	2026-01-10 10:33:50	No I do not	All of the above – we should not pay for government blunders	To: The National Energy Regulator of South Africa (NERSA) Subject: Opposition to the Redetermination of Eskom's Generation RAB (MYPD6) I hereby submit my comment in opposition to the proposed redetermination of Eskom's Generation Regulatory Asset Base (RAB) for the 2025/26 to 2027/28 tariff years. My opposition is based on the following points: 1. Affordability: Consumers should not be held responsible for NERSA's admitted calculation errors amounting to R76 billion. Passing these costs onto the public is unjust and exacerbates the cost-of-living crisis. 2. Reliability: Tariffs should reflect the actual quality of service delivered. It is irrational to charge full depreciation and returns for aging, unreliable infrastructure that fails to provide consistent electricity supply. 3. Efficiency: Consumers must not be required to fund Eskom's cash flow shortfalls, construction delays, or project overruns. These are management failures that should be addressed internally, not externalised to the public. 4. Corruption & Mismanagement : Apart from the three pillars above - ie: the affordability, reliability, and efficiency concerns already raised, it must be strongly noted that corruption, theft, and mismanagement have plagued Eskom for more than three decades. Eskom has allowed this culture of inefficiency and abuse to continue unchecked, resulting in massive financial losses and operational failures. These costs should be recovered internally by Eskom itself, through accountability measures and recovery from those responsible, and not unfairly transferred onto honest citizens who have already borne the consequences of load shedding and rising tariffs. In conclusion, I strongly oppose this motion. The public should not bear the financial burden of errors, inefficiency, and mismanagement within Eskom or NERSA. Accountability must rest with the institutions responsible, not with ordinary South Africans. Yours faithfully, Concerned Citizen	Rob	Gauteng

	2026-01-10 10:33:20	No I do not	All of the above – we should not pay for government blunders	It is naïve and short-sighted to expect the shrinking paying public to foot these bills. I understand that Eskom has investments and overheads they need to sustain, however the situation we find ourselves in now relates to poor and negligent management, greed, and corrupt and criminal behaviour throughout the organisation, and I suspect, within the public-sector institutions which support our power supplier. Expecting the public to continue to sponsor this is unacceptable. I understand that investments need to be paid, failing which we run the risk of defaulting on commitments which might impact our global standings negatively. I also understand that operating expenses need to be sustained in order for the organisation to continue to provide services to the public. That being said, taking revenue from your consumers to pay for your inefficient and bloated overheads is a betrayal of civic trust. Provision of electrical services is a national imperative, and a service, and the management of these services should be optimised to keep costs down against efficient outputs, in order to ensure that South African production is competitive. I am 100% certain that there is a massive amount of fat within Eskom which can be cut out with good, ethical leadership, well-designed and enforced policies, and support from a government which is not self-interested. This would create challenges with labour, and with the criminal organisations and individuals who, I have no doubt, are lining their pockets due to gaps being left open across the current system, but unless you do something intelligent about it, we are in serious trouble, as this problem is just going to continue to expand. Eskom must pay back the money they stole from the people and get ride of all the bonuses they give their employees, and they are way over staff and give smaller salaries to the top bosses in Eskom and the board.	Terry	Gauteng		self-employed
	2026-01-10 10:33:18	No I do not	All of the above – we should not pay for government blunders	Eskom needs to be held accountable for their mistakes. The people who let this happen need to be locked up. We as the people should not be burdened when there is clear corruption and incompetence at play. I don't ask my government to pay for my mistakes at work. We should not be forced support a failing and corrupt company when they clearly shot themselves in the foot here. 	2026-01-10 10:27:32	No I do not	All of the above – we should not pay for government blunders	My concerns are as follows: Affordability: Should you pay for NERSA's calculation errors? No!!! Abuse of power, corruption and inefficient management by incompetent people have lead to the downfall of Eskom. The state is responsible, not the public. Reliability: Should you pay full price for aging, unreliable infrastructure? Poor management and lack of maintenance has resulted in massive losses by Eskom. Government has failed to address the situation , but neither are being held accountable for their actions or lack of actions. Efficiency: Should consumers fund Eskom's cash flow and construction delays? Again No!!! Hire competent staff or call in experts to make Eskom great again. Mismanagement by the state has to end and the state must allocate funds. This money must not come from the consumer. My husband and I are business owners and our businesses hire many people. We pay huge amounts in taxes. We contributed fairly, and our monthly availability fees don't drop when we have to stop production because of load shedding or no power because of poor maintenance. We pay, but don't get the turnover we should. Running generators makes us way less profitable and less able to support our community through employment, the teachers we pay for etc. We contribute hugely to the economy and employ many people. Raising the price of Eskom puts pressure on our businesses that may lead to us no longer wanting to continue them, which would be catastrophic to our communities as we are the largest employer in one of the 3 areas.	Judy	Eastern Cape		business owner
	2026-01-10 10:27:27	No I do not	All of the above – we should not pay for government blunders	Government has failed to convince the people whom they SERVE, that they have the will, the integrity, the ability and knowledge to what is best for South Africa.	Marita	Western Cape		retired

	2026-01-10 10:24:21	No I do not	All of the above – we should not pay for government blunders	Eskom's poor management and entrenched corruption, coupled with a lack of accountability, should not be borne by taxpayers. For many years, consumers have paid increasingly high Eskom tariffs during prolonged periods of so-called load shedding, often receiving little to no electricity despite having paid for the service. Those responsible for mismanagement and corruption should be held accountable for the resulting costs and failures, rather than shifting the burden onto taxpayers who are already paying exorbitant amounts for unreliable and substandard service.	Stephanie	Western Cape

	2026-01-10 10:23:24	No I do not	All of the above – we should not pay for government blunders	My concerns are as follows: Incompetent, unqualified and uneducated employees that caused the blunder should be held accountable. Why should we pay for their ignorance? I don't think the consumers should pay for aging, unreliable infrastructure. Eskom and the government must manage their revenue and upgrade aging infrastructure. But it is easier to pass the bill to the consumer and to carry on miss-managing revenue. What perturbs me is how poor decisions and theft are entertained. Employ competent staff. Corruption, misconduct, exploitation, tyranny, miss-management and perversion of justice placed Eskom in the position that it finds itself. Why must I pay for their incompetency?	Nadeem	Western Cape		employed individual

	2026-01-10 10:12:54	No I do not	All of the above – we should not pay for government blunders	It is a known fact that corruption and theft prevails in this country. Why cover uo theft and corruption with miscalculation. I am a pensioner and currently in arrears die to high cost of services. I cannot afford any more expenses. It's leafing my thinking to suicide as It's tougher to survive	Chris	KwaZulu-Natal		unemployed individual
	2026-01-10 10:12:44	No I do not	All of the above – we should not pay for government blunders	Ordinary citizens cannot continue to bail out incompetent people or employees who are politically appointed without proper qualifications and experience under the banner of affirmative action employment. SA has many intelligent skilled people that are side lined and not appointed in strategic positions under affirmative action banner. Monies must be recovered from those in power making these incorrect decisions.	Nishi	Mpumalanga		retired
	2026-01-10 10:12:33	No I do not	All of the above – we should not pay for government blunders		Magda	Mpumalanga		
	2026-01-10 10:12:19	No I do not	All of the above – we should not pay for government blunders	There have been adequate revenue flows over the decades to pay for infrastructure, especially the older infrastructure already fully depreciated i t o the Tax Act. Reduce the insanely high salaries being paid to far too many people, and filter out the excesses. Eskom is not a job creation pond influenced/driven solely by ANC crisis management.	Chris	KwaZulu-Natal		business owner
	2026-01-10 10:12:14	No I do not	All of the above – we should not pay for government blunders	This is entirely an Eskom mgmt error. It must not be passed onto the consumer. Eskom is already a bloated parastatal with an average wage bill of a R1,000,000 per employee. As I am a pensioner these costs are unaffordable and unsupported.	Roger	KwaZulu-Natal		retired
	2026-01-10 10:12:09	No I do not	All of the above – we should not pay for government blunders		Pieter Eduard	Gauteng		employed individual
	2026-01-10 10:11:56	No I do not	All of the above – we should not pay for government blunders		Andrew	KwaZulu-Natal		
	2026-01-10 10:11:48	No I do not	All of the above – we should not pay for government blunders	My concern with Escom is that there is no clear measurable plan going forward. New technology is being developed all over the world, for example decentralised nuclear power stations that could take the strain off the grid and reduce the cost of power distribution, but still we stick with outdated coal power stations.	Richard	Western Cape		retired
	2026-01-10 10:11:45	No I do not	All of the above – we should not pay for government blunders	Corruption and poor management, with no accountability, has plaqued South Africans. Eskom has robbed the taxpayers of billions every year. We cannot pay for Eskoms mismanagement, Eskom is strangling our society, already burdened financially, trying to survive!	Stephanus	KwaZulu-Natal		business owner
	2026-01-10 10:11:27	No I do not	All of the above – we should not pay for government blunders	Again, we are faced with footing the bill for unqualified, corrupt government management. To pay will only empower the same actors to make the same mistakes and continue to run a substandard operation, perpetuate corruption and take advantage of the citizens they are meant to provide the service to. NO, enough is enough.	Rob	Western Cape		self-employed
	2026-01-10 10:11:22	No I do not	All of the above – we should not pay for government blunders	Unaffordable on shrinking real income Unfair to expect users to pay for what taxpayers already paid. Taxpayers already paid billions in bail outs for eskom Eskom should rather cut their expenses on labour and by focussing on lowering costs to the consumer, thereby becoming more attractive to consumers. More consumers lead to more income. There is also action that escom need to take regarding corrupt employees robbing them of income.	Marthinus	Gauteng		retired

	2026-01-10 10:08:15	No I do not	All of the above – we should not pay for government blunders	This government is totally inept and corrupt plus the fact that they earn fat salaries, let them start paying for their own mistakes.	Steve	KwaZulu-Natal		employed individual
	2026-01-10 10:08:08	No I do not	All of the above – we should not pay for government blunders	It is unthinkable that the public gets punished for Eskom's errors!! They should be held accountable !! I have not seen any money recovered from the looting before! That's the money they must use, I am using solar but I am paying excessive tariffs to rent the middle man's metre. Why can't we cut the middle man to make electricity affordable? In a R1000 rand purchace I pay R400+ before tax!! How is this fair?	Sinikiwe	Gauteng		retired

	2026-01-10 10:07:56	No I do not	All of the above – we should not pay for government blunders		Annemarie	Mpumalanga		retired
	2026-01-10 10:07:27	No I do not	All of the above – we should not pay for government blunders	Enough is enough! Eskom’s mis-managed its business for more than a decade supported by politicians. The only CEO who tried to clean up this corrupt mess was life threatened without serious undertaking of the legal system. It can not go on to allow continuation of mismanagement and corruption and to let some customers pay for it.	Dieter	Western Cape		retired
	2026-01-10 10:07:25	No I do not	All of the above – we should not pay for government blunders	They have poor infratructure and we cant pay for them only for the big guys to get more salary and we still struggle with electricity due to poor maintenance	Tanya	Mpumalanga		unemployed individual
	2026-01-10 10:06:48	No I do not	All of the above – we should not pay for government blunders	Nersa's so-called "errors" are nothing else than R76 million being stolen by caders in Nersa and Escom and can be found in the pockets and safes (chairs) of those people "responsible for the errors". SA citizens MAY NOT PAY for caders self-enrichment! Instead, there MUST BE A THOROUGH INVESTIGATION INTO THE MATTER AND THOSE RESPONSIBLE MUST STAND TRIAL FOR THEIR ACTIONS AND "ERRORS". If the above is not the case the only other reason is NON-EDUCATED PERSONNEL AND (TOP)MANAGEMENT IN NERSA AND ESCOM. R76 MILLION RAND OF SA CITIZENS' HARD PAID TAX MONEY IS STOLEN! WHY MUST WE PAY TWICE FOR THE SAME SERVICE, JUST TO BE STOLEN AGAIN?	Estie	Western Cape		retired
	2026-01-10 10:06:17	No I do not	All of the above – we should not pay for government blunders		Jan	Gauteng		retired
	2026-01-10 10:06:17	No I do not	All of the above – we should not pay for government blunders	I personally work with Nersa and am not surprised at all at this blunder. The way Nersa determines tariffs is entirely dependent on the information reported to them and the team working on the application. In no way can the consumers be held liable for a calculation error especially when the electricity price just keeps going up. Eskom must absorb the shortfall and pay out less bonuses as they clearly do not deserve it. If the money each year is actually used for upgrading and maintaining the infrastructure that would be slightly acceptable, but clearly that is not the case. Alternative power providers and renewable power should be integrated as soon as possible to topple Eskom's monopoly.	Michell	Gauteng		employed individual

	2026-01-10 10:03:41	No I do not	All of the above – we should not pay for government blunders	My concerns are as follows: Affordability: Should you pay for NERSA's calculation errors? No!!! Those respondible for these errors should be held accountable. Due to those employed who are Incompetent, unqualified and uneducated should be held responsible. Reliability: Should you pay full price for aging, unreliable infrastructure? No!!!!!! Again, due to a no care attitude of those employed by Eskom and supported by the Government by not being held accountable for their action, those are the 9nes who should pay. Efficiency: Should consumers fund Eskom’s cash flow and construction delays? Again No!!! Fire them all. Hire competent staff or call in experts of old. This is all due to mismanagement and abuse of power that has lead to the downfall of Eskom. State is responsible. Look at rail, look at road, look at SAA. All due to mismanagement by the state. The state must allocate funds not the consumer.	Cynthia	Gauteng		employed individual
	2026-01-10 10:03:28	No I do not	All of the above – we should not pay for government blunders		Norman	Eastern Cape		employed individual
	2026-01-10 10:03:25	No I do not	All of the above – we should not pay for government blunders	I am a pensioner, over 70s old, and CANNOT afford electricity costs as they stand, using a kettle to wash in warm water, only using the light in the room I am in, no outside security lights!!! while those in power use as much as like, as THEY don't pay for electricity in Ethekwini municipality anyway.	Char	KwaZulu-Natal		retired
	2026-01-10 10:03:23	No I do not	All of the above – we should not pay for government blunders	Eskom is just shooting itself in the foot. If this increase is implemented more consumers will look to solar as a solution.	Charmaine	Gauteng		self-employed
	2026-01-10 10:03:10	No I do not	All of the above – we should not pay for government blunders	To whom it may concern. Eskom has gone from great to good to bad to worse over he past decades. I t was one of SA's top infrastructures and leading companies. A place young employers were glad to be part of and a sought after company to get a bursary. These days people don't even mention when thy are employers of Eskom because of the negative comments and jokes made about this once thriving but now failing institution. What a shame. Who is responsible for this? Definitely not the consumer! Living costs in South Africa keep rising and many people struggle to get by. Because of Eskoms failing infrastructure and poor management , those who can, have gotten solar power. For many companies Solar is at a astronomical cost and would have a knock on effect on their budget. Once again this is reaction is to try and keep functioning in a country that has many challenges. Awarding this 76Bilion payout would only reward terrible management of a once great asset. If a person or (institution in this case) does something wrong, you do not reward that person . You get rewarded when you do well with the responsibility you have. It is also completely unfair to expect the consumer to cough up for the miss management,/ wrong calculation/mistakes, call it what you will , that has been rife in Escom. We are the ones paying our bills dutifully every month. Having to make budget cuts of our own. Struggling with rising costs. Eskom should be responsible for its own mistakes. Try by reducing top executive salaries. Get rid of employers who are not carrying their weight. Clamp down on corruption . Invest in education and bursaries to reap the benefits of University graduates. Hopefully Eskom can once again become a company people are proud to work for.	K	Western Cape		self-employed
	2026-01-10 10:03:09	No I do not	All of the above – we should not pay for government blunders	The ministers should pay for their own incompetence, not the SA taxpayers.	Wilhelmina	Gauteng		retired

	2026-01-10 10:00:12	No I do not	All of the above – we should not pay for government blunders	Every year, Eskom is granted increases that are way above inflation. Yet they have still not managed to sort out the issues. They are congratulating themselves on fixing load shedding but this is not the case. There is significantly less demand due to people having solar panels and other alternatives, and numerous businesses closing and Eskom has been burning diesel to keep the supply. It is time to privatise this operation and open the market to alternate power suppliers so that the prices come down for the consumer. We can no longer carry the charges especially when Eskom is guving increases and bonuses to staff and they still employ unneccessary people. The whole organisation needs to be restructured.	Kim	KwaZulu-Natal		employed individual
	2026-01-10 10:00:04	No I do not	All of the above – we should not pay for government blunders	This is just another attempt to get the SA taxpayer's and electricity consumers to pay for the billions that were plundered from Eskom in the past. Those who do pay SA taxation are already overburdened with taxes when compared to other countries and manufacturing companies and businesses are the majority of the electricity consumers can no longer afford to pay more for electricity. This proposal will just lead to MORE job losses and closure of businesses. ENOUGH IS ENOUGH! LET US GET RID OF THE CORRUPT ANC GOVERNMENT AND THEIR CRONIES! The proposal fails the public interest and reasonableness test according to the Constitiuton of SA	Ross	Gauteng		business owner
	2026-01-10 09:59:50	No I do not	All of the above – we should not pay for government blunders	We can not afford this when the government only increase our pension by 2,9%	Yvonne	Gauteng		retired

	2026-01-10 09:53:51	No I do not	All of the above – we should not pay for government blunders	It is grossly unfair, to burden the WELL OVERBURDENED citizens, for the corrupt, unethical, dishonest, incredibly inept, incorrect cadre deployment- with virtually no expert nor the ability to manage the finance of Eskom, and we are definitely not at fault for Eskom NOT to present the records in time, nor the way too many employees at Eskom, nor are the citizens responsible for blunders of corrupt officials, and the blatant theft that goes on unchecked, nor are their consequences for these thieves!!? SA citizens are already REELING under the anc cadre, family, cronies appointments- which MUST BE CORRECTED, nor is it our fault that there are so so so many illegal connections, that the honest, hard working SA citizen has to pay for!! SA citizens DESERVE hard working, ethical, well deserving workers!!? All employees- are way overpaid, Especially from Supervisor positions and all the way to the top. Tenders are very crooked, and the pricing is WAY OVERBOARD!! If these points as addressed, then the pricing to the SA citizens will drop considerably!! Thanks to you all for sticking up for the well drained SA citizen. Regards. Tony.	Tony	KwaZulu-Natal		retired

	2026-01-10 09:49:41	No I do not	All of the above – we should not pay for government blunders	Eskom can't maintain their own infrastructure. We are new in our area, they should at least educate the community should we have challenges like metere box struck by lightning we reported it reported to Eskom they kept saying they'll send technicians to assist and that never happened instead the technicians came to fix outside and they promised us that they will escalate to the relevant department but till today ? . We were forced to pay R6000 in full before they could assist, for something we didn't break. In some other suburb / locations only paid R500.00 and their light were switched on. Our councilor in ward 135 assured the community that some extensions will be exempted but still experiencing load reduction even today the 10th January 2026 we were lights were off from 05:00 to 09:00. Our street lights are off for the past two months we've been reporting the fault to Eskom and the Councilor there's no response from them. We're frustrated with the manner that they treat us. Our rights and concerns are not considered serious.	Olivia	Gauteng		unemployed individual

	2026-01-10 09:43:29	No I do not	All of the above – we should not pay for government blunders	Problem is that government steals and uses tax money to get what they want. Then when something goes wrong they want the tax payer to pay more or fix what is wrong although the tax payer already paid. So how much more must one pay to just get things done right. Somewhere government must also learn and that means they must also lose! If they were able to think clearly, they would realise that Eskom is on real trouble. Over capacity equivalent to 3 Medupis. The people able to, have already gotten rid of Eskom. Approach the smelters that have, or are being shut, make deals with industries to keep SA competitive. Otherwise, it is only a matter of time that Eskom will not be able to help the poor to get cheap electricity. Imagine that Cyril. When you grow a backbone I will call you Mr President. Untill then...	Jan	Gauteng		retired
	2026-01-10 09:43:28	No I do not	All of the above – we should not pay for government blunders	Power prices from Eskom is already too high. 	2026-01-10 09:35:35	No I do not	All of the above – we should not pay for government blunders	Eskoms debt and failure to maintain the electrical supply to the Country, is in no way the fault of the citizens. It is entirely due to mismanagement, corruption and inept governance. Instead of being viewed by Government as a place of employment for cadres and buddies, it should be run as the strategic, important asset it is. It's not just to provide basic electricity, it is meant to protect the economy and the Country as a sovereign state. It is NOT meant to be a political pawn. Citizens are already overpaying for what should be a basic service. With our high unemployment rate, high cost of living already burdening citizens, it is simply not feasible to expect them to bear this cost. You cannot get blood out of a stone.	Sharon	Mpumalanga		retired
	2026-01-10 09:35:35	No I do not	All of the above – we should not pay for government blunders	How about doing away eith Deputy Minister. positions. 	2026-01-10 09:35:08	No I do not	All of the above – we should not pay for government blunders	Before NERSA ask consumers for more money to fix the rot we need to see actual effective accountability from government for current and past corruption, retrieval of billions of Rands stolen, now in the hands of current and old corrupt officials, their families and their cronies. State-Owned Enterprises like ESCOM must be exempt of B-BBEE to ensure only officials who can actually do the job are employed and then personally held accountable for any blunders of incompetence. Until then we will not give a cent more towards further organised theft, nepotism, kleptomania, no pride or a care for the country, just Bureaucratic self-enrichment ..... it is pointless otherwise!	Heinrich	Western Cape		
	2026-01-10 09:34:41	No I do not	All of the above – we should not pay for government blunders	Many citizens of SA are already financially ruined through rising costs. Increasing the cost of electricity even further, will eventually make it an unaffordable luxury for many. Am I wrong or were there already 2 x 40% Eskom tariff increases in 2025? I for one simply cannot manage paying these ever increasing Eskom charges anymore. I am breaking under the strain. Where will this all end? There is sooo much damage done already in this country and it is always, as usual, the poor who have to suffer. The 'big guys' don't care. They have more than they need. 	2026-01-10 09:25:20	No I do not	All of the above – we should not pay for government blunders	Dear NERSA Panel Members, I am submitting this formal comment in response to the public consultation on Eskom's tariff application, particularly concerning the recovery of costs arising from the approximately R76 billion asset calculation error identified following the High Court judgment. Question 1: Should Consumers Pay for Regulatory Calculation Errors? My position is unequivocal: No. The responsibility for this R76 billion miscalculation lies with the regulatory process, not with electricity consumers. It is deeply unjust to transfer the financial consequences of administrative errors onto households and businesses already struggling with escalating living costs. South Africans are facing unprecedented economic pressure. Adding further tariff increases to correct mistakes we played no part in creating represents a failure of fair governance. Alternative solutions must be found that do not punish consumers for institutional failures. Question 2: Should Full Tariffs Apply to Unreliable, Aging Infrastructure? The infrastructure in question has consistently failed to deliver reliable electricity supply. Years of load shedding have demonstrated that this aging network does not justify premium pricing through increased depreciation and return calculations. Consumers should only pay rates commensurate with the quality and reliability of service received. Charging for theoretical asset values while delivering substandard service is fundamentally inequitable. Performance must match pricing. Question 3: Should Electricity Users Fund Operational Inefficiencies? Eskom's well-documented challenges with cash flow management, project delays, and cost overruns should not become consumer liabilities. Tariff structures should incentivize efficiency and penalize mismanagement, not the reverse. I contend that any tariff approval must be contingent upon demonstrated improvements in operational performance, financial discipline, and project execution. My Request to NERSA: I formally call upon NERSA to: Refuse the transfer of the R76 billion calculation error to consumer tariffs Require Eskom to address this shortfall through internal efficiency improvements and alternative revenue sources Establish clear performance benchmarks that must be met before any tariff increases are approved Safeguard consumers from bearing costs generated by failures in regulation and utility management This is a formal individual submission as part of the legally mandated public participation process, and I trust it will receive due consideration in your deliberations. Thank you for your attention to this critical matter affecting all South Africans. Respectfully submitted, Lucinda B	Lucinda Jayne	Eastern Cape		unemployed individual
	2026-01-10 09:24:47	No I do not	All of the above – we should not pay for government blunders	As law abiding citizens we are accountable for our actions. We do not receive handouts when we misappropriate funds or make “mistakes” on a continual basis. Before sapping the citizens out of their hard earned cents, do an audit of the salaries of the executive members of Eskom, make the findings public and then we can re look at the way forward. There needs to be a proactive approach by Eskom instead of always being reactive and in crisis mode, which they are constantly being bailed out of. It’s time the “powers that be” realise the majority of citizens in this country cannot afford to pay for their never ending blunders. It’s so sad that they don’t care.	Tracey	KwaZulu-Natal		retired

	2026-01-10 09:17:25	No I do not	All of the above – we should not pay for government blunders	Dear Members of NERSA, I am writing to formally submit my comments regarding Eskom's current tariff application, specifically concerning the proposed recovery of approximately R76 billion stemming from asset revaluation errors following the recent High Court ruling. 1. Affordability and Fair Cost Allocation I strongly oppose the proposal to recover NERSA's calculation errors through consumer tariffs. As an electricity user, I did not contribute to these regulatory miscalculations, nor should I bear the financial burden of correcting them. The current cost-of-living crisis has already placed enormous strain on households and businesses. Imposing additional tariff increases to recover a R76 billion regulatory error is fundamentally unfair and economically unsustainable. Consumers cannot be expected to subsidize administrative failures through their already-stretched budgets. I submit that NERSA must explore alternative recovery mechanisms that do not place this burden on consumers who are already paying for electricity services. 2. Reliability and Infrastructure Performance I question the justification for increased depreciation charges and returns on aging, unreliable infrastructure that frequently fails to deliver consistent service. South Africans have endured years of load shedding, voltage fluctuations, and service interruptions. It is unreasonable to expect consumers to pay premium rates for infrastructure that does not perform to acceptable standards. Any tariff determination must reflect the actual quality and reliability of service delivered, not theoretical asset values. 3. Operational Efficiency and Project Delays Consumers should not be required to fund Eskom's operational inefficiencies, cash flow mismanagement, or construction project delays. The proposed tariff increases appear to subsidize poor planning and execution rather than reward operational excellence. I urge NERSA to condition any tariff approvals on demonstrable improvements in efficiency, project delivery, and financial management. Conclusion In light of the above concerns, I respectfully request that NERSA: Reject the proposed recovery of the R76 billion calculation error through consumer tariffs Require Eskom to absorb these costs through improved operational efficiency and alternative funding mechanisms Ensure that any approved tariff increases are directly linked to measurable service improvements Protect consumers from bearing the cost of regulatory and operational failures they did not cause Thank you for considering my submission in this formal public participation process. Yours sincerely, Jill B	Jill	Eastern Cape		retired

	2026-01-10 09:02:51	No I do not	All of the above – we should not pay for government blunders	I hereby submit this formal objection to the consultation paper published by National Energy Regulator of South Africa (NERSA) proposing that South African energy users be required to pay an additional R76 billion to Eskom. This proposal is fundamentally flawed, procedurally unjust, and substantively unfair, and should be rejected in its entirety for the following reasons: 1. Consumers should not be compelled to fund institutional failure The proposed recovery seeks to transfer the financial consequences of Eskom’s operational, governance, and planning failures onto consumers who had no control over, and did not benefit from, the decisions that led to these losses. Cost-reflective pricing cannot reasonably include the recovery of inefficiencies, mismanagement, or regulatory errors without violating basic principles of fairness and accountability. 2. The proposal undermines regulatory credibility and public trust Following the December 2025 court ruling that rejected the settlement agreement between NERSA and Eskom, this consultation appears to be an attempt to reintroduce, in substance, what the court has already found wanting. Proceeding in this manner risks eroding public confidence in the independence, integrity, and purpose of the regulator. 3. Legal and constitutional concerns Forcing consumers to absorb Eskom’s past mistakes raises serious concerns regarding administrative justice, rationality, and proportionality. A decision that disproportionately burdens the public, while failing to demonstrate clear benefits or corrective reforms, may not withstand constitutional scrutiny. 4. Severe economic and social impact South African households and businesses are already under severe financial strain due to inflation, unemployment, unreliable electricity supply, and repeated tariff increases. An additional R76 billion burden will exacerbate energy poverty, suppress economic activity, and further undermine competitiveness—without any guarantee of improved service delivery. 5. Absence of accountability and reform conditions The consultation paper fails to meaningfully address how Eskom will be held accountable for the failures that gave rise to this shortfall, or what structural reforms will prevent recurrence. Any consideration of cost recovery—if contemplated at all—must be conditional upon demonstrable governance reform, performance improvements, and consequences for those responsible. NERSA’s mandate is to regulate in the public interest, not to shield regulated entities from the consequences of their own failures. Approving this proposal would set a dangerous precedent in which inefficiency and mismanagement are routinely socialised, while accountability remains absent. I therefore urge NERSA to reject this proposal and to pursue regulatory approaches that prioritise accountability, affordability, and the long-term sustainability of South Africa’s energy sector. 	2026-01-10 09:02:19	No I do not	All of the above – we should not pay for government blunders	Eskom is one of the reasons that this country's economy has been destroyed. We should not support this ongoing theft by paying for their theft & corruption. The public simply cannot afford electricity anymore. As it becomes clear that Eskom is as incompetent in financial management as the rest of the government. This clawback is unconscionable and unacceptable as a demand on the people. Cancel all income increases for MPs, cabinet ministers, DGs and senior civil servants. Maybe this will concentrate their attention on their duties and see that the figures are properly audited. A long term, ring-fenced bond issue with good returns, outside the budget, offered internationally might meet the need if enough investors trust Eskom and the government. 	2026-01-10 09:00:14	No I do not	All of the above – we should not pay for government blunders	I formally object to the proposed R76 billion adjustment to Eskom's revenue application. This submission is made in the interest of protecting consumers, ensuring regulatory fairness, and promoting sustainable energy governance in South Africa. Grounds for Objection 1. Unfair Burden on Consumers The proposed adjustment unfairly transfers Eskom's financial miscalculations and inefficiencies onto households and businesses. Consumers should not be compelled to finance incomplete projects, aging infrastructure, or daily cash flow shortfalls. Tariff hikes of this magnitude will exacerbate energy poverty, disproportionately affecting low- and middle-income households. 2. Economic Consequences Increased electricity tariffs will raise operational costs for businesses, particularly SMEs, leading to reduced competitiveness, closures, and job losses. Inflationary pressures will ripple through the economy, raising the cost of goods and services. The adjustment undermines South Africa's investment climate by making energy costs unpredictable and unsustainable. 3. Regulatory and Governance Concerns NERSA's downward adjustment from Eskom's request still leaves a R76 billion gap that lacks transparent justification. Consumers are effectively being asked to subsidize Eskom's inefficiencies without clear accountability mechanisms. This contradicts principles of fair regulatory practice, where costs should reflect actual service delivery and efficiency. Proposed Alternatives Government Intervention: Provide targeted subsidies or guarantees to Eskom instead of burdening consumers. Debt Restructuring: Renegotiate Eskom's debt obligations to ease cash flow pressures. Operational Efficiency: Prioritize cost-cutting, maintenance improvements, and reduction of waste within Eskom. Independent Power Producers (IPPs): Expand renewable and private generation capacity to reduce reliance on Eskom's aging infrastructure. Structural Reform: Accelerate unbundling of Eskom into generation, transmission, and distribution entities to improve transparency and competition. Conclusion The proposed R76 billion adjustment is unjust, economically damaging, and contrary to principles of fair governance. Eskom's inefficiencies and incomplete projects should not be financed by consumers who already face significant financial strain. I urge NERSA and Parliament to reject this adjustment and pursue alternative measures that protect households, businesses, and the broader economy. Relief Sought That NERSA withdraws or revises the proposed adjustment. That Eskom be compelled to demonstrate operational efficiency and accountability before any tariff increases are considered. That government and regulators pursue structural reforms and alternative financing mechanisms to ensure long-term sustainability of South Africa's energy sector.	Izak	Gauteng		employed individual

	2026-01-10 08:39:31	No I do not	All of the above – we should not pay for government blunders	I make this submission in opposition to any further electricity tariff increases for South African consumers. 1. Affordability South Africans are already under severe financial pressure due to the high cost of food, fuel, housing, transport and basic services. Electricity is an essential service required for dignity, health and economic participation. Consumers should not be required to pay higher tariffs as a result of calculation errors or regulatory mistakes made by NERSA. Any errors in tariff determinations must be corrected by the regulator and Eskom, not recovered from households and businesses who have no control over these processes. 2. Reliability Electricity supply in South Africa remains unreliable, with frequent load-shedding, unplanned outages and voltage instability. Consumers are paying for a service that is often unavailable or disrupted. In any other sector, unreliable service would justify reduced prices, not increases. It is unreasonable to expect consumers to pay full or higher tariffs for electricity delivered through aging and poorly maintained infrastructure that fails to provide consistent supply. 3. Efficiency Eskom's financial difficulties are the result of mismanagement, corruption, poor planning and significant construction delays, particularly at Medupi and Kusile. These failures were not caused by consumers. It is unjust to require households and businesses to fund Eskom's cash-flow problems through higher tariffs while operational inefficiencies and cost overruns remain unresolved. Conclusion South Africans are being asked to pay more for a service that is becoming less reliable and less affordable. Further increases will worsen poverty, reduce economic activity, and place additional strain on families and small businesses. NERSA's mandate is to protect consumers and ensure fair, reasonable and cost-reflective pricing. Approving further increases under the current conditions would fail to meet this obligation. I therefore respectfully request that NERSA rejects any tariff increases that place the burden of Eskom's failures onto consumers.	RT	Western Cape		employed individual
	2026-01-10 08:39:22	No I do not	All of the above – we should not pay for government blunders	The tax is a killer... the rising costs of electricity is a killer... the rising water costs is a killer... Of finances... Now to increase with a huge amount because of something that not only, we had no control over... We haf no part in it whatsoever! Own up to the mistake(s) you (Nersa) have made. We can't be held responsible for this blunder.	Frans	Gauteng		employed individual

	2026-01-10 08:37:21	No I do not	All of the above – we should not pay for government blunders	As pensioners we must enjoy the luxury of free electricity which is a basic need and right. ESKOM is a state enterprise which must not being maintained by expecting from citizens to uphold their financial obligations. We are suffering at the hand of the government who who can't uphold our constitutional right.	Barbara	Western Cape		retired
	2026-01-10 08:37:11	No I do not	All of the above – we should not pay for government blunders	Eskom should tighten it' s spending internally. Stop wasting money and if your company can't afford it stop paying huge salaries incentives and so on. Check that the salaries being paid are for actual people working at Eskom. Do maintenance on your equipment and switch to energies generated by wind, water or solar. Western Cape has an abundance of wind. Stop exporting coal if you do not have enough for your own countries needs. Stop providing cheaper power to nabouring countries if you don't have enough for your own country. Use common sense when making decisions, you can not expect us to pay 20-30% increases when the average person only receives about 4% if they lucky many like my husband and others did not receive an increase last year. Be realistic- you received Eskom in good working order - you mismanaged it and wasted money like it was a never ending tap - now you must absorb this mismanagement and tighten your own belt- something we are having to do on a daily basis. Why are the solar panels that we do have not being used? You insist on using coal- why? Someone needs to take over Eskom and sort out the absolute mismanagement and wasteful spending.	Tania	Western Cape		retired
	2026-01-10 08:36:58	No I do not	All of the above – we should not pay for government blunders	The quicker it is realised that the current Eskom management has absolutely no reason to run a profitable business the better. All they do is pass their mistakes onto the end users with no accountability themselves. "Oops, sorry" is not a valid excuse for basically bankrupting society. Eskom needs to be removed entirely from government control and oversight to allow actual, real, proven business expertise and practices to be implemented and enforced (not hypothetical, race based, unproven entrepreneurs) in the production of electricity for the country.	Rob	Gauteng

	2026-01-10 08:27:33	No I do not	All of the above – we should not pay for government blunders	The proposed recovery of 75billion through higher tariffs treats households and industry as external to the electricity system when they are actually the real economy and the foundation on which sustainability rests. Prioritising numbers on paper at the cost of industrial collapse, job losses, deeper poverty for the most vulnerable who are already not coping is not only immoral but a good indicator that the system itself has lost sight of what governance is. The people don't exist to prop up the state. The state exists to optimise life for the people. The shortfall isn't "real" unless this heinous plan makes it real. It's a paper correction and must not be allowed to become harm to flesh and blood of captive users who are already beyond the limits of affordability. Job losses, energy poverty, and direct impacts on children's lives and their rights to health, education, dignity and basic services are far more important to prioritise for the health of the nation than keeping the theoretical books balanced. This proposal fails the public interest and reasonableness according to the constitution.	David	Gauteng		employed individual

	2026-01-10 08:24:38	No I do not	All of the above – we should not pay for government blunders	Why should South-African taxpayers cover the burden of a malfunction SOE. We live in Wilgeheuwel Roodepoort,the area is constantly battling with Power-outage due too poor planning and maintenance issues.If I receive my Electricity Bill,there ia a R900 exlVAT service and connection fee,that I need to pay before using a single KW of electricity In 2022 at the height of loadshedding,Pres Ramaphosa suggested South-African citizens should (Help) Goverment/Eskom to stabilize the electricity network by investing in Greener solutions. Many South-Africans took out loans to install Solar panels etc to just keep on living, and working from home.This lead to the Private sector installing over 4Mkw in just 3 years-that is equal to almost 1 loadshedding stage. So now those citizens is still paying off loans for solar, and then get smacked by this new Mistake Nersa and Eskom made. Ridiculous to say at the most Eskom should rather stop buying/renting new fleet vehicles every year, and get rid of the overstaffed personal corps. When they eventually wake up, the wealthy taxpayers is going to get tired of this nonsense and go completely OFF GRID.	Gerhard	Gauteng		employed individual

	2026-01-10 08:22:04	No I do not	All of the above – we should not pay for government blunders	The public has been paying for incompetence, fraud, waste and misappropriation within Eskom for the last 30 years: ? Eskom’s shortfall is structural and historic, not consumer-created. ? Using tariffs to recover it shifts institutional failure onto households and businesses that cannot absorb it. Households and businesses are already at affordability limits, and further increases will destroy demand, reduce economic activity, and ultimately shrink Eskom’s revenue base rather than stabilise it. ? Tariffs are meant to recover efficient operational costs, not historic financial misstatements. ? Businesses cannot pass repeated increases on to consumers without job losses or closures. ? Continued tariff hikes accelerate grid defection (solar, storage), permanently eroding Eskom’s future income.	Boni	Gauteng		employed individual

	2026-01-10 08:00:25	No I do not	All of the above – we should not pay for government blunders	The games that they are playing is going to cost the citizens of South Africa loosing Escom to the Chinese. They already own a lot of mines in Mpumalanga and Durban Harbour. Escom must be privatized, that will lead to the right person for the job. Only in Communist country's Government official's get this massave salaries and they are good for nothing. I know, because I am in the (government)Engineering environment with engineers that's not producing anything for the institution but receive massive salaries for pleasing corrupt managers.	Peet	Gauteng		employed individual
	2026-01-10 08:00:25	No I do not	All of the above – we should not pay for government blunders	We the consumers have no control over incompetence. It is not something that should be put on us. Perhaps murderers should go free as perhaps it was the victims fault. That is the message you are sending out to the public. If maintenance is done from day 1 that solves many issues. Stop wasting money in places like Kruger park you are not encouraging investors that way. If more money is allocated to maintenance on infrastructure and it is used for that purpose instead of being embezzled and misused the problems we have would never have arisen.	Cindi	KwaZulu -Natal		retired
	2026-01-10 08:00:21	No I do not	All of the above – we should not pay for government blunders	It has come to the time where South Africans can no longer afford to pay for other people's inefficiencies. As the old adage goes " you can get blood out of a stone " Enough is enough.	Steve	Western Cape		retired
	2026-01-10 08:00:06	No I do not	All of the above – we should not pay for government blunders	Gross incompetence and corruption	Vis	KwaZulu -Natal		retired
	2026-01-10 07:59:42	No I do not	All of the above – we should not pay for government blunders		Huibrecht	Limpopo		retired
	2026-01-10 07:59:31	No I do not	All of the above – we should not pay for government blunders	I will not pay for bad corporate decisions by people who are "qualified and getting salaries" for their decisions!	SANDILE	KwaZulu -Natal		employed individual
	2026-01-10 07:59:18	No I do not	All of the above – we should not pay for government blunders	We should not pay for government blunders Eskom, like every state owned company, needs to be run like a business. If the business is not breaking even, it should be privatised. Government should work for us, not for profit. It would seem NERSA is not fit to be our watchdog anymore. Politicians involved must insist to recover losses from Eskom or be jointly responsible.	Johan	Western Cape		retired
	2026-01-10 07:59:12	No I do not	All of the above – we should not pay for government blunders	Management must take responsibility for any and all mistakes!! They are paid to run the company.....cut their salaries, stop bonuses or get someone that can do a proper job	Servaas	Western Cape		self-employed
	2026-01-10 07:59:08	No I do not	All of the above – we should not pay for government blunders		Brenda	Gauteng		retired
	2026-01-10 07:59:00	No I do not	All of the above – we should not pay for government blunders	I certainly do not support any private funds to pay for Govt blunders.Over two decades no effort by the Govt to improve or maintain electricity supply has been done.The public over this period is already paying increased fees due to incompetence and corruption by all Depts.Despite numerous warnings,official enquiries and Govt promises nothing is done to improve or rectify problems.Incompotence and corruption remain and will continue until the ANC Govt is dethroned.	Ben	Western Cape		self-employed
	2026-01-10 07:58:55	No I do not	All of the above – we should not pay for government blunders		Paulus	KwaZulu -Natal		retired
	2026-01-10 07:58:46	No I do not	All of the above – we should not pay for government blunders	Having to pay the huge escalation of electricity that we are charged in Buffalo City which is higher than most towns and Metros in SA. Infrastructure that collapses weekly, including the cable theft leaving us without electricity for days. We are being overcharged for the FAT CATS to live in luxury!	Susan	Eastern Cape		self-employed
	2026-01-10 07:58:16	No I do not	All of the above – we should not pay for government blunders	Eskom has been screwing us over and over since 1995. Fraud corruption mismanagement ill discipline nepotism under qualified personnel (managers, directors, ministers). They owe us for their blunders then! We are already paying too much for them to recover broken infrastructure and now they blunder again and want to make it our problem. And I bet bottom dollar the idiot that made the mistake is still in his job!	Henri	Western Cape		retired
	2026-01-10 07:57:52	No I do not	All of the above – we should not pay for government blunders	SA needs a complete change 360 totally. Enough is enough. The poor gets poorer and the rich just richer or shall I say the corrupt politicians and the whole government just robbing as daily as citizens. While they get to decide what works for them so they all and their families can have the rich life while stealing from us. We must pay for all their defaults, fancy cars, home you name it and we ca hardly put food on the table, our salaries aren't going up if you lucky to have one. We loose our jobs because everything must be about BEE and still just pay. Pay for what. S.A. in ruins. Hell No!!!!	Nicchia	Gauteng		self-employed

	2026-01-10 07:55:48	No I do not	All of the above – we should not pay for government blunders	Government blunders should be paid by those who made the blunders. I had no say in the matter and should therefore be left out of the corrective action too.	Glynn	Western Cape		retired
	2026-01-10 07:55:14	No I do not	All of the above – we should not pay for government blunders	Absolutley no!. Why should we pay for so.eone ele's incompetence. The employees concerned should be fired and legally charged.	Pat	Eastern Cape		retired
	2026-01-10 07:55:11	No I do not	All of the above – we should not pay for government blunders	Eskom do not take responsibility for the way that the company is being run Any short fall for their mistakes must be supplemented by the public Due to old infrastructure and incompetent staff, we are losing business due to power outages, and we have to resort to alternative means to still try and run on a daily basis Nobody assists our company's but then Eskom demand that we pay for their mistakes	Dawie	Gauteng		business owner
	2026-01-10 07:54:48	No I do not	All of the above – we should not pay for government blunders	I will never trust any i formation coming from Eskom, over staffed and over paid, this cost should be passed onto consumers. Eskom, just like any other state parastal, should run on their own and like a business. The already overburdend customers, can't be burdened further. Most of the theft and fraud happened within the company is inside job or by ex -employees. The monopoly by Eskom with energy provision needs to stop@	Evelyn	Western Cape		retired
	2026-01-10 07:54:34	No I do not	All of the above – we should not pay for government blunders	Electricity and living cost are not affordable and are continually rising without rialiable consistent supply. The consumer has no option but to use eskom, not alternative independent suppliers essentially holding us ransom for poor service quality without competitors. A small % are expected to cover the entire eskom operational costs, costs from illegal connections etc and still pay this premium cost for poor service delivery	Len	Western Cape		retired
	2026-01-10 07:54:32	No I do not	All of the above – we should not pay for government blunders	Eskom is a business. If the audit firm did not complete due diligence then the auditors and eskom are both liable for the 76billion. Eskom should also disclose their full policies of asset theft and incidents. Furthermore, government should pass laws that allow independent power providers to supply power.	Claire	Gauteng		employed individual

	2026-01-10 07:37:05	No I do not	All of the above – we should not pay for government blunders		Michael	KwaZulu-Natal		business owner
	2026-01-10 07:36:23	No I do not	All of the above – we should not pay for government blunders	It is ridiculous that government does not manage utilities efficiently and that the consumers has to pay for their inadequacies. This has been an the legacy of the ANC government for the pas 30 years. They use and abuse the very same people who put them into power. I'm sure that Eskom suffers from the same syndrome that the rest of government does. Which is that departments has top-heavy officials who are overpaid and underworked. If they have leaner structures the costs will be reduced dramatically. But they owe patronage to their comrades and place incompetent individuals into expensive positions that the consumer has to pay for.	Garth	Eastern Cape		retired

	2026-01-10 07:19:26	No I do not	All of the above – we should not pay for government blunders	I oppose the proposed electricity price determination. Consumers should not be required to pay for regulatory and accounting errors made by NERSA and Eskom. A recalculation error of this magnitude—reported to be in the region of R76 billion—represents a failure of governance and oversight, not a legitimate cost of electricity supply. Passing this burden on to consumers undermines trust in the regulatory framework. From an affordability perspective, households and businesses are already under severe pressure from rising living costs. Recovering historical errors through higher tariffs is neither fair nor sustainable. From a reliability perspective, consumers continue to experience load shedding, aging infrastructure, and inconsistent service delivery. It is unreasonable to expect full or increased pricing for electricity that is unreliable and does not meet acceptable standards of supply. From an efficiency perspective, consumers should not be used as a backstop for Eskom’s cash-flow challenges, construction delays, or historic mismanagement. Cost recovery should be linked to performance, transparency, and demonstrable efficiency gains—not retrospective corrections. NERSA’s mandate includes protecting the public interest. This determination, as proposed, fails that test. I therefore urge NERSA to reject any tariff increases aimed at recovering past calculation errors and to ensure accountability is addressed internally rather than transferred to electricity users. 	2026-01-10 07:14:38	No I do not	All of the above – we should not pay for government blunders		Pamela	KwaZulu-Natal		retired
	2026-01-10 07:14:36	No I do not	All of the above – we should not pay for government blunders	The cost of living is already killing and most South Africans are living above their means, the increase in electricity will push our country into further ruin, we simply cant afford to. Why not take the money from the high ranking people for have made the decisions to lead to this error. Make them pay the penalty ,	Raeesa	Western Cape		self-employed
	2026-01-10 07:14:06	No I do not	All of the above – we should not pay for government blunders		Rob	Western Cape		
	2026-01-10 07:14:03	No I do not	All of the above – we should not pay for government blunders	We have been paying for their mistakes, blunders, blind theft for years. Let the government absorb the cost by deducting from the over inflated salaries of every single government & municipal employee.	Guy	KwaZulu-Natal		self-employed
	2026-01-10 07:13:45	No I do not	All of the above – we should not pay for government blunders		Timothy	Gauteng		employed individual
	2026-01-10 07:13:17	No I do not	All of the above – we should not pay for government blunders	SAs milking cow Eskom is bleeding SA citizens dry by their corruption at many levels. We dont need this ongoing corruption of siphoning funds from its users to fit the bill of corruption for many to loot	Jay	KwaZulu-Natal		
	2026-01-10 07:13:10	No I do not	All of the above – we should not pay for government blunders	Not only government blunders, the blatant gouging and corruption that occurred, stealing from Eskom left unchecked by the government. They kept appointing incompetent management, didn’t heed warnings of infrastructure needing urgent attention and upgrades. We have continued to pay for all this time and again, despite the huge increases they have already enjoyed. At some stage there has to be accountability for all the SOEs that have been driven into the ground by their insistence to recruit cadre incompetents, letting them ride the gravy train. The “mistake” is surely just another example of the inadequacy of their managing teams. Why should we pay for that?	Amanda	Gauteng		retired
	2026-01-10 07:13:02	No I do not	All of the above – we should not pay for government blunders	After 34 years of corruption, corrupt tender allocation, corrupt spending, and most of all, overpaid top management, eskom will never improve or succeed on current structure. Stop paying people for not delivering results and living like billionaires while the majority of South Africans are suffering. STOP all salary increases to top management. The salary gap is enormous.	Catharina	KwaZulu-Natal		retired
	2026-01-10 07:12:44	No I do not	All of the above – we should not pay for government blunders		Brunhilda	Gauteng

	2026-01-10 06:50:08	No I do not	All of the above – we should not pay for government blunders	South Africans are already overburdened with ever increasing electricity costs, taxes etc. We cannot afford another tariff hike - worse, for a mistake that the taxpayers had nothing to do with. The answer is simply no.	M	Gauteng		employed individual
	2026-01-10 06:49:59	No I do not	All of the above – we should not pay for government blunders	As I understand the law, (and I am not a legal "eagle") at all) consumers should NOT carry the cost of, e. g. administration blunders/ financial losses of corporate institutions caused by their own faulty administration, systems, etc within the company - apparently Discovery Medical Aid, recently, is a case in point, wanting to recoup costs, for their administrative blunder, from their members. As people we, individually, have to take responsibility for our own actions - we're taught from a young age that actions have consequences. It is high-time that the state, local governments, large organisations/service providers like Eskom etc. take ownership of their responsibilities towards the public whose BEST interest should be SERVED, and that they're held fully responsible for their own blunders.	Eugene	Eastern Cape		business owner

	2026-01-10 06:41:44	No I do not	All of the above – we should not pay for government blunders	Eskom is abusing the fault reporting systems It is impossible to develop a paper trail showing the number of faults occuring recently, previous email addresses and even the call centre have been replaced by alfred and alfred whatsapp, an app that appears to be focused more of making jokes than recording faults. A recent occurance that has been repeated 5 times since 1 January 2026 in the northern freestate; A bit of wind or rain and the power supply is lost, logging into alfred and the rsponse is' I have bad news and good news, the bad is there is a general power failure in your area, the good news is there is a team working on it" . this message has no reference number to quote later. The faults last at least 12 hours , which is when the technician pulses the recloser and the power is returned at 08h00 the next day. These faults are affecting at least 60 farmers, retired persons and businesses. You cannot manage something you cannot measure, eskom have no accurate records to show their progress and definitely cannot justify a country crippling R76Billion.	Mattheus	Free State		self-employed

	2026-01-10 06:33:27	No I do not	All of the above – we should not pay for government blunders	My first and biggest concern with Nersa allowing Escom any increase in tariffs, however large or small, and let's all be realistic and honest here this is a large mistake on Escom part, is why should the already overburdened and over taxed consumer pay for Escom laxadaisical and gross mistakes, while their management and senior executives get paid millions in bonuses and incentives while Escom is imploding, they are being rewarded for corruption, theft and downright mismanagement and criminality , instead of being held criminally, legally, ethically responsible for the downfall of Escom. They should firstly look at the following : (1)recovering all fraudulently criminally I'll begotten monies from past manage to, executives, and contractors and then (2)ensure those that were and today are responsible for the losses at Escom should be criminally charged and when not if found guilty the state should seize their assets, and they (the perpetrators of those crimes) should be in addition to being found guilty of corruption, mismanagement, theft etc should be charged with high treason as this should be classified as economic terrorism and they should be given lengthy sentences for example life in prison and by life I mean never to be released again ever and they should not be allowed to plea bargain for lighter sentences as well. As it stands now it looks like the ANC rewards incompetence and corruption with more influential positions of power.	George	Gauteng		
	2026-01-10 06:33:06	No I do not	All of the above – we should not pay for government blunders	The government needs to focus on finding solutions not shifting the blame and expecting that citizens have an ever increasing source of funds to fit the bill. The government needs to change it policies to attract investors not expect that money to always come from already over taxed individuals.	Charlotte	Gauteng		employed individual
	2026-01-10 06:32:33	No I do not	All of the above – we should not pay for government blunders	Would this proposal, brought about by exceedingly poor management, have even been contemplated if ESCOM was a non Government entity.	Chris	Western Cape		retired

	2026-01-10 06:30:38	No I do not	All of the above – we should not pay for government blunders	This is due to pure incompetence. Why did the auditor's not pick this up at the time. The public should not pay for this incompetence.	Greg	Gauteng		employed individual
	2026-01-10 06:30:38	No I do not	All of the above – we should not pay for government blunders	They should take responsibility for their actions ans d we as the consumer should not be seen as the cas cow. Incompetence should not be rewarded.	Dawid	Gauteng		self-employed
	2026-01-10 06:30:29	No I do not	All of the above – we should not pay for government blunders	Sadly Eskom has been mismanaged and hollowed out by an incompetent corrupt government. It's now gotten to the point where electricity costs are exorbitant and strangling industry and consumers. SA operates in a global economy and needs to operate accordingly. The solution here is to cut costs, e.g. the non-market-related salaries and bloated staff complement. At the current rate, everyone who can afford to is going to stop using Eskom and it will only be left with non-paying customers and have to be subsidised by the taxpayers, who themselves are over-burdened. We are rapidly reaching the point of no return, so SA needs to change course before it's too late.	Chanel	Western Cape		self-employed

As a South African I will challange you to take Eskom back to its core mandate when it was opened the first time. Eskom was established in the early 1920s by the Union of South Africa under the Electricity Act of 1922, and formally began operating in 1923 as the Electricity Supply Commission (ESCOM). Its core mandate was to develop, own, and operate a national electricity supply system that would provide reliable, affordable, and sufficient electricity to South Africa. Eskom was specifically created to support industrial development, mining, railways, harbours, municipalities, and the broader economy at a time when fragmented private power suppliers could not meet national needs. A key principle of Eskom's founding was that electricity should be supplied at cost, not for profit, in order to stimulate economic growth, industrialisation, and job creation. The utility was designed to plan and build large-scale power infrastructure, ensure long-term energy security, and coordinate electricity generation and distribution on a national level. In essence, Eskom was founded as a state-owned public service, not a commercial entity, with the primary responsibility of delivering cheap, reliable electricity in the public interest to drive South Africa's economic and social development. My view is that Eskom today is sucking South Africans and South African businesses dry, they are the reason why the last manganese processing facility in South Africa laid off 600 workers because Eskom has shifted from its mandate to a profit making company because state owned entities cannot be managed properly, and this blunder proves it. We are already paying you for services, we not going to pay for your mistakes...	Arnold	Mpumalanga		unemployed individual
	2026-01-10 06:20:10	No I do not	All of the above – we should not pay for government blunders	Its time the government used the money they are exhtorting from taxpayers to fund the expenses needed to govern this country. We are paying taxes and exorbitant fees for EVERYTHING while they use our money for their own personal pleasures. They need to be held accountable and begin to use funds appropriately. We should not have to keep paying for their mistakes and lives of luxury while we struggle everyday!	Kayleen	Gauteng		employed individual
	2026-01-10 06:20:04	No I do not	All of the above – we should not pay for government blunders	I think this whole mess speaks for itself. Us paying for their mistakes is simply not acceptable.	Marthanique	Western Cape		employed individual

	2026-01-10 06:17:27	No I do not	All of the above – we should not pay for government blunders	Eskom is just another example of how the ANC has promoted and been involved in the looting of this country, the corruption has been worse under Rhamaposas government than any other president. They have stolen and weakened the infrastructure of every state owned entity and they have repeatedly placed inept people in positions of management and handed contracts to inept or fake companies. The time for reckoning is here, there should be consequences to your decisions especially when it has been this corrupt. The president should clean up his act and apply his billions that have been ill gained to the good of this country or it should be appropriated and applied to this. The ANC is all for appropriation in one direction but not the other, I believe that is called racism a card they love to play. It is time that the constitution is upheld and they are measured by it. Eskom is a state captured entity with the ANC government having captured it. Thus the perpetrators should be brought to justice and their personal ill gained wealth can pay for all of the mess.	Catalina	Gauteng		self-employed
	2026-01-10 06:17:26	No I do not	All of the above – we should not pay for government blunders	Eskom should get their management in order. They have been paid billions in the past and have not focused on maintenance and proper management of development.	Rudolf	Western Cape		self-employed

	2026-01-10 04:34:56	No I do not	All of the above – we should not pay for government blunders	How does one miscalculate such a "small"error? Perhaps we need to allocate some of the funding to employ those who know how to use a calculator? Not to mention employing people who actually know what they are doing, what the machines are meant to do or can do, and maybe, just a thought, spend less time and money getting rid of those that speak the truth, because it doesn't fit your narrative of silent corruption, but he or they actually knew what this job was all about.... Are we currently not already paying for a service or rather a basic human life essential that has failed to be reliable, effective and advancing with the latest Machinery etc?? How much more are we meant to pay with the costs already consistently increasing in a household whereby salaries are no longer enough to provide for the basic amenities of every day living? If they were to guarantee (which they can't nor will they), that the extra cost incurred by us as the consumer would not be put into their back pockets offering the proverbial well funded "ass landing in the butter" scenario, and that every cent being paid in to cover their "math's that isn't mathing errors" , adding to that the ability to ensure that the machinery and tools etc are in fact being upgraded and replaced to ensure the delivery of a stable, reliable, effective service... Perhaps then I would say yes. But that is not about to become a reality. Why must we as the consumers aka the already punished citizens of this country deliver an "out" or a "soft landing" so to speak to their problem? Were we not warned of such issues being imminent when the previous enterprise head gave his last report to the nation on the the Status quo? Were we not warned, were we not? When they can't even provide to me as a consumer what I would call a basic human right, not a privilege, you want me to be part of making their nosedive less of a blunder? whilst I explain to my family I have had the government appoimted privilege of digging a grave for ourselves into monthly unaffordability and debt more than we have and are currently in already..... Nope I think not. Not this time sailor. Ludicrous, insane, dilusional yet predictable and not surprising.... But the audacity is what gets me. They made the mess, but now we must fix it.... Seriously? Perhaps they can do a "go fund me", with a "heart string tugging storyline" to touch the hearts of all the bleeding hearts who are diluded enough to think that any of what we pay in will actually be used for and spent on the intended purpose. This is the prime example of no accountability. Under table dealings aka corruption. Reckless and disregarded spending. Uneducated and inexperienced people sitting in seats making decisions that shouldn't be sitting in the seats nor making the decisions to begin with. Arrogance. And the simple very easy for me to pass point of.... this government has thrown this country to the dogs Knowingly, hung its people out to dry willingly .. But then want to come crying for help after they've decided they didn't pack enough essentials for their self serving, greedy, rapidly wreckless journey.... Sorry, we have done our part (time and time again) as the patriotic people of this country... This one's on you. Figure it out, but leaving it at my front door is absolutely NOT AN OPTION. 	2026-01-10 03:48:05	No I do not	All of the above – we should not pay for government blunders	When Eskom was handed over in '94, the new Government and new Eskom bosses were warned that a complete overhaul, upgrade and maintenance was required of the reticulated system. This warning was mostly ignored and today we are once again asked to pay for government failure, incompetence, corruption and wilful neglect. From a world leading profitable enterprise to a failed SOE in less than 30 years, from one bailout to the next, from one scandal to another and the consumer is forced to keep footing the bill. Tarrif increases are forced upon us with scant regard for affordability amongst everyday living. From the lowest rates in the world to one of the highest where R3k/mnth for a household of two barely sees you through without switching off the geyser and now a "blunder" a "mistake" a "small error in calculation" of R 76 billion, not that much really....you want to palm off on the consumer! NO. This is enough now. This cost needs to be absorbed by Eskom and the state. No more bonuses, increases or tenders for the next few years. Had Eskom been seen to be operating as a business in legal manner, had it been doing the required maintenance and upgrades, had it not been rocked by one scandal after another and had they remained even just as an African leader in the power generation field, maybe then would the consumer be on it's side and willing to assist when "mistakes" happen. In short, enough. No more more handouts. No footing the cost of incompetence. 1. Asset values should be capped. We cannot afford a tarrif increase based on outdated assets. 2. Paying for increase upon increase in tarrifs on outdated, aging infrastructure prone to failure due to wilful neglect and lack of maintenance is not a consumer issue. In language you can understand, buying a mark 1 citi golf at a monthly installment the same as the latest GTI and then insuring it at the cost of Mercedes McClaren then giving it to the consumer because you must give them something and telling them to pay for it is totally unacceptable. 3. Your incompetence and lack of accountability has led to Eskom being a piggy bank and now it's empty. You've run out of money to complete the projects you'd started and your cash flow has dried up. ENOUGH IS ENOUGH. No more funding, bailouts or handouts. Get your house in order then get the consumers back on your side.	Shaun	Western Cape		self-employed

	2026-01-09 22:44:05	No I do not	All of the above – we should not pay for government blunders	It is not negotiable. We as the consumers will not pay for Eskom errors. I've had to pay a client out for my staff's mess up... that is business...but now you expect us to pay your Eskom mess up, that's NOT how it works. NO, WE ARE NOT PAYING!	K	Free State		self-employed
	2026-01-09 22:43:10	No I do not	All of the above – we should not pay for government blunders	I do not support the consultation paper or the proposal to recover an additional R76 billion from South African energy users. Consumers should not be held financially hostage for failures that were caused by government mismanagement, poor oversight, and Eskom's long-standing operational and governance issues. Shifting the cost of these mistakes onto the public is neither fair nor sustainable. South Africans did not create Eskom's debt, failed maintenance programmes, or delayed infrastructure investments, yet we are repeatedly expected to pay for them. Energy users in South Africa are already under severe financial pressure. Electricity tariffs have increased far beyond inflation for years, while households and businesses continue to experience unreliable supply, load shedding, and declining service quality. Many consumers are struggling simply to keep their homes running and their small businesses afloat. Forcing additional costs onto already stretched households will only deepen financial hardship, increase non-payment, and push more people into energy poverty. An affordable and reliable electricity system is a basic requirement for economic stability and social wellbeing. The responsibility for maintaining and funding that infrastructure lies with government and Eskom, not with consumers who have already absorbed excessive tariff increases with little improvement in service delivery. NERSA's mandate includes protecting consumers while ensuring a sustainable energy sector. Approving further cost recovery from the public for past mistakes undermines that mandate. Accountability, structural reform, and improved governance must come before any attempt to extract more money from consumers. For these reasons, I strongly oppose the proposal and urge NERSA to reject any outcome that places the financial burden of Eskom's failures onto South African energy users.	Raven	Western Cape		self-employed
	2026-01-09 22:40:05	No I do not	All of the above – we should not pay for government blunders	I just don't understand as citizens we were forced against our will by "loadshedding" most of us played an extra part by saving where we could. Some of us still save electricity where we can.more and more people can't afford a basic necessity like electricity. Some of us still have solar power gas as an alternative to electricity. Seemingly the more we save the more we get punished. I cannot see it any other way as a punishment. Tariff continues to skyrocket several times a year. And eskom continues to ask for higher and higher increases. Why is the consumer being punished for what that entity has messed up?	Edwina	Western Cape		employed individual
	2026-01-09 22:39:25	No I do not	All of the above – we should not pay for government blunders	The majority of SA citizens hardly have enough money for basic living costs, so why should innocent citizens continously pay for Eskom's lack of honesty in reporting, or the lack of integrity to administrate the money they receive to offer their services to SA citizens. How can the SA Government allow Nersa and Eskom to continuously drain the poorest of the poor from much needed money to put food on the table?	Maria	Gauteng		retired
	2026-01-09 22:38:21	No I do not	All of the above – we should not pay for government blunders	Ridiculous	Gavin	Mpumalanga		
	2026-01-09 22:37:46	No I do not	All of the above – we should not pay for government blunders		Nelson	KwaZulu -Natal		retired

	2026-01-09 21:40:35	No I do not	All of the above – we should not pay for government blunders	We already paying 2/3 more than we should be paying for electricity, all because of years of corruption and incompetence. We can reward that with more money and suffering.	Pieter	Gauteng		retired
	2026-01-09 21:40:31	No I do not	All of the above – we should not pay for government blunders	It is unfair, and unjust (familiar words) for this Government to ask the citizens to pay for aging, unreliable (and unmaintained infrastructure for decades). it is shocking! How can they ask for this without concience. Many are paying for things the Government should be suppying, and used to supply. Citizens should not pay for Government's mistakes. How can mistakes add up to this amount, when Government assures us, they are doing a good job and blaming everyone and everything, but themselves. Criminal looting, that they are aware of is still unjudged in the courts. This is irresponsible. Government cannot require it from the citizens. The Government needs to radically change its ways! The citizens of South African are being called upon time and time again, to support the Government! This is totally against our, and most any principled constitution. no! If Government would own their mistakes, their failures to judge their huge errors, and be transparent with its citizens, South Africa would be more in unity to back them. But even Government cannot agree with themselves. So - should hard working, over worked, poor citizens pay for all the above? Definiitely NOT!	Glenys	Gauteng		retired
	2026-01-09 21:40:21	No I do not	All of the above – we should not pay for government blunders	Government officials (living off thousands of rands, way above the SASSA pension that covers almost 'nothing' and is a totally unrealistic figure...) now expect US, who struggle on this insult of a subsistance grant, to PAY for government incompetence! This is totally unrealistic, inhumane and smacks of a lack of total accountability for government's incompetence. Shame on them all.	Tina	KwaZulu-Natal		retired

	2026-01-09 21:17:31	No I do not	All of the above – we should not pay for government blunders	There was always public consultation before tariff increases in years gone by. Eskom had always placed enormous operation costs for tariff increases. Nersa had always known what the actual operating costs were versus the projected increases. It's not fair to the consumers to say that they made a mistake after it became public knowledge of all the corruption and mismanagement that took place. Building new Power Stations is Capital expenditure that comes from Government and cannot expect to be paid from operating costs. Nersa is not being truthful in explaining the R76m shortfall	Kuben	KwaZulu -Natal		retired
	2026-01-09 21:17:13	No I do not	All of the above – we should not pay for government blunders	Hi. Yes, cost of living is very high. Why should we as a consumer pay for such high electricity prices. Power stations not being maintained properly. New ways of creating power should be created , fossil fuel should come to an end. It is harming the environment & our ozone.why must we pay the arrears of municipality's in arrears to Eskom. We as consumers are not stealing the money & filling our pockets like the ANC & their friends. Get qualified & better educated people to run our municipality's around the country. Eskom fix what needs to be fixed & make it environmentally friendly. No 2 us paying the mistakes of others in government	Nathan	Northern Cape		unemployed individual

	2026-01-09 21:10:16	No I do not	All of the above – we should not pay for government blunders	I am absolutely opposed in total disgust to the absolute arrogance shown by both Eskom as sole national electricity supplier and distribution company on the one hand and NERSA as the so-called national citizens watchdog on the other hand, working and collaborating together in absolute secrecy in enforcing Eskom persisting tariff increase demands. The labour unions at the same time on the contrary having the audacity demanding a 15 percent salary increase for workers already earning triple the average salary bracket most other middle class workers in South Africa earns. Suddenly out of the blue the already concluded tariff adjustment agreement originating from a so-called NERSA calculation error, done and kept in secret between ESKOM and NERSA, lands in the public domain. Suddenly it is being expected from the already overburdened SouthAfrican energy users to pay Eskom an additional R54 billion, now miraculously rising to R76 billion over and above the already multi-year still well above inflation approved tariff increases from the latest ESKOM found NERSA depreciation calculation mistake. For the best part over the last 25 years electricity users were burdened and fleeced with annual tariff increases five to eight times above the annual inflation rate in mainly compensating Eskom's for their loss between past budgeted and actual income. The only South African state owned entity allowed to do so! Suddenly a newly founded additional reasoning bombshell being dropped on the already overburdened South African Eskom customers. I furthermore find the fact mysterious strange that the same labour unions demanding and sometimes striking for up to five times above inflation rate salary increases annually, falling into complete then absolute silence when the ESKOM tariff increases are being announced. Should ESKOM customers pay for NERSA's calculation errors? NO Should ESKOM customers pay for aging unreliable infrastructure over and above annual agreed to inflation rate linked tariff increases? NO Should consumers fund Eskom's cash flow and cost overruns from construction delays? NO Are the already overburdened from all quarters middle class Eskom customers still able to afford the continued Eskom tariff increases? AN OBVIOUS NO It is common knowledge that the Minister of Energy recently reprimanded the Eskom Board and Management towards curtailing future tariff increases to single digits, meaning between 0.1 and 9.9 percent. From past experience ESKOM would obviously settle for nothing less than 9.99 percent, also finding new ways insisting on further increase methodology entitled to. The same Minister of Energy currently advocating the decrease of Eskom tariffs for South African consumers????? ESKOM OBVIOUSLY THOUGHT AND STILL FALSELY BELIEVE AT THIS MOMENT IN TIME THAT THE AVERAGE SOUTH AFRICAN HOUSEHOLD DOES HAVE AN INEXHAUSTIBLE DISPOSABLE MONTHLY INCOME FROM WHICH THEY CAN ENRICH ESKOM INDEFINITELY ON A YEAR-ON-YEAR BASE - SORRY TO BE THE BEARER OF BAD NEWS FROM A REALITY CHECK FOR BOTH ESKOM AND NERSA - 1. The low income grouping can barely afford to purchase more than 100 units per month, i.e. SASSA beneficiaries, many low income pensioners , shop cashiers, house workers, gardeners, waiters, car watchers, etc, etc. The bypassing of pre-paid meters including fraudulent electricity vouchers purchased becoming and being the only solution available to millions. 2. The so-called average middle class citizens including small to medium business enterprises already overstretched and overburdened from all fronts to a point where electricity effectively already became an unaffordable luxury burden many years ago, from which unit purchases are being cut back on as far as possible year-on-year and kept to the absolute minimum required. Many businesses already forced to close their doors leaving thousands of workers unemployed as direct result - still being an ongoing accelerated process as time moves along. 3. The only employees not complaining about and not affected at all by the extraordinary then ludicrous year-on-year tariff increases being the on average earning above R1 million same ESKOM employees. 4. For the record also take into consideration the far above inflation annual increases in municipal rates and taxes, medical aid scheme rates and related costs, property rental and maintenance, vehicle pricing and maintenance including fuel cost, most food products pricing increases, school fees and hostel accommodation for scholars, clothing, etc, etc. 5. ESKOM tariff increases outpacing everything else by far on annual demands. 6. The average citizen already cut back on all non-essential services and costs like subscription tv, news channel subscriptions, holiday, restaurants, take aways, etc and lately also being forced to cancel essential services like short term insurance, medical aid membership, gym membership, etc in keeping financially afloat. All of this in just keeping ESKOM afloat as life's new priority number one.	Julius	Free State		retired

	2026-01-09 20:36:06	No I do not	All of the above – we should not pay for government blunders		Alfons	Gauteng		
	2026-01-09 20:35:51	No I do not	All of the above – we should not pay for government blunders	Even in the last few years when loadshedding for hours a a time happened, the electricity bill we had to pay stayed the same and, often, was higher! My wife works for a lawyer's firm that specializes in accounts is arrears. In most, if not all, properties where the bonds were in arrears for months, the municipal rates arrears, INCLUDING electricity supply THAT WAS NEVER DISCONNECTED, sometimes exceeded the bond amount that was granted! These areas are predominantly Soweto, Atteridgeville, and all other dominantly black townships. Soweto's unpaid Eskom bill exceeds 14 BILLION?! IF Eskom focusses JUST recouping UNPAID MUNICIPAL (mostly ANC controlled) bills, NO INCREACES SHOULD BE NESSECARY!	Leon	Gauteng		employed individual
	2026-01-09 20:35:45	No I do not	All of the above – we should not pay for government blunders		Esme			
	2026-01-09 20:35:25	No I do not	All of the above – we should not pay for government blunders	the public cannot be asked to foot the bill through higher tariffs to cover "depreciation" and "returns" that were previously omitted.	Meridan	KwaZulu -Natal		employed individual
	2026-01-09 20:35:20	No I do not	All of the above – we should not pay for government blunders	ESKOM was run into the ground. It was formally a recognized world class entity. The liberation government is to blame for mismanagement and outright thieving. I will not bail ESKOM out.	Brenda	Western Cape		retired
	2026-01-09 20:32:55	No I do not	All of the above – we should not pay for government blunders		Ken	Western Cape		retired
	2026-01-09 20:32:27	No I do not	All of the above – we should not pay for government blunders	It is time that this government stops bleeding the ever decreasing % of taxpayers while the majority of the population which is steadily increasing, plus all the illegals - do not pay 1c!!! Reduce your bloated cabinet, municipalities/all SOE's - overstaffed , overpaid, under qualified. Stop all the salaries to those over 34000 millionaires in government positions. Stop building useless meaningless statues. Make all those who allowed this, to personally for these idols. Stop all the overtime payments which are more than for normal work days. Then offset that money to offset this enormous debt to pay Eskom.	Olive	KwaZulu -Natal		retired
	2026-01-09 20:31:56	No I do not	All of the above – we should not pay for government blunders	Why must we pay for ANC mess?	Daryn	KwaZulu -Natal		
	2026-01-09 20:31:30	No I do not	All of the above – we should not pay for government blunders	Mismanagement, no accountability or transparency and we have to foot the bill! Change Joburg to prepaid and no we have to change back to post paid again without being able to warrant the R1000 pm connection fee?? I will not convert back!	Francois	Gauteng

	2026-01-10 12:32:45	No I do not	All of the above – we should not pay for government blunders	Furthermore, if operational costs, which include salaries etc, are so high, then staff should not receive bonuses. Those monies could be used towards reducing the costs they want to recover from the public.	DONe	Western Cape		retired
	2026-01-10 12:32:39	No I do not	All of the above – we should not pay for government blunders	Eskom's financial problems are largely the result of long-standing mismanagement, cost overruns, corruption, and delayed maintenance—not excessive consumption by ordinary citizens. Passing these costs on to consumers amounts to asking the public to subsidise failure. For many households, electricity price hikes force difficult choices between food, transport, healthcare, and education. For small businesses, higher tariffs reduce competitiveness, slow job creation, and accelerate closures. At a time when the economy is fragile, raising electricity prices fuels inflation across the entire economy, driving up the cost of goods and services. Eskom must first demonstrate operational efficiency, accountability, and meaningful reform before asking more from a cash-strapped South Africa.	Anton	Western Cape		
	2026-01-10 12:32:23	No I do not	All of the above – we should not pay for government blunders		Marius	Western Cape		
	2026-01-10 12:30:35	No I do not	All of the above – we should not pay for government blunders	Both Medupi and Kusile were run with major corruption through ANC - Corruption in South African coal power, largely linked to the ANC era's state capture, involves massive fraud, bribery, and illicit deals, exemplified by Gupta-linked companies forcing substandard coal on Eskom (Tutuka, Majuba), kickbacks to the ANC's Chancellor House from Hitachi for boiler contracts, ongoing coal theft, and procurement manipulation, leading to massive financial losses, equipment issues, and energy crises, with ongoing investigations and asset forfeiture attempts targeting these networks. Where is the funds recovered and the people responsible in jail? Therefore why should the tax payer be responsible for the cANCer corruption to this day and their useless ineptitude	Julian	Gauteng		employed individual

	2026-01-10 12:17:35	No I do not	All of the above – we should not pay for government blunders	The SA public should not be punished for a mistake made by the regulator or Eskom. A R76 billion error is a massive failure in paperwork and planning, not a cost of providing consumers with electricity. It is unfair to ask ordinary citizens, who are already struggling to buy food and basic necessities, to pay extra just to fix an accounting mistake. Electricity is a basic need, and these price hikes are making it impossible for ordinary citizens to afford,let alone the less privileged. In any other business, you don't pay full price for a service that doesn't work properly. The SA public are being asked to pay more and more for infrastructure that is old and breaks down constantly. If NERSA allows the price to go up, there must be a guarantee that the lights stay on. We should not have to pay for 'depreciation' on plants that aren't even working correctly. If a project is late or over budget because of bad management, the company should take responsibility, not the customer. It is not fair to make the public pay for Eskom's delays and wasted money on construction. By giving them more money every time they fail, NERSA is not giving Eskom any reason to improve. They should fix their own internal problems instead of just asking the already overburdened end user for more money.	Elizabeth	Western Cape		self-employed
	2026-01-10 12:17:08	No I do not	All of the above – we should not pay for government blunders	Not having the people with the necessary background and experienace at Nersa lead to blunders like this. Choose the right peole to do the job.	Henri	Western Cape		retired

	2026-01-10 12:03:50	No I do not	All of the above – we should not pay for government blunders	South Africans should not be forced to pay an additional R76 billion for Eskom's long-term mismanagement, governance failures, and missed maintenance. These costs were not caused by consumers, yet households and businesses are already under severe financial strain from high tariffs, load shedding, and a weak economy. Passing these losses on to the public rewards failure and removes accountability. It sets a dangerous precedent that inefficiency and poor leadership have no consequences. Any recovery plan should prioritise internal reform and consequence management, not shifting the burden to electricity users.	Susan	Gauteng		employed individual

	2026-01-10 11:46:15	No I do not	All of the above – we should not pay for government blunders	I am submitting this comment to formally object to the proposed electricity tariff increase linked to a R70 billion calculation error. This shortfall was the result of internal errors and governance failures and was not caused by electricity consumers. It is neither fair nor reasonable to expect the public to absorb the financial consequences of mistakes made by Eskom or regulatory processes conducted without adequate transparency. South Africans are already facing severe cost-of-living pressures, including rising food prices, fuel costs, municipal charges, and taxes. A further substantial electricity tariff increase will disproportionately affect households, pensioners, and small businesses, many of whom are already struggling to remain financially viable. I am also deeply concerned by the lack of proper public consultation during the decision-making process. Decisions of this magnitude must be transparent, accountable, and open to meaningful public participation. Failure to do so undermines public trust in both Eskom and the regulatory framework intended to protect consumers. I urge the regulator to reject any tariff increase that seeks to recover losses arising from internal errors and to instead explore alternative mechanisms that prioritise accountability, efficiency, and genuine cost containment within the electricity sector. The public should not be treated as a financial backstop for systemic mismanagement.	Linda	KwaZulu-Natal		retired
	2026-01-10 11:46:00	No I do not	All of the above – we should not pay for government blunders	There is no way consumers should have to pay for Government blunders. Recover money from all of those involved with their fat paychecks and bonuses.	Gregory	KwaZulu-Natal		employed individual

	2026-01-10 11:31:05	No I do not	All of the above – we should not pay for government blunders	These are the after effects of cadre deployment. Eskom was looted and not maintained properly so now we have decaying infrastructure and NERSA fucked up and for some reason we are the ones that must pay for their actions? Make it make sense. Already as it stands electricity is too expensive, unemployment is rife and the cost of living is extremely high. So NERSA can fuck off.	Pule	Mpumalanga		student
	2026-01-10 11:29:57	No I do not	All of the above – we should not pay for government blunders	I'll use this comment space as more of a complain space. I'm a 21 year old male. I have a mother who depends on me as she's not working. I work a basic wage job just enough to cover the basic necessities for us to survive. Unfortunately we live in a area which the council regards as middle class. Water bills are already through the roof even though we use it sparingly to the extreme. Electricity is already expensive that we are looking for alternatives on how to save but with only one person working getting the minimum wage it's extremely difficult to invest in any other alternatives. No with that being said there are millions of more people in my position that can't sometimes afford to cover Electricity needs. What they are expecting us to do is not sound. Instead we should see where the can decrease their spending inside of ESKOM. They have a lot of personnel getting made hundreds of thousands yet they couldn't see this coming and now it's the consumer's problem. Poorer households are already struggling to survive. We can't be expected to help Eskom aswell.	Xavier	Western Cape		employed individual
	2026-01-10 11:29:57	No I do not	All of the above – we should not pay for government blunders	Over 30 years of neglect & theft should not be paid for by customers. They don’t understand how business works?	Hester	Western Cape		retired
	2026-01-10 11:29:07	No I do not	All of the above – we should not pay for government blunders	Electricity tariffs have increased by 900% in the last 10 years. Consumers cannot handle another increase. Furthermore, if the government is unable to hire someone with the necessary skills to do their calculations, that cannot be the public's problem. The government needs to start removing incompetent workers from their workforce, then this would stop happening.	Carol	Gauteng		employed individual
	2026-01-10 11:28:52	No I do not	All of the above – we should not pay for government blunders		Celeste	Gauteng		retired
	2026-01-10 11:28:44	No I do not	All of the above – we should not pay for government blunders	The Eskom story is marred by corruption, mismanagement and dishonesty! Let's get Eskom working honestly and efficiently, this will allow the country to prosper!	Pete	Mpumalanga		self-employed
	2026-01-10 11:28:27	No I do not	All of the above – we should not pay for government blunders	Electricity is ridiculously expensive as it is. We have been in the same house for 20 years and seen the cost increase all the time and now we are supposed to pay more for their mistakes. No.	Sian	KwaZulu-Natal		
	2026-01-10 11:28:16	No I do not	All of the above – we should not pay for government blunders	Maintenance costs should have been factored in annual budgets. If they were, they have not been managed at all. Additionally, tariffs are not affordable to the average/working class citizen, and of course the poorer individuals.	Gail	KwaZulu-Natal		employed individual
	2026-01-10 11:28:09	No I do not	All of the above – we should not pay for government blunders		Louise	Western Cape		self-employed
	2026-01-10 11:27:59	No I do not	All of the above – we should not pay for government blunders	As Electrical Engineer with more than 40 years Dx experience I know that Eskom is to blame for the state of the Gx and Dx infrastructure because Eskom has not spent revenue wisely. The Eskom HR account is by far too high causing insufficient funsing for capital network costs.	Gerhard	Gauteng		business owner
	2026-01-10 11:27:54	No I do not	All of the above – we should not pay for government blunders	The public should not be responsible for errors made by those in charge. The general public are already struggling to make ends meet, another significant increase in electricity price will negatively effect every member of the country, as well as the economy. 	2026-01-10 11:16:06	No I do not	All of the above – we should not pay for government blunders	The corruption occurred and was committed by those in power. Its Time that ALL CORRUPTED persons REGARDLESS of age and status be ARRESTED IMMEDIATELY and ALL their accounts and propertied siezed by the STATE. We all know who the REAL crimminals are in the country. They have gotten fat and wealthy, their families have hugely benefitted whilst they fed off the State coffers. Time for the State to prove to the population its doing something by taking back monies stolen and to rebuild the country. The main culprits have been in power since 1994 and in 35 years they have hollowed out and destroyed this once beautiful country-they have the arrogance to blame Apartheid for Their criminal activity and absolute FAILURE to make this a better country for all. Time for CHANGE and give the country To those Who are HONEST and will REBUILD. ALL CRIMINALS in the STATE are to be PUNISHED!!!!!!	Saskia	Gauteng		employed individual

	2026-01-10 11:02:53	No I do not	All of the above – we should not pay for government blunders	R76 billion is an awful lot of money. If Eskom is to survive in its current form, then it will need the money. However, why should the public once again foot the bill? Where does this massive financial hole come from? If, for example, it is due in part to the disgusting cost overrun and delay in building Medupi and Kusile then those responsible need to be charged. There are no doubt other reasons for this monetary hole and those others who are partly responsible should also cough up. Not the public! And if the worst comes to the worst, sell Eskom. When I talk about the public, I also include businesses. Increasing the tariffs is bound to result in businesses failing and why should they take the brunt of this mess?	Michael	Gauteng		retired
	2026-01-10 11:02:49	No I do not	All of the above – we should not pay for government blunders	South Africans can barely afford to put food on the table . 	2026-01-10 11:02:05	No I do not	All of the above – we should not pay for government blunders	The question is the elephant in the room. Why must or should the over taxed public foot the bill for negligent errors caused by government and its parastatal employees? There is definitely a lack of pride and responsibility from the so called powers in charge . We don't talk small errors here. Over the past 32 years, a once world class country is reduced to a crime ridden country, where crime is happening in all spheres of society. The question is why do we have an intelligence pre-requisite requirement but it is nowhere employed in managerial cadres, or is this only applicable to keep honest people at bay to be able to make cadre deployment for the incompetent ANC .	Corrie	Gauteng		retired

	2026-01-10 10:56:08	No I do not	All of the above – we should not pay for government blunders	NERSA is in bed with Eskom - I worked there and saw the proof of it. Load Shedding is done deliberately to manipulate consumers into agreeing to tariff increases: Eskom asks for increase, NERSA pretends to do its work and give a partial increase, Load shedding to make consumers & govt capitulate, full tariff increase approved = load shedding stops! How has no one picked up on this pattern??? Public hearings by NERSA are a farce! The decision is made & written up before the public hearings are even planned!!! The Regulators then travel around the country, at our expense, pretend to hold the public hearings, but do not give a damn about what is said there - have a party at our expense travelling around the country and then implement exactly what they had decided on before they embarked on the public hearings!	Jacquelene	KwaZulu -Natal		self-employed

We pay through our taxes for Eskom to operate, and still we are expected to then buy the electricity we have already paid for to be produced. It is absurd to say the least and to be constantly hammered with increases, and now to pay for mistakes they do, it is insane.	Mthokozisi	KwaZulu-Natal		employed individual

	2026-01-10 10:43:22	No I do not	All of the above – we should not pay for government blunders	This pattern repeats over and over. Why is the hardworking tax payer, who is earning an above board living having to budget and manage their own assets, expenses, incomes and costs to get by without help from anyone, but a massive company like Eskom can't manage themselves? Then Pays very high salaries to employees and gives bonuses and raises to employees who very obviously and clearly are not doing their jobs? Like the rest of the world, bring in competent employees who can budget, plan, organise and work a company properly... this bail out SAA, bail out the post office, the broken railway system, the failing water systems, badly managed electricity company, why is there the same pattern everywhere? It's actually unbelievable how much South Africa's infrastructure has depreciated all round, and people just watch it get worse and worse and think the same response of residents paying more will fix anything, it's insane and absurd! 	2026-01-10 10:42:48	No I do not	All of the above – we should not pay for government blunders	To: The National Energy Regulator of South Africa (NERSA) Subject: Opposition to the Redetermination of Eskom's Generation Regulatory Asset Base (MYPD6) I hereby submit my formal public comment in opposition to the proposed redetermination of Eskom's Generation Regulatory Asset Base (RAB) for the 2025/26 to 2027/28 tariff period. This submission is made in response to NERSA's consultation paper following the December 2025 court ruling that rejected the prior settlement agreement and acknowledged material calculation errors amounting to approximately R76 billion. My opposition is based on the following grounds: 1. Affordability and Fairness Consumers should not be required to absorb the financial consequences of regulatory miscalculations or institutional failures. Passing an additional R76 billion onto electricity users—households, small businesses, and industry alike—at a time of severe cost-of-living pressure is unjust and socially irresponsible. South Africans are already facing high taxes, escalating tariffs, and economic contraction. Expecting the shrinking base of paying consumers to continuously fund systemic failures is neither sustainable nor fair. 2. Reliability and Value for Money Tariffs should reasonably reflect the quality, reliability, and consistency of the service delivered. It is irrational to charge full depreciation and returns on aging, unreliable infrastructure that has failed for years to provide stable electricity supply. Consumers have endured prolonged load shedding, operational instability, and economic losses. Full cost recovery without commensurate service delivery undermines public trust in the regulatory framework. 3. Efficiency and Managerial Accountability Consumers must not be compelled to fund Eskom's cash-flow shortfalls, construction overruns, or project delays. These are management and governance failures that should be addressed internally through efficiency improvements, cost containment, and accountability—not externalised to the public through higher tariffs. Using tariffs to sustain inefficient or bloated overhead structures constitutes a betrayal of civic trust. 4. Corruption, Mismanagement, and Governance Failures Beyond affordability, reliability, and efficiency concerns, it must be explicitly acknowledged that Eskom has been plagued by corruption, theft, and chronic mismanagement for decades. These failures have resulted in massive financial losses and operational breakdowns. The costs of such misconduct should be recovered through accountability measures, internal reforms, and recovery from those responsible—not transferred to honest citizens who have already borne the consequences through load shedding, rising prices, and economic hardship. 5. Regulatory Integrity and Precedent Allowing retrospective recovery of admitted regulatory errors sets a dangerous precedent. It erodes confidence in the regulatory process and signals to both utilities and the public that mistakes can be socialised without consequence. Regulatory certainty depends on accountability—errors must be corrected within institutions, not imposed on the public after the fact. Conclusion In conclusion, I strongly oppose the proposed redetermination. The public should not be forced to carry the financial burden of regulatory errors, inefficiency, mismanagement, or corruption within Eskom or NERSA. Accountability must rest with the institutions responsible. Sustainable energy provision requires ethical leadership, efficient operations, and a regulatory framework that protects the public interest—not one that repeatedly shifts institutional failures onto citizens. 	2026-01-10 10:41:42	No I do not	All of the above – we should not pay for government blunders	I object to being held liable for the calculation costs. There is no clarity or assurance as to how the proposed recalculation can be verified as accurate, nor what safeguards exist to prevent repeated recalculations. This creates an open-ended financial risk, particularly once household budgets have already been allocated and spent. Accepting responsibility for recalculation costs sets an untenable precedent, where ongoing revisions could continue indefinitely without certainty, finality, or accountability. 	2026-01-11 12:34:28	No I do not	All of the above – we should not pay for government blunders	The capitalist approach of passing the cost of doing business on to consumers and clients while maximising shareholder returns has no place in state enterprises. For too long government's approach has been to treat Eskom as a cash cow at the expense of South African citizens, their mismanagement has caused those with means to seek alternate electricity supply, now only a few are left supporting a vast and crumbling network. Squeeze too hard and even they will leave. This should not be permitted.	Campbell	Western Cape		employed individual
	2026-01-11 12:34:13	No I do not	All of the above – we should not pay for government blunders		Michael	Western Cape		self-employed
	2026-01-11 12:33:36	No I do not	All of the above – we should not pay for government blunders	I strongly oppose the proposed redetermination and the R76 billion adjustment being considered. It is fundamentally unjust to ask the South African public to pay for 'regulatory errors' and 'government blunders'—specifically the R62 billion depreciation shortfall and R14 billion return on assets—that stemmed from NERSA's own miscalculations and Eskom's historical mismanagement. Most importantly, this application ignores the dire reality that millions of South African households are now well below the limit of being able to afford electricity. We are currently facing a crisis where over 10 million households live in energy poverty, forced to make the impossible daily choice between buying basic food and keeping the lights on. With tariffs having increased by approximately 150% over the last decade, and another 10.5% hike potentially on the table due to this redetermination, the 'cost-reflective' model has become a tool for economic exclusion. NERSA's mandate is to protect the consumer; however, by allowing these adjustments, you are effectively penalizing the poor for institutional incompetence. I urge NERSA to reject this adjustment and instead demand that Eskom find internal efficiencies and recover funds lost to state capture and construction overruns at Medupi and Kusile.	Erica	Free State		unemployed individual

	2026-01-11 12:04:56	No I do not	All of the above – we should not pay for government blunders	If Eskom was a private firm, it would be insolvent and out of business. My husband was in construction for many years and he informed me that if you requested additional monies you had to prove who was at fault in your claim. Eskom are saying that the new builds had additional costs who was to blame the designers , quantity surveyors or just no accountability as it was government money ie TAX payers to pay. It is totally ridicules that the man in the street has to pay for total incompetence of the above and I strongly recommend that Eskom bear the total costs for their mistakes, and eat humble pie. If we do not stop this it will happen over and over again when Eskom needs more monies due to their total lack of management.	Millicent	Eastern Cape		retired
	2026-01-11 12:04:56	No I do not	All of the above – we should not pay for government blunders	AGAIN WE ARE ASKED TO FOOT THE BILL FOR AN INEFFICIENT AND LYING GOVERNMENT AND THEIR COMPANIES. START MANAGING PROPERLY, STOP YING AND YOU PAY FOR YOUR MISTAKES AND FOR THE THEFT BY OFFICIALS . GO AND RECOVER THE FUNDS FROM YOUR CADRES THAT LIVE IN LUXURY ON FUNDS THAT SHOULD HAVE BEEN INVESTED IN INFRASTRUCTURE, IN EFFICIENCY AND IN DELIVERING TO US: Affordable power that stimulates the economy. Reliable supply, not what is faked at the moment but is causing industries to close down due to limited supply. (We know even though you try and use propaganda to pretend we getting stable supply.) Efficient and honest management and government - we cannot continue to give more so you can steal more. Even if we pay more it will not end up building infrastructure - and we know it.	Freda	Gauteng		self-employed
	2026-01-11 12:04:33	No I do not	All of the above – we should not pay for government blunders	The principle at stake is simple: ordinary citizens and compliant businesses should not be compelled to fund institutional failure, maladministration, and repeated governance breakdowns. Electricity tariffs already impose severe pressure on households, particularly low- and middle-income families, while businesses face escalating operating costs that harm jobs and growth. Allowing Eskom to recover “mistakes” via consumers creates moral hazard, rewarding poor decision-making rather than correcting it. NERSA’s mandate is to regulate in the public interest. This proposal undermines accountability and erodes public trust.	Ashley	Western Cape		unemployed individual
	2026-01-11 12:02:55	No I do not	All of the above – we should not pay for government blunders	Eskom is run as a business when it suites the C-level salary structures and perks but when it fails completely as a business then us, the people, must bale them out. The ANC mafia have been pillaging the business for 30 years and now it's destroyed we, the people, must pay what they stole. Also a business that can't collect reasonable fees for its service delivered (such as it is) nor ca collect debt owed to it from the people, is not a business at all. Eskom must reduce its debtors book dramatically and use that income to fix infrastructure and restructure the entire business for efficiency and top quality service.	Mike	Limpopo		business owner

	2026-01-11 11:51:58	No I do not	All of the above – we should not pay for government blunders	Absolutely the following: Citizens should not be paying for government blunders including mismanagement of infrastructure upkeep and replacement costs. Making citizens pay for the above impacts negatively on citizens lives (across the board) . To compenastae for tariff increases, business will have to raise prices, the impact on an already struggling economy will create a negative setback and impact that could take more years to recover. I would suggest that Escom employ an Articifial intelligence system that captures all the data pertaining to their reason for the increase, then to prompt the AI to generate solution options based that take into account a 'citizen first' policy. In other words, the AI generates workable solutions for recovering the said costs without negatively impacting negatively on citizens lives.	Robert Adrian	Western Cape		self-employed
	2026-01-11 11:51:32	No I do not	All of the above – we should not pay for government blunders	Not our fault as consumers, is Nersa willing to contribute if I make a mistake in my business	Shaun	Western Cape		employed individual

	2026-01-11 10:06:30	No I do not	All of the above – we should not pay for government blunders	Eskom was a fully functional, profitable entity and government broke it through incompetence. We, as a country, have been subjected to load shedding and economic hardship as a direct result, and now we are expected to pay even more for blatant incompetence? Where is the accountability for NERSA? Who made the error and what is being done about it? Nothing is being done. There is no accountability and so this will certainly happen again. With every other service or product that is sold customers and clients are expected to pay a fair price for fair value. Gross incompetence (because they chased away all the competent people before you ensured proper skills transfer) resulted in massive delays and cost over runs in constructing new capacity that couldn't even come online when needed. Ongoing incompetence led to outright destruction of an entire generating unit. Further incompetence led to the scrapping of affordable nuclear power before it even got off the design table. And you want us to pay more money for less value? Are you serious? All while the real culprits get away with it.	Alistair	Gauteng		
	2026-01-11 10:05:30	No I do not	All of the above – we should not pay for government blunders		Thabang	Gauteng		retired
	2026-01-11 10:05:17	No I do not	All of the above – we should not pay for government blunders	Eskom is one of South Africa's jewels pre 1994. The utility now leaves people in darkness, directly impacting voters from 1994, who correctly voted with their consciences. Brining the ESCOM "asset" (and others like the railways and ports) into a South African "Sovereign Fund", whereby pension funds, other savings funds and foreign funds invest, holds the management of these entities accountable on a financial, consumer and political basis. One-man-one-vote allows ALL South African to finally express their consciences. This means holding government accountable through their ballots. Speak-up culture is done in confidence because censorship merely covers mismanagement of Eskom (and other similar "assets") on governmental level.	Paul	Outside SA	Luxembourg	business owner

	2026-01-11 10:00:44	No I do not	All of the above – we should not pay for government blunders	Why should the consumer pay for Eskom's mistakes when not even trying to get the monies owed to them by the municipalities who don't pay what they owe for electricity used. Really this is ridiculous to over burden the already struggling consumer by having to pay for government blunders. enough is enough !!!!	Juls	Western Cape		retired
	2026-01-11 10:00:23	No I do not	All of the above – we should not pay for government blunders	This country is already buckling under poor governance, fraud and corruption. Why should the man in the street who is struggling to keep food on the table be burdened with another 10% hike in electricity tariffs because of incompetence at Nersa. What about aged folk, struggling with the cost of living? I say NO.	Judith	Gauteng		retired

	2026-01-11 10:00:20	No I do not	All of the above – we should not pay for government blunders	If it was a 'mistake', then heads should roll - but this has not happened. In effect we are being told that NERSA and Eskom are being run by highly paid incompetents. If Eskom is bailed out year after year and they know they will be, then management can carry on as usual without effecting the drastically needed changes to their organization. By their incompetence, the whole of South Africa is being pulled down financially because every aspect of our economy requires electricity. The more money extracted from the population, the less money to spend on other items and the fewer the jobs.	Wickus	Gauteng		
	2026-01-11 10:00:18	No I do not	All of the above – we should not pay for government blunders	Electricity is already to expensive for most households. Many households are incurring serious debt to install solar power to try and alliviate the cost but it is only your rich and upper middle class that can afford that cost. most of us are stuck with escom or municipal supplied power. Then City of Cape Town goes and subsidises the traditionally poorer areas with steeper tarriffs for the traditionally white areas. This is done unilatterely and without consultation and not keeping in mind that those classifications are not relevant any more. this all ads up to push the affordability factor way over the edge. if we now have to pay for goverment incompetence and corruption as well, they will find widespread resistance or worse flaring up. Already police have to escort and protect escom and city personnel when they try to disconnect the widespread illegal electricity connections.	Martin	Western Cape		employed individual

	2026-01-11 09:51:58	No I do not	All of the above – we should not pay for government blunders	The tax payers are already very burdened and squeezed. The SA citizens pay more tax than anywhere else in Africa and very close to what Europeans pay, except we get far less services and healthcare, less security and less financial stability. We cannot afford to pay for adjusting the cost of Eskom's assets to fiddle with the numbers. The reality is that Eskom's performance is dismal and that should not be the tax payers fault. We vote and with our vote the parastatal entities should be adequately run and their budgets adequately managed. Ageing infrastructure and lack of maintenance is simply not something that tax payers can control. If you have entities poorly run then you have to employ competent people to run them. Create JOBS. We all know that SARS has shortfalls and typically the top bracket extra rich do not pay the full tax because of using complex systems to avoid taxes. If the Utility needs more money they need to go to Finance Dpt and look at the country's revenue but not go increase the rates because the numbers don't add up or because your depreciation calculations were flawed. Errors, lack of oversight or poorly maintained assets should not be passed on to the cost of KWh. I have paid all my taxes and I cannot afford an electricity rate increase if the service is not improved. I reject the motivation for any increase in the electricity rates as the motivation is poorly founded. There is no justification for increased labour costs, material costs. It is purely because of poor administration.	Luis	Western Cape		employed individual

	2026-01-11 09:49:15	No I do not	All of the above – we should not pay for government blunders	PUBLIC SUBMISSION – I OPPOSE the proposal to recover the R76 billion shortfall from electricity consumers. Affordability: Electricity is an essential service and a key input cost across the entire economy. Passing an admitted regulatory/ calculation failure through to end-users is inequitable, regressive, and economically harmful. It forces households and small businesses —already under severe cost-of-living pressure—to subsidise an administrative error they did not cause, and creates a dangerous precedent: if mistakes can be recovered from customers after the fact, there is no meaningful consequence for poor regulatory process, and no incentive to prevent repetition. This undermines predictability and trust in the tariff-setting regime. Reliability: Consumers should not be required to pay “full price” (including returns and depreciation) for aging and unreliable infrastructure while supply remains unstable, maintenance backlogs persist, and the service delivered is not consistent with the price charged. Any tariff determination must reflect outcomes and service quality. Cost recovery without enforceable performance obligations amounts to paying more for less. Efficiency and prudency: Consumers should not fund cash-flow gaps, construction delays, cost overruns, or inefficiencies through higher tariffs. These risks must rest with Eskom and, where applicable, the shareholder (the State), not be shifted onto captive customers. NERSA should apply strict prudency tests and “used-and-useful” principles, disallowing returns on assets/costs that are not demonstrably efficient, necessary, and delivering value to customers. Tariffs must incentivise operational discipline—not reward errors, delays, or weak governance. Process and remedy: The court’s rejection of a closed-door settlement underscores the need for transparency and meaningful public participation. NERSA should publish the full, independently auditable calculation basis and reject any approach that retrospectively socialises regulatory mistakes onto consumers. The correct remedy is internal accountability, process correction, and—if any funding is required—addressing it through shareholder/government mechanisms and enforceable efficiency reforms, not higher electricity prices for the public.	Jason	Gauteng		business owner
	2026-01-11 09:48:11	No I do not	All of the above – we should not pay for government blunders	Our government has blundered funds given by us the South African people (taxpayers) every year we pay taxes and every year we question where our tax monies are going. Mistakes made by those in government and those in power should not be put on the people, Time and time again Eskom has been bailed out by government, if they can just fix what’s been broken with what they have our problems could reduce. It’s easy to spend money and waste it when it’s not yours	Neo	Gauteng		employed individual
	2026-01-11 09:48:08	No I do not	All of the above – we should not pay for government blunders	I find it shocking that no accountability has been taken for the treasonous destruction of Eskom... I will not ever be in favour of bailouts when there has been zero accountability for damage done and money repaid that was looted... The South African Government is a complete disgrace and is completely to blame for the current status quo. Privatisation of benefits and socialisation of losses is not how democracy is supposed to work... This is abuse and not my concern any longer as i pay my taxes as one of the most highly taxed citizens in any country in the world... 	2026-01-11 09:44:18	No I do not	All of the above – we should not pay for government blunders	I am utterly appalled and enraged by NERSA's brazen attempt to shove a R76 billion blunder down the throats of South African electricity consumers. This so-called "recalculation" is nothing more than a desperate bid to paper over the government's catastrophic incompetence, rampant theft, and abject failure to manage even the basics of a functional society. How dare they expect us—the hardworking, already overburdened citizens—to foot the bill for their monumental screw-ups? Let's be crystal clear: this isn't just a "mistake"; it's a damning indictment of a government that can't even do simple math. R76 billion in calculation errors? That's not an oversight; that's willful negligence at best, and outright corruption at worst. For years, we've watched as billions vanish into the black hole of state capture, cadre deployment, and endless bailouts for Eskom's bloated, inefficient carcass. The ANC-led regime has proven time and again their total incapacity to run anything—power stations fall apart, loadshedding cripples the economy, and now they're admitting they botched basic asset valuations? It's laughable if it weren't so tragic. These are the same geniuses who can't balance a budget, maintain infrastructure, or prevent the pilfering of public funds by their cronies. Theft? It's embedded in the system, from tender fraud to executive bonuses amid blackouts. On affordability: Absolutely not! Why should I, or any South African, pay for NERSA's and Eskom's arithmetic idiocy? We've already been squeezed dry by inflation, unemployment, and skyrocketing costs—now they want us to subsidize their incompetence? This is economic violence against the people. On reliability: No way in hell should we pay full price for aging, unreliable infrastructure that's been neglected for decades due to government mismanagement. Eskom's plants are dinosaurs, held together by duct tape and prayers, because the powers-that-be prioritized looting over maintenance. We're not customers; we're hostages. On efficiency: Consumers funding Eskom’s cash flow crises and endless construction delays? That's a joke. Medupi and Kusile—billions over budget, years behind schedule, riddled with corruption—epitomize this government's theft-ridden incompetence. Why reward failure with more of our money? Enough is enough. This proposal must be rejected outright. NERSA, absorb your own errors, hold the thieves accountable, and for once, do the math properly before daring to ask us for a single cent more. South Africans deserve better than this kleptocratic farce.	Trevor	Gauteng		self-employed

	2026-01-11 08:46:59	No I do not	All of the above – we should not pay for government blunders	I firmly believe there can be alternatives to mitigating the issue at hand rather than making life unbearable for the consumer. As it stands, a lot of south Africans already cannot afford electricity and one of the major outcomes of this is illegal connection. The more prices rise (which they shouldn't), the odds are that illegal connections will skyrocket. Trying to raise electricity prices for people who already cannot afford the current prices is inconsistent with the duties and obligations of a government. Alongside that, we all know who, in South Africa, constitutes the upper class or the class (race) that can afford the ostensibly incoming exorbitant prices. Is this then a tactical reconstruction of who has access to electricity and the criteria is race? If the entire country were to go dark, we know which places wouldn't be dark, we also know which races and classes populate those areas. Illegal connections constitute a criminal offence. The people that are connected to electricity illegally are predominantly black/ racialised people. With the constant increases, more black/racialised people will be part of the problem. Is this not then criminalisation of these races and further reinforcing the stereotypes held against them?	Chuma	Western Cape		student

	2026-01-11 08:36:20	No I do not	All of the above – we should not pay for government blunders	I do not support the proposed electricity price determination. Consumers should not be required to absorb financial shortfalls arising from regulatory calculation errors or institutional inefficiencies. These costs should be addressed through accountability and corrective governance measures, not transferred to the public through higher tariffs. South Africa's public infrastructure is already in a state of serious decline across multiple essential services. Water infrastructure is a clear example. Due to persistently poor municipal service delivery and concerns about water safety, I had my household water independently tested. The results showed alarmingly toxic readings that were affecting my health, forcing me to install a water filtration system at my own cost of R28,000. There is no mechanism to recover such costs from the state, despite the failure originating in public infrastructure. Similar failures continue to impact communities, including recent sewage flooding in the Flamingo Vlei area following the failure of a critical pump and an unrepaired backup system. In such cases, insurance payouts ultimately penalise consumers through increased premiums, while accountability for infrastructure neglect remains absent. Electricity users are already paying the economic and personal costs of unreliable services, aging infrastructure, and inadequate maintenance across the public sector. It is neither fair nor sustainable to expect consumers to further subsidise these failures through increased electricity tariffs. Financial responsibility for regulatory errors and infrastructure mismanagement must rest with the institutions responsible, not with the public.	Charmaine	Western Cape		retired

	2026-01-11 08:33:00	No I do not	All of the above – we should not pay for government blunders	Dear NERSA, I submit this comment as a mother, homeowner, and small business owner. I also carry responsibility for elderly family members and young adults with special needs who cannot fully care for themselves. When public systems fail, families and communities absorb the impact — financially, physically, and emotionally. I am writing to formally object to any approach that shifts the cost of Eskom/Regulator calculation errors, omissions, or governance failures onto consumers through higher tariffs. 1) Affordability: we cannot fund institutional mistakes South Africans are already stretched beyond capacity. Households are cutting essentials. Small businesses are closing or downsizing. Many of us are supporting dependents because state systems are not meeting basic needs. It is unfair and unrealistic to expect consumers to pay “catch-up” amounts caused by errors and mismanagement. If mistakes were made, they must be addressed through accountability, consequence management, and internal recovery, not by billing the public. 2) Reliability: we cannot pay premium prices for unreliable delivery We are asked to pay more while service remains unstable and outages continue to disrupt work, schooling, caregiving, safety, and health. Electricity is not a luxury — it is an essential service. Any revenue increase tied to asset values must be linked to measurable reliability improvements, maintenance outcomes, and transparent performance commitments — not assumed as automatic entitlement. 3) Efficiency and governance: stop rewarding failure Consumers should not be used as a permanent safety net for cash flow gaps, construction delays, and operational inefficiencies while leadership incentives and remuneration continue to appear disconnected from outcomes experienced by the public. NERSA should require clear evidence of: • disciplined cost control and waste reduction • consequence management for negligence or misconduct • transparency on why mistakes occurred and how recurrence will be prevented • executive incentives aligned to reliability, affordability, and delivery (not paperwork targets) 4) Transparency and substantiation: no recovery without full proof If the redetermination relies on revised asset values, depreciation, or returns, then the supporting valuation, assumptions, and methodology must be fully disclosed, independently verified, and open to scrutiny. Consumers cannot be expected to pay first and “trust the process later.” 5) What I am asking NERSA to do I request that NERSA: 1. Reject any recovery of prior errors/omissions through consumer tariffs, or cap and phase any adjustment strictly on affordability grounds. 2. Require independent verification of valuations, inputs, and methodology before any increase is considered. 3. Include explicit consumer protections, especially for households, pensioners, and small businesses. 4. Publish a clear, plain-language explanation of the decision and how consumer interests were prioritised. Closing Families, businesses, and communities are at breaking point. We feel exploited by repeated institutional failures that are then handed to the public to fund. This must stop. NERSA’s duty is to regulate in the public interest, and that means protecting consumers from bearing the cost of mistakes we did not make. “At some point, unaffordable decisions don’t just create non-payment — they create instability. Please do not push ordinary people past the limit.”	Rene	Western Cape		business owner

	2026-01-11 08:22:23	No I do not	All of the above – we should not pay for government blunders		Eric	KwaZulu -Natal		
	2026-01-11 08:22:22	No I do not	All of the above – we should not pay for government blunders		Eric	KwaZulu -Natal		
	2026-01-11 08:21:57	No I do not	All of the above – we should not pay for government blunders	I object to the proposed electricity price determination insofar as it requires consumers to pay higher tariffs to recover costs arising from NERSA's own calculation errors in Eskom's asset values. Consumers should not bear the financial consequences of regulatory mistakes, particularly in the current cost-of-living crisis. It is also unreasonable to approve increased tariffs when electricity supply remains unreliable and infrastructure performance continues to decline. Consumers should not be charged full depreciation and returns on aging assets that fail to deliver consistent service. Furthermore, electricity tariffs should not be used to address Eskom's cash flow challenges or to compensate for construction delays and inefficiencies. Tariffs must promote efficiency and accountability, not transfer institutional risk to consumers. I urge NERSA to prioritise affordability, value for money, and fairness, and to reject any tariff increases that seek to recover regulatory errors, inefficiencies, or unreliable asset costs from consumers.	Adhleigh	Gauteng		employed individual
	2026-01-11 08:21:45	No I do not	All of the above – we should not pay for government blunders		Clive	Gauteng		retired
	2026-01-11 08:21:08	No I do not	All of the above – we should not pay for government blunders		Diane	Eastern Cape		retired
	2026-01-11 08:19:38	No I do not	All of the above – we should not pay for government blunders	The consumers already paid for their electricity which includes formaintaining and renewal. This should be done through the operational business plans. The miscalculation problem in terms of infrastucture etc, should . Get rid of the cartel mafia, have better control over the procurement processes and Eskom will have enough funds to sustain the miscalculation error	Thys	Gauteng		retired
	2026-01-11 08:19:02	No I do not	All of the above – we should not pay for government blunders		P A			
	2026-01-11 08:18:59	No I do not	All of the above – we should not pay for government blunders	I have been paying tax for 20 years. I have been paying my electricity bill for 20 years. I have been paying for a service I barely receive. If I make a mistake on my budget. I live with the consequences. Stop demanding that the South African people fix what you have broken when you have been provided with every resource to succeed. We have done our part, it's not our fault that you are riddled with corruption and mismanagement.	Annelize	Gauteng		employed individual
	2026-01-11 08:18:35	No I do not	All of the above – we should not pay for government blunders	Eskom made a profit this year - as a state utility this is not fair to apply the profit to pay executive bonuses yet expect burdened South Africa's that barley survive (and luckily to get a 3 percent salary increase) to keep on paying these high increases for a corrupt and failing system. Nersa made the mistake, Eskom can eat it	Ilze	Gauteng		employed individual
	2026-01-11 08:18:31	No I do not	All of the above – we should not pay for government blunders	Not my mistake. Not my problem.	Tiara	KwaZulu -Natal		business owner
	2026-01-11 08:18:31	No I do not	All of the above – we should not pay for government blunders	The more ESKOM keeps on this path of unaffordable electricity costs, its death spiral of inefficient operations, extremely high salary structure, self serving pyramid scheme of nonsense home-made fixed charges, the quicker it will implode into a non-existent, merely historical organisation. It will be overtaken by the people of SA's ingenuity, innovative adaptation and the quest for freedom and independence of another tyrant. ESKOM is setting itself up to fade away into a dim memory.	Ludwig	KwaZulu -Natal		business owner
	2026-01-11 08:18:06	No I do not	All of the above – we should not pay for government blunders		André	Western Cape		business owner
	2026-01-11 08:17:36	No I do not	All of the above – we should not pay for government blunders		Ernest	Eastern Cape		retired

	2026-01-11 08:14:30	No I do not	All of the above – we should not pay for government blunders		Noel	Gauteng		employed individual
	2026-01-11 08:13:04	No I do not	All of the above – we should not pay for government blunders	It is very unfair that the people, that is mostly the poorest of the people in SA has to suffer. Some in our communities can only afford to buy R10 electricity per day which doesn't even last for a full day. Everyday they must look for that R10 never mind what they gonna eat. Single households and pensioners trying to just survive the day. The electricity tariff are too high, it only caters for those who have more than enough but the bulk of it's cost comes from people who already had nothing.	Goas Chantal	Western Cape		unemployed individual
	2026-01-11 08:12:05	No I do not	All of the above – we should not pay for government blunders		Catherine	Western Cape		retired

	2026-01-11 07:45:26	No I do not	All of the above – we should not pay for government blunders	NERSA is the energy regulator for South Africa's consumers of a basic right. I think those 'blunders' were deliberate in order to make Eskom' s financial position look rosier than it actuality was and now it's very convenient to expect the long suffering consumers to foot the bill. NERSA definitely does not take their consumers into account when considering price increases, They blindly overlook mismanagement of our electrical supply system, corruption, ineptitude and far too many blunders and happily pass the cost of all of these onto us, the users. Enough is enough.	Cynthia	Gauteng

	2026-01-11 07:16:44	No I do not	All of the above – we should not pay for government blunders	To whom it may concern. Thank you for the information and for highlighting the opportunity to participate in this public comment process. As a consumer, I do not support any increase in electricity tariffs that requires me to pay for errors, miscalculations, inefficiencies, or financial shortfalls that are not of my making. I believe consumers should only be responsible for paying for the actual electricity used in their homes, at a fair and reasonable rate. It is not acceptable for the financial consequences of regulatory mistakes, aging infrastructure, or operational inefficiencies to be passed on to households who are already under severe cost of living pressure. Electricity must remain affordable, and accountability for errors should rest with the institutions responsible for them, not consumers. I therefore object to any proposed price determination that seeks to recover these additional costs from the public. Kind regards, Fiona Jamal	Fiona	KwaZulu-Natal

	2026-01-11 06:59:14	No I do not	All of the above – we should not pay for government blunders	As a Food Science and Legal Professional. I have seen first hand the direct affect that increases in electricity tariffs have on consumer goods at the point of sale. We have also seen job looses in sectors like those of manufacturing etc. The fact is that average consumers simply cannot keep up with the runaway price hikes dealt by Nersa.. South Africans are chronically expected to fork out more and more in order to address the epidemic that is crime, corruption and looting of state-owned entities in this country. There is simply no respite. At what stage do increases become entirely crippling to consumer.s We are seeing that take hold already. Nersa in its responsibility to regulate the price of electricity, also has the onus of ensuring that it’s price increases are rooted on accountability and fair and reasonable logic. Neither of which it has shown in recent years. This simply cannot continue, not because consumers disagree, but because it will lead to increases in crime, emigration, retrenchment, consumer sentiment and ultimately continue to erode our already unstable economy. 	2026-01-11 06:36:19	No I do not	All of the above – we should not pay for government blunders	Eskom is a milking cow for corruption. It is proof of total incompetence in management. Yet, their workers are some of the highest paid individuals. Their structure is top heavy and are their to provide high-paid jobs for the cadres while sitting in offices and doing very little, if anything. This is not being addressed, yet they expect the taxpayer to fund even higher salaries every year. It is a disgrace. In a normal corporate environment, the management would be 50 to 75% less with definite outputs and expectations. In Eskom they are however protected. The 76 Billion is due to management incompetence and should not be paid by taxpayer money. Eskom became a total disgrace. Typical proof of the incompetence of an incompetent government. Rather use the money to subsidize wind- or solar installations at households or businesses.	Schalk	Northern Cape		self-employed
	2026-01-11 06:35:02	No I do not	All of the above – we should not pay for government blunders	The solution is called Accountability . Eskom and the government should not expect the general public to foot the bill for ineptitude, theft and greed.	Jeannine	Western Cape		retired

	2026-01-11 05:58:53	No I do not	All of the above – we should not pay for government blunders	Repeated past mismanagement, including corruption, accounting errors and compounding institutional incompetence, are being continuously carried forward into all future pricing of Eskom services. This approach means that the future, i.e. the people who use these services including even unborn generations, will forever account for the errors of the past - an economic burden that then constrains and shrinks the entire economy and thus ALL citizens, including government budgeting and policy choices. These proposals thus amount to an incentive for continued unaccountability. Which is to say it makes unaccountability a principle in the continuing management of SA's energy sector. It is thus a lazy solution. Of course these are extremely complex problems - but avoiding that complexity is not acceptable. NERSA's job, right now, is to grapple with that complexity and find innovative alternatives, or else find people who can through an open national debate. Do your job. Think it out.	Shim	Western Cape		retired
	2026-01-11 05:58:46	No I do not	All of the above – we should not pay for government blunders	We the public are sick and tired of this incompetent government and Eskom reduce the number of overpaid Directors and employees and reduce the profits margins, these individuals are getting performance bonuses for non performance, we the public are Gatvol.	Cheryl	North West		retired
	2026-01-11 05:58:45	No I do not	All of the above – we should not pay for government blunders	Eskom has already failed the South African public many times in the past. 	2026-01-11 05:37:51	No I do not	All of the above – we should not pay for government blunders		Sumei	Gauteng		employed individual
	2026-01-11 05:37:32	No I do not	All of the above – we should not pay for government blunders	Affordability – No. People shouldn’t have to cover the cost when NERSA or Eskom mess up the numbers. Making households and businesses pay more because of someone else’s mistake just isn’t fair—especially when everyone’s already struggling with rising costs. Reliability – No. Tariffs need to match what you actually get. Why should anyone pay full price for old infrastructure that can’t keep the lights on? Charging more while service gets worse ignores the whole idea of pricing that reflects quality. Efficiency – No. It’s not right to ask consumers to bail out Eskom for its cash problems, project overruns, or construction delays. These are management issues that Eskom needs to fix on its own, not problems to solve by raising tariffs and pushing the burden onto end users. Cut excessive executive and senior management salaries that are disconnected from performance and service delivery.	Nico	Mpumalanga		employed individual

	2026-01-11 05:21:51	No I do not	All of the above – we should not pay for government blunders	Instead of increasing salaries at Eskom, it's time to start fixing their outdated infrastructure and stop increasing tariffs! Employees at Eskom have salary increases twice a year if not more. Salaries should only be increased when there is progress and not regress! There has been no progress at Eskom for the last 25 years. The day that there is no loadshedding for at least 10 years, then Eskom can increase their tariffs, but NOT BEFORE!!	Moti	Gauteng		employed individual
	2026-01-11 05:21:34	No I do not	All of the above – we should not pay for government blunders	They should recover money lost through corruption over the years in stead of milking the consumers over and over again. Eskom tariff increases should be limited to the official inflation rate, end of story!	Johan	Eastern Cape		retired

	2026-01-11 05:20:49	No I do not	All of the above – we should not pay for government blunders	Public Comment on NERSA's Proposed Electricity Price Determination (R76bn Adjustment) Submitted by: David Davies Affordability I object to the proposal that electricity consumers should be required to pay for historical calculation errors made by NERSA and Eskom. Errors in asset valuation, depreciation, or regulatory determination constitute institutional and governance failures. Passing these costs on to consumers violates the principle of fairness and undermines confidence in the regulatory system. Consumers did not cause these errors and should not be retrospectively penalised for them. If regulatory mistakes can be recovered from users after the fact, there is no meaningful accountability or incentive for accuracy within the regulatory framework. Reliability Electricity tariffs are justified by the delivery of reliable supply. South Africa's electricity system has been characterised by ongoing load shedding, declining reliability, and ageing infrastructure. It is unreasonable to charge consumers full depreciation and returns on assets that do not consistently deliver electricity. Cost recovery must be linked to performance. Where infrastructure fails to meet service standards, full cost recovery is not justified. Efficiency The proposed adjustment effectively asks consumers to fund Eskom's cash flow shortfalls, construction delays, and operational inefficiencies. This creates moral hazard by rewarding inefficiency and shifting risk from the utility and regulator onto households and businesses already under severe economic pressure. Before any additional recovery is considered, NERSA should require clear accountability for the original errors, demonstrable efficiency improvements, and measurable improvements in reliability. Conclusion The proposed recovery of R76 billion transfers institutional failure to consumers, undermines affordability, and weakens regulatory credibility. It does not address the structural causes of Eskom's financial and operational challenges. I therefore oppose the proposal to recover these costs from electricity users.	David	Eastern Cape		business owner
	2026-01-11 05:17:21	No I do not	All of the above – we should not pay for government blunders	Before the advent of government change our power, system was considered as one of the best in the WORLD. the present Eskom obviously has no idea of what it is doing. To grant them this extraordinary sum of funds to squander is a disaster for the country as far as the attraction of investment and the general economy of our great country. the people of South Africa are not their loan bank. let Eskom fund their mistakes elsewhere.	michael	Western Cape		retired
	2026-01-11 05:16:56	No I do not	All of the above – we should not pay for government blunders	Om koste direk van verbruikers te verhaal, ontken enige vorm van aanspreeklikheid – ongeag die gemors met Eskom, ons bly meer betaal. 	2026-01-10 23:02:12	No I do not	All of the above – we should not pay for government blunders	It's not our responsibility to pay for a"mistake" that the company did, it is between Eskom and nersa to settle their bill without the public being forced or indirectly made to pay for such. The person responsible for this must take accountability for their actions, the issue is that majority of the country is not employed, meaning that people who can barely afford a loaf of bread will now be left with hunger even more. The people at the top will not suffer theses consequences , but those that are below who suffers the most. I am pretty much sure that if soccer players and the government donated of which it's still not fair, the bill would somehow be lessened. If the public is made to account for this mistake, this will cause more damage than it is already on our low economy because business will suffer as most people will no longer afford the increased prices, thus increasing crime rate as people are trying to survive the crisis at hand.	Sibanyoni	Gauteng		student
	2026-01-10 23:02:12	No I do not	All of the above – we should not pay for government blunders	It's not our responsibility to pay for a"mistake" that the company did, it is between Eskom and nersa to settle their bill without the public being forced or indirectly made to pay for such. 	2026-01-10 22:07:49	No I do not	All of the above – we should not pay for government blunders	NERSA's proposal to recover R76 billion from electricity users is unacceptable in a country already under severe economic strain. Households and businesses are grappling with high food prices, rising interest rates, fuel costs, and stagnant incomes. Electricity consumers are being asked, once again, to absorb the consequences of systemic failures they did not create. This approach entrenches inequality, weakens economic growth, and places additional pressure on small businesses, municipalities, and vulnerable households. It also undermines public trust in energy governance by normalising the transfer of inefficiencies and mismanagement onto compliant users. South Africa needs a decisive shift towards accountability, cost discipline, and structural reform within the electricity sector. Recovery mechanisms must prioritise efficiency gains, waste reduction, and internal reprioritisation before any further burden is placed on the public. Electricity is a public good and an economic enabler, not a revenue backstop for failure.	Amanda	Gauteng		
	2026-01-10 22:07:18	No I do not	All of the above – we should not pay for government blunders	All those redponsible for the blunder must pay for it. Assets, pension must be attached.	Ndumiso	Gauteng		employed individual

	2026-01-10 21:27:49	No I do not	All of the above – we should not pay for government blunders	For years already the people of this country has been suffering under increased prices for electricity, water, fuel and food! Ever so often these commodities get price increases. We pay our municipal bills every month for electricity that keeps giving problems and we sit in the dark for hours, due to faulty and old lines and all manner of outdated, old and faulty equipment. Tax and rate payers are struggling tremendously. Yet we are expected to pay more and more and more for something that does not even work properly! That is not fair! For years now we've had to pay for our government and Eskom's faults and mistakes and corruption! That is not fair! Our government should start looking after it's people! After all, it is our tax money that pays their salaries and all the rest! Deduct from their salaries (which is our money, by the way!) to correct their mistakes! Hopefully then they will learn to do things properly! Hold them responsible and accountable for their own mistakes, faults and corruption!	Janique	Western Cape		self-employed
	2026-01-10 21:27:26	No I do not	All of the above – we should not pay for government blunders	Wasteful expenditure and mismanagement by Eskom	Deon	Gauteng		employed individual

	2026-01-10 21:04:02	No I do not	All of the above – we should not pay for government blunders	The only problem is..... The government money is our tax money. There is no surplus to cover , and die to the way that tax is collected . We inevitably pay this costs anyway. Its pointless holding Eskom accountable as they need our taxes inmorder to supply the service. Its a lose/lose situation. Hold the Management accountable let their bonuses pay for this as it's our tax money anyway.	Neil	Outside SA	United kingdom	employed individual
	2026-01-10 21:03:47	No I do not	All of the above – we should not pay for government blunders	I am against this R76 billion adjustment because it forces South African households and businesses to foot the bill for a massive calculation error made by the regulator. We are already facing a 12.7% increase this year, and adding a further 'correction' on top of that—which could double next year's hike—is economically unsustainable. It is fundamentally unfair for consumers to suffer the consequences of NERSA's bad math and Eskom's historical inefficiencies. These constant, above-inflation price shocks are driving up the cost of living and making it impossible for struggling households to survive, all while we are being asked to pay more for an aging and often unreliable power grid. 	2026-01-10 20:11:51	No I do not	All of the above – we should not pay for government blunders	I do not support the proposed electricity price determination. South Africans are already under severe financial pressure due to the rising cost of living, stagnant wage growth, and repeated increases in administered prices. Asking consumers to absorb the cost of historical calculation errors made by NERSA and Eskom is fundamentally unfair. These errors were not caused by electricity users, and it is unreasonable to expect households and businesses to pay for regulatory and accounting failures through higher tariffs. Furthermore, consumers are being asked to pay full price for an electricity supply that remains unreliable. Persistent load shedding, aging infrastructure, and delayed maintenance have resulted in a service that does not reflect the cost being charged. Higher tariffs without meaningful improvements in reliability or performance undermine public trust and place further strain on the economy. Finally, passing these costs onto consumers creates no incentive for improved efficiency or accountability within Eskom or the regulatory framework. Funding cash flow shortfalls and construction delays through tariff increases simply shifts risk away from those responsible and onto the public. Electricity is a basic economic input. Decisions around pricing must balance financial sustainability with fairness, accountability, and affordability. This proposal fails to do so and should not be approved. 	2026-01-10 20:01:06	No I do not	All of the above – we should not pay for government blunders		Anne-Marie	Western Cape		unemployed individual
	2026-01-10 20:00:59	No I do not	All of the above – we should not pay for government blunders	I do NOT agree that the consumer should carry the additional financial burden of funding Eskom's incomplete construction projects and operational cash flow through increased electricity prices. WE SHOULD NOT PAY FOR THEIR INCOMPETENCE	Irma	Western Cape		retired
	2026-01-10 20:00:03	No I do not	All of the above – we should not pay for government blunders	Electricity is expensive enough. Eskom needs to get their house in order and consumers should stop having to bear the brunt of the corruption and mismanagement at that parastatal. Mistakes like this should not be the problem of the consumer.	Diane	Western Cape		self-employed
	2026-01-10 19:59:01	No I do not	All of the above – we should not pay for government blunders	It's a slap to the face of every citizen for the government to ask us to pay for being caught stealing from us.	Muhammed	Western Cape		
	2026-01-10 19:57:33	No I do not	All of the above – we should not pay for government blunders	I am sick and tired of Governments incompetency and then the general public must simply bail them out every time. I'm tired of being lied to By our presidents telling us how they plan to improve our lives How no more children will drown in pit toilets how they will see to all Schools having flushing toilets… And yet…. 30 Years later, children still drown in pit toilets. NOTHING ever gets done or done right . And when they order trains that cost us billions that don't fit On our rails, no one gets the blame, life just goes on, all the mistakes of the government is paid for by us the tax payers. I Wouldn't mind to Pay these high tax rates if I knew that my money was going towards a good cause. That it would be spent to Uplift all society, the poor as well as the middle and upper class. But this is simply just wasted. Here Nersa makes a 'mistake' but don't worry…. The general public will make up for the fact that they can't run a company properly, or make accurate calculations. It's not a joke, we're tired of the world laughing at our stupidity.	Michelle	Western Cape		self-employed
	2026-01-10 19:57:07	No I do not	All of the above – we should not pay for government blunders	What the hell is this - the governmenmt screws up, due to incompetence and corruption and then they want the already overburdend consumer / public to foot the bill ??? NO way ! Go after those who stole millions from Eskom to get the money back ...!!!	Gerhard	Outside SA	Brazil	retired
	2026-01-10 19:53:51	No I do not	All of the above – we should not pay for government blunders	What are the consequences for the people that makes these errors, and with eskom having reduced demand, what are we doing about excess staff or does eskom keep staff like transnet - no trains, but the staff quantity remains the same. Can we have an independent assessment of the staff requirements for eskom and why bonuses are paid despite the tax payers funding their shortfalls.	Hendrik	Gauteng		employed individual

	2026-01-10 19:18:10	No I do not	All of the above – we should not pay for government blunders	Just more money from already over taxed raxpayers and more opportunity for the thieving state to steal and plunder..	Chris	Western Cape		self-employed
	2026-01-10 19:18:01	No I do not	All of the above – we should not pay for government blunders	Eskom and every other SOE has been run into the ground by the incompetence and corruption of the cANCer; all the while ignoring and belittling anyone who dared to suggest things were not going well. The party is over and the shit is hitting the fan; Just don't think that the overloaded and tired South African citizen is coming to save your rotten corrupt arses. Best you go ask your commie pals Russia or China for another bailout or sell another nuclear weapon to Iran.	TRACY	Gauteng		self-employed
	2026-01-10 19:17:25	No I do not	All of the above – we should not pay for government blunders	Why must we pay for this corrupt government and for Eskom and Nersas fault try to get the money from the fat parlement we are sick and tired of these we people are struggling and you make us poorer and poorer what about our pensioners that can't afford it we are already using çandles	Petro	Western Cape		retired
	2026-01-10 19:16:52	No I do not	All of the above – we should not pay for government blunders	South African citizens should not be forced to pay for financial and operational failures that were not of their making. Eskom's mismanagement, cost overruns and poor governance occurred under the watch of both Eskom and NERSA. Shifting an additional R76 billion onto consumers unfairly punishes households and businesses already battling high tariffs, inflation and unreliable electricity. Our government consistently fails to act in the interests of its people, while corruption and looting drain our country's resources. We are angry, exhausted and fed up with being treated as an endless source of revenue. Accountability must lie with those responsible, not the public who have already paid the price for years of failure.	Micaela	KwaZulu -Natal		unemployed individual

	2026-01-10 18:43:06	No I do not	All of the above – we should not pay for government blunders	No proper accountability for error - no support from me or my business or from my money - I will do anything in my ‘power’ to rid my life of Escom	Rian	Free State		business owner
	2026-01-10 18:43:03	No I do not	All of the above – we should not pay for government blunders	The objection to citizens if RSA to pay for the Nersa-Eskom blunder can be summarised as: 1 Affordability: Should you pay for NERSA's calculation errors? 2 Reliability: Should you pay full price for aging, unreliable infrastructure? 3 Efficiency: Should consumers fund Eskom’s cash flow and construction delays? The bigger dilemma is the incapability of the RSA government to manage the intricate complexities of a First World country that was elected under ANC rule in 1994. Throwing money at the problem is irrational because the bottomless pit present in RSA that was evident from Day one after the 1994 elections. There is most likely in the mafia (illegal, criminal gangster controlled) economy of RSA that runs parallel to the official economy, more than enough money to fund a fundamental turn around to pre 1994 era in RSA. We need Christian leaders as well as clerks in RSA, throughout all layers in society, to acknowledge and act on this. The mafia state will not and can not see and act in the darkness it created and is rotting in. We don't have to solve anything but our moral fibre through obedience to and reliance on God our Father, through Jesus Christ. We need to die to be born afresh into a new life by the Holy Spirit	Casper	Mpumalanga		self-employed

	2026-01-10 18:10:14	No I do not	All of the above – we should not pay for government blunders	In my opinion all of the above problems,mishaps,corruption,blunders can be put squarely in front of the feet of the goverment. The goverment had mislead so many people in South Africa that it is unbelievable. The consumer pays for everything, even all the blunders of the goverment. Too many individuals are placed in certain positions under the false pretence of job creation. The reason to placed into positions to aid goverment in fraudulent, corruption based to abuse the powers bestowed onto them . Most people in these positions keep quiet about the different forms of corruption to benefit from the corrupt actions . Others are sworn to secrecy and forced to keep quiet about all the wrong doings of the person's who are part of it in fear of their or loved ones safety. Those who refuse and maintain their plans,words and actions to bring the blunders and corruption into the light for the rest of the country and the world to see simply pay with their lives(whissel blowers etc.) Sudden deaths,accidents etc. in my opinion says it all. Ask yourself why is all the people responsible for corruption and blunders not behind bars with their bank accounts and assets frozen ,salaries stopped and lifted out of their comfy positions. Such people must REALY BE PROPERLY INVESTIGATED AND APON FINDINGS OF WRONGDOING BE DISMISSED FROM THEIR POSTS,ALL THEIR ASSETS SOLD AND ALL THE MONEY USED TO PAY FOR ALL THE BAD DEBT OF OUR COUNTRY,NOT THE TAXPAYER. THE OERPATRATERS MUST NOT BE EXCUSED THEY BELONG IN JAIL AND BEVTREATED LIKE CRIMINALS,BECAUSE THEY ARE NOTHING LESS. SOUTH AFRICA had an excellent ESCOM, POLICE SERVICE,DEFENCE FORCE,SAA for example. Now all is gone. Money is borrowed from Russian and Chinese counterparts and so many others and the goverment has nothing to show of it. SAA is still bankrupt,South African Railways is a mess,our roads in the country is a mess whilst Cyrill has paved roads on at least one of his game farms in Limpopo. The infrastructure of our country is a mess. All because of greed for power and money of leaders who do not care about people who are plainly there to pay their taxes in order for the goverment to steal more. The country is suffering under the yoke of the goverment making all sorts of laws to promote their corruption minds and actions. Many peoples municipal accounts are sky high and are not paid and to top it all such people are lying about their staus claiming to be unemployed(even write affidavits at different police stations) ,yet they have good jobs with decent salaries.(driving around in their luxury vehicles,wearing crocodile leather shoes,Gucci clothing etc.) Some goverment officials and others in other organisation's are in short openly corrupt fearing nothing or nobody. Others plainly turn a blind eye out of helplessness and or fear thinking there is nothing they can do. This platform is exactly what they need to bring all that is bad and corrupt in nature to the light. Last but not least our country used to be a top destination,beautiful with ample resources, a place to admire. Now it is a mess and a laughing stock for the rest of the world and those who are realistic with the eyes open and minds set on what us good for everybody.	Leon	North West

	2026-01-10 18:07:53	No I do not	All of the above – we should not pay for government blunders	As it stands currently, South African's a burdened with high tax rates, high unemployment and a lack of service delivery while the government and regulating bodies continue to make it more difficult for the average South African to put bread on the table leading to majority of the population living below the poverty threshold. It is unfair and unethical that an average South African that strives to survive has to foot the bill to make up a R76 billion rand mistake that was made a regulating body- an institution that ought to be fair and considerate when it comes to affordability of a basic human right-electricity. As it stands, electricity is barely affordable with majority of the households trying to survive poverty and barely being able to afford basic food, this R76 billion mistake that South African are expected to pay is not only a slap in the face of struggling South Africans, but it is an insult and a disregard of the basic human right of the people of this nation, With that said, I conclude by rejecting the proposed idea that South African are to foot the R76 billion rand miscalculation error made by NERSA . 	2026-01-10 17:58:25	No I do not	All of the above – we should not pay for government blunders	The official title of government is “public servants”. With all that is going on in the country, we see more and more public serving the government, yet the public need to constantly serve the government. It needs to turn around. We can’t afford this hike in price. We are already over taxed by our government. I am very skeptical on the process of redetermining and settling. The fact that it was done in secret seems, as with most government dealings, very suspicious of corruption. We need investment into more efficient power plant, with oversight given by private companies. Nuclear power is the future	Johan	Western Cape		employed individual

	2026-01-10 17:31:56	No I do not	All of the above – we should not pay for government blunders	The last 15 years have seen gross mismanagement at Eskom. This has allowed corruption and fraud to take place robbing South Africa of one of its most valuable resources. Therefore NERSA and ESKOM must bear the cost of mistakes. R76 Billion is an enormous amount and I for one do not believe their calculations. My understanding is that the incorrect method has been used for many years and this is an accumulated amount. To expect the consumer to carry the cost is quite frankly ludicrous. It is too late to expect the consumer to cover the cost of these mistakes. It certainly looks like ESKOM is trying to recover money lost due to mismanagement and the previously stated consequences. Cost overruns on new plants such as Medupi and Kusile can not be the responsibility of the consumer. ESKOM must be managed the same way a private business is run. Cut labour as they are grossly over staffed. Ensure ALL appointments are made on merit and consequence management is practiced. Shut down plants that have reached their end of life. 	2026-01-10 17:30:10	No I do not	All of the above – we should not pay for government blunders	I agree with others that Eskom should be privatised. The current debt should be levied against corrupt individuals from Government all the way down to corrupt citizens involved. Not ALL consumers! I believe that Private Individuals should be the ones running Eskom in bite sizes to create competitive scaling of electricity prices. When one individual becomes too greedy, / corrupt / a poor service deliverer, one could then turn to another who will run with Integrity , honesty and accountability. Poor / improper and no education has been a critical factor in the running of our Country too. All MASSIVE, POWER HUNGRY CONGLOMERATES are to be minimized too.	Antoinette	Western Cape		
	2026-01-10 17:29:26	No I do not	All of the above – we should not pay for government blunders		Janet	Gauteng		
	2026-01-10 17:28:32	No I do not	All of the above – we should not pay for government blunders	It is already costing us so much to pay the bills, our government should find other ways to recover this loss.	Ronelle	KwaZulu -Natal		self-employed

How does this government expect the people they are meant to SERVE, to pay for mistakes and pathetic service? Enough is just enough!	Linda	Limpopo		retired
	2026-01-10 17:04:39	No I do not	All of the above – we should not pay for government blunders	Affordability- I don't believe we should pay for NERSA's calculation errors. It's time for the government to realise that fee education does not work. It produces individuals who do not appreciate or honour what they are doing and lacks accountability. At the end of the day education does cost the individual time, money, sweat and tears to make us better at our professions and care about what and how we do things, and being accountable and take responsibility for our mistakes. This is unaffordable for the average and majority of South Africans. Reliability- Poor planning, corruption and theft has lead to the aging, unreliable infrastructure. I don't believe the previous government can be held responsible for this given the amount of years in our democracy. Until these issues are successfully addressed and proven to be sustainable in the success outcomes, I believe paying the full price is like throwing money down a rabbit hole. So no we should not pay the full price. Efficiency - We should not fund Eskom's cash flow and construction delays. I believe these issues are the result of corruption, incompetence, and tenders being awarded to BEE companies who are there just to take the government's money with little to no expertise or infrastructure to do the job. That's at least one reason for the backsliding. I think the power generation for our country should be in the private sector and not in charge of the government sector. I do have my concerns on the private sector charging us fairly, however this could be regulated by the government. I do believe the private sector could deliver the efficiency and sustainability the country needs.	Jean-Pierre	Eastern Cape		employed individual
	2026-01-10 17:03:20	No I do not	All of the above – we should not pay for government blunders	The whole Eskom operating model is broken, it should be flipped to run like a business and rather than pass on inefficiencies to consumers, dead wood should be disposed of. Electricity is becoming unaffordable for consumers and we cannot just keep footing the bill	Werner	Western Cape		employed individual

	2026-01-10 16:43:58	No I do not	All of the above – we should not pay for government blunders	We are struggling to survive daily. Food, schooling, electricity and all other costs have increased exponentially and we are STRUGGLING. Imagine what this additional increase from Nersa will do to the cost of EVERYTHING. No, we as the public and consumers can not be held accountable for their mistakes. We are dying out here. If Nersa were private sector, they would all have been fired! In fact, why have so many boards and people layers (municipalities) between Eskom and the users. All they have done is generate additional costs which we already carry. How about municipalities pay outstanding debt to Eskom (how, I don't know). That should cover the million dollar mistakes! Electricity MUST be VAT free. Users buy directly from Eskom. Now that load shedding is 'sorted', let Eskom focus on illegal usage and non payment. Every single household must be on prepaid and we buy direct (job creation and automation) from Eskom. All people employed by boards can retire. Start with clean slate. Sick of the abuse from municipalities and government Why no intervention from government on this We pay way too much for electricity already !!!!! Please please remove municipalities from the supply chain	Patricia	Gauteng		retired

	2026-01-10 16:27:23	No I do not	All of the above – we should not pay for government blunders		Robert	Gauteng		retired
	2026-01-10 16:25:10	No I do not	All of the above – we should not pay for government blunders	We simply cannot afford to cover another price hike nevermind an additional R76 billion mistake. People are going to have to forgo unsing power if it gets much more expensive which will result in less income for Eskom. Alternatively, those who can afford it and who haven't yet gone off grid will now be even further motivated to do so, once again resulting in less revenue. They will be biting the hand that feeds them so to speak.	Laurianne	Gauteng		employed individual
	2026-01-10 16:24:41	No I do not	All of the above – we should not pay for government blunders		Paul	KwaZulu-Natal		retired
	2026-01-10 16:24:06	No I do not	All of the above – we should not pay for government blunders	Pensioners CANNOT afford this. Not prepared to pay for just another BLUNDER!!	Joletta	Western Cape		retired
	2026-01-10 16:23:34	No I do not	All of the above – we should not pay for government blunders	Once again, going for the low hanging fruit. When will you decide that the root of the problem needs to be URGENTLY addressed. Upping the tariffs every year until your product is totally unaffordable for most of the population, is not a solution, it's just lazy thinking and kicking the problem down the road.	Terry	Western Cape		retired
	2026-01-10 16:23:05	No I do not	All of the above – we should not pay for government blunders		Tumelo	Gauteng		self-employed
	2026-01-10 16:22:41	No I do not	All of the above – we should not pay for government blunders	Utter nonsense. The law abiding citizen should not be held responsible to pay for mistakes by ESCOM and NERSA. All these little pop-up shops in towns with illegal connections, hamper service delivery of legally connected shops. Nothing is being done to prevent or stop it. The fact that many users do not pay their utility bills and get everything for free or hardly pay for it, contributes to ESCOM's problem. Increase after increase after increase, it is killing us. With food prices continue to increase on top of electricity rates, we hardly survive. Not all have the funds to afford alternatives such as wind, gas or solar. Corruptuon, poor maintenance of infrastructure, people with no knowledge in positions they know nothing about, utility bills not being paid by certain members of public (who brags about it), writing off of debts (false statements given of financial status), etc. All of the above is a contribution towards the current problem. Do something about it. Appoint trustworthy and competent people in key positions with REAL knowledge and experience of the enterprise/utility/company. People who knows what they're doing and how to handle problematic situations with REAL solutions. Where corruption and mismanagement is a no-go. Only then can SA pick themselves up from the dirt. We once were the country with the best utility for electricity in the world... It won't happen overnight, but with the correct team on board, we might see progress for a better future.	Elmarie	North West		unemployed individual
	2026-01-10 16:22:14	No I do not	All of the above – we should not pay for government blunders	They must decrease the number of officials at the parliament and decrease or not give the officials that will remain and review their benefits. That will be a good starting point to get a lot of money. We as taxpayers and normal citizens are already overloaded with these unnecessary burdens and we can't always try to save this country while the so called decision makers are collapsing it	Nonhlanhla	Mpumalanga		employed individual
	2026-01-10 16:22:03	No I do not	All of the above – we should not pay for government blunders	The population of our country is already at a financial breaking point, and making an essential service inaccessible for the families that depend on this government to look after us, is indefensible, unjust and morally wrong.	Deborah	Gauteng		
	2026-01-10 16:21:49	No I do not	All of the above – we should not pay for government blunders	Pay for your own mistakes to much money taken from citizens for the regime to steal	Thelma	Gauteng		retired

	2026-01-10 16:02:43	No I do not	All of the above – we should not pay for government blunders	Incompetent people are paid overinflated salaries and we refuse to pay for their Incompetent mistakes. We simply cannot afford to pay for their mistakes. Let the ministers take responsibility. Put qualified people in place. Furthermore the infrastructure is old and unreliable .	Chris	Western Cape		employed individual
	2026-01-10 16:01:21	No I do not	All of the above – we should not pay for government blunders	I say enough is enough we sit sometimes for days without electr this must stop we pay our account every month but the shit does just carry on and on someone must derail this gravy train and therefore the ballot is the only way take this Cyrillic and his clan n out so I say NO NO NO NO to this tariff hike	Phillip	Free State		retired
	2026-01-10 15:59:49	No I do not	All of the above – we should not pay for government blunders	NERSA as a regulatory entity is questionable. It doesn't have the interest of consumers at heart. Our tariff increases despite suffering load shedding for more than a decade makes no sense. Eskom should decrease their tariff within South Africa considering the length of time for which they did not adequately provide a service and the mismanagement of the entity which adversely affected consumers- Why was NERSA not actively advocating for ESKOM to pay reparations to consumers by advocating for drastic decreases in tariffs for the same length of time that the entity was making the entire nation and economy suffer the lack of service provision. Also because of the inequity of our economic landscape, most consumers are stretched beyond belief by inflation. All this will achieve is to drain consumers who already have very little- it's Shameful!!!	Mierzaan	Western Cape		employed individual

	2026-01-10 15:58:52	No I do not	All of the above – we should not pay for government blunders		Patricia	Gauteng		retired
	2026-01-10 15:58:40	No I do not	All of the above – we should not pay for government blunders	If I made a fault and jumped the robot while driwing somewhere . Does this become the problem for my neighbour to pay the fine? That is redicules and ludicrause from Nersa to expect from me to pay for their mistakes and faults and incompitency. No no no everybody else pay for their own mistakes. SO MUST THEY let them who are paid massive salaries take accountability and pay it personally, from their salaries, that is the only way we will get rid of incompotent cadares	Johan	North West		retired
	2026-01-10 15:58:15	No I do not	All of the above – we should not pay for government blunders	ESKOM & NERSA must be held responsible, to sort out the mess ! The South African people are not responsible nor should we have to sort this out.	Shelley	Western Cape		business owner

	2026-01-10 15:31:38	No I do not	All of the above – we should not pay for government blunders	I have a few concerns with the total approach,. The man in the street can not afford bread, or basic food even but they believe increasing to recover their mistake is a good idea? I want to discuss them as following: 1) Depreciation of Eskom assets. As I understand, there is a cost to be built into the electricity tariff to cover the replacement of depreciating assets. This is understandable in a business context, where depreciation has tax implications. However, in the case of Eskom that is supposed to be a cost-based service provider, and not a company with a profit incentive, this is irrelevant. What should be done is to have a long term, viable plan for new assets to continue delivering electricity, and the cost in the tariff should reflect this cost. How much capital has been spent in the past is irrelevant, especially if a move away from coal-based generation is considered. 2) Responsible spending of funds. In the paper, the statement is made "The Multi-Year Price Determination (MYPD) is a process of determining allowable revenues for Eskom. This approach is a cost-of-service, rate of return-based method with incentives for cost savings, efficient and prudent procurement by the licensee (Eskom)." Unless Eskom starts to honour this approach, there should not be an increase in tariffs. Why do we need to pay for inefficient spending practices (including BEE spent). Eskom should first get its house in order to reduce wasteful spending before being allowed to increase tariffs. 3) Projects already in progress. This links to the point above – Eskom needs to get its house in order to reduce wasteful expenditure on projects, and deliver on time and in budget before they should be rewarded with increased tariffs. Why so we need to pay for Eskom inefficiency in project execution. 4) Apply money already in the process. While this is not mentioned in the paper, the massive municipal debt need to be addressed before asking for more money. Government needs to intervene, and use methods available to them to force municipalities to pay. As an example, why does Government not pay Eskom on behalf of municipalities from central tax funding, thereby making it impossible for municipalities not to pay their debts? 5) Where should Eskom get the money, if not from tariffs? The only other source of income would be tax money, also paid for by consumers. It is therefore imperative that Eskom should no longer be allowed to blunder along. If its management is not up to the task, it should be replaced, and not with "golden handshakes", but with replacement in shame. 6) Can the public afford it? I think this question has already been answered. The current cost of electricity is already above the means of a significant portion of the public, and that portion is increasing. Further increases may well lead to a point where private generation becomes economically viable, often at high cost to the environment. Neither the public, nor the general economy can afford electricity pricing that stifles economic growth. As a government institution, Eskom needs to start fulfilling its duty to the public, the economy and the Government (a.k.a. the taxpayer).	Lesley	Gauteng		unemployed individual

	2026-01-10 15:24:49	No I do not	All of the above – we should not pay for government blunders	In 1994 the ANC took responsibility for improving the quality of life for people without access to jobs, finances. I voted for them, with pride in the dignity and wisdom of their leaders. It's now 31 years later, and the corruption of this party has degraded most aspects of government services and functioning of SOE's. Of course the past is to blame. Nothing to do with the Cadres inability to take responsibility to actually do their work. 31 years of this. Is the quality of life for the masses better off now? Why don't corporations invest their billions in the economy? Does blaming the past still hold a shred of legitimacy? I for one have lost ALL trust for the ANC. I'm embarrassed for the great amazing leadership of the ANC great past. Their current blame is hollow and empty. Only the echoes of their wailing resounds in the cracks and crags. They filter into our ears, while the finances fill the pockets of the corrupt and incompetent. NOT ONE person who stole from the people that NERSA are forcing to finance their incompetence, has been put behind bars. In what way did the Zondo commission impact justice meets out? The ANC have lost all credibility and the NERSA Escom debacle is the next example of an economic environment littered with their filth.	Nigel	Western Cape		
	2026-01-10 15:24:29	No I do not	All of the above – we should not pay for government blunders	South Africans watch on a daily basis how our once beautiful country is driven into the ground by unnecessary mistakes, corruption, poor maintenance of infrastructures, wrong people in positions they know nothing about, etc. For years on end we are paying the price for these. Units blew up, communities without electricity for days. Illegal connections by pop-up shops which overload the circuits where shops in the vicinity pay the price of electricity cuts and nothing is being done to stop it. Some people in our society get everything for free, hardly pay or just don't pay utility bills at all (and bragging about it) and get away with it as their debts are written off, but we suffer the consequences when we don't pay. Increase after increase after increase. Many people hardly survive monthly as electricity and food price increases cut your throat, but we must pay or stay without it. Not everybody has the money to make use of solar, gas or wind alternatives. It is unfair to expect us, the law abiding citizen, to pay for mistakes made by companies/utilities. 	2026-01-10 15:08:46	No I do not	All of the above – we should not pay for government blunders	I do not support the proposed electricity tariff increases. The current determination unfairly transfers the burden of regulatory and operational errors onto consumers, who are already struggling under the rising cost of living. Key Concerns 1. Affordability Consumers should not be required to pay for NERSA's admitted calculation errors, amounting to a R76 billion mistake. These errors must be absorbed and corrected within the regulatory and utility framework, not passed on to households and businesses. Ordinary citizens cannot be expected to subsidize mistakes that were beyond their control. 2. Reliability South Africans are being asked to pay full price for electricity infrastructure that is aging, unreliable, and prone to breakdowns. Load shedding continues to disrupt daily life, education, and economic activity. It is unreasonable to demand higher tariffs for a service that fails to deliver consistent reliability. 3. Efficiency Eskom's inefficiencies—including cash flow problems, construction delays, and mismanagement—should not be rewarded through tariff hikes. Consumers funding inefficiency creates no incentive for reform. Accountability and operational improvements must precede any request for additional financial support from the public. 4. Corruption Corruption has been a persistent issue within Eskom and the broader energy sector, contributing to inflated costs, stalled projects, and diminished public trust. Passing the financial consequences of corruption onto consumers is unjust and undermines confidence in both Eskom and NERSA. Until corruption is decisively addressed and transparent governance is restored, tariff increases cannot be justified. Conclusion The regulator's duty is to protect the public interest. This proposal punishes citizens for errors and inefficiencies beyond their control. I therefore reject the proposed tariff increases and call for a fairer, more accountable solution that does not make ordinary South Africans pay for regulatory mistakes and systemic mismanagement. 	2026-01-10 14:49:22	No I do not	All of the above – we should not pay for government blunders	ABSURD - if a business has blundered, they should not expect their customers to pay for it. But that's obviously too profound a principle for some South Africans to understand.	siegfried	Western Cape		retired
	2026-01-10 14:49:19	No I do not	All of the above – we should not pay for government blunders	ABSURD - if a business has blundered, they should not expect their customers to pay for it. But that's obviously too profound a principle for some South Africans to understand.	siegfried	Western Cape		retired
	2026-01-10 14:49:19	No I do not	All of the above – we should not pay for government blunders	Consumers are suffering. Food prices increase by at least 10% each month, despite the so-called interest rate (which is utter nonsense if you track actual prices). And now you want South Africans to foot the bill for the government's and Eskom's mistakes? If you didn't run our power utility - which was world-class under pre-ANC rule - into the ground, and allow decades to go by without adequate upkeep, improvement, and retaining of qualified staff, Eskom would not be in this position. So find your own money, the consumer is not interested in paying for your mistakes.	Erin	Western Cape		unemployed individual
	2026-01-10 14:49:13	No I do not	All of the above – we should not pay for government blunders	We are not Eskom Shareholders (that would be the government) - we are Eskom CUSTOMERS - would any normal business (or ANY business for that matter) EVER be justified in asking its CUSTOMERS to pay for blunders they have made? The concept is anathema to worldwide business principles (and practices). The vast majority of South Africans have no choice whether or not to have Eskom as their Electricity Service-Provider - ESKOM IS A MONOPOLY - but we do have a choice, as customers, to tell our service-provider that what they propose is unacceptable and we do NOT accept it. WE DO NOT ACCEPT IT.	Ian	Gauteng		business owner
	2026-01-10 14:49:04	No I do not	All of the above – we should not pay for government blunders	We have been paying inflated electricity costs for some decades now, way above inflation rate. It is not sustainable for the average citizen of South Africa to continually be made to pay for blunders, corruption, electricity theft, inadequate infrastructure maintenance etc. Please get the funding from individuals and organizations involved in corruption and theft. Eskom is losing its paying customers who are now diverting their hard earned income into alternative power sources like solar, wind and gas, and going off grid, and rightfully so.	Margaretha	KwaZulu -Natal		retired
	2026-01-10 14:48:43	No I do not	All of the above – we should not pay for government blunders	As a tax payer & diligently, on time payment to Eskom client I should not be responsible	Sarah	Gauteng		self-employed

	2026-01-10 14:20:53	No I do not	All of the above – we should not pay for government blunders	As a citizen, I strongly object to being forced to foot the bill for NERSA's R76 billion regulatory blunder. The consultation paper makes it clear that this massive R76.066 billion increase in allowable revenue—consisting of R62.03 billion in depreciation and R14.04 billion in returns—is a direct result of NERSA's original decision being "reviewed and set aside" by the High Court due to fundamental calculation errors. It is unacceptable that consumers are expected to pay for these administrative failures, especially when Eskom itself has not complied with the law by failing to provide a modern asset valuation, relying instead on outdated 2020 figures. Furthermore, I should not be asked to fund Eskom's operational inefficiencies, such as the 300-day coal stockpile at Medupi—which far exceeds the allowed 42-day limit—simply because of their own construction and commissioning delays. Regulatory and management "blunders" should not translate into a financial burden for the public.	Gellert	Western Cape		employed individual

	2026-01-10 14:10:41	No I do not	All of the above – we should not pay for government blunders	I refuse to pay for the mismanagement and corruption of the comrade regime currently sucking our blood at every opportunity ???	Kevin	Eastern Cape		retired
	2026-01-10 14:10:05	No I do not	All of the above – we should not pay for government blunders	This is unacceptable and we the taxpayer should NOT be paying for the blunder so more money can be stolen!	Norma	Western Cape		self-employed
	2026-01-10 14:10:00	No I do not	All of the above – we should not pay for government blunders	Poor financial management by the authorities are placing a burden on every SA citizen whether the can afford it or not.. as a retired person who has been paying taxes for a period exceeding 55 years, with ever increasing food prices, fuel prices poor road infrastructure escalating expenditure on everything such as Sun power which does not belong to the ruling authorities which mean higher taxes imposed and to add to it all Nersa is now adding another R76 billion to the burden for what, or is it that they want more tax payers money, that they can squander it, on everything else except to maintain the current infrastructure or is it that they can pay the salary increases to government officials recently declared to the officials already earning for jobs they are not qualified even to do from my side it is an emphatic no I do not support any motion that will burden the poor in South Africa.	Johan	Gauteng		retired
	2026-01-10 14:09:20	No I do not	All of the above – we should not pay for government blunders		Syd	Eastern Cape		retired
	2026-01-10 14:08:28	No I do not	All of the above – we should not pay for government blunders	“Killing me softly”? Ha, Hardly. In no business should customers carry the cost of outdated or failing systems — that responsibility lies with the service provider. Yet we’re constantly paying for poor management and lack of proper upkeep, while being left with unreliable services. In South Africa, even those who are employed are barely keeping their heads above water, while many others are drowning. Stress levels are at breaking point, and it’s only making existing health conditions worse. This isn’t service — it’s survival. Shifting the burden doesn’t remove the weight — it just crushes people.	Louise	KwaZulu -Natal		self-employed
	2026-01-10 14:08:25	No I do not	All of the above – we should not pay for government blunders	The extent of the failure is enormous. We should not have to pay for incompenance of officials who suffer NO sanction!	Rudd	Western Cape		self-employed
	2026-01-10 14:08:03	No I do not	All of the above – we should not pay for government blunders	In stead of LEADING the people of this beautiful country of ours, the "powers that be" CONSTANTLY attempt to emaciate and impoverish it's people so that they (government) can pocket more money in their personal capacity. I am so sick of the blame game, the "apartheid" card, the race card and every other excuse why the people must pay for the irresponsible, selfish and often completely illegal actions of those at the top of our government! This is WRONG! To expect the consumer to pay for the negligence of whoever did this report, is diabolical! As is, people don't have enough money and enough jobs! Will you only rest once the country is completely destroyed? Oh, no, I apologise... of course that would (again) be the fault of Apartheid - how can I forget! I hope my tiny little voice in this matter, can make a difference in this decision.	Marianne	Western Cape		business owner

It's not right to do this, the tax payers didn't bankrupt eskom.	Marthinus	Eastern Cape		employed individual
	2026-01-10 13:09:41	No I do not	All of the above – we should not pay for government blunders	For over 30years anc led government has systematically allowed infrastructure to deteriorate through poor governance and looting. Nothing has been done to bring culprits to book. BECAUSE LEADERSHIP IS COMPLICIT. Why do we have to foot the bill for their incompetence. This situation will persist for aslong as we have the present electrol system . Black nationalism is here to stay. The solution lies in education. The anc has succeeded in keeping the majority black population illiterate. Give them quality education, you are guaranteed of loosing votes. Look at the lies being dished out at the Jan 8th anniversary celebration. Incompetence can never deliver service delivery. I weep for our beautiful country. This country needs educated visionaries. Dedicated leadership without greed for personal enrichment. Current crop of leaders are lacking in this. Getting into government is lucrative. Hence jostling to get into government. Think , concept of political killings !!! We should put our heads together to come up with a new electrol system. The present system will perpetuate incompetence and looting. May God help us. .	Mannie	KwaZulu -Natal		retired

	2026-01-10 12:52:01	No I do not	All of the above – we should not pay for government blunders	I am submitting this comment in response to NERSA's call for public input on the proposed electricity price determination. My objection is based on the following key concerns: Affordability and Accountability The recent High Court ruling revealed material calculation errors amounting to approximately R76 billion in asset valuations. These errors were made by regulatory and governance processes outside the control of consumers. It is neither reasonable nor equitable to recover these costs through higher tariffs. Households and businesses are already under severe financial strain from rising living costs, and shifting the burden of regulatory miscalculations onto the public undermines confidence in the regulatory framework. Reliability and Infrastructure Performance Consumers are being asked to pay premium returns on aging and unreliable infrastructure. Load shedding, equipment failures, and declining energy availability reflect structural and operational shortcomings. It is unjustifiable to charge full depreciation and return on assets without reliable delivery of service. The basic principle of cost recovery must be paired with performance standards and accountability. Efficiency and Delays The proposal appears to expect consumers to fund Eskom's cash flow issues and delays in capital projects. Construction delays, governance challenges, and inefficiencies fall within the utility's operational domain and should not be transferred to end users. Doing so creates no incentive for improved performance, fiscal discipline, or timely project execution. Conclusion For these reasons, I object to the current price determination proposal. Consumers should not be required to finance regulatory errors, degraded infrastructure performance, and avoidable operational inefficiencies. I respectfully request that NERSA revise the proposal in a manner that upholds affordability, incentivises improved reliability, and ensures that accountability for errors remains with the institutions responsible. Thank you for the opportunity to provide comment as part of this public participation process.	Carol	Western Cape		business owner
	2026-01-10 12:51:48	No I do not	All of the above – we should not pay for government blunders	The proposed hike in electricity costs, to cover the mistakes made by government is not acceptable to me. The consumer should not be made responsible for errors made by government.	Ann	Western Cape

	2026-01-11 15:25:05	No I do not	All of the above – we should not pay for government blunders	Errors in financial management are unfortunately very costly at as large of a scale as Eskom. The responsibility of steering such a ship is immense and must be done by a team that is well capable of the task. While this state facility is primarily a user-funded facility, the cost has risen dramatically to maintain it for, what it seems to the public, unnecessary reasons. The main source of financial loss needs to be identified and resolved. For example, there are plenty of illegal connections across the country which would require a great number of resources to identify and disconnect. However, perhaps such a task is necessary. Whatever the solution, it cannot cost already-burdened paying users more. It will simply result in a migration to off-grid options and fewer paying customers, leading to more financial instability.	Josef Ruben	North West		employed individual
	2026-01-11 15:24:38	No I do not	All of the above – we should not pay for government blunders	Can't afford to pay for someone else's blunder, Eskom made a BIG profit in 2025. 	2026-01-11 14:23:48	No I do not	All of the above – we should not pay for government blunders	it's like having your business or product backed by a sponsor and overcharging on the product, to compensate for any losses or any incompetence the only solution i see is to improvise for alternative energy solutions, that would force the manufacture to take accountability and improve the product or services and make it more affordable for everyone #worthy is the lamb and the one seated on the throne Revelation 5:12# // 2 Esdras 7:75 I answered and said, "If I have found favor in thy sight, O Lord, show this also to thy servant: whether after death, as soon as every one of us yields up his soul, we shall be kept in rest until those times come when thou wilt renew the creation, or whether we shall be tormented at once?" 76 He answered me and said, "I will show you that also, but do not be associated with those who have shown scorn, nor number yourself among those who are tormented. 77 For you have a treasure of works laid up with the Most High; but it will not be shown to you until the last times. 78 Now, concerning death, the teaching is: When the decisive decree has gone forth from the Most High that a man shall die, as the spirit leaves the body to return again to him who gave it, first of all it adores the glory of the Most High. 79 And if it is one of those who have shown scorn and have not kept the way of the Most High, and who have despised his law, and who have hated those who fear the Most High -- 80 such spirits shall not enter into habitations, but shall immediately wander about in torments, ever grieving and sad, in seven ways. 81 The first way, because they have scorned the law of the Most High. 82 The second way, because they cannot now make a good repentance that they may live. 83 The third way, they shall see the reward laid up for those who have trusted the covenants of the Most High. 84 The fourth way, they shall consider the torment laid up for themselves in the last days. 85 The fifth way, they shall see how the habitations of the others are guarded by angels in profound quiet. 86 The sixth way, they shall see how some of them will pass over into torments. 87 The seventh way, which is worse than all the ways that have been mentioned, because they shall utterly waste away in confusion and be consumed with shame, and shall wither with fear at seeing the glory of the Most High before whom they sinned while they were alive, and before whom they are to be judged in the last times. 88 "Now this is the order of those who have kept the ways of the Most High, when they shall be separated from their mortal body. 89 During the time that they lived in it, they laboriously served the Most High, and withstood danger every hour, that they might keep the law of the Lawgiver perfectly. 90 Therefore this is the teaching concerning them: 91 First of all, they shall see with great joy the glory of him who receives them, for they shall have rest in seven orders. 92 The first order, because they have striven with great effort to overcome the evil thought which was formed with them, that it might not lead them astray from life into death. 93 The second order, because they see the perplexity in which the souls of the unrighteous wander, and the punishment that awaits them. 94 The third order, they see the witness which he who formed them bears concerning them, that while they were alive they kept the law which was given them in trust. 95 The fourth order, they understand the rest which they now enjoy, being gathered into their chambers and guarded by angels in profound quiet, and the glory which awaits them in the last days. 96 The fifth order, they rejoice that they have now escaped what is corruptible, and shall inherit what is to come; and besides they see the straits and toil from which they have been delivered, and the spacious liberty which they are to receive and enjoy in immortality. 97 The sixth order, when it is shown to them how their face is to shine like the sun, and how they are to be made like the light of the stars, being incorruptible from then on. 98 The seventh order, which is greater than all that have been mentioned, because they shall rejoice with boldness, and shall be confident without confusion, and shall be glad without fear, for they hasten to behold the face of him whom they served in life and from whom they are to receive their reward when glorified. 99 This is the order of the souls of the righteous, as henceforth is announced; and the aforesaid are the ways of torment which those who would not give heed shall suffer hereafter." 100 I answered and said, "Will time therefore be given to the souls, after they have been separated from the bodies, to see what you have described to me?" 101 He said to me, "They shall have freedom for seven days, so that during these seven days they may see the things of which you have been told, and afterwards they shall be gathered in their habitations." 102 I answered and said, "If I have found favor in thy sight, show further to me, thy servant, whether on the day of judgment the righteous will be able to intercede for the unrighteous or to entreat the Most High for them, 103 fathers for sons or sons for parents, brothers for brothers, relatives for their kinsmen, or friends for those who are most dear." 104 He answered me and said, "Since you have found favor in my sight, I will show you this also. The day of judgment is decisive and displays to all the seal of truth. Just as now a father does not send his son, or a son his father, or a master his servant, or a friend his dearest friend, to be ill or sleep or eat or be healed in his stead, 105 so no one shall ever pray for another on that day, neither shall any one lay a burden on another; for then every one shall bear his own righteousness and unrighteousness." .....2 Esdras 7:75	Ugene	Western Cape		self-employed
	2026-01-11 14:23:13	No I do not	All of the above – we should not pay for government blunders	I strongly oppose the direct passing of these costs to consumers without first exploring and implementing alternative measures to address Eskom's inefficiencies, historical mismanagement, and the broader systemic issues in South Africa's energy sector. The proposed adjustments stem from errors in Eskom's application and NERSA's original assessment, including failures to submit updated asset valuations, inconsistent treatment of transfers to commercial operation, inflated work-in-progress (WIP) figures, and excessive coal stockpiles in net working capital. These "mistakes" should not burden ordinary South Africans, who are already grappling with high living costs, the impacts of load shedding, and economic pressures. The proposed increase in allowable revenue by R76.066 billion over the MYPD6 period will inevitably translate into higher tariffs—potentially raising the average increase from 5.36% to 8.76% in 2025/26, with similar uplifts in subsequent years. This comes at a time when South Africans are facing inflation, unemployment, and the lingering effects of years of unreliable power supply. Passing these costs directly to consumers without accountability measures would perpetuate a cycle in which Eskom's operational and regulatory shortcomings are subsidised by the public, rather than being addressed at their source. Responses to Selected Questions in the Consultation Paper I provide the following targeted comments on those most relevant to consumer protection and alternative approaches: 1. Comment on any aspect of the Generation RAB (Table 1) in line with Eskom's original application: The proposed RAB values (e.g., R776.095 billion for 2025/26) appear inflated due to the inclusion of unsubstantiated DRC figures and non-compliant valuations. NERSA should disallow any components not backed by a recent MEAV study to prevent overvaluation. 2. Comment on plants that should not be included in Eskom's RAB and avoiding undue compensation: Older, inefficient coal-fired plants (e.g., those beyond their economic lifespan like Komati or Hendrina) should be excluded or phased out from the RAB, as they contribute to environmental costs and inefficiencies. Without a 2025 valuation, there is a high risk of undue compensation; therefore, NERSA should apply stricter discretion to cap returns. 3. Comment on NERSA's approach to valuing Eskom's asset base without the latest valuation: Relying on outdated 2020 data is unacceptable and could lead to inaccurate depreciation calculations. An independent audit should be mandated before any redetermination, with NERSA exercising discretion to reduce allowances by at least 20% as a precautionary measure. 4. Comment on NERSA's approach to re-determining DRC: The reversal of prior adjustments to align with the 2022 High Court ruling is noted, but alternatives include commissioning a third-party valuation immediately and linking DRC to performance metrics (e.g., plant availability factors) to ensure value for money. 5. Comment on NERSA's approach to re-determining transfers to commercial operation: Limiting to new build capacity is a step forward, but NERSA should further scrutinise Eskom's projections for delays (e.g., in Medupi and Kusile) and propose clawback mechanisms if assets underperform. 6. Comment on NERSA's approach to re-determining WUC: Disallowing outage-related capex is appropriate, but alternatives include tying WUC approvals to verifiable milestones and independent verification to avoid cost overruns. 7. Comment on NERSA's approach to re-determining net working capital: Maintaining the 42-day coal stockpile limit is correct; excess should be funded internally by Eskom through efficiency gains, not consumer tariffs. 8. Comment on the impact of deviating from PAJA rules: While the shortened 25-day consultation period complies with the court's urgency, it limits public participation. This could undermine trust in the process; NERSA should extend it if possible or hold virtual public hearings for broader input. Multiple Options on What Should Be Done First Before Costs Are Passed on to Consumers Before approving any additional revenue recovery through tariffs, NERSA must prioritise measures that hold Eskom accountable, improve its operations, and explore non-consumer funding sources. Below, I outline five key options, each with a rationale and potential implementation steps. These should be mandated as preconditions in NERSA's final decision, with clear timelines and monitoring. 1. Conduct an Independent Forensic Audit of Eskom's Assets and Expenditures: o Rationale: The errors stem from outdated valuations and potential overstatements. An independent audit would verify the RAB components, identify mismanagement (e.g., cost overruns at Medupi/Kusile), and quantify avoidable costs, preventing undue compensation. o Steps: Appoint a reputable firm (e.g., via tender) to complete a full MEAV study and audit within 3 months. Disallow any disputed amounts (e.g., excess WUC) until resolved. This could reduce the R76 billion by identifying inefficiencies worth billions of Rands. o Benefits: Builds transparency and could lead to cost recoveries from contractors or internal reforms, sparing consumers. 2. Implement Strict Performance and Efficiency Incentives for Eskom: o Rationale: Eskom's history of underperformance (e.g., low energy availability factors) contributes to higher costs. Linking revenue recovery to measurable improvements ensures consumers aren't paying for ongoing failures. o Steps: Tie 50% of the additional revenue to KPIs like achieving 70% plant availability by 2027/28, reducing coal costs through better procurement, and transitioning to renewables. Use the MYPD methodology's incentive schemes to penalise non-compliance. o Benefits: Encourages operational reforms, potentially saving R10-20 billion in avoided inefficiencies, and aligns with South Africa's Just Energy Transition goals. In conclusion, while I acknowledge the need to comply with the High Court order and ensure Eskom's financial viability, the proposed R76 billion recoveries must not proceed without exhausting these alternatives. Prioritising accountability, efficiency, and non-consumer funding will lead to a more sustainable energy sector. NERSA should reject the full R76 billion adjustment and mandate alternatives, such as state capture recoveries, independent audits, and subsidies, before any hikes. Incorporate impact assessments in future MYPD processes, prioritising pro-poor tariffs and renewable incentives to shield the vulnerable.	Sajeev	Gauteng		employed individual

	2026-01-11 14:22:40	No I do not	All of the above – we should not pay for government blunders	We are already being gouged for electricity costs. My electricity bill already consumes most of my monthly income.	Hayley	Gauteng		self-employed

	2026-01-11 14:22:33	No I do not	All of the above – we should not pay for government blunders	I would like to strongly object to the proposed electricity price hikes. South Africans simply cannot afford this anymore. Every year we are told to adjust to higher costs while our salaries and living conditions stay the same. It is becoming impossible for ordinary people to survive, and approving another increase would be completely irresponsible. These hikes don't just affect "electricity bills" — they affect everything. Food prices go up, transport goes up, and even basic access to water and electricity becomes harder. This directly threatens food security and the basic human rights that every South African should be guaranteed. Many households are already stretched to the limit, and another increase will push people deeper into financial struggle. It is NERSA's and the government's responsibility to protect the public and make decisions that prioritise the wellbeing of everyday South Africans. I am urging NERSA to reject these proposed increases and to consider the real impact they have on the lives of the people in this country.	Bongiwe	Gauteng		employed individual

	2026-01-11 13:54:40	No I do not	All of the above – we should not pay for government blunders	To whom it may concern Firstly how can they declare that there has been a mistake in the calculation as to how they determined price when they do not even know how much money was stolen from within Eskom due to corruption etc. Who foot the bill of incompetent management? Secondly the inability of management to train & develop staff to be on top of pricing is not the tax paying people of South Africa's problem, the executives should not have been given performance bonuses and staff increases taken away as the company has not performed well and yet the executives were all paid excessive bonuses!! it is time for real mass action in South Africa whereby we call on every South African to switch off their power for say 2 hours daily to reduce the total consumption in RSA to ensure that the power supplier loosers further monies and reduce the consum,ption and further push private company initiative to remove the vested monopoly of Eskom with regard to power supply. just like t he development of alternative air travel participants since the demise of SAA. 	2026-01-11 13:42:16	No I do not	All of the above – we should not pay for government blunders	It is high time that we as tax payers draw the line between paying for corruption related debt within state owned entities, and paying only for efficient services delivered,.....whilst also being rewarded or rather offered incentives for being power savvy . Eskom has had over 30 years to put measures in place to stay ahead of the growing need for power and maintaining a fully operational business that which was passed on to the new government,.....whilst at the same time finding sustainable solutions for reducing the demand through actual incentives and not trying to penalise those who try and make a difference. It would appear that paying high salaries (not any of which is performance based), huge amounts of corruption, placing and appointing inadequately unsuitable qualified individuals not wanting to actually make a difference and implement strategies that work, and seeking reprieve and bailouts from Tax Payers.	Donnavin	Western Cape		business owner
	2026-01-11 13:42:15	No I do not	All of the above – we should not pay for government blunders	It should not fall upon the shoulders of the public to pay the price for the neglect of infrastructures that have not been upkept for years despite wise council. The public sector who pays their accounts diligently and consistently despite incredibly bad service delivery in the form of deeply inconvenient and costly ower cuts which often do not only render paying public with no electricity but no water as well. The mistake was not made by the public so no we should not have to pay.	Tracey	KwaZulu-Natal		self-employed

	2026-01-11 13:39:44	No I do not	All of the above – we should not pay for government blunders	Enough is enough. We are being bled dry. As pensioner i cannot keep up with your redistribution of wealth. It is ridiculous.	Ria	Western Cape		retired
	2026-01-11 13:39:39	No I do not	All of the above – we should not pay for government blunders	The arrogance of Nersa - who had argued that it wasn’t necessary to consult the public because it was "simply correcting an error made in its calculations." and then added that extensive consultations had already been done on the MYPD6 application. My argument is also that South Africans in general will be affected immensely by the settlement and therefor we have a direct interest in the matter and the scale of the agreement. Because of the prposed settlement, the electricity price hikes for 2026 and 2027, already running at double the inflation rate, would have ended up close to almost triple the inflation rate! This will place already over-taxed consumers, businesses and entire industries under severe strain, not something that can be flippantly brushed aside.	johannes	Mpumalanga

	2026-01-11 18:17:02	No I do not	All of the above – we should not pay for government blunders	This should be absorbed by Eskom &/or government need to bail out, due to mismanagement of funds!	Henning	Gauteng		retired
	2026-01-11 18:15:55	No I do not	All of the above – we should not pay for government blunders		Marietjie	Free State		employed individual
	2026-01-11 18:15:21	No I do not	All of the above – we should not pay for government blunders	The current economic climate has placed an unsustainable burden on the average citizen, leaving many of us struggling to afford basic necessities such as food and utilities. It is disheartening to witness a stark contrast between the lavish lifestyles of certain officials and the financial hardship faced by the public. Rather than further depleting the limited resources of struggling households to fund infrastructure repairs, I propose that these costs be recovered through the accountability of high-ranking government officials. Addressing systemic corruption and prioritising the well-being of the people over personal gain is not just a matter of policy, but one of basic fairness and social justice.	Jonah	Gauteng		employed individual

	2026-01-11 18:11:46	No I do not	All of the above – we should not pay for government blunders	This proposal is unconscionable, and it is rejected with the contempt it deserves. The SA taxpayer has been robbed by blatant corruption and mismanagement for decades. It has crippled the SA economy and blighted the lives of millions. It stops now.	Sharon	Gauteng		employed individual
	2026-01-11 18:11:10	No I do not	All of the above – we should not pay for government blunders		Nicole	Gauteng		employed individual
	2026-01-11 18:10:29	No I do not	All of the above – we should not pay for government blunders	It is unacceptable that the citizens of our country who are already burdened by so many unnecessary expenses due to inflation costs and our government's lack of ability to run our country properly, should also have to pay for the mistakes made by the management of Eskom. Nersa should be ashamed of their decision to force the SA energy users to pay for Eskom's lack of performance.	Mari	Western Cape		self-employed
	2026-01-11 18:10:27	No I do not	All of the above – we should not pay for government blunders	The ones who made the mistakes should be held accountable, goverment can pay for it with their high salaries.	Joannet	Gauteng		self-employed
	2026-01-11 18:10:11	No I do not	All of the above – we should not pay for government blunders	How are we going to accept a raise in electricity because we are struggling to make the ends meet now. These people are very unreasonable, they do not care for struggles the other people go through. We cannot afford to pay more than we are just paying.	Vuyiswa	Western Cape		
	2026-01-11 18:10:10	No I do not	All of the above – we should not pay for government blunders	How are we going to accept a raise in electricity because we are struggling to make the ends meet now. These people are very unreasonable, they do not care for struggles the other people go through. We cannot afford to pay more than we are just paying.	Vuyiswa	Western Cape		
	2026-01-11 18:09:49	No I do not	All of the above – we should not pay for government blunders	So again consumers are expected to pay for government corruption, neglect and incompetence. No to this.	Charl	Western Cape		
	2026-01-11 18:09:39	No I do not	All of the above – we should not pay for government blunders	By expanding the economy the government needs to capitalize on national treasures such as mining stabilize politics encouraging investments and through the growing economy and eliminate corruption to dilute the cost of mistakes such as these by spreading the load amongst a growing economy	Marc	Gauteng		employed individual
	2026-01-11 18:09:35	No I do not	All of the above – we should not pay for government blunders	The gross mismanagement is something that needs no introduction or further explanation. Corrupt officials and those who have benefited from the corruption need to be held to account. All assets of previous leaders and board members need to audited and redeemed as first point of call for re-cooperation for the blunder and monies needed. Further more government and other entities who have been found with their hands in the pie equally need to be held to account, all assets seized and monies redistributed to fund the issues. It is an absolute disgrace to have the current situation but to then turn around and lay that burden on the people is an absolute abomination and against the constitution that is supposed to protect the people of South Africa.	Ryan	Gauteng		Non-profit
	2026-01-11 18:09:08	No I do not	All of the above – we should not pay for government blunders	With all the looting and corruption, targeting whistle blowers and in many instances killing that whistle blower. The entire Eskom debacle since the anc took over is money thrown into a black hole. That including the incompetent Eskom personal been paid handsomely.Now we are told we must pay for their mess. No they must sort their mess not the tax payers.	Steve	Gauteng		self-employed
	2026-01-11 18:08:17	No I do not	All of the above – we should not pay for government blunders	Those who made the mistake should pay for it.	Brandon	Gauteng

	2026-01-11 18:06:15	No I do not	All of the above – we should not pay for government blunders		Jefferyne	Western Cape		self-employed
	2026-01-11 18:05:59	No I do not	All of the above – we should not pay for government blunders		Nicole	Western Cape		employed individual
	2026-01-11 18:05:06	No I do not	All of the above – we should not pay for government blunders	No no and No - We are just keeping our head above water - constantly rising costs from government means we have very little or no disposable income. Water, electricity and owning a property are rapidly becoming a luxury item. Nobody would cover me if I made a mistake in my small business. R76 billion is not a mistake - that is corruption, ineffective governance and downright terrifying.	Terry	Western Cape		business owner
	2026-01-11 18:04:05	No I do not	All of the above – we should not pay for government blunders	The price of electricity has increased at a rate of roughly 30% per year, which is unheard of seeing as employees and business are only afforded circa 6% per annum. This is due to the ANC incompetence, cadre deployment and widespread fraud within Eskom. The ANC took over a flagship Eskom that was producing enough electricity to export to neighboring countries and still have spare, to load shedding an price increases unheard of. ANC members should be in jail for this but always seem to find a way out. The public should not pay for this, go and take the money from the billionaire ANC members and their buddies that stole all the money out of Eskom.	Michael	Western Cape		business owner
	2026-01-11 18:03:44	No I do not	All of the above – we should not pay for government blunders		Marliese			
	2026-01-11 18:03:21	No I do not	All of the above – we should not pay for government blunders		Jill	Western Cape		retired
	2026-01-11 18:03:07	No I do not	All of the above – we should not pay for government blunders	The government hires the incompetent people because of they know them or have paid for the job that's why we get mistakes in books. If they followed the right way of hiring qualified candidates nothing of this sort would be happening. After that they expect the same unemployed people who don't earn enough to cover their errors. It's a NO	Mmapule	Gauteng		unemployed individual
	2026-01-11 18:02:37	No I do not	All of the above – we should not pay for government blunders	We can not afford the electricity prices as they are and now we must foot the bill. Not on	Afzal	Gauteng		employed individual
	2026-01-11 18:02:17	No I do not	All of the above – we should not pay for government blunders	1994 we had the cheapest electricity world wide ...and now we are the most expensive...	Homaira	Gauteng		employed individual
	2026-01-11 18:02:03	No I do not	All of the above – we should not pay for government blunders		Raquel	Gauteng		employed individual
	2026-01-11 18:01:50	No I do not	All of the above – we should not pay for government blunders		Robin	Western Cape		retired
	2026-01-11 18:01:14	No I do not	All of the above – we should not pay for government blunders	Eskom is unfortunately a failed entity. Eskom does not have a good track record of "using funds for its intended purpose".	Leigh	Mpumalanga		employed individual

	2026-01-11 18:01:14	No I do not	All of the above – we should not pay for government blunders	Let them fix their own mistakes. This has nothing to do with us. To top it off, their economy is weak as their ability to do maths. So, hell No!	Daniel	Gauteng		employed individual
	2026-01-11 18:00:58	No I do not	All of the above – we should not pay for government blunders		Jill	Western Cape		retired
	2026-01-11 17:59:46	No I do not	All of the above – we should not pay for government blunders	I can't afford as I'm unemployed the government must see where they recover the cost or bill . Already we are paying a lot on electricity , it means some of the house hold won't able to utilize electricity. It is too much constraints to unemployed , single parents and pensioners .	Cindy	Gauteng		unemployed individual
	2026-01-11 17:59:23	No I do not	All of the above – we should not pay for government blunders	Tired of having to carry the brunt of government incapacity.	Denise	Gauteng		retired
	2026-01-11 17:59:04	No I do not	All of the above – we should not pay for government blunders	Eskom is riddled with corruption and inefficiency. It is just as much of a "mafia" as any other crime category and is comparable to the issue of the "taxi mafia". This should be the primary focus from the organisation itself, AND GOVERNMEN. Only once this issue has been resolved is it justifiable for them to move onto even thinking about how to recover from miscalculated value, and the last resort to even be considered should be recovering that lost money from consumers.	Matt	Gauteng		employed individual
	2026-01-11 17:58:24	No I do not	All of the above – we should not pay for government blunders	Why must the we pay for Eskoms mess ups. They must sort out their own mess they created in secrecy	Veronique	Western Cape		self-employed

	2026-01-11 17:41:40	No I do not	All of the above – we should not pay for government blunders	I am submitting my response regarding the proposed electricity price determination. 1. Affordability: I do not believe that electricity consumers should bear the cost of NERSA’s calculation errors. Recovering R76 billion from the public unfairly penalizes ordinary South Africans for mistakes made by regulatory authorities. 2. Reliability: Consumers should not pay full price for ageing and unreliable infrastructure. Eskom must ensure that service delivery and infrastructure reliability are addressed before additional costs are passed on to the public. 3. Efficiency: Consumers should not fund Eskom’s cash flow problems or construction delays. Operational inefficiencies and financial mismanagement should be resolved by Eskom and government stakeholders, not through increased tariffs for users. In summary, I strongly urge NERSA to reject any proposal that recovers costs associated with calculation errors, unreliable infrastructure, or inefficiencies from electricity users.	Craig	KwaZulu-Natal		business owner
	2026-01-11 17:41:23	No I do not	All of the above – we should not pay for government blunders	Nersa and Eskoms screw ups should not be given to the public PERIOD	Brett	Gauteng		employed individual

	2026-01-11 17:33:32	No I do not	All of the above – we should not pay for government blunders	Eskom and the aging infrastructure need to be replaced with newer private companies. The time for a government owned nation wide electricity provider has long past its due date. I propose that South Africa looks at an option that allows for more provincial level power generation and more privatization of the grid. The cost of aging infrastructure, the delays and slow building of power plants that dont even work, all of these problems are not the South African people's problems. It was created by the government. Either way we pay in the end, through electricity or through taxes. I already pay my taxes, so I shouldn't have to pay for more problems caused by the government. 	2026-01-11 17:30:51	No I do not	All of the above – we should not pay for government blunders	It is long past time that Nersa should have forced the transformation of Eskom from a bloated inefficient organization to one which meets international standards for a wage bill proportional to the power which they generate. It is truly incomprehensible that the tax payer should continuously be expected to cover a wage bill in excess of R1 million per employee plus foot the bill for current and future expenses. Any sustainable organization should fund their current and future costs out of their own efficient cash flow management in line with international benchmarks for the industry. It is an in-excusable travesty that neither the regulating bodies nor the administration of this government are prepared to pull their heads out of the sand and start making the necessary changes to ensure competent and efficient sovereign governance.	Sean	Gauteng		self-employed

	2026-01-11 17:03:26	No I do not	All of the above – we should not pay for government blunders	Eskom is a key foundation for our industrial and social development. The current electricity price is twice that in China, even though we have an abundance of coal for our power stations. As a result, our smelters are closing down. Wealthier people are going off grid. The efficiency of Eskom must be seriously investigated including the price of coal, fuel and salaries so the country as a whole can be competitive. Surplus Eskom staff can maybe used to increase the skills at struggling municipalities. Merely paying Eskom's costs is not the answer as there is no incentive for that organization to become more efficient.	anton	Western Cape		retired
	2026-01-11 17:02:55	No I do not	All of the above – we should not pay for government blunders	I am a senior citizen and have been paying taxes religiously on everything Viz, salary, food, clothing, water, electricity, sewerage and almost everything else even provident fund and pension fund. Why should I pay to a government who steals and plunders our funds. Make the government pay, past and present. Hold them accountable since 1994 and freeze their accounts.	Michael	Eastern Cape		retired
	2026-01-11 17:02:41	No I do not	All of the above – we should not pay for government blunders	In a South Africa with already rising electricity rates amidst a cost of living crisis, we as those being affected cannot be expected to carry the costs of NERSA's mistakes. We are abused as citizens. Those in power who have their electricity bills covered by us taxpayers will not feel this and thus do not care.	Ethan	Gauteng		employed individual
	2026-01-11 17:02:21	No I do not	All of the above – we should not pay for government blunders	Eskom has had failing infrastructure for years, loadshedding has become the norm for the last 20 years. They should not have fired all the people that worked there that had the experience to manage the grin, and they should have taken the warnings seriously back in the 90's when they were told that they would need to build new power plants. The cost of electricity is already far too high, it would be extremely unfair to expect people who can't even afford the current price, to have to pay more. The people who made the error should be the ones to pay for it, then maybe next time they'll take their jobs more seriously	Wendy	Mpumalanga		unemployed individual
	2026-01-11 17:01:46	No I do not	All of the above – we should not pay for government blunders		Romaine	Gauteng		business owner
	2026-01-11 17:01:45	No I do not	All of the above – we should not pay for government blunders	Electricity is already excessively over priced. This is stifling growth in South Africa (along with many other factors). We should not be forced to continue to cover for mismanaged state "assets". A proposed alternative: allow for the unbundling/sale of Eskom into private entities able to provide power efficiently and economically to the country.	Terry	Western Cape		employed individual

	2026-01-12 08:39:14	No I do not	All of the above – we should not pay for government blunders	We've been paying more and more for electricity year on year on year. Why is there no clear return on investment? Why are we the ones that have to pay for incompetence and delays caused by what is clearly an insane amount of corruption at Eskom? FIX the underlying corruption and infrastructure at Eskom FIRST. Yes, NERSA, I know this is not YOUR mandate, but perhaps you should start making it part of your investigations by default. Said investigations are supposed to be based on accurate states of affair at Eskom, not what some (most likely corrupt) Eskom lackey is telling you to look at. Start taking responsibility, considering that 10% of the population pays for the electricity of 90% of the population already. If we're going to keep footing the bill for the vast majority of the population then at least TRY to accommodate us. We should ONLY be paying for what is actually provided, MINUS the cost of corrupt activities and failing infrastructure and/or delay in getting upgraded infrastructure through the door.	Werner	Free State

	2026-01-12 08:29:54	No I do not	All of the above – we should not pay for government blunders	Definitely a HARD NO!!!! They made the stuff up, they must carry the cost. For years Eskom has been trying one way or another to increase prices exponentially every year, this is just another tactic to try and achieve that. Electricity is already becoming unaffordable, and now NERSA wants to make it even more so. If I make a mistake in my costing and price that I give my customers I have to absorb that cost. I can't backtrack and now give them a new price. I also cannot ask my customer to pay for my error. If Eskom fires all the corrupt officials and if their CEO and top tier executives forego their bonuses for the next few years then I am sure that will make a dent in the cost to be recuperated. They are after all the people that made the mistake and their KPI's should reflect as such, ergo - no bonus or big increase. I mean even a 1% increase for the CEO is probably significantly more than the majority of their staff earns over a few years. Here at our company bonuses are determined by an employee's KPI, If the employee's KPI target is not achieved then there is a scale on which the bonus is calculated based on the KPI result. This also filters up the ladder to management and executives except if Team/Department KPI target is not achieved then they do not get a bonus at all. So to summarize. Eskom and NERSA, Hell No!! Suck it up and absorb the cost of your error. Consumers ARE NOT your money cow or bank!!!!	Nevilene	Western Cape		employed individual

	2026-01-12 08:25:13	No I do not	All of the above – we should not pay for government blunders	We the citizens of South Africa are tired of hearing that we should continuing for any infrastructure in this country where that infrastructure is not maintained and kept up to date, and where the rampant pillaging of the coffers continues without consequence. It is time that the government pays for those blunders directly by affecting the pockets of those in government, that means salary cuts and zero bonuses if you can't work it out. If they are not able to manage a country or a municipality, then they should not be in the positions that they are in. I say, bring back the days prior to 1994 when things were done properly. - We can no longer afford to pay for your mistakes. - We can no longer trust the systems you have in place, nor can we trust you as those in charge of making decisions in this country. - Its time to stop giving out contracts to people who cannot do the job, bring back the people who knew how to run the contracts and do the work, who made sure that there were penalties in place, and for once, stop paying until the job has been completed and you have made sure that it is up to scratch and worth the money. 	2026-01-12 08:16:41	No I do not	All of the above – we should not pay for government blunders	Government must employ or appoint people and service providers that are qualified and competent to be effective and efficient - these cadre deployments have demonstrated to be ineffective and inefficient costing a lot for the citizens. Leadership must demonstrate zero tolerance to corruption by implementing proper consequence management that precise and effective for the citizens and to detect and prevent further corruption by public servants .	Bongani	Gauteng		unemployed individual
	2026-01-12 08:16:32	No I do not	All of the above – we should not pay for government blunders	Nersa’s mistake. Nersa to fix their mistakes. That is how we, the people are managed for our mistakes. Get a way where we can pay ESKOM directly for our power, they can then negotiate directly with the enduser. Stop the “taxation” of Renewable energy users.	Olivier			self-employed
	2026-01-12 08:16:10	No I do not	All of the above – we should not pay for government blunders	I submit this comment to record my objection to any outcome of the re-determination process that results in higher electricity charges being passed on to compliant, paying consumers. South Africans are already under severe cost-of-living pressure. Electricity price increases directly raise the cost of food, transport, and basic services, and they further weaken small businesses and job creation. Any adjustment to Eskom’s Generation RAB or Allowable Revenue must be treated with extreme caution and must not become a mechanism to recover additional revenue from consumers who are already paying and are already stretched. My concerns are as follows: Affordability and fairness Any increase in allowable revenue must be justified as strictly necessary, and must be weighed against the real affordability constraints faced by households and formal businesses. It is not fair to increase tariffs for compliant payers when the broader system still struggles with non-payment and weak enforcement in parts of the economy. Equity in who carries the burden The electricity system cannot be financially sustainable if the burden of cost recovery falls mainly on those who comply, while large parts of economic activity operate with limited accountability. Government and regulators should prioritize improving compliance and enforcement across the economy rather than relying on repeated tariff increases that penalise the same group of paying customers. Transparency, verification, and accountability Given that this process follows a court order to correct errors and re-consult the public, NERSA should ensure that: the corrected depreciation and asset valuation methodology is clearly explained in plain language, the updated RAB inputs are independently verified, Eskom’s performance, efficiency, and prudency tests are applied rigorously, and the public is shown, clearly, how the corrected approach changes the revenue outcome and why. No “automatic” pass-through Correcting technical errors should not automatically translate into higher consumer tariffs. NERSA should consider the option of smoothing or limiting any adjustments, and attaching conditions that drive operational efficiency and measurable improvement, rather than simply increasing revenue recovery. At some point Eskom needs to be held accountable instead of the public suffering because of Eksom’s poor management.	Charne	KwaZulu-Natal		self-employed
	2026-01-12 07:53:42	No I do not	All of the above – we should not pay for government blunders	I am writing to express my utter disgust and disappointment at the state of governance in South Africa. The ANC government's catastrophic failure in every aspect of governance has had a devastating impact on the country, both internally and internationally. Their reckless corruption, blatant theft of public funds, and implementation of misguided policies have sabotaged South African businesses and brought every critical sector to its knees. The military, hospitals, law enforcement, rail, transport, and other essential services have all been severely compromised. The ANC's BEEE laws and apartheid-style policies have created a toxic environment that stifles growth, promotes inequality, and undermines the very fabric of our society. It is unconscionable that they continue to line their pockets with public funds meant for the people, while the burden of petrol tax, VAT, and other taxes weighs heavily on ordinary citizens. I strongly condemn the ANC government's actions and demand that they be held accountable for their failures. As a South African citizen, I refuse to support any further funding for Eskom or any other state-owned entity that is being mismanaged and looted by corrupt officials. I will not stand idly by while my hard-earned money is squandered on inefficiency and corruption. I am exercising my right to withhold support and funding for any entity that is not committed to transparency, accountability, and good governance. The people of South Africa have suffered enough, and it is time for change. I do not consent to any further exploitation of our resources or the misuse of public funds. The ANC government must be held accountable for their actions, and we, the people, must stand together to demand better.	Gary	Gauteng		

	2026-01-12 07:53:22	No I do not	All of the above – we should not pay for government blunders	Eskom has been disingenuous with their internal assets, depreciations, costings , etc. A back to zero-based budgeting is required and all their legacy provisions removed to arrive a true cost. Then remove all their inefficiencies and overstaffing costs (why should we pay for their cadre employment initiatives and complete lack of prudent financial management normal companies have to consider) and work from that zero base. Just carrying forward unproven, fictitious and manipulated figures to justify exorbitant increases has to stop!	George	Gauteng		employed individual

	2026-01-12 07:51:20	No I do not	All of the above – we should not pay for government blunders	Ever since the ANC have recognised Eskom as a looting house, the paying consumer has been forced to pay for unreasonable price increases which to a large extent have come due to Eskom being used to loot from. Ultimately, the whole of South Africa has had to pay for such corruption as the large corporates are forced to pass on their increased costs to consumers or to simply shit shop or move to more cost friendly countries. the result is an increase in the unemployment rate and the evil spiral has been set off like every level headed South African can see. it is time to halt this spiral or at least try to slow it down. So, I say no to further cost increases that are above the inflation rate	Riaan	KwaZulu-Natal		employed individual
	2026-01-12 07:50:57	No I do not	All of the above – we should not pay for government blunders	Insane how the absolute abuse of power and looting of our country for personal gain has prevailed in a once successful and thriving economy. A small percentage of law abiding, tax paying, honest citizens are expected to fund lavish lifestyles of criminals! Eventually they are going to run out of other people's money! When no mercy is shown by those who abuse power, they can expect no mercy when their positions are given to another.	Quintin	Gauteng		self-employed

	2026-01-12 07:37:44	No I do not	All of the above – we should not pay for government blunders	1. Affordability: Should consumers pay for NERSA's calculation errors? No. Consumers should not be required to fund the consequences of regulatory or accounting errors. The recalculation of Eskom's Regulatory Asset Base, reportedly involving errors amounting to approximately R76 billion, reflects failures in oversight and process rather than legitimate operational costs. Passing these costs on to electricity users undermines the principle of fair regulation and erodes public trust. Cost recovery mechanisms should protect consumers from bearing the financial impact of institutional mistakes. 2. Reliability: Should consumers pay full price for aging, unreliable infrastructure? No. Electricity tariffs should reflect the quality, reliability, and consistency of supply. South African consumers continue to experience load shedding, infrastructure failures, and declining service reliability. It is neither reasonable nor equitable to charge full or increased tariffs for assets that are aging, underperforming, and frequently unavailable. Any tariff determination should be linked to measurable improvements in reliability and service delivery. 3. Efficiency: Should consumers fund Eskom's cash flow pressures and construction delays? No. Consumers should not be used as a mechanism to compensate for inefficiencies, cost overruns, or delayed capital projects. Funding Eskom's cash flow challenges through higher tariffs removes incentives for operational discipline and project accountability. Regulatory decisions should encourage efficiency, timely delivery, and responsible financial management, rather than socialising the costs of mismanagement. Conclusion Electricity is an essential service, and affordability is critical for households, businesses, and economic growth. Tariff determinations should balance Eskom's sustainability with fairness, efficiency, and accountability. I urge NERSA to ensure that consumers are not penalised for errors, inefficiencies, or infrastructure shortcomings beyond their control.	Sonja	Mpumalanga		self-employed

	2026-01-12 07:36:03	No I do not	All of the above – we should not pay for government blunders	Get rid of the useless and brainless arseholes. Stop the thieving and lock them up. Time for a new beginning. Employ on merit, not colour of skin.	Hylton	Western Cape		retired
	2026-01-12 07:35:55	No I do not	All of the above – we should not pay for government blunders	I do not see it fair to punish the consumer for a mistake made by others. As a tax payer I do not see why my cost of living is placed at a lower standard only because they cannot ensure their calculations are done correctly. The cost of living is already so high, families are having to band together to cover costs that were otherwise easier to maintain for a longer period of time. Looking at how things are going now, it is daylight robbery. Electricity is higher, and towards the end of the month when electricity is purchased, the prices are increased. There is inconsistent pricing, unfair to the working class, and to make things worse, it feels as though the middle class is targeted to float those who are less fortunate. This is causing a larger rift between the different classes and the middle class is edging closer to being a struggling lower class. I am 31 years old and it seems I will never own my own home, and all of this is directly impacted by the current cost of living. It is cheaper to rent, but the dreams of a family home are negatively impacted and this needs to change!	Luke	Western Cape		employed individual

	2026-01-12 07:34:51	No I do not	All of the above – we should not pay for government blunders	NERSA is redetermining Eskom's RAB and allowable revenue following the High Court judgment, with public comments due soon (e.g., by 21 January 2026). The proposed adjustment risks significant additional tariff hikes for 2026/27 and beyond. Any electricity price increase above inflation harms the economy and households. Businesses facing higher energy costs inevitably pass these on through raised prices for goods and services—meaning South African households are hit hard twice: once by inflated electricity bills and again by broader cost-of-living pressures In an environment where inflation remains moderate (~3.5%), further above-inflation electricity hikes erode purchasing power, reduce consumer spending, and threaten growth and jobs. NERSA must prioritize transparency, rigorous justification, and measures to protect vulnerable consumers rather than approving uncapped recovery of past calculation errors	Willem	Gauteng		employed individual

	2026-01-12 07:30:58	No I do not	All of the above – we should not pay for government blunders		Quintin	Gauteng		
	2026-01-12 07:30:49	No I do not	All of the above – we should not pay for government blunders	I strongly oppose the proposed redetermination and the R76 billion adjustment being considered. It is fundamentally unjust to ask the South African public to pay for 'regulatory errors' and 'government blunders'—specifically the R62 billion depreciation shortfall and R14 billion return on assets—that stemmed from NERSA's own miscalculations and Eskom's historical mismanagement. Most importantly, this application ignores the dire reality that millions of South African households are now well below the limit of being able to afford electricity. We are currently facing a crisis where over 10 million households live in energy poverty, forced to make the impossible daily choice between buying basic food and keeping the lights on. With tariffs having increased by approximately 150% over the last decade, and another 10.5% hike potentially on the table due to this redetermination, the 'cost-reflective' model has become a tool for economic exclusion. NERSA's mandate is to protect the consumer; however, by allowing these adjustments, you are effectively penalizing the poor for institutional incompetence. I urge NERSA to reject this adjustment and instead demand that Eskom find internal efficiencies and recover funds lost to state capture and construction overruns at Medupi and Kusile.	Alida	Free State		retired
	2026-01-12 07:30:41	No I do not	All of the above – we should not pay for government blunders	My wife and I are SASSA pensioners, and there are many pensioners with barely enough income to survive on, let alone paying for the increasing electrical costs, and now the blunders that Nersa have made .The electricity we receive comes with many interruptions of power outages. The government has destroyed a once flourishing parastatal entity, sadly. We should get a discount for what we have to put up with.	John Louie	Gauteng		retired
	2026-01-12 07:30:26	No I do not	All of the above – we should not pay for government blunders	NERSA should not tranfer their errors to the citizens.	Zola	Eastern Cape		
	2026-01-12 07:30:15	No I do not	All of the above – we should not pay for government blunders	Where have you ever heard such rubbish……Government breaks, we pay. We as consumers are cornered into paying for below average basic services that get interrupted through no fault of ours; the continued decline of infrastructure because they sat and filled their pockets instead of managing and maintaining. Start taking accountability and responsibility for the incompetence that is the ANC…	Zinobia	Gauteng		employed individual
	2026-01-12 07:29:52	No I do not	All of the above – we should not pay for government blunders	For years ordinary South Africans barely making ends meat have been expected to cough up funds which could be used in much better ways i.e. like putting bread on the table for their families. Whether it be for e-tolls or paying CoJ more than needed to make up for the shortfall of all the households who are living on grants because of the employment crisis this government has put our nation in. When is this going to stop. When is the corruption going to stop. When is our nation going to stop getting the short end of the stick while the politicians destroy everything because of their greed. Between the illegal refugees and the politicians this once great nation of ours will not make it very long until we become the next Zim or Zam or Moz with our hands out to the rest of the world begging for our next meal. This must stop and the courts must start sentencing those guilty of treason.	Wesley	Gauteng		employed individual
	2026-01-12 07:29:48	No I do not	All of the above – we should not pay for government blunders	An effective, productive society requires individuals, organisations and leaders to take responsibility for their own mistakes. The government's habit of charging individuals for their own mistakes creates an imbalance and adversely affects the country's productivity, without accountability. The less money individuals need to spend on fixing the government organisation's mistakes, the more opportunity it creates for investment in the economy.	Suzette	Gauteng		self-employed
	2026-01-12 07:29:32	No I do not	All of the above – we should not pay for government blunders	Fraud and corruption drain this country, yet the general public / ordinary citizens get drained dry and deeper into poverty. Their mismanagement of state enterprises has worsened services for years, yet, their solution is to throw more money at the problem. This is not acceptable and the guilty parties that enriched themselves should foot the bill, not our struggling citizens	Hennie	Western Cape

	2026-01-12 07:09:09	No I do not	All of the above – we should not pay for government blunders	At present, many South Africans feel that democratic participation is limited. Government decisions are often made without sufficient public awareness or engagement, and information is sometimes communicated through channels that are not easily accessible to a large portion of the population. This can leave many citizens feeling excluded from decision-making processes. Even when opportunities for public input exist, there is a perception that these contributions do not always meaningfully influence final outcomes. This has contributed to growing concern about increasing inequality between different socio-economic groups, as well as a widening gap between government and citizens. High levels of unemployment and poverty remain serious challenges, and some citizens feel that these issues are not being addressed with the urgency they require.	Annie	KwaZulu -Natal		unemployed individual
	2026-01-12 07:08:49	No I do not	All of the above – we should not pay for government blunders	NERSA can't expect me to pay for their calculation errors and for me to pay full price for aging and unreliable infrastructure. 	2026-01-12 06:33:35	No I do not	All of the above – we should not pay for government blunders	1. I do NOT accept a further increase in electricity tariffs to fund a higher valuation of Eskom’s power plants, given the current economic climate. 2. Consumers should NOT be forced to pay higher tariffs to cover the full value of power stations that are near the end of their lifespan or frequently unavailable due to breakdowns. 3. I am OPPOSED to consumers having to carry the additional financial burden of funding Eskom’s incomplete construction projects and operational cash flow through increased electricity prices. 	2026-01-12 06:32:23	No I do not	All of the above – we should not pay for government blunders	I do not support the proposal that consumers should carry the financial cost arising from Eskom or NERSA calculation errors. Affordability: Consumers should not be expected to pay for regulatory or calculation errors made by NERSA. Passing these costs to customers undermines trust in the regulatory framework and places an unfair burden on households and businesses that are already under significant financial pressure. Errors must be addressed by the institutions responsible, not transferred to end users. Reliability: Consumers should not be charged full price for electricity supplied through aging and unreliable infrastructure. Ongoing load shedding, unplanned outages, and declining service levels mean customers are already paying more while receiving less value. Any pricing adjustments must be linked to demonstrable improvements in reliability and service delivery. Efficiency: Consumers should not be required to fund Eskom’s cash-flow challenges, inefficiencies, or construction delays. These issues stem from operational, governance, and project management shortcomings that must be resolved internally rather than offset through higher tariffs. Recommendations: Recover costs internally through efficiency improvements, cost containment, and the reduction of wasteful expenditure. Strengthen accountability mechanisms between Eskom and NERSA to ensure errors are corrected without financial recourse to consumers. Utilise shareholder support, fiscal instruments, or balance-sheet restructuring to address short-term funding gaps. Phase in recovery (if any) only once reliability and performance targets are demonstrably met.	Samantha	Western Cape		employed individual

	2026-01-12 06:29:57	No I do not	All of the above – we should not pay for government blunders	I agree in the ascertation that there are massive shortfalls in managing the entity, ESKOM, and it impacts us, the general populus. However, I do not feel that we have to pay MORE or continue paying for their errors. We, as the nation, have been paying for their shortfalls, corruption, incompetence, failure to maintain infrastructure etc. for decades now and NOTHING happens to improve anything. It is time that a proper team is built to erradicate the syndicates which milk ESKOM and therefore, milks US and restor fairness and stability to the elctrcity supplier internally, externally and also to the grid. As it stands, I am in the process of converting my property to a complete stand-alone elctricity supply solution, independent of ESKOM because I cannot rely on them to keep the electricity on. On top of that, comes the financial loss due to (a) devices failing as a reult of spikes and power outages, (b) food getting spoiled due to power outages and (c) extra expenses now having to ensure there are alternative means of heat to cook food e.g. lots of extra wood/charcoal or LPG bottles, burners and LP Gas. None of those come without cost and even with multiple days a month without electricity supply, the invoice never reflects any of that. The nation is being forced into poverty due to living costs which keep rising and nobody can keep up ith it. The failure of ESKOM to provide a stable grid, is part of the problem at the heart of this issue. When shops have to now plan for and utilise alternative means of generating electrcity, it comes at a cost to them, which reverts to a cost to us the nation.	Dawid	Gauteng		employed individual

	2026-01-11 23:18:06	No I do not	All of the above – we should not pay for government blunders	I say "NO": WE SHOULD NOT pay for NERSA's calculation errors. I DO NOT accept a further increase in electricity tariffs to fund a higher valuation of Eskom's power plants, and I believe that electricity asset values should be capped to keep electricity affordable? The government wanted to be a government and this is the sort of service they should provide to ALL South Africans. I say "NO"!!! WE SHOULD NOT pay full price for aging, unreliable infrastructure! Over many years, no proper maintenance was done on electricity infrastructure; now that things are struggling to work, you cannot just expect money to keep coming from the paying consumers i.e. the same people who previously paid for a service they were not getting. I say "NO": WE SHOULD NOT fund Eskom's cash flow and construction delays! Clarification: The consumer SHOULD NOT carry the additional financial burden of funding Eskom's incomplete construction projects and operational cash flow through increased electricity prices.	Nathaniel	Western Cape		employed individual
	2026-01-11 23:13:10	No I do not	All of the above – we should not pay for government blunders	Consumers should not be required to pay for regulatory mistakes, aging and unreliable infrastructure, or Eskom's inefficiencies and construction delays. Accountability must rest with the institutions responsible—not with the public.	Sylvia	Western Cape		retired

	2026-01-11 22:38:16	No I do not	All of the above – we should not pay for government blunders	I hereby submit a formal objection to the proposed electricity tariff increase of approximately R75 billion. It is my considered view that this increase is neither reasonable nor justifiable, given that the primary causes of Eskom's financial and operational distress stem from long-standing governance failures, inadequate maintenance practices, and documented instances of mismanagement. These issues did not arise from consumer usage or demand, yet consumers are repeatedly expected to absorb the financial consequences. Electricity users have already endured years of unreliable supply, load shedding, and economic disruption while continuing to pay for a service that has demonstrably failed to meet acceptable standards. Requiring the public to fund further increases under these circumstances effectively transfers responsibility away from those accountable for infrastructure neglect and poor financial oversight. Before any additional burden is placed on consumers, Eskom should be required to demonstrate meaningful corrective action, including the recovery of losses linked to mismanagement, the disposal of non-essential assets, and the implementation of sustainable maintenance and operational reforms. Tariff increases should be a last resort, not a mechanism to compensate for unresolved internal failures. NERSA has a statutory duty to act in the public interest. Approving this increase would undermine that mandate by normalising the practice of passing the cost of institutional failure onto households and businesses that are already under severe financial strain. I therefore urge NERSA to reject the proposed tariff increase and to require Eskom to address its structural and governance shortcomings before seeking further financial relief from consumers. 	2026-01-11 22:03:31	No I do not	All of the above – we should not pay for government blunders	Considering the current disheartening economic climate in South Africa, it is totally unfair to pass this cost on to the consumers. It remains the sole responsibility of NERSA to ensure that the assets are correctly valued, and if such errors are due to incompetence and inexperienced staff, I therefore believe that it is totally unfair and unjust to expect to pass the consequences of this onto the consumer. This blunder is most probably due to unqualified and inexperienced cadre deployment into senior positions which is known to end in disasters for all.	Deon	Gauteng		self-employed
	2026-01-11 22:02:28	No I do not	All of the above – we should not pay for government blunders	Government is responsible to foot the bill as they are the primary stakeholder in ESKOM, and have already TAXed consumers via income tax and excessively high electricity tariffs. ESKOM is in its current position due to governments abuse and misuse of taxpayers money.	Sewis	Western Cape

	2026-01-11 20:44:24	No I do not	All of the above – we should not pay for government blunders	I strongly object to electricity consumers being charged for calculation errors made by NERSA and Eskom. Electricity users should not be expected to fund past mistakes, unreliable and aging infrastructure, or inefficiencies caused by poor planning, mismanagement, and delays. I further object to the continued payment of year-end bonuses while Eskom seeks to recover costs arising from its own failures. These funds should instead be used to absorb the financial impact of management blunders, rather than passing the burden on to the public. As pensioners, we helped build this country and supported its state-owned enterprises over decades. It is deeply unfair that we are now expected to pay for the failure to maintain, manage, and protect the infrastructure inherited from the old South Africa. Electricity is an essential service. Consumers should not be punished for institutional shortcomings. I therefore urge NERSA to reject any tariff increases that are based on errors, inefficiencies, or a lack of accountability. 	2026-01-11 20:21:40	No I do not	All of the above – we should not pay for government blunders	Such massive mistakes cannot be solved by asking US, the consumers. The people directly involved should be made responsible and a plan made for THEM to recoup this huge mess up. Many consumers like ourselves, are pensioners who are already struggling to make ends meet and now we are expected to find a way to fix their blunders.....OH NO FORGET IT!!!	Jenny	Free State		self-employed
	2026-01-11 20:21:28	No I do not	All of the above – we should not pay for government blunders	Government has squandered our money, minerals, marine life and everything they touch. Ut us time the employees of said government is held responsible for their mistakes. Clearly the guy that mopped the floor is not responsible, and the fat paycheck senior management should foot the bill. If they cant, they should be trialed for treason. Thier inadequacy has economic impact that will last for generations. Just so that they can have fancy parties and bloated security, and a lifestyle that should only be lived by the super rich. It is ridiculous that people are "responsible" for our fate, but when it comes to taking responsibility it never happens.	Bendré	Western Cape		
	2026-01-11 20:20:49	No I do not	All of the above – we should not pay for government blunders	Privatize	Mike	Gauteng

	2026-01-11 20:19:08	No I do not	All of the above – we should not pay for government blunders	It is high time South African wakes up. This time we must completely reject the increase. If it comes to a push we must take it to the streets, call for nationwide stay away for a week. If the decision is not rescinded , we start again for another week and if we are not listened to, we must call for a nationwide shut down for every industry except for the essential services like health. We cannot continue to pay for ESKOM /ANC/GNU incompetence any longer, we must totally reject this even if it bringing down this present regime. Our electricity cost is already way out for a developing country. It is thuggery of the ANC over the past thirty years that had brought us here.	Mandla	Gauteng		retired

	2026-01-11 19:03:22	No I do not	All of the above – we should not pay for government blunders	As Christians, we believe in stewardship, accountability, and justice. Asking taxpayers to cover Eskom's R76 billion debt ignores these principles. Years of mismanagement and corruption have gone largely unpunished, yet ordinary people — many already struggling — are asked to pay again. Scripture teaches that leaders will be held accountable for how they manage what is entrusted to them (Luke 12:48). Redirecting scarce public funds to repeated bailouts, instead of caring for the poor, improving healthcare, education, and job creation, is not wise stewardship. True restoration requires repentance, reform, and responsibility — not endless rescue without consequence.	Elizabeth	Western Cape		employed individual

	2026-01-11 18:49:12	No I do not	All of the above – we should not pay for government blunders	I strongly object to NERSA’s proposal to recover R76 billion from electricity consumers to compensate for its own regulatory error in Eskom’s tariff determination. This is an outright abuse of power: ordinary households and businesses are being forced to pay for a mistake made by the regulator, not by consumers. South Africans are already crushed by high electricity prices, unreliable supply, and a failing economy. Passing the cost of NERSA’s blunder onto the public is unjust, irresponsible, and fundamentally unethical. Accountability must rest with those who made the error — not with consumers who have no choice but to buy electricity.	Pamela	North West		business owner
	2026-01-11 18:47:58	No I do not	All of the above – we should not pay for government blunders	I'm a pensioner and can't afford to pay more. Why must we pay for bad decisions by government.? Stop all the corruption in SA!!	Beryl	Free State		retired
	2026-01-11 18:46:51	No I do not	All of the above – we should not pay for government blunders	South African citizens are taxed on almost every aspect of daily life. These taxes, deducted repeatedly from our hard-earned salaries, are meant to fund effective governance — including correcting government failures, maintaining critical infrastructure, and building a functional, competitive country. It is unacceptable for the financial burden of mismanagement and operational failures to be shifted onto citizens who already contribute extensively. South Africa cannot afford to keep falling behind the rest of the world. It is time for government and state-owned entities to take responsibility and fulfil the duties for which they are funded.	Stefan	Western Cape		employed individual
	2026-01-11 18:46:48	No I do not	All of the above – we should not pay for government blunders	South African citizens are taxed on almost every aspect of daily life. 	2026-01-12 11:11:48	No I do not	All of the above – we should not pay for government blunders	This is a no-brainer. Eskom is the basis for it's own set of incompetency jokes as an indicator. If anything small businesses should be able to claim for down time throughout years of load shedding. Regarding maintenanace, our connection fee is exhorbatant yet this house was built in 1962. The exact same wire connection comes to the house. It has never been upgraded or checked. Why should I pay a 2026 fee for a 1962 connection? The law works on the fact that there are repercusions and penalties for actions (or non-actions) The blame falls squarely on the perpetrator. Why does Eskom as a servant to the people of South Africa, feel that it can get away with their actions? We the people (the actual clients of Eskom) refuse to pay for incompetency? Period.	Tertius	Western Cape		self-employed
	2026-01-12 11:11:21	No I do not	All of the above – we should not pay for government blunders	Dit gaan te maklik in ons land. As die regering geld vra het ons geeeen keuse en hou net aan om die monster te voed!! Hoeveel van die R76blj gaan in die sakke van amptenare. Ons sal nooit weet en die ander partye kom maar redelik swak voor om vir die publiek te baklei.	elaine	Mpumalanga		retired

	2026-01-12 10:58:09	No I do not	All of the above – we should not pay for government blunders	Determining the true cost of Eskom assets is a flawed and futile exercise for a number of reasons; 1. Most of the old assets have been fully depreciated in any case 2. Any revaluation of the assets in terms of some accounting framework [e.g. IFRS] is a matter of opinion and the consumer / public should not pay for depreciation, or amortisation of a theoretical value. 3. The new builds e.g. Medupi and Kusile is way over budget and fraught with corruption and inefficiency, which is well documented, which once again the consumer should not pay for. 4. Eskom has been misled into the so called "green energy / just energy transition" to buy into inefficient solar and wind projects which are expensive and inefficient. As for operating costs; 1. See point 4 above for high c/kwh cost from inefficient green projects. 2. It is common cause that Eskom employees earn the highest average salaries in the country. 3. The whole Eskom organisational structure is a behemoth of high overhead costs, job creation and inefficiency which lead to extremely high operating expenses. 4. Owing to the big transformation drive, the technical skills base and institutional knowledge of Eskom has been eroded to the point of dysfunctionality, and core functions have to be outsourced leading to further operational costs. 5. Owing to dysfunctional government at all levels, but in this case particularly municipalities, which owe Eskom billions of Rands for bulk electricity, resulting in poor cash flows for Eskom, high bad debt provisions, larger borrowings, hence interest charges, which result in financial losses, or low profitability. Eskom must recover municipal debt first to improve its cash flow / working capital Because Eskom has a state enforced monopoly on electricity supply it's existence can only be justified if it has low competitive electricity tariffs. Also the consumer can not be expected to pay for Eskom's blunders, corruption and inefficiency. Finally, at a conceptual level; NERSA is supposed to protect the public against exploitation or passing on excessive cost by Eskom. However, this blunder seems to indicate that NERSA is just another layer of complexity and cost in the electricity value chain, and rather there to cover up for the government, than act in the interest of the electricity consumer. 	2026-01-12 10:56:20	No I do not	All of the above – we should not pay for government blunders	Just another failure of incompetent but very clever thieves to try and earn more money from tax paying citizens to further fund their ever increasing theft schemes. We are sick of you cANCer!!! We want you out!! None of you are qualified or have enough savvy or knowledge to run a tollbooth, not to even begin that you run a country. You should never have been in control of escom. Since you captured and pillaged their coffers and you appointed thousands of your unskilled cronies, escom has gone down the drain. Power outages in our suburbs are leaving us with no alternatives but to pay for expensive solar and then you want to tax us for that too because you can't grow the economy. We can't keep up paying for your screwups!! Enough is enough. Step back and let qualified and people who actually care about others and not just themselves and their thieving behaviours. 	2026-01-12 10:54:51	No I do not	All of the above – we should not pay for government blunders	Over the years, reliability and affordability have been thrown out the door, while corruption and theft have been left unchecked. I don't see how holding the public responsible for the overall disarray of the government service. With taxes and overall costs constantly rising due to corruption, this latest stunt is just another way to hold the country hostage. I say that the buck should stop here, and the parties responsible for the errors and losses, the parties who have stolen, misappropriated, and wasted the financial resources, should be fined large sums to make up the amount.	Pauline	Gauteng		unemployed individual
	2026-01-12 10:54:48	No I do not	All of the above – we should not pay for government blunders	In my opinion, the cost of looting via BEE is factored into the cost of assets, liabilities and operational costs. It is a well-known fact from studies that the BEE premium is from 100% to 400% and this is factored into the Eskom and municipal tariffs.	Aubrey	Gauteng		retired

	2026-01-12 10:50:58	No I do not	All of the above – we should not pay for government blunders	Eskom is giving certain companies and organisations preferential rates (e.g. the steel producers, etc.) that are much lower than the rates we the ordinary electricity users are charged with. Many municipalities are in areas with their payments to Eskom. For this we, the ordinary electricity users, are already paying by means of the rate hikes of the past years. We are paying for the corruption and the neglected infra structure that went on for years. We are paying for the bad management and the bad efficiency of staff and the resources in general, while staff in the upper levels of Eskom are paid exorbitant salaries. In view of all of the above it is time that Eskom and NERSA seeks other means of financing this R67Billion shortfall. I DO NOT AGREE WITH NERSA'S APPROACH.	Manfred	Western Cape		self-employed

	2026-01-12 10:31:21	No I do not	All of the above – we should not pay for government blunders	I feel Eskom just keeps on raising the costs and don't do what is expected. If they were running there accounts correctly and keeping a proper asset list they should know what their assets were. They need to ensure that they are paying the correct amount for their consumables not inflated prices that they then want to pass down to the consumer. Projects that were suppose to be completed are still not finished and maintenance is also not kept up. Why don't they look to the contractors that are not completing projects for the loss of income and asset management as there should be a clause in the contract to state the completion dates and what the penalties will be. They should also look at the contractors that are employed to fix broken down thing and ensure that quality parts are used and if the same fault appears time and again they should start asking questions or replace the contractor as they are obviously not concerned about the damage that is been cause by their poor work men ship . There are a lot of poor and middle class people that can no longer afford to pay for the electricity they need and have to decide weather they want to eat or give there children hot water and lights at night. 	2026-01-12 10:21:46	No I do not	All of the above – we should not pay for government blunders	The Government is at fault here not the Public consumers. Their lack of inteligence should not become our problem. The ANC must go. They are incompitent and useless. Dock their pay and fix the system and infrastructure.	Vincent			retired
	2026-01-12 10:21:41	No I do not	All of the above – we should not pay for government blunders	I oppose Eskom's proposed tariff hikes, especially in light of the R76 billion mistake acknowledged by NERSA after a High Court ruling forced a recalculation of Eskom's asset values. Consumers should not be expected to absorb the cost of NERSA's calculation errors, nor should we pay full price for aging, unreliable infrastructure that fails to deliver consistent electricity. It is equally unreasonable to expect the public to fund Eskom's ongoing cash-flow problems and construction delays. These increases place an unfair burden on households and businesses, and I stand firmly against shifting the consequences of mismanagement onto electricity users.	Reinette	Gauteng		self-employed
	2026-01-12 10:21:30	No I do not	All of the above – we should not pay for government blunders	Aside from admitting to the blunder, I am hoping that further investigations will take place to determine why these blunders were made by professionals tasked with this responsibility. The depreciation cannot follow normal rates as the pushing of the battered infrastructure to meet energy demands over the last few years will have significant increased wear and tear on the assets.	Ashley	KwaZulu-Natal		unemployed individual

	2026-01-12 10:14:26	No I do not	All of the above – we should not pay for government blunders	In the private sector, when these mistakes are made, the client does not pay. The provider does. The provider was the one who gave these costs, and they are the ones who need to fit the bill. The consumer did not contribute to the erroneous calculations and should therefore not be held liable. I have already been paying for the infrastructure to be maintained. What happened to the taxpayers' money that was meant to fit that bill 5, 10, 20, 30 years ago? I have already paid. Why should I pay again? This is criminal! Eskom's incompetence is not something the customer should have to accommodate. In the private sector, the best and industry-proven company gets the job. We are forced to use Eskom, and they have the monopoly. If they wish to have the monopoly, then they need to ensure that they get the job done efficiently. They have the money, and if they lack funds because corrupt municipalities have been able to run amok, that is not the consumer's fault. That falls on Eskom and the government. The writing has been on the walls for years. Eskom and NERSA don't get to play dumb and insist the taxpayer now needs to fit the bill.	Tawnee	Gauteng		employed individual

	2026-01-12 10:12:34	No I do not	All of the above – we should not pay for government blunders	Like in the case of Discovery the consumer should not pay for the blunders of an organisation. The cost of these bunders should be absorbed by Eskom and Nersa. The consumer is already overburdended and cannot pay for errors by incompetent officials. No bonuses and salary increases for a few years will soon make good the short fall. Eskom should realise that there are other alternatives available and should have noticed that the demand for electricity is declining and this is due to 2 factors:- 1 The availability of electricity, and 2 The price of electricity Eskom cannot demand higher prices and hope that the consumer will not look for alternatives.	Francois	Gauteng		retired

	2026-01-12 09:57:59	No I do not	All of the above – we should not pay for government blunders	Eskom should sell off the bulk of its generation capacity to private sector energy companies and exit generation. By clustering packages of old, new and pumped storage units and offering them to the market, Eskom focuses on distribution and buying from cheapest cost producers and selling at best possible prices. By selling generation it can repay all debt. Foreign energy companies will run generation far more efficiently than Eskom has done and money raised by listing these clusters should easily settle all debt.	Greg	Gauteng		retired

	2026-01-12 09:53:33	No I do not	All of the above – we should not pay for government blunders	Its their blunder they must pay for it. The people at NERSA and Eskom have been irresponsible and need to do what is right - cut down their ballooning perks, stop irregular spending and corruption. There is enough revenue at Eskom to recover and pay up for this blunder - and more to subsidize burdened households.	Kopano	Gauteng		employed individual

	2026-01-12 09:53:27	No I do not	All of the above – we should not pay for government blunders	It is of great concern that irrisponsible most cabinet ministers with no or little education , careless for the people they are supposed to represent, are entrusted to make dicisions on spending trilions of hardworking taxpayers money. This is reckless. Every cabinet member should undergo extensive training on how to manage the responsibility they have to oversee on behalf of the people they represent. Corrie ten Boom once said: one can not give a child a case that is too heavy to carry. It is about time these stubborn leaders of SA realize, the case they are trying to carry, is far too heavy for them to keep on dragging. It is falling apart at the cost of those they were supposed to SERVE! Each one of them is a public SERVANT!	Anna	Western Cape		retired
	2026-01-12 09:53:21	No I do not	All of the above – we should not pay for government blunders	I hereby submit this formal comment in response to the electricity price determination published for public comment. It is a matter of serious concern that, following a High Court ruling, NERSA has acknowledged material errors in its original calculation of Eskom's Regulatory Asset Base, reportedly amounting to approximately R76 billion. The current proposal appears to seek recovery of this error from electricity consumers through increased tariffs, framed as adjustments for previously omitted depreciation and returns. From a consumer and legal standpoint, this approach is fundamentally flawed and unjustifiable. Firstly, consumers cannot lawfully or equitably be required to fund the consequences of regulatory calculation errors. The omission of depreciation and returns was not caused by electricity users, nor did consumers derive any benefit from these omissions at the time. Retrospectively charging consumers for a regulator's admitted mistake violates basic principles of fairness, reasonableness and administrative justice. Secondly, the proposal effectively requires consumers to pay full price for ageing, unreliable and underperforming infrastructure. Eskom's asset base is characterised by frequent breakdowns, declining availability, and extensive deferred maintenance. It is irrational to expect consumers to fund enhanced "returns" on assets that do not reliably deliver the service for which tariffs are levied and poor management and proper maintenance programs, Thirdly, this determination appears to shift the burden of Eskom's cash-flow constraints, project overruns and construction delays onto consumers. Electricity users should not be compelled to act as involuntary financiers of inefficiencies, dysfunctional leadership, governance failures or delayed capital projects over which they have no control. Fourthly, allowing recovery of historic regulatory errors through tariffs creates a dangerous precedent. It undermines regulatory certainty and public confidence in NERSA's determinations, as it signals that errors, no matter how material, will ultimately be borne by consumers rather than absorbed through regulatory correction, efficiency adjustments, or shareholder and state accountability mechanisms. In terms of the principles underpinning cost-reflective tariffs, only prudently incurred, efficiently managed and forward-looking costs should be recoverable from consumers. Historic miscalculations fail this test. Any attempt to recover such costs risks being unreasonable, irrational and susceptible to further legal challenge. Accordingly, I strongly object to any electricity price determination that: • Recovers historic regulatory calculation errors from consumers; • Requires consumers to fund returns on ageing and unreliable infrastructure; or • Uses tariffs to address Eskom's cash-flow pressures or construction delays. NERSA is urged to reconsider this approach and to ensure that the consequences of regulatory errors are addressed through appropriate regulatory and institutional mechanisms, rather than being passed on to already overburdened electricity users.	Shaun	KwaZulu-Natal		retired
	2026-01-12 09:52:53	No I do not	All of the above – we should not pay for government blunders	South Africans should not be forced to shoulder NERSA's errors or Eskom's mismanagement, electricity tariffs have already skyrocketed from just R0.69 per kWh in 2010 to over R4.17 per kWh in 2025, a more than sixfold increase, far outpacing inflation and leaving households and businesses crippled by unaffordable costs. Why Consumers Must Refuse to Pay for NERSA's Mistakes 1. Eskom's Failing Infrastructure Aging power stations are constantly breaking down, directly causing load shedding. Instead of investing wisely in maintenance and modernisation, Eskom has allowed its infrastructure to deteriorate, yet consumers are expected to pay inflated tariffs to cover depreciation on assets that are barely functional. Paying for "wear and tear" on plants that fail to deliver electricity is nothing short of exploitation. 2. Inflated Costs and Tariff Abuse Eskom's tariffs have risen over 15% annually since 2010, compared to average inflation of just 5%. In 2010, electricity cost R0.69 per kWh; by 2025, it has ballooned to R4.17 per kWh. This means electricity is now over six times more expensive, while service quality has collapsed. Consumers are paying more for less, higher bills, but fewer hours of reliable supply. 3. Load Shedding and Reliability Crisis South Africans endure daily blackouts that cripple productivity, education, and healthcare. Tariff hikes are justified on the basis of "asset value recovery," yet those same assets are failing to provide consistent electricity. It is unconscionable to demand more money from citizens for infrastructure that actively undermines their livelihoods. 4. Corruption and Mismanagement Eskom has been plagued by decades of corruption scandals, inflated procurement contracts, and misallocation of funds. Billions have been wasted on incomplete projects and questionable deals, yet NERSA's recalculations now propose that consumers fund "Work Under Construction" and "Net Working Capital." This effectively forces the public to bankroll Eskom's incompetence and corruption, rather than holding the utility accountable. 5. NERSA's Regulatory Failure NERSA's role is to protect consumers and ensure fair pricing. Instead, its repeated errors in calculating Eskom's asset base have led to court interventions. The High Court has already ruled against NERSA's flawed decisions, yet the regulator continues to push adjustments that increase tariffs. South Africans should not be punished for NERSA's mistakes, regulatory incompetence must never translate into higher household bills. In 2010 the average Eskom tariff (R/kWh) was R0.69, in 2025 it was R4.17, that's an over 500% increase in costs. How does Eskom expect South African's to now pay for the increase? South Africans are already paying exorbitant tariffs for unreliable electricity, while corruption, mismanagement, and regulatory blunders compound the crisis. To demand further increases to cover NERSA's mistakes and Eskom's inflated asset valuations is unjust, immoral, and economically destructive. We refuse to accept tariff hikes that reward incompetence and corruption, and demand accountability, transparency, and reform instead of footing the bill for a broken system. If you want to increase your income, start charging people for their free electricity, and stop penalizing those who do pay for it already.	Ashley	KwaZulu-Natal

	2026-01-12 09:46:31	No I do not	All of the above – we should not pay for government blunders	Mistakes by regulators or state-owned enterprises are governance failures, not the consumer obligation. South Africans already face high electricity tariffs, had to cope with rolling blackouts and made their own plans and have inflator pressures. Forcing public to pay undermines confidence in ESKOM and NERSA plus the GOVERNMENT. All these institutions are already criticized for mismanagement, corruption and fraudulent activities. NERSA should publish full details of the error and why it was concealed for months. ESKOM can absorb the loss through internal restructuring, effeciency improvements or government bailout (stop sending money to shell companies) - not consumer tariffs. Government institutions need to stop offload responsibilities onto consumers. Public confidence in energy governance will collapse further. Government might face the same conciquences as currently happening in Iran (consumers had enough).	Gerda	Western Cape

	2026-01-12 09:43:22	No I do not	All of the above – we should not pay for government blunders	To Whom It May Concern, I am writing to formally object to the proposed electricity price determination currently open for public comment. South African households and businesses are already under severe financial strain due to the rising cost of living. Any proposed tariff increase must therefore meet the highest standards of fairness, legality, efficiency, and affordability. It is deeply concerning that the current proposal seeks to recover costs arising from NERSA's own asset valuation errors. As confirmed by a High Court ruling, NERSA was required to recalculate Eskom's Regulatory Asset Base after admitting to significant calculation mistakes. Public reporting indicates that these errors amount to approximately R76 billion. I strongly object to the principle that electricity consumers should be required to fund these historical regulatory errors through higher tariffs. Costs arising from incorrect calculations, omissions, or regulatory oversight failures should not be retrospectively imposed on consumers who had no control over these decisions. Specifically, I request that NERSA address the following concerns: Affordability: Consumers should not be held financially responsible for errors made by the regulator or the utility. Passing these costs on through increased tariffs undermines public trust and places an unjust burden on households and businesses already facing economic hardship. Reliability: It is unreasonable to require consumers to pay increased tariffs — including returns and depreciation — for aging and unreliable infrastructure that continues to experience frequent breakdowns and load shedding. Efficiency: Consumers should not be expected to fund Eskom's cash flow challenges, construction delays, or inefficiencies through tariff increases, particularly where these issues stem from governance and project management failures rather than service improvements. NERSA's mandate includes balancing the financial sustainability of the electricity supply industry with the interests of consumers. Approving tariff increases that recover the cost of regulatory errors would set a dangerous precedent and erode confidence in the regulatory process. I therefore urge NERSA to reject any tariff determination that seeks to recover costs linked to prior calculation errors, inefficiencies, or unreliable infrastructure, and to prioritize affordability, accountability, and transparency in its final decision. Thank you for the opportunity to participate in this important public consultation. Yours sincerely, A concerned electricity consumer	Ashish	KwaZulu -Natal		employed individual

	2026-01-12 09:27:20	No I do not	All of the above – we should not pay for government blunders	I strongly oppose any electricity price increase intended to recover costs arising from NERSA's own calculation errors or Eskom's historical inefficiencies. Consumer should not be required to pay for a reported R76 billion miscalculation in asset values. These are regulatory and institutional failures, not consumer-driven costs. Passing them on through higher tariffs in unfair, regressive, and economically damaging, particularly in a country already facing extreme cost-of-living pressures. It is also unreasonable to charge full or increased tariffs for electricity supplied through aging, unreliable infrastructure that is prone to load shedding, breakdowns, and poor service delivery. Consumers are already paying more while receiving less. Further, electricity users should not be expected to fund Eskom's cash-flow shortfalls, operational inefficiencies, or construction delays. These issues point to systemic governance and management failures that must be addressed through reform, accountability, and restructuring, not through repeated tariff increases. Continually increasing tariffs under these conditions creates a perverse incentive, where inefficiency and mismanagement are effecitvely rewarded. It entrenches a cycle of higher costs, declining performance, and growing public distrust, while placing the unsustainable burden on households and businesses. South Africa urgently needs structural reform in the electricity sector, including meaningful competition and private sector participation, to improve efficiency, reliability, and affordability. Until such reforms are implemented, NERSA should prioritise consumer protection and affordability, not cost recovery for institutional failures. For these reasons, I object to the proposed price increase determination and urge NERSA to reject any tariff increases linked to past errors, inefficiencies, or unreliability. 	2026-01-12 09:20:43	No I do not	All of the above – we should not pay for government blunders		Gideon	North West		retired
	2026-01-12 09:20:34	No I do not	All of the above – we should not pay for government blunders	I write as a deeply concerned South African citizen, household electricity consumer, and participant in an already overburdened economy to express my strong opposition to NERSA's proposal that electricity consumers absorb an additional R76 billion in costs arising from regulatory errors and Eskom's historical inefficiencies. At its core, this proposal violates a basic principle of fairness: ordinary South Africans are being asked to pay for mistakes they did not make and could not influence. Consumers have no control over Eskom's capital decisions, cost overruns, project delays, governance failures, or NERSA's own regulatory miscalculations. Yet once again, the financial consequences are being transferred downward to households and businesses that are already struggling to cope with rising living costs, weak economic growth, and persistent unemployment. Electricity is not a discretionary product. It is an essential service that underpins human dignity, education, healthcare, food security, and economic participation. Any significant increase in tariffs disproportionately harms the most vulnerable low- and middle-income households, small businesses, and informal enterprises who have the least capacity to absorb further cost shocks. For many families, electricity affordability is already at a breaking point. For small businesses, higher tariffs directly threaten survival, employment, and local economic activity. The proposal also raises serious concerns about regulatory accountability and moral hazard. If errors of this magnitude can be retrospectively corrected by simply passing costs on to consumers, there is little incentive for improved diligence, transparency, or discipline, either from Eskom or from the regulator itself. A credible regulatory framework must protect the public interest, not merely guarantee revenue recovery for a monopoly utility regardless of performance outcomes.	Chris	Gauteng		self-employed
	2026-01-12 09:20:27	No I do not	All of the above – we should not pay for government blunders	Eskom is a utility company operating within South African commercial law. Therefore once a financial balance has bee submitted should not be able to be altered. So that said , Eskom can not claim losses due to financial errors . if they could it would mean that all the input costs would have to be recalculated so that the suppliers can also increase their tarrifs / prices . Imagine that we all can tell our past customers to pay an extra amount an all invoices sent out for a particular period. We would be told to GET LOST. So Eskom , GET LOST . IT'S YOUR ERROR , NOT THE CONSUMERS. Maybe Eskom should get LIQUEDATET . That is what happens to other institutions that are financially mismanaged through greed.	Guido	Gauteng		business owner
	2026-01-12 09:20:22	No I do not	All of the above – we should not pay for government blunders	The people of South Africa have suffered enough under a corrupt government and decaying public enterprises. It is unacceptable to make the people pay more and more while delivering less and less value and crucial services. The cost should be covered by the managers and executives at Eskom and Nersa. They earn enough to pay the out of pocket while the majority of this country lives in poverty. I refuse to cough to for this.	Magi	Gauteng		employed individual

	2026-01-12 09:17:14	No I do not	All of the above – we should not pay for government blunders	Why must I pay for continued mis- management, poor service and then when you have no option but to try solar, then you get punished for that as well??!! These are services that are basic for all people. How can the government have a socialist perspectiveiwhich is suppossed to be for the people, they cant even control the electricity crisis for the people?	Hilary	Gauteng		self-employed
	2026-01-12 09:16:46	No I do not	All of the above – we should not pay for government blunders	Asking consumers to foot the bill is absolutely ridiculous. It is mal practice. Government makes a massive mistake of R76 billion, which is probably stealing once again, incredible inefficiency, and they don't even have an accounting ability, and then ask the consumers to pay once again. No, enough is enough. This is not a blunder or a mistake. It is day light robbery.	H.	Gauteng		retired
	2026-01-12 09:16:07	No I do not	All of the above – we should not pay for government blunders	I do not agree that I and/or any other household should keep on funding the so-called Nersa/Eskom error or any new reason they can name for more increases. The excuses for increases while in December 2025 eskom boasted that they had a "fantastic" Financial year and the profit they made. Profit from what? for whom? more big bonusses for executives that do not deserve it! All of a sudden the government, which includes eskom, came to the realization that if they do not do upgrades they will loose votes. When solar started to be the only power source we could count on, they realised that we are not fully dependable on eskom. Again they want to pressure us into a registry to tax us for the very expensive solar systems that we had to install. Another expensive insurance cover that we need to pay extra for. Just another bloodsucking system with no assurances. Eskom boast about the number of days that there were no loadshedding, but in the meantime numerous suburbs are without power supply due to damage or stolen equipment. (Not your problem? The where does your responsibility for maintenance start and end?) Just how many municipalities pay their dues to eskom? Should I owe them R1.00 (one rand) my account is immediately flagged and I am prosecuted. Why can the same ruling not be applied to the corrupt municipalities? First start with debt collections and get your house in order, before you dream to add another increase.	Hannie	Gauteng		retired

	2026-01-12 08:54:22	No I do not	All of the above – we should not pay for government blunders	Unemployment is already sky high, and we are barely getting by as it is. higher tariffs will only make things worse. On top of that, the government wants us to pay them for installing solar panels on our properties, at our own costs instead of subsidizing greener energy to lessen the weight on the already flailing grid. They can recoup those costs by cutting down the salaries of our lawmakers and MPs, but we know they won't do that. Higher taxes for the rich and wealthy can add to this, instead of burdening the poor and middle-class people. The government has to take the full blunt of this and leave us out of it. We are already struggling to make ends-meet at this particular time.	Thabiso	Free State		unemployed individual
	2026-01-12 08:54:05	No I do not	All of the above – we should not pay for government blunders	You're right to raise these questions — but the framing matters. Affordability: Consumers should not be asked to retroactively pay for regulatory and accounting errors they did not cause. Mistakes by NERSA and Eskom are governance failures, and passing them on via tariffs undermines public trust and fairness. Reliability: Paying "full price" assumes full value. Aging plants, breakdowns, and load-shedding mean consumers are not receiving the service quality that those tariffs are meant to fund. Price must reflect performance. Efficiency: Covering cash-flow gaps and construction delays through higher tariffs removes incentives for reform, discipline, and accountability. It socialises failure while privatising inefficiency. If errors of this scale are simply shifted onto users, the message is clear: there is no consequence for poor planning or regulation. Sustainable reform requires transparency, cost containment, and accountability — not treating electricity users as the default bailout mechanism.	Michael	Gauteng		retired

	2026-01-12 08:51:01	No I do not	All of the above – we should not pay for government blunders	It's ridiculous that we have to continue paying for Eskom and the government's bungles. Strong action should be taken, but these guys are a bunch of criminals that stick together through thick and thin. It's time we stand up against these thugs and unite in the same way to fight incompetence and corruption!	David	Gauteng		employed individual
	2026-01-12 08:51:00	No I do not	All of the above – we should not pay for government blunders	Instead of taking more and more money from Tax-payers, goverment needs to cut salaries, staff amounts and corruption! 1. Government salaries are already high relative to the private sector and national averages. The Quarterly Employment Survey data shows that government-related institutions — especially extra-budgetary institutions like SARS, CCMA, RAF, and UIF — earn an average of R56,413 per month, significantly above the formal non-agricultural average of R29,490. Even other government sectors are above national norms. 2. A large share of government spending already goes to employee compensation In the 2025 budget, over 30% (R814.5 billion) of total government expenditure is allocated to wages and salaries. This is a substantial slice of national spending that reflects a large existing financial commitment to the public sector workforce. 3. South Africa's public wage bill is high by international comparison Both IMF and World Bank data indicate that South Africa spends 12–13% of GDP on the public sector wage bill — placing the country among the highest globally in government labor costs. This share is also 3.5% higher than the OECD average, underscoring the relatively generous compensation already in place. 4. Government employees have received above-inflation salary increases Despite earlier wage freezes during the pandemic, unions and government have negotiated raises often above inflation, further swelling public expenditure and reducing the need for additional tax revenue. 5. Within government finances, there are inefficiencies and overemployment Economists — such as Dawie Roodt — have characterized many state employees as underworked and overpaid, and have pointed to inefficiencies across departments and agencies that the state can address before turning to taxpayers for more money. 6. Tax increases would compound financial pressure on the public at a time of wage inequality With government pay above national averages, increasing taxes places an additional burden on citizens who are already struggling with cost of living pressures. There is a strong equity argument that taxpayers shouldn't be asked to subsidise an already large public wage bill.	Arno	Western Cape		employed individual
	2026-01-12 08:50:49	No I do not	All of the above – we should not pay for government blunders	Enough burden on consumers. The responsible for this disaster must pay: corrupted politicians and corrupted unions who sabotage Eskom.	Alex	Gauteng		self-employed

	2026-01-12 14:03:23	No I do not	All of the above – we should not pay for government blunders	Given repeated bailouts and failures to properly or responsibly address the power supply issue over nearly two decades, forcing consumers to pay yet again for government mistakes is unacceptable. What is more, government is (at best) glacially slow to adopt or support sustainable energy supply methods which have the benefit of moving away from environmentally disastrous power generation as well as from Eskom's death spiral. Instead, South Africa repeatedly turns to unsustainable fossil fuel-generated power that benefits interested individuals rather than the planet or the population. It's time that the country is forced to take a new path towards sustainable electricity generation and supply.	Laura	Gauteng		employed individual

	2026-01-12 14:01:12	No I do not	All of the above – we should not pay for government blunders	The ruling now mandates recalculation and consultation, which implies that the process remains rushed and opaque, with limited time for meaningful public input. Remitting the matter back to NERSA without providing clear guidelines on how to balance Eskom's financial recovery leaves room for further disputes and delays. Setting aside the original tariff decision, has created uncertainty for electricity pricing over future years. Households and business cannot plan effectively in a climate of sudden and unexpected tariff changes. NERSA's mistake now unfairly forces already strained consumers to compensate for this error, shifting the burden of regulatory incompetence onto the public. Has anyone responsible been held accountable? The prosed tariff hikes will hit households and businesses already struggling with high inflation and slow economic growth. Vulnerable groups, especially low-income households, would suffer the most from these increases. This is in effect a double penalty for consumers	Robert	North West		retired
	2026-01-12 14:00:43	No I do not	All of the above – we should not pay for government blunders	As a pensioner I am already struggling to meet my electricity account every month and have cut down as much as possible. No-one can really afford to pay more - it is too much already!!	Patricia	KwaZulu-Natal		retired
	2026-01-12 14:00:06	No I do not	All of the above – we should not pay for government blunders	Really unfair to shaft South Africans with their mistakes. They need to force those at fault to take accountability and recover the money from them.	Mikayla	Gauteng		self-employed

	2026-01-12 12:59:06	No I do not	All of the above – we should not pay for government blunders	I hereby submit my formal objection to NERSA’s consultation on the redetermination of Eskom’s Regulated Asset Base (RAB) and the associated allowable revenue and tariff adjustments for the 2026/27 and 2027/28 financial years. Any decision that results in increased electricity tariffs will be severely detrimental to South African households. Many families are already struggling with the rising cost of living, unemployment, and economic instability. Higher electricity prices will place additional financial pressure on low- and middle-income households, deepen energy poverty, and force many to choose between basic necessities. Furthermore, ordinary consumers should not be expected to bear the financial consequences of long-standing governance failures, inefficiencies, and mismanagement within Eskom. Approving tariff increases under these circumstances would unfairly shift the burden onto the public. I therefore strongly reject this redetermination and urge NERSA to prioritise affordability, fairness, and the protection of households across South Africa. Yours sincerely,	matshidiso	Gauteng		student

	2026-01-12 12:57:05	No I do not	All of the above – we should not pay for government blunders	Not too long ago it was published that Eskom had this fantastic profit made. What happened since as there were tariff increases? Any decent "BUDGET" should make provision for maintenance, Strategic Spares, Replacement of infrastructure etc. What is the reason for a "Body" like Nersa to be involved in the running of Eskom. Who pay the employees of Nersa Is the qualifications of the Nersa employees validated to enable their part in determining the tariff of electricity. Top Management of Eskom as well as Nersa should be Re-Structured to get rid of "passengers" An forensic audit should be done on both Eskom en Nersa. Life style audits should also be done.	johannes	North West		retired

	2026-01-12 12:56:08	No I do not	All of the above – we should not pay for government blunders	I object against Nersa's plan to force South African energy users to pay Eskom an additional R76 billion for its mistakes based on the following - 1. Unfair Burden on Consumers • Ordinary households and businesses would be forced to pay for regulatory mistakes they did not cause. • This could lead to electricity price hikes of 9–10.5% in 2026, on top of already steep increases. 2. Rewarding Mismanagement • Eskom has a long history of financial mismanagement, corruption, and operational failures. • Allowing recovery of R76 billion through tariffs rewards inefficiency instead of enforcing accountability. 3. Economic Impact • Higher tariffs will raise the cost of living, hitting low- and middle-income households hardest. • Businesses will face higher operating costs, discouraging investment and job creation. • Inflationary pressure could worsen, as electricity costs feed into food, transport, and manufacturing prices. 4. Transparency & Governance Concerns • The original settlement between NERSA and Eskom was reached behind closed doors, undermining trust in regulatory processes. • Public consultation was only ordered after court intervention, showing weak governance. 5. Alternative Solutions Ignored • Instead of passing costs to consumers, Eskom could: • Improve operational efficiency. • Pursue debt restructuring or government-backed relief. • Accelerate renewable energy integration to reduce reliance on costly, inefficient coal plants. 	2026-01-12 12:42:26	No I do not	All of the above – we should not pay for government blunders	Why should the public be held liable for the mistakes and errors of government officials and the like. This is one of the reasons government officials never learn from their mistakes, they're never being held accountable. If a member of the general public were found guilty of any form of misconduct or gross negligence etc, they will be punished severely. Therefore, these government officials should pay for the damage they have caused, and if they don't have the cash then there are plenty of personal assets to seize and their multiple streams of income to foot the bill.	Willem	Western Cape		unemployed individual
	2026-01-12 12:41:27	No I do not	All of the above – we should not pay for government blunders	I am tired of seeing our once beautiful and functioning country being reduced into a cess pool by the government. They continue to fail to undertake necessary maintenence, fail to address corruption and implement apt punishment toward the guilty and keep employing people who are not up to the task. Just over 30 years ago, Escom was the best functioning electricity giant in Africa. We have seen the same failures with our Rail Industry, The South African Airways, The South African Postal Service, Local municipalities etc. Nothing works anymore. Our roads are full of potholes, we do not have enough clean drinking water, the sewerage system is collapsing and we consistently have to dig into our own pockets to help the government clean up their act. No more! Enough is enough! The government needs to pay for their own failure and incompetence. Unemployment is rife, job opportunities are not being created and if you are a white South African, your chances of finding gainful emplomentare virtually zero. Let's not even touch on the rising crime and violence, farm attacks and the corruption in the SAPS. You need to clean up your act ANC.	Bev	Free State		retired
	2026-01-12 12:40:48	No I do not	All of the above – we should not pay for government blunders	Why push the costs unto the consumer if the government and the state owned entities have been filled with corruption for years. Look at the top level management within Eskom and I am sure if you cut their salaries you will get a lot of the funds back. The average general consumer earns R30,000 a month while the CEO of Eskom gets R1m. The history of Eskom top Management earnings is concerning, when you look at the fact that they have received comfortable salaries, while mismanaging the plants with little to no maintenance. They (including the government) have treated it as a cash cow and now they don't want to take responsibility for it. Top Management caused this, they should pay it.	Marius	Gauteng

	2026-01-12 12:37:20	No I do not	All of the above – we should not pay for government blunders	The cost of living is enormous. It exceeds the monthly salary income of many. Politicians should not be so corrupt and greedy. If the mismanagement of allocated funds could be stopped and the guilty prosecuted for theft and over wasteful expenditure, the books would be able to balance. Our yearly income and salary adjustments does not meet our personal needs. These institutions should also be safe guarded as it is crucial for our economy and the prosperity of our nation. Infrastructure are being damaged and sabotaged and the guilty parties get away with it without being punished for their wrongdoing. It is our constitutional right to be provided with electricity, water, sanitation, roads and freedom of speech etc. The government does not care about the people that put them into power.	Susanna	Eastern Cape		employed individual
	2026-01-12 12:36:52	No I do not	All of the above – we should not pay for government blunders	Eskom has failed to provide a reliable electricity supply, forcing households and businesses to invest in alternative energy solutions such as solar power simply to remain operational. These investments were not optional, but necessary for survival. In most industries, a challenged monopoly responds by improving efficiency and value to retain customers. Eskom has instead continued to increase tariffs while delivering a service of declining reliability and value. Even more concerning, Eskom is already developing plans to penalise consumers who have invested in solar power after being driven to do so by Eskom's own failures. We therefore call for an immediate halt to further tariff increases, the withdrawal of any punitive measures against solar users, and full transparency on Eskom's plans to restore reliable, affordable electricity to South Africans. 	2026-01-12 12:27:47	No I do not	All of the above – we should not pay for government blunders	To whom it may concern, I am writing to formally register my strong opposition to the proposal that South African electricity consumers should be made to bear the financial burden of the R76 billion revenue shortfall associated with Eskom's Sixth Multi-Year Price Determination (MYPD6) for the 2025/26 to 2027/28 financial years. It is unacceptable that mistakes made in the regulatory process should be socialised through higher electricity tariffs for households and businesses already struggling with rising living costs and economic pressures. The proposed adjustment effectively shifts the risk of regulatory miscalculation and operational inefficiencies onto the shoulders of end-users — individuals and enterprises who have limited ability to absorb further cost increases. Electricity affordability is critical for economic activity, job retention, and the well-being of citizens. Increasing tariffs materially beyond what was previously determined — particularly to compensate for errors that could, and should, have been avoided — places an unfair burden on consumers and undermines confidence in the regulatory framework. I respectfully urge NERSA to reconsider any decision that results in consumers subsidising Eskom's shortfall and instead explore alternative solutions that do not exacerbate cost-of-living pressures or penalise electricity users for issues that are beyond their control. Thank you for considering this submission. Kind regards,	Kim	Gauteng		employed individual

	2026-01-12 12:08:08	No I do not	All of the above – we should not pay for government blunders	In ANY large organisation/company/ SOE etc, SARS aswell as the managing directors/operational directors/ accountants/auditors and other senior parties belonging to such are, should be, are responsible for having constructive meetings so as to be able to draw up OPERATING/PROJECTED BUDGETS for the short term and long term operations of the proxies in question. At these meetings between the various parties mentioned previously, a full list of: operational expenses (both current and projected), estimated income and expenditures, liabilities, depreciation of assets, maintenance and an provisional miscellaneous expense allocation for unforeseen expenses should be present OR created between all the relevant parties. are/ should be available for discussion in order to reach a FINAL COST STATEMENT. The cost of electricity over the past couple of years,(going back to when the NEW POWER STATIONS WERE PLANNED FOR AND CONSTRUCTED) has been calculated in to the intended charge to charge the consumer for electricity. This is true because not only was the price agreed to between NERSA & ESKOM a price to cover the cost of supplying electricity to the consumer, no, it also had a proportion buil-in towards the cost of subsidising the NEW BUILDS & MAINTENANCE PROJECTS!! If the organizations in question had done their calculations / projections correctly, employing SUITABLY QUALIFIED PEOPLE IN CRITICAL POSITIONS INVOLVED IN THIS CALCULATION and not political porns, this would have been prevented and ESKOM would be profitable at this stage. So i am emphasizing this fact= Employ the wrong people to do the important work and turn a blind eye to in-efficiency and corruption within these organizations and when the proverbial ," krap hits the fan," do not come running back to the consumer to fix your problem!!! You created the ,short fall/ problem, between all of you that created the problem and benefitted from this mismanagement= YOU AND YOU ALONE SHOULD PAY UP THE SHORTFALL BETWEEN YOU!! The consumer pays your salaries, now leave them alone and go and sort this problem out between yourselves. In there projected budgets, they know the EXACT COSTS OF= RUNNING, REPAIRING, UPGRADING OF FACILITIES!! Therefore if they had qualified people in the correct positions doing their work correctly, they would not have to squeeze the consumer for replacing aged / modifying infrastructure, it was already projected in the electricity price= cost plus, end figure to the consumer!! As far as the consumer having to be forced to pay additionally for= their useless control of their cash flow and pie-in-the- sky, new build estimates, they calculated the amounts incorrectly, now let everyone in the chain of command paay the difference!!!! (NB:) In the private sector if you messed up like you have between the 2 of you, you would be FIRED IMMEDEATLY!! So get of your fat backsides, do you work correctly OR BUGGER OFF!!!	Raymond	Western Cape		self-employed
	2026-01-12 12:08:00	No I do not	All of the above – we should not pay for government blunders	Someone else said it best: "Time and again, tax paying citizens are being punished with government and state entity incompetence, corruption and maladministration. In my view, the people responsible for these blunders should be PERSONALLY liable and have their assets attached to recover costs due to poor decision making. The biggest issue in this country is that politicians and elected officials are immune from their failures and incompetence, this needs to change. There should be personal jeopardy for politicians and elected officials - this will encourage proper behavior... ie. if you want to become a politician and/or elected official, you stand to personally be liable for poor decision making, poor execution of your duties and be punished accordingly to recover penalties for this. I am sick and tired of the average South African footing the bill constantly, not only in bailouts, but for mistakes, incompetence and corruption, and then over and above that, still get punished by price increases (which rarely if ever get reduced) to make up for this." 	2026-01-12 11:47:05	No I do not	All of the above – we should not pay for government blunders	I believe we as consumers have carried and payed enough for the ineptness, greed and ignorance of government in this sector. Given the track record of those in charge, I find myself unwilling to foot the bill for their 'mistakes'. Should this request go forward, I can almost guarantee that the money will NOT be applied to the benefit of the consumer in any way, form or intend. Life is hard enough as it is.	Thea			
	2026-01-12 11:46:28	No I do not	All of the above – we should not pay for government blunders	I do not agree that electricity consumers should be required to pay for NERSA's calculation errors. Consumers had no role in these omissions, and it is neither fair nor reasonable to recover historic regulatory mistakes through higher tariffs. Given Eskom's ageing and unreliable infrastructure, it is also unjustifiable to expect consumers to pay full economic returns for assets that are not delivering consistent or reliable service. Lastly, consumers should not be required to fund Eskom's cash-flow constraints or construction delays, particularly where inefficiencies and governance failures have already been acknowledged. Any correction of regulatory errors should be addressed through institutional accountability, not passed on to households and businesses already under severe financial pressure. 	2026-01-12 11:44:58	No I do not	All of the above – we should not pay for government blunders	I believe that taxpayers should not pay (too few individual and business) but rather put a tax on petrol. There the whole country all pays for government errors, not only those who pay tax. Do not use vat tax, strictly petrol as taxis run on petrol and would be the greatest contributor to paying this bill as this problem has to be fixed and payed for by someone, something or some bodies!	Warren	Eastern Cape	South Africa	
	2026-01-12 11:44:50	No I do not	All of the above – we should not pay for government blunders	We are overpaying for electricity as it is, and it is unaffordable, even for those in more middle-class areas. This is the reason so many desperate people, earning below the breadline, turn to illegal connections. How much revenue is lost due to that? If electricity were affordable, I believe that many more people would pay. We are also paying VAT on government-rendered services which is iniquitous. It is wrong to make people pay VAT for water, electricity and municipal rates, which is a tax in and of itself.	Julie	Gauteng		self-employed
	2026-01-12 11:44:03	No I do not	All of the above – we should not pay for government blunders	As usual govt treats us taxpayers as a cash cow to bail them out for their corruption, huge blunders, and clear incompetence! Our economy is in a mess because of the ANC's outdated, irrelevant and poor policies - and yet they want to break us further, financially and morally. It is outrageous. Eskom must pay for its own corruption and inefficiences - they were warned decades ago to do due maintenance and upgrades but did not and we cannot be expected to cough up now, when we are all already cashstrapped and paying exorbitant fees to Eskom. Electricity costs to us users notably individuals has skyrocketed beyond belief and beyond all reasonableness since the ANC took over, and they continue to cripple the country, its economy and its people mercilessly while they live in luxury with bodyguards, luxury vehicles, and only the best in everything. They do not care about the people of SA, only themselves.	Gaye	Western Cape		business owner

	2026-01-12 11:43:09	No I do not	All of the above – we should not pay for government blunders	The people of South Africa need to look past the lie that there is no money. There is however through bribery, corruption and pure waste all that money disappears. We are one of the most overtaxed populations in the world. Less than 8% of our country is floating the bill for the other +90%. WHAT IS THE JUSTIFICATION FOR US TO PAY MORE!? We get NOTHING in return?! Why must pay for ANOTHER government blunder? The government have a contract with the people which states that WE PAY taxes and rates and vat etc. and in turn we are provided with infrastructure and basic maintenance. They have failed to deliver on anything. Our roads are worse than ever. Robots get stolen or are offline to the point where it has become a safety hazard to simply cross the street in your car. Petty crime and violent crime is on the way up and we are still told that we are somehow the ones responsible for this and not the government officials who have caused this mess? Why is that the public servants who have led us into this utter crap fest not being held accountable? Why is it that top officials are within government and municipalities are not investigated when they fail and when they become multi-millionaires whilst in government whilst earning R500k a year? 	2026-01-12 11:39:50	No I do not	All of the above – we should not pay for government blunders	It has been an ongoing story, they get money, steal it, waste it or whatever else they do with it, then when it runs out, they cry then want some more! Sorry but we also have expenses in our lives and if we waste our money can't cry to the government and then expect to be given more to waste!	Robyn	KwaZulu-Natal		
	2026-01-12 11:39:02	No I do not	All of the above – we should not pay for government blunders	Once an item is recorded as a fixed asset, its life is determined so depreciation can be calculated and recorded. Depreciation is the mechanism used to record the use of the item by the organization over its life until the value of the item is zero the old units are at ZERO value, you cannot place a value on old, failing assets, with a zero scrap value , certainly to chance the operational deficit This a further way to hide embezzlement, over payment to suppliers via third- and fourth-party vendors. in which Eskom employees have their fingers, ministers and Governmental figures	George	Gauteng		business owner
	2026-01-12 11:37:10	No I do not	All of the above – we should not pay for government blunders	South Africa's tiny tax base is already under immense pressure. Our income tax is among the highest in the world. All departments shuld have tax alleviation as it's highest priority in decision-making. Increasing the burden on the consumer is unacceptable and disastrous.	Gus	Gauteng		employed individual
	2026-01-12 11:36:56	No I do not	All of the above – we should not pay for government blunders	If any other company was in the same position the government would have forced them into liquidation and ceased all the assets. The amount of stealing that has gone on and there is no consequence's to the individual is ridiculous Before 1994 ESKOM used to be a profitable company and now its a joke. To pay for their stealing and then to be punished further when you as a business or a household make alternative arrangements to continue to be in business is double taxation	Diana	Western Cape		
	2026-01-12 11:36:53	No I do not	All of the above – we should not pay for government blunders	NoI should not have to pay for Eskom's mistakes. They showed a profit in their financials. Take it from that. Do not pay bonuses. There is no maintenance done currently (being the last 30 years) In the past Eskom was maintained well and the planning was up to date for new plants to be built. Now it is ..... how can the powers that are in charge, get their grubby little paws on the money and the people will just have to pay. WELL NO. Enough is enough the some apply to the road - just look at them. prime example	Louise	Gauteng		retired
	2026-01-12 11:36:49	No I do not	All of the above – we should not pay for government blunders	Pensioners tell horror stories of their current lifestyle , bathing in cold water as they cannot afford to keep the geyser going , or sitting in darkness and silence because they don't have the money to top up electricity. To live out their final years in this undignified way is tragic .	Shireen	Gauteng		retired

	2026-01-12 11:32:03	No I do not	All of the above – we should not pay for government blunders	I'm not willing, nor able, to pay for calculation errors made by NERSA. It's quite clear that the people in charge are not capable of doing their job and should be replaced by capable individuals (a.k.a. "non-BBBEE" appointments). The other concern is the ever aging, and unreliable infrastructure, which will end up costing even more money even after South Africans had to fork out money for solar energy sources. You would think the answer would be "building new infrastructure", but Eskom has proven over and over again that they are incapable of keeping to a building budget and project deadline, which means pushing up the electricity bill and making it our problem.	Jana	Gauteng		employed individual

	2026-01-12 11:29:24	No I do not	All of the above – we should not pay for government blunders		Tim	Western Cape		retired
	2026-01-12 11:29:23	No I do not	All of the above – we should not pay for government blunders	Every company is responsible for profits / liabilities and the success thereof. 1. No one except the respective body should pay and be accountable for NERSA's calculation errors. There is no accountability, hence the above. In accordance with the Constitution, accountability is an important value. 2. Why should the hardworking citizen pay full price for aging, unreliable infrastructure when " company" is incompetent of managing it ? In addition, some Municipalities already have these infrastructure repairs and maintenance included in their monthly bills. Which I must add we were never consulted on and which we have to pay. 3. Why should the consumer fund Eskom's cash flow and construction delays? It is not a cash pot for personal gain at the expense of millions who already pay tax. It is considered theft - taking from honest working people to cater for the mismanagement due to corruption, selfish gain and inability to be accountable.	Christelle	KwaZulu-Natal		
	2026-01-12 11:26:27	No I do not	All of the above – we should not pay for government blunders	It's ludicrous that consumers must pay exorbitantly and for so called professional top management blunders. Why is Top Management not accountable? We, as consumers are always a scapegoat and we must pay the high cost of living price. Like the saying goes, The bosses get richer and the customers get poor.	Anwar	KwaZulu-Natal		employed individual
	2026-01-12 11:26:01	No I do not	All of the above – we should not pay for government blunders	Eskom is besig om homself uit die mark te prys. Ons kan eenvoudig nie meer die krag bekostig nie, of ons gewone gebruikers, besigheidseienaars of groot aanlegte is. Almal doen somme en besef alternatiewe krag is goedkoper as wat Eskom kan lewer en met nuwe kragtariewe op d kaarte, oorweeg ons dit nou ernstig. Eskom kragtariewe is eenvoudig nie volhoubaar en realities nie.	Jeanne	Mpumalanga		business owner

	2026-01-12 18:33:30	No I do not	All of the above – we should not pay for government blunders	It is time now to set a precedent of righteous governance and righteous management. If a company or organisation or government agency runs at a loss, the individuals who are responsible for the loss must pay, not the public. This is the righteous way of dealing with these problems. This will also ensure that individuals in positions of decision-making begin to take personal responsibility for their actions. We cannot continue in this way, that every time individuals make mistakes, that others must pay for these mistakes. And how much of the loss is mistakes and not mismanagement and/or corruption? All those individuals, especially those guilty of corruption, must pay. This is the demand of the citizen.	Volker	Western Cape		
	2026-01-12 18:31:17	No I do not	All of the above – we should not pay for government blunders	They would not have such huge losses as well as big depreciation of assets had a well run maintenance and repair plan been in operation from day 1. How were the bale-outs used and where were they allocated. No one at Eskom has ever been accountable for the enormous loss in revenue nor has NERSA operated within the stipulated wording used to describe their very existence. They made a mistake of an enormous amount, OWN IT, FOR ONCE! It is not the consumers mistake and therefore, does not belong to us.	Megan	Western Cape		retired

	2026-01-12 18:15:02	No I do not	All of the above – we should not pay for government blunders	I submit this complaint as a member of the public regarding Eskom's reported R76 billion tariff under-recovery. It is my understanding that this R76 billion under-recovery, arising from Eskom's historical tariff-setting and/or accounting failures, is expected to be recovered from energy consumers through future tariff increases. These errors were not caused by consumers, but by Eskom's internal administration and management, and were only identified many years after the fact. Against this backdrop, residential solar users were previously encouraged by government policy to invest in small-scale power generation to alleviate pressure on the national grid during periods of severe load shedding. To now impose punitive charges for reduced Eskom consumption contradicts this policy position and undermines confidence in long-term energy planning. I respectfully request that the Portfolio Committee ensure that the financial consequences of Eskom's accounting and tariff failures remain Eskom's responsibility. In all fairness, accountability lay with the accounting officials and respective Management, of Eskom and are essential to restoring public trust in the energy sector. The households and businesses of South Africa are already under severe financial burden and will cause a major outcry of the energy consumers with catastrophic consequences. Let alone the further penalty consideration to solar installations which was supported by government to start off.	Jan	Mpumalanga		business owner
	2026-01-12 18:13:12	No I do not	All of the above – we should not pay for government blunders	We are exhausted from having to deal with all the financial mismanagement and theft of the peoples taxes by the government and state owned enterprisee. 	2026-01-12 17:03:12	No I do not	All of the above – we should not pay for government blunders	Discovery medies het dieselfde fout gemaak. Discovery het ń verskooning aangebied en besluit om self te betaal vir Discovery se fout. Om van die lede te verwag om vir die fout te betaal sou baie skade vir Discovery medies beteken. Eskom moet besef die publiek gaan in die interim betaal vir Eskom se fout maar solar uitbreiding in die langduur gaan Eskom onnodig maak veral vir groot besighede. Ons weetEskom kan nie vooruit beplan nie. Hierdie fout van Eskom gaan Eskom te laat agterkom en soos met soos met baie ander projekte: Water, riool, onderwys, infrastruktuur, werkloosheid gaan Eskom met hulle broek op hulle knië vind. Wat weet ons nou!	Gerhard	Gauteng		retired
	2026-01-12 17:03:07	No I do not	All of the above – we should not pay for government blunders	It's about accountability. I am sick and tired of bailing out ineptitude and corruption	Pessie	Gauteng		employed individual
	2026-01-12 17:02:42	No I do not	All of the above – we should not pay for government blunders	The fixed costs I have to pay on a monthly basis for my plot is exorbitant and the condition of the infrastructure in our area is abysmal. We have continual unscheduled outages on weekly basis from lightening and rainstorms, illegal connections and sometimes during sunny days for no apparent reason. The communication from ESKOM is very poor and we are not informed about causes and recovery times. It is high time that we stop paying for the ongoing ANC corruption at ESKOM who have taken a well managed business in the 1990 and turned it into cesspool of ineptitude.	Rene	Gauteng		retired
	2026-01-12 17:02:14	No I do not	All of the above – we should not pay for government blunders	Corruption and abuse by Government.	Luisa	Gauteng		retired
	2026-01-12 17:02:07	No I do not	All of the above – we should not pay for government blunders	In a private business errors like this equate to heads rolling. If incompetence starts at the top and accountability is expected at the bottom one can only assume that Eskom has lost control of their financial capability and their fiduciary duties. As a government institution this cannot be allowed. The public cannot be forced to pay for ANOTHER increase due to incompetence, miscalculation or misadministration. These are organisational faults, not the paying public. Aging infrastructure aside, there should’ve been an implementation plan and accountability for additional power and alternatives. The fact that it has taken private investment in renewable energy to assist Eskom to prevent further load shedding or grid collapse while planning to punish the public further points to gross mismanagement and failure to deliver. Remove incompetence. Rebuild public trust. And if necessary reduce costs. But do not increase prices while still posting profits and paying lavish bonuses.	Deanne	Western Cape		self-employed
	2026-01-12 17:01:52	No I do not	All of the above – we should not pay for government blunders	Why fund a bunch of thieves !	William	Eastern Cape		self-employed
	2026-01-12 17:01:18	No I do not	All of the above – we should not pay for government blunders	To think they ask us to pay for ESKOM's errors is ridiculous and unacceptable! We do pay our monthly electricity bill regularly. Just as Dischem, Eskom must own up to their mistakes and find another way to fix their own mistakes.	Magdel	Western Cape		retired

	2026-01-12 16:59:56	No I do not	All of the above – we should not pay for government blunders	Citizens should not pay for government's mistakes. We pay enough to government already, most of which is being stolen in plain sight by corrupt politicians. Leave the citizens alone and let us exist without your nonsense. Stop stealing, and fix your own mistakes. Remember: The government works FOR THE PEOPLE, not the other way around.	Matt	Western Cape		
	2026-01-12 16:58:00	No I do not	All of the above – we should not pay for government blunders	In a private business errors like this equate to heads rolling. If incompetence starts at the top and accountability is expected at the bottom one can only assume that Eskom has lost control of their financial capability and their fiduciary duties. As a government institution this cannot be allowed. The public cannot be forced to pay for ANOTHER increase due to incompetence, miscalculation or misadministration. These are organisational faults, not the paying public. Aging infrastructure aside, there should’ve been an implementation plan and accountability for additional power and alternatives. The fact that it has taken private investment in renewable energy to assist Eskom to prevent further load shedding or grid collapse while planning to punish the public further points to gross mismanagement and failure to deliver. Remove incompetence. Rebuild public trust. And if necessary reduce costs. But do not increase prices while still posting profits and paying lavish bonuses. Sort out your transmission business, integrate solar into your fleet, integrate private solar into your network and actively engage the public on cost cutting measures that YOU are implementing. No more bonuses. No more inflated expenses. Sort your business out.	Josh	Gauteng		
	2026-01-12 16:57:55	No I do not	All of the above – we should not pay for government blunders		Kobie	Western Cape		
	2026-01-12 16:57:29	No I do not	All of the above – we should not pay for government blunders	The cost of electricity is already too high. There should be no electricity tarrif increase at all. There are many households in South Africa who are living in Alexander, Soweto, Ekangala, Rethabiseng, Zithobeni and many others including informal settlements who are connected to the grid illegally. Eskom must compel them to pay for the electricity they are using.	Johannes	Gauteng		employed individual
	2026-01-12 16:57:08	No I do not	All of the above – we should not pay for government blunders	Suid-Afrika se ekenomie sukkel om teen meer as 1% te groei, die inflasie koers is minder as 6% maar hoe is dit moontlik dat ESCOM verhogings van meer as dubbel die inflasie koers jaar na jaar moet ontvang - dit kan mos nie en dui op ondoeltreffendheid. Stel die bedryf oop sodat die privaat sektor kan kompeteer en die pryse kan afdruk.	Stephan	Western Cape		self-employed
	2026-01-12 16:56:06	No I do not	All of the above – we should not pay for government blunders	We are already paying too much for electricity. R100 gives me only 29units. It cannot continue like this. I cannot use my geezer or oven because of the high rates.	Carol	Western Cape		retired
	2026-01-12 16:55:12	No I do not	All of the above – we should not pay for government blunders	Genoeg is genoeg , ons is nie daar om elke keer ander se foute reg te maak nie. As ons elke fout moet voor vetaal gaan ons letterlik ons welverdiende salaris betaal aan ons staat en ons gaan kripeer sodat hulle kan lekker leef!	Andries	Northern Cape		employed individual
	2026-01-12 16:54:59	No I do not	All of the above – we should not pay for government blunders	Its illogical, immoral, and plain unfair to make the average man pay for a governmental mistake, of any proportion, and this mistake and the coverage thereof by your tax paying citizens is abusive. Making the average man pay for this simply proves that this government is not ready to be mature, reasonable and to fulfil its single role, to look after this country and its people.	Gavin	KwaZulu-Natal		employed individual
	2026-01-12 16:54:22	No I do not	All of the above – we should not pay for government blunders	We as the customers and citizens are not responsible for Eskoms gross negligence on the maintenance and upkeep of infrastructure. Eskom and government should be held accountable for their own incompetence and corruption.	Andreas	Free State		employed individual
	2026-01-12 16:54:21	No I do not	All of the above – we should not pay for government blunders	I am deeply concerned that the financial consequences of admitted calculation errors by NERSA (reportedly amounting to R76 billion) are now being shifted onto electricity users through higher tariffs. These errors were not caused by consumers, and it is neither fair nor reasonable for the public to be required to pay for government or regulatory miscalculations after the fact. Electricity users are already under severe financial pressure due to rising living costs and previous tariff increases. Asking consumers to absorb the cost of historic administrative failures undermines trust in public institutions and sets a dangerous precedent where accountability is avoided and the public bears the burden of institutional mistakes. I strongly object to any tariff increase intended to recover costs arising from errors in asset valuation and urge that such losses be absorbed by the relevant authorities, not passed on to South African households and businesses.	Clive	Western Cape		self-employed

	2026-01-12 15:55:58	No I do not	All of the above – we should not pay for government blunders	NERSA is responsible for the accuracy of their accounting with periodic external audits done to trap errors before they reach a ridiculous amount of R76 billion. If due diligence was done, they would not be in this situation. I cannot see any reason why we the consumers have to be overburden and penalised for poor management by NERSA. We simply cannot afford it. If a calculation error was made, where is the R76 billion error? There is no way a company can make such an astronomical mistake unless it is once again due to fraud and corruption. Who has visibility into the finances of NERSA? They cannot just state they made a R76 billion error and expect the citizens of SA to accept that, Eskom is a state-owned enterprise and as such, we the citizens who are footing the bill should surely have the right to full visibility of their finances. I do not for a second believe this was a calculation error, this is yet another corruption cover up that we are expected to fix without internal culpability or consequences. No, this is not acceptable.	Marina	North West		retired

	2026-01-12 15:37:46	No I do not	All of the above – we should not pay for government blunders	The South Afrcan people are already burdened with the high cost of living and now this. Sort your own problems out, dont make it the consumers problem. We cant afford it.	Janine	Mpumalanga		retired
	2026-01-12 15:36:33	No I do not	All of the above – we should not pay for government blunders	In South Africa, and in particular with Eskom, South African consumers are expected to bail a public utility out that has been consistently shown to be both corrupt and incompetent. The fact that South Africans are being expected to pay for a R76 BILLION mistake is really shocking. I would suggest that the public sector take a haircut in their own funding, in order to pay for this latest fiasco. I do not believe that the South African public should be called upon to pay for ESKOM's "mistake". It is time that all of ESKOM's management were held accountable for the ongoing mess that it is, and further, that the organization's finances should be fully transparent for all South African's to see how ESKOM is spending the money that we give. So I, and probably many others, say, "No!", to bailing ESKOM out. Reduce the salaries for all employees from management levels, especially at C-level.	Michael	Western Cape		
	2026-01-12 15:35:26	No I do not	All of the above – we should not pay for government blunders	There is only one solution to ESKOM's and all other state "enterprises" . Vote out the ANC.	Chris	Western Cape		retired

	2026-01-12 15:27:22	No I do not	All of the above – we should not pay for government blunders	It is criminal for Eskom to ask us to foot the bill for inefficiency, affordability, mismanagement and negligence	Annelize	Gauteng		employed individual
	2026-01-12 15:27:09	No I do not	All of the above – we should not pay for government blunders	The regulator’s core mandate is to protect the consumer, not to act as a guaranteed cash-flow provider for Eskom’s construction delays and NERSA’s own clerical errors. Regulatory incompetence should be met with internal accountability and government intervention, not a blank check from the taxpayer. Efficiency is a legal requirement for tariff setting. This proposal rewards the opposite. The R76 billion "mistake" must be absorbed through operational efficiencies and state support rather than further crippling the South African economy through inflated tariffs. The High Court’s December 2025 ruling was clear: The previous R54 billion settlement was irrational and lacked transparency. Now, instead of finding internal efficiencies, the burden increased to R76 billion. In a climate where the Minister of Electricity has stated citizens must choose between food and power, it is unacceptable to pass the cost of a "version control error" onto a struggling public. The proposed R76 billion includes R62 billion in depreciation and R14 billion in returns on assets. Much of this valuation relates to aging plants and delayed projects like Medupi and Kusile, which have faced massive cost overruns and technical failures. Consumers are being asked to pay full-price and returns-on-assets that are often non-functional or unreliable. We should not fund a "return on assets" for infrastructure that fails to provide a stable supply. It is fundamentally unjust to force consumers to subsidise a R76 billion administrative failure that rewards infrastructure inefficiency while ignoring the dire financial reality of the South African public. NERSA must prioritise its mandate to protect citizens by ensuring that the cost of regulatory errors is absorbed through internal accountability and state intervention rather than further punitive tariff hikes. 	2026-01-12 15:23:11	No I do not	All of the above – we should not pay for government blunders		Thys	North West		business owner
	2026-01-12 15:22:25	No I do not	All of the above – we should not pay for government blunders	Eskom have wasted all the money paid by us, Their have been no consequences for the billions stolen and the load shedding we have had to injure caused by persons not doing their jobs. and the numerous bailouts the Tax payer has carried over the years	Derek	KwaZulu-Natal		self-employed
	2026-01-12 15:22:05	No I do not	All of the above – we should not pay for government blunders	This is another blatant competency issue caused by the ANC appointing unqualified people. Enough is enough the man in the street has had to face the consequences for the last 30 years under the rule of the ANC for bad economic decisions, plundering of our resources , no maintenance being carried on our infrastructure, crime out of control, yet to date after many commissions e.g. the Zondo commission after naming many politicians who are still in cabinet who should have been fired and charged nothing has happened. Eskom and Nersa had the audacity to try and sneak this proposal under the carpet smacks of yet another cover up. The persons /ministers responsible for this error must be held to account and Eskom /Nersa must fit the bill. The general public cannot be expected to once again pay for the incompetence of the entities concerned. Unemployment is over 40% and rising every day due to the governments ideological economic policies which are crippling the country with fewer tax and municipal payers left to fit the bill. This pattern of making the public pay for the ANC'S blunders must stop now. I strongly object to this proposal.	Jill	Eastern Cape		retired
	2026-01-12 15:21:16	No I do not	All of the above – we should not pay for government blunders	Electricity is already expensive as is, we cannot be punished for people’s incompetence and corruption. If funds are properly used to do what they’re meant to do at the right time, we won’t have aging infrastructure that always gives problems. Eskom needs to take responsibility for its own actions. How can we possibly take a hit for people’s incompetence? It doesn’t even make sense.	Mpumi	Gauteng		
	2026-01-12 15:19:13	No I do not	All of the above – we should not pay for government blunders	Enough is enough. 	2026-01-12 14:25:39	No I do not	All of the above – we should not pay for government blunders	This government has drained everything out of us.I used to work for Telkom and the government retrench thousands of staff and the rest they outsourced.I was retrenched 10 years ago when I was 50. This when they say they creating jobs! They have no clue they cannot even provide basic electricity or water never mind anything else. All they do is make the cost of living out of everybodies reach. If our vehicle is unroadworthy we get fines. Government does not do the job they supposed to and we must just accept that according to them. It is time the voters wake up and get rid of these money sucking delinquents. The ANC ran Eskom into the ground with the Gupta's. They are responsible , not the public. The ANC must recover all the stolen money from their cadres not the public. This government is an embarresment!	Andrew	KwaZulu-Natal		unemployed individual

	2026-01-13 12:32:54	No I do not	All of the above – we should not pay for government blunders	We cannot pay for Government blunders. The blunder must be treated with strong suspicion.We call on the President to initiate an enquiry as to how blunder occurred and those responsible their intellect and suitability to remain in dept /nersa is questionable .Corruption and capturing of dept cannot be ruled out. The people of South Africa are frustrated and over burdend by perpetual increases in electricity ,this government did absolutely zero to help the poor. This government is failing the people of South Africa and must consider its failures when voting .	Gopaul	KwaZulu -Natal		unemployed individual
	2026-01-13 12:31:17	No I do not	All of the above – we should not pay for government blunders	If I make a mistake I have to face it and bear the consequences therefore the people who made the mistake should face it and bear the consequences and not just pass the problem on. This is a direct result of appointing people who do not have the interest of the citizens at heart and just collecting their monthly salary and are incompetent for the job.	Koos	Gauteng		
	2026-01-13 12:29:15	No I do not	All of the above – we should not pay for government blunders	I will say it again. They must stop paying these senior management high salaries. Cleared they not doing their jobs. Redistribute these savings to infrastructure. Pay for qualified engineers that can resolve these issues without sucking the consumers dry.	Percival	Western Cape		self-employed
	2026-01-13 12:27:45	No I do not	All of the above – we should not pay for government blunders	1. Affordability: Should you pay for NERSA's calculation errors? No. Why should the consumer pay for poor financial leadership and accountability? Missing a cost item of R72bn that pushes pricing that is already exceeding unit cost for renewable energy sources. Strategic decision making is severely compromised, considerations of competitiveness, of staying relevant was missed. Overpricing of Eskom generated power has already passed the critical downward spiral of point of competitiveness. It will force more consumers to cheaper alternatives leaving Eskom in the position to recover operational costs from an ever shrinking customer base. Unfortunately those that can afford it the least, those who cannot afford switching, needs to foot a greater bill due to consumers that exit the grid, gradually or all at once. This is baseline business economics. To increase prices on a shrinking demand market consisting of the vulnerable citizens of South Africa in principle is wrong. . 2. Reliability: Should you pay full price for aging, unreliable infrastructure? No. Aging infrastructure that results in unreliability points to poor strategic operational leadership. Given the years of existence of the ageing infrastructure it should have been depreciated long time ago, that is, only scrap value is what should be remaining in the books. Replacement cost should have been part the pricing calculation years ago and similarly upgrade cost that is capital of nature, meaning depreciation should be part of the pricing calculation while the replaced old infrastructure is to disappear. Continued use of fully depreciated assets to form part of pricing calculations points to desperate unlocking of income to fund operations, and unfortunately obscure the real problems. 3. Efficiency: Should consumers fund Eskom's cash flow and construction delays? With regards to constructions delays, No. That is a leadership problem and consumers should never be required foot the bill for inefficiency. New construction the answer is mainly no. Cash flow comes from income generation and a business should use a portion from cash flow to fund expansion and upgrades as an own contribution, indicating commitment and accountability. Long term funding for capital expansions and upgrades equalize pricing determination, else it will lead to over-pricing and pushing for irrelevance. Eskom needs shift from a pure income perspective to determine pricing to a predominantly cost effective perspective and this will require a business culture shift.	Douwe	Gauteng		retired
	2026-01-13 12:23:46	No I do not	All of the above – we should not pay for government blunders	'Any price increase above inflation is bad for the economy… the prices of goods and services go up because businesses pass on these prices to the consumers, which means that the households are hit hard almost twice,' says Professor Sampson Mamphweli, South African National Energy Development Institute. 	2026-01-13 11:38:31	No I do not	All of the above – we should not pay for government blunders	Absolutely not. Government started with an "guaranteed one time" bailout "never to happen again". Now it is every year bailouts. All the while Eskom directors are handed outragious salaries and bonuses for failing in what they are employed to do. And "contractors are living it up in expensive hotels and payments. While non-southafrican companues are given major subsidies. Then it's the corruption and blatant theft. ALL AT THE EXPENSE OF THE SOUTH AFRICAN CITIZEN WHO IS BEING DRIVEN INTO POVERTY BY THESE GREEDY MORONS.	Linda	Gauteng		
	2026-01-13 11:38:12	No I do not	All of the above – we should not pay for government blunders	Strongly oppose any outcome that would force electricity consumers to bear the cost of any portion of the R76 billion. Electricity is already excessively expensive and consumers cannot absorb any more errors and mismanagement of this Government entitity.	Lynette	Western Cape		employed individual
	2026-01-13 11:36:50	No I do not	All of the above – we should not pay for government blunders	I hereby submit my objection to the proposed electricity price adjustment intended to recover R76 billion from consumers. These costs arise from calculation errors and inefficiencies within Eskom and NERSA, and it is fundamentally unjust to transfer this burden to the public. South Africans are already facing severe economic pressures, and increasing tariffs to cover mistakes undermines public trust and accountability. Consumers should not be penalized for errors in asset valuation, aging infrastructure, and delays in project delivery. The responsibility for these miscalculations must rest with the entities that made them, not with households and businesses struggling to remain afloat. I urge NERSA to explore alternative solutions that prioritize transparency, efficiency, and fairness—such as internal cost recovery measures, operational reforms, and accountability mechanisms—rather than imposing additional financial strain on electricity users.	Wouter	Gauteng		employed individual

	2026-01-13 11:26:54	No I do not	All of the above – we should not pay for government blunders	I strongly oppose any outcome that would force electricity consumers to bear the cost of the estimated R76 billion (or any portion thereof) arising from NERSA's admitted miscalculations in depreciation and asset valuation. The High Court rightly set aside NERSA's previous decision due to these errors. It is fundamentally unfair and unacceptable for households and businesses—already struggling with high electricity costs, load shedding aftermath, and economic pressures—to now pay higher tariffs to correct regulatory mistakes made by NERSA itself. Consumers did not cause these errors in asset valuation, depreciation treatment, or related calculations. We should not be penalized for them through increased electricity prices, which would exacerbate inflation, raise the cost of living, and harm businesses that pass on higher energy costs. Key concerns that must be addressed in the final decision: Asset values in the Regulatory Asset Base should be strictly capped or adjusted to prioritize affordability for consumers. Aging power stations nearing end-of-life or frequently unavailable due to breakdowns should not qualify for full recovery through tariffs—consumers should not subsidize unreliable infrastructure. Funding for "Work Under Construction" and "Net Working Capital" should not be loaded onto consumer bills, especially amid ongoing reliability issues. Electricity tariffs must remain affordable to support economic recovery. Any increase beyond inflation would be detrimental, as noted by experts, hitting households and the broader economy hard. I urge NERSA to absorb the corrections without passing the R76 billion burden onto consumers, perhaps through alternative mechanisms or efficiencies within Eskom. Consumers should not pay for NERSA's mistake.	DJ	Gauteng		employed individual

	2026-01-13 11:19:15	No I do not	All of the above – we should not pay for government blunders	All South Africans, especially the impoverished and lower income groups, have already reached a point where they must choose between buying electricity or their family's next meal. Forcing an already economically challenged citizenry try to foot this bill will send millions over the edge of brey scraping by to impoverished - and this simply cannot be allowed to happen!	Belinda	Gauteng		employed individual
	2026-01-13 11:18:39	No I do not	All of the above – we should not pay for government blunders	If NERSA or Eskom Make a mistake, this should not impact the lives of ordinary people. If the government sees fit to hire incompetent people to run NERSA and Eskom, then the government is responsible and should fit the bill. We have suffered enough because of high levels of corruption in Eskom. Also, if Eskom had work efficiently from the time the ANC decided to hire their incompetent and money hungry cadre's, it would have had plans and funds in place to upgrade plants and machinery. The ANC are totally to blame for the chaos that followed with load shedding etc. And, although the president announced the end of load shedding some time back, there is still load shedding in many municipalities, such as the one where i live, namely Maluti a Phofung. Because government caused the problem, they should pay and not the people. I am so tired of government incompetence and cadre deployment. The electricity infrastructure here in Qwa Qwa is so old it fails regularly, but nothing is done to remedy the situation. Government must wake up to its responsibilities to is citizen and take the knocks for their failures and not lay them on others.	Reginald	Free State		Non-profit

	2026-01-13 09:15:40	No I do not	All of the above – we should not pay for government blunders	Why is the paying consumer being penalized? Eskom should be recouping money from stolen and illegal connections. If the government wants to own Eskom, they should be the one taking the hit.	Raymond	Eastern Cape		
	2026-01-13 09:14:26	No I do not	All of the above – we should not pay for government blunders	If you sell something at your shop and you undercharge you clients, is that your clients' fault? They must accept their blunders and pay for it themselves. We already pay too much for electricity. Ask the ministers who receive free electricity to start paying. Sick and tired of this government and institutions exploiting the citizens of South Africa. The increases the government is planning on giving themselves must go towards this blunder because the employ incompetent people.	Philippa	Gauteng		self-employed
	2026-01-13 09:13:52	No I do not	All of the above – we should not pay for government blunders	Too many managers, cant check details?	Roland	KwaZulu-Natal		retired
	2026-01-13 09:11:15	No I do not	All of the above – we should not pay for government blunders		Tony	Gauteng		retired
	2026-01-13 09:10:06	No I do not	All of the above – we should not pay for government blunders	I am in construction, the client never pays for the contractors mistakes. This is a governmental issue and the government needs to carry the cost.	conrad	KwaZulu-Natal		
	2026-01-13 09:08:58	No I do not	All of the above – we should not pay for government blunders	The price of electricity is already so costly. We as consumers should not carry the burden of any government or non governmental mistakes.	Zulpha	Western Cape		retired
	2026-01-13 09:08:04	No I do not	All of the above – we should not pay for government blunders	Die verbruiker moet nie vir die staat se laksheid, oneffektiewetyd en gewoonweg korrupsie en swak bestuur te betaal nie. Onder die vorige regering het minder mense vir elektrisiteit betaal en tog kon daar elke paar maande 'n nuwe kragstasie aanlyn kom en is krag teen profyt so ver as Zambië uitgevoer. Die burgers van die land en baie beslis ook fabrieke, smelterye en ander sakelui kan nie nog verdere onnodige en belaglike verhogings in elektrisiteit bekostig nie. Teen die huidige tariewe kan ek en my gesin net 9 eenhede per dag bekostig in plaas van die 20 wat ons aanvanklik vir die selfde bedrag geld gekry het.	Andrieka	Free State		
	2026-01-13 09:07:50	No I do not	All of the above – we should not pay for government blunders	We can't be held responsible for cadre deployment who are placed in positions beyond their capabilities.	Mumsey	Gauteng		retired
	2026-01-13 09:04:59	No I do not	All of the above – we should not pay for government blunders	Why must we carry governmental mistakes they must pay for it all the Mps and let Rampara pay for it he is a billionaire of of our backs	Rudi	Western Cape		employed individual

	2026-01-13 07:59:47	No I do not	All of the above – we should not pay for government blunders	Escom and Nersa are both State parastatals, therefore the blame for the blunders and incompetence must be accepted, and the RB76 must be found within. This shortfall is not a calculation mistake by a single person or section within Escom (being a big organization) where oversight is essential at all levels. The deduction this brings to the for is that it is a deliberate male fide action with a shameful excuse to get some more money from the financial overburdened consumer/man in the street. Rather, if some entity within Escom is guilty of negligence or incompetence, get rid of it including those that had to do the oversight or control over it. Take that HR expense as a starting point to lessen the 'shortfall' and to show others within the Escom system that incompetence or fraud (whatever it need to be called), will not be tolerated. Do this instead of giving salary increases or bonusses.	Thinus	Gauteng

	2026-01-13 07:11:10	No I do not	All of the above – we should not pay for government blunders	This mistake points to incompetent people doing important work that affects the middle class specifically. My family have done what they can to reduce electricity usage to the point that our usage is R1700 compared to the service cost of R1600. I understand the necessity of a company having sufficient cash to function however the entity is top heavy with staff. Eskom is opaque about their future plans to resolve problems they created, why pay for poor infrastructure that has deteriorated because the money was stolen? Nersa is another institution that is supposed to protect the public by regulating what tariffs are implemented and for that you need skilled people that assess the reality of what's happening on the ground so that entities like Eskom are held accountable. Here they have failed terribly. This mess must be properly investigated. The gatekeeper has failed in their duties.	Jason	Gauteng		self-employed
	2026-01-13 07:11:00	No I do not	All of the above – we should not pay for government blunders	The consumer's earnings do not match the amount demanded by both Eskom and NERSA. This discourages even those who are paying from doing so as the cost of living is eroding their earnings.	Sonto	Gauteng		retired

	2026-01-13 07:04:53	No I do not	All of the above – we should not pay for government blunders	Citizens of South Africa are already struggling to get by. Businesses are struggling. Things are getting more and more difficult and now Eskom wants to add Extra financial strain on consumers. There has been requests for alternative, more cost effective ways of generating electricity, but the government refused. People, who make their own plans for more sustainable electricity, have been penalised just because Eskom doesn't benefit from it. Eskom is not looking to improve the country, they are looking to improve their own financial status.	Marinda	Gauteng		employed individual

	2026-01-13 07:03:12	No I do not	All of the above – we should not pay for government blunders	Government has actively avoided cheaper, cleaner solutions for decades, so why should we be held accountable? The government does not stamp out corruption or assist Eskom to protect its infrastructure, so why should we give more? Its partly because government keeps cancelling large debts (like writing off Soweto's debts more than once) that the honest consumer is forced to pick up the slack. How is that fair or democratic? Socialism is killing the poor and middle classes! I work for a micro-enterprise and the tariffs on water and electricity availability (which is never adjusted for times when it is in fact not available to us) has more than quadrupled. It is killing the business and we are a very small consumer of these services to start with. If we cannot make money, we have nothing to pay with.	Erin	Western Cape		
	2026-01-13 07:01:56	No I do not	All of the above – we should not pay for government blunders	I refuse to pay for mistakes made by INCOMPETENT management of ESCOM !!	Siegfried	Gauteng		retired
	2026-01-13 06:58:15	No I do not	All of the above – we should not pay for government blunders	NERSA has made a multi-billion Rand error in calculating Eskom's assets. Instead of this error being absorbed, we are being asked to foot the bill through higher tariffs to cover "depreciation" and "returns" that were previously omitted. This is unacceptable.	Vittoria	KwaZulu-Natal		unemployed individual
	2026-01-13 06:56:44	No I do not	All of the above – we should not pay for government blunders	The consumer should not be responsible to pay / bail out a government owned company just because they mismanaged and ruined a well functional company. 	2026-01-12 23:16:16	No I do not	All of the above – we should not pay for government blunders	My comment as an electricity consumer, regarding the proposed electricity price determination following the recent High Court ruling that required NERSA to recalculate errors amounting to R76 billion. I strongly object to the proposal that this historical calculation error now be recovered directly from electricity consumers through increased tariffs. Electricity consumers should not be required to pay for regulatory, accounting, or administrative errors made by Eskom or approved by NERSA. These costs did not arise from additional value delivered to consumers, nor from improved reliability, capacity, or service quality. Recovering such losses through tariffs effectively transfers institutional failure onto households, businesses, and the broader economy. Furthermore, it is unreasonable to expect consumers to fund full depreciation and returns on aging, unreliable, and underperforming infrastructure. Eskom's operational challenges are well documented and include chronic plant unreliability and load shedding, cost overruns on new power station builds, poor engineering and project management outcomes, years of financial losses linked to governance failures and corruption. Eskom previously received substantial budgets for new generation capacity, including coal-fired power stations and nuclear plant upgrades. The failure to deliver these projects within scope, budget, and timeline cannot be justified as a retrospective accounting oversight. Depreciation errors form part of a broader pattern of weak financial controls and cannot ethically or economically be passed on to consumers after the fact. There is widespread public evidence, including findings reported in the mass media and formal investigations, of incompetence and corruption within procurement, contracting, and financial management processes. In this context, it would be fundamentally unjust to burden consumers with the financial consequences of these failures. Accountability for Eskom's losses rests with Eskom's management, governance structures, and oversight mechanisms, not with electricity users. Consumers already face rising living costs, economic stagnation, and the indirect costs of unreliable electricity supply. Any further tariff increases to recover historical calculation errors will deepen financial hardship and undermine public trust in the regulatory framework. NERSA's mandate includes protecting the interests of electricity consumers while ensuring sustainability of the energy sector. Allowing consumers to absorb the cost of acknowledged accounting and regulatory errors would be inconsistent with this mandate. I urge NERSA to reconsider the proposed approach and to act in the best interests of South Africa's electricity users.	Jane	Gauteng		self-employed

	2026-01-12 23:09:57	No I do not	All of the above – we should not pay for government blunders	The price of electricity has, in the last couple of years, increased drastically and in stark disproportionate to inflation. Further radial increases will, in all likelihood, in due course result in lower revenue to ESKOM, not only from industrial users moving elsewhere to where electricity is more reasonably priced but also small consumers, not able to pay or justify the cost, making alternative energy arrangements. Furthermore, just when political shifts has resulted in many more small consumers having access to electricity, many are about to again deprived of it due to ESKOM And NERSA pricing structure resulting in it being unaffordable.	Dennis	North West		retired
	2026-01-12 23:08:31	No I do not	All of the above – we should not pay for government blunders	We, the people of ZA should not pay for government blunders. 	2026-01-14 11:57:59	No I do not	All of the above – we should not pay for government blunders	Eskom is already overcharging due to corruption, incompetence and a bloated workforce. Not paying extra for that.	William	Gauteng		business owner
	2026-01-14 11:53:55	No I do not	All of the above – we should not pay for government blunders		Lynne	Gauteng		
	2026-01-14 11:49:29	No I do not	All of the above – we should not pay for government blunders	Eskom is a government owned company. Before any decisions are made there should be an independent audit of the company to assess its financial standing and that's it's works in a cost effective and efficient way. Also, given its a government owned company this should be raised and discussed in Parliament by all parties. It is unacceptable that eskom seem to think it can bill the consumer for its errors given how expensive electricity is now becoming.	Faried	Western Cape		employed individual
	2026-01-14 11:48:34	No I do not	All of the above – we should not pay for government blunders	I cannot believe that R76 Billion is a blunder. Who does Escom employ? R76 Million would be disastrous, but R76 Billion? Someone else not employed by Escom should check everything again. I just cannot believe a R76 Billion blunder. Hocus pocus.	Cynthia	Western Cape		retired
	2026-01-14 11:47:12	No I do not	All of the above – we should not pay for government blunders	This situation is an example of yet another strategy for ongoing corruption and the abuse of public monies.	Shelly Anne	Gauteng		self-employed
	2026-01-14 11:45:07	No I do not	All of the above – we should not pay for government blunders	I'm sure many S, Africans would not support paying up for any debt I incurred as I should be responsible for it - especially at that vast sum! (It seems as though Eskom doesn't have a reliable Human Resource or Accounts team when employing staff.)	Cathy	Western Cape		retired
	2026-01-14 11:41:40	No I do not	All of the above – we should not pay for government blunders		Stanley	Western Cape		retired
	2026-01-14 11:41:38	No I do not	All of the above – we should not pay for government blunders	It's about time that government take accountability for their atrocious management of their state owned entities. They must cut their coat according to their cloth!	Cheryleen	Gauteng		self-employed
	2026-01-14 11:38:45	No I do not	All of the above – we should not pay for government blunders	The cost of living is hard as is. This is not a liable option	chandre	Gauteng		business owner
	2026-01-14 11:38:06	No I do not	All of the above – we should not pay for government blunders		Heather	Gauteng		business owner
