DEAR SOUTH AFRICA.co.za

Public Participation Report: Proposed10-Year Driving Licence Card Validity Regulations

18 August — 12 October 2026

https://dearsouthafrica.co.za/drivers-licence-validity/

DearSouthAfrica.co.za is an online platform designed to facilitate government and encourage the public to participate in unbiased decision-making processes or policy formation at SOE, municipal, provincial and national levels.

Addressed to:	The Minister of Transport, Ms. Barbara Creecy, MP
Attention:	Mr. John Motsatsing / Adv. NA Thoka (CommentsNRTR@dot.gov.za)
Compiled by:	Rob Hutchinson, Managing Director, Dear South Africa
Dataset Baseline:	4,987 verified South African citizens
Legislative Notice:	National Road Traffic Act, 1996 (Act No. 93 of 1996) — Proclamation Notice 336 of 2026, *Government Gazette No. 55205* (Published 17 August 2026)

1. Executive Summary

This report provides a statutory synthesis of **4,987 individual public submissions** collected and authenticated by the Dear South Africa platform in response to draft amendments to the *National Road Traffic Regulations, 2000*.

Under the *Promotion of Administrative Justice Act (PAJA, Act No. 3 of 2000)*, every comment delivered represents an independent civic representation that the Department of Transport and the Shareholders Committee are constitutionally required to evaluate prior to final promulgation.

The overarching findings demonstrate overwhelming public enthusiasm for modernising licence lifespans, paired with acute resistance to the draft regulation's administrative fine print:

1. **Decisive Mandate for 10-Year Cards: 91.74%** of respondents explicitly support extending driving licence card validity from 5 to 10 years for private motorists and motorcyclists (Codes A1, A, B, and EB).
2. **Support for Commercial Transport Differentiation: 78.02%** of participants agree that heavy commercial vehicles and buses (Codes C and EC) should remain on shorter 5-year cycles alongside biennial Professional Driving Permits (PrDPs).

3. **Overwhelming Rejection of the 3-Month Grace Period: 84.40%** of participants reject the proposed 3-month post-expiry cap in Regulation 108(7) as arbitrary, unworkable, and punitive. A decisive majority (**56.09%**) insist that an expired card must remain legally valid until the state physically produces and delivers the new card.
4. **Demand for Modern Administrative Infrastructure:** Over **84.6%** of participants demanded systemic modernisation, led by decentralised printing hardware (**69.28%**), integration of independent optometrists (**66.05%**), direct courier delivery (**62.80%**), and digital smartphone licences (**54.02%**).

2. Quantitative Sentiment Analysis

Question 1: Extension to 10 Years for Private Motorists & Motorcyclists

Draft Regulation 108(5)(a)(i) — Codes A1, A, B, and EB

Stance	Submissions	Percentage
Yes I do (Fully Support)	4,575	91.74%
Not fully (Conditional Support)	308	6.18%
No I do not (Oppose)	104	2.09%
Total	**4,987**	**100.00%**

Support for doubling the card validity period represents one of the highest consensus levels recorded on the DearSA platform. Motorists view the 10-year cycle as long-overdue relief from corrupt booking systems, administrative queue fatigue, and unnecessary renewal expenses.

Exact Question Posed:

> *Do you support extending the validity of driving licence cards from 5 years to 10 years for private motorists and motorcyclists?*

Question 2: Heavy Commercial Vehicles & Public Transport Renewal Cycles

Draft Regulation 108(5)(a)(ii) — Codes C1, C, EC1, and EC

Stance	Submissions	Percentage
Yes I do (Maintain 5-Year Cycle)	3,891	78.02%
No I do not (Extend to 10 Years as Well)	703	14.10%
Not fully (Require Targeted Adjustments)	393	7.88%
Total	**4,987**	**100.00%**

Nearly four out of five respondents support maintaining a shorter 5-year window for heavy vehicles and passenger transit, citing road safety risks associated with freight transit. However, a significant 14.10% minority—concentrated among fleet operators and commercial drivers—argued that because PrDPs require medical and criminal checks every 2 years under Regulation 115, a 5-year card requirement is a redundant administrative cost.

Exact Question Posed:

> *Do you agree that heavy commercial vehicles and public transport operators should remain on a 5-year card renewal cycle (with PrDPs remaining on 2 years)?*

Question 3: Sufficiency of the Proposed 3-Month Validity Extension

Draft Regulation 108(7) — Expiring Card Grace Period Cap

Stance	Submissions	Percentage
It should remain valid until the new card is produced	2,797	56.09%
No, it should be at least 6 months	1,412	28.31%
Yes (3 months is sufficient)	778	15.60%
Total	**4,987**	**100.00%**

Only **15.60%** of participants believe a 3-month grace period is sufficient. Combined, **84.40% (4,209 participants)** reject the proposed 90-day cap, identifying it as an administrative trap that unfairly penalises law-abiding motorists whenever the state suffers technical breakdowns or production backlogs.

Exact Question Posed:

> *Is the proposed 3-month validity extension after card expiry sufficient to cover potential processing backlogs or card printing delays?*

Question 4: Additional Administrative Improvements Demanded

Participants were invited to select all operational reforms government should integrate.

Administrative Reform Measure	Mentions	% of Total Footprint (N=4,987)	% of Cohort Responding (N=4,221)
Decentralised printing machines across provinces	**3,455**	**69.28%**	**81.85%**
Integration of independent optometrist eye tests	**3,294**	**66.05%**	**78.04%**
Direct courier/post delivery of renewed cards	**3,132**	**62.80%**	**74.20%**
Digital / Mobile Driving Licences (mDL) via smart app	**2,694**	**54.02%**	**63.82%**

Note: 1,850 participants (37.10% of the entire campaign) selected all four administrative reforms simultaneously, highlighting a widespread public demand for modernised, end-to-end service delivery.

3. Thematic Analysis of Public Touch Points & Verbatim Civic Testimony

Analysis of the **1,223 qualitative written comments** reveals several distinct legal, economic, and practical concerns:

Touch Point 1: The 3-Month Grace Trap (Regulation 108(7))

The most contentious legal clause is the proposed 3-month grace period cap. Citizens overwhelmingly pointed to the recurring breakdowns of the state's single national printing machine in Pretoria, noting that renewals regularly take four to six months. If the card production facility stalls past 90 days, motorists become technically unlawful on the road through no fault of their own.

- **Verbatim Civic Testimony:**

"A 3-month grace period is a complete setup. We have all seen the card machine break down for four to six months at a time. If I apply on time and pay my fees, my receipt and expired card must remain legally valid until the day the department actually delivers my card into my hands. Motorists cannot be fined for government failure."

— **Johan K., Employed Professional, Gauteng**

"Why should we be forced to buy an expensive temporary licence when the delay is 100% on the side of the department? If the state cannot produce the card in 90 days, the law must protect the citizen, not the traffic officer looking for a bribe."

— **Sarah M., Small Business Owner, Western Cape**

Touch Point 2: Modernisation & Single-Point-of-Failure Infrastructure

Participants expressed deep frustration with the operational design of the Card Production Facility. Relying on a single national printing apparatus was repeatedly labelled archaic. Participants strongly backed decentralised provincial printing hubs, home courier delivery, and digital mobile driving licences (mDL) accessible via smartphones.

- **Verbatim Civic Testimony:**

"Having one ancient printing machine in Pretoria to service over 12 million motorists in 2026 is absurd. It creates an unnecessary single point of failure. Every province should have its own high-speed printing capability."

— **Michael D., Self-Employed, KwaZulu-Natal**

"We bank on our phones, file taxes on our phones, and receive smart IDs, yet we still have to stand in two separate lines—one to apply and one to collect a piece of plastic. Digital licences via a secure app should have been launched in this gazette."

— **Thabo N., Software Developer, City of Joburg**

Touch Point 3: Eye Testing & Optometrist Integration

While welcoming the 10-year validity, participants raised concerns about deteriorating eyesight over a decade. However, rather than supporting more frequent visits to Driving Licence Testing Centres (DLTCs), respondents strongly advocated for integrating private, registered optometrists into the eNaTIS system to bypass broken, unhygienic testing machines at municipal centres.

- **Verbatim Civic Testimony:**

"The eye test machines at municipal DLTCs are filthy, half of them don't work, and the examiners are not qualified optical professionals. Let registered optometrists test our eyes and upload the results straight to eNaTIS before we even visit the centre."

— **Dr. Arthur B., Medical Practitioner, Eastern Cape**

"Ten years is a long time for eyes to change. Integrating certified optometrist certificates is the only logical way to ensure road safety without creating 5-hour queues at the licensing office."

— **Elmarie v.d. M., Retired, Western Cape**

Touch Point 4: Commercial Drivers & Redundant Permitting

Freight, transport, and logistics operators strongly challenged the exclusion of heavy vehicle codes (C1, C, EC1, EC) from the 10-year card validity. They noted that professional drivers already undergo strict medical fitness, optical assessments, and criminal background checks every two years for their Professional Driving Permit (PrDP) under Regulation 115. Forcing a separate 5-year card renewal adds redundant red tape to the supply chain sector.

- **Verbatim Civic Testimony:**

"The validity of codes C, C1, EB, EC1, and EC should all fall in with the 10-year period, with PrDP renewal every 2 years. Having different expiry dates for the card and the permit is nothing more than an administrative cash cow for municipalities."

— **Nicholas J., Retired Transport Operator, Nelson Mandela Bay**

"Commercial fleets run the economy. We already submit drivers for complete medical examinations and police clearances every 24 months for their PrDP. Forcing our drivers to queue every 5 years for the card itself adds unnecessary downtime and extra fees."

— **Willem P., Fleet Logistics Manager, Free State**

Touch Point 5: Separation of the Indefinite Licence from the Physical Card

Participants widely praised proposed Regulation 101(2) for explicitly affirming that a *driving licence* is permanent unless suspended or cancelled. However, many voiced concern that traffic enforcement officers will continue to fine motorists who carry an expired card as if they were driving without a licence.

- **Verbatim Civic Testimony:**

"Finally, the law acknowledges what the courts have always said: your competence to drive does not expire just because a plastic card reaches a calendar date. The Minister must issue strict directives to traffic departments that an expired card is an administrative oversight, not a criminal offence."

— **Adv. Pierre R., Legal Consultant, Gauteng**

4. Participant Demographics & Geospatial Profile

Participation was recorded across all nine provinces, drawing heavily from the economically active population, fleet owners, and retirees.

Geospatial Distribution Across Provinces

Province	Total Participants	% of Total Footprint	Primary Stance Tendency (Q1)
Gauteng	2,118	42.47%	92.1% Yes
Western Cape	1,542	30.92%	92.8% Yes
KwaZulu-Natal	563	11.29%	90.6% Yes

Province	Total Participants	% of Total Footprint	Primary Stance Tendency (Q1)
Eastern Cape	304	6.10%	91.4% Yes
Mpumalanga	138	2.77%	89.9% Yes
Free State	121	2.43%	92.6% Yes
North West	98	1.96%	88.8% Yes
Limpopo	68	1.36%	91.2% Yes
Northern Cape	35	0.70%	94.3% Yes
Total	**4,987**	**100.00%**	**91.74% National Consensus**

Gauteng and the Western Cape account for over 73% of total participants, reflecting regions where DLTC operational backlogs, corruption scandals, and booking platform failures have been most pronounced.

Participant Socio-Economic Profile

Stakeholder Category	Total Submissions	% of Disclosed Cohort	Dominant Touchpoint Raised
Employed Individuals	1,842	44.34%	Loss of work hours queuing at DLTCs; demand for mDL and home delivery.
Retired Citizens	1,326	31.92%	Rejection of 3-month grace cap; reliance on private optometrists over faulty DLTC machines.

Stakeholder Category	Total Submissions	% of Disclosed Cohort	Dominant Touchpoint Raised
Self-Employed / Freelance	487	11.72%	Inefficient booking systems; corruption and slot-selling syndicates at centres.
Business & Fleet Owners	328	7.89%	Commercial vehicle PrDP redundancy; high administrative overhead for logistics.
Unemployed Individuals	171	4.13%	High renewal fees and the financial burden of temporary licences.
Total Disclosed	**4,154**	**100.00%**	*(833 participants chose not to declare employment status)*

5. Alignment with Media, Civil Society, and Industry Stakeholders

Public sentiment recorded in this campaign aligns directly with technical research and legal submissions from leading civil society bodies, transport associations, and media investigations:

Sector / Organisation	Core Policy Stance	Public Reflection in Campaign Data
Civil Society Watchdogs *(e.g., OUTA, Dear South Africa)*	Benchmarked 35 global jurisdictions showing average card validity of 8.5–10 years; argued that 5-year renewals serve solely as a state revenue generator with zero link to road safety.	Directly reflected in **91.74% support** for 10-year validity, with widespread public calls to stop treating licence cards as a municipal "cash cow."

Sector / Organisation	Core Policy Stance	Public Reflection in Campaign Data
Motoring Organisations *(e.g., Automobile Association - AA)*	Welcomed 10-year validity but warned that state printing infrastructure remains fragile; insisted that grace periods must fully protect motorists from administrative breakdowns.	Mirrored in **84.40% rejection** of the 3-month grace cap and the demand that cards remain valid until delivery.
Freight & Logistics *(e.g., Road Freight Association - RFA)*	Argued that keeping commercial vehicles on 5 years while requiring PrDP every 2 years duplicates red tape and adds compliance costs to the supply chain.	Strongly supported by the **14.10%** of participants (and 7.89% fleet owners) who demanded parity for commercial licence cards.
Optical & Healthcare Bodies *(e.g., SAOA / HPCSA)*	Advocated for certified private optometrist integration into eNaTIS to streamline testing and improve road safety screening.	Directly supported by **66.05%** of all participants who selected optometrist integration as an essential reform.
Investigative Media *(e.g., BusinessTech, News24, Carte Blanche)*	Highlighted chronic single-printer breakdowns in Pretoria, illegal booking slot-selling syndicates, and DLTC network downtime.	Directly reflected in **69.28%** of participants demanding decentralised printing and **54.02%** calling for digital licences.

6. Strategic Recommendations for the Department of Transport

Based on the empirical evidence gathered from 4,987 participants, the Department of Transport is formally urged to adopt the following amendments before finalising the regulations:

1. Remove the 3-Month Grace Period Cap (Amend Regulation 108(7))

- **The Problem:** Capping the grace period at 3 months punishes motorists for state administrative backlogs.
- **The Recommendation:** Amend Regulation 108(7) to provide that an expiring driving licence card **remains legally valid until the new card is physically produced and issued to the applicant**, provided the renewal application was submitted on or before the expiry date of the existing card.

2. Standardise Nationwide Optometrist Integration

- **The Problem:** DLTC testing machines are frequently out of order, and centres lack optical specialists.
- **The Recommendation:** Formalise an electronic data-exchange interface allowing registered optometrists (HPCSA accredited) to submit visual acuity test results directly into the eNaTIS database, completely exempting motorists from on-site DLTC eye examinations.

3. Eliminate Single-Point-of-Failure Printing Infrastructure

- **The Problem:** The national reliance on a single centralised card production machine creates nationwide supply vulnerabilities.
- **The Recommendation:** Establish redundant, modern printing facilities across provincial capitals or transition to a multi-hub procurement model to ensure zero downtime during machine maintenance.

4. Harmonise Heavy Vehicle Cards with PrDP Requirements

- **The Problem:** Requiring 5-year card renewals alongside 2-year PrDP renewals creates redundant compliance burdens for logistics operators.
- **The Recommendation:** Align the physical card validity for Codes C1, C, EC1, and EC with the 10-year standard, while retaining the strict 2-year cycle for Professional Driving Permits (PrDP) focused on medical and criminal fitness.

5. Fast-Track Digital Mobile Licences (mDL) & Courier Delivery

- **The Problem:** Requiring citizens to queue twice (to apply and to collect) imposes unnecessary economic and productivity costs.
- **The Recommendation:** Prioritise the regulatory rollout of verifiable Digital Driving Licences (mDL) accessible via smartphones, and introduce an optional, user-funded home or workplace courier service for physical cards.

This public participation report is officially submitted to the Department of Transport on behalf of 4,987 verified South African citizens by the Dear South Africa platform.

					Please see my reasons below, to support extending the validity of driving licence cards from 5 years to 10 years for private motorists and motorcyclists. 1. Major Relief from Administrative Burden and Queues The current 5-year renewal cycle forces millions of motorists to repeatedly navigate an inefficient, backlogged licensing system . Extending the validity to 10 years effectively halves the frequency with which you have to endure long queues, deal with poor service, and navigate problematic online booking systems . This is seen as a long-overdue reform that prioritises common sense . 2. Significant Cost and Time Savings for Motorists Cutting the renewal frequency in half means you save money on renewal fees and the costs associated with taking time off work to visit a Driving Licence Testing Centre (DLTC) . As the Organisation Undoing Tax Abuse (OUTA) stated, forcing motorists through the current system every five years "wastes time and money without making our roads safer" . 3. Alignment with International Best Practice The decision is informed by a study from the Road Traffic Management Corporation (RTMC) which recommended the move to align with international standards . OUTA's research across 35 countries found the average licence validity period is 8.5 years, with many nations having a 10-year cycle . This change brings South Africa in line with countries like the UK and New Zealand . 4. Eases Pressure on a Dysfunctional Licensing System The current system is plagued by a single, ageing card-printer that frequently breaks down, causing massive backlogs . By reducing the number of renewals by half, the government can ease the service demand pressures on licensing centres, allowing them to focus on clearing backlogs and addressing more critical tasks . This also reduces opportunities for corruption by limiting motorists' interaction with authorities . 5. Road Safety is Not Dependent on Renewal Frequency Critics worry that a 10-year gap between renewals means less frequent eyesight checks. However, supporters argue that renewals are mostly an administrative formality and that road safety depends on effective law enforcement and driver responsibility, not a card's expiry date . OUTA's research has found no evidence linking longer validity periods with higher road fatality rates . Furthermore, it's been noted that people naturally seek help when their eyesight changes, as it endangers their own lives . A separate proposal suggests that while the card can last 10 years, a mandatory vision screening could occur more frequently through other mechanisms, as is the case in New South Wales, Australia . Thank you for your attention.

We should not be paying car licence renewals. It's far too expensive. We can barely survive with the cost of living. *No more annual car licence fees for pensioners*	Maria	unemployed individual
2026-08-19 08:27:21	Yes I do	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	**License Validity and the Right to Drive** **10-Year Validity:** All standard vehicle licenses, including motorcycles and Code 8 vehicles, should have a validity of 10 years. **License vs Card:** A driver's license is permanent and doesn't expire, while the plastic card is just an administrative receipt. **Protection from Penalties:** Motorists should not be penalised for carrying an expired card due to state backlogs. As long as they possess stamped eNaTIS renewal receipts or application slips from the DLTC, they are protected from fines. If fined unlawfully, drivers can request a Section 56 notice, contest the fine, and report harassment. **Solutions & Accessibility:** The Department should create decentralised printing hubs linked to live eNaTIS databases, ensuring smooth operations without relying on the internet. Additionally, applicants should receive physical receipts supported by offline verification tools for law enforcement, along with postal or courier delivery and optometrist submissions.	Erica	retired

2026-08-19 09:07:31	Not fully	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I agree with the extension. However, I also feel that you need to have a means of monitoring driver capability and compliance. If a driver is a repeat offender, then they should have a reduced renewal term. If drivers are over a certain age or suffer from illnesses that will degrade their capabilities over time (CP or similar), then they should have shorter periods for review of capability and fitness for operating a vehicle.	James	employed individual
2026-08-19 09:25:45	Yes I do	Yes I do	No, it should be at least 6 months	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	It is said that regular eye tests have been one of the stumbling blocks of licences being extended. This could easily be done with drivers who renew their road licence yearly; suppling an eye test certificate when renewing the licence and disc showing eye test symbol.	Angela	retired
2026-08-19 09:29:39	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions		Clyde	retired

2026-08-19 12:36:08	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	* Eliminates Unnecessary Bureaucracy and Queue Fatigue: DLTCs across South Africa are notoriously overwhelmed by routine five-year renewals. Doubling card validity to 10 years cuts administrative traffic by roughly 50%, freeing up testing centres to focus on new driver testing, professional permits, and core road safety enforcement. * Direct Financial & Productivity Savings for Motorists: Motorists only have to pay renewal fees, take time off work, and sit in administrative queues once every ten years instead of twice. For working families and small business owners, this translates directly into saved hours and reduced transport costs. * Alignment with International Best Practice: A 5-year validity period is an outlier internationally. Most developed economies—including the UK, European Union member states, Australia, and New Zealand—issue driving licence cards valid for 10 to 15 years (or until age 70) without compromising road safety. * Legal Separation of the “Card” from the “Right to Drive”: By explicitly stating in Regulation 101(2) that a driving licence is permanent unless cancelled or suspended, the law finally protects motorists from being treated as criminal “unlicensed drivers” simply because an administrative plastic card has lapsed. * Polycarbonate Durability & Corruption Reduction: Modern polycarbonate card materials are technically rated to last over a decade without delamination or fading. Furthermore, halving the renewal volume substantially disrupts the black market for corrupt online booking “slot selling” and DLTC bribery syndicates.	Lerene	employed individual
2026-08-19 12:39:37	Yes I do	No I do not	It should remain valid until the new card is produced		Digital ID, driver's licenses etc are NOT acceptable on a smart. Only the physical card is acceptable.	J

And after 70, drivers licences should only be valid for 2 or 3 years. Considering how quickly my eyesight deteriorated after 45, I'm very sceptical of having a drivers license valid for more than 6 years. Perhaps a drivers livence can be valid for longer, but eye tests need to be submitted every 2 or 3 years to keep validity?	Nikki	employed individual

So now it will expire late 2032. What do I do when it is currently due to expire late 2027? Do I just ignore?	Ro	employed individual
2026-08-19 16:23:02	Yes I do	Yes I do	No, it should be at least 6 months	Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Trevor	retired
2026-08-19 16:25:24	Not fully	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions	Heavy commercial vehicle and public transport operators should have extra requirements (eg police clearance) every 30 months (2,5 years). Drivers over 40 years should have a mandatory eye test every 30 months (2,5 years). Drivers over 65 should also have a mandatory doctor's confirmation letter that they are physically fit and able to drive every 30 months (2,5 years). Drivers need to keep a copy of these with their licenses.	Debra	employed individual
2026-08-19 16:25:36	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	These changes are well overdue and can't come soon enough. The issuing of physical cards should be abolished and replaced with digital drivers licences to move SA into the digital age - it's high time and a no brainer! If there is concern about deteriorating eye sight over 10 years, why not find out what other countries who have a 10 year licence do? Surely there is precedent fire this??	John	
2026-08-19 16:25:42	Yes I do	Yes I do	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions	RTML has an efficient motor vehicle license renewal system in place, the drivers license renewal should be electronic with a matching finger print system in place to avoid fraud .The drivers should be mandated to have eye tests done every 5 years to uphold safety measures,	Audia	employed individual

By halving the frequency of renewals from every 5 years to every 10 years, state entities stand to collect fewer total renewal transactions over time. There is therefore a strong likelihood that authorities will attempt to double or substantially increase the once-off cost of renewing a 10-year licence card to compensate for the lost transaction volume. The regulations and enforcement directives must explicitly clarify to all provincial traffic authorities and SAPS that an expired card is an administrative infringement, not a criminal offence of driving without a licence.	Coenraad	retired

2026-08-19 17:13:40	Yes I do	Yes I do	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions	FULLY agree. the 3 months validity period is more than enough - especially if Digital Driving license cards can be introduced, typically that can be loaded onto eg. Apple Wallet etc. Also seeing one's license expired in a few months after nearly 10 years, surely such an individual can apply for replacement before 10 years have expired in full, AND if independent optometrist test results can be uploaded digitally to the authorities, as well as a digital photo uploaded, then no problem with 3 months. One of the very few really good proposal and potential improvements.	Anton	business owner

Card remaining valid should be subject to annual or bi-annual medical fitness verification after 50	Sean	employed individual
2026-08-19 18:17:03	Yes I do	Yes I do	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Marc	employed individual
2026-08-19 18:17:09	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I support extending driving licence card validity for light vehicles and motorcycles (Codes A1, A, B, EB) from 5 to 10 years. It’s a sensible reform that will ease pressure on DLTCs and bring South Africa in line with international norms. My concern is cost: if the renewal fee rises significantly under the new cycle, the savings from renewing less often could be wiped out. I’d ask the Department to publish the proposed fee upfront, keep any increase modest and justified (e.g. card durability, security features only), and avoid using reduced renewal frequency as a reason to hike the price. I support the reform, but ask that the cost benefit to motorists be real, not offset by higher fees.	Karl	employed individual
2026-08-19 18:17:14	Not fully	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Digital / Mobile Driving Licenses (mDL) via smart app, Decentralized printing machines across provinces to eliminate single-point-of-failure risk	FAEEZ	employed individual

2026-08-19 19:46:12	Yes I do	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Thanks for the opportunity to comment on yet another important subject. Let us start asking the first question, what is the catch in the proposed extension of driver licences! We are all used to corruption, lawlessness and crime in the new South Africa under the ANC movement!! Our concerns are the same old story, what is the hidden costs if the extension happens, it makes no sense if one takes into account the volume of cards to be issued versus the price, or the amount of cards versus customers. In normal business, the more cards to be issued, the less the cost must be per card. Or is it a matter of more taxes to be charged for the corrupt officials and politicians to steal? Surely this must have a reduced tax or levy on the issuing of the cards. Secondly, will there be more printer's available for the cards to be printed, every Province doing it's own printing reducing overhead costs? Why not allowing the validity of the expired card until the new one printed and received by the owner, why three months, more penalties to the owner with the three months expiring date? Why must the consumer always be punished even if the service providers cannot deliver? We agree on ten year period but at a reduced cost or "tax" because the consumers are already over taxed with the fuel price, personal taxes, VAT, property taxes, company taxes, sugar taxes, alcohol taxes, tobacco taxes, driving licence taxes, etc. no wonder food prices are so expensive in our country! The expiring date on heavy vehicles can be reduced to two years, makes no sense having a professional driving license test every two years but the licences are valid for five years. Taking into account the damage done on our road pavement network, it is only fair to tax them more than light vehicle's because our design manual allows a factor of about 1 to 70, meaning damage done, 70 light vehicle's equals 1 heavy vehicles pending the amount of axis per heavy vehicle. They are destroying our roads, not light vehicle's! Lastly, making it easier for motorists obtaining their renewals as it is frustrating standing in queues for hours to be served sometimes leaving without any renewal of license because of human error costing us our time which is a our lost, at least consider us as your clients with the necessary respect we deserve as taxpayers and not your slave's. Service delivery is a huge problem in our country and become a huge frustration, therefore consider alternative measures issuing the cards than to stand in queues while other options are available, using other outlets for applications like vehicle licences and courier of cards while using private optometrists scanned to data centers. Thank you for our input hoping to speed up service delivery in our country!	Derek	business owner
2026-08-19 19:47:04	Yes I do	Yes I do	Yes	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions		Frederik	retired

2026-08-19 19:51:07	Yes I do	No I do not	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I am not in favour of only having a mDL available, mobile phones are lost or stolen and if this is the case, you are driving without a licence available, an offence at present. In addition, the information on the phone can be "hacked" or compromised by malware and/or other means. The current reliance on having an App on your phone to perform any activity that could be done with a "card" or in person is very disturbing and, personally, in my opinion unnecessary. The integration of independent eye test will also be open to abuse and, if instituted, the frequency and mechanism should be carefully considered and agreed. The Concern that the "Issuing Authorities" will unnecessarily increase the charges for the licence renewal is very real. One of the concerns raised by the RTA was that they would "loose" substantial income from the change, so it stands to reason that they will increase the costs so that their management can continue their "wasteful and fruitless expenditure" practices.	Malcolm	retired
2026-08-19 19:51:45	Yes I do	Yes I do	Yes	Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Shanaaz	employed individual
2026-08-19 19:52:18	Yes I do	Yes I do	It should remain valid until the new card is produced		I have one reservation. If someone has recently renewed their drivers licence, and provided it is not within 6 months of expiry , these should automatically also be extended for the full 10 years from date of issue.	Gavin	retired
2026-08-19 19:52:18	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	If proof of payment is produced to show renewal was on time, then the current license should only expire once the new card is in the applicants hand. To only produce a card does not guarantee physical receipt of the card. When the physical card is received, a QR code, for example, can be scanned that can automatically update the relevant authorities. Additionally, how can it be that the whole country relies on a single printer? There should be a printer, at the very least, in major municipalities or districts.	D	
2026-08-19 19:53:24	Yes I do	Not fully	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions		Wim	retired
2026-08-19 19:54:51	Yes I do	No I do not	It should remain valid until the new card is produced		The renewal of existing motor vehicle drivers licence should be valid for 10 years...at no extra costs to the citizens	Eldrid	retired
2026-08-19 19:55:13	Yes I do	Yes I do	It should remain valid until the new card is produced		There also needs to be a control percentage of cost increase for every 10-year renewal so that it remains affordable to all.	Jill	
2026-08-19 19:56:06	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I think that a compulsory eye test should be sent in to the Department of Transport every 5 years, done by a reputable Optician that is recognised for integrity. I know that this will open up another opportunity for the Government to behave in another corrupt manor to extort money out of hard tax paying citizens, but maybe individuals would rather be safe than sorry?	Owen	self-employed
2026-08-19 19:57:27	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Uros	employed individual
2026-08-19 19:58:00	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions		Ivan	retired

2026-08-19 20:35:56	Yes I do	No I do not	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	It will be very practical to extend the validity of all drivers licenses to 10 years. In the case of C1, C, EC1 and EC licenses, make the two yearly medical and criminal checks compulsory, including optometrist issued certificates relating to eye tests for all driver codes. Now is the perfect time to switch over to digital driver licenses. The only serious issue is related to the cost pertaining to renewal of the drivers licenses. It is essential that costs be moderate given that the cost of living is already at a level where poorer people are battling to keep their heads above water in an economy that is poor due to the extensive mismanagement of the economy by government.	Mark	retired
2026-08-19 20:36:11	Yes I do	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Martha	employed individual

2026-08-19 20:44:11	Yes I do	Not fully	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I support the proposal to extend the validity of light-vehicle and motorcycle driving licence cards from five to ten years. However, I believe the amendment should go further and address several practical issues before implementation. The biggest concern is the three-month grace period. It is unreasonable for motorists to carry the risk of being penalised because the State cannot produce and deliver a renewed licence card within the prescribed period. If a motorist applies for renewal before expiry and has complied with all requirements, their legal ability to drive should not be compromised by administrative or printing backlogs. I would therefore strongly recommend that the regulations provide that proof of a valid, timeously submitted renewal application remains legally valid until the replacement card is actually issued, rather than imposing an arbitrary three-month cut-off. I also believe the ten-year period should be accompanied by a more modern approach to eyesight and medical fitness. A ten-year licence cycle should not mean that roadworthiness of the driver is simply ignored for ten years. The system should allow for accredited optometrists and medical practitioners to update relevant information electronically on eNaTIS where necessary. Fees must be transparent The public should also be protected against excessive fee increases. If the administrative burden on DLTCs is reduced by approximately half, motorists should not simply be charged two or three times the current renewal fee. Government should commit to transparent, reasonable and cost-reflective fees, with the proposed ten-year card offering motorists a genuine financial benefit. Commercial drivers should be reconsidered The continued five-year validity for C1, C, EC1 and EC licences also deserves further consideration. Where commercial drivers already undergo regular medical, professional driving permit and other compliance checks, the rationale for maintaining a separate five-year plastic-card cycle should be clearly explained. Digital licences should be part of the reform Most importantly, this reform should not be limited to changing the expiry date printed on a plastic card. South Africa should use this opportunity to introduce a secure, verifiable digital driving licence, together with optional home or office delivery of physical cards. A modern licensing system should reduce the need for citizens to repeatedly queue at DLTCs simply to collect a piece of plastic. My overall position I support the move to a ten-year licence card, but only as part of a broader modernisation of the driving licence system. The final regulations should: Remove the three-month administrative risk for motorists who have applied for renewal on time. Ensure motorists are not penalised for State printing or administrative failures. Integrate eyesight and relevant medical information electronically. Keep ten-year renewal fees reasonable and transparent. Reconsider the five-year requirement for commercial drivers where other regular checks already apply. Introduce a secure digital driving licence. Provide an efficient home/office delivery option. Publish clear service-level standards for the issuing of cards. The principle should be simple: citizens who comply with the law should not suffer because of government administrative failures. Extending validity to ten years is a welcome step, but South Africa should take this opportunity to build a licensing system that is genuinely digital, efficient, affordable and centred around the motorist, rather than simply doubling the lifespan of the existing plastic card. 2026-08-19 20:58:05	Yes I do	Not fully	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions	Basically in favour of the extension of time but am concerned about the potential fee increases because the cost of production of licence cards should not change significantly. There is no indication of fee structure. I agree that regular eye testing should take place, particularly for those over 70?, but accommodation could be made for that in some way I am sure, without having to issue a new card. Perhaps those who fail should have their licence cards invalidated and those whose category of vision has changed, eg now have to wear glasses, would have to apply for a new licence card. But the bulk would stay the same. The eye test applied in our local municipality was not user friendly so I would suggest that independent optometrist test would make sense.	Stuart	retired

The bankrupt government is going after every cent it can lay its hands on. So while, on the face of it, this seems like a sensible way to cut down on bureaucracy and costs, it's likely a way of generating a lot of quick bucks and putting in place another feeding trough. It's a pity that we can't say yes, subject to contract. Unfortunately this reservation applies to ALL South African political parties. South African politicians are angels in opposition, but devils in power. We urgently need a direct constituency- based election system, so we can throw the scoundrels out..	Rodney	self-employed

2026-08-19 23:09:05	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I think it’s a great idea. I am however concerned about the eye tests. If there could still be a mandatory 5 year check up on the eye test, it would work great. People whose eyes didn’t weaken will have no change to their license, people whose eyes weakened and started wearing glasses or contacts, should just take an eye test and get their license updated for a minimal fee. The expiration date stays the same.	Malandrie	employed individual
2026-08-19 23:10:46	Yes I do	Not fully	No, it should be at least 6 months	Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Mandlenkosi	retired
2026-08-19 23:13:01	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I like the idea that the state should be fined if licences are not produced in time.	Johan	retired

2026-08-20 03:58:55	Not fully	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The validity of driving licence cards should not be changed. For Taxi drivers and ALL commercial drivers of trucks of any size should stay at 5 years or even more regululary due to the current standard of these drivers due to the potential risk the pose to the general public. It is my firm believe that these drivers are the cuase of most of the traffice accidents and road violantions. All the points under Point 4 are of great benefit to all drivers and should be implemented. The 'state' of applying for a Driver's Licence at the moment is and absolute disgrace and I have been waiting more than 2 1/2 years and have emailed every Traffic Government Department I can think of (including Minister Creecy) and don't even get a reply. Due to this I have to keep a folder in my car with all the relevant application documents in it.	Richard	retired
2026-08-20 03:59:10	Yes I do	Not fully	No, it should be at least 6 months		As normal licences move to ten years, PDP's should also move and be valid for a full five years. 2 year renewal is time consuming and unnecessary.	Brian	retired

Why should drivers of heavy vehicles be treated differently regarding validity? Rather use this opportunity to kick off the digital drivers license by requiring public transport operators and heavy duty drivers to undergo eye tests annually or every two years which can then be recorded on the digital profile for these type of drivers. Ordinary motorists can be phased in over time on the same system.	Anton	retired

2026-08-20 06:46:59	Yes I do	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I support extending card validity to ten years and clarifying that the licence itself remains valid indefinitely. However: the three-month grace period is inadequate given known card-printing backlogs and unfairly penalises motorists for state delays; a mandatory independent eyesight test should be required at renewal given how vision changes over a decade; renewal fees should be capped to prevent authorities offsetting lost revenue through steep increases; and heavy vehicle licences should also move to a ten-year cycle, since drivers already face medical and criminal checks every two years for their professional driving permit.	Ryan	employed individual

2026-08-20 07:00:13	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions	Technology is moving forward. While overhauling the system, why not go for a modern digital card? Most people do not carry a wallet anymore, doing electronic payments from a smart phone, so why not have the license on the phone as well? Eye tests can be done in app with face recognition to ensure it is not done by someone else, or recent eye test from optometrist can be uploaded. No point of getting in a queue to renew a license. It will also be cheaper as the manual card machine maintenance is eliminated. The purpose of issuing licenses is for public safety and should never be a source of income to the incompetent local authority!	Corne

However, I have some concerns that I would like to raise. Firstly, eyesight and general health can deteriorate significantly over a 10-year period. There should therefore be appropriate safeguards to ensure that drivers remain medically and visually fit to drive, particularly as they get older. Secondly, I am concerned about the possibility of increased renewal fees. While a 10-year licence may reduce administration, motorists should not be faced with an excessive fee simply because the validity period has doubled. South Africans are already under considerable financial pressure in the current economic climate. Finally, the ongoing problems with licence-card printing and machine breakdowns are a serious concern. If the system fails or there are lengthy delays in producing cards, motorists should not be penalised through no fault of their own. The three-month grace period may not be sufficient if the Department experiences another significant printing backlog. I support reducing unnecessary bureaucracy, but I believe these issues must be properly addressed to ensure the new system is fair, affordable and safe for South African motorists. Thank you for considering my submission.	Charleen	self-employed

2026-08-20 07:26:41	Not fully	No I do not	It should remain valid until the new card is produced	Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I am all for reducing tedious renewals which should also be done for vehicle licensing. Integrated eye tests should be done every 2-5 years to keep up to date that drivers can make arrangements for eye deterioration. Even for vehicle licensing, this should also be done every 10 years with annual roadworthy checks. Prices of licensing should stay the same as the government doesn't need to burden everyone with additional costs.	Greg

2026-08-20 07:39:05	Yes I do	Yes I do	It should remain valid until the new card is produced		Interesting proposal, and I can certainly see the appeal of moving to a 10-year licence card. Less bureaucracy, fewer queues and lower administrative costs for motorists all make sense. But the 90-day grace period concerns me most. If the system cannot guarantee that a renewed card will be issued within that period, motorists should not be penalised for delays outside their control. If this reform is going ahead, the systems supporting it need to be just as reliable as the policy itself.	Ailsa	retired

2026-08-20 07:55:11	Not fully	Not fully	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Comments on the Draft Regulations Regarding Driving Licence Card Validity I. Areas of Support Alignment with International Standards: Extending the card validity period from 5 to 10 years aligns South Africa with global best practices (such as those in the UK, EU, Australia, and New Zealand) and significantly reduces routine administrative transactions at Driving Licence Testing Centres (DLTCs). Clarification of Legal Right vs. Card Validity: The proposed amendment to Regulation 101(2) is a welcome change. Explicitly confirming that a driving licence itself is indefinite (unless formally revoked) correctly separates a motorist's legal right to drive from the administrative expiration of the physical plastic card. Potential Efficiency Gains: Halving the frequency of renewals should, in theory, reduce the time motorists must take off work and lower overall administrative costs, provided renewal fees remain reasonable. II. Key Concerns and Recommendations The 3-Month Grace Period Trap (Regulation 108(7)): Concern: The draft provision keeping an expired card valid for only 3 months post-application is inadequate. Given South Africa's history of single-printing-machine breakdowns and widespread administrative backlogs, card production frequently exceeds 90 days. Recommendation: The regulation should explicitly state that an expired card remains valid until the new card is produced and handed over, provided the application was lodged before the expiry date. Motorists must not be penalized on the road due to state administrative delays. Risk of Arbitrary Fee Increases: Concern: Card renewals represent a vital revenue stream for local municipalities and the RTMC. Halving renewal frequency creates a strong incentive for authorities to double or triple the once-off 10-year card fee to offset lost revenue, nullifying any financial relief for citizens. Recommendation: Introduce clear pricing caps within the regulations to ensure the transition remains cost-effective for motorists. Missed Opportunities for Modernisation: Concern: The proposed amendments focus exclusively on the physical plastic card, overlooking crucial modern logistics and digital infrastructure. Recommendation: The regulations should incorporate provisions for verifiable Mobile/Digital Driving Licences (mDL) accessible via smartphones, alongside optional direct-to-door courier delivery for physical cards, further reducing foot traffic at DLTCs.	Bertie

2026-08-20 08:08:16	Yes I do	No I do not	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The 10 year renewal of the proof of a valid driver's licence is a welcome change. However, why leave commercial at 5 years if they already need to renew PrDPs every 2 years? Make commercial 10 years too. Or even 12. Delivery of driver's licence cards would also be welcome, as that will create more jobs for people to courier them to work and home addresses. I'm not too worried about a digital licence, because as a software developer myself, there's too many questions still around that in the implementation. I'm also convinced it's not a proper solution at this stage. Maybe as a supplement version, in the case that either the card, or the digital version on a phone is valid. But not a standalone solution of just a digital card on a phone, thus giving the public the option of using either or. And on the eye test part, the stats don't support doing it every 5 years. Yes, eyesight can change over 10 years, but we need to see to be able to function. People will on their own get glasses or do what's needed to be able to see well. The stat on vehicle accidents caused by bad sight should back this up, cause it's likely to be a fraction of a percent.	Le-Roux	employed individual
2026-08-20 08:08:27	Yes I do	Yes I do	Yes	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Minnie	retired
2026-08-20 08:08:34	Yes I do	Yes I do	Yes	Decentralised printing machines across provinces to eliminate single-point-of-failure risk		BRANDON	self-employed
2026-08-20 08:09:26	Yes I do	Yes I do	It should remain valid until the new card is produced		It will be a HUGE relief not to have to renew one's driving licence every 5 years. It is just a money-making scheme. The UK does not do this!!! Your licence does not have to be renewed. Am sure there are plenty of other countries who don't enforce a person to renew their driving licence every 5 years. It's ludicrous.	Glynis	retired
2026-08-20 08:09:32	Yes I do	No I do not	It should remain valid until the new card is produced		Driver's licenses should be for life. We now have ARTO to deal with infringements. If you repeatedly offend you lose your license. No rocket science here. License fees are just another means of stealing from South Africans.	Patrick	retired
2026-08-20 08:10:02	Yes I do	Yes I do	No, it should be at least 6 months	Integration of independent optometrist eye test submissions		Jennifer	retired
2026-08-20 08:10:16	Yes I do	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	C1 and other vehicles should be reviewed if I possess C1 or alternative but I'm driving code 8 then 10years extension should apply. Work classification as driver should take a precident.	Mashao	employed individual
2026-08-20 08:10:18	Yes I do	No I do not	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I'm in full support of extending the licence renewal to 10 years, and it should include the C and EC licence categories, as the PrDP will remain rightly at 2 year renewal periods. It makes absolutely no sense to leave this renewal period at 5 years. It also makes sense to modernise the whole process by going digital instead of printed cards.	Mike	retired

2026-08-20 08:32:54	Yes I do	Yes I do	It should remain valid until the new card is produced		Provision of driving permits/licenses is a duty of the state. It should not be seen as a revenue generating opportunity for the ANC to pilfer more taxpayer funds. Do the right things: 1) Extend the validity to 10 years 2) Leave the cost of a license renewal as-is 3) Learn how to produce the fucking licenses efficiently and reliably. Stop doing backyard deals for mahines that don't work with suppliers who are willing to pay bribes. Get a properly run administrative setup to run the production of the drivers licenses - if help is needed I will do it personally - just do the right things for the right reasons for a change - make us proud 4) Lastlly stop teh fucking fraudulently issued licenses - has any member of government actually driven on the south african roads and observed the level of drivers out there? It's disgusting that these creatures are actually on our roads, and certainly no it's no wonder the death toll on our roads is so high. It has nothing to do with speed, which is the perennial excuse, it is everything to do with stupidity and unlicensed, unqualified idiots driving vehicles. Minister of transport or whoever is accountable for driving licenses should be held personally accountable for every death on our roads	lionel

2026-08-20 08:35:52	Yes I do	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I have a heavy duty license but don't do driving as a profession, so updating every 5 years would be prejudicial to people like myself. Every 10 years should be enough, with the PDP being done every two years. Maybe updating eye test by uploading test results will help. In that case, if a persons health alters drastically, a new card could be emailed with the endorsement on it. Also the A1 limitation should be increased to 250 cc. A driver that can drive a motor car should be able to handle a 250 cc safely. Another ID could be that a persons driving status could be linked to the RSA Smart ID card and eliminate the need for two cards. If an ID card gets stolen the banks can be used to re-issue one without overloading a system that can't be relied on.	Kenneth	employed individual

2026-08-20 08:53:53	Yes I do	No I do not	Yes	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I fully support this amendment. I don't believe that the change in eye sight over this period should be a concern. I have always needed a visual aid to drive and have generally worn contact lenses. I have never been stopped by traffic enforcement and asked if I was wearing appropriate visual aid. This has never been enforced in practice and will not change anything on the ground. I have no problem with the cost escalating, provided that the administrative burden of the renewal is reduced. The only thing that I will say on the validity period- if you can show that you renewed your license within time, your license should be valid until you are able to obtain your replacement.	Derryn	self-employed

2026-08-20 08:58:25	Yes I do	Not fully	Yes		Optometrist eye testing needs to be intergated into the eNatis system, negating the need for a hard copy certificate. Visual Acuity can reduce rapidly, and although the validity of the card may be increased to 10 years, regular eye checks should still be included into the system. There is also no reason why drivers card cannot be delivered by registered courier, reducing the burden on testing centres. Sensitive documents like overseas passports, bank cards etc are already delivered this way. Most would be happy to pay a small extra fee for this service.	Brett	business owner

2026-08-20 08:58:51	Yes I do	No I do not	No, it should be at least 6 months	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	In the UK you do not have to go to any Government department for driver's license renewal. When you license is about to expire the department contacts you via email or sms. You respond and they then deliver your new driver's license card by post our courier. There is no time waste in queues for days on end. We are spending way too much time running around trying to keep 'compliant' with government regulations when our businesses need to be attended to or we need to take time off all the time. It's rediculous. Also with the amount of people on our roads who do not know basic rules what is the point of all this 'licensing' anyway? It's easy pickings for our traffic departments to sit in groups of 50 or 100 officers under a shady tree or bridge to check if citizens of this country have their 'papers'! This is just another revenue stream for the government to keep someone employed when they contribute nothing to the real economy of this country.	Warren	employed individual
2026-08-20 08:58:51	Yes I do	Not fully	It should remain valid until the new card is produced		1. It is essential that Digital /Mobile Driving Licences are introduced via a Smart App. This would be in line with international practice. Time to get away from physical cards. 2. Given that we all have physical driver's licences, direct courier services should be automatic (user to pay). 3. Decentralised printing is vital. We have all experienced the disaster of the entire country relying on one or two machines and them breaking. This must be decentralised for us to have a reasonable shot at being an efficient country on our roads. 4. I agree that there should be a capability for integration of eye tests into the system outside of the 10 year renewal period	Eileen	self-employed

2026-08-20 09:04:05	Yes I do	Yes I do	It should remain valid until the new card is produced		This remains to be seen and experience whether the new system will be practical in many ways. The big problem is the staff who are not all trained and do not understand the work they are doing. Also to implement all the rules is a pie in the sky because South Africa is notorious for not implementing laws and rules etc. the roads still belong to bad drivers and attitudes which will take many years to improve. The loyalty of the traffic dept in my opinion needs to be addressed. The cops sit in their cars and do nothing to alleviate problems.	Marion	retired
2026-08-20 09:04:42	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Heather	employed individual

2026-08-20 09:07:20	Not fully	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Selection of all 4 points above seems contradictory, depending on whether a physical card remains, or whether a digital approach is adopted. Either way, loopholes for falsification, identity theft, etc, should be addressed, as a driver's licence also acts as an important form of personal identification. Interim Eye tests should remain, perhaps an opportunity for working with Public Health to provide access to eye tests every 5 years, that could be directly added to a driver's digital profile (should a digital approach be adopted). For older drivers, or beyond a certain age (70/75? definitely by 80), the 5 year interval (or less) should apply.	Helene	self-employed

2026-08-20 09:10:20	Yes I do	Yes I do	Yes	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions	I support the Department of Transport's draft amendments to extend driving licence card validity for light vehicles and motorcycles from 5 years to 10 years. This reform reduces unnecessary bureaucracy and queues at DLTCs, halves the frequency of renewal transactions, delivers clear time and cost savings for motorists, and aligns South Africa with international practice in the UK, EU, Australia and New Zealand. The clarification that the underlying driving licence itself remains indefinite (unless revoked) is also a welcome and sensible distinction between the legal right to drive and the administrative lifespan of the plastic card. While the 3-month grace period, long-term eyesight considerations, potential fee adjustments, the continued 5-year cycle for heavy vehicles, and the absence of digital/mobile licence provisions require careful attention and refinement, the core proposal is a practical, overdue improvement that benefits ordinary motorists without compromising the essential regulatory framework. I therefore endorse the move to 10-year card validity and encourage the Department to finalise the amendments with appropriate safeguards addressing the identified watchpoints.	Elizabeth	
2026-08-20 09:11:02	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Lorinda	employed individual
2026-08-20 09:11:32	Yes I do	Yes I do	It should remain valid until the new card is produced	Integration of independent optometrist eye test submissions	I think the initiative is positive. But there is still the lack of trust from the public on; 1. Devolving the printing of cards to the provinces is a good idea, but practically it opens up more space for corruption. 2. The same applies for delivery via courier. 3. The state does not have Cybersecurity under control, thus no smart app. One thing I would like to see is an integrated driver license card with your ID. One card for citizenship and drivers license. If you are a foreigner then a different colour card.	Richard	self-employed

2026-08-20 09:29:20	Yes I do	Yes I do	It should remain valid until the new card is produced	Integration of independent optometrist eye test submissions	Current licenses should automatically become valid for 10 years. The 10-year expiry should not be valid only on new renewals.	Louise	retired

					I think all those who drive for a LIVING , irrespective of the size of the vehicle incl ESPECIALLY TAXI drivers(who are hooligans and dangerous and should be limited and monitored in the number of hours they drive per day/ week / month as with truckers and delivery men) Also requiring 5 year renewals MOTORCYCLE DELIVERY riders , ALL DELIVERY drivers of all size trucks , mini vans , cars should remain on 5 year tests and renewals . BUS DRIVERS , esp school bus drivers THERE IS A VERY HIGH standard OF CARE required for those drivers who convey passengers Commercial truck drivers too , every 5 years . In fact ALL those who drive for their livelihood should actually undergo actual driving tests frequently as they are some of the worst offenders with reckless and dangerous , inconsiderate driving on the road l it's like they have no idea as with most South Africans as to the rule of the road . Perhaps the driving tests for new drivers should be more rigorous as they're either totally overconfident or have no idea about driving . Great to give out longer lasting licences but it's the quality of driving here that is apppalling . Perhaps instead of ridiculous road blocks , the police could be a presence checking on crazy driving, esp taxis (not bogus stops for cooldrink money). That could bring in the income that could be lost by increasing longevity of licence . Essentially SAns pay a huge amount of tax for zero services of any kind . Increase the cost of annual car licences. Fine drivers of cars that are not roadworthy . I'm aware some of these things are not under control of same departments . But streamlining and getting rid of an overlarge public sector makes sense - saves costs to tax payers . We're not looking to pat the wages of the members of the political party in power . Tax everyone who earns over R10000 per month , stop giving free university to those unfit or who do not qualify , chase those who don't pay student debt . Do not give free university to children whose parents earn over R15000 per month . Student loans work fine - when the 15/16 % qualify and children are gainfully employed they should have salaries garnished . Those who don't pass first year are out . We would not have to keep wasting tax payers money . There'd be a lot more to go around I'd the govt stopped wasting and extracting and over employing cadres and crooks . There should be no need to increase the cost of licence just so people who have less or nothing to do are sitting around and being paid for being cadres . No need to increase price .

Mngt of the system should also address internal corruption, tiered upward to ministerial level. The current waiting times are tedious - modern equipment and procedures should be adopted. The annual budget (based on our taxes) should account for this additional equipment. Modern equipment will also eliminate 'printing failures' Hopefully with new legislation the current 'padding of municipal jobs' can be reduced and this staff reduction can filter up to ministerial level. Further, municipalities can and should be more effective in their management (but objections to this new bill will probably include - reduction of jobs and less income for municipalities - go figure!!) I fail to comprehend the failure of our government in the governance of all infrastructure in our country - current decaying systems were installed by the previous political dispensation - for the past 30 odd years - infrastructure nationally has not been maintained and much less renewed. This in an indictment of the current national government and those who consistently vote them in. Unbelievable cult-like situation !!	zuleigha	business owner

2026-08-20 10:03:46	Yes I do	Not fully	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Going Digital with a Mobile App: Let’s be honest, almost everything is on our phones these days—banking, IDs, plane tickets. Introducing a secure digital driving licence app just makes sense. It would mean motorists don't have to panic if they leave their physical wallet at home, and it cuts out the reliance on plastic cards entirely. Plus, it would save the government a massive amount of money on printing and postage in the long run. Delivering Cards Straight to Our Doors: Right now, having to visit a DLTC twice—once to apply and once to collect—is a scheduling nightmare for working people. If the department used a secure courier service to deliver renewed cards directly to our homes or offices, it would completely change the game. It would instantly cut DLTC queues in half and save citizens from having to take multiple days off work just to sit in line. Let Optometrists Handle the Eye Tests : The eye test is usually where the queues crawl to a standstill at testing centres. Why not let us do our eye tests beforehand at a registered local optometrist? They can just upload the certified results directly into the eNatis system. It supports local businesses, gives motorists a much more accurate eye exam, and means when we actually walk into the DLTC, we can just snap a photo, pay, and leave. Put Printing Machines in Every Province: Relying on just one single card-printing machine for the entire country is an incredibly risky bottleneck. If that machine breaks down or needs maintenance, the whole country suffers a massive backlog. Setting up smaller, modern printing hubs across all nine provinces is a no-brainer. It ensures that if one machine goes offline, the rest of the country keeps moving, and it will get cards into drivers' hands much faster.	Ursula	business owner

2026-08-20 10:40:03	Not fully	Yes I do	Yes	Direct courier/post delivery of renewed cards to home/ work, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Over a certain age, 10 years is too long. Some people should just not be driving and eyesight is just one aspect that should be addressed on at least a 5 year basis. By kicking all licenses out by 5 years, we will have under utilised capacity, the system capabilities will degrade, then we will have a tsunami in 5 years time. Consider some sort of phasing in to ramp up the demand over a 2 year period.	JP	employed individual
2026-08-20 10:40:49	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	There should be some security measure built into a license that verifies its authenticity so that false licenses may easily be identified.	Alaythea	business owner
2026-08-20 10:41:14	Yes I do	Not fully	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The above covers my concerns. I cannot think of any other reason right now.	Kevin	retired
2026-08-20 10:41:16	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Denise Cecilia	self-employed

Marcello	employed individual
2026-08-20 10:44:21	Yes I do	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	There is concern that people's eyesight may deteriorate too far across a ten year span. People go and have their eyes tested when they cannot see. I'm assuming that eye testing is available to most people, at either a government of private facility. Could eye tests for drivers not be shared with the licensing departments? Instead of the wheel being expensively reinvented at licensing facilities? So professionals do the testing and upload relevant results to a central database that is accessible to the officers who need the information?	Kim	retired

2026-08-20 11:08:50	Not fully	Not fully	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I support the proposed extension to 10 years. The reduction in administrative burden on both motorists and Driving Licence Testing Centres is overdue, the cost and time savings to the public are significant, and the alignment with international practice (UK, EU, Australia, New Zealand) is sensible. I also welcome the clarification in Regulation 101(2) that the licence itself is indefinite unless revoked, distinct from the administrative life of the card. However, I ask that the following points be treated as conditions for successful implementation, not minor details: Regulation 108(7) — the 3-month grace period. Given the department's documented history of card-printing backlogs, a motorist who applies for renewal in good time but is failed by state processing delays should not bear the risk of being deemed unlicensed. This clause needs a stronger safeguard — for example, automatic extension of validity for any period the delay is attributable to the department, evidenced by the renewal application date. Eyesight and health over a 10-year period. A decade is a long interval for vision to change unnoticed. I would ask the department to consider integrating mandatory or periodic independent optometrist checks into the eNaTIS system rather than relying solely on self-declaration at the point of renewal. Fee structure. Given that renewal fees are a revenue stream for municipalities and the RTMC, halving the renewal frequency creates an obvious incentive to raise the once-off fee to compensate. I would ask that any new fee schedule be published and justified alongside the final regulations, not set administratively afterward. Heavy commercial vehicles (Codes C1, C, EC1, EC). These remain on the 5-year cycle despite drivers already undergoing PrDP medical and criminal checks every 2 years. The department should clarify the rationale for retaining a separate, shorter card cycle for this category, or align it where the existing checks already cover the same ground. Digital licences. This reform is an opportunity to introduce a verifiable Digital Mobile Driving Licence and/or courier delivery of cards, neither of which is addressed in the current draft. I would encourage the department to indicate whether this is on a future roadmap. I support the 10-year extension in principle, but its success will depend on the department addressing points 1–3 in particular, since a well-intentioned reform can be undermined by administrative delay and unclear cost implications more than by the policy itself.	Rick	retired

2026-08-20 11:51:26	Yes I do	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I fully support the extension and is is long time waiting. The loss in revenue or income for the state is good because the previous system was nothing but milking the already dry citizen. It can not be denied that the service is utterly bad at the traffic offices and extending it to 10 years saves and protect the citizen from having to endure the burden of the state upon its people. Further, the loss in income is justified because due to the reduction of volume and admin the 10 year extension bring less personnel is needed therefore less salaries to pay. This gives a change to lessen fat cats who deliver little service and collect salary at the department. Even more so when licenses is rolled out in digital format. (The state must stay as small as possible.) It is further a logic result that the heavy commercial vehicles and public transport's time line must be adapted and be the same as the PrDPs. It would be plain intellectually lazy not to do it like that. Lastly, I agree that eyes or ocular ability can deuterate allot in 10 years, but that is not an argument against the 10 extension. Rather set a medical science supported age (70) where it becomes mandatory to file say every 5 year an report from an eye test at an accredited optometrist.	Rudolf	employed individual
2026-08-20 11:51:49	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	We already stand in a long que when applying for the card, when the card is ready, it can be couriered to the person, instead of us going to stand in a que for the second time just to collect the card.	Richard	employed individual
2026-08-20 11:51:56	Yes I do	Yes I do	No, it should be at least 6 months		A reseat for renewal should be sufficient to cover the driver if the card printer is broken. Card holder should not be panelized if new card is not available on time.	Sarel	retired

Direct Cost & Time Savings: Motorists will only have to pay card renewal fees and take time off work once a decade rather than every five years. International Alignment: A 10-year validity period brings South Africa in line with global best practices across the UK, the European Union, Australia, and New Zealand. Licence Permanence Clarified: The draft amends Regulation 101(2) to explicitly confirm that a driving licence is indefinite unless revoked—formally separating your legal right to drive from the administrative lifespan of the plastic card. 2026-08-20 12:04:07	Not fully	Not fully	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The biggest problems further include: a. Lack of resources - Paper, etc. b. Pathetic "Staff " service delivery. c. So called system failure and everyone has to come back the next day or when possible. This happens frequently and around 10h00 to 11h00. d. Offices only process public till 12h00 then the the remaining person's have to come back. Office hours not adhered to. e. Excessive breaks, whereby most of the staff is standing around, or disappear from the posts. Thus service delivery is one of the biggest issues. Regarding the fees, it defeats the object, if they double or triples the fees, which is already very high for a piece of plastic and or paper. We already have to pay additional for eye tests as their machines are not working most of the time or the operator is just not available on the day.	Ben	employed individual

2026-08-20 12:06:45	Yes I do	No I do not	It should remain valid until the new card is produced	Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The regulation must be amended to state that an expired card remains legally valid until the new card is physically produced and collected, provided the motorist applied and paid before the original card's expiry date. The Department of Transport must establish regional/provincial printing facilities or procure redundant modern high-speed printing hardware to prevent national backlogs when equipment requires maintenance. The Department must standardise and mandate the real-time electronic upload of certified eye tests by registered, independent optometrists (HPCSA accredited) into the eNaTIS system, enabling drivers to complete health screenings before ever arriving at a DLTC. Allow commercial vehicle licence cards (Codes C/EC) to align with the 10-year standard for the physical card itself, while keeping the 2-year PrDP requirement strictly focused on health and background fitness. The regulations and enforcement directives must explicitly clarify to all provincial traffic authorities and SAPS that an expired card is an administrative infringement, not a criminal offence of driving without a licence. National Treasury and the Department of Transport must place a statutory cap on card renewal tariffs, ensuring that the cost-savings of reduced administrative processing are passed on to the public rather than offset by exploitative fee hikes. The final gazette must include an unambiguous transitional schedule explaining how existing valid cards will be handled during the transition to the 10-year format. Government should accelerate the deployment of verifiable digital licences on mobile devices and implement optional direct courier delivery of physical cards to homes or workplaces.	Hendrik	retired

2026-08-20 12:32:23	Yes I do	No I do not	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Dear Sir/Madam I would like to make a personal submission regarding the proposed extension of South African driving licence validity from five years to ten years. I understand and support the proposal to extend the validity of Light Motor Vehicle driving licences to ten years. However, I believe that Heavy Motor Vehicle driving licences should also be included in this extension. I understand that one of the reasons for considering a shorter validity period for HMV licences is the increased risk associated with operating heavy vehicles. I agree that heavy vehicles present a greater potential consequence in the event of an accident. However, I do not believe that retaining a five year licence validity period provides any meaningful additional safety benefit under the current licensing system. The current HMV renewal process The key issue, in my opinion, is that renewing an HMV driving licence does not constitute a comprehensive assessment of the driver's fitness to operate a heavy vehicle. The renewal process includes an eyesight assessment and the necessary administrative requirements, but it does not amount to a medical examination. It does not assess whether a driver has developed conditions such as cardiovascular disease, hypertension, diabetes, sleep apnoea, neurological conditions, cognitive impairment or other medical conditions that could affect their ability to safely operate a heavy vehicle. A driver could therefore renew an HMV licence, pass the required eyesight assessment and subsequently develop a medical condition that affects their ability to drive safely. The five year validity period would not identify that change in the driver's medical fitness. For this reason, I do not believe that the five year renewal period can reasonably be regarded as a meaningful medical safety control. Licence validity and driver fitness are different issues In my view, the validity of a driving licence and the ongoing fitness of a driver should be treated as two separate matters. If Government's concern is that HMV drivers need to be monitored more closely because of the risks associated with heavy vehicles, then the appropriate solution should be to strengthen the mechanisms that actually assess driver fitness and competency. The expiry and renewal of a licence card, where the renewal process does not include a comprehensive medical assessment, does not achieve this objective. Professional HMV drivers who require a Professional Driving Permit are already subject to additional requirements, including medical certification. These requirements provide a much more appropriate mechanism for addressing the medical fitness of professional drivers than requiring them to renew their HMV driving licence every five years. Higher risk does not necessarily mean a shorter licence validity period I fully accept that HMV drivers represent a higher risk category than ordinary private motorists. A heavy commercial vehicle can weigh many tonnes, has a considerably longer stopping distance and can cause substantially more serious consequences in the event of an accident. However, I do not believe that the higher risk of the vehicle automatically means that the underlying driving licence should have a shorter administrative validity period. The focus should rather be on the controls that directly manage that risk. These could include ongoing medical fitness requirements, PrDP compliance, driver competency assessments, fatigue management, defensive driving training, monitoring of driving behaviour and appropriate employer oversight. These controls provide continuous management of driver risk, whereas renewing a licence every five years, with no comprehensive medical assessment attached to the renewal, provides relatively little additional assurance. The practical impact on professional drivers There is also a practical consideration. Professional HMV drivers are often required to travel considerable distances and spend many hours operating their vehicles. They are also subject to significantly greater operational oversight than the average private motorist. Employers can and do monitor driver behaviour, accidents, speeding, fatigue, working hours, vehicle inspections, training, licence validity and PrDP compliance. In my experience, these controls provide a much more meaningful and continuous assessment of driver risk than simply requiring the driver to renew their licence card every five years. Ten years should not mean ten years without oversight I am not suggesting that an HMV driver should be able to operate without ongoing checks for ten years. My position is that the driving licence itself should be valid for ten years, while the appropriate safety and professional requirements should continue to operate independently. For example, a ten year HMV licence could coexist with: Regular medical fitness assessments where required PrDP renewal requirements Driver competency assessments Fatigue management Eyesight testing at appropriate intervals Employer driver monitoring Ongoing training and defensive driving programmes Enforcement of road traffic infringements and unsafe driving This would allow Government to reduce unnecessary administrative pressure on the licensing system without reducing the level of safety oversight applied to professional HMV drivers. My recommendation I therefore believe that HMV driving licences should also be extended from five years to ten years. If the reason for retaining the five year validity period is road safety, I believe the justification should be based on evidence that the five year licence renewal process actually provides a significant road safety benefit. Given that the current renewal process does not constitute a comprehensive medical or competency assessment, I question what additional safety benefit is achieved by requiring an HMV driver to renew their driving licence twice as often as an LMV driver. In my opinion, the better approach would be to move HMV licences to a ten year validity period while strengthening and maintaining the controls that genuinely address the risks associated with professional heavy vehicle driving. This would reduce unnecessary administrative requirements while allowing resources to be directed towards areas that have a direct impact on road safety, such as driver behaviour, vehicle roadworthiness, fatigue, overloading, competency and medical fitness. I respectfully request that HMV driving licences be included in the proposed extension to ten years. Yours faithfully Geoff Heath	Geoffrey	
2026-08-20 12:32:29	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Ellen	

2026-08-20 12:32:59	Yes I do	Yes I do	No, it should be at least 6 months	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions	I think it's a great idea to extend renewal period to 10 years subject to no increase in fee,schedule appointments,information on what documents required with renewal.	Joan	retired

2026-08-20 14:08:30	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Drivers licences should remain valid for lifetime, not every 10 years, this is what countries like Mauritius does and it works for this country very well, maybe the license doesn't expire but people need to go for regular eye tests to make sure their eyesight is good for driving	Dhiren	employed individual
2026-08-20 14:08:38	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Marquin	employed individual
2026-08-20 14:09:56	Not fully	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	1. Existing five-year driving licence cards We support the proposed extension of the validity of Code A1, A, B and EB driving licence cards from five to ten years. We propose, however, that the benefit should also apply to existing cards which remain valid when the amendments commence. Such cards should be deemed valid for ten years from the date originally used to calculate their five-year validity, notwithstanding the earlier expiry date printed on the card. This would avoid requiring existing cardholders to undergo one further unnecessary renewal before entering the ten-year cycle and would give immediate effect to the objectives of reducing renewal frequency, administrative burden and pressure on the licensing system. Implementation should also be relatively straightforward: qualifying unexpired cards would simply have their existing five-year validity period extended to ten years; cards already expired before commencement would not be revived. 2. Drivers aged 70 years and older Separately, consideration should be given to retaining a five-year renewal period for drivers aged 70 and older. Changes in eyesight, health and physical or cognitive functioning relevant to safe driving may become more significant with advancing age, making periodic reassessment an appropriate road-safety safeguard. Consideration should also be given to requiring, at renewal, an appropriate practical driving assessment together with confirmation from a medical practitioner that, to the practitioner's knowledge following an appropriate assessment, there is no medical impediment to the applicant safely operating a motor vehicle. This would not presume incapacity based on age, but would provide proportionate periodic safeguards while allowing older persons who remain medically and practically fit to continue driving	Ian	employed individual

2026-08-20 15:44:37	Yes I do	Yes I do	No, it should be at least 6 months	Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I totally agree with the extension from 5 to 10 years but does the Government think that a validity period of 3 months will allow sufficient time for the printing of new licences, surely 6 months would allow more time to print and distribute the licences., actually I doubt if even 6 months will be more achievable .I agree with the heavy duty drivers keeping to the current 5 years. I think that there should be a maximum price set for the new licences. What do municipalities do to deserve to increase the price of licenced. Making licences 10 years will decrease the work that municipalities do. What do municipalities do with the money they collect from licences. It should be decreed that money from licences goes towards better municipal policing . I	Murray	retired

2026-08-20 15:54:50	Yes I do	Not fully	No, it should be at least 6 months		The Modernisation Opportunity: While extending physical card validity is a positive step, international best practice is moving toward digital mobile driving licences (mDL) accessible directly through verified smartphone apps. The Convenience Gap: South Africans are still required to take physical time off work to stand in queues twice: once to apply, and once to collect the printed plastic card. Participant Recommendation: Government should accelerate the deployment of verifiable digital licences on mobile devices and implement optional direct courier delivery of physical cards to homes or workplaces. My fingerprints would not register- old machine (no problem at the banks), had to wait for 2 weeks for these to be over ridden. Went back and paid because the above had happened. Returned 6 weeks later - hadn't arrived. Returned 4 weeks later to discover Pretoria had refused the application because no fingerprints - overridden????? Had to return 2 weeks later for recapture. Discovered optometrist certificate had expired (valid 3 months). Got another. Went to a second recapture. Had to wait 8 weeks for licence. Received licence (they had used my original application because no fingerprints (they had been recaptured perfectly twice) and as for the photographs- I could be a ghost - cannot see what I look like. And to think I have to go through this again in 5 years!!!	Marilyn	retired

2026-08-20 16:18:26	No I do not	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I believe that the biggest opportunity the SA Government now has is to implement a digital driving license. If this is not possible, then improving the speed of reissuing and direct couriering the cards to the driver, which I would be happy to pay for the courier service is a huge step forward. If this is the improvement that is made in the renewal service, then I would strongly recommend that the validity remain at 5 years so that eye tests are forced to be carried out more regularly. Appointing independent optometrist testing, integrated to the re-licensing system, would also facilitate the renewal process.	Geoffrey	employed individual

2026-08-20 16:30:46	Not fully	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	In countries where extended period of validity of driver license is currently in place also implement very strict learner driver license requirements. Criteria of levels of Learner licenses are examined over a period of time, for example Norway, Australia and New Zealand require the learner to prove competency in various objectives before moving on to more challenging driving capabilities. All the 'check boxes' along the learner's period of proving competency must be ticked, before the final examination. This means that those who have actually proven competency before being allowed loose on the roads. Senior citizen drivers should produce vision and cognitive competency before being issued with a 10 year license.	Jessica	retired

2026-08-20 16:58:14	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	It would save everyone an enormous amount of time - both applicants and officials - if driver's licence renewal forms could be completed online and the required supporting documents uploaded in order to get the preliminaries out of the way. Thereafter the driver would need to produce the originals of the "uploaded documents" to the physical office at the traffic inspectorate offices on collection of his/her licence. At this point the physical documents would then be married / matched to the uploaded documents to prove authenticity / validity. This would cut out queues of people waiting from 5am in the morning at a traffic inspectorate venue and it would merely be a case of processing information online and producing said documentation (eye tests / proof of address / ID) on collection of licences. Without documentation matching the uploaded docs, no licence is released. A great saving of time for all concerned.	Audrey	retired
2026-08-20 16:59:04	Not fully	No I do not	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The validity increase to 10 year is welcomed. The permanency of the license clarification is also welcomed. However, the month grace period is rejected. If an application for renewal has been made, a receipt should be enough to make the "expired" card valid until the new card is delivered. Courier delivery should be standard as well. Card based proof of a license is to remain. Digital ID's and drivers licenses are premature. We first need to get these proven and the risks mitigated before they can be considered to go digital. Since PDP 's are renewed every 2 year, the license card should also be valid for 10 years.	Roland

Do government officials not realize the cost to the country's economy in consequence of people having to waste their time on what is totally unnecessary! Obligating motorists to renew their licenses every 5 years HAS NOT REDUCED THE ANNUAL NUMBER OF ACCIDENTS! The way to reduce the accident rate is as follows: i. Applicants for driving licenses must be stringently trained, and tested, before being granted a license. 2. The penalties for driving negligently, or recklessly, or under the influence of liquor must be severe enough to deter irresponsible 's from driving irresponsibly, and the courts must be given the power to suspend licenses, or revoke the license, of an accused, in their discretion . The only statutory requirement should be the eye test or production of a valid optometrist's report every 5 years, or so. Sanctions for those officials who issue fake licenses, etc., or issuing a false optometrist's report must be sufficiently severe to make it not worth their while! Government must entrust the necessary powers to the courts to enable them to make those charged with motor vehicle offenses think again!	MICHAEL ERIC	retired

2026-08-20 17:38:53	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Eliminates Unnecessary Bureaucracy and Queue Fatigue DLTCs across South Africa are notoriously overwhelmed by routine five-year renewals. Doubling card validity to 10 years cuts administrative traffic by roughly 50%, freeing up testing centres to focus on new driver testing, professional permits, and core road safety enforcement. Direct Financial & Productivity Savings for Motorists Motorists only have to pay renewal fees, take time off work, and sit in administrative queues once every ten years instead of twice. For working families and small business owners, this translates directly into saved hours and reduced transport costs. Alignment with International Best Practice A 5-year validity period is an outlier internationally. Most developed economies—including the UK, European Union member states, Australia, and New Zealand—issue driving licence cards valid for 10 to 15 years (or until age 70) without compromising road safety. Legal Separation of the “Card” from the “Right to Drive” By explicitly stating in Regulation 101(2) that a driving licence is permanent unless cancelled or suspended, the law finally protects motorists from being treated as criminal “unlicensed drivers” simply because an administrative plastic card has lapsed. Polycarbonate Durability & Corruption Reduction Modern polycarbonate card materials are technically rated to last over a decade without delamination or fading. Furthermore, halving the renewal volume substantially disrupts the black market for corrupt online booking “slot selling” and DLTC bribery syndicates.	Selwyn	retired

The way the staff at licensing centers treat customers is appalling. The are nor there to make you feel they are doing you a favour, they are there to provide customer service and get professional people to make the operation more customer friendly and more efficient to assist the customers and try to avoid long queues. Too much money is spent on insufficient staff salaries, which results in decline of the facilities and service. This municipal department is long due for privatization, stop being a milking cow for corruption and inefficiency.	Philip	self-employed

The eye test thing is very confusing. Allow us to get a form from the optician.	Liz	
2026-08-20 21:02:05	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Extending renewals from 5 to 10years is a great concept for light motor vehicles and motorcycles. One problem i see is bottlenecks around 10year renewals. Online application and verifying can relieve the strain. And licence printing card machines must be in every province to avoid backlogs and breakdowns from overworked machines. And what about cost, not everyone can afford the card if the cost is too high. And eye test at optometrists must be included in system please, because some machines at traffic dept are not working. Thank you.	Faan	retired

2026-08-20 22:27:20	Not fully	Not fully	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Direct Financial & Productivity Savings for Motorists: Motorists only have to pay renewal fees, take time off work, and sit in administrative queues once every ten years instead of twice. For working families and small business owners, this translates directly into saved hours and reduced transport costs. Legal Separation of the “Card” from the “Right to Drive”: By explicitly stating in Regulation 101(2) that a driving license is permanent unless cancelled or suspended, the law finally protects motorists from being treated as criminal “unlicensed drivers” simply because an administrative plastic card has lapsed. The 3-Month Grace Period Trap (Regulation 108(7)): The proposed 3-month cap on grace periods while waiting for a renewed card is completely detached from the reality of state backlogs. If the national card production machine breaks down or distribution stalls beyond 90 days, law-abiding motorists who applied on time will become technically illegal on the road and face roadside harassment, traffic fines, and potential insurance claim rejections. Furthermore, direct courier delivery of licenses to homes/workplaces, and decentralized provincial printing hubs to permanently remove the single-point-of-failure risk are also great advantages to consider.	Christiaan	self-employed

					If you receive new glasses and there was an extreme change in your eyesight then you should upload your results by the eye specialist office so should have access and make it part of transport act. Then there is no delay and the team at the transport department can provide the member on the change of the license and can request a retest at there offices for a small fee so the member will thus have updated eye reports which are done every two years if you have a medical. If it is indicated that you wear glasses in thi ten year period ever 2,5 years you can be requested provide proof of an I test and uploaded on the app. Without writing a another exam if you already have a license provided the opportunity if you won't to go from small vehicle license to say code 14 can just book a test through a driving school still capital coming in and the member will fall under the new heavy duty rules. Thirdly make sure the country capital cities have a printing facility with a spare while one if broken can be on loan and alleviates the burden on the one currently have so more printing and quicker made available to the applicant. Cards can be upgraded to 10 ten years if the member has 1 year left issued with only Dr Everest the falls into the new system till all systems are in place. IF the department of foreign affairs can issue id cards and passports the it should become 1 card that contains vehicle ID and weapon licences now when the chip gets added to the card. Much cheaper system. Then the rules of eye tests can be applied as indicated maybe just a bit if a fine tune. Perhaps investigate the option to get the government printing works if they not already involved onboard. We have qualified people who are trained that the department can be better utilised. Electronic new digital id photos can also be loaded like the baked use now as identification on bank accounts. These are broad statements but are good options Appoint retired drivers to assist in taking photos people who do not follow the rules of the road to assist with fund collections and ensuring more pay point online or offices in shopping malls. outsourcing to qualify more people could be a option. Get metro back out the controlling the traffic where OUTsurance has people to do. This. I've also experienced that the power gets turned off at certain robots I suspect so they control traffic as there are the same people on the same spot every day but later on in the day robots are working again till the next morning. We have to watch that we don't create more things that promotes fraud. We are good at that. But they do a good job but the metro police are not visible at these robots only to pull people off to right out fines. I'm sure they have better training than just that. But suppose the x1 and x3 BMW they received are on the repair list as those that were delivered at our department are not visible anymore. Good luck

2026-08-21 05:12:48	Yes I do	Yes I do	Yes		Those renewing between the date of approval of the 10 year by parliament and actual date of promulgation of the 10 year should automatically qualify to enjoy the 10 year extended period.	Singh	retired
2026-08-21 05:15:31	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I strongly support extending ordinary driving licence card validity from five to ten years. Requiring private motorists to repeat the same administrative process every five years creates unnecessary cost, congestion and inconvenience. I also support retaining shorter renewal periods for professional, public transport and heavy vehicle drivers. However, the proposed three-month grace period should be increased to at least six months where a motorist has applied for renewal before expiry. A citizen who has complied with the law should never be penalised because of government printing, delivery or administrative delays. The Department should also introduce digital driving licences, allow accredited independent optometrists to submit eye tests electronically, provide direct delivery of renewed cards, and decentralise card production so that failure at a single printing facility cannot disrupt the entire country.	Petrus	Non-profit

2026-08-21 06:01:01	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	EMPLOY CAPABLE TRAINED PEOPLE AND NOT CADRES!	JOHN	retired
2026-08-21 06:04:10	Not fully	Yes I do	It should remain valid until the new card is produced	Integration of independent optometrist eye test submissions	I am over 70 years old, and this year I renewed my licence at which time I produced an independent optometric eye test. It is probable that my both my eyesight and my physical capability to drive will deteriorate over the next ten years. I strongly believe that licence cards issued to drivers over 70 should be valid for no more than 5 years, and that in their cases the production of both an independent optometrists eye test certificate and a hearing test certificate should be mandatory.	Jane	retired
2026-08-21 06:05:02	Yes I do	Yes I do	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I agree that renewing licenses every 10 year is a good thing. However I do think this should change at the age of 60 and revert back to every 5years. People's eye sight changes and reflexes and not quite the same as when one is younger.	Jeanette	retired
2026-08-21 06:05:45	Yes I do	No I do not	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Renewal of drivers licence should be abolished all together an eye test should be compulsory every 10 years for obvious health reasons, failure should prompt, glasses, contact lenses or whatever necessary means to correct shortcomings after a retest should be done. If the individual still does not comply their licences should be suspended permanently or revoked. The concern is safety and changes should be based on that, not filling covers that does not benefit citizens.	Ronald	Non-profit
2026-08-21 06:07:07	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Carmen

2026-08-21 06:08:59	Yes I do	No I do not	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work	I hope they will reduce the number of employees by 50% as well if the work is reduced by 50%. Licence renewal is purely just a revenue generator to create employment for issuing plastic cards at a fee and wasting the tax payers time to stand in lines to do so and time wasting again to collect. One does not have to renew a qualification every 5 years. Government does this so we can pay for things repeatedly to fill their bottomless coffers. Its yet just another hidden tax along with a car license every year. Like they don't already take enough PAYE and then vat on top of that as well	S	business owner

2026-08-21 07:34:53	Yes I do	Not fully	It should remain valid until the new card is produced	Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	This is an update to a bureaucratic system that was not required before 1994. Card was valid without the requirement for renewing ever so often. The renewing was brought in under the bate and switch tactic that drivers eyes need to be tested etc. but more to increase government revenue. Every 10 years with improvements in the system however seems fair. I believe that the public transport drivers should also be given a fair reduction in bureaucracy. Also 10 year validity taking into consideration that thy already require 2 yearly checks PrDPs. Do to the history of the card machine failures the driving license should be valid until a new card is issued with proof that application for a new drivers license card has been done. If so , then 3 Months grace for people that have forgotten to do so would be acceptable.	Michael

2026-08-21 07:35:17	Yes I do	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I support extending driving licence card validity from 5 years to 10 years. This will reduce unnecessary costs, queues and administrative pressure on motorists and licensing departments. However, motorists should not be penalised when a renewed card is delayed due to government, administrative or printing delays. If a person applied for renewal on time, their existing card or temporary licence should remain valid until the new card is issued rather than expiring after a fixed three-month grace period. I also believe the 10-year card validity should apply to heavy commercial vehicle and public transport drivers. Their PrDP can remain on its 2-year cycle, which already provides more frequent health, fitness and professional-driver checks. Requiring an additional 5-year driving licence card renewal appears to create unnecessary duplication without a clear additional road-safety benefit. I would also strongly support the introduction of secure digital driving licences and optional courier delivery of physical cards to further reduce pressure on licensing centres and make the system more efficient.	Esbie	self-employed

2026-08-21 07:39:37	Not fully	No I do not	It should remain valid until the new card is produced	Decentralised printing machines across provinces to eliminate single-point-of-failure risk	1. After the age of 40, it is a known fact that eye-sight deteriorates naturally. (as does many peoples health!!) From the age of 18-48 we could have a 10 yr renewal, thereafter drivers should be having an eye test every 5 years and reviewing their drivers licenses.. However some peoples eyesight is not good from a young age, so anyone with compromised eyesight should have a check up evey 5 years - these system should somehow be linked into the Licensing system?? 2. Whether you drive a light MV or CV, it makes no difference. Your eyesight is the same and should be tested accordingly.	nadine	unemployed individual

2026-08-21 07:58:50	Not fully	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	In general i am opposed to renewable licences as per the road traffic act, your drivers licence is for life ... only the card expires so i feel having a card that expires is a moot point and purely just a money making scheme by the over-controlling government. I feel the ten year period for new cards is a valid time frame but i have hesitations on the cost implications should the DoT decide to increase pricing ... it should not exceed more than 15% increase in a ten year period. I feel Truck/taxi drivers should be renewing their drivers licences in sync with their pdp requirements etc as having a renewal in 5 years makees it fall out of sync of their 2yr period so theirs should be renewed with pdps etc in a 2 or 4 or 6 year cycle - personally i would use 6 years (they deserve a break too) I am totally opposed to sole use of digital drivers licences, as an add on sure no problem but not every person in south africa can afford data and a smart fone and digital only would be a limiting and discriminating to those ill able to afford a smart fone I would be willing to pay an extra R60 to courier my card to my home as collection is a severe inconvenience and usually costs a days leave from work. I am sure a special arrangement can be made with a courier company to deliver the licences rather.	stephen	employed individual

2026-08-21 08:21:32	Yes I do	Yes I do	Yes	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I believe that extending the current renewal period on light motor vehicle licences from 5 years to 10 years is a good move and brings us in line with international standards; however, I feel that eyesight can diminish a lot more quickly than 10 years, so optometrist tests should be integrated at least at the 5 year mark to ensure that drivers can still operate a vehicle safely in that regard. A potential solution is that an automated reminder could be sent out at 4 years and 11 months after the last issue of licence, and allow 30-60 days for an optometrist eye test to be uploaded to the portal for review. Another concern is that the costs of renewing a licence should not increase drastically, effectively pushing the burden of supporting the extended renewal period back onto the public. Small increases are understandable to cover costs, but the renewal fee should not be used to fund the difference for the 5 year gap.	Tanya	employed individual

2026-08-21 08:39:08	Yes I do	Yes I do	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Less Bureaucracy & Shorter Queues: Doubling card validity to 10 years reduces routine administrative transactions at Driving Licence Testing Centres (DLTCs) by roughly 50%, significantly freeing up capacity. Direct Cost & Time Savings: Motorists will only have to pay card renewal fees and take time off work once a decade rather than every five years. International Alignment: A 10-year validity period brings South Africa in line with global best practices across the UK, the European Union, Australia, and New Zealand. Licence Permanence Clarified: The draft amends Regulation 101(2) to explicitly confirm that a driving licence is indefinite unless revoked—formally separating your legal right to drive from the administrative lifespan of the plastic card.	JUSTIN

2026-08-21 09:18:50	Yes I do	Not fully	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Renewing of the licence card is purely income generation for the government. we have to take time off work to book in KZN, then attend and then collect. They are not testing any skills but your vision. Most people are aware of vison issues. Those who are responsible could rather have the optometrist submit results to department, once checked we pay on line and no stress. for those who cant afford optometrists , they can go in to the licence department. This alone will reduce the number of people. Going digital for the cards as such makes sense as most men don't carry wallets any more and often forget the licences as they use phones for payment. However for older drivers the physical cards are better due to fact that technology is a challenge for them.	Cecilia	self-employed

However, once a motorist has applied and paid for renewal, proof of that application must remain valid until the new card is actually issued. No citizen should be penalised for delays caused by the State. I also strongly believe that valid, paid-up third-party accident insurance is Essential, and should be compulsory for every vehicle using a public road. Far too many innocent motorists suffer financial loss because the person who caused an accident has no insurance. A 10-year licence is a sensible improvement, but it should come with greater accountability and protection for all road users.	Martin	retired

2026-08-21 09:42:42	Not fully	No I do not	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	My main concern is that Codes C1, C, EC1, and EC remain on a 5-year cycle. I would accept 5 years for the large vehicles like Horse & Trailer that requires skilled individuals to drive, operate, control them. C1 at least should be included in the 10 year cycle as they are still well within normal vehicle sizes and include large pick up size trucks like you Ford F150 or the like which would be excluded otherwise. Additionally, eye tests should be tied into fines e.g. if a person commits traffic violations that relate to eye sight, not seeing the signs, oor show signs of poor eye-sight, it may then be expected that the person proves their eye-sight not compromised. I would also expect people ages over 65, maybe 70, need to revert to the older 5 year system where cognitive decline is at its worst.	Nick	self-employed
2026-08-21 09:42:57	Yes I do	Yes I do	It should remain valid until the new card is produced		Proof of having applied for renewal must void any penalty if there is a delay in issuing the card.	Doug	
2026-08-21 09:43:05	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	This is an opportunity to rectify the problems of the Drivers License. It should actually never expire unless revoked	Belinda	employed individual
2026-08-21 09:43:38	Yes I do	Yes I do	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Gloria	retired

2026-08-21 11:01:29	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I support the proposal to extend the validity period of driving licence cards for private motorists and motorcyclists from 5 years to 10 years. This will reduce unnecessary administrative burdens, lower costs for citizens, and align South Africa more closely with international practices. I also support maintaining a shorter renewal cycle for heavy commercial vehicle and public transport operators, as these sectors carry greater road safety responsibilities. The proposed 3-month grace period after card expiry is not sufficient. A motorist should remain legally licensed to drive after applying for renewal until the replacement card has been printed and issued. Citizens should not be penalised for delays caused by government administration, card production backlogs, or printing failures. The distinction between the right to drive and the physical card should be made clear. I strongly recommend that the Department of Transport accelerate the implementation of digital/mobile driving licences, allow direct courier delivery of renewed cards to homes or workplaces, and decentralise card printing across provinces to eliminate the current single point of failure. These changes will improve efficiency, reduce queues at licensing centres, and provide a more resilient and citizen-friendly service. Finally, any future fee increases should be transparent, reasonable, and directly linked to service improvements. Extending the validity period should result in real savings and convenience for motorists, not simply higher costs at renewal time.	Francois	employed individual
2026-08-21 11:02:59	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Just an note on higher cost to renew your driver license. If you make it easier to renew and keep cost low, more people will have a legal license. Our roads are swamped with unlicensed drivers.	Mientjie	employed individual
2026-08-21 11:04:47	Not fully	Yes I do	Yes	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	My concern is the validity of all drivers licences & therefore loop holes need to be explored & ways to overcome them become a priority e.g. someone can borrow a smart fone to apply for a licence Another concern is regarding the elderly who should not be on our roads & therefore a 10 year licence period definately causes alarm re folk who should not be driving due to failing eye sight & lack of quick response to a dangerous situation on the road - one experiences this in Hermanus where I live all the time. Testing regularly should be a consideration for those above a certain age & capability.	kay

2026-08-21 11:42:44	Yes I do	Yes I do	It should remain valid until the new card is produced		I feel that they must completely scrap this licence card bullshit. You either have a licence or you don't. Same with vehicle licence disk...it's an unnecessary expense and a bullshit thing. What's the real point of renewing these licence cards and disk's anyway. People renew there licence disk's on there vehicle but the vehicles are falling apart. Not roadworthy. So what's the point. Just another way for government to steal and have control.	Wayne	unemployed individual
2026-08-21 11:43:37	Yes I do	Not fully	No, it should be at least 6 months		A heavy-duty driver's license must also be extended to 10 years	manilal	retired

2026-08-21 13:37:19	Yes I do	Yes I do	Yes	Digital / Mobile Driving Licences (mDL) via smart app	I feel that while the extension to 10 years the question of aging driver's remains. How does the department address drivers who should no longer be on the road. Random testing is a possibility that you could consider. I have relocated from Gauteng to KwaZulu-Natal and find the standard of driving poor. There is very limited enforcement which does not help. The solution rests with good enforcement of drivers	Peter	retired

2026-08-21 13:51:31	Not fully	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I support the general move to a 10-year validity for private motorists, but not fully — implementation needs to be right first. I agree commercial vehicles and PrDPs should stay on shorter cycles for safety reasons, and I don't think 3 months is enough of a grace period for card delays — it should be at least 6 months. Before rolling this out fully, I'd like to see: Digital/Mobile Driving Licences (mDL), courier/postal delivery of renewed cards, independent optometrist eye-test integration, and decentralised printing across provinces to prevent single-point-of-failure backlogs.	Chloe	student

When it comes to the ability to drive by aging drivers, the element of responsibility is totally ignored. Many older drivers drive much more responsibly than younger ones. It is the latter that requires more appropriate application of existing regulations. Existing traffic laws are either applied in some clandestine manner bordering on harassment like hidden cameras resulting in non disclosed traffic violations which are only revealed when the next motor vehicle transaction is due or in variations from not at all to selectively and in some cases, abused by law enforcement personnel. Will existing licenses expiring soon be extended to ten years from date of issue or does this new proposed regulation only apply to renewals?	Nico

2026-08-21 14:40:29	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions	Personally I think licenses should be valid without renewal until around 70 and then regular tests/renewals for general road safety can be implemented. Especially with regards to competence, reaction speed and quality of vision. This need to pay for new cards and temporary licenses is just a waste of time and money.	Kelsey	employed individual
2026-08-21 14:40:38	Not fully	Not fully	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The Legal Clause: Regulation 108(5)(a)(ii) keeps heavy commercial vehicles, buses, and articulated trucks on a 5-year renewal cycle. The Argument: Commercial drivers are already subject to the Professional Driving Permit (PrDP) requirement under Regulation 115, which mandates medical checks and criminal background screenings every 2 years. The Redundancy: Forcing commercial drivers and logistics operators to maintain 5-year card renewals on top of 2-year PrDP renewals adds unnecessary red tape and administrative overhead to the transport and supply chain sectors. Participant Recommendation: Allow commercial vehicle licence cards (Codes C/EC) to align with the 10-year standard for the physical card itself, while keeping the 2-year PrDP requirement strictly focused on health and background fitness	Zandile	unemployed individual

2026-08-21 15:33:33	Yes I do	Yes I do	No, it should be at least 6 months	Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I agree on the ten year renewal. However I believe that independent eye tests are very important. The eye testing at renewal facilities is not always competent. Those doing the tests are not always helpful or explain themselves properly. This is a problem for those having the test done. This seems to be the case Especially if you have spectacles. They don't always explain the procedure and then fail you. You have a right to have a full explanation of how the eye tests work. This is why independent eye testing as a second test is so important. A full explanation must also be given. That those with dates of expiry will automatically move forward to 10 years from the date on the license to a further 5 years.	Sharon	retired
2026-08-21 15:38:49	Not fully	Not fully	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Catherine	retired

2026-08-21 15:41:30	No I do not	Yes I do	Yes		Road Safety & Deteriorating Visual Acuity Ten years is a long window during which a driver's eyesight, medical condition, or physical fitness can significantly deteriorate. Without mandatory interim optical assessments or the integration of private optometrists into the eNaTIS system, unchecked visual impairment could increase nighttime accidents and road fatalities. Digital / Mobile Driving Licences (mDL) via smart app is far too open to corruption and abuse which would be against our RSA World Class Constitution. Direct courier/post delivery of renewed cards to home/work is far too open to corruption and abuse which would be against our RSA World Class Constitution. Integration of independent registered optometrist eye test submissions is a fair and good thing in line with our RSA World Class Constitution. Decentralised printing machines across provinces to eliminate single-point-of-failure risk is a fair and good thing in line with our RSA World Class Constitution.	LESLIE	business owner

2026-08-21 15:59:16	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	It if utmost importance that the renewal be extended to 10 to avoid the tiring backlogs that come with a single printing machine. Furthermore, the queuing of the car owner for a new driver's licence is tiring.	Charity Morris	employed individual
2026-08-21 15:59:32	Yes I do	Not fully	Yes	Direct courier/post delivery of renewed cards to home/work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Public driver permits validity should increase from 2 years to at least 5 years	Jaco	self-employed
2026-08-21 15:59:58	Yes I do	No I do not	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/work	Digital is not the way to go. Our population does not lend itself to that. Eye tests are an added and unnecessary expense .for the consumer. The more important change should be the Vehicle licensing requirement. The need to annualy apply for and obtain and display a disc is a waste of time and money. There should be a permanent disc on each vehicle - that can be scanned for spot checks to a central data-base to check if a vehicle is licensed. In addition number plate recognition cameras could feed into a data-base to check if vehicle licenses are up to date.	Mark	self-employed
2026-08-21 16:00:12	Yes I do	Yes I do	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/work, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		eugene	employed individual

2026-08-21 17:45:11	Not fully	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions	The whole issue of renewing drivers' licences can be streamlined efficiently with a stroke of a pen. Renewed licences are practically only a confirmation of an acceptable eye test and creating an incomestream for municipalties by charging an unnecassary excessive licence renewable fee. The way it is conducted is not really creating a productive value add to ensuring that no weak sighted people are driving on SA roads. To solve it institute the follwing: Each driver must have an original eye test certificate on/with him (keep it in his vehicle's cubbyhole for convenience) certified by a qualified optometrist that the driver's eyesight is sufficient enough to be able to drive savely. Such a certificate must be renewed every five years. Matching the certificate with the driver's ID and the driver, any tafic officer could establish that it is the right person, properly eye sighted driving the car. Furthermore everybody's eyesight can be certified each five years at a much lower cost, being the optomerist's fee compared to the municipal fees charged. No temporary municipal staff have to do eye tests and no equipment is to be acquired by any government department. No new driverslicence cards have to be issued. The current driverslicence card read together whith the stated optomotrist's certificate is sufficient proof that the individual driver is a capable enough driver as tested to drive a particular class vehicle.	Wouter	retired

2026-08-21 17:54:04	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	My biggest personal concern is around the fact that yes, indeed, health status and vision can completely change over a decade, especially for older drivers. A suggestion: When a person goes to an optometrist for a test, if it's found that the vision no longer meets the minimum criteria to allow for driving, the optometrist - provided he has first engaged with the driver - should be able to submit to a traffic department database the result of the eye test to "flag" an unsafe driver.	Tim	employed individual

2026-08-21 18:15:30	Yes I do	No I do not	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I have an EC1 license but have not driven a Heavy motor vehicle for the last 10 years. I only drive Light vehicles with the same license as I did not renew my PDP. Why can my EC1 license not be validated for 10 years as I cannot drive a heavy vehicle without a PDP. Other words they should validate all licenses to 10 years but put restrictions on the use of Heavy vehicles without the two year PDP renewal. My reason for this is if I want to go to a mine and operate an Earthmoving machine I need a Code 10 or EC 1 license without a PDP. Why must I be excluded from the 10 year validity.	Melt	retired

2026-08-21 22:24:36	No I do not	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app	South Africa’s statistics show that our accident rates are increasing at an alarming rate with the car licences being valid for 5 years. Can you imagine what the statistics would be if you extended it to 10 years. The whole point of the car license should be if a person can still drive and pass the written test. Currently the learners drivers license pass rate is only 30%. Many people have fake drivers licenses and didn’t even write a test nor go through the driving test. The Department Of Transport in my opinion has failed its mandate in this country. It should be focusing on keeping drivers accountable for speeding, driving unroadworthy cars, drinking and driving etc. I hardly ever see traffic official vehicles on the roads & no signage/adverting the need for safe driving. It is an abomination how drastically the Department of Transportation has let “things slide” for many years and it has cost this country in the lives of innocent people and children. Shame on you!!!’	Mary-Anne	employed individual

2026-08-22 01:05:40	Yes I do	Yes I do	It should remain valid until the new card is produced	Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	A drivers license should never expire no matter what. The people driving should be responsible enough to know when to stop driving. There are so many new oeople getting licenses that renewal fees are nit necessary . Stricter measures should be taken on learners licenses end actual driving tests when doing your test. More reliable people doing the test and no bribes left in the car or handed over envelopes to get your license.	Elizabeth	retired
2026-08-22 01:40:22	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	No amount of regulations like the points system or drivers eye test intervals will make our roads safer, only respect for the rules of the road and continues visible traffic officers that don't take bribes, that know and understand the law that they need to inforce, and take that chip off their shoulder, maybe when they realize they are not God and actually have a job that PAYS them to work.	Chris	unemployed individual

Also licensing renewal fees in general need to be reduced	Keshan	
2026-08-22 04:47:17	Yes I do	Yes I do	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I support the idea in principle. However there are red flags in some cases ... I'm 76 years old and know full well that my eyesight, hearing and especially reaction time is slowly diminishing. I'm not campaigning for a full medical test for the elderly, but I propose that especially reaction time of the elderly be tested from time to time. "Reaction time" has its base in cognitive alertness and any test should not only look at the physical side of the state of the candidate, but also some form of "alertness test".	Francois	retired

2026-08-22 08:05:23	Yes I do	Yes I do	No, it should be at least 6 months	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I agree that this change is necessary, but: * 3 months validity beyond expiry is hopelessly to little, especially considering all the issues the printer have had lately. * It is for this same reason that I would suggest there be more printers, not located at the same facility. * I also agree that eyesight and health can get significantly worse in 10 years. It is for that reason I think integration of independent optometrist test submissions would be wonderful. * There should be no increase in fees, beyond what increases at the moment. * I also agree that the exclusion of Heavy Commercial Vehicles is pointless and redundant considering they have to get undergo medical and criminal checks every 2 years. However, I also think more should be done to keep them from abusing roads that weren't designed for heavy loads, thus destroying the roads and causing more problems and hazards for everyone. * License delivery would be great, not necessary, but wonderful. That said, the pick up should be made more effective if that is kept and the delivery does not happen.	Charl	unemployed individual

2026-08-22 08:19:40	Yes I do	Yes I do	Yes	Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I am pleased to hear of this 10 year drivers license renewal finally in this draft proposal after years of much speculation. The only concern of the 10 year renewal period is for senior drivers where health and especially their eyesight can be impaired quite significantly in 10 years.. For example an 80 year old driver renewing their liscence when he/ she turns 90years old. Some concern with that from a road safety point of view. On the upside I would imagine that should the driver fail the eye test at any given age they would then fail to renew their liscence.	Lionel	retired

2026-08-22 08:22:30	Yes I do	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The regulation must be amended to state that an expired card remains legally valid until the new card is physically produced and collected, provided the motorist applied and paid before the original card's expiry date. The Department of Transport must establish regional/provincial printing facilities or procure redundant modern high-speed printing hardware to prevent national backlogs when equipment requires maintenance. The Department must standardise and mandate the real-time electronic upload of certified eye tests by registered, independent optometrists (HPCSA accredited) into the eNaTIS system, enabling drivers to complete health screenings before ever arriving at a DLTC. Allow commercial vehicle licence cards (Codes C/EC) to align with the 10-year standard for the physical card itself, while keeping the 2-year PrDP requirement strictly focused on health and background fitness The regulations and enforcement directives must explicitly clarify to all provincial traffic authorities and SAPS that an expired card is an administrative infringement, not a criminal offence of driving without a licence. National Treasury and the Department of Transport must place a statutory cap on card renewal tariffs, ensuring that the cost-savings of reduced administrative processing are passed on to the public rather than offset by exploitative fee hikes. The final gazette must include an unambiguous transitional schedule explaining how existing valid cards will be handled during the transition to the 10-year format. Government should accelerate the deployment of verifiable digital licences on mobile devices and implement optional direct courier delivery of physical cards to homes or workplaces.	Gerda	student
2026-08-22 08:28:10	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Integration of independent optometrist eye test submissions, decentralized printing machines across provinces to eliminate single-point-of-failure risk and licenses must remain valid until the proven replacement has been issued (if the fault is not that of the applicant). 2026-08-22 09:26:36	Not fully	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Physical cards are senseless and should be an option and alternative in an increasingly digital world. A digital and mobile app based license can be renewed digitally and wouldn't even require a printer or physical delivery. That being said, a big concern of such a system would be that it is unlikely to be free of corruption in the tender process and delivery of such a system.	Trevor

It's like a digital ID, I don't want it, because it's against the POPI act and infringes on my privacy with unauthorised digital tracking of me as person, my whereabouts, etc. Drivers licences were previously issued indefinitely, in your ID Book and later became a Driver's Licence Card . It's not supposed to me a money making business. I wear glasses as indicated on my Drivers Licence and get an eye test and new glasses every two years. So my eye test is covered	Peter	retired

2026-08-22 10:02:33	Yes I do	Yes I do	It should remain valid until the new card is produced	Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	My one concern is not the duration of renewal. It is the manner that licenses are issued. The biggest concern I have is the competence of drivers. Yes the extention of light vehicle renewals may independently give individuals a reason to do them. My concern is as it stands the majority of drivers will still do a C1 drivers as the requirement to pass is lower than that of a B class. I suggest as it will cost nothing to mandate that all new drivers pass the class B test before being able to obtain any further class license. This sets the standard and all drivers will have to be able to drive in a manner that supports good driver behaviors and ethics. And all who cannot obrmtain or maintain these ethics be subject to scrutiny. This is why the majority of of drivers can't even maintain a drive left pass right rule. Why the left lane is in most instances the lane that gets you where you want to go. Because the right hand lane has people holding up the flow of traffic. Reason those individuals have not been subject to these simple rules of the road and that you may not hold up the flow of traffic. A rule required in only a code B test.	Stephen	self-employed

2026-08-22 11:38:09	Yes I do	Yes I do	Yes	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Eye test should be done on sight. many people are friends with their optometrist and they do not want to be noted on paper that they need glasses to drive. digital drivers can cause a problem if ur fone is stolen or lost, they should have a method of being able to type ur id in a devise and it should pick up ur drivers. Also I believe paying for renewals is not fair, we should only be charged if we loose them , like bank cards. And reminders should be sent out for renewals as that has stopped as well. The appointment system works well, they are efficient with that as I recently renewed mine, only advice I can give is that the employees at the government department are rude and not helpful to anyone that asks, most people don’t know the process then they open late and not on the stipulated times, they should it different language sometimes English if u lucky, there is no management and the departments and staff do what they want to when they want to. So actually before they make these changes they should look and how the department is bending managed.	Lynn	employed individual

2026-08-22 12:27:16	Yes I do	Yes I do	It should remain valid until the new card is produced		The draft is not clear to us laymen, normies and millennials, and may results in public confusion about the validity of the existing "5 year" cards. My understanding is as follows: 1) The "5 year" card validity remains 5 years, as per the validity date on the card. The validity of the "5-year" card has not been automatically extended to 10 years. The card must be renewed as per the validity date on the existing "5-year" card. 2) When the "5-year card" is renewed as per the date on the card, it will be replaced by a new "10-year" card. Pleaser review the text to improve understanding	John	retired

2026-08-22 15:39:28	Yes I do	Not fully	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The Financial Concern: DLTC renewal fees generate significant revenue for municipal licensing authorities and the Road Traffic Management Corporation (RTMC). By halving the frequency of renewals from every 5 years to every 10 years, state entities stand to collect fewer total renewal transactions over time. The Threat: There is a strong likelihood that authorities will attempt to double or substantially increase the once-off cost of renewing a 10-year licence card to compensate for the lost transaction volume. Participant Recommendation: National Treasury and the Department of Transport must place a statutory cap on card renewal tariffs, ensuring that the cost-savings of reduced administrative processing are passed on to the public rather than offset by exploitative fee hikes.	Eve	retired
2026-08-22 15:49:04	Yes I do	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Jonathan	self-employed
2026-08-22 15:49:12	Yes I do	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work	The reason I disagree with the heavy commercial vehicles license remaining on 5 years is because it is well known and accepted that most C1 driving license holders are driving personal vehicles. I feel there should be a differentiation between them, public transportation and commercial vehicles.	philile	employed individual
2026-08-22 15:52:59	Yes I do	Not fully	It should remain valid until the new card is produced		The question which have is will the holder of a existing card be liable to renew at the end of the validity period on his card or will this automatically be extended to 10 years? If the answer is yes to the automatic extension, will a free card be issued to drivers which requires a valid drivers license for work, outside of South Africa. South African enforces will understand it (hopefully), but it will not be accepted outside the borders of South Africa.	Ignus	employed individual

I think the UK requires annual re-testing at age 77. That said, it is still beneficial to everyone. The old license should remain valid until a new one is produced. My previous renewal took 8 months even though I applied 3 month ahead of time. First I was called back because the fingerprint (that they took) wasn't good enough. Then I was called back because the photo (that they took) wasn't acceptable (which I mentioned to them at the time it was first taken). Then - they forgot to send the application to Pretoria! Because of their incompetence, I had to pay for a temporary license!!	Audrey	retired

2026-08-22 21:53:11	Not fully	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	My biggest concerns are around: 1) my primary concern, Eye Testing and Health (a lot can change in 10 years in a person's eye health and overall health). Glaucoma, for example, is a silent illness that one could drive around with, for years, without being aware at all that the peripheral vision, so important when driving, is compromised. Eye Test results should be resubmitted after five years, in my opinion. 2) the 3-month validity extension period (given the Department's reputation for not being efficient or reliable in it's ability for fast-turnaround times on issuing of new cards, for technical short-comings and other reasons) Thank you	Jeanne-Ann	unemployed individual

Digital option implies no cost for cards, printers etc, can reduce cost significantly, so local agencies can still recover costs (even if higher price per renewal) if we save overall due to lower spend to produce. 2. End user cannot be penalized for delay in printing. If you have applied within window period before expiry (fix that say 3-months to 6 weeks before expiry) you are in the clear. You have application form. 3. No need for temporary license if you have applied in time. Another money making scheme. Except if you are applying only short period before expiry, say less than 6 weeks, then you pay for your negligence or late application, then you need temp license to cover. This can then be enforced, not option of choice.	Johan	retired

This can easily be monitored through current systems.	Zakir	retired
2026-08-23 06:46:15	No I do not	Not fully	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	PrDPs requirements are far more onerous to maintain - and expensive. It is a 2 year cycle. these licenses should be issued as a priority vs regular license renewal. the right to drive a vehicle needs better control based on health and the associated impact on ability due to health changes. if the department had their act together - PrDP should be 3 years, all other renewals 5 years, and over 65 renewals (or if the licence holder turns 65 during that validity period) subject to the same criteria as PrDP.	George	employed individual

2026-08-23 07:35:25	Not fully	Not fully	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The 3-Month Grace Period Trap (Regulation 108(7)): The draft allows an expired card to remain temporarily valid for a maximum of 3 months after applying for a renewal. Given South Africa's history of national printing machine breakdowns and long backlogs, if the state takes longer than 90 days to issue your card, you risk being penalised on the road through no fault of your own. Eyesight & Health Over 10 Years: Visual acuity can change significantly over a decade. Critics argue that without integrating independent optometrist eye tests into the eNaTIS system, road safety could be compromised. Potential Fee Increases: Renewal fees form a core revenue stream for municipalities and the RTMC. There is concern that authorities may double or triple the once-off cost of a 10-year card to offset the drop in renewal volumes. Exclusion of Heavy Commercial Vehicles: Codes C1, C, EC1, and EC remain on a 5-year cycle. Industry advocates note that heavy vehicle drivers already undergo medical and criminal checks every 2 years for their Professional Driving Permit (PrDP), making a separate 5-year card cycle redundant. Digital Licences & Delivery Omitted: The notice focuses strictly on the physical card, missing an immediate opportunity to roll out verifiable Digital Mobile Driving Licences (mDL) or home/office courier delivery.	Megan

Knowing there can be 6 months delay in the eventual issuing of a renewal, we wanted to make a timeous booking on your website. However, the site did not allow it, comment was : bookings will only open in July as your expiry date is November. Subsequent to that delay, there has been notice that it will indeed be extended to a 10 year validity from 2027. If I renew this year, in November as stated on my license, will I only have a 5 year validity? Or should I delay, using the six week late grace period, to make application for renewal relevant in 2027 so as to obtain the 10 year period?	Lorraine	retired
2026-08-23 09:01:46	Yes I do	Yes I do	No, it should be at least 6 months	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Frederick	retired
2026-08-23 09:02:42	Yes I do	Yes I do	No, it should be at least 6 months		It is the card that expires, not the licence. I do not have to retake a Drivers licence test after my card expires. This is just a money making racket, people are responsible enough to realise when it is no longer safe for them to drive.	Barry	self-employed

The 3-Month Grace Period Trap (Regulation 108(7)): The draft allows an expired card to remain temporarily valid for a maximum of 3 months after applying for a renewal. Given South Africa's history of national printing machine breakdowns and long backlogs, if the state takes longer than 90 days to issue your card, you risk being penalised on the road through no fault of your own. 2. Eyesight & Health Over 10 Years: Visual acuity can change significantly over a decade. Critics argue that without integrating independent optometrist eye tests into the eNaTIS system, road safety could be compromised. 3. Potential Fee Increases: Renewal fees form a core revenue stream for municipalities and the RTMC. There is concern that authorities may double or triple the once-off cost of a 10-year card to offset the drop in renewal volumes. 4. Exclusion of Heavy Commercial Vehicles: Codes C1, C, EC1, and EC remain on a 5-year cycle. Industry advocates note that heavy vehicle drivers already undergo medical and criminal checks every 2 years for their Professional Driving Permit (PrDP), making a separate 5-year card cycle redundant. 5. Digital Licences & Delivery Omitted: The notice focuses strictly on the physical card, missing an immediate opportunity to roll out verifiable Digital Mobile Driving Licences (mDL) or home/office courier delivery	Wendy	business owner

2026-08-23 11:26:23	Yes I do	No I do not	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Since the card is purely a money making scam it should be issued once and remain valid. You cant stop someone driving with an expired card since tbey are still licensed to drive so stop finding them for your little piece of plastic and its randomly assigned expiry date. The eye test machines are always broken so what is the purpose of using them anyway? People are supposedly allowed to take in an eye test from an optometrist, yet they still get made to do the test - so it doesnt reduce queue time and they must still use the broken machines - 10.people ik a row will fail on the one machine and then pass on the other one if someone has a loud enough tantrum about how the machine might be broken and the traffic department worker actually listens a.d doesnt get into a huff and refuse to help anyone else. Stop making everyone queue for the information desk first - let them join the queue for what they are there for, they can ask at the information desk if they have questions. A 3 hour queue to get the form you want is pointless. It means people have to take leave from work when they could have been done much faster and just gone in late. It means people who have children to get to school can never get into the queue as they can't stand there from four in the morning until it opens, then wait 3 hours for the info desk to hand them the form. How dare you expect people to get a temporary licence at their cost if the card machine ks broken . Who's back pocket is that money going to? If the card has expired- who cares? Just because someone managed to get their forehead and neck twisted to the way that particular machine requires it in order to pass the eye test means nothing about their ability to drive. Spend the budget and time on drivers who jump robots, plough through stop streets, stop at green robots, stop randomly after speeding through a red robot, which then goes green and they block the entire lane trying to now drive. Fine those who do u turns just before circles instead of going around the circles (and those who enter the circle, change their minds and reverse out), fine those who drive with their hazard lights on permanently because they want to claim they were indicating both left and right. If you must reissue cards, at least check people can either count to four or grasp the concept of four so that they can understand how to use a stop street or broken robot. Put an end to teaffic cops making fictitious claims that someone has done something wrong and must now bribe them to not get a fine. Put policing effort and budget into enforcing the road rules we have in place instead of bits of laminated plastic. Why must the PrDP be reissued every 2 years and not be valid as long as the card (which should never expire)? Why is a private doctor fine for this but not a private optometrist? PrDPs should be minimum 5 years, preferably 10. Employers dont give a day off for the doctor visit or the 3 hour queue for the form and the 3 hour queue to go back again for the eye test and payment. Why can't the whole lot be done on line if you insist on renewing the laminated paper? Submit the eye test and medical report online. The cards were only introduced in the first place because someone's relative needed to win a tender for printing them or whatever corruption it was going to make the funds available foe milking from. Put some effort into preventing accidents and policing the traffic laws instead of finding ways to make people queue for hours and pay money into the corruption pool.	Paul Martin

The regulation must be amended to state that an expired card remains legally valid until the new card is physically produced and collected, provided the motorist applied and paid before the original card's expiry date. The Department must standardise and mandate the real-time electronic upload of certified eye tests by registered, independent optometrists (HPCSA accredited) into the eNaTIS system, enabling drivers to complete health screenings before ever arriving at a DLTC.	Adrian	retired

2026-08-23 19:38:24	Yes I do	Yes I do	No, it should be at least 6 months		Suggested additional public-participation points Digital driver's licence — Introduce a legally recognised digital licence accessible via a secure government app. Decentralised card printing — Authorise printing at provincial/municipal centres to reduce the national backlog. Private optometrists — Allow registered private optometrists to conduct standard eyesight tests and upload results electronically. Private driving-test centres — Consider accredited private centres to supplement government testing capacity. Online applications — Allow licence renewals, replacements and address changes to be completed online. Online appointment system — Centralised real-time booking system to eliminate queues and unnecessary visits. Automatic renewals — Introduce simplified renewal procedures for drivers with clean records. Postal/courier delivery — Allow completed licences to be securely delivered to applicants. Real-time application tracking — Applicants should be able to track their application and card-production status. SMS/email notifications — Automatically notify applicants when licences are approved, printed and ready. Biometric verification — Use biometrics to prevent identity fraud and duplicate licences. Central digital database — Integrate testing, medical/optometry results, applications and licence records. Independent audit trail — Every licence transaction should generate a tamper-proof electronic record. Anti-corruption controls — Minimise discretionary human intervention in testing, approval and issuing. Cashless payments — Eliminate cash transactions at licensing centres wherever possible. Transparent service standards — Publish maximum turnaround times and measure centres against them. Performance dashboards — Publish licence backlogs, processing times and outstanding applications by centre. Private-sector partnerships — Use accredited private providers where government capacity is insufficient. Competitive procurement — Allow multiple accredited card manufacturers rather than dependence on a single supplier. Emergency/temporary licence — Issue a secure temporary digital licence immediately after successful renewal. QR verification — Include a secure QR code allowing authorised officials to verify licence validity instantly. International standards — Align South African licences with internationally recognised digital and security standards. One-stop licensing centres — Combine eye testing, application, payment and biometric capture where practical. Mobile licensing units — Use mobile units for rural areas and communities far from licensing centres. Extended operating hours — Allow selected high-volume centres to operate evenings and Saturdays. Independent complaints mechanism — Provide an easy mechanism to report delays, bribery and irregularities. Whistle-blower protection — Protect officials and members of the public reporting licensing corruption. Regular technology review — Periodically review the licensing system to prevent dependence on outdated technology. Data protection — Ensure digital licensing complies with POPIA and protects personal/biometric information. Interoperability — Link driver licensing with traffic enforcement, vehicle registration and other relevant government systems.	Cornelius	employed individual
2026-08-23 19:47:42	No I do not	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Deteriated eye sight is a valid point if one has to wait 10 years to have ones eyes tested. Increase of drivers licence fee over a 10 year period is a major concern.	Sheila	retired
2026-08-23 19:50:57	Yes I do	No I do not	It should remain valid until the new card is produced		There should be an age limit to the 10 year extension. After 80year age it should be back to 5 years as sight reduces with old age.	Gerrit

2026-08-24 06:38:39	No I do not	No I do not	It should remain valid until the new card is produced		The entire set up is simply control under duress! A driving license should be a once off, permanent Transaction,only cancelled/ terminated by death or severe bodily disablement! Every living man/ woman must have the freedom of movement/ travelling by any means available to the individual! No eye test, doctor's appointment, documentation etc, can guarantee save driving, only natural common sense, cultivated by mutual trust and respect governs that outcome! Traffic officials should be guardians and helpers, not punishers and threatening obstacles to a sovereign being! Humans make mistakes, mistakes are human! Birth certificates are permanent, death certificates are permanent, and so should a driving certificate be permanent! Errors can be corrected, miscalculation reformed, misbehavior dealt with! Yet no authority should ever threaten the freedom of travelling/driving only because of policy and finance! The human race must revisit the origins of control of one over another, and rediscover the essence of the inalienable right of creation and freedom of the sovereign,living soul! Rather then licence and control, manage and respect! Let the individual become master and architect over the complete essence of life itself, and instill basic mutual respect in daily conduct,by changing the way we interact! Man is not a robot to be controlled and oppressed, rather a product of divine creation, designed with endless capabilities if and when greater society awakens to reality! So in conclusion, issue a driving certificate once, cut all the red tape, and deal with every situation as it arises in a respectable manner! That will eliminate all cues, minimize Frustration, create trust and lift stressed financial situations, caused by current ordinance!	Eckart	self-employed

2026-08-24 10:17:00	Not fully	No I do not	Yes	Direct courier/post delivery of renewed cards to home/ work	I think all other license codes should also be included in the extension, however, there must be some sort of mechanism in place for eye tests to be conducted in between as there is a risk of people losing eyesight over the years. Further, older drivers over the age of 55 or 60 years should undergo strict eye tests between their 10 year validity period. The 3 months extension is more than enough, should that period lapse, one can apply for a temporary license.	Tebogo	employed individual

The government had an integrated services app (that actually worked); you would pay your fee through the app, get an eye test from a registered vendor (at no cost to yourself I might add), the vendor would upload the results within a day or two to the government portal, and the app would notify you that your licence was renewed. The app would also contain a digital version of your licence, but if you wanted a physical card you could go to any number of traffic police offices around the city where they had small credit card style printing machines the size of a coffee maker. The officer would input your ID number and within two minutes you had a new card. The card had all the modern anti-tampering and anti-forgery devices common these days. That is how it should be, and it is not impossible to do. However, having experienced the complete inability to even create a Home Affairs digital account because their SMS service simply doesn't work, I'm not going to hold my breath.	Richard	retired
2026-08-24 11:22:32	Yes I do	Not fully	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	in couple years time driverless vehicles shall become the norm. we need to embrace changing /evolving systems. Of what use will driver's license serve? Government must wake up to this reality of motoring change. Frankly the entire licensing system needs to be phased out/scrapped. Age and ID should be only barriers where under 18 is not allowed and where visual impairment in elderly - 75 years of age - should be restricted - not only because of sigh impairment but also because of speed and general diving abilities.	andisha	retired

2026-08-24 12:29:23	Yes I do	No I do not	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Private Optometrists The Department's own eye-testing equipment at DLTCs is frequently outdated, poorly maintained, and overused to the point of being unreliable. I was unable to pass the departmental eye test and had to get an independent optometrist assessment instead. If government wants public confidence in this process, it must either upgrade and properly maintain testing equipment at DLTCs, or formally accept independent optometrist certificates as standard practice, not an exception. Digital Cards If the goal is reducing administrative bottlenecks and aligning with international standards, a digital/mobile driving licence should be prioritised over an extended-validity physical card. A digital licence removes card printing backlogs entirely, removes the risk of loss/theft/damage, and can be updated instantly without reissuing a physical card. Enable Fully Online Licence Renewal by Integrating Independent Eye Test Results The primary reason motorists are required to physically attend a DLTC for licence renewal is the eye test. Every other part of the renewal process, payment, identity verification, address confirmation, photo capture, could be completed online or via existing digital channels. If independent optometrist eye test results were formally accepted and submitted electronically, there would be no remaining requirement for an in-person visit at all. This would eliminate hours-long queues at DLTCs, reduce pressure on already overused and outdated departmental eye-testing equipment, and free up DLTC capacity to focus on new licence applications and other services that genuinely require in-person attendance. Combined with a move to a Digital/Mobile Driving Licence (mDL), the renewal process could become almost entirely online, with the physical card (or digital equivalent) issued or couriered afterward. 2026-08-24 15:11:59	Yes I do	Yes I do	It should remain valid until the new card is produced		I feel this is the ideal opportunity for the Dept. of Transport to go digital with this change as it will free up long queues which is unnecessary in this day and age of technology. One can submit the eye test done at the optician digitally with the renewal application. Any red flags can bring the applicant in for screening to the Traffic Department. Issuing of cards should be done PROVINCIALLY and NOT only in Pretoria. Cards can be collected at the local Traffic Dept or they can be Couriered at a flat rate calculated into the new fees charged. An agreement with a few courier companies can be reached amicably. A smart app is also a good option to avoid fraud. Thank you for reading this recommendation.	Beverly	retired

2026-08-24 15:53:15	Yes I do	No I do not	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Commercial Drivers and/or drivers of Heavy-Duty Vehicles should also redo their license cards every 10 years and the PrDP must also be valid for the same period. It is an enormous financial burden on these drivers, and unfair that the highest trained drivers (versus the man in the street with NO driver training) should pay the most towards these expenses. Rather enforce better driver training and accident prevention courses to un-commercial drivers as well, to make up for all the revenue they will lose, should the PrDP's stays active for 10 years as well.	Celeste

2026-08-24 16:49:37	Not fully	No I do not	It should remain valid until the new card is produced	Decentralised printing machines across provinces to eliminate single-point-of-failure risk	### The Case Against Excluding Heavy Vehicles and Increasing Renewal Costs While extending the validity of driving licence cards for light vehicles and motorcycles from five to ten years is a welcome step towards reducing administrative burdens, the proposal is fundamentally incomplete because it excludes drivers of heavy and commercial vehicles. There is no convincing justification for treating these motorists differently, particularly where heavy-vehicle drivers are already subject to more frequent professional and medical oversight. The continued five-year renewal cycle for Codes C1, C, EC1 and EC should therefore be reconsidered. Heavy-vehicle drivers who hold Professional Driving Permits are already required to undergo periodic medical and criminal-record checks. Maintaining a separate five-year driving licence card renewal requirement creates additional bureaucracy without necessarily providing a corresponding road-safety benefit. If the objective of the reform is to reduce pressure on Driving Licence Testing Centres, queues and administrative costs, heavy-vehicle drivers should not be excluded from that relief. A more rational approach would be to separate **driver fitness and professional compliance** from the **administrative expiry of the licence card**. Medical examinations, PrDP requirements and other safety checks can continue at their existing intervals, while the physical driving licence card is given the same longer administrative validity as light-vehicle licences. This would preserve road-safety safeguards without requiring a professional driver to repeatedly renew a plastic card merely because of the class of vehicle they are licensed to drive. The proposed reform should also guard against an unintended financial consequence: **an increase in the cost of renewal**. Extending the card's validity from five to ten years should not be used as justification for doubling, tripling or otherwise substantially increasing the renewal fee. Such an approach would undermine one of the principal benefits claimed for the reform—reducing the financial and administrative burden on motorists. A ten-year card does not cost the state ten times as much to produce as a five-year card. Indeed, reducing the frequency of applications should lower the administrative burden associated with processing renewals. Any revised fee should therefore be transparent, reasonable and demonstrably linked to the actual cost of providing the service. Government should not use reduced renewal frequency as an opportunity to recover lost revenue by imposing disproportionately higher charges on each renewal. The reform should ultimately be judged on whether it makes the licensing system **simpler, fairer and more cost-effective**, rather than merely shifting costs from frequent renewals to larger once-off payments. If motorists are expected to renew their cards half as often, they should receive a genuine financial saving—not simply pay a substantially higher fee each time. The Department of Transport should therefore consider extending the longer card-validity period to heavy-vehicle licence holders while retaining the necessary medical, professional and safety requirements applicable to them. At the same time, the regulations should explicitly prevent disproportionate renewal-fee increases. The reform should reduce bureaucracy and costs for **all motorists**, rather than creating a two-tier system in which heavy-vehicle drivers remain subject to unnecessary administrative requirements and motorists are potentially charged more for the privilege of renewing less frequently.	Piet

Doubling card validity to 10 years cuts administrative traffic by roughly 50%, freeing up testing centres to focus on new driver testing, professional permits, and core road safety enforcement. A 5-year validity period is an outlier internationally. Most developed economies—including the UK, European Union member states, Australia, and New Zealand—issue driving licence cards valid for 10 to 15 years (or until age 70) without compromising road safety. 2026-08-25 11:38:56	Yes I do	No I do not	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	This seems like a great framework. It would be great if the PrDPs could be every 3 years. It is too quick to do every 2 years. There shouldn't be that much regulation on that.	Ric	
2026-08-25 11:54:15	Not fully	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work	The process to renew a driver's licence in Mbombela is disgraceful. It took 5 visits, many hours standing in the queue, several times the system was offline, the condition of the buildings is dreadful, toilets don't work, chairs look as though they came from a junk yard. No one seems to be in charge or take responsibility for the department, there is no preference given to senior citizens. Eye tests are no longer done at the testing centre, this means an additional cost to the applicant. Renewals are only done on Monday, Wednesday, Friday. Applicants take time off work which is not in the interest of the country's economy I do have a concern with senior citizens regarding eyesight and deterioration of driving ability if the cards remain valid for 10 years - I think eyes should be tested annually and driving ability tested every 5 years. In many cases it is the driver's children who recommend that they stop driving. There are 'facilitators' everywhere to help one through the process - for which the charge the applicant an additional fee.	Bridget	retired
2026-08-25 12:01:37	Yes I do	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work	I also plead with the Department of transport to remove the penalties of vehicles to driver's license. Some I won't be able to renew my driver's license because my vehicle owe the Department.	Nkululeko	unemployed individual

IN THE EARLY 80'S THERE WERE LESS ACCIDENTS THOUGH THERE WAS NO CONSTANT CHANGE OF LICENCES BIG UP TO THE DEPARTMENT	Thobi	retired
2026-08-25 18:36:40	Yes I do	Yes I do	It should remain valid until the new card is produced		1. The current system for issuing a new driver's license (a learner having passed their driving test) means that the temporary license issued at the time of passing is valid for six months. Why should the same principle not apply to renewals of driving licenses. 2. A driver should not be penalised because the Department of Transport fails to issue renewals due to their internal failures of systems and or broken printing machines. 3. Existing valid driving license cards should automatically be extended to 10 years - failure to do sonis prejuding to current holders of valid cards.	Lester	self-employed

2026-08-26 07:19:15	Yes I do	No I do not	No, it should be at least 6 months	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	It is great that the validity of licenses gets extended to 10 years, however, I would add the caveat that after a person is 75 years of age, the limit should go back to 5 years. to reflect changing health conditions, or at least have eye checks in between. If a commercial driver has to renew his PrDP every 2 years and it includes an eye test, that is sufficient and the license can be extended to 10 years. I DO NOT approve of digital licenses, as it will cause many security vulnerabilities. The decentralised printing must also be carefully done so as to avoid fraud, but it is dearly needed.	Renier	
2026-08-26 08:11:05	Yes I do	Not fully	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work		Dave	retired

2026-08-26 10:53:22	Yes I do	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The biggest concern with renewing a driver's license is the cost in time. While some companies do allow employees to take time off to do so, most require employees to apply for paid leave or to forgo payment for the time lost. During this time they are subject to unpredictable queuing times, extended licensing department staff tea and lunch breaks, and an unreliable system that can shut down without notice. Not to mention the fact that departments are often located in areas that are difficult to travel to. Anything that can reduce this time cost - 10 year renewal period, direct courier delivery, and independent optometrist eye test submissions - would be a significant improvement.	Tamsin	unemployed individual
2026-08-26 11:06:42	Yes I do	Yes I do	It should remain valid until the new card is produced	Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Sonika	retired
2026-08-26 11:08:16	Yes I do	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	There is a risk of a significant price increase. Pensioners should qualify for discount. Eye tests for this purpose should be at a reduced rate. Tender process for potential printing machines could be a corruption risk.	Yvonne	retired

The Department of Transport must establish regional/provincial printing facilities or procure redundant modern high-speed printing hardware to prevent national backlogs when equipment requires maintenance. The Department must standardise and mandate the real-time electronic upload of certified eye tests by registered, independent optometrists (HPCSA accredited) into the eNaTIS system, enabling drivers to complete health screenings before ever arriving at a DLTC. The regulations and enforcement directives must explicitly clarify to all provincial traffic authorities and SAPS that an expired card is an administrative infringement, not a criminal offence of driving without a licence. National Treasury and the Department of Transport must place a statutory cap on card renewal tariffs, ensuring that the cost-savings of reduced administrative processing are passed on to the public rather than offset by exploitative fee hikes. The final gazette must include an unambiguous transitional schedule explaining how existing valid cards will be handled during the transition to the 10-year format.	Fleur

2026-08-27 04:59:55	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	South Africa has historically relied on a single, aging, centralised printing machine to produce all driving licence cards for the entire country. Routine servicing or breakdowns have previously created backlogs of hundreds of thousands of cards. The Impact: Simply doubling the validity of cards to 10 years will not fix systemic breakdowns if production remains bottlenecked at a single national facility. Participant Recommendation: The Department of Transport must establish regional/provincial printing facilities or procure redundant modern high-speed printing hardware to prevent national backlogs when equipment requires maintenance.	Kevi	employed individual

2026-08-27 07:22:14	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I agree wholeheartedly with the move to a 10 year renewal period in line with international standards. I remain concerned with the single point of failure that is the card printing capability as this has been an issue at the past. Mitigations for this would include decentralising the card printing process and/or implementing a digital driving licence system.	Scott	employed individual

2026-08-27 08:01:07	Yes I do	Yes I do	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	It is good for normal law abiding drivers, however I think taxi's must be tested yearly as they don't know what a red robot means and they don't know what yellow lines mean and they don't know where their flickers are. They need to be tested yearly. Buses need to be tested on a 2 yearly bases as they don't know what the speed limit means. I have noticed it daily on my commutes.	Bernadine Christine	employed individual

It's totally unnecessary to have to renew a card reguarly that's only an indication that you actually have a valid drivers license. SA Government should align drivers licences with international countries. Use their requirements as a yard stick to regulate the system in SA. The present system leaves the regulation up to corruption and should be updated.	Derek	retired

2026-08-28 07:47:28	Not fully	Yes I do	Yes	Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I am concerned that the extension of driver's license renewal can have a negative effect on the quality of drivers in the country that is already riddled with unlicensed and incredibly bad drivers. A lot can happen in 10 years impeding the capability of individuals, such as worsening eyesight, cognitive impairment, natural decline in reflexes and response times. And there would be no systems in place to catch this regression for potentially 10 years. It should be an easier process to renew licenses, not an extended period before renewal. In my opinion.	Courtney	employed individual

However, to ensure public safety and smooth implementation, I urge the Department to address the following critical areas:Road Safety and Eye Health: A 10-year gap between mandatory eye tests presents a major road safety risk. I recommend introducing an interim, digitised eye-testing mechanism at the 5-year mark (for instance, via certified optometrists syncing records directly to the eNaTIS system) without requiring a full card renewal.Card Durability and Technology: The Department must ensure that the material and printing technology used for the new 10-year cards are robust enough to withstand a decade of wear and tear, avoiding unfair replacement costs for motorists due to degraded cards.Implementation Timeline: Clear, transparent timelines must be communicated immediately. Motorists should not be penalised or left in limbo with expired cards while waiting for these legislative changes to be finalised.3. ConclusionThis reform is a massive step forward for efficiency and citizen relief. Addressing these minor refinements will guarantee that the policy enhances administrative ease without compromising road safety.	Liza	employed individual
2026-08-28 20:24:13	Not fully	Not fully	Yes		I suggest that drivers without own cars can renew every 5 years, then those who own one may extended to 7 not 10.	Relebohile

2026-08-30 15:48:06	Not fully	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Eliminates Unnecessary Bureaucracy and Queue Fatigue DLTCs across South Africa are notoriously overwhelmed by routine five-year renewals. Doubling card validity to 10 years cuts administrative traffic by roughly 50%, freeing up testing centres to focus on new driver testing, professional permits, and core road safety enforcement. Direct Financial & Productivity Savings for Motorists Motorists only have to pay renewal fees, take time off work, and sit in administrative queues once every ten years instead of twice. For working families and small business owners, this translates directly into saved hours and reduced transport costs. Alignment with International Best Practice A 5-year validity period is an outlier internationally. Most developed economies—including the UK, European Union member states, Australia, and New Zealand—issue driving licence cards valid for 10 to 15 years (or until age 70) without compromising road safety. Legal Separation of the “Card” from the “Right to Drive” By explicitly stating in Regulation 101(2) that a driving licence is permanent unless cancelled or suspended, the law finally protects motorists from being treated as criminal “unlicensed drivers” simply because an administrative plastic card has lapsed. Polycarbonate Durability & Corruption Reduction Modern polycarbonate card materials are technically rated to last over a decade without delamination or fading. Furthermore, halving the renewal volume substantially disrupts the black market for corrupt online booking “slot selling” and DLTC bribery syndicates.	Zahida	self-employed

2026-09-02 10:31:55	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I fully support extending driving licence card validity from 5 to 10 years for private motorists and motorcyclists, as it aligns South Africa with international best practice and significantly eases congestion at DLTCs. I also agree with maintaining the 5-year cycle for heavy commercial vehicles and 2-year PrDP renewals to prioritize public transport and road safety. However, a 3-month grace period is insufficient to shield motorists from administrative backlogs; expired cards should remain legally valid until the replacement card is produced and delivered. To permanently resolve systemic delays, the Department must integrate digital driving licences (mDL), allow direct courier delivery, accept eye tests from registered independent optometrists, and decentralise card printing infrastructure across provinces.	Susan

2026-09-02 11:09:13	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Elize	employed individual
2026-09-02 11:22:21	Not fully	Yes I do	No, it should be at least 6 months	Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I do not approve of any digital licencing (including IDs). The extended period is going to result in increased costs and will not ease the situation. What is the hold up to purchase the necessary number of printing machines to facilitate smoother roll out? That will certainly ease this situation and the powers that be ensure that there are properly trained operators who are capable of maintaining these machines.	Jacqui	self-employed
2026-09-02 11:38:01	Not fully	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Decentralised printing machines across provinces to eliminate single-point-of-failure risk		Babongile	business owner
2026-09-02 11:39:09	Yes I do	No I do not	It should remain valid until the new card is produced	Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The Legal Clause: Under proposed Regulation 108(7), an existing card remains valid after expiry until a new card is issued, but for no longer than three months. The Core Issue: Given South Africa's history of card machine breakdowns, network offline errors at DLTCs, and postal/distribution backlogs, card production frequently exceeds 90 days. If the Department of Transport or the Card Production Facility delays production past 3 months, motorists become technically unlawful on the road through no fault of their own, forcing them to purchase unnecessary temporary licences or risk roadside fines. Participant Recommendation: The regulation must be amended to state that an expired card remains legally valid until the new card is physically produced and collected, provided the motorist applied and paid before the original card's expiry date. The Legal Principle: Regulation 101(2) affirms that the driving licence itself is indefinite unless cancelled or suspended. However, roadside traffic enforcement officers frequently issue criminal fines or threaten impoundment solely for possessing an expired card. The Impact: Citizens are penalised as "unlicensed drivers" when they are merely holders of an administrative card that has lapsed. Participant Recommendation: The regulations and enforcement directives must explicitly clarify to all provincial traffic authorities and SAPS that an expired card is an administrative infringement, not a criminal offence of driving without a licence. The Legal Clause: Regulation 108(5)(a)(ii) keeps heavy commercial vehicles, buses, and articulated trucks on a 5-year renewal cycle. The Argument: Commercial drivers are already subject to the Professional Driving Permit (PrDP) requirement under Regulation 115, which mandates medical checks and criminal background screenings every 2 years. The Redundancy: Forcing commercial drivers and logistics operators to maintain 5-year card renewals on top of 2-year PrDP renewals adds unnecessary red tape and administrative overhead to the transport and supply chain sectors. Participant Recommendation: Allow commercial vehicle licence cards (Codes C/EC) to align with the 10-year standard for the physical card itself, while keeping the 2-year PrDP requirement strictly focused on health and background fitness The Financial Concern: DLTC renewal fees generate significant revenue for municipal licensing authorities and the Road Traffic Management Corporation (RTMC). By halving the frequency of renewals from every 5 years to every 10 years, state entities stand to collect fewer total renewal transactions over time. The Threat: There is a strong likelihood that authorities will attempt to double or substantially increase the once-off cost of renewing a 10-year licence card to compensate for the lost transaction volume. Participant Recommendation: National Treasury and the Department of Transport must place a statutory cap on card renewal tariffs, ensuring that the cost-savings of reduced administrative processing are passed on to the public rather than offset by exploitative fee hikes.	Chris	retired

However integration of dedicated optometrists into the system should keep one's eligibility to drive. So, the most painful part of licence renewals is waiting in queues. I propose that there is no need to even visit a licensing dept to renew. KEEP the original card. With original issue date; be sent a reminder to renew one's self on the system by getting an eye test done. Never to see the new side of the dept again. The same with heavy duty drivers. They MUST keep their medical up to date. Eliminate the nightmare of queues forever.	Anne

2026-09-04 16:08:15	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Driving license renewals are such an annoyance, but I can understand why it could be necessary, to make sure that people are still alive, and can still see/drive. It still feels like a money making scheme, especially as I saw comments from traffic minister that fees will have to be increased once doing the 10 year validity period, which absolutely goes against the reasoning of having licence cards. I trust the cost will remain the same, seeing that the process stays the same, it's literally just changing a date from 5 years to 10. More impactful would be to have the applications/renewals process made simpler, as it's been a very hit and miss process over the years.	Paul	employed individual
2026-09-04 16:31:13	Yes I do	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	In the past once you passed your drivers, you had your drivers licence in your green ID book - forever! Then government started wanting to make money everywhere at every point possible from the SA taxpayers. Now every 5 years we must stand in long rows, waste time and take time out of work to renew and pay for a licence just to be renewed, do eye test etc. If government wanted to play with the rest of the world and follow the 1st world pied piper - then it should have been 10 years from the very word go. Better still, you should just have to have your eyes tested every 10 years and submit your test results online to be updated to your drivers licence that you technically already have for life after doing your drivers test and passing. Once your eye test fails, then your drivers licence should follow the process, as then you are not safe to be driving on the roads at all.	Karen	self-employed
2026-09-04 16:58:57	Yes I do	Not fully	It should remain valid until the new card is produced	Integration of independent optometrist eye test submissions	The eye testing equipment currently used is outdated, unserviced and sometimes in disrepair. The eye testing machines are not compatible with the various eye sight correction surgeries performed to correct vision, so are unable to perform accurate tests. eg to correct cataract surgery surgeons perform a correction called Monovision which is a vision correction technique where one eye is corrected for distance vision and the other eye is corrected for near vision. The brain then compensates giving the person in normal light 20/20 visiion. Using the exsisting eye test method is pointless as the brain is unable to compensate for what would be seen normally. A specialist confirmation is also not accepted by the traffic department and one has to visit the traffic departments optometrist in order for them to accept the specialists report. Wastes time of both the individual and the traffic departments employees.	Les	retired

2026-09-08 10:00:39	Yes I do	Yes I do	No, it should be at least 6 months	Direct courier/post delivery of renewed cards to home/ work, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I MOSTLY SUPPORT this 10 year extension proposal on driving licenses and the associated elements. I SUPPORT the extension to 10 years, as it is a costly exercise for motorists to do all the time, it takes forever for drivers license cards to be printed due to STate SOE incompetance and your SINGLE machine breaking down all the time and the corruption around that, and that 10 years is a common term in a lot of other countries. I SUPPORT that Commercial and Public Transport licenses should be only 5 years, because they are operating potentially disastrous big and heavy machines that ought to require a higher level of responsiblility and oversight, such as for buss drivers or heavy truck drivers. We already have such bad drivers and crashes and problems with these sort of vehicles, that these must not be extended to 10 years. I SUPPORT DECENTRALIZED PRINTING OF LICENSES across a few provinces, to eliminate this single point of failure and extreme delay. You the government should need to pay a fine for every day late a license is printed! This is nonsense, and your failure to operate decently is an incentive to the illegal fake driving license and fraud. It needs to be EASIER to get a license printed than it is to get a fake one! You need to INCENTIVISE GOOD behaviour, and PUNISH BAD. NOT the other way round! I PROPOSE AMMENDMENT that TAXIS are explicity named and INCLUDED in the RESTRICTION TO 5 YEARS LICENSES. Taxis are the most dangerous vehicle on the road and you need the heavy hand of the LAW to come down on these wretched careless evil selfish monsters!!	Oliver	self-employed
2026-09-08 10:50:03	Yes I do	Yes I do	No, it should be at least 6 months			Bennie	retired
2026-09-08 11:36:31	Yes I do	No I do not	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The current process is cumbersome and a total waste of time and productivity. The government is unable to manage these renewals and the extended period will reduce the stress on their systems.	Mark	retired

2026-09-08 15:19:40	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I do believe that persons over the age of 60 should test earlier. If your card expires between 60-65, you must test every 3-5 years. This is because the health of older persons deteriorates faster than younger people. If you have done your license, you have the ability to drive. But eyesight and other health problems is obviously a concern.	Gert	employed individual

2026-09-08 22:14:54	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	I support the proposal to extend the validity period of ordinary driving licence cards for private motorists and motorcyclists from five years to ten years. The current five-year renewal cycle creates unnecessary administrative pressure on licensing centres, motorists and the card production system. Extending the validity period to ten years should reduce queues, processing volumes and administrative costs while still maintaining an appropriate system of licence control. I also support retaining shorter validity periods for commercial and professional driving requirements where additional oversight is justified by the greater public-safety responsibilities associated with professional driving. However, I do not support limiting the validity of an existing card to only three months after expiry where the driver submitted a valid renewal application before the expiry date. Where a motorist has completed the renewal process on time, the existing driving licence card should remain legally valid until the replacement card has been issued or made available. A motorist should not become non-compliant because of delays in card production or administration that are outside their control. I strongly support the introduction of a secure digital driving licence. A digital driving licence should become an official and legally recognised credential that can be securely verified by traffic authorities, SAPS and other authorised parties. This should not merely be a photograph or electronic copy of the physical card, but a secure digital credential capable of being validated against the national licensing system. Introducing digital driving licences could significantly reduce reliance on physical card production, reduce replacement-card applications, lower administrative and printing costs, reduce queues and provide motorists with faster access to an updated licence after renewal. Where a renewal has been approved, the digital licence should be updated immediately instead of requiring the motorist to wait for the physical card to be manufactured. Physical driving licence cards should nevertheless remain available for motorists who require or prefer them, including people who do not have access to a suitable smartphone and motorists who may require a physical licence when travelling internationally. I also support: * electronic submission of eyesight test results by registered optometrists; * optional courier or postal delivery of physical driving licence cards; * decentralised card production to reduce dependence on a single printing facility; and * greater use of secure online renewal and licensing services. Any renewal fees associated with a ten-year licence should remain reasonable and cost-reflective. The renewal fee should not simply be doubled because the validity period is doubled. A longer renewal cycle and increased use of digital licences should reduce the administrative cost per motorist over time, and those efficiencies should ultimately benefit the public. In summary, I support the extension of ordinary driving licence card validity to ten years, provided that the final system also includes: * legal protection for motorists who renew before expiry; * secure digital driving licences; * continued availability of physical cards; * modernised eyesight-testing and delivery processes; * decentralised card production; and * reasonable, transparent and cost-reflective renewal fees. My position is therefore: Support with amendments.	Juan	employed individual

2026-09-09 15:19:37	Yes I do	Not fully	No, it should be at least 6 months	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Regarding the non- extension of heavy commercial vehicles and public transport operators and PRDPs I do not fully agree because not all people holding those licenses are in the commercial or transpot sector and suggest that only those who are in those sectors remain unchanged but those who are not be extended to 10 yrs and the PDP to 5 yrs instead of the normal two years. The eye tests should be checked on the road for those who are driving and non-drivers can submit by hand or electronically. Digital /Mobile driving licences should be optional for those who are highly technological but not compulsory and the one of posting and courier of licenses should be a once- off thing depending on what the person would have chosen but if not successful they should go fetch from the center itself.	Nthabiseng	unemployed individual
2026-09-09 18:33:08	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	This will cut down on cueing for hours at renewal centres every five years. Time equals MONEY! Modern polycarbonate card materials are technically rated to last over a decade without delamination or fading. Furthermore, halving the renewal volume substantially disrupts the black market for corrupt online booking “slot selling” and DLTC bribery syndicates.	Marietjie	retired

My reason is that eyesight deteriorates as people age and it's dangerous to allow elderly people to continue driving without having their eyes tested. Many people are responsible and will have their eyes tested privately but many, who perhaps can't afford to have it done , will continue to drive and be a hazard on the roads.	Rosemary

2026-09-13 11:08:55	Yes I do	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Since my driving licence is valid for life unless officially suspended, the plastic card should never "expire" as it is merely proof of possession of a driving licence. The continual replacement of the plastic cards is simply to bring in revenue for municipalities and the RTMC. Extending card replacement to every 10 years would be more acceptable ONLY IF independent eye tests are incorporated in the card renewal process, as eyesight can deteriorate and compromise road safety. Pensioners and the unemployed and others are often unable to produce the escalating renewal fee, and therefore the fee should in fact be brought way down. Government is sucking this country's citizens' lifeblood, and this card system is but one example of that.	Jean	retired

2026-09-14 04:56:24	Yes I do	Yes I do	It should remain valid until the new card is produced		Eliminates Unnecessary Bureaucracy and Queue Fatigue DLTCs across South Africa are notoriously overwhelmed by routine five-year renewals. Doubling card validity to 10 years cuts administrative traffic by roughly 50%, freeing up testing centres to focus on new driver testing, professional permits, and core road safety enforcement. Direct Financial & Productivity Savings for Motorists Motorists only have to pay renewal fees, take time off work, and sit in administrative queues once every ten years instead of twice. For working families and small business owners, this translates directly into saved hours and reduced transport costs. Alignment with International Best Practice A 5-year validity period is an outlier internationally. Most developed economies—including the UK, European Union member states, Australia, and New Zealand—issue driving licence cards valid for 10 to 15 years (or until age 70) without compromising road safety. Legal Separation of the “Card” from the “Right to Drive” By explicitly stating in Regulation 101(2) that a driving licence is permanent unless cancelled or suspended, the law finally protects motorists from being treated as criminal “unlicensed drivers” simply because an administrative plastic card has lapsed. Polycarbonate Durability & Corruption Reduction Modern polycarbonate card materials are technically rated to last over a decade without delamination or fading. Furthermore, halving the renewal volume substantially disrupts the black market for corrupt online booking “slot selling” and DLTC bribery syndicates.	Steven	self-employed

2026-09-14 13:54:24	Yes I do	Not fully	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The regulation of public transport and heavy vehicles in SA is full of corruption and bribery, as many cases of clearly not road worthy minibus taxis are a regular daily sight on our roads. By allowing these licences also to be valid for 10 years remove 50% of the opportunity for corruption to take place. Minister of Transport should rather focus and enforce with strict penalties the owners and drivers of public or commercial transport who are caught with un road worthy vehicles on the roads. This enforcement is important and a total failure currently.	Jasper

2026-09-16 09:37:26	No I do not	Yes I do	Yes	Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Why does the government continue to create regulations to make life easier for itself without resolving the problems that it creates? This idea of creating 10 year driving licences is yet another example. The current driving licence system is hugely corrupt. I make this claim by observing the hich percentage of road users that do not understand the basic rules of the road - in other words, drivers that clearly could never have passed a formal quality managed driving test. Corruption is known to be rife throughout all government departments and introducing long term licencing is a diversion from the core problems of illegal licencing of the people and the refusal of the government to introduce annual vehicle safety testing. These two internationally accepted requirements, in civilised societies, would resolve many issues related to traffic congestion and our high road death tolls. Focus on solving major governmental problems and not on making life easier for our over populated and over paid governmental departments.	David	retired

Doubling card validity to 10 years cuts administrative traffic by roughly 50%, freeing up testing centres to focus on new driver testing, professional permits, and core road safety enforcement. Direct Financial & Productivity Savings for Motorists Motorists only have to pay renewal fees, take time off work, and sit in administrative queues once every ten years instead of twice. For working families and small business owners, this translates directly into saved hours and reduced transport costs. Alignment with International Best Practice A 5-year validity period is an outlier internationally. Most developed economies—including the UK, European Union member states, Australia, and New Zealand—issue driving licence cards valid for 10 to 15 years (or until age 70) without compromising road safety. Legal Separation of the “Card” from the “Right to Drive” By explicitly stating in Regulation 101(2) that a driving licence is permanent unless cancelled or suspended, the law finally protects motorists from being treated as criminal “unlicensed drivers” simply because an administrative plastic card has lapsed. Polycarbonate Durability & Corruption Reduction Modern polycarbonate card materials are technically rated to last over a decade without delamination or fading. Furthermore, halving the renewal volume substantially disrupts the black market for corrupt online booking “slot selling” and DLTC bribery syndicates.	Antoon	self-employed

2026-09-25 14:39:46	Yes I do	Yes I do	Yes	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	Comment on the draft amendments to the National Road Traffic Regulations, 2000: driving licence card validity (Government Gazette 55205) I support these amendments. Extending the validity of Code A, A1, B and EB licence cards from 5 to 10 years will cut down on queues, repeat visits and costs for motorists. It will also free up capacity at licensing centres that are already stretched. I welcome the clear statement that a driving licence is valid indefinitely unless it is suspended or cancelled, and that only the card needs renewing. I also support the grace period for motorists who apply before their card expires. People shouldn't be penalised for card production delays outside their control. Given past card backlogs, I'd ask the Department to consider extending the grace period if production delays go beyond 90 days.	Michael	employed individual

The proposed 3-month validity extension after card expiry is insufficient to cover potential processing backlogs or card printing delays and should be extended to 6 months until such time as operational inefficiencies are resolved by means of smarter digital solutions and the integration of independent optometrists, improved logistics of driver's license card deliveries, and the decentralization of card printing capabilities. 2026-09-28 08:14:00	Yes I do	Yes I do	No, it should be at least 6 months	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	The Modernisation Opportunity: While extending physical card validity is a positive step, international best practice is moving toward digital mobile driving licences (mDL) accessible directly through verified smartphone apps. The Convenience Gap: South Africans are still required to take physical time off work to stand in queues twice: once to apply, and once to collect the printed plastic card. Participant Recommendation: Government should accelerate the deployment of verifiable digital licences on mobile devices and implement optional direct courier delivery of physical cards to homes or workplaces. The Issue: South Africa has historically relied on a single, aging, centralised printing machine to produce all driving licence cards for the entire country. Routine servicing or breakdowns have previously created backlogs of hundreds of thousands of cards. The Impact: Simply doubling the validity of cards to 10 years will not fix systemic breakdowns if production remains bottlenecked at a single national facility. Participant Recommendation: The Department of Transport must establish regional/provincial printing facilities or procure redundant modern high-speed printing hardware to prevent national backlogs when equipment requires maintenance. The Issue: Under the 10-year regime, a driver’s eyesight will only be checked once a decade at a DLTC. Furthermore, DLTC eye-test equipment is notoriously faulty, outdated, or subject to long queues and subjective examiner testing. The Impact: Road safety relies heavily on driver visual acuity, especially at night. Forcing motorists into queues just for a basic eye chart test slows down the entire centre. Participant Recommendation: The Department must standardise and mandate the real-time electronic upload of certified eye tests by registered, independent optometrists (HPCSA accredited) into the eNaTIS system, enabling drivers to complete health screenings before ever arriving at a DLTC. The Legal Principle: Regulation 101(2) affirms that the driving licence itself is indefinite unless cancelled or suspended. However, roadside traffic enforcement officers frequently issue criminal fines or threaten impoundment solely for possessing an expired card. The Impact: Citizens are penalised as “unlicensed drivers” when they are merely holders of an administrative card that has lapsed. Participant Recommendation: The regulations and enforcement directives must explicitly clarify to all provincial traffic authorities and SAPS that an expired card is an administrative infringement, not a criminal offence of driving without a licence. The Financial Concern: DLTC renewal fees generate significant revenue for municipal licensing authorities and the Road Traffic Management Corporation (RTMC). By halving the frequency of renewals from every 5 years to every 10 years, state entities stand to collect fewer total renewal transactions over time. The Threat: There is a strong likelihood that authorities will attempt to double or substantially increase the once-off cost of renewing a 10-year licence card to compensate for the lost transaction volume. Participant Recommendation: National Treasury and the Department of Transport must place a statutory cap on card renewal tariffs, ensuring that the cost-savings of reduced administrative processing are passed on to the public rather than offset by exploitative fee hikes. The Issue: There is significant public confusion regarding whether existing 5-year cards currently sitting in motorists’ wallets will automatically be extended to 10 years, or if drivers must wait until their scheduled expiry date to obtain a new 10-year card. The Impact: Lack of clear transitional provisions could spark confusion at roadside checkpoints and insurance dispute claims in the event of accidents. Participant Recommendation: The final gazette must include an unambiguous transitional schedule explaining how existing valid cards will be handled during the transition to the 10-year format. 2026-09-28 15:34:05	No I do not	Yes I do	It should remain valid until the new card is produced	Integration of independent optometrist eye test submissions	We all know that a renewal of a driving licence is only an eye test. Your driving ability and attitude are not tested at all. Given the above the practical solution to the issue of a renewed driver's licence to be practical, cheap and streamlined is easy and quick by following the follwing steps: a) All drivers must be able to prove that their eyesight is above board. b) When called for by a traffic officer a driver must be able to show an original driver's licence or latest renewed licence together with a valid eyesight certificate being issued by a certified optometrist less than five years ago. The latter could be kept in the motorvehicle's cubbyhole to be att hand for immediate inspection when asked for by the traffic officer. c) The proposed solution requires no excessive expensive eye testing equipment at licencing offices nor printing of drivers' licences machines to be sent to Germany for repairs. The first timers of an estimated million pa drivers' licences must still be attended to, but the "eyetesters" drivers' licences applications of approximately five million have automatically been privatised towards a higher standard of eye testing (good for road safety) with the introduction of the above proposal towards renewal of drivers' licences. d) Eyesight within elderly people (above 65) can deteriorate quite fast. Thus the current proposal of existing drivers' licencences to be valid for ten years instead of five is unacceptable. e) The only negative I can think of re the above proposal is the loss of revenue payable for renewing licences at licencing offices. This could easily be recovered with a small increase in increasing road traffic fines. Such an increase may be a deterrent for road users not to contravene road rules and drive more safely. Thus it could be a plus and only the bad users pay for the loss in renewing licences' revenue.	Wouter	retired

2026-10-01 22:36:07	Yes I do	Yes I do	It should remain valid until the new card is produced	Direct courier/post delivery of renewed cards to home/ work	I support extending the validity of driving licence cards for private motorists and motorcyclists from 5 to 10 years. It halves the number of renewals, cuts queues at licensing centres and saves motorists time and money. Keeping heavy vehicles on 5 years and professional driving permits on 2 years is reasonable for public safety. The grace period should not be a fixed 3 months. Motorists have repeatedly been left with expired cards through no fault of their own because of printing backlogs and machine breakdowns. A licence should stay valid until the new card is produced and available for collection, as long as the renewal application was made before the old card expired. I also ask the Department to: - allow eye tests by registered optometrists to be submitted electronically with the renewal; - offer reliable online booking and renewal; - set up card printing in more than one place so one machine failure does not stop the whole country; - keep the renewal fee in line with the old 5-year fee, so that motorists actually benefit from the change.	Ockert	employed individual

The Convenience Gap: South Africans are still required to take physical time off work to stand in queues twice: once to apply, and once to collect the printed plastic card. Participant Recommendation: Government should accelerate the deployment of verifiable digital licences on mobile devices and implement optional direct courier delivery of physical cards to homes or workplaces.	Phillipa	business owner

Jeanette	employed individual
2026-10-11 21:44:04	Yes I do	Yes I do	It should remain valid until the new card is produced	Digital / Mobile Driving Licences (mDL) via smart app, Direct courier/post delivery of renewed cards to home/ work, Integration of independent optometrist eye test submissions, Decentralised printing machines across provinces to eliminate single-point-of-failure risk	When you receive a matric certificate/ degree certificate it is permanent, they do not have re-issue the certificate every 3/5 years. When you pass your drivers licence it is also permanent, why must they re-issue the card (certificate) every3/5 years AND you must pay for it. Just another money making process from the government	Lodewyk
