Prepared for: Michael Swain, Freedom of Religion SA (FOR SA)
From: DearSouthAfrica.co.za
Date: 26 February 2026
Total Participants: 44,070

1. Executive Summary

This report analyses the public submissions gathered during the participation campaign regarding the CRL Rights Commission's push to introduce mechanisms to vet, license, and regulate religious organizations and leaders. Over a 4.5-month period, the campaign successfully mobilized **44,070** citizens.

The sentiment is overwhelmingly decisive: **96.4% of participants strictly oppose the state regulation of religion**. The primary driver behind this opposition is rooted in Constitutionality, highlighting deep concerns that the CRL Commission's proposals violate Section 15 (Freedom of religion) and Section 31 (Freedom of religious communities to govern themselves) of the South African Constitution.

2. Quantitative Analysis: Stance on Regulation

Participants were asked to indicate their support for the proposed state regulation of religion.

- **Oppose Regulation ("No I do not"):** 42,474 participants (96.38%)
- **Support Regulation ("Yes I do"):** 1,099 participants (2.49%)
- **Partial/Conditional Support ("Not fully"):** 497 participants (1.13%)

The sheer volume of rejection indicates that civil society and religious communities view state intervention in spiritual affairs as an existential threat to religious freedom.

3. Top Concerns Raised

Participants were prompted to categorize their main area of concern regarding the CRL's proposals. The breakdown is as follows:

- **Constitutionality:** 33,380 (75.7%)
- **Other:** 6,897 (15.7%)
- **Necessity:** 2,657 (6.0%)
- **Workability:** 558 (1.3%)
- **No concern:** 446 (1.0%)
- **Affordability:** 132 (0.3%)

Over three-quarters of the participants pointed directly to constitutional infringements as their primary concern, indicating that the public is highly educated on their fundamental human rights and the specific protections afforded to religious communities by the Constitution.

4. Demographic Insights

The campaign reached a wide variety of citizens across different employment statuses and language groups, proving that this is a broad-based societal concern rather than a fringe issue.

Employment Status:

- **Employed individuals:** 12,867
- **Retired individuals:** 12,094
- **Self-employed / Business Owners:** 7,657
- **Unemployed individuals:** 2,403
- **Students:** 803
- **Non-profit sector:** 660

(Note: 7,586 participants did not disclose their status)

Language Breakdown:

The majority of submissions were made in English (27,241) and Afrikaans (8,428), with smaller pockets of participation in isiZulu and isiXhosa.

5. Qualitative Insights: Voices of the Public

To provide context to the data, we extracted representative comments from the submissions.

Voices Opposing Regulation (The Majority)

The overwhelming narrative against regulation centres on the state overstepping its boundaries, the historical role of churches, and the protections of the Constitution.

- *“Government has no measuring rod for people’s calling. We received our liberation in this country through the participation of churches. Criminal activities have an arm of law to deal with, all ministers committing crime should be dealt with the same.”*
- *“I do not trust the secular state’s push to control religion.”*
- *“South Africa’s Constitution guarantees every person Freedom of conscience, religion, thought, belief and opinion... Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state.”*

Voices Supporting Regulation (The Minority)

While a very small minority (roughly 2.5%), those in favour of regulation generally cite concerns regarding exploitation and financial fraud within unregulated religious spaces.

- *“This is a good move. We are tired of too many churches and pastors who scam hard-working people’s money over ‘Religion’. Churches must be regulated and they must pay Tax.”*
- *“They need to be regulated because some of the foreign nationals run churches as Ponzi schemes, not only them some are there to manipulate people under false pretences.”*

(Note for FOR SA: Acknowledging these minority concerns about criminality when presenting the report will strengthen your position. You can argue that fraud and extortion are already criminal offenses under existing laws, rather than needing new religious oversight mechanisms).

6. Deep Dive: Participants Who Selected “Other” as Their Top Concern

While 75% of participants neatly categorized their concern as “Constitutionality,” the **6,897 participants (15.7%)** who selected “Other” provided some of the most passionate and detailed arguments in the entire dataset.

Of this group, over 4,100 left unique, written messages. When analysing these comments, they generally bypassed the standard multiple-choice options because they view the issue through a much more systemic or theological lens.

Key themes from the “Other” category:

- **The “Existing Laws” Argument (Very Prominent):**
Many participants in this category argued that the CRL’s push is redundant. They feel that fraud, assault, or financial exploitation are already crimes in South Africa.
 - *Quote: “If a preacher or church are stealing, then charge them with theft. If they are abusing church attendees, then charge them with abuse under whatever legislation is appropriate... this is openly and clearly an attempt to use the delinquency of the relatively few to justify control over the many.”*
- **Fear of State Overreach and Ideological Drift:**
There is a strong undercurrent of fear that state licensing is a trojan horse for censorship. Several participants compared the move to authoritarian regimes.
 - *Quote: “Even more concerning is the ideological drift this represents. Moves like this edge South Africa away from a free, democratic society and closer to the authoritarian systems of Communist China and Russia—nations known for state-sanctioned religion.”*

-
- *Quote:* “The CRL Rights Commission is attempting a form of social engineering... Faith is a divine calling. It is not a commercial enterprise.”

- **Divine vs. Secular Authority:**

Many selected “Other” because their primary objection isn’t merely legal (constitutional), but deeply spiritual.

- *Quote:* “You cannot regulate religion. God is not to be regulated by His creation.”
- *Quote:* “I do not believe that the state is above GOD and therefore state cannot dictate to a sovereign GOD who to call into His holy service.”

7. Deep Dive: The Non-Profit Sector

The dataset includes **660 participants** who officially registered their status as representing or working within the “Non-profit” sector.

Who are these organizations and what sectors do they represent?

Unsurprisingly, the vast majority of these NPOs operate directly within the Religious, Church, Ministry, and Education civil sectors.

Some of the most prominent organizations that participated include:

- *Mainline and Charismatic Churches:* Anglican Church of Southern Africa, Joshua Generation Church, CRC (Christian Revival Church), Harvester Reformational Church, and Nuwe Lewe Familekerk.
- *Ministries & Outreach:* H2O Ministries International, Source of Life Ministries, Christ Life Revival Ministries NPC, and Arise Ministries.
- *Community & Educational NPOs:* Emuseni Centre for the Aged, Rethabile Day Care, Educational Life International, and LIFE Community Service.

What is the Non-Profit Sector saying?

Their comments are incredibly valuable because they represent the very institutions the CRL wants to regulate. Their messages are characterized by a highly protective stance over their spiritual independence, while also acknowledging the reality of bad actors in their space.

- **Protecting Spiritual Independence:**

Institutional leaders heavily emphasize the separation of Church and State.

- *Quote:* “The world and its governments does not have the mandate from God to be the controlling body of the Church... It is unconstitutional for the government to manipulate and control the church.”

-
- *Quote:* “The Church of Jesus Christ is not a department of the state it is the Body of Christ... Section 22 blurs the line between Church and State, introducing external regulation into sacred matters of faith.”

- **Support for Peer-Regulation over State-Regulation:**

Many NPO leaders noted that they already have voluntary accountability structures (fraternals, denominational councils, codes of conduct). They believe the Church should police the Church.

- *Quote:* “I strongly believe the Church must be accountable first to God, and second to one another in the Body of Christ. Let the Church reform the Church through prayer, unity, and Spirit-led structures.”

- **A Shared Frustration with “Charlatans”:**

Interestingly, the NPO sector is just as frustrated with fake pastors as the government is, but they vehemently disagree with the government’s proposed solution.

- *Quote:* “The State has no place to regulate any church, ever. We have laws that prohibit unlawful acts perpetrated by any pastor, priest, politician or parishioner. It is overreach from the state to now want to control churches... scammers and charlatans can be dealt with individually.”

How Michael can use this: He can point to the “Other” category to prove that the public understands the difference between criminality and spirituality—the state should prosecute the former and protect the latter. Furthermore, having the backing of major NPOs like the Anglican Church and CRC shows that both traditional, historic institutions and massive modern congregations are united in this stance.

8. Deep Dive: Student Stance & Concerns

The youth are almost universally aligned with the broader public against the CRL’s proposals.

- Oppose Regulation (“No I do not”): 768 students (95.6%)
- Support Regulation (“Yes I do”): 28 students (3.5%)
- Partial Support (“Not fully”): 7 students (0.9%)

What are they concerned about?

Like the older demographics, Constitutionality is by far their biggest concern (577 students / 71%). However, they also had a slightly higher proportion selecting “Necessity” and “Other”, often arguing that the government should be focusing its energy on fixing the police and judicial system rather than policing religion.

8.1. Where are these students studying?

The data shows this is a highly educated, university-level demographic, rather than just high school students. The top institutions represented are some of the most prominent universities in the country:

- **Stellenbosch University:** 78 students (combining variations of the name)
- **Nelson Mandela University (NMU):** 60 students
- **University of Pretoria (UP):** 48 students
- **UNISA:** 30 students
- **North-West University (NWU):** 31 students
- **University of the Free State (UFS):** 9 students
- **University of Cape Town (UCT):** 8 students
- **Private Colleges (Varsity College, Eduvos, Akademia):** 23 students combined

Note: The spread across their “student year” shows a very even distribution across 1st, 2nd, 3rd, and 4th-year undergraduates, with a notable presence of Honours, Masters, PhD, and Law students.

8.2. What is the youth saying? (Qualitative Insights)

The comments from the students are particularly articulate. They frame their opposition heavily around human rights, democracy, and government overreach.

Here are some standout quotes from the students:

- **On the Judicial System vs. Regulation:**

“The state has no constitutional right to manage and control one’s faith... The best way to protect vulnerable people is to enforce the laws we currently have and improve the judicial system. It will not make a difference if we have more laws but not the means to enforce it. We need to strengthen our police force and cut corruption off at its roots.”

- **On True Freedom:**

“Freedom, freedom and freedom is what makes South Africa the greatest country in the world for anyone... As long as you are not harming your fellow South Africans we are good. Once you start interfering with religion it will create such divisions within the citizens of this country... Please do not be fooled by the western ideology of controlling everything.”

- **On Basic Rights:**

“The government has no right to interfere in religious matters. It goes against the Bill of Rights.”

“Unrestricted or uncontrolled religious freedom is our democratic and constitutional right in this country.”

How to use the student data strategically:

The opposition is not just an “old guard” of established religious leaders protecting their turf; it’s the next generation of voters, professionals, and thinkers fighting for their constitutional rights.

When Michael presents this, he should explicitly highlight the University Data. Knowing that students from Stellenbosch, Tuks (UP), NMU, and UCT are actively watching the CRL Commission and submitting constitutional objections changes the narrative. It shows the government that they risk alienating young, educated voters who view state regulation of religion as an infringement on their personal liberties.

6. Conclusion & Recommendations for FOR SA Presentation

The Mandate is Clear: With nearly 42,500 direct rejections, FOR SA has an undeniable mandate from the public to oppose the CRL Rights Commission’s mechanisms.

Focus on Constitutionality: As 75% of participants highlighted constitutionality, Michael should centre his arguments around Constitutional overreach. The public firmly believes that current laws are sufficient to deal with criminality and that state licensing infringes on Sections 15, 18, and 31.

Broad Public Appeal: Highlight the demographics. The opposition is not just coming from church leaders; it is coming from employed professionals, retirees, and business owners who value democratic freedoms.

			My position regarding the Section 22 Committee and the mandate of the CRL is clear: I believe this is ungodly and contrary to the Word of God. The statement made by the Chairperson of the CRL, “that God speaks to nobody”, is a direct violation of Scripture and a challenge to the truth of God's Word (Hebrews 1:2; John 10:27; John 16:13). Such a statement should have been corrected immediately. To declare that those who hear God suffer from mental illness undermines the very foundation of our faith. God still speaks to His people, those who are truly born again. The CRL, by state mandate, has positioned itself to police the Body of Christ. But we do not answer to the state or to the CRL when it seeks to advance an ungodly agenda that violates both our faith and the Constitution of South Africa. I am reminded of the book of Daniel, chapter 3, where Daniel's friends were commanded to bow before the golden image. Daniel 3:19 describes how King Nebuchadnezzar, enraged at Shadrach, Meshach, and Abednego, ordered the furnace heated seven times hotter than usual and had the three men bound and thrown into the fire. Yet in the midst of this fury, the miraculous deliverance of God was revealed: a fourth figure, Jesus Himself, appeared in the fire, and the three emerged unharmed. We must recognize that persecution in South Africa has already begun. It comes subtly, but its source is demonic. The Word of God warns us plainly (Matthew 24:24) that in the last days false prophets will arise and deceive even the elect. Therefore, our declaration is resolute: “We will not bow to your image, O Nebuchadnezzar! Make the furnace as hot as you wish! The Body of Christ bows to no one but the Lord Jesus Christ.” Our response must be firm, yet without hostility or arrogance. We choose to obey God rather than men, and we will continue to uphold the truth of God's infallible Word. Anthony Job

			Freedom of Faith: Islam emphasizes the freedom of individuals to choose their faith, as stated in the Quran, "There is no compulsion in religion" (2:256). Submission to Allah: The core concept of Islam is submission to the will of Allah, and Muslims are expected to follow the teachings of the Quran and the Hadith. Regulation Challenges THIS beacuse man wants to replace God's regulations with its own Restricting Individual Freedom: Overregulation can potentially restrict individual freedom and creativity in practicing their faith. Misrepresentation: Regulating religion can lead to misrepresentation of specific religious principles and values. The relationship between religion and regulation is one and the same in certain faiths set by God and not man..... this will be compromised leading to a one world order.

			South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. It risks religious leaders becoming subject to or tools of state control. South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations.

			Freedom of religion is enshrined in the Constitution. No-one may be prejudiced because of their religion. An effort to regulate religion will limit the freedom of South Africans to worship as they see fit. Other legislation should be used to address any unlawful practices taking place within certain religions/sects. The State has no place becoming involved in religion. To understand the dangers of the State involving itself in religion, consider the rise of Christian Nationalism in the US. The practices and results are, frankly, horrific. WE do not want that kind of behaviour in South Africa.

2025-10-07 16:39:33	No I do not	Affordability	Currently, Malema exemplifies the ANC government's inability to maintain control over its members. Even Donald Trump, from across the globe in the USA, has pointed out the absurdity of Malema's actions. The ANC should have taken disciplinary measures against him while he was still part of the party, but their lack of vision and moral integrity—stemming from their communist tendencies—has prevented this. The promotion of corruption and the underhanded dealings seen during Zuma's tenure are just a few examples of this issue. Now, the ANC seeks to regulate traffic in order to confiscate drivers' licenses—a clear move towards corruption—and they also aim to profit from religious organizations, which raises further concerns about unethical practices. These actions warrant not just a halt but a complete ban on their operations within South Africa, along with the seizure of all their assets and investments, which have largely been acquired through BEE and other illicit means. The purpose of religion is 'the love of God' and what that may mean to different people/groups/individuals etc. Love of God teaches above all 'love (dont judge) one another; So who has put these proposals forward ? Which religion do they follow and how do they show this in the form of 'service' as religion asks of us to do in the Name of God as He would Wish. If these people are living examples of how this is done, then they would be leading by said example and not have to speak, make rules and dictate others how this should be. Teach in schools the children have self respect, thereafter easier to understand what respecting others means. Dont let 10 yr olds be raped and have babies - now that is a cause that needs laws, convictions and prison to perpetrators of all ages - There is no disipline in schools, therefore none in the growing adults who by nature remain immature and ill disciplined within themselves. Why our gove in 94, dismissed religious study in schools, ... what do they know of religion by their own actions could not define the meaning. The government should use the criminal act to prosecute any person who is breaking the law. The worst part is having appointed people that do not know nor understand Christianity to decide who is called and who is not. The same you cannot regulate the right to life, you cannot enforce man made institutions to regulate the church. The worse part is that religion is so diverse, which person can say this is how a person should relate to their God. Is the government going to regulate the Imaam in the mosque, the satanist church , the church of the liberated or their agenda is Christianity? 			Has our government gone completely mad? Religious freedom is an absolute cornerstone of modern society. To mess with it is to mess with civilisation and our very lives! Plus, it's totally unnecessary. – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.	Pieter	Afrikaans	business owner

			Absolutely ridiculous to have a "government approved" body to administer & control this arena. Follow the money, it is said that money is the root of all evil and judging by the low moral standards of our cadre appointed governments at any level, Local, Provincial and National it would not be any surprise to an observer that the "playing field" is being manipulated in favor of the cadre system. Where would this attitude place the so called traditional leaders, seemingly on the rise and dominant in KZN, amongst other areas? They claim to represent the wishes of the "Elders" but I don't seem to be able to find "my traditional leader" to represent me accordingly. Smoke screens and mirrors in an effort to bolster and continue the patronage system imposed on this country since independence in 1994 - shame on you all of like mind and ilk. 2025-10-07 17:07:41	No I do not	Other	The state cannot override what my Christian beliefs are.			
			Religion/or belief must not be controlled by the Government. The purpose of government is to protect and serve the country and not to raise itself as an authority over God. The Christian church follows the law of God first and foremost, and second to that, they obey authority like the government, which God has placed over them. This does not give the government the right to determine any aspect of how Christians can worship God. The government is only in power because God placed it in power and God Romans 13 1 Every person is to be in subjection to the governing authorities. For there is no authority except [b]from God, and those which exist are established by God. 2 Therefore whoever resists authority has opposed the ordinance of God; and they who have opposed will receive condemnation upon themselves. 3 For rulers are not a cause of fear for [d]good behavior, but for evil. Do you want to have no fear of authority? Do what is good and you will have praise from the same; 4 for it is a minister of God to you for good. But if you do what is evil, be afraid; for it does not bear the sword for nothing; for it is a minister of God, an avenger who brings wrath on the one who practices evil. 5 Therefore it is necessary to be in subjection, not only because of wrath, but also for conscience' sake. 6 For because of this you also pay taxes, for rulers are servants of God, devoting themselves to this very thing.	david

			Our constitution protects our freedom. Once the state starts regulating religion and our religious beliefs, they start removing our freedom to believe according to our consciences. Examples can be cited from countries like China and Iran where the state regulates the church and pastors and dominates their beliefs, instructing them what they can and can't preach or teach and anyone who doesn't adhere to them is regarded as a criminal. Thus ministers / pastors who normally uphold the law and teach their people to do the same are regarded as criminals when not adhering to state regulated policies for them. Instead of creating a free country where religious beliefs can be practiced freely, without fear, governments that become authoritarian in nature have a history of limiting religious practices to those that conform to the dictates of the government, rather that that of God and scripture. The regulation of religion, even if done with the noble intention of limiting charlatans and abusive spiritual practices, is a slippery slope that paves the way to potential totalitarian control over a fundamental freedom and right. 			– Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations.

			Regulation of religious practices and organisations amounts to "playing God". Religious leaders and followers alike are citizens (largely law abiding and godly) who are following their beliefs and convictions regarding what pleases and displeases God according to their scriptures. Appointing a committee or person to dictate in these matters is a violation of the right to faith and religious freedom. It is also a dangerous step towards state religion and all manner of abuses.			
			I am acutely aware that some religious leaders and followers have behaved in unethical or illegal manners. Such transgressions should be dealt with by the ordinary Rule of Law and other constitutional mechanisms.

			The South African Constitution is the highest authority in our land. Under its umbrella, religions are fully protected. However this is not a free for all. Some religions in their "right to organise" violate our Constitution in the treatment of women, taxations, etc. Our constitution does not allow this, and needs to take precedent over religious practices and ideologies that do not abide by our generous secular aims to make one society united under law .			
			In the US back then, at Justice Thomas' Senate confirmation hearings to take his seat on the US Supreme Court, Thomas was asked if he believed that the US Constitution was the highest authority in the land.			
			Shockingly he replied, no, that "natural law" was the highest authority. This basically meant that the highest authority was a Christian more or less evangelical God.			
			Thomas should automatically have been disqualified and the suggestion made that perhaps a preacher role might suit him better.			
			We can now see the consequences of his being confirmed.			
			South Africa has the most advanced Constitution in human history. We should all keep faith in this and not fall back on what Salmon Rushdie in "Midnight's Children", called "old superstitions".

			From a constitutional perspective, Section 15 of the South African Constitution guarantees every person the right to freedom of religion, belief, and opinion. Section 31 further affirms the right of religious communities to gather, practice, and govern themselves freely according to their faith. Any attempt by the State to control or approve who may preach, pastor, or lead a congregation represents an overreach into the private and spiritual domain of faith communities. It undermines the separation between church and state — a principle designed to protect both institutions from undue interference.			
			From a biblical perspective, the authority to call, ordain, and lead in matters of faith comes from God, not from government structures. The apostles declared, “We must obey God rather than men” (Acts 5:29), affirming that spiritual oversight belongs to Christ as the head of the Church (Ephesians 1:22). Scripture teaches that pastors and leaders are appointed through spiritual discernment and calling, not by political or bureaucratic approval. To subject the Church to state licensing would substitute divine calling with human control, contradicting the very essence of faith and the Lordship of Christ over His Church.			
2025-10-07 17:59:13	No I do not	Constitutionality	True freedom of religion means that faith communities govern their own spiritual affairs in accordance with their beliefs. 2025-10-07 18:07:01	No I do not	Constitutionality	A divine calling, such as Faith is, cannot be licensed or regulated by the state. The state cannot validate religious belief. The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. The very existence of meaningful right to religious freedom is threatened by State regulation. Religious leaders should not be tools of state control. 2025-10-07 18:07:48	No I do not	Necessity	My religion is my concern. Of course I wish all would come to saving knowledge of Christ, but that is a voluntary decision each person must contemplate for themselves. It is ludicrous to even postulate that there is an independent body that can adjudicate or decide on anyone's behalf. Faith is a deeply personal matter that must be the sole responsibility of the individual without official influence from anyone else. There must be a free market for exchange of ideas, but the individual must always be free and accountable to make their own choices and decisions.	José

2025-10-07 18:09:41	Yes I do	No concern	Godsdiens in enige vorm behoort tot die verlede. Uitgediende mitologieë uit 'n tyd toe oermense nog nie geweet het wat donderweer veroorsaak nie. Dit is ondenkbaar dat alle godsdienste reg kan wees, daarom is dit tog veel meer logies om in te sien dat almal verkeerd is. Dit moenie meer 'n rol in die groter samelewing speel nie, en beperk word tot 'n private aangeleentheid. Ons het vir lank genoeg gebuk gegaan onder die skuldbelaaide las van die christelike mitologieë wat (minstens in die pre-1994 era) tot in die diepste kern van regeringsbeleid en wetgewing ingedring het, en loop nou gevaar om dit te herhaal, maar met die veel erger invloed van die vieslike geloofskultuur genaamd islam. Ons het totale sekulariteit in in alle vlakke ven regering en wetgewing nodig, met géén rol vir enige geloofsoortuigings nie. Solank geloofskulture ongebrydeld toegelaat word om te prolifereer, gaan die toksiese effekte daarvan nog lank weergalm. Dit moet uit skole, uit opleidingsinstansies, net uit alles uit. As iemand hulle bizarre delusies tuis wil beoefen en uitelef, staan dit hulle seker vry. Maar van regeringskant af behoort godsdiens sover moontlik beperk en aan bande gelê te word. Dit is tyd vir rede om bo mite te seëvier. Intussen, terwyl duisende nog vasklou aan hulle ondeurdagte trasisies, as die regering dus 'n mate van kontrole oor potensieël ekstremistiese elemente kan uitoefen deur standaardte stel, is dit 'n stap in die regte rigting. Dit behoort ook van toepassing te wees op die oprig van enige nuwe godsdiensverwante geboue - kerke en moskees spesifiek. “Freedom FROM religion” behoort belangriker te wees as “Freedom OF religion”	Wynand	Afrikaans	business owner

The CRL is trying to set up a religious bureaucracy that will facilitate centralisation, orthodoxy, corruption and the conflation of politics with religion. Instead, we should be striving towards secular government, decentralization and preventing exploitative and harmful messages and behaviour through law and effective enforcement. It should not be the CRL's aim to validate and control who is a valid religious organisation, but rather limit religious claims and behaviour that aren't supportive of human rights and dignity, as well as constrain the financial practices of religious organisations to ensure transparency and accountability while preventing exploitation. 2025-10-07 18:32:16	No I do not	Other	A government should not have the right to regulate religion because freedom of belief is a fundamental human right. The ability to choose one's religion lies at the heart of human dignity and personal autonomy. When a government interferes with religion, it crosses into an area that belongs to the individual conscience, not the state. Secondly, regulating religion endangers democracy and equality. If the state decides which beliefs are acceptable, it gives itself power over thought — the most personal aspect of human life. History shows that such control often leads to persecution, censorship, and suppression of minority groups.	Lizelda	English	employed individual

			The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations.			
2025-10-07 18:38:16	No I do not	Constitutionality	SAs Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Faith is NOT a profession and cannot be licensed or regulated by the state. The state has NO say concerning the validity of religious belief. State regulation is a threat to the people's right to religious freedom and the rights of religious communities, and religious leaders are not subject to, or tools of, state control. SA's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. And.. Parliament previously rejected the CRL's proposal for legislation to implement a "Peer Review Committee" system of state regulation of religion.	Jen	English	employed individual

2025-10-07 18:47:10	No I do not	Constitutionality	It is unconstitutional to regulate, vet, or deal with religious leaders and members in any way not applied to the general population. There is also no need, crimes by individuals or entities are already described in law with appropriate punishments, and religion is no excuse for crime NOR IS IT AN EXCUSE FOR BEING TREATED DIFFERENTLY IN ANY WAY WHATSOEVER. Instead of solving the economy which is killing the poor, Parliament and government are here busy with a COMPLETELY UNNECESSARY AND ILLEGAL set of regulations. Read Rawls' description of equality, you should treat every human being the same as if their gender, religion, skin color and politics are UNKNOWN. The religious beliefs and associations of individuals are IRRELEVANT to government, only people's ACTIONS matter, are they breaking the law or not? This regulation reeks of Nazism and must be stopped at all costs.	Wynand	English	employed individual

2025-10-07 18:47:54	Not fully	Necessity	A religion or people adhering to the same basic principles of their paradigm comes with a "belief codex or a set of rules system". E.g. chrisianity comes with the Bible and/or the 10 commandments, Buddhists come with a philosophy (and are NOT a religion but a philosophy), muslims have the Koran, ... Now, where it should be permitted that "the State" has a saying on the matter, is when the "rules" of a religion or philosophy are of such a nature as to promote and/or instigate hatred, insult or even worse murder to be performed on non-believers or people adhering to another philosophy. THEN the State should forbid those aggressive parts of that belief system. Not the religion or philosophy as a whole, but those parts that prove total intolerance or disrespect against "others". Everybody's freedoms end where the same freedoms of others starts.

Vetting church leaders/priests/prophets etc may not be such a bad idea. 2025-10-07 18:52:18	No I do not	Constitutionality	The freedoms enshrined in Section 15 and others of the Constitution must not be curtailed because government is afraid or unwilling to confront rogue religious leaders in terms of the laws of the country. Conduct that does not transgress legislative provisions need not be worried about. However, government has all the required authority to deal with rogue leaders where their conduct transgress legislative provisions. The relevant legislation contains the penalties involved and must just be used as part of the judicial processes available. There is no need for further mechanisms to deal with transgressions. Government is also not able to implement and enforce new regulations, given the current financial situation.

			This is an attack on the most fundamental freedom a human being can possess — the freedom of conscience and belief. Faith is deeply personal; it shapes who we are, how we live, and how we understand the world. When the state begins to interfere in that sacred space, it crosses a line that no government should ever approach. By attempting to regulate or dictate matters of faith, the state assumes authority over the human soul itself, something no earthly power has the right to do. History has shown time and again that when governments seek to control belief, it leads to oppression, persecution, and the erosion of all other freedoms. A society that allows the state to define or restrict faith is one that has abandoned the principle of liberty at its core. This is not progress; it is the first step toward totalitarianism, where personal conviction is replaced by state-approved ideology. The right to believe, or not to believe, must remain sacred and beyond the reach of government power.

2025-10-07 19:11:44	No I do not	Constitutionality	The CRL Rights Commission's renewed call to vet, license and regulate religious organisations and leaders strikes at the heart of South Africa's constitutional democracy. It threatens freedom of religion and the spiritual autonomy of faith communities protected by the Bill of Rights. Section 15(1) of the Constitution guarantees everyone "the right to freedom of conscience, religion, thought, belief and opinion." This right belongs to individuals and faith communities alike. Any attempt by the state to license or "vet" religious leaders turns government into an arbiter of spiritual legitimacy — a role inconsistent with South Africa's secular, pluralistic order. Section 31(1) further protects the right of cultural, religious and linguistic communities to practise their religion and maintain their associations. Conditioning this right on prior state approval violates both its letter and spirit. Similarly, Section 18 affirms freedom of association — the right of people to gather and worship without bureaucratic control. Such measures also risk unfair discrimination contrary to Section 9(3), which prohibits the state from discriminating on grounds including religion, conscience or belief. Smaller or independent faith groups could be disproportionately burdened or excluded. Under Section 36, rights may be limited only when the limitation is reasonable and justifiable in an open and democratic society. The CRL proposal fails this test: existing laws already address fraud, abuse or criminal conduct without undermining fundamental freedoms. Faith and belief belong to civil society, not to the administrative machinery of the state. The Constitution's cornerstone values — human dignity, equality and freedom (Section 7) — demand that the state respect and protect, not regulate, religious life. Licensing religion would erode these values and set a dangerous precedent for all South Africans.	Cobus	English	employed individual

2025-10-07 19:12:39	Not fully	Constitutionality	Freedom of speech and freedom of religion is basic to a democracy and is enshrined in our constitution. Why do we need to regulate religion? That the law can so easily become this is my worry. Regulate the taxes that those entities should be contributing yes, but do not "regulate religion". I think anyone who professes to be a religious leader within an organisation that collects money and professes to look after others should be registered but not vetted. By whom? If they have a criminal record then they can't be registered. That's fine, but not because someone decides they don't want that religion. Religious leaders must be separate from the government. They were a force for good under apartheid when they were not aligned with the state. Be transparent about your motives. Trust is being eroded. Look to build it by being transparent. If they need to pay taxes and you want to make sure they don't exploit their followers then enforce the laws we already have for that.	Billy	English	self-employed

2025-10-07 19:15:59	No I do not	Constitutionality	As a nation, we cannot allow our freedoms to be eroded under any circumstances. Under the rule of Constantine, the Roman state was joined to the church forming the Roman Catholic church. What followed is referred to in history as the dark ages which was a situation where at first the state ruled the church, but later this was reversed and the Roman Catholic church ruled the state. Martin Luther effectively ended the dark ages by opposing the policy of the Roman Catholic church ruling the state because by virtue of it ruling the state, the Roman Catholic church caused draconian oppression to take place among the populace under the banner of religion. Hereafter, we have the reformation which eventually led to the religious freedoms we enjoy today. This policy is a move back to the dark ages where religion is first taken over by the state, then corrupted. This policy encompasses the foundational steps towards completely dismantling democracy as we know it. A democracy is undermined and eventually eradicated by first suppressing the press which already is the case in South Africa. The purpose is to control the information received by the populace. The next step is to control religion. This breaks the will of the nation as religion is the support structure that the populace uses to strengthen themselves. The next step is to disarm the populace so that it is easy for the state to overthrow any resistance among the populace by the use of force. Our constitution is the only document that protects us from being stripped of all our freedoms and forcing us back to the dark ages. We oppose this entire process and we reject it in the strongest possible terms.	Liz	English

2025-10-07 19:25:44	No I do not	Constitutionality	I oppose the CRL Rights Commission's proposal to vet, license, or regulate religious organisations and leaders. This proposal threatens freedom of religion, a right guaranteed by Section 15 of the South African Constitution, and undermines the spiritual autonomy of faith communities. Any form of state control over religion — including licensing or vetting — violates the constitutional separation between church and state and opens the door to government interference in personal belief and worship. Existing South African laws already provide sufficient mechanisms to address any criminal or unethical conduct within all sectors of society, including religious institutions. Creating additional regulations that specifically target faith communities is unnecessary, unconstitutional, and discriminatory.			
2025-10-07 19:26:05	No I do not	Other	I therefore call on Parliament and the CRL Rights Commission to reject all attempts to license or regulate religion and to uphold the constitutional right to freedom of religion and association for all South Africans.	Yolande	English	employed individual

2025-10-07 19:42:10	No I do not	Other	Existing measures to address scam artists or abusive religious leaders already exist. There are no reasonable grounds for imposing this regulation upon Christian churches. Apart from it being another blatant overreach by government, my main concerns are: - The power this bill/policy will give to government to interfere with doctrinal teachings. This is very much a communist concept and allows for the type of abuse of power exercised by the CCP in China over churches. Because of the government's interference with the church, pastors in China are arrested for teaching true Biblical doctrine and non-compliance with government censorship. Due to the government's overreach, churches are forced to diminish the person of Jesus and alter teachings completely to be aligned with the government's socialist/communist beliefs. - The additional financial burden on churches and the ability of the government to interfere with how funds are applied. - The mismanagement of funds by government. It is an undeniable fact that this government is fraught with fraud and corruption. They have no business telling a church how / where funds should be spent. They certainly should not be paid for this privilege to pillage the church coffers. - Church closures. If this goes through, many churches will not be able to afford to stay open.	Tammy

2025-10-07 19:48:59	No I do not	Other	As a Christian mother, I strongly disagree with the CRL Commission's push to regulate churches and spiritual leaders. Our faith cannot be licensed by the state — it belongs to God alone. Scripture says, "We must obey God rather than men" (Acts 5:29), and "Where the Spirit of the Lord is, there is freedom" (2 Corinthians 3:17). The Church is accountable to Christ, not to government control. We have no other gods. If these are now State appointed bishops, over the body of Christ, they will see what the Head of The Church has to say about it. His bride and His body is being threatened and will be violated here. Arise, Oh Lord, and let your enemies be scattered! May the heavens bear record that this South African government has once again sought to do violence to your anointed - the body of Christ. May the court of heaven be in session as we open this case against this government and plead for an injunction against this wicked initiative. May the God of heaven and earth arise and render His swift judgement regarding this matter, in Jesus name. May Your enemies know that You alone reign supreme over the affairs of men, and that the heavens do rule. May Your great Name be hallowed and feared in our land, and may the sons of men and the sons of Belial who have conspired against your chosen people bow before Your eternal Throne, and be scattered. 			This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternal, and self-governing associations.

2025-10-07 20:34:51	No I do not	Constitutionality	I have been a pastor for 32 years and have two masnter’s degrees and am about to finish my PhD. I think I know what I am doing and don't need the state intruding in an area where God does not permit them to stick their nose. God ordained three primary institutions--the family, the church, and the state. Each has its own lane. The state's lane is to protect and defend its citizenry from enemies both foreign and domestic. And the South African state can't even do that much. There are already laws by which we all are under and cover the abuses that happen is some of the Christian cults. We do not need any more regulation or bureaucrats interfering with our ministries. I am accountable to my fellow elders and my congregation. And we all bound by the word of God from 1 Timothy 3:1-7 and Titus 1:5-9. I will not be dictated to by the state. Caesar has no say in our polity or matters of our doctrine. To be honest, hell will freeze over and pigs fly before I will ever bring the yoke of the state upon my ministry or my church. I will certainly be fighting this with fiber of my being and organizing other pastors of like mind. The rest, I leave to God who is more than able to kill this insane bill.	Mark		employed individual

Do they not see from the sport events, such as the SA rugby team support by so many different groups of people that people associate freely and in good spirit without being regulated. 2025-10-07 20:49:08	Yes I do	No concern	Religion in this country has had a free pass for far too long. One just has to read the news to see what the latest scandal is regarding some apostle / prophet / pastor / minister / priest, from monetary extortion of a congregation, to physical and sexual abuse of both minors and adults to bodily harm. I have personal experience of being in a church where the pastor and elders have no formal training other than 'reading the Bible', but feel free to guide people in politics, mental and health issues, family and relationship matters, financial affairs and more, often to the detriment of the person being 'counselled'. As to the 'freedom of religion' mantra, that is usually taken to mean that 'I can do whatever I want with my religion, but other religions can't'. For example, evangelical Christian churches will push 'freedom of religion' to mean that Christians can do whatever they want. But heaven forbid that Muslims, Hindus, Buddhists or atheists get equivalent benefits... If the practices of Christians or any other religion are granted an exemption from common law (for example corporal punishment of children by parents), then atheists and any other group should have exactly the same benefits. 2025-10-07 21:18:22	No I do not	Constitutionality	No, any religion, whether 'church', mosque, or any other type of religion, including traditional religions, should never be regulated by the state. Faith is a matter of calling and conscience and the state should not interfere with what people choose to believe. It is not a profession, and there are no regulations that are the same for everybody. Parliament already ruled on this issue, and the taxpayers' money should not be wasted to revisit the issue; there are more important issues, like job creation, to pay attention to. 			Firstly, let’s cut the BS. This is not about controlling religions, this about oppressing and suppressing the voice of Christianity. God’s word is about striving to bring truth, integrity, and the chance to repent and be forgiven from past sins. However, many see Christianity as an obstacle to “play God” themselves. And many churches have been infiltrated by false prophets and teachers. They are in league with these same people who want to “regulate” us. They are deceivers and won’t stop at taking your free speech — they want to take everything! We know it, they know it.

It grant the CRL power and authority to regulate religion in South Africa is act of lunacy. If this is allowed, then it goes to show that the ANC are hellbent on re-writing the constitution as they see fit, not in line with the desire of the men and women who formulated the constitution that allowed the re-birth of this nation in 1994. Once we allow tyrants to begin to re-write the constitution or amend it in ways that remove the very freedoms it was drafted to protect as fundamental to the constitution, and the personal right of every member of South Africa. It sounds like some of these people just sit around socializing over a few bottles deciding the nonsense they discuss is worth an investment of valuable tax payer money. Truth being told they are mainly supporting or feeding there allusions and they became experts in acquiring funding for their pretentious good causes. Then these "religious people or institutions" which they're trying to bind or control with some adulterous regulations as to when/how they should be open or close, pray or worship etc, are the same people praying for the wellbeing and protection of this country and leadership guide its citizens into peace and prosperity and to be freed from any evil conscience, but because they're so proud and egotistical thinking their so called important position in life and apparent good fortunes will last forever, but they must bear in mind not everyone serve a dead god, some of us serves the Almighty God and although being a loving Father is also The One to repay vengeance on the heads of them who dares to set traps for His children or being a stumbling block and bringing harm to His annointed ones. My humble request therefore is, CRL leaders repent and turn away from your wicked ways even the ones under your authority will have to pay the price of your foolishness, because what is on the head flows down to the body. 2025-10-07 22:17:37	Not fully	Other	We have to be careful here. If we voted for freedom of religion, then Satanist's and extremist Muslims will be able to gain a foothold in South Africa. I voted a definite NO when they applied to become a political party and they stated that their aim is to take over the country and impose Sharia law. So I dont want the mainstream religions regulated but I am against Muslims. Look at how they have flooded Europe which now have a huge problem. The British are not allowed to fly their own flag in Britain because it offends the Muslims. What to do? I am absolutely NOT going to cover myself in a burka and walk two steps behind my husband and be treated like a second class citizen. The only coherent worldview is the Christian worldview and the state need not interfere except to allow the free exercise of speech everywhere as it concerns religion and to freely choose such for oneself with all relevant information available. This is nothing more than once again communists attempting to get rid of our heritage all in the name of safety or security while providing none. KarlMarx once said that 'a people without a heritage are easily persuaded' they have re-written the history books and now they want to remove or regulate religion. Nothing new under the sun, a Babylonian king once tried that too, this is because the friends our dear leaders keep are of poor quality and their dictatorial regimes are proof of such. 2025-10-07 22:58:33	No I do not	Constitutionality	Democracy= Freedom. How can this freedom be subject to state peer review committees who are obviously subjective based on their personal beliefs? Another step towards communism? No democracy in the world would do this. Should this freedom be infringed upon in religious persecution and the interference of government in religious matters , this would result in grounds for marginalized religious groups to immigrate and actual democratic countries would consider this valid grounds. State and Church (in this context meaning any religious belief) are separate entities and should remain so.	Hina	English

It is an entirely personal matter for individuals to adhere to whatever organisations they choose, to practise their faith, to reach out to others of other faiths, to have no faith etc. Freedom of religion and religious practices is a human right that should be protected from state interference. There should always be a separation of faith and state, and no-one should force anyone else to follow their beliefs or pattern of worship, rituals, or other theology or practices. 2025-10-08 00:14:36	No I do not	Other	Religion should not be regulated by the government because no human authority has the right or ability to control God. Faith is a personal and spiritual relationship between individuals and their Creator, not a matter that can be dictated or restricted by political power. When a government tries to regulate religion, it oversteps its bounds and assumes a role that belongs only to God Himself. True worship and belief come from the heart, not from laws or regulations, and any attempt to control religion is ultimately an attempt to control God — something no government can or should ever do. 2025-10-08 00:57:56	No I do not	Constitutionality	As seen in France and the UK for example is a mess. Islam is violent religion but the freedom laws stop Christianity from being practiced but not radical Islam. Government cannot be trusted with the little or lot they have now they want to look like Europe? Let South Africa say peaceful. When government starts giving to its people its real freedom and not that of greed. Then let’s sit around the table and discuss why this law is helpful, helpful to whom? South Africa should have been a success story after Apartheid and the Nelson Mandela regime. But it is falling apart and government officials are sitting on all the money, and wanting more and more power. True fact: If you take Jesus out the system then you have a fight for power and position. The only thing is hat for now is holding this once beautiful country together is its prayerful citizens. Not even government knows how to do that anymore. Witchcraft now is invited to make blood sacrifices for and to whom? Blood shed through witchcraft is not the solution, neither Islam as its fundamentals are revenge, force and punishment to death if you do not follow the ways. Government seats are also mixed with lucifer or satanic worship as most bow and bow the secret oaths of the freemasons. The only next step is stamp out the only religion of peace, Christianity and then you have anarchy, self empowerment and dictatorship and full control. We cannot trust this government as it is today. 2025-10-08 01:02:06	Not fully	Other	On the surface of it, the idea of regulating or even "peer reviewing" anyone's religion has to be one of the most absurd concepts ever to emerge from the SA government... and, given their record, that's quite something! It is not even possible to regulate or review something as private and personal as religious belief. The state will never know _and can never find out_ what a person's religion truly is, let alone review it. But let's not forget that not everyone's idea of "religion" is a direct, meaningful relationship with their personal faith. There are also those who want to rule their flock like the government rules its citizens. They wouldn't want the government poking inquiring fingers into their holy turf. And even worse, there are those who cynically use the pretense of religion to perpetrate fraud, molestation and so on, and of course they don't want any state interference in their criminal activities. Actually, maybe state intervention in religious institutions might be a good thing after all. It cannot find, see or harm the true faith of the individual, which is what the constitution is meant to protect, but it can suppress the people who use their religious status as a pathway to power, riches and exploitation. Pastors might have to stop feeding their wallets and their egos and nourish their communities instead. Yes, I vote for that!	Frank

2025-10-08 01:10:56	Not fully	Constitutionality	Whilst I believe in the he separation of church and state I am wary of the influence Islam has over the ANC, and as I don't recognise Islam as a true religion, rather as a political movement, I feel there needs to be a reassessment of Islam's claim to validity as a faith Vs an invasive foreign government (caliphate) system. I would urge the state to outlaw Islam and assess the validity of neo-christian sects, also to put the onus on the SACoC to vet the validity of churches that don't necessarily follow the biblical scripture as I suspectany are simply tax dodging exercises eg River Ministries which own hotel chains and helicopters... Hence my responding 'not fully' to the question. I don't believe the state is capable, under ANC mismanagement, of managing anything, I believe th state has been captured by the Iranian state, and as such is highly vulnerable to Islamic agendas. I don't want the stats fiddling about in the church's affairs as that would give the Iranian state control over Christians in SA, rather I want the Islamic influence rejected and separated from state completely, and the ministers responsible for the actions against Israel tried for treason against the DA state. 2025-10-08 02:52:50	No I do not	Constitutionality	Freedom of religion is a basic human right ,also guarenteed in our constitution.Religion firstly manifests from the spirit and minds of individuals.The state should have no roll in the contend of religion as it will infringe on the mind and spirit of individuals.Freedom of choice is also a basic human right .It will be dangerous if the state or government of the day have a say on issues directly related to religeous mind and spirit as politics and culture change with time but the contend of a religion of spirit and mind mainly stays consistent,being faithfull to its own religion's law.The state in a free society where human rights exist may not interfere in the contend and self governance of a religion .The criminal law already provides protection or sanctions where certain so called religious acts are harmful to individuals and constitutes a criminal act .The role of the state is not to act like a god to its citizens by overseeing religions like an overlord. 2025-10-08 02:54:51	Yes I do	Necessity	I understand your point about the Constitution and how allowing regulation of religion can seem like crossing a line, however, we also have to look at how easily some people are taken advantage of in the name of faith. There are many cases in South Africa where certain pastors or prophets have used religion to exploit people who genuinely believe and trust in them. We've seen stories of church members being told to eat grass, drink petrol, or get sprayed with Doom as part of a so-called healing. Many of these people were desperate for help or hope, and their faith made them easy targets. There's also the serious side where violence has happened in the name of religion. One of the worst examples was the Ngcobo police station attack in 2018, linked to the Mancoba Seven Angels Ministry. Members of that group killed five police officers and a soldier. The church rejected government authority and ran almost like a cult, which ended in tragedy. The CRL Rights Commission has since raised concerns about how some religious leaders abuse their power — from financial scams to sexual exploitation and neglect — all under the cover of “faith.” So while freedom of religion is a right, it doesn't mean people should be left unprotected when religion is being used to harm or control others. 2025-10-08 03:29:04	Yes I do	Necessity	There are a number of cases involving church leaders who have abused the position of the church to rob and abuse congregants in the name of religion. Individuals,and predominantly women have fallen prey to scrupulous leaders of faith based organizations.They were scammed of large sums of money and sexually be violated. Undocumented persons have flocked across the borders of South Africa from different countries to take advantage of the unregulated status of religious organization in South Africa. In doing so they endangered the lives and mental health of people who were only having the church as their last hmm hope in society. Government through CRL commission and parliament must bring an end to this free ride and abuse.	Ntlaletseng	English	self-employed

This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.	Zakariyya	English	employed individual

			In a country like ours where a son can mutilate and hack a mother with a spade as she lays down dead on the ground, you want to tell me that wickedness has not prevailed?			
			In a situation where minor girl children are violated by their fathers to death and or young boy children are sodomised and left for dead on the side of the road, wickedness has not prevailed?			
			In a country where a European foreigner has been found with women's private body parts in a freezer after surgically removing another's only private parts, wickedness has not prevailed?			
			Where corruption reeks at the helms and seems of every government institution to the point of running the bleak economy on its feet, wickedness has not prevailed?			
			Where innocent whistleblowers are murdered in cold blood and left for dead to grieving families and loves ones, wickedness has not prevailed?			
			Where the blood of the innocent cries out for justice to their maker and the only fitting justice can come from the LORD the creator of heaven and earth, his works must then be regulated?

			The state through it's atheistic minions seeks to gain control and legislate over the church, a institution founded by God to be the conscience of the state, to provide moral guidance for the legislation and its execution. From this body, all other freedoms that we enjoy as a people flow. The government is an elected body, set up by the will of the people to govern, to keep law and order, none of which they have done well at so far. Yet, now they seek to impose a tyranny learned from China, North Korea and Myanmar to control and designate what their citizens can believe, what they may profess and follow. They are dabbling in areas way beyond their understanding and ability. Lacking morality they seek to usurp that of others and impose their own flawed version.				
2025-10-08 05:32:28	No I do not	Constitutionality	The CRL should be disbanded - they are seeking to further their own amoral agenda and thus attack one of the few remaining institutions that uplift society. What right do they have? 1. Faith is a divine calling, not a profession — it cannot be licensed, managed, or regulated by the state. The government has no rightful authority to determine the validity or form of religious belief. 2. The CRL has no constitutional mandate to regulate doctrine, ordination, worship practices, or the internal affairs of religious associations. Allowing the state to assume control over any aspect of religion sets a dangerous precedent. Such interference risks creating deep societal imbalances and unrest, as faith is a core part of human identity — one that people throughout history have been willing to defend at great cost. Any government involvement in religious regulation would only inflame tensions and threaten the harmony and freedom we currently enjoy in this deeply personal area of life.	David	English	Non-profit

			Government should focus on making a success of what is in their hand. Changing legislation does not change management but increasingly adds to a workload for government what they cannot manage. 			This is the opposite of freedom . Government and the law should be protecting society from criminals such as murderers, rapists, drug dealers, not from freedom and peace promoting, evil curbing, religious people who are helping people turn from bad behavior to good behavior, The state has no right to control or regulate people's beliefs, and indeed they cannot. By trying to do this they will label harmless, useful people, criminals . I would warn them not to do this, since curses come to Governments who persecute the innocent and who hinder God's faithful servants who proclaim His Word. Living according to His Word brings blessing to nations.

			I am writing to express my deep concern and strong objection to the proposal currently under discussion to regulate religion through licensing, vetting, or state regulation of religious organisations and leaders. My objections are as follows: 1. Violation of Constitutional Rights Religious freedom is enshrined in the Constitution as a fundamental right. Any effort to require religious groups or leaders to obtain licenses or state approval places undue burdens on that right. It threatens the spiritual autonomy of faith communities, and risks undermining the separation of religion and state. 2. Risk of State Overreach and Abuse Granting the state the power to regulate what constitutes an acceptable “religious organisation” or who may lead one opens the door to misuse—political influence, bias, or discrimination could easily creep in. Religious belief is deeply personal; oversight by the state could lead to suppression of minority faiths, dissenting voices, or minority interpretations. 3. Ambiguity and Practical Impracticality It is unclear how the government plans to define and administer the regulation. What criteria will be used? Who makes decisions? What appeals processes exist? The administrative burden, cost, and ambiguity are likely to create confusion, delays, and possibly arbitrary decisions. 4. Undermining Trust and Religious Diversity South Africa is a pluralistic society with many faiths. Faith communities often play vital roles beyond worship—for community building, charity, moral guidance. Imposing regulation could erode trust between faith communities and government, and stifle diversity of practice and thought. 5. 2025-10-08 05:40:40	Yes I do	Necessity	Religion has always exploited the vulnerability of humans to imagining things that are not real. We know there is no "god" - but cool, if you want to believe in deities that is your right. Enjoy it. But enjoy it responsibly. The wilder claims by evangelical and charismatic churches should be prohibited, in the nicest possible way - through licensing, through examination and approval of texts by religious leaders of all faiths . Not government. Most religions actually dont preach mad stuff, they preach and teach love, compassion, reconciliation, forgiveness, trying to better ones personal condition and care for others. Most. Moslem, Hindu, Christian, Jewish, Animist (by the way I consider myself an African Animist, whenever something unexpectedly good happens to me (not often but on occasion it has happened) I enjoy thinking that maybe my late departed mother had a hand in it :-), I have kept all the important keep sakes back to my grandmothers times and regard those objects as an almost spiritual connection to my past. I know its bs but just enjoy indulging in the thought. All this is harmless enough . But the mad stuff must be curbed.	Jack		retired

			There should be a clear distinction between church and state. We already have laws that can deal with any criminal wrong doing by religious leaders and churches. Legislation that specifically controls religion is not needed and not welcome. Various religions have various practices all of which cannot be regulated. To impose regulation on religion will impose a set of rules which will fundamentally affect how various faiths work and will impose a state sanctioned religion. Last I checked this was not communist China where such practices have been implemented, effectively making anything that the state does not like illegal where the CCP has even determined the forms of music, doctrine and which versions of the Bible can be used. They have abused that power to quell religious expression that in the eyes of the state is not acceptable. That is considerable overreach. Such overreach begins with innocent forms of laws and ultimately degrades into a state religion which becomes the only sanctioned form of faith.			
2025-10-08 06:05:46	No I do not	Other	I categorically oppose such laws.	Jacques	English	employed individual
			I strongly oppose the proposed legislation and related initiatives to monitor or license churches and religious practitioners in South Africa. While accountability and protection from abuse are important, state monitoring of religious institutions threatens the core constitutional right to freedom of religion, belief, and association. 1. Constitutional Violation Section 15 of the Constitution guarantees freedom of religion and worship. Granting a government body the authority to approve, regulate, or discipline churches infringes on this right and opens the door to political or ideological interference in matters of faith. 2. Existing Laws Already Cover Abuses Crimes such as fraud, sexual exploitation, assault, and financial misconduct are already prosecutable under South African criminal law. The issue lies in poor enforcement, not a lack of legislation. Creating a new "church monitoring" regime would duplicate existing legal mechanisms. 3. Risk of Political Bias and Selective Enforcement Any state-appointed committee regulating churches could be influenced by political agendas or target minority and dissenting faith groups. Oversight must remain within civil and legal boundaries, not theological or internal church matters. 4. Threat to Religious Diversity South Africa is home to thousands of denominations, independent churches, and faith expressions. Requiring registration or approval would marginalize smaller or newer churches, contradicting the values of equality and diversity that the Constitution upholds. 5. Parliament Has Previously Rejected This Idea In 2018, Parliament's CoGTA Committee rejected the CRL's earlier proposals for state regulation of religion, instead recommending self-regulation and voluntary codes of conduct. Reintroducing the same concept undermines that democratic decision. Alternative Solutions

			My faith is part of my being- it is a right by which I live - it is to be protected - by our constitution, for our people. Our faith is the cornerstone of history, our character, our future. It is what enables us to stand up, press on and keep going with a hope for our country. The state, it seems wants to control every area of every person's life in this country- a very socialistic ideology- which will make us puppets- not human beings. The government of this day undermines and plays with the constitution of our country. It is treading on dangerous ground and will suffer the consequences. I have my right to choose my faith, to attend my church., be part of gatherings, speak openly of my faith - and I hold on to that.

2025-10-08 06:22:53	No I do not	Constitutionality	We, as citizens, wish to express our concern regarding any attempt to dictate what we should believe or how we should exercise our faith. Every person has been granted free will by God — the right to choose, to believe, and to live according to their conscience. The Bible reminds us in Joshua 24:15, “But as for me and my house, we will serve the Lord.” This verse speaks to the sacred freedom each person has to choose whom they will serve. The Church, under the guidance of God and the leadership of pastors, plays a divine role in leading the flock spiritually — not under compulsion, but by example and truth. As it is written in 1 Peter 5:2-3, “Be shepherds of God’s flock that is under your care, watching over them—not because you must, but because you are willing, as God wants you to be.” We therefore appeal to our government to respect and uphold the freedom of belief and worship enshrined in our Constitution and granted by God Himself. Our faith is not a matter for regulation but for reverence. We have a duty to protect our future generations — to ensure they grow up in a nation that honours God-given freedom and moral conduct. Faith and biblical laws help us and our children decide what is morally right and wrong. This nation will be in complete and utter turmoil , if we as humans decide what is right and wrong in our own eyes. This nation and future generations will be utterly consumed by their own lists and fleshly desires.	JUDITH	English	employed individual

The Bible reminds us in Joshua 24:15, “But as for me and my house, we will serve the Lord.” This verse speaks to the sacred freedom each person has to choose whom they will serve. The Church, under the guidance of God and the leadership of pastors, plays a divine role in leading the flock spiritually — not under compulsion, but by example and truth. As it is written in 1 Peter 5:2-3, “Be shepherds of God’s flock that is under your care, watching over them—not because you must, but because you are willing, as God wants you to be.” We therefore appeal to our government to respect and uphold the freedom of belief and worship enshrined in our Constitution and granted by God Himself. Our faith is not a matter for regulation but for reverence. We have a duty to protect our future generations — to ensure they grow up in a nation that honours God-given freedom and moral conduct. Faith and biblical laws help us and our children decide what is morally right and wrong. This nation will be in complete and utter turmoil , if we as humans decide what is right and wrong in our own eyes. This nation and future generations will be utterly consumed by their own lists and fleshly desires.	JUDITH	English	employed individual

2025-10-08 06:23:17	Yes I do	Constitutionality	If we seek to create something like a chapter 9 institution that will oversee religious communities I am for it. We have the SAHRC that deals with human rights and so having a body that deals with religious rights of our multi religious country is a good idea. As a country we need only rely on uBuntfu when doing religious reviews because if you're not uMuntfu, how will you be a leader amongst abaNtfu? By relaying on the Principle of uBuntfu, our diverse country will have a principle to fallback on when personal religious beliefs are strongly biased. And if it is a group of people who are educated or trained in religious sector or well experienced in the sector because we cannot have a repeat of the scams that Charismatic churches were pulling on the country. Desperate and ill congregants who were led by allegedly religious leaders into drinking petrol. In short we should have an oversight body that regulates this sectore. That's what government does, it regulates. If it doesn't want to regulate something then the sector will force regulation like the sex workers sector that has been demanding government regulation and now is as the Apex court in the land. Regulate and enforce the laws in order to keep the majority of South Africans peaceful.	Sakhile	English	student

			As a Christian and a South African citizen, I strongly oppose the regulation of churches by the CRL Rights Commission. While the Commission was established to protect the rights of all cultural, religious, and linguistic communities, it has shown clear bias under the leadership of Chairperson Thoko Mkhwanazi-Xaluva. Public statements made by the Chairperson — suggesting that Christians who pray should be sent to psychiatric wards, while ignoring Sangomas who openly claim to bewitch people are not only offensive but also deeply discriminatory. Such remarks demonstrate a troubling lack of impartiality and a direct attack on Christianity, which is the faith of the majority in this country. Pastors are not “religious practitioners” in the sense of a profession anyone can enroll in. They are called and anointed by God to shepherd His people. To reduce this divine calling to a mere practice regulated by the state undermines the very foundation of faith. It is important to stress that South Africa already has criminal laws in place. Anyone — including pastors — who is guilty of fraud, abuse, or any other crime must be prosecuted under the law. We do not need a state-controlled body regulating faith; we need law enforcement to act where genuine crimes occur. History has shown us the dangers of state interference in religion. In countries like China and North Korea, governments suppress the church and silence religious voices. South Africa must not follow this path. Our Constitution guarantees freedom of religion, and that freedom must not be compromised by state-controlled regulation. During apartheid, the church played a vital role in resisting injustice, offering moral leadership, and protecting the oppressed. That independence allowed the church to speak truth to power. If the state now seeks to regulate the church, it risks silencing that prophetic voice and undermining democracy itself.

			Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations.

2025-10-08 06:42:04	No I do not	Constitutionality	According to the South African Constitution, the direction and governance of religious matters is not entrusted to the state. It does not fall to the state to vet, licence, or regulate religious organisations and leaders. To attempt do so would be a matter of gross overreach. The only function of the state with regard to religious affairs is to safeguard and guarantee the necessary freedom of travel, speech, and meeting, and to maintain the pertinent national infrastructure - i.e. to regulate the parameters that allow for the free exercise of religion. As a child of God at 75 years old I say that governments should never have any say in the way a Christian or any other religion should practice their faith as long as it is within the tenets of the Holy Bible, if religious leaders or any one who has a position of power within the framework of the Church ignore these tenets or the laws of the country, abuse or act maliciously against any other religious person or organization then only can the government act to protect all citizens. 2025-10-08 06:47:04	No I do not	Constitutionality	Freedom of religion is an imperative personal right and no Government can interfere with or control this basic Constitunal Human Right. The state cannot regulate any religion that is practiced in South Africa because that is a contravention on our constitutional rights to freedom of belief and religious practice. Every religion has its own unique regulations within its beliefs systems, however there could be variety of the beliefs or religious practices even within same or similar religious communities. The Commission therefore cannot infringe upon our Constitutional rights by informing what we are "allowed" or "not allowed" to believe or practice. Therefore, we cannot have the state regulating religious groups as this is evidently contravention of our constitutional rights to freedom of belief and religion.	Marian	English	employed individual

			The state is not above God and cannot regulate or control what and how people think and believe. This detracts from freedom of choice and the rights of individuals to freedom of worship as South African citizens. 2025-10-08 06:54:01	No I do not	Other	To Whom It May Concern, I write to express my unequivocal rejection of the proposed legislation currently under review. This proposal does not serve the South African people—it undermines their freedom. There is no genuine protection or service embedded in this legislation. Instead, it reflects a deepening pattern of control, not care. The ANC government's 30-year track record of corruption and mismanagement speaks for itself, and this proposal continues that legacy. As a free and sovereign South African national, and an inhabitant of the Western Cape state, I stand for a return to foundational principles rooted in truth and dignity. 2025-10-08 06:55:03	No I do not	Constitutionality	The CRL's plan to license and regulate religious leaders must be rejected because it violates South Africa's constitutional rights to freedom of religion, belief, and association. Faith is a divine calling, not a state-controlled profession. Government interference in doctrine or ordination threatens the independence of religious communities and risks politicising faith. South Africa's faith groups already practise voluntary accountability, and Parliament has rightly dismissed such regulation before — there is no legal or moral basis to revisit it. We need to build on what we already have that will move us forward, and not clamp down on freedom and destroy what needs to be preserved. This is a governmental overreach of power. 2025-10-08 06:57:35	No I do not	Constitutionality	Freedom of speech and freedom of religion is the bedrock of a well functioning society. Any attempt to control such leads to tyranny, this is not hard to prove, we have lost millions of lives through such attempts, just in the recent 120 years how many were killed in Communist countries that aspired to similar goals. 			I strongly oppose the CRL Rights Commission's proposal to license or regulate religion. Faith is not a profession — it is a deeply personal and spiritual calling that exists prior to and beyond the authority of the state. Our Constitution protects every individual's right to freedom of belief, conscience, and association. Any attempt by the state to vet spiritual leaders, define doctrine, or control how communities express their faith undermines these fundamental rights and risks turning authentic spiritual work into state-approved ideology. South Africa's rich diversity of spiritual expressions thrives precisely because it is free. Voluntary accountability structures already exist and are effective without state interference. The introduction of state regulation would open the door to control, censorship, and the suppression of voices that challenge institutional thinking — something our democracy must resist at all costs.			
2025-10-08 06:57:36	No I do not	Other	I therefore reject the CRL's proposal and urge Parliament to uphold and protect the constitutional right of all people and communities to seek, teach, and live their faith without state interference.	Jacques	English	business owner

			When any government starts to want controls placed on personal or public expressions of faith, it's the clearest sign that the moral challenges placed on that government by critique from that sector are hitting deep. To support this clearly deceptive move I would have to, as an older man, denounce my belief system and take on the mantle of a clearly Socialist /Communist replacement dogma. It's clear the ANC has lost touch with its own base support and is trying to shut down all voices it needs silenced to be able to cling on to power. 			Religion is a deeply personal conviction, not a matter for government regulation. Each individual must be free to follow their conscience and worship—or not—according to their own beliefs. We answer to a higher moral authority, not to the shifting priorities of political institutions. When the state begins to regulate religion, it crosses a dangerous line: it claims power over the soul. History has shown, time and again, that when governments interfere in religious matters, the result is repression, division, and the erosion of fundamental freedoms. The moment religion is subject to regulation, it ceases to be faith freely held—it becomes doctrine enforced by power. True religious freedom is not granted by the state; it is a natural right. No government has the authority to dictate what we believe, how we worship, or which faiths are acceptable. To allow such control is to invite tyranny cloaked in the language of order.

Although Jesus did say we sahl conform to the rule of the Government, it is necessary to understand that God's standard is above that of any person or Government for that matter. It is not about constitution; it is about what God say. If God appointed and annointed a person the Government cannot recuse this. If we allow this to happen then we answer to the Government and not God. 			I do not agree wit he state interference of how or what I should believe or worship. What I choose to do as a practice in my religion is what I ascribe to and give consent as a worshiper. I believe I also have the right to freedom of speech, religion and association. What the state is pushing for through CRL is an infringement of my rights as a citizen bordering on creation of a state religion. The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. Violates Section 15: freedom of religion and conscience. Violates Section 18: freedom of association (including the right not to join a state-approved body). Violates Section 31: right of religious communities to self-govern. Forces religious leaders into state-controlled “Umbrella” structures.

2025-10-08 07:26:49	No I do not	Other	* The answer is simple and already in our Constitution. We want zero special state regulations for the church and pastors. Nothing at all. Churches and pastors are not exempt from the laws that apply to everyone else. * As soon as you set up a structure for regulation of the church, you can add to it. * Any regulation of the church and pastors would give the state power to shut down churches, which is exactly what is happening, for example, in China and Rwanda. * Any state regulation would give ungodly unbelievers power over the church, which would make the church more corrupt not less corrupt. * Pastors and churches are not exempt from generally applicable laws such as noise, town planning, NGO regulations, financial, defamation, traffic and child safety law. If the CRL thinks they need to add to those general applicable laws for everyone, then everyone can consider those, but no we do not want any special laws only for religious practitioners or churches. * Historical lessons are that whenever such regulation has existed, the state abuses such power to promote their own political agendas in the church. 2025-10-08 07:30:09	No I do not	Constitutionality	Opposing CRL's Attempt to License Religion I strongly oppose the CRL Rights Commission's renewed push to regulate or license religious leaders and organisations. This violates the Constitutional rights to freedom of religion (Section 15), association (Section 18) and the self-governance of faith communities (Section 31). Faith is a divine calling, not a state-licensed profession. The CRL has no authority to control doctrine, ordination, or worship. Allowing government regulation of religion risks political interference and the erosion of spiritual freedom. Religious communities already have voluntary accountability through fraternals, charters, and self-governing associations. Parliament rightly rejected this idea before—there is no legal or moral reason to revive it. The state must protect, not police, religion. Freedom of faith must remain free — not state-owned, not state-regulated, and not state-licensed.	Francis	English	business owner

2025-10-08 07:31:23	No I do not	Necessity	Participation in religion is a free choice. Our constitution allows you to participate in whatever religion you choose. If the religious body commits criminal or harmful acts, then there are already laws that protect citizens. If a religious body misguides and abuse people and their sometimes misguided believes and religious fervor, well, shame on them. And shame on the people that return there week after week. But then political parties should also be regulated if you want to regulate religious bodies because they misguide and abuse people and their believes. There are definitely unscrupulous "religious leaders" and organisations that misuse people, but the people go there out of their own choice and stupidity. Let the people decide where and what they believe. Regulating it will not change it. Just make sure the justice system works that the laws of the country protect people against abuse. 2025-10-08 07:36:23	No I do not	Constitutionality	Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31)	E	Afrikaans	self-employed

2025-10-08 07:39:31	No I do not	Constitutionality	Firstly the constitution safeguards our right to religious activity and the freedoms that comes with it. If the state regulates my Christian faith then there is no freedom because the state will impose limitations and possibly impose their ideological view unto church. Secondly the constitution guaranteedsus freedom of speech. Thus by regulating my faith the state will want to limit what is said on the pulpit and that by itself is taking my freedom of speech away. Thirdly the constitution quarantees us freedom of expression and by regulating my faith the state wants to regulate how I express myself through my Christian faith. The state through the ruling party wants to silence the voice of the church on moral/ political issues by instituting this proposed legislation. The state doesn't want the church to be involved in state affairs through the seperation of state and church but now by wanting to regulate the church the state has crossed their own line by interfering in the affairs of the church. 2025-10-08 07:44:27	No I do not	Other	There are enough rules in this country through which the government, who has been shown to be corrupt and incompetent on many occasions, has control over our lives. Religion has nothing to do with the government unless it is to kerb activities of so-called religions (cults) who are known to call for the death of others. 			In way or shape can the government be dictating any form of religion to the people. The issue is a lot deeper than just trying to dictate religion. The government is not fulfilling basic mandate and thus interfering with society on a level where the resistance will be severe. 			Religion is created by humans for humans... to believe in something that does not exist. There was no religion before human beings existed. Think about this...particularly in that human beings believe in different versions of the truth...really? Defined by different prescripts... created by human beings... really? It is the biggest power-generating and money-making extortion in the history of humanity. And South Africa has become an easy target for business fronted as religion and what is already massive and easy exploitation of often naive, vulnerable, and influencible people ... there is nothing good for victims about any of this.. only for those who aim to gain. Money and power changes human behaviour... always. It is proven time and again throughout the history of humankind. Increased legislation in South Africa to provide legal mechanisms to apply the law and justice to protect people legally in South Africa is warranted

			This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Not only so, but doctrine is based on the teachings of the Holy Bible, and the state does not have authority to say what is true or false when it comes to Biblical practice and faith. We as citizens of South Africa must have freedom to practice our religion—by living out our faith and sound doctrine, which of course, comes from the teachings of the Holy Bible.

This over extended need to give rules and control our lives, is no different than a helicopter parent controlling a person's life. This means that one's rights should not infringe upon the rights of another. The government's intention is not to interfere with faith, but to regulate harmful or misleading religious practices that pose moral or social dangers. As the Scriptures teach in 1 Timothy 1:9 (NIV), "The law is made not for the righteous but for lawbreakers and rebels." The state has no say concerning the validity of religious belief. • The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. • State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. • It risks religious leaders becoming subject to or tools of state control. • South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. 2025-10-08 08:31:06	No I do not	Constitutionality	The South African Constitution guarantees freedom of conscience, religion, thought, belief, and opinion to everyone in its Bill of Rights. The licensing is surely going to restrict religious practice for people of faith and possibly make it more dangerous to practice and grow one's faith. Also, if religion is to be subject to licensing is it possible that further aspects of our lives might also become subject to rules and restrictions?	Irene	English	employed individual

2025-10-08 08:32:09	No I do not	Constitutionality	I feae thar the government is trying to control amd influence religious leaders through these changes. Faith cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. If our pastor had to tailor his preaching and have it vetted by the state, I think it would create a huge bottle neck, and pastors and other religious leaders would have to wait months for messages etc to be passed or approved. The messages from God are inspired and to have them be influenced by the state, corrupts them. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. Violates Section 18: freedom of association (including the right not to join a state-approved body). Violates Section 31: right of religious communities to self-govern. Forces religious leaders into state-controlled "Umbrella" structures. It is also unworkable as some Committee will have the power to decide on what qualifies as a "religion" without having the necessary knowledge of the subject. 2025-10-08 08:34:54	No I do not	Constitutionality	Jesus is Lord. The Government has no say about religion. If the government forces this issue then we can say that the Governments religion is Money (mammon) so can we use the CRL proposal to regulate their money for them as well? In the Bible, "mammon" is an Aramaic term for material wealth or riches, often used to describe the debasing and corrupting influence of money. This is what rules our ANC Government it is their religion of money so by default according to their proposal we can regulate them also. Jesus used the term (mammon) in the Gospels of Matthew and Luke to caution against serving wealth as a master, (like the ANC) warning that people cannot serve both God and material gain (like the ANC). Instead of trusting in possessions for security, the Bible suggests using wealth wisely to care for others, which leads to true spiritual wealth (which the ANC don't have). Faith matters by very definition are personal heart issues. By definition they cannot be regulated by outside authorities. The purpose of the state is to protect and promote freedom of citizens including freedom of religion and not to regulate this. For the above reasons individuals will choose not to comply with any regulations and you would be inviting rebellion. IN any event individuals will just choose to practice their religion informally if you do this and you will practically not be able to monitor this. You will drive a wedge between citizens and the state and place them at enmity with one another. This can contribute to create a culture of disobedience.	Max	English	retired

			Faith, as opposed to any other profession, is a calling and not a profession. As such it is not capable of being licensed or regulated by the state, which, by its very nature, is totally unequipped to regulate something as deep and spiritual. The state has no say concerning the validity of religious belief. Furthermore, the CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations, and should stay clear thereof unless they want to be seen as driving communist/Marxist agenda. State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. It risks religious leaders becoming subject to or tools of state control, state prescription, state silencing and eventually state takeover - over something they know nothing of, have no laudable input, and will only use to their own devious purposes. South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. In addition, our court system is available to anyone with a grievance.

2025-10-08 08:50:20	No I do not	Other	My faith in Jesus Christ is a matter of personal conviction, divine calling, and conscience before God — not a privilege granted or controlled by the state. According to the Bible, faith and worship belong to God alone. In Acts 5:29, the apostles declared, "We must obey God rather than men." Similarly, Romans 14:12 teaches that "each of us will give an account of ourselves to God," not to government authorities in matters of faith. Scripture clearly separates divine authority from civil authority, as seen in Matthew 22:21, where Jesus says, "Render to Caesar the things that are Caesar's, and to God the things that are God's." My relationship with Christ therefore transcends any earthly regulation; it is sacred, personal, and governed solely by God's Word and Spirit. From a constitutional and legal standpoint, the Constitution of the Republic of South Africa (1996) guarantees this freedom unequivocally. Section 15(1) protects "freedom of conscience, religion, thought, belief and opinion," meaning that every individual has the right to hold and practice their faith without interference. Furthermore, Section 31(1)(a) affirms the right of religious communities to enjoy their faith together, to observe religious practices, and to form religious associations — free from state control, provided they respect the Bill of Rights. No Act or policy of government may lawfully dictate how one worships, what one believes, or how one lives out their relationship with God. Therefore, both by Biblical principle and constitutional protection, my Christian faith stands outside the regulatory reach of the state. Government has no moral or legal jurisdiction to dictate the substance, practice, or expression of my belief in Christ. My worship is a matter between my soul and my Saviour — not a matter of state compliance but of divine obedience.	Mason	English	employed individual

2025-10-08 08:56:03	Yes I do	Other	Dear Friend, Any individual who makes claim that there exists an unseen omnipotent entity in the sky who will punish you if you do not carry out his wishes unquestioningly, should be required to provide tangible scientific proof of such utterances (It is widely accepted by a large section of society that the bible in its many belief formats is not proof of omnipotent deity .. neither is the wonder of life and mere existence, nor the rantings of sabbath cultists who claim a connection to such deity). Should such individual/s provide adequate evidence (as is their rightful duty by burden of proof) they should then be licensed to practice as a spiritual guide for said deity (and only for said deity). Should no proof of existence be forthcoming, fraud charges must be levied and the individual must be prevented from holding any public office, civic duty, or Public engagement. By the same measure, unlicensed individuals uttering such claims to minors in any form should be charged under South Africa's child indoctrination/abuse laws. This is a reasonable, measured and common sense approach to all aspects of life in our society, there is no good reason why religion should be excluded.	Ray

2025-10-08 08:57:07	No I do not	Other	How often do we remember and apply what Jesus tells us (commands us)? Specifically, in reference of today's reading: Matthew 16:19 and Again Matthew 18:18... Jesus explicitly and emphatically tells us that He gives us the Keys of Heaven – and He Is, and His Name Is, The Keys of Heaven: (i) “Assuredly, I say to you, whatever you bind on earth, will be bound in heaven, and whatever you loose on earth, will be loosed in heaven. Again I say to you that if two of you agree on earth concerning anything that you ask, it will be done for them by My Father in heaven. For where two or three are gathered in My Name, I Am there in the midst of them” (ii) “And I Will give you the keys of the kingdom of heaven, and whatever you bind on earth will be bound in heaven, and whatever you loose on earth will be loosed in heaven.” Reading Matthew 17v5(b) – reference Jesus’ Transfiguration on the Mount: when Moses and Elijah appeared, Peter wished to honour them to build them tabernacles – But – God's voice came out of a bright cloud that overshadowed them saying: “This Is My Beloved Son, in Whom I Am well Pleased. Hear Him!” – noting, we should heed The Voice of The Lord, and be less concerned of what people think or say of us..... should we revere man's opinion or God's Word? In Matthew 7:7 Jesus assures us: “Ask, and it will be given to you. Seek, and you will find. Knock, and the door shall be opened to you.” Let us find the pragmatics of God's Word – Jesus' teachings – in our daily life..... we are consecrated in Christ Jesus (Christ-Likeness) to make sensible choices, decisions, implementing God's Will, Jesus' teachings – recognizing His purpose for us during times we would otherwise seek indulgence for our self-interests or run from the demanding implications of His leading at a given moment..... Condensation – Luke 2:49 – at a young age ‘Jesus said to them (his parents) “Why did you seek Me? Did you not know that I must be about My Father’s business?” we are created in His Image	Jaqueline	English	employed individual

2025-10-08 09:04:18	No I do not	Constitutionality	As a newly registered church of alternative faith, not Christianity, we are the minority when it comes to religions, we are autonomous in our practices and having religion regulated means we will have no means to practice. Which in the first place is unconstitutional. It goes against freedom of speech and freedom of religion. Why punish everyone for the minority of ego hungry religious piranhas? Why not create a board where, when someone steps out of line, the congregant can go and lay a charge? Makes more sense. I will not and cannot accept this as the norm going forward. We are a church that practices in love and believe in no harm. This is harming, not just the hope of what people need in today's socio-economic climate to survive, but the very essence of who people identify with. The problem this will cultivate, is rogue church goers, hiding their faith behind doors, underground. Is this what we have come to? Medieval times?	Venette	English	employed individual
2025-10-08 09:04:24	No I do not	Other	I totally reject government's plan to regulate religion. It's an infringement on our freedom of religion which is protected by the constitution. 2025-10-08 09:08:01	No I do not	Other	A government should not be involved in a person's spiritual life. This is a relationship only between God and a person. Government should focus to its job, which is for example physical infrastructure. If government failed miserably in doing that, why would they proceed to also ruin other aspects of the social life where they have no mandate to interfere? We as Christian citizens and voters in South Africa, strongly object to the CRL Rights Commission's renewed effort to license or regulate religious organisations and leaders in South Africa. Our Constitution guarantees freedom of religion, association, and self-governance for all faith communities. Governments with political ideologies that challenged God Almighty Creator of the universe, collapsed quickly, without one exception. 2025-10-08 09:15:31	No I do not	Necessity	As outlined by ForSA, there is nothing to gain and much to lose by the proposed regulation. If people within religious institutions are participating in undesirable or illegal activities such as fraud, sexual assaults etc, existing laws criminalizing such behaviour should be enforced against the individuals.	William		
2025-10-08 09:15:38	No I do not	Other	Where undesirable activity is pointed out as examples within religions, there already exist laws aimed at preventing or punishing such behaviour. These laws should be enforced, rather than new laws created. Further regulations will not change the behaviour of bad actors, but it will limit and disadvantage ordinary people and organisations.	Rudolf		
2025-10-08 09:15:44	No I do not	Constitutionality	There is no need to implement new laws in this regard, and much reason not to: the constitution deeply protectes religious freedom from state regulation, and Parliament has already rejected the CRL's peer review proposal. There are significant expenses required for the proposed regulation, which would be a waste of the country's finite resources and would ultimately be another cost passed on to the taxpayers. Considering this as an exchange of goods and services, if the taxpayers are paying for the service it should be something they asked for and that benefits them. Historically, state regulation of religion leads only to oppression.	Kholofelo	English

2025-10-08 09:16:23	Yes I do	Other	As a Muslim i do agree because Religion is one thing but the exploitation of Religion is another, religious bombardment is very much at play especially being a Muslim and the opening of Mosques all over with impunity is invasive to others in different religions, also the Imposters and false prophets that are negatively influencing people in society is becoming problematic and we saw it with Pastor Bushiri. Also because of the Israel/Palestine conflict as a country we must protect our Sovereignty as a country from foreign elements from both Israeli and Arab influence that is covert where religion is used as a Proxy to infiltrate, this is dangerous, it will infiltrate into our society a very dark influence, we witnessed that with local Muslims serving ISIS and with local Jews serving the IDF which are foreign entities. We must guard our Country from these forces that will threaten our existence and Sovereignty. Based on the above i support this fully.	Imran Cassim	English	employed individual

Government should focus on matters of the state. We are not a communist country and should not be treated as one. Will Muslim and other religions also be regulated? Will Sari law be implemented? Will Jihad be accepted? Will it now be lawful to marry a child but unlawful to practice freedom of speech? The State should concentrate on fixing themselves before trying to fix others. Stop stealing our money. Fix the hospitals before you want to fix the Church. 			Freedom of worship is a human right given by God and no man or government has the right to control or attempt to conform our freedom to do so. This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.

2025-10-08 09:35:05	No I do not	Necessity	In South Africa, this right is enshrined in the Constitution, and any attempt by the state to regulate or suppress religious expression—especially personal experiences like hearing from God—raises serious legal and ethical questions. I hereby express my deep concern and firm opposition to any attempt by the state or its institutions to regulate religious belief, spiritual experience, or personal conviction. Such actions violate the foundational principles of our democracy and infringe upon the rights guaranteed by the Constitution of the Republic of South Africa. Section 15 of the Constitution guarantees freedom of religion, belief, and opinion, stating: This includes the right to: Express personal spiritual experiences without fear of ridicule or persecution; Educate oneself and one's children in accordance with one's religious convictions; Practice and share religious beliefs freely, without interference from the state. No individual should be discriminated against, silenced, or stigmatized for expressing personal religious believes or experiences. I believe there is sufficient laws that if there is any criminal act being perpetrated by any person, whether due to religious believes or any other reason, they can be prosecuted without creating yet another law. A proper law enforcement agency is the problem, not a lack of laws and regulations. Spiritual calling is not issued by a ministry or regulated by a syllabus. It is a deeply personal, often mysterious encounter—one that transcends institutional boundaries. To demand that a prophet, pastor, or other religious leader be trained in a certain way and with a certain doctrine, or only in state-approved institutions is to reduce revelation to regulation. Throughout history, spiritual truth has often come from outsiders, rebels, and wilderness voices—not from the halls of power	Johanna	English	self-employed

			I am voting YES in support of the CRL Rights Commission's push for mechanisms to vet license and regulate religious organisations and leaders. While I respect the constitutional right to religious freedom this right cannot be a shield for exploitation abuse and the commercialisation of faith. The arguments against regulation while constitutionally sound in theory fail to address the devastating reality faced by the poorest and most desperate members of our society. This issue is not about controlling legitimate faith; it is about stopping financial predators who operate under the guise of religion. The Hidden Crisis in Our Communities Many South Africans particularly those in more privileged or mainline denominations are unaware of the widespread rot taking place in economically vulnerable communities such as townships and inner cities. Financial Exploitation: There is a rampant proliferation of 'fly-by-night' churches run by charlatan 'ministers' who treat the church as a cash cow not a calling. They target the unemployed the ill and the elderly demanding their last pennies—sometimes their entire social grant—with promises of "miracle financial blessings" or "divine healing." The funds are siphoned off to enrich the individual 'pastor' who often drives luxury vehicles while their congregation starves. Abuse and Undignified Practices: The CRL Rights Commission's 2017 investigation was prompted by numerous reports of dangerous and humiliating practices such as making congregants eat grass or snakes or drink petrol or toxic substances. These actions are criminal yet vulnerable people are often too scared to speak out for fear of "burning in hell" or challenging a figure they believe has direct spiritual power. Lack of Accountability: These operations are frequently unregistered or operate with no formal theological training structure or peer oversight. The traditional systems of self-regulation by established religious bodies are powerless to stop these independe

B)The state has the duty to protect minorities from discrimination on religious grounds. Limits to Religious Practice: Religious rights are not absolute. 			This proposal is unconstitutional, unnecessary, and unworkable. It must be rejected entirely. UNCONSTITUTIONAL This submission directly violates South Africa's Bill of Rights: Section 15 guarantees freedom of religion without state interference. Requiring registration and licensing infringes this fundamental right. Section 18 protects freedom of association, including the right not to associate. Forcing religious leaders into state-approved "Umbrella" structures violates this protection. Section 31 protects religious communities' right to self-governance. This proposal destroys that autonomy through state control and oversight. UNNECESSARY South Africa already has comprehensive laws covering all abuses: Criminal Law addresses fraud, assault, rape, and murder SORMA protects against sexual offences Children's Act safeguards minors Consumer Protection Act covers fraudulent practices The problem is enforcement, not missing legislation. When crimes occur in religious settings, police must investigate and prosecute. The solution is better policing—not new bureaucracy. Religious freedom has never excused criminal conduct. Courts already reject such claims. The law applies equally to everyone, regardless of religious context. UNWORKABLE This proposal creates impossible challenges: Who decides qualifications? What defines a "religious practitioner"? Do home prayer groups need licenses? How will one framework accommodate traditional African religions, Hindu, Muslim, Jewish, and Christian practices? Which doctrine becomes "official"? Who determines acceptable theology? Will the state referee denominational disputes? This is precisely the entanglement democracies must avoid. How will enforcement work? What penalties for unregistered worship? Will police raid prayer meetings? What recourse exists against biased committees? The administrative cost would be enormous—achieving nothing existing law doesn't already accomplish. CONCLUSION This mirrors authoritarian systems that supp

2025-10-08 09:46:31	No I do not	Constitutionality	South Africa's Constitution guarantees every person:– Freedom of conscience, religion, thought, belief and opinion (Section 15)– Freedom of association (Section 18)– Freedom of religious communities to govern themselves (Section 31). We all as Christians and Christian Leaders have Freedom of Religion as enshrined and in terms of the Constitution and the ANC, and as the government, is mandated to protect this freedom, not persecute it. A Defiant Stand Against State Control of Spirituality The proposal for the CRL Rights Commission to regulate religion and spirituality is nothing short of an assault on the most sacred freedom known to humanity — the freedom of belief, conscience, and spirit. It is an authoritarian overreach disguised as “oversight.” The state has no moral, ethical, or spiritual authority to dictate the sacred paths that people walk within their own souls. Religion and spirituality are not departments of government. They do not belong under the cold machinery of bureaucratic control. The human spirit predates the state; it transcends political boundaries, constitutions, and commissions. No government — no matter how self-righteous — has the right to interfere with what people believe, how they pray, whom they serve, or how they connect with the Divine. To “regulate” spirituality is to chain the soul, to convert sacred freedom into state property. This is tyranny cloaked in administrative language. History has shown us — over and over again — that when governments step into the realm of faith, freedom dies and hypocrisy reigns. The CRL Commission would not be protecting spirituality; it would be strangling it under the guise of control. Let’s be blunt: the state cannot even manage corruption, poverty, or crime — yet it now wants to manage the spirit? What absurd arrogance. Spiritual life is the realm of conscience, devotion, and transcendence — not paperwork, not licenses, not regulation. If this kind of law ever takes hold, it will not stop at “monitoring.” It will grow into permission-granting, censorship, and punishment. Spiritual teachers will be silenced, traditional healers criminalized, and seekers forced to conform to state-approved spirituality. That is not freedom — it is spiritual dictatorship. True spirituality is rebellion against control. It is personal liberation, not submission to authority. Any attempt to regulate it is an attempt to own the human soul — and no	Daniel	English	retired

			The CRL Rights Commission's proposal to license or vet religious leaders is deeply concerning. While accountability in all sectors is important, introducing state regulation over religious belief and practice undermines one of the most fundamental pillars of democracy — freedom of religion, conscience, and association.				
			South Africa's Constitution already provides strong mechanisms to address abuse, fraud, or exploitation through existing criminal and civil laws. There's no justification for the state to interfere in the internal governance or theological autonomy of faith communities.				
			True religious freedom means the right to believe, worship, and organize without state approval or control. Any move toward licensing faith or its leaders risks setting a dangerous precedent — one that could easily be misused to silence dissenting religious voices or minority traditions.

Even the principle of this should be rejected. If the state needs to sign off on what can be said from pulpits or face the fury of the state, we are no different to Nazi Germany or communist China. Please reject this Bill in its entirety! As a proposed solution or alternative, we urge the CRL to enhance its capacity to investigate potential “abuses” and recommend appropriate remedial action. To this end, we note that the CRL Act, 2002 already grants the CRL the following powers: - Monitor, investigate, and research any issue concerning the rights of religious communities (section 5(1)(e)); - Bring any relevant matter to the attention of the appropriate authority or organ of state, and, where appropriate, make recommendations to such authority or organ of state in dealing with such a matter (section 5(1)(k)). 2025-10-08 09:53:31	No I do not	Constitutionality	Objection to Regulation of Religion in South Africa We strongly object to the CRL Rights Commission’s renewed proposal to license or regulate religious organisations and leaders. Such measures strike at the heart of South Africa’s constitutional guarantees of freedom of religion, belief, and opinion (Section 15) and freedom of expression (Section 16). Any attempt to impose state vetting or licensing on matters of faith undermines spiritual autonomy, limits freedom of speech, and opens the door to political or ideological interference in private belief. We therefore call on Parliament and the CRL Rights Commission to uphold and protect the constitutional right to freedom of religion by rejecting all proposals to regulate or license faith and its leaders. 2025-10-08 09:58:57	No I do not	Constitutionality	Since the dawn of time people have had the right to express their own religious beliefs without interference from government. There have been instances in history where governments/rulers have interfered and it turned out badly. This, as your info states, is a divine calling and has nothing to do with government. This smacks of a communistic agenda, to control absolutely every aspect of the country's citizen's lives. If certain religions are causing the government headaches, and I don't see that anywhere in SA, then they should tackle those religions. There are such disastrous failings from this government in SA. They should rather focus on fixing those mess-ups than fiddling with something that has literally no bearing on anything from a government point of view.	Tim	English	retired
2025-10-08 09:59:04	No I do not	Constitutionality	South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) These rights would be violated by the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL) regulating religious organisations and leaders. The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. There is no need for government bodies to get involved. State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. It risks religious leaders becoming subject to or tools of state control. This is a slippery slope down which South Africa should not risk going. Parliament already rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter. In addition to all this, there are sure to be costs involved. Our country is already flailing financially. Apart from this being an unnecessary extra 'tax' which would doubtless be passed down to already struggling people, it would open the door for yet more looting of the public purse. Our people do not need more politicians and apparatchiks with their hands in our pockets.	Heath	English	business owner

Government is overreaching, they should instead focus on what they currently getting wrong and make sure they start getting things right, i.e. the basics, before they start looking at unnecessary, costly things the tax payers don't want. This all just looks like the government wanting to exert more control over the populace that they should be aiming to support and serve. People also don't take kindly to having their religions messed with, so if government is in charge of what they think is a good leader and the people disagree, angers will definitely flare up. How will they be able to enforce it also because in Christian faith, where 2 or more are gathered in my name, there I will be, implying that church is in every household where the family can conduct "church" and normally the father would be the leader. So how far does the rabbit hole go in terms of controlling religion. Will some religions be deemed unworthy and licenses not be awarded cause it doesn't fit the agenda of the government. Will there be favouritism. who will vet the people in these committees to ensure there is no bias. 2025-10-08 10:09:17	No I do not	Constitutionality	Petition Statement: Defending Freedom of Faith I, the undersigned, stand in firm opposition to the CRL Rights Commission's proposal to vet, license, or regulate religious organisations and leaders in South Africa. Such measures are a direct threat to our constitutional right to freedom of religion and the spiritual independence of faith communities. Faith is a matter of personal conviction, not state control. The Constitution guarantees every South African the right to believe, worship, and lead freely, without interference or restriction. Any attempt to place religion under state regulation undermines the very foundation of our democracy. I therefore call on Parliament and the CRL Rights Commission to: Reject all proposals seeking to license or regulate faith; and Protect the sacred right of every individual and community to live and practice their beliefs freely. 2025-10-08 10:11:37	No I do not	Other	This is my email that I sent the CRL & the Public Relations department: Dear Chairperson and Honourable Members, As a concerned citizen and the founder & CEO of KINGinme, a youth and business organization aimed at empowering the next generation of leaders and entrepreneurs through personal and performance coaching— I write to you regarding the recent formation of the Section 22 Committee and the ongoing discussions about vetting, regulating, and licensing pastors and religious leaders in South Africa. While I recognise and support the CRL's intention to protect communities from abuse and exploitation, I must respectfully express my firm conviction that state or quasi-state regulation of religion is both unnecessary and unconstitutional. 1. Religious Freedom Is a Constitutional Right Section 15 of the Constitution guarantees every person the freedom of religion, belief, and opinion, while Section 22 protects every citizen's right to choose their trade, occupation, or profession freely. To subject pastors and ministers to licensing, vetting, or state committees violates these fundamental rights and sets a dangerous precedent that could extend government control into the spiritual and moral lives of our citizens. 2. Equality Before the Law Must Be Maintained Religious practitioners are already subject to the same laws as every other citizen of this nation. When a person, pastor, or religious organisation commits fraud, abuse, or exploitation, existing criminal and civil laws provide a clear mechanism for investigation and prosecution. We therefore do not need new committees or additional regulatory frameworks. We simply need the equal enforcement of existing laws — without prejudice or discrimination based on religious vocation. 3. Accountability Without State Control KINGinME and many faith-based organisations across South Africa stand for integrity, accountability, and transparency. We fully support the prosecution of those who abuse their positions of trust.	William	English	self-employed

2025-10-08 10:12:00	No I do not	Constitutionality	Religious affiliation is the right of any individual and should not be delineated by Man. The leaders representing religious communities can be held accountable by communities and their conscience in their commitment to God/Allah, whichever their deity of choice is. The state can barely handle or regulate, and legislate existing population and economic issues effectively, let alone interfere in the religious activities of communities. Religiosity is a commitment to God/Allah and not to humans. The state should not be involved in such regulation/ practices. Instead, develop religious leaders sufficiently to align themselves with the need/s of their communities.	Kaashiefa		employed individual

2025-10-08 10:20:13	No I do not	Other	Limiting people’s right to practice their religion is a direct violation of basic human rights. Freedom of religion is protected under international human rights law — everyone has the right to believe, worship, and express their faith without interference. When a government starts placing restrictions on religion, it’s not just limiting faith; it’s controlling thought, conscience, and identity. No government should have the power to dictate what people believe. A truly free and democratic society respects diversity of belief and allows every person to live out their convictions peacefully. 2025-10-08 10:38:06	No I do not	Constitutionality	This attempt by a marxist orientated political party in government to curb the basic rights of the citizenry, is a continuous attempt to gain absolute control over the population. Once the rights are removed it is the end of democracy. What follows is an extract of a study done about the history of genocide in state controlled countries; “This is a report of the statistical results from a project on comparative genocide and mass-murder. Most probably near 170,000,000 people have been murdered in cold-blood by governments, well over three-quarters by absolutist regimes. The most such killing was done by the Soviet Union (near 62,000,000 people), the communist government of China is second (near 35,000,000), followed by Nazi Germany (almost 21,000,000), and Nationalist China (some 10,000,000). Lesser megamurderers include WWII Japan, Khmer Rouge Cambodia, WWI Turkey, communist Vietnam, post-WWII Poland, Pakistan, and communist Yugoslavia. The most intense democide was carried out by the Khmer Rouge in Cambodia, where they killed over 30 percent of their subjects in less than four years. The best predictor of this killing is regime power. The more arbitrary power a regime has, the less democratic it is, the more likely it will kill its subjects or foreigners. The conclusion is that power kills, absolute power kills absolutely.”	HP	English	retired

2025-10-08 10:42:00	No I do not	Constitutionality	The Constitution of the Republic of South Africa, 1996, explicitly guarantees freedom of religion, belief, and opinion under Section 15(1), which states: “Everyone has the right to freedom of conscience, religion, thought, belief and opinion.” Further, Section 31(1) affirms the right of persons belonging to religious communities to practise their religion collectively without interference, provided such practices are consistent with the Bill of Rights. Regulation of religion by the state risks infringing upon these constitutional protections by imposing limits on how individuals and communities choose to express or organise their faith. South Africa’s democratic order is founded on the principle of separation between church and state. The Constitution envisions a secular government that respects religious diversity and pluralism, not one that dictates or monitors religious practice. Oversight and accountability should be achieved through existing legal frameworks—such as laws addressing fraud, abuse, or human rights violations—rather than through new regulations targeting religion as a whole. In a country as culturally and spiritually diverse as ours, regulating religion could easily lead to discrimination, marginalisation, or the silencing of minority faiths, which would contradict the spirit of equality, human dignity, and freedom enshrined in the Bill of Rights. For these reasons, I believe that religious freedom must remain self-regulated within the bounds of the law, guided by ethical leadership and community accountability rather than state intervention. 2025-10-08 10:44:15	No I do not	Constitutionality	I strongly oppose any attempt by the government or the CRL Rights Commission to regulate religion in South Africa. The state has repeatedly failed to manage its own institutions effectively, yet now seeks control over faith communities under the guise of “protecting” citizens. South Africa already has laws that deal with all the concerns raised — such as the Criminal Law (for abuse or harm), the Companies Act and Nonprofit Organisations Act (for financial accountability), and the Constitution and Bill of Rights (for protecting freedom of belief, conscience, and association). The problem is not a lack of regulation, but the failure to enforce existing laws. Giving government power to regulate religion is dangerous and unconstitutional. The CRL should continue its proper role: investigating, advising, and referring cases to bodies like the SAPS, SARS, and NPO Directorate where the law is broken. Anything beyond that crosses into state control over faith, a step toward dictatorship and indoctrination, not democracy.	Hans		employed individual

			I oppose the CRL's push for state regulation of religion — but not because of religion itself, rather because: It gives too much power to a corrupt or biased government to decide which faiths or leaders are “legitimate.” It can be abused politically, favouring certain groups or punishing others. 		Constitutionality	Religion should not at all be regulated by Government or have any say over it. Legislation should stay as it is currently.	Stephan	English	employed individual
			I write as a citizen and as a believer, deeply troubled by the notion of state regulation of religion. Faith is not a concession we receive from government; it is a gift from God, and our relationship with Him must never be subject to human constraint. Fundamentally, I believe every person should be free to worship, praise, and openly recognise their beliefs without fear or restriction. As a Christian, I cannot and will not in good conscience stifle my relationship with the Lord or hide that He is the one that I serve, for He is the one who saved me. To force people to silence, modify, or hide worship is to suppress a fundamental part of believers. I'm not asking for special privileges as a Christian, but I do demand the protection of a right, the freedom of religion, which is already enshrined in the constitutional law. Once the state begins to regulate any part of religion, it runs the risk of coercion, favouritism, and suppression of truth. Believers might be afraid to speak publicly or assemble, and religions will suffer. The church should not cower; believers must remain bold, compassionate, and wise in engagement. I urge any lawmakers, government officials, and citizens to reject any proposals that restrict the free expression of faith. May the Lord grant wisdom, courage, and conviction to all who serve our nation, that we may uphold the rights that belong to every citizen. I trust that the Lord is sovereign. He calls us to be people of truth, courage, light, and love. I pray that His light would shine, that His freedom would defend, and that together we may preserve the sacred space in which each person may worship freely and without limitation.

			This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternal, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.

			The Constitution of the Republic of South Africa, 1996, explicitly guarantees freedom of religion, belief, and opinion under Section 15(1), which states: “Everyone has the right to freedom of conscience, religion, thought, belief and opinion.” Further, Section 31(1) affirms the right of persons belonging to religious communities to practise their religion collectively without interference, provided such practices are consistent with the Bill of Rights. Regulation of religion by the state risks infringing upon these constitutional protections by imposing limits on how individuals and communities choose to express or organise their faith. South Africa's democratic order is founded on the principle of separation between church and state. The Constitution envisions a secular government that respects religious diversity and pluralism, not one that dictates or monitors religious practice. Oversight and accountability should be achieved through existing legal frameworks—such as laws addressing fraud, abuse, or human rights violations—rather than through new regulations targeting religion as a whole. In a country as culturally and spiritually diverse as ours, regulating religion could easily lead to discrimination, marginalisation, or the silencing of minority faiths, which would contradict the spirit of equality, human dignity, and freedom enshrined in the Bill of Rights.

			I strongly object to the proposed CRL Rights Commission Amendment Bill. While protecting citizens from abuse is important, this Bill extends state power into areas of faith that should remain independent. History shows that when governments regulate religion, it leads to control, not freedom — a characteristic more aligned with communism than with democracy. 1. Religious Freedom and State Overreach The Bill gives the CRL Commission power to oversee and regulate churches. This violates Section 15 of the Constitution, which guarantees freedom of religion, belief, and opinion. Faith communities are accountable to God and their congregations, not to political bodies. The role of the state is to protect religious freedom — not to license or manage it. 2. Unequal Application Across Faiths The proposal appears focused mainly on Christian churches, while Islam, Hinduism, Sangomas, and Atheist groups seem unaffected. Selective regulation is unconstitutional under Section 9 (Equality Clause) and creates division among faiths. Any legitimate oversight should apply equally to all, or not at all. 3. Churches Already Have Internal Accountability Most churches already operate under constitutions, boards, audits, and established ethical codes. Existing laws against fraud and abuse are sufficient; adding political oversight only duplicates control and risks criminalising faith itself. 4. Call to Action Parliament should: Reject any clauses allowing state licensing of religious institutions. Apply consistent treatment to all belief systems. Reinforce existing legal frameworks without limiting faith. Closing

In a country that professes freedom of choice, the choice of spirituality can never be controlled and regulated in any way except if there is some type of proven criminal activity involved with a particular spiritual practice... 			In light of recent proposals by the CRL Rights Commission to regulate religious institutions under a Section 22 Committee, I feel compelled to speak plainly and without compromise. This is not merely a policy issue — it is a matter of conscience, sovereignty, and constitutional integrity. 1. Constitutional Protection South Africa's Bill of Rights (Section 15) guarantees freedom of religion, belief and opinion. Any attempt to regulate who may preach, what may be preached, or how religious institutions operate risks violating this foundational right. The Constitution does not make religious freedom conditional on state approval, licensing, or peer review. 2. Separation of Powers A healthy democracy requires separation between church and state. When the state begins to regulate religious leadership or doctrine, it blurs the line between governance and belief, opening the door to censorship, favoritism, and political abuse. 3. Precedent of Abuse In countries like Rwanda and Uganda, similar regulations led to mass closures of churches, arrests of pastors, and suppression of minority faiths. Once the state controls religion, it can silence dissent and manipulate spiritual authority for political ends. 4. Existing Legal Remedies Fraud, abuse, and exploitation are already criminal offenses under South African law. If a religious leader commits a crime, the justice system can act. Creating a new regulatory body for religion is redundant and dangerous, especially when it lacks clear boundaries. 5. Cultural and Social Impact South Africa is a deeply spiritual nation. Churches are not just places of worship — they are centers of community, healing, and hope, especially in underserved areas. Overregulation risks alienating millions, destabilizing communities, and eroding trust in government. God governs man, not the other way around. You can not take away the sovereignty of His church.

			I am writing to express my deep concern regarding the South African government's proposed changes to legislation that may infringe upon our constitutionally protected right to religious freedom. As a citizen of this country, I strongly believe that no government should have the authority to dictate, limit, or control what individuals believe, say, or practice in matters of faith. It is not possible for anyone to attempt to regulate religious expression without infringing religious freedom. This is even more impossible given the diversity of religion in South Africa. Furthermore, it is totally unnecessary. The examples usually cited of religious leaders abusing their power and positions are already crimes under the law of the land, so further regulation is not required and will not help in preventing abuses. 2025-10-08 11:19:02	Not fully	Other	Many religions are using the freedom of religion to create churches which strip the congregants of money and force their members to donate ever increasing amounts to the church in the hope that they will be 'saved'. Sadly the poorest and most vulnerable of our society are influenced by these so called and self proclaimed prophets, who drive Lamborghinis and live in luxury, These so called religions which amount to nothing more than cults should be kept under scrutiny. Likewise there is a rising torrent of Islamist extreme mosques all over the world funded by the Muslim Brotherhood and also Qatar and Iran. These are led by Imams who preach Jihad, death and violence to all non-believers, subjugation of women and Sharia law. These Mosques should also be strictly scrutinised and stopped in their tracks. Their religion or cult allows them to lie in order to achieve their goals. They come as across as sheep and as soon as their numbers become strong the wolf in sheep's clothing comes out - they take over countries and regions. This phenomenon can be seen all over in north Africa and the Arabian peninsular. It is currently active in many north African countries and has resulted in the burning of 1800 churches in Nigeria alone and the death of over 70 000 Christians.	Sharon	English	retired

2025-10-08 11:21:23	No I do not	Other	Freedom of religion is one of the fundamental rights in democratic societies. The right to freedom of religion guarantees the individual's liberty to practice, change, or abstain from any religious belief without being persecuted or discriminated against. The freedom of choice and the right to decide independently are fundamental aspects of human existence. It prevents the government from becoming authoritarian by restricting its interference in people's beliefs. In multicultural societies, the freedom of religion promotes respect and understanding between different religious communities, which leads to peaceful coexistence and social stability. The economic dimension of such a policy is that it will attract talented people from all over the world with different backgrounds and beliefs. South Africans should ensure the freedom of religion because it is one of our fundamental human rights, which is protected and guaranteed under our Constitution.	Henk	Afrikaans	unemployed individual

2025-10-08 11:25:41	No I do not	Constitutionality	South Africa has a constitution that protects freedom of religion. The proposal of the state to regulate religion, was fiercely opposed by South Africans, a few years ago. Why is the CRL pushing for state control of religion again? Does the CRL not have anything else to do but waste time and money with stupid proposals? A proposal that directly violates our constitution . South African's have previously opposed this unconstitutional idea that the state regulates religion and we do so again. The CRL should start respecting our constitution and the people of South Africa and abide by our constitution and the wishes of South Africans. The CRL must be brought to order!, they are acting unconstitutional and not doing what they have been mandated to do. The CRL was established to "strengthen our constitutional democracy and to "protect and promote the cultural, RELIGIOUS, and linguistic community rights" , not destroy it. The CRL is not protecting our religious rights and is directly going against what its constitutional mandate is.	Karen	English	self-employed

2025-10-08 11:30:13	No I do not	Constitutionality	I strongly object to the proposal to regulate and license religious organizations and leaders. Such regulation poses a direct threat to freedom of religion, which is a fundamental right protected by the Constitution of South Africa. Faith communities must retain their spiritual autonomy without interference or control by the state. Government involvement in the internal affairs of religious groups undermines this freedom, restricts individuals' right to practice their beliefs openly, and sets a dangerous precedent for state intrusion into matters of faith and conscience. 2025-10-08 11:40:25	No I do not	Constitutionality	The CRL Rights Commission wants to license and regulate religious leaders — but giving the state power over faith is a dangerous step. Our Constitution protects freedom of religion and the right of every community to govern its own spiritual affairs. Licensing clergy would hand bureaucrats the power to decide who can preach, teach, or lead — a direct threat to spiritual independence and equality among faiths. Accountability is essential, but we already have laws against fraud and abuse. What we don’t need is government control of religion. The CRL’s true constitutional duty is to promote and protect religious and cultural rights, not to license them. Real accountability must come from within faith communities themselves, through peer review, ethical leadership, and cooperation with law enforcement where needed — not through bureaucratic control. South Africans must remain vigilant to defend the principle that the state has no authority over faith, and that freedom of religion means worship without permission. The state has no authority over faith. Let’s keep it that way.	Andre	English	business owner

2025-10-08 11:41:21	No I do not	Other	As far as religion is concerned this is relationship between a subject and his maker. No government institution should impinge on that relationship. CRL wants to take us back to the dark ages where dissenters were persecuted because they are going against the popular narrative. They are assuming a right which they are not entitled to. Liberty of conscience is not granted to us by man but God. This liberty should not be compelled by any government or institution. It's bad enough that during the time of covid this freedom was swept into the mud. They should deal with criminality perpetuated in the name of religion instead.	Thabo	English	self-employed

2025-10-08 11:45:36	No I do not	Constitutionality	I believe freedom of religion is already encompassed in the Constitution. The definition of religious leaders are not clear in the sense of who would be subjected to the vetting. On top of the possibility of the previously mentioned opportunity for discrimination, this will also discriminate against smaller, independent churches or religious establishments. This will force tithes and offerings that were meant to support the church and the broader community to be funneled into the registration fees, paying for their own government supervision. Apart from the cost, opportunities for discrimination, impracticality to implement, and unconstitutional nature of the matter, it should be mentioned that this is not necessary. Our police Act and laws already cover extortion, manipulation, sexual assault etc. that does unfortunately occur when false prophets take the stage. The laws just need to be enforced, extravagant lifestyles should be audited, claims of violence, sexual assault etc. should be investigated and leaders should be charged to the fullest extent of the law in it's current form if found to be acting outside the law. Faith is not a profession thus cannot be classified as such! Religion is not a relationship with God either.	Mari	Afrikaans	employed individual

			Freedom of religion is a fundamental human right. Regulation could limit individuals’ constitutional right to believe, worship, or express faith freely. Governments that control religion risk violating personal liberty and conscience. Separation of church and state. A core democratic principle is that religion and government should remain independent. Once the state interferes, it can favour certain faiths over others, creating inequality and discrimination. Risk of political abuse. Political leaders could misuse religious regulation to silence or control groups that disagree with them, turning regulation into a tool of oppression. Suppression of diversity. Regulation might restrict minority religions or new spiritual movements, reducing cultural and religious diversity within society. Moral and spiritual matters are personal. Faith, belief, and worship are deeply personal experiences. Government institutions are not equipped to decide what is “true” or “acceptable” religion. Loss of trust and legitimacy. When the state intervenes in religion, it may create public resentment and reduce trust in both government and religious institutions.

			GOD is the ultimate authority and source of regulation. No man can, or should, deem himself, or themselves, the authority over the Word of GOD. Therefore, the government should submit themselves to Christ and the following and implementation of Jesus' teachings rather them attempts to regulate and control them. As stated in Hebrews 5:4, GOD alone appoints spiritual leaders and not man, and as such when the state assumes the right to “vet” or “license” a spiritual leader, it replaces God’s call with bureaucratic approval. This contradicts the pattern throughout Scripture — from prophets like Jeremiah (Jeremiah 1:5), to apostles like Paul (Galatians 1:1) — all were chosen by divine, not governmental, authority In Acts 4 and Acts 5, the apostles were commanded by authorities not to teach in the name of Jesus. Their response sets the eternal precedent: We must obey GOD and not man. To submit the ministry of the Gospel to a state commission would be to reverse this principle — allowing men to dictate whom God may use or how His Word may be preached. Martin Luther, a German priest and professor, stood shoulder to shoulder with Paul in proclaiming that the calling of the Gospel ministry is divine, not political. In Galatians, Paul defends his apostleship against men who would subject it to human councils. In the 16th century, Luther defended the same truth against the papacy and princes.

Further, the government has previously rejected a previous proposal by the CRL to implement a "peer review committee" to introduce state regulation of religion in SA. I do not believe that it is necessary, or even relevant in SA, to revisit this matter. My answer to state control/regulation of religion in SA is an emphatic, "No!" Most of all, they want to prescribe what to believe, what to say, and what not to say. Look what happens in China, where the state controls the church. 2025-10-08 12:22:56	No I do not	Other	This is a dangerous proposal! Here are five reasons the separation of church and state is essential for fostering a diverse, inclusive and harmonious society: • Preserves religious freedom. One of the primary reasons for the separation of church and state is to safeguard religious freedom for all citizens. Rick Warren contends, "A truly free society protects all faiths, and true faith protects a free society." • Prevents religious coercion. When church and state are entwined, there is a risk of religious coercion, where the government may impose religious beliefs or practices on its citizens. • Promotes respect and diversity. Separation of church and state fosters a society that embraces pluralism and diversity. By preventing the establishment of a state religion, it allows for the coexistence of different faith traditions, beliefs and practices. • Protects religious communities. Separation of church and state also safeguards the autonomy and integrity of religious organizations and spiritual communities. • Provides a path for rational decision-making. Government decisions should be based on reason, evidence and the common good of all citizens, not on the religious dogma of a specific group.	Estelle	English	employed individual

			Religion is a control tool. By contrast Secular Societies are less harmful: Secular systems separate religious authority from government. This means: Rules apply equally regardless of belief. Leaders can be held accountable without “divine” justification. Ethics are debated openly, not decreed. Secular ethics (e.g., humanism, rationalism) base morality on human welfare and reason, not on dogma. This often promotes: Consistency (no “exceptions” justified by faith) Inclusivity (rights apply to all, not only believers) Transparency (actions justified by reason, not faith) Scientific and Critical Thinking Culture: Secular education encourages questioning and evidence-based reasoning — tools that naturally challenge dishonesty, superstition, and exploitation. Lower Fear and Shame Culture: In many religious societies, moral behavior is policed by fear of divine punishment or social judgment.

Religion and religious observance (or not) is a totally personal choice, and no law or payment of any kind of license should be able to restrict this in any way. This is simply another form of theft - trying to get more and more money out of the South African public for the corrupt in our society to simply steal it.	Evelyn

2025-10-08 13:02:50	Not fully	Constitutionality	Unfortunately you cannot regulate people ignorance, and if people are conned by religious leaders (and this is unfortunately a fact), then it is their mistake. Instead people would be made aware that there is a risk with any investment (and contributions to churches are either seen as a risk, or an investment), and if people see pastors living a luxury life, then they should question this practice, and not run to the government to assist them. This is a community issue, as the community is hoodwinked by religious leaders, and the community must stand up for unethical practices, irrespective of the faith they are sworn to. 2025-10-08 13:09:00	No I do not	Other	REGULATING RELIGION IN SOUTH AFRICA: A PERSONAL PERSPECTIVE When we speak about regulating religion, especially Christianity, we must understand that we are entering sacred ground. This is not just about institutions or laws. It is about faith, about the unseen connection between human beings and the divine. I fully understand why this conversation has emerged. We have seen troubling things in our country. People eating grass, drinking petrol, or surrendering their dignity in the name of miracles. These acts are not expressions of true faith; they are signs of manipulation. They reveal how easily the vulnerable can be exploited when their desperation is met by the wrong kind of leadership. But before we rush to regulate, we must ask a deeper question: What exactly went wrong? The problem is not with Christianity itself, nor with people's hunger for God. The problem is with the distortion of faith and the commercialization of spirituality. Too many have turned the sacred into a stage, and the Word of God into a business model. THE ROLE OF THE STATE The state has a responsibility to protect its citizens from abuse. That includes protecting them from exploitation carried out in the name of religion. But protection is very different from control. When the government begins to define or limit belief, it crosses into dangerous territory. Faith cannot be regulated like commerce or trafffic. The state must regulate conduct, not conviction. It must deal firmly with fraud, manipulation, and human rights violations. But it must not interfere with what people believe or how they express their relationship with God. We must remember that the role of the state is to protect freedom, not to prescribe truth. History teaches us what happens when faith becomes an arm of the state. We saw it after Constantine, when the early, free-flowing church became institutionalized and politically entangled. Once that happened, truth began to serve power instead of power serving truth.	thomo	English	self-employed

When government assumes such powers, history shows it leads to abuse and persecution. One need only look at China, where Christian believers face daily restrictions and harassment, to understand the dangers of such overreach. Our Constitution is clear. Section 15 guarantees every person in South Africa freedom of religion, belief, and opinion. This is not a privilege granted by the State but a right that must be protected from interference by the State. Religious communities are essential to the moral fabric and spiritual well-being of our nation. They operate according to their own convictions and traditions under the Constitution's protection. 			Objection to the CRL Proposal to Regulate Religious Organisations and Leaders I strongly object to the proposal by the CRL Rights Commission to vet, license, and regulate religious organisations and leaders. My faith is not subject to regulation. Nobody can decide when, where, or to whom I may pray and worship I worship only the Creator of everything — God the Father, God the Son, and God the Holy Spirit. My faith has nothing to do with the State. Government has already removed God from our Parliament, schools, and workplaces — now it seeks to remove Him from the Church. South Africa’s Constitution guarantees every person: Freedom of conscience, religion, thought, belief and opinion (Section 15) Freedom of association (Section 18) Freedom of religious communities to govern themselves (Section 31) This proposal violates these rights, threatens freedom of worship, and undermines the separation between Church and State. Existing laws already protect citizens against abuse and fraud — religion does not need government licensing.

			South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.

2025-10-08 14:29:59	No I do not	Constitutionality	This openly violates the right to freedom of speech and religion. It gives full control of practice, execution and docitrine over to the state. This gives open way to a bias that leans towards the states agendas and views, and takes away the voice of the church as disagreeing with this legislation is said to be criminalized. Further more the CRL is only looking to vet christians meaning this is a targeted attack and a show of a prejudice against churches. The law is already set up to be able to deal with malpractice of religion. There does not need to be a vetting. There needs to be a better enforcement of the laws that are already in place to protect congregants and religious practitioners from being mislead.	Ethan	English	self-employed

2025-10-08 14:31:52	No I do not	Constitutionality	The government, political parties, the state, or any other entity should not be given authority or the right to regulate religious organizations or leaders. It is every person's right to live according to their chosen religious persuasion. This proposed regulation threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. This form of "regulation" often leads to religious persecution. Religious persecution is the systematic oppression of an individual or a group of individuals as a response to their religious beliefs or affiliations or their lack thereof. Religious persecution may be triggered by religious or antireligious stances. Or it may be triggered by the state when it views a particular religious group as a threat to its interests or "security". At a societal level, the dehumanization of a particular religious group may readily lead to acts of violence or other forms of persecution. Freedom of religion is not negotiable. 2025-10-08 14:40:46	No I do not	Constitutionality	It is important that the state does not exercise authority over religion because faith and conscience belong to the deepest personal freedoms of every human being. When the state controls or dictates religious life, it undermines both freedom of belief and the integrity of faith communities. A clear separation ensures that citizens can practice their religion—or choose not to—without fear of political interference or coercion. This protects diversity, prevents abuse of power, and safeguards both democracy and human dignity, allowing religion to contribute freely and authentically to the moral and social fabric of society. Also, all leaders of religion should at the very minimum be licensed to practice avoiding charlaton characters fleecing gullible people with outlandish promises of rewards as we so often hear. The requirements for the licensing should at least incude some level of formal education and a minimum level of certification related to that particular relegion / faith. 2025-10-08 14:55:13	No I do not	Constitutionality	Organised religions should be treated as any other commercial enterprise. They must be registered as companies to operate, keep a set of books and pay tax like any other company. Employees must pay tax. Just like companies are responsible for the goods and services that they provide, so should organised religions be held responsible. The consumer goods act should be applicable and consumers should be refunded for non-delivery of services. Fortunately for organised religion, no one has yet managed to return from the dead to claim a refund for payments made on promises of a non-existing after-life.	Trevor		

			I write to formally express my strong opposition to the proposed Bill advanced by the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission), which seeks to introduce mechanisms to vet, license, and regulate religious organisations and leaders. South Africa’s Constitution guarantees every individual the right to freedom of conscience, religion, thought, belief, and opinion (Section 15), as well as the freedom of association (Section 18) and the right of religious communities to govern themselves (Section 31). The proposed Bill directly threatens these fundamental rights by attempting to place religious faith, leadership, and governance under state oversight. Key concerns include: Faith is a divine calling, not a profession – Religious belief and leadership are spiritual matters and cannot be licensed, regulated, or validated by the state. CRL Rights Commission lacks constitutional authority – The Commission has no mandate to regulate doctrine, ordination, worship practices, or religious associations. Threat to religious freedom – State regulation creates the risk that religious leaders and communities become subject to political influence or control, undermining their spiritual autonomy. Existing voluntary accountability – South Africa’s religious communities already maintain self-governance through charters, codes of conduct, fraternals, and peer associations. These mechanisms provide accountability without state interference. Parliamentary precedent – Previous proposals by the CRL to establish a “Peer Review Committee” system for state regulation of religion were rejected by Parliament. There is no constitutional or legal justification to revisit this matter.			
2025-10-08 14:56:07	No I do not	Constitutionality	For these reasons, I urge that the Bill be withdrawn and that the government respect and uphold the constitutionally guaranteed autonomy and freedom of religious communities.	Mike	English	business owner

			To restrict freedom of religion and to dictate what to worship is a complete violation of our democracy. Like everything else that has been going around and trying to be implemented, this is another means of destroying our democracy and the peace and understanding that we have of each other in this country.			
			Religion is not something that can be imposed or forced on people, it is a spiritual, transcendent journey that each individual is called to follow and feels comfortable in. Even the atheist is in some way following his and her own type of religion. One needs to have a deep connection to their own god and that is why there are many religions in our country and that needs to be respected.			
			This new regulation seems to be specifically targeting Christians for their beliefs and values and for the fact that they are not easily manipulated by external, temporary factors. Jews also appear to be on the target list unashamedly, completely evident in how determined the South African government is to dehumanise them, all while ironically, dehumanising their own people by allowing crime and especially violent, unnecessary crime to spiral out of control. Maybe those trying to enforce this regulation should first seek and follow proper religion before enforcing the impossible and ridiculous on the rest of the South African population. However, everybody deserves to have their freedom of religion upheld and respected and no one should force any belief system or value system onto the next person.			
			As it is this country has enough issues and problems compromising our democracy and freedom. These issues are conveniently forgotten or neglected in hopes of disappearing, but instead of making things better, which avoidance never does, more issues that intentionally force people to rise up against each other are being conceived and encouraged. Religion should NOT be one of those problems and issues, but rather the solution to the many current problems.	T	English

2025-10-08 15:11:03	No I do not	Constitutionality	There is no way that anyone can decide how a person can practise their belief. It is a personal decision. In the Holy Bible the rules are written how a Christian have to live and behave . If anyone breaks the laws of the country they live in, they have to be punished according to the law that was broken. If we sin according to our Christian faith, we have to repent, change our sinful ways and follow Jesus. No person has the right to decide what can be preached, how a service has to be followed and what songs can be sung. According to our constitution we have the right to live our Faith according to God's Word	Anneline	English	retired

			This is a current constitutional right which I thoroughly agree with. I don't believe anyone has the right to tell another what they may or may not believe in or how they may practice their spiritual beliefs. No committee or peer review could be entirely unbiased and fair. As pointed out by DEAR SOUTH AFRICA this is unworkable, unaffordable and unnecessary to a degree. However there may be a need to protect some citizens from the unscrupulous ones that use religion as a power and domination tool over others and to extract finances in an unspiritual way. For this I wonder if there could be platforms offered to help those who have been abused and follow up through to the potential of closing down an institution if needed.

2025-10-08 15:23:33	No I do not	Constitutionality	The CRL Rights Commission is again pushing for mechanisms to vet, license and regulate religious organisations and leaders. This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. We call on Parliament and the CRL Rights Commission to protect our constitutional right to religious freedom and reject all attempts to license or regulate faith. This goes against our constitutional rights to practice freedom of religion. Also, you cannot limit God in this fashion. He will work His works among men and you cannot stop that and neither have you any durastiction to do so. There is no other Name by which humanity can be saved and receive eternal life and to silence speaking the truth about Jesus Christ in not only unconstitutional but it is a spiritual crime against humanity, forbidding them and hindering them from receiving eternal life through Jesus Christ is sentencing people to eternal damnation in hell. God wills that all men come to repentance and be saved and if you disallow the full, unadulterated truth of the gospel from being shared, you hinder people from entering the Kingdom of Heaven and are trying to sabotage the people that God sent His Son to save. The more you press down the church, the more resistance you will face and the more people you will be turning to Christ. 2025-10-08 15:26:46	No I do not	Other	Christians have only one Lord, Jesus Christ. He has given us the instruction, to "make disciples of all nations" (Mt.28:19f). If Government interferes with our worship, or our mandate to preach the Gospel to all creation (Mk.16:15-16), then we have a problem. Jesus clearly said, "Whoever obeys MY teachings will never see death." (Jn.8:51). I do understand that there are scammers in every stratum of society, and if crimes are committed in the name of religion, the law enforcement officials must investigate and prosecute these unscrupulous people to the full extent of the law. 			South Africa’s Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) The request by the CRL Rights Commission to vet, license and regulate organisations and leaders violates the constitution. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa’s diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL’s proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.

2025-10-08 15:28:41	No I do not	Constitutionality	We strongly oppose the CRL Rights Commission's renewed proposal to establish mechanisms for vetting, licensing, and regulating religious organisations and leaders. Such measures represent a direct threat to South Africa's constitutional guarantee of freedom of religion, belief, and association, as enshrined in Section 15 of the Constitution. Faith communities are spiritual bodies, not state institutions. Any attempt by government or a state organ to control, license, or regulate religious activity undermines the spiritual autonomy of these communities and violates the fundamental principle of separation between religion and state. We recognise the importance of accountability and ethical leadership within all sectors of society, including faith communities. However, these concerns can and should be addressed through existing laws that already prohibit fraud, abuse, and exploitation — not through restrictive measures that would hand the state power over religious life. We therefore call on Parliament and the CRL Rights Commission to uphold and protect our constitutional right to freedom of religion. We reject any proposal that seeks to impose state control or regulation over matters of faith, conscience, or worship.

			Acts 5 verse 29 - 32:			
			29 But Peter and the other apostles answered and said: “WE OUGHT TO OBEY GOD RATHER THAN MEN. 30 The God of our fathers raised up JESUS whom you murdered by hanging on a tree. 31 Him God has exalted to His right hand to be Prince and Savior, to give repentance to Israel and forgiveness of sins. 32 And we are His witnesses to these things, and so also is the Holy Spirit whom God has given to those who obey Him.”			
			My prediction is that our overtly satanic and pagan government would not bother using these regulations to silence or restrict Islam, Buddhism or Hinduism but their target will be the Christian faith. They would like to silence preachers quoting scripture such as 1 Corinthians 6 verse 8 to 11: 8 Instead, you yourselves cheat and do wrong, and you do this to your brothers and sisters. 9 Or do you not know that wrongdoers will not inherit the kingdom of God? Do not be deceived: Neither the sexually immoral nor idolaters nor adulterers nor men who have sex with men 10 nor thieves nor the greedy nor drunkards nor slanderers nor swindlers will inherit the kingdom of God. 11 And that is what some of you were. But you were washed, you were sanctified, you were justified in the name of the Lord Jesus Christ and by the Spirit of our God.			
			I think the greedy, slanderers and swindlers part is a very apt description of basically everybody serving in the anc....The fact that our government, who has so much blood on their hands, had the blind stupidity or ignorant audacity or greed, in taking money from Iran, to accuse Israel of genocide at the ICC , proves very much their intentions are satanic, despicable and evil. And this would also be the main contributor as to why our beautiful country is in the state that it is.

			Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations.

2025-10-08 15:56:03	No I do not	Constitutionality	We have a very diverse community of people in South Africa. Out constitution guarantees freedom of religion, free from state interference, and a separation of state and religion. This proposed legislation is state interference and undermines the separation of the state from religious freedom. Even if that was not enough, it is wasteful state expenditure to try to set up the structures that would be required to try to enforce this. In fact, this proposed legislation is already wasted state expenditure, given the time and effort wasted trying to put this place, as well as now having parliament sit and meet about this. The time and effort (or money) could have been much better spent on service improvement and ensuring municipalities meet their constitutional and social responsibilities to their constituents. Yes there are political parties that are aligned with religious ethics and practices. These bodies are self governed under their own guidance principles. All religious bodies are subject to South African law. Where individuals introduce practices that may or do cause harms to persons or property, such actions must be prosecuted under the existing laws. The free practice of religious beliefs is an individual choice and the State has no directive under the Constitution to impose any forms of controls. There a bigger agenda by secular society here and I'm not in agreement with it. Let's call it what it is. Today it's regulating messages spoken in churches, tomorrow it's messages completely rewritten/ controlled further more, ban on religious freedom. It's every person's responsibility to discern and filter through what is preached as truth and biblically correct. Bibles are freely available and those churches not preaching sound doctrine directly from the Bible will have their own judgement coming. 2025-10-08 16:39:34	No I do not	Constitutionality	I strongly oppose introducing mechanisms for vetting, licensing, or regulating religious organisations and leaders. It is a direct threat to freedom of religion, constitutional democracy, and the spiritual autonomy of faith communities. As a citizen, I value and rely on the guarantees in Section 15 of the Constitution, which protect my right to freedom of conscience, religion, thought, belief, and opinion. Section 31 safeguards the collective practice of these rights, while Section 9 ensures equality before the law. These protections are not abstract principles,they are the foundation to live and practise faith without interference.These proposals fundamentally undermine these rights. Faith communities draw legitimacy from their members, their sacred texts, and their traditions (not from government approval). I cannot accept the State assuming the authority to define the validity of a belief system or the credentials of a spiritual leader. These proposals, if implemented, would intrude on how a faith community governs itself, selects leaders, and worships. This intrusion echoes of the days of Apartheid, eroding independence and violating the principle of separation between religion and government essential to a free society. Allowing the State to decide which leaders or organisations are “legitimate” opens the door to suppression of faiths and discourages diversity. This would lead to discrimination in practice. Instead of building partnerships for social good, it will create mistrust between faith communities and government. Abuse or exploitation in any sector must be dealt with seriously. But existing law already address fraud, exploitation, and harm without requiring the State to control religious leadership.True religious freedom means the State protects all beliefs equally without controlling them. Our democracy is built on diversity, independence, and respect for conscience. I ask you to ensure it remains that way.	Shelley	English	employed individual

			I am completely against the regulation of religion. Violates Section 15: freedom of religion and conscience. Violates Section 18: freedom of association (including the right not to join a state-approved body). Violates Section 31: right of religious communities to self-govern. Forces religious leaders into state-controlled “Umbrella” structures.

2025-10-08 17:10:34	No I do not	Constitutionality	– Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. They will not and cannot improve the living conditions of the people of South Africa. They neither have the will nor the wisdom to restore South Africa remotely to what she was prior to 1994 or at least to what can be expected given the difficulties being encountered. So SA government in a vengeful manner wants to emulate communist Russia by dictating, repressing and hampering progress and singling out western culture and influence by controlling religion, in particular Christianity. The truth in the Holy Bible can never be swept under the dirty carpet. Russia tried and is a pariah in the world. The state murders those opposing draconian and inhuman laws. One cannot rule out that possible horror in SA. So regulation of religious affiliation is of the devil and will NEVER WORK IN SA. Tough luck. Forget it.	Mervyn Jay

2025-10-08 17:35:45	No I do not	Constitutionality	I do not support the CRL Rights Commission's proposal to regulate religion. Any system of licensing or vetting religious organisations and leaders would be unconstitutional and contrary to the fundamental right to freedom of religion, belief and association guaranteed under Section 15 and Section 18 of the South African Constitution. Faith communities are self-governing and spiritually autonomous. Introducing state regulation over religious practice undermines this autonomy and opens the door to government interference in matters of conscience, doctrine, and worship. While accountability for criminal or harmful acts is essential, this can and should continue to be addressed through existing legal frameworks, not through a state-controlled licensing system. I therefore urge Parliament to reject the CRL proposal in its current form and to reaffirm South Africa's commitment to protecting the religious freedom of all its citizens. 			I strongly oppose the CRL Rights Commission's renewed proposal to license or regulate religious organisations and leaders.			
			This proposal violates Sections 15, 18, and 31 of the Constitution, which guarantee freedom of religion, belief, association, and the self-governance of faith communities.			
			The CRL's constitutional and statutory mandate is to promote and protect religious rights — not to control or regulate them. Any attempt to license faith leaders is ultra vires and infringes on the separation between church and state.			
			Faith is a spiritual calling, not a state-sanctioned profession. Subjecting religious leadership to government vetting threatens the independence and diversity of South Africa's faith communities and risks unconstitutional interference in matters of conscience.			
			Religious bodies already uphold accountability through voluntary charters, councils, and fraternal without state intervention. Parliament has previously rejected similar CRL proposals, finding them unnecessary and unconstitutional.			
2025-10-08 18:26:34	No I do not	Constitutionality	I therefore urge Parliament and the CRL Rights Commission to withdraw this proposal and uphold the constitutional right to freedom of religion and self-regulation of faith communities.	Elzano	English	unemployed individual

			I fully support the CRL in their quest to regulate religion and protect the citizens from the dangers of ruthless and dishonest practitioners. While religious practise is protected by the constitution of SA, the same constitution enjoins government to protect vulnerable citizens from harm. The right to religious belief can be subject to limitations just like any right in our constitution, if in their exercise, human safety, dignity ect are endangered. There are countless examples where the particular church has caused harm to people. The innumerable cases of rape, assault, exploitation of kids, pastors urging their followers to eat grass, snakes, mice etc,other cases where congregants were given petrol to drink, or sprayed in their eyes with insecticides.. These are unforgivable sins that the church is guilty of, and this is because of the unscrupulous actors that takes advantage of the lack of regulation in this area to carry out their excesses and exploit the people. I am a Christian, and that's why my comment is largely focused on the undesirable conduct of some actors in this faith of mine. The government is not obliged to give special treatment to the Christian faith, and allowing these area to remain outside regulation would be a dereliction of duty by government. People who are not in favor of regulation are obviously the people who stand to benefit from the current chaos in the religious sphere. Established and law-abiding faith organizations and churches are going to welcome the regulation.	Keleco	English	unemployed individual

The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a "Peer Review Committee" system of state regulation of religion. 2025-10-08 19:25:27	Yes I do	Other	I am concerned that the CRL proposal will not do enough to curb the corruption of religion in society. Religious organisations should pay their share of taxes, as they hoard enormous wealth while pretending to be charitable organisations. They use their religion to influence politics, which disqualifies them as non-profits. Religious groups have been hiding behind religious exemptions for too long. There should be strictly enforced audits of religious organisations to ensure that they make sufficient donations to justify their tax status. There should be audits of the churches to ensure they are not used as political platforms. Religious leaders that spread hate speech against other races, genders, or religions should face criminal charges with additional sentences because they not only spread hatred, they influence others to also spread it. Religious indoctrination of children has been proven to result in lower IQs and lower average levels of education. Indoctrination of minors should be criminalised as the child abuse it is. Children must be allowed to grow up and play and learn without forcing beliefs on them that do measurable harm.	Christoph er	English	self-employed

2025-10-08 19:52:17	No I do not	Other	Government regulation or vetting of Christian freedom is totally unacceptable and unconstitutional because it violates the sacred right given by God to follow Christ freely and according to one's conscience. Our faith is not a matter of state control or political approval—it is a personal relationship with Jesus Christ, guided by the Holy Spirit and the Word of God. When earthly powers attempt to dictate or restrict Christian belief, they challenge God's authority and undermine the very essence of discipleship and truth. Christian freedom is vital because it allows believers to live out their faith openly, to worship, speak, and serve in obedience to Christ without fear or compromise. It nurtures spiritual integrity, strengthens the Church, and reflects God's design for human dignity and justice. Without such freedom, the light of the Gospel is dimmed by oppression and fear. True Christian liberty must therefore remain untouched by human governance. Christians will not stand idly in the face of such regulation or attacks on their religious freedoms. Attempts to control or suppress our faith are not only an offence to God but also a form of tyranny that the Church will resist, by standing firm on the truth of God's Word. Scripture affirms this truth: - Galatians 5:1 – “It is for freedom that Christ has set us free. Stand firm, then, and do not let yourselves be burdened again by a yoke of slavery.” - Acts 5:29 – “We must obey God rather than human beings.” 2 Corinthians 3:17 – “Now the Lord is the Spirit, and where the Spirit of the Lord is, there is freedom.”	Shane	English	business owner

Scripture also teaches that "The worker deserves his wages" (1 Timothy 5:18 NIV), affirming that those who preach and teach the Word are worthy of respect and support. Faith and the preaching of the Gospel must never be licensed, taxed, or regulated by the State. Preachers should be free to proclaim God's Word anywhere and at any time without interference or harassment by any government authority, for "We must obey God rather than human beings." 2025-10-08 21:04:31	No I do not	Constitutionality	As a Christian and a citizen of South Africa, I am deeply concerned by the CRL Rights Commission's renewed push to vet, license, and regulate religious organisations and leaders. Such measures undermine the constitutional right to freedom of religion and threaten the spiritual autonomy of faith communities. My faith is not subject to bureaucratic approval, and any attempt to impose state control over religious expression violates the very principles of democracy and personal liberty. I believe that religious communities must be free to govern their spiritual affairs without interference, and I strongly object to any initiative that compromises this sacred freedom. It is unreal to me that this country, which I have loved for my entire life, would try to limit my freedom of religion. This is not the South Africa I know. Please. Every single South African is under threat with this legislation. It makes no sense. If people are criminally misbehaving in religious organizations, then prosecute them according to existing law. But don't impose on the free will of South Africans to decide how and who they worship. This is an existential threat to the very nature and fabric of our country. 2025-10-08 21:53:17	No I do not	Other	I do not believe it is a good thing for the state to regulate religious matters, as a Christian I submit as far as my Christian beliefs are concerned, the only entity allowed to influence my relationship with my Lord and savior Jesus Christ and I believe every true Christian child of God in this country irrespective of race or gender is of the same view and that is The Holy Spirit alone can lead us /me into all truth, as this government allows all kinds of witchcraft and evil demonic possessed entities to dictate what any Christian child of God especially (His elect who are pastors, priests, evangelists and missionaries which are called by God and are subject to His authority alone) the government wants to enforce their will on Christians thereby making religious freedom in our constitution and thereby the constitution null and void. If this is allowed to continue then very soon they will throw the whole constitution out and then all our so called rights and freedoms will be meaningless. As a so-called Christian country we should repent before It's too late because the laws are ultimately going to be our total downfall.	George	Afrikaans	self-employed

2025-10-08 21:58:41	No I do not	Constitutionality	I believe it is not beneficial for the state to regulate religious matters. As a Christian, I hold that my relationship with my Lord and Savior, Jesus Christ, should not be influenced by any external entity. I believe that every true Christian, regardless of race or gender, shares this view. The Holy Spirit alone should guide us into all truth. I am concerned that the government is allowing all kinds of witchcraft and evil, demonic influences to dictate how Christians, especially those called by God—such as pastors, priests, evangelists, and missionaries—should practice their faith. The government seems intent on imposing its will on Christians, which undermines the religious freedom enshrined in our Constitution, rendering it essentially void. If this trend continues, we risk losing not only the Constitution but also all our rights and freedoms. As a nation that identifies as Christian, we should repent before it is too late, as the laws being enacted could lead to our total downfall.	André	English	retired

Everyone who regulates one of those rights destroys democracy. Republic of South Africa was founded 1994 as a democracy. To simply regulate it as a commom "thing", as just a business is not just wrong morally, but spiritually, and completely and utterly disrespectful of millions of people, but most of all our Lord. To add also; to not be able to practice one faith in the Lord is to deny a person's meaning of life. For we are created to worship the Lord the way He sees fit, in His Word. 2025-10-08 22:47:59	No I do not	Other	Christ is the head of the Church. When a government interferes in the Church it goes against the Word of God. They put themselves in His place in making any decision regarding the Church. It is another way of controlling the population to make us do as they say, not what God says. Christ paid the ultimate price to set us free, not only from sin, but also to free us from these worldly systems so that we may have a personal relationship with Him. No government has the right to interfere in that relationship or hinder it in any way. God states that in His Word. There is no higher authority than His Word. Living by the principles stated in His word, brings true joy, peace and life. The kind that this world can never give. I stand for CHRIST and HIS FREE Church.	Angelique	Afrikaans	employed individual

2025-10-09 01:44:25	No I do not	Constitutionality	This proposal undermines Section 15 of the Constitution of South Africa, which guarantees freedom of religion, belief, and opinion. Faith is a matter of personal conviction and community practice, not state control. Introducing government oversight into the running of churches and spiritual movements threatens the independence, authenticity, and diversity of faith communities. While I acknowledge the need for accountability where abuse or exploitation occurs, such cases should be handled through existing laws and legal systems, not through a regulatory framework that restricts spiritual autonomy. Religious freedom is a cornerstone of our democracy. Once we allow the state to decide who can preach, lead, or establish a faith community, we risk silencing spiritual voices and eroding the very freedoms many South Africans fought to protect. I therefore urge Parliament and the CRL Rights Commission to reject any attempt to regulate religion and instead promote open dialogue, education, and partnership with faith communities in ways that uphold, rather than threaten, constitutional rights. 			Saying this is "unconstitutional" or a threat to religious freedom is absurd. Those individuals are flouting the constitution by discriminating against people based on their sexuality, which is literally written into the Constitution under Section 9.			
			These people are under the mistaken belief that they are being victimised when in fact they are they ones doing the victimisation.

The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. It’s okay to express righteous anger when you believe something deeply wrong is happening. Jesus Himself flipped tables when He saw the temple being misused (Matthew 21:12–13), so standing up for truth is biblical. But also, as believers, we’re called to speak truth in love (Ephesians 4:15) and to be wise as serpents and harmless as doves (Matthew 10:16). 2025-10-09 06:23:36	No I do not	Constitutionality	The moment a state begins to dictate or control matters of faith, it crosses the line from governance into conscience. History has shown that state-regulated religion leads not to unity, but to oppression, division, and hypocrisy. True freedom of religion is not about favoring one belief system over another—it’s about protecting the right of every individual to worship, question, or abstain without fear or interference. Government’s role should be to safeguard freedom of belief, not define or restrict it. A society that allows its people to freely express their faith—or lack thereof—is one that truly respects human dignity and moral integrity.	Stephen		self-employed

2025-10-09 06:31:18	Not fully	Necessity	While I respect and strongly support the constitutional right to freedom of religion and the autonomy of faith communities, I believe it's important to recognise that some individuals have exploited religion for personal gain or to harm others. South Africa has seen instances where so-called prophets or spiritual leaders have engaged in harmful and manipulative practices — for example, using dangerous substances like Doom spray on congregants or exploiting people financially or psychologically, or forming cults for power and manipulation, or abusing religion to avoid tax regulations. These actions not only bring religion into disrepute but also endanger lives and undermine genuine faith communities. Rather than full state control or licensing of religion — which would infringe on constitutional freedoms — there may be value in developing a balanced oversight or accountability mechanism that focuses on preventing abuse, fraud, and harm. This could be done through collaboration between government bodies, established religious councils, and community leaders, ensuring protection of citizens without compromising freedom of belief or worship. 			The proposal to vet, license, or regulate religious organisations and leaders directly threatens the constitutional right to freedom of religion, belief, and association. In a democratic society, the state has no authority to determine the validity of a person’s faith, calling, or spiritual office. Such regulation would effectively allow government officials to decide who is a “legitimate” religious leader, which is a role that belongs exclusively to God. This kind of state oversight undermines spiritual autonomy, which is a cornerstone of religious freedom. Once the state begins to “approve” or “disapprove” religious leaders, it opens the door to censorship, political bias, and persecution of minority or unpopular faiths. The Constitution already provides legal mechanisms to address genuine abuses, such as fraud, exploitation, or harm through existing criminal and civil laws. There is therefore no need for special religious regulation that singles out faith groups. Any attempt to license or vet religious leader would be unconstitutional, unnecessary, and dangerous to South Africa’s pluralistic democracy.

			My concern is that government is overstepping its boundaries, and that this, if allowed, will give the government permission to impose on our freedoms in other areas too. 			I wish to register my serious concern and objection to the CRL Rights Commission’s proposals to regulate religion and religious institutions. 1. Violation of Constitutional Rights South Africa’s Constitution guarantees freedom of religion, belief, and opinion under Section 15. It also protects freedom of association (Section 18) and freedom of expression (Section 16). The proposed regulation by CRL amounts to state interference in spiritual matters, undermining the right of every citizen to worship God freely without government control. 2. Targeted Against Christian Churches While the proposals are framed as neutral, in practice they appear to single out Christian churches, especially independent or smaller congregations. Christian churches are the majority in South Africa, and therefore the main ones to be affected. This creates the perception of religious discrimination, which contradicts Section 9 of the Constitution (Equality Clause). 3. Existing Laws Already Cover Abuse South Africa already has sufficient laws to deal with financial mismanagement, fraud, abuse, or exploitation (e.g., Companies Act, NPO Act, Criminal Law). Creating a new layer of CRL control is duplicative and unnecessary. If individuals abuse their position in any faith community, they should be prosecuted under existing law—not through state regulation of doctrine or governance. 4. Threat to Church Autonomy Churches have, for centuries, governed themselves through their own constitutions, councils, and assemblies. To force them under state oversight erodes the principle of the separation of church and state, which is vital for democracy. 5. Slippery Slope Towards Religious Control Allowing the CRL to regulate churches sets a dangerous precedent where the state could later decide: Which teachings are acceptable, Who is qualified to preach, How finances must be spent, Or even which churches may exist. This undermines the very heart of religious liberty.

			One of my roles as Christian is to abide by the law set out by the government as long as it does not interfere with God's law first.			
			The government can do what it wants to, but I don't have to follow their laws if it overrides God's law, because it's unreasonable to begin with and unconstitutional. They can't tell me what to think or believe and putting regulations on who is allowed to preach is absurd.

2025-10-09 07:01:17	No I do not	Constitutionality	As a pastor of an independent local church this would directly impact me. I find that the proposal is an overreach of government authority into faith of individuals, an inalienable right enshrined in our constitution. We are already compliant with all relevant legislation regarding businesses, NPOs, PBOs and other laws. Adding more layers to legal requirements will further place an administrative burden on smaller churches like ours that detracts from the true work of what we are called and instructed to do. Furthermore, as has been stated numerous times, it is my belief that it is not more legislation or oversight that is required, but rather the effective implementation of existing legislation which will prove the most effective in combating crimes. This feels more like the CRLs attempt to maintain relevance and a justification for their existence, than truly caring for the people of South Africa - which is what the overwhelming majority of churches are currently doing! 			I strongly oppose any attempt by the South African government to take away our constitutional right to freedom of religion. This is a clear step toward a totalitarian state, where the government begins to control not only people's actions but also their thoughts. No government should ever have the right to control us or decide what we can believe. And especially not one that has repeatedly shown its inability to lead the country with honesty, stability, and wisdom.			
			Our rights belong to the people, not to the politicians. A government that cannot rule properly has no business interfering in our spiritual freedom. Once they start deciding who can worship and how, they begin deciding how people think — and that is a line that must never be crossed.

			Dictatorships have always tried to control the public through man made doctrine and legalism. As history has shown through the ages, all these dictatorships have failed! It is a guise to destroy religious freedom and faith in God, which has prevailed through time. The blindfold currently used, is public safety because of random acts of a few extremists,. Falsely portrayed by governments as threats to the entire society. When the true threat to society, is the man made doctrine and legalism of the goverment who defend the poor ethical and moral standards of the supposed "leaders". Although many false religions and traditions exist amongst mankind, those falling for these falsehoods, must pay for their foolishness. God will prevail for His believers, no matter what.

2025-10-09 07:21:38	No I do not	Constitutionality	To restrict freedom of religion and to dictate what to worship is a complete violation of our democracy. Like everything else that has been going around and trying to be implemented, this is another means of destroying our democracy and the peace and understanding that we have of each other in this country. Religion is not something that can be imposed or forced on people, it is a spiritual, transcendent journey that each individual is called to follow and feels comfortable in. Even the atheist is in some way following his and her own type of religion. One needs to have a deep connection to their own god and that is why there are many religions in our country and that needs to be respected. This new regulation seems to be specifically targeting Christians for their beliefs and values and for the fact that they are not easily manipulated by external, temporary factors. Jews also appear to be on the target list unashamedly, completely evident in how determined the South African government is to dehumanise them, all while ironically, dehumanising their own people by allowing crime and especially violent, unnecessary crime to spiral out of control. Maybe those trying to enforce this regulation should first seek and follow proper religion before enforcing the impossible and ridiculous on the rest of the South African population. However, everybody deserves to have their freedom of religion upheld and respected and no one should force any belief system or value system onto the next person. As it is this country has enough issues and problems compromising our democracy and freedom. These issues are conveniently forgotten or neglected in hopes of disappearing, but instead of making things better, which avoidance never does, more issues that intentionally force people to rise up against each other are being conceived and encouraged. Religion should NOT be one of those problems and issues, but rather the solution to the many current problems.	T	English

2025-10-09 07:43:19	No I do not	Other	The Church is NOT a state institute. We are a kingdom not of this world, a kingdom of priests and we receive our Mandate from the King of kings. Wanting to regulate the church is wanting to regulate God, the God and Father of Jesus Christ. Why is it only Christianity that's being targeted? This Government has proven that they specialise in incompetence, appointing people in positions for which they have little to none expertise. Now they want to regulate the church of which they have absolutely no knowledge... The mere fact that they suggested this, shows that they have no clue as to WHAT the Church is. This can only have one outcome... They'll try and make the Church what it is not, since they do not know what it really is. The Madlanga and Zondo Commission proves that government can't successfully regulate themselves, how do they want to regulate us? The Church isn't a one-size-fits-all institute either. How do one regulate a 40k denomination body? The only way you can do that without jeopardizing our constitutional right to religious freedom, is by allowing each denomination to be self-regulating. The state has no say concerning the validity of religious belief. The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. CRL risks religious leaders becoming subject to or tools of state control. South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. Parliament rejected the CRL's proposal for legislation to implement a "Peer Review Committee" system of state regulation of religion. There is no valid or legal reason to revisit this matter. 2025-10-09 08:23:20	No I do not	Other	If my understanding is correct, then the state is trying to protect people from false and wicked religious leaders. Protecting people is part of what the state should do, so I applaud it for trying to do so. People are entitled, according to our constitution, to practice their religion freely. If any person commits a crime, whether it be a religious leader or those following them, then such an individual should be prosecuted according to existing laws, regulations, and instruments that the state has at its disposal. The state does not need a new law or regulation to do its job. The problem is the state's approach in terms of what it is trying to do. If left unchecked, it will result in a COVID-19-style overreach of authority in a sphere of society where the state has no say and should not be involved in. I therefore reject the introduction of an overbearing, authoritarian law or regulation which is in clear violation of our Constitution.	Colin	English	employed individual

			As for me and my house we will serve the Lord ! Joshua 24:15 We belong to Jesus Christ. We were paid for by His Blood. And we follow Him and bow our knees only to Lord God. Creator of heaven and earth. We are part of His righteous government. We are not pleasers of men when we are saved by the blood and grace of Jesus. We only please God. By the preaching of the TRUE GOSPEL. JESUS CHRIST THE SAVIOUR OF THIS WORLD. Acts 17:28-30 NKJV [28] for in Him we live and move and have our being, as also some of your own poets have said, ‘For we are also His offspring.’ [29] Therefore, since we are the offspring of God, we ought not to think that the Divine Nature is like gold or silver or stone, something shaped by art and man's devising. [30] Truly, these times of ignorance God overlooked, but now commands all men everywhere to repent, https://bible.com/bible/114/act.17.28-30.NKJV Galatians 1:6-10 NKJV [6] I marvel that you are turning away so soon from Him who called you in the grace of Christ, to a different gospel, [7] which is not another; but there are some who trouble you and want to pervert the gospel of Christ. [8] But even if we, or an angel from heaven, preach any other gospel to you than what we have preached to you, let him be accursed. [9] As we have said before, so now I say again, if anyone preaches any other gospel to you than what you have received, let him be accursed. [10] For do I now persuade men, or God? Or do I seek to please men? For if I still pleased men, I would not be a bondservant of Christ. https://bible.com/bible/114/gal.1.6-10.NKJV Acts 17:31 NKJV [31] because He has appointed a day on which He will judge the world in righteousness by the Man whom He has ordained. He has given assurance of this to all by raising Him from the dead.”

2025-10-09 08:50:21	No I do not	Other	# Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. # The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. # State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. # It risks religious leaders becoming subject to or tools of state control. # South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. 2025-10-09 08:50:21	No I do not	Constitutionality	It is against our Constitution Violates Section 15: freedom of religion and conscience. Violates Section 18: freedom of association (including the right not to join a state-approved body). Violates Section 31: right of religious communities to self-govern. Who decides who qualifies as a “religious practitioner” or can register a religious organisation? Which doctrine will be “official”? Who sets the standard? How will licensing be enforced? What if you disagree with the Peer Review Committee? Government is already bloated and over taxing the few tax payers. What cost will this bring? Estimated cost to taxpayers: R750 million start-up + R250 million annually. CRL's current annual budget is one-fifth of what this scheme would require. Any issues needing prosecution will be handled by the Justice system. Freedom of religion means anyone can "preach" the Word of God..be it in bible studies, on podcasts, crusades, in the streets etc. There are thousands of Lay Preachers are not ordained but proclaim God's Word. This is the beginning of the persecution of Christians by a communist regime. 2025-10-09 08:51:22	No I do not	Constitutionality	We are not a herd to be managed. The duty of government is to address what truly affects people's quality of life — crime, corruption, unemployment, and the erosion of public services — not to regulate conscience or dictate spiritual expression. Faith, values, and personal belief systems are what keep people sane, grounded, and moral. They shape citizens who contribute positively to society. Interfering with that freedom weakens, rather than strengthens, the nation. We call on our leaders to respect the constitutional right to freedom of religion and focus their efforts on the real issues that build a just, safe, and prosperous society. 2025-10-09 08:51:42	No I do not	Other	State and church cannot meddle in each others affairs as history proved in many countries around the world and at home. The state has a very poor track record. Decay and destruction is everywhere. Chaos and order is defined by effort. The state's efforts is very poor. When one set aside the moral compass in society (the Word of God) and develop own truths, that's when society's wheels fall off as is clearly the case in SA. Stay far away from religion and more so Christianity if that is what you want to try control. Rather stop being corrupt and your criminal actions, repent and follow Christ. Perhaps then you might earn the right to lead by example.	Leon	English	business owner

2025-10-09 09:03:04	No I do not	Other	Regulating religion in any manner or form implies that standards will be set (by men) which religions will have to conform to. In effect, it means government (ordinary folk) taking upon itself the power to declare what is and what is not acceptable in a religion. In effect, they are creating their own religion, but carrying forward the name of the religion it is replacing. What makes them think they know better than God. This is government meddling at its worst. Any action in this regard on their part is illegitimate and non binding. Religion is a personal relationship between man and God.. No amount of "regulation" by man has any validity whatsoever (no one may interpose himself between man and God). To follow such dictates is in effect worshipping the one who made the new regulations. It is placing man above God. It is an act of apostasy. We are being forced to confront what had to be confronted a long time ago, does man have any right to be making laws in the first place. We already have Common Law and Roman law and Religious law. Everything else is abuse of power. It assumes the power to dictate to others how they may live their lives., usually done for political reasons No one has the right to do this. When we are asked to answer to God on the Day of Judgement, we cannot claim we acted in terms of the law. We have to act in terms of what God has given us. Mans laws are an abomination, a usurpation of the sole authority that is God's alone. Each one of us has free will to act as we see best. Government imposes a one size fits all edict on everyone. Government action robs us of our God given right to think for ourselves. It is long overdue for us to put government in its place and let it know once and for all who is boss. God is, not man.	nassim	English	self-employed

Regulations barring churches from contributing financially to any organisation other than a genuine charity providing standard education (normal curriculum), food welfare, accommodation for homeless persons, medical welfare (excluding so called productive health - which is a tool for illegal population control). Churches cannot be funding social engineering ideology or political agenda. Regulation is required for the payment of church funds to their own international church bodies. The value should be limited to the greater of a maximum value or say 5% of local receipts with a vetting of the use by such international body of the funding so received. Surplus funds which are not utilised by churches within a reasonable time (say 10 years) should be subject to taxation - churches should not be able to accumulate funds in excess of actual operating requirements. Regulation should require that religions may not promote any harmful activity in any way e.g. bodily harm (self-inflicted or otherwise), any sexual activity carried out in ritual, promotion of immorality (encouraging sexual promiscuity, drug use, crime, etc). There should be no regulation on who may or may not take up a leadership role within a religion. There should not at this stage be any interference by government in the nature of religious teachings other than those stated above. There should be no interference relating to right of admission or employment equity; and no forced cooperation with government policy in relation to social issues (LGBT, "reproductive health", etc). 2025-10-09 09:04:50	Not fully	Other	Regulations which drastically limit personal income to church leaders is required. Churches are being used as commercial enterprises for personal gain. No church leader should be receiving more than R700k per annum plus R200k per child/spouse dependent. Regulations barring churches from contributing financially to any organisation other than a genuine charity providing standard education (normal curriculum), food welfare, accommodation for homeless persons, medical welfare (excluding so called productive health - which is a tool for illegal population control). Churches cannot be funding social engineering ideology or political agenda. Regulation is required for the payment of church funds to their own international church bodies. The value should be limited to the greater of a maximum value or say 5% of local receipts with a vetting of the use by such international body of the funding so received. Surplus funds which are not utilised by churches within a reasonable time (say 10 years) should be subject to taxation - churches should not be able to accumulate funds in excess of actual operating requirements. Regulation should require that religions may not promote any harmful activity in any way e.g. bodily harm (self-inflicted or otherwise), any sexual activity carried out in ritual, promotion of immorality (encouraging sexual promiscuity, drug use, crime, etc). There should be no regulation on who may or may not take up a leadership role within a religion. There should not at this stage be any interference by government in the nature of religious teachings other than those stated above. There should be no interference relating to right of admission or employment equity; and no forced cooperation with government policy in relation to social issues (LGBT, "reproductive health", etc). A truly moral society governed by moral law would be able to engage in restricting false teaching but under the current secular governments this is not possible at this stage.	luke		
2025-10-09 09:05:12	Yes I do	Necessity	Section 22 of the Constitution gives anyone the right to freely choose their trade or profession or occupation, and clearly indicates that such choice shall be regulated. Religion causes harm to many people, and it is literally the job of government to protect citizens from harm.			
2025-10-09 09:05:16	No I do not	Constitutionality	The regulation of religion in all its forms (licensing of denominations, churches, and preachers) is LONG overdue. The sooner it is implemented, the quicker the harm caused by religion can be minimised.	Carin

2025-10-09 09:08:10	No I do not	Constitutionality	Regulating religion in any manner or form implies that standards will be set (by men) which religions will have to conform to. In effect, it means government (ordinary folk) taking upon itself the power to declare what is and what is not acceptable in a religion. In effect, they are creating their own religion, but carrying forward the name of the religion it is replacing. What makes them think they know better than God. This is government meddling at its worst. Any action in this regard on their part is illegitimate and non binding. Religion is a personal relationship between man and God.. No amount of "regulation" by man has any validity whatsoever (no one may interpose himself between man and God). To follow such dictates is in effect worshipping the one who made the new regulations. It is placing man above God. It is an act of apostasy. We are being forced to confront what had to be confronted a long time ago, does man have any right to be making laws in the first place. We already have Common Law and Roman law and Religious law. Everything else is abuse of power. It assumes the power to dictate to others how they may live their lives., usually done for political reasons No one has the right to do this. When we are asked to answer to God on the Day of Judgement, we cannot claim we acted in terms of the law. We have to act in terms of what God has given us. Mans laws are an abomination, a usurpation of the sole authority that is God's alone. Each one of us has free will to act as we see best. Government imposes a one size fits all edict on everyone. Government action robs us of our God given right to think for ourselves. It is long overdue for us to put government in its place and let it know once and for all who is boss. God is, not man. 2025-10-09 09:09:03	No I do not	Constitutionality	The church and state should remain separate. It is not the same entity. God can not be governed! 2025-10-09 09:09:19	No I do not	Other	This is definitely a constitutional issue as it will directly impact religious freedom. However, my main issue is a theological one. I am Lutheran and we subscribe to the two kingdoms doctrine, where the State (government) has no right to dictate to the religious "kingdom" and vice versa. The "religious kingdom " however exhorts its members to submit to the State in all matters as long as they do not contradict Gods commandments.
