fiscally responsible solutions that do not further impoverish already struggling South Africans. I respectfully urge NERSA to consider the real socio-economic impact of this proposal and to act in the best interests of the public it is mandated to protect. 	2026-01-21 09:43:23	No I do not	All of the above – we should not pay for government blunders	I am writing as a South African electricity consumer to formally submit my objection to the proposal that electricity users should bear the cost of Eskom's R76 billion calculation error arising from the revaluation of assets. South African consumers are already under extreme financial pressure due to the rising cost of living. Electricity tariffs have increased steadily over the years, while household incomes—especially for unemployed and low-income citizens—have not kept pace. As an example, prepaid electricity users currently receive approximately 3.4 kWh for R10, which in many households does not even last a full day when basic necessities such as lighting, cooking, refrigeration, and communication are considered. To illustrate the impact more clearly: an unemployed youth relying on the R370 Social Relief of Distress (SRD) grant must already choose between buying food and purchasing electricity. A household with only a television, a cooking plate, and a refrigerator still consumes electricity simply to survive with dignity. Asking such consumers to absorb the cost of a R76 billion institutional error is neither affordable nor reasonable. From an affordability perspective, consumers should not be expected to pay for calculation errors made by Eskom and NERSA. These are governance and regulatory failures, not consumption-related costs. From a reliability perspective, it is unjustifiable to charge full and increased tariffs for aging and unreliable infrastructure, especially in a context of ongoing load shedding, equipment failures, and inconsistent supply. From an efficiency perspective, transferring the burden of Eskom's cash flow challenges, construction delays, and accounting mistakes to consumers undermines public trust and contradicts the principle of cost-reflective and fair pricing. In conclusion, I strongly object to any proposal that seeks to recover Eskom's R76 billion mistake from electricity users. The cost should be addressed through internal accountability mechanisms, improved governance, and fiscally responsible solutions that do not further impoverish already struggling South Africans. I respectfully urge NERSA to consider the real socio-economic impact of this proposal and to act in the best interests of the public it is mandated to protect. 	2026-01-21 13:19:55	No I do not	All of the above – we should not pay for government blunders	We, the people of South Africa, cannot afford all these unrealistic cost increases. We are always being put in a position of "you have no choice" These services are basic and essential. So, what are we to do? The rising electricity costs in South Africa have become an unbearable burden for many households and businesses alike. These increases do not merely reflect a line item on a bill; they signify a growing gap between necessity and affordability. Since electricity is fundamental to our daily lives, the implications of these hikes stretch far beyond financial strain, they threaten our well-being, productivity, and the overall stability of our communities. As citizens, we understand that managing energy infrastructure and ensuring reliable service necessitates investment. However, the current trajectory of escalating costs leaves us feeling cornered and powerless, as we are forced to make difficult choices between basic needs such as food and education, and maintaining essential services. We urge those in positions of power to reconsider these drastic increases. It is crucial to explore alternative solutions that prioritise the needs of the people while still addressing the challenges faced by our energy providers. We deserve a transparent discussion about the factors driving these costs and a commitment to fair pricing that considers the economic realities of everyday South Africans. Let us come together to advocate for a future where access to electricity is not a privilege, but a right, a future that ensures all citizens can thrive without the fear of overwhelming expenses.	Fiona	Gauteng		
	2026-01-21 13:18:51	No I do not	All of the above – we should not pay for government blunders	Sick to death of this ANC government, they live in luxury when even their own kind is dying of hunger and lack of accommodation. they need to be removed so we can rebuild South Africa, which is now worse than the worst African state. What a hell of a mess they made of things. Wake up people, just kick them out, no further tolerance, or en elections which get rigged	rusty	Gauteng		retired

	2026-01-21 12:56:11	No I do not	All of the above – we should not pay for government blunders	Unaffordability, aging and unreliable infrastructure	Zwelithini	KwaZulu -Natal		
	2026-01-21 12:55:22	No I do not	All of the above – we should not pay for government blunders	We need to be clear about the path forward: this is the time to wipe the slate clean. The historical debt, born from years of systemic incompetence and malfeasance, must be laid squarely at the door of the entity responsible: the South African Government. It is no longer sustainable to expect the current tariff structure or the end-user to subsidise these past failures. The State should take on all historical cumulative debts. This would finally allow NERSA to structure a tariff based on the actual realities of the present and the requirements of the future. Specifically, we need a structure that accounts for: Cost of production and current operating expenses. Essential maintenance and the urgent strengthening of the national grid. Equitable access that provides a fair, predictable cost for personal, commercial, and industrial use. Without this "ground zero" approach, we are simply compounding old errors. We need a clean break to ensure the Inner City and the broader economy have the energy security required to thrive.	Michael Brian	Gauteng		self-employed

	2026-01-21 12:51:10	No I do not	All of the above – we should not pay for government blunders	*My comments below on Nersa's petition, which you're free to copy and paste, if you so wish to do.* Thanks. The majority of SA citizens hardly have enough money for basic living costs, so why should innocent citizens continously pay for Eskom's lack of honesty in reporting or the administration of the money they receive to offer their services to SA citizens. How can the SA Government allow Nersa and Eskom to continuously drain the poorest of the poor from much needed money to put food on the table? I agree with our leàders. NO TO THIS TARIFF INCREASE. GET RID OF CADER APPOINTMENTS	Philida	Gauteng		retired

	2026-01-21 11:36:03	No I do not	All of the above – we should not pay for government blunders	NERSA is a government appointed committee and will always favour the crooks who run this country!	Anil	KwaZulu -Natal		employed individual
	2026-01-21 11:35:19	No I do not	All of the above – we should not pay for government blunders	The ANC has stuffed up again, as usual. But we have to foot the bill after our gov. medical aid has gone up 9%, and our pension goes up 2.8%. Sis!	Keith	KwaZulu -Natal		retired
	2026-01-21 11:33:18	No I do not	All of the above – we should not pay for government blunders	Between ESKOM and NERSA the SA public have been increasingly burdened with rampantly escalating electricity costs, with ineptitude and corruption playing a significant role. Whilst these costs escalate in double digity percentages, the Government Employee Pension Fund only allocates single digit percentage increases (e.g. 2.9% for 2025). This is unsustainable. Many other pensionsers of other funds, employees and small businesses also lack commensuarte increases in income to be able to absorb more exhorbitant electricity price hikes together with municipal rates, medical aid fees, etc. all outpacing income. Electricity costs need to be kept affordable to the consumer. ESKOM has had more than enough opportunity to revive itself and return to being an efficient power provider with affordable rates but has failed, whilst it maintains an inflated work force with above market related salaries. All regulatory protections ESKOM has enjoyed should be removed to encourage Indpendent Power Producers to move into the elctricty supply space.	George	Gauteng		retired

	2026-01-22 08:00:54	No I do not	All of the above – we should not pay for government blunders	I am writing to express my extreme concern and formal objection regarding the continued expectation that the South African taxpayer should subsidize the systemic failures of the current administration. The taxpaying public can no longer be expected to bear the financial burden of destructive policies and mismanagement. Specifically, I wish to highlight the following points of contention: Political Interference & Cadre Deployment: The practice of prioritizing political loyalty over technical competence has crippled our institutions. This has led to a culture of incompetence that prevents essential services from functioning efficiently. Unsustainable Fiscal Policy: Granting salary increases and bonuses in the face of operational failure and massive debt is economically reckless. Fiscal Accountability: Government-owned companies must be held to the same standards as the private sector. In any private entity, if there is no profit or liquidity, there are no increases or bonuses. The government's refusal to apply this logic to SOEs like Eskom is a betrayal of the public trust. The Eskom Debt Burden: It is unacceptable that the general public is forced to foot the bill for years of corruption and mismanagement. Responsibility for these shortfalls should be borne by the entities themselves and those who have disproportionately benefited from BBBEE-linked contracts and billionaire-level dividends while the utility crumbled. Conclusion The era of "blank check" bailouts must end. We demand a shift toward meritocracy, transparency, and a governance model that protects the taxpayer rather than the political elite. 	2026-01-22 00:02:42	No I do not	All of the above – we should not pay for government blunders	NERSA has lost at least 4 courtcases against Eskom due to repeated "regulatory failures". Why are they not replaced by competent people? The people at NERSA are not delivering on their mandate and they are not taking ANY accountability for their incompetence either. How much corruption and mismanagement are still taking place at Eskom? Who is supposed to oversee and receive reports of how specific procedures are being either checked, improved or rooted out? Why must we keep on paying more so incompetent people can receive mega salaries? It is unacceptable that the consumer/taxpayer should pay for NERSA and Eskom staff to fail year after year and then be expected to pay so that the same people can fail again? How can anybody justify that? Mr. Mathebula did not answer any of the interviewer's questions when asked about the increases for 2026! He skirted around every single point - proof that he was only sent to "misdirect". The regulator fails year after year and now consumers must pay for that. This is not sustainable at all. How much revenue is lost due to illegal connections? How much money is still lost through theft, corruption and mismanagement? Why are these matters still a problem? Why keep on bleeding the few who pay instead of working effectively? First fix what should be fixed before allowing NERSA to fail again and burden the consumers.	Susan	Gauteng		unemployed individual

	2026-01-21 21:34:47	No I do not	All of the above – we should not pay for government blunders	The government collects significant tax from its citizens, both those fortunate enough to work and those who may not, through VAT. We are one of the most highly taxed citizens in the world. I have no problem with our tax being used to address ageing infrastructure and to improve access to basic necessities like electricity; in fact, I support it. What is not appropriate is for the taxpayer to fund the government's ineptitude, whether it be incorrect calculations, construction delays or the inability of the highly paid staff at Eskom to manage their cash flow appropriately. The government must ensure that a proper plan is on the table to address and maintain infrastructure, be open to cost-effective and alternative energy sources and hold contractors responsible for delays. In addition, the government should hold Eskom's staff accountable for doing their jobs properly, including managing their cash flow responsibly. There has to be consequence management. The government should also cease and desist from the punitive direction they are heading in regarding businesses and individuals who came to the rescue when Eskom could not keep the lights on by investing in alternative energy, thereby releasing much-needed capacity into the grid. While loadshedding devastated the economy and restricted economic growth, it would have been far worse if alternative energy solutions had not been utilised. Lastly, the tax payer would like to see government coming to the party regarding these costs. For public servants to stop getting above inflation increases. The taxpayer would like to see fruitless and wasteful expenditure throttled once and for all. The taxpayer would like to see public officials dismissed for abusing taxpayers' money for their own personal gain and comfort. The government continues to spend lavishly while the average South African tightens their belt. Taxpayers have had enough, and the government should be careful not to continue abusing the hand that feeds them. The greed of our politicians and public officials needs to be reigned in. Corruption must be stamped out. If public officials understand that they are first and foremost public servants who should serve the public rather than be self-serving and feather their own nests, then South Africa would be a better place for everyone. 	2026-01-21 20:56:52	No I do not	All of the above – we should not pay for government blunders	The public cannot continue to pay for the significant blunders of Eskom. There is a significant amount of government spending that is wasteful, that if managed with the correct level of accountability, may be available to reduce impacts of these kinds of issues.	Wendy	Gauteng		retired
	2026-01-21 20:56:43	No I do not	All of the above – we should not pay for government blunders		Sandy	Gauteng		retired
	2026-01-21 20:55:49	No I do not	All of the above – we should not pay for government blunders	This is an issue of the past, and the entity in question has since recovered, even posting a profit for 2025. Further increases in tariffs will only place an additional burden on citizens, many of whom are already struggling to cope with the high cost of living. For example, R500 worth of electricity provides approximately 110 kWh, which does not even last two weeks for many households. Increasing tariffs under these circumstances will only deepen financial strain on the public.	Vusi	Gauteng		
	2026-01-21 20:54:57	No I do not	All of the above – we should not pay for government blunders	Eskom need to employ competent, honest people who are capable of running this vital utility efficiently.	Wendy	KwaZulu -Natal		retired

	2026-01-21 18:54:56	No I do not	All of the above – we should not pay for government blunders	The government continues to connect electricity in all informal settlements whenever elections are about to take place. These are areas where they know very well that electricity is not paid and law abiding citizens have to pay for government blunders. We know everyone has the right to electricity, however, everyone should also know their responsibilities. Let's share the load, we are all using electricity and we need it. Their own poorly run municipalities squander money and forget the important issues. They should just put measures in place to recover that money from places and institutions they know very well are not paying them accordingly.	Concerned	North West

	2026-01-21 18:33:26	No I do not	All of the above – we should not pay for government blunders	*The R76 billion shortfall arises from institutional and regulatory error, not from the cost of supplying electricity. Recovering this amount through tariffs constitutes an impermissible transfer of risk from the regulated entity to captive consumers of an essential service. *There is no causal link between electricity consumption and the asset-valuation error. In the absence of causation, consumers cannot lawfully be held financially responsible. *Imposing liability on consumers for errors they neither caused nor benefited from is irrational and inconsistent with sound regulatory practice. It undermines accountability and weakens regulatory discipline. *The Electricity Regulation Act requires tariffs to be cost-reflective, fair, transparent, and non-discriminatory. A tariff designed to recover historical accounting or regulatory mistakes fails to meet these statutory requirements. *The proposal conflicts with stated reforms aimed at enhancing consumer protection, transparency, and the ability of consumers to challenge tariff increases. Absent full disclosure and meaningful participation, the process is procedurally unfair *Electricity is an essential service. Additional tariff burdens: Disproportionately affect low-income households; Increase energy poverty; Undermine economic activity and employment. *OPINION AND REQUEST: It is respectfully submitted that: The proposed recovery of the R76 billion from electricity consumers is unlawful, irrational, and inconsistent with the Electricity Regulation Act; Consumers should not be required to fund historical institutional or regulatory errors. NERSA should expressly exclude recovery of the asset-valuation error from any approved tariff determination. Eskom should be directed to address the shortfall through mechanisms that do not burden electricity users. *CONCLUSION: Approving the proposed recovery would undermine regulatory integrity, consumer protection, and public confidence in the tariff-setting process. NERSA is therefore respectfully urged to reject the proposed recovery of the R76 billion from electricity consumers.	Rina	Gauteng		retired

	2026-01-21 18:27:11	No I do not	All of the above – we should not pay for government blunders	Whatever calculation mistakes Eskom made, they must deal with it, without involving the overburdened taxpayers and electricity users. They must take accountability for their actions. They even afford to increase their salaries and pay themselves fat bonuses, so they must absorb the deficit they created.	Nohle	Gauteng		retired
	2026-01-21 18:25:23	No I do not	All of the above – we should not pay for government blunders	Q1.Why must the value of assets be increased? They should already be at a good value but guess what they are poorly managed and failing, how will adding more valued assets help? Add better management over the current assets, otherwise the new assetd will also fail and we will be asked again to gather up another R76bn. Q2. Why must we add onto the existing tarrifs (which is already high FYI) to cover for aging assets? Where does all our money go of our bills we pay each year, how is it allocated, why do you need more. I am sure there is a management issue here that needs to be fixed, just adding more money to fix a problem is not the answer. Q3.Again, why must we be asked to pay more to cover the construction of power plants? I Ask again where does all our money go to? My honest opinion is, we sre already working month to month with tight budgets to survive, we cannot grow our lives to afford things like families, houses, cars etc. What joy do we have to live as humans on earth, it more like we are surving a nightmare. We cannot see ourselves growing and getting old these days. We cant afford retirements, we have to choose carefuly what to buy for groceries, having fuel near the end of the month is a luxury, we have to cut costs in every aspect of our lives to try and make it through the month and it just gets worse each year Now we have to pay more to have electricty while we are not allowed to have solar without being punished for it, while other people have so many illigal connections and they just get away with it. No I wont pay anything extra anymore, I am being robbed each month by the government with my tax. Reduce the salaries of you top cats. 	2026-01-21 17:27:37	No I do not	All of the above – we should not pay for government blunders	you really need to wake up and realize people simply can not afford it. there is no way a single person living on minimum wage can afford a 1 bedroom flat, and pay electricity, and have food to eat. - a 100L geyser, when cold would use 8 KWA units to heat the water to 70C if a single person switch off the geyser when not at home and switch it on at night that is still 8 KVA per day, and 240 KVA per month - if a 100L geyser stay on and is used once a day it use about 11 KVA per day, and 330 KVA per Month in Abaqulusi, prepaid electricity cost between R2.30 - R5.50 per unit on a sliding scale 240 units would cost about R700 just for hot water switching off geyser 330 units would cost about R1100 to use it once a day realistically a single person household use about 400 units when taking normal use and cooking into account thats R1500 a month minimum wage is R28.79 per hour or about R4800 a month if rent is a very low R2500, and electricity is R1500, that leaves R800 for the month 1 bread = R20, 2L milk = R30, so if a person only eat bread + milk, thats R50 a day, R1500 a month, and the R800 left above would only last 16 days. cost of living is already unaffordable, and a single person single income is unsustainable there are single income households with many dependencies, already unable to sustain themselves even dual income on minimum wage is unsustainable. 	2026-01-21 16:35:24	No I do not	All of the above – we should not pay for government blunders	There are thousands of electricity users that don't pay , not to talk about all the thousands of illegal connections, were they steal it. First get all the due from Provinces, Metro's, Municipalities, Businesses and individuals, before burdening us that buy pre-paid electricity and are paid up. Eskom was build to supply cheap and affordable electricity for the people of South Africa, but the ANC made it an endless money pit for croonies and crooks to plunder.	Peter	Eastern Cape		retired
	2026-01-21 16:35:16	No I do not	All of the above – we should not pay for government blunders	This is anUnfair burden on consumers — Electricity users, many facing economic hardship, should Not fund a regulator's mistake. The regulator has failed to protect consumers and must pay for their mistakes. I agree that Nersa should absorb the error or offset it against Eskom's inefficiencies rather than passing it on to the consumers they are mandated to protect. Eskom's broader accountability issues — Eskom's RAB includes assets plagued by corruption, delays, and cost overruns. Allowing full depreciation and returns, rewards mismanagement, with consumers already burdened by massive historical tariff hikes and SOE bailouts (hundreds of billions in taxpayer funds). Affordability and economic impact — Higher tariffs exacerbate poverty, Crime, business costs and grid defection (e.g., solar adoption), without guaranteeing better service.	M	Gauteng		
	2026-01-21 16:35:15	No I do not	All of the above – we should not pay for government blunders	the Taxpayers should not keep paying for Governments mistakes. when is the Government highly paid officials going to BE HELD ACCOUNTABLE to pay for their mistakes. in other countries they would be fired and have to pay for their errors.	rachelle	KwaZulu -Natal		unemployed individual

	2026-01-21 16:26:06	No I do not	All of the above – we should not pay for government blunders	If NERSA does not currently have people capable of doing the calculations or generating the correct information leading to correct calculations, then they must employ people who can! Even if these people are not preferred BBEEE-selected candidates. The ONLY criteria that must apply are qualifications, experience and capability. ESKOM has wasted public money for many years now through incompetency, mismanagement and a great deal of corruption. Nor is there much in the way of consequence management from the top all the way down the chain. They still haven't eradicated these issues, and therefore in no way should the public be held to ransom . I still believe that we are not always given the true, real breakdown behind Energy Availability Factor and the issues that affect it. The public is sick to death of ESKOM staff being paid huge salaries and bonuses for these failings. Lack of consequence management has allowed them to perform badly for many years with impunity. It must stop! The public, being sick and tired of the load-shedding issues, takes the pressure off the grid by taking on solar electricity. At enormous expense it must be noted. So ESKOM then decides to penalise the public for doing so, instead of being grateful and using that relief of pressure to improve the system. I for one, do not accept that ESKOM owns the sun that shines on my property or the equipment that I had to pay a lot of money for , and I certainly do not believe that I must pay any form of levy WHATSOEVER to ESKOM, when entirely OFF the grid. ESKOM should be supporting and applauding people who have invested in renewable energy, after all this is the way forward for this whole climate change mode that the world has adopted. They should actually be reimbursing a portion of each investor's provable outlay for solar. There should be tax breaks for people who spend money on renewable energy investments. This is Africa where the sun shines a lot of the time, it is the ideal candidate for solar energy, and this money-wasting, money-grabbing, corrupt and incompetent SOE needs to sort itself out, realise this properly, and deliver good service and value. They should be delivering far more to outlying areas than they are, but again that is down to the problems already mentioned.	Vanessa	Gauteng		retired

There are so many spares which were delivered but cannot be used. This is going on for years already and no one is doing anything about it. Cost is just being given to the consumer. Other concern is alson that the consumer pays the electricity bill, but the municipalities is not paying over to Eskom. WTF	Walter	Mpumalanga		self-employed

	2026-01-21 15:58:10	No I do not	All of the above – we should not pay for government blunders	Due to their incompetence the payi g public should not pay. Inability to run Eskom, inability to claw back the money that municipalities owe them. Inability from Nersa to do the calculations correct. A sh!tshow to say the least. Time for change in goverment and all their SOEs.	Jacques	Gauteng		unemployed individual
	2026-01-21 15:57:08	No I do not	All of the above – we should not pay for government blunders	My argument is that the decision on passing the error on to taxpayers should be delayed while proper vigour should be put into pursuing the billions of Rands stolen by Jacob Zuma and the Gupta brothers and associates. We would like to see a reckoning of those funds as recommended by Judge Zondo 3/4 years ago. Strange how quickly some mechanics of government works when more money could be squeezed from ordinary and innocent citizens but how slow it moves when it comes to the protection of the same citizens against criminals by the judiciary and police.	Bettie	Gauteng		self-employed
	2026-01-21 15:55:56	No I do not	All of the above – we should not pay for government blunders	The majority of SA citizens hardly have enough money for basic living costs, so why should innocent citizens continously pay for Eskom's lack of honesty in reporting or the administration of the money they receive to offer their services to SA citizens. How can the SA Government allow Nersa and Eskom to continuously drain the poorest of the poor from much needed money to put food on the table?	Joey	Gauteng		self-employed
	2026-01-21 15:55:09	No I do not	All of the above – we should not pay for government blunders	We are paying already R16000.00 for ekectricity at a private home with gas for cooking. So we ate not even sure how they get to that. We are two people over 70 years old	Janet	Gauteng		employed individual
	2026-01-21 15:54:46	No I do not	All of the above – we should not pay for government blunders		Katja	KwaZulu -Natal		self-employed

	2026-01-21 15:53:13	No I do not	All of the above – we should not pay for government blunders	The primary cause of a tariff increase is the failure of municipalities to collect debt and pass payments onto Eskom. Added to this we have gross maladminstration, non- controlled projects, theft, pilfering, and corruption, by Eskom and Govermental officials and officers who have enriched themselves at the cost of their own citizens, poor and rich.. including maintenance contracts to enrich Comrades and connected individuals. I do not believe that is fair and equitable that citizens be forced to pay for Eskom and Govermental corruption and failures. Those in charge penalize the citizens with high tariffs while enriching themselves at our expense, increased tariffs translates to increased money in the pockets of corrupt officials, while adding no new power infrastructure, no added capacity, or better service delivery. They have destroyed Eskom at the expense of the people.	Mark	Gauteng		retired

	2026-01-21 15:50:58	No I do not	All of the above – we should not pay for government blunders	THere should be accountability. Don't expect of consumers to bail out corruption every time it happens.	Jan	Gauteng		
	2026-01-21 15:50:41	No I do not	All of the above – we should not pay for government blunders	In todays day and age, electricity is a necessity for economic survival, not a luxury. Pushing pricing above affordability does not serve the citizens of the country, who have been paying for related governance and management mistakes for years. Electricity at current rates is already unaffordable for many households and small businesses, adding on to it will make this burden so much worse. Too often we find that governing bodies are allowed to take the easy way out when faced with a challenge; instead of compiling creative constructive solutions, it is so much easier to burden a captive audience - hardworking SA citizens. Forsing the cost of the latest blunder onto main feed electricity users, is both unfair, unethical and reckless. There must be more suitable ways to resolve the blunder in question than plainly pushing the cost to already overburdened citizens who are not actually the cuase of the problem. Surely Eskom and Nersa have adequately brained people networks who can produce a more elegant and citizen-friendly solution.	Francina	Gauteng

	2026-01-09 09:03:44	No I do not	The cost of Eskom's assets vs. tariff affordability	The cost of electricity is key to the whole economy. Jobs, investment, manufacturing and cost of living. By hiking tariffs the government has destroyed whole swaths of industry and tens of thousands of jobs. Take the closure or aluminium smelters, steel foundaries, manufacturing. The country is dying - fueled by Eskom. It is well and good for the treasury and government to say that Eskom must be self sustaining, but when the supply of energy is key to our very survival as a country, should government not step in. Set aside ideology, and do something constructive. This is one area of finance that impacts everything....	chris	Mpumalanga		retired
	2026-01-09 09:01:00	No I do not	The cost of Eskom's assets vs. tariff affordability	We are tired of paying for the ineffecent manner the country is being run.	Graham	KwaZulu-Natal		retired

	2026-01-09 07:56:45	No I do not	The cost of Eskom's assets vs. tariff affordability	Once again, the South African consumer and taxpayer is being asked to foot the bill for errors, mismanagement, delays and the lack of meaningful upgrades of a state-owned company's assets and operation. South African taxpayers and consumers are already feeling the strained economic conditions and certainly don't have extra resources to further fund the businesses of government. When is government going to hold state owned entities and their management accountable for their actions and/or lack thereof? I am not referring to another task team or commission of enquiry; I am referring to civil and criminal liability of the responsible bodies and individuals that have allowed these state-owned entities to be pilfered instead of using the funds allocated to properly run and manage these state-owned entities for the betterment of society. I reject the proposal of shifting the cost of an error by a state entity to the consumer and/or taxpayer.	Marcel	Gauteng		self-employed

	2026-01-09 13:42:35	No I do not	The cost of Eskom's assets vs. tariff affordability	Dear Sirs, The question is too simplistic! If tariffs are based on the value of Eskom's assets, then the horrendous cost overruns of Medupi and Kusile should be deducted as it makes the values ridiculously high and completely artificial. So the Tariff increases will be ridiculously high and artificial. These cost overruns, be they due to incompetence or corruption or both, are far higher than R76 billion. Eskom produces far less electricity now than 10 years ago yet is has, on average, one of the highest paid annual salaries per worker in South Africa. It has become an employment agency in disguise. The graph of Eskom price increases versus inflation since 2008 tell a dreadful story. The graph would be even more enlightening if the electricity component was removed from the South African inflation rate. Eskom must use the Bond Market and not burden consumers beyond their ability to pay. Best Wishes, Andrew	ANDREW	Gauteng		retired

	2026-01-11 16:21:53	No I do not	The cost of Eskom's assets vs. tariff affordability	Subject: Formal Objection: Eskom MYPD6 Revenue Redetermination (RAB Adjustment) To NERSA, I am writing to formally object to the proposed R76 billion adjustment and the resulting 10.5% tariff increase for 2026. This proposal is not affordable for my household and many others in similar positions. 1. Household Financial Hardship My household consists of five or more people, with only one person working. We are already in survival mode. Every rand we have is stretched to cover basic necessities. With food prices and other living costs rising constantly, we cannot survive another high-percentage increase. 2. Lack of Value for Money It is sickening to see tariffs go up when the value of what we buy is shrinking. When we purchase electricity, we feel we don't even get 50% of the power we should for the amount spent. The poor service and aging infrastructure do not justify these constant price hikes. 3. Responsibility for Errors I strongly object to being forced to pay for "accounting errors" or missed depreciation calculations. It is unfair that consumers must foot the bill for mistakes made by the regulator and the utility while we are struggling to put food on the table. Conclusion I request that NERSA rejects this R76 billion claim. Electricity is a basic need, and pricing it out of reach for a household like mine—where one income supports many—is a violation of our right to a basic standard of living. Sincerely, Elvonia Kleinmond	Elvonia	Western Cape		employed individual
	2026-01-11 16:21:16	No I do not	The cost of Eskom's assets vs. tariff affordability	The tarriff pricing model passes long-term asset financing cost on to current consumers. I don't support that approach to funding public goods.	Derek	Western Cape

	2026-01-12 09:55:03	No I do not	The cost of Eskom's assets vs. tariff affordability	Correct me if I'm wrong – here is my understanding: It all started when Eskom approached Government in 1998 to begin planning for the next power generation capacity. ANC's investment wing, Chancellor House, only finalised its 25% stake in Hitachi Power Africa (HPA) as BEE partner in 2005. Before then, HPA had no track record of providing supercritical boilers in South Africa. Therefore the construction of Kusile & Medupi power stations was delayed until the ANC could get a return from Hitachi's contracts. (2007-2008) The generating capacity of those two power stations remains deficient. That underperformance and the delays in project initiation are the genesis of the load-shedding that has crippled the RSA economy; immeasurable destruction of value and of potential job creation by the ANC government. NERSA must not be allowed to coerce the public into bailing them out.	John	Gauteng		retired

	2026-01-12 09:46:51	No I do not	The cost of Eskom's assets vs. tariff affordability	I would rather fund my own recourses and become self-sufficient than rely on inapt management and then fitting the bill for their negligence.	Martin	Gauteng		self-employed
	2026-01-12 09:38:55	No I do not	The cost of Eskom's assets vs. tariff affordability	Eskom is not properly capitalized. Consumers are being asked to fund Eskom, while the shareholder (government) consistently refuses to contribute capital. Consumers should only pay the reasonable operating costs (not wasteful expenditure) and a small contribution to profits to allow Eskom to recover capital and make a profit over a reasonable investment horizon (in the case of power stations this would be somewhere between 20 to 50 years, not over a 2- or 3-year period.	Lawrence	Gauteng		retired

	2026-01-12 15:17:55	No I do not	The cost of Eskom's assets vs. tariff affordability	This is another blatant competency issue caused by the ANC appointing unqualified people. Enough is enough the man in the street has had to face the consequences for the last 30 years under the rule of the ANC for bad economic decisions, plundering of our resources , no maintenance being carried on our infrastructure, crime out of control, yet to date after many commissions e.g. the Zondo commission after naming many politicians who are still in cabinet who should have been fired and charged nothing has happened. Eskom and Nersa had the audacity to try and sneak this proposal under the carpet smacks of yet another cover up. The persons /ministers responsible for this error must be held to account and Eskom /Nersa must fit the bill. The general public cannot be expected to once again pay for the incompetence of the entities concerned. Unemployment is over 40% and rising every day due to the governments ideological economic policies which are crippling the country with fewer tax and municipal payers left to fit the bill. This pattern of making the public pay for the ANC'S blunders must stop now. I strongly object to this proposal.	Mike	Eastern Cape		retired

	2026-01-19 05:48:32	No I do not	The cost of Eskom's assets vs. tariff affordability	Tariffs should be determined by what the market can afford to pay. This is the problem with a monopoly as it gives Eskom the false impression it can charge what it pleases for bad management and corruption and so called mistakes. In a free market the institution would be forced to charge that which customers are willing to pay and run the business accordingly. The current model allows for the other way around which has led to gross mismanagement and mistakes that go unpunished (loss of customer base).	Jeanette	Gauteng		employed individual
	2026-01-19 05:39:53	No I do not	The cost of Eskom's assets vs. tariff affordability	Eskom has been run by our crooked government. They have ripped us long enough now. It's time the ANC go. 	2026-01-19 12:38:58	No I do not	The cost of Eskom's assets vs. tariff affordability	Electricity - Something we all need, demand and want and feel we can't live without. However, if I own a car I had to pay for it, if you buy a house - you pay for it. Surely, if you use electricity you must pay for it. In my opinion if all the illegal connections to the electricity network were to pay their way then surely that would be a massive boost to Eskom's income. There are many people who battle to pay their electricity accounts yet they try. They might be off for a few days now and then due to the illegal theft of electricity cables BUT they still do the right thing. Time and again it is the legal consumers who pay for the mismanagement and blunders caused by a few.	Megan	Eastern Cape		employed individual

	2026-01-19 16:07:39	No I do not	The cost of Eskom's assets vs. tariff affordability	Why should we pay Eskom when their asset is not even reliable? When it comes to cost of living and additional cost of paying for subscriptions such as Cable TV and Wi-Fi only to have electricity cut off for 2 or 3days, even when you log a complain they don't even come to fix their old infrastructure, yet each year they keep escalating the price? It's absurd and ridiculous. And they even have the tendency of making errors on their finances.	Calvin	Limpopo		employed individual
	2026-01-19 15:48:05	No I do not	The cost of Eskom's assets vs. tariff affordability	I oppose NERSA's proposal to claw back R76 billion from South African energy consumers to fund Eskom. This decision places an undue financial burden on households and businesses already struggling with high electricity costs and frequent load shedding. By increasing tariffs to cover these expenses, NERSA is essentially forcing ordinary citizens to pay for Eskom's historical mismanagement and inefficiencies, rather than holding the utility accountable for its failures. This approach exacerbates economic inequality and ignores the affordability crisis facing many South Africans.The inclusion of costs for unreliable and end-of-life power stations in tariff calculations is particularly unjust, as consumers should not be penalised for infrastructure that fails to deliver consistent service.	Hendrik	Western Cape

	2026-01-20 09:54:26	No I do not	The cost of Eskom's assets vs. tariff affordability	I strongly object to the increase in electricity tariffs proposed by NERSA. The increase reportedly arose due to miscalculation by NERSA and an initially secret settlement with ESKOM. Apart from some public embarrassment, it seems the only consequence has been to suspend one senior executive. Meanwhile consumers bear the consequences. 1. Electricity pricing is already beyond the reach of many consumers. With already stretched resources, hard choices have to be made: A few examples: whether to buy nutritious food or use the money for electricity, whether to use heating in cold weather, whether children can study at night, how often to heat water for bathing. 2. Eskom's infrastructure is old, resulting in unreliable power supply. Why should consumers have to pay for Eskom's failures in foresight and effective planning and management of resources? 	2026-01-20 13:15:17	No I do not	The cost of Eskom's assets vs. tariff affordability	Electricity tariffs are already unaffordable for by far the majority of people. The primary reasons are: (1) double the number of staff they need and can afford. (2) Extremely high and thus unaffordable salaries and bonusses. (3) Performance bonusses for senior staff and management that are already receiving more than just good salaries and benefits to do their jobs, thus so they can and should perform at peak capacity. That is what they are paid for. (4) Lack of maintenance as a result of bad management and corruption. (5) High levels of corruption and theft over many years. The consumer is not going to pay for this anymore. Streamline the organisation on all levels, employ competent people with integrity, stop all inflated and unnecessary expenses, get rid of what is not needed, reduce the cost of electricity so more people can afford it and come back on the grid, and stick to tariff increases in line with inflation. For the consumer only this is acceptable. This is not negotiable.	Rudie	Gauteng		employed individual
	2026-01-20 13:12:28	No I do not	The cost of Eskom's assets vs. tariff affordability	Why should I pay for Eskom mistakes. No wonder people who can afford it, are putting solar in.	Jan	Limpopo		retired

	2026-01-20 15:41:21	No I do not	The cost of Eskom's assets vs. tariff affordability	There needs to be an independent audit done on Eskom's tariff structure. Eskom 3 fixed monthly charges (Network capacity Charge, Services and Admin Charge and a Generating Capacity Charge). In addition Eskom charges 3 demand based (per kWh) charges (Energy Charge, Ancillary Service Charge and a Network demand charge. Eksom increased the the fixed monthly charges by 88% in April 2025 and the demand based charges by 20% in April 2025. The effect is that the small domestic consumer consuming 4kWh per day will pay roughly 50% of the total charge in fixed charges alone. This translates into a massive 40% plus increase in electricity costs in 1 year. For a small consumer another increase to pay for an accounting error is not affordable.	Leon	Gauteng		retired

	2026-01-20 14:22:34	No I do not	The cost of Eskom's assets vs. tariff affordability	Consumers should not be required to pay for regulatory errors made by NERSA. Passing the cost of miscalculations onto the public undermines fairness, accountability, and trust in the regulatory system, especially during a cost-of-living crisis. Consumers should not pay full prices or returns for infrastructure that does not reliably deliver electricity. Tariffs should reflect actual performance and value received, not theoretical asset values disconnected from service quality. Inefficiencies, delays, and cash-flow problems arising from poor planning or management should not be recovered from consumers. Doing so removes incentives for operational discipline and shifts financial risk unfairly onto the public.	Rashanda	Western Cape		employed individual

	2026-01-08 14:31:03	No I do not	Burdening consumers with construction and operational costs	Mistakes always cost money! it is mind boggling that Nersa could make a mistake of this magnitude.Recovering the R76 billion from consumers of electricity should be spread over a period of at least 10 years and Eskom will need to reduce its operational costs to break even. Consumers have suffered enough with load shedding and massive electricity hikes as a result of Eskom's incompetence.	Peter	Gauteng		retired
	2026-01-08 14:27:27	No I do not	Burdening consumers with construction and operational costs		Tandile	Gauteng		self-employed
	2026-01-08 14:06:21	No I do not	Burdening consumers with construction and operational costs	The recent High Court ruling revealed a R76 billion miscalculation in Eskom's asset valuation. Instead of absorbing this error, the proposal now seeks to recover the cost directly from ordinary South Africans through higher tariffs. This is unacceptable. Consumers should not be punished for mistakes made by the regulator. I would like to raise three key points: Affordability: It is unjust to expect the public to pay for NERSA's calculation errors. South Africans are already struggling with the rising cost of living, and further tariff hikes will only deepen this crisis. Reliability: We are being asked to pay full price for aging, unreliable infrastructure that frequently fails to deliver consistent electricity supply. Consumers should not be charged premium rates for substandard service. Efficiency: Eskom's history of inefficiency, construction delays, and poor cash flow management should not be funded by the public. For decades, tariffs have increased by up to 20% while service delivery has declined. Even when households invest in solar panels to reduce dependence on Eskom, they face additional charges. This discourages innovation and punishes responsible citizens. If Eskom and NERSA cannot manage the system effectively, then leadership should change. South Africa deserves competent management and fair pricing, not repeated bailouts at the expense of the public. I urge NERSA to reject this proposal and ensure that accountability, not consumers, bears the cost of mismanagement.	Tanja

	2026-01-08 12:55:17	No I do not	Burdening consumers with construction and operational costs	To Whom It May Concern, I am submitting this comment in response to NERSA's call for public participation on the proposed electricity price determination. I strongly object to any tariff increases that require the public to absorb the consequences of Eskom and NERSA's R76 billion calculation error. South Africans are already burdened by an escalating cost of living, unreliable electricity supply, and years of mismanagement within the energy sector. It is neither fair nor reasonable to expect consumers to pay for mistakes that were not of their making. 1. Affordability: Should consumers pay for NERSA's calculation errors? No. A regulatory or accounting error of this magnitude must be resolved within government and Eskom's internal financial processes. It should be corrected through proper auditing, internal accountability, or fiscal intervention, not through tariff hikes imposed on households and businesses already under strain. 2. Reliability: Should consumers pay full price for aging, unreliable infrastructure? No. Consumers cannot be expected to pay premium rates for infrastructure that consistently fails to deliver reliable service. Load shedding, equipment failures, and operational inefficiencies demonstrate that the value received does not match the price being demanded. 3. Efficiency: Should consumers fund Eskom's cash-flow problems and construction delays? No. Chronic delays, cost overruns, and inefficiencies are the result of internal management issues. These must be addressed through operational reform, cost-cutting measures, and accountability within Eskom, not by shifting the financial burden onto the public. Conclusion The public should not be penalised for errors, inefficiencies, or mismanagement within Eskom or NERSA. Government must explore alternatives such as: absorbing the error through national financial processes, enforcing accountability within Eskom, reducing unnecessary expenditure, and implementing structural reforms to improve efficiency. Tariff increases cannot be the default solution to internal failures. South Africans deserve transparency, accountability, and fair treatment, not another financial burden.	Teressa	Gauteng		employed individual
	2026-01-08 12:52:38	No I do not	Burdening consumers with construction and operational costs	To Whom It May Concern, I am submitting this comment in response to NERSA's call for public participation on the proposed electricity price determination. Efficiency: Should consumers fund Eskom's cash-flow problems and construction delays? No. Chronic delays, cost overruns, and inefficiencies are the result of internal management issues. These must be addressed through operational reform, cost-cutting measures, and accountability within Eskom—not by shifting the financial burden onto the public. Conclusion The public should not be penalised for errors, inefficiencies, or mismanagement within Eskom or NERSA. Government must explore alternatives such as: absorbing the error through national financial processes, enforcing accountability within Eskom, reducing unnecessary expenditure, and implementing structural reforms to improve efficiency. Tariff increases cannot be the default solution to internal failures. South Africans deserve transparency, accountability, and fair treatment—not another financial burden.	Teressa	Gauteng		
	2026-01-08 12:45:17	No I do not	Burdening consumers with construction and operational costs	Taxes are to be applied for maintenance and new infrastructure. Manage your finances better and stop.paying bonuses and extravagant salaries	Riana	Gauteng		retired

	2026-01-08 16:09:53	No I do not	Burdening consumers with construction and operational costs	It is important for Eskom as the main producer of power for the country to have a tariff that supports its operations as well as refurbishment of existing infrastructure and the development of new infrastructure to meet future demand. However, these tariffs need to be calculated in a fair and transparent manner so that the public sector can make its own decision as to validity of the claims for a tariff increase and accordingly to approve or disapprove. Currently, this is not the case. Eskom operates in a cloud of obscurity with very dubious contracts and operational practices, that if allowed to be scrutinized by the general public, will result in the remediation of these dubious practices. The end result will be a more streamlined business with cost efficient processes and the net result will be truly cost reflecting tariffs.	Claudio	Gauteng		self-employed

	2026-01-09 11:04:02	No I do not	Burdening consumers with construction and operational costs	My answer is no no no no Never no more we will not be able to live. So no no no	Giideon	Western Cape		
	2026-01-09 11:01:51	No I do not	Burdening consumers with construction and operational costs	The justification given before 2012 on high tariffs was because infrastructure was failing and needed renewal. At about that time free electricity fell away So regardless of errors made to tune of R76B plus, we have been paying for infrastructure all along. Btw then & now SA has been held to ransom irt load shedding as well. How can a national body miscalculate to such a value. Fire the error makers, then calculate then ask me again.	Caroline	Western Cape		retired
	2026-01-09 10:58:06	No I do not	Burdening consumers with construction and operational costs	Dear NERSA Energy Regulator Members, I am writing as the owner of Supreme Dry Cleaners and Laundry est. 1973, a commercial laundry business operating in Germiston, Gauteng. We provide essential laundering services to clients including hotels, hospitals, restaurants, and other commercial entities. Our business employs [25] staff and supports local economic activity as a small/medium enterprise (SME). I strongly object to the proposed redetermination that would allow Eskom additional revenue recovery of up to R76 billion through higher electricity tariffs. This adjustment, stemming from past valuation decisions, would exacerbate the already unsustainable electricity cost burden on businesses like mine, threatening viability amid South Africa's challenging economic climate. Key Impacts on My Business as a Commercial Laundry: 1. High Electricity Dependency and Intensity: • Commercial laundries rely heavily on electricity for core operations: industrial washing machines, high-capacity tumble dryers, steam boilers for hot water, flatwork ironers, and pressing equipment. • Heating water and drying account for the majority of energy use, with typical consumption far exceeding standard commercial users. Our monthly usage is approximately , making electricity our largest variable cost (often 35-50% of total expenses). 2. Cumulative Burden from Prior Increases: • Recent years have seen repeated double-digit tariff hikes, compounded by municipal markups (e.g., City of Ekurhuleni). These have already forced cost-cutting measures, such as reduced shifts or deferred equipment maintenance. • Further increases would directly erode thin profit margins in a competitive sector where clients demand affordable rates. 3. Financial and Operational Implications: • An additional ~5%+ effective hike (from the proposed adjustment) could add to our annual electricity bill, equivalent to [e.g., 10 full-time salary or critical maintenance]. • This risks: • Passing costs to clients, leading to lost contracts (especially to informal or lower-cost competitors). • Reduced investment in efficiency upgrades (e.g., energy-saving machines) due to cash flow constraints. • Potential downsizing, affecting jobs in a sector that employs many semi-skilled workers. 4. Broader Economic and Social Considerations: • SMEs like commercial laundries form the backbone of local economies, supporting upstream (detergent suppliers) and downstream (hospitality/healthcare) sectors. • Higher tariffs disproportionately hit energy-intensive industries, stifling recovery post-load shedding era, high inflation, and unemployment. • Passing Eskom's historical inefficiencies (e.g., aging plants, construction overruns) to consumers is unfair—regulatory decisions should prioritize affordability and incentivize efficiency/renewables over blanket revenue clawbacks. • Edge cases: During peak seasons, our demand surges; time-of-use tariffs already penalize us, and further base increases compound this without relief for compliant businesses. I urge NERSA to: • Reject or substantially reduce the proposed R76 billion adjustment. • Prioritize consumer affordability in the final decision. • Explore alternatives, such as phased recoveries, incentives for energy efficiency, or ring-fencing inefficiencies. Thank you for considering these comments. I am available for further clarification. Sincerely, Jenny Lioundris	Jenny	Gauteng		business owner

	2026-01-10 10:47:54	No I do not	Burdening consumers with construction and operational costs	The current proposal to make consumers pay for the R76 billion error, while also paying premium rates for unreliable service and inefficiency, is unjust. It confuses the consumer with the investor or owner. Consumers pay for a service. Investors and owners bear the risk of errors and inefficiency. This proposal inverts that logic, forcing the public to bear all risks while receiving diminishing returns. I object to this transfer of institutional failure onto the public. The solution must start with accountability for the error, transparency in all future calculations, and a tariff structure that reflects the actual, reliable delivery of power, not the covering up of past mistakes. The focus should be on fixing Eskom's governance and operations, not on perfecting methods to make the public pay for its dysfunctions.	Paledi Lebogang	Gauteng		employed individual
	2026-01-11 12:41:21	No I do not	Burdening consumers with construction and operational costs	Electricity already unaffordable particularly for pendioners. Why must we pay for NERSA's errors. We are tequired to pay even more for an aging unreliable infrastructure. Consumers should not be required to fund Escom's cash flow and construction delays.	Brian	Gauteng		retired
	2026-01-11 12:28:36	No I do not	Burdening consumers with construction and operational costs	My electricity costs have already risen enormously this past year. We are using as little as possible and are slapped with a bunch or new connection fees and charges. The fees are the same as the actual co sumption and now you want to add your accounting blunders to this? The people responsible for the mistake should be held responsible not ordinary South Africans.	Michelle	KwaZulu -Natal		
	2026-01-11 12:24:48	No I do not	Burdening consumers with construction and operational costs	We can't afford the high prices of electricity as we have a very strained economy. They must fix their own crooked (Mistakes) as we all have to do if we make a mistake. As it is we are one of the highest charged electricity rates in the world. A Big NO from me , pay for your own mistakes.	Jeffrey	KwaZulu -Natal		business owner

	2026-01-11 07:20:34	No I do not	Burdening consumers with construction and operational costs	Due to a misrepresentation of Eskom's assets- which then highlited that Eskom could make that excess - why should the population pay for the 'unexpected' difference in assets? If a bank made a mistake regarding its assets, would that mean that the bank has to increase its service prices? If so, I firmly believe that increasing the prices would only drive potential consumers away. Moreover, it would only widen the divide between socioeconomic classes. I believe the same results would occur if you decide to increase Eskom's price/s. The country already has one of the most highest prices of electricity in the world - do you really want it to move up on that list?	Shmuel	Gauteng		unemployed individual

	2026-01-12 08:19:31	No I do not	Burdening consumers with construction and operational costs	Affordability No, consumers should not be required to pay for NERSA's calculation errors. Regulatory mistakes, including the miscalculation of asset values and the omission of depreciation and returns, are governance failures. Passing these costs on to households and businesses—many of whom are already under severe financial pressure—undermines public trust in the regulator and violates the principle that inefficiencies and errors should not be socialised through tariffs. Reliability No, consumers should not be expected to pay full price for aging and unreliable infrastructure. Electricity tariffs should reflect the quality and reliability of supply. Persistent load shedding, unplanned outages, and declining system performance indicate that consumers are not receiving value commensurate with the proposed increases. Efficiency No, consumers should not fund Eskom's cash-flow challenges, construction delays, or historical inefficiencies through higher tariffs. These issues arise from governance failures, cost overruns, and poor project execution. Allowing these costs to be recovered from consumers weakens accountability and reduces incentives for operational improvement. Recommendation NERSA should disallow the recovery of costs arising from its own calculation errors and Eskom's inefficiencies, and instead: Require an independent audit and verification of Eskom's asset base and depreciation assumptions; Link any future tariff increases to demonstrable improvements in reliability, availability, and operational performance; Phase in only justified and verified costs over a longer period to minimise affordability impacts; and Strengthen regulatory accountability by ensuring that errors and inefficiencies are addressed through corrective governance measures rather than tariff increases. Conclusion Electricity pricing must be fair, transparent, and affordable. Regulatory errors, unreliable infrastructure, and inefficiencies should be resolved through accountability and reform—not by transferring the financial burden to consumers. I therefore object to the proposed increases to the extent that they seek to recover costs arising from these failures.	nikhil	Western Cape		employed individual
	2026-01-12 08:06:40	No I do not	Burdening consumers with construction and operational costs	It is about time that the people reasonable own up and stop trying to hide that they are incompetent, or not qualified to do the job. 	2026-01-12 13:06:07	No I do not	Burdening consumers with construction and operational costs	I hereby submit my formal objection to NERSA's consultation on the redetermination of Eskom's Regulated Asset Base (RAB) and the associated allowable revenue and tariff adjustments for the 2026/27 and 2027/28 financial years. Any decision that results in increased electricity tariffs will be severely detrimental to South African households. Many families are already struggling with the rising cost of living, unemployment, and economic instability. Higher electricity prices will place additional financial pressure on low- and middle-income households, deepen energy poverty, and force many to choose between basic necessities. Furthermore, ordinary consumers should not be expected to bear the financial consequences of long-standing governance failures, inefficiencies, and mismanagement within Eskom. Approving tariff increases under these circumstances would unfairly shift the burden onto the public. I therefore strongly reject this redetermination and urge NERSA to prioritise affordability, fairness, and the protection of households across South Africa. Yours sincerely,	Matshidiso	Gauteng		student

	2026-01-12 12:20:54	No I do not	Burdening consumers with construction and operational costs	I object to consumers bearing additional costs arising from past errors, inefficiencies, or governance failures within Eskom's generation business. Electricity consumers are already under significant financial pressure, and it would be inequitable to transfer the consequences of historical mismanagement to end users. Before any increase in allowable revenue is considered, priority should be given to addressing corruption, collusion, and procurement irregularities, including the recovery of losses and strengthened consequence management. NERSA is urged to protect the public interest by prioritising affordability, accountability, and efficiency in its final determination.	Zahirah	Western Cape		employed individual
	2026-01-12 12:19:05	No I do not	Burdening consumers with construction and operational costs	Government and Eskom should first recover the stolen funds from the corrupt tenders. This money must be offset against any funds required, By making all of us pay for Nersa mistakes we acknowledge that anyone can steal without any consequences.	David	Gauteng		business owner
	2026-01-12 12:18:03	No I do not	Burdening consumers with construction and operational costs	Eskom should budget correctly for salaries, construction, maintenance etc. If Nersa made a mistake, Nersa must suffer the consequences of having inefficient employees who think they can merely "pass the buck". Take responsibility for your errors, be fired and surrender your pensions, packages or whatever.	Janene	Mpumalanga		retired
	2026-01-12 12:05:52	No I do not	Burdening consumers with construction and operational costs	The cost of energy is causing business to either install alternative capacity or procure directly from Escom. Municipal electricity rates subsidies other municipal expenses and municipalities do not pay Eskom. Thus to increase the municipal tariffs would just increase the amounts not paid over to Eskom. The "middle man" being the Municipalities must be removed and payments made directly to the service provider. The tariffs should be calculated on cash cost. Operating cost, debt (loans for CAPEX) outflows and actual revenue flows should be used. Depreciation is not a cash flow item. The capex is. Based on reporting on the depreciation errors I remain concerned that consumers are paying for depreciation and the capex. Overtime and the wage bill should be strategically reviewed. To what extent did Eskom become an extension of the Government's social grant system, do Eskom need that many people? Do Eskom have the correct skills? Corruption in the supply chain must be stopped. Proposal: Increase VAT to fund Eskom, then all voters pay for the blunders of the Government. Then National treasury can keep an eye on how the VAT specific for Eskom are being utilized. This VAT increase can be ringfenced to assist municipal Eskom Accounts. Take municipalities out of the energy loop.	Willem	KwaZulu-Natal		self-employed

	2026-01-13 10:31:03	No I do not	Burdening consumers with construction and operational costs	I would like to strongly object to the proposed electricity price hikes. South Africans simply cannot afford this anymore. Every year we are told to adjust to higher costs while our salaries and living conditions stay the same. It is becoming impossible for ordinary people to survive, and approving another increase would be completely irresponsible. These hikes don't just affect "electricity bills" — they affect everything. Food prices go up, transport goes up, and even basic access to water and electricity becomes harder. This directly threatens food security and the basic human rights that every South African should be guaranteed. Many households are already stretched to the limit, and another increase will push people deeper into financial struggle. It is NERSA's and the government's responsibility to protect the public and make decisions that prioritise the wellbeing of everyday South Africans. I am urging NERSA to reject these proposed increases and to consider the real impact they have on the lives of the people in this country.	Nolo	Gauteng		employed individual
	2026-01-13 10:14:32	No I do not	Burdening consumers with construction and operational costs	The new team seem to have a handle on issues, and are making a difference, but in the normal course of business the business should stand on it's own. As consumers we deserve an organisation that manages itself as an arms length organisation.	Jennifer	Western Cape		
	2026-01-13 08:24:03	No I do not	Burdening consumers with construction and operational costs	In Ekurhuleni, from July 2025 we are overcharged. If you buy electricity for R1000, the municipality first takes about R240, and another tariff of about R40. So the units you receive are for about R700. The hardest hit are customers who fall into the B category. Ekurhuleni buys electricity from Eskom and sells to us. Electricity charges are unaffordable.	Hamilton	Gauteng		retired
	2026-01-13 05:10:42	No I do not	Burdening consumers with construction and operational costs		Sadick	Western Cape		retired
	2026-01-12 22:50:50	No I do not	Burdening consumers with construction and operational costs	Consumers are not the insurers of regulatory failure. I do not support: 1. a blanket upward correction of Eskom's RAB, 2. Automatic revenue recovery for past regulatory errors, 3. passing the full cost of correction directly to consumers, 4. treating the redetermination as revenue restitution for Eskom. I do support: 1. compliance with the court order, 2. correction of identifiable calculation and methodological errors, 3. a lawful and transparent redetermination process, 4. only to the extent that outcomes remain fair, efficient, and affordable.	Tiffany	Gauteng		retired

	2026-01-14 10:39:36	No I do not	Burdening consumers with construction and operational costs	I hereby formally submit my objection to Eskom's proposed electricity tariff increase. Eskom's request for a tariff increase is deeply concerning, particularly given the organisation's ongoing inability to provide a reliable and stable electricity supply. Persistent load shedding, caused largely by poor maintenance of power generation units and long-standing operational inefficiencies, has severely disrupted households, businesses, and the broader economy. Under these circumstances, there is no reasonable justification for transferring additional financial burden onto consumers. Furthermore, the well-documented issues of fraud, corruption, and financial mismanagement within Eskom remain unresolved. Until there is clear evidence of accountability, transparency, and meaningful consequence management, the public has little confidence that increased revenue will be used responsibly to improve infrastructure and service delivery. Instead, there is a widespread and justified perception that additional funds may be misused, further eroding public trust. The proposed increase will place an unfair and unsustainable financial strain on the majority of South Africans, many of whom are already struggling with rising living costs, high unemployment, and a weak economy. Ordinary citizens should not be expected to pay more for a service that is inconsistent, unreliable, and declining in quality. I strongly urge Eskom and the relevant regulatory authorities to reconsider this proposal. Priority should instead be given to improving maintenance practices, eliminating corruption, enforcing accountability, and stabilising electricity generation before any tariff increases are contemplated. South Africans deserve affordable, reliable electricity and responsible stewardship of public resources. Yours faithfully, Naresh	Naresh	KwaZulu-Natal

	2026-01-18 13:19:08	No I do not	Burdening consumers with construction and operational costs	Eskom tariffs are based on a "cost-plus" pricing principle. This assumes that the costs at Eskom is managed rationally and there are no corruption. The reason for the exorbitant increases for Eskom are two-fold: 1) Poor cost management as can be seen from their submission to Nersa. (Electricity generation comes down, but costs goes up - i.e. negative jaws) 2) Corruption is included in Eskom's costs and this is a further burden on consumers of the corruption at Eskom Electricity users are adding more solar systems and the next step for Eskom is to charge exorbitant fees for customers with solar systems. It is a black hole that can't be rectified with pricing. A higher the price increase will make it more affordable to put solar systems in and the higher Eskom needs to charge. No more pricing should be allowed for electricity as it makes the Eskom revenue shortfall bigger.	Hennie	Gauteng		employed individual

	2026-01-19 07:57:28	No I do not	Burdening consumers with construction and operational costs	Re-determination of Eskom Generation RAB and Allowable Revenue (MYPD6) This submission addresses the re-determination of Eskom's Generation Regulatory Asset Base (RAB) and the associated allowable revenue for FY2026/27 and FY2027/28, following the court order directing NERSA to correct specific valuation and depreciation-related determinations. The re-determination must be tightly scoped to the matters remitted by the court. It should not be used to recover unrelated revenue shortfalls or to transfer the cost of historic inefficiencies and governance failures onto electricity customers. The Generation RAB should be rebuilt using a transparent, auditable roll-forward methodology. Only prudent, commissioned, and used-and-useful assets should be included. Assets lacking verifiable valuation, commissioning evidence, or efficiency justification should be excluded or deferred until adequately substantiated. NERSA should require Eskom to submit a complete, independently assured asset register and valuation aligned with the MYPD methodology. Where such evidence is unavailable, NERSA should default to the last accepted valuation base and permit only clearly evidenced additions, applying conservative assumptions to protect consumers from overcompensation. Depreciation must be recalculated strictly in line with the corrected Generation RAB, approved asset lives, and consistent indexation rules. A clear reconciliation showing how depreciation adjustments affect the RAB and allowable revenue is essential for transparency and regulatory credibility. Allowable revenue arising from the re-determination should be limited to the return on the corrected Generation RAB and associated depreciation, using the approved WACC. Any tariff impacts for FY2026/27 and FY2027/28 should be explicitly disclosed, with consideration given to smoothing mechanisms to avoid tariff shock. This re-determination presents an opportunity for NERSA to restore confidence in the regulatory process through discipline, transparency, and evidence-based decision-making. Electricity consumers in South Africa should not be required to pay for evidentiary gaps or institutional failure.	Rick	Gauteng		unemployed individual
	2026-01-19 07:52:51	No I do not	Burdening consumers with construction and operational costs	Eskom receive huge amounts iro their Fixed Cost components and Subsidies as it is! Large Power Users, especially Sectional Title Complexes, are already over burdened. These costs should be relative to CPI not Eskom tariffs.	Faith	Gauteng		
	2026-01-19 07:44:40	No I do not	Burdening consumers with construction and operational costs	ESKOM is responsible and must shoulder the responsibility of their incompetence solely without involving consumers. We are already paying way too much for unreliable energy sources from them. ESKO.M made this mess and should clean it up by themselves. I do not support an increase in tariffs for their mistakes. ESKOM can introduce cost cutting measures within their organization to absorb the cost of messing up.	Eloise	Gauteng		
	2026-01-19 07:41:48	No I do not	Burdening consumers with construction and operational costs	The citizens of South Africa cannot be further burdened with costs due to organisational errors and incompetence.	Andrew	Western Cape

	2026-01-19 22:04:06	No I do not	Burdening consumers with construction and operational costs	A democratically elected government serves the people. This proposal inverts this principle when it makes the people serve the government, or the ruling party. We should not be held hostage to incompetent, ignorant, inefficient and ineffective governance. We are already crushed by the burden of taxation through the cleverly manipulated taxing system. Seniors in particular can no longer cope with living expenses. It is a gross injustice that these same inefficient leaders continue to receive salary increases, drive multiple expensive vehicles, live lavish lifestyles and flaunt personal extravagance in the faces of the ordinary citizens. This lifestyle is funded by a public held ransom. Hold the responsible staff and leaders personally responsible. Take the example of other countries where the people continue to rise and let the lessons be learned soon. Thank you for the opportunity to have my voice heard. (Someone should propose an investigation into the Nelson Mandela Metro municipality's billing system.	Christina	Eastern Cape		retired

	2026-01-20 17:07:02	No I do not	Burdening consumers with construction and operational costs	Dear NERSA, I'm writing to express my concerns regarding the re-determination of Eskom's Generation Regulated Asset Base (RAB) and Allowable Revenue for 2025/26, 2026/27, and 2027/28. I strongly disagree with the proposal to allow Eskom to recover billions from consumers for "Work Under Construction" and daily cash flow ("Working Capital") through increased electricity prices. The proposed adjustments would unfairly burden consumers with the financial risks of Eskom's incomplete construction projects and operational inefficiencies. It's essential to ensure that Eskom's revenue is aligned with prudent and efficient operations, rather than passing on costs to consumers. I urge NERSA to carefully consider the following: - Ensure transparency and accountability in Eskom's financial management. - Protect consumers from unjustified tariff increases. - Prioritize efficient and cost-effective operations within Eskom. Thank you for considering my input. Sincerely	Marco	Gauteng		business owner

	2026-01-20 16:13:36	No I do not	Burdening consumers with construction and operational costs	The consumer has been burdened with ever-increasing electricity costs , due to Eskom's employment and operational decisions which were based purely on race and quotas, and preferential procurement deals, without any consideration of the financial and service delivery costs associated with their decisions. These impractical and unsustainable decisions not only costs the consumer dearly, but also almost brought Eskom to its knees. It is time that Eskom stopped milking the consumer for their irrational decisions and blunders, and employed the right people in the roles to once again return Eskom to the well-respected, well-functioning entity that was a world leader, If we keep bailing Eskom out for all its mistakes and reckless decisions, it will never be efficient or cost-effective again, and that will disadvantage all South Africans and business for a very long time. It's time for tough-love on Eskom!	Corinne	KwaZulu-Natal		self-employed

	2026-01-21 08:53:07	No I do not	Burdening consumers with construction and operational costs	We should not be paying for governments blunders, B-BBEE, pigheadedness and corruption. When construction costs more than doubles on projects, something is seriously wrong and that bill should be covered by the engineers, contractors and project managers. If the client or their personnel is so inept that they cannot manage simple things such as receiving quality coal vs overburden, they should not be in bussiness. The public at large pay taxes, money that was spent on infrastructure, why should we now be burdened with their mistakes. Prosecute the beneficiaries of the large scale corruption and get rid of the wrotten apples. Then we can discuss fair price for electricity, based on what production should have cost, not trying to be compensated for incompetence.	Hendrik	Western Cape		employed individual

	2026-01-08 14:31:47	No I do not	Other	If I made a R76Billion mistake, would Eskom pay me? They can get lost and pay from their fat salaries and bonuses	Jasper	Gauteng		retired
	2026-01-08 14:08:20	No I do not	Other	As a South African energy consumer, I refuse to make any further payments for these erroneous mistakes. We as South Africans are under immense pressure as is.	Lourens	Western Cape		employed individual
	2026-01-08 14:07:59	No I do not	Other	For me it's not even about the error in calculation. ESKOM are making a large profit in excess of R2 billion. ESKOM is a nationalised company as long as they break even and it does not make a loss that is a good position fur South Africa and all of its citizens. Prices of electricity have gone up way more than inflation already over the past 5 years . Paying customers and tax payers can no longer afford yet another increase for electricity. It's time to manage ESKOM operating costs and limit increases to at least ,50 percent below inflation. In addition we recently had increases in electricity so no more increases should be allowed until 2027.	Jeffrey	Gauteng		retired
	2026-01-08 14:03:31	No I do not	Other	All of the above and why not go after the self enrichment trough feeders who were responsible for this disaster and not burden the law abiding citizens.	Manny	Gauteng		retired
	2026-01-08 14:03:29	No I do not	Other	All of the above and why not go after the self enrichment trough feeders who were responsible for this disaster and not burden the law abiding citizens.	Manny	Gauteng		retired
	2026-01-08 13:47:31	No I do not	Other	This country under the governance of the ANC is a disgrace. The ANC is a disgrace. The ANC has destroyed this country. We have been saddled with electricity prices that far outstrip inflation while there is huge under-performance by Eskom. What a shame. I urge all citizens to oppose any further payments or increases in electricity prices. Eskom must also reduce the size of its workforce.	Ken	Western Cape		retired
	2026-01-08 13:36:44	No I do not	Other	Affordability. I am retired afed 75. My pensiom decreases with every intetest rate drop but evetything goes up on price. I cannot afford the huge electriciy price increases. Write off past mistakes as you write off bad debts, don't look to the public to bail you out of your mistakes.	Richard	Western Cape		retired
	2026-01-08 13:28:39	No I do not	Other	The public are sick and tired of having to constantly bail out government and SOE's who waste tax money due to their blatant ineptitude and mismanagement of expenditure from conceptual planning through to the always late and well over budgeted infrastructure projects. Pathetically poor future planning for maintenance and replacement costs contributes to the escalation of costs to the public in an economy that has no sustained growth and a constant disinvestment due to failing infrastructure due to government mismanagement and corruption. We cannot afford to pay.	Pathmavathie	KwaZulu-Natal		retired
	2026-01-08 13:15:57	No I do not	Other	We should not be paying for goverment's blunder, but more than this, we should not continue to pay for Eskom's inefficiencies, bloated salaries, corruption and mismanagement. It is time for Eskom to get its act together, to get back to where it was, before it was systematically destroyed by criminal behaviour and greed. So many South Africans have shelled out a fortune for solar power and other alternatives - systems we could not afford. This relieved much pressure from the grid, and should have been more than adequate a gap for Eskom to get its maintenance sorted, and fix its inefficiencies. STOP paying bonuses for ineffectual employees and start focusing on service provision, rather than expecting bailouts from those who are already overtaxed, and have overspent horribly, just to keep the lights on.	Erica	Western Cape		employed individual
	2026-01-08 13:03:03	No I do not	Other	Why should we pay for Eskom / government incompetence, and blunders? They can and should claim from fat cat government officials and any other people who have ENRICHED themselves at the expense of the POOR through rampant corruption and crime. Ordinary South Africans cannot even afford a loaf of bread anymore... the POOR are starving. SHAME on Eskom and the government who are responsible for this state of affairs!!!	Mademoiselle	Gauteng		retired
	2026-01-08 12:20:02	No I do not	Other	Eskom aqnd Nersa are just throwing numbers around. Eskom wanted R116 billion, Then settled for R62 billion. Then Nersa said R54 Billion and according to Mr Mathebula, Eskom accepted this amount. Eskom needs to be privatised, slimmed down and turned into a proper company competing in an open market. And the honest tariff paying consumer is the one who has to pay the R54 billion to fund the rest of South Africa. How about Eskom get the Debt defaulters to pay their outstanding amounts. Absolute mismanagement and incompetence.	Arthur	Gauteng		retired
	2026-01-08 12:08:23	No I do not	Other	I have a registered SSEG installation which cost an unreasonable amount to register. I switched Eskom off on 25 September 2025. I haven't used 1 kWhr of Eskom supplied electricity since then but have to pay around R600 a month for availability. Eskom can use that money to recover their mess up	Clive	Eastern Cape		retired
	2026-01-08 11:41:07	No I do not	Other	What is the truth why are we paying for Eskoms assets, is the electirty tariff not supposed to be there to cover this? It makes no sense why tariffs needed to hiked to pay for assists. We are over taxed already, corruption is rife and the corrupt are not being held accountable. BEE remains so the elite can continue to plunder the poor are not benefitting. Business are leaving and unemployment is climbing. There is more to this we are still being lied too.	Monique	Gauteng		employed individual
	2026-01-08 16:41:12	No I do not	Other		Eldrid	Free State		retired
	2026-01-08 15:59:00	No I do not	Other	If I make a mistake in my bussiness,I have to resolve it. Pay in from my earnings. Certainly Nersa and Eskom can find money amongst themselves to pay for this rediculous bill. The client, (electricity user) did not make the mistake and should not pay a single cent for it.	Josine	Mpumalanga		
	2026-01-08 15:56:33	No I do not	Other	During the negotiation process with ESKOM, NERSA forgot to include depreciation of Plant however the negotiated tariff would have included affordability for the end User. While ESKOM may have found an error in NERSA's calculations, the negotiated tariff increase is more than fair. As a paying consumer, I am burdened with ESKOM's costs for their own corruption, poor engineering decisions, bloated workforce and inefficient collection of debt from consumers. 	2026-01-08 18:00:39	No I do not	Other	A R76Bn blunder. Where is the competent Accountants that must have been employed based on merits and competence, not on political correctness. Accountability must rest where it belongs namely the Minister of Energy and the supporting government, not the general public. It is time that we stiffen our spines as consumers and as a nation by pushing back and by getting rid of incompetence.	Maartin	Western Cape		retired
	2026-01-08 17:52:15	No I do not	Other	It is well known in intelligence circles - this is a UN Biden agenda. Govts run down ELEC facilities and economies pushing prices up - Increases are then levied to rectify - the money is laundered off to the WEF Biden and UN [whoever gets it, Biden was mentioned in this clip] the Intel clip is taken down, but here is another one saying the agenda - https://www.youtube.com/watch?v=6ZQDGFkPvfQ It is a MONEY LAUNDERING scheme and also intended to make people poor and enslaved. they will then introduce digital currency and micro chipping and total loss of liberty. Communism. Attach corrupt Politian's assets if anything has to be paid for. Gutvol.	Jeannot	Western Cape		retired
	2026-01-09 08:53:34	No I do not	Other	Decades of rampant corruption and mismanagement under the ANC goverment has lead to this situation. We need more accountability in government for their poor performance and mismanagement of critical state resources. Also - due to rising electricity charges and poor delivery from Eskom more and more users are switching to self-generation. This move should be actively supported by government to alleviate the pressure on the power plants and the distribution network.	Meyer	Gauteng		employed individual
	2026-01-09 08:51:55	No I do not	Other	Eskom is over-staffed and on top of that they are over-paid.	Rene	Gauteng		retired
	2026-01-09 08:39:21	No I do not	Other	Whilst it is certainly correct to include depreciation in any cost recovery. It begs the question as to how renewal have been claculated in the past. If new power stations have been cpaitalised and these costs have not formed paart of the "tariff costs" then the treatment has been an error. That said how NERSA have calculated the annual allowable increse in tariffs has never been clearly set out for the consumer. Secondly this deals only with the generation side of the business. No recalculation of the distribution side of the business has been undertaken. Yet here is where the real cah flow hits occur with bloated costs, inefficiencies and non payment of amounts due occur. It seems that this is a cherry picked argument by ESKOM and the bigger failures are being ignored.	Martin	Eastern Cape		business owner
	2026-01-09 08:20:59	No I do not	Other	Eskom is not a going concern and hasn't been for than a decade due to its crushing debt burden and excessive operating costs. The law provides for tariff increases bases on prudently incurred costs, however Eskom's excessive costs are not prudently incurred. Numerous examples show how Eskom has paid excessively for capital and operating expenditures. The staff complement is far too high compared to international benchmarks, and the staff costs are too high for the productivity of the staff. The high tariff increases are leading to job losses as industries become uncompetitive.	Trevor	Gauteng		
	2026-01-09 08:20:14	No I do not	Other	Besides agreeing with all of the above, I do not believe that we should constantly be penalised for the mismanagement and lack of competency of Government. The tariffs are already high and should include replacement of infrastructure etc. however, the funds are mismanaged to serve personal gain leaving a shortfall that now needs to be footed by the already heavily burdened consumers. When are these "decision makers" and government officials going to be held responsible and accountable for their actions? This course of action is totally against the principle of "unfairly enriched" in the case of officials and consumers being penalised.	Tina	Gauteng		business owner

	2026-01-09 09:20:08	No I do not	Other	We should not pay for government blunders (all of the above) because we do not share in the profits.	Dennis	Western Cape		self-employed
	2026-01-09 09:17:36	No I do not	Other	It is a real concern that our electricity costs continue to increase exponentially, and to be a net driver of inflation. A major factor is the under-recovery from certain sectors (illegal connections, municipalities who don't pay) while those who do pay are burdened with the direct cost of their own contribution and covering for those who are not paying. This results in those who can migrating away from the grid, reducing the pool of those who pay. As this is only a percentage of the consumers, the nett effect is to increase the burden on payers, to the point where they can longer pay, and the system will collapse economically.	Peter	Gauteng		employed individual

	2026-01-09 17:31:39	No I do not	Other	Eskom should first collect the money owed to them before expecting the paying customers to fund their inadequacies.	NEVILLE	KwaZulu-Natal		retired
	2026-01-10 10:29:08	No I do not	Other	It is naïve and short-sighted to expect the shrinking paying public to foot these bills. I understand that Eskom has investments and overheads they need to sustain, however the situation we find ourselves in now relates to poor and negligent management, greed, and corrupt and criminal behaviour throughout the organisation, and I suspect, within the public-sector institutions which support our power supplier. Expecting the public to continue to sponsor this is unacceptable. I understand that investments need to be paid, failing which we run the risk of defaulting on commitments which might impact our global standings negatively. I also understand that operating expenses need to be sustained in order for the organisation to continue to provide services to the public. That being said, taking revenue from your consumers to pay for your inefficient and bloated overheads is a betrayal of civic trust. Provision of electrical services is a national imperative, and a service, and the management of these services should be optimised to keep costs down against efficient outputs, in order to ensure that South African production is competitive. I am 100% certain that there is a massive amount of fat within Eskom which can be cut out with good, ethical leadership, well-designed and enforced policies, and support from a government which is not self-interested. This would create challenges with labour, and with the criminal organisations and individuals who, I have no doubt, are lining their pockets due to gaps being left open across the current system, but unless you do something intelligent about it, we are in serious trouble, as this problem is just going to continue to expand. Failing access to foreign direct investment, I expect that Eskom and related entities can only acquire the necessary income to support their obligations through three mechanisms: 1. Direct cost to consumer - i.e. rates 2. Public acquisition through taxes 3. Selling off the business to the private sector I am in opposition to 1 and 2. I have no faith that Eskom or the regulators will overcome the issues I have mentioned in the near future without a radical restructuring and a culling of corrupt or weak, inexperienced leadership, from government down. We need to increase the volume of people who can act in our economy with discretion to drive demand and pull production output up. We know that the consumer base with the capacity to drive demand in this country is shrinking and makes up a small percentage of the population. It is completely unsustainable to keep increasing this small groups' costs, as each hike, from whatever service, is driving more and more people below the discretionary line into survival mode. Furthermore, more people with the means will exit the system and self-serve, using an independent supply. I can guarantee you that they don't want to do this, but they have determined that this is the most economically viable strategy. This means that the people paying for services through rates will be an already overwhelmed class without the financial means to get out of the hole. You will be pushing people out of the participating middle class, either into survival mode locally or out of the country. This is not the South African dream. This is a spiral of death for our people. You and all the services need to be working to pull more people out of poverty and give them advantages such as cheap power, services, etc., by finding ways to keep your costs down while delivering world-class, competitive infrastructure. Taxation is similarly problematic as South Africa's consumer tax base is fraxional, with a small percentage of the population supporting the majority. They are overtaxed, and very close to the Laffer curve in terms of tax tolerance. Government ought to be reducing taxes, or you will find more people finding ways to avoid tax than growth in revenue, which is similarly going to accelerate a downward slide economically. Increasing collection from consumers is an extremely short-sighted plan, and may well be one of the final straws that drops the country below any manageable economic situation for a long time. The only solution I can imagine, if we cannot find foreign investment, which in itself is not solving the problem as we don't see any improvement, is to sell off the assets to private sector and recover these overheads that way. Even then, I'm not sure anyone would want to buy into this without guarantees of profitable futures, which might involve some radical changes of policy. You need to be extremely careful how you handle this because this country has a history of making bad decisions here and handing strategic assets to bad players who do not have our nations' best interests at heart, both locally, and abroad. If you do this, you need to ensure governance is solid, uncorruptible, and with strong expertise (engineers, not politicians and economists). This governance role is what I feel public sector should be taking on, not that of production, this is private sector, which is designed for this.	Adrian	Gauteng		employed individual
	2026-01-10 10:26:05	No I do not	Other	Eskom is making a profit . . .use that to fix their mess up	Lc	Gauteng		retired
	2026-01-10 09:53:42	No I do not	Other	Power availability should be regarded as part of the "commons". 	2026-01-10 08:40:18	No I do not	Other	We are being asked to pay for the criminal and incompetent misuse of ESKOM funds which should have been used to maintain and develop the country's power generation and distribution infrastructure.	Eugene	Gauteng		retired
	2026-01-10 08:29:29	No I do not	Other	I have 3 issues with Eskom/Nersa and the R76 billion 1. The R76 billion is a mistake - surely a whopper - but a mistake. If the mistake had not been made, the initial allocation would have been R76 billion higher. Therefore the "mistake" is not at issue, the R76 billion awarded at the cost of the tax payer , is. 2. Nersa makes no value added contribution to electricity supply/availabilty question. It is a sop. It seems to act as a sort mediator to curb Eskom's voracious appetite to fuel its ambition to remain a monopoly supplier and appease the consumer and tax payer. The main reason for its existence is to create expensive jobs . Close Nersa down , save a fortune, deregulate the generating of electricity and make the national power grid available at a useage cost. 3. Eskom as an organisation registered under the companie's act, should be changed to a specific government entity under a specific law of parliament recognising that its main reason for existence is to ensure continuity of daily supply to balance the power grid. This would come at a cost as it would need to have generating capacity which cannot be judged under any measure of ROA as it would be expected to have surplus capacity available at short notice to maintain the grid. Eskom would then be a non-profit business, run in an efficient productive cost effective way. Oversight should be to ensure cost efficacy and grid stability. The distribution grid should be a seperate entity, outside of Eskom which would be run as a business , which could even be privatised.	Quent	Western Cape		retired

	2026-01-11 06:50:44	No I do not	Other	Why I dont support this bailout us simple. Corruption has not been rooted put at Eskom yet. Secondly the only reason Eskom has had no load shedding tecently is because we the people have bought our own sun panels. I pay my taxes snd then have no control of how it is wasted and looted. With my sun panels I have control of my own momey. I am not ovet budget, not getting increases every year that I cant afford. In fact my electricity costs are going down. Lastly , Eskoms shortfall is lack is scale/volume/lost customers. To get more volume Eskom needs to cut costs to customers. Alas thus will not happen because Eskom is a state owned criminal enteprise. What is the answer. Privatise and then see what happens. People at Eskom are being paid far above their ability or qualifications or pay for the job they do so badly.	Anthony	Western Cape		retired
	2026-01-11 06:50:41	No I do not	Other	I do not see why we have to pay for nersa's mistake. While eskom over the past how many years, did not invest money ondoing proper maintenance and a lot of fruad that went on. They need more and more money. To fix their mistakes. Why is it always the people that have to pay for their mistakes. If you look at the cost of living and how eskom's electricity prices increased. It's safe to say they have fraud going on, with a lot of irregular spending. If eskom can afford to buy new vehicles for their workers, then they have enough money. The people working at eskom that do not pull their weight. Fire them and recruit proper people that can do the work and that is willing to work. Remove the cadre, cadre bullshit so that eskom can start performing.	Dewaldt	Gauteng

	2026-01-11 15:56:30	No I do not	Other	The Eskom electicity supply option in not suitable for South Africa. It is a waste to try and keep aged over-used poorly maintained plant going. The marked should be thrown open to enable private initiative to do the power supply in south africa.	Carl			
	2026-01-11 14:07:02	No I do not	Other	What a joke!! I suggest they just write it off. It's only a book entry! The more cash into Eskom, the more to mismanage (steal).	John	Western Cape		
	2026-01-11 17:16:48	No I do not	Other	Consumers can not pay for a "reset" in how assets are valued in tariff calculation - finding anew formula and calling it blunder? This calculation need to be open to public scrutiny from beginning. If such a big difference arise the basis of asset to tariff should be re-assed as Eskom has made a profit now already.	Petrus	Gauteng		self-employed
	2026-01-12 08:46:27	No I do not	Other	The economy should pay!! : low electricity costs encourage businesses to expand / start up, and create more jobs leading to higher taxes Cut the size of the government and divert those savings to spending on infrastructure Privatization!	J	Western Cape		
	2026-01-12 08:33:16	No I do not	Other	We are struggling to put food on our tables due to the soaring cost of living, never mind keeping the lights on (if and when they decide that we may have power) How come the public have to keep fitting the bill for incompetent decisions being made by public servants that should not have been appointed in the first place!!!	Leon	Mpumalanga		employed individual
	2026-01-12 07:59:53	No I do not	Other	The problem is one of endemic incompetence in government and state owned entities. The majority of electricity consumers and particularly households do not have the capability to be independent of the national supplier. Tax payers will have to fund this error if the monies are not recovered directly from consumers. The monies must come from somewhere and at the end of the day that means the voters pay for the government that was elected. This problem is not resolved by popular vote of majority in our democracy because the vast majority of voters are not significant tax payers not consumers. The problem with the NERSA model is that it assumes ESKOM is effectively managed and operates efficiently - that is assets are maintained, operated and replaced at end of service life. This has not been the case for many years and NERSA rates should be downscaled proportionately to reflect actual delivery by ESKOM. Perhaps the model of "democracy" needs reconsideration in that it seems that persons who are not strongly affected by the outcome of their vote have the majority influence on the outcome that affects others strongly. 	2026-01-14 01:06:58	No I do not	Other	✍️ Objection to NERSA's R76 Billion Increase & Proposal for Competitive Electricity Market Reform I object to NERSA's proposed R76 billion increase. South Africa's electricity crisis is not the result of insufficient tariffs — it is the result of a structural monopoly that has failed repeatedly despite continuous financial support. Eskom's model is obsolete, uncompetitive, and incapable of delivering reliable, affordable electricity. A tariff increase will not fix a monopoly that is fundamentally broken. 1. Core Grounds for Objection A. Eskom's monopoly is the primary cause of systemic failure For decades, Eskom has operated without competitive pressure, resulting in: Inefficiency Corruption Bloated operational costs Declining energy availability Poor maintenance discipline Lack of innovation A monopoly has no incentive to improve, and tariff increases only entrench this dynamic. B. Consumers cannot continue subsidising a failed structure South Africans are being asked to pay more for: Load shedding Aging infrastructure Mismanagement Cost overruns Procurement failures This is neither fair nor sustainable. C. Tariff increases have not produced improved outcomes Despite years of above-inflation increases, Eskom's performance continues to decline. There is no evidence that additional revenue will change this trajectory. 2. Proposed Structural Reform Plan South Africa requires a competitive electricity market, not another bailout disguised as a tariff increase. A. Issue up to sixty (60) generation and distribution licenses to private enterprises NERSA should initiate a phased licensing programme that: Opens the market to multiple independent providers Encourages competition on price, reliability, and innovation Reduces reliance on a single failing entity Diversifies generation technologies and business models Stimulates investment and job creation Competition is the only proven mechanism that drives efficiency and service quality. B. Unbundle Eskom's operational functions and open them to competitive bidding Eskom's generation, transmission, and distribution functions should be separated and progressively opened to private participation under regulated competition. This reduces systemic risk and prevents a single point of failure. C. Replace Eskom's senior management with performance-based consultants Eskom's leadership has failed to deliver operational stability. NERSA should recommend: Immediate replacement of senior management Appointment of independent, qualified consultants Performance-linked contracts with measurable KPIs Competitive bidding among consulting teams Removal of any team that fails to meet targets This introduces accountability and aligns compensation with results. D. Establish a competitive management framework for Eskom's remaining assets Where Eskom retains ownership of infrastructure, management should be outsourced to teams that compete on: Cost efficiency Maintenance performance Reduction of unplanned outages Improved EAF Transparent procurement This ensures that even state-owned assets are operated under competitive pressure. E. Protect consumers during the transition Instead of tariff increases, NERSA should implement: A tariff freeze during restructuring Municipal markup caps Lifeline protections for vulnerable households Incentives for private generation and wheeling Consumers must not bear the cost of structural reform. 3. Conclusion The proposed R76 billion increase is a short-term financial patch for a long-term structural failure. South Africa does not need higher tariffs — it needs competition, accountability, and a diversified electricity market. I therefore object to the proposed increase and call on NERSA to: Open the market to up to sixty private providers Replace Eskom's senior management with performance-based consultants Implement a competitive, decentralised electricity model that protects consumers and ensures long-term energy security This is the only credible path to restoring stability, affordability, and trust in South Africa's electricity sector. 	2026-01-13 17:45:21	No I do not	Other	This is not the way a country's mismanaged institution should be solved. Firstly it would set a very bad precedent and would pave the way for future management to continue careless and unaccountable behavior. The broader public should definitely not have to suffer the consequences caused by a few incompetent people.	Dino	KwaZulu-Natal		retired
	2026-01-16 12:31:07	No I do not	Other	As tax payers, already heavily burdened by the government's for years of mismanagement, poor planning and incompetence of government managed entities, in this case Eskom and its management/Board/workers how can they now want to hold us liable for their extravagance and mistakes?	Noek	North West		retired
	2026-01-16 10:05:32	No I do not	Other	I think NERSA should be made independent like all other National Regulatory Authorities and be allowed to tightly regulate a monopoly like Eskom. NERSA should also bow its head in shame as it has failed to regulate in the interest of the people over many years if you look at how electricity tariffs have increased. No other entity has seen prices rise likes Eskom's and that is clear evidence of the failings of NERSA. This is partially because it is not independent but controlled by Government. It should be made completely independent and strictly regulate a monopoly like Eskom. It should also drive towards creating competition at all fronts of the Eskom business and protect consumers who use their own means of electricity production like solar etc.	Andy	Gauteng		business owner

	2026-01-15 10:31:34	No I do not	Other	The Eskom grid is not a 76bn rand hole. If you put coal or diesel in the Eskom grid it works perfectly, with ongoing maintenance. This is NORMAL for power plants. I do not TRUST the R76m lie that is being thrust upon SA citizens. Proof is the absence of loadshedding and absence of major breakdowns in Jhb north. This is another lie aimed at STEELING from the public. To Nersa, and Eskom and the bad actors trying to make up this R76m invoice: There are people who see your lies, and do not accept them. This is another one of your lies. Sincerely, Steve G	Steve G	Gauteng		employed individual
	2026-01-14 17:13:13	No I do not	Other	Definately do NOT want to pay for an aging system. That has been neglected for years. Corrupted, stolen abused by Eskom	Helena	Gauteng		retired
	2026-01-14 16:05:04	No I do not	Other	This is disgusting that the citizens should foot the bill for the Governments mistakes! In typical Communist fashion people who have never run a business in their lives now want those that create the wealth to pay for their colossal oversights and mistakes! It's time competent people start managing state institutions and those that err take responsibility and pay for their mistakes that costs the Taxpayer. WE NOLONGER HAVE THE FINANCE TO PAY FOR MISTAKES. SO F-OFF and get one of those Billionaire Tenderpreneurs to start paying back the money to cure our Country. So no, we wont and can't pay!	Andrew	Gauteng		unemployed individual
	2026-01-14 14:19:14	No I do not	Other	Consistently bailing out a failing business reinforces the fact that there are no consequences for poor management, proper education and corruption. Nersa has no valid reason for approving yet another bail out when Eskom have consistently failed to do basic consistent maintenance, improvements and supply for the country as well as neighbouring countries who we supply power to. Give the money to another (perhaps private) company that will actually work for the people instead of stealing all the money and blaming apartheid that happened a generation ago	Paul	Gauteng		unemployed individual
	2026-01-17 13:49:41	No I do not	Other	Eskom made billions in profits. Eskom must serve the people in supplying electricity. Eskom is not supposed to be a money printing machine for the corrupt. This calculation error will not cause any harm to eskom. It will Only cause more harm to the people of the country. Eskom survived without making profits why do they need to make more profit on top of the profits they already made?!? This is not about an error but rather about lining pockets of the corrupt.	Christo	Gauteng		employed individual
	2026-01-17 08:14:12	No I do not	Other	I understand that to provide South Africa with Electricity will take money. However, I strongly object that the law abiding citizen has to fit the bill to pay for incompetence. Therefore, - Get the money from non paying municipalities. - get the money from non paying customers. - Fine the responsible employees, board and government member personally where their mistakes and incompetence and politics waste money.	Martir	Western Cape		employed individual
	2026-01-16 18:05:08	No I do not	Other	I've NEVER supported corruption & stupidity. Giving money to corrupt people is stupid.	Grant	Western Cape		
	2026-01-18 06:20:36	No I do not	Other	Their management structure is top heavy. Too much corruption, they should reduce their staff by 30 % and they are earning too much money !!!	Rudi	Gauteng		
	2026-01-18 00:37:04	No I do not	Other	Rising cost of living for people who increasingly cannot afford it, eg., teachers.	Martin	Gauteng		employed individual
	2026-01-18 08:47:09	No I do not	Other	Does not address the underlying cause of this mistake. Incompetence. PRIVATISE Eskom! Government have proven they are not able to run any department efficiently and economically electricity is not a luxury but an absolute necessity	Gary	KwaZulu -Natal

	2026-01-18 10:19:47	No I do not	Other	It is not our fault that the government has made a blander, besides that this people are not quite capable of running everything sufficiently.	Vincent	Limpopo		self-employed
	2026-01-18 10:17:35	No I do not	Other	As a pensioner I cannot afford all the regular annual increases in tariff of nearly four times the CPI. These have arisen from equipment neglect and funds mismanagement (by which South Africans up to the highest level have enriched themselves) at the public cost. Now you wish to add incompetence of NERSA to that! No womder there is so much illegal connections etc	David	Gauteng		retired
	2026-01-18 13:24:47	No I do not	Other	No Heck no! Why should we pay for government mess ups .	G	Gauteng		retired
	2026-01-18 12:32:18	No I do not	Other	The rate at which tariffs have been increasing over the past several years has significantly outpaced end users' incomes. Rather than burdening citizens with further increases, there should be a freeze on electricity tariffs and the government should adopt zero-based budgeting to reallocate budget from less priority areas to electricity.	Mpumelelo	Western Cape		
	2026-01-18 12:18:00	No I do not	Other	Collect outstanding debt. If I'm not mistaken, this amount is in the budget, which means I, like thousands of other paying customers, will pay towards this amount. Should this amount not be in the balance sheet as an asset?	Maurice	Gauteng		retired
	2026-01-18 16:16:55	No I do not	Other		Cornelia	KwaZulu -Natal		retired
	2026-01-18 16:14:09	No I do not	Other	There is a fundamental problem we are facing, the so called R76 Billion Mistake in my opinion is a hogwash, rate payers require proof of there ever was a mistake. Also there are non paying customers that owe billions in unpaid electricity and Eskom has hiked prices to the paying customers to clear the debt of the non paying customers. When does this BS ever end?	Imran	Gauteng		employed individual
	2026-01-18 15:16:11	No I do not	Other	Burdening the consumer with the costs of Eskoms years of mismanagement and ineptitude.	Michael	Gauteng		employed individual
	2026-01-18 15:09:59	No I do not	Other	The majority of South Africans are already battling to afford essential living expenses. Consumers cannot be held responsible for repeatedly subsidizing Eskom's internal mismanagement and NERSA's faulty calculations through ever-rising tariffs. It is unreasonable to expect the public to bear the financial burden of deteriorating infrastructure that results from inadequate maintenance and planning. Similarly, consumers should not have to absorb the costs of Eskom's cash flow issues and project delays stemming from organizational inefficiency and poor oversight. Higher electricity rates should not be used to offset Eskom's depreciation expenses, returns on investment, or other internal shortcomings. Eskom exists to serve consumers and fulfill their energy needs—not to continually extract more money to compensate for mismanagement, negligence, corruption, and self-interest.	Nic	Western Cape		
	2026-01-18 19:17:04	No I do not	Other	when will we actually have action? the only tangible action is against the consumer, never those in charge. i see all the social media, whether fake or not or the best invention yet: Conspiracy theist. what a joke. strange that the truth comes out and then the media divers attention and nothing happened. zondo, millions, nothing, zumu millions nothing, ciryl, millions nothing, julius, milions nothing, eskom millions nothing. i hope you guys area ready, when the implant the new bill, there will be no more freedom to have your say. shocking, majority of SA do not know that soon, there will be no more freedom of speech unless it is favorable.	Magnus	Eastern Cape		self-employed
	2026-01-18 18:13:40	No I do not	Other	Refuse to Subsidize NERSA'S Incompetence It is absolutely disgraceful that the South African consumer is once again being treated as a bottomless ATM for NERSA's administrative failures. We are told to pay for "calculation errors" as if we are responsible for the oversight of a multi-billion rand energy sector. We are not. The precedent for ethical corporate behavior has already been set. When Discovery Medical Aid recently identified an error in their claims processing, they didn't take the coward's way out by extorting their members. They showed integrity by absorbing the cost themselves. They recognized that a mistake made by the provider is the provider's responsibility to fix. Why is NERSA held to a lower standard? South Africans are already drowning under the weight of some of the highest electricity price hikes in the world, alongside crumbling infrastructure. To demand that we foot the bill for internal incompetence is not just unfair—it is a blatant abuse of power. If Discovery can take accountability for their mistakes, NERSA can do the same. We refuse to be penalized for your inability to do your jobs. Stop passing the buck and start carrying the cost of your own errors.	Hennie	Gauteng		employed individual
	2026-01-18 18:11:16	No I do not	Other	Why do consumers have to pay to compensate for the fraud and embezzlement which Eskom has allowed to occur.	Jean	Western Cape		
	2026-01-18 17:14:05	No I do not	Other		Wynany	Mpumalanga		business owner
	2026-01-18 08:53:09	No I do not	Other	Eskom made a huge profit this last year, the consumer should be paying less towards their electricity consumption Not more.	Sonja	Western Cape		retired
	2026-01-19 08:34:18	No I do not	Other	If you are the authority calculating the tariffs, but you keep the tariff calculations concealed and do not get a firm to audit them and confirm calculations, then you must stand in for your mistakes. The outstanding debt is not collected from Municipalities and people who don't pay and use mass intimidation and political threats to avoid payment. Now the faithful payers of bills must pay for this mistake, it is unacceptable. Disclose how much Municipalities owe Eskom and what steps are taken to collect and how much was written off and who made these decisions? Disclose per municipality who does not pay their bills and how much is owed and name the top 1000 non-payers? Last question, how do we know there was really a calculation mistake, was the mistake audited by an independent body? As Nersa is no longer independent. Who made the mistake and what steps were taken against the individuals and who were fired and who resigned?	Retief	Gauteng		business owner
	2026-01-19 08:12:39	No I do not	Other	Government gets rewarded handsomely by tax and rate payers. Instead of squandering the money through very dubious and unethical behavior there should be more accountability on officials, including jail time for wrongdoing and i guarantee you will find more than enough money to do alot more things for the country without additional charges. Further to my point of tenders, these should be awarded to companies actually doing that job and not tenderprenuers that will subcontract it off to someone else.	Ahmed	KwaZulu -Natal		business owner
	2026-01-19 08:12:20	No I do not	Other	Why must i pay when again i have been without electricity since 29/11/25 to one of my factorys and the other one since mid DECEMBER(?)	victor	Gauteng		
	2026-01-19 08:02:26	No I do not	Other	Eskom has a ridiculously bloated staffing structure, with AVERAGE salaries of R1,026,000 in 2025. This is way higher than any other SOE. South Africa is the fourth worst electricity cost per kw/h on a PPP adjusted basis in the G20. Despite our prolific coal reserves, we have the most expensive average cost per kw/h in Africa at +/- R3,30. Right-sizing the staffing of Eskom will cover this pathetic infrastructure costing boob in 3 years. Please, please, start understanding that the South African consumer has actually got very finite resources. Your tariffs will drive the wealthy payers off the grid, and you will be left with consumers who cannot afford your product. This will be a terminal business strategy for Eskom, and it will follow SAPO, SAA and the other SOEs into financial penury.	Roderick	Western Cape		retired
	2026-01-19 07:34:34	No I do not	Other	All of the above mentioned reasons together with corruption, nepotism, etc.	David	Gauteng		retired
	2026-01-19 07:32:11	No I do not	Other	1. Affordability: The current electricity annually are already putting a strain on house holds. If this correction is going to be passed to the consumer then electricity will be a luxury that only a few can afford. 2. Reliability: old infrastructure cannot be charged at "new" infrastructure cost. The cost of these should already have been recouped. 3. Efficiency: The operations of Eskom need to be efficient to ensure that affordability is maintained.	James	Gauteng		employed individual

	2026-01-19 07:15:50	No I do not	Other	Tax-paying South Africans are permanently immigrating at a rate of 50 families per day. Nontax paying immigrants are flouding in to SA at a rate of 200 families per day. ANC = Another National Catastrophe. Therefore, the tax-paying South African who did not want to immigrate is really considering it.	Hannes	Gauteng		self-employed

	2026-01-19 09:53:06	No I do not	Other	Stop with all this nonsense people are suffering enough God is watching you all Stop the hoax green agenda the planet has spun around for millions of years and still will when we all dead and our children and grandchildren and great grandchildren etc!!!!	Rita	KwaZulu-Natal		
	2026-01-19 09:50:38	No I do not	Other	I support the consultation process and several consumer-protection positions, but I do not support the paper as currently published. Main concerns 1. Risk of overcharging: Eskom did not give the newest asset value report (the paper refers to a 2020 report). Without updated proof, changing the RAB upward can lead to people paying too much. 2. People may pay for delays and overspending: The paper says using “at cost” numbers can make it hard to remove extra costs and overruns. This means consumers could still pay for slow work and wasted money. 3. More clarity and fairness is needed: NERSA should share clear, checkable calculations (so everyone can see how the numbers were made) and apply a rule that consumers should not pay full returns for assets that are not working well (“used and usable”).	Deborah	Western Cape		employed individual
	2026-01-19 09:49:10	No I do not	Other	Return the stolen money.....	Andrew	Western Cape		
	2026-01-19 09:36:14	No I do not	Other	We were told Eskom is doing well and they are making profit, why now we should be paying money towards Eskom Selling electricity cheap on neighboring countries and we must subsidies that, no it can't be correct. 	2026-01-20 02:30:23	No I do not	Other	I am not paying for their mistakes. If I make wrong calculations in my business I have to fit the bill.	Johannes	Gauteng		business owner
	2026-01-19 19:09:59	No I do not	Other	A recalculation is needed which now should also include the profits Eskom scores since the "meterbox frauds" supported by hacked software systems that supported the leached power out to consumers and income to the fraudsters who are Eskom employees who alledgedly stole such boxes and orchestrated the whole fraud system, had been sniffed out last year. This means Eskom is profiting on the double now. This has not been taken into consideration for a new recalculation. All in all this should result in tariffs to go down again. After investigstions lead to eliminating fraudsters from Eskom employees that sold electricity but pocketed the income, Eskom is obviously having a significant boost in their income by gaining the "leached" customers AND their money on the legal systems. Since this had an immediate affect, it is only logic and fair now that the extremely high tariffs should be brought down soonest now to for consumers. Because it is extra income for Eskom and no losses of electricity. If this is not calculated then I daresay it'll begin to reek like fraud. See some articles - losses Eskom suffered seen as a loss of sales - a lot of sales did not register on their system due to the parallel system stealing electricity: https://www.eskom.co.za/loss-before-tax-for-the-2024-financial-year-improves-by-r9-billion-to-r25-5-billion-ntcsa-separation-triggers-once-off-accounting-adjustment-leading-to-loss-after-tax-of-r55-billion-profit-forecast/	Dawn	Free State		retired
	2026-01-19 18:30:57	No I do not	Other	Eskom has been mismanaged and ransacked by cronies for decades and now you want the public to bail you out – how about you get the cronies to bail you out instead?	Noel	Western Cape

	2026-01-20 06:20:27	No I do not	Other	I would like to point out that both the staff members of Nersa as well as the Eskom Staff , will agree with me that they are employed to perform specific tasks and that these task be performed in the utmost efficiency as well as in a diligent and professional manner . I would further like to believe that the personnel of both Nersa as well as Eskom perform their daily duties as professionals that indeed stand responsible for the actions . I have served the electrical construction industry in the private sector for most of my career and as the responsible person for numerous contracts , mistakes made were your and your companies' responsibility , and for your account and no matter what the circumstances , could not be shifted to the client . Therefore as individuals as well as company management we took utmost care in not making mistakes . There were checks and balances in place , as well as process and result reviews by various members of the company (at highest level) I firmly believe that Regulator Nersa as well as Eskom have become less concerned about mistakes as there are no consequences on their mistakes . Mistakes just get passed onto the consumer , the public , and the responsible persons walk away , hardly reprimanded . Professional Engineers (registered with the engineering bodies) , and actively performing their duties in the industry and market place are responsible , and stay responsible , for their work and thus act as such , in the manner considered fit for any Engineer . I thus believe that this rather grotesque mistake be placed squarely in front of the persons and companies responsible . Perhaps once an example is set and consequences have repercussions , more care will be taken in executing the duties you are responsible for . Hoping this serves as a reminder that each person employed to perform certain tasks do so to the best of their ability and in a manner that will make them proud .	Louis	Eastern Cape		retired
	2026-01-20 08:04:31	No I do not	Other	I have heard that the employees are getting school fees payed for and high salaries. This is not in keeping with a service that is cash strapped. Stop high expenses and concentrate on service delivery and alternative energy sources. Don't tax people that use solar to take some of the load off the grid and even feed extra power into the grid. Don't be greedy. Over charging customers will be to your downfall.	Zelda	Eastern Cape		employed individual
	2026-01-20 07:51:37	No I do not	Other	Incompetencies from employing the wrong people, waiting until crisis situations [little forward planning] and then milking the population dry is not acceptable. Why should we bail companies out of their own mess? Overpaid for nothing	Jillian	Western Cape		retired
	2026-01-20 07:48:28	No I do not	Other	The core issue here is not about the public been 'requested' to pay for the R76 Billion so called mistake. The public is paying for that in any event; who else is doing the paying but the public? The issue is about several tiers of incompetence in the management structure, receivign great salaries and bonusses, and never saying we are sorry for the mess in the first place. There is no return of bonusses happening and positions remain secure; binding the 'error' to continue making the one mistake after the other. The tax payor will continue to pay, there are no other options. The only option that we do have is cleaning up the management and executive act, would it not be nice to hear them saying we are taking accountabilility for this 40 year old mess? the broken structure is for sure the infra-structure, but the management-structure must be fixed before any structural-repairs can follow	Andre	Gauteng		business owner
	2026-01-20 07:45:47	No I do not	Other	What the consumer is going to pay is most probably just going to go into the pockets of the looters of the country. Bilions going into ESKOM. what control is there over where and how that money is going to be spend.. Eskom's leaders have a proven record of stealing billions. The R76B orr largest part thereof should be recovered from the parties that looted and are still looting ESKOM first. When will we see any attempt of that?	Ettienne	Gauteng		self-employed

	2026-01-20 13:50:14	No I do not	Other	Eskom needs money, now they realised that they made a blunder of their calculations and now we must pay for their mistakes. Half of our people do not pay for electricity or steal electricity and now they want the other half to pay for their mistake. Eskom must also make sure that every person that uses electricity must pay for what they use and made sure all their systems are in place, to collect their money. This is not a government blunder, Eskom made a mistake about the calculations, they need money and should have made sure all the calculations where correct. Eskom must absorb the loss and ran their business properly. The same happened to Discovery. So sorry Eskom, they must fire the people who did not do their job properly, get competent people into the job, then you would not have blunders like this. If this is their request this year, with what will they come up next year, Eskom must go to the government and ask for money, then everybody that pay tax will assist in this regard. We must also privatise our electricity suppliers or get more suppliers, so that we can have more competition on our electricity supply and not on Eskom alone. 1) No 2) No 3) No	Stephanus	Limpopo		retired
	2026-01-20 17:12:22	No I do not	Other	I have not once ever agreed to an Eskom tarriff increase. Very few in SA ever did. Yet the farce of democracy has made the people believe their opinion matters.	Nicole	Western Cape		unemployed individual

	2026-01-21 14:26:29	No I do not	Other	Eskom must get the money back from the people who stole it via corruption from Eskom. Can't charge the consumer for their poor management.	Percival	Western Cape		
	2026-01-21 13:18:42	No I do not	Other	Blunders by Nersa or Eskom must not be passed onto the consumer. The government and Nersa must pay this, they are the ones who are employing stupid people.	Gavin	KwaZulu-Natal		retired
	2026-01-21 13:06:34	No I do not	Other	Fact of the matter is.We must keep on paying higher prices for electricity,that just keep going on n on.Regardless the fact that many of us is pensioners that live from a little income many only has SASSA to rely on.The more money we have to pay and the units become lesser and lesser.Wonder who can affort this.And nobody feel a crual damn.,if we cope or not.	Kobie	Mpumalanga		retired
	2026-01-21 11:56:17	No I do not	Other	Govt should be accountable and be responsible for the cost of the mistake. This should be recovered from the president's secret fund.	Pierre-Yves	KwaZulu-Natal		retired
	2026-01-21 18:45:50	No I do not	Other	I don't believe it is good business ethics on the part the government or Eskom to expect the people who already pay rates and taxes and also have to pay increased power prices each year to an organization that is corrupt at its core. To just escalate prices to cover up a blunder made by the company should be covered by the company. Paying escalated prices will only feed the existing corruption. The company in question has had over 30 years to prove to the country that they can provide the service, however, that has not been the case. To pay escalated prices will only mean that we will be throwing hard earn money into an abys and not see the benefits. Additionally, having made an error of this magnitude, just is another indicator that there is either serious incompetence (which is a major concern not only for the consumer) or indicates a serious case of manipulating the books for personal gain. Therefore, if the internal corruption or faulty internal affairs are not sorted out, the same problem will remain and only get worse.	J	Gauteng		employed individual
	2026-01-21 18:22:12	No I do not	Other	Our income tax, if correctly used, should be covering the costs of maintenance and improvement of infrastructure. The cost of poor management of finances should not be passed on to the already overburdened consumer.	Agnes	Gauteng		unemployed individual

	2026-01-10 10:08:20	No I do not	Paying for aging and unreliable infrastructure	This is a result of maladministration, the state should manage this better, not the small proportion of people who actually pay for electricity	Maryanne	Gauteng		retired
	2026-01-10 10:08:18	No I do not	Paying for aging and unreliable infrastructure	This is a result of maladministration, the state should manage this better, not the small proportion of people who actually pay for electricity	Maryanne	Gauteng		retired
	2026-01-10 09:52:50	No I do not	Paying for aging and unreliable infrastructure	I submit this comment in response to NERSA's call for public input on the proposed electricity price determination. I strongly object to consumers being required to absorb costs arising from acknowledged regulatory and calculation errors. The High Court ruling makes it clear that the asset valuation previously used was incorrect. Passing the financial consequences of those errors onto electricity users is neither fair nor justifiable. Affordability: Consumers should not be required to pay for mistakes made by Eskom or NERSA. Households and businesses are already under severe cost-of-living pressure, and retrospective recovery of omitted depreciation and returns places an unreasonable burden on users who had no role in these errors. Reliability: Electricity tariffs should reflect value received. Consumers are being asked to pay increased prices for aging infrastructure that continues to deliver unreliable supply, frequent outages, and operational failures. Charging full tariffs without corresponding service reliability undermines trust in the regulatory process. Efficiency: It is not appropriate for consumers to fund Eskom's cash-flow challenges, inefficiencies, or construction delays. Cost overruns and governance failures should be addressed through internal accountability and efficiency improvements, not transferred to the public via higher tariffs. In conclusion, I urge NERSA to reject any tariff determination that seeks to recover historical calculation errors from consumers. Regulatory credibility depends on fairness, transparency, and accountability — not on shifting institutional mistakes onto the public.	Michelle	Western Cape		unemployed individual
	2026-01-10 09:09:11	No I do not	Paying for aging and unreliable infrastructure	We simply cannot afford to pay anymore for unreliant energy. We must run a generator as well as our area have huge infrastructure problems. Totally unacceptable. We are pensioners!!!!	Sanet	Gauteng		retired

	2026-01-10 07:29:11	No I do not	Paying for aging and unreliable infrastructure	Without fail a storm brings down our entire area, plunged into darkness for days on end, sometimes for as long as a week! It's seems to be getting worse by the month and with this in mind how the hell do Eishkom feel they can penalize the public for their theft, their apparent miscalculations! Part of my letter to Eishkom and ENCA besides a couple of government officials and Ramapoes-y . Amazing how government many listed email addresses are inaccurate too, your comms bounce back… go figure ? This week alone we were left without power for three days, the excuse : no available spares. Wonder why? Stolen no doubt! Antiquated transformer: Tfmr RVSDE_VW_/LAEZONIA 1 88KV BB 1D ISOL, 88KV (Eskom Ref 1091249078 Eskom is aware of a fault experienced on Tfmr RVSDE_VW_/ LAEZONIA 1 88KV BB 1D ISOL, 88 kV and is attending to it. For any inquiries, WhatsApp us at 08600 37566) Kindly note that the greater Mnandi and Knopjeslaagte area are subject to ongoing outages on an almost biweekly basis whether it be due to antiquated/ un maintained equipment or wet weather. Sub standard repairs (duck tape used to connect cables) are performed leading to further outages. Without fail rain causes an outage, we are off now due to a storm 7/1/26, with no indication of when we will be switched back on! Eskom provides excuse after excuse as to why a seemingly minor issue takes a week to repair. Apparently they no longer carry any spares. Last year there was a single link open for a week, eskom were nowhere to be seen until I blocked there gate at the Mnandi Depot refusing to move without a technician following me to the point of contention. Yes an entire week for them to close a link. Power surges have also became the new norm when the technicians switch us back on causing many households to loose equipment never mind the thousands of rands in destroyed consumables.	Niki	Gauteng		self-employed
	2026-01-10 07:18:15	No I do not	Paying for aging and unreliable infrastructure	Valuation of old assets is notoriously difficult. It is an area where significant fraud and corruption takes place. The assets etc. should written off and not be used in any pricing calculation.	Richard	KwaZulu-Natal		retired

	2026-01-18 15:51:42	No I do not	Paying for aging and unreliable infrastructure	Maintenance and the upgrading of infrastructure are normal duties that any company owner and responsible manager should carry out, a normal and integral part of any household and production plant.	Gert	Western Cape		self-employed
	2026-01-18 15:23:08	No I do not	Paying for aging and unreliable infrastructure	If the cost is specific to asset depreciation then we have been paying for fully depreciated assets which have or are now being replace hence the delay in replacement of equipment and the amounts already recovered since previous or current assets having been fully depreciated should be factored into everything. If the current assets had a depreciation period of 48 months but have been used for 96 months then double the actual value of the equipment has been recovered if the equipment was never replace which should cater for any future or current replacements under way. Further to this if the depreciation charge factors in replacement the the costs recovered would far exceed the actual value of the assets.	Vincent	Western Cape

	2026-01-19 10:06:30	No I do not	Paying for aging and unreliable infrastructure	We as citizens living in this country should never have to pay these high costs and most definitely not for their mistakes. Eskom and Nersa simply don't care about the people in South Africa. They need to take accountability for what ever they have done wrong. According to news previously Eskom made a profit after loosing money for years, makes no sense whatsoever.	Marilyn	Gauteng		retired
	2026-01-19 09:55:39	No I do not	Paying for aging and unreliable infrastructure		PJ			retired

	2026-01-19 09:54:34	No I do not	Paying for aging and unreliable infrastructure	You missed your window, all of you. Too late for "take-it-backsies". Try again in the the new year. The NERSA process and calculations are blatantly inappropriate, and their mandate is clearly not being met. We need effective, professional, informed oversight and we are not getting this as individual citizens or as businesses. It makes no sense to ask citizens to cover excessive capital costs. And they are horrifyingly excessive. This is not done in the real business world. There was a profit last year - how has this been used to reduce the alleged R76bn error? We should not be funding profits to government. I am appalled that this has arisen. Again. In the same year. Shame on all of you.	Sarah	Gauteng		unemployed individual
	2026-01-19 09:51:21	No I do not	Paying for aging and unreliable infrastructure	We as ghe users always pay for the goverments flaws..it so unfair and undemocrately. WHEN will goverment do something right to please her inhabitants for a change..we are always on the losing end....ridiculous!!!	Christie	Western Cape		retired
	2026-01-19 09:51:20	No I do not	Paying for aging and unreliable infrastructure	We as ghe users always pay for the goverments flaws..it so unfair and undemocrately. WHEN will goverment do something right to please her inhabitants for a change..we are always on the losing end....ridiculous!!!	Christie	Western Cape		retired
	2026-01-19 09:34:21	No I do not	Paying for aging and unreliable infrastructure	How can pensioners be expected to pay for government blunders. Eskom needs to recover debts from customers, municipalities and government departments, get rid of incompetent staff, stop all the tender corruption, etc. Then consumers might feel inclined to pay reasonable price increases, but not under the current circumstances. NERSA needs to take responsibility for its mistakes, just like the rest of us. We are being squeezed tighter and tighter. Cost of living is driving us into poverty.	Debbie	Western Cape		retired
	2026-01-19 09:31:09	No I do not	Paying for aging and unreliable infrastructure	No, we should not finance Eskom's cash flow or construction delays.	Emmerentia	Western Cape		unemployed individual

	2026-01-19 09:16:48	No I do not	Paying for aging and unreliable infrastructure	Why do we have to pay for incompetent workers not doing their jobs. Retrench a percentage of the workforce or stop giving astronomical and above inflation increases or bonusses	JOhan	Gauteng		self-employed
	2026-01-19 12:50:07	No I do not	Paying for aging and unreliable infrastructure	Why should the citizens of this fair South Africa be held liable for those who are employed to ensure that our infrastructures are all working to its optimal? Why should the citizens now be asked to foot a bill created by those who allegedly made this error? First we had to endure load sheading for a long periods of time due to miss management. How could Eskom's / NERSA have made such a miss calculation of such a large discrepancy in their assets records of R76 billion? Have they rechecked their figures to see that it's not just a minor error of R75m? Recommendation That those who made this error be held liable for the shortfall in reporting such a huge calculated error. The question begs to be asked: What calculations are Eskom's / NERSA referring to that lead to them reporting such a large discrepancy in their report? Does it relate to under budged over spending? Why did the Audit General not pick up this error? That Eskom's / NERSA freeze any increase in the staff salaries who are responsible for error in their reporting. It's a big NO that the citizens of this fair South Africa should foot this bill in any form at all.	Peter	Western Cape		retired

	2026-01-18 10:34:40	No I do not	No concern	The reason that I do not want to be part of paying yet again almost the most in the world for electricity ,that is often out due to the mismanagement of the ANC by not updating and maintaining the existing infrastructure, is because the staff at Eskom are one of the highest paid in the country (besides the bloated public service) and that there are way to many incompetent people working there. Hence the need for contractors etc. Those who made the mistakes, should take responsibility for it and not the beleagured citizens, who are innocent of this mismanagement and incompetencies.	Barbara	Mpumalanga		Non-profit
	2026-01-19 08:23:49	No I do not	No concern	Dear Lita, last year we inadvertently discovered that Eskom have been charging us for three phase power supply since we moved into our house in October 1999. I have had numerous conversations with Eskom and a face to face meeting with the relevant persons at Eskom and effectively they just give us the run around and somehow they managed to come up with a suggestion that the felt that they felt they owed us R6000, the then proceeded to adjust our deposit in excess of R5000. effectively they increased our deposit from R420 in 1999 to in excess of R5000 in 2025. I asked them to confirm that we were being charged for three phase instead of single phase. They sent a representative around to confirm. When he arrives he did not have a key to open the box, however based on his visit they reduced out monthly fee to single phase. The net effect will be in the region of R1600 this year. However we then contacted Nersa for assistance, effectively their position is that they only play a role of mediator, communication is up to you, not Nersa. So effectively they are useless to us. Please neighbours, please confirm that where you have single phase, you are not being charged for three phase. Don’t rely on Nersa. If there are enough people who are being charged incorrectly, possibly we should look at a class action against Eskom. Being overcharged for 26 years in my case is unacceptable. If this is the norm, then it’s time to hold Eskom responsible. DO NOT EXPECT NERSA TO ASSIST.	Andrew	Gauteng		retired

	2026-01-20 23:24:34	No I do not	No concern	Why has this preposterous amount of R76 billion come out of nowhere? Nersa and Eskom officials should be investigated and punished accordingly for their incompetence, NOT THE POOR PEOPLE OF THIS COUNTRY. You can't increase the price of electricity again because it's not in line with inflation and you know that. The best way is to generate electricity from wind turbines and solar power stations spread throughout the country, Eskom's behaviour is tantamount to stealing money from our already strained individual budgets, WE CANNOT AFFORD AN INCREASE ANYMORE, qWE want a DECREASE IN THE PRICE OF ELECTRICITY. This childish behaviour from Nersa needs to stop now, it's ridiculous.	Mohamed	Western Cape		self-employed
	2026-01-21 09:55:35	No I do not	No concern	No, Eskom should not be allowed to make their users pay for their negligence, i.e. employing people not qualified to do their work properly, not being held responsible as well as accountable for decisions made.	Salmon	KwaZulu-Natal		retired

Why have the thieves and thugs that made Eskom to perform dpp	Morakabi Danny	Gauteng		unemployed individual
	2026-01-08 13:14:38	Not fully	All of the above – we should not pay for government blunders	There is a Social reality that is unconscious in the thinking of most human beings. It looks like this, whereever, one goes in the world one finds a grouping of 3 realities that are organised by people. One is the organisations that focus on the care, development and cultural health of people, for example the religious organisations, care organisations, education and training organisations. The next is the organisations that implement the law and the infrastructure needed by all people to be able to operate in their environment, for example, governments, municipalities, the justice system, police, safety and security. The third are the organisations that provide for the physical material needs of others, that is industry and trade, or economy in its unadulterated form. These organisations also happen to be the only organisations that generate money by providing relevant products efficiently, a profit is earned. Governments have to get their money by tax collection, they do not generate money. The organisations in the first sphere have to find a healthy way to support the people who have a vocation for care, education, training and spiritual, cultural development. In relation to the current Nersa question there are a couple of core principles: Governments should not own economic organisations - governments decide where the electrical infrastructure needs to be erected. It then tenders to power suppliers and construction suppliers to provide said infrastructure. Economic organisations cannot expect customers to pay for their inefficiencies. Imagine if the price of bread was based on the waste produced by the bakers. There is a concept of fair price, simply put, if a shoemaker makes a pair of shoes, the fair price for the shoes would be enough for the shoemaker to be able to purchase the raw material for another pair of shoes and provide a dignified living for himself and his family while he manufactured the next pair of shoes. The price does not include the shoe maker sleeping in until 9 or 10 in the morning before he starts working on the shoes, or an upgrade for his TV set, or a new car. I don't think it is difficult to see in the above a thread that isn't about blame or being clever but simply about having a conscience for what is right, good and truthful. If as a country we are continuously going to look after only me and not take an interest in us then we are doomed as is the rest of the world to finding out the hard way what the real, authentic truth of life is. 	2026-01-09 12:03:35	Not fully	All of the above – we should not pay for government blunders	I do not fully support the consultation paper as published. South Africans are already paying high tariffs while still facing reliability issues and the knock-on costs of outages. Asking consumers to fund additional amounts without strict conditions creates a serious trust problem, given repeated public concerns about governance, irregular expenditure, and poor accountability across the electricity value chain. If any additional recovery is approved, it should be subject to: 1. Full transparency: a clear, itemised, independently audited breakdown of the amounts, time periods, root causes, and responsible decisions. 2. Ring-fencing and oversight: funds must be ring-fenced for specific, published purposes, with regular public reporting and independent audit outcomes. 3. Performance conditions: approval must be linked to measurable improvements (reliability, maintenance execution, loss reduction, billing accuracy, and cost containment). 4. Fairness and affordability: protect households and small businesses, and prioritise fixing losses, non-payment, and inefficiencies before placing more burden on paying customers. 5. Consequence management: clear accountability for wasteful/irregular expenditure and failure to deliver. In short, consumers should not be asked to carry additional costs unless transparency, accountability, and enforceable improvements are guaranteed.	Regardt	Gauteng		employed individual

	2026-01-11 06:09:09	Not fully	All of the above – we should not pay for government blunders	Eskom used to be one of the top performing electricity companies in the world but has become bloated in terms of staff numbers and financial remuneration which are not performance related. In addition the ANC has not invested at the correct level over the last 30 years resulting in the need for this rapid catch up. Lastly the desire to have 27 million people on welfare, including free electricity vs 8 million tax payers is something that the ANC should be embarrassed about not praising. Time to put all managers , executives and board members onto a performance focused remuneration scheme and make the NERSA process transparent. The government should carry the R76bn cost as NERSA made this mistake and them and Eskom then tried to hide it.	Roy	Gauteng		retired

	2026-01-10 20:35:25	Not fully	All of the above – we should not pay for government blunders	This is a catch 22 subject and circumstance. It has two sides to the coin. On one hand Eskom needs this cash injection in order to keep power generation running, this means updating and maintenance on old plants, and building new ones. This offcourse will cost the tax payer and average because where else will they get. On the other hand if we do not allow this through and agree to the settlement, then eskom power generation and ability to provide stable power goes away as well again, looking at stage 6 and beyond loadshedding as the norm. I do not agree in rewarding incompetence, but I do acknowledge infrastructure needs and demands. This time force more regulations and transparency to make sure money is spent as it should be and where, not lost to corruption and useless spending.	Albert	Gauteng		unemployed individual
	2026-01-10 20:20:06	Not fully	All of the above – we should not pay for government blunders	We as consumers should not be liable for dysfunctional Eskom which has been stolen bare by dysfunctional thieves and cadres.	Cyril	KwaZulu -Natal		retired

	2026-01-10 15:20:49	Not fully	All of the above – we should not pay for government blunders	I have a few concerns with the total approach, and want to discuss them as following: 1) Depreciation of Eskom assets. As I understand, there is a cost to be built into the electricity tariff to cover the replacement of depreciating assets. This is understandable in a business context, where depreciation has tax implications. However, in the case of Eskom that is supposed to be a cost-based service provider, and not a company with a profit incentive, this is irrelevant. What should be done is to have a long term, viable plan for new assets to continue delivering electricity, and the cost in the tariff should reflect this cost. How much capital has been spent in the past is irrelevant, especially if a move away from coal-based generation is considered. 2) Responsible spending of funds. In the paper, the statement is made "The Multi-Year Price Determination (MYPD) is a process of determining allowable revenues for Eskom. This approach is a cost-of-service, rate of return-based method with incentives for cost savings, efficient and prudent procurement by the licensee (Eskom)." Unless Eskom starts to honour this approach, there should not be an increase in tariffs. Why do we need to pay for inefficient spending practices (including BEE spent). Eskom should first get its house in order to reduce wasteful spending before being allowed to increase tariffs. 3) Projects already in progress. This links to the point above – Eskom needs to get its house in order to reduce wasteful expenditure on projects, and deliver on time and in budget before they should be rewarded with increased tariffs. Why so we need to pay for Eskom inefficiency in project execution. 4) Apply money already in the process. While this is not mentioned in the paper, the massive municipal debt need to be addressed before asking for more money. Government needs to intervene, and use methods available to them to force municipalities to pay. As an example, why does Government not pay Eskom on behalf of municipalities from central tax funding, thereby making it impossible for municipalities not to pay their debts? 5) Where should Eskom get the money, if not from tariffs? The only other source of income would be tax money, also paid for by consumers. It is therefore imperative that Eskom should no longer be allowed to blunder along. If its management is not up to the task, it should be replaced, and not with "golden handshakes", but with replacement in shame. 6) Can the public afford it? I think this question has already been answered. The current cost of electricity is already above the means of a significant portion of the public, and that portion is increasing. Further increases may well lead to a point where private generation becomes economically viable, often at high cost to the environment. Neither the public, nor the general economy can afford electricity pricing that stifles economic growth. As a government institution, Eskom needs to start fulfilling its duty to the public, the economy and the Government (a.k.a. the taxpayer).	Wynand	Free State		retired

	2026-01-11 15:21:39	Not fully	All of the above – we should not pay for government blunders	Dear Sir/Madam, I would be willing to contribute to the extra cost for the sole reason of repairing the current damages, if the government (regardless of which nationality is the ruling party) of this country willingly accepts the Lord Jesus Christ as their Lord - firstly, on the individual, personal level. We (individually) are corrupt on our own. Having power merely amplifies the scope of that corruption. Christ (as described in the Holy Bible) is not corrupt, nor can be corrupted. He requires everyone who follows Him to love God and love their neighbour. What is wrong with this? If your/the government's current intent/desires do not mirror His, we are lost. Consider Matthew Parris, a former British MP and a lifelong atheist, who wrote the following piece for The Times, after returning to Malawi (where he spent part of his childhood) to observe a water charity project. Article Title: "As an atheist, I truly believe Africa needs God" Published: 2008 Excerpt: "Now a confirmed atheist, I've become convinced of the enormous contribution that Christian evangelism makes in Africa: sharply distinct from work of secular NGOs, government projects and international aid efforts. These alone will not do. Education and training alone will not do. In Africa Christianity post-reformation is a change of mind. It has to be. It has to be a change of heart. I used to avoid this admission, but I've become convinced that the church is the only institution that can help the African person walk tall and look the world in the eye. It is a change of heart that is needed. It is a change of mind that is needed. And I am convinced that the Christian message provides it." "Those who want Africa to walk tall amid 21st-century global competition must not kid themselves that providing the material means or even the know-how that accompanies what we call development will make the change. A whole belief system must first be supplanted. And I'm afraid it has to be supplanted by another. Removing Christian evangelism from the African equation may leave the continent at the mercy of a malign fusion of Nike, the witch doctor, the mobile phone and the machete." Sincerely, K. Pillay KZN	K.	KwaZulu -Natal		employed individual

	2026-01-12 18:19:46	Not fully	All of the above – we should not pay for government blunders	It seems like the responsibility for this is being placed solely on the clients and there has not been sufficient responsibility taken by the organisation. As clients receiving power we have paid for the services given, we have not shirked our side of the arrangement. We do not expect our tenants to reimburse us for our mistakes or lack of planning, those are learning curves for us to have. This is having integrity in business, open honest communication is key at all times, these create trust and a willingness to find mutual in-win solutions. I do not feel that this is the case with this matter or many others within our government.	Katrina	Gauteng		business owner
	2026-01-12 17:58:54	Not fully	All of the above – we should not pay for government blunders	We can't survive with the high costs of electricity	Masilo	Gauteng		self-employed
	2026-01-12 17:44:21	Not fully	All of the above – we should not pay for government blunders	Eskom is killing the working class and does not consider all other factors regarding living expenses and the fact that we as working class citizens support this country including the non working citizens and the governments inability to manage anything correctly we are gatvol paying for their mistakes.	Michelle	Gauteng		employed individual
	2026-01-12 16:38:43	Not fully	All of the above – we should not pay for government blunders	While I do believe that we, as a nation, should invest in our future by maintaining our infrastructure well & building new plants in good time, I do not believe that the public should shoulder the whole bill - and certainly not in a short space of time. The government & Eskom need to ensure that the very best managers are employed to manage this process in a fiscally sound and transparent manner so that we can eventually be proud to pay our contribution to a solid, functional electricity network.	Simon	Western Cape		self-employed
	2026-01-13 12:01:19	Not fully	All of the above – we should not pay for government blunders	Eskom new they need to construct new power station for more that 20 years ago& they did not, they allowed corruption & the money that consumers paid for their electricity was stolen by Eskom top brass CEO's, year in year out? We have sunshine the whole country for good 10 months yearly they could have build a solar plant to ease old structures in eskom's piwer station, while building new. It's time we have private companies computing with Eskom , so consumers can have a choice of who supply electricity for their home (just like cell phone companies) we choose what works best & best value for our money. Load shedding/reduction is just doing the same disservice to everyone, there's no difference & what puzzle me worse is that we have a pre paid meter , how come we are subjected to this load shedding/reduction as we owe nothing to eskom our electricity it's already paid for , why switch it off like everyone who doesn't pay bor pay instalments??? Pre paid meters should not , should not be part of load shedding/reduction we suppose to have electricity 24/7 365 days yet in South Africa it's not!!! Our appliances are getting damaged no one re embers us, our food get destroyed in the process of load shedding & still no one pays us anything , insurance company are not willing to pay damages caused by Eskom & Eskom does not to compensate its loyay customers . So consumers are always being told to pay for money stolen, damage infrastructure's, new improvements, what does our tax money used for???? The ones needing compensation is us consumers not paying fir mistakes made by Eskom/NESRA!!! If they are incompetent they shouldn't be working at Eskom in the first place. State capture commission named names that brought Eskom to its knees , why not ask those who looted the coffers to pay this R76 billion ??	Ntombizodwa	Gauteng		retired
	2026-01-13 11:29:07	Not fully	All of the above – we should not pay for government blunders	A few months ago Eskom announced an operating profit of around R24bn. This was generated in the context of a change in management more than a change in infrastructure. The purpose of depreciation is to account for the decreasing economic value of an asset as it approaches the end of its life cycle. If Eskom is accounting for the value of the depreciation but not for the replacement of the asset, it is treating the business as a private entity. However, Eskom is a SOE not a private business. The purpose of Eskom is to serve the country effectively and efficiently. If Eskom is putting profits above service delivery, then it is in breach of its mandate. Eskom needs to foot the bill for the shortfall of its own limited or misguided accounting practices. Maybe the Eskom executive should be held accountable for not accounting for replacement value in their depreciation calculations, and reporting profits while asking the public to pay even more to replace infrastructure they are using to make these profits.	C	Western Cape		employed individual
	2026-01-13 10:25:17	Not fully	All of the above – we should not pay for government blunders	The ANC government needs to stop stealing the taxpayer's money and start spending the income tax collected on this sort of things. The taxpayer in this country is stretched to the limit.	Tom	Gauteng		
	2026-01-13 00:49:25	Not fully	All of the above – we should not pay for government blunders	Those CEO's that earns fat salaries whom made the blunder must start paying. Accountability should start in all State Owned Enterprises the public must keep on paying and be quite for their mistakes. They get rich by the day and public gets poorer. Welkom still goes without water on a daily basis empty promises are made daily and a lot of excuses but the public must pay for service delivery which is non existent plus they have to buy water to stay alive no living can go without water. The liquor taps must also start to close as well. NO WATER NO LIQUOR	Jurie	Free State		employed individual
	2026-01-14 11:07:18	Not fully	All of the above – we should not pay for government blunders	I am a pensioner and this extra cost is going to kill my income. It is time for Nersa as well as ESCOM to appoint personnel to execute their duty and not to come back to the user for their mistakes. If I make a mistake I have to take my own responsibility for the result of that mistake. I can't blame somebody else for it and expect the other person for my blunder. It seems to me that even the Minister of energy don't even know what is going on. Summarized: I am not prepare to pay for other government plunders.	Theo	Gauteng		retired

	2026-01-18 10:27:07	Not fully	All of the above – we should not pay for government blunders	My concern is directed at the responsible individuals for this mess. When will they be held personally responsible and sanctioned? Our country is collapsing under these negligent individuals. Their credentials are truly questionable. Increasing tarrifs is already suffocating the poor. More electricity is stolen by illegal immigrants whom our government is ignoring to curb. These higher tarrifs are directed at sponsoring illegal immigrants at the expense of South Africans. Expell the guilty officials and hire appropriately qualified South Africans who will do the job with patriotic spirits. This mistake is tantamount to terrorism and treason against South Africa and he people. However the increase is imminent but it may be minimal to cushion a hard blow. That debt caused negligently will not disappear by resistance. Disciplinary processes must be considered. Time to save SOUTH AFRICA is NOW.	Mfanelo	Free State		unemployed individual

	2026-01-20 13:36:27	Not fully	All of the above – we should not pay for government blunders	I am writing to formally express my strong objection to the recent electricity tariff increase implemented by Eskom. It is deeply concerning that paying consumers are once again being asked to carry the burden of government mismanagement, poor oversight, and systemic failures. Law-abiding customers should not be expected to pay higher tariffs to compensate for outstanding electricity bills, non-payment, or inefficiencies within the system. Many South Africans are already under significant financial pressure. Increasing electricity costs places an unfair strain on households and businesses that are doing their best to pay their accounts responsibly. It is unreasonable to expect compliant customers to subsidize those who do not pay, or to absorb the consequences of long-standing governance failures. I do not support this tariff increase and urge Eskom and the relevant authorities to address the root causes of financial shortfalls rather than passing these costs on to the public. This approach is unsustainable and erodes trust in the system.	Gail	Gauteng		employed individual

	2026-01-21 13:55:17	Not fully	All of the above – we should not pay for government blunders	Lack of maintenance and appropriate use of government funds should not fall to consumers to address through tariff hikes. Eskom is a government institution and has a primary monopoly on electricity production in the country. The government and Eskom executives should be fitting the bill for mistakes made by the government-run institution, not have the error-driven shortfall covered by increasing access costs to the consumers.	Kenda	Western Cape		employed individual
	2026-01-21 12:48:32	Not fully	All of the above – we should not pay for government blunders	The majority of SA citizens hardly have enough money for basic living costs, so why should innocent citizens continously pay for Eskom's lack of honesty in reporting or the administration of the money they receive to offer their services to SA citizens. How can the SA Government allow Nersa and Eskom to continuously drain the poorest of the poor from much needed money to put food on the table?	Danilo	Gauteng		unemployed individual
	2026-01-21 12:16:58	Not fully	All of the above – we should not pay for government blunders	I am writing as a household electricity consumer to submit comments on the above-mentioned consultation paper issued by NERSA. I appreciate the opportunity to participate in this consultation process, particularly given the significant impact that electricity tariffs have on households and cost-of-living pressures in South Africa. I acknowledge that this redetermination follows a High Court judgment requiring NERSA to correct errors related to the valuation of Eskom's Generation Regulated Asset Base and depreciation, and that NERSA is legally obliged to comply with that judgment. However, I respectfully submit that the implementation of these corrections must still be balanced against NERSA's statutory mandate to ensure that electricity prices remain just, reasonable, and affordable. 1. Affordability of Electricity for Households Electricity tariffs have increased substantially over the past decade, placing severe strain on household budgets. Many households are already forced to reduce consumption or make difficult trade-offs between electricity and other basic needs. While the corrected valuation of Eskom's generation assets may be technically justified, a full and immediate pass-through of higher asset values into tariffs would further worsen affordability. I therefore urge NERSA to consider limiting, capping, or phasing in the tariff impact of the revised RAB, rather than transferring the full cost burden to household consumers in the short term. 2. Paying for Aging and Unreliable Power Stations As a consumer, I am concerned that households may be required to pay higher tariffs for generation assets that are old, nearing the end of their useful life, and frequently unavailable due to breakdowns. Many of these power stations contribute to ongoing load shedding and declining reliability of supply. It does not appear fair or reasonable for households to pay higher prices for assets that no longer deliver reliable service. I submit that NERSA should carefully assess whether aging or poorly performing power stations should be included at full value in the RAB, or whether depreciation and returns should better reflect actual performance and availability. 3. Work Under Construction and Working Capital Costs The proposal to allow recovery of costs related to Work Under Construction and increased working capital raises serious concerns from a household perspective. These costs effectively require consumers to fund incomplete projects and Eskom's day-to-day cash flow through higher tariffs, even though households receive no immediate benefit from assets that are still under construction. I respectfully submit that construction risk, cost overruns, and operational inefficiencies should not be shifted entirely onto consumers. Allowing such costs to be recovered through tariffs weakens incentives for cost control and places an unfair financial burden on households. 4. Fairness, Accountability, and Public Interest Household consumers have repeatedly absorbed the financial consequences of past inefficiencies, maintenance failures, and governance challenges within Eskom. Any increase in allowable revenue arising from this redetermination should therefore be approached with caution and accompanied by strong conditions to protect consumers. NERSA is urged to exercise its regulatory discretion to ensure that: Households are not forced to pay for inefficiencies or under-performing assets Tariff increases are moderated and predictable Electricity pricing reflects both affordability and value for money	Wynand	Eastern Cape		self-employed

	2026-01-08 15:24:17	Not fully	The cost of Eskom's assets vs. tariff affordability	The error was NERSAs, not ESKOM's, but the money they claim is going to be hard to get from an ever shrinking base of people prepared to pay. It is much more important that ESKOM saves the money it needs by accountability, good management and belt tightening.	Charl	Western Cape		retired
	2026-01-08 13:52:24	Not fully	The cost of Eskom's assets vs. tariff affordability	Eskom is SA's largest energy supplier - by far. It is funded by sales of energy that its power stations generate. The cost of delivering this energy has been calculated incorrectly, and corrections must now be applied. As long as the incremental cost is spread evenly across all consumers, the billing of the catch-up seems a reasonable means of addressing the problem. If a non-tariff measure is used to balance the books, SA taxpayers will foot the bill anyway. There's no secret Santa to bail us out - so we should just bite the bullet and pay. But no exemptions, no special pleading.	Michael	Western Cape		retired

	2026-01-10 09:32:48	Not fully	The cost of Eskom's assets vs. tariff affordability	Eskom's assets have cost far more than they should have due to all the corruption. This then increases the depreciation and therefore the tarrifs charged to customers. By allowing this increase in tarrifs we are not holding the Eskom executives accountable for their actions. However Eskom still needs to function as we don't have viable alternatives, unless the various cities can start making their own electricity again and Eskom only services big industry. Thank you government for decreasing the country's resources for your own personal gains and thereby crushing our ability to grow and thrive. We were on the path to becoming a first world country, but instead of bringing everyone into the first world scenario you pushed us all back into third world status	Jacqui	Limpopo		employed individual

	2026-01-10 03:57:57	Not fully	The cost of Eskom's assets vs. tariff affordability	I do not fully support the consultation paper as published. While I recognise the need to correct past regulatory determinations and to ensure Eskom's financial sustainability, the current proposal places disproportionate financial risk on electricity consumers, particularly in relation to the recalculated value of Eskom's assets. Affordability remains my primary concern. Passing the full cost of historical asset valuation errors directly through tariffs risks making electricity increasingly unaffordable for households and businesses, especially in the current economic climate. Electricity price increases that outpace income growth undermine both social welfare and long-term revenue sustainability. In addition, consumers are being asked to fund higher tariffs despite persistent reliability challenges linked to aging infrastructure and ongoing load shedding. Increased prices should be aligned with demonstrable improvements in service quality and supply reliability. I respectfully suggest that NERSA consider the following alternatives or amendments: 1. Phased or partial recovery of costs linked to historical valuation errors, rather than full and immediate pass-through to consumers. 2. Stronger disallowance of inefficient and imprudent costs, including those arising from construction delays and operational shortcomings. 3. Conditional cost recovery, where portions of allowed returns are linked to measurable improvements in reliability, maintenance, and operational performance. 4. Enhanced affordability safeguards, particularly for vulnerable households and small businesses, to prevent further escalation of non-payment and energy poverty. I urge NERSA to balance legal cost recovery principles with affordability, efficiency, and value for money, and to ensure that consumers are not required to bear the full burden of past regulatory and operational failures. 	2026-01-19 10:36:42	Not fully	The cost of Eskom's assets vs. tariff affordability	Why should the public pay for mistakes on audited Financials. The previous Executives should pay back their ridiculous bonuses and the short fall of R74mil will soon be cleared.	Petrus	Western Cape		self-employed
	2026-01-20 19:12:35	Not fully	The cost of Eskom's assets vs. tariff affordability	I can understand that the cost for infrastructure maintenance comes from taxes and tarrifs paid by the public and that would be fair it wasn't for fact that we can't trust Eskom. They have a very poor track record of delivering on promise made, they have misused funds that was suppose to have gotten us through our current energy crisis. In this case, once again their incompetence and greed, I believe, will once again be the norm and the funding, wherever it comes from will bankrupt the consumer, and yet more funds will be demanded, and more of the public's funding will go down this preverbial black whole of so called "upgrades" or "replacements". I don't agree that the public should once again be milked and milked again and again. Yes, we can pay part of it, but for heaven sake, protect the publics income and their cost of living at the same time.	André	Gauteng		employed individual
	2026-01-20 17:07:52	Not fully	The cost of Eskom's assets vs. tariff affordability	Look at cost saving in it's bloated ministerial makeup and trim unnecessary posts, cut excessive salaries and look at funding this huge mistake partly from internally Government spending, including municipalities are out of control. Bear in mind that due to this mistake, past tariff increases were lower leading to less income for Eskom. The public (electricity users) therefore paid less for electricity than they should have paid and thus had the benefit of cheaper electricity. It is therefore understandable to recover some of these costs through tariffs. The very important question is what happened to these people at NERSA who did this miscalculations? Surely disciplinary action should be taken against the culprits.	David	Western Cape		retired

	2026-01-10 16:08:07	Not fully	Burdening consumers with construction and operational costs	I can accept that as South Africans we need to partially pay toward the electricity that we use and I understand that the demand for electricity is greater than it was before, however, I do not understand why the public is being made to have their electricity bills ramped up when there are municipalities that owe billions to Eskom. Surely, the first place to start getting the funds necessary for Eskom to update or fix their systems and buildings should start with getting those outstanding monies. If as an individual can have my assets collected by a sheriff for failing to pay my bills, then something can be done about these municipalities who are connected to government. Maybe they need to feel the pinch in their own wallets before asking the lay person to pay higher electricity bills. Paying more because of the ineptitude of the people who are responsible for this mess, is like asking me to pay for school clothes of the children of parents who used all their Christmas money to party instead of looking at what their children need first. As people who are responsible for properly running a municipality, they should start with running their own offices better. Once the municipalities have paid what they owe, then a new calculation can be made on what would be a sustainable rate for citizens to pay.	Darrel	Gauteng

	2026-01-09 05:57:37	Not fully	Other	SA is too reliant on Eskom. It has a monopoly that needs to be dismantled so that competition can drive down electricty prices over time. As long as Eskom remains a corrupted monopoly, it will siphon off of SA citizens. It does not matter which way you slice it, the price will always ultimately land on the consumer, whether it is directly through increased tarrifs, or indirectly through additional taxes, or via loadshedding. The problem is the monopoly.	Mike	Gauteng		employed individual
	2026-01-08 19:06:50	Not fully	Other	I agree that consumers should not pay for blunders, but understand that it will be taxpayers that will have to foot the bill if not the consumers. Are there other payment models to cover this loss? One option might be the GEPF and PIC to foot the bill. If no other viable payment models are viable, I would prefer consumers paying for this and NOT the tax payers, as the tax payers are a small subset of the electricity consumers.	Riana	Mpumalanga		retired
	2026-01-09 11:02:45	Not fully	Other	Affordability: We should no be paying for NERSA's calculation errors. Reliability: We shou;d not be paying full price for aging, unreliable infrastructure. Efficiency: We should partially fund Eskom's unforeseen construction delays and associated cash flow issues, because if not then we will be forced intp load shedding which affects the economic growth negatively.	Stefan	Western Cape		self-employed
	2026-01-09 18:22:36	Not fully	Other	As much as a deplore Escom and NERSA's attempt to exploit the public, who else is going to pay and if they don't recover the funds what little of what is left of the infrastructure will disappear and the country will collapse What is needed is better governance and oversight	Alan	Gauteng		
	2026-01-10 06:53:47	Not fully	Other	Why is the fact that many municipalities and Government owe Eskom Billions. The proposed increase is Governments way of getting us to pay off their Eskom Debt .... an additional taxation. Hidden before the next election!!	John	KwaZulu-Natal		retired

	2026-01-10 11:16:40	Not fully	Other	Someone has to pay for updates or maintenance to infrastructure, construction and operational costs much as one would do if part of a body corporate. My issue is having us as the body corporate pay for someone's blunder which implies that there is no accountability and whoever or whichever department commits such costly blunders is able to do so again and again without any repercussions.	Thandeka	Gauteng		
	2026-01-11 11:14:55	Not fully	Other	Electricity cost is becoming a major factor in household and commercial expenses. Careful balancing is needed to protect the economy. The principal that a fair price should be paid for electricity is acknowledged, but incompetence, bad business decisions, cost overruns and fraud cannot be tolerated without any implication to Eskom. Just shifting the cost to the consumer, without accountability, is a recipe for ongoing bad management.	Gerhardt	Gauteng		retired
	2026-01-11 07:51:38	Not fully	Other	I have first hand knowledge and evidence of billions of rands of organized prepaid token theft. Also known as ghost vending. DeLoitte has evidence of at least 153 million 600 kwh tokens created in just 7 months. Value at the time, R246 billion. Eskom management knows this. I have provide them with evidence of prepaid meters having at least 799060 stolen toke s for a single prepaid meter. People will be paying for losses dues to theft that could technically, easily be stopped.	Sampie	North West		
	2026-01-11 07:39:10	Not fully	Other	we all make mistakes. we should also show mercy. But, the corruption, mistakes + lies should stop, together with lawlessness. 	2026-01-11 14:29:09	Not fully	Other	Provided that work is continuiting to stop Cartels and criminal patronages from ravaging Eskom, we all need to pull together, and see Eskom restared to it`s former stature, as withother SOE`s	Charles	Western Cape		employed individual
	2026-01-18 11:38:31	Not fully	Other	For long term sustainability a company must charge for depreciation on working assets. However, where assets have already been fully depreciated and already claimed for, no further depreciated claims should be allowed. Only direct maintenance and operational costs for those fully depreciated assets should be allowed. When a new power station is built or new equipment is installed, then the new depreciation cycle starts again only for such new plant and equipment. The fact that NERSA made a mistake is sad but irrelevant and must be corrected as per above, or long term we'll be back onto load shedding.	Albert	Western Cape		self-employed
	2026-01-18 21:59:30	Not fully	Other	If Eskom were private and independent, there would be no ways that we would be funding its errors and inefficiencies. Unless it's run by honest, competent people, this government energy model is over. Abolish it and appoint multiple private energy providers to compete for business at best prices and best technology. Eskom need to find a new finance structure to reduce overheads, other than just loading the consumer for its inefficiencies, as they are become an unviable energy supplier. Eskom may think they are winning by upping prices over and over but they are pricing themselves or the market. the system WILL collapse even if they save the infrastructure, because alternatives, mainly solar, are cheaper. Solar will keep getting cheaper while Eskom will keep getting more expensive. IT'S OVER, sooner or later...! Gov should encourage and support everyone to install solar and assist the grid. support local production of PV panels. Cut taxes and duties on PV and the population become part of the solution on mass, lightening Eskom's load, and feeding into the grid. Residences require relatively low consumption and tech products become increasing more energy efficient. Residences could for the most part go off grid. Industry will be the main consumer and that will be Eskom's main customer. We all need industry so if we all feed in excess solar to the grid, we all support it. Eskom should be carved up into manageable sections for independents to maintain, handle shortfalls and surplus re battery storage and production where necessary.	Ben	Gauteng		
	2026-01-19 09:06:34	Not fully	Other	Cut the profit margins down to zero/very very little and invest the profits back into ESKOM. If you're getting a salary after such a big mess up, then that's enough. No need for bonuses or profits, or share dividends, etc. Cut salaries if that's necessary. Employ people with integrity and experience above anything else.	Lynette	Western Cape		employed individual

				If Eskom is not funded through higher tariffs paid by the public, the main alternatives fall into a few broad categories. Each shifts the cost to a different group or mechanism rather than removing it entirely. 1. Direct government funding The state can fund Eskom through the national budget, using tax revenue or additional borrowing. This spreads the cost across taxpayers rather than electricity users alone. The downside is increased pressure on public finances and higher sovereign debt. 2. Debt restructuring or write-offs Government can assume a portion of Eskom's debt or negotiate write-downs with lenders. This reduces Eskom's immediate funding needs but shifts the burden to the state balance sheet and, indirectly, taxpayers. 3. Asset sales or partial privatisation Eskom can sell non-core assets or bring in private investors for specific business units, such as generation or transmission. This raises capital without tariff hikes but reduces state ownership and future revenue streams. 4. Increased efficiency and cost recovery Funding gaps can be reduced through operational reforms: cutting losses, improving maintenance planning, reducing procurement costs, and addressing non-payment and electricity theft. This does not generate cash quickly enough on its own but limits future funding needs. 5. Ring-fenced levies or targeted charges Instead of general tariff increases, specific levies can be applied to certain user groups, such as large industrial users, or funded through carbon taxes or fuel levies. This concentrates the burden but raises competitiveness concerns. 6. Market reform and private generation Accelerating independent power producer participation reduces Eskom's capital requirements over time. Eskom becomes less responsible for new build funding, though this does not resolve short-term financial gaps. 7. International finance and development funding Loans or grants from development finance institutions can be used, often tied to grid upgrades or energy transition goals. These funds still require repayment but are usually cheaper and longer-term.				
	2026-01-20 07:15:47	Not fully	Paying for aging and unreliable infrastructure	In practice, Eskom funding has tended to rely on a combination of these approaches. Avoiding public tariff increases usually means higher taxes, higher government debt, or reduced state ownership rather than a cost-free alternative.	Ronel	Western Cape		
	2026-01-20 10:32:53	Not fully	Paying for aging and unreliable infrastructure	A possible financial recourse is to write off the interest on our debt for 3 years that will cover 72 billion..and pay as we can. The other alternative is nuclear energy with russia? My intial response was blaming the corptocracy..however the problem seems deeper noting that we have an unemployment rate of 45%..we need an alternative sustainable solution.	Feizal	Gauteng		retired
▼ **No concern**	**1**							
	2026-01-19 06:16:43	Not fully	No concern	What has happened is no accident when you consider the manpower and skills resources employed by Eskom, and the politicians. Clearly, there was a reason they did not want to tell the public the full truth, and hoped to hide it, and later recover their costs via the taxpayer outside the public view. My opinion is that no matter what was fiddled :- ELECTRICITY COSTS MUST BE CONFINED WITHIN THE ELECTRICITY SECTOR AND NOT BE SURREPTITIOUSLY CROSS SUBSIDIZED BY THE GENERAL TAX PAYERS. OTHERWISE THE PROBLEMS CAN BE HIDDEN AND NOT RESOLVED. This method of passing costs to taxpayers, if set as a precedent with Eskom, will be used again and again by other embarrassments such as South African Airways, Water Boards, Roads, etc. The biggest consumers of electricity are commerce and industry while the biggest taxpayers are private South African citizens. The money from taxpayers is there to be used for the benefit of both rich and poor citizens, and by cross subsidizing Eskom you are taking benefits away from our poorest citizens to subsidize the income of rich foreigners. The commercial and industrial companies are owned via the stock exchanges of the world where foreigners predominate. Therefore, electricity costs, however they arise, MUST REMAIN AN ELECTRICITY COSTS to be paid by consumers, and NOT BE PASSED ONTO CITIZENS BY TAKING MONEY FROM OUR TAXES. 	2026-01-08 13:45:01	Yes I do	All of the above – we should not pay for government blunders	When is enough, enough, Electricity has increased more than a 1000 percent in the last 10 years, yet this is not enough for a failing state owned entity, not cause of the company, but cause of lack of leadership, mobs currently extorting this entity, where is the Gov, why has nothing been done to bring cost down? We have Coal that is know been shipped to China, why are we not using our own resources to curb rising cost. We have access to Water, Sun, Wind, but yet wasting money on entities that fulls the pockets of the elite at the expense of the majority. Tariffs should be coming down due to the Rand strengthening and USD weakening? South Africa needs a true leader to stand up and no longer puppets found in the pool of parties on offer in SA, all are puppets paid by the same owner? Maybe we should curb the exposure at lesser rates to other countries and concentrate on our country first, for those that actually pay to keep the lights on, and not given for free to brothers and sister neighboring us.	aaron	Gauteng		self-employed
	2026-01-08 13:24:27	Yes I do	All of the above – we should not pay for government blunders	The public are sick and tired of having to constantly bail out government and SOE's who waste tax money due to their blatant ineptitude and mismanagement of expenditure from conceptual planning through to the always late and well over budgeted infrastructure projects. Pathetically poor future planning for maintenance and replacement costs contributes to the escalation of costs to the public in an economy that has no sustained growth and a constant disinvestment due to failing infrastructure due to government mismanagement and corruption.	Andre	Western Cape		retired
	2026-01-08 13:12:52	Yes I do	All of the above – we should not pay for government blunders	This is completely unacceptable. The money must be recouped from those who stole and mismanaged Eskom for years without accountability	Wendy	Western Cape		employed individual
	2026-01-08 13:01:18	Yes I do	All of the above – we should not pay for government blunders	The cost of electricity just continues to rise and we do not see anything in return. The media celebrates the "no loadshedding for x amount of days". This is ridiculous. Eskom's only task is to supply electricity. Badly managed and fraud is what this entity want's the public to fund. Absolutely not.	Leigh-Ann	Gauteng		employed individual
	2026-01-08 13:00:56	Yes I do	All of the above – we should not pay for government blunders	This is about corruption, when are some heads going to roll and pay the money back.	Alan	Gauteng		retired

	2026-01-08 12:36:52	Yes I do	All of the above – we should not pay for government blunders	If the mistake were made by individual Eskom officials they should be held liable or the State should revise means internally and foot the bill rather than increasing tariffs and indirectly forcing us to foot the bill	Zwelinzima	Eastern Cape		unemployed individual
	2026-01-08 12:33:29	Yes I do	All of the above – we should not pay for government blunders	The ANC apartheids movement appointed incompetent, uneducated and inexperienced people within the public sector which destroyed our economy, our country and our people because of their foolish religious policies. We are not descendants of Ismael, Hagar and mount Sinia because their brains has been cursed as explained in Galathias chapter 3, the Word of God. Daniel chapter 12, the Word of God, explains the Truth, power is about knowledge and wisdom not religion. South Africa has been destroyed since 1994 because of this curse upon our country, Deuteronomy chapter 28, caused by those named in Mathew chapter 16 and Revelation chapter 13, the Word of God because they do not understand John chapter 3! Sad to notice the deterioration of our infrastructure, the collapsing of our economy and the poverty and slavery in our country. Unemployed, crime, lawlessness, corruption, drug syndicate's, construction mafia's, poverty and the collapsing of health care facilities, education, the SOE's and SOC's under this evil government who came into out country as terrorists backed by the liberals named in Mathew chapter 16, themselves named in Revelation chapter 13, serving their father, satan or religion, the father of all lies. Their purpose is in accordance with the book they worship written by Iran since 1935 and implemented in 1979, false prophets, fals god created by humans to destabilise our country and steal what do not belong to them. If they can provide us the formula of our finger prints we will start talking to them, they removed the Word of God deliberately from the statue of Parliament enabling them to ignore God's commandments and instructions. We are worshipping our Father, the Creator God of our finger prints, created to His image as creators and not destroyers. The difference between our track records till 1994 and theirs since 1994, the damage caused by this curse as written in Revelation chapter 22. Yeshua, Jesus Christ is the Word of God as declared in Revelation chapter 19, the Horse of victory and not the three other horses defined in Revelation chapter 6, the Word of God! Knowledge is our power and wisdom, not religion! No more taxing of our people because of the mistakes of incompetent employees!	Derek	Northern Cape		business owner
	2026-01-08 12:29:49	Yes I do	All of the above – we should not pay for government blunders	I strongly object to the proposed electricity price increase. As a concerned citizen, I believe it's unfair to burden consumers with: 1. NERSA's calculation errors (R76 billion mistake): Why should we pay for mistakes made by the regulator? 2. Aging infrastructure: Instead of increasing tariffs, Eskom should invest in modernizing its infrastructure to improve reliability. 3. Eskom's inefficiencies: Construction delays and cash flow issues are not our problem. I urge NERSA to reconsider this proposal and prioritize affordable, reliable electricity for all South Africans. Sincerely, Apostle Godson Nefale	Apostle Godson	Gauteng		self-employed

	2026-01-09 07:53:06	Yes I do	All of the above – we should not pay for government blunders	Why must the average individual pay for their blunders. Eskom gets every year more and more money from government as bailouts and they increase the tariffs to such an extent that the average household is struggling to keep on their lights. Yet if they dont get what they want suddenly loadshedding happens and once again we the consumer pays the price. Eskom doesnt pay us if our equipment get faulty due to loadshedding, they dont pay if people food goes off. Consumers shouldn't be paying for their mistakes. If you as a consumer is already paying for electricity at such a high tariff then its ridiculous to ask us more. When is eskom and nersa going to take responsibility. They get salary increases which is ridiculous cos why get an increase if you dont do your job correctly. Why must we the consumer pay the price for everything. This is the reason why the rate of poverty is increasing. Get people that can do their jobs correctly.	Melissa	Western Cape

	2026-01-09 18:54:03	Yes I do	All of the above – we should not pay for government blunders	I hereby submit this public comment in response to NERSA's consultation paper arising from the December 2025 court ruling, which invites public input on proposals that may result in South African energy users being required to pay Eskom an additional R76 billion. I respectfully oppose this proposal for the following reasons: 1. Unfair Burden on Consumers The proposed recovery shifts the financial consequences of Eskom's operational, governance, and planning failures onto consumers. Electricity users—already under severe financial pressure due to high tariffs, inflation, and unreliable supply—should not be compelled to fund historical inefficiencies and mismanagement over which they had no control. 2. Severe Economic Damage Already Incurred by Energy Users South African energy users have already paid a heavy price for Eskom's failures. Persistent load shedding, escalating tariffs, and supply instability have directly contributed to the closure of multiple ferrous and ferroalloy smelters, particularly in energy-intensive sectors such as chrome, manganese, and silicon production. These closures have resulted in: Significant financial losses to businesses and investors Job losses affecting thousands of workers and their families Loss of local economic activity in host communities Reduced export earnings and downstream industrial decline Forcing consumers—many of whom have already suffered these losses—to now fund an additional R76 billion would compound the harm already inflicted on citizens and the broader economy. 3. Contravention of the "User Pays for Value Received" Principle Consumers have endured years of unreliable supply and economic disruption. Requiring payment for costs that did not result in improved service delivery or system performance undermines the core regulatory principle that tariffs must reflect value received. 4. Moral Hazard and Accountability Failure Allowing Eskom to recover past losses through tariffs creates a dangerous precedent. It weakens incentives for prudent financial management, cost control, and consequence management. Regulatory decisions should promote efficiency and accountability—not socialise losses arising from failure. 5. Economic and Social Consequences of Further Tariff Increases An additional R76 billion tariff burden will: Further erode the viability of remaining energy-intensive industries Discourage industrial investment and re-industrialisation Increase the risk of further plant shutdowns and job losses Deepen energy poverty for households already struggling to afford electricity This runs counter to South Africa's economic recovery and industrialisation objectives. 6. Court Ruling Should Not Be Used to Justify Consumer Punishment While the court rejected the prior settlement agreement, this does not mandate cost recovery from consumers. NERSA retains a constitutional and statutory duty to act in the public interest by balancing Eskom's sustainability with affordability, fairness, and economic impact. 7. Alternative Measures Must Be Prioritised NERSA should instead pursue: Firm cost disallowances linked to inefficiencies and governance failures Increased shareholder (state) support where justified Enforced operational and financial reforms at Eskom Performance-based regulation and consequence management Full transparency and independent verification of the claimed R76 billion before any consideration of recovery Conclusion Electricity users have already absorbed substantial financial and economic losses due to Eskom's failures, including the shutdown of ferrous smelters and the destruction of jobs and livelihoods. Requiring the public to now fund an additional R76 billion would be unjust, economically damaging, and contrary to sound regulatory practice. I therefore urge NERSA to reject any proposal that transfers this burden to electricity users and to adopt an approach that prioritises accountability, affordability, and the long-term public interest. Thank you for the opportunity to submit this comment. Yours sincerely	Stanza	Gauteng		employed individual

	2026-01-09 20:37:00	Yes I do	All of the above – we should not pay for government blunders	We cannot afford to pay for the exorbitant increases anymore as it is we are stretched and barely afford anything. It's too much now.	Cynthia	Gauteng		employed individual
	2026-01-09 20:11:08	Yes I do	All of the above – we should not pay for government blunders	I submit a formal objection to NERSA's proposal to recover approximately R76 billion from electricity consumers following admitted errors in Eskom's asset valuation and prior regulatory determinations. It is irrational, procedurally unfair, and inconsistent with sound regulatory practice to shift the financial consequences of regulatory and utility miscalculations onto consumers. These costs did not arise from consumer demand or usage and therefore fail the test of just, reasonable, and cost-reflective pricing as required under the Electricity Regulation Act. Eskom continues to deliver an unreliable service characterised by aging infrastructure, persistent load shedding, and ongoing operational inefficiencies. Requiring consumers to pay increased tariffs for a declining quality of supply is neither equitable nor defensible in law or policy. NERSA must require Eskom to first implement internal corrective measures, including substantial reductions in executive and senior management remuneration, elimination of wasteful and irregular expenditure, and demonstrable improvements in governance and operational efficiency, before any tariff recovery is contemplated. NERSA has a statutory obligation to nact in the public interest and to protect consumers from unjustified price increases. Approval of this proposal would improperly penalise the public for institutional failures and should be rejected in its entirety.	Susan	Gauteng		retired

	2026-01-11 10:41:50	Yes I do	All of the above – we should not pay for government blunders	We as South Africans are not recognized by our leaders. All they care about are themselves and this is very clear, greed, want want want and all to do with material wealth and not considering the poverty filth and illnesses this is causing to humans and animals. Our country is in a state of no turning back in all respects until the leaders decide that their pockets are full and have enough to last them a life time and beyond. The begging and situation is depressing and extremely sad. Our leaders are not human, sometimes i think of them has Satan posing as destructive humans . Some earth angels are trying but can only do so much. Things are out of control. All corruption and destruction starts with our leaders that manipulate people that are desperate to do their dirty filthy work. So much corruption that has lead to deaths of innocent and wonderful people but to date no justice is done. I have no hope and sad for the future generations. People barely have food in their homes and they want to increase basics needs. Sick frustrated and desperate for change. Our leaders have no common sense. Everything is in a pathetic state ? ?. I trust and believe in God until I am no longer on this earth and will continue to pray for everyone. Thank you for giving us this opportunity and a bit of hope. We the citizens are always footing the bill for the mistakes and greed that our leader should I say stupid children make. This must come to an end.	Sandra	Gauteng		employed individual

	2026-01-12 13:59:07	Yes I do	All of the above – we should not pay for government blunders	We all knew that the corruption, theft, incompetence and lack of maintenance would 'catch up' with the SOE's in time. Look at all the other SOE's Government has ruined. Let those responsible be brought to book and make them pay. Cut the bloated staff numbers, cut salaries, remove bonus's and give Eskom over to private investors who know how to run a business. Eskom have created the losses and they must absorb those same losses. Why must South African energy users pay for Eskom's poor management and "mistakes". When as many as can, change to Solar energy - and more and more folk are changing - Eskom's client base will keep reducing, until you have close to no clients. Best Eskom absorb their mistakes and value their clients with a smaller increase than last year	Ray	Western Cape		retired
	2026-01-12 13:21:26	Yes I do	All of the above – we should not pay for government blunders	Eskom has been unreliable leading to many people having to install inverters and constant loadshedding. Theft by senior management staff at Eskom and no repairs or maintenance and infrastructure have lead to the situation we unfortunately find ourselves in. Why must we pay for the bad management, theft and incompetency of Eskom. Not Acceptable!	Liz	Gauteng		employed individual
	2026-01-12 12:09:57	Yes I do	All of the above – we should not pay for government blunders	We are already at the stage where we can no longer afford the cost	Melanie R	Eastern Cape		retired
	2026-01-12 19:22:38	Yes I do	All of the above – we should not pay for government blunders	It is outrageous that the users should have to continue to pay for blunders, mismanagement, corruption over staffing, and the list goes on. When will it stop.	Pat	Western Cape		retired

	2026-01-19 17:09:21	Yes I do	All of the above – we should not pay for government blunders	Public Comment on Eskom Electricity Price Determination I submit this comment as an electricity consumer participating in NERSA's public consultation process. I object to the proposal that consumers should pay higher electricity tariffs to recover costs arising from NERSA's previous calculation errors relating to Eskom's asset values. NERSA has acknowledged that its earlier asset valuation contained errors and that a High Court ruling requires recalculation. However, consumers were not responsible for these errors, had no influence over the calculations, and should not be required to bear the financial consequences of regulatory mistakes. The impact of further tariff increases on low-income households must be given serious consideration. Electricity is an essential service, not a luxury. For many households, particularly those reliant on fixed or low incomes, electricity is already barely affordable. Repeated above-inflation increases have forced households to reduce usage, fall into arrears, or turn to unsafe alternatives such as paraffin and illegal connections. Additional increases to recover regulatory errors will disproportionately harm vulnerable consumers and deepen energy poverty. Passing these costs on to consumers undermines the principle of fairness and accountability in regulation. Electricity users have already experienced significant tariff increases while receiving unreliable supply due to aging infrastructure, frequent breakdowns, and ongoing load shedding. Charging full depreciation and return on assets that do not deliver consistent service is not reasonable or justifiable. Furthermore, allowing regulatory errors and inefficiencies to be recovered through tariffs creates a moral hazard. It removes incentives for accuracy, efficiency, and prudent decision-making by both the regulator and the utility, while transferring all risk to households and businesses already under financial pressure. I respectfully submit that: - Consumers should not be required to pay for historical regulatory errors. - Any adjustment to asset values should not result in retrospective or excessive tariff increases. - Affordability, service reliability, and efficiency must be prioritised in the final determination. NERSA's mandate includes protecting the interests of consumers. I urge the regulator to exercise this responsibility by ensuring that the cost of regulatory mistakes is not unfairly transferred to electricity users. Thank you for the opportunity to participate in this process. Sincerely, Segahlo	Segahlo	Limpopo		employed individual
	2026-01-19 16:50:49	Yes I do	All of the above – we should not pay for government blunders	Another perfect example of incompetent people running these vital institutions and when they eff up, they blame evertything else under the sun and look to consumers to pay for their epic blunders. When is it going to stop. 30 years into a free SA and its gone from bad to disastrous. Enough is enough. :(	Susam	KwaZulu -Natal		unemployed individual

	2026-01-20 09:16:06	Yes I do	All of the above – we should not pay for government blunders	I object to NERSA's proposal to recover an additional R76 billion from electricity users to cover Eskom's shortfall. Eskom's financial challenges are the result of long-standing governance, operational, and procurement failures, for which the public is not responsible. The December 2025 court ruling rejecting the settlement agreement highlights serious flaws in the regulatory process and should not be circumvented through renewed consultation. Electricity users are already under severe financial pressure, and further tariff increases linked to Eskom's mismanagement will worsen affordability and energy poverty. NERSA has not demonstrated that Eskom has exhausted internal cost-cutting measures or enforced accountability before seeking recovery from consumers. Allowing this sets a dangerous precedent by shifting the cost of institutional failure onto the public. I urge NERSA to reject any proposal that forces consumers to pay for Eskom's mistakes and to uphold its mandate to protect the public interest.	Kim	KwaZulu -Natal		self-employed

	2026-01-11 14:47:52	Yes I do	The cost of Eskom's assets vs. tariff affordability	am writing to express my strong opposition to the recent electricity price increase. The cost of living is already high, and many people are struggling to afford basic necessities. Adding another financial burden by increasing electricity prices will only exacerbate the situation. Many households are already finding it difficult to make ends meet, and expecting them to absorb this additional cost is unfair. I urge you to reconsider this decision and explore alternative solutions to manage the electricity sector's financial crisis which we are not a cause of.	Charity	Gauteng		employed individual

▼ Paying for aging and unreliable infrastructure	**24**							
	2026-01-08 14:29:13	Yes I do	Paying for aging and unreliable infrastructure		Don	Gauteng		
	2026-01-09 07:28:31	Yes I do	Paying for aging and unreliable infrastructure	Pouring money into outdated, failing and unreliable infrastructure is pouring money into a leaking bucker - an utter waste of money. The problem lies in a gross failure / neglect to maintain - and repair timeously. Furthermore, when it was evident the structures were aging, they should have been in a financial position to REPLACE - instead of trying to repair: a gross lack of planning;/ foresight here. Funds appear not to have been put aside for this, but the public is now required to foot the bill.	Hilary	Western Cape		retired

▼ No concern	**8**							
	2026-01-08 13:23:18	Yes I do	No concern		Gerald	Western Cape		business owner
	2026-01-09 07:09:50	Yes I do	No concern	Eskom corruption is escalated by contractor. Contractors should be cancelled with immediate effect. I hate the fact that this platform provides English, Afrikaans Zulu and Xhosa speaking language as an option for preferred communication. It is so disappointing that in this so called democracy other languages are considered. Next time if you guys don't have Setswana as an option for communication don't you dare bother to send me anything. Shame on you for your disgusting and unconstitutional discrimination.	Mpolokeng Peter	North West		unemployed individual
	2026-01-09 09:32:36	Yes I do	No concern	We should play our part as users; we pay for everything with private companies and never complain so why are we complaining when we have to pay something tha benefits us all. Government is not a cash cow and it is funded by the people for the people. we are the users of the infrustructure so who must contribute to fixing it?	Yamkela	Eastern Cape		employed individual
	2026-01-09 11:41:58	Yes I do	No concern	One way or another the public is going to pay for the 'mistake '-- either through higher electricity charges or through additional taxation. Additionally, if the 'mistake' had not been made, then the electricity consumer would anyway have paid the amount -- the only difference is that the consumer would have known about it sooner. The only effect of the mistake is that the amount of the increase is being made known in two tranches. The unfortunate reality is that if incompetent people are employed to perform a job then mistakes will occur.	Brian	North West		retired
	2026-01-09 18:58:10	Yes I do	No concern	The opposition to this tariff increase is nonsense. Electricity consumers in the past have underpaid for electricity because of these blunders. Should Escom go back 5. 10 years and work out how much more users should have paid and then charge them for that? That's not really feasible. The only feasible option is to charge future users as is proposed.	Kevin	Western Cape		retired
	2026-01-11 03:58:27	Yes I do	No concern	I think it is fair that the cost of replacing aged infrastructure should be born by users of said infrastructure.	Wessel	Mpumalanga		
	2026-01-10 13:32:58	Yes I do	No concern	This will lead to the poor being poorer and the economy being destroyed. Therefore, I believe in supporting this failure and blunder that it will lead to increased cost of living and make the ANC exposed to overthrow and possibly violent backlash. This is clearly their intention, so let's give them what they want.	Lukas	Gauteng		unemployed individual
	2026-01-19 10:53:34	Yes I do	No concern	NERSA made a (big) mistake. This is not the fault of Eskom, who should have received more funds, but NERSA's mistake. NERSA needs to appoint experts who understand the issues.	M	Western Cape

	2026-01-12 08:29:37	Yes I do	Other	I have many concerns. We have to pay for ageing infrastructure to procure new infrastructure. We have to pay for the errors made by Eskom because we elected the government that placed inefficient people to run Eskom. The burden of construction and operational costs must be borne by consumers because there is no other source. The burden will be borne by consumers one way or the other. The issue of tariffs and assets is neither here nor there. Tariffs must escalate sooner or later. Yes indeed, we should pay for government blunders because we elected the government. Eskom is necessary, but badly run, with much corruption in a country that is poorly run, with a lot of corruption.	Sandile	KwaZulu -Natal		employed individual
	2026-01-13 11:59:45	Yes I do	Other	In a democracy, we need to pay for government blunders. Who else will? The men from Mars? Or maybe China in return for our country? Or Iran in return for our freedom? If we don't like the government, vote for a new one.	Lauwrens	Western Cape		
	2026-01-18 09:16:47	Yes I do	Other	With eskom as a state owned enterprise (SOE) sadly "we" the people own it. "We" the people sadly cannot afford for it to fail as it still generates 90% of the grid electricity needed to power the businesses, industry, home and services that power SA Inc. AT the end of the day the government does not pay for anything. "We" the people pay primariy through taxes. if it was investor shareholders and would not stop the country running then sure let the shareholders pay. SO if we need to keep eskom running...for now no choice ...see 90% above..then the question is who bears the cost as companies need money to run and balance their books. SO the choice is then the owners/shareholders i.e. taxpayers as owners or the customers through increased . Increased to Charging customers will directly effect and, over time, promote the energy supply choices impacting those who are directly affected. Charge the customers, through increase tarrifs, is the answer. QED.	Charles	Western Cape		self-employed
	2026-01-18 15:50:24	Yes I do	Other	It is inevitable that things will age. But what is is not inevitable is competence. The black person does not understand maintenance and never will. Eskom needs white people to go forward. Does this sound racist? It's not the "white supremacists", as described by many balck politicians and clowns, fault that that blacks have remained inferior. It's in their mindset. Apartheid understood this. We cannot pay for something we know is not going to be fixed with the money collected if blacks are in control of the "repairs".
