2025-10-09 09:14:58	No I do not	Constitutionality	In this world we see so much pain and suffering. The commission of Christian beliefs is to walk alongside people that are hurting and to give them a hope of a better life through the kingdom purpose established through Christ Jesus and the power of the Holy Spirit for the Glory to God the Father (creator of everything). As creation we can't deny the knowledge and teaching of God's Holy Word through the Gospel of Christ Jesus. And now more than ever, we can just stand by and watch things worsen just because the state declares it so. Authority is given by God to man. Man doesn't establish authority. The sad part is, the National Athem of South Africa mentions God yet we trying to regulate who gets to hear about God. May God have mercy on this nation and revive the Love we have for God Almighty through Christ Jesus and the power of the Holy Spirit. Amen	Justin	English	business owner
2025-10-09 09:15:01	No I do not	Constitutionality	The CRL Rights Commission wants to regulate religious organizations and leaders through vetting, licensing, and other mechanisms. This proposal threatens: 1. Freedom of religion and spiritual autonomy of faith communities 2. Constitutional rights to freedom of conscience, association, and self-governance of religious communities Concerns include: 1. Faith being treated as a profession subject to state control 2. State overreach into religious doctrine and practices 3. Risk of religious leaders being controlled by the state 4. Existing voluntary accountability mechanisms within religious communities are sufficient The proposal was previously rejected by Parliament, and there is no valid reason to revisit it, as it poses an existential threat to religious freedom. No government and especially a government with socialist goals like ours can be trusted with the control of religious matters. It is ill equipped to do so and the risk is always there that governments can play god with the ability to control religion.	J M	Afrikaans	self-employed

2025-10-09 09:17:43	No I do not	Constitutionality	South Africa's democracy was built on freedom from state control of belief. Under apartheid, the state licensed churches and silenced dissent. Our Constitution broke from that, guaranteeing freedom of conscience, religion and association. The CRL Rights Commission's plan to vet and license religious organisations reverses those gains. Faith is not a profession the state can approve. The CRL's mandate is to protect rights, not regulate them. Existing civil and criminal laws already punish fraud and abuse; licensing belief adds bureaucracy, bias and control. Government cannot neutrally judge doctrine. Such power would privilege some faiths and endanger minority ones. If a licence can be revoked, leaders will self-censor rather than speak truth to power – the very courage that helped end apartheid. Accountability is vital, but it must remain voluntary within faith communities. Turning the CRL into a licensing bureau would betray the struggle's promise. South Africans fought to worship freely; we must not surrender that freedom again.	Anthony	English	employed individual

It is the 'Church' that leads these matters and 'guide' Leadership/Governments, not the other way around. 2025-10-09 09:17:51	No I do not	Other	The State is putting believers in an untenable situation where they will have to choose between the prescriptions of their faith or complying with state law, and if not complying with state law facing criminal sanction. That is unreasonable, undesirable, an infringement of freedom of belief and will lead to unrest and civil disobedience. Furthermore, it is clear that the problem is not a lack of legislation but rather a lack of enforcing existing laws to curb criminal activity in churches. In some African cultural contexts, accusations of witchcraft can tragically lead to violence or even death, with no regard for freedom of speech or human rights. These realities highlight the urgent need for religious institutions to be more strictly monitored. This has been done in other countries with disastrous effects. It goes against the very principles of freedom in our constitution and should be outright rejected. Freedom of religion is one of the central freedoms in our Bill of Rights. It is the first freedom of the human soul, the right to speak the words that God places in our mouths. 			While I do believe in the right to your own beliefs, I am confounded by the power of religion in South Africa - in terms of financial power (churches not taxed) but also land power - often continuing to hold onto land that should be released back to local residents (the Moravian church for example). The church also has so much power over what people think and continues to promote unconstitutional and hurtful ideas - about LGBTI folks, sex workers etc - and continues to culturally promote racism. I have also been concerned about how churches deny climate change. When an institution has so much say over people's thoughts, in a country with poor education (and less critical thinking skills, poor constitutional and human rights knowledge etc), I do feel like the state should be trying to regulate them and what they can or cannot preach - and a peer review system seems like a good way forward. I don't think I agree with everything proposed, but I do agree that we need to have hard conversations about what is happening in churches and the powers their wield. Churches should not be allowed to own land outside of the church grounds, they should be taxed (or their finances regulated somehow), they should be expected to promote integration, and they should be called out when their preaching is harmful to some of the changes we are supposed to be making in SA. We also need to ensure that those who have abused children or women should be banned from leadership in churches and if the state is unable to enforce this, then perhaps peer review mechanisms can.

			Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) All efforts by the CRL to negate the Constitutional rights are clearly ultra vires and a deliberate attack on the holders of the said rights. Clearly the CRL is acting outside its constitutional mandate and in the light of the Parliament already rejecting the CRL's previous attempts at the state regulation of religion, the CRI is acting mala fide, contra bones mores and ultra vires. The CRL has therefore gone rogue and should be brought to order and disbanded as an commission not acting in the best interest of the country's citizens. How is it tenable that a body of a few persons can sit around a table and decide on the religious affairs of 66 million people. 2025-10-09 10:12:46	No I do not	Other	I can understand that the Commission would like to protect vulnerable people from being exploited, because unfortunately there are people out there pretending to be "Spiritual Leaders" who's main goal is to persuade their members to donate money or to get them do stuff that's harmful to themselves and their families. It should, however, always be up to the individual to ensure that they belong to a community of like-minded people (i.e. churches, organizations etc. etc.) that's open about their goals, values and principles. My church for instance shares their financials with us, they are always transparent about the expenditure, and the goals remain the same, year after year. Therefore, I do not believe that Government should interfere but should rather "apply the law" to deal with individuals who operates unlawfully and causing harm to vulnerable citizens. I think Government should wake up to the reality that it's not a profession, but a calling. So, trying to "regulate" an individual's life decision (to serve) is definitely unconstitutional. 2025-10-09 10:29:32	Yes I do	Constitutionality	The government needs to monitor and track the false religious leaders and organisations out there, such as those that abuse their power to exploit members of their church, especially in poorer communities. There is a threat to freedom of religion by certain groups such as jehovahs witnesses, where members are not free to leave due to the consequences that come with leaving. Many stay with them due to fear of abandonment by their family. This needs to be looked at as a threat to freedom of religion for those who wish to leave.	Shirly	English	unemployed individual

2025-10-09 10:38:00	No I do not	Constitutionality	All the people of South Africa are constitutionally granted the freedom and right to subscribe to any faith or belief of their choice and to teach and learn, converse about and debate any thought and philosophy of life and faith. With the diversity of thought and understanding there is no way the State could regulate this without demanding the abolution of this freedom. If the intent is to prevent bad actors, fraudsters or dangerous actions or practices (like extremist islam or satanic sacrifice), I would point out that the State already has a legal system with specific criminal charges (fraud, incitement to violence, assault, or murder, for example) that could be brought to bear on these individuals and they can be held to account as in any case where a member of society violates the law and lives of others. The state should rather pay attention to enforcing these existing laws and rather encourage the various faith movements to regulate themselves to deligitimise false or wayward teachings in their communities and to report when they see the breaking of South african law. 			I do not agree with the government regulating religion. I believe this is just a way to control and sensor truth spoken to power. We need awakened church leaders that can call out the political and governmental powers to account. We need religious leaders that are going to be sensitive to our peoples plight in this country, of which our government is not. Take what happened in Marikana, the Church was and is supposed to be leading the marches to the governments door, demanding accountability. The church is made up of family units and the units make up a community. So in its rightful place , the church should be very active in what hurts the community. The late Bishop Desmond Tutu showed us an example of how church leaders should stand for communities wherein they operate. The Rt Reverend Allan boesak is another example, though he later excused himself for reasons well known. However his active stance back then was very exemplary.			
			If then the Church accounts and reports to government, how will we call them to account? We as the church though need to have hard conversations amongst ourselves. There has been a lot of rotten potatoes in our ranks for a long time now. People can not be fed snakes and made to drink petrol. We can not continue to allow and tolerate fake miracles in the place of worship. So we must be truthful and call out fake churches and pastors alike. Can we really live side by side with these churches that happen in tarverns? Can we really say we are of the same God with the churches that supported apartheid? Jn 8: 32 "And ye shall know the truth, and the truth shall make you free." The expositor says on this passage and i quote "Against this background of wholehearted commitment to Jesus' teachings , obedient Christians will "know the truth" and this very truth "will set them free. The truth of which Jesus speaks is not the truth of rational discourse, an intellectual attainment, but the truth of relationship.

			It will be good in the sense of these liberstiin theologies that should get scrutinided, with their extreme in cahoots to left or right. Though , I do not promote one religion over another. No specific one to act as a "gateway" force. Should have the care of all as principle, no islam christianity or another as the defining gatekeeping power.			
			I believe the action and fruit of a grouping should be the guiding principle. These groups that promote "donations" as an entry point should be scrutinised. A charity arm should be in force to promote assistance to own followers or destitute.			
			Political parties masquerading as religions should be illegal, banned.			
			No enforced revealing of membership for political putpises, as currently certain pilitical parties selfproclaimed as "church", and then primote or utter slogsns such as "till Jesus comes" - then either political or religious, not both.			
			Sects proclaim other as anathema , is intolerant and deviant action behaviour, while clandestinely supporting certain politicals. Not on at all. Though , scrutiny of deviant actions should be upheld.			
			Each should maintain own religious "schools" for own education if so chosen, and maintained thus.

			The current government has been greatly influenced by Marxist thinking as well as pressure from communist country like China, Russia, Iran etc. Our current government is not a democracy anymore. The open and blatant attack on Christianity by the CRL is evidence. Strangely Islam was not mentioned nor attacked, a religion that promotes violence, GBV, child marriages etc. But it is understandable, since this government are bed buddies With those who persecute Christians. My assumption is that the current government is aiming to do the same as CHina, sensing and eventually ending public executions like Iran. Strangely, the DA, VF plus, EFF etc, doesn't seem to support the plight of Christian when the head of the CRL made her public comments. No condemnation came from these political parties who claims to uphold democracy and the RSA Constitution.. Which tells me that they also support the ANC in targeting and persecuting Christians. The Church is a spiritual body, not a government institution, and must be led by the Holy Spirit, not state control. Misconduct in churches can already be dealt with under existing laws, so there is no need for new regulation. Allowing the CRL to govern faith matters risks political interference, limits spiritual diversity, and could silence the prophetic voice of the Church. They are often not qualified in the broad sense to lead communities and promote unethical and unsafe religious practices that are against some clauses of the Bill of Rights (and done in the name of religious freedom. Checks and balances are needed to protect the vulnerable and the poor from such persons. It is not about shutting down or 'regulating' religious practices and legitimate traditions. The CRL is not a position to approve or refuse religious practice unless it touches on civil liberties, the Bill of Rights protections or national legislation. What is ironical is the National Government always use religious leaders fr the SONA, for tradition and culture, for calamities and even for blessings Furthermore the National Government has commanded South African Police Service to institute a Spiritual Crime Prevention Group by calling upon Faith Based Organizations to reduce crime, gangsterism, drugs, murders, Gender Base Violence etc so if the CRL want to regulate religion, our current crises will become an international crises, making South Africa a dangerous and unsafe state Maybe the CRL should rethink to bring in the death penalty instead of trying to regulate religion as it might lead to another comission to be open, like Madlanga Commission	Samsoodien	English	retired

2025-10-09 11:21:09	No I do not	Constitutionality	There's no need for the Religious and Linguistic Communities (CRL Rights Commission) to push again for mechanisms to vet, license and regulate religious organisations and leaders. This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) And it should remain as such. – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state should have no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – The state should note that the South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. 2025-10-09 11:33:30	Not fully	Necessity	While I support freedom of religion, as with everything else, there should be some oversight, as not all "religions are made equal". Some exploit the poor and the most vulnerable. Some operate more as a cult than a religion, where the leader is venerated as being almost superhuman. In the wrong hands, religion can be/is exploited to make their leaders very wealthy. So yes, I believe there must be oversight. Many times, religious organizations believe they should be treated differently, have more privileges, and be exempt from certain laws. This of course, is wrong. Having said all that, I don't believe any new regulations or laws are required. There are sufficient existing laws. But as we all know, the laws are not enforced. And this is the main reason our beautiful country is so broken! Instead of wasting tax payer's money on new regulations, use existing laws and enforce them. It should not be about government's control over religion. But appropriate oversight so that religions do not exploit the most vulnerable and that they are not perceived to be above the law. 2025-10-09 11:55:39	No I do not	Constitutionality	The proposed regulation of religious practices is unconstitutional in several regards, ie. It removes freedom of religion and freedom of association enshrined in the Bill of Rights. It also does not meet the criteria for equal rights, as only Christians are being targeted. There are sufficient existing laws and institutions to deal with issues of criminality and abuse. If the Government can't adequately enforce these existing laws, how on earth would the enforce additional laws? Besides the proposed regulations are cumbersome, unworkable and hugely expensive. 2025-10-09 12:00:46	No I do not	Constitutionality	Comment on Religious Regulation and Constitutional Rights I respectfully submit my objection to any attempt by the CRL Commission to regulate religion in South Africa. Constitutional Grounds: The Constitution of South Africa guarantees every citizen the right to freedom of conscience, religion, thought, belief, and opinion (Section 15). Any attempt to regulate or interfere with religious practice risks violating these fundamental rights. Moreover, Section 9 ensures equality before the law and protection against unfair discrimination on the basis of religion. Regulation that imposes limits or standards on faith practices could also contravene Section 33, which protects citizens' rights to administrative justice and procedural fairness. Religion is a deeply personal matter, and the state should not dictate how individuals choose to worship or believe. Biblical Grounds (KJV References): From a Biblical perspective, faith is a matter of individual conscience, directed toward God rather than human authorities. The KJV teaches: “We ought to obey God rather than men” (Acts 5:29). “Where the Spirit of the Lord is, there is liberty” (2 Corinthians 3:17). “Who art thou that judgest another man’s servant? to his own master he standeth or falleth” (Romans 14:4). These verses affirm that religious belief and practice are governed by God, not the state, and that true worship must come freely from the heart. Any interference by a government body contradicts these principles and infringes on the liberty that both Scripture and our Constitution uphold. Conclusion: For these reasons, I respectfully urge the CRL Commission not to regulate religious beliefs or practices. Such regulation is inconsistent with the South African Constitution and contradicts the Biblical principle of freedom in matters of faith. Religious practice must remain voluntary, free, and protected from coercion.	Arnold	English	unemployed individual

2025-10-09 12:07:30	No I do not	Constitutionality	One cannot argue that the CRL proposal does not directly contradict several clearly stated cornerstones of our Constitution, such as freedom of association. This proposal is typical of the moral and ethical decay in our society at present. I suspect that once again this is merely another excuse to loot state coffers as well as chip away at the righteous fundamentals of our hard-won "free society". Criminal activity should be punished and prevented by our legal system and law-enforcement officials. As it is this is proving an insurmountable task for the current structures. Introducing more regulation is not going to change this. The taxpayer will again need to fund another hair-brained, diabolical scheme which will waste hundreds of millions of Rand to implement and which is seriously vulnerable to corruption. I say forget it, this proposal is garbage, it will accomplish nothing but unrest.	Gary	English	employed individual

Where do we draw the line? Next thing you know, they'll be telling us what to preach or teach. - Lack of Trust in Existing Laws: We already have laws in place to deal with abuse and exploitation. Why do we need new regulations that will only serve to stifle religious freedom? - Potential for Abuse of Power: Who will be the ones regulating these regulators? We can't trust that this won't be used as a tool to silence minority groups or dissenting voices. - Religion is Not a Business: Religion is not a business that can be regulated like one. It's a matter of faith, conscience, and personal freedom. - Chilling Effect on Religious Expression: This proposal will have a chilling effect on religious expression and will stifle the ability of religious leaders to speak truth to power. - Protecting the Rights of All: While we need to protect people from abuse, we must do so in a way that doesn't undermine our constitutional rights. Let's find a solution that balances protection with freedom. - Alternative Solutions: Instead of regulation, let's focus on promoting education, awareness, and community engagement to prevent abuse and exploitation. 2025-10-09 12:38:50	No I do not	Other	The state has no right to interfere with any religion. There appears to be an unfair focus on Christianity by the CRL Righrts Commission that undermines our God-given right to practice whatever religion in whatever way we wish. The reasons given for putting the government in charge of religion fail to convince anyone of the neccessity for this oversight and control. Existing legislation protects the rights of women and children as well as those who are subject to fraud and other crimes. The government's failure to apply the law and keep us safe from criminals does not require more laws, it requires the government to do its job. The fraud and corruption rampant in government does little to give us hope that this new body of proposed laws will not themselves be used to steal from the citizens of South Africa. History has proven that placing religion in the hands of politicians results in persecution and violence. Our government is led by a cadre of criminals who's clear aim is to enrich themselves at the expense of the ordinary citizen. This attempt to control us further should be repudiated and defended against with the full force we have, even un to death.	John	English	employed individual
2025-10-09 12:39:15	No I do not	Constitutionality	I do not support the idea of government regulating religion. 2025-10-09 12:46:11	No I do not	Constitutionality	Ideas, opinions and beliefs are not crimes. Propagation, explanation and teaching of ideas, opinions and beliefs are not crimes, unless such expressions also violate other rights by physical means, as explained below. Thoughts are not crimes. The expression of thoughts are not crimes, unless the expression of thoughts also violate other rights by physical means, as explained below. Of course, the creation of graffiti, loud protests, and obstruction of other peoples' movements go beyond verbal expression. Such actions are essentially physical, and the prohibition of such actions can well fall within the Law's function to protect peoples' rights -- always depending on circumstances. Examples: Defacing the property of another person bmo graffiti, shouting slogans in a concert hall during a performance, etc. The Law needs to operate within a sharp distinction between physical actions and ideas. Preaching that the gods desire the eating of grass is insane, but it should be legal. Forcing children to do what the preachers deems to be the will of the gods, is criminal. Conclusion: No institution of the state should have any power over what citizens believe. Institutions of the state may not intervene in the actions of citizens who do not physically violate the rights of anybody. The legal institutions of the state must intervene, in accordance with objective laws, in the actions of people who physically violate the rights of others. I do not support the institution of the proposed CRL or any similar institutions of the state.	Ben		
2025-10-09 12:46:24	No I do not	Constitutionality	First and foremost God ordained that state and the church should coexist but not mingle in each other's affairs. The state is there to protect all religions without imposing on the church any of its will. God gave each one of us free will to choose to worship Him according to the dictates of our conscience. How, when, why, what and which religion to follow is none of the government's business but between me/us and God. So the state should back off and not stick its nose where it's not required. We know what happened when the church sort government help to punish its dissenters. Papacy was formed and we know the result of that and we can't go back there. Thank you	Abegail X	English	retired

2025-10-09 12:47:44	No I do not	Constitutionality	South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.	Hanlie	English	employed individual

It appears that our government is currently on a mission to be "seen to be doing something" by proposing all kinds of random pieces of legislation, renaming things and trying to "fix" things that are working perfectly, rather than actually performing their core functions. They need to focus on crime, education, hospitals and the maintenance of infrastructure, all of which they are currently failing to manage effectively. 2025-10-09 13:12:31	No I do not	Other	Freedom of religion and association is the most deeply rooted basic human right. The pressure on Christians worldwide is escalating and the blind support by our government against Israel, instigated by local radical Islamic organizations that openly support terrorist organizations like Hamas, makes it clear that there is already a hidden agenda with this planned action. The question is, where does this idea really come from and everyone can see it comes from extremists or radicals for whom there must be no room or place allowed in our country. Government has absolutely no business whatsoever getting involved in issues clearly they know nothing about. Their tenor as government for over 30 years is a sterling example of why people that know nothing about governance of any kind should be in a position to govern. Ironically a tree will be judged by its fruit and this government has none. They plunder destroy and bankrupt everything they touch. I suggest strongly that the clever minister behind this hands back the bribe they took to even put this on the agenda. And then mind their own business.

2025-10-09 13:44:10	Not fully	Other	My only opinion on this is that where a group of people choose to subscribe to practises which cause harm to others or themselves unknowingly or even knowingly, should be regulated, in order to avoid harm of any kind. Consideration of others around you, whether outside or inside a venue, needs regulations in terms of volume allowed and time limits. For example, a church in a residential area should not be allowed to continue to conduct a noisy service or activity for an extended period, which disturbs surrounding residents' peace.		fiona	English	self-employed

2025-10-09 13:51:50	Not fully	Affordability	To a limited extent, I believe that churches and mosques could be subject to oversight, particularly where there are concerns that some institutions might be linked to extremist activity. However, I do not believe that formal regulation is the most effective or appropriate solution. I am therefore opposed to the CLR decision, as the administrative costs will amount to Billions per annum of which CLR only receive R50 million p/a therefore, the cost associated with implementing such regulation would likely be significant. This could result in increased taxes for the 9% of citizens who currently contribute to the tax base. Alternatively, if religious institutions are compelled to cover these costs, it may lead to the closure and reduced community services due to financial strain. From a moral and spiritual perspective, I believe that God alone has the authority to address wrongdoing, fraud, or abuse within the church. Human institutions cannot supersede divine justice — for God will not be mocked. Finally, I am concerned that the state regulation of religious institutions risks encroaching on freedom of religion and borders on communist-style control, which is incompatible with a democratic society. 			While oversight and transparency is important and necessary to identify abuse of power in any context, it should not require any explicit legislation or regulation. If the goal is to deal with issues, criminal activity and violations of human rights, then it can and should be prosecuted under existing law. Promoting / recommending new legislation or legal frameworks does not fall within the powers and functions of the commission. They may make recommendations or advise on proposed legislation that may impact religious rights, but may not propose legislation themselves.

2025-10-09 14:30:56	No I do not	Constitutionality	The constitution lays the foundation for all legislation - regulation has no place in law enforcement in any shape or form becuase there is already legislation in place to prosecute crimes that violate the rights of our citizens. Regulation is just a way to get around the law and oppress people by using 'colour of law', which makes regulation in and of itself a crime. Notice how every wicked thing government wants to unleash upon it's people is always rolled out in the form of regulation because regulation is the way to circumvent the legislative process in order to commit human rights offences. This needs to end and we need to hold true to our constitution which guarantees our right to freedome of religion and association. In conclusion - regulation is not the law it's the vehicle for racketeering and corruption, God's Law supercedes all man's laws, regulations and opinions. I will not comply!	Justin

It is part of the essence of democracy. The state has no right to regulate or exercise any control over that. 			The state (or any other governing body) should have no say in a person's faith or belief. Unless we're heading in the direction of communism where the state tells us what we can or cannot believe in. We should be free to worship or have our own religious associations that we prefer to have. The state (or any other governing body) has no say here. The state's job is to be the servant to the people and the country... not the controller. Religion should not be a tool of state or state (or any other governing body) control.

2025-10-09 14:50:12	No I do not	Constitutionality	The government has no right to police freedom of religion. Government is by all means trying to hide its corruption, theft, extortion etc. South Africa has always been a country build on freedom of speech and religion. With all due respect, government is supporting the wrong countries, Russia and Iran, Isis, Hamas, which are identified as terrorist and/or communist. Now the SA Government wants to bring the ideologies and rules of those terroristic and communistic countries into South Africa in order to remain in power.....it is unconstitutional and against the principles of democracy and freedom in South Africa. What does our current government know about all the religions.....every person in SA should be allowed to worship freely in this country. But as said, government knows religion is bringing the truth and is a treat to the fraud, theft, financial looting and corruption. Government should be ashamed that they are even considering to control religion. Are we now becoming a communist country?	Martin	Afrikaans	
2025-10-09 14:50:13	No I do not	Constitutionality	Do you support the CRL proposal to regulate religion? - No I do not What is your top concern? - Constitutionally Reason - These proposals directly violate the rights guaranteed by the South African Constitution, specifically Sections 15, 18, 30, and 31, which protect freedom of religion, belief, association, and assembly. Freedom of religion means that any person should be free to gather, worship, and establish a place of worship without State approval or interference. The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. For the State or the CRL to define who may preach, what is acceptable doctrine, or where people may meet would be an infringement of religious liberty.

			Statement Opposing the Regulation of Religious Organisations by the CRL Rights Commission			
			I do not agree with the proposal by the CRL Rights Commission to introduce mechanisms to vet, license, or regulate religious organisations and leaders. Such measures directly threaten the constitutional right to freedom of religion, which includes the spiritual independence and self-governance of all faith communities.			
			Faith, by its very nature, cannot and should not be subject to state control. Any attempt by a government body to decide who may lead, teach, or minister within a religious community undermines Section 15 of the South African Constitution, which guarantees freedom of religion, belief, and opinion. It also erodes the autonomy of the church and other faith-based organisations to govern their internal spiritual affairs without external interference.			
			The proposed regulatory framework risks opening the door to state overreach, discrimination, and suppression of minority faiths, violating both constitutional principles and the foundational values of democracy and pluralism.			
2025-10-09 15:14:59	No I do not	Other	We therefore call on Parliament and the CRL Rights Commission to uphold the constitutional protection of religious freedom and to reject any attempt to license or regulate religious organisations or their leaders. True accountability within faith communities must arise from within, through moral integrity, shared belief, and spiritual conviction—not through state-imposed control. 2025-10-09 15:17:03	No I do not	Constitutionality	South Africa stands at a troubling crossroads. The proposal by Thoko Mkhwanazi-Xaluva and the CRL Rights Commission to register and vet all religious ministers across the country might seem, on the surface, to be a well-intentioned plan to protect the public from exploitation and abuse. Yet beneath its language of accountability lies something far more concerning—a move that risks eroding the very freedom of faith that our democracy was built upon. I do not agree with this proposal, because while it claims to bring order, it opens the door to dangerous state intrusion into matters of conscience, conviction, and worship.	Grant	English	employed individual
			The reasoning behind this plan is familiar. There have been high-profile cases of religious exploitation—charlatans feeding congregants snakes or petrol, self-proclaimed prophets enriching themselves at the expense of the poor, and heartbreaking reports of sexual abuse under the guise of faith. These are serious problems that no responsible citizen, Christian or otherwise, can ignore. They bring shame to the name of religion and harm to those who seek God sincerely. But while the CRL Rights Commission is right to be alarmed by these abuses, the solution it proposes undermines a far greater good: the constitutional right to freedom of religion, belief, and association.			
2025-10-09 15:17:04	No I do not	Constitutionality	Religion is not a profession like medicine or law that the state can license or revoke. It is a matter of calling, conviction, and divine vocation. When a government begins to decide who may preach, teach, or lead worship, it crosses a line that history warns us never to cross again. The same state that today claims to “protect” the public could tomorrow use that same power to silence or control churches that speak truth to power. South Africa’s Constitution does not permit such interference, precisely because faith must be free to challenge, to comfort, and to confront.	Grant	English	employed individual

			Thank you for your message regarding the proposal from the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission) to introduce mechanisms for the vetting, licensing, and regulation of religious organisations and leaders. Having considered the matter carefully, I must respectfully express my opposition to the proposal. In terms of the Constitution of the Republic of South Africa, 1996: Section 15 guarantees everyone the right to freedom of conscience, religion, thought, belief and opinion. Section 18 provides for the right to freedom of association. Section 31 further protects the rights of cultural, religious and linguistic communities to enjoy their culture, practise their religion, and form voluntary associations. The proposed regulatory framework would constitute a material and unjustifiable limitation of these rights. Faith-based expression, leadership, and association are not matters that can be subjected to state licensing or control without infringing upon constitutionally enshrined freedoms. The regulation of religious doctrine, ordination, and internal governance exceeds the CRL Rights Commission's constitutional mandate and poses a significant risk of state encroachment into the spiritual autonomy of religious communities. Furthermore, Parliament has previously declined to adopt the CRL's proposal for a "Peer Review Committee" regulatory system, indicating a lack of legislative support for such measures. There is no lawful basis to resurrect a proposal that has already been deemed inconsistent with the constitutional framework. For these reasons, and in defence of the constitutional right to religious freedom, I do not support the CRL Rights Commission's proposal to regulate religion.

			Under no circumstances ever, does the ANC and it's Policies, Practices, Departments or Commissions, have ANY grounds, rights, authority or insight as to what a meaningful relationship with God is, know God, or be able to give any 'advice' or 'oversight' into anything with relation to God. Likewise, this extends to implementation of God's laws, practices and behaviour. These corrupt Politicians and their new proposed laws aren't there to protect the people, they are there to CONTROL the people. It is in NO-ONE's best interest other than the corrupt ANC's to have this in place, because once in place they will get more funding from Iran. This in turn will change the 'regulation' of Christianity, into the further criminalisation of Christianity as a whole and it's replacement with Islam.

			It is needed as globally and in SA there are way too many cases involving religion which have related to: 1. Child abuse 2. Fraud 3. Encouraging divisions/aggression between different religions 4. Tax evasion purposes Registration won't be a problem for any recognised and Constitutionally compliant religion, but unfortunately, citizens need protection from such abuses claimed to be from a God. There are also needs to be better accountability. This is not only about one's "own" religion, but also all the various sects, alternatives,etc of which there are many.

2025-10-09 15:27:52	No I do not	Constitutionality	What is government's agenda behind the control of Religion. Government has already removed Religion in schools and unleashed disrespectful & unchristian behaviour. There is no law above the Law in the Bible. This is another form of control and thievery from government to create portfolios, receive salaries and steal from the very people that are supporting and uplifting the down and out in our communities. No government should have any control over our faith with any regulating or licensing factors as that overrides our constitutional right to religious freedom. With this control from government, what will our constitutional rights to religious freedom be???? Soon we are going to be governed the same as the communist countries. Be dictated to that we may not worship, read our bibles, pray, or even meet together for fellowship. That is not freedom.	Loredana	English	employed individual

2025-10-09 15:30:21	No I do not	Constitutionality	That we live in a Constitutional Democracy is sufficient for the "powers to be" to enact those laws that are stipulated for offences far and wide. It is sheer incomprehensible that the standing LAW needs any beefing up, in particular when it comes to such a matter as faith/religion. You cannot regulate what each and every person on this great planet of earth has innately received and sets his or her life by, namely, a conscience of being. So, what the authors of our country's Constitution has added to that, not only gives credence to the "unwritten" law "on our hearts" (right and/ wrong) but now a new body wants to bedevil (pun intended) the system further in its expansion of Authorised Religion! Down with CRL, Down!! Phansi CRL, Phansi!!!	Arnold		retired
2025-10-09 15:30:23	No I do not	Other	This is an affront to the free practice of religion. There already exist in the criminal justice system mechanisms to deal with criminality in whatever sphere it manifests itself. Moreover, there are organisations or bodies with which some have voluntarily associated themselves as a form of regulation. What CRL seeks to do is to strip the spiritual and divine element of belief to the mechanics of unnecessary regulation, which will have a chilling effect on the large body of believers. What CRL is proposing is not protection but erosion. This is nothing but a gateway to further erosion in the future, and we cannot allow that to happen. In spiritual terms, this is a force of evil, whether consciously or unconsciously, aimed at destroying the profound and personal foundation of faith. A divine calling is not preceded by an earthly qualification.	Monde		employed individual

2025-10-09 15:32:08	No I do not	Constitutionality	These proposals directly violate the rights guaranteed by the South African Constitution, specifically Sections 15, 18, 30, and 31, which protect freedom of religion, belief, association, and assembly. Freedom of religion means that any person should be free to gather, worship, and establish a place of worship without State approval or interference. The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. For the State or the CRL to define who may preach, what is acceptable doctrine, or where people may meet would be an infringement of religious liberty.	Riaan

There is no place for the state in regulating religious bodies since there is no easy way to do that. Next you will need a license to be a religious leader and that will require more paperwork. Violates Section 18: freedom of association (including the right not to join a state-approved body). Violates Section 31: right of religious communities to self-govern. Forces religious leaders into state-controlled "Umbrella" structures. As FORSA has outlined, there are far more appropriate ways of addressing the problems motivating CRL to use the authority and instrumentation of the state. The loss of religious freedom is too great a sacrifice to justify the measures CRL is proposing.	Stuart	English	Non-profit

			Whenever a government wants to gain more control, it will always offer a reason for doing so, and that reason will always be around the benefits to be gained. The true reason for proposing any such control is never ever actually disclosed. Politics is about power, control and money, so any politician will seek power, control and money. Another factor is that the government will seek to legislate where it is either too lazy to control using already available mechanisms, or where it has proved itself ineffective in exercising control. It is true that we have both churches and preachers, or "pastors," or "prophets," or whatever other meaningless title they choose, who have broken the law. So this is now apparently being used as an excuse or justification to control these churches, and these preachers, where there are, in fact, already control mechanisms in place. If a preacher or church are stealing, then charge them with theft. If they are abusing church attendees, then charge them with abuse under whatever legislation is appropriate to their delinquency. If the existing mechanisms are inadequate in any way, then address the shortcomings in the already existing mechanisms. Apart from the fact that these proposals are blatantly in conflict with the constitution, I doubt very much if any such legislation would actually stand up in the Constitutional Court. This is openly and clearly an attempt to use the delinquency of the relatively few to justify control over the many. The delinquents do not represent the many who are actually not involved in any delinquency, and who are openly speaking out against it. This move is totally reminiscent of communist Russia, and today's communist China, and so on. It is clearly a blatant attempt at control over freedom of speech generally, freedom of religious expression and worship, and freedom to have one's own views.

			I do not agree with the proposal to regulate and license religious organisations and leaders. Faith is a deeply personal and spiritual calling that comes from God, not from man, and should never be controlled or validated by the state. South Africa's Constitution protects freedom of religion, association, and belief — and this proposal undermines those very rights.			
			Allowing the government to decide who may preach, lead, or minister opens the door to interference, censorship, and even persecution. Religious communities are already capable of self-regulation through their own internal structures and accountability systems.

2025-10-09 16:06:45	Not fully	Other	I agree that the state should never have power to influence what religions people chose to associate or practice. The Constitution provides for freedom of religion and religious expression. However, when any religious doctrine calls for or practices persecution of people who chose not to associate with a particular religion, then the state must have the power to prevent such persecution. Same goes for religious practitioners that call for death or destruction of people, objects, norms, standards or social/cultural practices/behaviour not aligned with any religion, then again the state should have the power to take steps to prevent such religious practice of bigotry/hate/terrorism against non-believers or persons of other beliefs. No religion should have the right to enforce its doctrine/views/norms/standards on others outside a religious practice. SA follows a secular mode of statehood and therefore no religion should enforce its doctrine/practice/policy in a political fashion; i.e. attempting to instal Islamic Sharia Law in place of secular state legislation. 2025-10-09 16:21:03	Not fully	Other	I think denominations that have structures that keep religious leaders accountable should not be regulated, as they are regulated by boards, as is the Dutch Reformed church that I am employed by. My problem are those prosperity pastors, prophets, or whatever they call themselves, scamming people out of their money, emotionally manipulating their church-members into tithing large sums of money into their personal bank accounts, making them eat rats, spraying them with Doom, making them eat grass and so forth. These people clearly do not have a calling – they are nothing but scamsters - they MUST be regulated. Doctors, engineers, architects, lawyers, accountants, builders and many more do have boards that can suspend or stop their members from practicing if they behave unethically, abuse their positions etc. I studied 7 years to become a minister of religion, how can anybody just pitch a large tent, call themselves pastors, prophets, priests or whatever, and just start ministering – they do more harm than good and goodhearted, gullible people should be protected against these scammers abusing theology for their own enrichment and abuse of power. It really gives the church a bad name. Just a few weeks ago Danie Botha predicted the second coming of Christ – this so-called pastor!	Tjaart	Afrikaans	employed individual
2025-10-09 16:22:08	No I do not	Constitutionality	Faith is a deeply personal and voluntary matter of conscience. I acknowledge that the government's intention may be to maintain order and protect citizens from harmful practices. However, I strongly oppose the proposed regulation of religion as it poses a serious threat to freedom of belief, expression and conscious. The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. 2025-10-09 16:44:37	No I do not	Constitutionality	Religious freedom is a fundamental human right enshrined in our constitution. It includes the right to freely practice, teach, and propagate one's faith without interference from the state. Vetting or licensing religious leaders could be seen as a form of prior restraint, limiting the freedom to worship and teach according beliefs. There is a constitutional principle of separation between religious institutions and the government. Requiring religious organizations or leaders to be licensed or vetted by the state blurs this boundary, giving the state undue influence over religious matters . Government regulation could open the door to bias or discrimination against religious groups. If the state controls who is considered a "legitimate" religious leader, it may favour certain religions over others. History shows that when governments interfere in religious affairs, it often leads to abuse, repression, and persecution. Safeguarding against such overreach requires maintaining a clear line between state authority and religious autonomy. Criminal and civil laws already provide mechanisms to deal with harm or abuse, regardless of the perpetrator's religious status. Fraud, abuse, incitement to violence, or exploitation can and should be addressed under existing legal statutes without the need for special regulatory frameworks targeting religious leaders specifically. While concerns about abuse, exploitation, or harmful practices within some religious groups are valid, the solution should not be a sweeping system of state vetting or licensing. Such measures risk infringing on fundamental rights and compromising democratic values. A better approach is to uphold and apply neutral, religion-blind laws that protect public safety and human dignity while preserving the essential freedom of religion. 2025-10-09 16:48:19	No I do not	Constitutionality	I strongly oppose any move by the CRL Rights Commission or the government to license or regulate religious organisations and leaders. Faith and spirituality are deeply personal matters that fall outside the authority of the state. Allowing government interference in spiritual or religious life threatens the constitutional right to freedom of religion, belief, and association. Each faith community must remain free to govern its own practices, teachings, and leadership according to its own convictions, without political influence or bureaucratic control. Regulation of religion sets a dangerous precedent that undermines South Africa's democratic values and opens the door to discrimination and suppression of diverse beliefs. The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. What the Bible says about church and state: There should be no state-established and state-run church, for this would violate the church-state division of labor. Christ gives to the church alone the power to discipline, to bind and loose in spiritual matters (Matt. 18:15–20). 2025-10-09 17:06:50	No I do not	Constitutionality	The law in South Africa is sufficient to prosecute those who commit crimes in the name of religious freedom. The constitution protects religious freedom and the right to association with those of similar conviction. Those appointed to regulate may very well regulate from a subective view of religious belief and association and ,should that belief be agnostic or atheistic , Christian freedoms and deeply held beliefs will be regulated by those wanting to eliminate, rather than regulate. China being a good example of this regulation of religion.	Kim	English	employed individual
			I strongly oppose any attempt by the CRL Rights Commission or the government to regulate, license, or vet religious organisations and leaders. Such mechanisms would constitute an unjustifiable violation of South Africa's constitutional right to freedom of religion and belief. The government has no rightful authority to regulate how religion is practised or how faith communities are organised. Religious life, by its nature, must remain independent of state control. History shows that when governments involve themselves in religious matters, it often leads to corruption, suppression of belief, and abuse of power. For example, in China, government regulation of Christianity has extended to altering religious texts to align with state ideology. This demonstrates the very real danger of political interference in matters of faith. While the government may have legitimate concerns about harmful practices within certain religious groups, these concerns are already addressed by existing laws that prohibit fraud, abuse, and other criminal acts. There is no justification for granting the state broader powers to regulate religion as a whole or to interfere in matters of doctrine. The best way to counter harmful or exploitative teachings—such as the so-called “prosperity gospel,” where people are misled into giving money to enrich preachers—is not through government regulation but through truth, education, and the example of integrity within the faith community itself. It is the role of good and faithful churches to challenge false teachings, and ultimately it is God who will hold leaders accountable for their actions, not the state. These proposed measures represent government overreach and risk setting a dangerous precedent where spiritual autonomy is replaced by bureaucratic control. Freedom of religion is not only a constitutional right but a cornerstone of a free and democratic society. I therefore call on Parliament and the CRL Rights Commission to uphold this freedom	Connor	English	student

2025-10-09 17:07:55	No I do not	Constitutionality	South Africa's Constitution protects its citizens from the state having any say concerning the validity of religious belief.			
			The Government has nothing to do with an Individual's religious choices. The Government has 2 God given directives, which at this point they are completely neglecting in the first place, namely 1. To uphold righteousness and Justice. 2. To punish evildoers. as per Romans Chapter 13 Both these duties are directly given by the God of the Bible for Government to uphold. Yet the Government does exactly the opposite. They steal land and commit theft, Breaking the 8th Commandment = "You shall not steal", while calling it "Expropriation without Compensation". The Lord Jesus Christ calls it THEFT, and thieves will not inherit the Kingdom of God. Also, Based on a nonsense argument of Past racism from 31 years ago, they punish farmers and tax payers who keeps the country fed and the economy going. And farmers get brutally murdered and their wives raped and their children brutalized, but the Government and the Media pretends that nothing happened. Secondly, the police does next to nothing when real crime happens and they easily take bribes and pervert justice. The Government also provides almost no reliable services while charging ridiculous fees for incompetent and negligent service, While blaming apartheid from 31 years ago for what they currently have the ability to fix. On top of that the Government wants to regulate religion and yet again over reach their already self ordained communist dictatorship for which less than 50% of the Country Voted. The Government has no right or authority to make such decisions on behalf of people's freedom of religion. The Government exists to SERVE the people of it's Country and to uphold righteousness and Justice and to punish murderers, thieves, rapists, extortioners, and the like. Not to take away freedom of speech, religion or opportunity-based-on-merit of those qualified to add value to the Economy in a lawful way. God Commands all people everywhere to Repent. 			It seems to be necessary to have some regulation to stop every Dick, Tom and Harry from starting a new "church". Too many people use religion to influence emotionally weak people to pay lots of money for false promises and get financially and mentally abused. I had the displeasure of living next to a "pastor" and trained with another fake at the gym. Across the road from my apartment, an African religious group have regular gatherings. Nobody seems to have a regular job, but they always have lots of money, judging from the way they dress, the cars they drive and the food deliveries they get. It is run like a business, but I doubt if they declare income and pay tax. With regulation, this could be monitored and perhaps stop the exploitation of unsuspected "followers". 2025-10-09 17:15:32	No I do not	Constitutionality	ChatGPT You said: My God is not one that will be tried to be controlled by man and his ideas. No government should try and control our religion, it is my human right to follow a religion how I see fit. ChatGPT said: That's a powerful statement — it expresses deep conviction about personal faith and freedom. You're absolutely right that freedom of religion is a fundamental human right, protected by international law (like Article 18 of the Universal Declaration of Human Rights). Would you like me to help you expand this thought — for example, turning it into a short speech, social media post, or statement of belief? You said: Statement of belief ChatGPT said: Here's a polished version of your statement of belief — clear, strong, and respectful: Statement of Belief My faith is not something that can be shaped or controlled by man, government, or society's ideas. My God stands above human authority and cannot be confined by political systems or worldly powers. I believe that every individual has the sacred and undeniable right to worship freely, to seek truth in their own way, and to live out their faith without interference. Religious freedom is not granted by any government — it is an inherent human right. No law or institution should ever dictate how one connects with the divine. My relationship with God is personal, sovereign, and guided by conscience, not by control. Would you like it to sound more spiritual, more assertive/political, or more poetic and inspiring? I can tailor it to your preferred tone. You said: Political ChatGPT said: Here's a more politically charged version of your statement of belief — firm, principled, and rooted in the defense of freedom and human rights: Statement of Belief	Sarah	Afrikaans	employed individual

2025-10-09 17:45:50	Not fully	Other	The focus should be on disqualification criteria and not qualification criteria. There should be statements outlining what would disqualify a spiritual leader such as extortion of money, conducting immoral acts universally defined by Council of Churches in South Africa. It can not be that pastors are allowed to mislead people and let them drink toxins such as petrol or eat grass or bless them by sleeping with them promising them luck to get married being a moral act befitting of spirituality universally acceptable. Also, satanism that endangers people and property can not be condoned as spiritual practice. Some form of regulation is necessary to protect the gullible members of our society. 2025-10-09 17:46:06	No I do not	Constitutionality	The issue of corruption in church is sufficiently handled by laws already in place.. This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters to me South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. Violates Section 31: right of religious communities to self-govern. Forces religious leaders into state-controlled “Umbrella” structures. It is UNNECESSARY South Africa already has robust laws (Criminal Law, SORMA, Children's Act etc.) that cover all criminal abuses. The issue is not the absence of law—it is poor enforcement of the law. Religious freedom has never been a defence to excuse criminal behaviour. It is UNWORKABLE Who decides who qualifies as a “religious practitioner” or can register a religious organisation? Which doctrine will be “official”? Who sets the standard? How will licensing be enforced? What if you disagree with the Peer Review Committee?

2025-10-09 18:45:06	No I do not	Constitutionality	➤ The South African Constitution protects the right to religious freedom very clearly. Section 15 (1) “Everyone has the right to freedom of conscience, religion, thought, belief and opinion”. ➤ Any attempt by the State to interfere in or enforce any form of religious orthodoxy will almost certainly infringe religious freedom rights. Section 18 “Everyone has the right to freedom of association” ➤ The right to freedom of association guaranteed by Section 18 of the Constitution clearly includes the right NOT to associate. ➤ If you – or your church – are forced to join a Peer Review Committee approved “umbrella organisation”, how will this not violate this right? ➤ The CRL’s proposals give lip service to the Constitution but evidently do not respect the rights of the religious communities it guarantees	Louise	English	unemployed individual

2025-10-09 18:45:46	Not fully	Other	I understand that faith it is not a job it is a calling , however the are church leaders who are making a business out ofc the church and we are all quiet about this. the government is putting its nose to church because of all the scandals that trusted pastors do and yet the CRL does nothing about that. In the times of Samuel the affairs of state where not greater than the affairs of God but today the affairs of state has long supersede the affairs of God because we do not have enough people who are carriers of the covenant. Purity is overlooked and God cannot raise people who are not trust worthy to stand on his mountain. Let me tell you a small story that happened to another country, the politicians of that country were misusing the funds of the state until the president decided that since they had pastors let the money go to the pastors instead because they are man of God they fear the lord they are not going to misuse the state funds. so it was so, after a while they realized that money was disappearing and a lot of the pastors started to be flamboyant so it was investigated and an audit was done, the results said the politicians were far better than the pastors when it comes to handling the money . so it was decided that the money return to the politicians. 2025-10-09 19:09:46	No I do not	Constitutionality	1. It is UNCONSTITUTIONAL • Violates Section 15: freedom of religion and conscience. • Violates Section 18: freedom of association (including the right not to join a state-approved body). • Violates Section 31: right of religious communities to self-govern. • Forces religious leaders into state-controlled “Umbrella” structures. 2. It is UNNECESSARY • South Africa already has robust laws (Criminal Law, SORMA, Children’s Act etc.) that cover all criminal abuses. • The issue is not the absence of law—it is poor enforcement of the law. • Religious freedom has never been a defence to excuse criminal behaviour. 3. It is UNWORKABLE • Who decides who qualifies as a “religious practitioner” or can register a religious organisation? • Which doctrine will be “official”? Who sets the standard? • How will licensing be enforced? What if you disagree with the Peer Review Committee? 4. It is UNAFFORDABLE • Estimated cost to taxpayers: R750 million start-up + R250 million annually. • CRL’s current annual budget is one-fifth of what this scheme would require. • Who do you think will pay the license fees for “approved” religious organisations	Nicki	English	business owner

2025-10-09 19:12:47	No I do not	Constitutionality	These proposals directly violate the rights guaranteed by the South African Constitution, specifically Sections 15, 18, 30, and 31, which protect freedom of religion, belief, association, and assembly. Freedom of religion means that any person should be free to gather, worship, and establish a place of worship without State approval or interference. The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. For the State or the CRL to define who may preach, what is acceptable doctrine, or where people may meet would be an infringement of religious liberty. 2025-10-09 19:16:11	No I do not	Constitutionality	The CRL's mandate is to promote and protect the right of the religious , linguistic and cultural communities , not to regulate or police them , and such is constitutional overreach and goes against the religious rights enshrined in the constitution. We have laws already in place to deal with crimes such as rape , money laundering , illegal foreigners , and the failures of state organs to enforce those laws should not be shifted to the church. 2025-10-09 19:29:14	No I do not	Necessity	We categorically reject and denounce any attempt by the CRL Rights Commission or any arm of the State to regulate religion, religious institutions, or religious leadership in South Africa. Such interference is not merely an administrative overreach — it is a direct assault on the very foundations of freedom of belief, conscience, and worship enshrined in our Constitution. Religion, by its nature, transcends the authority of the State. The State’s legitimacy is temporal and political; faith is eternal and moral. To subject religious practice to bureaucratic oversight is to place the Divine under human guardianship — a proposition as absurd as it is dangerous. The CRL’s continued efforts to centralize and standardize religious life under state-defined “norms” constitute a clear violation of constitutional guarantees and a betrayal of South Africa’s pluralistic ethos. No commission, however well-intentioned it claims to be, has the moral or intellectual competence to determine what constitutes legitimate faith or authentic religious practice. We call upon the CRL to immediately cease all initiatives aimed at licensing, registering, monitoring, or “accrediting” religious leaders and institutions. Religion is not a profession to be audited; it is a sacred covenant between human beings and their Creator.

2025-10-09 19:41:09	No I do not	Other	We categorically reject and denounce any attempt by the CRL Rights Commission or any arm of the State to regulate religion, religious institutions, or religious leadership in South Africa. Such interference is not merely an administrative overreach — it is a direct assault on the very foundations of freedom of belief, conscience, and worship enshrined in our Constitution.			
2025-10-09 19:41:09	No I do not	Other	Religion, by its nature, transcends the authority of the State. The State's legitimacy is temporal and political; faith is eternal and moral. To subject religious practice to bureaucratic oversight is to place the Divine under human guardianship — a proposition as absurd as it is dangerous.			
2025-10-09 19:41:09	No I do not	Other	The CRL's continued efforts to centralize and standardize religious life under state-defined “norms” constitute a clear violation of constitutional guarantees and a betrayal of South Africa's pluralistic ethos. 			Dear Honourable Members, We, the undersigned citizens of South Africa, write to express our deep concern and firm opposition to any proposed legislation or policy that seeks to **regulate churches, ministries, or religious institutions** under state authority. South Africa's Constitution guarantees **freedom of religion, belief, and opinion** under Section 15. This right is foundational to our democracy and must be safeguarded without compromise. Allowing the state to determine **who may preach, how faith may be expressed, or which institutions qualify as legitimate churches** would be a direct violation of this constitutional freedom. While we understand and support the need for accountability, financial transparency, and the protection of citizens from abuse or exploitation, these objectives can be achieved through existing laws without interfering in **doctrinal, spiritual, or ministerial matters**. Regulating the pulpit risks blurring the line between Church and State — a separation that has preserved peace, diversity, and freedom for generations. History has repeatedly shown that when governments assume authority over matters of faith, the results are **division, persecution, and the loss of individual liberty**. Religious communities play a vital role in addressing poverty, addiction, education, and social upliftment — often reaching where government cannot. To constrain or license these ministries would weaken, not strengthen, our nation. We therefore appeal to government leaders to: 1. **Uphold and defend the constitutional right to freedom of religion** for all South Africans. 2. **Engage faith communities in consultation**, rather than imposing regulation upon them. 3. **Focus enforcement on criminal and fraudulent conduct**, not legitimate expressions of faith or ministry.

The religion is not the problem but the criminals behind the so-called religious organisations. Furthermore if a private entity upholds a certain belief and values and others do not agree with those beliefs or values, the entity cannot then be punished if it based on its beliefs and values restricts access or prevent those with different beliefs from using the private facility. A christian church who wants to host a certain ceremony at a mosque, cannot do so if it offends the muslim faith community and then accuse the muslim community of discrimination, because the reverse will also not be allowed ie a Muslim ceremony held in a christian church building. South Africa must uphold freedom of religion as a cornerstone of its democratic Constitution, enshrined in Section 15 of the Bill of Rights, which guarantees every person the right to freedom of conscience, religion, thought, belief, and opinion, including the freedom to practice and propagate their faith without state interference. Regulating churches would undermine this freedom by inviting bureaucratic overreach, potentially stifling spiritual expression, charitable works, and community support systems that churches provide independently—much like how excessive state control in authoritarian contexts has historically led to corruption, favoritism, and the persecution of minority faiths, contradicting South Africa's Constitutional Court rulings that affirm religious institutions' autonomy in internal affairs to safeguard democracy and prevent tyranny. Volg asb die link en vul in die volgende by die opsies: Do you support the CRL proposal to regulate religion? - No I do not What is your top concern? - Constitutionally Reason - These proposals directly violate the rights guaranteed by the South African Constitution, specifically Sections 15, 18, 30, and 31, which protect freedom of religion, belief, association, and assembly. Freedom of religion means that any person should be free to gather, worship, and establish a place of worship without State approval or interference. The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. For the State or the CRL to define who may preach, what is acceptable doctrine, or where people may meet would be an infringement of religious liberty.

			We are, sadly, very aware of the abuses that have been carried out in religious bodies, like having people consume poison, having people behave like animals and eat grass, sexual abuse, violence and so on. I do not believe, however, that it is necessary to pass new laws regarding these matters as I see we already have adequate laws designed to protect the dignity of most people in this country (with the exception of pre-born children who are still subject to legally being killed, the ultimate form of abuse). The State needs to apply existing laws properly. The State should be subject to God, not God to the State. Divine Law is a higher form of law than human law and as the Bible teaches: Obedience to God comes before obedience to man. I would reject the notion that the State should be able to prescribe to a religion what its beliefs should be although I accept that when the God-given dignity and rights of people are being violated in the name of religion, such as has happened in certain cults which has led to awful consequences like mass suicides, the State would have the right to intervene to prevent such extremist and criminal measures. But where the society departs from accepted religious teachings and morality, such as in the present WOKE movements and around areas of gender dysphoria, the State does not have the right to impose an ideology upon persons who hold to longstanding spiritual and religious beliefs and values around marriage, sex and gender (as an example). I nevertheless believe that existing legislation is sufficient to deal with whatever might come along and that there is no need for yet more legislation.

			The renewed push by the CRL Rights Commission to introduce mechanisms for vetting, licensing, and regulating religious organisations and leaders is deeply concerning. While accountability within all sectors of society is important, these proposed measures pose a direct threat to the constitutional right to freedom of religion, belief, and opinion as enshrined in Section 15 of the South African Constitution. Religious communities are inherently diverse, self-governing, and spiritually autonomous. To subject them to state regulation is not only a violation of their independence but also sets a dangerous precedent of government overreach into the sacred space of belief and worship. The licensing of religious leaders by the state echoes systems of control incompatible with a free and democratic society. South Africa already has adequate legal frameworks to address abuse, exploitation, or criminal behaviour—regardless of whether it occurs within religious settings or elsewhere. What we need is better enforcement of existing laws, not the creation of new mechanisms that compromise fundamental rights. Faith communities must remain free to govern their own internal affairs without fear of political or bureaucratic interference. True religious freedom includes the right to choose leaders according to the doctrines, customs, and convictions of each faith tradition—without state approval.			
2025-10-09 20:47:03	No I do not	Constitutionality	We urge all South Africans to remain vigilant in defending our shared constitutional values. Freedom of religion is not a privilege granted by the state—it is a right that must be protected from state encroachment.	Wendy	English	retired

			In a country where the majority of people are Christians, the South African government has chosen to stop religious instruction and prayers at public schools. Now the same lofty people want to have a hand in regulating religion, registering churches and ministers/pastors. Freedom of religion and association is guaranteed by our Constitution, but since when has the Constitution and the ideals behind our Constitution stopped the ANC from doing exactly as they want, cloaking their actions in buzzwords like transformation or restitution. This latest attack on the few freedoms still remaining to men and women is to be expected. It is part and parcel of the move, by governments worldwide, towards the New World Order, where anything that could be used to challenge the authority of the state is unacceptable, such as religious worship or even strong family ties. We, the people, have to seriously resist anything that could, even in a small way, erode our freedoms. This move by the CRL Rights Commission will be cloaked in the buzzwords of protecting us, the people, from bogus churches and extreme church groups or ministers and pastors that exploit people in some way. The move by the CRL Rights Commission is the thin edge of the wedge. I absolutely reject their bona fides and regard this proposal as falling outside the stated objectives and purpose of the Commission.

2025-10-09 21:00:35	No I do not	Constitutionality	1. Constitutional and Autonomy Concerns My biggest objection to the CRL Rights Commission's proposal is that it represents an unconstitutional infringement on religious freedom and institutional autonomy. The proposed system mandates registration, affiliation with an "Umbrella Organisation," and external vetting. This violates Section 15 (Freedom of Religion) and Section 31 (Rights of cultural, religious and linguistic communities) of the Constitution. The right to "practice their religion" and to "form, join and maintain religious associations" is interpreted to include the right to govern internal affairs without undue state interference. Adjudicating Doctrine: Proposals that involve vetting leaders based on "acceptable doctrine" or requiring a "religious text of defined or ancient origin" are seen as forcing the state to become an arbiter of theology, which is an explicit violation of the principle of religious autonomy and secularism. Placing the CRL Rights Commission as the final authority with the power to deregister or shut down a religious institution converts the proposed "self-regulation" into State Control. 2. Financial Principles and Fees My concern over fees is an element of the debate, often viewed as both a practical and principled objection: Many religious organisations operate on the principle of voluntary giving (tithes and offerings) and see imposing mandatory licensing or operating fees as contradicting their charitable or non-profit nature, particularly for small or poor churches. Affordability: The practical reality is that a mandatory, annual fee structure would be unworkable and unaffordable for a large number of small, independent religious bodies across the country, effectively forcing them to close. 3. Risk of Corruption and Abuse of Power I fear corruption is an inherent danger of introducing a state-controlled licensing bureaucracy: "Gatekeeper" Power to grant or deny operating licenses. Extortion and bribery: informal agreements	Hendrik	Afrikaans	employed individual

2025-10-09 21:10:03	No I do not	Other	No human being has the right to control or regulate any Christian's God-given right to worship the Creator of heaven and earth. In doing so, such a human tries to "become God" to the Body of our Lord Jesus Christ. Without a doubt eternity awaits each and every one of us, and it is a very dangerous place to find yourself in if you tried to "play God" over the lives of other people in your lifetime, and did not allow them to freely worship God the Father, God the Son, and God the Holy Spirit. 2025-10-09 21:15:49	No I do not	Constitutionality	I, Hudson Le Feuvre-Smith, formally object to the CRL Rights Commission's proposal to vet, license, and regulate religious organisations and leaders, as it constitutes a clear violation of the constitutional right to freedom of religion guaranteed under Sections 15 and 31 of the Constitution of the Republic of South Africa. Such measures threaten the spiritual autonomy of faith communities and amount to unconstitutional state interference in religious affairs. The state's role is to protect, not control, religious belief and practice, and any attempt to regulate faith or its leaders undermines the very principles of a free and democratic society. I therefore call on Parliament and the CRL Rights Commission to uphold and protect our constitutional right to religious freedom and to reject all attempts to license or regulate religion. They grow up condemning Christianity and want to persecute. See how they are murdering the christian community in how many countries. They come to South Africa and put up their temples but you try put a church up in their country then you are persecuted. See what Hamas did to the Israel women, men and children and babies. They attached Israel first. Our government calls Isreal an Apartheid country for responding to the attacks of Hamas. In the world war America beat Japan, but when the war ended Japan used America to build up their motor industry. Now you see quality vehicles that have been built in Japan. South Africa the wealth of the country was handed over to the ANC. What have they done with it? They filled their back pockets and kicked the people of South Africa in their butts. The only Municipality in South Africa that operates properly is Cape Town. The others are bankckrupt. Guess who controls them. Tell me how do you come out of the bush and in no time you are Millionaires or Billionaires. Religious organisations have failed the most vulnerable people for decades, if not hundreds of years. 300,000 children were abused by priests and deacons in France since WW2. The same in Spain and other countries. No category of organisations that has such an abysmal record of abusing children may be allowed to exist unregulated. Over and over and over again we read of priests and mega church pastors having abused children, and after a sad sweaty apology, half the members of their church are happy to forgive the abuser. 2025-10-09 21:35:22	Yes I do	No concern	The "religious" space have been taken over by so many scammers. "Churches" are popping up left right and centre. God is a God of miracles but he expects education. Why can I not be a brain surgeon without the necessary training. Marriages by these fly by night religious leaders are an example of the illegal behaviour of so many Further, when I grew up, there were likely a maximum of 10 churches in a particular community. Today there are hundreds in the very same communities but we have more problems then previously. Why be scared of legislation?	David	English	retired

2025-10-09 21:36:03	No I do not	Constitutionality	Freedom of religion is a basic human right. The government has the tools available to prosecute bad actors within the religious space. Regulation is not the answer, and enforcement of existing laws is. Regulating and becoming the 'authority' on religion is a gross overreach and will ensure criminality of ordinary pastors and small churches who will be asked to foot the bill of any bureaucratic process and cannot afford it. 			Why I Believe the CRL Should Not Be Allowed to Regulate Religion in South Africa I strongly feel that the CRL has no right to interfere in or regulate religion in our country. South Africa's Constitution gives every person the freedom to believe, practise, and live according to their faith without state control. Once a government body starts to decide who can preach, how religion must be practised, or which groups are recognised, then freedom of religion becomes meaningless. Religion is a matter between a person and their Creator. It should not be subject to political agendas, bureaucracy, or people who may not even understand the beliefs they want to control. We already have laws in place for issues like fraud, abuse, or crime—so if any religious figure breaks the law, they can be dealt with through the normal justice system. We do not need a commission trying to “regulate” belief itself. It is also deeply concerning that the person being put forward to lead this process has serious allegations and controversies surrounding them. Someone with such questions over their integrity has no moral standing to oversee or control religion. Before talking about regulating others, they should clear their own name. For these reasons, I firmly oppose any attempt by the CRL or government to regulate religion in South Africa. Faith is sacred, and it must remain free from political or personal manipulation. 2025-10-09 21:44:45	No I do not	Other	– Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa’s diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL’s proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.	Daniel

2025-10-09 21:45:24	No I do not	Constitutionality	Once we have freedoms of religion regulated, by persons or bodies, whose agenda we do not know, we live in danger. Our constitution, in its original form, was and is based on the Biblical principles. With the constant debates and reforms, we have managed to erode it to the bare bone, and the Church is what holds the balance. It is the restrainer against all-out evil, and is a guard-rail for politics and society at large. Let God be true and every man a liar, and let His Word remind us of where we are going wrong. Men will bend the truth, but God’s truth remains as the very unchanging constant, not respecting anyone. As the Apostle Peter said, divinely directed by the Holy Spirit in Acts 4:19 AMP ‘But Peter and John replied to them, “Whether it is right in the sight of God to listen to you and obey you rather than God, you must judge [for yourselves],’ and in Acts 5:29 ‘Then Peter and the other apostles answered and said, We ought to obey God rather than men.’	Lunga Vincent	English	employed individual

2025-10-09 21:58:04	No I do not	Constitutionality	The top concern when regulating religion in South Africa is constitutionality. This is because the South African Constitution strongly protects freedom of religion, belief, and opinion under Section 15. The state must remain neutral and may not favor or discriminate against any faith. Any law or policy that regulates religion must therefore be consistent with the Constitution and cannot unjustifiably limit these rights. Regulation is only acceptable if it addresses real harm, is reasonable, and respects every individual's right to practice their religion freely.	antoneze	English	employed individual

			I think this is entirely against freedom of choice and speech. We are known as a rainbow nation where many different people are welcome, live and celebrate differences (also why we have heritage day), many different belief systems are in south africa and all choices of such religion beliefs should be respected. There is no such rules against any other religion, what is the purpose of celebrating differences and claiming constitution of free will of religion, allowing a rainbow nation but wanting to control and regulate christianity alone? It's hipocracy and in violation of the constitution. It is our right to live a life of our choice having freedom of religion without it being regulated and spoonfed. We have a right to think for ourselves, make our own conclusions based on the truth and not a regulated false version there of. Nobody likes it when someone else tells you how to do your job based on their worldview, same goes here. This is unjust, this is unnecessary, the time and effort put into this could be well spent elsewhere to build a better south africa for tomorrow for our children the next generations, in terms of schooling systems, roadworks, sport, crime prevention, ending corruption, , etc. I honestly don't think that Christianity is a threat to be regulated - if anything it is for the building up of people and community. Which builds a stronger nation.

2025-10-09 22:17:51	No I do not	Constitutionality	I don't believe the intent behind this is pure and is a front for a bigger agenda. Government needs to apply their focus on rooting out corruption, getting failing states across the country to have clean audits, restore basic infrastructure, etc. Any well run church that aligns to the structures defined in the new testament, does have oversight and accountability else God will never bless that church and it will not stand. A preacher isn't just appointed by themselves, nor and especially by government, the Church recognizes the gift God has placed on an individuals life.

The South African state needs to first get their act together and actually run the basic necessities of the country before it begins to regulate the finer details. (In short leave religion alone and fix the physical needs and short falls within the country) State regulated religion will cause a major collapse in the South African society because it will become a flop just like the rest of the state run aspects of South Africa. 			This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing asso

Section 31! The right of religious organisation's to govern themselves. All religious bodies have a charter that they adhere to. 2025-10-09 22:52:20	No I do not	Workability	The first sign of state control is the regulation of someone's abstract faith and freedom to worship. There are no politicians qualified to do this. The community of each religious belief itself is adequate... Any politician who seeks to control my religious freedom will seek to dominate it with their choices or with the choice of the political entity paying them, its only human. The issue of corruption in church is sufficiently handled by laws already in place. No need for regulations. The Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission) is again pushing for mechanisms to vet, license and regulate religious organisations and leaders. This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control.	Amika	Afrikaans	employed individual

			The CRL proposal to license religion is not about safety — it’s about control. It seeks to redefine who may speak for God, who may lead His people, and how faith may be expressed. This is unconstitutional, undemocratic, and spiritually dangerous.

2025-10-09 23:22:25	No I do not	Constitutionality	Religion is ones own belief and the constitution allows everyone to choose ,follow and practice their religious beliefs freely . Laws are already in place to prosecute any person or organisation that commits what is perceived to be a crime. The state and or its entity [in this case CRL] cannot be a regulator of any religion as this goes against freedom of religion. Neither should the CRL propose to be the moral police. Morality is relative. if the CRL believes that any religious leader is misappropriating funds from a vunerable person , then it should ask for intervention from the relevent authorities that are tasked with applying the law. Same for any other alleged criminal act by a relious leader or relious body. Even under the apartheid government religiuos bodies were left to their own devices by government . Even if they were not Christians. It seems that the poor immigrations laws and practically non existant border controls brought in many, so called religious leaders from different faiths into this country . This country already had many SA religious leaders of all faiths already serving its citizens religious needs . Many religious leaders that were allowed into this country solely did so to make money. Do not blame religion ,blame the state for allowing them entrance. CRL is seeking laws that will make it a nanny or a bully of all religions . No laws exists that prevents gullibility/naivety in any person. Social media awareness campaigns can make people more aware off shady behaviour/dealings etc. Gullibility /naivety causes pain and losses to many people daily, in all spheres of life. 2025-10-09 23:32:48	No I do not	Other	This move by the CRL is outside of their jurisdiction. A chapter 9 institution is supposed to propose that which safeguards freedoms, not anything that impedes it. The very definition of what they are supposed to do betrays this new venture to be undue influence from a corrupt government and powerful political influence used AGAINST the very people they are meant to protect. They are not 'empowered' to do any work in our lawmaking, they are placed as a watchdog to prevent government overreach or any other political pressure. They are mandated to promote and protect our cultural, religious and linguistic rights, not whittle them away. They are not only NOT empowered to make regulations that limit our freedoms, but they are liable for dereliction of their duties in not protecting them. If they can't do the one thing they were formed to do, then they need to be disbanded, dissolved or dismissed. In fact, because what they are protecting is so precious to the integrity of social autonomy and human dignity, they should stand trial for trying to make restrictive laws that hinder public democratic freedoms of belief. What they are doing now is not right. It is wrong, and we should seek to disqualify all their current members and hold a referendum for democratic election of new members for the CRL	Rebekka	English	self-employed

2025-10-09 23:47:47	No I do not	Constitutionality	This is government over reach! Our Constitution already guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) State control of religion will compromise our freedom. We do already have laws that prevent criminality - be it in the church or outside of it.	Tania		Non-profit

2025-10-10 00:11:37	Not fully	Necessity	Religion and religious beliefs is the most important method of instilling discipline in society since it conveys the difference between good and bad, right and wrong. Different cultures have different religions yet it all boils down to the same ideology. Government should realize that if they decide to control religion they will expose themselves as willing to take responsibility for the different religions not only as a watchdog but financially as well and it is a situation they will not be able to avoid. My religion has no negative effect on the economy so I don't see a reason for something like this. A regulation is there to protect the public from monopolies and poor business practices, this doesn't feel like protecting. Christianity doesn't harm anyone, in actual fact my christianity has saved so many people from drugs,alcohol and so many other things that can destroy your life,people are dying to all these things everyday that just fails to be stopped. We are helping young people live a stronger, happier life without these things. A support system that helps and strengthens each other by having community of people that actually loves and cares about you, my faith is an essential part of human nature. Please let my Christianity show you how we have changed people lives for the better and you will find a million reasons not to regulate it.	Tertius	English	employed individual
2025-10-10 03:07:45	Yes I do	Necessity	Regulate, audit and lifestyle audits. You have nothing to hide. Right? Practice the values you preach. As an unintended consequence, quality of governance will also improve. The regulation of religious content is one aspect, but another aspect is the focus on facilitators and financial funding of religious organizations and sects. Religious institutions in the financial realm are mechanism implemented for channels of tax evasion under disguise of charity, funding for self enrichment, party political funding and fraud. It is a very, very lucrative business since emotions, guilt, shaming, self instituted positions of power over people leave the vulnerable, financial/ and intellectually challenged exposed. If your religious event is staged, you are played. Your watching a concert. As an unintended consequence, educated and true religious leaders can UNITE also too influence and improve quality of government under principals of Abrahamatic faith.	JC	English	retired

2025-10-10 05:15:04	No I do not	Constitutionality	– Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternal, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.	Johanna

2025-10-10 05:26:39	Yes I do	Constitutionality	While faith itself is indeed a divine calling and cannot be dictated by the state, the protection of citizens from abuse, exploitation, and manipulation is a constitutional obligation of the government. The state has every right — and duty — to enact legislation that safeguards vulnerable people from harm, even within religious or spiritual environments. Too often, we’ve witnessed cases where individuals hide behind “spiritual authority” to commit acts of rape, abuse, financial exploitation, and psychological manipulation. These are not matters of faith — they are violations of human rights and criminal law. Regulation does not mean interference with doctrine or worship; rather, it ensures that religious institutions operate transparently and ethically, and that leaders are held accountable when they exploit their positions of trust. A responsible approach would therefore be for the state to establish oversight mechanisms that protect citizens from harm, without infringing on genuine religious freedom. Faith must uplift and heal — not destroy lives under the cover of spirituality.	Nkubi Lola	English	retired

			Suid-Afrika se grondwetlike beskermings (Artikel 15, 18 en 31) verseker minimale staatsinmenging in godsdien, met 'n lae Regeringsbeperkingsindeks (GRI) van ongeveer 1.5/10 in vroeëre data, maar onlangse Pew-navorsing (2022-data, gepubliseer 2024) klassifiseer dit as "laag" (0.0-2.2 op die skaal). Die land se godsdiensvryheid is hoër as die globale mediaan, met vrywillige selfregulasie en minimale beperkings. Die CRL se voorgestelde lisensiering kan dit na matige of hoër vlakke skuif, soortgelyk aan globale gevalle waar regulasie vryhede ondermyn. Globale data (Pew 2024-verslag) toon dat 59 lande (30% van 198) hoër of baie hoër GRI het, met 'n globale mediaan van 3.0/10 – 'n piekvak. USCIRF 2024 beveel 17 lande aan as "Lande van Besondere Besorgdheid" (CPC) vir ernstige skendings, insluitend China, Rusland, Indië en Saoedi-Arabië. Globale neigings (Pew 2024) toon stygende beperkings in 59 lande, met Asië (mediaan GRI 4.3) en Midde-Ooste (5.9) die hoogste. SA se lae-regulasie-model stem ooreen met suksesvolle soos VSA en Japan, waar selfregulasie misbruik hanteer sonder vryhede te benadeel. Die CRL-voorstel, soortgelyk aan China of Rusland se registrasie, kan SA se hoër vryheidsvlak ondermyn. Bevorder eerder bestaande wette en vrywillige meganismes vir beskerming

2025-10-10 06:14:38	No I do not	Constitutionality	The first sign of state control is the regulation of someone's abstract faith and freedom to worship.. There are no politicians qualified to do this.. The issue of corruption in church is sufficiently handled by laws already in place.. No need for regulations This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the constitution. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing asso	Alfeus	English	employed individual

			The Christian faith is the backbone of our nation. It is through prayer and unity in faith that South Africa has been sustained and protected. The Church is not only a calling, it is real work that carries moral authority far greater than any government or constitution. True leadership lies in accountability, service, and compassion, values the Church consistently upholds. Unlike the widespread lack of accountability and misuse of resources within government, the Church continues to serve communities faithfully and selflessly. It is by grace alone that this government has remained, and only the Christian heart of forgiveness has restrained harsher judgment. Yet, while the Church feeds, clothes, heals, and restores the people of South Africa, it is the Church that is now being questioned and burdened.

The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa’s diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL’s proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.	Melony	English	employed individual

2025-10-10 07:06:03	No I do not	Other	I find it deeply concerning that there is even a discussion about regulating religion. Our Constitution clearly upholds the right to freedom of religion — a right that protects every individual's ability to believe, worship, and live according to their convictions without government interference. If the state begins to decide what people may or may not believe, it moves us away from democracy and closer to dictatorship. South Africa is a nation founded on diversity — of culture, language, and faith — and that diversity is part of what makes us strong and united. The Bible teaches us to love one another and to lead others to truth through how we live, not through force or control. Regulating religion would take away the very freedom of choice that God Himself has given us. We are called to lead by example, not to impose belief. For the sake of our faith, our freedom, and our future, we must protect the right to worship and believe freely.		Bianca	English	employed individual

			I do not agree with the CRL Rights Commission’s proposal to regulate religion and license religious leaders. Such a move would place unnecessary limitations on our freedom of religion and interfere with the spiritual independence of faith communities. Our Constitution guarantees every person the right to freely practice and express their faith without government control. By giving the state authority to decide who may lead or how ministries should operate, this proposal risks undermining the very freedom it is meant to protect. Faith is a matter of conviction, not compliance. True accountability within the church should come from spiritual and community-based structures, not state regulation.

2025-10-10 07:16:06	No I do not	Constitutionality	I believe Christianity finds it’s Foundation on the Church of Jesus Christ, where He is the head of the Church (Col 1:18). Jesus is the one who builds his church, not government (Matt 16:18). God gave (appointed) leaders in the church with a mandate to grow the church, they are apostles, prophets, teachers, evangelist and pastors — they are in the church not external from it (Eph 4:11-16). Christianity expands from inside the church externally, not other way around. - It Violates Constitutional Rights - Freedom of religion is protected under Section 15 of the South African Constitution. - Everyone has the right to freedom of conscience, religion, thought, belief and opinion.” - Government regulation of religion would infringe on this right and contradict the Bill of Rights, which guarantees individuals and communities the freedom to practice their faith without state interference. - It Threatens Democracy and Pluralism - South Africa is a secular state, meaning the government should not favor or control any religion. - Regulating religion could lead to state favoritism, discrimination, or even religious persecution, undermining democracy and social equality. - It Undermines Religious Diversity and Tolerance - South Africa is home to a wide range of faiths — Christianity, Islam, Hinduism, Judaism, traditional African religions, and others. - Regulation could privilege dominant faiths while marginalizing smaller or minority groups, creating division and tension. - It Risks Limiting Free Expression and Belief - Religious expression is closely linked to freedom of speech and association. - Regulation could silence dissenting or minority voices within religious communities, leading to censorship and loss of spiritual freedom. - It’s Difficult to Implement Fairly - How would the state decide which beliefs or practices are “acceptable”? - Any attempt to regulate doctrine, clergy, or worship practices would be subjective and arbitrary, inviting abuse of power and bureaucratic corruption. - It Could Lead to Social Conflict - Religion is deeply personal and sensitive. - Government interference could provoke resistance, protests, and even violence, especially if communities feel their beliefs are being policed. - There Are Already Laws to Handle Abuse - Issues like fraud, abuse, or exploitation in religious contexts can be dealt with through existing legal frameworks (criminal	Megan	English	business owner

2025-10-10 07:19:41	Not fully	Constitutionality	Some religious leaders operate without any oversight. And that can be dangerous. Freedom of religion is a fundamental part of the Constitution. If you try and take that away, you can be classed similarly to Hitler. No, I'm not saying you want to kill people who believe differently from you. But trying to regulate religion is basically trying to tell people how they are allowed to be religious. I do believe religious leaders need to be held accountable. If there is no oversight in how they operate, a lot could go wrong. But trying to regulate religious organizations and leaders leaves a lot of room for dictatorship, and that is unconstitutional. 			This matter is more a legal matter than a constitutional matter. Constitutionally, we all know what happened when people did not want to vote for certain political parties. People must be free to choose and learn not to be fooled by the evil of the few. Legally, criminals go to jail! There are thousands of good evangelical ministers, attached to recognised evangelical churches. People can choose better... educate the people! Thirdly, the people who are implementing these certainly would not like to implement sanctions on funeral rituals, ancestral feasts and the like., can you imagine the aggressive untamed response? Finally, then there is witchcraft, the occult, Islam and sangoma's everywhere doing much more harm and bringing pain and fear into otherwise what should be peaceful communities. These too then must come under the hammer! Personal thoughts Reader, The beginning of wisdom is the fear of God. In this well known 'quote', there should lie a stern warning to tread very careful. If you don't want to listen to the Bible, then turn to Roman Governing history, particularly AD 145-400, where black African Christians changed the world, simply leave the Christians alone and deal with Criminals. Do not put your hands in where they do not belong, You cannot govern God, He gave the laws that we now live by.

2025-10-10 07:32:44	Yes I do	No concern	In Christian as I believe in Christ. We have nothing to hide. We give what ceazer demand and God what belongs to God which is our faith. Jesus Warn us that the time will come where many false Prophets will raise. Government doesn't have power over God. God cannot be controlled by human beings. The congregation we possess doesn't not belong to God, the bank account i the name of congregation doesn't belong to God either its our own doing. We cannot continue to be ignorant. Church must be regulated because God doesn't not dwell in the corrupt house build by human hands. God is Spirit. We cannot be blinded by our greedy. Tithe and free will offering was for store House of God, where store house is referring to the needy not bank accounts. We need to change. Jesus Christ Warn us and say be aware of All kind of greedy, life is not about what we possess. He say if they take one coat give them another coat. The war is not for us by God. Jesus say do not resist the evil one. Why Brothers and Sisters you want to resist the evil one. If you belong to Christ, Deny Self protection, Deny Self defend, Deny Self seeking and follow Christ. Speak like Jesus, if my kingdom was of this world my followers will be fight for me. If they persecute our Master what about follows. Let us sit and relax dwell and secret place of the Most High. 2025-10-10 07:34:40	Yes I do	No concern	It must be noted that of recently churches are used to violate the rights of the society. Some churches make their members to eat grass, snakes and rats, drink petrol amongst many other atrocities. Churches are also used for money laundering. Criminals use the churches banking accounts to achieve such deeds. Few years ago, a church in Eastern Cape was in the news for keeping guns and holding people hostage. These so called pastors are not trained to lead people spiritually. They come from other parts of Africa and set up churches anywhere they want. This is evident in most townships where tents are erected. Surely, such deeds will lead to moral decay in our country. Something needs to be done to protect the vulnerable people. Some form of regulation is needed.	Vakele	English	retired

			I Do Not Support CRL I stand for the freedom of the message of Christ. This movement risks blocking people from giving their lives to Jesus by limiting the full spontaneity of the Gospel and not allowing the Holy Spirit the space to move and transform hearts. We are not meant to be boxed in or silenced. The Word of God is alive, and we are commanded to go out and make disciples of all nations. Our calling is to follow Jesus — not to be restricted by human rules or systems. Yes, church abuse is real and should be addressed where it happens, but that must not be used to control or confine the true message of Christ. Faith is not a regulation — it is a relationship. A personal, powerful connection between you and God that no institution should attempt to contain.

			-It violates the constitutional right to freedom. Section 15 of the South African Constitution guarantees freedom of religion, belief and opinion.			
			-It gives the government power to approve or reject religious leaders and organisations and interferes with the spiritual autonomy of faith communities.			
			-South Africa already has laws that protect citizens from abuse — for example, fraud, assault, child protection, and human rights laws. If a religious leader commits a crime, they can already be prosecuted under existing legislation. There's no need for a new system targeting religion specifically.			
			-It is unworkable and cannot be implemented fairly across thousands of diverse faiths, which will also create division and distrust between religious communities and the state.

2025-10-10 08:13:23	Yes I do	Necessity	Religion is a man-made construct and subject to abuse in its form of interpretation and indoctrination of people's minds and way of living. Human rights violations or cults are disguised under the auspices of "religion." While freedom of religion is a constitutional right, it should not serve as a shield for exploitation, human rights violations, manipulation, or financial gain at the expense of vulnerable individuals and communities. Regulation of religious organisations and leaders is essential to protect the public and ensure accountability. Licensing and vetting mechanisms would help distinguish legitimate faith-based institutions from those operating as vehicles for justification of human rights violations, financial gain or psychological abuse. True faith should withstand scrutiny and welcome accountability.	Sue	English	employed individual

2025-10-10 08:21:51	No I do not	Constitutionality	My Objection:			
2025-10-10 08:21:58	No I do not	Other	I object to the proposed state regulation of the church because it infringes on the God-given authority and spiritual independence of the Church. The Church is established by Christ Himself (Matthew 16:18) and is called to be governed according to His Word, under the Lordship of Jesus Christ. Spiritual matters—such as doctrine, worship, pastoral leadership, and discipline—are entrusted to the Church by God, and not by the state (Acts 5:29).			
2025-10-10 08:22:02	No I do not	Constitutionality	State regulation of the Church would undermine the biblical principle that Christ is the Head of the Church (Colossians 1:18), and that no human authority should dictate spiritual governance. It risks placing earthly law above divine law, which Scripture clearly forbids. The Church’s freedom to teach, disciple, and minister according to God’s Word must remain protected for the sake of the faithful and for the integrity of the Gospel (2 Corinthians 10:5; 1 Timothy 3:15).			
2025-10-10 08:22:10	No I do not	Constitutionality	For these reasons, I respectfully urge that the state refrain from imposing regulatory control over the Church, preserving its God-ordained mission and spiritual authority.	Bradley	English	Non-profit

			You see, this is exactly what the Bible speaks about in John:10v10 ESV - part A [10] The thief comes only to steal and kill and destroy. This is the full time job of the government. The state if this country is the way it is cause it's govern by thieves. Instead of putting the Lord Jesus Christ 1st and flourish as God promises in His word. They want to control. We did NOT say they must sleep with the devil cause he ALWAYS collect. Let them control the Hindu and Muslims or the sangomas that sacrifice lives just like the government. Why don't they endure our safety huh. Why is rape still a issue? House breaking? If the government want to control, start with themselves. What happened to the robots? The Bible is a great basis to use to govern the people of God. We DON'T belong to anyone. We are God's people, He died, He rose, He called us, He chose us. Prayer changes things. They took it out so they can have control yet they CAN'T even managed what they have.. Come Jesus come We've been waiting so long For the day You return To heal every hurt And right every wrong We need You right now Come and turn this around Deep down I know This world isn't home Come Jesus come One day He'll come And we'll stand face to face. Romans 14:11-12 ESV [11] for it is written, "As I live, says the Lord, every knee shall bow to me, and every tongue shall confess to God." [12] So then each of us will give an account of himself to God.

2025-10-10 08:43:49	Not fully	Constitutionality	Religion, whether organized or informal and all forms of spiritual practices that include the occult sciences and practise thereof is the constitutional right of citizens in South Africa. This constitutional right should remain so as it is the freedom to act according to ones faith that fosters basic human rights and a flourishing democracy. However, certain amendments need to be maintained within the framework of the above. Amendments : Regulation of Religious or Spiritual practise. This would involve establishing rules of law regarding 'certain' practises within the above contexts. Including: That no religion or spiritual practise be the cause of harm, death of any human or animal. Clear definitions need to be established for the above: Harming: inflicting physical pain on or maiming of the physical body of either human or animal unless the individual has provided written consent for this to be done (in that case animals are not included as humans may not give consent for them) Killing: Be the direct cause of murder or death whether by ritual (group or individual) of any human or animal. With regards to death: consent to kill another human being for any religious or spiritual reason, including euthanasia, by any individual regardless of their stature in society or in family unless the human or animal. Euthanasia should remain a medical reason and not a religious nor spiritual reason for death. Sacrifice: no human nor animal may be sacrificed for any reason religious or spiritual. Any harm (including the unwillful infliction of harm on the body of a human or animal by themselves or by others during religious or spiritual sacrifice or for the purpose of ritual both ceremonial or private group or individual, must be considered a form of violence subject to legal implications. In this context, the word 'harm' is clarified to mean maiming, scaring including mutilation of any body parts, tattooing, branding, piercing of any part of the body.	Robert	English	self-employed

2025-10-10 08:48:52	No I do not	Constitutionality	The term "Government" literally means mind control. Government is structured from two concepts to govern or control + mind (ment) from Latin, look it up. Religion already is the ultimate form of mind control actually much more if you knew what the Vatican did which is an understatement. Religion means to bind from Latin re-ligare(=ligament). Christianity was created by the Roman Empire and is a religion about Jesus (really Isis). There is so much more that exposes the lie of Christianity and all the other religions. I guess government which is still based on maritime law and hails from the original Babylon via the Roman empire is in good company with the religions of Christianity and Islam that it spawned for political influence. You hav much research to do. As an official of Government and paid by government just remember that you took on a position with government voluntarily. There are many of us that knows the truth and are carefully studying the chess board of the world. Please let the people go about their business without interference. 2025-10-10 08:49:14	No I do not	Constitutionality	- These proposals directly violate the rights guaranteed by the South African Constitution, specifically Sections 15, 18, 30, and 31, which protect freedom of religion, belief, association, and assembly. Freedom of religion means that any person should be free to gather, worship, and establish a place of worship without State approval or interference. The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. For the State or the CRL to define who may preach, what is acceptable doctrine, or where people may meet would be an infringement of religious liberty.	Charles		retired

2025-10-10 08:53:50	No I do not	Constitutionality	As a free human bring and an atheist, I maintain no personal religious convictions. However... I firmly uphold the fundamental right of individuals to pursue their spiritual beliefs without interference. My concern lies not with faith itself, but with the dangerous precedent of governmental overreach into the private sphere of personal conscience and religious practice. State regulation of religious affairs invariably creates mechanisms ripe for abuse—transforming spiritual leaders into instruments of political control and opening pathways for corruption and coercion. History demonstrates repeatedly that when governments assume authority over matters of faith, they compromise both religious integrity and individual liberty. Such policies represent a profound miscalculation by governing bodies, as they systematically erode the very foundations of trust and legitimacy upon which stable governance depends. In attempting to control the spiritual lives of their citizens, governments paradoxically accelerate their own institutional decline, creating the conditions for the very instability they seek to prevent.

2025-10-10 08:55:32	No I do not	Constitutionality	South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) The state have no say concerning the validity of religious belief, and the religious leaders of our rainbow nation has a freedom of choice as to how they seem fit to worship their god, and what to preach for freedom of speech is also in the constitution. Just as people has the freedom to go where they want, to decide on their own identity(male or female) etc , so does religious leaders have the right to decide on their own teaching, method of worship. The state should not dictate what a leader should say or do. For then our constitution violates the Democratic rights of our government , but practises communistic values which is not what SA is or the people voted for, or will vote for. A democratic state should not interfere with the individual;s right to be and believe and attend a place of worship as the themselves decide, and certainly not control or decide for the diverse religious communities in our rainbow nation what to preach and do or not. 2025-10-10 08:56:36	No I do not	Other	While I do not support the regulation of religious organisations and leaders—recognizing the importance of religious freedom and the autonomy of faith communities—I am deeply concerned about the disturbing practices carried out by certain individuals under the guise of spiritual leadership. It is unacceptable for prophets to instruct congregants to eat snakes, grass, or be sprayed with harmful substances like Doom. These actions are not only dangerous but exploit the trust and vulnerability of people seeking spiritual guidance. Equally troubling is the commercialization of religion, where some leaders prioritize personal enrichment over the well-being of their members. We need to encourage accountability within religious communities themselves, promote ethical leadership, and empower congregants to speak out against abuse. 2025-10-10 08:58:03	No I do not	Constitutionality	Firstly the supreme law of the country guarantees everyone freedom of religion, thought, opinion and belief. Even though you might attempt or even succeed in changing the Constitution, there is no way (and justification is just a human concept that can be politically misused to attain your evil intention, but not a reality) that this right can be regulated. But far more important (if you have the intellectual comprehension) the State can never prescribe the belief or worship system of its population and especially in a diverse country like the RSA where a multitude of belief and worship systems are in existence, as the state are mere humans and not the Almighty Creator (however the different belief systems classify their deity). If you think human rights abuse or poverty or alleged 'privilege' can disrupt a society with civil war, try telling people what and how they must belief and you WILL find out that this will put their back against a wall and then bring the state to an end. You might achieve their 'word of mouth' 'support', but you cannot operate their minds and your intention is obviously luciferian and demonically inspired. Cease and desist with this endeavour. 2025-10-10 09:03:33	No I do not	Constitutionality	This sums it up: This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.	Graeme	English	self-employed

South Africa's Constitution protects freedom of religion, belief, and opinion — this proposal goes against that right. While accountability is important, regulating churches and religious practices could easily lead to misuse of power, censorship, and discrimination against certain faiths. Religious communities already play a vital role in supporting people spiritually, emotionally, and socially. Instead of control, government should focus on partnership and dialogue with faith leaders to address concerns. Freedom of worship must remain protected for all South Africans. I think it taught children to respect their upbringing , their peers and themselves, apart from any religious conviction. Whilst I still embrace the concept of total religious toleration, the actions of certain segments of Muslims in various parts of the world are fearful and South Africa should do everything possible not to allow Muslim domination of any aspect of our lives. 			Freedom of Religion and Association in South Africa Freedom of religion and association are cornerstones of any democratic society. They safeguard individuals’ rights to believe, worship, and assemble according to their convictions — without fear of coercion or state interference. These freedoms ensure a pluralistic society where differing worldviews can coexist peacefully and where moral, cultural, and civic development can flourish. Constitutional Protection In South Africa, these rights are enshrined in the Constitution of the Republic of South Africa, 1996. Section 15(1) guarantees everyone the right to freedom of conscience, religion, thought, belief, and opinion. Section 18 provides for freedom of association — the right to form, join, or participate in any organisation, including religious bodies. Section 31 further protects the collective exercise of cultural, religious, and linguistic rights within communities, provided these are consistent with the Bill of Rights. Together, these provisions affirm that the state must remain neutral on matters of faith, neither endorsing nor restricting legitimate religious expression. This separation of church and state is fundamental to South Africa’s constitutional democracy. Why Regulating Religious Organisations Is a Terrible Idea Attempts to regulate religious organisations or leaders would strike at the heart of these constitutional freedoms. Such regulation risks politicising faith, granting the state power to determine what constitutes “legitimate” belief or acceptable practice — a deeply dangerous precedent. It would invite censorship, suppress minority or unpopular faiths, and undermine the voluntary nature of religious association.

2025-10-10 09:25:50	No I do not	Other	First I want to say to this government department, Who appointed you to decide over how God will build His church? The fact that it was not God the answer is obvious. This regulation you want to bring in sounds like what the Communist did and because of your relationship with them tells me who is steering your agenda and telling you how to create diversion. And that in itself shows where the get their instructions from and it is not God. You are just confirming to us, the body of Christ, that time is speeding to the end, your move is part of the signs that tells us how close we are to the coming of our glorious King. I also think you are looking for other avenues to get to the money that you have not yet tapped into to steel that as well. But know this: we are not unfamiliar with the works of the devil. Do not be an instrument in the hands of the devil. Do not while you are trying to stop and control the works of the church find out that you are fighting the living God as they die when the church started 2000 years ago. Many a government and movements have tried is for 2000 years and they all failed, you will fail as well. This is your warning: Back of !!! you are taking on a force no one can stand against. 2025-10-10 09:29:54	No I do not	Constitutionality	Concern: Regulation of Religious Freedom in South Africa We express deep concern regarding ongoing discussions and proposals aimed at regulating religious institutions and practices in South Africa. Such regulation poses a serious threat to the constitutional right to freedom of religion, belief, and association. Faith is a divine calling, not a profession — it cannot be licensed, regulated, or controlled by the state. The state has no legitimate authority to determine the validity of any religious belief, doctrine, or form of worship. Any attempt to do so undermines both the spirit and the letter of our Constitution. The Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL) does not have constitutional authority to regulate doctrine, ordination, worship, or the internal governance of religious associations. These matters belong exclusively to faith communities and their leadership. Introducing state oversight over religious leaders or institutions risks turning them into subjects or instruments of government control, threatening the independence and prophetic voice of the Church and other faith communities. This would erode the moral and spiritual foundation that has long contributed positively to South Africa's social fabric. South Africa's diverse religious communities already maintain effective voluntary systems of accountability through charters, codes of conduct, fraternal networks, and self-regulating associations. These mechanisms ensure integrity, transparency, and moral responsibility without compromising spiritual autonomy. Parliament has already rejected the CRL's previous proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no constitutional, legal, or ethical basis to revisit this matter.	Elna	Afrikaans	retired

			It unconstitutional CRL to advocate for government regulations of Church. Whatever criminal actions of any religious organisations commit there are more than sufficient laws that address such. Especially when South African Parliament has refused pass any law to regulate the religious community because of the unconstitutionality of such act , CRL must have hidden agenda to : 1. Dictate what can be preached from the pulpit 2. The interpretation of the Bible becomes subject to government approval or disapproval. NB: Please I'm addition to prayers I humbly suggest that the Church gets *Christian Senior counsels* together who are against the regulation of the Church to represent the Church position.

2025-10-10 09:34:02	No I do not	Constitutionality	One very important point is that the CRL Rights Commission has no constitutional authority to regulate doctrine, ordination, worship or religious associations. Religious practice and faith are divine callings, they are not professions. The state cannot legislate concerning the validity of religious belief and it cannot be licensed or regulated by the state. Why? Because such legislation runs the risk of religious leaders becoming subject to, or tools of, state control. Also state regulation threatens the very existence of any meaningful right to religious freedom and the rights of religious communities. Another very important point which precludes the need for state regulation is that religious communities in South Africa support voluntary accountability through charters, codes of conduct and self-governing associations. Religious beliefs is something that requires freedom to choose. By trying to regulate and restrict someone's belief is basically daring to stand up against our creator and our God and that is where you have to draw the line. Taking these daring steps opens doors nobody wants to cross. Pls leave our Relegious beliefs alone and focus on more pressing and critical matters that need urgent attention in this country. Leave religious bodies to handle there own matters because they have a full understanding of how things need to be done. People who don't have an understanding of supernatural things will never be able to clearly and responsibly handle Relegious matters. Pls leave these matters to be handled by the relevant bodies. 			I vehemently oppose this proposal to regulate religion. Any attempt by the CRL to establish a regulatory framework for religious bodies is a direct and unconstitutional assault on the fundamental right to religious freedom and autonomy guaranteed by Section 15 of the Constitution. This is a dangerous exercise in state overreach that sets a precedent for government control over private conscience and belief. Existing criminal and civil laws are more than sufficient to deal with abuse and fraud without creating a bureaucratic body that threatens the very freedom it purports to defend. This proposal must be rejected outright.

The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. 			Here's the same comment with all asterisks removed: --- ### Comment: Opposition to CRL Regulation of Religious Organisations I do not agree with the CRL Rights Commission's proposal to vet, license, or regulate religious organisations and leaders. This proposal is unconstitutional and deeply concerning for the following reasons: 1. Violation of Constitutional Rights South Africa's Constitution explicitly protects freedom of conscience, religion, thought, belief, and opinion (Section 15), freedom of association (Section 18), and the right of religious communities to govern themselves (Section 31). Any attempt by the state to license or control faith communities undermines these fundamental rights. 2. Faith Is a Calling, Not a Profession Religious leadership is a matter of divine calling, not state qualification. The validity of spiritual conviction or ministry cannot—and must not—be subjected to government approval. To do so would give the state authority over matters of conscience and belief, which lie beyond its rightful jurisdiction. 3. Threat to Spiritual Autonomy and Pluralism South Africa's strength lies in its religious diversity and voluntary cooperation among faith groups. Many churches and ministries already practise self-regulation through codes of conduct, denominational accountability, and inter-faith councils. State oversight would replace genuine accountability with bureaucratic control and open the door to censorship of doctrine and worship. 4. Historical and Constitutional Precedent Parliament has already rejected similar CRL proposals in the past, recognising their incompatibility with constitutional freedoms. There is no legal or moral basis for revisiting a measure that would erode the very liberty the Constitution was designed to protect. 5. Danger of Political Manipulation Once the state claims power to decide who is a “legitimate” religious leader, it can easily silence or punish faith communities that challenge governmen

			Statement of Objection to the CRL Rights Commission’s Proposal I firmly reject the CRL Rights Commission’s renewed proposal to introduce mechanisms that would vet, license, and regulate religious organisations and leaders. Such measures are unconstitutional, unnecessary, and represent a serious threat to the freedom of religion guaranteed under Section 15 of the South African Constitution. Freedom of religion includes the right of individuals and communities to determine their own beliefs, doctrines, and leadership structures without interference from the State. By attempting to impose state control over faith institutions, the CRL Rights Commission undermines the spiritual autonomy that lies at the heart of every faith community. While accountability and ethical leadership in religious spaces are important, these must be pursued within the context of faith-based self-regulation, not through government licensing. True reform can only come from within — through moral, doctrinal, and community accountability — not by granting the State authority to decide who may or may not preach, minister, or establish a place of worship. South Africa’s democracy was built on the foundation of freedom and diversity. Allowing the State to regulate religion risks reversing these gains and sets a dangerous precedent for future interference in matters of conscience and belief. Religious freedom must remain protected, not restricted under the guise of oversight.			
2025-10-10 10:06:30	No I do not	Constitutionality	I therefore call upon Parliament, civil society, and all faith communities to stand together in defense of our constitutional rights and to reject any attempt to subject religion to state licensing or control.	Lwazi	English	employed individual

This government of RSA already deprived me from my continual right of association by introducing BEE. 2025-10-10 10:14:34	No I do not	Necessity	It is each person's human right to have a religion and be able to openly follow that religion. It is at the base of all humanity and it influences how we conduct ourselves as human beings. Without religion there will be anarchy, just as there will be if there was lawlessness in our country. Just look at what is happening in our schools because religion has already been removed there. It should be a good indication of what would happen to our country if we are not allowed to freely express and follow our religions. We are a democratic country that pride ourselves in wanting the best for our people. How can we do that if the necessity for our right to practice our religion is taken away from us? 2025-10-10 10:16:37	No I do not	Constitutionality	I do not support state control of religion because it strikes at the heart of one of our most fundamental freedoms: the freedom to worship, believe, and order our faith communities according to conscience and what we believe are God-given texts rather than by state decree. When the state begins to define or enforce what constitutes acceptable religious practice, it crosses a boundary and also violates rights I believe enshrined in our Constitution. While I affirm the rule of law and the need to hold abusers accountable, legislation that governs the inner life of the believer and church - even under the guise of self-regulation (by government appointment!) - inevitably places the state in authority over matters of faith. Accountability of the faith community should not be different to other citizens.	Steve

2025-10-10 10:20:57	No I do not	Constitutionality	We, the undersigned, firmly oppose any form of government interference in matters of personal faith and religious practice. The sanctity of religion must remain free from political influence, regulatory overreach, or bureaucratic intrusion. Government institutions lack the theological understanding, spiritual sensitivity, and cultural context required to legislate or dictate religious affairs. Attempts to do so are not only misguided—they are deeply disrespectful to the diverse beliefs held by millions. Such interference undermines constitutional principles of freedom of religion and sets a dangerous precedent for the erosion of civil liberties. We call upon lawmakers and public officials to respect the boundaries between state and faith, and to refrain from imposing policies that compromise religious integrity. This is not merely a matter of policy—it is a matter of principle.	Ahmed	English	employed individual

2025-10-10 10:31:58	No I do not	Constitutionality	Christianity should not be regulated by the state because its faith and practices originate from divine authority, not human laws. Historically, early Christians separated their spiritual mission from political power, emphasizing voluntary faith rather than state compulsion. State regulation risks compromising the church's spiritual autonomy, freedom to worship, and the individual's relationship with God. It can also enforce conformity, limiting the diversity of Christian beliefs and practices. The principle of separation of church and state, largely shaped during and after the Reformation, protects Christianity from state control and secures religious liberty, allowing Christians to follow their faith freely without government interference or favouritism. 			There are several reasons why regulating faith can be problematic and why it's often considered unnecessary for governments to do so: Separation of Church and State Many countries have a principle of separation between religious institutions and the government. This helps prevent any one religion from dominating others and ensures that all citizens are treated equally. -Freedom of Religion Regulating faith can infringe upon individuals' right to freedom of religion, which is a fundamental human right. People should be able to practice their faith freely, as long as they're not harming others. Diversity and Pluralism : Regulating faith can stifle diversity and pluralism, which are essential for a healthy and vibrant society. By allowing different faiths to coexist, we can foster greater understanding, tolerance, and peace. -Potential for Abuse Giving governments the power to regulate faith can lead to abuse and discrimination. History has shown that governments can use their power to suppress certain faiths or groups, leading to persecution and human rights violations. Faith is a Personal Matter For many people, faith is a deeply personal and intimate aspect of their lives. Regulating faith can be seen as an overreach of government authority into personal matters. In terms of how governments can approach faith, it's often more effective to: Protect Freedom of Religion Governments can protect individuals' right to practice their faith freely, while also ensuring that others are not harmed.

2025-10-10 10:42:54	No I do not	Constitutionality	The proposed state regulation of religion through CRL-appointed "peer-review" committees is unconstitutional, unnecessary, and dangerous. It violates Sections 15, 18 and 31 of the Constitution by undermining freedom of religion, association, and self-governance of faith communities. South Africa already has comprehensive laws—criminal, tax, and child-protection—that deal with the abuses the CRL cites; the problem is enforcement, not the absence of regulation. History and regional precedent (Rwanda, Angola) show that once the state licenses religious practice, closure of churches and persecution soon follow. A far better path is voluntary self-accountability: strengthening ministerial fraternals, adopting the Religious Freedom Charter and Codes of Conduct, promoting education in governance and compliance, and ensuring child-protection vetting—all within the existing legal framework. The CRL should use its current statutory powers to educate and support, not control, faith communities. State control of belief is the first step toward silencing conscience. 			This proposal should NOT even be tabled for further debate or discussion. It threatens our fundamental freedom of religion, including the spiritual autonomy of faith communities. As absolutely guaranteed by the Constitution, every individual has the right to practice their religion freely without interference from the government or any regulating body. The proposal to subject religious organizations and leaders to licensing and regulation undermines this constitutional right and sets a dangerous precedent for government ort regulating body overreach into religious affairs. Furthermore, the regulation of religious organizations and leaders by ANY secular organization raises questions about the separation of church and state. It is not the government's place to determine what constitutes legitimate religious practice or to interfere in the internal affairs of religious organizations.

2025-10-10 11:02:10	No I do not	Constitutionality	This legislation is unconstitutional and unnecessary. In addition, it is unworkable in that it will need to define formal religious groupings and variations thereof. A further factor is that it will require state resources and funding that are not available nor should be allocated. Furthermore, the government has not demonstrated any ability whatsoever in managing any government agency. Incompetence, mismanagement, corruption, and inefficiency have meant that many, if not most, agencies and authorities are ineffective. Any religious group that is doing something contrary to existing legislation can be investigated and prosecuted in terms of the law already. Given that religious and religious beliefs are personal and often contained in small, informal groups of individuals, this legislation will not be able to regulate those and nor should these be regulated. 2025-10-10 11:07:46	No I do not	Constitutionality	The state must turn to Scripture to cultivate and refine its institutional integrity. Biblical principles provide clear instruction on the divine appointment of leadership and establish unambiguous qualifications for those who would govern with moral authority. It is God alone who speaks to the world through His Word—not through state apparatus, not through the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL), and not through any individual like Thoko Mkhwanazi-Xaluva.. The authority of Scripture supersedes human institutions and their representatives. Leadership derives its legitimacy from divine ordination, and the standards for those who would lead are set forth in Scripture with precision and clarity. The state's responsibility is to align itself with these eternal principles, recognizing that true governance flows from submission to biblical truth rather than human wisdom or institutional decree. 			I object to the proposal by the CRL Rights Commission to regulate religion.			
			As a Christian, I believe that faith is a divine calling given by God and cannot be subject to licensing, vetting, or state control. Scripture affirms that Christ alone is the head of the Church (Colossians 1:18), and no government has the authority to determine doctrine, ordination, or the legitimacy of spiritual leadership. To attempt this is to intrude upon sacred matters that belong to God and His people alone.			
			The Constitution of South Africa already provides full protection for freedom of religion (Section 15), freedom of association (Section 18), and the right of religious communities to govern themselves (Section 31). Any move to impose regulation on religious organisations directly violates these protections. It would undermine the spiritual autonomy of faith communities and contradict the very principles of democracy, human dignity, and freedom upon which our nation is built.			
			Faith is not a profession or a trade that can be licensed, and the state has no rightful place in judging belief or controlling worship. The danger of such regulation is that religious leaders could become tools of the state, rather than servants of God, which would weaken both the independence of the Church and the freedom of conscience for every believer.			
			South Africa's diverse religious communities already practise voluntary accountability through charters, codes of conduct, fraternals, and self-regulating associations. There is no need for state interference. Furthermore, Parliament has previously rejected this same proposal, and there is no valid constitutional or legal basis for the CRL to revisit it.			
2025-10-10 11:22:39	No I do not	Other	For these reasons, I must firmly answer No. I do not support the proposal from the CRL Rights Commission to regulate religion. It is unconstitutional, unnecessary, and fundamentally incompatible with my Christian faith.	Neil	English	employed individual

But, as TRUE Christians and not FAKE Christians or Hippocrates we must fight the enemy, which is Satan, every day. 2025-10-10 11:28:18	No I do not	Constitutionality	The freedom of religion is a fundamental right of every person in SA. Regulating religion will only serve to give the CRL authority to determine which religions may be practised and which ones not. Our government proved over the last 30 odd years that they will blindly follow any religion if it suits their purposes to do so and if the price is right. They will promote certain religions to further their cause and block any and all other religions not aligned with them. In the end persecution will be allowed to silence certain voices opposing them. This cannot be allowed.	Connie		employed individual

2025-10-10 11:28:42	No I do not	Other	I am concerned about the constitutionality, necessity amd workability of it. But mainly the government does not have the best interest of citizens at heart which is very much evident by their lack of response to things that actually matyer (crime, workless, abuse, drug lording, education, healthcare ect) and the high rate of corruption and nepotism. Citizens are suffering daily due to the lack of care and appropriate governance already in place. They're already controlling too much and doing too little. A government that doesn't understand the difference between different belief systems and people shouldn't be able to control the religious sector of the country. The mismanage what they already control, therefkrre they shouldn't be able to control even more. People have the right to decide themselves. The agenda to control religion and belief is being pushed world wide, we shouldn't allow it here.	Ash-Lee	English	employed individual

2025-10-10 11:29:57	No I do not	Constitutionality	Regulating religion in South Africa is a dangerous proposition. It risks undermining the constitutional guarantees of freedom of belief, association, and community autonomy. The country's legal framework already provides mechanisms to address abuse and misconduct—what’s lacking is enforcement, not regulation of faith. Moreover, entrusting the state with oversight of religion is deeply problematic given its track record. Over the past 30+ years, the South African government—under ANC leadership—has failed to govern effectively. Public institutions are collapsing, service delivery is erratic, and corruption has hollowed out accountability. The ANC is financially bankrupt and morally adrift, leaving the country in administrative and economic shambles. To hand such a government the authority to regulate spiritual life would be reckless. It would politicize belief, deepen social divisions, and erode the last bastions of community resilience. South Africa needs principled governance—not more control over its people’s conscience. 2025-10-10 11:30:23	No I do not	Constitutionality	The proposed regulation of religion is unconstitutional and would directly impact on the ministers of religion. History has many examples of how this has been abused by government and resulted in regulation of religion and not merely the ministers. There is sufficient legislation to regulate the ministers of religion and keep them accountable, as it is. All the concerns of those who propose regulation, can be addressed by existing legislation. More legislation will not result in better religious organizations. The proposal is misconceived and is rejected.	Maarten	English	business owner

2025-10-10 11:30:57	No I do not	Constitutionality	The state should not be regulating religious institutions or leaders to this extent, as this is in conflict with our constitutional right to freedom of religion. Regulations of this nature have been performed in many communist countries and it can be seen throughout history that this leads to negative outcomes for society as a whole. Religious societies should retain their autonomy, free from state- enforced policies and agendas, like enforcing homosexuality in church leadership. The only instance where the state should be allowed to interfere, should be cases where human lives are threatened (e.g. satanic offering and murdering of human beings). Homosexuals should make their religious choices according to their own convictions, not force anyone in a church, through legal means, to comply with their views, when it contradicts the beliefs of the congregants. The same is applicable to transgenderism and many other agendas that the state may use its power to enforce upon religious communities that do not share those views. 2025-10-10 11:45:07	No I do not	Constitutionality	Whenever the Church (religion) and State have influence and/or control over each other history shows that it always causes chaos. Either religion gets weakened and controlled by the State or the State becomes subject to religion. Eg Apartheid Nationalist govt did want the NG Church said. The Catholic Church in the Middle ages effectively controlled the then known world. Muslim majority countries are often subject to the laws of Islam. When the government tries to interfere with religion or control it, freedom in the country is severely compromised. 2025-10-10 11:51:01	No I do not	Other	The CRL want to specifically suppress Christians, but also other religions. This act is clearly against Christians and their beliefs. This is a communistic, anti-Christian act that is and will be non-constitutional. – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship, or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternal, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.	Jan	Afrikaans	self-employed

			My top concern is that such regulation would infringe on the constitutional right to freedom of religion, belief, and association. The Constitution already provides adequate protection against abuse, and further regulation by the state risks violating these fundamental freedoms.

The state can never regulate the church, because they do not have the same beliefs as the people in the different groups. they cannot have the understanding of that religion's core belief and can therefore not act in their behalf-definitely not for their good. 2025-10-10 12:02:12	No I do not	Constitutionality	– Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. The LORD your God hates people who do these disgusting things, and that is why he is driving those nations out of the land as you advance.)? 			I have been personally affected by the negative impacts of unregulated religious organisations. Before coming out as a gay man, I underwent self imposed conversion therapy because the church I was part of (common ground) taught that homosexuality was sinful and should not be practiced. This led to severe depression and suicidal thoughts. More than 10 years later, I am still in therapy. I have left the church and am no longer a practicing Christian. 3 years ago, my sister and her husband joined a church by the name of Joshua generation, we have noticed that they have become so engrossed in this community that they are now estranged from our own family. The church's teachings have led them to believe that anyone who does not share their beliefs should not be engaged with unless this is in an evangelical level. Their being part of this church and community has caused a significant rift in our family and is extremely distressing. Additionally, the beliefs perpetuated by the teachings of the church are discriminatory towards anyone who does not follow a heteronormative family model which I believe to be against the South African constitution.

The church , as a body, has many internal policies and regulations to protect congregants. There is no need for the government to censor the church in this way.

2025-10-10 12:28:59	No I do not	Constitutionality	We as the church adhere to the Highest Authority who is God, who deemed it fit for us to have a govement but only to be submissive to the Goverment as long as they do not go against Scripture. Regulation towards the church in any way is going against Scripture, if you need a governing body appoint church leaders as most of the traditional church have a sinod who governs them, any involvement or any interference from the state side in the church is going agains the Constitution and agains the Scriptures. 2025-10-10 12:29:14	No I do not	Constitutionality	I do not support the proposal from the CRL Rights Commission to regulate religion or religious leaders. My conviction is rooted both in Scripture and in the constitutional freedoms that recognise the spiritual autonomy of faith communities in South Africa. Faith is not a profession but a divine calling. It arises from a personal relationship between the Creator and His creation, a sacred covenant that no human institution can license or regulate. The Christian Scriptures consistently affirm that spiritual authority comes from the Cre alone, not from earthly powers. When human authorities have historically sought to define or control matters of conscience and worship, it has led to oppression, not righteousness. South Africa's Constitution wisely protects freedom of religion, belief, and association (Sections 15, 18, and 31). Any attempt by the State to determine who may minister, what may be believed, or how communities of faith may organise themselves violates not only the Constitution but the very principle of liberty of conscience, a gift given by the Creator to all humanity. The proposal to license religious organisations presumes that faith can be standardised, audited, or validated through bureaucratic structures. Such thinking reduces the sacred to the procedural, and spiritual leadership to an administrative function. It risks creating a future in which religious expression is tolerated only under state permission ... a profound departure from the freedom our democracy sought to guarantee. Faith communities across South Africa already demonstrate accountability through voluntary associations, ethical codes, and internal structures. This self-governance is both Scripturally consistent and constitutionally sound. External regulation, on the other hand, opens the door to ideological bias, political interference, and the silencing of minority or prophetic voices. 2025-10-10 12:29:32	No I do not	Constitutionality	Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.	Ivan	English	retired
2025-10-10 12:30:05	No I do not	Other	Greetings. I am of a view that the real reason for religion to be regulated is because the people who were supposed to defend religion did not defend and protect it. Instead, more than 95% of us who are rejecting this idea are the very same ones that spoke ill about religion itself. We commended highly those who defined religion as evil and irrelevant in our days. One fellow even pointed out that they are CASTRATING religion. And I am here asking myself why do people who want to castrate religion be the ones who are defending it from CRL? Many have constantly said CHRISTIANITY IS NOT A RELIGION BUT A RELATIONSHIP. Can we tell this to CRL and leave them to regulate religion? I do not think the church is on the same page with issue. Can we please meet and discuss this and make corrections where neccesary before we engage in a losing battle?	Oratile	English	employed individual

			To: The Honourable Members of Parliament Parliament of the Republic of South Africa Cape Town Subject: Urgent Appeal to Uphold and Protect Freedom of Religion in South Africa Dear Honourable Members, I write to you as a concerned citizen deeply committed to the constitutional values of our democracy, particularly the right to freedom of religion, belief, and opinion as enshrined in Section 15 of the Constitution. Recent discussions and proposed regulations—such as those surrounding the regulation of religious practices—have raised serious concerns within faith communities. While we understand the need to address harmful practices, we urge Parliament to ensure that any legislative or policy changes do not infringe upon the fundamental rights of individuals and religious institutions to practice and express their faith freely. South Africa is a diverse nation, and our Constitution wisely protects this diversity. The South African Charter of Religious Rights and Freedoms, endorsed by many religious communities, affirms that no person should be forced to act against their convictions or be denied the right to manifest their beliefs. We respectfully request that: Parliament reaffirms its commitment to religious freedom in all legislative processes. Any proposed regulations be subject to broad and inclusive public consultation, especially with faith-based communities. The constitutional protections of religious freedom be upheld without compromise. We trust that you will act in the best interest of all South Africans and safeguard the rights that form the bedrock of our democracy. Yours sincerely, Saartjie Duvenhage

I understand that some may use the tax exemption to unduly avoid paying taxes however that speaks to a greater issue regarding the corrupt nature of our society. Which is most corrupt as current news highlights at the highest levels of government. So there is no basis for this change. Secondly our constitution clearly outlines freedom of religion. This all reeks of a corrupt government seeking greater legal influence with which to coerce more funds and influence out of non governmental sectors	Emile	English	employed individual
2025-10-10 12:38:33	No I do not	Constitutionality	Whoever is pushing this into law certainly is not a God fearing person. The people of our country South Africa are religious, 80% of the Christian faith. We use the Bible for guidance on all matters, God and the worship of the Almighty, birth, marriage, health, wealth, how to avoid greed, theft, murder, and rape etc. The matter of our responsibility to other nations, peoples, and particularly Israel. We need more teachers and preachers of the scriptures to uplift society from being godless and secular, thieves and murderers, and rapists. China imprisons pastors; they persecute Christians and Muslims. North Korea expects citizens to worship Kim Jong Un. You can surely concentrate on finding jobs for young people and building up the economy. Why interfere with our constitutional rights and freedoms? We are not communists like the leaders of this country, some have forsaken their childhood upbringing with God fearing parents - Church and state are separate, please leave it that way. 2025-10-10 12:41:03	Yes I do	Other	The unregulated religious indoctrination of children constitutes a significant public health and ethical issue, demanding legislative action akin to other protected domains like age-of-consent laws. My primary argument is for a legally mandated age limit, similar to the drinking age, before organized religious instruction can occur. Children lack the cognitive maturity to critically evaluate complex, absolute metaphysical claims. Imposing doctrines of eternal consequences on impressionable minds is a form of coercion, preventing genuine informed consent. Belief should be a choice for mature adults, not a default setting installed in childhood. Furthermore, specific indoctrination tactics, particularly those instilling fear of hell or divine punishment, are tantamount to psychological child abuse. Systematically terrorizing a child with concepts of eternal torment for natural behaviors creates lasting anxiety and shame, causing demonstrable harm from which the state has a duty to protect them. Finally, religious schools and colleges function as ideological silos that segregate children and inhibit critical thinking. By insulating students from competing worldviews and often presenting dogma over established fact, they undermine the principles of a pluralistic society and produce citizens less equipped for democratic participation. This framework is not an attack on faith itself, but a defense of individual liberty. The goal is to end the cognitive colonization of the young, ensuring that any future belief is an authentic, informed choice made by a developed mind, free from early-life coercion and fear. Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. 2025-10-10 13:01:22	No I do not	Constitutionality	State Regulation of Religion: A Fundamental Threat to Constitutional Freedom The renewed push by the CRL Rights Commission to license and regulate religious organisations represents a dangerous overreach that would fundamentally undermine the constitutional freedoms that define our democracy. This proposal should be firmly opposed on both principled and practical grounds. Constitutional Violations South Africa's Constitution is unequivocal in protecting religious freedom. Section 15 guarantees freedom of conscience, religion, thought, belief and opinion, while Section 31 explicitly protects the right of religious communities to govern themselves and maintain their own institutions. These are not mere administrative provisions—they represent fundamental human rights that acknowledge the profound importance of spiritual autonomy in a free society. State licensing of religious leaders would violate these protections at their core. It would place government bureaucrats in the position of determining who may or may not exercise spiritual leadership—an authority the state simply does not possess under our constitutional framework. The CRL Commission has no mandate to regulate doctrine, ordination procedures, or the internal governance of faith communities. Parliament's previous rejection of similar proposals confirms this constitutional reality. The Nature of Religious Calling Faith is fundamentally different from professional occupations. Religious leadership stems from divine calling and spiritual discernment within faith communities, not from state-issued credentials. To subject this to government licensing would be to deny the transcendent nature of religious belief itself. The state has no legitimate basis for determining the validity of religious convictions or the authenticity of spiritual callings. Different faith traditions have vastly different understandings of leadership, authority, and ordination. What qualifies someone for ministry in one tradition may be en	DJ	Afrikaans

2025-10-10 13:07:17	No I do not	Constitutionality	Religion cannot be licensed or regulated by the state. Constitutionally the state does not have any say concerning the validity of religious belief. How will a government employee decide what is acceptable doctrine?! How will he/she know what is right and what is false? The false church is so prevalent that popularity is not at all a criteria for what is acceptable doctrine. Neither is the culturally acceptable fetishes that continually changes. The state is a servant of God for the benefit of the society. It is clear that it is totally impossible for such a hypothetical state employee, or, even worse, an AI bot, to determine the acceptable doctrines within religion. At the same time one can see where things go wrong, and using one's freedom of association, one needs to shun such practises. If any criminality occurs, there are adequate means of addressing this under the criminal law. It is the willingness of people to utilise the lawful options to address these incidents that needs to be addressed. The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. For the state to try to regulate religion is WRONG in all aspects. It will totally destroy freedom on all fronts - association, religion, speech, and eventually even thought. 2025-10-10 13:12:46	Yes I do	Necessity	We cannot stand to have this continue any longer. I fully support the call to protect freedom of religion in South Africa. Any attempt by the CRL Rights Commission to license, regulate, or control faith leaders and religious communities is a direct threat to our constitutional rights and undermines the spiritual autonomy of every community of faith. South Africa's Constitution guarantees religious freedom precisely so that no state body can interfere in how people worship, lead, or practice their beliefs. Licensing religious leaders would effectively give government the power to decide who is "qualified" to preach, which is unconstitutional and dangerous. I therefore urge Parliament and the CRL Rights Commission to uphold the Constitution, reject these regulatory attempts, and ensure that religious communities remain free to govern themselves without state interference. 2025-10-10 13:42:12	Yes I do	Constitutionality	The concerns that are raised by those that are against the CRL Commission's are understandable given the historic relationships between church and state. However, this new endeavour is being pursued to create a framework that can be use for religious groups to be compliant with the laws that exist in our Constitution and other acts, as well as create accountability criteria that we have full authority in establishing and and can be held to. Opposers of this framework would also have to concede that with the church domain, and religious sector at large, we have had very little success with ensuring that there are adequate channels to hold people to account. This has been the case for criminal, financial and ethical matters that have tainted the work of the church throughout South Africa. Hence, due to our inability to self-govern in areas of misconduct, and our inability to assist legitimate churches with the daunting tasks of being compliant, it is my belief that an independent framework and policies that are made through church engagement is necessary at this time. This is a satanic decision and we cannot allow such a decision made by people who does not believe in Jesus Christ. Not just constitutionality but also on the very grounds of necessity. There are enough laws to criminally charge those who do break laws. The current and corrupt government cannot even deal with it's own criminal elements and yet now wants to attack the Church. Yes I said attack because no matter how You paint it otherwise, that is what it is. The Church with it's freedoms have been the very instrument God has used to keep our Country from being in a worse state of darkness than it is, currently. The government, gets into bed with Islam who financially bleed our Country with one hand whilst using it to hand a You a carrot of promise. Islam will come back to bite You without doubt. 2025-10-10 13:57:49	No I do not	Constitutionality	Formal Submission: Opposition to the Regulation and Licensing of Religious Organisations. I herewith place on record my firm opposition to the renewed efforts by the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission) to vet, license, and regulate religious organizations and their leaders. This proposal poses a direct threat to the constitutional rights and spiritual autonomy of faith communities in South Africa. Constitutional Considerations: The Constitution of the Republic of South Africa guarantees: Section 15: Freedom of conscience, religion, thought, belief, and opinion. Section 18: Freedom of association. Section 31: Freedom of religious communities to gather, practice their faith, and govern their internal affairs. Any attempt by the state or a state institution to regulate religious belief, practice, ordination, or governance infringes on these rights and exceeds the CRL’s constitutional mandate. Substantive Concerns: Violation of Religious Autonomy: Faith is a divine calling, not a profession. Licensing undermines its spiritual nature. Lack of Constitutional Authority: The CRL has no legal mandate to regulate doctrine, ordination, or worship. Risk of State Control: Oversight of religion opens the door to political interference and loss of independence. Existing Self-Regulation: Faith communities already have internal accountability systems. Previous Parliamentary Rejection: Parliament has already rejected a similar “Peer Review Committee” proposal. Conclusion: The CRL’s proposal is unconstitutional, unnecessary, and contrary to the principles of a free and democratic society. I strongly urge Parliament to reaffirm its previous position and reject any attempt to regulate or license religious organizations or leaders. Protecting the autonomy of religious communities is essential to safeguarding the constitutional freedoms of all South Africans.	Francois	English	retired

2025-10-10 14:25:04	No I do not	Constitutionality	Why the ANC thinks the people need them to interfere in all aspects of life is a mystery, until one realizes they care only about taking peoples money and then stealing it. Why should they let the constitution interfere with their aims to try control the populations beliefs, it has not stopped them from disobeying the constitutions fundamentals. I know it works in Iran and other countries supporting the death cult called Islam whose holy teachings include the direct instruction to its followers to kill those who believe otherwise, like the churches which espouse love as the solution. Government over reach is the norm as the ANC attempt to infiltrate their tentacles into every ones lives. Their thieving ways are running out of targets so why not target peoples religious persuasions to force registration, government licenses and the money to pay for them another way for the ANC criminals to "eat" the country to oblivion. The ANC wont pay their suppliers and need money to do so, wherever they can steal they have shown time and again they will. This has nothing to do with protecting the people, and seems hell bent on invading the privacy and gatherings of communities for religious or other purposes. Especially the other purposes, where the people can gather to discuss ways to stop the further destruction of the country and withdrawing of our support for these idiots in parliament. 2025-10-10 14:31:10	No I do not	Constitutionality	As a Christian, I believe the State has no authority to license or regulate religion. Christ alone is head of the Church (Ephesians 1:22–23), and each faith community answers to God, not government. Freedom of religion means freedom from state control. The Constitution protects our right to worship and organise independently. Civil law already addresses crimes like fraud or abuse—religious licensing is unnecessary. The Bible calls the Church to hold its own leaders accountable (1 Timothy 3; Titus 1). History shows that when governments regulate religion, it leads to persecution and loss of spiritual freedom. 2025-10-10 14:31:45	No I do not	Constitutionality	True reform comes from within faith communities through integrity, teaching and self-discipline, not state interference. 2025-10-10 14:31:55	Not fully	Other	While I agree with the arguments presented on this site, it overlooks the aspect of cruelty and animal welfare. For example, killing animals in a halaal or kosher way is considered by many to be cruel and these methods do need regulation. Many Sangomas use wildlife to treat disease when there is no proven medicinal benefit for such treatment. Equally some religions argue treatment of male fertility prolems is to sleep with a virgin - how much say does the woman have in this situation. Despite their claims otherwise, religion often has a negative effect on those that do not follow the same belief system. It is at this point that regulation is needed.	Claire	English

2025-10-10 15:15:37	No I do not	Other	Freedom of religion keeps people on a religious directive in life. Freedom of religion is guaranteed by the constitution so why fiddle with that,for what reason. The state is governed by principles that goes against a lot of religious beliefs,so if you allow the state to control your life then where is the room for spiritual advancement and religious ethos. I simply don't approve of the CRL proposal to regulate religion as a way of life for its citizens.	Najmudeen	English	employed individual

2025-10-10 15:16:24	No I do not	Necessity	I can understand that government sees the need to stop people claiming that they have rights to start a religious movement or to practice religion as they see fit, however, I do not agree that this is something that government need to control through a special law. Where people are acting unlawfully surely our country has laws that allow them to investigate and prosecute them in place already. Why the need for new laws? Will these laws prevent people from demanding that their followers pay them more money or do things that are ultimately dangerous? It is my view that where such individuals exist, that the full book of the Law is thrown at them and that as a country that supports freedom of religion, that we will place measures in place that will look after the citizens of our country. Making new laws that seem dubious and that looks as if it wants to control what people of faith do that are not unlawful according our current laws seems a little controlling. I believe that those who do not know how to lead, try to control those that they are supposed to be leading by making more and more rules instead of creating better ways of helping their constituents, This seems to another example of this kind of leadership. No one likes to be micro-managed. Please show us more respect and please treat us like adults.	Darrel

2025-10-10 15:40:39	No I do not	Necessity	As a South African believer, I am deeply concerned about the ongoing push to license and regulate churches, pastors, and spiritual leaders. This move might seem harmless or well-intended, but it strikes at the very heart of what our Constitution protects — our freedom to worship God without interference from the state. My faith is not something that can be licensed. The call of God cannot be measured, approved, or restricted by any human institution. Our spiritual leaders are chosen, not by paperwork, but by calling, anointing, and the fruit of their ministry. South Africa is built on diversity — different voices, churches, and expressions of faith — yet one nation under God. If the government begins to decide who can preach, who can start a ministry, or what qualifies as a “real” church, we risk silencing the very heartbeat of spiritual freedom in our country. Yes, there have been abuses in some circles, and accountability is important. But we already have laws in place to deal with fraud, harm, or financial misconduct. What we don't need is a system that places the state above the church. I humbly appeal to Parliament and the CRL Rights Commission to protect — not restrict — our right to believe, to gather, and to serve God freely. Let the church remain under the authority of Christ, not a government license. Please, hear the voices of ordinary South Africans who simply want to worship in truth and spirit — without fear that their pastors will need permission to preach the Gospel. 2025-10-10 16:14:21	No I do not	Constitutionality	These proposals directly violate the rights guaranteed by the South African Constitution, specifically Sections 15, 18, 30, and 31, which protect freedom of religion, belief, association, and assembly. Freedom of religion means that any person should be free to gather, worship, and establish a place of worship without State approval or interference. The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. For the State or the CRL to define who may preach, what is acceptable doctrine, or where people may meet would be an infringement of religious liberty.	Annette	English	retired

2025-10-10 16:25:08	No I do not	Constitutionality	I accept that there are men and women who use religion as a means of fleecing their congregations, and who sin against them in other ways. But that is not a reason to give the state the power to control our religious life. Firstly, such regulation would be another example of the gross over-regulation we endure in this Centrist state which has us already tied up in such a vast amount of bureaucracy that our freedom is seriously limited. Then it is not appropriate to legislate to make state officials the judge of what is taught and acceptable in a Christian Church, for instance. That would steal members' freedom of conscience to obey the guidance of the word of God and of his Holy Spirit, and be a direct sin by that state against the Authority of God to guide and lead his people. It would be a sin against our Creator which would open up that state to the judgment of God and all that means to that state. The fear of God should preclude any thought of taking on the regulation of such a church. In addition there are enough provisions in our present laws to use to prosecute clergy guilty of criminal behaviour already to control such cases. Thus the CRL should be scrapped.	Jon	English	retired

2025-10-10 16:43:31	No I do not	Other	This proposed legislation is absolutely not acceptable: 1. It violates the constitution with regards to S15 (freedom of conscience, religion, believes, and perspectives), S18 (freedom of association), and S31 (responsibility pf self-regulation). 2. What is proposed in essence boils down to “man” trying to exalt himself above God to regulate God initiated actions. (a) The calling or appointment of a person comes from the Sovereign Ruler and Creator by His will and commandment, (b) the called person has a fiduciary responsibility to properly represent the Sovereign Ruler and Creator in terms of messages carried over, good faith conduct that is to reflect in honesty, integrity, self-regulation, loyalty, and more, (c) each called person will have a day of giving account to the Sovereign Ruler and Creator of all. (d) The names of the offices given to religious leaders is “man defined” for they are nothing more than bondservants, messengers and witnesses GIVEN to build others up, and that by grace and not because they are special, and (e) such servants of the Sovereign Ruler and Creator of all will be forced to choose to be obedient to the One who appointed him/her and who gave the messages or instructions in the first place or to be obedient to a “man-institutionalized-idea/desire” and this is not acceptable. 2025-10-10 16:48:35	Not fully	Workability	Religion was introduced into SA by the British and the Dutch and others. It was a concept foreign to the indigenous population. Formal religious doctrine converted people to various forms Christianity & other religions. However, in recent times, the charismatic movements have become popular. With that, and the gullibility of Africans, they have become money-making businesses often 'fleecing" followers of the hard-earned money. The reality is religion has become increasingly divisive and is a source of much conflict agitated by lay preachers in search of easy money from gullible and infatuated congregations. So, yes, regulation is imperative in a third world nation to protect individuals and communities from charismatic predators. Finally, all religions are man-made in a world where evolution is the birth of humans and all other life forms. A re-set of who we are and where we come from is imperative today and into earths continued development.	Stirling	English	business owner

2025-10-10 16:52:46	No I do not	Constitutionality	– Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. 2025-10-10 16:54:26	No I do not	Constitutionality	This proposal is oppression. I think the proposers should once more read the definitions of government systems in case they forgot what a democracy is. Oppression is the unjust and cruel exercise of authority or power over a group/groups of people, leading to their systematic subjugation and limiting their access to resources and freedom. It involves power imbalances and structural inequalities rooted in factors like gender, wealth, religion, race, age, etc. resulting in suffering, fear, and self-doubt for marginalized groups. This is not endorsement of democracy but of tyranny, disregarding the rights and freedoms of the people. It is a cruel, harsh, and unfair exercise and is associated with arbitrary rule and a severe, despotic abuse of power. Mostly: This proposed regulation is a greedy, rebellious fist that is shown to Almighty God our Creator. The God of perhaps even more than 80% of South Africans IS NOT a god of oppression. He is a God of mercy and love and justice.	Rita	English	employed individual
2025-10-10 16:54:49	Not fully	Other	I believe the concept control is not proper. The issue facing our government is more administrative than constitutional. The constitution does allow exercise of certain freedom freedoms in a number of social activities. What the constitution also does not allow is excessive enjoyment of said rights to an extent of violating the other in the name of religious freedoms. We have seen some congregants encouraged to say, eat grass, sprayed with insecticides including Doom, including numerous other acts bordering on unacceptable freedoms. 2025-10-10 16:57:24	Not fully	Constitutionality	Religious beliefs often include rules that may conflict with civil law (e.g. on gender roles, marriage, divorce). How rigidly courts or law should enforce civil norms vs allow religious autonomy is a delicate balance. Because religion is deeply personal and foundational for many, and oversight or regulation—even with good intentions—can be seen (and possibly used) as encroachment on religious freedom. 2025-10-10 17:24:56	No I do not	Constitutionality	Our freedom of religion is a constitutional right — not a privilege granted by government. The Church belongs to Christ, not to the state. There is now growing concern that government wants to begin governing and regulating religion — determining what can or cannot be preached, who can preach, believed, or practiced. This is a direct threat to our God-given and constitutional freedom. Let us be clear: there are already laws in place that protect people's rights and hold everyone — including faith leaders — accountable when they do wrong. We do not need a new system to regulate faith leaders or churches. What we need is fairness, freedom, and respect for the Constitution that already safeguards every citizen. When government starts deciding what is “acceptable” worship or “approved” belief, it crosses a dangerous line. The Church must remain free to preach truth, to serve the nation, and to stand on the Word of God without fear or interference. “We must obey God rather than man.” — Acts 5:29 Silencing the Church is silencing freedom. Faith is not a threat to democracy — it is the foundation of it. Let the Church be free. Let believers worship without fear. Because once religious freedom is lost, all other freedoms soon follow. 2025-10-10 17:31:44	No I do not	Other	While I fully understand and support the need to prevent exploitation, abuse, and criminal conduct in any sector — including within religious institutions — the imposition of state licensing and regulatory control over religious organisations directly infringes upon the fundamental rights guaranteed under the Constitution of the Republic of South Africa, particularly: Freedom of Religion, Belief, and Opinion (Section 15): Every person has the right to freely choose, practise, and express their religious beliefs. Subjecting religious institutions to state licensing undermines this right by placing conditions on their existence and operation — in effect, allowing the state to decide which beliefs are legitimate or acceptable. Freedom of Association (Section 18): Individuals and groups must be free to voluntarily associate for religious purposes without needing approval or permission from the government. State oversight risks introducing political or ideological bias into what must remain a sphere of personal conscience.	Marike	English	employed individual

2025-10-10 17:35:12	No I do not	Other	South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. 2025-10-10 18:10:03	No I do not	Constitutionality	When the State begins to dictate what a church may preach, or decides who is permitted to be ordained as a pastor, that is no longer freedom of religion — it is the erosion of it. Freedom of religion means that faith communities govern their own beliefs, teachings, and leadership under the authority of their convictions and sacred texts — not under the permission of government officials. The Constitution of South Africa guarantees every person and religious body the right to freely believe, teach, and practice their faith without interference or control from the State. So why should the government decide what may or may not be taught in a church? That power does not belong to any political institution — it belongs to the conscience of believers and the community of faith. Once the government begins to regulate doctrine or ordination, it crosses a dangerous line: the line between protecting rights and controlling belief. That kind of control is not democracy; it mirrors the actions of authoritarian or communist regimes where religion is tolerated only under State supervision. South Africa's democracy was built to prevent exactly that — to ensure that the pulpit remains free, that pastors and ministers are accountable to God and their congregations, not to government bureaucrats. A free society must allow the church, mosque, synagogue, or temple to speak truth as they understand it — even when it challenges power. Once the State decides who may preach or what may be preached, freedom of religion ceases to exist in practice, no matter what the law says on paper.	Brian	English

2025-10-10 18:59:53	No I do not	Constitutionality	The Constitution of South Africa presupposes the separation of church and state. Within the context of South Africa, 'church' may refer to any organised religion. Such a presupposition assumes that government can not and will not be governed by any religious body, which must be reciprocated toward any and all religious bodies, provided such bodies operate within the ambit of South African law. Where there are infringements on the rights of South Africans by any such body, then the state has the prerogative to intervene for the good of its citizens. Where this is not the case, the government has no place intervening. Thus, this legislation is constitutional overreach and does not uphold nor honour the spirit of our constitution. 2025-10-10 19:03:31	No I do not	Constitutionality	One's spiritual beliefs are deeply personal, and the government has no right to interfere with that. 2025-10-10 19:03:32	No I do not	Other	Greetings Brethren, As a Christian leader committed to truth, justice, and the freedom of worship, I hereby express my firm opposition to the CRL Rights Commission's Section 22 initiative. While I acknowledge the stated intention of promoting accountability and curbing abuse within religious circles, Section 22 poses a serious threat to the spiritual independence and divine order of the Church. The Church of Jesus Christ is not a department of the state it is the Body of Christ, governed by the Word of God and led by the Holy Spirit. Section 22 blurs the line between Church and State, introducing external regulation into sacred matters of faith, doctrine, and spiritual leadership. This directly undermines Section 15 and Section 31 of the South African Constitution, which guarantee freedom of religion and the right of faith communities to govern their own affairs. Scripture teaches that Christ is the Head of the Church (Ephesians 1:22–23). Any attempt by a secular body to “oversee” or “review” Christian ministry contradicts God’s divine order. Accountability in the Church must flow through biblical structures and not state-appointed committees. Though presented as a “peer-review mechanism,” the Section 22 framework opens the door to state interference in the internal affairs of the Church. History shows that when the government begins to regulate faith, persecution, censorship, and compromise soon follow. I strongly believe the Church must be accountable first to God, and second to one another in the Body of Christ. Let the Church reform the Church through prayer, unity, and Spirit-led structures. True transformation will never come from regulation, but from repentance and revival. Section 22 of the CRL Commission, while perhaps well-intentioned, violates the sacred independence of the Church and risks placing man’s authority where only Christ should reign. 			I strongly oppose the CRL Rights Commission's proposal to vet, license, and regulate religious organisations and leaders. This move directly threatens freedom of religion and spiritual autonomy, both protected under Sections 15, 31, and 9 of the South African Constitution.			
			Giving government the power to approve or reject religious groups is dangerous and unconstitutional. It risks political abuse, discrimination against smaller faiths, and state interference in matters of conscience. Religion must remain independent from government control.			
			While concerns about fraud or abuse in some religious institutions are valid, these can be dealt with through existing laws — such as the NPO Act, Companies Act, and criminal legislation — rather than imposing new, restrictive measures.			
			Suggested Alternatives			
			Enforce current laws on fraud and exploitation without targeting religion as a whole.			
			Encourage self-regulation through voluntary faith councils and ethical codes.			
			Promote education and awareness so citizens can identify and report abuse.			
			If any oversight is introduced, it must be independent, inclusive, and voluntary — not a licensing requirement.			
			Conclusion			
			The CRL's proposal undermines constitutional freedoms and could harm South Africa's diverse religious landscape. I urge Parliament and the CRL Rights Commission to reject any attempt to license or regulate faith and instead support partnerships that protect both the public and the right to believe freely. 2025-10-10 19:44:17	No I do not	Constitutionality	Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. 2025-10-10 20:03:12	No I do not	Constitutionality	History has shown us what happens when governments begin to control faith. In Nazi Germany, the regime sought to “unify” the church under state oversight — forcing pastors to register, silencing those who preached truth, and persecuting believers who refused to conform. It began with licensing and regulation, and ended with the loss of freedom, conscience, and countless lives. That same pattern begins whenever a government believes it has the right to vet, license, or approve religious leaders and organisations. Once the state claims authority over what people can believe or who may lead them, the door opens to control, censorship, and manipulation. It is a direct step toward totalitarianism. The CRL Rights Commission’s renewed proposal to regulate faith communities is therefore not a matter of “oversight” — it is a violation of South Africa’s Constitution and the freedom it guarantees. Our Bill of Rights protects freedom of religion, belief, and association precisely to prevent such interference. Faith communities are independent gatherings of believers, not government departments. They are accountable to their members and to God, not to political or bureaucratic structures. Any attempt to license religious leaders undermines spiritual autonomy and sets a dangerous precedent for state power over conscience. Yes, there are abuses within some religious spaces — but the solution is not government control. South Africa already has laws against fraud, abuse, and exploitation. Enforcing those laws is the proper route, not infringing on constitutional freedoms that protect millions of law-abiding believers. If we value democracy, we must guard against any step that blurs the line between church and state. Freedom of faith is not a privilege granted by government — it is a God-given right that government must respect and protect.	Ryan	English	business owner

2025-10-10 20:26:16	No I do not	Other	The government has no authority to regulate the Church. The Church is not a human institution—it is divine, established by God Himself. No man, no government, and no law can control what was created by the Almighty. We do not report to people, we answer to God who is eternal and above all human authority. What you are trying to do is beyond your power. Leave the Church alone and focus on solving the real issues affecting South Africans. The Church belongs to God, not to man. 			Objection to Proposed Regulation of Religious Organisations and Leaders Dear Chairperson, I am writing to formally object to the CRL Rights Commission's proposal to vet, license, and regulate religious organisations and leaders in South Africa. My objection is based on the following constitutional and practical grounds: 1. Violation of Constitutional Rights South Africa's Constitution guarantees: - Freedom of conscience, religion, thought, belief, and opinion (Section 15) - Freedom of association (Section 18) - The right of religious communities to govern themselves (Section 31) State regulation of faith communities directly infringes on these rights, undermining the spiritual autonomy of religious communities. 2. Faith is Not a Profession Religious belief and leadership are matters of divine calling, not professional certification. Licensing or state regulation of religious leaders is therefore inappropriate and unconstitutional. 3. No Mandate to Regulate Doctrine or Worship The CRL Rights Commission lacks constitutional authority to interfere with religious doctrine, ordination, worship practices, or internal governance. 4. Existing Accountability Mechanisms Religious communities in South Africa already maintain voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. Additional state oversight is unnecessary. 5. Risk of State Overreach Such regulation could make religious leaders subject to state control or influence, threatening religious freedom and diversity. 6. Previous Parliamentary Rejection Parliament has previously rejected similar proposals, including the "Peer Review Committee" system. There is no legal or moral reason to revisit this matter.			
2025-10-10 20:41:05	No I do not	Constitutionality	For these reasons, I urge the CRL Rights Commission to abandon any plans to license, regulate, or vet religious organisations and leaders, in order to respect South Africans' constitutional rights and the independence of faith communities. 2025-10-10 21:06:23	No I do not	Constitutionality	The issue of religion as ordinary human calls it, it's mystery beyond human comprehension. It is a matter of another world or another dimension called the spiritual world or realm. This world is extremely different from our world. It is therefore a myth to believe that religion can be regulated by this world's methods and principles. Spiritual things cannot be comprehended or understood by human mind. We will be fooling ourselves to believe that there is something we can d9 for God by regulating the way people worship. I also want to warn against desire to be concerned about malpractices done in the name of religion by criminals and deceivers. Again there is no human who can judge people on God's behalf, the people who do these malpractices will be judged by God Himself, we mere humans cannot help Him.	Sandile	English	employed individual

Violates Section 18: freedom of association (including the right not to join a state-approved body). Violates Section 31: right of religious communities to self-govern. Forces religious leaders into state-controlled “Umbrella” structures. Most importantly, I believe in God and that He is sovereign and His Word is the ultimate truth and He teaches that we (as His children) have a duty to test all things (spoken and done) against His Word. He is not a man that will lie and there is no turning in Him. No government can govern or limit God or His Word. No ecumenical (in the widest interpretation and not limited to the Christian Church) government structure, commission or council should in any manner have any control over the Church - which ultimately belongs to Christ Jesus as King of all kings. 2025-10-10 22:57:50	No I do not	Constitutionality	I oppose any attempt to license or regulate religious organisations. Faith is a matter of conscience, not government control. Our Constitution already guarantees freedom of religion — this proposal threatens that right and opens the door to unnecessary interference in how communities worship and express their beliefs. No government or commission should have the power to decide who can preach or practice their faith. This proposal goes against our Constitution and violates one of our most fundamental freedoms — the right to believe and worship freely. I value my freedom to believe, worship, and live according to my faith without needing permission from the state. 2025-10-11 03:27:56	No I do not	Constitutionality	Preamble I am a citizen of South Africa and a member of a faith community who affirms my constitutional right to freedom of religion, belief, and conscience, as enshrined in Section 15 of the Constitution of the Republic of South Africa (1996). I am deeply concerned about proposals by the CRL Rights Commission to establish mechanisms for the vetting, licensing, and regulation of religious organisations and their leaders. While I acknowledge the importance of accountability and the need to prevent abuse within all institutions, I believe that such mechanisms—if implemented by the State—would constitute an unwarranted infringement on religious freedom, violate the spiritual autonomy of faith communities, and contradict both biblical authority and constitutional principle. Grounds for This Petition 1. Christ Alone Is the Head of the Church, not government. State licensing places civil power above His authorit Ephesians 1:22–23 2. The Church Is Led by the Holy Spirit, Not by Civil Power Acts 20:28 3. The Kingdom of Christ Is Not of This World; the State governs earthly affairs. John 18:36 4. The Apostles Rejected Political Control Over the Gospel Acts 5:29 5. The Church and the State Have Distinct Roles Matthew 22:21 6. The Church Is a Spiritual Body, Not a Political Institution. Licensing undermines true vocation. Ephesians 2:19–22 7. Freedom of Religion Is a Constitutional and Moral Right 2 Corinthians 3:17; Constitution §15(1) Faith must remain free from political interference to preserve democracy and human dignity. Conclusion and Request • Abandon all proposals to vet, license, or regulate religious organisations and leaders. • Uphold Section 15 of the Constitution guaranteeing freedom of religion and spiritual autonomy. • Engage faith communities in voluntary dialogue on accountability without state control. • Affirm publicly that the State will not interfere in the internal affairs or leadership of any faith community. It has already taken the state 30+ years to wrap itself around marriages alone, and that system is also flawed and should be used as a case in point - the state does not have a place in traditional religions. The fact that the Constitution protects this right is sufficient. However, religions not based on traditional divine books could be a threat to social stability and these must be regulated since any person can 'create' a 'religion' that may support mutilation, bloodshed or other types of harm and these MUST be regulated by man in the absence of divine regulations. 			History shows that when the State enforces religious orthodoxy, it leads to exclusion and oppression. Religious freedom must remain voluntary and unrestricted within the rule of law. There is more than sufficient existing legislation that if enforced by the government can deal with the issues that are sated as the reason for requiring this new legislation. This is nothing more than a power grab by the corrupt ANC led pro Islamist government to suppress Christianity in South Africa. Violates Section 15: freedom of religion and conscience. Violates Section 18: freedom of association (including the right not to join a state-approved body). Violates Section 31: right of religious communities to self-govern. Forces religious leaders into state-controlled “Umbrella” structures.

			1. Accountability is necessary You might argue that while freedom of religion is important, no freedom is absolute. Religious institutions, like any other organizations, operate within society and can have significant social, financial, and even political influence. Therefore, having a vetting or regulatory mechanism helps protect people from abuse, exploitation, or manipulation done under the guise of religion. 2. Protection of vulnerable people There have been cases in South Africa and globally where so-called religious leaders have taken advantage of followers, extorted money, or even caused physical or psychological harm. Licensing and oversight could prevent such abuses and ensure that leaders are held accountable — not to restrict genuine faith, but to protect believers. 3. Transparency and trust Regulation can increase public trust in legitimate religious organizations. If there's a formal process to confirm that a group or leader operates ethically and lawfully, people will have more confidence in those institutions. It's not about controlling beliefs, but about ensuring responsible leadership. 4. The Constitution allows reasonable limitations The South African Constitution protects freedom of religion, but also allows reasonable limitations on rights if they are justifiable in an open and democratic society (see Section 36). If regulation is meant to stop harm, fraud, or exploitation, it could be viewed as a justified limitation, not a violation. 5. Other professions are regulated — why not religious leadership? Doctors, lawyers, teachers, and even traditional healers are regulated to ensure public safety. Similarly, religious leaders who operate publicly, collect money, and influence followers could also be held to ethical standards through proper oversight. This isn't persecution — it's public accountability. 6. It doesn't have to threaten autonomy

2025-10-11 10:23:14	No I do not	Constitutionality	Dear Chairperson,We write to you regarding the CRL Rights Commission's proposal to introduce legislation aimed at regulating religion and religious institutions in South Africa.fter careful consideration, we respectfully but firmly reject the proposed legislation on the following grounds:1. Violation of Constitutional RightsThe Constitution of the Republic of South Africa, particularly Section 15, guarantees every person the right to freedom of religion, belief, and opinion. The proposed legislation poses a serious threat to these fundamental rights by introducing unnecessary state interference in the internal governance and practice of faith-based communities.2. Lack of Justifiable NeedWhile we acknowledge the need to protect citizens from abuse and fraudulent practices within any sector—including religious institutions—we believe existing laws already provide sufficient mechanisms to address such misconduct. 3. Potential for Abuse and OverreachThe proposal raises serious concerns about potential state overreach, including the licensing and registration of religious practitioners and institutions. Such measures could be used to suppress minority beliefs, censor dissenting voices, or control religious expression—all of which are incompatible with a democratic society founded on freedom and equality.4. Undermining Self-RegulationMost religious communities in South Africa have long-standing traditions of self-regulation and internal accountability. Imposing external regulatory frameworks risks undermining these structures, creating conflict and confusion rather than promoting ethical integrity.We urge the CRL Rights Commission to withdraw the proposed legislation in its current form and to engage in broad, meaningful consultation with religious communities, legal experts, civil society organizations, and the public at large. The goal should be to protect citizens without compromising their right to religious freedom.	Anne	English	employed individual

2025-10-11 11:38:19	No I do not	Constitutionality	To the CRL Rights Commission and Members of Parliament, I strongly oppose the proposal to license, vet, or regulate religious organisations and leaders. Such actions are not only unconstitutional but strike at the very heart of our nation's spiritual and cultural freedom. Throughout history, religion and state have remained separate for good reason. In ancient times, spirituality guided the people — until dark forces rose to silence the old ways, crushing the ancient religions in favour of a single, state-approved faith. We cannot allow history to repeat itself. Today, once again, the ancient spiritual traditions are awakening — voices of light, harmony, and truth long suppressed are being remembered. Yet now, it is not the Church that seeks to suppress them, but the machinery of government itself, cloaked in bureaucracy and regulation. Those who lack spiritual understanding should not presume to govern the sacred. We, the people of faith — from all paths, ancient and modern — refuse to be subject to any unlawful or unethical attempt to control the divine expression of spirit. Religious freedom is not a privilege granted by government; it is a birthright. We will stand firm and defend the freedom of belief, worship, and spiritual practice in this country. For many, this freedom is all we truly have left — and it must be protected at all costs. Respectfully, Dr. Trevor Straussner	Trevor	English	self-employed

2025-10-11 11:48:01	No I do not	Constitutionality	Our constitution is very clear when it comes to both the freedom of religion (beliefs, thoughts, conscience etc) and the freedom of association. As such it covers the areas which are currently trying to be infringe upon. There are many different religious groups in South Africa and the Constitution protects all people who do, or don't profess faith including the belief not to believe. There are already many fraternities and self regulating bodies that regilate the various religions in the country. The state cannot be allowed to regulate any one or all religions as these are separate from the state.and each has its own unique traditions and doctrines. People are Constitutionally protected to believe whatever they do and the current laws of the land prohibit all people, of any belief system, from breaking any moral code and, as such, the current laws are sufficient to regulate the people of South Africa without infringing on other people's rights. So the Constitution should be upheld and not infringed upon by non-Constitutional laws	Kelly	English	retired

2025-10-11 12:11:46	Yes I do	Other	1. "The Constitution protects the right to believe, not the right to exploit, defraud, or endanger people under the banner of belief." 2. It's not about controlling doctrine or telling anyone what to believe. It's about making sure people who claim religious authority are accountable to some ethical and financial standard, just like teachers, doctors, and lawyers are. 3. South Africa has seen churches where people were told to eat snakes, drink petrol, or stop taking medication. That's not faith, it's abuse. If "religious freedom" means leaders can harm others without consequence, that's not freedom; it's chaos. 4. The same people crying "constitutional violation" often have no problem with the state regulating everyone else's professions, or with religious institutions benefiting from tax breaks and public funding. You can't have public privileges without public accountability. 5. Regulation isn't persecution. It's protection... for believers, for communities, and for the integrity of religion itself. The more entrenched Christian groups react defensively, because for decades religion in South Africa was effectively untouchable. They got used to moral authority without oversight. But democracy doesn't work that way, rights come with responsibilities.	Keri-Lee	English	self-employed

2025-10-11 12:12:42	No I do not	Constitutionality	There should be clear definitions as to when a religion becomes a cult, and this should center around extortion of financial wealth, harm to self and harm to others. 2025-10-11 12:16:42	Not fully	Constitutionality	While I fully support a constitution which grants us freedom of religious choice, I am concerned about the number of "pop-up" churches created and led by people with no formal religious training. Do these people have the right to call themselves pastors or prophets and to expect their followers to contribute financially to their ministries? Should they not have to attend a registered seminary, college or university before embarking on their ministries? There has been so much abuse of religious faith in the past that it might be wise to have some control over what could become an unhealthy cult.	Marguerite	English	retired

			Stakeholders in the state do not possess the moral character nor the necessary knowledge and understanding in matters of faith. They have not taken the time to apply their minds to consider such matters in earnest. Therefore their approach would carry more weight concerning legal frameworks and humanistic narratives. Neither do I believe their decision -making will be on a merit by merit case study, considering that all faith based organizations do not adhere to the same basic principles when it comes to doctrinal ideologies. Governments are therefore not equipped to make rational assessments in matters of such a nature, unless the human rights of individuals and the laws of a country is transgressed. 2025-10-11 15:35:53	No I do not	Constitutionality	This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.		D	English	unemployed individual

			I strongly object to the CRL Rights Commission’s proposal to regulate religion, religious leaders, and faith communities. This proposal threatens freedom of religion and association as guaranteed by the Constitution of South Africa, including: • Section 15: Freedom of conscience, religion, thought, belief, and opinion • Section 18: Freedom of association • Section 31: Freedom of religious communities to govern themselves Faith is a divine calling, not a profession, and cannot be licensed or controlled by the state. The CRL has no constitutional authority to regulate doctrine, ordination, worship, or religious associations. Any attempt to do so would undermine the independence and spiritual autonomy of faith communities. State regulation poses an existential threat to genuine religious freedom and risks turning spiritual leaders into subjects of state control. South Africa’s diverse faith communities already have effective voluntary accountability systems — including codes of conduct, charters, and fraternal — that ensure integrity without government interference. Importantly, Parliament has already rejected the CRL’s earlier attempt to establish a “Peer Review Committee” system. There is no valid reason to revisit this matter. For these reasons, I respectfully urge Parliament to reject any legislation or framework that seeks to regulate religion or faith communities in South Africa.

Religion isn't a static thing. As one grows so beliefs may change and another "home" found for such beliefs so i t's totally stupid to expect people to (a) register in the first place and (b) update such registrations as they search for a new "home" which new home may only last for a few months before trying another one. Surely they have better and more productive issues to put their little brains to work on. 2025-10-11 17:21:51	Not fully	Constitutionality	While I recognise the freedom of each individual to follow their own beliefs and faith, there have been some religious groups that I have encountered where basic human rights have been violated in the name of religion (rights to life, to dignity, to food and shelter). In such cases, I might agree that vetting or peer review is necessary. But whether it will be effective in regulating and preventing these groups from continuing their actions is disputable. I would rather say that allowing religious freedom to continue may, I hope, lead to the leaders of such groups coming to a realisation of their wrong as they face the law (laws that protect human rights, etc) and its' consequences, and perhaps even interactions with people from other religious groups. And hopefully, they will change and be led to a renewed and eternal faith that is unlike the one they had before.	Josef Ruben	English	employed individual

			I object to any proposal to license, vet or otherwise regulate religious organisations or religious leaders. Such state regulation would violate the Constitutionally protected freedoms of conscience, religion, belief and association and the right of religious communities to govern themselves. Faith is not a profession to be licensed by the state. If individual ministers or leaders commit criminal acts (for example, forcing people to drink petrol or otherwise endangering congregants), they must be investigated and prosecuted under South Africa's criminal law (assault, attempted murder, fraud, etc.). The appropriate response to abuse is criminal enforcement against the perpetrators — not a system of state licensing that threatens religious liberty and undermines religious self-governance.

2025-10-11 18:14:08	No I do not	Constitutionality	No person is exempt from the civil or criminal laws. If a religious leader is engaging in abusive or criminal conduct, there are sufficient laws and mechanisms to deal with this. The state has no business regulating the theology and practices of religious institutions. What is particularly worrying is that the CRL wants powers to license and regulate religions leaders. The membership of the Section 22 Committee appointed by the CRL is an indicator of how this can be abused. All the appointed members are from Pentecostal churches only. Why are these churches, whose doctrines and beliefs are rejected by many Christians, placed in this position of authority? Indeed, some Christians will argue that it is precisely the Pentecostal-type churches that have opened the door to the abuses that need to be combated - fake miracles, financial abuse, authoritarian leaders, etc. The diversity among Christian churches and denominations is such that there is no agreement about which beliefs and practices are right or wrong. If a body is created to regulate churches, its members' own beliefs and biases will become the yardstick for determining which ministers can be licensed and with churches are registered. This initiative appears to be a not-very-subtle attempt by the government to police the religious sector so that only those churches perceived as government-friendly are permitted to operate. 2025-10-11 19:21:53	No I do not	Constitutionality	Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. Having a corrupt government dictate religion is the equivalent to the lunatics running the asylum Telling people what to believe! Who in their right mind would allow a pagan or a satanist to regulate Christianity?! If they want to regulate stuff let them regulate the witchdocrors and witchcraft and the occult and the various cults and the secret societies and their strange clubs and covens. Let them regulate the members of parliament who make sacrifices to demons by biting off the heads of chickens while standing in a stream of water.	Charmaine

2025-10-11 20:09:27	No I do not	Constitutionality	My assessment — • It raises fundamental tension in democracy: between the freedom of religion as a core value, and the need to protect citizens (especially vulnerable ones) from abuse, exploitation, or harmful practices, even if done in the name of religion. • Many are suspicious because in South Africa religious organisations have had a history of being relatively unregulated in internal practices, and it's not always clear who holds them accountable. At the same time, people are wary of letting government get too close to faith, worship, doctrine. • There is also a trust issue: Will the government / CRL apply regulations fairly? Will they respect diversity? Or will they suppress dissenting or minority religious voices?	Jake	English	retired

2025-10-11 20:23:26	No I do not	Other	In attempting to control religion, the South African government is seeking to establish Statism - a belief system built on the assumption that the State alone knows what is right and wrong, and that the State alone knows how to do good to the people. The State seeks to be everyone's Big Brother, attempting to look over everyone's shoulder. This is unnecessary, as existing laws outlaw the kinds of sins that the CRL Commission seeks to eliminate; more regulation is not the answer, but enforcing existing alw would go a long way to address the existing problems. It is also unworkable, as it is impossible for the CRL Commission to adequately regulate eqach case in the way that they propose. Most importantly, in attempting this regulation in the case of the Christian Church, the State is setting itself up against the authority of Christ. It is required that our government officials recognise their personal and collective responsibility to the Living God, and King of kings. All governments are established by God, and Christ alone if Head of the Church. The government is conspiring to usurp the rule of Christ by attempting to control the Church in this way. 			Apart from the Constitutionality, it is a serious infringement on individual liberty and freedom of conscience.			
			Ever since the devastating and brutal European religious wars, religious freedom has been seen as essential for a peaceful society; requiring that governments refrain from interference in religious matters and religions refrain from trying to run governments. Can it really be that this "settlement" has been forgotten?			
			I quote below from "The historical path of religious tolerance and its justification: A comprehensive analysis "			
			https://wjarr.com/sites/default/files/WJARR-2024-2442.pdf			
			As to the historical origin of tolerance in modern times:			
			"The rise of philosophical theories related to religious tolerance occurred in the Enlightenment Age when church and state became independent and respectable arguments for religious tolerance blossomed [13]. According to these views, the shift to a tolerance culture was motivated by a combination of urbanized trade and the Protestant Reformation that began in 1517, as well as a reaction to Europe's bloody religious wars in the sixteenth and early seventeenth centuries, which did not succeed in creating a lasting compromise of variation between Catholicism and the eight different Protestant faiths [4]. The Thirty Years' War (1618–1648) ceased with the Peace of Westphalia (1648). This peace treaty organized European laws to allow Christian minorities to exist [14]."			
2025-10-11 20:36:56	No I do not	Other	There is also an international law aspect to tolerance : "2.4. Evolution of Religious Tolerance as International Law in the 20th Century" Same article. eg. I strongly disagree with this approach. The country is grappling with pressing challenges, including sluggish economic growth, high unemployment rates, pervasive corruption, and the high number of illegal shebeens in the town ships that destroys our youth. 2025-10-11 20:59:00	No I do not	Other	Before I even get into the spiritual side of this matter, let me first point out the legal implications: - The Constitution of South Africa, states that every citizen has the right to: (1) Freedom of conscience, religion, thought, belief and opinion (See Section 15) (2) Freedom of association (See Section 18) (3) Freedom of religious communities to govern themselves (See Section 31) The state / ANC Government cannot possibly involve themselves in religious matters the way they do when it comes to employment / labour issues. An individual's faith cannot and should not ever be regulated by the state. It should definitely NOT be licensed. What on earth has the state to do with an individual's religious beliefs? The Civil Rights Commision does NOT have the authority to regulate any kind of doctrine, ordination, worship or religious associations and should they try to further their aim in this regard, they are then imposing on my right to religious freedom as well as that of all various religious communities. There is NO WAY that the religious leader of any registered religion should become subservient to state control. This idea was rejected by Parliament years ago for good reason — it poses a direct threat to religious freedom, community autonomy, and the constitutional order of our democratic society. If still unconvinced read the stories of communist control of churches in Russia and communist block European countries in the latter part of the 20th century and also current day examples of China and North Korea. Throughout history, government control of the Church has always infringed on freedom and resulted in persecution. So what makes our ANC government, who have failed at everything they have touched, think it can end any differently.	Dave	English	business owner
2025-10-11 21:56:46	No I do not	Necessity	In the first place, the CRL proposal exhibits an unprecedented overreach by the State into religious organisations. One of the pillars of society is the separation of religious organisations and the state. From a Baptist perspective, the State cannot (1) dictate the church's doctrine, (2) determine the church's membership, and (3) appoint the church's leaders. By regulating religious practitioners, the State is overreaching (even abusing) its powers. Moreover, not all religious institutions subscribe to or are affiliated with an umbrella organisation. Secondly, South African already has laws and regulations in place to deal activities which are unlawful and harmful to individuals. If the State was concerned about the safety of its citizens, it should encourage the reporting of harmful and unlawful activity.	Parmesh	English	employed individual

2025-10-11 22:09:42	No I do not	Other	I believe that every individual has the right to choose who they believe in. Faith in God as creator is something that defys man's common knowledge of things and life and existence of all life forms. Mere man trying to curb and control another human being to worship or not to worship their God is like trying to brace the wind, you simply cannot. You can make me sit down but I'll still be standing on the inside. If I chose to say that this decision infringed on my constitutional right, mere man can have that constitution changed taking away that so called rights, again to suit what they are trying to carry out and implement. So I will simply not agree to the passing of this proposal and pray God doesn't allow it to be passed. Having said that even if they do pass this proposal the position of my God in my life will not change and neither will my worship unto Him be changed, simply because I don't serve and worship mere man but an All powerful, Almighty living God. and creator. I don't agree to the passing of this proposal.	Louis	English	unemployed individual

2025-10-11 22:27:32	No I do not	Constitutionality	I believe this attempt to regulate religion is unconstitutional. As a Christian in a healthy church that follows biblical principles based on the bible, it already calls for accountability for all in the faith. This accountability is foundational for a healthy and spirit filled church. The church is lead by people, not a person, held in account to the Lord. It's not a free for all. Regulating who leads and who cannot lead is NOT guided by the law, but is guided by biblical principles highlighted in the biblical word.	Robyn	English	employed individual

2025-10-11 23:36:43	No I do not	Constitutionality	The “incidents” presented by CRL Rights Commission to motivate the regulation of religion are cases that nobody in any religious community would wish to happen in their community. Fortunately, harmful, fraudulent, and abusive behaviours are ALREADY illegal in South Africa. Regulating mankind’s divine gift of faith with political power undermines the very principle of divinity. It is unconstitutional to dictate by law what/who we may/ may-not exercise faith in. An attempt at spending seven hundred and fifty million rand in the initial phase of starting up an organisation that nobody asked for is something that in itself should be investigated. The existing corpus of laws and regulations in South Africa is sufficient to keep our citizens protected from harmful individuals/groups. Let’s rather campaign to promote the reporting of potential hidden criminal activities/behaviours among the religious communities, and provide protection for anyone who may be endangered for reporting such crimes. 2025-10-12 00:32:03	No I do not	Other	Government needs to be very careful not to try tie God Almighty’s hands. This is what he is... He is ALMIGHTY and all powerful. It is a terrible thing to come up against the wrath of the God of all creation, the God of the universe. Who are you oh man to dictate to God. He is not a man that he should lie. God is not weak. He may take a persons life in the twinkling of an eye. He is equally able to heal and restore a repentant person back to life. Be sure you government officials that when your life is taken from you that you have not denied the grace and mercy of God; given through Jesus Christ His son, the savior of the world that you land up in hell for eternity where there is no escape and no second chance. It could be any day now. I warn you to take heed and repent of your evil ways and turn back to God before it’s too late. He is ready and willing to forgive you and save you from yourself. Turn to him, and He will help you to lead and to rule. By the same power of his Holy Spirit that raised Jesus from the dead will he help you. Do not be stiff necked and rebellious as were his people that he led out of captivity only to die in the desert because they forgot God and turned to idols made by man’s hand.	Beverley	English

2025-10-12 06:40:22	No I do not	Workability	Protecting one's freedom to practice their religion is paramount to freedom and democracy, we can't have the government regulating how we worship and how we pray, and how we teach from the Word of God. It takes away from the Holiness of faith inspired teachings. Many of times faith makes no reasonable/realistic sense. How can one regulate things that we cant understand. However those moments that dont make realistic sense produce life changing miracles. Any country that truly values religion does not regulate it they embrace it.	Shaniel	English	employed individual

2025-10-12 07:29:06	No I do not	Necessity	Regulating religion or requiring government approval to open a church or faith-based centre violates the South African Constitution’s guarantee of freedom of religion and belief. Faith is a personal conviction, not a state-controlled activity. Once the government decides who may worship or preach, it undermines democracy, silences conscience, and opens the door to political abuse. Religious communities already follow safety and legal standards — they do not need state permission to serve God. True freedom means the state protects belief, not controls it. 2025-10-12 07:39:33	No I do not	Other	I write to express concerns regarding the CRL Rights Commission's announced plans to establish a committee to pursue legislation for state regulation of religion. The proposal would require religious leaders to register with state-controlled umbrella structures and obtain licenses. This raises questions about alignment with constitutional provisions including Section 15 (freedom of religion), Section 18 (freedom of association), and Section 31 (right of religious communities to self-govern). The estimated implementation cost is R750 million for startup plus R250 million annually, which is five times the CRL Commission's current annual budget. This raises questions about fiscal sustainability and taxpayer impact. South Africa already has comprehensive legislation addressing criminal conduct, including the Criminal Law, SORMA, and the Children's Act. These laws apply to all individuals regardless of religious affiliation, and religious freedom has never provided immunity from criminal prosecution. I respectfully request that these factual considerations be taken into account in policy deliberations.	Claude	English	self-employed

2025-10-12 07:54:08	Yes I do	Constitutionality	According to my own view it will address fake Churches that take an advantage of this open constitution of South Africa that allows everyone to come in our country to do as they wish. Laws must be put in place to address those who capilize on our poor citizens and take all what they have worked for,we need protection even globally.	Professor Vuyani	English	employed individual

2025-10-12 07:54:43	No I do not	Other	Jesus save my life. I believe in Him and will die for Him. Nobody can take away the freedom of your faith. And it is wrong for someone to say that we cannot have freedom of our faith. One thing for sure, He will come back to Judge. Do not be fooled. Heaven and Hel is a reality. Choose wisely. 2025-10-12 07:54:52	No I do not	Constitutionality	This playbook is similar to the disastrous one that led to the law on Expropriation of Land/Property without Compensation (ELC). Since the Constitution addresses the issue of land, there was no need for the Act. In the case of religious matters the same Constitution, sections 15 (on freedom of conscience, religion, thought, belief and opinion); section 18 (on freedom of association); and section 31 (freedom of religious communities to govern themselves) are all adequate provisions that don't need another law. 2025-10-12 07:57:16	No I do not	Constitutionality	Faith is the cornerstone of this nation. If laws start to gorvern how we worship and where we worship God that is a clear sign of government stating that in the future abolishing of faith practices is imminent.
