2025-10-12 08:28:46	No I do not	Constitutionality	I do not believe the South African government should be allowed to regulate religion in our country. Every individual has the constitutional right to freedom of belief, thought, and religion - these are deeply personal matters that should never fall under government control. Allowing the state to interfere in religion sets a dangerous precedent and risks giving it excessive power over people's private convictions. Instead of trying to regulate what citizens believe, the government should focus on what truly matters: eradicating corruption, fighting crime, improving service delivery, and running the country with integrity, accountability, and efficiency. My concern is abuse of power vested in pastors by the congregants. We have seen many times pastors making people each grass or be sprayed with Doom in the name of cleansing them of their sins. We have also seen pastors taking 3 or 4 times of contributions from the unsuspecting poor people as conditions to pray to for them so that they can get jobs. 2025-10-12 09:01:55	No I do not	Constitutionality	The proposed State regulation of religion is unconstitutional, unnecessary in light of existing legislation, unworkable, unaffordable and an unfair targeting of the Christian religion (what about traditional healers and sangomas, and all the other religions?). Subject: Urgent Call for CRT to Prioritize Pressing National Issues Over Legitimate Churches It is crucial that the CRT (Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities) redirect its focus towards the most urgent and widespread issues affecting our nation, instead of targeting legitimate, law-abiding churches. While accountability is important in every sector, there is growing concern that unnecessary interference in genuine religious institutions diverts valuable resources and attention from far more serious problems plaguing our society. South Africa is currently facing: Rampant corruption in public hospitals, municipalities, and other state entities; Unprecedented levels of violence in schools and communities; The ongoing crisis of drug abuse, particularly among our youth and in our schools; Sexual abuse of children, which remains inadequately addressed; Rising unemployment, especially among young graduates, whose degrees are becoming redundant due to lack of opportunity; The looting of civil servants' pension funds and other financial irregularities that are weakening public trust in governance. In this climate of widespread social and economic decay, the CRT should prioritize investigating and addressing these serious national concerns. Legitimate churches and religious organizations many of which provide essential community support and social relief should not be unfairly targeted or disrupted. There is a growing perception that these interventions may serve as a gateway to misappropriation of funds or politically motivated control, which is deeply troubling. We call on the CRT to refocus its mandate, demonstrate integrity and fairness, and direct its oversight towards institutions where fraud, corruption, and abuse are well-documented and significantly more damaging to the public interest. Let the CRT do what is right start where the crisis is deepest, and leave legitimate churches to continu	Jordan	English	employed individual

			These proposals directly violate the rights guaranteed by the South African Constitution, specifically Sections 15, 18, 30, and 31, which protect freedom of religion, belief, association, and assembly. Freedom of religion means that any person should be free to gather, worship, and establish a place of worship without State approval or interference. The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. For the State or the CRL to define who may preach, what is acceptable doctrine, or where people may meet would be an infringement of religious liberty.

			The problem here is the government is now overstepping its boundaries. Why is only the Christian faith focused on here? I have read the articles so I am clued up. Will the government also regulate Islam, The Sangomas? why only the religion to which most white people belong to? Makes you sit up and pay attention. The reason being is because our government hates Israel so much that they would want to regulate and destroy anything that resembles faith and or the truth. How can the ANC who is suppose to have been the "liberators" now gag over 60% of all South Africans? How can a government entity who does not ascribe to the faith now come and try and govern a people not their own. The ANC is now worse than any apartheid government ever was - and trust me - The promise is that if you touch what belongs to God this same God will sort you out. IF the ANC, who is no longer the majority party does this, then it will be their end. Its never the Christians rioting and causing chaos - always the communists, Marxists. We are not an Islamic country, Islam is only 4% of the population. We say no to this regulation. It is obvious the government fears Christians.

			"I am a Spirit-filled child of God, living under the government of the Holy Spirit — not man. My faith is not a cultural practice, it is a divine relationship with the Living God through Jesus Christ. While I respect the laws of our nation and the role of the CRL in promoting peace and protecting rights, I believe that no earthly authority should regulate or control the move of God or the expression of faith. The Church is governed by Christ Himself, and the Holy Spirit is our ultimate guide, teacher, and ruler. The Word of God teaches that ‘we must obey God rather than men’ (Acts 5:29). Therefore, any form of regulation that attempts to silence, monitor, or control the ministry of the Holy Spirit stands in opposition to the freedom we have in Christ (2 Corinthians 3:17).

2025-10-12 10:17:44	No I do not	Other	1. From Mrs Xaluva's comment it is evident she does not know God; she is a "natural man," therefore unqualified to judge the Church 1Corinthians 2: 14--15. 2. The occult comprises seed groups. Seed group five and seed group six comprise antiChrist government officials and seed group six comprises false clergy. They have been given a mandate to attack the Church through antiChrist regulation. (Bailey, Externalisation of the Hierarchy 1998:47). 3. God knows how to deal with stares. But through crafty means anti-Christ government officials, are trying to uproot the holy to leave the evil (see Parable of the Tares). Matthew 13:27). 4. Government cannot tell the Church who is called. Government cannot tell the Church what to preach. Our calling is not from man and our preaching is not of man. (1 Corinthians 1:1; 2:4) 5. Government wants the "lowest of the people," those who are not really called by God to be the ones in Church. This is a demonic strategy that was used before (1Kings 12:31) 6. Regulating the church is a satanic directive to bring about a One World Religion through antiChrist proponents known as New Group of World Servers (Bailey, Rays and Initiations 1988:233). 7. From the year 2025- 2039 the kingdom Darkness set itself to begin the release of demonic forces through destruction of Christianity. The Church stands in the way of this Plan. (Bailey, Externalisation of the Hierarchy 1957:531). 8. A false clergy is not false because of the money he swindled someone, a false clergy is one who has the Spirit of the antiChrist behind him. The spirit of the antiChrist pervades all spheres of life 1John 4:1--4. 9. The Church is the pillar of truth, and today's world is hostile to truth. This CRL is an attempt to temper with truth of Jesus Christ. (1 Timothy 3:15).	Nomvula	English	self-employed

2025-10-12 10:27:06	No I do not	Other	Freedom to worship our CREATOR is not a man given right so therefore it can never be a "human right" based on humanism... man's reasoning and logik using Greco-Roman philosophy. It's a right given to us at conception and birth by our CREATOR, YAHUAH. You can never legislate CREATOR given rights, to assume that position is to think you are a "god". Neither can they be taken away or conditions placed upon it. There is common law and then there the LAW of YAHUAH which supercedes all other so called man made legislation. When man's legislation is in conflict with the LAW of YAHUAH we are compelled to fight against it and not to obey. To do so would be to bow down to man because whom you obey you serve and worship. 2025-10-12 10:32:01	No I do not	Constitutionality	This is the typical rhetoric of a dictatorship government who are hell bent of controlling every aspect of the population of South Africa. The ANC government is communistic order where the elected dictators enrich themselves whilst looting everything they can get their hands on. Now they want to control our religious beliefs as well. There is no place for such ludicrously in our society. We are a democratic sovereign nation with an excellent, well thought through Constitution, which these dictators now wish to control for their own narrative. Why? Because they are wishing to impose their communistic ideology on our nation. This is morally wrong and we, the South African people should tell these communist thugs to go and get stuffed. Cyril and his cohorts should all be in gaol for the tyranny and looting they have undertaken in the last 30 years of our fragile democracy. Shame on them! Mandela is probably turning in his grave given the way the cronies of the ANC government are running our beautiful country and its peoples into the ground. There is no way that the peoples of SA can allow this communistic regime to dictate our lives and the future lives of our children and their children. Enough is enough! This madness must be stopped! The last straw is now upon us....to try and control our religious freedom. let's stand up and fight this madness with tooth and nail.	Aubrey	English	self-employed

2025-10-12 10:33:14	Yes I do	Other	I support the legislation only on the basis that there are countless fraudsters in many countries, including South Africa, who prey on the religious beliefs and susceptibility to suggestion/persuasion of others to take advantage of them. Such legislation would provide better basis for prosecuting such individuals and potentially protecting those who want to engage in 'real' religious activities. For what it's worth, I'm agnostic, but am not opposed to people having any religious beliefs if they feel it does something positive for themselves. I only take issue with the practise of religion when people use their religion or pretend to partake in a religion to cause problems for, oppress or take advantage of others. 2025-10-12 10:47:43	No I do not	Other	I believe that regulation on your religion is not constitutional, and you should have a choice that's why you've been given a brain to think and a conscience to guide you. The moment a government begins to dictate what you may or may not believe, it crosses the line between governance and control. Religion is deeply personal, and once the state assumes authority over belief, it opens the door to controlling every other aspect of your life your speech, your actions, your associations, even your thoughts. That is how a society drifts toward martial law when the government stops protecting your freedom and starts enforcing obedience. A country built on liberty cannot thrive under fear or forced conformity. True democracy protects the individual's right to believe, think, and worship freely.	Kayal	English	self-employed

2025-10-12 10:51:40	No I do not	Constitutionality	Abuses by certain religious leaders are committed by a very small and marginal minority. The law is there to protect people from abuse. Most churches have governance bodies with rules and procedures. My own denomination has a rigorous selection process for ministers. All churches also have to submit constitutions for registration as NPO's. No further regulation is needed. State interference is not required and will infringe on religious freedom. The Human Rights Commission is well established and can deal with infringements on rights and there us legislation which protects people from abuse and hate speech. 2025-10-12 10:52:25	Not fully	Constitutionality	Choice of religion should be a personal decision, HOWEVER, if there are people exploiting the vulnerable and gullible.... which we've seen happen many times, then I do think local authorities must intervene or appropriate regulations are in place to put a stop to such weird practices. An example: spraying insect repellent on a congregation - in this instance there needed to be a safe and efficient way for people to report this behaviour and authorities have the power to investigate swiftly and put a stop to it. The other VERY important issue (global and local) is that of allowing one religion to dominate and become aggressive within society. The gradual (and sometimes not so gradual) infiltration of Islam is concerning and our provincial and national governments should be keeping an eye on this development. 			Religion and ones religious beliefs are senior to governments and any organisation established by man.			
			It is an individual's inalienable right that no one has the right to regulate or have authority over.			
			There are a multitude of religious and spiritual believes on planet earth and no one has the right to tell another that they are going to govern and control their religious or spiritual beliefs. This would impose a spiritual and religious dictatorship over the population by way of a self appointed ministry of religion with spiritual views apposed to other's.

			I am writing to express my concern about any government involvement in or control over religion. Faith is a deeply personal matter, and I believe that every individual should have the freedom to choose their own beliefs without interference from the state.			
			A clear separation between government and religion protects both our democracy and our right to worship — or not to worship — freely. I urge you to uphold these principles and ensure that our government remains neutral in matters of faith.

Religion is an extremely diverse and complex subject intertwined with culture and tradition with more than 4000 organisations worldwide. Members of the same group often disagree on key topics. Trying to regulate religion will therefore be impossible. Government should consider regulating themselves as they are spinning out of control. The licensing idea is obviously another money-making scheme that is meant to pay the salaries of a bunch of nincompoops on the CRL Rights Commission.	Molahlehi Daniel	English	Non-profit
2025-10-12 12:52:06	No I do not	Constitutionality	The CRL Commission proposal to regulate religion can in no way be justified because the Almighty God Himself gives us a free choice on whether we want to serve Him or not, This CRL-proposal wants to take away our religious freedom which the Constitution guarantees all religious communities, and also wants to take away the freedom religious communities have their belief and freedom of expression. In the process the biggest drawback of the CRL proposal is that the government will then eventually themselves play God over us and we will not be allowed to believe and do what God tells us to believe and to do. 2025-10-12 13:13:50	No I do not	Constitutionality	We have enough laws in place to deal with abuses. Furthermore our Constitutional freedom of Religion,Speech and of freedom of association is sacrosanct (untouchable). These were the main issues that the New South Africa was based on. Why do we now have people wanting to undermine those very principles by subjecting people to an oppressive Rights Commission that stand for everything opposite to these hard faught and enshrined laws? We as a Nation cannot allow people in Government to oppress the citizens of this Country any longer by using the excuse that they are supposedly looking out for abused people by the Religious Leaders in Christianity. What about the other Religions of this Country? If one Religion is investigated all must be investigated. Equality is another Constitutional matter that the Government conveniently overlook in this instance. Every citizen is equal before the law and therefore affiliations with Institutions based on Religion should not be singled out for scrutiny by a Government funded Commission that does not have the best interest of the citizens in mind. Also the "take it or leave it" attitude as expressed by the Chairperson of this Commission will not allow for fair dialog .	Joey	English

2025-10-12 13:14:51	No I do not	Other	You cannot treat a nation like robots to control. Basic rights to worship, speak freely and have access to necessities for health should never be interfered with. – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. 2025-10-12 13:22:49	No I do not	Other	It is UNCONSTITUTIONAL - Violates Section 15: freedom of religion and conscience. - Violates Section 18: freedom of association (including the right not to join a state-approved body). - Violates Section 31: right of religious communities to self-govern. - Forces religious leaders into state-controlled “Umbrella” structures. It is UNNECESSARY - South Africa already has robust laws (Criminal Law, SORMA, Children’s Act etc.) that cover all criminal abuses. - The issue is not the absence of law—it is poor enforcement of the law. - Religious freedom has never been a defence to excuse criminal behaviour. It is UNWORKABLE - Who decides who qualifies as a “religious practitioner” or can register a religious organisation? - Which doctrine will be “official”? Who sets the standard? - How will licensing be enforced? What if you disagree with the Peer Review Committee? It is UNAFFORDABLE - Estimated cost to taxpayers: R750 million start-up + R250 million annually. - CRL’s current annual budget is one-fifth of what this scheme would require. - Who do you think will pay the license fees for “approved” religious organisations and religious practitioners? 2025-10-12 14:26:21	No I do not	Constitutionality	Dear Bernice Wendy The Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission) is again pushing for mechanisms to vet, license and regulate religious organisations and leaders. This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.	Wendy	English	business owner
2025-10-12 14:26:50	No I do not	Constitutionality	Section 15 of our Constitution guarantees an absolute right to freedom of conscience, freedom of religion, thought, belief and opinion. The Constitution has clearly not given the State power to regulate thought, belief or religion. This would include such way out or extreme religions or belief systems such as Satanism, Christian Nationalism, Muslim Fundamentalism, and even stranger cults such as snake eating or petrol drinking or male or female circumcision religions. However, if If a religion is likely to harm or destroy the lives of some of its adherents or others, then our criminal law is available to be used to counter the anti-social and dangerous activities of that religion or cult. This makes perfect sense because the State cannot control, prescribe or proscribe what citizens believe no matter how unhinged those beliefs are.. Lunatic asylums and jails are available if such beliefs harm or are likely to harm anyone. Legal mechanisms such as restraining orders, interdicts and criminal charges are available to those who are or may be harmed by dangerous behaviour motivated by weird beliefs or religious fanaticism. The attempt to regulate religion is therefore unconstitutional and unworthy of a free democratic society in which the rule of law should be paramount and authoritarian bodies should not be empowered to sit in judgment and draft rules to regulate belief systems they don't approve of	charles	English	business owner

2025-10-12 14:27:58	No I do not	Constitutionality	Faith must always be free. In South Africa, our Constitution protects the right of every person to believe, worship, and live out their faith without government control. Churches are communities of faith, not branches of the state. The moment government starts telling people how to worship, who can preach, or what to believe, it violates the freedom that keeps our democracy alive. The state's role is to protect people from harm, not to regulate their faith.	Gavin

			It is against the Constitution.Absolutely, Benita — here’s a clear and compelling explanation of why freedom of religion is essential, written in a way that could be used for teaching, outreach, or even a sermon: --- ? Why We Should Have Freedom of Religion Freedom of religion is a cornerstone of a just and compassionate society. It protects the dignity of every person and allows communities to flourish in peace. Here’s why it matters: 1. It Honors Human Dignity - Every person has the right to seek truth, meaning, and connection with the divine in their own way. - Forcing someone to follow a religion—or forbidding them from doing so—violates their conscience and identity. 2. It Promotes Peace and Unity - When people are free to worship, they’re less likely to feel oppressed or rebel. - Respecting different beliefs builds bridges between communities, reducing conflict and division. 3. It Encourages Learning and Growth - Freedom of religion allows people to explore different faiths, ask questions, and deepen their understanding. - It creates space for dialogue, reflection, and spiritual maturity. 4. It Protects Minority Voices - Without religious freedom, only the dominant group’s beliefs are allowed. - This silences smaller communities and can lead to persecution, discrimination, or even violence. 5. It Fuels Compassion and Service - Many faiths teach love, generosity, and care for the vulnerable. - When people are free to live out their beliefs, they often serve others—feeding the hungry, sheltering the homeless, and comforting the broken.

2025-10-12 14:38:56	No I do not	Constitutionality	I do not support the proposal to vet, license and regulate religious organisations and leaders because it threatens one of our most fundamental rights in South Africa, which is freedom of religion. Giving the state the power to decide who may lead or operate faith communities would interfere with their spiritual autonomy and undermine their ability to govern themselves according to their own beliefs and traditions.

2025-10-12 14:42:57	No I do not	Other	State regulations and Religious Beliefs should never mix. Christianity is not a religion , it is faith, a way of life where Christians choose to follow God. In the Bible, Christians are taught to give to the state what belongs to the state and to God what belongs to God. So God already provides for the state. However God as our Creator is above all. Nobody should be allowed to control the beliefs that a person has and how they worship. I believe the various religions need to ensure that people are not taken advantage of, but at the end of the day God will be the person to judge and as human beings it is not our role to judge, or tell anyone how they can worship. 2025-10-12 14:44:15	No I do not	Constitutionality	The CRL is not the correct body to have a say over the church of Jesus Christ. The church is not to be confused with other secular institutions, but it is a body under the headship of Jesus Christ. There are already enough legal procedures in place to deal with violations in church, should they occur. The two or three pastors who infringed, eg the Doom case, is not the norm and is long gone and were dealt with. The solution is definitely not the CRL whose chairperson has already shown that she is disrespectful towards christians by maintaining that a christian who hears God talking should be in a psychiatric ward. This is near blasphemy since Jesus Christ said in the bible that His sheep hear His voice. The Word of God (Bible) is authoratative and not the disrespectful utterances of someone who should never be allowed to speak on behalf of Christians. We demand Ms Xaluva out and absolutely no control of the CRL over the body of Jesus Christ. Networks, denominations and fraternities can be encouraged to make sure their pastors, reverends and priests stay faithful to the Word of God. The control and regulation if the CRL and the state or government is totally rejected and should not take place. On the contrary the church should be a voice that can freely speak to the government when they are violating their God-given mandate of governance, like Elijah spoke to king Ahab, Nathan to King David, among many other examples. Stop messing with the body of Jesus Christ! Stop every attempt at state regulation of the Church, the body of Jesus Christ! We are fully aware what the end game of this attempt or similar ones by the state to regulate and control the church, is. See how Christians (especially pastors) from underground churches and house churches in China are persecuted - by the state. Christians in Nigeria are killed in great numbers. We are fully aware of the end game of state control of churches. Rejecting every form of state regulation or control of churches.	Linda	English	retired

2025-10-12 14:51:15	No I do not	Constitutionality	It is unconscionable and foolish to give up the very principles of freedom and dignity, to regulate the or constrain the liberties of the church. Many of the founders of our democracy, like Chief Albert Luthuli, Alan Boesak, Desmond Tutu, would never support a Regulation like this. I believe that when our society loses its moral compass, then everything else crumbles. I believe that this Regulation sets new presidence for devaluing freedom of speech. While SA suffers greater problems that the few abuses in the church community (which can be resolved by stricter policing), its more sensible to focus on those matters than lording over the church and the God of the church. 2025-10-12 14:57:20	No I do not	Constitutionality	I strongly oppose the CRL Rights Commission’s proposal to regulate religion through state licensing and peer review structures. While the intention to prevent abuse is understandable, this proposal overreaches, duplicates existing law, and undermines fundamental freedoms. 1. Freedom of conscience over compliance Freedom of religion is inseparable from freedom of thought and conscience. Once the state decides who may minister or teach, belief itself becomes regulated. Such control is incompatible with a constitutional democracy built on diversity of conscience and association. 2. Existing laws already apply Fraud, abuse, and exploitation are criminal offences under existing legislation. The issue is enforcement, not the absence of law. Creating another bureaucracy adds cost and complexity without improving safety. 3. Faith communities strengthen society Religious and spiritual groups provide education, care, and community support. Heavy-handed control risks weakening these networks and eroding trust. 4. Partnership, not policing True accountability grows from cooperation, not control. In the spirit of Ubuntu, government should engage faith leaders through dialogue and voluntary good-governance frameworks, not state licensing. Conclusion The proposal is unnecessary, unconstitutional, and socially harmful. Protecting freedom of religion protects everyone’s freedom of conscience. I urge government to reject the proposal and strengthen enforcement of existing laws instead.	Matthew	English	self-employed

2025-10-12 15:08:19	No I do not	Other	We don't have to reinvent the wheel on the constitutionality of how crime and criminals are dealt in this country. Religious leaders that step out of line must be dealt with an already existing constitutional structure that deals with law breakers. Eg. Pastors that commit sexual offenses must be charged within the already existing structure that all other citizens are dealt with. Regulating the church is not within the scope of a political system. Politics cannot regulate religion. It's chalk and cheese. The church is regulated by God Himself. Just like no more can be above the law. No one can be above God. That's demonic. Each church has or should have it's church constitution which it abides by. Sometimes it's the fault of gullible followers that give these pseudo pastors etc rights do do foolish things in the name of Christianity.	Manuel	English	employed individual

2025-10-12 15:10:09	No I do not	Other	There is a definite break between the State and Religion - the two have no business being interfered with by the other. No politician has the right (even if they are priests) in determining anything within Religion. This is a Christian country built on Christian values and those values have helped form the Constitution - this is morally and ethically correct. But once that Constitution has bee written and accepted into law the direct relationship between state and Religion must end. Each may inform the other but neither can control the other. No politician has the right to make decisions or laws regarding Religion and most definitely not be able to determine who is or is not a priest. This is subjective to the man in the street but not to those within a Religion. The Church will decide who qualifies as priests within that particular religion not some politician. No, stop nonsense laws like this and concentrate on the basics, once you have proved you can get the basics of ruling right you will find you have no place trying to legislate Religion. Stop these stupid attempted distractions and go back to basics - you have ruined this country and no distraction will shield you from that.	Hugh	English	unemployed individual

2025-10-12 15:24:33	No I do not	Constitutionality	The recent proposal by the CRL Rights Commission to require the registration of churches and the licensing of pastors under state oversight is a direct threat to religious freedom in South African. The Constitution guarantees freedom of speech, religion, belief and association. Churches do not exist by the permission of government, they exist by the command of Christ. to force churches and pastors into a state-controlled registration system is to place Caesar at the pulpit and to risk the erosion of one of our most fundamental liberties. The CRL Commission should not be in the business of regulating faith. its proper role is to safeguard the right of all South Africans to freedom of speech and freedom of worship, without fear of state intrusion. A free church is essential to a free people. The Gospel cannot be registered. There are 10 commandments of God of which our current corrupt ANC government breaches many of them every single day of the lives of the people of South Africa. 2025-10-12 15:41:07	No I do not	Constitutionality	Section 31 of the constitution should simply be translated into corporate identity. I write as Catholic priest and religious bound by the vows of my order. Unlike other democracies neither my ministry nor the legal personage of the order I belong to is acknowledged in law. This is a holdover from aspects of the apartheid years when the Catholic Church received active discrimination. However, this is not a Catholic problem alone but also touches Buddhist and Hindu forms of common life or monasticism. We are forced into the NGO or NPO realm to register as legal person. This realm relies on various assumptions of business-like employer employee relationships. These requirements are imposed to be able to initiate banking services and the suchlike. NGO and NPO structures are not appropriate to our way of life. The Catholic Church has an extensive canon law and each religious order has, within that framework, its own laws and usages, approved by the central authority. Why can they not be accepted as legitimate documents establishing legal personhood in the South African dispensation? A place needs to found for the constitutional guarantee of section 31 to gain actual expression in the legal and financial regime of the country. A point to note in this respect is that your Status drop down list also makes no provision for persons like myself.	Martin		
2025-10-12 15:41:38	No I do not	Constitutionality	Separation of State and Religion is a cornerstone of democracy, and ensures freedom from oppression and persecution of people on faith based matters. This proposal has previously been rejected in this country. It is unconstitutional, unnecessary and fiscally irresponsible to overburdened taxpayers. We already have adequate laws to deal with these issues. The matter at hand is one of weak enforcement. Stop making laws to fix gaps left by governance issues and start strengthening our police and judiciary to enforce the laws we already have.	Tina

			Faith is a divine vocation rather than a profession. It cannot be licensed, accredited, or supervised by government authority. Matters of belief fall entirely outside the state's jurisdiction.			
			The CRL Commission has no constitutional mandate to interfere in matters of doctrine, ordination, worship practices, or the internal affairs of religious bodies.			
			Any attempt at state regulation would undermine the very essence of religious liberty and the collective rights of faith communities.			
			Such control would inevitably expose spiritual leaders to political influence, or worse, turn them into instruments of state policy.			
			South Africa's wide range of faith traditions already maintain voluntary systems of accountability—through charters, codes of conduct, fraternals, and other self-regulating bodies.

			Rights in the Bill of Rights are limited only in terms of law of general application as envisaged in section 36 of the Constitution, 1996.			
			We have read, heard and watched people on the media being subjected to persecutions and exploitative practices by leaders of faith, through barbaric acts such as sexual violation of vulnerable women, appropriation of property of the poor, drinking poisonous substances, eating grass and snakes to name a few.			
			These activities are violation of human rights and they undermine freedom of religion as intended by the legislature.

2025-10-12 16:42:15	No I do not	Other	This is clearly unconstitutional, violating both freedom of speech and freedom of religion. Over and above that, the government has been shown to be both corrupt and biased, and therefore not capable of fair judgement. Additionally, the head of the proposed CPL, Thoko Mkhwanazi-Xaluva recently claimed that God does not speak and those who claim to hear His voice need psychiatric assessment, a clear indicator that she has no understanding of Christian religion. There can therefore be no legitimacy in any regulation, as no-one can regulate something they cannot understand. Additionally, there are regulations for buildings and public meetings and organisations. And how information is handled etc. The environment and managed is already regulated. The content of the communication already obeys the 10 commandments, which are universal laws respecting human dignity, already much more strict than current government Dept practice. There is no need to restrict people from inspiring hope and transforming lives for the better, and developing a community which supports members and uplifts the poor and downtrodden.	Jane

			The proposal by the CRL threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternal, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.

2025-10-12 18:01:24	No I do not	Constitutionality	Religion should NEVER be run by state. It should be something that is between an individual and God. When state gets involved, it becomes a mechanism to control the masses, as the "registered institutions" are afraid to loose their licences, so they can only preach what is acceptable to whoever is the reigning political regime. This has proven to create havoc and destruction in the past, think of the Catholic crusades to kill the Protestants. In this case it is just more subtle to silence the voice of the oposition. 2025-10-12 18:03:51	Yes I do	Other	Regulation of religion is absolutely necessary and constitutional. "Freedom of religion" does not mean that religion cannot be regulated, in the same way that freedom of trade and occupation does not mean that trades and occupations cannot be regulated. There are countless examples of exploitation of vulnerable people under the guise of religions, particularly in South Africa. People are free to believe what they want and to participate in any religion but in order to hold yourself forward as a legitimate religion and to acquire the benefits of this (particularly from a taxation perspective) it is essential that this is properly regulated. Well done to lawmakers for doing this!	Kate	English	employed individual

2025-10-12 18:04:36	No I do not	Constitutionality	Every South African citizen has the right or freedom of belief - in their own creed and religion. This CRL is targeted at a certain sector of Christianity so it is aiming to limit people's expression by regulating how we worship and we can't do this and can't do that. It will be a witch hunt. 2025-10-12 18:05:22	No I do not	Necessity	The CRL's to regulate church is unnecessary because there sufficient laws already that keep ministers accountable under the rule of law. The issue here is it enforceability of existing laws in which the relevent state organs have failed to enforce. Also a spiritual calling to be a minister or pastor of the gospel is not professional but a spiritual calling. Licensing becomes irrelevant in such matters and an infringement of religious liberty.	Themba	English	business owner

			I respectfully but strongly disagree with the petition’s proposal to allow mechanisms for the vetting, licensing, and regulation of religious organisations and leaders by the CRL Rights Commission or any arm of government. Such measures, however well-intentioned, pose a serious threat to the constitutional right to freedom of religion as enshrined in Section 15 of the South African Constitution. They risk undermining the spiritual autonomy of faith communities and set a troubling precedent for state interference in religious affairs. The Constitution provides clear protection for individuals and groups to freely practise, express, and organise around their religious beliefs — without state control or approval. Any attempt to introduce licensing or vetting mechanisms is not only constitutionally questionable but could open the door to censorship, discrimination, or the politicisation of faith. Abuses or harmful practices that may occur under the guise of religion should be dealt with under existing laws — such as criminal, civil, and human rights laws — which already provide mechanisms to protect the public without compromising religious freedom.			
2025-10-12 18:05:39	No I do not	Constitutionality	I therefore call on Parliament and the CRL Rights Commission to reject any attempts to license or regulate religious organisations, and instead to uphold and defend our constitutional right to freedom of religion and belief. 2025-10-12 18:07:16	No I do not	Other	Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa’s diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL’s proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.	Gustav Nic	English	business owner

2025-10-12 18:28:44	No I do not	Constitutionality	Very few countries have as strong a constitution protecting the rights of ALL citizens to freedom of association and religion. This high moral standard was and is built on what we learned from our history of oppression and control by those in power. If we do not guard and uphold these pillars of our democracy we betray the principles (and leaders) that bought us these freedoms at great cost. Our constitution and judicial system underpinning these rights makes more than ample provision for bringing to justice those perpetrators who prey on the vulnerable and weak by abusing their powers and positions of religious authority. We do not need more/new regulation but a greater application and enforcement of existing laws that are already in place in this regard. WE CANNOT MOVE BACKWARDS ON HUMAN RIGHTS PROTECTION OR WE WILL SOON BE WORSE OFF THAN BEFORE 1994. Regulating and controlling who is allowed to be the shepherds of the flock will not keep the wolves out, it will just empower the strongest wolves to dress up as shepherds !!	Mervyn	English	retired

Our freedom of religion is our right and cannot be regulated by the CRL Rights Commission. Why not ,instead of wanting to control and impede on our basic right to religious freedom,instead set sights on controlling the drug cartels,crime syndicates and the staggering crime statistics of this country . I dare say that if it wasn't for our religions,the prayers that daily goes up for this failing government and its leader,we would have been done for. It's the very prayers of the very religions you want to touch with your corrupt hands that still holds up this government. 2025-10-12 18:44:47	No I do not	Constitutionality	You know, when someone tells you they want to "regulate" your faith, what they're really asking is for you to hand them the keys to your soul... and I wonder... have you ever noticed how the moment government steps between a person and their God, something sacred... disappears? Because here's what's interesting: you can remember a time when people tried to control how others worship... and you can probably recall how that always... always... ends badly. History whispers it. Your spirit knows it. The ANC wants to decide what's acceptable belief? That's like asking permission to breathe. To love. To know Jesus Christ personally. And the question isn't whether they have good intentions - the question is: Who gave them authority over your covenant with the Living God? See, when you accepted Christ, you didn't sign a government form. You didn't need their approval then... and you certainly don't need their permission now. Your faith isn't a privilege the state grants - it's a fundamental human right that exists above and beyond any earthly authority. And perhaps... just perhaps... when a government that's failed to deliver water, electricity, safety, and jobs suddenly wants to regulate your relationship with Jesus... you might ask yourself: What are they really afraid of? Could it be that they know - deep down they know - that faith transforms lives in ways their policies never could? The answer is NO. Not because we're rebellious. But because some things - some sacred, beautiful, transformative things - were never theirs to regulate.

2025-10-12 19:00:47	Not fully	Other	While I absolutely support the right for everyone to practice their chosen belief system and it's also a constitutional right I do feel that in certain circumstances religion or more precisely, religious practices need to be regulated as they can be offensive, illegal, and in violation of others rights to name but a few. In general I don't agree with idea of having any single organization in power dictate what or who a person chooses to believe but I do think that how they choose to practice those beliefs needs regulation. The law has too many loopholes to provide any level of said regulation so perhaps those levels of regulation should in fact be more clearly defined in the law rather than having a "religious police force" to enforce it. The standard police force will be obligated to enforce it if it were clearly stated by law.	Francois	English	employed individual

			? 1. Freedom of Religion Is a Fundamental Human Right Most democratic constitutions — including South Africa’s — protect freedom of religion, belief, and opinion. If a government regulates religion, it limits that freedom and begins deciding what people are allowed to believe or how they may worship. This violates one of humanity's most basic rights — the right to think, believe, and live according to one's conscience.  2. Separation of Church and State Modern democracies are built on the principle that the state and religion should remain separate. The state deals with laws, governance, and public order. Religion deals with personal faith and moral guidance. When these two mix, corruption, bias, and abuse of power often follow. History shows that when governments control religion, they tend to use it as a political tool. ? 3. Protection Against Discrimination If the government regulates religion, it might favor one faith over another. This creates inequality — minority religions could be silenced, restricted, or punished. Freedom means everyone has the same right to believe (or not believe), regardless of whether their faith is popular or not. ? 4. Preserving Peace and Diversity Religious diversity can enrich societies — but government interference often creates conflict. When people feel their beliefs are being controlled or attacked, it fuels resentment and division. Keeping religion free allows different groups to coexist peacefully under a shared framework of mutual respect. ? 5. Preventing Abuse of Power Once a government claims authority over religion, it can use it to justify actions — even unjust or violent ones — “in the name of God.” Regulation opens the door to censorship, persecution, and political manipulation of faith. ? 6. Authenticity of Faith True faith must be voluntary. If the government dictates what people should believe, religion becomes a performance, not a conviction. Spiritual life only has meaning when chos is

2025-10-12 19:08:51	No I do not	Constitutionality	The constitution is meant to guarantee the freedom to practice whatever faith we happen to have in whatever way we deem fit provided that it does not cause harm to others. Political vetting of religious leaders leads to one outcome only; religious leaders who are forced to parrot the propaganda of the state. Wonder where we've seen that before? Take a look at the history of the Soviet Union. There is already enough legislation in place to deal with criminal acts within religious practices; we don't need more laws, we need proper enforcement of the ones we already have. Once again, unelected individuals are attempting gross overreach in an effort to wield power and influence over others. Enough already! Churches need to be regulated because there is a lot of abuse of unsuspecting vulnerable congregants or members of the church and there is also corruption and dangerous practices which violates human rights and human dignity. Additionally, these churches are very commercialised now of late and it is a money scheming and they evading tax laws and they are not even paying Tax . These are some of the reasons why they should be regulated.	Richard	English	retired

2025-10-12 19:29:01	No I do not	Constitutionality	History has shown that when government is involved in making decisions for the church there's oppression and persecution. Once churches belong under an "umbrella" structure terms such as democracy and majority start being passed to justify infringing the autonomy of those of different religious beliefs. As a Christian I firmly believe that the head of the Church is Christ not some group of people who will have powers in deciding when or not I can preach publicly, granted there are some questionable things that happen within the church that needs to be addressed but rather by internal structures who will make use of the doctrine and belief to reprimand such individuals. My right to freedom of religion and expression will be infringed as soon as there are powers that will regulate how I should believe. Their control will start with leadership and then eventually it will be the manner of practice next thing we know there might even be debates to rewrite the Bible to suit the political agenda of the group. 2025-10-12 19:35:36	No I do not	Constitutionality	We, as concerned members of the faith community, strongly oppose the recent actions and proposals of the CRL Rights Commission (CRL), particularly its efforts to regulate religious institutions through mechanisms such as the Section 22 Committee. While the CRL was established to promote and protect the rights of cultural, religious, and linguistic communities, its current trajectory raises serious constitutional, ethical, and spiritual concerns. 1. Violation of Religious Freedom The South African Constitution guarantees freedom of religion, belief, and opinion under Section 15. The CRL's push to license churches and regulate spiritual practices undermines this foundational right. Faith is not a commodity to be audited—it is a sacred relationship between individuals and their Creator. 2. Overreach and Misrepresentation The CRL's mandate is to support and strengthen constitutional democracy, not to control or interfere with religious expression. By attempting to impose bureaucratic oversight on churches, ministries, and spiritual leaders, the CRL risks becoming a tool of suppression rather than protection. 3. Lack of Consultation and Transparency Many religious communities, especially grassroots ministries and independent churches, have not been adequately consulted. Decisions are being made without inclusive dialogue, and the voices of those most affected are being ignored. 4. Threat to Community-Based Ministry Local ministries like Harvesttime Ministries, which serve vulnerable populations through prayer, counseling, trauma recovery, and outreach, may face unnecessary restrictions or closure. These ministries are lifelines—not liabilities—and should be supported, not stifled. 5. Undermining the Role of Faith in Society Faith-based organizations play.	Darrol	English	employed individual

2025-10-12 19:35:57	No I do not	Constitutionality	My main concern is that there are existing platforms to regulate complaints brought against religious leaders, namely the constitution but also NGOs that can bring certain cases to light in a court of law. Why then, if sufficient means already exist to prosecute offenders, should the state be allowed to impose laws on churches (which goes directly against the constitutional right to freedom of religion)? If this goes through it would certainly be the beginning of the end of freedom of religion. The Section 22 committee seems to have a specific hatred for the Christian sector which is the very definition of faith-based persecution. 2025-10-12 20:01:33	No I do not	Constitutionality	FREEDOM OF RELIGION is being violated. We speak to our God and He speaks to us , as opposed bu the CRL chairperson. The church has its own rules and regulations from the God of the Universe which is the highest power over any government of this world. The church has always submitted under the governing authorities in every way that does not violated God's authority, But this time CRL has gone too far, to try and take the place of our God. GOD IS THE HEAD of the Church. He gave birth to it and is in control, that means He alone calls and qualifies Ministers. Anything out of this is from the devil. Thr government itself is under God's power not vice versa. We are expecting the CRL, and the government to come to Church for guidance fir a better Nation, not the church to come for guidance to go to the government. We have the word of God that guides. Only a Believer can understand the things of God, not Unbelievers or confused people who thinks they know by worshipping idiots as gods. Ours is God Almighty, the creator of heavens and eath. He is superior to everything He created. Therefore we refuse to be oppressed, derailed by deceitful people in the name of crime, regulations and so on. Freedom of speech, of religion, and association does not need ammendment to satisfy hidden agendas of hate and destruction against the Church especially Christianity. In this case we call for the disbandment of the CRL commission because it has failed its mandate and do not stand for anyone concerning the church, because we have heard the chairperson speech full of hate, blasphemy, violation of human rights, deformation of character, saying those who say they speak with God are psychiatric patients, above all, ensighting devisions among believers to destroy the church of God by nominating characters without others parties participation . 2025-10-12 20:36:19	No I do not	Constitutionality	I write as a concerned citizen and Christian to record my opposition to any proposal that would vet, license, register, or otherwise regulate religious organisations or leaders. 1. Constitutional rights, The Bill of Rights guarantees freedom of conscience, religion, thought, belief and opinion, freedom of association, and the right of religious communities to form, join and maintain their own associations, and to govern their affairs. Any mechanism that requires state or state-mandated approval to preach, plant a church, ordain, or convene worship compromises these rights. 2. Unconstitutional entanglement, A state-appointed or state-endorsed "peer review" that evaluates doctrine or validates religious leadership is impermissible entanglement in internal religious matters. Courts avoid adjudicating theology, Parliament should too. 3. Parliament already declined this path, The 2017–2018 proposals were not supported by the COGTA Portfolio Committee, which recognised self-regulation and better enforcement of existing laws as the correct route. 4. Unnecessary and duplicative, South Africa already has criminal, child-protection, NPO, tax, and anti-money-laundering laws. The challenge is enforcement, not more law. 5. Practical harm, A licensing regime will burden smaller congregations, chill religious diversity, and risks political misuse. Comparative examples on the continent show closures and credential tests that would be unthinkable in a constitutional democracy. I support voluntary accountability, including adoption of existing charters and codes of conduct, local fraternals, police-clearance and register checks for children’s work, and financial transparency, without state control. 2025-10-12 21:11:32	No I do not	Other	The regulation of religion in South Africa would represent a dangerous encroachment on one of our most fundamental constitutional freedoms. South Africa's history under apartheid demonstrated the grave consequences of state interference in matters of belief and conscience, and any attempt to regulate religious practice risks repeating those authoritarian patterns under a different guise. Our Constitution's guarantee of freedom of religion, belief, and opinion is not merely decorative—it recognizes that individuals and communities must be free to worship, organize, and express their faith without government oversight or interference. While reasonable limitations exist to prevent harm, broad regulatory frameworks threaten to politicize religious institutions, stifle spiritual expression, and empower bureaucrats to determine which beliefs are acceptable. South Africa's strength lies in its religious diversity and pluralism, where mosques, churches, temples, and synagogues coexist freely. Rather than imposing top-down regulation that could be weaponized against minority faiths or used to silence dissent, we should trust civil society, existing laws against genuine harm, and the marketplace of ideas to address concerns about religious institutions. The solution to problematic religious conduct is not state control, but rather transparency, accountability, and the robust protection of individual rights that our democracy already provides. What's next? South Africans will be banned from owning Bible's because it's offensive to government? Stop this nonsense !	Desiree	English

There is so much that is not going right in our country.Government should deal with high level of crime, unemployment sexual exploitation of children.fenocide.Stagnant economy corruption. Those are the issues that citizens worry about. Focusing on this is meaningless in a grand scheme of things.Focus should be on impactful things that will change lives of ordinary citizens. 2025-10-12 21:16:14	No I do not	Constitutionality	Imposing government control over religion in South Africa would be a troubling violation of one of our most essential constitutional rights. The legacy of apartheid has already shown us the devastating impact of state intrusion into personal beliefs and conscience. Any effort to regulate religious practices risks reviving those oppressive tendencies under a new banner.			
2025-10-12 21:16:33	No I do not	Constitutionality	The Constitution's protection of religious freedom is not symbolic—it affirms the right of individuals and communities to worship, gather, and express their faith without interference from the state. While laws rightly exist to prevent harm, sweeping regulations could politicize faith-based organizations, suppress spiritual voices, and give officials undue power to judge which beliefs are acceptable. 2025-10-12 21:17:02	No I do not	Constitutionality	South Africa's true strength lies in its rich tapestry of faiths—where churches, mosques, temples, and synagogues thrive side by side. Instead of enforcing top-down control that could be misused against minority religions or dissenting views, we should rely on civil society, existing legal safeguards, and open dialogue to address concerns. The answer to questionable religious behaviour isn't government domination—it's transparency, accountability, and the unwavering defence of personal freedoms that our democracy promises. 			– Faith is a divine calling, not a profession — it can not be licensed or regulated by the state. The state has no say concerning the validity of religious belief.			
			– The CRL has no constitutional authority to regulate doctrine, ordination, worship, or religious associations.			
			– State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities.			
			– It risks religious leaders becoming subject to or tools of state control.			
			– South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations.

2025-10-12 21:18:19	No I do not	Constitutionality	The whole reason we live in South Africa is because of the freedoms enshrined in our constitution. These ensure that no particular viewpoint (no matter how impassioned) trumps what has been tested and tried for over 30 years. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa’s diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL’s proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. 2025-10-12 21:42:29	No I do not	Constitutionality	We, South Africans, have been very proud of our Constitution since 1994, it has been argued that it is the best in the World. Now the Government wants to change it, why? The answer is simple, they are struggling to retain popularity so falling victim to the easy road of "compromise" which leads to control and finally dictatorship. The intention is to take away our freedom of speech, association and religion while trying to be "nice" about it. Sadly they have taken a few too many leaves out of the books of other dictatorships. They are inept and found wanting, just a pity the education they hand out is not good enough to teach the bulk of the population to think for themselves and for the future of their children. However, this is changing and the man/woman on the street is becoming fedup with them and beginning to speak out.	Nick	English	self-employed

2025-10-12 22:44:06	No I do not	Constitutionality	A peer review committee to oversee and regulate religion in SA would not be able to come to agreement on all aspects of any particular religion, let alone all religions, without reducing the religious content allowed to a common minimum set of acceptable social behaviours. The result would be banning of teaching content that falls outside of the agreed parameters and a drastic simplification of religious views. This is unconstitutional in that religious teaching cannot be dictated by government. Religious views come from holy scriptures per religion, the interpretation of which is not a legal matter to be decided by government or the courts, but by learned religious leaders. A peer review committee would fail to come to consensus on all topics of importance, even in any one religion. If regulation of religion is implemented, then a state religion would effectively be imposed and religious freedom lost, which is neither desirable nor constitutional.	Rodney	English	retired

2025-10-12 23:13:07	No I do not	Constitutionality	I am deeply concerned about the proposed regulation of religious organisations and leaders. South Africa already has comprehensive laws in place to prevent fraud, abuse, assault, and other crimes within churches and faith communities. The core issue is not a lack of legislation, but rather the state's failure to enforce these existing laws effectively. Creating additional laws will not solve the problem; it risks unnecessary interference in religious freedom while leaving the underlying enforcement challenges unaddressed. The focus should be on ensuring that current laws are properly applied, rather than introducing new regulations that may infringe on the constitutional rights of faith communities.	Steven	English

2025-10-12 23:36:15	No I do not	Constitutionality	First and foremost, I am atheist. I thus support the freedom of choice of religion. I will, if necessary, fight to my last breath to defend that right. This includes the right to freely choose between freedom of choice of religion and well as freedom of choice FROM religion. In stead of this kakistocratic, ineptocratic waste of a "government" concentrating on running the country correctly, it gets its self involved in everything excluding their prime directive by legislating control over thought, where nobody has the right to impinge. This is the hallmark of all religions and thus is moving towards a theocracy, the best example of which is North Korea.	Gerald		self-employed

2025-10-12 23:48:06	No I do not	Constitutionality	It is not the place of government to tell people what to believe or how to practice their faith. Besides, whose definition of faith or religion would supposedly be the one that whatever religious practices would need to be measured against? If a church or other religious group (or individual) does something illegal according to the many laws we already have, then of course the police should get involved and guilty offenders be prosecuted. But there is no reason at all to regulate expressions of faith itself in any way.	Maritsa		
2025-10-12 23:52:59	No I do not	Other	Speaking from a Christian perspective, as we all fully understand that this is undoubtedly targeted at us, it is wrong for anyone in a place of authority to abuse their position by enforcing or superimposing one person's moral belief of what is right or wrong with respect to a religion that has more than 52.8 million plus members.... And who even approves the prefects that should govern religion when we can't even link them to even a single biblical reference. In fact, what we can only coincidentally link what CRL is trying to achieve is what the Holy Bible warns of in the days of the Antichrist. So we are unequivocally against what they are trying to achieve with CRL, which is even contradictory to the reason why they were established in the first place. We must preserve right to religion without any external interference from anyone!	Tatenda	English	self-employed

2025-10-13 04:04:33	No I do not	Constitutionality	The constitution of South Africa allows for freedom of religion. When we start to 'allow' people to register as a religious leader or organisation it will take away the freedom part. This will then become a personal choice of the current person in charge to deem some one religious, or even their church as a true vessel for religion. Further to this it seems that this will open up yet another avenue for corruption and theft. Where will the line be drawn? Will traditional healers fall under religion or medical? This is a way to control people and it is unacceptable and unethical	Maria

2025-10-13 04:09:05	No I do not	Constitutionality	Government should refrain from interference with the governance of God's laws and procedures. First government took Jesus Christ (prayer and assembly) out of schools, now look at how the school children have become? hurting, bullying and killing each other and their teachers. The Constitution of SA has guaranteed that every SA has the freedom of right to choose their religion, education and freedom of movement, amongst other. Every citizen in SA can choose how and where to worship our Lord and Saviour and there should not be blasphemous interferences in religion. Religion should remain autonomous as we all know what interference can result in, shown over and over by the way the Government handles its fiduciary responsibilities robbing each citizen to experience the benefits of the wealth SA has. By this I cite the state of our public hospitals and the lack of care provided by some nursing staff.	Tsakane	English	business owner

			Firstly, it's scary that the government is playing straight into the devil's endgame. Secondly, state-controlled religion is yet another way for the government to extract funds to party on. They've realized how much money people are willing to give the church and they want access to it. Not so that they can feed and house the poor, but so they can buy more cars and houses for their family members and the people they need to bribe to stay in power.

			South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) This proposed bill is mainly aimed at Christianity. The State and Religion should be kept separate. No other human has te right over the beliefs of another. It is personal. As mentioned, this bill is against Christianity mostly, and it will not be enforced against traditional healers and sangomas.

			It is my submission that Faith is is for people who devote themselves to believing in God. – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations.

2025-10-13 06:15:58	No I do not	Other	It is unconstitutional, unnecessary, unworkable, and unaffordable. It is UNCONSTITUTIONAL and will require the state to bear a huge cost, when workability is very doubtful. It is fruitless and wasteful expenditure. We have a criminal code that already addresses the issue if better enforced. Violates Section 15: freedom of religion and conscience. Violates Section 18: freedom of association (including the right not to join a state-approved body). Violates Section 31: right of religious communities to self-govern. Forces religious leaders into state-controlled “Umbrella” structures. It is unnecessary South Africa already has robust laws (Criminal Law, SORMA, Children’s Act etc.) that cover all criminal abuses. The issue is not the absence of law—it is poor enforcement of the law. Religious freedom has never been a defence to excuse criminal behaviour. It is unworkable Who decides who qualifies as a “religious practitioner” or can register a religious organisation? Which doctrine will be “official”? Who sets the standard? How will licensing be enforced? What if you disagree with the Peer Review Committee? It is UNAFFORDABLE Estimated cost to taxpayers: R750 million start-up + R250 million annually. 2025-10-13 06:46:47	No I do not	Other	A person should be entitled to their options with regard to religion and their personal belief system. Isn't that what our constitution says? Does our government want to control our lives? The 'Bella' act has the authority of the parent being transferred to the government - the government holds the parent accountable for the misconduct of the child, but they are not allowed to say what and how their child should be taught in the schools, now they want to tell us what to believe and how to believe. They can't control the taxes and state-owned entities - there is corruption and government interference whenever government officials or family members of government officials have been implicated in fraud or suspected fraud and nepotism, but now they want to control the population by telling them what they can and cannot believe, and how it should be done. Are they trying to turn this country into another Russia /China where the government determines what the people can and cannot do? A dictatorship. Hasn't worked so well in the other African countries where this happened.	Anne	English	employed individual

2025-10-13 06:48:03	No I do not	Necessity	– Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. We have freedom of religion. This means that by definition we will have a few cooky people popping up now and then. The problematic ones usually do other illegal things. There are enough laws in place to keep them in line. If they don't do illegal things, what's the problem? If the state regulates religion, they will prescribe what churches may preach. 2025-10-13 06:51:28	No I do not	Other	The proposition before us asks us to ignore both history and human nature. It asks us to trust the state with the conscience of the people, an authority it has consistently proven itself unworthy to hold. Consider the evidence of the last three decades: a pattern of financial corruption, a tendency toward tyrannical overreach, and a legacy of destructive policies. This is not the record of an institution that should be granted more power, least of all over the sacred realm of faith. This bill does not promote order; it creates a state-sanctioned weapon. It will be used to marginalize peaceful Christian communities and persecute all other faiths that refuse to bow to a government-driven, and potentially corrupted, theological agenda. And if our recent history is not enough, let us heed the darker lessons of our past. Let us not forget the Spanish Inquisition. For over three centuries, the union of royal and religious power unleashed a nightmare of persecution in the name of doctrinal purity. It serves as an eternal monument to the tyranny that arises when the state holds the power to define orthodoxy.

2025-10-13 07:29:26	No I do not	Constitutionality	It is unconstitutional- Section 15 of the constitution provides for freedom of religion. State regulation is an existential threat to religious freedom. When a state controls who can control who can or cannot teach,preach or form a religious organization, any meaningful right to religious freedom is lost and effectively places religion under govt control. It is also unnecessary as it will alter the relationship between the state and religion. Criminal offenses should be dealt within criminal courts. The government must realize that are not fighting against man but against God Himself(Jesus Christ) and it's a battle that cannot win. They must stay in their lane. 2025-10-13 07:35:32	Not fully	Other	Religions have been the cause of child rape, wars and a host of other crimes over many years, so regulation is required. In SA there are a number of religious organisations that coerce some of our most vulnerable of citizens to giving monies that they should be using to feed or house their families. Religion was used to justify apartheid in SA and to justify slavery in the US - they have to be regulated. Being regulated does not say that you are not allowed to worship or follow whichever god you want, but these organisations have to be regulated in a way that they operate within the laws and do not cause harm to any of the vulnerable in our society. With regards to workability, there is no consistency currently with regards to many topics in South Africa, and to be frankly honest there are too many commissions happening around different topics which seem to never reach consensus, so then who will determine what is doctrine. Internationally the topic itself is a complex one, we have so many denominations all with their own doctrine, and now as a country we want to waste more resources debating things the world itself has not been able to solve. The government needs to sort out itself and all the horror playing out at this very moment in time, in CRIME, CORRUPTION, non-existence of genuine law and order. The State needs to abide by the LAWS of the HIGH COURT OF HEAVEN and the CHURCH was placed on earth to encourage those laws which The LORD JESUS fulfilled. Granted, there were, and probably are some dodgy pastors with their own brand of "Gospel", BUT WHO exactly in the "State" department is able to screen, vet, or choose who is qualified to be in service to the LORD? Any criminal or a fake can get a Bible College Certificate, put on a robe and "Preach" True ministers must evidence JESUS and His life of Sacrifice in their lives. The State mustn't use tactics so they can bully the CHURCH around and CONTROL THE TRUE GOSPEL. PEOPLE NEED THE LORD. SOUTH AFRICA NEEDS THE LORD. WE NEED THE LORD TO STEP IN AND PULL DOWN THE STRONGHOLDS OF EVIL THAT IS IN GOVERNMENT. MAY GOD HAVE MERCY ON US ALL FOR DISGRACING HIS HOLY NAME. ??? 2025-10-13 08:03:21	No I do not	Constitutionality	The CRL violates the Constitution in a number of ways. South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31)	PIETER	English	employed individual
2025-10-13 08:03:26	No I do not	Constitutionality	I believe that while accountability in all sectors is important, state interference in matters of faith is deeply concerning. The CRL Rights Commission's call to license and regulate religious organisations may stem from a desire to prevent exploitation or abuse within faith communities. However, such regulation risks undermining one of our most sacred constitutional rights: freedom of religion, belief and opinion, as guaranteed by Section 15 of the Constitution. Once the State starts deciding who is "qualified" to preach or lead, it opens the door to government control over faith itself — something no democracy should allow. Faith, by its nature, is a personal and spiritual journey. It cannot be licensed, standardised or managed by a government office. Spiritual authority flows from calling, not compliance.South Africa's diversity of belief is one of its greatest strengths. Instead of regulating religion, the State should protect the freedom that allows every person to worship — or not — according to conscience.	Sharon	English	self-employed

			As a believer and citizen of South Africa, I stand firmly against any form of state regulation of the Church. Our Constitution is clear on this matter. Section 15(1) of the Constitution of the Republic of South Africa guarantees that “everyone has the right to freedom of conscience, religion, thought, belief and opinion.” This freedom is not conditional, nor does it require state permission. It is a fundamental right — one that protects the sacred space between God and His people. The Church is not a department of the State. It is a divine institution established by God Himself, as affirmed in Matthew 16:18, where Jesus says, “On this rock I will build My Church, and the gates of hell shall not prevail against it.” The authority and governance of the Church come from Christ, not from Parliament, policy, or political will. To invite the State to regulate the Church is to open the door for interference in matters of faith — and once that door is open, it will not easily close. History has shown us that when governments begin to “regulate” religion, they soon begin to restrict it. Today's oversight becomes tomorrow's censorship. This is not a matter of rejecting accountability; it is a matter of preserving spiritual sovereignty. Churches are already subject to the laws of the land regarding finances, safety, and justice — as every organisation is. What we reject is spiritual regulation: the idea that government officials can decide how, when, or by whom the Word of God is preached, or how the Holy Spirit moves. South Africa is a constitutional democracy, not a theocracy nor a state religion. The Church must remain free to operate under the authority of God, independent of political influence or legislative control. Let us not confuse governance with God's government. The Church answers to a higher court — Heaven's — and its mandate is not man-made. We must protect this sacred freedom for our generation and the ones to come.

2025-10-13 08:19:28	No I do not	Constitutionality	The proposal by the CRL threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. 			Hi don't support this because the government failed in every instance where it has it hands and say in. You cannot vet, govern, and regulate religion / your faith. That is like putting a lid on the power of a church, power of prayer and power of unity in Christ Jesus... that's going against our constitution and freedom of speech. Everything that the government touches and regulate and has a hand in is either broken, out of order / full of corruption because of their manipulation and control and now, seems like they want to implement this so that they can get their hands on money ...yet...again. We are not China and Russia , we need and want prayer for our country as this is the only way that this failed government will be kicked out, and that we can rebuild our nation.

2025-10-13 08:30:56	No I do not	Constitutionality	Religion is a matter of conscience. History has shown that whenever a government tries to regulate peoples' conscience it inevitably leads to religious prosecution. Any government that regards itself of such a stature that it thinks it can regulate what people think, Whom they worship or serve in their innermost feelings, places itself in the position of God. Such a government regards itself as having enough power to control both body and mind and this is precisely the future against which the crucial prophecies given in the Bible, has warned people. (Specific reference: Revelation 13) For this reason the people who compiled the Constitution separated church and state and expressly stated that the government in this country should not have the power to intervene in any form of religious activity. That should be left to Someone higher in authority than the government. Freedom of religion is a basic human right in the same way as freedom of speech and should therefore not be tampered with.			
2025-10-13 08:31:05	No I do not	Constitutionality	The time has come that this government should take note of historical lessons and the results of the same in order not to make the same mistakes of many of their predecessors, and which will inevitably lead to their own destruction. 2025-10-13 08:31:33	No I do not	Other	There is no place in our democracy for the state to be involved in religion and to have any oversight over which religions may be recognised or which religions people may choose to belong to or not. The separation of state and religion should be defended entirely and hence the constitutional approach to enshrine this. This lack of separation of state and religion (including the former apartheid government) leads to horrors of religion being used as a weapon of state to legitimise or convince people of particular outcomes. The removal of any constitutional safeguards will ultimately result in terrible (hopefully unintended) consequences.	Simon

2025-10-13 08:34:33	No I do not	Constitutionality	Regulating religion at a constitutional level is unconstitutional because it violates core principles of individual liberty, equal protection, and the separation of powers. The constitution safeguards the free exercise of religion, and any attempt to control or restrict it through constitutional amendments, especially by a government marred by self-interest or lack of accountability, infringes on personal autonomy and risks state-sponsored favoritism or persecution. Such actions undermine the separation of state and religion, a foundational democratic principle, by entangling governance with spiritual matters, often for political gain. Moreover, a government's regulation of religion threatens equal protection under the law by potentially favoring certain groups, fostering discrimination, and eroding the impartiality required of constitutional provisions. This overreach not only destabilizes the rule of law but also invites oppression, as history demonstrates when corrupt regimes manipulate religion to consolidate power. 2025-10-13 08:38:26	No I do not	Constitutionality	South Africa's Constitution guarantees every individual and community the right to freedom of religion, belief, and association. Any attempt by the state — through the CRL Rights Commission or Parliament — to vet, license, or regulate religious organisations or leaders represents a direct threat to this freedom. While the intention to curb abuse or promote accountability within religious sectors may be legitimate, licensing faith effectively places the state in a position of spiritual authority — something no democracy should allow. It opens the door to discrimination, censorship, and the erosion of religious autonomy that has been carefully protected since 1994. Faith communities already operate under existing legal frameworks: the Constitution, the Non-Profit Organisations Act, and general criminal and civil laws. These provide sufficient means to address wrongdoing without infringing on sacred freedoms. What South Africa needs is not state control of religion, but partnership and dialogue that upholds human dignity and diversity of belief. Regulating religion is not a solution — it is a step backward from the very freedoms that define our democracy.	Dewald		employed individual

Jesus called me out of darkness and changed my life to now love people more than ever before. Now, why should my right to verbal expression be violated by the mandate for "registration" just because I point to God. Why are you not prosecuting sex offenders and sodomites rather? I strongly propose that the existing laws (cival & criminal) offer full and sufficient protection to any citizen, and every person already has legal recourse if harmed by another. 2025-10-13 08:53:37	Yes I do	Other	While I feel that governments should have no control over religions, as such and I endorse freedom of religion, there is a case for regulation. My reason for saying this is that I see an explosion of small churches, particularly in poorer areas. Most are run by lay preachers who's sole concern is to make money. This can be a very lucrative business as they pay no taxes and there is no regulation as to what they can charge for their services. This therefore needs to be regulated and I feel that churches should pay some sort of tax, the same as businesses do. I know of lay preachers who drive very fancy cars and own a number of properties - all from the proceeds of their churches while paying no tax! You have to question that.	Mike	English	business owner

			It is UNCONSTITUTIONAL Violates Section 15: freedom of religion and conscience. Violates Section 18: freedom of association (including the right not to join a state-approved body). Violates Section 31: right of religious communities to self-govern. Forces religious leaders into state-controlled “Umbrella” structures. It is UNNECESSARY South Africa already has robust laws (Criminal Law, SORMA, Children’s Act etc.) that cover all criminal abuses. The issue is not the absence of law—it is poor enforcement of the law. Religious freedom has never been a defence to excuse criminal behaviour. It is UNWORKABLE Who decides who qualifies as a “religious practitioner” or can register a religious organisation? Which doctrine will be “official”? Who sets the standard? How will licensing be enforced? What if you disagree with the Peer Review Committee? It is UNAFFORDABLE Estimated cost to taxpayers: R750 million start-up + R250 million annually. CRL’s current annual budget is one-fifth of what this scheme would require. Who do you think will pay the license fees for “approved” religious organisations and religious practitioners? Fiscus is already under extreme pressures, this places unnessary further pressure and is wasteful.			
2025-10-13 08:55:21	No I do not	Constitutionality	Much as the constitution guarantees freedom of religion, it is a known fact that a lot of such religious leaders are in it for money not necessarily because it is a calling. In pushing their get rich agenda, these leaders give false hope to vulnerable citizens who end up being exploited and abused. They would sell things like holy water to the congregants and convince them that the water has some miraculous powers to change their lives for the better. In many instances, these water would not work. They would coerse vulnerable people to bring the last money as an offering in order to get a blessing. This attempt to impose a government-controlled oversight structure—like mandatory "Umbrella" bodies—is an intolerable violation of the fundamental constitutional rights of faith communities. It directly undermines Section 15 (freedom of religion and conscience), Section 18 (freedom of association, including the right not to join), and Section 31 (the right of religious communities to self-govern their internal affairs). Such mechanisms threaten the spiritual autonomy essential to a free and diverse society, replacing it with the chilling spectre of state control over faith. 2025-10-13 09:10:13	No I do not	Constitutionality	The government's proposal for the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission) to vet, license, and regulate religious organizations and leaders is fundamentally opposed, as it represents a severe and unwarranted infringement on the constitutional right to freedom of religion and the spiritual autonomy of faith communities. State regulation of doctrine, ordination, or worship is beyond the CRL's constitutional mandate, transforming a divine calling into a state-controlled profession. Furthermore, such government oversight poses an existential threat to meaningful religious liberty, risking the subjugation of religious leaders to state control and undermining the existing, effective systems of voluntary accountability already supported by diverse faith communities. This matter has been previously rejected by Parliament, and there is no legal justification to revisit a proposal that threatens to violate fundamental constitutional guarantees, specifically Sections 15, 18, and 31. The final authority can't to practice my beliefs and faith cannot rest on the commission. As a believer in Jesus Christ, what regulates me is the Bible on how I Worship God. My relationship with Jesus Christ , who is my commander in chief is governed by scriptures, the Living Word of God inspired by the Holy Spirit. Any regulation outside of this is simply, an attempt to take away the guaranteed right as espoused in the constitution. 2025-10-13 09:15:04	No I do not	Constitutionality	In South Africa, the right to practice one's religion freely is a fundamental constitutional right. This is enshrined in the Bill of Rights, specifically in Section 15 of the Constitution, which states that "Everyone has the right to freedom of conscience, religion, thought, belief and opinion." This right encompasses the freedom to hold a religion, to change one's religion, or to have no religion at all. It also provides for the right to manifest one's religious beliefs through worship, practice, teaching, and dissemination. Additionally, Section 9 of the Constitution, the equality clause, prohibits unfair discrimination on the grounds of religion, conscience, or belief, further protecting this freedom from both state and private interference. The Constitution also allows for religious observances in state and state-aided institutions, provided they are conducted on an equitable and voluntary basis.	Anna	English	self-employed

2025-10-13 09:19:30	Yes I do	Necessity	As an atheist and community advocate, I support financial transparency and accountability for all institutions—including religious ones. While I respect the right to spiritual autonomy, I believe churches, mosques, and other faith-based organizations should be subject to financial oversight to prevent misuse of funds, protect donors, and uphold zoning laws. Regulation should focus on ethical governance, not spiritual content. I also urge Parliament to consider the impact of religious noise pollution—especially amplified calls to prayer from mosque speakerphones in residential areas. These disrupt the peace and violate the rights of non-participating residents. Freedom of religion should not come at the cost of others’ right to quiet enjoyment of their homes. I do not support blanket licensing of religious leaders, but I do support mechanisms that ensure financial integrity, zoning compliance, and respectful coexistence.	Arisha	English	employed individual

The authority of manmade structures to regulate my beliefs and faith cannot rest on a commission. As a believer in Jesus Christ, what regulates me is the Bible on how I Worship God. My relationship with Jesus Christ, who is my commander in chief is governed by scriptures, the Living Word of God inspired by the Holy Spirit. 2025-10-13 09:26:35	No I do not	Other	There is a reason for separation between state and church. We call ourselves a Christian nation, lets start acting that way.	Robin		
			It's just downright wrong. To understand the faith in the Christian Bible for example, one needs to be practicing it. One cannot be an authority on regulating the church of God when one is not a disciple who does the works of the first disciples of Jesus. You cannot have true understanding of the words of Jesus when you are not doing them. The members of government are not doing the words of Jesus. They therefore cannot regulate the church of God. It is those who are loyal to Jesus that are doing the works Jesus commanded His first disciples who are to look after the church of God and ensure that the church is under the leadership of the Lord Jesus Christ. In John 8:31-32 Jesus says: "Then said Jesus to those Jews which believed on him, If ye continue in my word, then are ye my disciples indeed; And you shall know the truth, and the truth shall make you free." " NKJV, the King James version says it like this: "Then Jesus said to those Jews who believed Him, "If you abide in My word, you are My disciples indeed..." From the above it is clear, one must continue to do the word of Jesus, i.e. abide in Jesus to know the truth. 1 John 2:6 says it like this: "He who says he abides in Him ought himself also to walk just as He walked." Here we see John clearly showing that abiding in Jesus means you literally do the same work as Jesus - Preach, heal, cast out devils, etc. Which evidently are the same works Jesus instructed His disciples to do. So... One must do as Jesus did, and as Jesus instructed, and further have shown themselves loyal to Jesus in order to be an 'elder' in the church. There is further criteria regarding eldership in the letters Paul wrote to Timothy etc. Which extends above and beyond that one must first be a disciple of Jesus also.

			South Africa's many religious groups already have their own systems of accountability, such as charters, codes of conduct, and independent associations that guide and support them. If the state starts regulating religion, it would seriously threaten the freedom of faith and could lead to religious leaders being controlled by the government. Romans 8:15 from the Amplified Bible (AMP): “For you have not received a spirit of slavery leading again to fear [of God’s judgment], but you have received the Spirit of adoption as sons [the Spirit producing sonship] by which we [joyfully] cry, ‘Abba! Father!’” ? Some Inspired word for all We are breaking the cycle of fear in our life’s, We are not called to serve God out of dread or distance, but out of love, out of sonship, out of joy. He did not give us a spirit that drives us into hiding. He gave us His Spirit, who draws us into Gods arms. We are His, not as a slave, but as a son, a daughter, an heir. The spirit of slavery that once ruled over your thoughts, the fear of failure, rejection, judgment is being silenced. For Gods Spirit is speaking louder now, and you call Him Abba Father. This is the cry that I am placing in your spirit again: the cry of belonging, of nearness, of trust. Do not shrink back. The shame of the past has no voice in Gods courts. Come boldly for you are adopted into His household. You are seated at His table. And every fear that told you otherwise is being uprooted. You will walk in a new identity, not as one tolerated, but as one chosen. Not as one forgotten, but as one marked. He have given you His Spirit to remind you daily, You are His child. 2025-10-13 09:45:27	No I do not	Constitutionality	Religion is a personal choice and a relationship with the MOST HIGH. NO LAW can alter that. As far as I know we are a democracy and it is quite obvious that it is CHRISTIANITY that is being targeted for this exercise through the government. I can't help to wonder what the Islam people's reaction on this is. Funny that we don't see any commentaries from them on this issue? Do they know it is not them that will be influenced by this new 'law'? NO law is going to change what I preach or teach for I have TRUTH on my side and TRUTH is a PERSON and His Name is YASHUA HaMASHIACH/ JESUS CHRIST AND NO LAW CAN KILL HIM AGAINS FOR HE IS ALIVE FOR EVER MORE!! HALLELUYah!! Also, South Africa’s many religious groups already have their own systems of accountability, such as charters, codes of conduct, and independent associations that guide and support them. If the state starts regulating religion, it will seriously threaten the freedom of faith and could lead to religious leaders being controlled by the government. 2025-10-13 09:59:00	No I do not	Other	There is an agreed separation of State and Church. The State is not God and cannot therefore dictate the qualifications and professional knowledge required by church leaders. Church leaders must be called by God and follow God's Word for their conduct and ministry. There are enough laws that protect people from those who would misuse this office and harm others. Church leaders are not exempt from the normal laws of the land. The State needs to recognize that it itself is subject to God's authority and must submit itself to God's law if the country is to experience God's blessing. South Africa needs to recognise the separation of Church and State and accept that both are under God's authority. Both must submit to God's Word. The State has no right to dictate the qualifications and conduct of church leaders. It is not under their sphere of authority. We therefore reject any attempt by the State to control church leaders except for what is common to all people under the law. The constitution of South Africa upholds the freedom of religion and we call upon the elected government of South Africa to uphold the constitution and the freedom of religion. ChatGPT said: Here's a refined and respectful version of your message — strong in conviction yet clear and suitable to send or post publicly: To Our Government, We, as followers of Jesus Christ, stand firm on the Word of God, the Bible, which is our ultimate authority. While we continue to pray for our government and leaders, as the Scriptures instruct, we must also speak out in truth and conviction. The Church has the right to uphold its faith and beliefs without interference or control by the government. We are guided by the Holy Spirit, not by the laws or opinions of man. As children of God, we cannot support any attempt to regulate or redefine our beliefs. Pastors and ministers are called and chosen by God, not appointed or approved by earthly institutions. 2025-10-13 10:10:27	No I do not	Constitutionality	No other religion is regulated by this state. Why do you want to regulate Christianity? If you try to understand why we are passionate about our religion maybe, you will have a better understanding. Christianity does not have terrorists that kill people that does not believe in the same god. We are the one's helping, supporting, caring and opening out hearts and hands to be His hands extended. We hate what is wrong and evil. A teacher inspires some children in her class, and they excel in the subject, other just don't care and fail. Is it the teacher's fault if some children do not excel? Same with Christianity, some people are inspired by the Word of God, and does good, but some use it to cause damage, it is not God's fault if people don't even bother to understand. We are known as a Christian country with the Bible as our guide. Why do you think it is used in courts? Because it is the only way and the truth.	Naomi	Afrikaans	retired

2025-10-13 10:11:09	No I do not	Constitutionality	The right to freedom of religion, belief, and opinion is a fundamental human right enshrined in Section 15 of the Constitution of the Republic of South Africa, 1996. This right guarantees that every individual may hold and exercise their religious beliefs freely, without interference or coercion from the State or any other entity. My religious faith and its expression are both a matter of personal conviction and a constitutionally protected liberty. The State has no authority to dictate, regulate, or restrict the manner in which I — or any citizen — choose to worship or live out our beliefs, provided such conduct remains within the bounds of the law. It must be clearly stated that government does not possess ultimate ownership over creation — the earth, the sea, or the natural order — as these belong to God, the Creator of heaven and earth. Government’s jurisdiction extends only to the administration of human affairs, as delegated to it by the citizens it serves. In a democratic society, government derives its authority from the consent of the governed. Its role is to act on behalf of the people, in accordance with the Constitution and the will of the citizens, not to impose unilateral or self-serving directives that disregard the voice and values of the nation. It is imperative that government remember they are servants of the people, entrusted — not enthroned — with authority. The erosion of public participation and accountability cannot be tolerated. The essence of democracy demands that citizens, through lawful and constructive means, direct the course of governance — not the other way around. South Africa was founded upon the principles of freedom, human dignity, and equality before the law. Government must serve the people, and refrain from assuming authority in matters that fall outside its constitutional mandate — particularly in matters of personal faith and conscience. Let true democracy, justice, and freedom of belief continue to prevail in SA.	Jaco	English	self-employed

2025-10-13 10:15:29	No I do not	Constitutionality	Government control over religion threatens one of the most fundamental human rights, freedom of belief and conscience. South Africa's Constitution enshrines this liberty precisely to prevent the abuse of power that occurs when the state dictates spiritual life. If the government were to interfere in religious matters, it would erode the separation between church and state, a principle that safeguards both democracy and diversity. History shows that when governments regulate religion, intolerance, censorship, and persecution often follow. Once the state decides which beliefs are acceptable, dissenting faiths and minority groups become targets of discrimination. This undermines unity and fuels division in a nation already working hard to heal from its past. Furthermore, religion is essential in moral guidance, charity, and community cohesion. Government control would politicize faith, turning it into a tool for manipulation rather than moral influence. Citizens would lose trust not only in their spiritual institutions but also in the state itself. South Africa's strength lies in its diversity and freedom. Preserving the independence of religion ensures that moral authority remains with the people, not with politicians. A free society must always protect the right to worship, question, or abstain without fear.	Johan	English	self-employed

2025-10-13 10:18:50	No I do not	Constitutionality	We, as citizens of South Africa, strongly oppose the CRL Rights Commission's renewed efforts to license, vet, and regulate religious organisations and leaders. This proposal is not only deeply concerning—it is unconstitutional. It threatens the freedom of religion and the spiritual autonomy of faith communities, which are protected under Section 15 and Section 31 of the Bill of Rights in our Constitution. These rights guarantee every individual the liberty to practice their faith freely, without interference or oversight from the state. The CRL's attempt to introduce state-appointed peer review mechanisms and regulatory frameworks—under the guise of accountability—risks opening the door to state control over religious doctrine, leadership, and belief systems. This is a dangerous overreach that undermines the very principles of democracy and diversity that South Africa stands for. We acknowledge the need to protect congregants from abuse and exploitation. However, South Africa already has robust laws to prosecute fraud, assault, and other crimes. What is needed is better enforcement, not new legislation that infringes on religious freedoms. Furthermore, the CRL's proposals have already been rejected by Parliament in 2018, which instead recommended voluntary self-regulation within the faith sector. The religious community has responded responsibly by developing instruments like the South African Charter of Religious Rights and Freedoms and accompanying codes of conduct. We call on Parliament and civil society to defend our constitutional rights and reject any attempt to police belief. Freedom of speech and freedom of religion are not negotiable. They are the cornerstones of our democracy and must be upheld without compromise. Let us remember: the state's role is to protect rights—not to regulate faith. The renewed push by the CRL Rights Commission to impose mechanisms for vetting, licensing, and regulating religious organisations and leaders is an alarming and unconstitutional overreach. Such measures strike at the very heart of one of our most fundamental liberties: freedom of religion, belief, and association. Our Constitution does not give the state—or any of its bodies—the authority to act as a theological gatekeeper. The proposal to “license” faith leaders or to “vet” religious organisations amounts to state interference in the internal affairs of faith communities. It arrogates to government bureaucrats the power to decide which forms of faith are legitimate, who may preach, and what doctrines may be followed. That is a direct assault on spiritual autonomy and an affront to the pluralistic character of our democracy. South Africa's history has shown, time and again, the dangers of allowing government institutions to police belief. The beauty of our constitutional order lies precisely in its protection of diversity and dissent. Faith communities are accountable to their members and their sacred texts—not to state regulators. Abuses that occur within religious settings can and should be addressed through existing criminal and civil law; we do not need a special “licensing regime” that treats every faith group as a potential suspect. Let us be clear: this proposal is not about accountability—it is about control. It risks creating a chilling effect on religious expression, forcing communities to conform to state-sanctioned norms or risk being declared “illegal.” That is incompatible with Section 15 of the Constitution, which guarantees everyone the right to freedom of conscience, religion, thought, belief, and opinion. Even more concerning is the ideological drift this represents. Moves like this edge South Africa away from a free, democratic society and closer to the authoritarian systems of Communist China and Russia—nations known for state-sanctioned reli	Jurgen	Afrikaans	employed individual

			This is a 'state vs religion' view where inasmuch as the state does not want religion to dictate how it should run government, the government should not meddle with spiritual matters. Spiritual matters are bigger than what politicians can grasp, if they are not spiritually inclined. Those who do have an inclination are usually not practitioners, as such they are comprised by political agendas, ideologies and ambition. Therefore they have no meaningful contributions towards spiritual and religious matters. It is funny that the Republic of South Africa professes to be a Christian nation, yet the decisions, agendas and views of parliament go against the very fabric of Christianity, or Godliness in general. So, I oppose the stance of government regulating religion. We need the government to sort out its own matters of running the state, province and local government efficiently. In order to do that, it needs to collaborate with us, the religious community. Government focuses on the basic needs and infrastructure, we focus on the spiritual wellbeing and moral fiber of society. State and religion are not mutually exclusive but should be complementary. They should work hand-in-hand to serve the people. If government seeks to dominate and regulate religion, we would not freely operate within our calling and vocations.

2025-10-13 10:35:45	No I do not	Constitutionality	1) child marriage is now rife. As a Muslim, I'm seeing this trend increase exponentially, with the introduction of Muslims from other countries. Just last month, an imam close to my family was horrified, when a Coloured Muslim family, suffering from poverty, offered their 11-year-old daughter to a Pakistani foreign national shop owner to marry. The imam could do nothing as it is allowed in Islam under Shari'a Law. That, plus many terrorism-affiliated people flooding into our country and indoctrinating our youth etc, would make me feel that there should be more state control. However, the silence about this from the Muslim community is giving me an uneasy feeling. 2025-10-13 10:42:30	No I do not	Other	The renewed push by the CRL Rights Commission to impose mechanisms for vetting, licensing, and regulating religious organisations and leaders is an alarming and unconstitutional overreach. Such measures strike at the very heart of one of our most fundamental liberties: freedom of religion, belief, and association. Our Constitution does not give the state—or any of its bodies—the authority to act as a theological gatekeeper. The proposal to “license” faith leaders or to “vet” religious organisations amounts to state interference in the internal affairs of faith communities. It arrogates to government bureaucrats the power to decide which forms of faith are legitimate, who may preach, and what doctrines may be followed. That is a direct assault on spiritual autonomy and an affront to the pluralistic character of our democracy. South Africa's history has shown, time and again, the dangers of allowing government institutions to police belief. The beauty of our constitutional order lies precisely in its protection of diversity and dissent. Faith communities are accountable to their members and their sacred texts—not to state regulators. Abuses that occur within religious settings can and should be addressed through existing criminal and civil law; we do not need a special “licensing regime” that treats every faith group as a potential suspect. Let us be clear: this proposal is not about accountability—it is about control. It risks creating a chilling effect on religious expression, forcing communities to conform to state-sanctioned norms or risk being declared “illegal.” That is incompatible with Section 15 of the Constitution, which guarantees everyone the right to freedom of conscience, religion, thought, belief, and opinion. Even more concerning is the ideological drift this represents. Moves like this edge South Africa away from a free, democratic society and closer to the authoritarian systems of Communist China and Russia—nations known for state-sanctioned reli	Christopher

Religious leaders would be at risk of becoming subject to, or tools of, state control. Our nation's diverse religious communities already support voluntary accountability through charters, codes of conduct, co-operation and association between fellow believers, and self-governing associations. – The CRL Rights Commission proposal, for legislation to implement a “Peer Review Committee” system of state regulation of religion, has already been rejected by Parliament, so there is no valid or legal reason to revisit this matter. 2025-10-13 11:02:18	No I do not	Constitutionality	I hereby record my objection to the proposal by the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission) to vet, license, and regulate religious organisations and leaders. I do not agree with this proposal, and my objections are as follows: 1. It violates Section 15 of the Constitution, which guarantees freedom of conscience, religion, thought, belief, and opinion. Faith is a personal conviction and divine calling that cannot be licensed or controlled by the state. 2. It infringes Section 18, the right to freedom of association, by attempting to force religious organisations into state-defined frameworks instead of allowing voluntary association and governance. 3. It undermines Section 31, which affirms the right of religious communities to form, maintain, and govern their own institutions according to their beliefs and traditions — free from government interference. 4. The CRL Commission lacks constitutional authority to regulate religious doctrine, ordination, worship, or association. Its role is to promote and protect these rights, not to impose control over them. 5. State regulation threatens religious freedom, as it opens the door to political influence and potential misuse of power over faith communities and spiritual leadership. 6. Faith communities already practise voluntary self-regulation, through codes of conduct, councils, and fraternalns. There is no constitutional or practical basis for state-imposed control. 7. Parliament has already rejected similar CRL proposals in the past, deeming them unconstitutional. Revisiting the matter disregards both precedent and constitutional principles. For these reasons, I do not support the CRL Rights Commission’s proposal to regulate religion in any form. It is inconsistent with South Africa’s constitutional democracy and the foundational right to religious freedom.	Schallie	English	retired

2025-10-13 11:12:38	No I do not	Constitutionality	South Africa's Constitution guarantees the freedom of religion, belief, and association. These rights are not conditional, nor are they subject to government approval. They are inalienable, and any attempt to undermine them is not only unconstitutional—it is undemocratic and dangerously authoritarian. The justification offered for this proposal namely, the presence of criminal elements within certain religious institutions is misleading. South Africa already has robust legal frameworks to address fraud, abuse, and criminal activity. The issue is not the absence of law, but the failure to enforce existing laws. Historical examples demonstrate the dangers of religious control: the Soviet Union, Nazi Germany, modern-day China, and Iran all show how state regulation of religion leads to oppression and the erosion of freedom. As a Christian, I affirm that every person must have the freedom to worship God according to their conscience. This is not just a spiritual conviction; it is a democratic right. Faith cannot be licensed. Belief cannot be policed. And worship cannot be regulated. The proposal to register religious leaders and institutions is a direct violation of our Constitution. It undermines the principles upon which our democracy was built. The individual or body responsible for this proposal must be held accountable. Their actions are an insult to our Constitution and a betrayal of our democratic values. I urge all government officials to reject this proposal in its entirety. Focus instead on the real crises facing our nation. Protect our freedoms. Uphold our Constitution. And remember the words of Acts 5:29: "We must obey God rather than human beings." South Africans must remain vigilant. We must defend our rights. We must ensure that our democracy remains a place where faith is free, conscience is sacred, and government must respect the boundaries of belief and religion.	Derick	English	employed individual

			he Nature of the Church Body of Christ: Believers are united with Christ and each other, like a human body with many parts, each serving a unique and necessary function. Spiritual House: God's temple is holy because the Spirit of God dwells within believers, and they are built up together into a dwelling place for God. Family of God: The church is God's family, with Christ as the head of the body. Fellow Citizens: Believers are no longer strangers but fellow citizens with other saints and members of God's household, built on the foundation of the apostles and prophets with Christ as the cornerstone. The Purpose of the Church Worship and Fellowship: The church is a place for believers to gather, worship, and encourage one another in faith and good works. Gospel Proclamation: It serves as a "lighthouse," pointing people to Jesus Christ and proclaiming the gospel to the world. Serving Others: The church is called to minister to those in need, providing physical and spiritual help to orphans, widows, and the wider community. Discipleship: The church equips believers for ministry by providing biblical teaching and fostering Christian fellowship, helping them grow in maturity. Being Christ's Example: As the body of Christ, the church is to live out Christ's teachings and demonstrate His character to the world. Key Functions Mutual Support: Believers are to support, love, and encourage one another, using their spiritual gifts to serve others. Unity in Diversity: While diverse in their members, all believers are one in Christ, with no distinction based on race, social status, or gender. Spiritual Growth: The community aspect of the church provides a vital outlet for using spiritual gifts and receiving assistance and encouragement from other believers.

			The institution of a "peer review system" within Christianity and/or religion in general is a good and necessary minimal step in attempting to reduce emotional, spiritual, economic, and physical/sexual abuse within religion. The fact that so many Christians are misrepresenting this proposed peer review system as essentially "religious persecution" is not only logically ridiculous, but a clear indication of the kind of wrong, even abusive thinking that exists within Christianity (and other religions). What I've read of the Christian opposition to this proposal also clearly indicates a basic lack of understanding of the "peer review" process. Peer review is not control or interference by people outside of the peer-group. Rather, it is input and discussion by people within the relevant peer-group ... in this instance religion in general, and Christianity specifically. Logically, any religious group - including Christianity - should welcome discussion, feedback, and oversight from within their peer-group. The massive incidence of abuse (of all kinds) within religion in general, and within Christianity in particular require that action be taken. Logically, any group that fears and opposes the scrutiny and oversight of its peers, is fearful that abuses will be pinpointed.

			Such regulation violates Section 15 of the Constitution, which guarantees freedom of conscience, religion, belief, and opinion. No government or commission should hold authority to license, register, or define what counts as a “legitimate” faith. While abuses within religious settings must be addressed, these are already covered by existing criminal and civil laws. The solution is not more regulation — it is better enforcement of the laws we already have. State control of religion sets a dangerous precedent, opening the door to politicised oversight, discrimination against minority faiths, and erosion of human autonomy and conscience. We call instead for: Voluntary self-regulation within faith communities, Transparent enforcement of current laws, and Respect for constitutional freedom as a cornerstone of South African democracy.

I do however vehemently object to any interference by Government to regulate Pastors who have a true calling on their lives doing the work of God. this not something secular but a calling from Almighty God to prepare and help people to enter His Kingdom by way of repentance, being born again of the Spirit of God and living Holy Lives. Government in itself is in no way qualified or called to do this, it's a commission of God to His Church to do so. Yes, charlatans must be recognized and weeded out, but in doing so Government should practice extreme caution not to put hands on that which is Holy unto the God almighty lest they be judged by Him. 2025-10-13 12:16:42	No I do not	Constitutionality	Good day I hereby object to the CRL commission's desire to license and vet churches and religious leaders. The constitutionality of the so-called mandate of the CRL and how the CRL could start dictating what gets taught and said are my main concerns. We already have laws in place to prosecute individuals who commit a crime. If someone steals money, sprays Doom in a person's face, and beats them with a stick, all of these crimes can be prosecuted within the legal framework that we already have. It just requires that charges are laid by victims and witnesses. Regulating religion by a state authority is not going to solve any issue of non-reporting as officials cannot be in every service.The people should just be empowered to know the law and how to access what it can provide. Furthermore, the constitution guarantees us the right of freedom of religion - the right to believe and the right to associate with an organization who holds similar beliefs. This means that we have the right to attend a church with a leader with God-given understanding of the scriptures as well as a church with a leader who underwent full theological training for a theology degree who also hopefully relies on God to preach. A pastor is not defined as only one who has a degree. A church that is structured according to the Bible, has accountability. My second main concern is that the so-called regulation of churches and religious organizations could result in dictation of what is taught and not taught later. Our constitution enshrines our freedom of speech, and that includes religious speech. So long as that speech does not incite violence or other crimes. This brings me to the unjust attention on churches when Julius Malema and his EFF counterparts have been allowed to sing the struggle song 'Kill the Boer' for so long. 2025-10-13 12:26:07	No I do not	Other	The CRL's push to regulate religion is deeply concerning — not just for freedom of worship, but because it ignores a growing imbalance in how faith is treated in South Africa. While we're meant to be a Judeo-Christian society, radical Islamic influence is quietly expanding — visible in exclusive Muslim-only prayer spaces in public institutions, while no such provision exists for other faiths. This growing jihadist idealism thrives where government bodies start deciding which beliefs are "valid." Once the state claims that power, it opens the door to ideological bias and silent endorsement of one group over others. Faith must remain free — equally protected, not politically managed.	Wayn

2025-10-13 12:31:28	No I do not	Constitutionality	Regulating religion in South Africa would directly contradict the country's Constitution, which enshrines freedom of religion, belief, and association. Section 15 guarantees every person the right to choose and practise their faith without interference, while Sections 18 and 31 protect the independence and self-governance of religious communities. Any attempt by the state to license or vet religious leaders or institutions undermines these protections, effectively placing government authority above spiritual conviction. Such regulation would erode the principle of separation between religion and state. This is a cornerstone of South Africa's democracy, and this proposal alone threatens the diverse, voluntary nature of faith in the country. As a Christian, I believe that my faith is a personal and sacred relationship with God, not something that can or should be overseen, licensed, or validated by the government. The state has no bearing on my beliefs, my worship, or my calling to live out my faith.			employed individual

			How could someone be against Vetting religious organisations? Wouldn't you want to know that the people leading your organisation are good, know what they are doing and have the credentials to be there? Religious organisations have been used as loopholes for legislation, fraud and abuse since the introduction of religion. This can not go unchecked. Religious institutions need to be vetted and regulated to reduce corruption. People are still welcome to practice their own religion how they see fit in their own homes, but religious institutions need to be monitored and properly legislated.

			Christianity does need to be regulated. There is no precept in the bible that allows for leaders to abuse congregation members. Any leader who is abusing their congregation is a criminal and must be dealt with by the law. Moreover, and atheistic, communist government cannot be trusted to govern/regulate matters on religion. It will be a direct infringement on freedom of belief. Any christian organisation that joins this commission is not a christian and they do not follow the teachings of the bible. Any person that falls victim to any acts of extortion by any religious leader, needs to take accountability for themselves. They were scammed and they must follow the relevant legal proceedings to charge those that defrauded them. Christianity is a religion of peace. There is nothing wrong with it. Any leader who defrauds people under the banner of christianity, is not a christian.

			Religion and the belief in the unprovable are direct gateways to delusional thinking, and that is far more dangerous to be left unchecked than the government using religion as yet another way to funnel money around. Religion in and of itself is nothing more than a self-fulfilling cycle of lies that change with the times to maintain relevance. The "Hope" that people claim to get from it is nothing more than a cover up for a lack of ability to provide hope for oneself through acts of genuine compassion. Instead we mask this weakness by believing in deities that supposedly "love" us, yet not one of them has been able to curb the suffering of this world in any meaningful way. Yet people still believe that their deity is THE deity that created us? Do you not see how delusional this thinking is and how dangerous this can become when it is weaponized by those who will definitely seek to take advantage of an unregulated system? By allowing religion to go unchecked, you allow evil to take control, because evil does not wear a hood or a ski mask, true evil wears a kind smile that hides the atrocities that it has or is about to commit. It gives you hope for a better tomorrow in order to blind you from the evil deeds being committed in front of your face, it is the pacifier that keeps huge amounts of people blissfully unaware of what is truly happening in the world. It creates a bias where there shouldn't be. Regulation will help to at least attempt to prevent these inherently evil organizations from freely preying on their poor victims who are most of the time already desperate people just looking for hope to keep going, when they can find that in other more sustainable and non-harmful ways, like secular humanism

			While I believe that it is worth ensuring that religious leaders do not encourage acts of violence or other dangerous ideologies, I don't believe that religious teachings should be regulated by government. For example, some religions have assigned gender roles that do not match our democratic policies. They have restrictions that you wouldn't find in a workplace. Provided no abuse is taking place, these religions can't be forced to change their core beliefs. However, religious leaders who are guilty of things like abuse should still be persecuted just like anyone else.

			The CRL is a Trojan Horse tactic intended to nullify section 15 of the constitution. Church and state separation is vital for the constitutionality of section 15. The excuses the CRL makes about the need to "restore order" within churches has no basis as all churches of signatories to the code of conduct of the SA Charter of Religious Rights and Freedoms. For anything untoward, the existing courts are there to be consulted. The ANC's strong ties with Communist China are reflected in the intrusion which the CRL constitutes. The CCP, like the Bolsheviks, knows that unless religion is controlled and regulated, it represents a political threat. The role of Christianity in the overthrow of communism in Eastern Europe , starting with Poland in the 1980s, is a lesson not lost the the CCP. Today churches in China are closely monitored. No one younger than 18 may be a member of a congregation; efforts to add CCP values to worship songs have been authorised by the CCP.

			The CRL being yet another attempt by the government to "over reach" their influence and threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. 30 plus years of government in SA have proven that government is unable to remain biased and has continuously leaned in the favor of black interests to the detriment of non-black South African citizens. We have a constitution to prevent racist government over reach, that the constitution do its job. 2025-10-13 13:06:56	No I do not	Constitutionality	We are a Democratic State by taking our freedom of Religion away we cannot call it a Democratic State. We are human and we should have freedom of choice and this should not be controlled by certain religion. Proper Religion Minister trained at a College are trained to Minister to people in their faith.These Minister or preachers should have the freedom of choice as their heart leads. A preacher is guide by his Council and the congregation. When you restrict the preacher you are controlling his feelings and emotions and this is just not right . 2025-10-13 13:10:53	No I do not	Constitutionality	My concerns relate to the following areas: – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternal, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. My wifr and I run our own ministry, which is a teaching ministry, not conducted in a church building. My wife and I are both missionaries, we work out in the open amongst the people, we do not have a closed church, so our work takes place at shopping mall shops, restuarants, shop ques, bank queues, where ever we get a chance to minister. This is our constirutional right, freedom of religion and speech that the ANC wants to control. It in fact is a disingenious attempt to effect counter intellegence on Christains and leaders alike, bearing in mind the ANC has given Hamas a office base in Cape Town, openly embraced them, is aligned with Hezbollah, ISIS and Iran. They plan to use this counter intelligence to target Christian Leaders for persection through and by means of the above proxies. The intention of the legislature in passing this into law is therefore disingenious and persecutorial towards Christain Leaders and missionaries like ourselves. 			I do not support the proposal by the CRL Rights Commission to regulate religious organizations and leaders. From a Biblical perspective, faith and ministry are divine callings, not professions to be licensed or controlled by the state. Scripture clearly emphasizes that spiritual authority comes from God, not human institutions: Acts 5:29 – “We must obey God rather than human beings.” This reminds us that religious leaders answer ultimately to God, not the state. 2 Corinthians 3:6 – God calls and equips His servants for ministry, showing that ordination and spiritual authority are spiritual matters, not bureaucratic ones. Matthew 28:18-20 – The Great Commission highlights the responsibility of the Church to teach, disciple, and govern itself under God’s authority. State regulation of doctrine, ordination, or worship infringes on the Biblical principle of spiritual autonomy and risks turning faith leaders into instruments of government rather than servants of Christ. Faith communities already exercise accountability through voluntary charters, councils, and fellowships — the kind of oversight Scripture encourages (e.g., 1 Timothy 5:19-21, elders held accountable by the community). There is no need for government interference, which could compromise religious freedom guaranteed in both the Constitution and God’s Word.

2025-10-13 14:07:12	No I do not	Constitutionality	I am in full support of The South Africa’s Constitution that guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) NO Government should EVER have the right or authority to take away these freedom from any person. The proposal by the CRL threatens freedom of religion, including the spiritual autonomy of faith communities, and thus violates the Constitution. Pushing for mechanisms to vet, license and regulate religious organizations and leaders is a huge concern. Faith is a personal matter that should never be licensed or regulated by the state and should therefore NEVER have any constitutional authority to regulate doctrine, ordination, worship or religious associations. Religious leaders should never be threatened or become subject to or tools of state control. In South Africa diverse religious communities already support voluntary accountability through charters, codes of conduct, and self-governing associations. Government and the State should rather aim their time and effort to focus on eliminate corruption, promoting good health care systems, education and the protection off all citizens in South Africa, instead of wasting funds and valuable resources on such ridiculous proposals. 2025-10-13 14:08:00	No I do not	Constitutionality	I strongly object to the CRL’s proposed regulation of religion in South Africa. The plan is unconstitutional, unnecessary, unworkable, and unaffordable. It threatens the very freedoms our Constitution protects. Section 15 guarantees freedom of religion and conscience, Section 18 the right of association, and Section 31 the right of faith communities to govern themselves. Forcing religious leaders to register under state-approved bodies violates these rights and invites government control over belief and practice. This proposal is unnecessary because existing laws such as the Criminal Law Amendment Acts, SORMA, and the Children’s Act already address all forms of abuse and exploitation. The problem is poor enforcement, not a lack of law. It is also unworkable—no fair way exists to decide who qualifies as a “religious practitioner” or which beliefs are legitimate. Finally, it is unaffordable, with costs far beyond the CRL’s budget and likely to burden taxpayers and faith communities. I therefore reject the proposal in defence of religious freedom and constitutional rights.	Carl	English	employed individual

2025-10-13 14:16:31	No I do not	Constitutionality	I strongly DO NOT support this proposal. It is a clear violation of my constitutional rights as a South African — particularly the right to freedom of religion, belief, and association as enshrined in Section 15 of our Constitution. The government has no mandate to interfere in matters of personal faith or to “license” spiritual leaders and communities. This kind of overreach threatens the very foundation of democracy and religious autonomy that our Constitution protects. Instead of inserting itself into areas that do not concern the state, government should be focusing its energy where it’s urgently needed — fixing our collapsing infrastructure, creating employment opportunities, addressing crime, and cleaning up corruption within its own ranks. South Africans deserve governance that respects our freedoms, not one that seeks to control them.	Lucy	English	unemployed individual

The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. 2025-10-13 14:57:06	No I do not	Other	?? 1. The Constitution Guarantees Religious Freedom Section 15(1) of the Constitution of the Republic of South Africa (1996) states: “Everyone has the right to freedom of conscience, religion, thought, belief and opinion.” This means: People can choose, change, or practice their faith freely. The state cannot interfere in how religion is expressed, as long as it does not violate others’ rights or the law. ? Section 31 further protects the right of religious communities to gather, worship, and maintain their traditions independently of state control. So, state regulation of religion would directly violate these constitutional rights. 📖 2. Church and State Separation While South Africa is not a “secular” state in the anti-religious sense, it upholds separation between church and state — meaning: The state does not control religion, and Religious institutions do not govern the state. This separation ensures that: No religion is favored or suppressed by the government. Faith-based organizations can operate according to their convictions. The state remains neutral, protecting all citizens equally, regardless of belief. ? 3. Freedom Prevents Abuse of Power If the government were allowed to regulate religion, it could: Decide which churches are “valid” or “illegal.” Censor sermons or teachings that criticize the state. Manipulate religion for political purposes. South Africa's apartheid history already showed how state manipulation of religion (e.g., theological justification for apartheid) can distort truth and oppress people. Freedom of religion ensures that faith remains prophetic, not political. ? 4. Religious Accountability Exists Without State Control Religion should be accountable, but not regulated by the state. Accountability comes from: Internal governance within churches and denominations. Oversight by independent religious councils or associations (e.g., the South African Council of Churches, FOR SA). Civil and criminal law — which already apply to every	David

2025-10-13 14:59:39	No I do not	Constitutionality	The Constitution provided each and every grouping of population the right to freedom of choice as to the religion they wish to follow. There is no reason for this bill to be processed as it will affect so many South Africans as we are a very diverse population and have been peacefully following our own religions for years and continue to enjoy the right to freedom of choice as to which religion to follow. Far to many politicians get involved in aspects of human rights that due to their attempts to shift the various nations of the world to socialism or communism have failed or created huge conflict often resulting in huge loss of human life. What is the purpose of them dabbling in these arena's is to merely rule and divide the population of South Africa as the ANC have done since they came into power. The attempt to socially re-engineer our society on these ridiculous grounds must never be allowed in our country as these rights were embedded in our new constitution for the purpose of tolerance and respect for one another. By virtue of the power they think they have vested they have no right to change the right to freedom of religion, speech, land rights,and many areas that were also part of the old Government which created huge conflict and we still after 30 years have a hangover from the impact of those ridiculous laws we had. Violates Section 18: freedom of association (including the right not to join a state-approved body). Violates Section 31: right of religious communities to self-govern. Forces religious leaders into state-controlled “Umbrella” structures. It is UNNECESSARY South Africa already has robust laws (Criminal Law, SORMA, Children’s Act etc.) that cover all criminal abuses. The issue is not the absence of law—it is poor enforcement of the law. Religious freedom has never been a defence to excuse criminal behaviour. It is UNWORKABLE Who decides who qualifies as a “religious practitioner” or can register a religious organisation? Which doctrine will be “official”? Who sets the standard? How will licensing be enforced? What if you disagree with the Peer Review Committee? It is UNAFFORDABLE Estimated cost to taxpayers: R750 million start-up + R250 million annually. 			Dear parliamentarians We already have perfectly adequate laws that apply religious leaders. Giving the state the power to regulate who can be the pastor at my local church is unnecessary and unwelcome. Speaking as a private citizen, I don't want the government to have the slightest say on who pastors my church. If any religious leader is a fraud, a murderer, a thief, or a paedophile, there is nothing preventing such a person from facing legal consequences. Our existing laws are adequate. We don't need more laws. We need existing laws enforced.

2025-10-13 15:43:29	No I do not	Constitutionality	The state has no rightful place regulating religion, except where a group promotes harm or extremism. Faith is not a profession to be licensed, it is a matter of conscience, conviction, and spiritual calling. South Africa's Constitution protects freedom of religion, association, and self-governance precisely to prevent this kind of overreach. When the state claims authority to vet or license religious leaders, it crosses a line from governance into control, the very danger our democracy was built to reject. Religious communities already maintain voluntary systems of accountability; what they do not need is political interference masquerading as protection. Unless a group incites violence or endangers others, the state must stay out of the sacred space of belief. To subject belief to state approval is to turn worship into bureaucracy and freedom into permission	Dean	English	employed individual

2025-10-13 15:46:42	No I do not	Constitutionality	Despite assurances, legislated "self-regulation" is state control by another name. I believe that existing laws, properly enforced, combined with education and sector-led initiatives, can address misconduct without compromising constitutional freedoms. The CRL says religious practitioners can be regulated like any other profession, but there are wide-ranging theological viewpoints within the Christian faith. The Constitutional Court has ruled that even if a belief is "bizarre, irrational or illogical", it is protected by the Constitution. It is therefore impossible to find a set of criteria or an agreed-upon base of knowledge, unlike in professions such as law, medicine, and accounting. Similarly, criminal law already applies to everyone equally; there is no such thing as a "spiritual crime". However, if a religious leader abuses a position of trust, that can and should weigh heavily at sentencing. I therefore note with concern references to the need for legislation to enable "enforcement". However well-intended, regulation backed by legislation is, by definition, state regulation. 			South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.

Freedom of religion means that any person should be free to gather, worship, and establish a place of worship without State approval or interference. The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. 2025-10-13 16:50:14	No I do not	Constitutionality	This move is reminiscent of the actions taken in many pre-communist states. It is a warning sign that cannot be taken lightly. Any government that seeks to impose itself into the realm of religion in order to try and control or monitor it, is a government which seeks to control its people the same way Constantine did in the 4th century. Dictating what religious thought may or may not be held by the populus is a sure way of subjugating people into dictatorial slavery. When the government claims the right to define or supervise faith, it stops being a protector of freedom and becomes its rival. The moment conscience becomes a matter of state regulation, freedom ceases to exist in practice—even if it's still written in law. A society's spiritual life belongs to its people, not its rulers. Religion should be the voice that speaks truth to power, not the instrument through which power speaks to the people.	Vincent	English	employed individual

The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is a threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. 			South Africa's Constitution guarantees freedom of religion, belief, and opinion under Section 15. This means every individual has the right to choose their faith and spiritual leaders—even if others find those choices controversial. Regulating religion risks infringing on these fundamental rights. Despite serious allegations, the state failed to secure a conviction against Pastor Timothy Omotoso after eight years of legal proceedings. The case was marred by: Prosecutorial mishandling; Lack of corroborative evidence; Witness fatigue and withdrawal & Procedural delays and mistrial applications If the government couldn't manage a high-profile case effectively, how can it be trusted to regulate religious institutions fairly and consistently? According to the Pew Research Center, countries with high levels of religious regulation often experience: Increased harassment of religious groups; Government interference in worship Reduced trust in public institutions. In 2021, 183 countries reported government harassment of religious groups—the highest since tracking began. [pewresearch.org] Countries like Iran, Saudi Arabia, and Turkmenistan, which enforce strict religious laws, also suffer from: Human rights violations; Suppression of minority beliefs; Social unrest and authoritarian governance These possible outcomes go against the very principles that South Africa is built on. Instead of regulation, South Africa should focus on: * Strengthening legal accountability for abuse * Supporting victims through civil society * Promoting education and awareness * Upholding constitutional freedoms

2025-10-13 18:06:15	Not fully	Other	The justifications for some oversight are compelling: the documented abuses, financial exploitation, and dangers in unregulated religious spaces justify some form of accountability, especially for large, public religious organisations. However, the concerns about constitutional overreach and lack of legal mandate are serious. Any regulatory regime must be carefully confined to non-theological, procedural, financial, and conduct matters, and must be grounded in enabling legislation that is constitutionally consistent. The strongest path forward is a hybrid model: self-regulation and peer oversight (i.e. religious bodies voluntarily agreeing to codes, accreditation, licensing) but with a regulatory backstop (state power only in egregious cases, appeals processes, judicial oversight) rather than blanket state control. 				pieter	Afrikaans	

			It is UNCONSTITUTIONAL: It violates Section 15, which guarantees freedom of religion, belief, and conscience, by imposing state oversight that could interfere with personal and communal spiritual practices. It infringes on Section 18, the right to freedom of association, including the freedom not to associate with or join any state-mandated or state-approved bodies, thereby coercing religious groups into unwanted affiliations. It contravenes Section 31, which protects the rights of cultural, religious, and linguistic communities to enjoy their culture, practice their religion, and maintain their traditions through self-governance without undue government interference. By forcing religious leaders and organizations into state-controlled "umbrella" structures, it erodes the autonomy of faith communities and risks turning religion into a government-regulated entity, which is antithetical to a democratic society. It is UNNECESSARY: South Africa already possesses a comprehensive legal framework, including the Criminal Law, the Sexual Offences and Related Matters Amendment Act (SORMA), the Children's Act, and other statutes, that adequately address criminal abuses such as exploitation, fraud, or harm within any context, including religious settings. The real problem lies not in a lack of laws but in the inadequate enforcement of existing ones; strengthening law enforcement and judicial processes would be far more effective than creating redundant regulatory layers. Religious freedom has never served as a shield for criminal acts—perpetrators can and should be prosecuted under current laws without blanket regulation that punishes the innocent majority for the actions of a few.

2025-10-13 20:03:00	No I do not	Constitutionality	I don't support this proposal. The Church must remain free — accountable to God, not government. True faith cannot be licensed or controlled by the state and our freedom of worship is a sacred right that must be protected, not regulated. 2025-10-13 20:12:53	No I do not	Constitutionality	Too mnay people want to over-regulate and duplicate systems that government can barely maintain an appearance of policing, with an over-burdened and understaffed police force and legal system. This CRL proposed legislation is just another piece of overreach and overreaction becaus eof a few stories where less than a tiny fraction of 1% of pastors did something absurd that many people with their own intellect can easily see for themselves is ridiculous. If we are going to react this hard to every anomaly that comes our way we will never get to doing anything important. There is way too much effort and money being wasted on something that already has legal recourse provisions for in the existing legal framework. If adults want to be so stupid as to eat grass and snakes then the kind of deserve to pay the price. However, if people are seriously injured or die because of the enforced practices of a leader then that leader bears responsibility for the harm brought upon those people. We don't need new laws and ridiculously tight controls and prohibitions that we can never police. We need leaders who will focus their attention on things that will really make a difference that is impactful on a large scale for good, not this obsession with majoring on the minors. We don't need a nanny state and I'm sur ethat many people in parliament don't want to become nannies. It's time for new leadership at the CRL because this is becoming absurd. 			Here is a detailed explanation of why you disagree with the CRL's decision, framed as a direct response to the points in the text provided. --- Why I Disagree with the CRL's Proposal for State Regulation My disagreement with the Commission's push to license and regulate religious organizations is not merely a political opinion; it is a matter of deep conviction and a defense of a foundational human right. The government has no legitimate place in regulating or controlling what happens in my relationship with the Lord. Here's why: 1. It Violates the Sacred Nature of Faith. You are correct: faith is a divine calling, not a profession. My relationship with God is a matter of conscience and spirit, not a commercial enterprise or a public service that requires state approval. To suggest that a government body can "license" a minister, pastor, or imam is to fundamentally misunderstand the nature of religious authority, which comes from a higher power and the recognition of a faith community, not from a secular bureau. The state has neither the competency nor the right to judge the validity of a religious belief or the qualifications of its leaders. 2. It Directly Contradicts the South African Constitution. The Constitution is not just a legal document; it is the bedrock of our post-apartheid freedoms. It explicitly guarantees: · Section 15: My freedom of conscience, religion, thought, belief, and opinion. State regulation, by its very nature, infringes upon this freedom by imposing secular standards on spiritual matters. · Section 31: The right of religious communities to govern themselves. This includes the freedom to determine our own doctrines, select our own leaders, conduct our worship, and manage our internal affairs without state interference.	Jeremy

2025-10-13 21:38:23	No I do not	Other	Spirituality, whether expressed through organised religion and structure or not, is up to individual choice. That's between God and the individual soul and wherever that person stands in terms of their own level of consciousness. How they choose is a matter of free will choice. It has absolutely nothing to do with any government and the government, therefore, has no right to exercise control in this realm of human expression. Individual sovereignty is an imperative in choice-making here, no government can or should prescribe. The spiritual and religious organisations played an important role in standing up to governmental control and overreach during the Covid pandemic, for example, when many said 'no' to the so-called mandates and many lives were saved as a result, I believe, through their courageous action in going counter to 'what the government says'. Spiritual values have been eroded in government approach and those with strong spritual values need to guide those corrupt and lost leaders in our government to the right way - to remind them of their humanity and connection to God, rather than the other way around. To exercise their spiritual leadership effectively, they need to be independent-minded and speak from their sovereignty and never be puppets of a questionable government intent upon controlling people. We need counter-forces to the Godlessness running through many levels of abusive government in South Africa. The extent of corruption being brought to light is sufficient evidence that basic human respect is missing, God-values MIA. Many politicians are clearly lacking spiritual direction - so they're out of their business. Where religion breaks common decency and law, they should be exposed and brought to book though established legal channels e.g. sexual transgressions, or an organisation becomes a front for child trafficking or abuse of any kind, or there is violence used to impose their set of beliefs etc. All is ONE. The CRL Chairperson committed a blaspheme against God and Christianity by saying no one can hear from God, which she needs to repent from. The issues they complain about are pale in comparison when you consider the crimes committed in the country that are linked to rituals and traditional believes, people who are involved in contract killings, CIT's robberies go to sangomas to get muthi and strength to do their work, ritual killings are always connected to Songoma and the use of muthi, and i believe those are more serious cases, "crimes" that need more attention than the few cases in the church that they use to paint all Christians with one brush. The CRL is stepping outside their durisdiction by trying to regulate the church, they should be fighting to keep religion free from regulation instate, that is their mandate. This also opens up the possibility of government using religious principles to sneakily try and deceive people into buying into their propogandic tactics. 2025-10-14 00:00:40	No I do not	Constitutionality	I strongly object to any attempt by the South African government to regulate or interfere in matters of religion. The state has consistently failed to govern effectively in political, social and economic spheres - it has struggled to manage corruption, service delivery, education, and basic governance. Given this track record, it would be entirely irrational to entrust the same government with oversight or control of religious institutions or beliefs. Religion and faith communities are among the few remaining spaces that provide moral guidance, social stability, and hope where the state has failed. Government interference would not strengthen these institutions - it would politicize and corrupt them. The Constitution guarantees freedom of religion, belief and opinion. Any move by the state to 'regulate' religion violates that right and represents an overreach of government power. The separation between church and state must be preserved to protect both democracy and faith itself. I therefore reject any proposal or policy that seeks to place religion under state control, directly or indirectly. The government should focus on fixing its own failures rather than extending its reach into areas where it has no moral or constitutional authority.

			While I understand the concern, this remains unbiblical. The government has no right to decided who is a religious leader (specifically within Christianity). The church is autonomous and holds the right to decide who are elders and deacons. This again gives the government more control over the church, which is history repeating itself from the times that the church and state were one. Who will be enforcing these laws? The same people who were responsible of enforcing the law on the false and criminal religious leaders who caused the need for this legislation? This is another legislation that will completely fail to achieve what it sought out to, while making it harder for those whom this legislation was NOT intended for.

2025-10-14 02:17:23	No I do not	Constitutionality	While constitutionally is violated the CRL does not have Devine Powers to decide on religious matters and freedom. In addition, the laws of SA should be adequate to address any illegal aspects by any organisation in SA including Traditional Doctors, Religious Organisations, NOPs etc without the application of additional regulations. The failure of government to consistently and adequately apply the existing laws does not necessitate additional regulations. We view this aspect as Demonic Control as it will also result in corruption like any other system of law in our Country, including the systems which are meant to protect us. There is much to fix at present in the country than to create an additional and unnecessary entanglement that will fail to be implemented from the beginning. There are further different religions based on different foundations and principles for which the CRL will not be familiar, making it impracticable if not impossible to implement, i.e not workable; no one in the world has been able to fairly decide on religious foundations and theological basis to formulate regulations thereof. Lastly, whilst even managing companies registered has been a challenge through CIPC and SARS, we do not see any benefits that will be derived except for the Government to create an unfunded mandate which will drain the SA population and limited funds the government has through taxation. It will definitely not be affordable and lead to corruption under the circumstances.	Titus	English	self-employed

			We are forced to pay R40 Billion rand a year for Halal for 1.4 million Muslims as per their website and census. PnP, Checkers, Pioneer foods, Unilever force suppliers to comply adding to costs. In the chicken industry there is a religious law called " Positive discrimination". This allows only Muslims to slaughter our chickens. No tax is paid on this 40 Billion rand that the Muslims association brags about. I want the state to institute religious free food. 			I hereby record my objection to the proposal by the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission) to vet, license, and regulate religious organisations and leaders. I do not agree with this proposal, and my objections are as follows: 1. It violates Section 15 of the Constitution, which guarantees freedom of conscience, religion, thought, belief, and opinion. Faith is a personal conviction and divine calling that cannot be licensed or controlled by the state. 2. It infringes Section 18, the right to freedom of association, by attempting to force religious organisations into state-defined frameworks instead of allowing voluntary association and governance. 3. It undermines Section 31, which affirms the right of religious communities to form, maintain, and govern their own institutions according to their beliefs and traditions — free from government interference. 4. The CRL Commission lacks constitutional authority to regulate religious doctrine, ordination, worship, or association. Its role is to promote and protect these rights, not to impose control over them. 5. State regulation threatens religious freedom, as it opens the door to political influence and potential misuse of power over faith communities and spiritual leadership. 6. Faith communities already practise voluntary self-regulation, through codes of conduct, councils, and fraternals. There is no constitutional or practical basis for state-imposed control. 7. Parliament has already rejected similar CRL proposals in the past, deeming them unconstitutional. Revisiting the matter disregards both precedent and constitutional principles. For these reasons, I do not support the CRL Rights Commission’s proposal to regulate religion in any form. It is inconsistent with South Africa’s constitutional democracy and the foundational right to religious freedom.

			Freedom of speecha and freedom of religion goes hand in hand. If you do not like the doctrine then it is your choice and you are entitled to distance yourself from that religion or organisation. 			My God is my ultimate authority. He is the first I will obey. Secondly is my conscience. Sadly, government falls far short of these positions and have no authority over them. We are a DEMOCRATIC nation with freedom of religion literally built into our constitution. We are NOT a communist state where government has any authority whatsoever in what I believe or how I practice my faith. It is not up to government to license or regulate my faith. My faith is what it is and needs no permission from any mortal to be thus. Perhaps the government has spent too much time with their European buddies? We have no need to morally decay as they have. I will pray and praise my God where, when and how I feel the need. I will believe what is True. I will do what I must, according to my faith. I will obey my God. I will not open this metaphorical door even a crack as it is a slippery slope to decay, to invite the rot inside. No human being has the authority to override my God. The mere thought is ludacris. 			God is in control of His church and He has placed Jesus over the governance of the church. God makes the decisions in His Kingdom, which includes the church and the body of Christ. No government has the right to control or dictate to God what He is meant to be doing and no government has the right to decide what happens with God's church on God's behalf. He is all sufficient and all powerful and has given over the responsibility to Jesus. Ephesians 1:15-23 NKJV [15] Therefore I also, after I heard of your faith in the Lord Jesus and your love for all the saints, [16] do not cease to give thanks for you, making mention of you in my prayers: [17] that the God of our Lord Jesus Christ, the Father of glory, may give to you the spirit of wisdom and revelation in the knowledge of Him, [18] the eyes of your understanding being enlightened; that you may know what is the hope of His calling, what are the riches of the glory of His inheritance in the saints, [19] and what is the exceeding greatness of His power toward us who believe, according to the working of His mighty power [20] which He worked in Christ when He raised Him from the dead and seated Him at His right hand in the heavenly places, [21] far above all principality and power and might and dominion, and every name that is named, not only in this age but also in that which is to come. [22] And He put all things under His feet, and gave Him to be head over all things to the church, [23] which is His body, the fullness of Him who fills all in all. Government rests upon the shoulders of Jesus, not Jesus and the church of God upon government. Isaiah 9:6 NKJV [6] For unto us a Child is born, Unto us a Son is given; And the government will be upon His shoulder. And His name will be called Wonderful, Counselor, Mighty God, Everlasting Father, Prince of Peace.

			If you can't handle the truth, you regulate it. Jesus is the truth. Joh 8:44 You are of your father the devil, and your will is to do your father's desires. He was a murderer from the beginning, and does not stand in the truth, because there is no truth in him. When he lies, he speaks out of his own character, for he is a liar and the father of lies. If God is your Father, you will except the truth and not try to regulate it. If you try to regulate my faith, my obedience to God and the truth: then God is not your Father. The devil hates Jesus, hates God and hates the truth. He hates every person who try to live a life of holiness. He wants to regulate them. You as the government wants to regulate them. Your father will be known by your works and you will be judged according to your works. Regulate the children of the living God and see how we grow. Regulate the church of Christ and see how we grow. You can't handle us, regulate us and see. The constitution allows me to worship freely, not regulated.

The state has no authority to judge or validate religious beliefs. The CRL lacks constitutional power to regulate doctrine, ordination, worship, or religious bodies. State interference poses a direct and existential threat to religious freedom and the rights of faith communities. Such regulation risks turning religious leaders into instruments of state control. South Africa's diverse religious communities already uphold voluntary accountability through charters, codes of conduct, and self-governance. Parliament has decisively rejected CRL's proposed legislation for a state-run "Peer Review Committee" on religion; revisiting this is legally and morally unjustifiable. 			The Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission) is again pushing for mechanisms to vet, license and regulate religious organisations and leaders. This threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. CRL has no constitution mandate to regulate religion. It threatens the freedom and the rights of South Africa and non-South Africans to practice their beliefs freely. It is a violation of religious and spiritual freedom in our constitution. South Africa has already been damaged by a communist regime who has and is stil robbing the wealth of this nation and wants to further destroy the wealth of this country for their own gain. 2025-10-14 09:05:24	No I do not	Other	In America in 1962 they took control over religion and removed it from schools Since then there are more school shootings and more deaths and injuries from them now compared to many decades ago. The data shows increases in both incidence and severity. The growing violence, loss of life, and harm in schools are a tragedy and suggest that something important is missing—morality, accountability, spiritual formation, love, respect for life etc. This is the Christian teaching they legally "took control" over. In addition to that it is unconstitutional. Criminals will still be criminals, and regulating religion will not solve a criminal issue. Better policing and criminal justice system that is not corrupt will solve it. Even more Christian religion will. This research article shows that religion (not being run or affected by the government) actually helps the criminal justice system do better. https://academic.oup.com/edited-volume/41333/chapter/352355230 https://academic.oup.com/edited-volume/41333/chapter/352355230	Andrew	English

2025-10-14 09:23:49	No I do not	Constitutionality	Faith is deeply personal and must remain free from state control. The moment government begins to regulate religion, we cross a line from freedom into restriction — where belief is measured, approved, or licensed by bureaucracy. Our Constitution protects freedom of conscience, belief, and opinion precisely because spiritual life belongs to individuals and communities, not to the State. Once the State decides what is “acceptable” religion, it becomes an authority over faith instead of a protector of freedom. South Africa’s strength lies in its diversity — of culture, language, and faith. We can only preserve that richness when government respects the clear boundary between religion and politics. Oversight of criminal or financial misconduct already exists through law enforcement and revenue services; creating another layer that targets faith itself is unnecessary and dangerous. If someone believes that trees speak to them, it is their religious right to continue worshiping the tree, how would you go about regulating that? Even amongst Christians we have multiple denominations in addition to that we have many independents who never wanted to be a part of denominations due to doctrinal differences. Who is to say that a qualification or licence from that body can regulate all these denominations. Faith which is not based on fact cannot be regulated. Martin Luther went against the government of the day when he printed the bible in the common tongue and he was greatly persecuted for that. Had he not made that move protestants would not exist and the bible wouldn't be in the hands of everyone like it is today. England used to regulate the church and force the church to preach specific doctrine with the threat of revoking licences if those doctrines were not preached. 2025-10-14 09:35:14	No I do not	Constitutionality	Any attempt to censor religion is something I'm totally against. As long as or until religion starts getting involved in politics or threatening others with harm it should be left alone. This is coming from a non religious person. Belief is a fundamental human right and should not be tampered with by government. Equally religion should not be involved in government at all. We need to maintain separation between state and religion and that includes the latest threat from political Islam which already has its tentacles in South African politics. The moment it is clear that religion is attempting to influence government it should be dealt with. So, I am in favour of some sort of mechanism that allows for that. Our constitution guarantees freedom of religion. Faith is a divine calling that cannot be regulated by the state. Our religious communities already support voluntary accountability through charters, codes of conduct, fraternal and self-governing associations. 			South Africa's Constitution clearly recognize it's citizens' freedom of conscience, religion, thought, belief and opinion (Section 15). The right to freedom of thought, conscience, and religion is recognized by the United Nations' Universal Declaration of Human Rights (Article 18) and other international treaties. In fact, the right to freedom of thought is considered a universal human right, where internal thought, conscience and belief of an individual should be protected from being interfered with by the state. In addition, unfortunately our South African government and institutions established by government, have proven to be vulnerable to criminal entities and bribes. Corruption is rife within our country. As such, for the state to attempt to license or regulate faith of its' citizen is not only contradictory but even dangerous to our democracy. As members of the CRL Rights Commission are directly appointed by President Cyril Ramaphosa, our government can influence how decisions are made by the commission, and therefore it is vulnerable to the same decline and corruption. This threatens freedom of religion, including the spiritual autonomy of faith communities and may very well weaken our South African democracy.	Mariza	English	employed individual

			Who I choose to worship is my choice and mine alone. Not even my parents can dictate or regulate this. I find it ironic that a government as corrupt as ours would try and regulate other institutions. We have laws in our country that are supposed to prevent all kinds of abominations, that are common place in our society, outside of our churches. Let us revive our legal structures, route out corruption at the highest levels of government and then allow the system to work as it was designed too. No organisation whether it be a church or a corporate company is above the law! Jesus Christ himself acknowledged the government in power at the time, and it's laws when asked if His followers should pay taxes. He said, "Give unto Caesar what belongs to Caesar"	John	English	self-employed
2025-10-14 09:54:08	No I do not	Other	In Matthew 7:5 Jesus also said: "You hypocrite! First take the plank out of your own eye, and then you will see clearly to remove the speck from your brother's eye".			
			It is shocking, it is alarming, it is so sad to hear the reasoning of officials driving this proposal. Namely that God cannot speak to anybody, more or less in words that say it is foolish for anybody to say God speaks to you, or God has spoken to you. Such words deny the history in the Bible's Old Testament when God spoke to Moses, even to all the Israelites at Mount Sinai (Exodus 20), to the Judges like Gideon and Samuel, to individuals like Mary the mother of Jesus in the New Testament (Luke 1), also to Philip (Acts 8), to the apostle Paul (Acts 9) congregations (Acts 13). There are numerous examples. For a member of any selected committee to assume the right to judge God's own actions, to judge sincere believers, and to know better than the Word of God, might be blasphemy. Why do the selected members of the CRL Rights Commission not rather initiate cooperation with churches to properly train all unqualified pastors who have appointed themselves as church leaders? By doing so the level of competence and spirituality can become a powerful source of growth and development in our country, and promote care and love rather than conflict amongst our people. 			Freedom of religion & constitutional rights: fear that regulation may infringe on religious freedom: what faith people can follow, how churches run their internal affairs, doctrine, worship, etc. Risk of state overreach: my concern is that once you allow government or state bodies to define what is acceptable religious practice, or to issue licences or accreditation, the door opens to potential suppression or discrimination. Some believe that existing laws (criminal, civil, anti-fraud, etc.) already cover abusive or illegal behaviour, so enforcement rather than new regulation might be the answer. forsa.org.za			
2025-10-14 09:56:17	No I do not	Other	Practical difficulties: Religious organisations are extremely diverse in size, structure, doctrine, practice. What works for one might not for another. Imposing uniform regulatory frameworks may be difficult, costly, or unfair. Religion must be regulated.	Bethel		
			People cannot continue to practice religion anyhow anywhere without accountability. So many people are hurt in the name of religious beliefs and practices. People are made to believe everything they are told and intructed to do by their spiritual leaders without questioning. To protect people from harmful, inhuman and degrading religious practices, it is of cardinal importance that the government regulates religion. Foreigners use religion as a form of income-generating tool, making our vulnerable poor communities poorer. In conclusion, it is a fact that cannot be disputed that people died and continue to die in South Africa, Africa and other parts of the world as a result of unregulated religious practices. So we must not be made to believe that every religious practice encompasses spiritual calling. That's the loophole pseudo-spiritual leaders utilize to enjoy lavish lifestyle at the expense of their followers (who are their victims).

			Un-constitutional! The State should have no control of a person's religious beliefs. The State has more than enough legislation so that if any reasonable law is broken, the necessary framework is available to remedy the situation. In fact it is high time that they do the necessary policing and use the system to address such issues of crime, murder, fraud, corruption etc., etc. Then South Africa will start returning to a civilized society, which it currently it is not. I recommend that those in authority are invited to read the Bible and apply those principles to their own lives, as those in control have a higher responsibility to God and if they do not heed His requirements,. 			I do not support the CRL proposal to regulate religion because I believe that faith and religious practice are matters of personal conviction and freedom, not areas that should fall under government control. While accountability and ethical leadership are important, regulating religion risks infringing on the constitutional right to freedom of belief, conscience, and association. It could open the door to unnecessary interference in spiritual matters, restrict diversity of worship, and undermine the independence of religious communities. Instead of regulation, efforts should focus on promoting transparency and self-regulation within faith groups, guided by shared moral and ethical principles rather than state-imposed rules. 2025-10-14 10:18:43	No I do not	Constitutionality	Not only is the regulation of religion yet another government overreach and a gross violation of freedom of religion, association and thought guaranteed by the South African Constitution, but it also is another attempt to dilute and destroy diversity. It is the diversity in South Africa that makes it strong - any centralisation smacks of Communism and Totalitarianism especially when it comes to controlling freedom of thought, speech and spiritual practice. The South African government must stop seeking manners to reduce opposition - if it truly acknowledges democracy it will accept that less and less South Africans want to be controlled and regulated especially when it comes to personal individual and group freedom of thought and spirituality. The South African government should start facilitating diversity and economic growth and stop interfering in individual and group autonomy. We are in the societal and economic mess because our 'government' continuously focuses on irrelevant and ineffectual policies and pursuits, instead of actually getting out of the way of South Africans and a free economy to make things better. This latest attack on religious freedom is yet another example of pursuing control that does not benefit South Africans, but only the government.	Matthew	English

2025-10-14 10:22:19	No I do not	Constitutionality	I believe Christianity is not merely a spiritual religion; it is a lived faith that must transform society. As followers of Christ, we are called to ensure that no one lacks food, education, employment, or shelter. We must resist worldly governments when they impose laws that harm the well-being of people. Our allegiance is not divided; Christians cannot faithfully hold both political and spiritual loyalties when politics contradict the Gospel. We are not called to escape into heaven while ignoring suffering on earth. The Lord's Prayer teaches us to pray, "Thy will be done on earth as it is in heaven." That means we must embody the Upside Down Kingdom here and now, a kingdom where the poor are blessed, the meek inherit, and justice rolls down like waters. Today, many people find little value in the church, not because God is absent, but because they suffer in His presence while His representatives remain silent. That may sound harsh, but it's true: we, as church leaders, represent God, yet we have been quiet about the injustices inflicted on His people. Since the new government replaced the nationalists, the church has largely remained silent, only speaking now because its own freedoms are threatened. This is not the way of Christ. Jesus was not hated for His prayers; He was hated because He confronted corruption, exposed hypocrisy, and stood with the oppressed. As church leaders, we must be active peacemakers, agents of justice, mercy, and truth. We must speak not only when our own interests are at stake, but whenever God's people are suffering. 2025-10-14 10:22:55	No I do not	Constitutionality	This approach threatens one of the most fundamental democratic principles: freedom of religion, belief and conscience. Faith is NOT for the state to approve. Religion and belief are deeply personal and spiritual matters. No government agency should have the power to decide which faiths, denominations, or spiritual leaders are 'legitimate' or 'acceptable'. It crosses a dangerous line from protecting rights to controlling belief. What begins as 'vetting' can easily become suppression. A healthy democracy allows different beliefs to coexist peacefully. Although christians do live on earth and need to obey the reasonable laws of the country. Governments were not appointed according to the bible to dictate to God's people. It is not in their range of authority. The authority of governments are given by God to ensure harmony amongst people. Thus can they also not inhibited the functioning of the church if it is not trespassing laws. 			I strongly oppose the renewed proposal by the CRL Rights Commission to introduce mechanisms for vetting, licensing, and regulating religious organisations and leaders. This proposal is not only unnecessary and impractical, it is unconstitutional. South Africa's Constitution enshrines the right to freedom of religion, belief, and association. Specifically: - Section 15(1) guarantees “freedom of conscience, religion, thought, belief and opinion.” This includes the right of individuals and communities to hold and express religious convictions without state interference. - Section 18 protects “freedom of association,” allowing individuals to freely form and join religious organisations of their choosing. - Section 31(1)(a) and (b) affirms the rights of persons belonging to religious communities to “practise their religion” and “form, join and maintain cultural, religious and linguistic associations and other organs of civil society.” Crucially, Section 31(2) prohibits any exercise of rights that is inconsistent with any provision of the Bill of Rights—yet it is the CRL's proposal that violates these rights. The CRL's proposed regulatory framework undermines the spiritual autonomy of faith communities and imposes a state-centric model of religious legitimacy. It risks converting constitutionally protected freedoms into privileges subject to bureaucratic approval. Such a regime would be incompatible with the pluralistic and democratic values upon which our constitutional order is founded. While accountability in all sectors is important, it must be pursued through lawful and proportionate means. Existing legal remedies already address abuse and fraud within religious contexts. Blanket regulation of religious belief and leadership is not only overbroad, it is a direct affront to the foundational principle of religious freedom.

2025-10-14 10:46:30	Yes I do	Other	The so-called religious community is rife with charlatans who prey on the weakest and most gullible members of society. There have been numerous cases of 'pastors' sexually abusing and assaulting parishioners. Scientologists have huge offices all over the place and are clearly very well funded, yet they pay no tax and do who knows what exactly. There needs to be some sort of framework and oversight to protect the people from the many who use religion as a means of control, to influence politics and more. Real crooks and corrupt individuals pose in religious settings to pretend piety, and this is tolerated although there many sins are known and tolerated by these pastors and other fakes. 2025-10-14 11:11:41	Not fully	Other	The regulation of religious leader and religion stems from a need to protect our vulnerable from exploitation. We have seen how so called church leaders and misled our people, robbed them of their life savings, of their health and of their trust. Women have been sexually abused by individuals who presented themselves as having a higher purpose. Parliament needs to sit and work through how to protect people without infringing on their constitutional rights. I support the idea behind it. Just not the execution they have decided to go with. To think otherwise is not what was intended by those who drew up and instituted the Bill of Rights and the Constitution. The Government needs to abide by the Constitution. This is for the electorate to decide democratically in consultations with the heads of religious institutions and not by the state which can lead to suppression and oppression the very aspect that this government professes to fight against and prides itself as the protector of . 2025-10-14 11:26:31	Yes I do	Constitutionality	Religion's FREE REIGN was used as the "divine" backing to unconstitutionally infringe on the human rights of black and brown people in South Africa for decades. Freedom of religion is fundamentally different and does not need regulation. If you reserve the right to be unconstitutional because your interpretation of the bible gives you "the right" to do so, then you do not deserve to be covered by the constitution. Freedom of speech and religion are not without consequences when those rights impose on any other living being's right to exist. To regulate organisations is not to regulate religion. The main reasons for this bill is to address "issues like abuse and commercialisation" AND more importantly to "check religious leaders against a register of SEX OFFENDERS, particularly those with contact with CHILDREN". To be obtuse about this proposal and to fear monger is to showcase your blatant ignorance and bigotry and shows how in favour you are of the abuse of children and the hoarding of money and resources by mega churches who don't plow any of those funds back into the community. What kind of religions do you heathens follow?	Meagan	English

2025-10-14 11:33:05	No I do not	Constitutionality	I firmly object to any attempt by the South African Government, the CRL Rights Commission, or any related body to: - License or register Christian ministers, churches, or ministries; - Regulate ordination, doctrine, or religious practice; or - Introduce legislation that would place Christianity under state supervision or control. Such actions would constitute a violation of the Bill of Rights, an assault on the independence of the Church, and an erosion of the moral and constitutional fabric of our democracy. I therefore call upon Parliament and the Government to: 1. Uphold and defend the constitutional right to religious freedom in all its fullness; 2. 2025-10-14 11:40:38	No I do not	Constitutionality	The proposal by the CRL threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters South Africa's Constitution guarantees every person: - Freedom of conscience, religion, thought, belief and opinion (Section 15) - Freedom of association (Section 18) - Freedom of religious communities to govern themselves (Section 31) Concerns - Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. - The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. - State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. - It risks religious leaders becoming subject to or tools of state control. - South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. - Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. It is letting them tell us how to pray, who to listen to, and what to believe in. We are unique human beings that was created by God with senses and are not robots that need to be controlled. Our Constitution gives everyone the right to believe and worship freely. No one — not even the SA government — should decide who can be a pastor, prophet, imam, or spiritual leader. South Africa has many beliefs. You can't make one law to control all of them. What works for one church may not work for a mosque, a temple, or traditional healers. Lastly, we were created by God, not by government. We each have a spirit, a mind, and a conscience and are definitely not machines to be programmed by the state. 			South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns: – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.

2025-10-14 12:40:01	No I do not	Constitutionality	The CRL is a Trojan Horse to reduce section 15 of the constitution to a bunch of meaningless words. All SA churches are signatories to a Charter which includes a code of conduct. The means to sort out issues among the churches is there. Anything beyond that can be taken to court. So there is no need anyway for the CRL. But, of course, as Marxists, double=speak is their standard. The claim by the CRL that there is a need "to restore order" is classic deceptive Marxism. The Bolsheviks knew to crush religion on day one because of its threat to political control. China has long been persecuting and controlling religious practice. The effect and influence of religion in dismantling communism in Eastern Europe is something the CCP is very wary of. Which is why churches in China have to be registered; no one under the age of 18 may be involved in religious practice; retranslating and annotation of Biblical passages is taking place to establish common ground with socialism. The same is happening to worship songs: the CCP is inserting CCP values into the lyrics. As loyal supporters of and dependents on the CCP for aid and trade, the ANC's intrusion into religion is not surprising. It's another key area in sewing up complete control and dictatorship. 2025-10-14 12:44:23	No I do not	Constitutionality	Everyone has the right to believe (or not believe) in any faith. When governments control religion, they can use it to justify political power or silence dissent. History shows that mixing religion and state authority often leads to oppression, discrimination, and conflict. In most societies, people follow different religions (or none). If the state controls or favours one religion, others are treated unfairly. A neutral state allows all faiths to coexist peacefully. Freedom of belief encourages mutual respect and reduces religious conflict. Faith is personal; it depends on inner conviction, not government approval. When the state interferes, religion risks becoming a tool of politics rather than a matter of spiritual or moral guidance. Religious institutions that operate independently are less likely to be corrupted by political interests. Likewise, governments that stay secular are more accountable to all citizens, not just one religious group.	Theo	English	retired

To me its of the Governments opinion that their main aim is to tax the churches and other religions fraternities under the umbrella of sensed sermons. Having then full control of the people that is indeed democratically free in South Africa. The first phase where they imburse Sangomas and not wanting to imburse the Khoisan kings is already a loophole in the system, therefore they waiver their right to an equal society. In fact it is the religious people like the Christians and Muslims and other religions that assist without the help of Government where food is needed for the poor, disaster risk areas, pensioners who live on little SASSA payouts, the unemployed, opening up and maintaining drug addiction safe houses, help with teenage pregnancies, prison ministries and integration back into societies, and the list go on and on. Religion is something that is not tangible, you can't touch it, feel it, see it - it is a link to the divine - whatever religion/faith you follow. I saw a comment that it smacks of Communism - not sure if Russia is like the Communism of way back but I saw recently Christianity is not banned there - true? I cannot confirm it. 			I am a practicing minister of religion. I do not approve of the proposal, based firstly on the matter of necessity: It is not necessary; I fully support the arguments supplied by Freedom of Religion SA and of the text in Dear South Africa: The proposal by the CRL threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. South Africa's Constitution already guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) My Concerns why the proposal by the CRL are these – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. 			Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. There is no valid or legal reason to revisit this matter.

2025-10-14 16:45:17	Yes I do	Necessity	Faith Without Accountability: Why South Africa Must Regulate Religion South Africa's constitutional democracy enshrines freedom of religion as a fundamental right. It's a principle worth defending—but not without limits. In recent years, the country has witnessed a disturbing rise in unregulated religious movements and spiritual practices that exploit this freedom, operating in legal grey zones with little to no oversight. The result? A proliferation of charlatans, criminal enterprises cloaked in spiritual authority, and communities left vulnerable to abuse. From self-proclaimed prophets selling miracles to cult-like groups engaging in harmful rituals, the lack of regulation has created fertile ground for manipulation, exploitation, and even violence. These actors often operate above the law, shielded by the very freedoms meant to protect genuine belief. They evade scrutiny, avoid taxation, and in some cases, commit crimes with impunity—all under the guise of religious practice. This is not an attack on faith. It's a call for accountability. Just as we regulate education, healthcare, and finance to protect the public, so too must we ensure that religious institutions are held to ethical and legal standards. Regulation doesn't mean censorship—it means transparency. It means requiring registration, financial disclosure, and adherence to basic human rights. It means protecting vulnerable people from spiritual abuse and ensuring that religious leaders are not immune to the law. South Africa needs a framework that: - ? Requires religious organizations to register and disclose leadership structures - ? Enforces transparency in financial practices to prevent fraud and exploitation - 🏛️ Holds spiritual leaders accountable for criminal behavior - ? Promotes public education on religious rights and protections e.g A lot of people are killed, families and communities destroyed due to sorcery and the religious practitioners are above the law... 2025-10-14 16:54:09	No I do not	Necessity	It is UNCONSTITUTIONAL as it violates Section 15: freedom of religion and conscience, Section 18: freedom of association (including the right not to join a state-approved body), Section 31: right of religious communities to self-govern & forces religious leaders into state-controlled “Umbrella” structures. It is also UNNECESSARY as South Africa already has robust laws (Criminal Law, SORMA, Children's Act etc.) that cover all criminal abuses. The issue is not the absence of law—it is poor enforcement of the law. Religious freedom has never been a defence to excuse criminal behaviour. It is UNWORKABLE as who decides who qualifies as a “religious practitioner” or can register as a religious organisation? Which doctrine will be “official”? Who sets the standard? How will licensing be enforced? What if you disagree with the Peer Review Committee? It is UNAFFORDABLE as the estimated cost to taxpayers is R750 million start-up + R250 million annually & CRL’s current annual budget is one-fifth of what this scheme would require. In addition the license fees for “approved” religious organisations and religious practitioners would be burdensome.	Heather	English	employed individual

2025-10-14 16:57:07	No I do not	Constitutionality	Freedom of religion is a right for all and cannot be regulated by selected inidvuals. Religion is complicated and based on belief systems that regulate from within. While we may want to protect people from imposters and fraudsters, imposters and fraudsters come in all forms, and we should be educating the public rather than regulating. Government has no right to decide who can or can not be a "religious practitioner". This goes against our Constitutional rights and the bias is in favor of the Christian church and how it is run, so all other religions will be penalised.	Gail	English	employed individual

2025-10-14 18:03:24	No I do not	Constitutionality	While I recognise the need to protect communities from harmful practices, fraud, and abuse within some religious contexts, I wish to express my strong opposition to state-controlled mechanisms that risk infringing on constitutional rights and the freedom of religion, as guaranteed in Section 15 of the Constitution. The licensing of religious leaders by the state undermines the right of every individual and community to practise, teach, and organise their religion freely, without state interference in theological matters. South Africa's constitutional democracy depends on a clear boundary between religious life and government power. State vetting of religious leaders risks politicising faith and silencing dissent. Where abuse, fraud, or harm occurs, it should be addressed using existing criminal, consumer protection, and nonprofit legislation. Regulation must target unlawful behaviour, not belief systems. 			Dear Karen The Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission) is again pushing for mechanisms to vet, license and regulate religious organisations and leaders. A big thank you to the 18,000+ participants ... so far! Karen, please click the button below to have your say right away! The proposal by the CRL threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. Why This Matters South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Concerns – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes

2025-10-14 18:44:57	Not fully	Constitutionality	The State has very little say concerning the validity of religious belief, in particular foundational moral Religions, on which our Moral Law & Constitution are based eg: Christianity. This is unless certain movements, claiming to be "Religious" oppose a Fundamental Moral Code, in which Innocent Life is Protected. I refer here to the protection of Human & Animal Life, and the Unborn Human Baby. The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations, provided these are based essentially on a moral code, eg: Christianity, Judaism, Hinduism, Islam etc. Satanism should be absolutely banned and not be permitted to be included as an acceptable "Religious" practice - it is dangerous & violent, and the complete antithesis of what religion, in the true sense, stands for: the Right to Seek the One True God. Since God don't play a role in government they can do as they which. Everything is falling apart. Children in schools have rights but not educators. When I was in school we started the day with reading the bible, praise and worship en prayers. A child had respect for grown ups and all the people of any race as the bible said. 2025-10-14 18:52:50	No I do not	Constitutionality	I cannot stay silent while the CRL Rights Commission tries once again to bring religion under state control. My faith is not a profession to be licensed — it is a sacred calling that cannot be dictated or validated by any government body. As a person of faith, I believe every South African should have the right to worship freely, to follow conscience, and to gather in community without fear of interference. Allowing the state to decide who may minister or what beliefs are acceptable is a dangerous step toward silencing the very freedom our Constitution guarantees. 2025-10-14 19:03:14	No I do not	Constitutionality	The state has no business trying to regulate who, what, how or where I practise my religion. I am a Christian who accepted Jesus Christ as my Saviour. The state has no right to tell me or my church how to believe. They cannot govern the country as is at the moment. 2025-10-14 19:03:20	No I do not	Constitutionality	I hereby record my objection to the proposal by the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission) to vet, license, and regulate religious organisations and leaders. I do not agree with this proposal, and my objections are as follows: It violates Section 15 of the Constitution, which guarantees freedom of conscience, religion, thought, belief, and opinion. Faith is a personal conviction and divine calling that cannot be licensed or controlled by the state. It infringes Section 18, the right to freedom of association, by attempting to force religious organisations into state-defined frameworks instead of allowing voluntary association and governance. It undermines Section 31, which affirms the right of religious communities to form, maintain, and govern their own institutions according to their beliefs and traditions — free from government interference. The CRL Commission lacks constitutional authority to regulate religious doctrine, ordination, worship, or association. Its role is to promote and protect these rights, not to impose control over them. State regulation threatens religious freedom, as it opens the door to political influence and potential misuse of power over faith communities and spiritual leadership. Faith communities already practise voluntary self-regulation, through codes of conduct, councils, and fraternals. There is no constitutional or practical basis for state-imposed control. Parliament has already rejected similar CRL proposals in the past, deeming them unconstitutional. Revisiting the matter disregards both precedent and constitutional principles. For these reasons, I do not support the CRL Rights Commission’s proposal to regulate religion in any form. It is inconsistent with South Africa’s constitutional democracy and the foundational right to religious freedom.	Jayson	English	employed individual

Freedom of religion means that any person should be free to gather, worship, and establish a place of worship without State approval or interference. The right to start a church, whether in a building, a hall, a tent, or under a tree - is fundamental to this freedom. This will only facilitate abuse as its workability is non-existent. 2025-10-14 21:13:07	No I do not	Constitutionality	It is no secret to any observant South African that our government has seemingly made it its duty and pleasure to attempt to force down our throats a variety of narratives entirely disagreeable to the word of God, to the natural order and to common sense, and we are obliged to wonder whether this might not be a further attempt to subjugate Christians, so that we should not, as is our duty, speak out against rampant corruption, call and actively strive for the maintenance of justice, and proclaim boldly the truth, whether agreeable or no to the world. We have seen the track record of this government, and it is a sure thing that such legislation, [a thing repugnant under any circumstances], would merely be used for the silencing of the truth and to gain freedom to commit all sorts of criminal activities without the discomfort of being called out for it. In addition to the consideration that the proposal would, if implemented, doubtless lead to the weakening and undermining of the church and to the silencing and putting down of things good, true and beautiful, it ought also to be kept in mind that the current proposal seems to me, a layman in matters legal, to go against both the letter and the spirit of the constitution of this land. South Africa boldly states that it is a Christian country, wherefore let us see repentance from this proposal, humility and duty in our government, and the reign of truth in all things. This devilish and deceptive proposal is in no wise acceptable and ought entirely to be scrapped, for let it be known that the voice of truth does not fall silent and that, if necessary, the people of God will turn to disobedience of civil authorities for the sake of our Lord and Saviour, for this earthly life and anything therein is but brief and the life hereafter, eternal. 2025-10-14 21:34:03	No I do not	Constitutionality	Concerns We, the South African public, are not puppets; we are humans, we have the right to choose for ourselves what we think, how we feel, what is viable for each person. – Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. – It risks religious leaders becoming subject to or tools of state control. – South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a “Peer Review Committee” system of state regulation of religion. 2025-10-14 21:55:26	Yes I do	Workability	Every religion should have freedom to worship and to have freedom rights. My problem is when any religion interferes with other religions s freedom to worship. I am precautionate worried to allow street worship or street preaching, because if you allow christains you should allow other teligions also to do it. Preaching should stay inside own premises preaching. All religions should be allowed to help the poor on the streets or charities. No preaching on the streets though. Allot of evangelists will not agree. But if you allow one religion on the streets, all should be allowed. I would allow religious walks on the streets with a cross or any other religions, but no praying or preaching. Praying or preaching should happen inside a house or building. 2025-10-15 06:46:54	Not fully	Workability	It's one thing to appropriately observe and unbiased reports on the goings on in institutions that want to participate in society. But, with the licensing etc implies authority, which governments have over our actions but not our thoughts. So what happens when that authority is exercised or what happens when a group is declined or chastised. Now it's one thing to have freedom of speech but when you are using that speech to control people's actions at some point there is an overlap between what we believe to be right and true and what we DO. Let's take marriage law in the property act. What if a traditionally married man wants to exclude his wife from inheritance and converts to Islam. (in SA that now is going to be tricky. So. If government wants to get involved with controlling religion values and character. I recommend it starts with itself. I think this act is not born in SA and will fail but the precedent is dangerous because of what is implied SA has a reputation of ignoring laws it seems silly and this is as silly as USA politics

Religion is a deeply personal aspect of human identity, and imposing strict regulations could lead to unintended consequences. Rather than regulation, I propose fostering a more harmonious and inclusive society, where individuals can freely practice their faith without fear of persecution or marginalization. Ultimately, the focus should be on promoting tolerance, empathy, and mutual respect among people of all faiths and beliefs, rather than imposing restrictive regulations that could undermine these values. 2025-10-15 07:32:30	No I do not	Constitutionality	Pastors, Priests are called by God and governed by God's laws. These people are accountable to the church organisations they are a part of. Furthermore, they are accountable to the laws of the country. If there are wrong things done then there are laws to bring them to account, just like any other profession. For instance, if they are illegally in the country or are fraudsters, there are laws that will be applied . As soon as Governments start to say who can and who can't be a pastor they are now regulating who and what we are allowed to believe. We see how this is used in countries such as China to persecute those who hold religious beliefs . Already there is talk that Ms Xaluva has commented that people who claim to hear the voice of God should be sent to a psychiatrist. Clearly she is confusing schizophrenia with religious belief. These are examples of dangerous and intolerant views that could be used to control religious practice in this country. No to regulation , we already have what is needed to control people in our comprehensive set of laws and other regulations that we are all subject to.	Maria		retired

2025-10-15 07:46:09	No I do not	Other	I am deeply concerned about the CRL Rights Commission’s push to regulate religious organisations and leaders. While I respect the need for accountability, I question the timing and priority of this initiative. South Africa is facing far more pressing challenges—rampant corruption, economic instability, and social inequality. Why focus on controlling how people worship when the government itself has unresolved issues within its own institutions? Faith is a personal and sacred matter. Attempting to dictate how we serve the Most High God infringes on our constitutional right to religious freedom. Before trying to “clean” the spiritual lives of citizens, perhaps it’s time to sweep the dirt in front of your own door.	Ellery	English	Non-profit

2025-10-15 08:06:09	No I do not	Constitutionality	I do not support the CRL Rights Commission’s proposal to introduce state regulation, vetting, or licensing of religious organizations and leaders. South Africa’s Constitution guarantees freedom of religion, belief, and association (Section 15 and 18). Any attempt by the state to control or regulate faith communities would fundamentally undermine these rights and threaten the spiritual autonomy of all religious groups. While accountability and ethical conduct in all sectors are important, this proposal risks politicizing religion and giving government undue influence over matters of faith, doctrine, and internal leadership — areas that must remain independent of state control. Religious communities already have existing self-regulatory mechanisms, codes of conduct, and governance structures that can be strengthened without new state interference. 2025-10-15 08:08:00	No I do not	Constitutionality	I therefore urge Parliament to reject the CRL’s proposal in its current form and instead promote policies that protect both religious freedom and responsible self-governance within faith communities. It's unconstitutional and no one person or state function can or should regulate religious matters/ organisations. There are already laws and regulations in place to address any abuse or criminal activity perpetuated by or within religious organisations, there's therefore no need for this.	Johnathan

2025-10-15 08:16:08	No I do not	Constitutionality	Democracy if for freedom of religion i it allows people to believe, worship, or not believe as they choose — without fear of punishment. 			1. Violation of Freedom of Religion One of the core human rights is the freedom to believe, worship, or not worship as one chooses. Government control interferes with this right and limits people's ability to express their faith freely. 2. Bias and Discrimination When the government regulates religion, it may favor one religion over others, leading to discrimination and inequality among citizens of different faiths. 3. Suppression of Diversity Religious beliefs are diverse. Regulation often tries to impose uniform rules, which suppresses cultural and spiritual diversity in society. 4. Risk of Political Manipulation Politicians might use religion for political gain, manipulating laws or religious groups to maintain power or control public opinion. 5. Erosion of Religious Authenticity When religion is regulated, faith becomes more about compliance with government standards than genuine belief, weakening spiritual values and sincerity of worship. 6. Conflict and Resistance Government interference often creates tension between the state and religious communities, sometimes leading to protests, unrest, or persecution. 7. Violation of Church-State Separation Many democratic systems uphold the principle of separation between religion and government. Regulation breaks this balance and threatens democratic values. 8. Moral and Ethical Autonomy

Firstly Christianity are earmarked as crime by our government and this is wrong, it is also victimization of religion. There is no freedom of religion in regulating one faith. 2025-10-15 08:20:39	No I do not	Constitutionality	I stand against the CRL's proposal to regulate religion because faith is not a profession — it is a divine calling. No government or commission has the authority to license what God Himself ordains. The moment the state claims power to decide who may preach, teach, or gather for worship, it crosses a sacred line and threatens one of our most fundamental rights. South Africa's Constitution guarantees freedom of religion, belief, and association — not as a privilege granted by the state, but as a God-given freedom the state must protect. The Church answers to Christ alone, not to a political or bureaucratic system that seeks to define or control spiritual matters. While accountability and integrity in ministry are vital, these must come from within the faith community, not through state regulation. True faith cannot be registered, licensed, or approved by government. Once we allow that door to open, genuine freedom of belief and worship begins to close.	Carl	English	employed individual

2025-10-15 08:49:11	Not fully	Workability	I believe the Bible 100%. I, unfortunately, also know that the church does not. They say they do, but there is no self-regulation. People are getting destroyed in the name of Jesus to get money out of them, for one example. Other pastors are just too weak to do anything. Unfortunately, people are desperate when they go to church (that was me) and will believe what they say and try this because they are desperate, just to realize later that they actually did not give a hoot and now their life is ruined. You might say that this is my experience only, but that is just not true. Call me and I will come to your church and show this out in about 2 hours. Theunisjt@gmail.com I cannot speak for other religions firsthand, but I can think that this will be the same there, because where there are people, there is greed for money and power, and in religion you can get both. 2025-10-15 08:54:24	No I do not	Constitutionality	To Whom It May Concern, The recent initiatives by the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL Rights Commission), particularly the establishment of the Section 22 Committee, have sparked significant national debate. While the Commission asserts that its intent is to promote accountability and curb abuse within religious institutions, many stakeholders—including faith leaders, legal experts, and civil society organisations—have raised serious concerns regarding the constitutional implications and practical consequences of these proposals. Concerns Regarding the CRL's Proposals Constitutional Infringement The proposed oversight mechanisms risk violating key constitutional rights enshrined in Sections 15, 18, and 31 of the South African Constitution, which guarantee: Freedom of religion, belief, and opinion. Freedom of association. The right of religious communities to self-govern without state interference. [dearsoutha...rica.co.za] State Overreach and Autonomy The establishment of a peer-review committee, even if framed as “self-regulation,” introduces potential state control over religious doctrine, leadership qualifications, and worship practices. This undermines the spiritual independence of religious institutions. [msn.com] Lack of Legal Mandate The CRL Act empowers the Commission to educate, investigate, and advise—but not to regulate religious communities. Parliament previously rejected similar proposals in 2018, recommending voluntary self-regulation instead. [joynews.co.za] Existing Legal Frameworks South Africa already possesses robust laws to address abuse, fraud, and exploitation within religious settings. The issue lies not in the absence of legislation but in the inadequate enforcement of existing laws. [iol.co.za] Suggested Alternatives and Amendments	Tawfeeq	English	employed individual

Most churches has some sort of out reach programs that helps people in need of food/ clothing/ schooling supplies/ shelter. It is against our constitutional right to try and control the church. Religion should never be controlled as it is a choice of each person. 2025-10-15 09:09:05	No I do not	Necessity	Historical evidence indicates that State enforcement of religious orthodoxy has often resulted in exclusion and oppression. It is essential that religious freedom remains voluntary and unrestricted, provided it operates within the boundaries of the law. The implementation of a State-appointed "Peer Review" mechanism to determine eligibility for religious practitioners or organisations would, in effect, place religion under government control. Comprehensive State regulation of religion poses a fundamental risk to religious freedom. When government authorities dictate who may teach, preach, or establish religious organisations, the substantive right to religious liberty is significantly compromised. I choose freedom as umfundisi because nowhere in this world where I have been has this happened, but there are places where it has happened and the results have been , in all the instances, a phenomenal revival of freedom of religion. This amendment is unnecessary and can only be argued and justified on the grounds of Government having an ulterior motive. 			As we see the spread of false, demonic, satanic, fanatical , violent, despotic, ungodly, unwholesome religions across the globe, we in South Africa appear to be the least affected - for now at least. There must be huge political pressure from the likes of Iran (but fading?), Russia, China, and many others, it won't be long "before it's crying time" here in the RSA! Many people know that most, if not all, organised churches and religions in the RSA are all part and parcel and complicit in the BBEEE transformation of these institutions. This does not bode well for the freedom of worship in whatever religion one chooses, if such legislation is enforced. We know also that the GNU is just another farce and that the ANC goes full steam ahead, unchecked, unaccountable, unwaveringly, very purposefully, very deliberately, based on their true and undisguised evil Marxist agenda and policies! With all and every kind of legislation that gives it more and more and more power and unchecked control of all its citizens daily lives! The Christian faith spells out very clearly from prophecies and doctrine as contained in the Holy Bible, that we, the human beings, in the 21st Century, are indeed experiencing the "time of the end" days. What the ANC wishes for, it generally gets, due to citizenry apathy, disinterest, complicity, neglect, personal greed, delusion, wokey philosophy, propagating false teachings and religions, self-satisfaction, selfishness, and generally - just couldn't give a continental about the reality of the moral , financial, infrastructure, etc., etc., decay as experienced and witness these past 31 years. Our European forefathers ran from religious persecution a few centuries ago. Maybe the wheel is now set to once again - turn! We have an opportunity NOW to block this obscene CRL Rights Commission, as what they will ensure in future, is the full force of Islamic and Sharia Law. That cannot and must not happen!

2025-10-15 10:44:04	Yes I do	No concern	For millennia, religion has been given a free pass to indoctrinate, intimidate and generally spread lies and deceit in order to gain power and wealth. All religions should be considered as businesses. Most of the new generation churches are cash-generating and highly profitable businesses that have generated a new class of millionaire preachers. Almost all churches are franchises in some form or another because they pay fees to their franchisor, whether that be the Vatican or the USA mega churches. The proliferation of pop-up churches must be controlled. They must be regulated to protect those who are unable to determine the validity of the preached message or the credibility of the (all too often) one-man bands that are just in it for the money. 2025-10-15 12:00:52	No I do not	Constitutionality	The proposal by the Commission for the Promotion and Protection of the Rights of Cultural, Religious and Linguistic Communities (CRL) threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. South Africa's Constitution guarantees every person the freedom of conscience, religion, thought, belief and opinion (Section 15), the freedom of association (Section 18), and the freedom of religious communities to govern themselves (Section 31). Parliament therefore already rejected the CRL's proposal for legislation to implement a "Peer Review Committee" system of state regulation of religion. There is no valid or legal reason to revisit this matter. Faith is a divine calling, not a profession — it cannot be licensed or regulated by the state. The state has no say concerning the validity of religious belief. The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. State regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. It risks religious leaders becoming subject to or tools of state control. South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct, fraternals, and self-governing associations. 2025-10-15 12:19:29	No I do not	Constitutionality	As a starting point, there's no legal basis for state regulation of religion; quite the opposite! State regulation of rights is nothing new but the assertion that the state should be able to vet and license religious leaders tramples on the notion of freedom! One need only look to history and see how biased religious leaders were able to support problematic governments (we can see it now in the US). The assertion is that regulation will counteract those issues but, in reality, it will just result in pro-state religious leaders being licensed and anti-state leaders being forbidden from teaching. This is social engineering at its best.		Timothy	English	student

2025-10-15 13:38:37	Not fully	Other	There does need to be a certain amount of regulation, due to the increase of religious institutions, and the effect within the community. Noise levels are often so high that car alarms are set off, increased traffic into neighbourhoods because they don't serve local communities and so-called preachers who are unqualified and misleading community members. There are also those who radicalise people within communities, to partake in extremist activity. However, it should not be done in a way where said communities are marginalised because of their beliefs. 2025-10-15 13:46:27	Yes I do	Necessity	Freedom to express religion should be a the right of every south african. However, where televangelism, financial abuse and religious dogma is utilised to influence south africans negatively, there is where I believe that regulation is required. Look at these mega churches like REMA and Prohet Bushiri church. The pastors/ officials are multi millionaires that care very little for the community they serve. Only to line their own pockets. I have seen pastors become upset when people dont pay their tithing, I have seen pastors telling people that if they send money to the church "seedfaith" that God will cure their cancer. I have seen prophets spraying doom pesticide in the mouth of community members to rid them of demons. Hence why I believe that these institutions should 100% be regulated, and if they generate prophet which is not directly utilised to serve the community they serve, to be taxed like any other business. Pastors should be registered, trained in the basics of serving a community and the consequences when they abuse the community/ enrich themselves without balance. A license to practice religious servicing should only be granted upon completion of this basic course successfully. 			The regulation contradicts several constitutional guarantees and undermines the democratic principles on which the country is founded. 1. Violation of Constitutional Rights The Constitution of South Africa explicitly protects: Freedom of conscience, religion, thought, belief and opinion (Section 15); Freedom of association (Section 18); The collective right of religious communities to govern themselves independently (Section 31). By proposing to “vet” or “license” religious organisations, the state would be asserting authority over spiritual matters—an area where the Constitution expressly limits government interference. Faith is not a profession or trade that can be licensed; it is a matter of personal conviction and spiritual calling. 2. No Constitutional Mandate for Regulation The CRL Rights Commission was established to promote and protect the rights of cultural, religious and linguistic communities—not to regulate or control them. There is no legal or constitutional basis for it to determine doctrines, approve ordinations, or monitor religious practices. Such actions would exceed its mandate and create a dangerous precedent for state intrusion into spiritual life.

The very same people belong to a certain religion, which might not carry the same beliefs, interests, love, and doctrine. This act will plunge the country into spiritual chaos and disaster, with negative consequences. No one person has full knowledge of God and is in a better position to regulate religious matters. It is better left alone and in God's hands, as it was—no more opening corruption and Satanic loopholes in the name of religious regulation. Not even a prophets who is highly rated comprehend a full knowledge of God, but they are sent for a particular purpose, which is not the same as compared to another prophet or any ministry or fold of calling. 2025-10-15 17:25:43	No I do not	Constitutionality	Many religions believe that religious leadership is a calling from God, and that calling comes by revelation from God. The requirement to have the CRL regulate this process severely undermines this belief and freedom of religion because the final say whether someone can be a religious leader will now rest with the CRL. If there are concerns that existing religious leaders are acting in a way that is against the law or inconsistent with the constitution, then they need to be prosecuted using the existing frameworks of the country. Furthermore, even if the CRL decides to only require registration of religious leaders, it risks. Besides the overall costs of the proposed regulation, it is fundamentally against the constitution. 2025-10-15 18:19:24	No I do not	Constitutionality	Religious freedom is a constitutional right. State registration, licensing etc (which inherently imply conditions which require compliance) would already be an infringement of such constitutional right and it would open the door to further unconstitutional state control of religious activities, association etc. There are certainly fraudsters and criminals in every sphere of human activity and religion is no exception - such perpetrators must feel the full weight of the law, however there are sufficient legal instruments to achieve this and state interventions such as licensing and registration is absolutely not required. 2025-10-15 18:31:11	No I do not	Constitutionality	This Government is now going too far. South Africans in the Majority are Christians. This land was very blessed by God; it was a land of milk and honey, prosperous, clean, and almost crime-free. The pride of Africa, where one could walk safely and sleep safely. The ANC, which is nothing other than a Mafia organisation, has turned it into a long drop toilet; nothing works, everything is falling apart, potholes destroy our cars, Street lights do not work, robots are forever out of order, and bad accidents are caused by this dreadful situation. We need to get rid of the ANC. They have destroyed everything that the previous government built up They are devils, they lie to their own people, and the sad part they go around giving the unemployed R350 a month to survive on, and they are too afraid not to vote for ANC as they can not find work. R350 is better than nothing, yet Ramaposa can take all this cabinet on a South African Airways flight, besides that they fly up and down by helicopter to Waterkloof airbase almost every day from Soweto, WHAT FOR, yes Rhamaphopsa is a Hamas lover even entertained them in Cape Town, what a nerve with taxpayers money hey are all money grabbing nanas, even steel from the little opensioners have to suvive on any person who is still in the dark is really DOFF.	rusty	English	retired

What qualifications doo they have to make EDUCATED judgements on what constitutes sound preaching. If preachers subject congregants to abnormal practices then our law enforcement should step in and do the necessary. Two things are happening here. 1./ They take away our rights and replace it with a "privilege" that the Pastors have to pay for i.e. registration. 2./ This is solely to ultimately eradicate Christianity. They won't apply this strictly to other religions. I see their Communist puppet masters hand in this. There is in no way, shape or form that I would ever register to preach about Jesus. 2025-10-15 19:42:18	Not fully	Other	Mistranslations are hidden in plain sight - in all religions: Too use a modern analogy, when a merger&acquisition of a company takes place - the "conquered" company is absorbed. This is the same thing, that has happened to olden days intellectual property of defeated Kingdoms - and they were many. The ethical, and Godly, thing to do, is to acknowledge where the source came from. ✓ [I've done that for the people: my research takes me to the most probable and logical place of ancient Egypt - the world's first Government...I am conflicted also with all their trading partners, as the concept of their science, technology etc - which we call religion - was also a trading commodity]. Well to abruptly end off, because I do not want to write a book or a TV series, if Religion Governs, then so to is there a need for one to Govern Religion. This ensures especially in Africa, that witchcraft(some done to harm individuals) and also detrimental to the soul and countries energy[due to the laws of karma] is curbed. NB: As I wrote this, a man came for work at my gate. There was a communication handicap, because of language and broken phone etc. In our conversation, what was mentioned was that there are existing structures around, when the need was for business centres in each community and suburb. As people need money, to put food on the table..and to also keep the table, and the roof that houses the table. Eg. I myself, need money to start my Solar Energy Company. Its not a want, but a need - that came about 3 years ago, when 600000 companies closed down, and jobs and the skills for them impacted on the wellbeing of society. I do believe in God(Soul), and Science(Mind) and Government(Body), but these are all systems: They undistort with the timeline. [Given that conflict from the past, and also language development, distorted much] In summary: Monarchy, Government, Religion are all systems. Government is the only updated system - updating every election.	Kajan	English	unemployed individual

2025-10-15 19:51:38	No I do not	Constitutionality	The amount of concerns I have about this is honestly hard to enumerate. Let us start with the basic historic fact that any regulation of religion by the state is a bad idea. The fact that any person was ever burned for preaching the gospel (and to restate the obvious there where many) should proof this. Obviously I am not comparing the last circumstance directly to what is happening, merely that this is the type of thing state regulation of religion can and generally has lead to; and I pray South Africa does not start walking down this path.Beyond this basic historical point South Africa is a democracy and religious freedom is a completely essential part to an actual democracy. Religion forms a very important and even central part of the life of many many people. To many people there religious identity is more central then there race, efficiency, gender, class and anything else. For a country to be a free democracy people need to be able to follow their consciences on religious matters . Which mean if someones conscience convicts them to be a spiritual leader they should be able to do it. It could be argued that this can lead to abusive leaders. Very well how can this power be abused, they could perhaps convince there followers to do something criminal, or perhaps doing something criminal themself maybe committing fraud. Very well these should be regulated by criminal law as they would be criminal offenses.The legislation wants to protect against spiritual abuses. What are spiritual abuses, I am a reformed Christian with according to that stats I can find about 10% of the country. To me any other religious preaching than the pure law and gospel of Jesus Christ delivered to us in scriptures alone is a spiritual abuse. The other 90% of religious groups don't preach this.. No other group has a much higher than 10% share. Surely it is unconstitutional to ban 90% of religion. In summary who gets to choose? There is no good option this is why religious freedom exist. The problem is not the churches - the problem is the judicial system - we have the laws, but when we take people to court, even if they plead guilty, they get suspended sentences - and to put the cherry on the cake, the court sends those same abusive people back to 'ministry' over weekends but puts them under house arrest in the week... (I refer to an actual real-life case of abuse) Now they want to tell us that such an 'oversight' committee will be able to do what? Discipline or send that person to jail? 			I am a Christina living in South Africa. My concerns are as follows: Constitutional and Faith-Based Concerns Violation of Religious Freedom: The proposed legislation infringes on the constitutional right to freedom of religion, belief, and opinion. For Christians, this includes the right to preach, teach, and lead congregations according to biblical convictions without state interference. Threat to Spiritual Autonomy: The regulation is perceived as an attempt to control the internal governance of churches, undermining their God-given authority to appoint leaders and manage spiritual affairs. Interference with Freedom of Association: Christian communities must be free to gather, worship, and organize ministries without state oversight, in accordance with scriptural principles. Practical and Theological Concerns Unnecessary Regulation: Existing laws already address criminal misconduct. Additional regulation risks punishing the broader Christian community for isolated abuses. Risk of State Control: Licensing religious leaders could lead to government influence over church teachings and leadership, compromising the church's prophetic voice and independence. Misunderstanding of Divine Calling: The concept of licensing spiritual leaders fails to recognize that Christian ministry is a divine calling, not a profession. Figures such as Jesus and the apostles would not have qualified under such criteria. Lack of Legitimate Support: Previous proposals were rejected by Parliament, and claims of support from Christian denominations have not been substantiated. Alternative Approaches Self-Regulation by Churches: Christian denominations and independent churches already have governance structures, codes of conduct, and accountability mechanisms rooted in scripture and tradition. Enforcement of Existing Laws: The focus should be on applying current laws to prosecute wrongdoing, rather than imposing blanket regulation on all Christian leaders and communities.			
2025-10-16 06:55:41	No I do not	Constitutionality	Just like you cannot regulate wind, so can you not regulate Spirituality. This is deeply ingrained in the Unity of our Multicultural Environment. HIGHLIGHTING: The idea that true unity in a diverse society is not about imposing a single spiritual path on everyone, but about recognizing and respecting the multitude of authentic spiritual journeys that exist. This tolerance for religious and spiritual plurality is a critical component of multiculturalism.	Philene	English	employed individual

2025-10-16 07:50:17	No I do not	Constitutionality	Geloof is wat dit is. 'n Geloof saak. As jy dit wetlik wil bestuur beperk jy die reg van 'n persoon om sy eie geloof te volg. Die feit dat Christelike leiers amptelike opleiding en kwalifikasies bekom, maak dit nie 'n proffesionele beroep of besigheid nie, maar verseker dat leiers bemaagtig is om met goeie kennis die geloof te verkondig en begelei. Die vryheid om te glo en die geloof uit te leef mag nie beperk of gereguleer word nie. As iemand nie saam stem met byvoorbeeld die Chritelike geloof nie, is die persoon nie gevorseer om dit te volg nie. As 'n persoon wel hou van sommige van die geloof se oortuigings, moet hy dit ten volle beoefen, of 'n geloof soek waarin hy kan glo en gemaklik is. Daar is plek vir atiisme waar jy kan kies om nie te glo nie. Jy kan ook nie aan dring op sekere belonings van sekere gelowe sonder om daarin te glo nie en daarom is geloof en Godsdien's 'n vrye keuse en kan en mag dit nie met wetgewing gereguleer word nie. 2025-10-16 10:00:24	No I do not	Constitutionality	As people who were made by God, who fear and love Him, we reject the regulating of religion in SA. If these regulations are passed and come into effect we will remind our fellow believers of what Jesus said in Luke 12:4,5 "I tell you, my friends, do not be afraid of those who kill the body and after that can do no more. But I will show you whom you should fear: Fear him who, after your body has been killed, has authority to throw you into hell. Yes, I tell you, fear him." I suspect that with these regulations the ANC has the same objective as illustrated in the BBC article "China arrested 30 Christians. Some fear it's the start of a bigger crackdown" (Published 16 Oct 2025 at https://www.bbc.com/news/articles/cx2pez2vg8wo) From the account of the persecution experienced by Peter and John we read in Acts 4:18,19 "Then they called them in again and commanded them not to speak or teach at all in the name of Jesus. But Peter and John replied, "Which is right in God's eyes: to listen to you, or to him? You be the judges! As for us, we cannot help speaking about what we have seen and heard."

2025-10-16 10:08:16	No I do not	Constitutionality	This is against the constitution and is totally unnecessary. It is taxpayers money once again spent without a good reason other than job creation for the cadres. This proposed new law threatens freedom of religion, including the spiritual autonomy of faith communities, and violates the Constitution. South Africa's Constitution guarantees every person: – Freedom of conscience, religion, thought, belief and opinion (Section 15) – Freedom of association (Section 18) – Freedom of religious communities to govern themselves (Section 31) Faith is a divine calling, not a profession — it cannot and should not be licensed or regulated by the state. The state has no say concerning the validity of religious belief. – The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. – State regulation is a threat to any meaningful right to religious freedom. Religious leaders will become subject to or tools of state control. South Africa's diverse religious communities already support voluntary accountability through charters, codes of conduct and self-governing associations. – Parliament rejected the CRL's proposal for legislation to implement a "Peer Review Committee" system of state regulation of religion. There is no valid or legal reason to revisit this matter.	J	English	retired

Since religious communities have already subjected them to voluntary control through various mechanisms which are more than ample to protect the rights of citizens, this attempt by the CRL can only be viewed as an onslaught on religious freedom in disguise. One's religious beliefs is a divine calling an cannot be regulated. Another concern is the constitutionality of this proposal. Any legislation to regulate religion will be in conflict with a citizen's constitutional rights, viz section 15, 18 and 31. 2025-10-16 12:36:17	No I do not	Constitutionality	I strongly oppose any attempt by the CRL Rights Commission or Parliament to vet, license, or regulate religious organizations or leaders, because such regulation would violate core constitutional protections. The South African Constitution guarantees freedom of religion, belief, and opinion (Section 15), and protects religious communities to practice their religion (Section 31). Any legislation that allows the State to decide who is a “legitimate” religious leader, or to require licensing of faith bodies, amounts to undue state interference in religious doctrine, governance, and spiritual autonomy. It risks turning faith communities into regulatory subjects of the State—a grave encroachment on section 15 and 31 rights. Regulation of religion in this manner would be unconstitutional unless it meets the strict test of justifiable limitation (i.e. it must be reasonable and necessary in an open and democratic society), and I see no plausible justification that could survive that test. 2025-10-16 12:45:45	No I do not	Constitutionality	I strongly oppose any initiative by the CRL Rights Commission or Parliament to vet, license, or otherwise regulate religious organizations or their leaders. Such measures would constitute a direct infringement of constitutionally protected rights and exceed the permissible bounds of state authority in relation to religion. The Constitution of the Republic of South Africa, 1996, guarantees freedom of religion, belief, and opinion under Section 15, and further secures the collective right of religious communities to practice their faith and maintain their institutions under Section 31. Any statutory scheme that empowers the State to determine the legitimacy of religious leaders, or that subjects religious bodies to a licensing or registration regime, would amount to impermissible state interference in matters of religious doctrine, internal governance, and spiritual autonomy. Such regulation would, in effect, subordinate religious communities to state oversight, thereby undermining the very freedoms Sections 15 and 31 are designed to protect. It is well established that any limitation of these rights must satisfy the stringent requirements of Section 36 of the Constitution, that is, it must be reasonable and justifiable in an open and democratic society based on human dignity, equality, and freedom. I am of the considered view that no conceivable justification could meet this constitutional threshold.	Ilana	English	employed individual

2025-10-16 12:50:11	No I do not	Necessity	Even if one concedes that certain abuses in religious organizations may sometimes occur, the proposed licensing and regulation of religion is not necessary to address them. There are less intrusive, more appropriate remedies within existing legal and oversight frameworks (e.g. criminal law, civil law, existing oversight bodies). Imposing a blanket regulatory regime over all faith communities is disproportionate; it treats all religion as if they are subject to uniform suspicion. The State already has tools to act when wrongdoing happens (e.g. fraud, abuse, cult harms). It does not need sweeping legislation that endangers religious freedom. The “solution” must be narrowly tailored to real, proven harms—not a blanket licensing scheme that punishes the faithful in general because of isolated malpractice.	Linda	English

2025-10-16 12:54:11	No I do not	Workability	The proposal to regulate religious organizations and leaders raises serious practical and administrative problems. Who decides the criteria for who is a “religious organization” or “religious leader”? Which doctrine, tradition, or belief is the standard? How will the State enforce compliance without becoming embroiled in theological disputes and internal faith governance? The regulator would have to adjudicate deeply sensitive doctrinal, theological, and ecclesial matters—which is not within the State’s competence and invites endless conflict, bias, inconsistency, and litigation. Also, religious groups are hugely diverse in structure, size, informal networks, and modes of worship; applying a one-size-fits-all regulatory standard would be chaotic and unfair. The proposed licensing machinery will be too complex and unworkable in practice.	Linda	English

2025-10-16 12:55:56	No I do not	Affordability	Imposing a licensing or regulatory regime over religious communities would come with heavy costs and burdens—both financial and administrative. Faith communities (especially smaller churches and indigenous congregations) may be required to pay registration fees, ongoing compliance costs, audits, reports, or licensing renewals. Many operate with minimal budgets; adding regulatory overhead undermines their viability. The State would also need to allocate substantial resources to staff, inspect, adjudicate, monitor, and enforce compliance—funds that could instead be better used for pressing social needs (education, health, infrastructure). In short, the cost of regulation (for both religious bodies and the government) would far outweigh any purported benefits.	Linda	English

2025-10-16 13:00:44	No I do not	Other	Risk of Ideological or Political Capture Handing the State — or a politically appointed body — the power to vet and license religious leaders opens the door to future ideological bias, political interference, or even persecution. Once a regulatory framework exists, it can be easily abused by future administrations to silence religious voices that oppose prevailing political or ideological agendas. Threat to Spiritual Autonomy & Doctrinal Integrity Regulation would inevitably require the State to define what is “acceptable religious practice” or what counts as a “legitimate faith leader”. This forces the government into doctrinal territory, which it has no constitutional or moral mandate to enter. It breaches the spiritual autonomy of churches, ministries, and faith communities, who answer to God, not to a licensing authority. Marginalisation of Small, Indigenous, and Independent Ministries Large, institutionalised denominations may survive regulatory burdens — but house churches, township ministries, informal fellowships, and rural congregations could be pushed out or criminalised simply for not fitting bureaucratic templates. This pushes faith expression toward state-favoured, institutional religion, marginalising grassroots spiritual life. Chilling Effect on Religious Freedom of Expression Once licensing becomes a condition for legal recognition, religious leaders may self-censor sermons or avoid controversial biblical teachings to maintain compliance. This creates a climate of fear, where Christian (and other faith) teachings are moderated to satisfy state policy rather than scripture or conscience.	Linda	English

2025-10-16 13:03:43	No I do not	Other	Conflict With Section 185 Mandate of the CRL The CRL’s mandate is to promote and protect religious freedom, not regulate or control it. By trying to license and vet religious bodies, the CRL is acting outside its constitutional purpose, shifting from protection to intervention and control — which contradicts its founding principle. Undermining of Community-Based Accountability Faith communities already have internal discipline, eldership structures, councils, synods, and moral accountability mechanisms rooted in scripture and tradition. Imposing a state-based oversight structure cheapens and overrides these God-given governance systems, implying that community-based pastoral leadership is insufficient and must answer to the State. Precedent for Future Religious Control Even if this regulation starts with “light licensing”, it becomes a dangerous legal precedent. Once religious structures are in a database and under a regulatory framework, future laws could escalate control: sermon pre-approval, doctrinal reviews, fines for “non-compliant theology”, mandatory state training, etc. What begins as administration can end in state control over belief. 			Freedom of speech and freedom of religion are foundational pillars of South Africa’s constitutional democracy. These rights were hard-won through decades of struggle against systems that silenced voices and suppressed belief. They are embedded in our Constitution precisely to ensure that every citizen — regardless of faith, denomination, or worldview — can express their convictions without fear of interference or censorship. The current proposal by the CRL Rights Commission to regulate religion poses a serious threat to these freedoms. Religion, by its very nature, is based on faith, conviction, and individual conscience — areas where the state has no legitimate authority to govern. The introduction of government oversight over religious institutions could open the door to political manipulation, control, and suppression of spiritual expression. Once the state begins to decide what constitutes “acceptable” doctrine, worship, or leadership, the very essence of freedom of belief is undermined. Churches and faith-based organizations have long shown that they are capable of self-regulation. Through established denominational structures, councils, and ethical codes, religious institutions can hold themselves accountable without compromising their independence. South Africa’s diverse religious landscape should be celebrated, not regulated. The government should rather focus on protecting the right of every citizen to practice their faith freely, not on policing it — especially when some within the government openly distance themselves from faith in God. If government interference is allowed to take root, it sets a dangerous precedent. Today it may be the church; tomorrow it may be any citizen whose voice or beliefs do not align with prevailing political ideologies. The strength of our democracy lies in the freedom to disagree, to believe differently, and to speak boldly without fear. True freedom demands that the church remains accountable to God and its congregants.	Glantine	English	self-employed

2025-10-16 15:11:17	No I do not	Constitutionality	The state should not regulate religion but should instead focus on enforcing existing laws against church leaders who violate them. The constitutional right to religious freedom has never protected individuals who commit crimes, and to suggest otherwise undermines the rule of law. 2025-10-16 16:29:47	No I do not	Constitutionality	We as the citizens of South Africa need to protect our Constitutional Rights to Religious Freedom. There is no valid or legal reason for the CRL Rights Commission to push again for State control of Religion when Parliament has already previously rejected the CRL's proposal for this dangerous legislation. The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. South Africa's Constitution guarantees every person these rights under Sections 15, 18 and 31. State Regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. Faith is a divine calling, not a profession-it cannot be licensed or regulated by the State. There is also a very real risk of religious leaders becoming subject to or tools of state control. This form of control has been exposed as a reality in many critical areas of governance, and it continues to destroy our country from within as it only benefits political parties and not the people of South Africa. 2025-10-16 20:44:37	No I do not	Constitutionality	We as the citizens of South Africa need to protect our Constitutional Right to Religious Freedom. There is no valid or legal reason for the CRL Rights Commission to again want to push for State control of Religion when Parliament has already rejected the CRL's proposal to implement this harmful legislation. The CRL has no constitutional authority to regulate doctrine, ordination, worship or religious associations. South Africa's Constitution guarantees every person these rights under Sections 15, 18 and 31. State Regulation is an existential threat to any meaningful right to religious freedom, including the rights of religious communities. Faith is a divine calling, not a profession-it cannot be licensed or regulated by the State. There is also a very real risk of religious leaders becoming subject to or tools of state control. This form of control has been exposed as a reality in many critical areas of governance, and it continues to destroy our country from within as it only benefits political parties and not the people of South Africa. He gave us the Bible and His Holy Spirit to help us and guide us in all truth and love. No human being are more righteous than Him and should not put themselves above Him and 'regulate' His Church, as it belongs to Him alone and He governs it. He is the head of the Church. 2025-10-17 08:55:14	No I do not	Constitutionality	I am a living breathing being , government do not own me , religion is a choise not a property of the state to dictate. South Africa is a Democratic country rich in diversity, which includes cultures, languages, and religious beliefs. As South Africans we are community conscious and a social nation. We build our nation through coming together in community and with respect for our diversity and differences. No person or entity can FORCE someone to believe or agree with specific things. It is a personal choice and a deeply internally intimate, spiritual and emotional decision which cannot be forced by anyone else. Therefore religious beliefs and actions cannot be regulated as proposed by the CRL. The CRL's proposal goes against our basic constitution and democracy. It invades our right to freedom of speech, freedom to choose, and freedom to believe. This right to freedom is what we (and the generations before us) have fought to achieve and protect. Religious beliefs cannot be regulated or dictated. The only time there should be any form of government involvement is if the religious beliefs are a danger to the community, ie. only if the religious beliefs condone violence, and criminal acts (such as murder); and only in very few, and very specific circumstances. 2025-10-17 09:08:31	No I do not	Constitutionality	I strongly oppose the proposal to regulate religion. It is wrong for the State to assume authority over matters of faith, as this violates the constitutional right to religious freedom and undermines the independence of faith communities. No government should have the power to decide who can preach, lead, or operate in a religious context. This kind of regulation opens the door to control, censorship, and discrimination, which is dangerous for a free and democratic society. The Church must remain accountable to God and its members—not to the State.	Francis

This basis of control is very common amongst communist parties, like the ANC. To this I add recent reported comment by Chair persons of the CRL stating "Those who speak to God need a psychiatrist" makes it clear that those who are already part of the board of those who have say in such regulation do not even believe in God, therefore no good thing can come of this, only that which is deceptive and for the end gain of control by a government that clearly does not have the best interest of its people. 2025-10-17 12:46:15	No I do not	Constitutionality	My biggest question is: Why? What is the government's motive(s)? Are the Muslims happy with this new 'trend'? South Africa is NOT a communist country and we believe in free choice. Up to now it works for its people. I can only suspect the government has some sinister plan to destroy unity. Free religion is promised to all of us. The government shouldn't interfere at all. Instead of direct state regulation, I propose the following recommendations for the CRL to consider: Recommendations: 1. Promote Self-Regulation within the Religious Sector Encourage the formation of recognized umbrella bodies or interdenominational councils that will establish internal codes of conduct and accountability mechanisms for member churches. Support religious institutions to take ownership of moral and administrative discipline within their own faith communities. 2. Facilitate Partnership, Not Control The CRL should position itself as a partner and facilitator, not a regulator. Develop frameworks for dialogue, mediation, and training with faith leaders — without infringing on doctrinal or spiritual matters. 3. Capacity Building and Education Implement joint programs that equip religious leaders in areas such as governance, financial management, child protection, and community development. Encourage continuous learning to improve ethical and operational standards within the Church. 4. Accreditation through Religious Bodies Instead of government licensing of pastors, allow religious councils or associations to establish peer-accreditation systems to ensure ministry competence and credibility. The CRL may recognize such structures for consultation and cooperation. 5. Promote Transparency and Accountability Churches and faith organizations should be encouraged to adopt transparent administrative practices, publish annual reports, and comply with financial governance laws — without compromising their spiritual mandate. 6. Protect Religious Freedom and Diversity Any future policy must safeguard the right of all faith groups to preach, worship, and organize according to their beliefs, provided they operate within the bounds of law and human rights. In conclusion, the Church must not reject accountability, but it should be allowed to regulate itself under biblical principles and good governance standards. The CRL's role should be supportive. 2025-10-17 14:16:18	No I do not	Other	The ANC CRL rights commission has absolutely no rights whatsoever to regulate the true and genuine Christian faith's denominations and churches here in South Africa. God of the Bible has tasked the various ordained heads and leaders of the true Christian denominations and churches to regulate and monitor the churches. By no means is it the true Christian faith denominations and churches in South Africa's fault and problem that there are other so-called "Chistian" CULTS that are not true to the Christian faith whatsoever at all, they are in fact so very false and fake "Christian" churches and must not even be called Christian at all. As soon as syncretism (the combination of different religions, beliefs and rituals) takes place, the true Christian faith - Christianity, no longer exists because God has clearly said in the Bible :- that nothing at all can be added, or taken away, distorted or changed as it is in the Bible, which is the divine Word of God. So yes, CRL rights commission, you may have a big problem with the many so-called "Christian" CULT false and fake churches here in SA that you feel you need to intervene with and to monitor and regulate due to the very unacceptable and deceiving falsehoods and fakeness that the so-called "Christian" CULT churches utilise to deceive and entrap the congregant members into all kinds of nefarious issues and situations. However, the CRL rights commission cannot and must not get involved in and regulate the really true Christian faith denominations and churches that are true to the Word of God - the Bible, here in South Africa. This will be a huge mistake and problem for the CRL rights commission to do. CRL rights commission, please do not go down this very inconceivable and unacceptable road with the true Christian faith denominations and churches. Thank you so much! Yes go after those using the women and children as sex slaves. Go after those calling for murder and mayhem. At the end of the day God has the last say, whether you think you can talk to Him or not. Faith in Jesus is deeply personal. If you wish to regulate anyone, consider those practicing worship which calls for blood sacrifice, or which calls for the slaughter of anyone not in their faith. 2025-10-17 19:35:38	No I do not	Constitutionality	Religion is every individual's free right. It is an area that should never be governed by the state. Putting this law in place violates many of my constitutional rights. An individual should have the right to choose their religion or choose not to be a part of one. We have a right and responsibility to self govern. This act forces everyone under one version that the government has created. That is beyond their jurisdiction. There is also absolutely no need for this law. Crime has never been committed on the basis of religion, just poor governance of the current law we have. The government needs to focus enforcing the laws we currently have and getting rid of corruption so law and order can be restored. Targetting the churches and religious institutions of the country is not going to fix that.	Talia	English	employed individual

2025-10-17 19:48:30	No I do not	Constitutionality	Constitutional and Faith-Based Concerns Violation of Religious Freedom: The proposed legislation infringes on the constitutional right to freedom of religion, belief, and opinion. For Christians, this includes the right to preach, teach, and lead congregations according to biblical convictions without state interference. Threat to Spiritual Autonomy: The regulation is perceived as an attempt to control the internal governance of churches, undermining their God-given authority to appoint leaders and manage spiritual affairs. Interference with Freedom of Association: Christian communities must be free to gather, worship, and organize ministries without state oversight, in accordance with scriptural principles. Practical and Theological Concerns Unnecessary Regulation: Existing laws already address criminal misconduct. Additional regulation risks punishing the broader Christian community for isolated abuses. Risk of State Control: Licensing religious leaders could lead to government influence over church teachings and leadership, compromising the church's prophetic voice and independence. Misunderstanding of Divine Calling: The concept of licensing spiritual leaders fails to recognize that Christian ministry is a divine calling, not a profession. Figures such as Jesus and the apostles would not have qualified under such criteria. Lack of Legitimate Support: Previous proposals were rejected by Parliament, and claims of support from Christian denominations have not been substantiated. Alternative Approaches Self-Regulation by Churches: Christian denominations and independent churches already have governance structures, codes of conduct, and accountability mechanisms rooted in scripture and tradition. Enforcement of Existing Laws: The focus should be on applying current laws to prosecute wrongdoing, rather than imposing blanket regulation on all Christian leaders and communities. 			I am a Born Again Christian, according to John 3:5 Unless anyone are Born Again by Water & the Spirit of GOD, they shall NOT enter the Kingdom of GOD! I am a zealous minister of the Gospel of JESUS Christ. I am working for the Kingdom of GOD not for the Kingdom of this world. This Government have no take on the things pertaining to the Kingdom of GOD, unless they themselves wana promote the Kingdom of Heaven. I saw a black female interviewed by Lee Ann Manas. She disclosed to Lee Ann that ministers who erect Tents for Gospel Campaigns will be jailed. Why don't they go jail Sangomas who use a polished name: Traditional healers. These are Sangomas who have our children abducted for Muti. Go & target them. All the ancestor spirit worshippers who are not interested in the righteousness of the Three In One GOD, Father, Son & Holy Ghost. They forget the breath they breathe is by the grace of the very GOD they plan to persecute! When Paul persecuted the Church on his way to Damascus, with a letter of authority to kill & destroy Christians, JESUS interrupted his pursuit & did not say why are you persecuting my Children, but..why are you persecuting Me? So, let them bringit on! The power of GOD inside the Child of GOD surpasses any power on Earth. Their prayers will dismantle the plans of any persecutor. The witchcraft manifestations that is carried out in Parliament most years at the opening of Parliament, to keep the ANC in power..their strongholds will be torn down by the prayers of Believers. They don't have the intellect or creativity in their brain to rule our Country sufficiently, they target the core power of society..the Christian! They shall NOT prevail! I petition the Lord to persecute & overtake them, turn them inside out, scatter them seven ways, uprout them & lay them waste!

2025-10-18 12:54:08	No I do not	Constitutionality	The state has no constitutional authority to regulate doctrine, ordination, worship or religious associations... In trying to do so, the state is encroaching upon one's individual right to freedom of liberty and association... I reject, wholeheartedly, this attempt to manipulate and control such a deeply personal part of my life and see it as a form of overt aggression and attack on my personhood... Moreover, there are sufficient voluntary controls in place to oversee and support accountability in the form of charters, codes of conduct, fraternaties and similar self-governing authorities; it therefore makes absolutely no sense for the state to interfere in a process that has governed itself externally well for decades if not centuries... It is also essential, when it comes to matters of faith, to preserve in the belief and practice of divine institution and calling over issues of ordination, teaching (doctrine), prophecy and practice, the heart of which is no vensted in any mandated secular authority... State control of individual conscience, religion, thought, belief and opinion suggests a morbid eradication of individual freedom of association and the right of religious communities to practice their belief/faith; such action is untenable and is reminiscent of the appalling actions assumed under a communist playbook... 			Violation of Constitutional Rights!!! South Africa's Constitution guarantees freedom of religion, belief, and opinion (Section 15). Requiring religious organizations or leaders to be “licensed” or “approved” by the state infringes on that freedom and creates government control over personal and communal faith expression. Once the state decides who is “approved” to preach or lead, it opens the door to censorship and discrimination against certain faiths, denominations, or independent churches. Who decides what qualifies as a “legitimate” religion, organization, or leader? Any attempt to define such criteria will inevitably be subjective, biased, or open to abuse. South Africa's religious landscape is extremely diverse — from mainline churches to traditional African practices to small independent ministries — and no single state body can fairly “license” them all. Existing laws (criminal, civil, and financial) already protect citizens from fraud, abuse, or exploitation — including by religious figures. Instead of new regulation, the government could strengthen enforcement of existing laws and promote public education about rights and accountability within religious contexts.

2025-10-18 21:45:01	No I do not	Constitutionality	Our constitution guarantees freedom of religion. The proposed CRL discriminated against certain religions in that it prescribes what may be taught and by whom. This affects most formal religions. This is clearly discriminatory against positive, self-regulating religious denominations in favour of unregulated traditional and occultic beliefs.	Andalé	Afrikaans	self-employed
2025-10-18 21:58:36	No I do not	Constitutionality	State regulation of religion is an existential threat to religious freedom. When the State controls who can (or cannot) teach, preach or form a religious organisation, any meaningful right to religious freedom has been lost. State regulation treats religious freedom as a privilege rather than a constitutional right, contradicting Section 15 of the South African Constitution, which guarantees freedom of belief and expression without qualification. South Africa’s democracy is built on the principle that the State must remain neutral in matters of faith. Religious communities are already accountable under existing laws for any abuse or exploitation. Imposing state control over doctrine, leadership, or registration would undermine the independence and diversity that make our faith communities a vital part of our society. What we need is responsible self-regulation, not state interference in spiritual matters.	Rienie	English

			I am writing to express my firm opposition to the proposed legislation that seeks to regulate religious practice and institutions. While I understand the importance of maintaining public order and ensuring accountability, this legislation poses a serious threat to the foundational principles of religious freedom and individual liberty. Freedom of religion is not merely a cultural preference—it is a constitutional right and a cornerstone of democratic society. Any attempt to regulate religious belief or practice risks infringing upon the deeply personal convictions of individuals and communities. Such regulation could lead to undue government interference in spiritual matters, suppress minority faiths, and erode the pluralism that enriches our nation. Moreover, history has shown that when governments attempt to control religion, it often results in social unrest, discrimination, and the marginalization of vulnerable groups. Rather than fostering unity, this legislation could deepen divisions and undermine trust between citizens and the state. I urge you to reconsider this proposal and instead promote policies that protect religious freedom while addressing legitimate concerns through dialogue and existing legal frameworks. Let us uphold the values of tolerance, diversity, and freedom that define our society.	Kelly	English	employed individual

2025-10-19 14:54:27	No I do not	Other	The very notion of this is upsetting as it violates the rights of the South African public. As a man of faith myself this is again what we as a country take pride in, our diversity. We cannot standby idly and watch how the very rights of South African are ripped from them by the opinion of a very select few. We all have the right to practice our religion within this country. When we look at other countries such as those in Europe where a similar strict religious rules were imposed, society as a general started regressing at alarming pace. To legislate what religious are and are not allowed to preach is pushing an agenda that does not align with one of the core value of South Africa. It will remove the ability of organizations to pursue the truth with passion and will greatly dampen the affect of the organization will have within the community. My statement is that this notion is far fetched and a desperate attempt of a very select few to benefit from this absurdity. It will not be a benefit to the general population of South Africa and has little to nothing to offer.	Sean	English	employed individual

2025-10-20 00:11:20	Not fully	Affordability	It's hard to say which weighs more in debacle: constitutionality or budget. Since the constitution framework exists already to may this illegal, let me focus on the fiscal aspect: annual ruenovers for small private schools vary in the 5-10 million per anum (rough estimate based on adjusting for inflation from my school days). State run school cost less, but let use assume the cost is the same, this annual spend of R250 million would fund between 25-50 schools. This to enforce something illegal? I think not. Let us stop this before it costs SA any more money we can ill afford.	James	English	employed individual

2025-10-20 02:56:22	No I do not	Constitutionality	Government over reach is not acceptable in personal beliefs such as religion. Focus on corruption and stop pushing global narratives of control. The government doesn’t have the rights or authority to regulate religion or religious practices/activities ~ it goes against every human’s rights to choose for themselves what religion they want to believe or choose to follow and this proposal from the government’s perspective or viewpoint will take away every human or person in South Africa ?? to make a choice out of freedom to exercise their rights. !? Isn’t South Africa ?? still a country where freedom of choice is still the norm and the right of every person or human-being.. !?	Lee	English	employed individual

2025-10-20 07:40:41	No I do not	Constitutionality	It is not necessary nor constitutional for the state to impose regulations on such matters. We can’t trust the state to regulate this anyway as they are, for the most part, spiritually and morally corrupt. The state has bigger problems to worry about and this should be the least of its concerns. Government overreach in SA needs to be stopped. We need to protect individual freedom now more than ever	Taylor
